This manual is available for download at www.tmhp.com, and is also available on CD. There are many benefits to using the electronic manual, including easy navigation with bookmarks and hyperlinked cross-references, the ability to quickly search for specific terms or codes, and form printing on demand.

The Texas Medicaid & Healthcare Partnership (TMHP) is the claims administrator for Texas Medicaid under contract with the Texas Health and Human Services Commission.

WELCOME: 2011 TEXAS MEDICAID PROVIDER PROCEDURES MANUAL

This manual is a comprehensive guide for Texas Medicaid providers. It contains information about Texas Medicaid benefits, policies, and procedures. It also includes information about Texas Health Steps (THSteps), the Children’s Services Program and managed care programs, including Primary Care Case Management (PCCM).

Texas Medicaid policy published in this manual was implemented on or before January 1, 2011. Policy updates effective after January 2, 2011, are published bimonthly in the Texas Medicaid Bulletin.

All Texas Medicaid policy updates that are published bimonthly in the Texas Medicaid Bulletin supplement this manual and update the policy it contains.

This manual and copies of the Texas Medicaid Bulletin are available on the TMHP website at www.tmhp.com.

The 2011 Texas Medicaid Provider Procedures Manual (TMPPM) is divided into two volumes as follows:

Volume 1: General Information
Volume 1 applies to all health-care providers who are enrolled in Texas Medicaid and provide services to Texas Medicaid clients. The sections in Volume 1 include general information for enrolling in the program, receiving appropriate reimbursement, and claim submissions and appeals for services rendered.

• Contents
• Introduction
• TMHP Telephone and Address Guide
• Section 1. Provider Enrollment and Responsibilities
• Section 2. Texas Medicaid Reimbursement
• Section 3. TMHP Electronic Data Interchange (EDI)
• Section 4. Client Eligibility
• Section 5. Prior Authorization
• Section 6. Claims Filing
• Section 7. Appeals
• Section 8. Managed Care
• Appendix A: State and Federal Offices Communications Guide
• Appendix B: Vendor Drug Program
• Appendix C: HIV/AIDS
• Appendix D: Medical Transportation
• Appendix E: Acronym Dictionary
• Index (for Volume 1 and all handbooks)

Volume 2: Provider Handbooks
Volume 2 includes 11 handbooks. Each handbook covers Medicaid policies, procedures, and claims filing requirements for specific products or services. Volume 2 includes the following handbooks:

• Ambulance Services Handbook
• Behavioral Health, Rehabilitation, and Case Management Services Handbook
• Children’s Services Handbook
• Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook
• Gynecological and Reproductive Health, Obstetrics, and Family Planning Services Handbook
• Hospital Services Handbook
• Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook
• Nursing and Therapy Services Handbook
• Outpatient Services Handbook
• Radiology and Laboratory Services Handbook
• Vision and Hearing Services Handbook

INTRODUCTION

Medicaid Program Administration

The Texas Medical Assistance (Medicaid) Program was implemented on September 1, 1967, under the provisions of Title XIX of the federal Social Security Act and Chapter 32 of the Texas Human Resources Code.

The State of Texas and the federal government share the cost of funding Texas Medicaid. The Health and Human Services Commission (HHSC), the single state Medicaid agency, is responsible for the Title XIX Program. The administration of the program is accomplished through contracts and agreements with medical providers; Texas Medicaid & Healthcare Partnership (TMHP), the claims administrator; MAXIMUS, the enrollment broker; various managed care organizations (MCOs); the Institute for Child Health Policy (ICHP), the quality monitor; and state agencies. Texas Medicaid providers are reimbursed for services through contracts with health-insuring contractors, fiscal agents, or direct vendor payments.

By signing an HHSC Medicaid Provider Agreement (through the enrollment process) and submitting Medicaid claims, each enrolled provider agrees to abide by the policies and procedures of Medicaid, published regulations, and the information and instructions in manuals, bulletins, and other instructional material furnished to the provider.

Refer to: Appendix A: State and Federal Offices Communication Guide (Vol. 1, General Information) for addresses and telephone numbers of HHSC and Department of State Health Services (DSHS) regional offices.

TMHP Website

The TMHP website at www.tmhp.com is a valuable resource that provides:

- Provider education information and registration for upcoming education/training sessions (i.e., live workshops, webinars, computer-based training, and audio content).
- Publications, such as bulletins, banner messages, and provider manuals.
- A TMHP News section with announcements of program changes and other important information.
- Real-time and static fee schedules.
- Forums, polls, and questionnaires.
- Online provider enrollment.
- Complete instructions for setting up a Provider Administrator account and the use of online claims status inquiries (CSI), eligibility verification, and Electronic Remittance and Status (ER&S) Reports.

Additional advanced features are available for those providers who create an account. All enrolled providers are eligible for this free account. Once an account is activated, providers will have access to:

- Texas Medicaid Program enrollment information.
- CSIs.
- Eligibility verification.
- ER&S Report download option.
- Claims submission.
- Claims appeals.
- Online provider lookup.
- Online fee lookup (OFL) to obtain real time fee information for an individual or a range of procedure codes. Benefits and limitations for certain services and history up to 2-years is also available.
- Payment amounts search, view, and print capabilities.
• Notification of an invalid address on file for any Texas Provider Identifier (TPI) associated with a provider’s National Provider Identifier (NPI).
• Notification of pending payments because of inaccurate or incomplete provider information.
• Manage hospital admission and discharge information on clients residing in an institution for mental diseases (IMD)

**Important:** Natural disasters, such as floods or hurricanes, can impact the delivery of health care to Texas Medicaid clients. When disaster strikes, providers should monitor the TMHP website for special instructions.

New services are always being added to the website. Please visit www.tmhp.com for the latest information on TMHP online services.

## Other TMHP Information

### TMHP Contact Center

The TMHP Contact Center is available from 7 a.m. to 7 p.m., Central Time, Monday through Friday.

The TMHP Contact Center assists with questions such as:

- Provider enrollment procedures
- Claims filing procedures
- Policy information

The TMHP Contact Center is available to assist providers and clients. Please review the telephone and fax communication guides in this section for a list of contact phone and fax numbers.

For questions or information about Medicaid eligibility, clients are referred to their caseworker or the local Health and Human Services Commission (HHSC) office.

### Automated Inquiry System (AIS)

AIS provides the following information and services through the use of a touch-tone telephone: claim status, patient eligibility, benefit limitations, Medically Needy case status, Family Planning, current weekly payment amount, and claim appeals.

Eligibility and claim status information is available on AIS 23 hours a day, 7 days a week, with scheduled down time between 3 a.m. and 4 a.m., Central Time. All other AIS information is available from 7 a.m. until 7 p.m., Central Time, Monday through Friday. AIS offers 15 transactions per call.

For full instructions on the use and benefits of AIS, refer to the “Automated Inquiry System (AIS) User’s Guide” available on www.tmhp.com or call the TMHP Contact Center at 1-800-925-9126 for faxed instructions.
TMHP Provider Relations
The TMHP Provider Relations Department comprises a staff of Austin- and field-based provider relations representatives whose goal is to serve the health-care community by furnishing a variety of services and activities designed to inform and educate health-care providers about Texas Medicaid activities and claim submission procedures.

Provider Relations activities include the following:

- **Provider education through planned events.** Provider Relations representatives conduct a planned program of educational workshops, in-services, webinars, computer-based training (CBT), and other training sessions designed to keep all actively-enrolled providers informed of the latest policies, claim processing procedures, and federal and state regulations affecting Texas Medicaid. Details of all available provider training can be found in the Provider Education section of the TMHP website at www.tmhp.com.

- **Problem identification and resolution.** A staff of research coordinators is available to assist providers with clarification of Medicaid policies and assist with in-depth problem claim submission issues after initial inquiries are made with the TMHP Contact Center. Coordinators work closely with field-based regional representatives to coordinate the educational needs of the community.

- **Relationship with professional health-care organizations.** To ensure that Texas associations that represent health-care professions have up-to-date information about the requirements for participation in Texas Medicaid, the Provider Relations Department maintains a work relationship with these organizations. Also, the Provider Relations Department participates in several events sponsored by Texas health-care associations, such as conventions and conferences.

Visit www.tmhp.com for Provider Relations contact information, or call the TMHP Contact Center at 1-800-925-9126 for assistance.

TMHP Electronic Data Interchange (EDI) Help Desk
The TMHP EDI Help Desk assists Medicaid providers with EDI transactions. The TMHP EDI Help Desk is available at 1-888-863-3638 from 7 a.m. to 7 p.m., Central Time, Monday through Friday.

TMHP EDI Help Desk activities and responsibilities include, but are not limited to, the following:

- Enrolling providers for electronic billing
- Qualifying vendors for TMHP EDI production through testing
- Diagnosing claim transmission problems through research
- Consulting with provider billing personnel, billing services, and software vendors regarding TMHP EDI

TMHP EDI Help Desk staff assists with questions about TMHP EDI, TexMedConnect, and electronic transmissions at 1-888-863-3638.

Providers who employ hardware or software vendors should contact those vendors for the resolution of technical problems.

1.1 Provider Enrollment

1.1.1 National Provider Identifier (NPI) and Taxonomy Codes

The National Provider Identifier (NPI) final rule, Federal Register 45, Code of Federal Regulations (CFR) Part 162, established the NPI as the standard unique identifier for health-care providers and requires covered health-care providers, clearinghouses, and health plans to use this identifier in Health Insurance Portability and Accountability Act (HIPAA)-covered transactions. An NPI is a 10-digit number assigned randomly by the National Plan and Provider Enumeration System (NPPES).

The Health Care Provider Taxonomy Code Set is an external, non-medical collection of alphanumeric codes designed to classify health-care providers by provider type and specialty. Providers may have more than one taxonomy code. (Taxonomy codes can be obtained from the Washington Publishing Company website at www.wpc-edi.com).

During the enrollment process, providers must select a primary and, if applicable, secondary taxonomy code associated with their provider type. Providers will be supplied a list of taxonomy codes to choose from that correspond to the services rendered by the type of provider they wish to enroll as. Only the code will be displayed. Due to copyright laws, TMHP is unable to publish the taxonomy description. Therefore, providers must verify the taxonomy code associated with their provider type and specialty before beginning the online attestation process.

Initial Texas Medicaid fee-for-service enrollment and reenrollment can be completed online. This includes the Texas Health Steps (THSteps) program for both medical and dental providers and case management for Children and Pregnant Women (CPW). A link to the provider enrollment application is provided on the TMHP website homepage at www.tmhp.com.

1.1.2 Online Enrollment

Online enrollment has the following advantages:

- Applications are validated immediately to ensure that all fields have been completed.
- Most of the application can be completed online so that only a few forms need to be printed, completed, and mailed to TMHP.
- Applicants can view both incomplete and complete applications that have been submitted online.
- Some form fields are automatically completed, reducing the amount of information that has to be entered.
- Providers can complete the Provider Information Change (PIC) form online.
- Providers will receive e-mail notifications when messages or deficiency notices about their applications are posted online. The messages can be viewed on the secured access portion of the website. Providers may opt out of e-mail communication and receive messages or deficiency letters by mail.
- Providers can create templates, which make it easier to submit multiple enrollment applications.
- Providers who enroll as a group can assign portions of the application to performing providers to complete. Performing providers can complete their portion of a group application by logging into Provider Enrollment on the Portal (PEP) with their unique user name and password.
- Providers can navigate to completed sections of the application without having to click through all pages of the application.
- Information that is on file for owners and subcontractors of the applying provider are auto-populated in the application.

Before submitting an application to TMHP for processing, providers are required to review a portable document format (PDF) copy of the application and verify it is complete. Providers are able to edit submitted applications to correct identified deficiencies.
To be eligible for Texas Medicaid reimbursement, a provider of medical services (including an out-of-state provider) must:

- Meet all applicable eligibility criteria.
- Be approved by HHSC for enrollment.
- Obtain an NPI from NPPES.
- File with TMHP the required Texas Medicaid enrollment application ensuring that the application is correct, complete, and includes all required attachments and additional information.
- Meet all applicable criteria for eligibility to enroll.

Refer to: Subsection 2.5, “Out-of-State Medicaid Providers” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for criteria specific to out-of-state providers.

- Provide any additional information requested by TMHP, HHSC, or the HHSC Office of Inspector General in connection with the processing of the application.
- Be approved by HHSC for enrollment and enter into a written provider agreement with HHSC.

Enrolling online promotes accurate submissions, decreases processing time, and enables immediate feedback on the status of the application.

As an alternative to applying for enrollment online, a provider may file a paper enrollment application with TMHP. Providers may download the Texas Medicaid Provider Enrollment Application at www.tmhp.com or request a paper application form by contacting TMHP directly at 1-800-925-9126. A paper enrollment application may also be requested from and must be submitted to the following address:

Texas Medicaid & Healthcare Partnership
Provider Enrollment
PO Box 200795
Austin, TX 78720-0795

Note: During the Texas Medicaid enrollment process, with HHSC approval, the Claims Administrator may waive the mandatory prerequisite for Medicare enrollment for certain providers whose type of practice will never serve Medicare-eligible individuals (e.g., pediatrics, obstetrician/gynecologist [OB/GYN]).

Providers must maintain a valid, current license or certification to be entitled to Texas Medicaid reimbursement. Providers cannot enroll in Texas Medicaid if their license or certification is due to expire within 30 days of application. A current license or certification must be submitted, if applicable.

Refer to: Subsection 1.1.5.11, “Copy of License/Temporary License/Certification” in this section.

A provider identifier is issued when a determination has been made that a provider qualifies for participation.

Refer to: Subsection 2.5, “Out-of-State Medicaid Providers” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for additional criteria that must be met for out-of-state providers to enroll in Texas Medicaid.

There are four types of enrollment for providers in Texas Medicaid, as follows:

- Individual. This type of enrollment applies to an individual health-care professional who is licensed or certified in Texas, and who is seeking enrollment under the name, and social security or federal tax identification number of the individual. An individual may also enroll as an employee, using the federal tax identification number of the employer. Certain provider types must enroll as individuals, including the following: dieticians, licensed vocational nurses, occupational therapists, registered nurses, and speech therapists.
• **Group.** This type of enrollment applies to health-care items or services provided under the auspices of a legal entity, such as a partnership, corporation, limited liability company, or professional association, and the individuals providing health-care items or services are required to be certified or licensed in Texas. The enrollment is under the name and federal tax identification number of the legal entity. For any group enrollment application, there must also be at least one enrolling performing provider.

• **Performing provider.** This type of enrollment applies to an individual health care professional who is licensed or certified in Texas, and who is seeking enrollment under a group. The enrollment is under the federal tax identification number of the group, and payment is made to the group. If a health-care professional is required to enroll as an individual, as explained above, but the person is an employee and payment is to be made to the employer, the health-care professional does not enroll as a performing provider. Instead, the health-care professional enrolls as an individual provider under the federal tax identification number of their employer.

• **Facility.** This type of enrollment applies to situations in which licensure or certification applies to the entity. Although individuals working for or with the entity may be licensed or certified in their individual capacity, the enrollment is based on the licensure or certification of the entity. For this reason, facility enrollment does not require enrollment of performing providers. However, certain provider types must enroll as facilities, including the following:
  
  • Ambulance and air ambulance
  • Ambulatory surgical center (ASC) and hospital-based ambulatory surgical center (HASC)
  • Birthing center
  • Catheterization lab
  • Chemical dependency treatment facility (licensed by the Texas Commission on Alcohol and Drug Abuse)
  • Consumer Directed Services Agency
  • County Indigent Health Care Program
  • Community mental health center
  • Comprehensive health center
  • Comprehensive outpatient rehabilitation facility/outpatient rehabilitation facility
  • Department of Assistive and Rehabilitative Services Division for Blind Services
  • Durable medical equipment (DME)
  • Durable medical equipment home health
  • Early Childhood Intervention
  • Federally Qualified Health Center (FQHC)
  • Freestanding psychiatric facility
  • Freestanding rehabilitation facility
  • Home Health/Home and community support services agency
  • Hospital/critical access hospital/out-of-state hospital
  • Military hospital
  • Hyperalimentation
  • Independent diagnostic testing facility/physiological lab
Providers must submit a separate Texas Medicaid Provider Enrollment Application for each enrollment type requested. For example, a health-care professional who is already enrolled with Texas Medicaid as an individual with his or her own practice, and who wishes to bill for services provided in connection with a group, must submit a separate enrollment application and be approved as a performing provider with the group. Similarly, a health-care professional who is enrolled as a performing provider with one group, but who wishes to bill for services provided in connection with another group, must submit a separate enrollment application and be approved as a performing provider with the other group.

During the Provider Enrollment on the Portal (PEP) process, the taxonomy code for group providers is populated with either the multi-specialty (193200000X) or single-specialty (193400000X) group taxonomy code dependent on which specialty was chosen.

The multi- or single-specialty taxonomy codes for group providers are accurate and have been approved by HHSC. The most appropriate taxonomy codes should be selected for any performing providers that will be enrolled according to their specific performing provider type and specialty.

Note: A separate provider identifier is issued for each enrollment type that is approved. The provider is authorized to use the provider identifier only to bill for services provided as indicated in the approved enrollment application. It is a program violation for a provider to use a provider identifier for any purpose other than billing for the types of services, and under the type of enrollment, for which that provider identifier was issued. Improper use of a provider identifier constitutes program abuse and/or fraud.

Refer to: Subsection 1.6, “Medicaid Waste, Abuse, and Fraud Policy” in this section for additional information.
1.1.3 Provider Enrollment Application Determinations

An application for provider enrollment may be approved, approved with conditions, or denied. The provider applicant is issued a notice of the enrollment determination.

When an application for enrollment is approved, with conditions, the applicant has no right of appeal or administrative review of the enrollment determination. The types of conditional enrollment include, among other things:

- An application may be approved for time-limited enrollment, meaning the provider is granted a contract to participate in Medicaid for a specific period of time. In this case, the provider is sent a notice that includes the termination date of the contract. It is the provider’s responsibility, if the provider chooses to seek continued Medicaid participation, to file a complete and correct reenrollment application before the termination date of the provider’s current contract. It is recommended that the provider submit a reenrollment application at least 60 days before the current contract termination date, to ensure that the reenrollment application is complete and correct before the termination date. This may avoid a lapse between the provider’s current contract and the new contract, if a new contract is granted.

- An application may be approved subject to restricted reimbursement, meaning the provider is eligible to have only certain types of claims paid. This includes, among other things, reimbursement of only Medicare crossover claims (i.e., claims with respect to “dual eligible” recipients who are covered by both Medicare and Medicaid).

An application may be denied, in which case a denial notice that explains the basis for denial is sent. The notice also explains the right to make a written request for an administrative review of the denial decision, and the procedures for filing such a request. Any administrative review request must be received within 20 days of the date on the letter and filed in accordance with the instructions provided in the denial notice. HHSC will conduct the administrative review and render a final enrollment determination. The HHSC determination following administrative review is not subject to further appeal or reconsideration.

Claims submitted by newly-enrolled providers must be received within 95 days of the date the new provider identifier is issued, and within 365 days of the date of service. Providers with a pending application should submit any claims that are nearing the 365-day deadline from the date of service. Claims will be rejected by TMHP until a provider identifier is issued. Providers can use the TMHP rejection report as proof of meeting the 365-day deadline and submit an appeal.

Refer to: Subsection 1.1.5.11, “Copy of License/Temporary License/Certification” in this section.

Note that all claims for services rendered to Texas Medicaid clients who do not have Medicare benefits are subject to a filing deadline from the date of service of:

- 95 days for in-state providers
- 365 days for out-of-state providers

TMHP cannot issue a prior authorization before Medicaid enrollment is complete. Upon notice of Medicaid enrollment, by way of issuance of a provider identifier, the provider must contact the appropriate TMHP Authorization Department before providing services that require a prior authorization number to Medicaid clients. Regular prior authorization procedures are followed after the TMHP Prior Authorization Department has been contacted. Retroactive authorizations will not be issued unless the regular authorization procedures for the requested services allow for authorizations to be obtained after services are provided. For these services, providers have 95 days from the add date of the client’s retroactive eligibility in TMHP’s system to obtain authorization for services that have already been performed. Providers should refer to the specific manual section for details on authorization requirements, claims filing, and any timeframe guidelines for authorization request submissions.
Providers who have not been assigned a provider identifier and have general claim submission questions may refer to Section 6: Claims Filing for assistance with claim submission. If additional general information is needed, providers may call the TMHP Contact Center at 1-800-925-9126 to obtain information. Due to HIPAA privacy guidelines, specific client and claim information cannot be provided. Providers who have already been assigned a provider identifier and have questions about submitting claims may call the same number and select the option to speak with a TMHP Contact Center representative.

1.1.3.1 Provider Identifiers Terminated After 24 Months of No Claim Activity

Payment denial codes are applied to a Texas Provider Identifier (TPI) that has had no claim activity for a period of 24 months or more. The TPI will be considered inactive and will not be able to be used to submit claims.

A courtesy letter will be sent to all providers whose TPIs have been identified as not having any claims activity over the previous 18 months. Providers will have six months to submit claims and prevent the TPI from being terminated. If the provider is enrolled in both Medicaid and the Children with Special Health Care Needs (CSHCN) Services Program, the provider identifiers for both programs will be examined to determine whether claims activity has occurred.

After 24 months without claim activity, providers will be sent a termination letter, and a payment denial code will be applied to their provider identifier. If a provider’s Medicaid TPI is terminated, any enrollments with Primary Care Case Management (PCCM) or the CSHCN Services Program will also be terminated. Claims that are submitted for a terminated TPI after the payment denial code has been applied will be denied.

To have the payment denial code removed from a provider identifier, providers must submit a completed application for the state health-care program in which they wish to enroll, and the application must be approved. The information on this application must match exactly the information currently on the provider’s file for the payment denial code to be removed.

For providers who are enrolled in any of the Texas Medicaid managed care organizations (MCOs), claim activity through the MCO will also be monitored to determine whether there is a lack of claim activity that warrants termination of the provider’s agreement with Texas Medicaid.

1.1.3.2 Excluded Entities and Providers

The United States Health and Human Services Office of Inspector General (HHS-OIG) and the Texas Health and Human Services Commission Office of Inspector General (HHSC-OIG) exclude certain individuals and entities from participation in all federal or state health-care programs. The exclusions restrict individuals from receiving any reimbursement for items or services furnished, ordered, or prescribed.

All current providers and providers who are applying to participate in state health-care programs must screen their employees and contractors every month to determine whether they are excluded individuals or entities. These screenings are a condition of the provider’s enrollment or re-enrollment into state health-care programs.

Providers can determine whether an individual or entity is excluded by searching the List of Excluded Individuals/Entities (LEIE) website at www.oig.hhs.gov/fraud/exclusions.asp. A downloadable version of the database is available but it does not include Social Security Numbers (SSNs) or Employer Identification numbers (EINs). The Texas HHSC-OIG website is found at https://oig.hhsc.state.tx.us/Exclusions/Search.aspx. If a name matches a name on the exclusion list, it can be verified online with a Social Security Number (SSN) or Employer Identification number (EIN).

Providers must search the LEIE website monthly to capture any exclusions or reinstatements that have occurred since the last search. Providers must immediately report to HHS-OIG any exclusion information they discover when searching the LEIE database.
CFR section 1003.102(a)(2), states that civil monetary penalties may be imposed against Medicaid providers and managed care entities (MCEs) that employ or enter into contracts with excluded individuals or entities to provide items or services to Medicaid clients. In addition, no Medicaid payments can be made for any items or services directed or prescribed by an excluded physician or other authorized person when the individual or entity furnishing the services either knew or should have known of the exclusion. This prohibition applies even when the Medicaid payment itself is made to another provider, practitioner, or supplier that is not excluded.

1.1.4 Enrollment in Medicaid Managed Care Programs

A Texas Medicaid provider must have at least one active TPI to be eligible to enroll with Primary Care Case Management (PCCM). The provider can be selected as a primary care provider by PCCM clients once enrolled into PCCM.

PCCM providers may be reimbursed for services rendered to Medicaid Managed Care clients other than those whom they serve as a primary care provider. The provider must enroll with the client’s health plan to be eligible for reimbursement for services rendered.

Refer to: Subsection 8.1, “Medicaid Managed Care” in Section 8, “Managed Care” (Vol. 1, General Information) for more information about PCCM and Managed Care enrollment.

1.1.5 Required Enrollment Forms

The following sections provide information on the forms required to enroll in Texas Medicaid.

1.1.5.1 Texas Medicaid Provider Enrollment Application

The Texas Medicaid Provider Enrollment Application must be submitted by all providers who want to enroll in Texas Medicaid, and it must be signed by the person who is applying for enrollment. If the applicant is an entity, a principal of the entity must sign the application.

Refer to the checklist in the Texas Medicaid Provider Enrollment Application. This checklist explains, by provider type, the documents and information that must be provided with the application. Applications must be complete in order to process and issue a provider identifier. Each application/applicant is considered separate and should not be combined.

Note: If enrolled in Medicare, the provider must submit a copy of the Medicare enrollment letter to enroll in Texas Medicaid. Otherwise the enrollment application will be considered incomplete.

When prompted to enter a tax identification number (tax ID) on either a paper or electronic copy of an enrollment application, the applicant should list the provider or entity’s nine digit federal tax identification number.

Providers can call the TMHP Contact Center at 1-800-925-9126, Option 2, for help with completing the application. Providers should retain a copy of the original application for future reference.

All pages of the application must be present even if the forms are left blank because they are not pertinent to the provider’s situation. Providers will be notified of incomplete applications and will have 30 business days to provide the requested missing information. If the information is not provided within 30 business days, TMHP will terminate the enrollment process. If the provider wants to enroll at a later date, the provider should contact TMHP to determine if a new enrollment application must be submitted. Providers are required to review their enrollment application for correctness and completeness before submitting it to TMHP.

By signing the Medicaid enrollment agreement, a provider is certifying that all information submitted in connection with the application for enrollment is complete and correct. Any false, misleading, or incomplete information submitted in connection with an enrollment application constitutes a Medicaid program violation, and may result in administrative, civil, or criminal liability.

Refer to: Subsection 1.6, “Medicaid Waste, Abuse, and Fraud Policy” in this section.
1.1.5.2 HHSC Medicaid Provider Agreement

The HHSC Medicaid Provider Agreement must be submitted by all providers who enroll in Texas Medicaid and must be signed by the provider who is applying for enrollment. If the applicant is an entity, a principal of the entity who has the authority to bind the entity to the requirements of the HHSC Provider Agreement must sign the agreement. "Principal" is defined in the following section. (In the case of a corporation, see subsection 1.1.5.7, “Corporate Board of Directors Resolution” in this section.)

If the provider is city or government owned, the agreement must be signed by a person who is authorized under the city or government charter. This form is an agreement between HHSC and the provider performing services under the State Plan wherein the provider agrees to certain provisions as a condition of participation.

1.1.5.3 Provider and Principal Information Forms

The Provider Information Form (PIF-1) must be completed by, or on behalf of, all providers. If the provider is an entity, the PIF-1 must be completed on behalf of the entity. A separate Principal Information Form (PIF-2) must be completed by each principal of the provider.

Principals of the provider include all of the following:

- An owner with a direct or indirect ownership or control interest of five percent or more
- Corporate officers and directors
- Limited or nonlimited partners
- Shareholders of a professional corporation, professional association, limited liability company, or other legally designated entity
- Any employee of the Provider who exercises operational or managerial control over the entity, or who directly or indirectly conducts the day-to-day operations of the entity

Note: This includes the on-site manager for each physical location of the provider in Texas.

The person who signs the HHSC Medicaid Provider Agreement is certifying that all of the information in the application packet, including every completed PIF-1 and PIF-2, is complete and correct. This includes a certification that every person who is required to complete a PIF-2 has done so, and all required PIF-2s are included with the application.

1.1.5.4 Disclosure of Ownership and Control Interest Statement

The Disclosure of Ownership and Control Interest Statement must be submitted as part of the enrollment application for all types of enrollment, except in the case of a performing provider who is applying to join an already enrolled group. This form provides TMHP Provider Enrollment with the appropriate information to enroll the provider as a sole proprietor, corporation, partnership, or nonprofit organization. This information determines if other enrollment forms are required.

This form also contains questions that must be answered under federal law. Failure to provide complete and accurate information as instructed on this form will constitute an incomplete application, which may result in denial of enrollment. Incomplete or inaccurate information on this form constitutes a violation of the rules of Medicaid and may also result in administrative, civil, or criminal liability.

Refer to: Subsection 1.6, “Medicaid Waste, Abuse, and Fraud Policy” in this section.

Note: Providers are required to submit any change in ownership, corporate officers, or directors to TMHP Provider Enrollment within 10 calendar days of the change.

Refer to: Subsection 1.4.2, “Maintenance of Provider Information” in this section.
1.1.5.5 **Internal Revenue Service (IRS) W-9 Form**

The IRS W-9 Form must be completed and submitted for all types of enrollment, except in the case of performing providers seeking to join an already enrolled group.

1.1.5.6 **Medicaid Audit Information Form**

The Medicaid Audit Information Form is required by facilities such as hospitals, home health agencies, FQHCs, RHCs, and dialysis facilities.

1.1.5.7 **Corporate Board of Directors Resolution**

All providers who indicate that they are a corporation on the Disclosure of Ownership and Control Interest Statement are required to submit the Corporate Board of Directors Resolution. This form indicates the individual (by name) who is authorized by the corporation to sign the agreement forms. The secretary of the corporation must sign the Corporate Board of Directors Resolution and have it notarized. If a business is city or government-owned, this form is not required.

1.1.5.8 **Certificate of Good Standing (Board Corporation Act, Article 2.45)**

The Certificate of Good Standing must be submitted by all for-profit corporations. A for-profit corporation that is delinquent in Franchise Tax cannot be awarded a contract or granted a license or permit by the state or agency of the state. Providers must obtain the Certificate of Good Standing from the Comptroller’s Office, which verifies that the corporation is not delinquent in Franchise Tax. Only an original or photocopy of a Certificate of Good Standing will be accepted (i.e., a printout from the Comptroller website will not be accepted). Corporations that are nonprofit with a “501(C)(3)” IRS exemption are not required to submit this form. Out-of-state providers who do not conduct business in Texas are also exempt from submitting this form.

1.1.5.9 **Certificate of Formation or Certificate of Filing/Certificate of Incorporation**

All providers that are legal entities must submit the Certificate of Formation or Certificate of Filing form. Obtain the form from the Office of the Secretary of State. The name on this form must exactly match the legal name shown on the W-9 form. Out-of-state providers are exempt from submitting this form. Texas Corporations formed prior to January 1, 2006, must submit their Certificate of Incorporation.

1.1.5.10 **Certificate of Authority**

The Certificate of Authority and any required certifications to provide certain services in Texas must be submitted when a corporation is registered in a state other than Texas. Obtain this form from the Office of the Secretary of State of Texas. It takes the place of the Certificate of Incorporation. The form identifies the legal name of the corporation and is proof that the corporation is registered to do business in Texas.

1.1.5.11 **Copy of License/Temporary License/Certification**

Providers who must be licensed or certified in Texas must submit a copy of their current license or certification, except in the case of doctors, nurses, and dentists. TMHP directly obtains licensure information from the following licensing boards:

- Texas Medical Board
- Texas State Board of Dental Examiners
- Texas Board of Nursing

Once a provider is enrolled in Texas Medicaid, a reminder letter will be automatically generated and sent to the provider 60 days before the provider’s license expires. When the license is renewed, providers that are licensed by the boards listed above will not need to contact TMHP with renewal information.
TMHHP does not directly obtain licensure information from the following license boards:

- Texas State Board of Examiners of Psychologists
- Texas State Board of Chiropractic Examiners
- Texas State Board of Podiatric Examiners

Psychologists, chiropractors, and podiatrists must submit a paper copy of the license at the time of renewal to maintain a current record with TMHHP.

Providers who are licensed, other than doctors, nurses, and dentists, will be sent a reminder letter to submit a copy of their license renewal 60 days before their current license expires.

**Note:** Providers are also required to submit to TMHHP, within 10 days of occurrence, notice that the provider’s license or certification has been partially or completely suspended, revoked, or retired. Not abiding by this license and certification update requirement may impact a provider’s qualification to continued participation in Texas Medicaid.

### 1.1.5.12 Licensure Renewal

Not abiding by the license and certification update requirement may impact a provider’s qualification for continued participation in Texas Medicaid. If a provider’s license has expired, a termination letter will be sent to the provider, and all claims filed on and after the expiration date will be denied.

To have claims payments resumed, updated information must be sent to the applicable licensing board to renew the license. Payment will be considered for dates of service on or after the date of license renewal. Claims denied due to an inactive license may be appealed, and payment will be considered for dates of service on or after the date of return to active license status. Payment deadline rules for the fiscal agent arrangement must be met.

**Refer to:** Subsection 6.1.4, “HHSC Payment Deadline” in Section 6, “Claims Filing” (*Vol. 1, General Information*).

### 1.1.5.13 Medicare Participation

Under federal law, Medicaid is the payor of last resort, so Medicare-covered services must first be billed to and paid by Medicare. Therefore, in order to be eligible to enroll in Texas Medicaid, a provider must be a Medicare participating provider. Certain types of providers, however, are not required to meet the Medicare participation requirement, including:

- OB/GYN providers
- Pediatric providers
- Family Planning providers
- Case Management for Children and Pregnant Women (CPW) program providers
- Comprehensive Care Program (CCP) providers
- Licensed professional counselors (LPCs)
- Licensed marriage and family therapists (LMFTs)

Some provider types may apply for a waiver of the Medicare certification requirement of the application process if they do not serve Medicaid-eligible individuals. The following provider types are eligible to apply for this waiver:

- Ambulatory Surgical Center (ASC)
- Audiologist
- Certified Nurse Midwife (CNM)
- Certified Registered Nurse Anesthetist (CRNA)
• Chiropractor
• Dentist (D.D.S. or D.M.D.)
• Durable Medical Equipment (DME)
• Independent Lab (No physician involvement)
• Independent Lab (Physician involvement)
• Nurse Practitioner/Clinical Nurse Specialist (NP/CNS)
• Optometrist (OD)
• Physician (DO)
• Physician (MD)
• Physician Assistant (PA)
• Podiatrist

Each provider seeking enrollment must include a valid and current Medicare number in the Texas Medicaid Provider Enrollment Application, and must include with the application a copy of the provider’s notice of Medicare participation.

Each group and each performing provider of a Medicare group must have a current Medicare number. The group enrollment application must include the current and valid Medicare number for the group and for each performing provider in the group, as well as a copy of the notice of Medicare enrollment for the group and for each performing provider in the group.

Each group enrolling as a Medicaid-only does not need to submit a current Medicare number for the group. Performing providers added to this Medicaid-only group also do not require a current Medicare number.

1.1.5.14 Group Information Changes
If additions or changes occur in a group’s enrollment information (for example, a performing provider leaves or enters the group, changes an address, or a provider is no longer licensed) after the enrollment process is completed, the provider group must notify Texas Medicaid in writing within 10 calendar days of occurrence of the changes. Failure to provide this information may lead to administrative action by HHSC. Filing claims and receiving payment without having followed this requirement constitutes a program violation and may also result in administrative, civil, or criminal liability.

Refer to: Subsection 1.6, “Medicaid Waste, Abuse, and Fraud Policy” in this section for additional information.

1.2 Payment Information
Texas Medicaid reimbursements are available to all enrolled providers by check or electronic funds transfer (EFT). Providers are strongly encouraged to utilize EFT, which allows for more rapid reimbursement.

1.2.1 Using EFT
As a result of the 76th legislature, House Bill (H.B.) 2085 recommends that all Texas Medicaid providers receive payment by EFT. EFT is a method for directly depositing funds into a designated bank account. EFT does not require special software, and providers can enroll immediately.

1.2.2 Advantages of EFT
Advantages of EFT include:
• Electronically-deposited funds are available more quickly than with paper checks.
• Providers do not have to worry about lost or stolen checks.
• TMHP includes provider and Remittance and Status (R&S) Report numbers with each transaction submitted. If the bank’s processing software captures and displays the information, both numbers would appear on the banking statement.

1.2.3 EFT Enrollment Procedures
The Electronic Funds Transfer (EFT) Authorization Agreement can be found as Form 1.5 in this section and on the TMHP website at www.tmhp.com. Completed EFT forms can be faxed to 1-512-514-4214, or mailed to:

Texas Medicaid & Healthcare Partnership
Attn: Provider Enrollment
PO Box 200795
Austin, TX 78750-0795

To enroll for EFT, providers must submit a completed Electronic Funds Transfer (EFT) Authorization Agreement to TMHP. A voided check or letter on bank letterhead, containing the bank routing and account information, must be attached to the enrollment form. One completed form must be filled out for each billing provider identifier, including an original signature of the provider.

After the Electronic Funds Transfer (EFT) Authorization Agreement has been processed, TMHP issues a prenotification transaction during the next cycle directly to the provider’s bank account. This transaction serves as a checkpoint to verify EFT is working correctly.

If the bank returns the prenotification without errors, the provider will begin receiving EFT transactions with the third cycle following the enrollment form processing. Providers will continue to receive paper checks until they begin to receive EFT transactions.

If the provider changes bank accounts, the provider must submit a new Electronic Funds Transfer (EFT) Authorization Agreement to TMHP Provider Enrollment. The prenotification process is repeated and, once completed, the EFT transaction is deposited to the new bank account.

Refer to: Form 1.5, “Electronic Funds Transfer (EFT) Authorization (2 Pages)” in this section.

1.2.4 Stale-Dated Checks
Stale-dated checks (i.e., checks that are older than 180 days) that have not been cashed are voided and/or applied to any outstanding accounts receivable. If the balance on a stale-dated check after it has been applied to accounts receivable is over $5,000, written notification is sent to the provider 30 days before the void occurs.

1.3 Provider Reenrollment
Providers must submit a new application and a new provider identifier must be issued when there are changes in Medicare number, ownership, status, address, or principal information. The new application may be submitted electronically using PEP or by submitting a completed paper Texas Medicaid Provider Enrollment Application. A new application is required when one of the following changes:

• Medicare Number. If Medicare has issued a new Medicare number, the provider must complete and submit a Texas Medicaid Provider Enrollment Application in order to enroll the new location or with a new group.
• Change of Ownership. The new owner must do the following:
  • Obtain recertification as a Title XVIII (Medicare) facility under the new ownership
• Provide TMHP with a copy of the Contract of Sale (specifically, a signed agreement that includes the identification of previous and current owners in language that specifies who is liable for overpayments that were identified subsequent to the change of ownership, that includes dates of service before the change of ownership)

• Provide a separate change of ownership and Texas Medicaid provider enrollment application for all of the provider identifiers affected by the change of ownership

• Submit any new enrollment application relating to a change in ownership to TMHP Provider Enrollment within 10 calendar days of the change

**Important:** Providers must adhere to claim filing deadlines throughout the enrollment process. Claims should be submitted without a provider identifier until notified by TMHP of final enrollment determination. Note that all claims for services rendered to Texas Medicaid clients who do not have Medicare benefits are subject to a filing deadline from the date of service of 95 days for in-state providers and 365 days for out-of-state providers.

**Refer to:** Subsection 6.1.3, “Claims Filing Deadlines” in Section 6, “Claims Filing” (Vol. 1, General Information).

• **Provider Status (individual, group, performing provider, or facility).** Providers leaving group practices must send a signed letter or a Provider Information Change Form to TMHP that states the date of termination. The letter should include the provider identifier, effective date of termination, and the group’s provider identifier. The letter should be signed by an authorized representative of the group or the individual provider leaving the group. If the provider is joining a new group practice or enrolling as an individual, the provider must complete and submit a new Texas Medicaid Provider Enrollment Application to request enrollment in the new group or as an individual provider.

• **Physical Address.** If a provider has changed an address and the address is within the same Medicare locality, the provider must update the address information within 10 days. Updates may be made using the online provider lookup update screen located in the administrator section of TMHP’s website at www.tmhp.com. Alternately, the provider may update the address information by completing and submitting a Provider Information Change Form. A W9 is required if the provider is changing the mailing address using a PIC form. If the address is not within the Medicare locality and Medicare has issued a new Medicare number, the provider must complete and submit a Texas Medicaid Provider Enrollment Application in order to enroll the new location. Dental providers must complete a TMHP Dental Provider Enrollment Application for each practice location.

• **Change in Principal Information (as defined in subsection 1.1.5.3, “Provider and Principal Information Forms” in this section).** This includes a change in corporate officers or directors, professional association membership, and managing employees. The change must be reported to TMHP within 10 calendar days of when it occurs.

**Refer to:** Subsection 1.4.2.2, “Online Provider Lookup” in this section for additional information.

Providers must contact the Electronic Data Interchange (EDI) help desk directly and request an Electronic Remittance & Status (ER&S) Report each time a new provider identifier is issued to the provider. This form must be completed and returned to EDI with unique identifying information related to the new provider identifier to ensure there is no suspension in the provider’s ability to access their ER&S statement on the TMHP Home Page at www.tmhp.com.

Providers must also contact any third party EDI vendors with whom they are contracted to add any new provider identifiers to their ER&S Report. To obtain a portable data file (.pdf) copy of the ER&S Report on the TMHP Home Page, the provider must create an administrator account for each provider identifier belonging to them.
Providers that have been issued a new provider identifier through the TMHP enrollment or re-enrollment process must ensure that any prior authorizations affected have been updated to reflect the new provider identifier.

1.4 Provider Responsibilities

1.4.1 Compliance with Texas Family Code

1.4.1.1 Child Support

The Texas Family Code 231.006 places certain restrictions on child support obligors. Texas Family Code 231.006(d) requires a person who applies for, bids on, or contracts for state funds to submit a statement that the person is not delinquent in paying child support. This law applies to an individual whose business is a sole proprietorship, partnership, or corporation in which the individual has an ownership interest of at least 25 percent of the business entity. This law does not apply to contracts/agreements with governmental entities or nonprofit corporations.

The required statement has been incorporated into the Texas Medicaid Provider Agreement. The law also requires that payments be stopped when notified that the contractor/provider is more than 30 days delinquent in paying child support. Medicaid payments are placed on hold when it is discovered that a currently enrolled provider is delinquent in paying child support. A provider application may be denied or terminated if the provider is delinquent in paying child support.

