Issue with Some PASRR Evaluation Forms Being Rejected for Position of Alpha Characters in ICD-10 Diagnosis Codes is Now Resolved

Information posted October 9, 2015

The issue that prevented submission of some Preadmission Screening and Resident Review (PASRR) Evaluations (PEs) due to more than one alpha character entered in the first seven positions of the *International Classification of Diseases, Tenth Revision* (ICD-10) diagnosis code has been resolved.

Providers should now be able to successfully submit PASRR Evaluations (PEs).

TMHP apologizes for any inconvenience.
