Update to 2020 is a Leap Year Impacting CLASS and DBMD Waivers

Information posted March 1, 2019

The year 2020 is a leap year. This impacts individual plans of care being written now for CLASS and DBMD IPCs that include this extra day of February 29, 2020. This is an update to the initial alert released on February 27, 2019.

To ensure adequate service authorizations, service planning teams must ensure an IPC accounts for this extra day and have 366 days on the plan.

All CLASS and DBMD IPCs must have an effective period beginning on the first of a month.