1.4.1.2 Reporting Child Abuse or Neglect

The Texas Family Code Sec. 261.101 states: (a) A person having cause to believe that a child’s physical or mental health or welfare has been adversely affected by abuse or neglect by any person shall immediately make a report as provided by this subchapter; (b) If a professional has cause to believe that a child has been abused or neglected, or may be abused or neglected, or that a child is a victim of an offense under section 21.11, Penal Code, and the professional has cause to believe that the child has been abused as defined by section 261.001 or 261.401, the professional shall make a report no later than the 48th hour after the hour the professional first suspects that the child has been, or may be abused or neglected, or is a victim of an offense under section 21.11, Penal Code. A professional may not delegate to or rely on another person to make the report. In this subsection, professional means an individual who is licensed or certified by the state or who is an employee of a facility licensed, certified, or operated by the state and who, in the normal course of official duties or duties for which a license or certification is required, has direct contact with children. The term includes teachers, nurses, doctors, day-care employees, employees of a clinic or health-care facility that provides reproductive services, juvenile probation officers, and juvenile detention or correctional officers.

According to Rider 19 of the General Appropriations Act, 78th Legislative Regular Session, 1999, House Bill (H.B.) 1, all Medicaid providers shall comply with the provisions of state law as set forth in Chapter 261 of the Texas Family Code relating to investigations of reports of child abuse and neglect and the provisions of HHSC policy. Reimbursement shall only be made to providers who have demonstrated a good faith effort to comply with child abuse reporting guidelines and requirements in Chapter 261 and HHSC policy. Provider staff shall respond to disclosures or suspicions of abuse or neglect of minors, by reporting to the appropriate agencies as required by law.

All providers shall adopt this policy as their own, report suspected sexual abuse of a child as described in this policy and as required by law, and develop internal policies and procedures that describe how to determine, document, and report instances of sexual or nonsexual abuse.

This information is also available on the HHSC and TMHP websites at www.hhsc.state.tx.us and www.tmhp.com.
1.4.1.3 Procedures for Reporting Abuse or Neglect

Professionals as defined in the law are required to report no later than the 48th hour after the hour the professional first has cause to believe the child has been or may be abused or is the victim of the offense of indecency with a child.

Nonprofessionals shall immediately make a report after the nonprofessional has cause to believe that the child’s physical or mental health or welfare has been adversely affected by abuse.

A report shall be made regardless of whether the provider staff suspect that a report may have previously been made.

Reports of abuse or indecency with a child must be made to one of the following:

- Department of Family and Protective Services (DFPS) if the alleged or suspected abuse involves a person responsible for the care, custody, or welfare of the child (the DFPS Texas Abuse/Neglect Hotline, at 1-800-252-5400, operated 24 hours a day, 7 days a week)
- Any local or state law enforcement agency
- The state agency that operates, licenses, certifies, or registers the facility in which the alleged abuse or neglect occurred
- The agency designated by the court to be responsible for the protection of children

The law requires the report to include the following information if known:

- The name and address of the minor
- The name and address of the minor’s parent or the person responsible for the care, custody, or welfare of the child if not the parent
- Any other pertinent information concerning the alleged or suspected abuse

Reports can be made anonymously.

A provider may not reveal whether the child has been tested or diagnosed with human immunodeficiency virus (HIV) or acquired immunodeficiency syndrome (AIDS).

If the minor’s identity is unknown (e.g., the minor is at the provider’s office anonymously to receive testing for HIV or a sexually transmitted disease [STD]), no report is required.

1.4.1.4 Procedures for Reporting Suspected Sexual Abuse

All providers shall ensure that their employees, volunteers, or other staff report a victim of abuse who is a minor 13 years of age or younger who has engaged in sexual activity with any individual to whom the minor is not married. Sexual activity would be indicated if the minor is pregnant or has a confirmed STD acquired in a manner other than through perinatal transmission.

Sexual activity may include, but is not limited to, the actions described in Penal Code §21.11(a) relating to indecency with a child; §21.01(2) defining sexual contact; §43.01(1) or (3)-(5) defining various sexual activities; §22.011(a)(2) relating to sexual assault of a child; or §22.021(a)(2) relating to aggravated sexual assault of a child.

Providers may voluntarily use the HHSC checklist for monitoring all clients younger than 14 who are unmarried and sexually active. The checklist, if used, as well as any report of child abuse, shall be retained as part of the client’s record by each provider and made available during any monitoring conducted by HHSC.

Refer to: Form 1.3, “Child Abuse Reporting Guidelines (2 Pages)” in this section.
1.4.1.5 Training
All providers must develop training for all staff on the policies and procedures in regard to reporting child abuse. New staff must receive this training as part of their initial training/orientation. Training must be documented. As part of the training, staff must be informed that the staff person who conducts the screening and has cause to suspect abuse has occurred is legally responsible for reporting. A joint report may be made with the supervisor.

1.4.2 Maintenance of Provider Information
Providers must, within 10 calendar days of occurrence, report changes in address (physical location or accounting), telephone number, name, federal tax ID, and any other information pertaining to the structure of the provider’s organization (for example, performing providers). Changes in address, office telephone or fax number, and e-mail address should be updated online using the online provider lookup update page. Alternately, providers may update their address information using either the Provider Information Change (PIC) Form referenced below or the Demographic Update (DU) Form on the TMHP website.

Refer to: Subsection 1.4.2.2, “Online Provider Lookup” in this section.
Form 1.8, “Provider Information Change Form” in this section.

Effective January 1, 2009, TMHP implemented a system enhancement that notifies providers when they have an invalid address on file with TMHP. Account administrators who log onto their accounts on the TMHP website at www.tmhp.com are notified when they have an invalid address on file for any of the TPIs associated with their NPI.

The Check Status Amount Search screen on the provider’s secure homepage of the TMHP website will alert providers when payments are pending because of inaccurate or incomplete provider information. The Remittance and Status (R&S) Reports viewed on the TMHP website will also notify the provider of pending payments.

Pending payments will be released in the financial cycle of the following week after the address information has been updated. Payments that are pending for more than 180 days will be voided.

Other changes (in name, ownership status, federal tax ID, etc.) must be reported in writing to TMHP Provider Enrollment. Failure to notify TMHP of changes affects accurate processing and timely claims payment. In addition, failure to timely report such changes is a violation of the rules of Medicaid, and may result in administrative, civil, or criminal liability.

Refer to: Subsection 1.6, “Medicaid Waste, Abuse, and Fraud Policy” in this section.

The DU Form is only used to make changes to provider addresses on file with TMHP. Providers can use the DU Form on the TMHP website at any time via the My Account link. Providers must create a provider administrator account to access the DU Form on the secure pages of the TMHP website. Nonadministrator users must be assigned by the provider administrator. Only providers or their authorized representatives can access the provider administrator accounts to obtain and complete the DU Form. Providers will be prompted to verify their address(es) and make necessary changes at least once a year.

After the PIC or DU Form has been completed, it can be faxed to 1-512-514-4214, Attn: Provider Enrollment, or mailed to the address below for processing.

Texas Medicaid & Healthcare Partnership
Provider Enrollment
PO Box 200795
Austin, TX 78720-0795

Providers should keep a copy of the completed form for their records.
1.4.2.1 NPI Verification

TMHP verifies NPIs with NPPES to ensure that the NPI is active. If the NPI is shown by NPPES to be inactive, TMHP will notify the provider by letter.

The provider will be allowed a 60-day grace period to contact NPPES and resolve their NPI status. If the inactive NPI has not been reinstated within the 60-day grace period, TMHP will disenroll all TPIs associated with the inactive NPI. TMHP will also close all PCCM panel reports for the disenrolled TPIs. Clients enrolled in these panel reports will be notified to choose a different primary care provider.

1.4.2.2 Online Provider Lookup

An online provider lookup (OPL) is available on the public access portion of the TMHP website at www.tmhp.com. Provider information can be viewed by providers, clients, and anyone who accesses the TMHP website.

Providers can use the online update function to update their demographic information on the website. This allows users to view the most current information about the provider. To update demographic information online, authorized users log in to the TMHP website by clicking Log In on the homepage. Periodically, administrators will be required to verify their address when logging in to their account. This verification must be completed before the administrator can proceed to the secured portion of the website. The My Account page has a link to the Provider Demographic Update web page. Current information will be displayed with a button to allow editable fields to be changed. Demographic information may be updated only by authorized administrators. This authorization is controlled through the Permissions Management link, also located on the My Account page. Fields that can be updated online include the following:

- Primary physical address:
  - Street address lines 1 and 2
  - City, state, ZIP code
  - County
- Telephone numbers
- E-mail address
- Office hours
- Accepting new clients, current clients only, or not accepting new clients
- Additional sites where services are provided
- Languages spoken
- Additional services offered
- Medicaid waiver programs
- Client age or gender limitations
- Counties served

The following enhancements have also been made to the OPL to increase overall functionality:

- Clients are able to search for providers in up to 5 counties in a single search.
- Doing business as (DBA) names appear for providers or provider groups.
- The STAR Health program has been added as a searchable health plan.
- The default zip code radius for provider search has been increased to 10 miles from 5 miles.
- FQHCs and RHCs appear in the PCCM Provider Directory.
• Providers who make address updates may receive a confirmation e-mail from TMHP after the address has been verified and if their e-mail address has been provided.

• Users will be able to search for providers within a ZIP code that crosses multiple counties.

Each provider specialty and subspecialty listed in the OPL now has a corresponding definition. Users can view the definitions by clicking “more information” on either the basic or advanced search page or by hovering over the specialty on the results page. The definitions have been added to help clients locate the correct type of provider.

Primary Care Case Management (PCCM) Multispecialty Providers are able to self-Declare as many as four subspecialties to identify the services they offer. All other providers are able to self-Declare as many as three subspecialties to identify the services they offer. Providers may declare only subspecialties that are within the scope of their practice. Users are able to search for a provider on the OPL using these subspecialties.

Clients using the OPL will use drop-down boxes to select search criteria. An initial list will display all providers that meet the specified search criteria. Clicking on any name in that list will display the provider’s specific information, including a map of the office location.

Links to health maintenance organization (HMO) websites are also provided, enabling clients to search each HMO’s network of participating providers. The OPL supports both English and Spanish language users, and search results can be printed.

1.4.3 Retention of Records and Access to Records and Premises

The provider must maintain and retain all necessary documentation, records, R&S Reports, and claims to fully document the services and supplies provided and delivered to a client with Texas Medicaid coverage, the medical necessity of those services and supplies, costs included in cost reports or other documents used to determine a payment rate or fee, and records or documents necessary to determine whether payment for those items or services was due and was properly made for full disclosure to HHSC and its designee. A copy of the claim or R&S Reports without additional documentation will not meet this requirement.

The documentation includes the following, without limitation:

• Clinical medical patient records
• Other records pertaining to the patient
• Any other records of services, items, equipment, or supplies provided to the patient and payments made for those services
• Diagnostic tests
• Documents related to diagnosis
• Charting
• Billing records
• Invoices
• Treatments
• Services
• Laboratory results
• X-rays
• Documentation of delivery of items, equipment, and supplies
Accessible information must include information that is necessary for the agencies specified in this section to perform statutory functions.

The required information may also include, without limitation, business and accounting records with backup support documentation, statistical documentation, computer records and data, and patient sign-in sheets and schedules. Additionally, it includes all requirements and elements described in Title 1, Texas Administrative Code (TAC), §§371.1643(f), 371.1617(a)(2), and 371.1601 (definition of “failure to grant immediate access”).

The provider is required to submit original documents, records, and accompanying business records affidavits to representatives of the organizations listed in this section. These records should also be provided to any agents and contractors related to the organizations. At the discretion of the requestor, the provider may be permitted to instead provide copies notarized with the required business records affidavit. Requested records must be provided promptly and at no cost to the state or federal agency. If the provider was originally requested to provide original documents and subsequent requests for copies of these records are made by the provider, any and all costs associated with copying or reproducing any portion of the original records will be at the expense of the provider. This applies to any request for copies made by the provider at any point in the investigative process until such time as the agency deems the investigation to be finalized. A method of payment for the copying charge, approved by the agency, would be used to pay for the copying of the records. If copies of records are requested from the provider initially, the provider must submit copies of such records at no cost to the requestor’s organization.

The provider must provide immediate access to the provider’s premises and records for purposes of reviewing, examining, and securing custody of records, documents, electronic data, equipment, or other requested items, as determined necessary by the requestor to perform statutory functions. Nothing in this section will in any way limit access otherwise authorized under state or federal law. If, in the opinion of the Inspector General or other requestor, the documents may be provided at the time of the request or in less than 24 hours or the Inspector General or other requestor suspects the requested documents or other requested items may be altered or destroyed, the response to the request must be completed by the provider at the time of the request or in less than 24 hours as allowed by the requestor. If, in the opinion of the Inspector General or other requestor, the requested documents and other items requested cannot be completely provided on the day of the request, the Inspector General or requestor may set the deadline for production at 24 hours from the time of the original request.

Failure to supply the requested documents and other items, within the time frame specified, may result in payment hold to the provider’s Medicaid payments, recoupment of payments for all claims related to the missing records, contract cancellation, and/or exclusion from Texas Medicaid.

As directed by the requestor, the provider or person will relinquish custody of the requested documents and other items and the requestor will take custody of the records, removing them from the premises. If the requestor should allow longer than “at the time of the request” to produce the records, the provider will be required to produce all records completed, at the time of the completion or at the end of each day of production, as directed by the requestor who will take custody of the requested items.

If the provider places the required information in another legal entity’s records, such as a hospital, the provider is responsible for obtaining a copy of these requested records for use by the requesting state and federal agencies.

These documents and claims must be retained for a minimum period of five years from the date of service or until all audit questions, appeal hearings, investigations, or court cases are resolved. Freestanding RHCs must retain their records for a minimum of six years, and hospital-based RHCs must retain their records for a minimum of ten years. These records must be made available immediately at the time of the request to employees, agents, or contractors of HHSC Office of Inspector General (OIG), the Texas Attorney General’s Medicaid Fraud Control Unit (MFCU) or Antitrust and Civil Medicaid Fraud Section, TMHP, DFPS, the Department of Aging and Disability Services (DADS), Department of State Health Services (DSHS), Department of Assistive and Rehabilitative Services (DARS), U.S. Department of Health and Human Services (HHS) representative, any state or federal agency authorized
to conduct compliance, regulatory, or program integrity functions on the provider, person, or the services rendered by the provider or person, or any agent, contractor, or consultant of any agency or division delineated above. In addition, the provider must meet all requirements of 1 TAC, Part 15, §371.1643(f).

The records must be available as requested by each of these entities, during any investigation or study of the appropriateness of the Medicaid claims submitted by the provider.

1.4.3.1 Payment Error Rate Measurement (PERM) Process

CMS assesses Texas Medicaid using the PERM process to measure improper payments in Texas Medicaid. Providers will be required to provide medical record documentation to support the medical reviews that the federal review contractor will conduct for Texas Medicaid fee-for-service and PCCM Medicaid and State Children’s Health Insurance Program (SCHIP) claims.

Under the PERM process, if a claim is selected in a sample for a service that a provider rendered to a Medicaid client, the provider will be contacted to submit a copy of the medical records that support the medical review of the claim. All providers should check the TMHP system to ensure their current telephone number and addresses are correct in the system. If the information is incorrect or incomplete, providers must request a change immediately to ensure the PERM medical record request can be delivered. Client authorization for release of this information is not required.

Once a provider receives the request for medical records, the provider must submit the information electronically or in hard copy within 60-calendar days. It is important that providers cooperate by submitting all requested documentation in a timely manner because no response or insufficient documentation will count against the state as an error. This can ultimately negatively impact the amount of federal funding received by Texas for Medicaid.

1.4.4 Release of Confidential Information

Information regarding the diagnosis, evaluation, or treatment of a client with Texas Medicaid coverage by a person licensed or certified to diagnose, evaluate, or treat any medical, mental/emotional disorder, or drug abuse, is confidential information that the provider may disclose only to authorized persons. Family planning information is sensitive, and confidentiality must be ensured for all clients, especially minors.

Only the client may give written permission for release of any pertinent information before client information can be released, and confidentiality must be maintained in all other respects. If a client’s medical records are requested by a licensed Texas health-care provider or a physician licensed by any state, territory, or insular possession of the United States or any State or province of Canada, for purposes of emergency or acute medical care, a provider must furnish such records at no cost to the requesting provider. This includes records received from another physician or health-care provider involved in the care or treatment of the patient. If the records are requested for purposes other than for emergency or acute medical care, the provider may charge the requesting provider a reasonable fee and retain the requested information until payment is received.

The client’s signature is not required on the claim form for payment of a claim, but HHSC recommends the provider obtain written authorization from the client before releasing confidential medical information. A release may be obtained by having the client sign the indicated block on the claim form after the client has read the statement of release of information that is printed on the back of the form. The client’s authorization for release of such information is not required when the release is requested by and made to DADS, HHSC, DSHS, TMHP, DFPS, DARS, HHSC OIG, the Texas Attorney General’s MFCU or Antitrust and Civil Fraud Division, or HHS.
1.4.5 Compliance with Federal Legislation
HHSC complies with HHS regulations that protect against discrimination. All contractors must agree to comply with the following:

- Title VI of the Civil Rights Act of 1964 (Public Law 88-352), section 504 of the Rehabilitation Act of 1973 (Public Law 93-112), The Americans with Disabilities Act of 1990 (Public Law 101-336), Title 40, Chapter 73, of the TAC, all amendments to each, and all requirements imposed by the regulations issued pursuant to these acts. The laws provide in part that no persons in the U.S. shall, on the grounds of race, color, national origin, age, sex, disability, political beliefs, or religion, be excluded from participation in or denied any aid, care, service, or other benefits provided by federal and/or state funding, or otherwise be subjected to any discrimination.

- Health and Safety Code 85.113 as described in “Model Workplace Guidelines for Businesses, State Agencies, and State Contractors” on page G-2 (relating to workplace and confidentiality guidelines on AIDS and HIV)

**Exception:** In the case of minors receiving family planning services, only the client may consent to release of medical documentation and information. Providers must comply with the laws and regulations concerning discrimination. Payments for services and supplies are not authorized unless the services and supplies are provided without discrimination on the basis of race, color, sex, national origin, age, or disability. Send written complaints of noncompliance to the following address:

HHSC Commissioner  
1100 West 49th Street  
Austin, TX 78756-3172

**Reminder:** Each provider must furnish covered Medicaid services to eligible clients in the same manner, to the same extent, and of the same quality as services provided to other patients. Services made available to other patients must be made available to Texas Medicaid clients if the services are benefits of Texas Medicaid.

1.4.6 Tamper-Resistant Prescription Pads
Providers are required by federal law (Public Law 110-28) to use a tamper-resistant prescription pad when writing a prescription for any drug for Medicaid clients.

Providers must take necessary steps to ensure that tamper-resistant pads are used for all written prescriptions provided to Medicaid clients. Providers may also use compliant, non-written alternatives for transmitting prescriptions such as by telephone, fax, or electronic submittal. Pharmacies are required to ensure that all written Medicaid prescriptions submitted for payment to the Vendor Drug Program are written on a compliant tamper-resistant pad.

If a prescription is not submitted on a tamper-resistant prescription form, a pharmacy may fill the prescription and obtain a compliant prescription by fax, electronic prescription, or re-written on tamper-resistant paper within 72 hours after the date the prescription was filled.

Providers may purchase tamper-resistant prescription pads from the vendor of their choice.

Special copy-resistant paper is not a requirement for prescriptions printed from electronic medical records (EMRs) or ePrescribing generated prescriptions. These prescriptions may be printed on plain paper and will be fully compliant with all three categories of the tamper-resistant regulations, provided they contain at least one feature from each of the three following categories:

- Prevents unauthorized copying of completed or blank prescription forms.
- Prevents erasure or modification of information written on the prescription form.
- Prevents the use of counterfeit prescription forms.
1.4.7 Utilization Control — General Provisions

Title XIX of the Social Security Act, sections 1902 and 1903, mandates utilization control of all Texas Medicaid services under regulations found at Title 42 CFR, Part 456. Utilization review activities required by Texas Medicaid are completed through a series of monitoring systems developed to ensure the quality of services provided, and that all services are both medically necessary and billed appropriately. Both clients and providers are subject to utilization review monitoring. Utilization control procedures safeguard against the delivery of unnecessary services, monitor quality, and ensure payments are appropriate and according to Texas Medicaid policies, rules, and regulations. All providers identified as a result of utilization control activities are presented to HHSC OIG to determine any and all subsequent actions.

The primary goal of utilization control activity is to identify providers with practice patterns inconsistent with the federal requirements and Texas Medicaid scope of benefits, policies, and procedures. The use of utilization control monitoring systems allows for identification of providers whose patterns of practice and use of services fall outside of the norm for their peer groups. Providers identified as exceptional are subject to an in-depth review of all Texas Medicaid billings. These review findings are presented to the HHSC OIG to determine any necessary action. Medical records may be requested from the provider to substantiate the medical necessity and appropriateness of services billed to Texas Medicaid. Inappropriate service utilization may result in recoupment of overpayments and/or sanctions, or other administrative actions deemed appropriate by the HHSC OIG. There are instances when a training specialist may be directed to communicate with the provider to offer assistance with the technical or administrative aspects of Texas Medicaid.

At the direction of the HHSC OIG, a provider’s claims may be manually reviewed before payment. Parameters are developed for prepayment review based on the specific areas of concern identified in each case. As part of the prepayment review process, providers are required to submit paper claims, rather than electronic claims, along with supporting medical record documentation (e.g., clinical notes, progress notes, diagnostic testing results, other reports, superbills, X-rays, and any related medical record documentation) attached to each claim for all services billed. This documentation is used to ascertain that the services billed were medically necessary, billed appropriately, and according to Texas Medicaid requirements and policies. Services inconsistent with Texas Medicaid requirements and policies are adjudicated accordingly. Claims submitted initially without the supporting medical record documentation will be denied. Additional medical record documentation submitted by the provider for claims denied as a result of the prepayment review process is not considered at a later time. A provider is removed from prepayment review only when determined appropriate by the HHSC OIG. Once removed from prepayment review, a follow-up assessment of the provider’s subsequent practice patterns is performed to monitor and ensure continued appropriate use of resources. Noncompliant providers are subject to administrative sanctions up to and including exclusion and contract cancellation, as deemed appropriate by the HHSC OIG as defined in the rules in 1 TAC §371.1643. Providers placed on prepayment review must submit all paper claims and supporting medical record documentation to the following address:

Texas Medicaid & Healthcare Partnership
Attention: Prepayment Review MC-A11 SURS
PO Box 203638
Austin, Texas 78720-3638

1.4.8 Provider Certification/Assignment

Texas Medicaid service providers are required to certify compliance with or agree to various provisions of state and federal laws and regulations. After submitting a signed claim to TMHP, the provider certifies the following:

- Services were personally rendered by the billing provider or under the personal supervision of the billing provider, if allowed for that provider type, or under the substitute physician arrangement.
- The information on the claim form is true, accurate, and complete.
• All services, supplies, or items billed were medically necessary for the client’s diagnosis or treatment. Exception is allowed for special preventive and screening programs (for example, family planning and THSteps).

• Medical records document all services billed and the medical necessity of those services.

• All billed charges are usual and customary for the services provided. The charges must not be higher than the fees charged to private-pay patients.

• The provider will not bill Texas Medicaid for services that are provided or offered to non-Medicaid patients, without charge, discounted or reduced in any fashion including, but not limited to, sliding scales or advertised specials. Any reduced, discounted, free, or special fee advertised to the public must also be offered to Texas Medicaid clients.

• Services were provided without regard to race, color, sex, national origin, age, or handicap.

• The provider of medical care and services files a claim with Texas Medicaid agreeing to accept the Medicaid reimbursement as payment in full for those services covered under Texas Medicaid. The client with Medicaid coverage, or others on their behalf, must not be billed for the amount above that which is paid on allowed services or for services denied or reduced as a result of errors made in claims filing, claims preparation, missed filing deadlines, or failure to follow the appropriate appeal process. However, the client may be billed for noncovered services for which Texas Medicaid does not make any payment. Before providing services, providers should always inform clients of their liability for services that are not a benefit of Texas Medicaid, including use of the Client Acknowledgment Statement.

• The provider understands that endorsing or depositing a Texas Medicaid check is accepting money from federal and state funds and that any falsification or concealment of material fact related to payment may be grounds for prosecution under federal and state laws.

Providers must not bill for, and agree not to bill for, any service provided for which the client bears no liability to pay (i.e. free services). The only exceptions to this ban on billing for services that are free to the user are:

• Services offered by or through the Title V agency when the service is a benefit of Texas Medicaid and rendered to an eligible client

• Services included in the Texas Medicaid client’s individualized education plan (IEP) or individualized family service plan (IFSP) if the services are covered under the Title XIX state plan, even though they are free to the users of the services

1.4.8.1 Delegation of Signature Authority

A provider delegating signatory authority to a member of the office staff or to a billing service remains responsible for the accuracy of all information on a claim submitted for payment. A provider’s employees or a billing service and its employees are equally responsible for any false billings in which they participated or directed.

If the claim is prepared by a billing service or printed by data processing equipment, it is permissible to print “Signature on File” in place of the provider’s signature. When claims are prepared by a billing service, the billing service must obtain and keep a letter on file that is signed by the provider authorizing claim submission.
1.4.9 Billing Clients

A provider cannot require a down payment before providing Medicaid-allowable services to eligible clients, bill, nor take recourse against eligible clients for denied or reduced claims for services that are within the amount, duration, and scope of benefits of Texas Medicaid if the action is the result of any of the following provider-attributable errors:

- Failure to submit a claim, including claims not received by TMHP
- Failure to submit a claim to TMHP for initial processing within the 95-day filing deadline (or the initial 365-day deadline, if applicable)
- Submission of an unsigned or otherwise incomplete claim such as omission of the Hysterectomy Acknowledgment Statement or Sterilization Consent Form with claims for these procedures
- Filing an incorrect claim
- Failure to resubmit a corrected claim or rejected electronic media claim within the 120-day resubmittal period
- Failure to appeal a claim within the 120-day appeal period. Errors made in claims preparation, claims submission, or appeal process
- Failure to submit a claim to TMHP within 95 days of a denial by Titles V or XX for family planning services
- Failure to submit a claim within 95 days from the disposition date from Medicare or a primary third party insurance resource
- Failure to obtain prior authorization for services that require prior authorization under Texas Medicaid

Providers must certify that no charges beyond reimbursement paid under Texas Medicaid for covered services have been, or will be, billed to an eligible client. Federal regulations prohibit providers from charging clients a fee for completing or filing Medicaid claim forms. Providers are not allowed to charge TMHP for filing claims. The cost of claims filing is part of the usual and customary rate for doing business.

Medicaid payment to physicians for covered services includes the incidental services such as completion of required forms submitted by a nursing facility to the physician for signature. It is not acceptable for the physician to charge Texas Medicaid clients, their family, or the nursing facility for telephone calls, telephone consultations, or signing forms. Medicaid payment is considered payment in full. The visit reimbursement includes any incidental services.

In accordance with current federal policy, Texas Medicaid and Texas Medicaid clients cannot be charged for the client’s failure to keep an appointment. Only billings for services provided are considered for payment. Clients may not be billed for the completion of a claim form, even if it is a provider’s office policy.

Letters of inquiry about client billing are sometimes sent to providers in lieu of telephone calls from TMHP representatives. In either case, it is mandatory that the questions be answered with the requested pertinent information. Upon receipt, TMHP forwards these letters to HHSC. HHSC uses the information to resolve client billing/liability issues. It is mandatory that these letters be signed, dated, and returned within ten business days.

Refer to: Hospital Services Handbook (Vol. 2, Provider Handbooks) for more information about spell-of-illness.

Subsection 4.6, “Medically Needy Program (MNP)” in Section 4, “Client Eligibility” (Vol. 1, General Information).

Form 1.6, “Private Pay Agreement” in this section.
1.4.9.1 Client Acknowledgment Statement

Texas Medicaid only reimburses services that are medically necessary or benefits of special preventive and screening programs such as family planning and THSteps. Hospital admissions denied by the Texas Medical Review Program (TMRP) also apply under this policy. The provider may bill the client only if:

- A specific service or item is provided at the client’s request.
- The provider has obtained and kept a written Client Acknowledgment Statement signed by the client that states:
  - “I understand that, in the opinion of (provider’s name), the services or items that I have requested to be provided to me on (dates of service) may not be covered under the Texas Medical Assistance Program as being reasonable and medically necessary for my care. I understand that the HHSC or its health insuring agent determines the medical necessity of the services or items that I request and receive. I also understand that I am responsible for payment of the services or items I request and receive if these services or items are determined not to be reasonable and medically necessary for my care.”
  - “Comprendo que, según la opinión del (nombre del proveedor), es posible que Medicaid no cubra los servicios o las provisiones que solicité (fecha del servicio) por no considerarlos razonables ni médicamente necesarios para mi salud. Comprendo que el Departamento de Salud de Texas o su agente de seguros de salud determina la necesidad médica de los servicios o de las provisiones que el cliente solicite o reciba. También compreno que tengo la responsabilidad de pagar los servicios o provisiones que solicite y que reciba si después se determina que esos servicios y provisiones no son razonables ni médicamente necesarios para mi salud.”

A provider is allowed to bill the following to a client without obtaining a signed Client Acknowledgment Statement:

- Any service that is not a benefit of Texas Medicaid (for example, cellular therapy).
- All services incurred on noncovered days because of eligibility or spell of illness limitation. Total client liability is determined by reviewing the itemized statement and identifying specific charges incurred on the noncovered days. Spell of illness limitations do not apply to medically necessary stays for THSteps clients birth through 20 years of age.
- The reduction in payment that is because of the medically needy spend down MNP is limited to children 18 years of age and younger and pregnant women. The client’s potential liability would be equal to the amount of total charges applied to the spend down. Charges to clients for services provided on ineligible days must not exceed the charges applied to spend down.
- All services provided as a private pay patient. If the provider accepts the client as a private pay patient, the provider must advise clients that they are accepted as private pay patients at the time the service is provided and responsible for paying for all services received. In this situation, HHSC strongly encourages the provider to ensure that the client signs written notification so there is no question how the client was accepted. Without written, signed documentation that the Texas Medicaid client has been properly notified of the private pay status, the provider cannot seek payment from an eligible Texas Medicaid client.
- The client is accepted as a private pay patient pending Texas Medicaid eligibility determination and does not become eligible for Medicaid retroactively. The provider is allowed to bill the client as a private pay patient if retroactive eligibility is not granted. If the client becomes eligible retroactively, the client notifies the provider of the change in status. Ultimately, the provider is responsible for filing timely Texas Medicaid claims. If the client becomes eligible, the provider must refund any money paid by the client and file Medicaid claims for all services rendered.
A provider attempting to bill or recover money from a client in violation of the above conditions may be subject to exclusion from Texas Medicaid.

**Important:** Ancillary services must be coordinated and pertinent eligibility information must be shared. The primary care provider is responsible for sharing eligibility information with others (e.g., emergency room staff, laboratory staff, and pediatricians).

### 1.4.10 General Medical Record Documentation Requirements

The Administrative Simplification Act of the Health Insurance Portability and Accountability Act (HIPAA) of 1996 mandates the use of national coding and transaction standards. HIPAA requires that the American Medical Association’s (AMA) Current Procedural Terminology (CPT) system be used to report professional services, including physician services. Correct use of CPT coding requires using the most specific procedure code that matches the services provided based on the procedure code’s description. Providers must pay special attention to the standard CPT descriptions for the evaluation and management services. The medical record must document the specific elements necessary to satisfy the criteria for the level of service as described in CPT. Reimbursement may be recouped when the medical record does not document that the level of service provided accurately matches the level of service claimed. Furthermore, the level of service provided and documented must be medically necessary based on the clinical situation and needs of the patient.

HHSC and TMHP routinely perform retrospective reviews of all providers. HHSC ultimately is responsible for Texas Medicaid utilization review activities. This review includes comparing services billed to the client’s clinical record. The following requirements are general requirements for all providers. Any mandatory requirement not present in the client’s medical record subjects the associated services to recoupment.

**Note:** This list is not all-inclusive. Additional and more specific requirements may apply to special services areas.

**Note:** Medical documentation that is maintained by a provider in a client’s record can be maintained in a language other than English. However, when TMHP, HHSC, or any other state/federal agency requests a written record or conducts a documentation review, this medical documentation must be provided in English in a timely manner.

- (Mandatory) All entries are legible to individuals other than the author, dated (month, day, and year), and signed by the performing provider
- (Mandatory) Each page of the medical record documents the patient’s name and Texas Medicaid number
- (Mandatory) A copy of the actual authorization from HHSC or its designee (e.g., TMHP) is maintained in the medical record for any item or service that requires prior authorization
- (Mandatory) Allergies and adverse reactions (including immunization reactions) are prominently noted in the record
- (Mandatory) The selection of evaluation and management codes (levels of service) is supported by the client’s clinical record documentation. The AMA CPT descriptors of key/contributory components with level of service descriptions are used to evaluate the selection of levels of service
- (Mandatory) The history and physical documents the presenting complaint with appropriate subjective and objective information
- (Mandatory) The services provided are clearly documented in the medical record with all pertinent information regarding the patient’s condition to substantiate the need and medical necessity for the services
- (Mandatory) Medically necessary diagnostic lab and X-ray results are included in the medical record and abnormal findings have an explicit notation of follow-up plans
(Mandatory) Necessary follow-up visits specify time of return by at least the week or month
(Mandatory) Unresolved problems are noted in the record
(Desirable) Immunizations are noted in the record as complete or up-to-date
(Desirable) –Personal data includes address, employer, home/work telephone numbers, sex, marital status, and emergency contacts

1.4.11 Informing Pregnant Clients About CHIP Benefits
Section 24, S.B. 1188, 79th Legislature, Regular Session, 2005, requires that Medicaid providers rendering services to a pregnant Medicaid client must inform the client of the health benefits for which the client or the client’s child may be eligible under the Children’s Health Insurance Program (CHIP).
CHIP is available to children whose families have low to moderate income, who earn too much money to qualify for Texas Medicaid, and who do not have private insurance. Some clients may have to pay an enrollment fee.
To qualify for CHIP, a child must be:
- A Texas resident
- 18 years of age or younger
- A citizen or legal permanent resident of the United States
- Must meet all income and resource guidelines
CHIP benefits include:
- Physician, hospital, X-ray, and lab services
- Well-baby and well-child visits
- Immunizations
- Prescription drugs
- Dental services
- DME
- Prosthetic devices (with a $20,000 limit per 12-month period)
- Case coordination and enhanced services for children with special health-care needs and children with disabilities
- Physical, speech, and occupational therapy
- Home health services
- Transplants
- Mental health services
- Vision services
- Chiropractic services
Individuals may apply for CHIP by downloading and completing the application found on the CHIP page of the HHSC website at www.hhsc.state.tx.us/chip or by calling the toll-free CHIP number at 1-800-647-6558.
1.5 Enrollment Criteria for Out-of-State Providers

Texas Medicaid covers medical assistance services provided to eligible Texas Medicaid clients while in a state other than Texas, as long as the client does not leave Texas to receive out-of-state medical care that can be received in Texas. Services provided outside the state are covered to the same extent medical assistance is furnished and covered in Texas when the service meets one or more of the following requirements of 1 TAC §355.8083:

**Note:** Border state providers (providers rendering services within 50 miles of the Texas border) are considered in-state providers.

- The medical services are needed because of a medical emergency documented by the attending physician or other provider.

  **Note:** An out-of-state provider seeking enrollment under this criterion must include with the enrollment application a copy of the claim containing the diagnosis indicating emergency care or medical record documentation. The documentation must demonstrate emergency care was provided to a Texas Medicaid client. Providers enrolled under this criterion will be enrolled for a period of 90 days from the enrollment date.

- The services are medically necessary and, in the opinion of the attending physician or other provider, the client's health may be endangered if he or she were required to travel to Texas.

  **Note:** An out-of-state provider seeking enrollment under this criterion must include with the enrollment application an explanation of the circumstances, demonstrating why the Texas Medicaid client's health would have been endangered if the client had been required to travel to Texas. Providers enrolled under this criterion will be enrolled for a period of 90 days from the enrollment date.

- HHSC or its designee determines that the medically necessary services are more readily available in the state where the client is located.

  **Note:** This criterion may apply when the Texas Medicaid client is already out-of-state and receives services that are not readily available in Texas, or when a Texas Medicaid client must leave Texas in order to receive care that is not readily available in Texas. HHSC makes the determination of whether this criterion applies on a case by case basis. An out-of-state provider seeking enrollment under this criterion must include with the enrollment application documentation for why this criterion applies, and must provide any additional information requested by HHSC or its designee. Providers enrolled under this criterion may be enrolled for a time limited period.

- The customary or general practice for recipients in a particular locality is to use medical resources in the other state.

  **Note:** An out-of-state provider located within 50 miles of the Texas border is automatically considered to meet this criterion. HHSC makes the determination of whether this criterion applies on a case by case basis. An out-of-state provider located more than 50 miles from Texas and seeking enrollment under this criterion must include with the enrollment application documentation for why this criterion applies, and must provide any additional information requested by HHSC or its designee. Such providers, if approved for enrollment, may be enrolled for a time limited period.

- HHSC makes Title IV-E adoption assistance or Title IV-E foster care maintenance payments for a child who is also eligible for Texas medical assistance benefits.

  **Note:** HHSC makes the determination of whether this criterion applies on a case by case basis. An out-of-state provider seeking enrollment under this criterion must include with the enrollment application documentation explaining why this criterion applies, and must provide any additional information requested by HHSC or its designee. Such providers, if approved for enrollment, may be enrolled for a time limited period.
• Other out-of-state medical care may be considered when prior authorized by HHSC or its designee.

**Note:** Providers seeking enrollment under this criterion are encouraged to contact TMHP to request approval before filing an enrollment application. TMHP will coordinate the request with HHSC. HHSC will make the determination of whether this criterion applies on a case by case basis. The provider must provide any additional information requested by HHSC or its designee. Such providers, if approved for enrollment, may be enrolled for a time limited period.

Providers located out-of-state seeking reimbursement under one or more of the above criteria must submit an enrollment application and be approved for enrollment.

An out-of-state provider that meets none of the above criteria, but that is eligible to receive reimbursement for Medicare crossover claims involving Texas Medicaid dual eligible clients, may seek enrollment in order to receive such reimbursement. Such providers, if approved for enrollment, will be restricted to receiving reimbursement only for Medicare crossover claims.

**Refer to:** Subsection 2.6, “Medicare Crossover Claim Reimbursement” in this section.

Payments to out-of-state providers enrolled in Texas Medicaid are made according to the usual, customary, and reasonable charges or the stipulated fee for services as appropriate for the provided care. Reimbursement may not exceed the lesser of:

- The Medicaid reasonable charge or fee determined for the same services in Texas; or
- If agreed to by HHSC, 100 percent of the Medicare reasonable charge determination for the same service in the state where the service was provided.

Inpatient hospital stays are reimbursed according to the Texas prospective payment methodology (diagnosis-related group [DRG]). Payments made on a reasonable cost basis are mutually determined by the state agency and the contractor.

TMHP must receive claims from out-of-state providers within 365 days from the date of service.

### 1.6 Medicaid Waste, Abuse, and Fraud Policy

The OIG has the responsibility to identify and investigate cases of suspected waste, abuse, and fraud in Medicaid and other health and human services programs. This responsibility, granted through state and federal law, gives the OIG the authority to pursue administrative sanctions and to refer cases to prosecutors, licensure and certification boards, and other agencies. Additionally, Texas Medicaid is required to disenroll or exclude any provider who has been disenrolled or excluded from Medicare or any other state health-care program.

Anyone participating in Texas Medicaid must understand the requirements for participation. Available methods both to learn and stay up to date on program requirements include the following:

- **Provider education.** Attendance at educational workshops and training sessions. Regular training opportunities are offered by TMHP.
- **Texas Medicaid publications.** These include the *Texas Medicaid Provider Procedures Manual*, the *Texas Medicaid Bulletin*, and banner messages, which are included in Remittance and Status (R&S) Reports.
- **All adopted agency rules.** These include those related to fraud, waste, and abuse contained in Title 1, Chapter 371 of the Texas Administrative Code (TAC).
- **State and federal law.** Statutes and other law pertinent to Texas Medicaid and fraud, waste, and abuse within Texas Medicaid.
In addition, providers are responsible for the delivery of health-care items and services to Medicaid clients in accordance with all applicable licensure and certification requirements and accepted medical community standards and standards. Such standards include those related to medical record and claims filing practices, documentation requirements, and records maintenance. The TAC requires providers to follow these standards. For more information, consult 1 TAC §371.1617(a)(6)(A).

Texas Medicaid providers must follow the coding and billing requirements of the *Texas Medicaid Provider Procedures Manual*. However, if coding and billing requirements for a particular service are not addressed in the TMPPM, and if coding and billing requirements are not otherwise specified in program policy (such as in provider bulletins or banners), then providers must follow the most current coding guidelines. These include:

- **CPT** as set forth in the American Medical Association’s most recently published “CPT books”, “CPT Assistant” monthly newsletters, and other publications resulting from the collaborative efforts of American Medical Association with the medical societies.

- Healthcare Common Procedure Coding System (HCPCS) as developed and maintained by the federal government.

- National Correct Coding Initiative (NCCI), as set forth by CMS, and as explained in the NCCI Policy and Medicare Claims Processing Manuals. NCCI consists of procedure code combinations that a provider must not bill together. One of the codes in the pair is considered a part of the primary procedure and not reimbursable to the same provider on the same date of service.

**Exception:** NCCI outlines use of modifiers some of which are not currently recognized by Texas Medicaid. See the list of modifiers utilized by Texas Medicaid in subsection 6.3.5, “Modifiers” in Section 6, “Claims Filing” (Vol. 1, General Information).

- **Current Dental Terminology** (CDT) as published by the American Dental Association.

- **International Classification of Diseases, 9th Revision, Clinical Modification** (ICD-9-CM).

Failure to comply with the guidelines provided in these publications may result in a provider being found to have engaged in one or more program violations listed in 1 TAC § 371.1617.

All providers are held responsible for any claims preparation or other activities that may be performed under the provider’s authority. For example, providers are held responsible for any omissions and the accuracy of submitted information, even if those actions are performed by office staff, contractors, or billing services. This, however, does not absolve these other individuals for their participation in any documents provided to the state or designee with false, inaccurate, or misleading information; or pertinent omissions.

HHSC-OIG may impose one or any combination of administrative actions or administrative sanctions on Texas Medicaid providers or other persons when fraud, waste, or abuse is determined. Those who may be sanctioned include:

- Those furnishing services or items directly or indirectly.

- Those billing for services.

- Those violating any of the provisions delineated in this section.

- Affiliates of a provider or person violating any of the provisions delineated in this section.

Administrative sanctions include, without limitation:

- Exclusion from program participation for a specified period of time, permanently, or indefinitely. Anyone excluded from Texas Medicaid is also automatically excluded from all programs under Titles V and XX of the Social Security Act.
• Suspension of Medicaid payments (payment hold) to a provider.
• Recoupment of Medicaid overpayments, including any overpayments determined through statistical sampling and extrapolation.
• Restricted Medicaid reimbursement (specific services will not be reimbursed to an individual provider during the time the provider is on restricted reimbursement; however, reimbursement for other services may continue).
• Cancellation of the Medicaid provider agreement (however, a termination in accordance with the agreement itself is not considered a sanction).
• Exclusion or suspension under the authority of the CFR.

Administrative actions include:
• Amending a provider agreement so that it will terminate on a specific date.
• Granting an agreement or transferring a provider to an agreement with special terms or conditions, including a probationary agreement.
• Required attendance at provider education sessions.
• Prior authorization of selected services.
• Pre-payment review.
• Post-payment review.
• Required attendance at informal or formal provider corrective action meetings.
• Submission of additional documentation or justification that is not normally required to accompany submitted claims. (Failure to submit legible documentation or justification requested will result in denial of the claim.)
• Oral, written, or personal educational contact with the provider.
• Posting of a surety bond or providing a letter of credit.
• Having a subpoena served to compel an appearance for testimony or the production of relevant evidence, as determined by the HHSC/OIG.

Anyone facing an administrative sanction has a right to formal due process. This formal due process may include a hearing before an administrative law judge. Conversely, anyone facing an administrative action is not entitled to formal due process. People who induce, solicit, receive, offer, or pay any remuneration (including, but not limited to, bribes, kickbacks, or rebates) directly or indirectly in relation to referrals, purchases, leases, or arrangements of services covered by Medicare or Texas Medicaid may be in violation of state statutes and guilty of a federal felony offense. State law also allows for the suspension of providers convicted of a criminal offense related to Medicare or Texas Medicaid. The commission of a felony in Medicaid or Medicare programs may include fines or imprisonment ranging from five years to life in prison. Examples of inducements include a service, cash in any amount, entertainment, or any item of value.

As stated in 1 TAC § 371.1617, following is a nonexclusive list of grounds or criteria for the Inspector General’s administrative enforcement and/or referral for criminal, civil, or licensure or certification investigation and judicial action regarding program violations by any provider or person. Violations result from a provider or person who knew or should have known the following were violations. The headings of each group listed below are provided solely for organization and convenience and are not elements of any program violation.

1) Claims and Billing.
   a) Submitting or causing to be submitted a false statement or misrepresentation, or omitting pertinent facts when claiming payment under the Texas Medicaid or other HHS program
or when supplying information used to determine the right to payment under the Texas Medicaid or other HHS program;

b) Submitting or causing to be submitted a false statement, information or misrepresentation, or omitting pertinent facts to obtain greater compensation than the provider is legally entitled to;

c) Submitting or causing to be submitted a false statement, information or misrepresentation, or omitting pertinent facts to meet prior authorization requirements;

d) Submitting or causing to be submitted under Title XVIII (Medicare) or a state healthcare program claims or requests for payment containing unjustified charges or costs for items or services that substantially exceed the person's usual and customary charges or costs for those items or services to the public or the private pay patients unless otherwise authorized by law;

e) Submitting or causing to be submitted claims with a pattern of inappropriate coding or billing that results in excessive costs to the Texas Medicaid or other HHS program;

f) Billing or causing claims to be filed for services or merchandise that were not provided to the recipient;

g) Submitting or causing to be submitted a false statement or misrepresentation that, if used, has the potential of increasing any individual or state provider payment rate or fee;

h) Submitting or causing to be submitted to the Texas Medicaid or other HHS program a cost report containing costs not associated with Texas Medicaid or other HHS program or not permitted by Texas Medicaid or other HHS program policies;

i) Presenting or causing to be presented to an operating agency or its agent a claim that contains a statement or representation that the person knows or should have known to be false;

j) Billing or causing claims to be submitted to the Texas Medicaid or other HHS program for services or items furnished personally by, at the medical direction of, or on the prescription or order of a person who is excluded from Texas Medicaid, other HHS program, or Medicare or has been excluded from and not reinstated within Texas Medicaid, other HHS program, or Medicare;

k) Billing or causing claims to be submitted to the Texas Medicaid or other HHS program for services or items that are not reimbursable by the Texas Medicaid or other HHS program;

l) Billing or causing claims to be submitted to the Texas Medicaid or other HHS program for a service or item which requires a prior order or prescription by a licensed health-care practitioner when such order or prescription has not been obtained;

m) Billing or causing claims to be submitted to the Texas Medicaid or other HHS program for an item or service substituted without authorization for the item or service ordered, prescribed or otherwise designated by the Texas Medicaid or other HHS program;

n) Billing or causing claims to be submitted to the Texas Medicaid or other HHS program by a provider or person who is owned or controlled, directly or indirectly, by an excluded person; and

o) Billing or causing claims to be submitted to the Texas Medicaid or other HHS program by a provider or person for charges in which the provider discounted the same services for any other type of patient.

2) Records and Documentation.

a) Failing to maintain for the period of time required by the rules relevant to the provider in question records and other documentation that the provider is required by federal or state law or regulation or by contract to maintain in order to participate in the Texas Medicaid or other HHS program or to provide records or documents upon written request for any records or documents determined necessary by the Inspector General to complete their statutory functions related to a fraud and abuse investigation. Such records and documentation include, without limitation, those necessary:
i) To verify specific deliveries, medical necessity, medical appropriateness, and adequate written documentation of items or services furnished under Title XIX or Title XX;

ii) To determine in accordance with established rates appropriate payment for those items or services delivered;

iii) To confirm the eligibility of the provider to participate in the Texas Medicaid or other HHS program; e.g., medical records (including, without limitation, X-rays, laboratory and test results, and other documents related to diagnosis), billing and claims records, cost reports, managed care encounter data, financial data necessary to demonstrate solvency of risk-bearing providers, and documentation (including, without limitation, ownership disclosure statements, articles of incorporation, by-laws, and corporate minutes) necessary to demonstrate ownership of corporate entities; and

iv) To verify the purchase and actual cost of products;

b) Failing to disclose fully and accurately or completely information required by the Social Security Act and by 42 CFR Part 455, Subpart B; 42 CFR Part 420, Subpart C; 42 CFR §1001.1101; and 42 CFR Part 431;

c) Failing to provide immediate access, upon request by a requesting agency, to the premises or to any records, documents, and other items or equipment the provider is required by federal or state law or regulation or by contract to maintain in order to participate in the Texas Medicaid or other HHS program (see subparagraphs (a) and (b) of this paragraph), or failing to provide records, documents, and other items or equipment upon written request that are determined necessary by the Inspector General to complete their statutory functions related to a fraud and abuse investigation, including without limitation all requirements specified in 1 TAC §371.1643(f) of this subchapter. “Immediate access” is deemed to be within 24 hours of receiving a written request, unless the requesting agency has reason to suspect fraud or abuse or to believe that requested records, documents, or other items or equipment are about to be altered or destroyed, thereby necessitating access at the actual time the request is presented or, in the opinion of the Inspector General, the request may be completed at the time of the request and/or in less than 24 hours;

d) Developing false source documents or failing to sign source documents or to retain supporting documentation or to comply with the provisions or requirements of the operating agency or its agents pertaining to electronic claims submittal; and

e) Failing as a provider, whether individual, group, facility, managed care or other entity, to include within any subcontracts for services or items to be delivered within Texas Medicaid all information that is required by 42 CFR §434.10(b).

3) Program-Related Convictions.

a) Pleading guilty or nolo contendere, agreeing to an order of probation without adjudication of guilt under deferred adjudication, or being a defendant in a court judgment or finding of guilt for a violation relating to performance of a provider agreement or program violation of Medicare, Texas Medicaid, other HHS program, or any other state’s Medicaid program;

b) Pleading guilty or being convicted of a violation of state or federal statutes relating to dangerous drugs, controlled substances, or any other drug-related offense;

c) Pleading guilty of, being convicted of, or engaging in conduct involving moral turpitude;

d) Pleading guilty or being convicted of a violation of state or federal statutes relating to fraud, theft, embezzlement, breach of fiduciary responsibility, or other financial misconduct relating to the delivery of a health-care item or service or relating to any act or omission in a program operated or financed by any federal, state, or local government agency;

e) Being convicted in connection with the interference with or obstruction of any investigation into any criminal offense that would support mandatory exclusion under 1 TAC
§371.1655 of this subchapter or any offense listed within paragraph (3) of this subsection regarding program-related convictions; and

f) Being convicted of any offense that would support mandatory exclusion under 1 TAC §371.1655 of this subchapter.

4) Provider Eligibility.
   a) Failing to meet standards required for licensure, when such licensure is required by state or federal law, administrative rule, provider agreement, or provider manual for participation in the Texas Medicaid or other HHS program;
   b) Being excluded, suspended or otherwise sanctioned within any federal program involving the provision of health care;
   c) Being excluded, suspended or otherwise sanctioned under any state health-care program for reasons bearing on the person’s professional competence, professional performance or financial integrity;
   d) Failing to fully and/or correctly complete a Provider Enrollment Agreement, Provider Re-enrollment Agreement or other enrollment form prescribed by the relevant operating agency or its agent for enrollment; and
   e) Loss or forfeiture of corporate charter.

5) Program Compliance.
   a) Failing to comply with the terms of the Texas Medicaid or other HHS program contract or provider agreement, assignment agreement, the provider certification on the Texas Medicaid or other HHS program claim form, or rules or regulations published by the Commission or a Medicaid or other HHS operating agency;
   b) Violating any provision of the Human Resources Code, Chapter 32 or 36, or any rule or regulation issued under the Code;
   c) Submitting a false statement or misrepresentation or omitting pertinent facts on any application or any documents requested as a prerequisite for the Texas Medicaid or other HHS program participation;
   d) Refusing to execute or comply with a provider agreement or amendments when requested;
   e) Failing to correct deficiencies in provider operations after receiving written notice of them from an operating agency, the commission or their authorized agents;
   f) Failing to abide by applicable federal and state law regarding handicapped individuals or civil rights;
   g) Failing to comply with the Texas Medicaid or other HHS program policies, published Texas Medicaid or other HHS program bulletins, policy notification letters, provider policy or procedure manuals, contracts, statutes, rules, regulations, or interpretation previously sent to the provider by an operating agency or the commission regarding any of the authorities listed above, including statutes or standards governing occupations;
   h) Failing to fully and accurately make any disclosure required by the Social Security Act, §1124 or §1126;
   i) Failing to disclose information about the ownership of a subcontractor with whom the person has had business transactions in an amount exceeding $25,000 during the previous 12 months or about any significant business transactions (as defined by HHS) with any wholly-owned supplier or subcontractor during the previous five years;
   j) Failing, as a hospital, to comply substantially with a corrective action required under the Social Security Act, §1886(f)(2)(B);
   k) Failing to repay or make arrangements that are satisfactory to the commission to repay identified overpayments or other erroneous payments or assessments identified by the commission or any Texas Medicaid or other HHS program operating agency;
l) Committing an act described in the Social Security Act, §1128A (mandatory exclusion) or §1128B (permissive exclusion);
m) Defaulting on repayments of scholarship obligations or items relating to health profession education made or secured, in whole or in part, by HHS or the state when they have taken all reasonable steps available to them to secure repayment;

n) Soliciting or causing to be solicited, through offers of transportation or otherwise, Texas Medicaid or other HHS program recipients for the purpose of delivering to those recipients health-care items or services;
o) Marketing, supplying or selling confidential information (e.g., recipient names and other recipient information) for a use that is not expressly authorized by the Texas Medicaid or other HHS program; and

p) Failing to abide by applicable statutes and standards governing providers.

6) Delivery of Health-Care Services.

a) Failing to provide health-care services or items to Texas Medicaid or other HHS program recipients in accordance with accepted medical community standards or standards required by statute, regulation, or contract, including statutes and standards that govern occupations;
b) Furnishing or ordering health-care services or items for a recipient-patient under Title XVIII or a state health-care program that substantially exceed the recipient's needs, are not medically necessary, are not provided economically or are of a quality that fails to meet professionally recognized standards of health care; and

c) Engaging in any negligent practice that results in death, injury, or substantial probability of death or injury to the provider's patients.

7) Improper Collection and Misuse of Funds.

a) Charging recipients for services when payment for the services was recouped by the Texas Medicaid or another HHS program for any reason;
b) Misapplying, misusing, embezzling, failing to promptly release upon a valid request, or failing to keep detailed receipts of expenditures relating to any funds or other property in trust for a Texas Medicaid or other HHS program recipient;
c) Failing to notify and reimburse the relevant operating agency or the commission or their agents for services paid by the Texas Medicaid or other HHS programs if the provider also receives reimbursement from a liable third party;
d) Rebating or accepting a fee or a part of a fee or charge for a Texas Medicaid or other HHS program patient referral;
e) Requesting from a recipient in payment for services or items delivered within the Texas Medicaid or other HHS program any amount that exceeds the amount the Texas Medicaid or other HHS program paid for such services or items, with the exception of any cost-sharing authorized by the program; and

f) Requesting from a third party liable for payment of the services or items provided to a recipient under the Texas Medicaid or other HHS program, any payment other than as authorized at 42 CFR §447.20.

8) Licensure Actions.

a) Having a voluntary or involuntary action taken by a licensing or certification agency or board that requires the provider or employee to comply with professional practice requirements of the board after the board receives evidence of noncompliance with licensing or certification requirements; and

b) Having its license to provide health care revoked, suspended, or probated by any state licensing or certification authority, or losing a license or certification, because of action based on assessment of the person's professional competence, professional performance, or financial integrity, non-compliance with Health and Safety Code, statutes governing
occupations, or surrendering a license or certification while a formal disciplinary proceeding is pending before licensing or certification authorities when the proceeding concerns the person's professional competence, professional performance, or financial integrity.

9) Managed Care Organizations (MCOs) and Persons Providing Services or Items Through Managed Care.

Note: This paragraph includes those program violations that are unique to managed care; paragraphs (1) through (8) and (11) of this section also apply to managed care.

a) Failing, as an MCO, PCCM system, or an association, group or individual health-care provider furnishing services through an MCO, to provide to recipient enrollee a health-care benefit, service or item that the organization is required to provide under its contract with an operating agency;

b) Failing, as an MCO, a PCCM, or an association, group or individual health-care provider furnishing services through an MCO, to provide to an individual a health-care benefit, service or item that the organization is required to provide by state or federal law, regulation or program rule;

c) Engaging, as an MCO, in actions that indicate a pattern of wrongful denial or payment for a health-care benefit, service or item that the organization is required to provide under its contract with an operating agency;

d) Engaging, as an MCO, in actions that indicate a pattern of wrongful delay of at least 45 days or a longer period specified in the contract with an operating agency, not to exceed 60 days, in making payment for a health-care benefit, service or item that the organization is required to provide under its contract with an operating agency;

e) Engaging, as an MCO, a PCCM or an association, group or individual health-care provider furnishing services through managed care, in a fraudulent activity in connection with the enrollment in the organization's managed care plan of an individual eligible for medical assistance or in connection with marketing the organization's services to an individual eligible for medical assistance;

f) Discriminating against enrollees or prospective enrollees on any basis, including, without limitation, age, gender, ethnic origin or health status;

g) Failing, as an MCO, to comply with any term within a contract with a Texas Medicaid or other HHS program operating agency to provide healthcare services to Texas Medicaid or HHS program recipients; and

h) Failing, as an MCO, reasonably to provide to the relevant operating agency, upon its written request, encounter data and/or other data contractually required to document the services and items delivered by or through the MCO to Texas Medicaid or other HHS program recipients.

a) Reporting noncovered or nonchargeable services as covered items; e.g., incorrectly apportioning or allocating costs on cost reports; including costs of noncovered services, supplies or equipment in allowable costs; arrangements between providers and employees, related parties, independent contractors, suppliers, and others that appear to be designed primarily to overstate the costs to the program through various devices (such as commissions or fee splitting) to siphon-off or conceal illegal profits;

b) Reporting costs not incurred or which were attributable to nonprogram activities, other enterprises or personal expenses;

c) Including unallowable cost items on a cost report;

d) Manipulating or falsifying statistics that result in overstatement of costs or avoidance of recoupment, such as incorrectly reporting square footage, hours worked, revenues received, or units of service delivered;

e) Claiming bad debts without first genuinely attempting to collect payment;
f) Depreciating assets that have been fully depreciated or sold or using an incorrect basis for depreciation; and

g) Reporting costs above the cost to the related party.

11) Kickbacks and Referrals.

a) Violating any of the provisions specified in 1 TAC §371.1721(b) of this subchapter relating to kickbacks, bribes, rebates, referrals, inducements, or solicitation;

b) As a physician, referring a Texas Medicaid or other HHS program patient to an entity with which the physician has a financial relationship for the furnishing of designated health services, payment for which would be denied under Title XVIII (Medicare) pursuant to §1877 and §1903(s) of the Social Security Act (Stark I and II). Neither federal financial participation nor this state's expenditures for medical assistance under the state Medicaid plan may be used to pay for services or items delivered within the program and within a relationship that violates Stark I or II. The Commission hereby references and incorporates within these rules the federal regulations promulgated pursuant to Stark I and II, and expressly recognizes all exceptions to the prohibitions on referrals established within those rules;

c) Failing to disclose documentation of financial relationships necessary to establish compliance with Stark I and II, as set forth in subparagraph (b) of this paragraph; and

d) Offering to pay or agreeing to accept, directly or indirectly, overtly or covertly any remuneration in cash or in kind to or from another for securing or soliciting a patient or patronage for or from a person licensed, certified, or registered or enrolled as a provider or otherwise by a state health-care regulatory or health and human service agency.

Involvement in any of these practices may result in provider exclusion or suspension from Texas Medicaid. Providers are notified in writing of any actions taken as well as procedures for appeal and reinstatement. The written notification will specify the date on which Medicaid program participation may resume. The reinstated person may then apply for a contract or provider agreement.

Providers and individuals who have been excluded from Texas Medicaid may be reinstated only by HHSC-OIG. If HHSC-OIG approves an individual’s request for reinstatement, a written notice will be sent to that individual. The provider must first be reinstated into Medicaid and receive written notification specifying the date on which Medicaid program participation may resume. Once the provider has been reinstated into Medicaid, the provider may then apply for a contract or provider agreement.

Full investigation of criminal Medicaid fraud is the Texas Attorney General MFCU’s responsibility and may result in a felony or misdemeanor criminal conviction.

1.6.1 Reporting Waste, Abuse, and Fraud

Anyone with knowledge about suspected Medicaid waste, abuse, or fraud of provider services must report the information to the HHSC-OIG. To report waste, abuse, or fraud, visit www.hhs.state.tx.us and select Reporting Waste, Abuse, and Fraud. Waste, abuse, and fraud may also be reported by calling the OIG hotline at 1-800-436-6184. All reports of waste, abuse, or fraud received through either channel remain confidential.

HHSC-OIG encourages providers to voluntarily investigate and report fraud, waste, abuse, or inappropriate payments of Medicaid funds in their own office. Providers are required to report these activities to HHSC-OIG when identified. HHSC-OIG will work collaboratively with self-reporting providers. For more information on provider self-reporting, visit oig.hhsc.state.tx.us/ProviderSelfReporting/Self_Reporting.aspx.
1.6.2 Suspected Cases of Provider Waste, Abuse, and Fraud
HHSC-OIG is responsible for minimizing waste, abuse, and fraud by Medicaid providers. HHSC-OIG has established and continues to refine criteria for identifying cases of possible waste, abuse, or fraud and recouping provider overpayments. When HHSC-OIG identifies fraud, waste, and abuse, a case may be referred to the Texas Attorney General’s MFCU or Antitrust and Civil Medicaid Fraud Section, or result in administrative enforcement.

1.6.3 Employee Education on False Claims Recovery
United States Code (U.S.C.), Title 42, §1396a(a)(68) requires any entity that receives or makes annual Medicaid payments of at least $5,000,000 to establish written policies that provide detailed information about each employee’s role in preventing and detecting waste, fraud, and abuse in federal health-care programs. These written policies, which must apply to all employees of the entity (including management) as well as the employees of any contractor or agent of the entity, must address:

- Administrative remedies for false claims and statements as provided in 31 U.S.C. § 3802.
- Texas law relating to civil and criminal penalties for false claims (including Chapter 36 of the Human Resources Code; section 35A.02 of the Penal Code; Title 1, Chapter 371, Subchapter G of the TAC; and other applicable law).
- Whistleblower protections under the above laws (including section 36.115 of the Human Resources Code).

In addition, these written policies must include detailed provisions regarding the entity’s policies and procedures for detecting and preventing fraud, waste, and abuse. The entity must also include a specific discussion of the following in all employee handbooks:

- The above laws.
- The entity’s policies and procedures for detecting and preventing fraud, waste, and abuse.
- The rights of employees to be protected as whistleblowers.

TMHP sends a yearly letter to each provider that receives over $5,000,000 in Medicaid payments. This letter requires providers to verify that they have educated their staff on the False Claims Act. Failure to return this letter, signed by the provider, may result in an administrative hold on the provider’s Texas Medicaid payments.

1.7 Texas Medicaid Limitations and Exclusions
Medicaid pays for services on behalf of clients to the provider of service according to Texas Medicaid’s limitations and procedures. TMHP does not make Medicaid payments directly to clients.

The following services, supplies, procedures, and expenses are not benefits of Texas Medicaid. This list is not all inclusive.

- Autopsies.
- Biofeedback therapy.
- Care and treatment related to any condition for which benefits are provided or available under Workers’ Compensation laws.
- Cellular therapy.
- Chemolase injection (chymodiactin, chymopapain).
- Custodial care.
- Dentures or endosteal implants for adults.
• Ergonovine provocation test.
• Excise tax.
• Fabric wrapping of abdominal aneurysms.
• Hair analysis.
• Heart–lung monitoring during surgery.
• Histamine therapy–intravenous.
• Hyperthermia.
• Hysterectomy for infertility.
• Immunizations or vaccines unless they are otherwise covered by Texas Medicaid. (These limitations do not apply to services provided through the THSteps Program.)
• Immunotherapy for malignant diseases.
• Infertility.
• Inpatient hospital services to a client in an institution for tuberculosis, mental disease, or a nursing section of public institutions for the mentally retarded.
• Inpatient hospital tests that are not specifically ordered by a physician/doctor who is responsible for the diagnosis or treatment of the client’s condition.
• Intragastric balloon for obesity.
• Joint sclerotherapy.
• Keratoprosthesis/refractive keratoplasty.
• Laetrile.
• Mammoplasty for gynecomastia.
• More than $200,000 per client per benefit year (November 1 through October 31) for any medical and remedial care services provided to a hospital inpatient by the hospital. If the $200,000 amount is exceeded because of an admission for an approved organ transplant, the allowed amount for that claim is excluded from the computation. This limitation does not apply to clients eligible for CCP or clients with an organ transplant.
• More than 30 days of inpatient hospital stay per spell of illness–each spell of illness must be separated by 60 consecutive days during which the client has not been an inpatient in a hospital.

**Important:** CCP provides medically necessary, federally allowable treatment for Medicaid/THSteps clients birth through 20 years of age. Some medical services that usually would not be covered under Medicaid may be available to CCP-eligible clients. An additional 30-day spell of illness begins with the date of specified covered organ transplant. No spell of illness limitation exists for Medicaid THSteps clients who are 20 years of age and younger.

• Obsolete diagnostic tests.
• Oral medications, except when billed by a hospital and given in the emergency room or the inpatient setting (hospital take-home drugs or medications given to the client are not a benefit).

**Important:** Outpatient prescription medications are covered through the Medicaid Vendor Drug Program. See Appendix B: Vendor Drug Program for more information.

• Orthoptics (except CCP).
• Outpatient and nonemergency inpatient services provided by military hospitals.
• Outpatient behavioral health services performed by a licensed chemical dependency counselor (LCDC), psychiatric nurse, mental health worker, non-LCSW social worker, or psychological associate (excluding a Masters-level licensed psychological associate [LPA]) regardless of physician or licensed psychologist supervision.

• Oxygen (except CCP and home health).

• Parenting skills.

• Payment for eyeglass materials or supplies regardless of cost if they do not meet Texas Medicaid specifications.

• Payment to physicians for supplies is not an allowable charge. All supplies, including anesthetizing agents such as Xylocaine, inhalants, surgical trays, or dressings, are included in the surgical payment.

• Podiatry, optometric, and hearing aid services in long term care facilities, unless ordered by the attending physician.

• Private room facilities except when a critical or contagious illness exists that results in disturbance to other patients and is documented as such when it is documented that no other rooms are available for an emergency admission, or when the hospital only has private rooms.

• Procedures and services considered experimental or investigational.

• Prosthetic and orthotic devices (except CCP).

• Prosthetic eye or facial quarter.

• Psychiatric services:
  • Outpatient behavioral health services for which no prior authorization has been given.
  • Each individual behavioral health practitioner is limited to a combined total of 12 hours of Medicaid reimbursement per day for behavioral health services.

Refer to: Section 5, “Licensed Clinical Social Worker (LCSW), Licensed Marriage and Family Therapist (LMFT), and Licensed Professional Counselor (LPC)” in Behavioral Health, Rehabilitation, and Targeted Case Management Services Handbook (Vol. 2, Provider Handbooks).

• Quest test (infertility).

• Recreational therapy.

• Review of old X-ray films.

• Routine cardiovascular and pulmonary function monitoring during the course of a surgical procedure under anesthesia.

• Separate fees for completing or filing a Medicaid claim form. The cost of claims filing is to be incorporated in the provider’s usual and customary charges to all clients.

• Services and supplies to any resident or inmate in a public institution.

• Services or supplies for which benefits are available under any other contract, policy, or insurance, or which would have been available in the absence of Texas Medicaid.

• Services or supplies for which claims were not received within the filing deadline.

• Services or supplies not reasonable and necessary for diagnosis or treatment.
• Services or supplies not specifically provided by Texas Medicaid.
• Services or supplies provided in connection with cosmetic surgery except as required for the prompt repair of accidental injury or for improvement of the functioning of a malformed body member, or when prior authorized for specific purposes by TMHP (including removal of keloid scars).
• Services or supplies provided outside of the U.S., except for deductible and coinsurance portions of Medicare benefits as provided for in this manual.
• Services or supplies provided to a client after a finding has been made under utilization review procedures that these services or supplies are not medically necessary.
• Services or supplies provided to a Texas Medicaid client before the effective date of his or her designation as a client, or after the effective date of his or her denial of eligibility.
• Services payable by any health, accident, other insurance coverage, or any private or other governmental benefit system, or any legally liable third party.
• Services provided by an interpreter (except sign language interpreting services requested by a physician).
• Services provided by ineligible, suspended, or excluded providers.
• Services provided by the client’s immediate relative or household member.
• Services provided by Veterans Administration facilities or U.S. Public Health Service Hospitals.
• Sex change operations.
• Silicone injections.
• Social and educational counseling except for certain health and disability related and counseling services.
• Sterilization reversal.
• Sterilizations (including vasectomies) unless the client has given informed consent 30 days before surgery, is mentally competent, and is 21 years of age or older at the time of consent. (This policy complies with 42 CFR §441.250, Subpart F.)
• Take-home and self-administered drugs except as provided under the vendor drug or family planning pharmacy services.
• Tattooing (commercial or decorative only).
• Telephone calls with clients or pharmacies (except as allowed for case management).
• Thermogram.
• Treatment of flatfoot conditions for solely cosmetic purposes and the prescription of supportive devices (including special shoes), the treatment of subluxations of the foot.

Refer to the applicable handbooks in Volume 2 of this manual for additional information.

1.8 Forms
1.1 Authorization to Release Confidential Information (2 Pages)

AUTHORIZATION TO RELEASE CONFIDENTIAL INFORMATION

PATIENT’S NAME ____________________________________________

I authorize __________________________ and/or __________________________, and/or
(Name of HMO) (Name of BHO)

the following person/agency/group:

Provider/Agency/Group    Address    City    State    ZIP

To disclose information and records regarding my treatment, medical and/or behavioral
health condition to the following professional person/agency, physician and/or facility:

Provider/Agency/Group    Address    City    State    ZIP

Information to be released or exchanged include (check all that apply):

_____ History and physical

_____ Discharge and Summary

_____ Behavioral Health Treatment Records

_____ Laboratory Reports

_____ Physical Health Treatment Records

_____ Medication Records

_____ Information on HIV or communicable disease treatment

_____ Other (specify) ________________________________

The authorized purpose(s) for this release are:

_____ Diagnosis and Treatment

_____ Coordination of Care

_____ Insurance Payment Purposes

_____ Other (specify) _____________________________________
I understand that my health and behavioral health records are protected from disclosure under Federal and/or state law. I may revoke this authorization. This authorization is valid until I revoke it or 60 days after I have completed treatment, whichever is sooner. Once I revoke this authorization, no information can be released except as authorized or allowed by law. File copy is considered equivalent to the original.

This authorization was explained to me as I signed it of my own free will on:

The ___________ day of ____________, 20__.

_________________________________________  ______________________________
Signature of Client                        Signature of Witness

Signature of Parent, Guardian, or Authorized Representative, if required

NOTICE OF CLIENT’S REFUSAL TO RELEASE INFORMATION:

I have reviewed the above release of information form and refuse to authorize release of health and behavioral health information to mental health and/or alcohol and/or drug abuse treatment providers and/or physical health providers.

Executed this ___________ day of ________________, 20__.

_________________________________________  ______________________________
Signature of Client                        Signature of Witness

Signature of Parent, Guardian, or Authorized Representative, if required

The person signing this authorization is entitled to a copy.

TO PERSON RECEIVING THE CONFIDENTIAL INFORMATION:  PROHIBITION OF REDISCLOSURE

Federal and state law protects the confidentiality of the information disclosed to you related to the individual’s alcohol and drug abuse treatment. Federal regulations (42 CFR Part 2) prohibit you from making any further disclosure of this information unless further disclosure is expressly permitted by the written consent of the person to whom it pertains, or as otherwise permitted by such regulations. Disclosure is limited to the purpose and persons included on the authorization form. The Federal rules restrict any use of the information to criminally investigate or prosecute any alcohol or drug abuse patient. State laws may also protect the confidentiality of the client’s records.

TO THE INDIVIDUAL FILLING THIS OUT:

You have the right to ask us about this form. You also have the right to review the information you give us on the form. (There are a few exceptions). If the information is wrong, you can ask us to correct it. The Health and Human Services Commission has a method of asking for corrections. You can find it in Title 1 of the Texas Administrative Code, section 351.17 through 351.23. To talk to someone about this form or ask for corrections, please contact NorthSTAR. You can write to NorthSTAR at 1199 S. Beltline Rd., Coppell, Texas 75019. You can also call the NorthSTAR Helpline at 1-972-906-2500.
1.2 Authorization to Release Confidential Information (Spanish) (2 Pages)

AUTORIZACIÓN PARA DIVULGAR INFORMACIÓN CONFIDENCIAL

NOMBRE DEL PACIENTE ___________________________________________________________

Autorizo a _________________, a _________________ y a la siguiente persona, agencia o grupo:

(Nombre de la HMO) (Nombre de la BHO)

____________________________________________________________________________________

Proveedor/Agencia/Grupo Dirección Ciudad Estado ZIP

para que divulgue información y expedientes relacionados con mi tratamiento y estado de salud física, mental o de abuso de sustancias a las siguientes personas, agencias, doctores y centros profesionales:

___________________________________________________________________________________

Proveedor/Agencia/Grupo Dirección Ciudad Estado ZIP

La información que se divulgará o intercambiará es, entre otra (marque toda la que sea pertinente):

_____ Historia clínica y física
_____ Documentos de alta y resumen
_____ Documentos del tratamiento de la salud mental y abuso de sustancias
_____ Informes de laboratorio
_____ Documentos del tratamiento de la salud física
_____ Documentos de medicamentos
_____ Información del tratamiento del VIH o de las enfermedades transmisibles
_____ Otra (especifique) ________________________________

Esta divulgación se ha autorizado con el siguiente propósito (marque todos los que sean pertinentes):

_____ Diagnóstico y tratamiento
_____ Coordinación de la atención médica
_____ Pagos del seguro
_____ Otro (especifique) ________________________________
Entiendo que mis expedientes de salud mental y abuso de sustancias están protegidos contra la divulgación bajo la
ley federal o estatal. Puedo revocar esta autorización. Esta autorización tiene vigencia hasta que yo la revoque o
60 días después de que yo haya terminado el tratamiento, lo que suceda primero. Una vez que revoque esta
autorización, no se podrá divulgar ninguna información, excepto como lo autorice o lo permita la ley. La copia de
archivo se considera equivalente al original.

Se me explicó esta autorización y la firmé por mi propia voluntad:

El día ____________ del mes de ___________________ de 20____.

Firma del cliente __________________________________________ Firma del testigo __________________________________________

Firma del padre, tutor o representante autorizado, si es necesario ________________________________

AVISO SOBRE LA DECISIÓN DEL CLIENTE DE NO AUTORIZAR LA DIVULGACIÓN DE
INFORMACIÓN:

He revisado el formulario anterior para la divulgación de información y me he negado a autorizar la
divulgación de información de salud mental y abuso de sustancias a los proveedores de salud física o de
tratamiento de salud mental o contra el abuso de alcohol o drogas.

Firmado este día ____________ del mes de ___________________ de 20____.

Firma del cliente __________________________________________ Firma del testigo __________________________________________

Firma del padre, tutor o representante autorizado, si es necesario ________________________________

La persona que firma esta autorización tiene derecho a una copia.

PARA LA PERSONA QUE RECIBE LA INFORMACIÓN CONFIDENCIAL: PROHIBICIÓN SOBRE LA DIVULGACIÓN
Las leyes federales y estatales protegen la confidencialidad de la información que usted recibió sobre el tratamiento
del abuso de alcohol y drogas de la persona. Las normas federales (42 CFR Parte 2) le prohíben a usted dar esta
información a otra persona a menos que se haya permitido expresamente en un consentimiento escrito de la persona
de quien se trata, o de otra manera permitida por dichas normas. La divulgación se limita al propósito y a la persona
anotados en el formulario de autorización. Las reglas federales limitan el uso de la información a investigar o
enjuiciar penalmente a algún paciente que tiene problemas de abuso de alcohol o drogas. Es posible que las leyes
estatales también protejan la confidencialidad de los expedientes del paciente.

PARA LA PERSONA QUE LLENA ESTE FORMULARIO:
Tiene el derecho de hacernos preguntas sobre este formulario. También tiene el derecho de revisar la información
que nos da en el formulario. (Hay algunas excepciones). Si la información está incorrecta, puede pedir que la
corrijamos. La Comisión de Salud y Servicios Humanos tiene un método para pedir correcciones. Puede encontrarlo
en el Título 1 del Código Administrativo de Texas, Secciones 351.17 a 351.23. Para hablar con alguien acerca de esta
forma, o para pedir correcciones, haga el favor de comunicarse con NorthSTAR. Puede comunicarse con
NorthSTAR escribiendo a 1199 S. Beltline Rd., Coppell, Texas 75019 o llamando a la Línea de Ayuda de
NorthSTAR al 1-972-906-2500.
1.3  Child Abuse Reporting Guidelines (2 Pages)

HHSC Child Abuse Screening, Documenting, and Reporting Policy for Medicaid Providers

Each contractor/provider shall comply with the provisions of state law as set forth in Chapter 261 of the Texas Family Code relating to investigations of report of child abuse and neglect and the provisions of this HHSC policy. HHSC shall distribute funds only to a contractor/provider who has demonstrated a good faith effort to comply with child abuse reporting guidelines and requirements in Chapter 261 and this HHSC policy. Contractor/provider staff shall respond to disclosures or suspicions of abuse/neglect of minors [by reporting] to appropriate agencies as required by law.

PROCEDURES

I. Each contractor/provider shall adopt this policy as its own.

II. Each contractor/provider shall report suspected sexual abuse of a child as described in this policy and as required by law.

III. Each contractor/provider shall develop an internal policy and procedures that describe how it will determine, document, and report instances of abuse, sexual or nonsexual, in accordance with the Texas Family Code, Chapter 261.

REPORTING GENERALLY

I. Professionals as defined in the law are required to report not later than the 48th hour after the professional first has cause to believe the child has been or may be abused or is the victim of the offense of indecency with a child.

II. Nonprofessionals shall immediately make a report after the nonprofessional has cause to believe that the child’s physical or mental health or welfare has been adversely affected by abuse.

III. A report shall be made regardless of whether the contractor/provider staff suspect that a report may have previously been made.

IV. Reports of abuse or indecency with a child shall be made to:

   A. Texas Department of Family and Protective Services (DFPS) if the alleged or suspected abuse involves a person responsible for the care, custody, or welfare of the child (DFPS Texas Abuse Hotline at 1-800-252-5400, operated 24 hours a day, seven days a week);
   B. Any local or state law enforcement agency;
   C. The state agency that operates, licenses, certifies, or registers the facility in which the alleged abuse or neglect occurred; or
   D. The agency designated by the court to be responsible for the protection of children.

V. The law requires that the following be reported:

   A. Name and address of the minor, if known;
   B. Name and address of the minor’s parent or the person responsible for the care, custody, or welfare of the child if not the parent, if known; and
   C. Any other pertinent information concerning the alleged or suspected abuse, if known.

VI. Reports can be made anonymously.

VII. A contractor/provider may not reveal whether or not the child has been tested or diagnosed with HIV or AIDS.

VIII. If the identity of the minor is unknown (e.g., the minor is at the provider’s office to anonymously receive testing for HIV or an STD), no report is required.
REPORTING SUSPECTED SEXUAL ABUSE

I Each contractor/provider shall ensure that its employees, volunteers, or other staff report a victim of abuse who is an unmarried minor under 14 years of age and is pregnant or has a confirmed sexually transmitted disease acquired in a manner other than through perinatal transmission.

II The Texas Family Code, Chapter 261, requires other reporting of other instances of sexual abuse. Other types of reportable abuse may include, but are not limited to, the actions described in:
   A Penal Code, §21.11(a) relating to indecency with a child;
   B Penal Code, §21.01(2) defining “sexual contact”;
   C Penal Code, §43.01(1) or (3)(5) defining various sexual activities; or
   D Penal Code, §22.011(a)(2) relating to sexual assault of a child;
   E Penal Code, §22.021(a)(2) relating to aggravated sexual assault of a child.

III Each contractor/provider may utilize the attached Checklist for HHSC Monitoring for all clients under 14 years of age. The checklist, if used, shall be retained by each contractor/provider and made available during any monitoring conducted by HHSC.

TRAINING

I Each contractor/provider shall develop training for all staff on the policies and procedures in regard to reporting child abuse. New staff shall receive this training as part of their initial training/orientation. Training shall be documented.

II As part of the training, staff shall be informed that the staff person who conducts the screening and has cause to suspect abuse has occurred is legally responsible for reporting. A joint report may be made with the supervisor.
Child Abuse Reporting Guidelines, Checklist for HHSC Monitoring

Date: _____________________________
Client’s name: ___________________________________________________________
Client’s age (use this checklist only if the client is under 14): _________________________________________
Staff person conducting screening: ______________________________________________

Each contractor/provider shall ensure that its employees, volunteers, or other staff report a victim of child abuse who is a minor under 14 years of age who has engaged in sexual activity with any individual to whom the minor is not married. Sexual activity would be indicated if the minor is pregnant or has confirmed diagnosis of a sexually transmitted disease acquired in a manner other than through perinatal transmission.

Using the criteria above, did you determine that a report of child abuse is required? ______ Yes ______ No
If "yes," please report and complete the information below.

Report was made: _____ Yes _____ No
Staff person who submitted the report (optional): _____________________________________________
Date reported: ____________________________________________________________________________
Name of agency to which report was made: ______________________________________________________
DFPS call ID# or law enforcement assigned # (optional): _________________________________________
Name of person who received report (optional): _________________________________________________
Phone number of contact (when applicable): _____________________________________________________

Use of the checklist for HHSC monitoring of reporting of abuse of children younger than 14 years of age who are pregnant or have STDs does not relieve contractors or subcontractors of the requirements in Chapter 261, Texas Family Code, to report any other instance of suspected child abuse.
Electronic Funds Transfer (EFT) Notification

Electronic Funds Transfer (EFT) is a payment method used to deposit funds directly into a provider’s bank account. These funds can be credited to either checking or savings accounts, if the provider’s bank accepts Automated Clearinghouse (ACH) transactions. EFT also avoids the risks associated with mailing and handling paper checks by ensuring funds are directly deposited into a specified account.

The following items are specific to EFT:

- Pre-notification to your bank occurs on the weekly cycle following the completion of enrollment in EFT.
- Future deposits are received electronically after pre-notification.
- The Remittance and Status (R&S) report furnishes the details of individual credits made to the provider’s account during the weekly cycle.
- Specific deposits and associated R&S reports are cross-referenced by both the provider identifiers (i.e., NPI, TPI, API) and R&S number.
- EFT funds are released by TMHP to depository financial institutions each Thursday.
- The availability of R&S reports is unaffected by EFT and they continue to arrive in the same manner and time frame as currently received.

TMHP must provide the following notification according to ACH guidelines:

Most receiving depository financial institutions receive credit entries on the day before the effective date, and these funds are routinely made available to their depositors as of the opening of business on the effective date. Contact your financial institution regarding posting time if funds are not available on the release date.

However, due to geographic factors, some receiving depository financial institutions do not receive their credit entries until the morning of the effective day and the internal records of these financial institutions will not be updated. As a result, tellers, bookkeepers, or automated teller machines (ATMs) may not be aware of the deposit and the customer’s withdrawal request may be refused. When this occurs, the customer or company should discuss the situation with the ACH coordinator of their institution, who in turn should work out the best way to serve their customer’s needs.

