STAR+PLUS Medicare-Medicaid Plan (MMP) Effective March 1, 2015

Information posted March 4, 2016

The STAR+PLUS Medicare-Medicaid Plan (MMP) is a demonstration project that became effective March 1, 2015, for members residing in the community and August 1, 2015, for those residing in a nursing facility. The project will prompt managed care plans to oversee both the Medicare and Medicaid responsibility for dual eligible clients.

A beneficiary participating in the demonstration receives both Medicare and Medicaid coverage, including Part D prescription drugs from a single, integrated MMP. Eligible individuals will have access to a network of medical, behavioral health, and supportive services, including acute care services covered under Medicare and long term care services under Medicaid through one MMP. Clients can locate MMP participating providers through the Online Provider Lookup.

**Note:** Nonemergency medical transportation (non-ambulance), hospice and Preadmission Screening and Resident Review (PASRR) are paid consistent with current program policies. This program is not the STAR+PLUS Program and does not replace the STAR+PLUS Program, which will continue.

Certain beneficiaries will be transferred out of STAR+PLUS in some counties and into this demonstration program for dual eligible participants.

**Eligible Participants**

Only clients enrolled in Star+Plus who are 21 years of age or older, receive Medicare Part A, B and D and receiving full Medicaid benefits, do not have third-party insurance (other than Medicare and Medicaid), and reside in one of the following six designated counties can participate in the demonstration program: Bexar, Dallas, El Paso, Harris, Hidalgo, or Tarrant.

Specific plan codes located in the managed care section of a client's eligibility file have been created to identify MMP clients.

**Medicaid Managed Care Organizations (MCOs) Participating in the Program**

Providers can visit the following link for a list of the participating MCOs:
