

October 2018 Texas NDC-to-HCPCS Crosswalk Now Available for Clinician-Administered Drug Processing

Information posted October 26, 2018

The monthly [Texas National Drug Codes \(NDC\) to Healthcare Common Procedure Coding \(HCPCS\) System Crosswalk](#) is now available for clinician-administered drug processing.

The NDC-to-HCPCS Crosswalk identifies relationships between National Drug Codes and Medicaid payable Healthcare Common Procedure Coding System codes. The crosswalk is published monthly, based on quarterly additions to the Centers for Medicare & Medicaid Services list of rebate-eligible drugs and new drugs added monthly to the First Data Bank pricing compendia. The crosswalk is intended to assist providers with accurate claims submission.

More information about clinician-administered drug processing is available on the Texas Vendor Drug Program website.