In all cases, credits received should be posted to the customer’s account on the effective date and thus be made available to cover checks or debits that are presented for payment on the effective date.

To enroll in the EFT program, complete the attached Electronic Funds Transfer Authorization Agreement. **You must return a voided check or signed letter from your bank on bank letterhead with the agreement to the TMHP address indicated on the form.**

Call the TMHP Contact Center at 1-800-925-9126 if you need assistance.
Electronic Funds Transfer (EFT) Notification

(Provider Name)
1.7 Provider Information Change (PIC) Form Instructions

Instructions for Completing the Provider Information Change Form

Signatures

• The provider’s signature is required on the Provider Information Change Form for any and all changes requested for individual provider numbers.

• A signature by the authorized representative of a group or facility is acceptable for requested changes to group or facility provider numbers.

Address

• Performing providers (physicians performing services within a group) may not change accounting information.

• For Texas Medicaid fee-for-service and the CSHCN Services Program, changes to the accounting or mailing address require a copy of the W-9 form.

• For Texas Medicaid fee-for-service, a change in ZIP Code requires copy of the Medicare letter for Ambulatory Surgical Centers.

Tax Identification Number (TIN)

• TIN changes for individual practitioner provider numbers can only be made by the individual to whom the number is assigned.

• Performing providers cannot change the TIN.

Provider Demographic Information

An online provider lookup (OPL) is available, which allows users such as Medicaid clients and providers to view information about Medicaid-enrolled providers. To maintain the accuracy of your demographic information, please visit the OPL at www.tmhp.com. Please review the existing information and add or modify any specific practice limitations accordingly. This will allow clients more detailed information about your practice.

General

• TMHP must have either the nine-digit Texas Provider Identifier (TPI), or the National Provider Identifier (NPI)/Atypical Provider Identifier (API), primary taxonomy code, physical address, and benefit code (if applicable) in order to process the change. Forms will be returned if this information is not indicated on the Provider Information Change Form.

• The W-9 form is required for all name and TIN changes.

• Mail or fax the completed form to:
  
  Texas Medicaid & Healthcare Partnership (TMHP)
  
  Provider Enrollment
  
  PO Box 200795
  
  Austin, TX 78720-0795
  
  Fax: 512-514-4214
Provider Information Change Form

Texas Medicaid fee-for-service, Children with Special Health Care Needs (CSHCN) Services Program, and Primary Care Case Management (PCCM) providers can complete and submit this form to update their provider enrollment file. Print or type all of the information on this form. Mail or fax the completed form and any additional documentation to the address at the bottom of the page.

Check the box to indicate a PCCM Provider ☐ Date: / /

2.1 Payment Information

Texas Medicaid reimbursements are available to all enrolled providers by check or electronic funds transfer (EFT).

Refer to: Subsection 1.2, “Payment Information” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).

2.2 Reimbursement Methodology

Texas Medicaid reimburses providers using several different reimbursement methodologies, including fee schedules, reasonable cost with interim rates, hospital reimbursement methodology, provider-specific encounter rates, reasonable charge payment methodology, and manual pricing. Each Texas Medicaid service describes the appropriate reimbursement for each service area.

Note: Medicaid reimbursement through the STAR, STAR Health, STAR+PLUS, and NorthSTAR Program health plans may differ according to the provider’s contract with the health plan.

2.2.1 Online Fee Lookup (OFL) and Static Fee Schedules

Texas Medicaid reimburses certain providers based on rates published in the OFL and static fee schedules. These rates are uniform statewide and by provider type. According to this type of reimbursement methodology, the provider is paid the lower of the billed charges or the Medicaid rate published in the applicable static fee schedule or OFL.

Providers can obtain fee information using the OFL functionality on the TMHP website at www.tmhp.com.

The online OFL can be used to:

- Retrieve real-time fee information.
- Search for procedure code reimbursement rates individually, in a list, or in a range.
- Search and review contracted rates for a specific provider (provider must login).
- Retrieve up to 24 months of history for a procedure code by searching for specific dates of service within that 2-year period.
- Search for benefit limitations for dental and durable medical equipment (DME) procedure codes.

Providers can obtain the static fee schedules as Microsoft Excel® spreadsheets or portable document format (PDF) files from the TMHP website at www.tmhp.com.

Type of service (TOS) codes payable for each procedure code are available on the OFL and the static fee schedules.

The following provider types are reimbursed based on rates published with the rates calculated in accordance with the referenced reimbursement methodology as published in the Texas Administrative Code (TAC), Part 1 Administration, Part 15 Texas Health and Human Services Commission (HHSC), and Chapter 355 Reimbursement Rates.

- Ambulance. The Medicaid rates for ambulance services are calculated in accordance with 1 TAC §355.8600.
- Ambulatory Surgical Center (ASC). The Medicaid rates for ASCs are calculated in accordance with 1 TAC §355.8121.
- Blind Children’s Vocational Discovery and Development Program. The Medicaid rate for this service is calculated in accordance with 1 TAC §355.8381.
- Case Management for Children and Pregnant Women (CPW). The Medicaid rates for this service are calculated in accordance with 1 TAC §355.8401.
- **Targeted Case Management for Early Childhood Intervention (ECI).** The Medicaid rate for this service is reimbursed in accordance with 1 TAC §§355.8421 and 355.8423.

- **Certified Nurse-Midwife (CNM).** The Medicaid rates for CNMs are calculated in accordance with 1 TAC §355.8161.

- **Certified Registered Nurse Anesthetist (CRNA).** According to 1 TAC §355.8221, the Medicaid rate for CRNAs is 92 percent of the rate reimbursed to a physician anesthesiologist for the same service.

- **Certified Respiratory Care Practitioner (CRCP) Services.** The Medicaid rate per daily visit for 99503 is calculated in accordance with 1 TAC §355.8089.

- **Chemical Dependency Treatment Facility (CDTF).** The Medicaid rates for CDTF services are calculated in accordance with 1 TAC §355.8241.

- **Chiropractic Services.** The Medicaid rates for chiropractic services are calculated in accordance with 1 TAC §355.8081 and 1 TAC §355.8085.

- **Dental.** The Medicaid rates for dentists are calculated as access-based fees in accordance with 1 TAC §355.8081, 1 TAC §355.8085, 1 TAC §355.8441(11), and 1 TAC §355.455(b).

- **Durable Medical Equipment (DME).** Home health agencies are reimbursed for DME and expendable supplies in accordance with 1 TAC §355.8021 (b). Comprehensive Care Program (CCP) is reimbursed for DME and expendable supplies in accordance with 1 TAC §355.8021 (2)(3).

- **Family Planning Services.** The Medicaid rates for family planning services are calculated in accordance with 1 TAC §355.8584.

- **Genetic Services.** The procedure codes and Medicaid rates for genetic services are listed in the OFL or the Physician - Genetics fee schedule on the TMHP website at www.tmhp.com.

- **Hearing Aid and Audiometric Evaluations.** Newborn hearing screenings are provided at the birthing facility before hospital discharge and, as such, are reimbursed in accordance with the reimbursement methodology for the specific type of birthing facility. Outpatient hearing screening and diagnostic testing services for children are provided by physicians and are reimbursed in accordance with the reimbursement methodology for physician services at 1 TAC §355.8085, 1 TAC §355.8141, and 1 TAC §355.8441.

- **Texas Medicaid (Title XIX) Home Health Services.** The reimbursement methodology for professional services delivered by home health agencies are statewide visit rates calculated in accordance with 1 TAC §355.8021(a).

- **Independent Laboratory.** The Medicaid rates for independent laboratories are calculated in accordance with 1 TAC §355.8081 and §355.8610, and the Deficit Reduction Act (DEFRA) of 1984. By federal law, Medicaid payments for a clinical laboratory service cannot exceed the Medicare payment for that service. Early Periodic Screening, Diagnosis, and Treatment (EPSDT)/Texas Health Steps medical and newborn screening laboratory services provided by the Department of State Health Services (DSHS) Laboratory are reimbursed based on actual costs in accordance with 1 TAC §355.8610.

- **Indian Health Services.** The reimbursement methodology for outpatient services provided in Indian Health Services Facilities operating under the authority of Public Law 93-638 is located at 1 TAC §355.8620.

- **In-Home Total Parenteral Nutrition (TPN) Supplier.** The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8087.

- **Licensed Clinical Social Worker (LCSW).** According to 1 TAC §355.8091, the Medicaid rate for LCSWs is 70 percent of the rate paid to a psychiatrist or psychologist for a similar service per 1 TAC §355.8085.
• **Licensed Marriage and Family Therapist (LMFT).** According to 1 TAC §355.8091, the Medicaid rate for LMFTs is 70 percent of the rate paid to a psychiatrist or psychologist for a similar service per 1 TAC §355.8085.

• **Licensed Professional Counselor (LPC).** According to 1 TAC §355.8091, the Medicaid rate for LPCs is 70 percent of the rate paid to a psychiatrist or psychologist for a similar service per 1 TAC §355.8085.

• **Maternity Service Clinic (MSC).** The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8081.

• **Nurse Practitioner (NP) and Clinical Nurse Specialist (CNS).** According to Title 1 TAC §355.8281, the Medicaid rate for NPs and CNSs is 92 percent of the rate paid to a physician (doctor of medicine [MD] or doctor of osteopathy [DO]) for the same service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections.

• **Physical Therapists/Independent Practitioners.** The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8081 and §355.8085.

• **Physician.** The Medicaid rates for physicians and certain other practitioners are calculated in accordance with 1 TAC §355.8085.

• **Physician Assistant (PA).** According to 1 TAC §355.8093, the Medicaid rate for PAs is 92 percent of the rate paid to a physician (MD or DO) for the same service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections.

• **Psychologist.** The Medicaid rates for psychologists are calculated in accordance with 1 TAC §355.8081 and §355.8085.

• **Radiological and Physiological Laboratory and Portable X-Ray Supplier.** The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8081 and §355.8085.

• **Renal Dialysis Facility.** The Medicaid rates for these providers are composite rates based on calculations specified by the Centers for Medicare & Medicaid Services (CMS).

• **School Health and Related Services (SHARS).** The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8081.

• **THSteps reimburses by provider type in accordance with 1 TAC §355.8441.** Approved providers enrolled in Texas Medicaid are reimbursed for THSteps services in the same manner as they are reimbursed for other Medicaid services. THSteps CCP reimburses for DME and expendable supplies in accordance with 1 TAC §355.8441(2)(3).

• **Tuberculosis (TB) Clinics.** The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8081.

• **Vision Care (Optometrists, Opticians).** The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8001, §355.8081, and §355.8085.

### 2.2.1.1 Physician Services in Outpatient Hospital Setting

Section 104 of the Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982 requires that Medicare and Medicaid limit reimbursement for those physician services furnished in outpatient hospital settings (e.g., clinics and emergency situations) that are ordinarily furnished in physician offices. The limit is 60 percent of the Medicaid rate for the nonemergency service furnished in physician offices.
The following table identifies the services applicable to the 60-percent limitation when furnished in outpatient hospital settings:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99201</td>
</tr>
<tr>
<td>99281</td>
</tr>
</tbody>
</table>

These procedures are designated with note code “1” in the current fee schedule or OFL on the TMHP website at www.tmhp.com.

The following services are excluded from the 60-percent limitation:
- Services furnished in rural health clinics (RHCs)
- Surgical services that are covered ASC/hospital-based ambulatory surgical center (HASC) services
- Anesthesiology and radiology services
- Emergency services provided in a hospital emergency room after the sudden onset of a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain), such that the absence of immediate medical attention could reasonably be expected to result in one of the following:
  - Serious jeopardy to the client’s health
  - Serious impairment to bodily functions
  - Serious dysfunction of any bodily organ or part

### 2.2.1.2 Drugs and Biologicals

Physician-administered drugs and biologicals are reimbursed under Texas Medicaid as access-based fees under the physician fee schedule in accordance with 1 TAC §355.8085. Physicians and certain other practitioners are reimbursed for physician-administered drugs and biologicals at the lesser of their usual and customary or billed charges and the Medicaid fee established by the HHSC. The Medicaid fee is an estimate of the provider’s acquisition cost for the specific drug and biological. An invoice must be submitted when it is in the provider’s possession. Submission of an invoice will document that the provider is billing the lesser of the usual and customary charge or the access-based fee.

The following guidelines should be used with respect to fee decisions for physician-administered drugs and biologicals:
- Fees for vaccines and infusion drugs furnished through an item of implanted DME are based on the lesser of the billed amount or 89.5 percent of the average wholesale price (AWP).
- Fees for drugs and biologicals, other than vaccines and infusion drugs furnished through an item of implanted DME, that are covered by Medicare are based on the lesser of the billed amount or 106 percent of average sales price (ASP).
- Fees for those drugs and biologicals not listed in the first two bullets above that are covered by Medicare are based on the lesser of the billed amount or one of the following:
  - 89.5 percent of AWP if the drug and biological is considered a new drug and biological (i.e., approved for marketing by the Food and Drug Administration within 12 months of implementation as a benefit of Texas Medicaid)
  - 85.0 percent of AWP if the drug and biological does not meet the definition of a new drug (above)

HHSC reserves the option to use other data sources to determine Medicaid fees for drugs and biologicals when AWP or ASP calculations are determined to be unreasonable or insufficient.
Prescriptions are covered under the Texas Medicaid Vendor Drug Program (VDP). The reimbursement methodology for pharmacy services is located at 1 TAC §§355.8541–355.8551.

2.2.2 Cost Reimbursement
Medicaid providers who are cost reimbursed are subject to cost reporting, cost reconciliation, and cost settlement processes, including time study requirements.

The following providers are cost reimbursed in accordance with the noted TAC rules:

- 1 TAC §355.743—Mental health (MH) case management
- 1 TAC §355.746—Mental retardation (MR) service coordination
- 1 TAC §355.781—MH rehabilitative services
- 1 TAC §355.8443—School Health and Related Services (SHARS)
- 1 TAC §355.8061 (a)(2)—Outpatient Payment for Hospital Services
- 1 TAC §355.8052 (i)—Hospitals in counties with 50,000 or fewer persons and certain other hospitals. Inpatient Hospital Reimbursement
- 1 TAC §355.8054—Children’s Hospital Reimbursement Methodology
- 1 TAC §355.8056—State-Owned Teaching Hospital Reimbursement Methodology

2.2.3 Reasonable Cost and Interim Rates
Outpatient hospital services are reimbursed in accordance with 1 TAC §355.8061. The reimbursement methodology is based on reasonable costs, and providers are reimbursed at an interim rate based on the provider’s most recent Medicaid cost report settlement. To determine the provider’s payable amount, the interim rate is applied to the claim details allowed amount.

2.2.4 Hospitals
Inpatient hospital services are reimbursed as follows:

- 1 TAC §355.8052—Inpatient Hospital Reimbursement
- 1 TAC §355.8054—Children’s Hospital Reimbursement Methodology
- 1 TAC §355.8056—State-Owned Teaching Hospital Reimbursement Methodology
- 1 TAC §355.8058—Inpatient Direct Graduate Medical Education (GME) Reimbursement
- 1 TAC §355.8060—Reimbursement Methodology for Freestanding Psychiatric Facilities
- 1 TAC §355.8061—Payment for Hospital Services
- 1 TAC §355.8064—Reimbursement Adjustment for Hospitals Providing Inpatient Services to SSI and SSI-Related Clients
- 1 TAC §355.8065—Disproportionate Share Hospital (DSH) Reimbursement Methodology
- 1 TAC §355.8068—Supplemental Payments to Certain Urban Hospitals
- 1 TAC §355.8069—Supplemental Payments to Certain Rural Public Hospitals
- 1 TAC §355.8070—Supplemental Payments to Private Hospitals
- 1 TAC §355.8071—Supplemental Payments to Children’s Hospitals
- 1 TAC §355.8072—Supplemental Payments to State-Owned Hospitals
2.2.5 Provider-Specific Visit Rates
Medicaid provider-specific prospective payment system (PPS) visit rates for RHCs are calculated in accordance with 1 TAC §355.8101, and those for federally qualified health centers (FQHCs) are calculated in accordance with 1 TAC §355.8261.

Refer to: Section 5, “Federally Qualified Health Center (FQHC)” and Section 8, “Rural Health Clinic” in the Outpatient Services Handbook (Vol. 2, Provider Handbooks) for more information.

2.2.6 Manual Pricing
When services or products do not have an established reimbursement amount, the detail or claim is manually reviewed to determine an appropriate reimbursement. The manual pricing methodology for DME and expendable supplies is included with the reimbursement methodology for these products.

2.3 Reimbursement Reductions
The Legislative Budget Board (LBB) and the Governor’s Office informed the Health and Human Services Commission (HHSC) in a letter dated May 17, 2010 of their revision to the Spending Reduction Plan for the 2010-11 Biennium submitted by HHSC. The result of this revision is that payments for Medicaid were reduced by 1 percent for dates of service on or after September 1, 2010.

These 1-percent reductions in the final payment amounts for inpatient, professional, and outpatient services apply to Medicaid fee-for-service, Medicaid managed care, family planning, and the Children with Special Health Care Needs (CSHCN) Services Program with the exceptions noted below. The following services are excluded from the 1-percent reduction in reimbursement:

- School Health and Related Services (SHARS)
- Tax Equity and Fiscal Responsibility Act (TEFRA) reimbursed inpatient hospitals (children’s and state teaching hospitals)
- State hospital freestanding psychiatric facilities
- RHCs
- DSHS clinical laboratories
- Indian Health Services
- Birthing Centers
- Case Management and Rehabilitative Services-Blind Children’s Vocational Discovery and Development Program
- Case Management and Rehabilitative Services-Early Child Intervention
- Case Management and Rehabilitative Services-Mental Retardation
- Outpatient Behavioral Health-Chemical Dependency Treatment Facility
- Medicare crossover claims
- Federally Qualified Health Centers (FQHCs) rendering Medicaid fee-for-service

2.3.1 Primary Care Case Management (PCCM)
The 1-percent reduction in case management reimbursement was applied to PCCM primary care providers’ panels. The $5.00 per client per month payment to PCCM primary care providers for case management has been reduced to $4.95.
2.3.2 Federally Qualified Health Centers (FQHCs)
FQHCs are exempt from the 1-percent reduction in reimbursement for services provided to Medicaid fee-for-service clients. However, the one percent reimbursement reduction that was applied to the alternative prospective payment system (APPS) annual adjustment remains in effect.

FQHCs are not exempt from the 1-percent reduction in reimbursement for family planning services (Titles V and XX). Title X is informational only and is not payable.

2.3.3 Personal Care Services (PCS)
PCS reimbursement rates were included in the 1 percent effective September 1, 2010 reimbursement rates were included in the 1 percent effective September 1, 2010.

2.4 Additional Payments to High-Volume Providers
High volume provider payments are made to outpatient hospitals and ASCs/HASCs per 1 TAC §355.8061
Outpatient hospital services are those services provided by outpatient hospitals and ASCs/HASCs. The definition of a high-volume outpatient hospital provider is one that was paid a minimum of $200,000 during the qualifying period. This criterion captured about 95 percent of total outpatient hospital spending. Similar criteria were developed for ASCs/HASCs, such that providers accounting for 95 percent of total payments were designated as high-volume providers. Payments to high-volume outpatient hospitals were increased by 5.2 percent. The new payment amount was implemented by increasing the discount factor for designated high-volume providers of outpatient hospital services from 80.3 percent to 84.48 percent. ASCs/HASCs that qualify as high-volume providers also receive a 5.2 percent increase in payment rates.

2.5 Out-of-State Medicaid Providers
Texas Medicaid covers medical assistance services provided to eligible Texas Medicaid clients while in a state other than Texas, as long as the client does not leave Texas to receive out-of-state medical care that can be received in Texas. Services provided outside the state are covered to the same extent medical assistance is furnished and covered in Texas when the service meets one or more requirements of 1 TAC §355.8083. TMHP must receive claims from out-of-state providers within 365 days from the date of service.

Note: Border state providers (providers rendering services within 50 miles of the Texas border) are considered in-state providers for Texas Medicaid.

Refer to: Subsection 1.5, “Enrollment Criteria for Out-of-State Providers” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).

2.6 Medicare Crossover Claim Reimbursement
2.6.1 Part A
The payment of the Medicare Part A coinsurance and deductibles for Medicaid clients who are Medicare beneficiaries is based on the following:

- If the Medicare payment amount equals or exceeds the Medicaid payment rate, Medicaid does not pay the Medicare Part A coinsurance/deductible on a Medicare crossover claim.

- If the Medicare payment amount is less than the Medicaid payment rate, Medicaid pays the Medicare Part A coinsurance/deductible, but the amount of the payment is limited to the lesser of the coinsurance/deductible or the amount remaining after the Medicare payment amount is subtracted from the Medicaid payment rate.
2.6.2 Part B
The payment of the Medicare Part B coinsurance and deductibles for Medicaid clients who are Medicare beneficiaries is based on the following:

- If the Medicaid client is eligible for Medicaid only as a qualified Medicare beneficiary (QMB), Medicaid pays the Medicare Part B coinsurance/deductible on valid Medicare crossover claims.
- If the Medicaid client is not a QMB, Medicaid pays the client’s Part B:
  - Deductible liability on valid, assigned Medicare claims.
  - Coinsurance liability on valid, assigned Medicare claims that are within the amount, duration, and scope of the Medicaid program, and would be covered by Medicaid when the services are provided, if Medicare did not exist.

Medicaid payment of a client’s coinsurance/deductible liabilities satisfies the Medicaid obligation to provide coverage for services that Medicaid would have paid in the absence of Medicare coverage.

2.7 Federal Medical Assistance Percentage (FMAP)
The Federal Medical Assistance Percentages (FMAPs) are used in determining the amount of Federal matching funds for State expenditures for assistance payments for certain social services and State medical and medical insurance expenditures. The Social Security Act requires the Secretary of Health and Human Services to calculate and publish the FMAPs each year.

The "Federal Medical Assistance Percentages" are for Medicaid. Section 1905(b) of the Act specifies the formula for calculating Federal Medical Assistance Percentages.

"Enhanced Federal Medical Assistance Percentages" are for the State Children’s Health Insurance Program (SCHIP) under Title XXI of the Social Security Act. Section 2105(b) of the Act specifies the formula for calculating Enhanced Federal Medical Assistance Percentages. The FMAPs are subject to change.

3.1 TMHP EDI Overview

The Texas Health and Human Services Commission (HHSC) and the Texas Medicaid & Healthcare Partnership (TMHP) encourage providers to submit claims using electronic methods. Providers can participate in the most efficient and effective method of submitting requests to TMHP by submitting through the TMHP EDI Gateway. TMHP uses the Health Insurance Portability and Accountability Act (HIPAA)-compliant American National Standards Institute (ANSI) ASC X12 4010A1 file format through secure socket layer (SSL) and virtual private networking (VPN) connections for maximum security. Providers can access TMHP’s electronic services through the TMHP website at www.tmhp.com, TexMedConnect, vendor software, and third party billing agents. Providers may also submit claims using paper forms.

3.1.1 Advantages of Electronic Services

- **It’s fast.** No more waiting by the mailbox or telephone inquiries; know what’s happening to claims in less than 24 hours and receive reimbursement for approved claims within a week. TexMedConnect users can submit individual requests interactively and receive a response immediately.

- **It’s free.** All electronic services offered by TMHP are free, including TexMedConnect and its technical support and training.

- **It’s easy.** TMHP offers computer-based training (CBT) for TexMedConnect, Medicaid billing, and many other topics, including those for the Children with Special Health Care Needs (CSHCN) Services Program, and Long Term Care, as well as a large library of reference materials and manuals on www.tmhp.com.

- **It’s safe.** TMHP EDI services use VPN and SSL connections, just like the United States government, banks, and other financial institutions, for maximum security.

- **It’s accurate.** TexMedConnect and most vendor software programs have features that let providers know when they’ve made a mistake, which means fewer rejected and denied claims. Rejected claims are returned with messages that explain what’s wrong, so the claim can be corrected and resubmitted right away. Denied claims appear on the provider’s Remittance and Status (R&S) Report along with paid and pending claims.

- **It’s there when it’s needed.** Electronic services are available day and night; from home, the office, or anywhere in the world.

- **It makes record keeping and research easy.** Not only can TexMedConnect be used to send and receive claims, it can check client eligibility, retrieve Electronic Remittance and Status (ER&S) Reports, perform claim status inquiries, and archive claims. TexMedConnect can generate and print reports on everything it sends, receives, and archives.

3.1.2 Electronic Services Available

- Eligibility verification
- Claims submission
- Claim status inquiry (CSI)
- ER&S Reports
- Appeals (also known as correction and resubmission)

3.1.3 Paper Remittance and Status (R&S) Reports No Longer Available

TMHP no longer produces or distributes paper R&S Reports. This initiative saves the state of Texas the cost of printing and mailing Paper R&S Reports.
All R&S Reports are now available online through the secure portion of the TMHP website at www.tmhp.com. Providers who receive an ER&S Report with third party software are not affected by this change.

Online R&S Reports are available as a portable document format (PDF) file every Monday morning—four days earlier than paper R&S Reports were available. Providers must have a provider administrator account on the TMHP website to receive R&S Reports. Providers who do not have a provider administrator account should create one to avoid delays or interruptions to business processes.

Providers can follow the instructions in the TMHP Portal Security Training Guide to setup a provider administrator account.

3.2 Electronic Billing

Providers who want to transition from paper billing to electronic billing must decide how they will submit their claims to TMHP. Providers can use TexMedConnect on the TMHP website at www.tmhp.com, vendor software that submits files directly to TMHP, or they may use a third party billing agent (e.g., billing companies and clearinghouses) who submit files on the provider’s behalf.

3.2.1 TexMedConnect

TexMedConnect is a free, web-based, claims submission application provided by TMHP. Technical support and training for TexMedConnect are also available free from TMHP. Providers can submit claims, eligibility requests, claim status inquiries, appeals, and download ER&S Reports (in either PDF or ANSI 835 formats) using TexMedConnect. TexMedConnect can interactively submit individual claims that are processed in seconds. To use TexMedConnect, providers must have:

- An internet service provider (ISP)
- One of the following internet browsers:
  - Microsoft® Internet Explorer®
  - Netscape Navigator®

Note: Although TexMedConnect will work with Microsoft® Internet Explorer® 7.0 and Netscape Navigator®, TMHP only offers technical support for TexMedConnect when it is used with Microsoft® Internet Explorer® 6.0.

A broadband connection is recommended but not required. Providers that use TexMedConnect can find the online TexMedConnect manuals for Acute Care and Long Term Care on the TexMedConnect Info web page in the EDI section of the TMHP website at www.tmhp.com/Pages/EDI/EDI_TexMedConnect.aspx.

3.2.1.1 EDI ANSI X12 4010 835 File Changes

TMHP has implemented modifications to the EDI ANSI X12 4010 835 files. The 835 files display the appropriate Claims Adjustment Reason Code (CARC), Claims Adjustment Group Code (CAGC), and Remittance Advice Remarks Code (RARC) explanation codes that are associated with Explanation of Benefits (EOB) denials.

The 835 file includes the CARC, CAGC, and RARC explanation codes that are associated with the highest priority detail EOB to provide a clearer explanation for a denial. The CARC, CAGC, and RARC explanation codes that are associated with EOB 01147 (Please refer to other EOB messages assigned to this claim for payment/denial information) are no longer displayed.

3.2.2 Vendor Software

Providers that do not use TexMedConnect must use vendor software to create, submit, and retrieve data files. Providers can use software from any vendor listed on the EDI Vendor Testing List, which is located in the EDI section of the TMHP website at www.tmhp.com. There are hundreds of software vendors that
have a wide assortment of services and that have been approved to submit electronic files to TMHP.
Providers that plan to access TMHP’s electronic services with vendor software should contact the
vendor for details on software requirements. TMHP does not make vendor recommendations or
provide any assistance for vendor software. Not all vendor software offers the same features or levels of
support. Providers are encouraged to research their software thoroughly to make certain that it meets
their needs and that it has completed testing and has been certified with TMHP.

3.2.3 Third Party Billing Agents
Billing agents are companies or individuals who submit electronic files to TMHP on behalf of the
provider. Generally, this means that the provider uses a product that sends billing or other information
to the billing agent who processes it and transmits it to TMHP and other institutions. A complete list of
billing agents who have completed the testing process and been certified by TMHP can be found on the
EDI Vendor Testing List, which is located in the EDI section of the TMHP website at www.tmhp.com.
TMHP does not make billing agent recommendations or provide any assistance for billing agents’
software or services. TMHP has no information on the software or other requirements of billing agents.
Providers should contact the billing agent to obtain information about their products and processes.

3.3 Gaining Access
Providers must setup their software or billing agent services to access the TMHP EDI Gateway.
Providers who use billing agents or software vendors should contact those organizations for information
about installation, settings, maintenance, and their processes and procedures for exchanging electronic
data.

Providers that download the ANSI 835 file through TexMedConnect and providers that use vendor
software must request a submitter ID. A submitter ID is necessary for vendor software to access TMHP’s
electronic services. It serves as an electronic mailbox for the provider and TMHP to exchange data files.
To order a submitter ID, providers must call the EDI Help Desk at 1-888-863-3638, Option 3. Providers
that use a billing agent do not need a submitter ID.

Providers may receive an ER&S Report by completing the Electronic Remittance and Status (ER&S)
Agreement and submitting it to the EDI Help Desk after setting up access to the TMHP EDI Gateway.

Refer to: Form 3.1, “Electronic Remittance and Status (ER&S) Agreement (2 pages)” in this section.

3.4 Training
Providers should contact their TMHP Provider Relations representative for assistance with resolving
billing issues. Information about training opportunities is available in the Provider Education section of
the TMHP website at www.tmhp.com. Providers may also use the many reference materials and
workbooks available on the website. The TMHP EDI Help Desk provides technical assistance and does
not provide training.

3.5 Electronic Transmission Reports
Providers are required to retain all claim and electronic file transmission records. Providers must verify
that all claims submitted to TMHP are received and accepted. Providers must also track claims submis-
sions against their claims payments to detect and correct all claim errors.

Refer to: Subsection 1.4.3, “Retention of Records and Access to Records and Premises” in Section 1,
Provider Enrollment and Responsibilities (Vol. 1, General Information), for more inform-

If an electronic file transmission record is missing, providers can request that the transmission report
file be reset by contacting the TMHP EDI Help Desk at 1-888-863-3638, Option 3. The TMHP EDI Help
Desk will then reset the files for the production submitter ID provided. Requests for transmission
reports produced in the previous 30 days will be provided at no cost to providers. Requests for trans-
mission reports produced more than 30 days before the request will result in a charge of $500 plus 8.25 percent sales tax of $41.25 for a total charge of $541.25. Providers that hold a tax-exempt certificate will not be assessed the sales tax. This cost is per transmission report.

### 3.6 Provider Check Amounts Available Online

Acute care providers can search, view, and print on the TMHP website at www.tmhp.com all payment amounts issued during the previous year.

The features of the online check amount include:

- The ability to search information up to one year before the date of the search.
- All results are displayed on a single screen.
- All results can be printed on a single report.
- The 52 weeks of reimbursement payment information includes the:
  - Payment date
  - Payee name
  - Payment amount
  - Program for which payment was issued
  - Hold amount
  - Payment status

Providers must have or must create an administrative account to view their payment amounts online. Providers can then grant “View Payment Amounts” security permission to the office staff of their choice. Providers can access their check amounts by logging into their accounts from the TMHP website and then pressing View Payment Amounts.

Provider check amounts are also available through the automated inquiry system (AIS) telephone line and ER&S Reports.

### 3.7 Third Party Vendor Implementation

TMHP requires all software vendors and billing agents to complete EDI testing before access to the production server is allowed. Vendors that wish to begin testing may either call the EDI Help Desk at 1-888-863-3638, Option 3, or visit the Edifecs testing site at editesting.tmhp.com and use the TMHP Support link. An Edifecs account will be created for the vendor to begin testing EDI formats once they have enrolled for testing. After the successful completion of Edifecs testing and the submission of a Trading Partner Agreement, vendors must then complete end-to-end testing on the TMHP test server. Software vendors and billing agents must be partnered with at least one Texas provider before a test submitter ID can be issued. When end-to-end testing has been completed, the software vendor or billing agent will be added to the EDI Submitter List. Providers and billing agents may then order production submitter IDs for use with the vendor’s software. Companion guides and vendor specifications are available on the EDI page of the TMHP website at www.tmhp.com.

#### 3.7.1 Automated Maintenance Process for All Electronic Submitters

All submitter folders have a maximum limit of 7500 files, and no files can be more than 30 days old. Files that exceed these limits will be purged by TMHP on a daily basis. Providers should review, retrieve, and backup their electronic response files within 30 days. Files not retrieved within the 30-day time period or files that exceed a maximum file count of 7500 will be purged by TMHP. All electronic submitters are responsible for the maintenance of their submitter folders.
Requests for transmission reports produced after the 30-day period, or resulting from a purge of over 7500 files will require fees, as outlined in subsection 3.5, “Electronic Transmission Reports” of this section.

### 3.7.2 Supported File Types

TMHP EDI supports the following electronic HIPAA-compliant ANSI ASC X12 4010A transaction types:

<table>
<thead>
<tr>
<th>Electronic Transaction Types</th>

### 3.8 Forms

*Note:* Forms are available on the TMHP website at www.tmhp.com.
### Electronic Remittance and Status (ER&S) Agreement

**Before your ER&S Agreement** can be processed, you MUST choose ONE of the following:

- **Set up INITIALLY** (first time). Use Production User ID: ____________ (9 digits)
- **CHANGE** Production User ID FROM: ____________ (9 digits) TO: ____________ (9 digits)
- **REMOVE** Production ID Remove: ____________ (9 digits)

**The TMHP Production User ID (Submitter ID) is the electronic mailbox ID used for downloading your Electronic Remittance & Status (ER&S) reports. For assistance with identifying and using your Production User ID and password, contact your software vendor or clearinghouse.**

**This information MUST be completed before your request can be processed.**

<table>
<thead>
<tr>
<th>Provider Name (must match TPI/NPI number)</th>
<th>Billing TPI Number</th>
<th>Provider Tax ID Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Provider's Physical Address</td>
<td>Billing NPI/API Number</td>
<td>Provider Phone Number</td>
</tr>
<tr>
<td>Provider Contact Name (if other than provider)</td>
<td>Provider Contact Title</td>
<td>Contact Phone Number</td>
</tr>
</tbody>
</table>

**Do not complete this block UNLESS the ER&S will be downloaded by anyone OTHER than the provider.**

<table>
<thead>
<tr>
<th>Name of Business Organization to Receive ER&amp;S</th>
<th>Business Organization Phone Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business Organization Contact Name</td>
<td>Business Organization Contact Phone No.</td>
</tr>
<tr>
<td>Business Organization Address</td>
<td>Business Organization Tax ID</td>
</tr>
</tbody>
</table>

**Check each box after reading and understanding the following statements.**

If you are unsure about anything that is stated below, contact the TMHP EDI Help Desk at (888) 863-3638. All three statements must be checked before we can process your Electronic Remittance & Status Agreement.

- I (we) request to receive Electronic Remittance and Status information and authorize the information to be deposited in the electronic mailbox as indicated above. I (we) accept financial responsibility for costs associated with receipt of Electronic R&S information.
- I (we) understand that paper formatted R&S information will continue to be sent to my (our) accounting address as maintained at TMHP until I (we) submit an Electronic R&S Certification Request form.
- I (we) will continue to maintain the confidentiality of records and other information relating to recipients in accordance with applicable state and federal laws, rules, and regulations.

3.2 Claim Status Inquiry (CSI) Authorization Form

Claim Status Inquiry Authorization

This form is for ACUTE CARE providers only.

If you are a Long Term Care provider, contact TMHP’s EDI Help Desk at 888-863-3638 to request the correct form.

The following information MUST be completed before you can be granted Claim Status Inquiry (CSI) access.

1. Enter your Production User ID:

2. Enter your Production User ID Password:
   The TMHP Production User ID (Submitter ID) is the electronic mailbox ID used for downloading your Claim Status Inquiry reports. For assistance with identifying and using your Production User ID and password, contact your software vendor or clearinghouse.

3. Select Action:
   A  [] Add Claim Status Inquiry Privileges
   B  [] Revoke Claim Status Inquiry Privileges

4. Enter organization information:
   List the billing Texas Provider Identifier (TPI)/Atypical Provider Identifier (API) and National Provider Identifier (NPI) number(s) you choose to access using the Production User ID given above. Submit additional copies of this form if you need to add more TPI and NPI/API numbers.

   Provider Name
   Must be the name associated with the TPI Base number listed at right.

   7–Digit BILLING TPI Base Number
   The first 7 digits of the 9 digit TPI number.*

   10-digit BILLING NPI/API*

   *Note: Performing TPI and NPI/API numbers do not have Claim Status Inquiry access. Enter only BILLING TPI and NPI/API numbers.

5. Enter Requestor Information:
   Name:
   Title:
   Signature:
   Telephone Number: ________________________________ ext.
   Fax Number: ________________________________ ext.

6. Return this form to:
   Texas Medicaid & Healthcare Partnership

4.1 General Medicaid Eligibility

A person may be eligible for medical assistance through Medicaid if the following conditions are met:

- The applicant must be eligible for medical assistance at the time the service is provided. It is not mandatory that the process of determining eligibility be completed at the time service is provided; the client can receive retroactive eligibility. Services or supplies cannot be paid under Texas Medicaid if they are provided to a client before the effective date of eligibility for Medicaid or after the effective date of denial of eligibility. Having an application in process for Medicaid eligibility does not guarantee the applicant will be eligible.

- The service must be a benefit and determined medically necessary (except for preventive family planning, annual physical exams, and Texas Health Steps [THSteps] medical or dental checkup services) by Texas Medicaid and must be performed by an approved provider of the service.

- Applicants for medical assistance potentially are eligible for Medicaid coverage up to three calendar months before their application for assistance, if they have unpaid or reimbursable Medicaid-covered medical bills and have met all other eligibility criteria during the time the service was provided. The provision also includes deceased individuals when a bona fide agent requests application for services. An application for retroactive eligibility must be filed with the Health and Human Services Commission (HHSC); it is not granted automatically. The applicant must request the prior coverage from an HHSC representative and complete the section of the application about medical bills.

Clients who are not eligible for Medicaid but meet certain income guidelines may receive family planning services through other family planning funding sources. Clients not eligible for Medicaid are referred to a family planning provider. Clients seeking other services may be eligible for state health-care programs, some of which are described in this section.

Refer to: Department of State Health Services (DSHS) website at www.dshs.state.tx.us/famplan/ for information about family planning and the locations of family planning clinics that receive Title V, X, or XX funding from DSHS.

4.1.1 Retroactive Eligibility

Medicaid coverage may be assigned retroactively for a client. For claims for an individual who has been approved for Medicaid coverage but has not been assigned a Medicaid client number, the 95-day filing deadline does not begin until the date the notification of eligibility is received from HHSC and added to the TMHP eligibility file.

The date on which the client’s eligibility is added to the TMHP eligibility file is the add date. To ensure the 95-day filing deadline is met, providers must verify eligibility and add date information by calling the Automated Inquiry System (AIS) or using the TMHP Electronic Data Interchange (EDI) electronic eligibility verification.

If a person is not eligible for medical services under Texas Medicaid on the date of service, reimbursement for all care and services provided must be resolved between the provider and the client receiving the services. Providers are not required to accept Medicaid for services provided during the client’s retroactive eligibility period and may continue to bill the client for those services. This guideline does not apply to nursing facilities certified by the Department of Aging and Disability Services (DADS).

If it is the provider’s practice not to accept Medicaid for services provided during the client’s retroactive eligibility period, the provider must apply the policy consistently for all clients who receive retroactive eligibility. Providers must inform the client about their policy before rendering services. If providers accept Medicaid assignment for the services provided during the client’s retroactive eligibility period and want to submit a claim for Medicaid-covered services, providers must refund payments received from the client before billing Medicaid for the services.

Note: The Medicaid managed care programs do not generally have retroactive eligibility.
The provider should also check the Eligibility Date on the Client Medicaid Identification (Form H3087) to see whether the client has retroactive eligibility for previous bills. Clients with retroactive eligibility are issued only one Client Medicaid Identification (Form H3087) showing the retroactive eligibility period. Texas Medicaid considers all services between the Eligibility Date and the Good Through date for reimbursement. Providers can determine whether a client has retroactive eligibility for previous bills by verifying eligibility on www.tmhp.com, transmitting an electronic eligibility request, or calling AIS or the TMHP Contact Center.

Examples of Medicaid identification forms are found at the end of this section. Actual Medicaid forms can be identified by a watermark.

Refer to: Subsection 4.1, “Client Medicaid Identification (Form H3087)” in this section.

Section 8: Managed Care (Vol. 1, General Information).

4.1.2 Expedited Eligibility (Applies to Medicaid-eligible Pregnant Women Throughout the State)

HHSC processes Medicaid applications for pregnant women within 15 business days of receipt. Once eligibility has been certified, a Client Medicaid Identification (Form H3087) will be issued to verify eligibility and to facilitate provider reimbursement.

4.1.3 Medicaid Buy-In Program for Employed Individuals with Disabilities

The Medicaid Buy-In (MBI) Program allows employed individuals with disabilities to receive Medicaid services by paying a monthly premium. Some MBI participants, based on income requirements, may be determined to have a $0 premium amount and therefore are not required to make a premium payment. Individuals with earnings of less than 250 percent of the federal poverty level (FPL) may be eligible to participate in the program. Applications for the program are accepted through HHSC’s regular Medicaid application process.

Participants will receive a Medicaid identification form that indicates the Medicaid services for which they are eligible. MBI participants in urban service areas will be served through Texas Medicaid fee-for-service and MBI participants in Primary Care Case Management (PCCM) counties will be served through PCCM.

4.1.4 Newborn Eligibility

A newborn child may be eligible for Medicaid for up to 1 year if:

• The child’s mother received Medicaid at the time of the child’s birth.
• The child’s mother is eligible for Medicaid or would be eligible if pregnant.
• The child resides in Texas.

If the newborn is eligible for Medicaid coverage, providers must not require a deposit for newborn care from the guardian. The hospital or birthing center must report the birth to HHSC Eligibility Services at the time of the child’s birth.

