OASIS Submission and Reports Changing to iQIES
Effective January 1, 2020

Information Posted December 5, 2019

Medicare certified home health agencies are required to submit Outcome and Assessment Information Set (OASIS) data and retrieve reports using the Internet Quality Improvement Evaluation System (iQIES) effective January 1, 2020. The process that providers follow for submitting patient assessments won’t change, but the enhanced system is now Internet facing and allows providers to submit assessments and view associated reports in one place.

Use of the new iQIES system requires registration. Texas agencies began onboarding September 2019, and agencies are encouraged to register as soon as possible to ensure a smooth transition.

Register for an iQIES account to access instructions and important information.

Email iQIES_Broadcast@cms.hhs.gov for general iQIES questions.

Call the OASIS Help Desk at 833-769-1945 for general OASIS questions.
