

# **Providers to Gain Access to Medicaid Client Medical and Dental Health Information Through myAccount**

Information posted May 31, 2019

Effective July 1, 2019, access to Medicaid client medical and dental health information will be available through myAccount for providers or their delegates. These providers must have attestation, to be renewed yearly, on file to view this information.

Providers can access Medicaid client health information by:

- Logging into myAccount on the Online Provider Lookup (OPL)
- Logging into myAccount on the provider home page of TMHP.com through TexMedConnect
- Through the Provider Information Management System (PIMS)

Providers and delegates will have access to a Medicaid client's health information. This will not be a complete Medicaid client health record but rather a set of available medical and dental information for care coordination and treatment purposes including, but not limited to, prescription medicines, vaccines, and health events; including diagnosis and treatment and Texas Health Steps alerts. Providers will be able to view client health information unless the client opts out of sharing their health information.

For more information, call the TMHP Contact Center at 1-800-925-9126.