If the hospital or birthing center notifies HHSC Eligibility Services that a newborn child was born to a Medicaid-eligible mother, then the hospital caseworker, mother, and attending physician (if identified) should receive a Medicaid Eligibility Verification (Form H1027) from HHSC a few weeks after the child’s birth. Form H1027 includes the child’s Medicaid identification number and effective date of coverage. After the child has been added to the HHSC eligibility file, a Client Medicaid Identification (Form H3087) is issued.

Note: Claims submitted for services provided to a newborn eligible for Medicaid must be filed using the newborn client’s Medicaid number. Claims filed with the mother’s Medicaid number cause a delay in reimbursement.
The Medicaid number on the Medicaid Eligibility Verification (Form H1027) may be used to identify newborns eligible for Medicaid.

Refer to: Subsection 4.1, “Client Medicaid Identification (Form H3087)” in this section.

### 4.1.5 Foster Care

Most children in the state of Texas foster care program are automatically eligible for Medicaid.

Extended health-care coverage is also available for some former foster care youth clients enrolled in an institution of higher education through the Former Foster Children in Higher Education (FFCHE) program.

To ensure that these children have access to the necessary health-care services for which they are eligible, providers can accept the Medicaid Eligibility Verification (Form H1027) as evidence of Medicaid eligibility. Although this form may not list the client’s Medicaid identification number, it is an official state document that establishes Medicaid eligibility.

Providers should honor the Medicaid Eligibility Verification (Form H1027) as proof of Medicaid eligibility and must bill Texas Medicaid as soon as a Medicaid ID number is assigned. Medicaid ID numbers will be assigned approximately one month from the issue date of the Medicaid Eligibility Verification (Form H1027). The form includes a Department of Family and Protective Services (DFPS) client number that provides an additional means of identification and tracking for children in foster care.

Reminder: Adoption agencies/foster parents are no longer considered third party resources (TPRs). Medicaid is primary in these circumstances.

Refer to: Subsection 8.5, “STAR Health Program” in Section 8, “Managed Care” (Vol. 1, General Information).

### 4.2 Eligibility Verification

To verify a client’s Texas Medicaid eligibility, use the following options:

- Verify electronically through TMHP EDI. Providers may inquire about a client’s eligibility by electronically submitting one of the following for each client:
  - Medicaid or Children with Special Health Care Needs (CSHCN) Services Program identification number.
  - One of the following combinations: Social Security number and last name; Social Security number and date of birth; or last name, first name, and date of birth. Providers can narrow the search by entering the client’s county code or sex.

- Submit electronic verifications in batches limited to 5,000 inquiries per transmission.

- Verify the client’s Medicaid eligibility using the Medicaid Eligibility Verification (Form H1027) or the Client Medicaid Identification (Form H3087).

- Contact the TMHP Contact Center or AIS at 1-800-925-9126 or 1-512-335-5986.

- Submit a hard-copy list of clients to TMHP. This service is only used for clients with eligibility that is difficult to verify. A charge of $15 per hour plus $0.20 per page, payable to TMHP, applies to this eligibility verification. The list includes names, gender, and dates of birth if the Social Security and Medicaid ID numbers are unavailable. TMHP can check the client’s eligibility manually, verify eligibility, and provide the Medicaid ID numbers. Mail the lists to the following address:
  
  Texas Medicaid & Healthcare Partnership  
  Contact Center  
  12357-A Riata Trace Parkway  
  Suite 100  
  Austin, TX 78727
PCCM primary care providers can also check the client’s letter or the current month’s panel report of clients assigned to their practice to determine whether the client’s name and Medicaid ID number appear on the list. If the client’s name and Medicaid ID number are shown, eligibility is guaranteed for that month only. The Panel Report Changes list is also available on the TMHP website.

Refer to: Subsection 8.6.10.3, “Monthly Client Panel Report” in Section 8, “Managed Care” (Vol. 1, General Information).

### 4.2.1 Advantages of Electronic Eligibility Transactions

Eligibility transactions through TexMedConnect or EDI have the following advantages:

- Submissions are available 24-hours a day 7 days a week
- Submission of EDI batches of 5000 per transmission
- Submission of client group lists through TexMedConnect. Providers can create lists of clients to verify eligibility. Each client group can contain up to 250 clients, providers can create up to 100 groups for each NPI number.

Electronic eligibility responses contain:

- Restrictions applicable to the client’s eligibility such as limited, emergency, or womens health.
- Medicare eligibility and effective dates, including Part A, B, and C.
- Complete other insurance information, including name and address, and effective dates. EDI transactions also indicate the patient relationship to policy holder.

### 4.3 Medicaid Identification and Verification

Providers are responsible for requesting and verifying current eligibility information from clients by using the methods listed above or by asking clients to produce their Medicaid Identification forms (Form H3087 or H1027) issued for the month in which services are provided. Providers must accept either of these forms as valid proof of eligibility. Providers should retain a copy for their records to ensure the client is eligible for Medicaid when the services are provided. Clients should share eligibility information with their providers.

Providers should request additional identification if they are unsure whether the person presenting the form is the person identified on the form.

Providers should check the Eligibility Date to see whether the client has possible retroactive eligibility for previous bills.

Only those clients listed on the Medicaid identification form are eligible for Medicaid. If a person insists he or she is eligible for Medicaid but cannot produce a current Client Medicaid Identification (Form H3087) or Medicaid Eligibility Verification (Form H1027), has lost it, or has forgotten to bring it to the appointment, providers can verify eligibility through the methods listed in subsection 4.2, “Eligibility Verification” in this section. Providers must document this verification in their records and treat these clients as if they had presented a Client Medicaid Identification (Form H3087) or Medicaid Eligibility Verification (Form H1027).

HHSC issues one of the following only when a client’s Form H3087 has been lost or stolen or for temporary emergency Medicaid:

- **Form H1027-A.** Medicaid eligibility verification is used to indicate eligibility for clients who receive regular Medicaid coverage.
- **Form H1027-B.** Medicaid Qualified Medicare Beneficiary (MQMB) is issued to clients eligible for MQMB coverage.
- **Form H1027-C.** QMB is issued to clients who are eligible for QMB coverage only.
• Form H1027-F. Temporary Medicaid identification for clients receiving Former Foster Care in Higher Education (FFCHE) health care.

Refer to: Subsection 4.9.1, “QMB/MQMB Identification” in this section.

The Medicaid Eligibility Verification (Form H1027-A) is acceptable as evidence of eligibility during the eligibility period specified unless the form contains limitations that affect the eligibility for the intended service. Providers must accept any of the documents listed above as valid proof of eligibility. If the client is not eligible for medical assistance or certain benefits, the client is treated as a private-pay patient.

Note: When treating a Medicaid Managed Care Program client, providers must refer to the Client Medicaid Identification (Form H3087) and, if applicable, the client’s health plan ID card.

Refer to: Subsection 4.2, “Eligibility Verification” in this section.

Medicaid clients in Cameron, Hidalgo, and Travis counties are now issued a Medicaid Access Card, which is a plastic smart card that automates client check-in and eligibility verification. In these counties, clients use their Medicaid Access Card in place of the Client Medicaid Identification (Form H3087) to identify themselves as eligible for Medicaid. If a Medicaid client with one of these cards sees a provider for service in an area that is not using the new process, providers can still verify the client’s Medicaid eligibility through the methods listed in subsection 4.2, “Eligibility Verification” in this section.

Providers must review limitations identified on the Medicaid electronic eligibility file, AIS, the Client Medicaid Identification (Form H3087), or the Medicaid Eligibility Verification (Form H1027-A). Clients may be limited to one primary provider or pharmacy. Qualified Medicare Beneficiary (QMB) clients will be limited to Medicaid coverage of the Medicare Part A premiums, if any, Medicare Part B premiums, and Medicare deductibles and coinsurance for Medicare services.

If the client is identified as eligible and no other limitations of eligibility affect the intended service, proceed with the service. Eligibility during a previous month does not guarantee eligibility for the current month. The Medicaid Eligibility Verification (Form H1027-A), the Client Medicaid Identification (Form H3087), the PCCM Monthly Panel Report, and a member list from a Medicaid Managed Care HMO health plan are the only documents that are honored as verification of Medicaid eligibility. The right side of the Client Medicaid Identification (Form H3087) consists of information about limited services provided to clients. On some Medicaid identification forms, a check mark indicates eligibility for a particular service.

• Reminders of THSteps medical and dental checkups appear under the client’s name during the month the client is eligible for routine checkups. Emergency THSteps dental services, or THSteps dental or medical checkups services may be provided when medically necessary.

• All Medicaid clients birth through 20 years of age are eligible to receive medically necessary THSteps dental services.

Providers should indicate the services received by the client by putting a slash (/) with an initial and date in the appropriate column on the Medicaid identification form. Providers should update the appropriate columns of the Medicaid Identification Form to indicate services received by Medicaid fee-for-service and PCCM clients. Providers can check the third party resource (TPR) column on the Client Medicaid Identification (Form H3087) to determine whether the client has other health insurance.

Refer to: Subsection 4.11, “Third Party Liability (TPL)” in this section.

In accordance with current federal policy, Texas Medicaid and Texas Medicaid clients cannot be charged for the client’s failure to keep an appointment. Only claims for services provided are considered for payment. Clients may not be billed for the completion of a claim form, even if it is a provider’s office policy.
4.4 Restricted Medicaid Coverage
The following sections are about limitations that may appear on the Medicaid Identification form, indicating that the client’s eligibility is restricted to specific services. Unless “LIMITED” appears on the form, the client is not limited to a single provider.

4.4.1 Emergency Only
The word “EMERGENCY” on the form indicates the client is restricted to coverage for an emergency medical condition. “Emergency medical condition” is defined in subsection 4.4.2.2, “Exceptions to Limited Status” in this section.

Certification for emergency Medicaid occurs after the services have been provided. The coverage is retroactive and limited to the specific dates that the client was treated for the emergency medical condition.

Clients limited to emergency medical care are not eligible for family planning, THSteps, or Comprehensive Care Program (CCP) benefits. Only services directly related to the emergency or life-threatening situations are covered.

Undocumented aliens and aliens with a nonqualifying entry status are identified for emergency Medicaid eligibility by the classification of type programs (TPs) 30, 31, 32, 33, 34, 35, and 36. Under Texas Medicaid, undocumented aliens are only eligible for emergency medical services, including emergency labor and delivery.

Any service provided after the emergency medical condition is stabilized is not payable.

If a client is not eligible for Medicaid and is seeking family planning services, providers may refer the client to one of the clinics listed on the DSHS website at www.dshs.state.tx.us/famplan.

4.4.2 Client Limited Program
Texas Medicaid fee-for-service clients can be limited to a primary care provider and/or a primary care pharmacy. Medicaid managed care clients can be limited to a primary care pharmacy.

The client is assigned to a designated provider for access to medical benefits and services when one of the following conditions exists:

- The client received duplicative, excessive, contraindicated, or conflicting health-care services, including drugs.
- A review indicates abuse, misuse, or fraudulent actions related to Medicaid benefits and services.

After analysis through the neural network component of the Medicaid Fraud and Abuse Detection System (MFADS), qualified medical personnel validate the initial identification and determine candidates for limited status. The validation process includes consideration of medical necessity. For the limited status designation, medical necessity is defined as the need for medical services to the amount and frequency established by accepted standards of medical practice for the preservation of health, life, and the prevention of more impairments.

Except for specialist consultations, services rendered to a client by more than one provider for the same or similar condition during the same time frame may not be considered medically necessary. For questions about pharmacy services for clients limited to a primary care pharmacy, contact the Limited Program Hotline at 1-800-436-6184.

4.4.2.1 Limited Medicaid Identification
Clients with limited status receive the Client Medicaid Identification (Form H3087) with “LIMITED” printed on the form. The designated provider names are printed on the form under the word “LIMITED.” Only one client is identified on a LIMITED Client Medicaid Identification (Form H3087).
The Limited Program may also alert providers by means of a message on Medicaid Identification Form H3087, when the form was reportedly used by an unauthorized person or persons, or for an unauthorized purpose. In these cases, the provider is asked to verify the client’s identity by requesting personal identification that carries a photograph, such as a driver’s license.

When limited Texas Medicaid fee-for-service clients attempt to obtain nonemergency services from someone other than their designated primary care provider, the provider must do one of the following:

- Verify the limited status online on the TMHP website or by calling AIS or the TMHP Contact Center at 1-800-925-9126.
- Attempt to contact the client’s designated primary care provider for a referral. If the provider is unable to obtain a referral, the provider must inform clients that they are financially responsible for the services.

### 4.4.2.2 Exceptions to Limited Status

Limited clients may go to any provider for the following services or items:

- Ambulance services
- Anesthesia
- Annual well-woman checkup
- Assistant surgery
- Case management services
- Chiropractic services
- Counseling services provided by a chemical dependency treatment facility
- Eye exams for refractive errors
- Eyeglasses
- Family planning services (regardless of place of service [POS])
- Genetic services
- Hearing aids
- Home health services
- Laboratory services (including interpretations)
- Licensed clinical social worker (LCSW) services
- Licensed professional counselor (LPC) services
- Mental health rehabilitation services
- Mental retardation diagnostic assessment (MRDA) performed by an MRDA provider
- Nursing facility services
- Primary home care
- Psychiatric services
- Radiology services (including interpretations)
- School Health and Related Services (SHARS)
- CCP
- THSteps medical and dental services
For referrals or questions, contact:

HHSC  
Office of Inspector General  
Limited Program - MC 1323  
PO Box 85200  
Austin, TX 78708  
1-800-436-6184

If an emergency medical condition occurs, the limited restriction does not apply. The term emergency medical condition is defined as a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain), such that the absence of immediate medical attention could reasonably be expected to result in:

- Placing the client’s health (or, with respect to a pregnant woman, the health of the woman or her unborn child) in serious jeopardy.
- Serious impairment to bodily functions.
- Serious dysfunction of any bodily organ or part.

**Important:** A provider who sends in an appeal because a claim was denied with explanation of benefits (EOB) 00066 must include the performing provider identifier, not just a name or group provider identifier. Appeals without a performing provider identifier are denied. The National Provider Identifier (NPI) of the designated provider must be entered in the appropriate paper or equivalent electronic field for nonemergency inpatient and outpatient claims to be considered for reimbursement.

**Note:** Only when the designated provider or designated provider representative has given permission for the client to receive nonemergency inpatient and/or outpatient services, including those provided in an emergency room, can the facility use the designated provider’s NPI for billing.

### 4.4.2.3 Selection of Designated Provider and Pharmacy

Texas Medicaid fee-for-service clients identified for limited status can participate in the selection of one primary care provider, primary care pharmacy, or both from a list of participating Medicaid providers. Eligible providers cannot be under administrative action, sanction, or investigation. In general, the designated primary care provider’s specialty is general practice, family practice, or internal medicine. Other specialty providers may be selected on a case-by-case basis. Primary care providers can include, but are not limited to: a physician, physician assistant, physician group, advanced practice nurse, outpatient clinic, rural health clinic (RHC), or Federally Qualified Health Center (FQHC).

Medicaid Managed care clients identified for limited status can participate in the selection of pharmacy providers only from participating Medicaid providers who are not under administrative action, sanction, or investigation.

If the client does not select a primary care provider and/or primary care pharmacy, HHSC selects one for the client.

When a candidate for the designated provider is determined, HHSC contacts the provider by letter. If the provider agrees to be the designated provider, HHSC sends letters of confirmation to the designated provider and the client confirming the name of the client, primary care provider or primary care pharmacy, and the effective date of the limited arrangement.

### 4.4.2.4 Duration of Limited Status

The Limited Program duration of limited status is the following:

- Initial limited status period–minimum of 36 months.
• Second limited status period—additional 60 months.

• Third limited status period—will be for the duration of eligibility and all subsequent periods of eligibility.

• Clients arrested, indicted, or convicted of a nonfelony crime related to Medicaid fraud will be assigned limited status for 60 months or the duration of eligibility and subsequent periods of eligibility up to or equal to 60 months.

HHSC uses the same time frames for clients whose LIMITED Medicaid Identification (Form H3087) includes a message.

Clients are removed from limited status at the end of the specified limitation period if their use of medical services no longer meets the criteria for limited status. A medical review also may be initiated at the client’s or provider’s request. Clients or providers can call the Limited Program Hotline at 1-800-436-6184 to request this review.

Providers may request to no longer serve as a client’s designated provider at any time during the limited period by calling the Limited Program Hotline. Providers are asked to serve or refer the client until another arrangement is made. New arrangements are made as quickly as possible.

4.4.2.5 Referral to Other Providers

Texas Medicaid fee-for-service clients with a limited status may be referred by their designated provider to other providers. For the referred provider to be paid, the provider identifier of the referring designated provider must be in the referring provider field of the claim form. Claims submitted electronically (see subsection 6.2, “TMHP Electronic Claims Submission” in Section 6, “Claims Filing” [Volume 1, General Information]) must have the six-digit Medicare core number of the referring designated provider in the Referring Provider Field. Providers must consult with their vendor for the location of this field in the electronic claims format.

4.4.2.6 Hospital Services

An inpatient hospital claim for a limited Medicaid fee-for-service client is considered for reimbursement if the client meets Medicaid eligibility and admission criteria. Hospital admitting personnel are asked to check the name of the designated provider printed under the word “LIMITED” on the client’s LIMITED Medicaid Identification Form H3087 and inform the admitting physician of the designated provider’s name if the two are different.

Provider claims for nonemergency inpatient services for limited Texas Medicaid fee-for-service clients are considered for payment only when the designated provider identifier appears on the claim form as the billing, performing, or referring physician.

Providers can get information about claim reimbursement for limited clients by calling the TMHP Contact Center at 1-800-925-9126.

4.4.2.7 Limited Status Claims Payment

Payment for services to a limited Medicaid client who is not in a managed care plan is made to the designated provider only, unless the services result from a designated provider referral or emergency. An automated review process determines if the claim includes the limited primary care provider’s provider identifier as the billing, performing, or referring provider. If the limited primary care provider’s provider identifier is not indicated on the claim, the claim is not paid. Exceptions to this rule include emergency care and services that are included in subsection 4.4.2.2, “Exceptions to Limited Status” in this section. Appeals for denied claims are submitted to TMHP and must include the designated Medicaid provider identifier for reimbursement consideration.

Claims for provider services for Texas Medicaid fee-for-service clients must include the provider identifier for the designated primary care provider as the billing or performing provider or a referral number in the prior authorization number (PAN) field.
4.4.3 Hospice Program

DADS manages the Hospice Program through provider enrollment contracts with hospice agencies. These agencies must be licensed by the state and Medicare-certified as hospice agencies. Coverage of services follows the amount, duration, and scope of services specified in the Medicare Hospice Program. Hospice pays for services related to the treatment of the client’s terminal illness and for certain physician services (not the treatments).

Medicaid Hospice provides palliative care to all Medicaid-eligible clients (no age restriction) who sign statements electing hospice services and are certified by physicians to have six months or less to live if their terminal illnesses run their normal courses. Hospice care includes medical and support services designed to keep clients comfortable and without pain during the last weeks and months before death.

When clients elect hospice services, they waive their rights to all other Medicaid services related to their terminal illness. They do not waive their rights to Medicaid services unrelated to their terminal illness. Medicare and Medicaid clients must elect both the Medicare and Medicaid Hospice programs. Texas Medicaid clients who are 20 years of age and younger who elect hospice care are not required to waive their rights to concurrent hospice care and treatment. Concurrent hospice care and treatment services include:

- Services related or unrelated to the client’s terminal illness
- Hospice care (palliative care and medical and support services related to the terminal illness).

Direct policy questions about the hospice program to DADS at 1-512-438-3519. Direct all other general questions related to the hospice program, such as billing, claims, rate key issues, and authorizations to DADS at 1-512-438-2200.

DADS pays the provider for a variety of services under a per diem rate for any particular hospice day in one of the following categories:

- Routine home care
- Continuous home care
- Respite care
- Inpatient care

4.4.3.1 Hospice Medicaid Identification

Individuals who elect hospice care are issued a Medicaid Identification (Form H3087) with “HOSPICE” printed on it. Clients may cancel their election at any time.

4.4.3.2 Physician Oversight Services

Physician oversight is defined as “physician supervision of clients under the care of home health agencies or hospices that require complex or multidisciplinary care modalities.” These modalities involve regular physician client status review of related laboratory and other studies, communication with other health professionals involved in patient care, integration of new information into medical treatment plans, and adjustment of medical therapy. Medicaid hospice does not reimburse for physician oversight services.

4.4.3.3 Medicaid Services Unrelated to the Terminal Illness

When services are unrelated to the Medicaid Hospice client’s terminal illness, Medicaid (TMHP) pays its providers directly. Providers of services that are unrelated to the terminal illness are required to follow Medicaid prior authorization and claims filing deadlines.

Refer to: Section 5: Prior Authorization (Vol. 1, General Information) for more information about prior authorizations for Medicaid hospice clients.

Section 6: Claims Filing (Vol. 1, General Information) for more information about filing claims for Medicaid Hospice Clients.
4.4.4 Presumptive Eligibility (PE)

PE provides temporary Medicaid coverage to pregnant women whose family income does not exceed the state’s Medicaid limit. The intent of PE is to provide the earliest possible access to prenatal care to improve maternal and child health. Clients with PE receive immediate, short-term Medicaid eligibility while their formal Medicaid application is processed.

4.4.4.1 PE Medicaid Identification

Clients with PE coverage receive a Client Medicaid Identification (Form H3087) with PE printed on the form. Medicaid coverage for PE continues through the last day of the month indicated on the form. The Client Medicaid Identification (Form H3087) with PE indicates that Medicaid-covered services during the PE period do not include labor, delivery, inpatient services, and THSteps medical and dental services. The PE ID indicates eligibility for limited Medicaid services during the PE period (e.g., eye exams, eyeglasses, hearing aids, and family planning services).

A woman who is certified for regular Medicaid receives the regular Client Medicaid Identification (Form H3087). Other family members who are determined to be eligible for Medicaid receive a separate Client Medicaid Identification (Form H3087) from the one issued to the pregnant woman.

Claims filing procedures for clients with PE are the same as those for all clients with Medicaid.

4.4.4.2 Services

Medicaid-covered services during the PE period are limited to medically necessary medical services provided during pregnancy and certain preventive services such as family planning.

Labor, delivery, inpatient services, and THSteps medical or dental services are not covered during the PE period. If the woman is determined eligible for regular Medicaid for the same period of time, regular Medicaid coverage overlays the PE period providing the full range of services. Client eligibility for PE coverage must be determined by a PE provider. Once eligibility is determined, services may be obtained from any enrolled Medicaid provider.

4.4.4.3 Qualified Provider Enrollment

To be eligible as a qualified provider for PE determinations the following federal requirements must be met. The provider must:

- Be an eligible Medicaid provider.
- Provide outpatient hospital services, RHC services, or clinic services furnished by or under the direction of a physician without regard to whether the clinic is administered by a physician (includes family planning clinics).
- Be determined by HHSC to be capable of making PE determinations.
- Receive funds from or participate in one of the following:
  - The migrant health centers
  - Community health centers
  - *The Stewart McKinney Act* (homeless)
  - Maternal and Child Health Services Block Grant Program
  - *The Indian Self-Determination and Education Assistance Act*
  - Special Supplemental Food Program for Women, Infants, and Children (WIC)
  - The Commodity Supplemental Food Program of the *Agriculture and Consumer Protection Act* of 1973
  - A state perinatal program (including family planning programs)
• The Indian Health Service must be a health program or facility operated by a tribe or tribal organization under the *Indian Self-Determination and Education Assistance Act*. Indian Health Service providers can refer to Section 1: Provider Enrollment and Responsibilities (*Vol. 1, General Information*) for more information about the enrollment procedures for Texas Medicaid.

Family planning agency providers may be eligible to enroll as PE providers. To enroll as a qualified provider for PE, the provider must request a Presumptive Eligibility Qualified Provider Enrollment Packet from the following address:

HHSC
Attn: Texas Works
Presumptive Eligibility Program
PO Box 149030
Mail Code W-323
Austin, TX 78714-9030

Before final approval as a qualified PE provider, an operating plan must be developed with the regional HHSC client self-support regional director’s office. The rules for PE identify minimal agreements that must be included in this plan.

### 4.4.4.4 Process

A qualified provider designated by HHSC requests that the pregnant woman complete a Medicaid application form. The qualified provider determines eligibility for PE coverage based on verification of pregnancy and a determination that the family’s income is at or below the current Medicaid limit for pregnant women.

The same application used to determine the woman’s PE is forwarded to the local HHSC office for determination of regular Medicaid coverage for the pregnant woman and any other household members. The pregnant woman must follow through with the regular Medicaid application process and be eligible under those requirements to continue receiving Medicaid.

The period of PE begins on the date the qualified provider makes the determination and ends when HHSC makes the final Medicaid determination.

### 4.5 CHIP Perinatal Program

The Children’s Health Insurance Program (CHIP) Perinatal Program provides CHIP perinatal benefits for 12 months to the unborn children of non-Medicaid-eligible women. This program allows pregnant women who are ineligible for Medicaid because of income (186 to 200 percent of the Federal Poverty Income Limits [FPIL]) or immigration status (with an income at or below 200 percent of FPIL) to receive prenatal care and provides CHIP benefits to the child upon delivery for the duration of the coverage period. Children born to CHIP Perinatal recipients whose income is at or below 185 percent of the FPIL and who receive Emergency Medicaid to cover labor with delivery charges are enrolled in Texas Medicaid.

#### 4.5.1 Program Benefits

CHIP Perinatal benefits are provided by select CHIP health plans throughout the state. Benefits for the unborn child include:

• Up to 20 prenatal visits:
  • First 28 weeks of pregnancy—one visit every four weeks.
  • From 28 to 36 weeks of pregnancy—one visit every two to three weeks.
  • From 36 weeks to delivery—one visit per week.
  • Additional prenatal visits are allowed if they are medically necessary.
- Pharmacy services, limited laboratory testing, assessments, planning services, education, and counseling.
- Prescription drug coverage based on the current CHIP formulary.
- Hospital facility charges and professional services charges related to the delivery. Preterm labor that does not result in a birth and false labor are not covered benefits.

Program benefits after the child is born include:
- Two postpartum visits for the mother.
- Medicaid benefits for the newborn.

4.5.2 Claims
Providers who serve CHIP Perinatal clients must follow the claims filing guidelines in subsection 6.17.1, “CHIP Perinatal Newborn Transfer Hospital Claims” in Section 6, “Claims Filing” (Vol.1 General Information).

4.5.3 Client Eligibility Verification
A number is issued for the baby based on the submission of the Emergency Medical Services Certification Form H3038 for the mother’s labor with delivery.

Establishing Medicaid for the newborn requires the submission of the Emergency Medical Services Certification Form H3038 for the mother’s labor with delivery. If Form H3038 is not submitted, Medicaid cannot be established for the newborn from the date of birth with an additional 12 months of Medicaid coverage. Once enrolled, clients are identified as type program (TP) 30 for the mother and TP 45 for the newborn.

Establishing Medicaid (and issuance of a Medicaid number) can take up to 45 days after Form H3038 is submitted. Medicaid eligibility for the mother and infant can be verified via the online lookup on the TMHP website at www.tmhp.com or by calling AIS at 1-800-925-9126.

For clients enrolled in the CHIP Program, the CHIP health plan assigns a client ID to be used for billing. Providers should contact the CHIP health plan for billing information.

Newborns at or below 185% FPL are eligible to receive Medicaid benefits beginning at the date of birth and will not be assigned a client ID from the CHIP health plan.

HHSC requires the expectant mother’s provider to fill out the Emergency Medical Services Certification (Form H3038).

The expectant mother will receive this form from HHSC before her due date, along with a letter reminding her to send information about the birth of her child after delivery. The letter will instruct the expectant mother to take the form to her provider, have the provider fill out the form, then mail the form back to HHSC in a preaddressed, postage-paid envelope. In many cases this activity will occur after delivery when the mother is being discharged from the hospital.

Once HHSC receives the completed the Emergency Medical Services Certification (Form H3038), Emergency Medicaid coverage will be added for the mother for the period of time identified by the health care provider. The Emergency Medical Services Certification (Form H3038) is the same form currently required to complete Emergency Medicaid certification.

The CHIP perinatal mother whose income is at or below 185 percent of the FPIL will not be required to fill out a new application or provide new supporting documentation to apply for Emergency Medicaid. HHSC will determine the woman’s eligibility for Emergency Medicaid by using income and other information the mother-to-be provided when she originally applied for coverage, as well as information included on the Emergency Medical Services Certification (Form H3038).
If a woman fails to return the completed Emergency Medical Services Certification (Form H3038) within a month after her due date, HHSC will send her another Emergency Medical Services Certification Form H3038 with a postage-paid envelope. If the woman fails to submit Emergency Medical Services Certification (Form H3038), and the hospital cannot locate a Type Program 30 for her in the TMHP online provider lookup tool, then the hospital can bill her for facility fees incurred during her stay.

Mother’s eligibility
For mothers who currently receive CHIP perinatal and have an income at or below 185 percent of the FPIL, and who receive Emergency Medicaid coverage, providers can check eligibility by performing an eligibility verification on the TMHP website at www.tmhp.com or by calling the TMHP AIS at 1-800-925-9126.

Newborn’s eligibility
For CHIP Perinatal newborns with a family income at or below 185 percent of the FPIL, providers can obtain eligibility information and the newborn’s PCN by performing an eligibility verification on the TMHP website or by calling the TMHP Contact Center at 1-800-925-9126.

TMHP cannot provide CHIP Perinatal Program eligibility information for the newborn or mother, regardless of the client’s income level. For CHIP Perinatal Program eligibility information, contact the CHIP health plan.

A report of birth remains an important step to ensure timely Medicaid eligibility for the newborn. A birth must be reported to the state via the typical birth registry process (e.g., use of Texas Electronic Registration system [TER]). In TER, the screen containing the Medicaid/CHIP number should continue to be populated with the mother’s alpha-numeric CHIP Perinatal Program number (e.g., J12345678). In addition, a mother can report the birth by calling 1-877-KIDS-NOW (1-877-543-7669).

4.5.4 Submission of Birth Information to Texas Vital Statistics Unit
Hospital providers must submit birth registry information to the DSHS Vital Statistics Unit in a timely manner. Once received by the Vital Statistics Unit, birth information is transmitted to the state’s eligibility systems, so a PCN (Medicaid number) can be issued for newborns at or below 185 percent FPIL. Hospitals should use the CHIP Perinatal health plan ID to enter the mother’s CHIP perinatal coverage ID number in the Medicaid/CHIP number field on the Texas Electronic Registration (TER) screen. This number will appear as an alpha-numeric combination, starting with a letter followed by eight digits. For example: G12345678.

For more information, go to the HHSC website at www.hhsc.state.tx.us/chip/perinatal/VitalStatisticsInstructions_062807.pdf, or call Texas Vital Statistics at 1-800-452-9115.

4.6 Medically Needy Program (MNP)
The MNP with spend down is limited to children 18 years of age and younger and pregnant women.

The MNP provides Medicaid benefits to children (18 years of age and younger) and pregnant women whose income exceeds the eligibility limits under Temporary Assistance for Needy Families (TANF) or one of the Medical Assistance Only (MAO) programs for children but is not enough to meet their medical expenses. Coverage is available for services within the amount, duration, and scope of Texas Medicaid. Individuals are considered adults beginning the month following their 19th birthday.

Medicaid benefits, including family planning and THSteps preventive services through the MNP, are available to:

- Pregnant women.
- Children 18 years of age and younger.
MNP provides access to Medicaid benefits. Applications are made through HHSC. HHSC determines eligibility for the appropriate Medicaid program.

If spend down is applicable, HHSC issues a Medical Bills Transmittal (Form H1120) to the MNP applicant that indicates the spend down amount, months of potential coverage (limited to the month of application and any of the three months before the application month that the applicant has unpaid medical bills), and HHSC contact information.

The applicant is responsible for paying the spend down portion of the medical bills. The TMHP Medically Needy Clearinghouse (MNC) determines which bills may be applied to the applicant’s spend down according to state and federal guidelines. No Medicaid coverage may be granted until the spend down is met.

Newborns of mothers who must meet a spend down before becoming eligible for Medicaid are not automatically eligible for the full year of newborn coverage. The newborn and mother are eligible for the birth month and the two following months. Hospitals and other providers that complete newborn reporting forms should continue to follow the procedures in subsection 2.3.2.3, “Newborn Services” in Hospital Services Handbook (Vol. 2, Provider Handbooks) for these newborns.

### 4.6.1 Spend Down Processing

Applicants are instructed to submit their medical bills or completed claim forms for application toward their spend down to TMHP MNC along with the Medical Bills Transmittal/Insurance Information Form H1120. Charges from the bills or completed claim forms are applied in date of service order to the spend down amount, which is met when the accumulated charges equal the spend down amount.

Providers can assist medically needy clients with their applications by giving them current, itemized statements or completed claim forms to submit to MNC. MNC holds manually completed claim forms used to meet spend down for ten calendar days preceding the completion of the spend down case, then forwards them to claims processing. The prohibition against billing clients does not apply until Medicaid coverage is provided.

Current itemized statements or completed claim forms must include the following:

- Statement date
- Provider name
- Client name
- Date of service
- All services provided and charges
- Current amount due
- Any insurance or client payments with date of payment (the date and amount of any insurance or payments)

**Important:** Amounts used for spend down are deducted from the total billed amount by the provider. Using older bills may provide earlier eligibility for the client.

Bills for past accounts must be current, itemized statements (dated within the last 60 days) that are from the provider and that verify the outstanding status of the account and the current balance due. Accounts that have had payments made by an insurance carrier, including Medicare, must be accompanied by the carriers EOB or Remittance Advice and show the specific services covered and amounts paid.

Unpaid bills incurred before the month of potential eligibility (the month with spend down) may be used to meet spend down. Itemized statements must be dated within 60 days of the date they are received at TMHP MNC.
The unpaid balance on currently due accounts may be applied toward the spend down regardless of the date of service. All bills or completed claim forms must be itemized showing the provider’s name, client’s name, dates of service, statement date, services provided, charge for each service, total charges, amounts and dates of payments, and total due.

Clients have 30 days to submit their bills or completed claim forms. Thirty-day extensions are available to the client as necessary to gather all needed information. The provider can assist by furnishing the additional information to the applicant.

All communication about submission of billing information is carried out between MNC and the applicant; however, providers can assist clients by:

- Providing clients with current itemized statements or completed claim forms.
- Encouraging clients to submit all of their medical bills or completed claim forms incurred from all providers at the same time.
- Submitting manual claim forms directly to MNC or to applicants for the MNP, that can be used to meet spend down.

Bills or claim forms submitted to MNC are for application toward the spend down only. Submitting a bill or claim forms for spend down is not a claim for reimbursement. No claims reimbursement is made from such submittals unless the claim form is complete. The provider must file a Medicaid claim after eligibility has been established to have reimbursement considered by Texas Medicaid. If the provider assisted the client with submission of a claim form, the MNC retains all claim forms for ten calendar days preceding the completion of the spend down case. The MNC then forwards all claim forms directly to claims processing to have reimbursement considered by Texas Medicaid.

MNC informs the applicant and HHSC when the spend down is met. HHSC certifies the applicant for Medicaid and sends the Medicaid Identification form to the applicant when Medicaid eligibility is established. Clients are encouraged to inform medical providers of their Medicaid eligibility and make arrangements to pay the charges used to meet the spend down amount. When notified of Medicaid eligibility, the provider asks if the client has retroactive eligibility for previous periods. All bills submitted to MNC are returned to the client, except for claim forms. An automated letter specific to the client’s spend down case is attached, indicating which:

- Bills/charges were used to meet the spend down.
- Bills/charges the client is responsible for paying in part or totally.
- Bills the provider may submit to Medicaid for reimbursement consideration.
- Claims have been received and forwarded to TMHP claims processing.

Providers may inquire about status, months of potential eligibility, Medicaid or case number, and general case information by calling the TMHP Contact Center at 1-800-925-9126.

Medically needy applicants who have a case pending or have not met their spend down are considered private-pay clients and may receive bills and billing information from providers. No claims are filed to Medicaid. A claim that is inadvertently filed is denied because of client ineligibility.

### 4.6.2 Closing an MNP Case

Medically needy cases are closed by MNC for the following reasons:

- Bills were not received within the designated time frame (usually 30 days from the date on which the case is established by the HHSC worker).
- The client failed to provide requested additional case/billing information within 30 days of the MNC request date.
• Insufficient charges were submitted to meet spend down, and the client did not respond to a request for additional charges to be submitted within 30 days of the notification letter.

Charges submitted after the spend down has been met will not reopen the case automatically. The client must call the Client Hotline at 1-800-335-8957.

**Note:** For information regarding the Medically Needy Program for CSHCN Services Program clients refer to the CSHCN Services Program Provider Manual.

### 4.7 Women’s Health Program (WHP)

The goal of the WHP is to expand access to family planning services that reduce unintended pregnancies in the eligible population. WHP participants receive a limited family planning benefit that supports the goal of the program. WHP participants do not have access to full Medicaid coverage. Not all Medicaid family planning benefits are payable under WHP.

The WHP provides an annual family planning exam, family planning services, and contraception for women who meet the following qualifications:

- Are from 18 through 44 years of age
- U.S. citizens or eligible immigrants
- Reside in Texas
- Do not currently receive full Medicaid benefit (including Medicaid for pregnant women), CHIP, or Medicare Part A or B
- Have a household income at or below 185 percent of the federal poverty level
- Are not pregnant
- Are not sterile, infertile, or unable to get pregnant because of medical reasons
- Do not have private health insurance that covers family planning services (unless filing a claim on the health insurance would cause physical, emotional or other harm from a spouse, parent, or other person).

### 4.8 Medicaid for Breast and Cervical Cancer (MBCC)

Through MBCC, the state of Texas provides full Medicaid benefits to eligible women who were screened through the Centers for Disease Control and Prevention’s (CDC) National Breast and Cervical Cancer Early Detection Program (NBCCEDP) and found to need treatment for breast or cervical cancer, including precancerous conditions. The goal of the program is to improve timely access to breast and cervical cancer treatment for uninsured women identified by NBCCEDP.

DSHS receives the CDC funds and awards these funds to providers across the state to perform breast and cervical cancer screenings and diagnostic services under the Breast and Cervical Cancer Services (BCCS) program.

#### 4.8.1 Initial MBCC Program Enrollment

A woman may be eligible for initial enrollment in the MBCC Program if she has active disease as indicated by a biopsy-confirmed precancerous or cancerous breast or cervical diagnosis as specified in “Medicaid for Breast and Cervical Cancer Guidelines for Determination of Qualifying Diagnosis,” which is available on the DSHS website at www.dshs.state.tx.us/chscontracts/pdf/MBCCQualifyingDx072009.pdf.
Women who only require monitoring for hormonal treatment or triple negative receptor breast cancer (TNRBC) do not qualify for initial MBCC enrollment.

**4.8.2 MBCC Program Eligibility**

To be eligible for MBCC, a woman must be diagnosed and in need of treatment for one of the following biopsy-confirmed breast or cervical cancer diagnoses:

- Grade 3 cervical intraepithelial neoplasia (CIN III)
- Severe cervical dysplasia
- Cervical carcinoma in situ
- Primary cervical cancer
- Ductal carcinoma in situ
- Primary breast cancer

In addition, a woman may be eligible for MBCC with a diagnosis of metastatic or recurrent breast or cervical cancer and a need for treatment.

After a woman has received an eligible breast or cervical cancer diagnosis from a provider, a BCCS provider must review her diagnosis to help determine her eligibility for MBCC. Once a BCCS provider has reviewed the diagnosis, her application is sent to HHSC to determine eligibility for the program. The client cannot apply for MBCC at an HHSC benefits office.

In addition to having received an eligible diagnosis, a woman must meet the following criteria to qualify for benefits:

- A household income at or below 200 percent of the FPL
- 64 years of age or younger
- U.S. citizen or eligible immigrant
- Uninsured or otherwise not eligible for Medicaid

A woman who is eligible to receive Texas Medicaid under MBCC receives full Medicaid benefits beginning the day after she received a qualifying diagnosis and for the duration of her cancer treatment. Services are not limited to the treatment of breast and cervical cancer.

**4.8.3 Continued MBCC Program Eligibility**

After a woman is enrolled in the MBCC program, eligibility may continue if she meets one of the following criteria:

- She is being treated for active disease as defined above,
- She has completed active treatment while in MBCC and now is receiving hormonal treatment,
- She has completed active treatment while in MBCC and now is receiving active disease surveillance for TNRBC.

A woman may continue to receive Medicaid benefits as long as she meets the eligibility criteria and provides proof that she is receiving active treatment for breast or cervical cancer. Women who are no longer in MBCC may reapply if they are diagnosed with a new breast or cervical cancer or a metastatic or recurrent breast or cervical cancer.

*Note: Active disease surveillance (for the purposes of determining eligibility for MBCC) is periodically monitoring disease progression in order quickly to treat cancerous and precancerous conditions that arise from the presence of a previously diagnosed TNRBC.*
If the client’s cancer is in remission and the physician determines that the client requires only routine health screening for a breast or cervical condition (e.g. annual breast examinations, mammograms, and Pap tests as recommended by the American Cancer Society and the U.S. Preventative Services Task Force), the client is not considered to be receiving treatment; and MBCC coverage will not be renewed. A client who is subsequently diagnosed with a new, metastatic, or recurrent breast or cervical cancer may reapply for MBCC benefits.

4.9 Medicare and Medicaid Dual Eligibility

Medicaid Qualified Medicare Beneficiary (MQMB) clients are eligible for Medicaid benefits not covered by Medicare in addition to Medicaid payment of the Medicare deductible and/or coinsurance. Clients eligible for STAR+PLUS who have Medicare and Medicaid are MQMBs.

Qualified Medicare Beneficiary (QMB) clients are not eligible for Medicaid benefits other than the Medicare deductible and coinsurance liabilities and payment of the Medicare Part B premium. Certain clients also receive payment of Medicare Part A premium. Clients limited to QMB are not eligible for THSteps or CCP Medicaid benefits.

These guidelines exclude clients living in a nursing facility who receive a vendor rate for client care through DADS.

Refer to: Section 6: Claims Filing (Vol. 1, General Information) for more information about filing claims for MQMBs and QMBs.

