DataLogic Vesta Complete Claims Billing Software Issue Now Resolved

Information posted September 20, 2019

The connectivity issue with DataLogic Vesta Complete software has been resolved. Program providers can continue to use the software for claims billing.

*Note:* The issue affected only claims billing through DataLogic Vesta Complete software and did not affect the processing of Electronic Visit Verification (EVV) visits with DataLogic Vesta EVV software.

For additional information or questions, refer to the [EVV Contact Information Matrix](#) or contact EVV@tmhp.com. For up-to-date news, program providers should regularly refer to the [EVV webpage](#) on the TMHP website.
