Learning Management System Upgrade on June 1, 2015

Information posted May 14, 2015

On June 1, 2015, TMHP will upgrade its Learning Management System (LMS). The upgraded LMS will include many new features, including, but not limited to, the following:

- Ability to view most computer-based training (CBT) courses on a mobile device, such as an iPhone, Android phone, or a tablet device (Flash is no longer required to view CBTs)
- Faster login and content access
- Featured and recommended courses
- Access to enrollment and history records for all completed courses
- Ability to pause and restart a CBT course without having to start over from the beginning
- Large course modules have been broken down into smaller modules that can be accessed individually
- Feedback surveys will be available for all courses.

Providers who have an existing LMS account must create a new one on the upgraded site once it’s available. Providers should watch for additional information about the LMS upgrade on this website.

For more information, call the Long Term Care Help Desk at 1-800-626-4117, Option 1.
