8578 Intellectual Disability/Related Condition (ID/RC) Assessment Purpose Code 3

Information posted September 9, 2015

In preparation for the *International Classification of Diseases, Tenth Revision* (ICD-10) implementation beginning on September 9, 2015, providers will be required to complete the fields below prior to entering the diagnosis code(s):

- Field 8 “Medicaid No.;”
- Field 73 “Care ID;” and
- Field 58a “Would you like to renew on the individual’s regular assessment cycle?”

This is required to allow for diagnosis code version validation and to avoid system errors that will prevent the submission of the purpose code 3.

If these three fields are not completed prior to entering the diagnosis code(s) the form will display the following error message:

- Enrollment Data: 58a – “Would you like to renew on the individual’s regular assessment cycle?” is required before entering Diagnosis Code.
- Prov/Individual Info: 8 – “Medicaid No” is required before entering Diagnosis Code
- Prov/Individual Info: 73 – “Care ID” is required before entering Diagnosis Code

Resolving this error requires that these three fields are answered for the Long Term Care (LTC) Online Portal to make a proper diagnosis code validation.

For more information, call the LTC Help Desk at 1-800-626-4117, Option 1, and then Option 4.
