

STAR and STAR+PLUS Providers Must Ensure OPL Information Is Current

Information posted January 31, 2012

Medicaid providers who have contracted with STAR and STAR+PLUS Medicaid managed care organizations (MCOs) or children's Medicaid dental services organizations for the Medicaid managed care expansion effective March 1, 2012, must have their current provider information on the Online Provider Lookup (OPL) portion of this website. The information on the OPL must match the information that was provided to the MCOs when the provider was completing the contracting and credentialing process for inclusion in the MCO provider network. Providers must have a Texas Provider Identifier (TPI) number for each location that will be listed in the MCO provider directories.

Providers can update their information by logging into their provider account on this website.
