

New EVV Provider Data Validation Process - Improves Quality

Information posted April 1, 2019

Effective **April 1, 2019**, the Texas Health and Human Services Commission is implementing an Electronic Visit Verification provider data validation process for all contracted providers required to use EVV. This new process will improve data quality by standardizing EVV data within the Vesta® EVV system, which will help reduce data element errors on visits.

For more information, refer to the [complete EVV provider data validation process](#).

For questions regarding this alert, contact [HHSC EVV Operations](#).
