Important Changes June 1, 2015, for Provider Agencies Using DADS EVV

Information posted May 26, 2015

The Department of Aging and Disability Services (DADS) has been working with Sandata Technologies, LLC, (Sandata) to ensure that provider agencies who currently have data in the Sandata Electronic Visit Verification (EVV) system (Santrax) will continue to have access to that data after May 31, 2015, to complete visit maintenance and to run reports in Santrax.

Provider agencies will see many changes to the Santrax system beginning June 1, 2015. DADS urges provider agencies to go to [www.dads.state.tx.us/evv/news.cfm](http://www.dads.state.tx.us/evv/news.cfm) now to learn about important details on the particular aspects of EVV services that will continue to be available through Sandata; how long those services will be available; and steps provider agencies must take now to prepare for changes they will experience effective June 1, 2015.

Visit [www.dads.state.tx.us/evv/news.cfm](http://www.dads.state.tx.us/evv/news.cfm) and read the information under “DADS EVV Data Access for Provider Agencies” for more information regarding this alert.
