Providers Must Update Permissions to Use the New PCSP Form

Information posted January 30, 2019

The new PASRR Comprehensive Service Plan (PCSP) form is available. The new PCSP form replaces the Interdisciplinary Team (IDT) Meeting and PASRR Specialized Services (PSS) forms.

Nursing Facility (NF) and Local Authority (LA) Long Term Care (LTC) Online Portal administrators will need to add both **PCSP Viewer** and **PCSP Submitter** permissions for their LTC Online Portal users to be able to successfully view and submit the PCSP form. Managed care organization (MCO) providers who want to view the PCSP form will only need to add the **PCSP Viewer** permission.

Go to **My Account**, select **Modify Permissions**, and select one or both of the PCSP check boxes on the right-hand side. The PCSP form has security access based on user type.

After checking the **PCSP Viewer** and/or **PCSP Submitter** box, administrators will need to click **Update Permissions** to apply the changes.
Providers can refer to an article titled, “Update: New PASRR Comprehensive Service Plan Form Available for LA and NF Providers on January 26, 2019,” which was published on this website on December 28, 2018.
