PASRR Level 1 (PL1) Screenings Converted from Previous Screenings and Assessments

Information posted June 18, 2013

Beginning June 17, 2013, Preadmission Screening and Resident Review (PASRR) PL1 Screenings that were converted from PASARR Screenings and applicable Minimum Data Set (MDS) assessments will be available in the LTC Online Portal system.

Providers will be able to find these PL1s by using Form Status Inquiry (FSI) and searching for PL1s with a status of either Individual Placed in NF (which indicates a Positive PASRR screening for an individual in the NF) or Negative PASRR Eligibility (which indicates an individual in the NF who did not meet the criteria for Positive PASRR screening). All converted Screenings will have a Date of Assessment before May 25, 2013, and a system-generated note in the History trail that states “The PASRR Level 1 Screening has been created from an MDS Assessment (or PASRR Screening) on file that has the following DLN: XXXXXXXXXXXX mm/dd/yyyy h:mm:ss.”

Local Authorities (LAs) will have a six-month grace period to complete PASRR Evaluations (PEs) for these individuals whose PL1 is in status Individual Place in NF. PE’s are not required for PL1’s in status of Negative PASRR Eligibility. The six-month time period begins on the PL1’s creation date. DADS will provide oversight and monitoring of this process for IDD and MI PE completion.

Information about FSI and submitting a PE can be found in the Long Term Care Local Authorities Preadmission Screening and Resident Review (PASRR) Workshop User Guide, which is available on this website. Click here to read the User Guide. Providers can also review the training workshop video on the Learning Management System (LMS) at http://learn.tmhp.com.

Contact TMHP 1-800-626-4117 for questions about claim submissions, PL1 and PE submission error messages, or status questions.