4.9.1 QMB/MQMB Identification

The term “QMB” or “MQMB” on the Client Medicaid Identification (Form H8037) indicates the client is a Qualified Medicare Beneficiary or a Medicaid Qualified Medicare Beneficiary. The Medicare Catastrophic Coverage Act of 1988 requires Medicare premiums, deductibles, and coinsurance payments to be paid for individuals determined to be QMBs or MQMBs who are enrolled in Medicare Part A and meet certain eligibility criteria (see 1 TAC §§358.201 and 358.202).

Refer to: Form 4.1, “Client Medicaid Identification (Form H3087)” in this section for examples of QMB/MQMB forms.

4.9.2 Medicare Part B Crossovers

Based on Medicare determination of the beneficiary’s eligibility and the status of the annual deductible, the Medicare intermediary pays the provider a percentage of the allowed amount for covered Part B services. Medicaid pays the deductible if any is applied to the Medicare claim. Medicaid also pays the coinsurance liabilities according to Medicaid benefits and limitations.

Federal regulations require that Texas Medicaid pay all Medicare deductible and coinsurance payments to nursing facilities, regardless of whether the provider has filed the claims as assigned to Medicare. The following qualify as Medicare Part B crossover claims: QMB, MQMB, and client TPs 13 or 14, with base plan 10, and category R.

Therefore, even if the provider has not accepted Medicare assignment, the provider may receive payment of the Medicare deductible and coinsurance on behalf of the QMB, MQMB, client TPs 13 or 14, base plan 10, and category R client. If the provider has collected money from the client and also received reimbursement from TMHP, the provider is required to refund the client’s money.

The Social Security Act requires that Medicaid payment for physician services under Medicare Part B be made on an assignment-related basis.

If Medicaid does not reimburse or does not reimburse the full deductible or coinsurance, the provider is not allowed to bill the client.
4.9.3 Clients Without QMB/MQMB Status

Medicare is primary to Medicaid, and providers must bill Medicare first for their claims. Medicaid’s responsibility for coinsurance and/or deductibles is determined in accordance with the Medicaid benefits and limitations including the 30-day spell of illness. TMHP denies claims if the client’s coverage reflects Medicare Part A coverage and Medicare has not been billed first.

Providers must check the client’s Medicare card for Part A coverage before billing Texas Medicaid.

Refer to: Subsection 2.6, “Medicare Crossover Claim Reimbursement” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information).

4.9.4 Medicare Part C

Providers can receive information about a client’s Medicare Part C eligibility through TexMedConnect or EDI. In response to an eligibility inquiry, providers receive the client’s Medicare Part C eligibility effective date, end date, and add date. Additionally, the Managed Care segments section of TexMedConnect displays the CMS Contract ID and a link to a list of MAP carrier names and telephone numbers.

HHSC contracts with some Medicare Advantage Plans (MAPs) and offers a per-client-per-month payment. The payment to the MAP includes all costs associated with the Medicaid cost sharing for dual-eligible clients. MAPs that contract with HHSC will reimburse providers directly for the cost sharing obligations that are attributable to dual-eligible clients enrolled in the MAP. These payments are included in the capitated rate paid to the HMO and must not be billed to TMHP or a Medicaid client.

TMHP now processes certain claims for clients enrolled in a Medicare Advantage Plan (Part C).

A list of MAPs that have contracted with HHSC is available in the “EDI” section of the TMHP website at www.tmhp.com. The list will be updated as additional plans initiate contracts.

4.10 Contract with Outside Parties

The State Medicaid Manual, Chapter 2, “State Organization,” (Section 2080.18) allows states to contract with outside agents to confirm for providers the eligibility of a Medicaid client. Medicaid providers may contract with these agents for eligibility verification with a cost to the provider. The provider remains responsible for adhering to the claims filing instructions in this manual. The provider, not the agent, is responsible for meeting the 95-day filing deadline and other claims submission criteria.

4.11 Third Party Liability (TPL)

Federal and state laws require the use of Medicaid funds for the payment of most medical services only after all reasonable measures have been made to use a client’s third party resources (TPR) or other insurance.

To the extent allowed by federal law, a health-care service provider must seek reimbursement from available third party insurance that the provider knows about or should know about before billing Texas Medicaid. All claims for clients with other insurance coverage must reference the information (see subsection 6.12, “Other Insurance Claims Filing” in Section 6, “Claims Filing” (Vol. 1, General Information)), regardless of whether a copy of the EOB from the insurance company is submitted with the claim.

Refer to: Subsection 7.2, “Refunds to TMHP” in Section 7, “Appeals” (Vol. 1, General Information) for information regarding refunds to TMHP resulting from other insurance payments and conditions surrounding provider billing of third party insurers.

Eligible clients enrolled in private HMOs must not be charged the co-payment amount because the provider has accepted Medicaid assignment.
A provider who furnishes services and participates in Texas Medicaid may not refuse to furnish services to an eligible client because of a third party’s potential liability for payment of the services.

A TPR is a source of payment for medical services other than Medicaid or Medicaid Managed Care Organization (MCO), the client, and non-TPR sources. TPR includes payments from any of the following sources:

- Other health insurance including assignable indemnity contracts
- Health maintenance organization (HMO)
- Public health programs available to clients with Medicaid such as Medicare and Tricare
- Profit and nonprofit health plans
- Self-insured plans
- No-fault automobile insurance such as personal injury protection (PIP) and automobile medical insurance
- Liability insurance
- Life insurance policies, trust funds, cancer policies, or other supplemental policies
- Workers’ Compensation
- Other liable third parties

**Reminder:** Adoption agencies/foster parents are no longer considered a TPR. Medicaid is primary in these circumstances.

**Refer to:** Subsection 4.11.4, “THSteps TPR Requirements” in this section for THSteps TPR exceptions.

Family planning (including Titles V, X, XIX and XX) services providers cannot bill a client’s TPRs before filing the claim with TMHP. Federal regulations protect the client’s confidential choice of birth control and family planning services. Confidentiality is jeopardized when seeking information from TPRs.

SHARS and Early Childhood Intervention (ECI) providers are not required to bill private insurance before billing Medicaid.

Case Management for Children and Pregnant Women (CPW) providers are not required to file claims with other health insurance before filing with Medicaid.

Non-TPR sources are secondary to Texas Medicaid and may only pay benefits after Texas Medicaid. The following are the most common non-TPR sources. If providers have questions about others not listed, they may contact a provider relations representative.

- Department of Assistive and Rehabilitative Services (DARS), Blind Services
- Texas Kidney Health Care Program
- Crime Victims’ Compensation Program
- Muscular Dystrophy Association
- CSHCN Services Program
- Texas Band of Kickapoo Equity Health Program
- Maternal and Child Health (Title V)
- State Legalization Impact Assistance Grant (SLIAG)
- Adoption Agencies
• Home and Community-based Waivers Programs through DADS

*Note:* Claims for clients who are seeking disability determination must be submitted to DARS for consideration of reimbursement. Refer to the DARS website at www.dars.state.tx.us for additional information about disability determinations and claims filing.

Denied claims or services that are not a benefit of Medicaid may be submitted to non-TPR sources.

If a claim is submitted inadvertently to a non-TPR source listed above before submission to TMHP, the claim may be submitted to TMHP using the filing deadlines identified under subsection 6.1.3, “Claims Filing Deadlines” in Section 6, “Claims Filing” (Vol. 1, General Information).

If a non-TPR source erroneously makes a payment for a dual-eligible client for services also covered by Medicaid, the payment is refunded to the non-TPR source.

Any indemnity insurance policy that pays cash to the insured for wages lost or for days of hospitalization rather than for specific medical services is considered a TPR* if the policy is assignable to someone else.* HHSC has assignment to any Medicaid applicant’s or client’s right of recovery from a third party health insurer, to the extent of the cost of medical care services paid by Medicaid. Texas Medicaid requires a provider take all reasonable measures to use a client’s TPR before billing Medicaid.

Medicaid-eligible clients may not be held responsible for billed charges that are in excess of the TPR payment for services covered by Texas Medicaid. If the TPR pays less than the Medicaid-allowable amount for covered services, the provider should submit a claim to TMHP for any additional allowable amount.

4.11.1 Client Medicaid Identification (Form H3087)

When Medicaid billing information is obtained from the client, the provider examines the TPR column of the Client Medicaid Identification (Form H3087) to determine if the client has other health insurance. The following indicators may be found in the TPR column:

- “M” indicates that the client is eligible for Medicare. The provider must file with Medicare before filing with Medicaid. The “M” is followed by a Medicare claim identification number.

- “P” and “M” indicate that the client has other insurance and Medicare coverage. Both must be billed before billing Medicaid.

To ensure receipt of TPR disposition of payment or denial, the provider must obtain an assignment of insurance benefits from the client at the time of service. Providers are asked not to provide claim copies or statements to the client.

If the provider is aware that a client has other health insurance, and “P” is not recorded in the TPR column of the Client Medicaid Identification (Form H3087), the provider must notify TMHP of the details concerning the type of policy and scope of benefits.

Providers can notify TMHP by calling TPR at 1-800-846-7307, sending a fax to 1-512-514-4225, or submitting the Other Insurance Form (located in the back of this section) to the following address:

Texas Medicaid & Healthcare Partnership  
Third Party Resources Unit  
PO Box 202948  
Austin, TX 78720-2948

4.11.2 Workers’ Compensation

Payment of covered services under Workers’ Compensation is considered reimbursement in full. The client must not be billed. Services not covered by Workers’ Compensation must be billed to TMHP.

4.11.3 Adoption Cases

- TMHP/Medicaid, not the adoption agency, should be billed for all medical services that are a benefit of Texas Medicaid.
If a claim is inadvertently sent to the adoption agency before it is sent to TMHP, TMHP must receive the claim within 95 days of the date of disposition from the adoption agency denial, payment, request for refund or recoupment, to be considered for payment.

If the adoption agency inadvertently makes a payment for services covered by Medicaid, the provider should refund the payment to the agency.

A copy of the non-TPR disposition must be submitted with the claim and received at TMHP within 95 days from the date of the disposition (denial, payment, request for refund, or recoupment by the non-TPR source).

4.11.4 THSteps TPR Requirements

THSteps medical and dental providers are not required to bill other insurance before billing Medicaid; however, if the provider is aware of other insurance, the provider should document the other insurance in the client’s medical record. TMHP processes the claim for payment, determines whether a TPR exists, and seeks reimbursement from the TPR.

THSteps medical checkup providers that render services to clients who are not in a managed care program must file directly to TMHP. TMHP processes the claim for payment, determines whether a TPR exists, and seeks payment from the TPR.

Refer to: Subsection 4.5.2, “Third Party Resources (TPR)” in Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information.

4.11.5 Accident-Related Claims

TMHP monitors all accident claims to determine whether another resource may be liable for the medical expenses of clients with Medicaid coverage. Providers are requested to ask clients whether medical services are necessary because of accident-related injuries. If the claim is the result of an accident, providers enter the appropriate code and date in Block 10 of the CMS-1500 claim form, and Blocks 31-34 on the UB-04 CMS-1450 claim form.

If payment is immediately available from a known third party such as Workers’ Compensation or PIP automobile insurance, that responsible party must be billed before Medicaid, and the insurance disposition information must be filed with the Medicaid claim. If the third party payment is substantially delayed because of contested liability or unresolved legal action, a claim may be submitted to TMHP for consideration of payment.

TMHP processes the liability-related claim and pursues reimbursement directly from the potentially liable party on a postpayment basis. Include the following information on these claims:

- Name and address of the liable third party
- Policy and claim number
- Description of the accident including location, date, time, and alleged cause
- Reason for delayed payment by the liable third party

4.11.5.1 Accident Resources, Refunds

Acting on behalf of HHSC, TMHP has specific rights of recovery from any settlement, court judgment, or other resources awarded to a client with Medicaid coverage (Texas Human Resources Code, Chapter 32.033). In most cases, TMHP works directly with the attorneys, courts, and insurance companies to seek reimbursement for Medicaid payments. If a provider receives a portion of a settlement for services also paid by Medicaid, the provider must make a refund to TMHP. Any provider filing a lien for the entire billed amount must contact the TPL/Tort Department at TMHP for Medicaid postpayment activ-
ities to be coordinated. A provider may not file a lien for the difference between the billed charges and the Medicaid payment. A lien may be filed for services not covered by Medicaid. A lien is the liability of the client with Medicaid coverage.

Providers should contact the TPL/Tort Department at TMHP after furnishing an itemized statement and/or claim copies for any accident-related services billed to Medicaid if they received a request from an attorney, a casualty insurance company, or a client.

The provider furnishes TMHP with the following information:

- Client’s name
- Medicaid ID number
- Dates of service involved
- Name and address of the attorney or casualty insurance company (including the policy and claim number)

This information enables TMHP to pursue reimbursement from any settlement. Providers must use the Form 4.6, “Tort Response Form” to report accident information to TMHP. When the form is completed, providers must remit it to the TMHP TPL/Tort Department (the address and fax number are on the form).

Providers may contact the TMHP TPL/Tort Department by calling 1-800-846-7307, sending a fax to 1-512-514-4225, or mailing to the following address:

Texas Medicaid & Healthcare Partnership
TPL/Tort Department
PO Box 202948
Austin, TX 78720-2948

4.11.6 Third Party Liability - Tort

HHSC contracts with TMHP to administer third party liability cases. To ensure that Texas Medicaid is the payer of last resort, TMHP performs postpayment investigations of potential casualty and liability cases. TMHP also identifies and recovers Medicaid expenditures in casualty cases involving Medicaid clients.

The Human Resources Code, chapter 32, section 32.033 establishes automatic assignment of a Medicaid client’s right of recovery from personal insurance as a condition of Medicaid eligibility.

Investigations are a result of referrals from many sources, including attorneys, insurance companies, health-care providers, Medicaid clients, and state agencies. Referrals should be submitted to the following address:

TMHP TPL/Tort Department
PO Box 202948
Austin, TX, 78720-2948
Fax: 1-512-514-4225

Referrals must be submitted on Form 4.4, “Authorization for Use and Release of Health Information (2 pages)” in this section.

TMHP releases Medicaid claims information when an HHSC Authorization for Use and Release of Health Information Form is submitted. The form must be signed by the Medicaid client. Referrals are processed within ten business days.

Refer to: Form 4.4, “Authorization for Use and Release of Health Information (2 pages)” at the end of this section.
An attorney or other person who represents a Medicaid client in a third party claim or action for damages for personal injuries must send written notice of representation. The written notice must be submitted within 45 days of the date on which the attorney or representative undertakes representation of the Medicaid client, or from the date on which a potential third party is identified. The following information must be included:

- The Medicaid client’s name, address, and identifying information.
- The name and address of any third party or third party health insurer against whom a third party claim is or may be asserted for injuries to the Medicaid client.
- The name and address of any health-care provider that has asserted a claim for payment for medical services provided to the Medicaid client for which a third party may be liable for payment, whether or not the claim was submitted to or paid by TMHP.

If any of the information described above is unknown at the time the initial notice is filed, it should be indicated on the notice and revised if and when the information becomes known.

An authorization to release information about the Medicaid client directly to the attorney or representative may be included as a part of the notice and must be signed by the Medicaid client. The HHSC Authorization for Use and Release of Health Information Form must be used.

HHSC must approve all trusts before any proceeds from a third party are placed into a trust.

Providers may direct third party liability questions to the TMHP TPL/Tort Contact Center at 1-800-846-7307, Option 3.

### 4.11.6.1 Providers Filing Liens for Third Party Reimbursement

Any provider filing a lien for the entire billed amount must contact the TMHP TPL/Tort Department for Medicaid postpayment activities to be coordinated.

A provider may file a lien for the entire billed amount only after meeting the criteria in 1 TAC §354.2322, summarized below. Providers who identify a third party, within 12 months of the date of service, and wish to submit a bill or other written demand for payment or collection of debt to a third party after a claim for payment has been submitted and paid by Medicaid must refund any amounts paid before submitting a bill or other written demand for payment or collection of debt to the third party for payment, and they must comply with the provisions set forth in 1 TAC §354.2322, which states:

Providers may retain a payment from a third party in excess of the amount Medicaid would otherwise have paid only if the following requirements are met:

- The provider submits an informational claim to TMHP within the claims filing deadline. (See Informational Claims below.)
- The provider gives notice to the client or the attorney or representative of the client that the provider may not or will not submit a claim for payment to Medicaid and the provider may or will pursue a third party, if one is identified, for payment of the claim. The notice must contain a prominent disclosure that the provider is prohibited from billing the client or a representative of the client for any Medicaid-covered services, regardless of whether there is an eventual recovery or lack of recovery from the third party or Medicaid.
- The provider establishes the right to payment separate of any amounts claimed and established by the client.
- The provider obtains a settlement or award in its own name separate from a settlement obtained by or on behalf of the client or award obtained by or on behalf of the client, or there is an agreement between the client or attorney or representative of the client and the provider, that specifies the amount that will be paid to the provider after a settlement or award is obtained by the client.
4.11.6.2 *Informational Claims*

If providers determine that a third party may be liable for a Medicaid client’s accident-related claim, they can submit an informational claim to the TMHP Tort Department to indicate that a third party is being pursued for payment. This allows providers to secure the 95-day claims filing deadline in the event that the payment is not received from the third party.

TMHP processes informational claims for PCCM, STAR+PLUS, and Medicaid fee-for-service clients. Providers cannot submit an informational claim to TMHP for Medicaid recipients who are receiving benefits from a Medicaid Managed Care Organization (MCO).

4.11.6.3 *Submission of Informational Claims*

Providers must submit informational claims to TMHP:

- On a UB-04 CMS-1450 or CMS-1500 paper claim form. Informational claims cannot be submitted to TMHP electronically or by fax.
- On an Informational Claims Submission Form. Providers should complete only one form per client, regardless of how many separate informational claims are being submitted with the form.
- By certified mail.
- Within the 95-day claims filing deadline. Informational claims will not be accepted after the 95-day claims filing deadline.

Refer to: Form 4.2, “Informational Claims Submission Form” in this chapter.

Providers must complete either the Insurance Information field (liable third party) or the Attorney Information field on the Informational Claims Submission Form.

Providers must send the informational claims and the Informational Claims Submission Form by certified mail to TMHP at:

TMHP TPL/Tort Department
PO Box 202948
Austin, TX 78720-2948

TMHP will send providers a letter to confirm that the informational claim was received. The letter will provide the date on which TMHP must receive a request from the provider to convert the informational claim to a claim for payment. If TMHP receives an informational claim that cannot be processed, TMHP will notify the provider of the reason.

Providers can inquire about the status of an informational claim by calling the TMHP TPL/Tort Department at 1-800-846-7307, Option 3. If a provider has not received confirmation that TMHP has received the informational claim within 30 days, the provider should contact the TMHP TPL/Tort Department at 1-800-846-7307, Option 3 to validate the status of the request.

4.11.6.4 *Informational Claim Converting to Claims for Payment*

If providers have submitted an informational claim to TMHP but have not received payment from the liable third party, they must make one of the following determinations and notify TMHP within 18 months of the date of service:

- Providers can continue to pursue a claim for payment against the third party and forego the right to convert an informational claim to a claim for payment by Texas Medicaid.
- Providers can submit a request to convert to the informational claim to a claim for payment consideration from Texas Medicaid.

Providers that decide to convert an informational claim to a claim for payment consideration must submit a request to TMHP. The request must be submitted:

- On provider letterhead.
• With the client’s name and Medicaid ID, the date of service, and total billed amount that was origi-
nally submitted on the UB-04 CMS-1450 or CMS-1500 paper claim form

• By fax or by mail to:

   TMHP/Tort Department  
   P0 Box 202948  
   Austin, TX 78720-2948  
   Fax: 1-512-514-4225

TMHP will not accept any conversion request that is submitted more than 18 months after the date of
service, regardless of whether an informational claim was submitted timely to TMHP. All payment
deadlines are enforced regardless of whether the provider decides to pursue a third party claim. The
conversion of informational claims to actual claims is not a guarantee of payment by TMHP.

4.12 Health Insurance Premium Payment (HIPP) Program

The HIPP Program reimburses for the cost of medical insurance premiums. A Medicaid client is eligible
for the HIPP Program when Medicaid finds it more cost effective to reimburse a Medicaid client’s group
health insurance premiums than to reimburse his or her medical bills directly through Medicaid.

By ensuring access to employer sponsored health insurance, individuals who are eligible for the HIPP
Program may receive services that are not normally covered through Medicaid. Also, members of the
family who are not eligible for Medicaid may be eligible for the HIPP Program.

Providers can benefit from this program by helping the uninsured population, saving money for the
state of Texas, and receiving a higher payment from the group health insurance carrier. Providers can
increase HIPP Program enrollment by displaying brochures to educate their Medicaid clients about the
program.

For more information, call the TMHP-HIPP Program at 1-800-440-0493 or visit www.gethipptexas.org.

4.13 Long-Term Care Providers

A nursing facility, home health services provider, or any other similar long-term care services provider
that is Medicare-certified must:

• Seek reimbursement from Medicare before billing Texas Medicaid for services provided to an
  individual who is eligible to receive similar services under the Medicare program.

• Appeal Medicare claim denials for payment, as directed by the department.

A nursing facility, home health services provider, or any other similar long-term care services provider
that is Medicare-certified is not required to seek reimbursement from Medicare before billing Texas
Medicaid for a person who is Medicare-eligible and has been determined to not be homebound.

4.14 Medicaid Managed Care

The Medicaid managed care program consists of two types of health-care delivery systems: HMOs and
PCCM.

Programs under Medicaid managed care include:

• STAR Program
• STAR+PLUS Program
• NorthSTAR Program
• PCCM Program
• PCCM PLUS
• STAR Health (for foster care clients)

  **Note:** Some foster care children are enrolled in Permanency Care Assistance (PCA) traditional Medicaid

  **Refer to:** Section 8: Managed Care (Vol. 1, General Information) for additional information about these programs.

### 4.15 State Mental Retardation Facilities (State Supported Living Centers)

Inpatient hospital care for individuals who are eligible for Supplemental Security Income (SSI) Medicaid and reside in a state mental retardation facility (State Supported Living Center) must be billed to TMHP. Claims for off-campus acute care services for clients in a state mental retardation facility (State Supported Living Centers) must not be filed to TMHP.

Providers may contact DADS for assistance or information about billing procedures for state school services.

If you have Medicare, effective January 1, 2006, you are eligible for Medicare Rx and your Medicaid prescription drug coverage will be limited.

Si tiene Medicare, a partir del 1° de enero de 2006, usted llenará los requisitos de Medicare Rx y se limitará su cobertura de medicamentos recetados de Medicaid.
FOR THE CLIENT: About your Medicaid ID Form

This is your Medicaid Identification form. A new Medicaid Identification form will be mailed to you each month. Take your most recent Medicaid Identification form with you when you visit your doctor or receive services from any of your health care providers. This form helps health care providers know which services you can receive.

If you receive a letter from HHSC stating that the Medicaid program will not pay for certain health services your provider thinks you need, the letter will tell you about your right to ask for a fair hearing to appeal the denial of services. The letter will tell you who to call and list an address where you can write to request a hearing.

NOTE: If you accept Medicaid benefits (services or supplies), the HHSC has the right to receive payment for those services or supplies from other insurance companies and other liable sources, up to the amount paid by Medicaid.

IMPORTANT TRAINING NOTE -- NOT PART OF THIS FORM

PCCNEWB01 (newborns) – Any Medicaid provider can submit claims for necessary medical services.

PCCPCCM01 (all new PCCM clients except for newborns) – Any Medicaid provider can submit claims for necessary medical services. Tell your clients with either PCCNEWB01 or PCCPCCM01 on their Medicaid IDs that they need to choose a primary care provider before one is chosen for them.

As of March 1, 2008, the PCCM primary care provider name is not listed on the Medicaid ID to allow clients to see their provider of choice more quickly. Providers can see clients on their panel when clients do not have their primary care provider letter.

Check current panel reports for current eligible clients. (Panel reports now posted in Excel format.)

If you have Medicare, effective January 1, 2006, you are eligible for Medicare Rx and your Medicaid prescription drug coverage will be limited.

Si tiene Medicare, a partir del 1° de enero de 2006, usted llenará los requisitos de Medicare Rx y se limitará su cobertura de medicamentos recetados de Medicaid.

Form H3687-HCIMCC/October 2009
For the client: About your Health Care ID Form
This is your Health Care Identification form. A new Health Care Identification form will be mailed to you each month. Take your most recent Health Care Identification form with you when you visit your doctor or other health care providers. This form helps health care providers know which services you can get.

If you receive a letter from HHSC stating that the health care benefits program will not pay for certain health services your provider thinks you need, the letter will tell you about your right to request a review of your case for the denial of services. The letter will tell you who to call and list an address where you can write to request a review of your case.

Note: If you accept the health care benefits program (services or supplies), the HHSC has the right to receive payment for those services or supplies from other insurance companies and other liable sources, up to the amount paid by the health care benefits program.

Para el cliente: información sobre la forma de Identificación del programa de beneficios de cuidado médico.
Esta es su forma de Identificación del programa de beneficios de cuidado médico. Le enviaremos por correo una nueva forma de Identificación del programa de beneficios de cuidado médico cada mes. Lleve su forma de identificación más reciente con usted cuando vaya al doctor o a uno de sus proveedores de atención médica. Esta forma ayuda a los proveedores de atención médica a saber qué servicios puede recibir.

Si recibe una carta de la Comisión de Salud y Servicios Humanos (HHSC) que le dice que el programa de beneficios de cuidado médico no pagará ciertos servicios de salud que su proveedor piensa que necesita, la carta le dirá sobre su derecho de pedir una revisión de su caso por la negación de servicios. La carta le dirá a quién debe llamar y tendrá la dirección a dónde puede escribir para solicitar una revisión de su caso.

Nota importante: si acepta beneficios del programa de beneficios de cuidado médico (servicios o artículos), la HHSC tiene el derecho de recibir el pago de esos servicios o artículos de otras compañías de seguro y de otras fuentes responsables, hasta la suma que pagó el programa de beneficios de cuidado médico.

You are enrolled in STAR+PLUS, the state’s plan for Medicaid in your county. Your health plan’s name and telephone number are listed under your name. Call your health plan for your Primary Care Provider (PCP) name or refer to your health plan identification card. If you have Medicare you will not have a STAR+PLUS Primary Care Provider (PCP).

If you have any concerns or questions about STAR+PLUS, please call 1-800-964-2777 for help.

Under 21 years old? Please call your doctor, nurse or dentist to schedule a checkup if you see a reminder under your name. If there is no reminder, you can still use Medicaid to get health care that you need. Read the Back of This Form!

If you have Medicare, effective January 1, 2006, you are eligible for Medicare Rx and your Medicaid prescription drug coverage will be limited.

Si tiene Medicare, a partir del primero de enero de 2006, usted llenará los requisitos de Medicare Rx y se limita su cobertura de medicamentos con receta de Medicaid.

Form H3087 - September 2007
You must take this Medicaid Identification form with you when you visit your doctor or receive Medicaid services from any of your health care providers. This form helps health care providers know which services you can receive and how to bill Medicaid. You will receive a new Medicaid Identification form each month while you are eligible for Medicaid services.

You are enrolled in Women’s Health Program. If you would like to apply for other Medicaid services, call us toll free at 2-1-1, Monday through Friday, 8 a.m. to 8 p.m. Central Time.

Notice to Providers

Women’s Health Program services covered by Medicaid during the period of eligibility are limited to:

- An annual visit and exam.
- Contraception, except emergency contraception.

Debe llevar con usted esta forma de identificación de Medicaid cuando vaya al doctor o reciba servicios de Medicaid de uno de sus proveedores de atención médica. Esta forma ayuda a los proveedores de atención médica a saber que servicios puede recibir y cómo cobrarle a Medicaid. Recibirá una nueva forma de identificación de Medicaid cada mes que lleve los requisitos para recibir servicios de Medicaid.

Usted está inscrita en el programa Programa de Salud de la Mujer. Si quiere solicitar otros servicios de Medicaid, llámenos gratis al 2-1-1, de lunes a viernes, de 8 a.m. a 8 p.m. hora central.

Aviso a los proveedores

Los servicios del programa Programa de Salud de la Mujer que cubre Medicaid durante el periodo de elegibilidad están limitados a:

- Una visita y un examen anuales.
- Anticonceptivos, salvo los anticonceptivos de emergencia.

**THIS FORM COVERS ONLY THE DATES SHOWN BELOW. IT IS NOT VALID FOR ANY DAYS BEFORE OR AFTER THESE DATES.**

Esta forma es válida solamente en las fechas indicadas abajo. No es válida ni antes ni después de estas fechas.

- Each person listed below has applied and is eligible for MEDICAID BENEFITS for the dates indicated below, but has not yet received a client number. Do not submit a claim until you are given a client number. Pharmacists have 90 days from the date the number is issued to file clean claims. However, check your provider manual because other providers may have different filing deadlines. Call the eligibility worker named below if you have not been given the client number(s) within 15 days.

- Each person listed below is eligible for MEDICAID BENEFITS for dates indicated below. The Medicaid Identification form is lost or late. The client number must appear on all claims for health services.

---

I hereby certify, under penalty of perjury and/or fraud, that the above client(s) have lost, have not received, or have no access to the Medicaid Identification (Form H3087) for the current month. I have requested and received Form H1027-A, Medical Eligibility Verification, to use as proof of eligibility for the dates shown above. I understand that using this form to obtain Medicaid benefits (services or supplies) for people not listed above is fraud and is punishable by fine and/or imprisonment.

**CAUTION:** If you accept Medicaid benefits (services or supplies), you give and assign to the state of Texas your right to receive payments for those services or supplies from other insurance companies and other liable sources, up to the amount needed to cover what Medicaid spent.

---

Por este medio certifico, bajo pena de perjurio y/o fraude, que los clientes nombrados arriba hemos perdido, no hemos recibido o por otra razón no tenemos en nuestro poder la Identificación para Medicaid (Forma H3087) del corriente mes. Solicité y recibí esta Confirmanación de Elegibilidad Médica (Forma H1027-A) para comprobar nuestra elegibilidad para Medicaid durante el periodo cubierto especificado arriba. Comprendo que usar esta confirmación para obtener beneficios (servicios o artículos) de Medicaid para alguna persona no nombrada arriba como beneficiario constituye fraude y es castigable por una multa y/o la cárcel.

**ADVERTENCIA:** Si usted acepta beneficios de Medicaid (servicios o artículos), otorga y concede al estado de Texas el derecho a recibir pagos por los servicios o artículos de otras compañías de seguros y otras fuentes responsables, hasta completar la cantidad que se requiere para cubrir lo que haya gastado Medicaid.

Medicaid clients do not have to pay bills which Medicaid should pay. It is very important that you tell your doctor, hospital, drugstore, and other health care providers right away that you have Medicaid. If you do not tell them that you have Medicaid, you may have to pay these bills. If you get a bill from a doctor, hospital, or other health care provider, ask the provider why they are billing you. If you still get a bill, call the Medicaid hotline at 1-800-252-8263 for help. If Medicaid will not pay the bill or if Medicaid benefits (services and supplies) are denied, you may request a fair hearing by writing to the address or calling the telephone number listed on the letter you get.

Note: Family planning clinics and other providers give free physical exams, lab tests, birth control methods (including sterilization) and contraceptive counseling.

El cliente de Medicaid no tiene que pagar cuentas médicas que Medicaid debe pagar. Es muy importante que usted diga inmediatamente a su médico, al hospital, a la farmacia y a otros proveedores de servicios médicos que usted tiene Medicaid. Si no les dice que tiene Medicaid, puede que usted tenga que pagar estas cuentas. Si usted recibe una cuenta de un doctor, un hospital, u otro proveedor de servicios médicos, pregunte por qué le mandó la cuenta. Si todavía le mandan una cuenta, llame al número directo de Medicaid al 1-800-252-8263 para pedir ayuda. Si Medicaid no va a pagar la cuenta o si se niegan los beneficios de Medicaid (los servicios o los artículos), usted puede pedir por escrito una audiencia imparcial. La dirección y el número de teléfono aparecen en la carta que recibió.

Nota: Las clínicas de planificación familiar y los otros proveedores ofrecen gratis exámenes físicos, análisis de laboratorio, métodos anticonceptivos (inclusive la esterilización) y consejería sobre los anticonceptivos.

Provider Information/Información para el proveedor

Only those people listed under “CLIENT NAME” have Medicaid coverage. Payment is allowed ONLY for services received during the eligibility dates reflected on the front of this form.

Note: Payment for Family Planning Services is available without the consent of the client’s parent or spouse. Confidentiality is required. Family planning drugs, supplies, and services are exempt from the prescription drug and “LIMITED” restrictions.

If there is a health plan named on the front of this form, the client is a member of that health plan in a Medicaid Managed Care program.

Key to terms that may appear on this form:

Limited– Except for family planning services, and for Texas Health Steps (EPSDT), medical screening, dental, and hearing aid services, the client is limited to seeing the doctor and/or limited to using the pharmacy named on the form for drugs obtained through the Vendor Drug Program. In the event of an emergency medical condition as defined below, the “LIMITED” restriction does not apply.

Emergency– The client is limited to coverage for an emergency medical condition. This means a medical condition (including emergency labor and delivery) manifesting itself by acute symptoms sufficient severity (including severe pain) such that the absence of immediate medical care could reasonably be expected to result in (1) placing the patient's health in serious jeopardy, (2) serious impairment to bodily functions or (3) serious dysfunction of any bodily organ or part.

Hospice– The client is in hospice and waives the right to receive services related to the terminal condition through other Medicaid programs. If a client claims to have canceled hospice, call the local hospice agency or HHSC to verify.

QMB– The Medicaid agency is providing coverage of Medicare premiums, deductible, and coinsurance liabilities, but the client is not eligible for regular Medicaid benefits.

MQMB– The Medicaid agency is providing regular Medicaid coverage as well as coverage of Medicare premiums, deductibles, and coinsurance liabilities.

PE– Medicaid covers only family planning and medically necessary outpatient services.

Women’s Health Program– Medicaid coverage is limited to an annual exam, health screenings and contraceptives. The client is not eligible for regular Medicaid benefits.

Note to Pharmacy: Medicaid will pay for more than three prescriptions each month for any Medicaid client who is under age 21, or lives in a nursing facility, or has the STAR/STAR+PLUS Health Plan, or gets services through the Community Living Assistance and Support Services (CLASS), Community Based Alternatives (CBA) and other non-SSI community-based waiver programs. Clients with Medicare who are enrolled in STAR+PLUS may be limited to three prescriptions per month.

</table>

Information to be released or exchanged include (check all that apply):

_____ History and physical

_____ Discharge and Summary

_____ Behavioral Health Treatment Records

_____ Laboratory Reports

_____ Physical Health Treatment Records

_____ Medication Records

_____ Information on HIV or communicable disease treatment

_____ Other (specify) ________________________________

The authorized purpose(s) for this release are:

_____ Diagnosis and Treatment

_____ Coordination of Care

_____ Insurance Payment Purposes

_____ Other (specify) ________________________________
SECTION 4: CLIENT ELIGIBILITY

I understand that my health and behavioral health records are protected from disclosure under Federal and/or state law. I may revoke this authorization. This authorization is valid until I revoke it or 60 days after I have completed treatment, whichever is sooner. Once I revoke this authorization, no information can be released except as authorized or allowed by law. File copy is considered equivalent to the original.

This authorization was explained to me as I signed it of my own free will on:

The __________ day of ____________________, 20__.

______________________________  ______________________________
Signature of Client                        Signature of Witness

______________________________  ______________________________
Signature of Parent, Guardian, or Authorized Representative, if required

NOTICE OF CLIENT'S REFUSAL TO RELEASE INFORMATION:

I have reviewed the above release of information form and refuse to authorize release of health and behavioral health information to mental health and/or alcohol and/or drug abuse treatment providers and/or physical health providers.

Executed this __________ day of ____________________, 20__.

______________________________  ______________________________
Signature of Client                        Signature of Witness

______________________________  ______________________________
Signature of Parent, Guardian, or Authorized Representative, if required

The person signing this authorization is entitled to a copy.

TO PERSON RECEIVING THE CONFIDENTIAL INFORMATION: PROHIBITION OF REDISCLOSURE

Federal and state law protects the confidentiality of the information disclosed to you related to the individual’s alcohol and drug abuse treatment. Federal regulations (42 CFR Part 2) prohibit you from making any further disclosure of this information unless further disclosure is expressly permitted by the written consent of the person to whom it pertains, or as otherwise permitted by such regulations. Disclosure is limited to the purpose and persons included on the authorization form. The Federal rules restrict any use of the information to criminally investigate or prosecute any alcohol or drug abuse patient. State laws may also protect the confidentiality of the client’s records.

TO THE INDIVIDUAL FILLING THIS OUT:
You have the right to ask us about this form. You also have the right to review the information you give us on the form. (There are a few exceptions). If the information is wrong, you can ask us to correct it. The Health and Human Services Commission has a method of asking for corrections. You can find it in Title 1 of the Texas Administrative Code, section 351.17 through 351.23. To talk to someone about this form or ask for corrections, please contact NorthSTAR. You can write to NorthSTAR at 1199 S. Beltline Rd., Coppell, Texas 75019. You can also call the NorthSTAR Helpline at 1-972-906-2500.

AUTORIZACIÓN PARA DIVULGAR INFORMACIÓN CONFIDENCIAL

Entiendo que mis expedientes de salud mental y abuso de sustancias están protegidos contra la divulgación bajo la ley federal o estatal. Puedo revocar esta autorización. Esta autorización tiene vigencia hasta que yo la revoque o 60 días después de que yo haya terminado el tratamiento, lo que suceda primero. Una vez que revoque esta autorización, no se podrá divulgar ninguna información, excepto como lo autorice o lo permita la ley. La copia de archivo se considera equivalente al original.

Se me explicó esta autorización y la firmé por mi propia voluntad:

El día _______ del mes de _______________ de 20____.

Firma del cliente _______________________________ Firma del testigo _______________________________

Firma del padre, tutor o representante autorizado, si es necesario

AVISO SOBRE LA DECISIÓN DEL CLIENTE DE NO AUTORIZAR LA DIVULGACIÓN DE INFORMACIÓN:

He revisado el formulario anterior para la divulgación de información y me he negado a autorizar la divulgación de información de salud mental y abuso de sustancias a los proveedores de salud física o de tratamiento de salud mental o contra el abuso de alcohol o drogas.

Firmado este día _______ del mes de _______________ de 20____.

Firma del cliente _______________________________ Firma del testigo _______________________________

Firma del padre, tutor o representante autorizado, si es necesario

La persona que firma esta autorización tiene derecho a una copia.

PARA LA PERSONA QUE RECIBE LA INFORMACIÓN CONFIDENCIAL: PROHIBICIÓN SOBRE LA DIVULGACIÓN

Las leyes federales y estatales protegen la confidencialidad de la información que usted recibió sobre el tratamiento del abuso de alcohol y drogas de la persona. Las normas federales (42 CFR Parte 2) le prohíben a usted dar esta información a otra persona a menos que se haya permitido expresamente en un consentimiento escrito de la persona de quien se trata, o de otra manera permitida por dichas normas. La divulgación se limita al propósito y a la persona anotados en el formulario de autorización. Las reglas federales limitan el uso de la información a investigar o enjuiciar penalmente a algún paciente que tiene problemas de abuso de alcohol o drogas. Es posible que las leyes estatales también protejan la confidencialidad de los expedientes del paciente.

PARA LA PERSONA QUE LLENA ESTE FORMULARIO:

Tiene el derecho de hacernos preguntas sobre este formulario. También tiene el derecho de revisar la información que nos da en el formulario. (Hay algunas excepciones). Si la información está incorrecta, puede pedir que la corrijamos. La Comisión de Salud y Servicios Humanos tiene un método para pedir correcciones. Puede encontrarlo en el Título 1 del Código Administrativo de Texas, Secciones 351.17 a 351.23. Para hablar con alguien acerca de esta forma, o para pedir correcciones, haga el favor de comunicarse con NorthSTAR. Puede comunicarse con NorthSTAR escribiendo a 1199 S. Beltline Rd., Coppell, Texas 75019 ó llamando a la Línea de Ayuda de NorthSTAR al 1-972-906-2500.

5.9 Submitting Claims for Services That Require Prior Authorization ....................... 5-10

5.10 Guidelines for Procedures Awaiting Rate Hearing .............................................. 5-10
5.1 General Information About Prior Authorization

Some Medicaid services require prior authorization as a condition for reimbursement. Information about whether a service requires prior authorization, as well as prior authorization criteria, guidelines, and timelines for the service, is contained in the handbook within Volume 2 that contains the service.

Prior authorization is not a guarantee of payment. Even if a procedure has been prior authorized, reimbursement can be affected for a variety of reasons, e.g., the client is ineligible on the date of service (DOS) or the claim is incomplete. Providers must verify client eligibility status before providing services.

In most instances prior authorization must be approved before the service is provided. Prior Authorization for urgent and emergency services that are provided after business hours, on a weekend, or on a holiday may be requested on the next business day. TMHP considers providers’ business hours as Monday through Friday, from 8 a.m. to 5 p.m., Central Time. Prior authorization requests that do not meet these deadlines may be denied.

To avoid unnecessary denials, the request for prior authorization must contain correct and complete information, including documentation of medical necessity. The documentation of medical necessity must be maintained in the client’s medical record. The requesting provider may be asked for additional information to clarify or complete a request for prior authorization.

Refer to: Subsection 6.1.3, “Claims Filing Deadlines” in Section 6, “Claims Filing” (Vol. 1, General Information) for the TMHP-approved holidays.

5.1.1 Prior Authorization Requests for Clients with Retroactive Eligibility

Retroactive eligibility occurs when the effective date of a client’s Medicaid coverage is before the date the client’s Medicaid eligibility is added to TMHP’s eligibility file, which is called the “add date.”

For clients with retroactive eligibility, prior authorization requests must be submitted after the client’s add date and before a claim is submitted to TMHP.

For services provided to fee-for-service Medicaid and Primary Care Case Management (PCCM) clients during the client’s retroactive eligibility period, i.e., the period from the effective date to the add date, prior authorization must be obtained within 95 days from the client’s add date and before a claim for those services is submitted to TMHP. For services provided on or after the client’s add date, the provider must obtain prior authorization within 3 business days of the date of service.

The provider is responsible for verifying eligibility. The provider is strongly encouraged to access the Automated Inquiry System (AIS) or TexMedConnect to verify eligibility frequently while providing services to the client. If services are discontinued before the client’s add date, the provider must still obtain prior authorization within 95 days of the add date to be able to submit claims.

