

Update for Home Health Glucose Testing Equipment and Supplies

Information posted July 9, 2010

This is a correction to an article titled "Revised Documentation Criteria for Home Health Glucose Testing Equipment and Supplies," which was published on this website on November 6, 2009, and in the January/February 2010 *Texas Medicaid Bulletin*, No. 227.

Certified nurse midwives were incorrectly left off the list of authorized prescribing providers. Authorized prescribing providers for glucose testing equipment and supplies include physicians, physician assistants, nurse practitioners, clinical nurse specialists, and certified nurse midwives.

For more information, call the TMHP Contact Center at 1-800-925-9126.
