New Web Page Designed to Help with Managed Care Questions

Information posted February 12, 2015

With the managed care change that will happen March 1, 2015, the Department of Aging and Disability Services (DADS) knows that providers may have questions.

To make it easier for Nursing Facility providers to direct their questions to the correct parties, DADS has added a “Provider Inquiries” page to its Nursing Facility managed care site. The page includes web addresses and telephone numbers where providers can direct questions on topics ranging from resident enrollment to billing to admission and discharges.