Refer to: Section 4: Client Eligibility (Vol. 1, General Information).

5.1.2 Prior Authorization Requests for Newly Enrolled Providers

TMHP cannot issue a prior authorization before Medicaid enrollment is complete. Upon notice of Medicaid enrollment, by way of issuance of a provider identifier, the provider must contact the appropriate TMHP Authorization Department to request prior approval before providing services that require prior authorization. Regular prior authorization procedures are followed after the TMHP Prior Authorization Department has been contacted.

Retroactive authorizations will not be issued unless the regular authorization procedures for the requested services allow for authorizations to be obtained after services are provided. For these services, providers have 95 days from the date the new provider identifier is issued (add date) to obtain authorization for services that have already been performed. Providers should refer to specific handbook sections for details about authorization requirements, claims filing, and timeframe guidelines for authorization request submissions.

Refer to: Section 1: Provider Enrollment and Responsibilities (Vol. 1, General Information).
5.1.3 Prior Authorization Requests for Clients with Private Insurance
If a client's primary coverage is private insurance and Medicaid is secondary but prior authorization is required for Medicaid reimbursement, providers must follow the guidelines and requirements listed in the handbook for that service.

5.1.4 Prior Authorization Requests for Clients with Medicare/Medicaid
If a client's primary coverage is Medicare, providers must always confirm with Medicare whether a service is a Medicare benefit for the client.

If a service that requires prior authorization from Medicaid is a Medicare benefit and Medicare approves the service, prior authorization from TMHP is not required for reimbursement of the coinsurance or deductible. If Medicare denies the service, then prior authorization is required. TMHP must receive a prior authorization request within 30 days of the date of Medicare's final disposition. The Medicare Remittance Advice and Notification (MRAN) that contains Medicare's final disposition must accompany the prior authorization request.

If a service requires prior authorization through Medicaid and the service is not a benefit of Medicare, providers may request prior authorization from TMHP before receiving the denial from Medicare.

5.1.5 Prior Authorization Requests for Medicaid Health Maintenance Organization (HMO) Clients
If a client is covered through a Medicaid HMO, providers must submit prior authorization requests following the administration guidelines specific to the plan under which the client is covered. Providers must validate a client's eligibility to determine the plan under which the client is covered.

Prior authorizations do not transfer with a client between plans. For payment to be considered when a client changes plans, providers must obtain prior authorization through the plan under which the client is covered for the date of service.

Exception: If a client transfers between plans during an inpatient stay, the plan under which the client was covered at the time of admission authorizes and reimburses the entire stay.

5.1.6 Prior Authorizations for Primary Care Case Management (PCCM) Clients
PCCM providers must comply with all prior authorization and notification requirements of the PCCM program.

Refer to: Subsection 8.1.12, “Prior Authorizations” in Section 8, “Managed Care” (Vol. 1, General Information) for prior authorization requirements for PCCM clients.

5.2 Authorization Requirements for Unlisted Procedure Codes
Providers have the option to obtain prior authorization before rendering the service if all of the required information is available. When requesting a PCCM or fee-for-service prior authorization for an unlisted procedure code, providers must submit the following information with the prior authorization request:

- Client's diagnosis.
- Medical records that show the prior treatment for this diagnosis and the medical necessity of the requested procedure.
- A clear, concise description of the procedure to be performed.
- Reason for recommending this particular procedure
- A procedure code that is comparable to the procedure being requested.
- Documentation that this procedure is not investigational or experimental.
- Place of service in which the procedure is to be performed.
• The physician’s intended fee for this procedure including the manufacturer’s suggested retail price (MSRP) or other payment documentation.

If any of this information is unavailable at the time the prior authorization is requested, the request will be returned as incomplete; however, this is not a denial of reimbursement. If the required information becomes available before the service is performed, the prior authorization request can be resubmitted, or the required medical necessity and payment documentation can be submitted with the claim after the service is provided to be considered for reimbursement.

The prior authorization number must appear on the claim when it is submitted to TMHP. Claims submitted without the appropriate prior authorization will be denied.

### 5.3 Benefit Code

A benefit code is an additional data element that identifies a state program.

Providers that participate in the following programs must use the associated benefit code when they submit prior authorizations:

<table>
<thead>
<tr>
<th>Program</th>
<th>Benefit Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>Comprehensive Care Program (CCP)</td>
<td>CCP</td>
</tr>
<tr>
<td>Texas Health Steps (THSteps) Medical</td>
<td>EP1</td>
</tr>
<tr>
<td>THSteps Dental</td>
<td>DE1</td>
</tr>
<tr>
<td>Family Planning Agencies*</td>
<td>FP3</td>
</tr>
<tr>
<td>Hearing Aid Dispensers</td>
<td>HA1</td>
</tr>
<tr>
<td>Maternity</td>
<td>MA1</td>
</tr>
<tr>
<td>County Indigent Health Care Program</td>
<td>CA1</td>
</tr>
<tr>
<td>Early Childhood Intervention (ECI) providers</td>
<td>ECI</td>
</tr>
<tr>
<td>Tuberculosis (TB) Clinics</td>
<td>TB1</td>
</tr>
<tr>
<td>Texas Medicaid Home Health Durable Medical Equipment (DME)</td>
<td>DM2</td>
</tr>
<tr>
<td>Case Management Mental Retardation (MR) providers</td>
<td>MH2</td>
</tr>
</tbody>
</table>

*A agencies only—Benefit codes should not be used for individual family planning providers.*

### 5.4 Prior Authorization Submission Methods

Prior authorization requests can be submitted by fax, mail, telephone, and online through the TMHP website at www.tmhp.com. The methods to use to request the prior authorization depends on the service being requested.

#### 5.4.1 Prior Authorization Requests Through the TMHP Website

Online prior authorization requests for some services in the following areas can be submitted through the TMHP website at www.tmhp.com:

- Home Health
- PCCM
- Comprehensive Care Inpatient Psychiatric (CCIP)
- CCP
- Ambulance
The benefits of submitting prior authorization requests through the TMHP website include:

- Online editing to ensure that the required information is being submitted correctly.
- The prior authorization number is issued within seconds of submission and confirms that the prior authorization request was accepted. Before providing services, providers must confirm that the prior authorization was approved.
- Notification of approvals and denials are available more quickly.
- Extension requests and status checks can be performed online for prior authorization requests that were submitted online.

Providers can access online prior authorization requests from the "I would like to..." links located on the right-hand side of homepage of the TMHP website at www.tmhp.com. Select **Submit a prior authorization request** to submit a new request or **Search for/extend an existing prior authorization** to check the status of or extend a prior authorization request that was previously submitted through the TMHP website.

Instructions for submitting prior authorization requests on the TMHP website are located in the Help section at the bottom of the Prior Authorization page.

Prior authorizations that are submitted online will be processed using the same guidelines as prior authorizations submitted by other methods.

Before providers can submit online prior authorization requests, providers must register on the TMHP website and assign an administrator for each Texas Provider Identifier (TPI) and National Provider Identifier (NPI), if one is not already assigned. Users who are configured with administrator rights automatically have permission to submit prior authorization requests.

The TPI administrator can assign submission privileges for nonadministrator accounts. Billing services and clearinghouses must obtain access to protected health-care information through the appropriate administrator of each TPI/NPI provider number for which they are contracted to provide services.

### 5.4.1.1 Document Requirements and Retention

If information provided in the online request is insufficient to support medical necessity, TMHP Prior Authorization staff may ask the provider to submit additional paper documentation to support the medical necessity for the service being requested.

Submission of prior authorization requests on the secure pages of the TMHP website does not replace adherence to and completion of the paper forms/documentation requirements outlined in this manual and other publications.

Documentation requirements include, but are not limited to, the following:

- Documentation that supports the medical necessity for the service requested.
- Completion and retention in the client’s medical record of all required prior authorization forms
- Adherence to signature and date requirements for prior authorization forms and other required forms that are kept in the client record, including the following:
  - All prior authorization forms completed and signed before the online prior authorization request is made
  - Original handwritten signatures (Computerized or stamped signatures are not accepted by Texas Medicaid.)
- A printed copy of the Online Request Form, which must be retained in the client's medical record

Any required documentation that is missing from the client's medical record subjects the associated payments for services to be recouped.
5.4.1.1 Acknowledgement Statement
Before submitting each prior authorization request, providers (and submitters on behalf of providers) must affirm that they have read, understood, and agree to the certification and terms and conditions of the prior authorization request.

Providers and submitters are separately held accountable for their declarations after they have acknowledged their agreement and consent by checking the “We Agree” checkbox after reviewing the certification statement and terms and conditions.

5.4.1.1.2 Certification Statement:
"The Provider and Authorization Request Submitter certify that the information supplied on the prior authorization form and any attachments or accompanying information constitute true, correct, and complete information. The Provider and Authorization Request Submitter understand that payment of claims related to this prior authorization will be from federal and state funds, and that falsifying entries, concealment of a material fact, or pertinent omissions may constitute fraud and may be prosecuted under applicable federal and/or state law. Fraud is a felony, which can result in fines or imprisonment.

"By checking ‘We Agree’ you agree and consent to the Certification above and to the TMHP ’Terms and Conditions.’"

5.4.1.1.3 Terms and Conditions:
"I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the state’s Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or U.S. Dept. of Health and Human Services may request. I further agree to accept, as payment in full, the amount paid by Medicaid for those claims submitted for payment under that program, with the exception of authorized deductible, coinsurance, copayment or similar cost-sharing charge. I certify that the services listed above are/were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction.

"Notice: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim, based on information provided on the Prior Authorization form, will be from federal and state funds, and that any false claims, statements or documents, or concealment of a material fact, may be prosecuted under applicable federal or state law.”

Omission of information or failure to provide true and accurate information or notice of changes to the information previously provided may result in termination of the provider’s Medicaid enrollment and/or personal exclusion from Texas Medicaid.

5.4.2 Prior Authorization Requests to TMHP by Fax, Telephone, or Mail
When submitting prior authorization requests through fax or mail, providers must submit the requests on the approved form. If necessary, providers may submit attachments with the form. Providers must follow the guidelines and requirements listed in the handbook for the service. Providers can refer to the provider handbooks for the guidelines and requirements listed for a specific service.

Prior authorization requests must be signed and dated by a physician or dentist who is familiar with the client’s medical condition before the request is submitted to TMHP. When allowed, prior authorizations must be signed and dated by an advanced practice registered nurse (APRN) or physician assistant (PA) who is familiar with the client’s medical condition before the request is submitted to TMHP. Prior authorization requests for services that may be signed by a licensed health-care provider other than a physician, dentist, or when allowed by an APRN and PA, do not require handwritten signatures and dates. Electronic signatures from a registered nurse (RN) or therapist are acceptable when submitting therapy requests for CCP.
All signatures and dates must be current, unaltered, and handwritten. Computerized or stamped signatures and dates are not permitted. Prior authorization requests that are submitted without a handwritten signature and date will be denied. TMHP will not authorize any dates of services on the request earlier than the date of the provider's signature. The prior authorization request that contains the original signature must be kept in the client's medical record for future access and possible retrospective review. These documentation requirements also apply to telephone authorizations. To avoid delays, providers are encouraged to have all clinical documentation at the time of the initial telephone authorization request.

5.4.3 Radiology Prior Authorizations Through MedSolutions

MedSolutions, Inc., performs radiology prior authorization services on behalf of TMHP.

Refer to: Subsection 3.2.5, “Authorization Requirements for CT, CTA, MRI, fMRI, MRA, PET, and Cardiac Nuclear Imaging Services” in the Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks) to determine which radiology services require a prior authorization through MedSolutions.

5.4.3.1 Online Prior Authorizations Through MedSolutions

Radiology prior authorization requests may be submitted through the MedSolutions website at www.medsolutionsonline.com. The TMHP website at www.tmhp.com also has links to the MedSolutions website.

5.4.3.2 Prior Authorizations to MedSolutions by Fax, Telephone, or Mail

When submitting radiology prior authorization requests to MedSolutions by fax or mail, providers must use the approved Form RL.1, “Radiology Prior Authorization Request Form” in the Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks).

Telephone: 1-800-572-2116
Fax: 1-800-572-2119
Mail: Texas Medicaid & Healthcare Partnership
730 Cool Springs Blvd., Suite 800
Franklin, TN 37067

5.4.3.3 Retroactive Authorization Requests

Retroactive authorization requests for outpatient diagnostic computed tomography (CT), magnetic resonance (MR), positron emission tomography (PET) and cardiac nuclear imaging services for Texas Medicaid fee-for-service clients and PCCM clients must be submitted online to MedSolutions. The retroactive authorizations requests must be submitted to MedSolutions no later than 14 calendar days after the day on which the study was completed, regardless of the method of submission. If the retroactive authorization request is submitted after the allotted time, the authorization request will not be processed. Providers can refer to the TMHP website for MedSolutions’ contact information and methods of submission.

5.5 Verifying Prior Authorization Status

Prior Authorizations are processed based on the date the request is received. Requests with all required information can take up to three business days after the date of receipt for TMHP to complete the authorization process.

Providers can check the status of prior authorizations requested online through the TMHP website at www.tmhp.com.
Providers may also check status of prior authorizations by using the following numbers.

<table>
<thead>
<tr>
<th>Contact</th>
<th>Telephone Number</th>

<td></td>
</tr>
<tr>
<td>All other authorization requests</td>
<td>1-800-925-9126</td>
</tr>
</tbody>
</table>

### 5.6 Prior Authorization Notifications
TMHP sends a notification to the provider when the prior authorization is approved, denied, or modified. If TMHP receives prior authorization requests with incomplete or insufficient information, TMHP will ask the requesting provider to furnish the additional documentation needed before TMHP can make a decision on the request. If the requesting provider does not respond to the request for additional information, the prior authorization request will be denied. It is the requesting provider’s responsibility to contact the appropriate provider, when necessary, to obtain the additional documentation.

### 5.7 Prior Authorization Denials Appeals Process
Prior Authorizations that are denied by TMHP can be resubmitted to the TMHP Prior Authorization Department with new or additional information for reconsideration.

If the request is denied a second time, or if the provider has no new or additional information, the provider may file an Administrative Appeal to HHSC. Providers must include a copy of the denial letter.

It is strongly recommended that providers maintain a list that details the prior authorizations, including:
- Client’s name
- Client’s Medicaid number
- Date of service
- Provider Identifier
- Items submitted

This information will be required if a provider needs to file an administrative review.

Refer to: Subsection 7.3, “Appeals to HHSC Texas Medicaid Fee-for-Service and PCCM” in Section 7, “Appeals” (Vol. 1, General Information) for information about filing an administrative appeal to HHSC.

### 5.8 Closing a Prior Authorization
When a client decides to change providers or elects to discontinue prior-authorized services before the authorization ends, that prior authorization is updated to reflect the early closure date and the reason for closure.

If a client with an active prior authorization changes providers, TMHP must receive a change of provider letter with the request for a new prior authorization in accordance with submission guidelines for the service. The client must sign and date the letter, which must include the name of the previous provider, the current provider, and the effective date for the change.
The client is responsible for notifying the previous provider that the client is discontinuing services and the effective date of the change. TMHP also notifies the previous provider by mail when a prior authorization has been closed early. The letter includes the beginning date of service, the revised ending date of the authorization, and the reason for the early closure.

**5.9 Submitting Claims for Services That Require Prior Authorization**

Claims submitted for services that require prior authorization must indicate the authorization number, provider identifier, procedure codes, dates of service, required modifiers, number of units, and the amount for manually priced procedure codes as detailed on the authorization letter. If the prior authorization letter shows itemized details and the provider rendered all services listed, the details on the claim must match the details on the prior authorization letter.

*Important:* Claims processing and payment may be delayed if the detailed information on the authorization letter and the claim details do not match exactly.

Claims for prior authorized services must contain only one prior authorization number per claim. Prior authorization numbers must be indicated on the applicable electronic fields or in the following blocks for paper claim forms:

<table>
<thead>
<tr>
<th>Paper Claim Form</th>
<th>Block for Prior Authorization Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMS-1500 (professional) claim form</td>
<td>Block 23</td>
</tr>
<tr>
<td>UB-04 CMS-1450 (institutional) claim form</td>
<td>Block 63</td>
</tr>
<tr>
<td>American Dental Association (ADA) claim form</td>
<td>Block 2</td>
</tr>
<tr>
<td>Family Planning 2017 claim form</td>
<td>Block 30</td>
</tr>
</tbody>
</table>

**5.10 Guidelines for Procedures Awaiting Rate Hearing**

For procedure codes that require prior authorization but are awaiting a rate hearing, providers must follow the established prior authorization process as defined in the applicable provider handbook. Providers must obtain a timely prior authorization for services provided. Providers must not wait until the rate hearing process for the procedure codes is completed to request prior authorization. In this situation, retroactive prior authorization requests are not granted; the requests are denied as late submissions. Providers are also responsible for meeting the initial 95-day filing deadline and for ensuring that the prior authorization number is on the claim the first time it is submitted to TMHP for consideration of reimbursement.

Claims for procedure codes awaiting a rate hearing are denied. No further action on the part of the provider is necessary. Once the rates are established, TMHP automatically reprocesses the claims. If the required prior authorization number is not on the claim at the time of reprocessing, the claim is denied for lack of prior authorization.

6.1 Claims Information

Because Texas Medicaid cannot make payments to clients, the provider who performs the service must file an assigned claim. Federal regulations prohibit providers from charging clients a fee for completing or filing Medicaid claim forms. Providers are not allowed to charge TMHP for filing claims. The cost of claims filing is part of the usual and customary rate for doing business. Providers cannot bill Texas Medicaid or Medicaid clients for missed appointments or failure to keep an appointment. Only claims for services rendered are considered for payment.

Medicaid providers are also required to complete and sign authorized medical transportation forms (e.g., Form 3103, Individual Driver Registrant (IDR) Service Record, or Form 3111, Verification of Travel to Healthcare Services by Mass Transit) or provide an equivalent (e.g., provider statement on official letterhead) to attest that services were provided to a client on a specific date. The client presents these forms to the provider.

Providers are not allowed to bill clients or Texas Medicaid for completing these forms.

6.1.1 TMHP Processing Procedures

TMHP processes claims for the Texas Medicaid fee-for-service and Medicaid Managed Care programs.

Medicaid claims are subject to the following procedures:

- TMHP verifies all required information is present.
- Claims filed under the same provider identifier and program and ready for disposition at the end of each week are paid to the provider with an explanation of each payment or denial. The explanation is called the Remittance and Status (R&S) Report, which may be received as a downloadable portable document format (PDF) version or on paper. A Health Insurance Portability and Accountability Act (HIPAA)-compliant 835 transaction file is also available for those providers who wish to import claim dispositions into a financial system.

An R&S Report is generated for providers that have weekly claim or financial activity with or without payment. The report identifies pending, paid, denied, and adjusted claims. If no claim activity or outstanding account receivables exist during the time period, an R&S Report is not generated for the week.

- For services that are billed on a claim and have any benefit limitations for providers, the date of service determines which provider’s claims are paid, denied, or recouped. Claims that have been submitted and paid may be recouped if a new claim with an earlier date of service is submitted, depending on the benefit limitations for the services rendered.

Services that have been authorized for an extension of the benefit limitation will not be recouped. Providers can submit an appeal with medical documentation if the claim has been denied.

Refer to: Section 8: Managed Care (Vol. 1, General Information) for TMHP claims processing information related to Medicaid managed care.

6.1.1.1 Fiscal Agent

TMHP acts as the state’s Medicaid fiscal agent. A fiscal agent arrangement is one of two methods allowed under federal law and is used by all other states that contract with outside entities for Medicaid claims payment. Under the fiscal agent arrangement, TMHP is responsible for paying claims, and the state is responsible for covering the cost of claims.

Note: The fiscal agent arrangement does not affect Long Term Care (LTC) and Family Planning (Titles V, X, XX) providers.
Provider Designations
The fiscal agent arrangement requires that providers be designated as either public or nonpublic. By definition, public providers are those that are owned or operated by a city, state, county, or other government agency or instrumentality, according to the Code of Federal Regulations. In addition, any provider or agency that performs intergovernmental transfers to the state would be considered a public provider. This includes those agencies that can certify and provide state matching funds, (i.e., other state agencies). New providers self-designate (public or private) on the provider enrollment application.

The fiscal agent:
- Rejects all claims not payable under Texas Medicaid rules and regulations.
- Suspends payments to providers according to procedures approved by HHSC.
- Notifies providers of reduction in claim amount or rejection of claim and the reason for doing so.
- Collects payments made in error, affects a current record credit to the department, and provides the department with required data relating to such error corrections.
- Prepares checks or drafts to providers, except for cases in which the department agrees that a basis exists for further review, suspension, or other irregularity within a period not to exceed 30 days of receipt and determination of proper evidence establishing the validity of claims, invoices, and statements.
- Makes provisions for payments to providers who have furnished eligible client benefits.
- Withholds payment of claim when the eligible client has another source of payment.
- Employs and assigns a physician, or physicians, and other professionals as necessary, to establish suitable standards for the audit of claims for services delivered and payment to eligible providers.
- Requires eligible providers to submit information on claim forms.

6.1.1.2 Payment Error Rate Measurement (PERM)

The Improper Payments Information Act (IPIA) of 2002 directs federal agency heads, in accordance with the Office of Management and Budget (OMB) guidance, to annually review agency programs that are susceptible to significant erroneous payments and to report the improper payment estimates to the U.S. Congress.

Every three years the Centers for Medicare & Medicaid Services (CMS) will assess the Texas Medicaid Program using the PERM process to measure improper payments in the Texas Medicaid Program and the Children’s Health Insurance Program (CHIP).

CMS uses PERM to measure the accuracy of Medicaid and CHIP payments made by states for services rendered to clients. Under the PERM program, CMS will use three national contractors to measure improper payments in Medicaid and CHIP:
- The statistical contractor will provide support to the program by identifying the claims to be reviewed and by calculating each state’s error rate.
- The data documentation contractor will collect medical policies from the State and medical records from providers.
- The review contractor will perform medical and data processing reviews of the selected claims in order to identify any improper payments.

Providers are required to provide medical record documentation to support the medical reviews that the federal review contractor will conduct for Texas Medicaid fee-for-service and PCCM Medicaid and CHIP claims.
Past studies have shown that the largest cause of error in medical reviews is lack of documentation or insufficient documentation. It is important that information be sent in a timely and complete manner, since a provider’s failure to timely submit complete records in support of the claims filed can result in a higher payment error rate for Texas, which in turn can negatively impact the amount of federal funding received by Texas for Medicaid and CHIP.

Providers must submit the requested medical records to the data documentation contractor and HHSC within 60 calendar days of the receipt of the written notice of request. If providers have not responded within 15 days, the data documentation contractor and possibly state officials will initiate reminder calls and letters to providers. The data documentation contractor and possibly state officials will also initiate reminder calls and letters to providers after 35 days. If providers have not responded in 60 days, the data documentation contractor will submit a letter to the provider and the state PERM director indicating a “no documentation error”. After the provider’s submittal of requested information, the data documentation contractor may request additional information to determine proper payment. In this instance, the provider is given 15 days to provide additional documentation.

If medical records are not received within 60 calendar days, the data documentation contractor will identify the claim as a PERM error and classify all dollars associated with the claim as an overpayment. Providers will be required to reimburse the overpayment in accordance with state and federal requirements.

A provider’s failure to maintain complete and correct documentation in support of claims filed or failure to provide such documentation upon request can result in the provider being sanctioned under Title 1, Texas Administrative Code (TAC) Part 15, Chapter 371. Sanction actions may include, but are not limited to, a finding of overpayment for the claims that are not sufficiently supported by the required documentation. Sanctions may include, but are not limited to, a finding of overpayment for the claims that are not sufficiently supported by the required documentation.

### 6.1.2 Claims Filing Instructions

This manual references paper claims when explaining filing instructions. HHSC and TMHP encourage providers to submit claims electronically. TMHP offers specifications for electronic claim formats. These specifications are available from the TMHP website and include a cross-reference of the paper claim filing requirements to the electronic format.

Providers can participate in the most efficient and effective method of submitting claims to TMHP by submitting claims through the TMHP Electronic Data Interchange (EDI) claims processing system using TexMedConnect or a third party vendor. The proceeding claim filing instructions in this manual apply to paper and electronic submitters. Although the examples of claims filing instructions refer to their inclusion on the paper claim form, claim data requirements apply to all claim submissions, regardless of the media. Claims must contain the provider’s complete name, address, and provider identifier to avoid unnecessary delays in processing and payment.

**Note:** Information about filing claims for services rendered to STAR Program and STAR+PLUS Program members is available in Section 8, “Managed Care” (Vol. 1, General Information).

**Exception:** File Primary Care Case Management (PCCM) claims with TMHP.

**Refer to:** Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on accessing the TMHP website.

Subsection 8.1, “Medicaid Managed Care” in Section 8, “Managed Care” (Vol. 1, General Information).

### 6.1.2.1 Maximum Number of Units allowed per Claim Detail

The total number of units per claim detail can not exceed 9,999. Providers who submit a claim with more than 9,999 units must bill 9,999 units on the first detail of the claim and any additional units on separate details.
6.1.2.2 Tips on Expediting Paper Claims

Use the following guidelines to enhance the accuracy and timeliness of paper claims processing.

General requirements

- Use original claim forms. Don’t use copies of claim forms.
- Detach claims at perforated lines before mailing.
- Use 10 x 13 inch envelopes to mail claims. Don’t fold claim forms, appeals, or correspondence.
- Don’t use labels, stickers, or stamps on the claim form.
- Don’t send duplicate copies of information.
- Use 8 ½ x 11 inch paper. Don’t use paper smaller or larger than 8 ½ x 11 inches.
- Don’t mail claims with correspondence for other departments.

Data Fields

- Print claim data within defined boxes on the claim form.
- Use black ink, but not a black marker. Don’t use red ink or highlighters.
- Use all capital letters.
- Print using 10-pitch (12-point) Courier font, 10 point. Don’t use fonts smaller or larger than 12 points. Don’t use proportional fonts, such as Arial or Times Roman.
- Use a laser printer for best results. Don’t use a dot matrix printer, if possible.
- Don’t use dashes or slashes in date fields.

Attachments

- Use paper clips on claims or appeals if they include attachments. Don’t use glue, tape, or staples.
- Place the claim form on top when sending new claims, followed by any medical records or other attachments.
- Number the pages when sending when sending attachments or multiple claims for the same client (e.g., 1 of 2, 2 of 2).
- Don’t total the billed amount on each claim form when submitting multi-page claims for the same client.
- Use the CMS-approved Medicare Remittance Advice Notice printed from Medicare Remit Easy Print (MREP) (professional services) or PC-Print (institutional services) when sending a Remittance Advice from Medicare or the paper MRAN received from Medicare or a Medicare intermediary. You may also download a TMHP-approved MRAN template from the TMHP website at www.tmhp.com.
- Submit claim forms with MRANs and R&S Reports.

6.1.3 Claims Filing Deadlines

For claims payment to be considered, providers must adhere to the time limits described in this section. Claims received after the following claims filing deadlines are not payable because Texas Medicaid does not provide coverage for late claims.

Exception: Unless otherwise stated below, claims must be received by TMHP within 95 days from each date of service (DOS). Appeals must be received by TMHP within 120 days of the disposition date on the R&S Report on which the claim appears. A 95-day or 120-day appeal filing deadline that falls on a weekend or a holiday is extended to the next business day following the weekend or holiday.
Only the following holidays extend the deadlines in 2011 and 2012:

<table>
<thead>
<tr>
<th>Date</th>
<th>Holiday</th>
</tr>
</thead>
<tbody>
<tr>
<td>January 17, 2011</td>
<td>Martin Luther King, Jr. Day</td>

<td>Memorial Day</td>
</tr>
<tr>
<td>July 4, 2012</td>
<td>Independence Day</td>
</tr>
</tbody>
</table>

* Columbus Day is a federal holiday, but not a state holiday. The claims filing deadline will be extended for providers because the Post Office will not be operating on this day.

The following are time limits for submitting claims:

- Inpatient claims filed by the hospital must be received by TMHP within 95 days of the discharge date or last DOS on the claim.
  - Hospitals reimbursed according to diagnosis-related group (DRG) payment methodology may submit an interim claim because the client has been in the facility 30 consecutive days or longer. A total stay claim is needed after discharge to ensure accurate calculation for potential outlier payments for clients who are 20 years of age and younger.
  - Children’s hospitals reimbursed according to *Tax Equity and Fiscal Responsibility Act (TEFRA)* of 1982 methodology may submit interim claims before discharge and must submit an interim claim if the client remains in the hospital past the hospital’s fiscal year end.
  - When medical services are rendered to a Medicaid client in Texas, TMHP must receive claims within 95 days of the DOS on the claim.
  - Claims submitted by newly enrolled providers must be received within 95 days of the date the new provider identifier is issued, and within 365 days of the DOS.
  - TMHP must receive claims from out-of-state providers within 365 days from the DOS. The DOS is the date the service is provided or performed.
  - TMHP must receive claims on behalf of an individual who has applied for Medicaid coverage but has not been assigned a Medicaid number on the DOS within 95 days from the date the eligibility was added to the TMHP eligibility file (add date) and within 365 days of the date of service or from the discharge date for inpatient claims.
  - Providers should verify eligibility and add date by contacting TMHP (Automated Inquiry System [AIS], TMHP EDI’s electronic eligibility verification, or TMHP Contact Center) when the number is received. Not all applicants become eligible clients. Providers that submit claims electronically within the 365-day federal filing deadline for services rendered to individuals who do not currently have a Texas Medicaid identification number will receive an electronic rejection. Providers can use the TMHP rejection report as proof of meeting the 365-day federal filing deadline and submit an administrative appeal.

* CPT ONLY - COPYRIGHT 2010 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.*
Important: Providers should request and keep copies of any Medicaid Eligibility Verification (Form H1027) and Client Medicaid Identification (Form H3087) forms submitted by clients. A copy is required during the appeal process if the client’s eligibility becomes an issue.

- If a client becomes retroactively eligible or loses Medicaid eligibility and is later determined to be eligible, the 95-day filing deadline begins on the date that the eligibility start date was added to TMHP files (the add date). However, the 365-day federal filing deadline must still be met.

- When a service is a benefit of Medicare and Medicaid, and the client is covered by both programs, the claim must be filed with Medicare first. TMHP must receive Medicaid claims within 95 days of the date of Medicare disposition.

Providers must submit a paper MRAN received from Medicare or a Medicare intermediary, the computer-generated MRANs from the CMS-approved software application MREP for professional services or PC-Print for institutional services, or the TMHP Standardized MRAN Form with a completed claim form to TMHP.

- When a client is eligible for Medicare Part B only, the inpatient hospital claim for services covered as Medicaid only is sent directly to TMHP and is subject to the 95-day filing deadline (from date of discharge).

Note: It is strongly recommended that providers who submit paper claims keep a copy of the documentation they send. It is also recommended that paper claims be sent by certified mail with a return receipt requested. This documentation, along with a detailed listing of the claims enclosed, provides proof that the claims were received by TMHP, which is particularly important if it is necessary to prove that the 95-day claims filing deadline has been met. TMHP will accept certification receipts as proof of the 95-day or 120-filing deadline. For this, the provider must provide the following: certification receipt, log to include information in the packet, Medicaid number, billed amount, DOS, and a signed claim copy. The provider needs to keep such proof of multiple claims submissions if the provider identifier is pending.

- If the provider is attempting to obtain prior authorization for services performed or will be performed, TMHP must receive the claim according to the usual 95-day filing deadline.

Note: PCCM providers, refer to Section 8: Managed Care (Vol. 1, General Information) for additional information about authorizations.

- The provider bills TMHP directly within 95 days from the DOS. However, if a non-third party resource (TPR) is billed first, TMHP must receive the claim within 95 days of the claim disposition by the other entity.

Note: The provider submits a copy of the disposition with the claim. A non-TPR is secondary to Texas Medicaid and may only pay benefits after Texas Medicaid.

Refer to: Subsection 4.11, “Third Party Liability (TPL)” in Section 4, “Client Eligibility” (Vol. 1, General Information) for examples of non-TPRs.

- When a service is billed to another insurance resource, the filing deadline is 95 days from the date of disposition by the other resource.

- When a service is billed to a third party and no response has been received, Medicaid providers must allow 110 days to elapse before submitting a claim to TMHP. However, the 365-day federal filing deadline requirement must still be met.

- A Compass21 (C21) process allows a Title V, X, or XX Family Planning claim to be paid by Title XIX (Medicaid) if the client is eligible for Title XIX when those services are provided and billed under Title V, X, or XX. In this instance, the Medicaid 95-day filing deadline is in effect and must be met or the claim will be denied.
• For claims re-submitted to TMHP with additional detail charges (i.e., quantity billed), the additional
details are subject to the 95-day filing deadline.

  **Note:** In accordance with federal regulations, all claims must be initially filed with TMHP within
365 days of the DOS, regardless of provider enrollment status or retroactive eligibility.

**Refer to:** Subsection 6.1.2, “Claims Filing Instructions” in this section.

Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for information on the provider enrollment process.

Subsection 6.1.3.2, “Exceptions to the 95-Day Filing Deadline” in this section.

“Automated Inquiry System (AIS)” in “Preliminary Information” (Vol. 1, General Information) to learn how to retrieve client eligibility information by telephone.

Subsection 6.11.7, “Provider Inquiries—Status of Claims” in this section.

**6.1.3.1 Claims for Clients with Retroactive Eligibility**

Claims for clients who receive retroactive eligibility must be submitted within 95 days of the date that the client’s eligibility was added to the TMHP eligibility file (add date) and within 365 days of the DOS.

Title 42 of the Code of Federal Regulations (42 CFR), at 447.45 (d) (1), states “The Medicaid agency must require providers to submit all claims no later than 12 months from the date of service.” The 12-month filing deadline applies to all claims. Claims not submitted within 365 days (12 months) from the date of service cannot be considered for payment.

Retroactive eligibility does not constitute an exception to the federal filing deadline. Even if the patient’s Medicaid eligibility determination is delayed, the provider must still submit the claim within 365 days of the date of service. A claim that is not submitted within 365 days of the date of service will not be considered for payment.

To submit a claim for services provided to a patient who is not yet eligible for Medicaid, Texas Medicaid allows providers to submit claims using a pseudo recipient identification number such as 999999999 or 000000000. Although TMHP will deny the claim, providers should retain the denial or electronic rejection report for proof of timely filing, especially if the eligibility determination occurs more than 365 days after the date of service. Claims denied for recipient ineligibility may be resubmitted when the patient becomes eligible for the retroactive date(s) of service. Texas Medicaid may then consider the claim for payment because the initial claim was submitted within the 365-day federal filing deadline and the denial was not the result of an error by the provider.

If the 365-day federal filing deadline requirement has passed, providers must submit the following to TMHP within 95 days from the add date:

- A completed claim form.
- One of the following dated within 365 days from the date of service:
  - A page from a Remittance and Status (R&S) Report documenting a denial of the claim.
  - An electronic rejection report of the claim that includes the Medicaid recipient’s name and date of service.
Providers that have submitted their claims electronically can provide proof of timely filing by submitting a copy of an electronic claims report that includes the following information:

- Client name or Medicaid identification number (patient control number [PCN])
- DOS
- Total charges
- Batch identification number (Batch ID) (in correct format)

**Note:** Only reports that were accepted or rejected by TMHP will be honored. The claim filed (client name or PCN, DOS and total charges) should match the information on the batch report.

### 6.1.3.2 Exceptions to the 95-Day Filing Deadline

TMHP is not responsible for appeals about exceptions to the 95-day filing deadline. These appeals must be submitted to the HHSC Claims Administrator Contract Management. TAC allows HHSC to consider exceptions to the 95-day filing deadline under special circumstances.

**Refer to:** Subsection 7.3, “Appeals to HHSC Texas Medicaid Fee-for-Service and PCCM” in Section 7, “Appeals” (Vol. 1, General Information).

### 6.1.3.3 Appeal Time Limits

All appeals of denied claims and requests for adjustments on paid claims must be received by TMHP within 120 days from the date of disposition, the date of the R&S Report on which that claim appears. If the 120-day appeal deadline falls on a weekend or holiday, the deadline will be extended to the next business day.

**Refer to:** Subsection 6.1.2, “Claims Filing Instructions” in this section.

Hospitals appealing final technical denials, admission denials, DRG changes, continued-stay denials, or cost/day outlier denials refer to Section 7: Appeals (Vol. 1, General Information) for complete appeal information.

### 6.1.3.4 Claims with Incomplete Information and Zero Paid Claims

Claims listed on the R&S Report with $0 allowed and $0 paid may be resubmitted as electronic appeals. Previously, these claims were only accepted as paper claims and were not accepted as electronic appeals. Appeals may be submitted through a third party biller or through TexMedConnect.

Zero-paid claims that are still within the 95-day filing deadline should be submitted as new day claims, which are processed faster than appeals. Claims can be resubmitted past the 95-day deadline as new day claims if the following fields have not changed:

- Provider identifiers
- Client Medicaid number
- Dates of service
- Total billed amount

Claims that are past the 95-day filing deadline and require changes to the fields listed above must be appealed on paper, with a copy of the R&S report. All other appeal guidelines remain unchanged.

### 6.1.3.5 Claims Filing Reminders

After filing a claim to TMHP, providers should review the weekly R&S Report. If within 30 days the claim does not appear in the Claims In Process section, or if it does not appear as a paid, denied, or incomplete claim, the provider should resubmit it to TMHP within 95 days of the DOS.

The provider should allow TMHP 45 days to receive a Medicare-paid claim automatically transmitted for payment of deductible, coinsurance, or both.
Electronic billers should notify TMHP about missing claims when:

- An accepted claim does not appear on the R&S Report within ten workdays of the file submittal.
- A claim or file does not appear on a TMHP Electronic Claims Submission Report within ten days of the file submission.

Certain claims, including those that were submitted for newborn services or that might be covered under Medicare, are suspended for review so that other state agencies can verify information. This review may take longer than 60 days.

These suspended claims will appear on the provider’s R&S Report under “The following claims are being processed” with a message indicating that the client’s eligibility is being investigated. Providers must wait until the claim is finalized and appears under “Paid or Denied” or “Adjustment to Claims” on the R&S Report before appealing the claim. If the claim does not appear on the R&S Report, providers must resubmit the claim to TMHP to ensure compliance with filing and appeal deadlines.

6.1.4 HHSC Payment Deadline

Payment deadline rules, as defined by HHSC, affect all providers with the exception of LTC and Family Planning Titles V, X, and XX.

The new HHSC payment deadline rules for the fiscal agent arrangement ensure that state and federal financial requirements are met. TMHP is required to finalize and pay claims within a determined time frame (see table below), based on provider, claim, or eligibility type.

The following table describes the new payment deadline rules:

<table>
<thead>
<tr>
<th>Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>All Providers</td>
<td>Medicaid/CSHCN payments, excluding crossovers, cannot be made</td>
</tr>
<tr>

<td>For paper submissions, the state has 24 months from the Medicare</td>
</tr>
<tr>
<td></td>
<td>disposition date to pay a crossover claim.</td>
</tr>
</tbody>
</table>
| Retroactive SSI Eligibility (clients)      | The payment deadline is derived from the client’s eligibility “add date”;
|                                           | to allow 24 months from the add date for the retroactive Supplemental       |
|                                           | Security Income (SSI)-eligible client.                                      |
| County Indigent SSI Eligibility (clients)  | The payment deadline is derived from the client’s eligibility add date; to   |
|                                           | allow 24 months from the add date to pay the claim.                         |

Claims and appeals submitted after the designated payment deadlines are denied.

**Note:** Providers may appeal HHSC Office of Inspector General (OIG) initiated claims adjustments (recoupments) after the 24-month deadline but must do so within 120 days from the date of the recoupment. Refer to subsection 7.1.5, “Paper Appeals” in Section 7, “Appeals” (Vol. 1, General Information) for instructions. All appeals of OIG recoupments must be submitted by paper, no electronic or telephone appeals will be accepted.
### Filing Deadline Calendar for 2011

**Note:** If the 95th or 120th day falls on a weekend or holiday, the filing or appeal deadline is extended to the next business day.

## 6.1.4.2 Filing Deadline Calendar for 2012

**Note:** If the 95th or 120th day falls on a weekend or holiday, the filing or appeal deadline is extended to the next business day.

SECTION 6: CLAIMS FILING

CPT ONLY - COPYRIGHT 2010 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.
6.2 TMHP Electronic Claims Submission

TMHP uses the HIPAA-compliant American National Standards Institute (ANSI) ASC X12 4010A file format through secure socket layer (SSL) and virtual private networking (VPN) connections for maximum security.

Claims may be submitted electronically to TMHP through TexMedConnect on the TMHP website at www.tmhp.com or through billing agents who interface directly with the TMHP EDI Gateway.

Providers must retain all claim and file transmission records. They may be required to submit them for pending research on missing claims or appeals.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information).

6.2.1 Benefit and Taxonomy Codes

Providers that submit electronic claims are required to submit new data fields. The Benefit Code field (when applicable), Address field, and Taxonomy Code field must be completed before submitting electronic claims.

Taxonomy codes do not affect pricing or the level of pricing, but rather are used to crosswalk the NPI to a TPI. It is critical that the taxonomy code selected as the primary or secondary taxonomy code during a providers enrollment with TMHP is included on all electronic transactions.

Group billing providers are not required to submit a taxonomy code on all electronic claims.

Billing providers that are not associated with a group are required to submit a taxonomy code on all electronic claims. TMHP will reject claims for non-group billing providers (individuals and facilities) that are submitted without a taxonomy code.

Medicare does not require a taxonomy code for Part B claims. Therefore, some claims submitted to TMHP from Medicare for payment of coinsurance and deductible may not include the taxonomy code needed for accurate processing by TMHP.

6.2.2 Electronic Claim Acceptance

Providers should verify that their electronic claims were accepted by Texas Medicaid for payment consideration by referring to their Claim Response report, which is in the 27S batch response file (e.g., file name E085LDS1.27S). Providers should also check their Accepted and Rejected reports in the rej and acc batch response files (e.g., E085LDS1.REJ and E085LDS1.ACC) for additional information. Only claims that have been accepted on the Claim Response report (27S file) will be considered for payment and made available for claim status inquiry. Claims that are rejected must be corrected and resubmitted for payment consideration.

