New Long Term Care Computer-Based Training and Updates Now Available

Information posted December 21, 2011

The Texas Medicaid & Healthcare Partnership is now offering new computer-based training (CBT) for Long Term Care (LTC) Community Services Waiver Programs providers, and for LTC Nursing Facility/Hospice providers. These two new CBTs are available on the TMHP website.

The LTC Community Services Waiver Programs and the LTC Nursing Facility/Hospice CBTs are divided into individual modules. This allows providers to directly access specific topics based upon their individual needs.

The new CBTs provide online, on-demand training information so providers can learn the LTC Online Portal functions, including all tasks required for successful submission of assessments, and any applicable forms or screenings for Nursing Facility/Hospice providers.

Additionally, the LTC TexMedConnect for Long Term Care Providers Training CBT has been updated.

Providers can view these CBT materials through the TMHP Learning Management System (LMS). The LMS home page can be accessed directly at http://learn.tmhp.com.

Users must have a User Name and Password to access CBTs on the LMS. To obtain a User Name and Password, providers must create an account by clicking on the Registration link at the top left-hand corner of the LMS home page. After creating an account, providers can access all available CBT materials in the LMS.

For more information, contact the LTC Help Desk at 1-800-626-4117, Option 1.