Refer to: Subsection 3.2, “Electronic Billing” in Section 3, “TMHP Electronic Data Interchange (EDI)” (Vol. 1, General Information), visit www.tmhp.com, or call the EDI Help Desk at 1-888-863-3638 for more information about electronic claims submissions.

6.2.3 Electronic Rejections

The most common reasons for electronic professional claim rejections are:

- Client information does not match. Client information does not match the PCN on the TMHP eligibility file. The name, date of birth, sex, and nine-digit Medicaid identification number must be an exact match with the client’s identification number on TMHP’s eligibility record. If using TexMedConnect, send an interactive eligibility request to obtain an exact match with TMHP’s record. If not using TexMedConnect, verify through the TMHP website or call AIS at 1-800-925-9126 to verify client information. A lack of complete client eligibility information causes a rejection and possibly delayed payment. To prevent delays when submitting claims electronically:
  - Always include the first and last name of the client on the claim in the appropriate fields.
• Always enter the client’s complete, valid nine-digit Medicaid number. Valid Medicaid numbers begin with 1, 2, 3, 4, or 5. CSHCN client numbers begin with a 9.

• When submitting claims for newborns, use the guidelines in the following section.

• *Referring/Ordering Physician field blank or invalid.* The referring physician’s NPI must be present when billing for consultations, laboratory, or radiology. Consult the software vendor for this field’s location on the electronic claims entry form.

• *Performing Physician ID field blank or invalid.* When the billing provider identifier is a group practice, the performing provider identifier for the physician who performed the service must be entered. Consult the software vendor for this field’s location on the electronic claim form.

• *Facility Provider field blank or invalid.* When place of service (POS) is anywhere other than home or office, the facility’s provider identifier must be present. If the provider identifier is not known, enter the name and address of the facility. Consult the software vendor for this field’s location on the electronic claims entry form.

• *Invalid Type of Service or Invalid Type of Service/Procedure code combination.* In certain cases some procedure codes will require a modifier to denote the procedure’s type of service (TOS).

  Note: The C21 claims processing system can accept only 40 characters (including spaces) in the Comments section of electronic submissions for ambulance and dental claims. If providers include more than 40 characters in that field, C21 will accept only the first 40 characters; the other characters will not be imported into C21. Providers must ensure that all of the information that is required for the claim to process appropriately is included in the first 40 characters.

  Refer to: Subsection 6.2.6, “Modifier Requirements for TOS Assignment” in this section for TMHP EDI modifier information.

### 6.2.3.1 Newborn Claim Hints

The following are to be used for newborns:

• If the mother’s name is “Jane Jones,” use “Boy Jane Jones” for a male child and “Girl Jane Jones” for a female child.

• Enter “Boy Jane” or “Girl Jane” in first name field and “Jones” in last name field. Always use “boy” or “girl” first and then the mother’s full name. An exact match must be submitted for the claim to process.

• Do not use “NBM” for newborn male or “NBF” for newborn female.

The following are the most common reasons for electronic hospital UB-04 CMS-1450 claim rejections:

• *Admit hour outside allowable range* (such as 24 hours).

• *Billed amount blank.*

• *Health coverage ID blank or invalid.* This number must be the valid nine-digit Medicaid client number. Incorrect data includes: a number less than nine digits; PENDING; 999999999; and Unknown.

• *Referring physician information on outpatient claim is blank* when laboratory/radiology services are ordered or a surgical procedure is performed. The referring physician’s NPI is required in Fields 78–79. Consult the software vendor for the location of this field on the electronic claims entry form.

Refer to: Subsection 8.6, “PCCM” in Section 8, “Managed Care” (Vol. 1, General Information)
6.2.4 TMHP EDI Batch Numbers, Julian Dates

All electronic transactions are assigned an eight-character Batch ID immediately upon receipt by the TMHP EDI Gateway. The batch ID format allows electronic submitters to determine the exact day and year that a batch was received. The batch ID format is JJJYSSSS, where each character is defined as follows:

- **JJJ** – *Julian date*. The three J characters represent the Julian date that the file was received by the TMHP EDI Gateway. The first character (J) is displayed as a letter, where E = 0, F = 1, G = 2, and H = 3. The last two characters (JJ) are displayed as numbers. All three characters (JJJ) together represent the Julian date. For example, a Julian date of 143 would be F43.

- **Y** – *Year*. The Y character represents the last digit of the calendar year when the TMHP EDI Gateway receives the file. For example, a “1” in this position indicates the year 2011.

- **SSSS** = The unique 4-character sequence number assigned by EDI to the claim filed.

6.2.5 TMHP Paper Claims Submission

All paper claims must be submitted with a TPI and NPI for the billing and performing providers. All other provider fields on the claim forms require an NPI only. If an NPI and TPI are not included in the billing and performing provider fields, or if an NPI is not included on all other provider identifier fields, the claim will be denied.

6.2.6 Modifier Requirements for TOS Assignment

Modifiers for TOS assignment are *not* required for Texas Health Steps (THSteps) Dental claims (claim type 021), Inpatient Hospital claims (claim type 040), or Medicare Crossover claims (claim types 030, 031, 050). Additionally, procedures submitted by specific provider types such as genetics, eyeglass, and THSteps medical are assigned the appropriate TOS based on the provider type or specific procedure code, and will not require modifiers.

Most procedure codes do not require a modifier for TOS assignment, but modifiers *are* required for *some* services submitted on professional claims (claim type 020) and outpatient hospital claims (claim type 023). Services that require a modifier for TOS assignment are listed below.

6.2.6.1 Assistant Surgery

For assistant surgical procedures, use one of the following modifiers: 80, 81, 82, and AS. Using these modifiers results in TOS 8 being assigned to the procedure.

6.2.6.2 Anesthesia

For anesthesia procedures, use one of the following modifiers: AA, AD, QK, QS, QX, QY, and QZ. Using these modifiers results in TOS 7 being assigned to the procedure.

6.2.6.3 Interpretations

For interpretations or professional components of laboratory, radiology, or radiation therapy procedures, use modifier 26. Using modifier 26 results in TOS I being assigned to the procedure.

6.2.6.4 Technical Components

For technical components of laboratory, radiology, or radiation therapy procedures, use modifier TC. Using this modifier results in TOS T being assigned to the procedure.

*Exception:* Outpatient hospitals do not include the TC modifier when they provide technical components of lab and radiology services. These services automatically have TOS 4 or 5 assigned and are subject to the facility’s interim reimbursement rate or the clinical lab rate.
Additionally, the following procedure codes do not require a modifier for TOS assignment and are processed automatically as a technical component with a TOS T:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>77401 77402 77403 77404 77406 77407 77408 77409 77411 77412</td>
</tr>
<tr>
<td>77413 77414 77416 77417 93005 93017 93041 93225 93226 93721</td>
</tr>
</tbody>
</table>

### 6.2.7 Preferred Provider Organization (PPO)

PPO discounts are not considered a part of other insurance payments. Electronic submitters must supply the PPO discount amount when submitting other insurance information; however, this information is not included in the total other insurance payment during claims processing. Paper submitters are not required to add the PPO discount to the other insurance payment.

### 6.3 Coding

Electronic billers must code all claims. TMHP encourages all providers to code their paper claims. Claims are processed fast and accurately if providers furnish appropriate information. By coding claims, providers ensure precise and concise representation of the services provided and are assured reimbursement based on the correct code. If providers code claims, a narrative description is not required and does not need to be included unless the code is a not otherwise classified code.

**Important:** Claims for anesthesia must have the Current Procedural Terminology (CPT) anesthesia procedure code narrative descriptions or CPT surgical codes; if these codes are not included, the claim will be denied.

The carrier for the Texas Medicare Program has coding manuals available for physicians and suppliers with codes not available in CPT. To order a CPT Coding Manual, write to the following address:

American Medical Association  
Book and Pamphlet Fulfillment  
PO Box 2964  
Milwaukee, WI 53201

### 6.3.1 Diagnosis Coding

Texas Medicaid requires providers to provide *International Classification of Diseases, Ninth Revision, Clinical Modification* (ICD-9-CM) diagnosis codes on their claims. The only diagnosis coding structure accepted by Texas Medicaid is the ICD-9-CM. Diagnosis codes must be to the highest level of specificity available. In most cases a written description of the diagnosis is not required. ICD-9-CM codes for external causes of injury and poisoning (E codes) and morphology of neoplasms (M codes) are not valid as a primary diagnosis.

All V-codes are acceptable as diagnoses except the following nonspecific codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>V0381 V0382 V0389 V039 V040 V041 V042 V043 V044 V045</td>
</tr>
<tr>
<td>V046 V047 V048 V0481 V0482 V0489 V050 V051 V052 V053</td>
</tr>
<tr>
<td>V054 V056 V060 V061 V062 V063 V064 V065 V066</td>
</tr>
<tr>
<td>V068 V069 V070 V071 V078 V079 V1200 V1201 V1202 V1203</td>
</tr>
<tr>
<td>V1209 V121 V122 V1260 V1261 V1269 V1270 V1271 V1272 V1279</td>
</tr>
<tr>
<td>V1300 V1321 V1329 V133 V134 V1361 V1369 V137 V138 V139</td>
</tr>
<tr>
<td>V140 V141 V142 V143 V144 V145 V146 V147 V148 V149</td>
</tr>
<tr>
<td>V1501 V1502 V1503 V1504 V1505 V1506 V1507 V1508 V1509 V1541</td>
</tr>
</tbody>
</table>
These nonspecific codes can be used for a general description but may not be referenced to a specific procedure code. Generally, V-codes are supplementary and are used only when the client’s condition cannot be classified to categories 001 through 999. The use of observation diagnosis code V717 results in claim denial with explanation of benefits (EOB) 00543, "Documentation insufficient to verify medical necessity. Resubmit the claim with signed claim copy, R&S Report copy, and complete documentation of medical necessity."

Independent laboratories, pathologists, and radiologists are not required to provide diagnosis codes unless otherwise stated in other sections of this manual.

### 6.3.1.1 Place of Service (POS) Coding

The POS identifies where services are performed. Indicate the POS by using the appropriate code for each service identified on the claim.

<table>
<thead>
<tr>

**Note:** Family planning and THSteps medical services performed in a rural health clinic (RHC) are billed using national POS code 72.

### 6.3.2 Type of Service (TOS)

The TOS identifies the specific field or specialty of services provided.

To determine the TOS payable for each procedure code, providers may refer to the online fee lookup (OFL) or the static fee schedules, both are available on the TMHP website at www.tmhp.com.

**Refer to:** Subsection 6.2.6, “Modifier Requirements for TOS Assignment” in this section for TMHP EDI modifier information.

#### 6.3.2.1 TOS Table

**Important:** TOS codes are not used for claim submissions, but they do appear on Re&S Reports.

6.3.3 Procedure Coding

The procedure coding system used by Texas Medicaid is called the Healthcare Common Procedure Coding System (HCPCS). HCPCS provides health-care providers and third party payers a common coding structure that is designed around a five-character numeric or alphanumeric base for all codes.

HCPCS consists of two levels of codes including the Current Procedural Terminology (CPT®) Professional Edition (Level I) and the HCPCS codes approved and released by CMS (Level II).

At the beginning of each year, TMHP applies the annual HCPCS additions, changes, and deletions that include the program and coding changes related to the annual HCPCS, Current Dental Terminology (CDT), and CPT updates. These updates ensure an up-to-date coding structure by using the latest edition of the CPT and nationally established HCPCS codes released by CMS. Scheduled updates are announced in Medicaid bi-monthly bulletins.

Most added procedure codes that are not directly replacing a discontinued procedure code must go through the rate hearing process, as required by Chapter 32 of the Human Resources Code, §32.0282, and Title 1 of the Texas Administrative Code, §355.201, which require public hearings to receive comments on Texas Medicaid payment rates. The two levels of codes are as follows:

### 6.3.3.1 Level I

**CPT® Professional Edition:**

- All numeric—consist of five digits
- Represent 80 percent of HCPCS
- Maintenance—responsibility of the AMA, which updates annually
- Updates by the AMA are coordinated with CMS before their distribution of modifications to third party payers
- Anesthesia codes from CPT

</table>
6.3.3.2 Level II

HCPCS codes:

- Approved and released by CMS
- Codes for both physician and non-physician services not contained in CPT (for example, ambulance, DME, prosthetics, and some medical codes)
- Updating: Responsibility of the CMS Maintenance Task Force
- All alphanumeric consisting of a single alpha character (A through V) followed by four numeric digits
- The single alpha character represents the following:

<table>
<thead>

</tbody>
</table>

6.3.3.3 Rate Hearings

All of the new procedure codes are adopted in accordance with CMS effective dates. Added procedure codes that are not directly replacing a discontinued procedure code must go through the rate hearing process. Health and Human Services Commission (HHSC) conducts public rate hearings to provide an opportunity for the provider community to comment on the Medicaid proposed payment rate.

Services provided before the rates are adopted through the rate hearing process are denied as pending a rate hearing (EOB 02008) until the applicable reimbursement rate is adopted. The client cannot be billed for these services. Providers are responsible for meeting the initial 95-day filing deadline. Once the reimbursement rates are established in the rate hearing and applied, TMHP will reprocess claims, and no further action on the part of the provider is necessary.

Providers must submit the procedure codes that are most appropriate for the services provided, even if the procedure codes have not yet completed the rate hearing process and are denied by Texas Medicaid as pending a rate hearing.

Authorization guidelines for procedure codes awaiting a rate hearing are available in subsection 5.10, “Guidelines for Procedures Awaiting Rate Hearing” in Section 5, “Prior Authorization” (Vol. 1, General Information).
6.3.4 National Drug Code (NDC)

The NDC is an 11-digit number on the package or container from which the medication is administered. All Texas Medicaid fee-for-service, PCCM, and Family Planning providers must submit an NDC for professional or outpatient claims submitted with physician-administered prescription drug procedure. Codes in the A code series do not require an NDC.

N4 must be entered before the NDC on claims.

The unit of measurement codes can also be submitted, however, are not required. The codes to be used for all claim forms are:

- F2 – International unit
- GR – Gram
- ML – Milliliter
- UN – Unit

Unit quantities can also be submitted, however, are not required.

Depending on the claim type, the NDC information must be submitted as indicated below for paper claims, or the equivalent electronic field:

**UB-04 CMS 1450**

</tr>
</tbody>
</table>
The Drugs Requiring NDC for Texas Medicaid Reimbursement list is available on the TMHP website at www.tmhp.com. The list contains those physician-administered, multiple-source drugs that the U.S. Secretary of Health and Human Services has determined to have the highest dollar volume of physician-administered drugs that are dispensed through Medicaid.

**6.3.5 Modifiers**

Modifiers describe and qualify the services provided by Texas Medicaid. A modifier is placed after the five-digit procedure code. Up to two modifiers may apply per service. Examples of frequently used modifiers are listed in the following table. Refer to the service-specific sections for additional modifier requirements.

<table>
<thead>
<tr>

<td>FP+</td>
<td>Use to indicate that the service was part of an annual family planning examination.</td>
</tr>
</tbody>
</table>

* Modifier is required for accurate claims processing.  
* Description is defined by the state.
## SECTION 6: CLAIMS FILING

### TH+
Use with external causes of injury and poisoning (E Codes) procedures and morphology of neoplasms (M Codes) procedures to specify antepartum or postpartum care.

### 25
Use to describe circumstances in which an office visit was provided at the same time as other separately identifiable services.

### Anesthesia

One of the following modifier combinations must be used by anesthesiologists directing non-CRNA qualified professionals.

<table>
<thead>
<tr>
<th>Modifier</th>
<th>Special Instructions/Notes (if applicable)</th>
</tr>
</thead>
<tbody>
<tr>
<td>AA and U1</td>
<td>Use to indicate that the anesthesia services were performed personally by the anesthesiologist.</td>
</tr>
<tr>
<td>AD and U1 (Emergency circumstances only)</td>
<td>Use when directing five or more concurrent procedures provided by non-CRNA qualified professionals. Used in emergency circumstances only and limited to 6 units (90 minutes) per case for each occurrence requiring five or more concurrent procedures.</td>
</tr>
<tr>
<td>QK and U1</td>
<td>Use when directing two, three, or four concurrent procedures provided by non-CRNA qualified professionals.</td>
</tr>
<tr>
<td>QY and U1</td>
<td>Use when directing one procedure provided by a non-CRNA qualified professional.</td>
</tr>
</tbody>
</table>

One of the following modifier combinations must be used by anesthesiologists directing CRNAs.

<table>
<thead>
<tr>
<th>Modifier</th>
<th>Special Instructions/Notes (if applicable)</th>
</tr>
</thead>
<tbody>
<tr>
<td>AD and U2 (Emergency circumstances only)</td>
<td>Use when directing five or more concurrent procedures involving CRNA(s). Used in emergency circumstances only and limited to 6 units (90 minutes) per case for each occurrence requiring five or more concurrent procedures.</td>
</tr>
<tr>
<td>QK and U2</td>
<td>Use when directing two, three, or four concurrent procedures involving CRNAs.</td>
</tr>
<tr>
<td>QY and U2</td>
<td>Use when directing one procedure involving a CRNA.</td>
</tr>
</tbody>
</table>

One of the following modifier combinations must be used by CRNAs.

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

### FQHC and RHC

Services provided by a health-care professional require one of the following modifiers:

<table>
<thead>
<tr>
<th>Modifier</th>
<th>Special Instructions/Notes (if applicable)</th>
</tr>
</thead>
<tbody>
<tr>
<td>AH</td>
<td>Use to indicate that the services were performed by a clinical psychologist.</td>
</tr>
<tr>
<td>AJ</td>
<td>Use to indicate that the services were performed by a clinical social worker.</td>
</tr>
<tr>
<td>AM</td>
<td>Use to indicate that the services were performed by a physician or team member service (includes clinical psychiatrist).</td>
</tr>
<tr>
<td>SA</td>
<td>Use to indicate that the services were performed by an advanced practice nurse (APN) or CNM rendering services in collaboration with a physician.</td>
</tr>
<tr>
<td>TD</td>
<td>For home services performed by a RN and provided in areas with a shortage of home health agencies.</td>
</tr>
<tr>
<td>TE</td>
<td>For home services performed by an LVN and provided in areas with a shortage of home health agencies.</td>
</tr>
<tr>
<td>TS</td>
<td>Use to indicate a case management follow-up service</td>
</tr>
<tr>
<td>U1</td>
<td>Licensed professional counselor</td>
</tr>
<tr>
<td>U2</td>
<td>Licensed marriage and family therapist</td>
</tr>
<tr>
<td>U7*</td>
<td>Physician assistant services for other than assistant at surgery</td>
</tr>
</tbody>
</table>

+ Modifier is required for accurate claims processing.

* Description is defined by the state.
The following modifiers may be used in addition to the modifier identifying the health-care professional that rendered the service:

<table>
<thead>
<tr>
<th>Modifier</th>
<th>Special Instructions/Notes (if applicable)</th>
</tr>
</thead>
<tbody>
<tr>
<td>EP</td>
<td>Use to indicate THSteps services (FQHC only).</td>
</tr>
<tr>
<td>FP</td>
<td>Use to indicate that the service was part of an annual family planning examination.</td>
</tr>
<tr>
<td>TH</td>
<td>Use to indicate the encounter is for antepartum care or postpartum care.</td>
</tr>
<tr>
<td>TU</td>
<td>For services provided outside of normal business hours to a client enrolled in the PCCM program.</td>
</tr>
<tr>
<td>U5*</td>
<td>State-defined modifier for use with case management services.</td>
</tr>
</tbody>
</table>

### Abortion

| G7       | Use by performing physicians, facilities, anesthesiologists, and CRNAs (with appropriate procedure code) when requesting reimbursement for abortion procedures that are within the scope of the rules and regulations of Texas Medicaid. |

### Vision

| RB       | Use modifier RB to indicate replacement of prosthetic or nonprosthetic eyeglasses or contact lenses. |
| VP+      | Use when billing prosthetic eyeglasses or contact lenses with a diagnosis of aphakia. |

### Laboratory/Radiology

| 26+      | Use for laboratory interpretations and radiological procedures. |
| 91+      | Use for repeat laboratory clinical test. |
| 76       | Use for repeat laboratory nonclinical test. |
| SU+      | Indicates necessary equipment is in physician’s office for RAST/MAST testing or Pap smears. |
| TC+      | The modifier TC is used for technical radiological procedures. |
| Q4+      | Use for lab/radiology/ultrasound interps by other than the attending physician. |

### Therapy

| AT+      | Must be used to indicate the necessity of an acute condition for occupational therapy (OT), physical therapy (PT), osteopathic manipulation treatment (OMT), or chiropractic services. |
| GN       | Use to indicate outpatient speech language pathology. |
| GO       | Use to indicate outpatient occupational therapy. |
| GP       | Use to indicate outpatient PT. |
| U4*      | Reassessment |

### THSteps Medical

| AM       | Physician, team member service |
| EP       | FQHCs must use modifier EP for services provided under THSteps. |
| SA       | Nurse practitioner rendering service in collaboration with a physician |
| U5*      | Intermediate oral examination with dental varnish |
| U7*      | Physician assistant services for other than assistant at surgery |
| TD       | Registered nurse |

### THSteps Exceptions to Periodicity

| SC       | Medically necessary service or supply |

+ Modifier is required for accurate claims processing.
* Description is defined by the state.
The following modifiers may appear on R&S Reports (they are not entered by the provider):

- **PT.** The DRG payment was calculated on a per diem basis for an inpatient stay because of patient transfer.
- **PS.** The DRG payment was calculated on a per diem basis because the patient exhausted the 30-day inpatient benefit limitation during the stay.
- **PE.** The DRG payment was calculated on a per diem basis because the patient was ineligible for Medicaid during part of the stay. Also used to adjudicate claims with adjustments to outlier payments.

### 6.3.6 Benefit Code

A benefit code is an additional data element used to identify state programs.
Providers that participate in the following programs must use the associated benefit code when submitting claims and authorizations:

<table>
<thead>
<tr>
<th>Program</th>
<th>Benefit Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>Comprehensive Care Program (CCP)</td>
<td>CCP</td>
</tr>
<tr>
<td>THSteps Medical</td>
<td>EP1</td>
</tr>
<tr>
<td>THSteps Dental</td>
<td>DE1</td>
</tr>
<tr>
<td>Family Planning Agencies*</td>
<td>FP3</td>
</tr>
<tr>
<td>Hearing Aid Dispensers</td>
<td>HA1</td>
</tr>
<tr>
<td>Maternity</td>
<td>MA1</td>
</tr>
<tr>
<td>County Indigent Health Care Program</td>
<td>CA1</td>
</tr>
<tr>
<td>Early Childhood Intervention (ECI) Providers</td>
<td>ECI</td>
</tr>
<tr>
<td>Tuberculosis (TB) Clinics</td>
<td>TB1</td>
</tr>
<tr>
<td>Texas Medicaid Program Home Health DME</td>
<td>DM2</td>
</tr>
<tr>
<td>Case management mental retardation (MR) providers</td>
<td>MH2</td>
</tr>
</tbody>
</table>

*Agencies only—Benefit codes should not be used for individual family planning providers.

### 6.4 Claims Filing Instructions

This section contains instructions for completion of Medicaid-required claim forms. When filing a claim, providers should review the instructions carefully and complete all requested information. A correctly completed claim form is processed faster.

This section provides a sample claim form and its corresponding instruction table for each acceptable Texas Medicaid claim form.

All providers, except those on prepayment review, should submit paper claims to TMHP to the following address:

Texas Medicaid & Healthcare Partnership
Claims
PO Box 200555
Austin, TX 78720-0555

Providers on prepayment review must submit all paper claims and supporting medical record documentation to the following address:

Texas Medicaid & Healthcare Partnership
Attention: Prepayment Review MC–A11 SURS
P.O. Box 203638
Austin, TX 78720-3638

### 6.4.1 Claim Form Requirements

When filing claims for a STAR or STAR+PLUS Program members, providers should follow the client’s STAR or STAR+PLUS health plan’s claim filing requirements.

The Patient Protection and Affordable Care Act (PPACA) mandates that all claims submitted to TMHP be filed in accordance with the National Correct Coding Initiative (NCCI) guidelines. These guidelines can be found in the NCCI Policy and Medicare Claims Processing Manuals on the CMS website at www.cms.gov/NationalCorrectCodInitEd/.
6.4.1.1 Provider Signature on Claims

Each CMS-1500, 2006 American Dental Association (ADA), and Family Planning 2017 paper claim form submitted must have the handwritten signature (or signature stamp) of the provider or an authorized representative in the appropriate block of the claim form. Signatory supervision of the authorized representative is required. Providers delegating signature authority to a member of the office staff or to a billing service remain responsible for the accuracy of all information on a claim submitted for payment. Initials are only acceptable for first and middle names. The last name must be spelled out. An acceptable example is J.A. Smith for John Adam Smith. An unacceptable example is J.A.S. for John Adam Smith. Typewritten names must be accompanied by a handwritten signature; in other words, a typewritten name with signed initials is not acceptable. The signature must be contained within the appropriate block of the claim form. Claims prepared by computer billing services or office-based computers may have “Signature on File” printed in the signature block, but it must be in the same font that is used in the rest of the form. For claims prepared by a billing service, the billing service must retain a letter on file from the provider authorizing the service.

Printing the provider’s name instead of “Signature on File” is unacceptable. Because space is limited in the signature block, providers should not type their names in the block. Claims not meeting these specifications appear in the “Paid or Denied Claims” sections of the R&S Reports.

6.4.1.2 Group Providers

Providers billing as a group must give the performing provider identifier on their claims as well as the group provider identifier.

6.4.1.3 Prior Authorization Numbers on Claims

Claims filed to TMHP must contain only one prior authorization number per claim. Prior authorization numbers must be indicated on the appropriate electronic field, or on the paper claim forms as indicated below:

- CMS-1500—Block 23
- UB-04 CMS-1450—Block 63
- ADA—Block 2
- Family Planning—Block 30

6.4.1.4 Newborn Clients Without Medicaid Numbers

If a Medicaid eligible newborn has not been assigned a Medicaid number on the DOS, the provider must wait until a Medicaid client number is assigned to file the claim. The provider writes the number instead of “Pending.” The 95-day filing period begins on the “add date,” which is the date the eligibility is received and added to the TMHP eligibility file. Providers verify eligibility and add date through TexMedConnect or by calling AIS or the TMHP Contact Center at 1-800-925-9126 after the number is received.

Providers must check Medicaid eligibility regularly to file claims within the required 95-day filing deadline.

Refer to: Section 4: Client Eligibility (Vol. 1, General Information).

6.4.1.5 Multipage Claim Forms

6.4.1.5.1 Professional Claims

The approved electronic claims format is designed to list 50 line items. The total number of details allowed for a professional claim by the TMHP claims processing system (C21) is 28. If the services provided exceed 28 line items on an approved electronic claims format or 28 line items on paper claims, the provider must submit another claim for the additional line items.
The CMS-1500 paper claim form is designed to list six line items in Block 24. If more than six line items are billed on a paper claim, a provider may attach additional forms (pages) totaling no more than 28 line items. The first page of a multipage claim must contain all the required billing information. On subsequent pages of the multipage claim, the provider should identify the client’s name, diagnosis, information required for services in Block 24, and the page number of the attachment (for example, page 2 of 3) in the top right-hand corner of the form and indicate “continued” in Block 28. The combined total charges for all pages should be listed on the last page in Block 28.

### 6.4.1.5.2 Institutional Claims

The total number of details allowed for an institutional claim by the TMHP claims processing system (C21) is 28. C21 merges like revenue codes together to reduce the lines to 28 or less. If the C21 merge function is unable to reduce the lines to 28 or less, the claim will be denied, and the provider will need to reduce the number of details and resubmit the claim.

An EDI approved electronic format of the UB-04 CMS-1450 is designed to list 61 lines. C21 merges like revenue codes together to reduce the lines to 28 or less.

Providers submitting electronic claims using TexMedConnect may not submit more than 28 lines. If the services exceed the 28 lines, the provider may submit another claim for the additional lines or merge codes.

The paper UB-04 CMS-1450 is designed to list 23 lines in Block 43. If services exceed the 23-line limitation, the provider may attach additional pages. The first page of a multipage claim must contain all required billing information. On subsequent pages, the provider identifies the client’s name, diagnosis, all information required in Block 43, and the page number of the attachment (e.g., page 2 of 3) in the top right-hand corner of the form and indicate “continued” on Line 23 of Block 47. The combined total charges for all pages should be listed on the last page on Line 23 of Block 47.

**Note:** Each surgical procedure code listed in Block 74 of the claim form is counted as one detail and is included in the 28-detail limitation.

When splitting a claim, all pages must contain the required information. Usually, there are logical breaks to a claim. For example, the provider may submit the surgery charges in one claim and the subsequent recovery days in the next claim.

TEFRA hospitals are required to submit all charges.

### 6.4.1.5.3 Inpatient Hospital Claims

Medicaid present-on-admission (POA) reporting is required for all inpatient hospital claims that are paid under prospective payment basis methodology with the exception of the following facilities that Medicare exempts or are paid for by TEFRA methodology. These facilities include:

- Critical access hospitals (CAH)
- Cancer hospitals
- Children’s inpatient facilities
- State-owned teaching facilities
- RHCs
- Federally qualified health centers (FQHCs)
- Religious nonmedical health-care institutions
- Inpatient psychiatric hospitals and institutes for mental disease (IMD)
- Inpatient rehabilitation facilities (IRF)
- Military hospitals
A POA value must be submitted for each diagnosis on the claim form. Claims submitted without POA are rejected unless the facility is exempt from POA reporting.

POA values are:

<table>
<thead>
<tr>
<th>POA Value</th>
<th>Description</th>
<th>Payment</th>

<td>Exempt from POA reporting</td>
</tr>
</tbody>
</table>

Depending on the POA indicator value, the DRG may be recalculated, which could result in a lower payment to the hospital facility provider. If the number of days on an authorization is higher than the number of days allowed as a result of a POA DRG recalculation, the lesser of the number of days is reimbursed.

### 6.4.1.6 Attachments to Claims

To expedite claims processing, providers must supply all information on the claim form itself and limit attachments to those required by TMHP or necessary to supply information to properly adjudicate the claim. The following claim form attachments are required when appropriate:

- All claims for services associated with an elective sterilization must have a valid Sterilization Consent Form attached or on file at TMHP.
- Nonemergency ambulance transfers must have documentation of medical necessity including out-of-locality transfers.
- Providers filing for coinsurance, deductible, or both on Medicare claims to TMHP must attach the paper MRAN received from Medicare or a Medicare intermediary, the computer generated MRANs from the CMS-approved software applications MREP for professional services or PC-Print for institutional services, or the TMHP Standardized MRAN form. Providers that submit paper crossover claims must submit only one of the approved MRAN formats. Paper crossover claims submitted with multiple MRAN forms (e.g., TMHP Standardized MRAN Forms and any other MRAN) with conflicting information will not be processed and will be returned to the provider. This requirement does not apply to claims transferred automatically to TMHP from the Medicare intermediary.
- Medically necessary abortions performed (on the basis of a physician’s professional judgement, the life of the mother is endangered if the fetus were carried to term), or abortions provided for pregnancy related to rape or incest must have a signed and dated physician certification statement. Elective abortions are not benefits of Texas Medicaid.
- Hysterectomies must have a Hysterectomy Acknowledgment Statement attached or on file at TMHP.

### 6.4.1.7 Clients with a Designated or Primary Care Provider

Claims for clients with a primary care provider or designated provider (i.e., managed care clients or Limited Program clients) must indicate the primary care provider or designated provider identifiers in the billing or performing provider fields.
When clients receive services from a different provider, such as a specialist, the primary care provider or designated provider's information must be included in the referring provider fields on the claim.

### 6.5 CMS-1500 Paper Claim Filing Instructions

The following providers bill for services using the ANSI ASC X12 837P 4010A electronic specifications or the CMS-1500 paper claim form:

<table>
<thead>
<tr>

<tr>
<td>Psychologist</td>
</tr>
</tbody>
</table>
Providers obtain copies of the CMS-1500 paper claim form from a vendor of their choice; TMHP does not supply them.

### 6.5.1 CMS-1500 Electronic Billing

Electronic billers must submit CMS-1500 paper claim forms with TexMedConnect or approved vendor software that uses the ANSI ASC X12 837P 4010A format. Specifications are available to providers developing in-house systems, software developers, and vendors on the TMHP website at www.tmhp.com/Pages/EDI/EDI_Technical_Info.aspx. Because each software developer is different, location of fields may vary. Contact the software developer or vendor for this information. Direct questions and development requirements to the TMHP EDI Help Desk at 1-888-863-3638.

### 6.5.2 CMS-1500 Claim Form (Paper) Billing

Claims must contain the billing provider’s complete name, address, and a provider identifier. Claims without a provider name, address, and provider identifier cannot be processed. Each claim form must have the appropriate signatory evidence in the signature certification block.

Important: When completing a CMS-1500 paper claim form, all required information must be included on the claim in the appropriate block. Information is not keyed from attachments. Superbills or itemized statements are not accepted as claim supplements.

**NUCC INSTRUCTION MANUAL**

[www.nucc.org]
6.5.4 CMS-1500 Provider Definitions

The following definitions apply to the provider terms used on the CMS-1500 paper claim form:

**Referring Provider**
The referring provider is the individual who directed the patient for care to the provider that rendered the services being submitted on the claim form.

Examples include, but are not limited to the following:
- A primary care provider referring to a specialist
- An orthodontist referring to an oral and maxillofacial surgeon
- A physician referring to a physical therapist
- A provider referring to a home health agency

**Ordering Provider**
The ordering provider is the individual who requested the services or items listed in Block D of the CMS-1500 paper claim form.

Examples include, but are not limited to, a provider ordering diagnostic tests, medical equipment, or supplies.

**Rendering Provider**
The rendering provider is the individual who provided the care to the client. In the case where a substitute provider was used, that individual is considered the rendering provider.

An individual such as a lab technician or radiology technician who performs services in a support role is not considered a rendering provider.

**Supervising Provider**
The supervising provider is the individual who provided oversight of the rendering provider and the services listed on the CMS-1500 paper claim form.

An example would be the supervision of a resident physician.

**Purchased Service Provider**
A purchased service provider is an individual or entity that performs a service on a contractual or reassignment basis.

Examples of services include the following:
- Processing a laboratory specimen
- Grinding eyeglass lenses to the specifications of the referring provider
- Performing diagnostic testing services (excluding clinical laboratory testing) subject to Medicare's antimarkup rule

In the case where a substitute provider is used, that individual is not considered a purchased service provider.
# 6.5.5 CMS-1500 Instruction Table

The instructions describe what information must be entered in each of the block numbers of the CMS-1500 paper claim form. Block numbers *not* referenced in the table may be left blank. They are *not* required for claim processing by TMHP.

<table>
<thead>
<tr>
<th>Block No.</th>
<th>Description</th>
<th>Guidelines</th>
</tr>
</thead>
<tbody>
<tr>
<td>1a</td>
<td>Insured’s ID No. (for program checked above, include all letters)</td>
<td>Enter the client’s nine-digit patient number from the Medicaid identification form. For other property &amp; casualty claims: Enter the Federal Tax ID or SSN of the insured person or entity.</td>
</tr>
<tr>
<td>2</td>
<td>Patient’s name</td>
<td>Enter the client’s last name, first name, and middle initial as printed on the Medicaid identification form. If the insured uses a last name suffix (e.g., Jr, Sr) enter it after the last name and before the first name.</td>
</tr>
<tr>
<td>3</td>
<td>Patient’s date of birth Patient’s sex</td>
<td>Enter numerically the month, day, and year (MM/DD/YYYY) the client was born. Indicate the client’s gender by checking the appropriate box. Only one box can be marked.</td>
</tr>
<tr>
<td>5</td>
<td>Patient’s address</td>
<td>Enter the client’s complete address as described (street, city, state, and ZIP code).</td>
</tr>
</tbody>
</table>
| 9         | Other insured’s name | For special situations, use this space to provide additional information such as:
- If the client is deceased, enter “DOD” in block 9 and the time of death in 9a if the services were rendered on the date of death. Enter the date of death in block 9b. |

| 10a 10b 10c | Is patient’s condition related to:
  a. Employment (current or previous)?
  b. Auto accident?
  c. Other accident? | Check the appropriate box. If other insurance is available, enter appropriate information in blocks 11, 11a, and 11b. |

| 11 11a 11b | Other health insurance coverage | • If another insurance resource has made payment or denied a claim, enter the name of the insurance company. The other insurance EOB or denial letter must be attached to the claim form.  
• If the client is enrolled in Medicare attach a copy of the Medicare Remittance Advice Notice (MRAN) to the claim form.  
• For Workers Compensation and other property and casualty claims: (Required if known) Enter Workers' Compensation or property and casualty claim number assigned by the payer. |
<p>| 11c | Insurance plan or program name | Enter the benefit code, if applicable, for the billing or performing provider. |</p>
<table>
<thead>
<tr>
<th>Block No.</th>
<th>Description</th>

### 6.6.1 UB-04 CMS-1450 Electronic Billing

Electronic billers must submit UB-04 CMS-1450 claims with TexMedConnect or approved vendor software that uses the ANSI ASC X12 837T 4010A format. Specifications are available to providers developing in-house systems and software developers and vendors. Because each software package is different, field locations may vary. Contact the software developer or vendor for this information. Direct questions and development requirements to the TMHP EDI Help Desk at 1-888-863-3638.

6.6.2 UB-04 CMS-1450 Claim Form (Paper) Billing
Providers obtain the UB-04 CMS-1450 paper claim forms from a vendor of their choice.

Note: To avoid claim denial, only the provider’s NPI should be placed in form locators 76-79 of the UB-04 CMS-1450 paper claim form or in the referring provider field on the electronic claim unless the client is a limited client.

Completed UB-04 CMS-1450 claims must contain the billing provider’s full name, address, and provider identifier. Claims without a provider name, address, and provider identifier cannot be processed.

Refer to: Subsection 6.6.4, “UB-04 CMS-1450 Instruction Table” in this section.

### 6.6.4 UB-04 CMS-1450 Instruction Table

The instructions describe what information must be entered in each of the block numbers of the UB-04 CMS-1450 paper claim form. Block numbers not referenced in the table may be left blank. They are not required for claim processing by TMHP.

<table>
<thead>
<tr>
<th>Block No.</th>

### Block No. Description Guidelines

<table>
<thead>
<tr>
<th>Block No.</th>
<th>Description</th>
<th>Guidelines</th>
</tr>
</thead>
</table>
| 39-41     | Value codes                              | Accident hour–For inpatient claims, if the patient was admitted as the result of an accident, enter value code 45 with the time of the accident using military time (00 to 23). Use code 99 if the time is unknown.  
For inpatient claims, enter value code 80 and the total days represented on this claim that are to be covered. Usually, this is the difference between the admission and discharge dates. In all circumstances, the number in this block is equal to the number of covered accommodation days listed in Block 46.  
For inpatient claims, enter value code 81 and the total days represented on this claim that are not covered.  
The sum of Blocks 39–41 must equal the total days billed as reflected in Block 6. |
| 42-43     | Revenue codes and description            | For inpatient hospital services, enter the description and revenue code for the total charges and each accommodation and ancillary provided. List accommodations in the order of occurrence.  
List ancillaries in ascending order. The space to the right of the dotted line is used for the accommodation rate.  
**NDC**  
Enter N4 and the 11-digit NDC number (number on packaged or container from which the medication was administered).  
Optional: The unit of measurement code and the unit quantity with a floating decimal for fractional units (limited to 3 digits) can also be submitted but they are not required.  
Do not enter hyphens or spaces within this number.  
**Example:** N400409231231GR0.025  
**Refer to:** Subsection 6.3.4, “National Drug Code (NDC)” in this section. |
| 44        | HCPCS/rates                              | **Inpatient:**  
Enter the accommodation rate per day.  
Match the appropriate diagnoses listed in Blocks 67A through 67Q corresponding to each procedure. If a procedure corresponds to more than one diagnosis, enter the primary diagnosis.  
Each service and supply must be itemized on the claim form.  
**Home Health Services**  
Outpatient claims must have the appropriate revenue code and, if appropriate, the corresponding HCPCS code or narrative description.  
**Outpatient:**  
Outpatient claims must have the appropriate Healthcare Common Procedure Coding System (HCPCS) code. |
Each service, except for medical/surgical and intravenous (IV) supplies and medication, must be itemized on the claim form or an attached statement.

**Note:** The UB-04 CMS-1450 paper claim form is limited to 28 items per outpatient claim. This limitation includes surgical procedures from Blocks 74 and 74a-e.

If necessary, combine IV supplies and central supplies on the charge detail and consider them to be single items with the appropriate quantities and total charges by dates of service. Multiple dates of service may not be combined on outpatient claims.

<table>
<thead>
<tr>
<th>Block No.</th>
<th>Description</th>
<th>Guidelines</th>

</tr>
<tr>
<td>76</td>
<td>Attending provider</td>
<td>Enter the attending provider name and identifiers. NPI number of the attending provider. Services that required an attending provider are defined as those listed in the ICD-9-CM coding manual volume 3, which includes surgical, diagnostic, or medical procedures.</td>
</tr>
<tr>
<td>77</td>
<td>Operating</td>
<td>Enter operating provider’s name (last name and first name) and NPI number of the operating provider.</td>
</tr>
</tbody>
</table>
6.6.5 Occurrence Codes

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
<th>Guidelines</th>
</tr>
</thead>
<tbody>
<tr>
<td>01</td>
<td>Auto accident/auto liability insurance involved</td>
<td>Enter the date of an auto accident. Use this code to report an auto accident that involves auto liability insurance requiring proof of fault.</td>
</tr>
</tbody>
</table>
### Code | Description | Guidelines
--- | --- | ---
02 | Auto or other accident/no fault involved | Enter the date of the accident including auto or other where no-fault coverage allows insurance immediate claim settlement without proof of fault. Use this code in conjunction with occurrence codes 24, 50, or 51 to document coordination of benefits with the no-fault insurer.
03 | Accident/tort liability | Enter the date of an accident (excluding automobile) resulting from a third party’s action. This incident may involve a civil court action in an attempt to require payment by the third party other than no-fault liability.  
**Refer to:** Subsection 4.11.6, “Third Party Liability - Tort” in Section 4, “Client Eligibility” (Vol. 1, General Information).
04 | Accident/employment-related | Enter the date of an accident that allegedly relates to the patient’s employment and involves compensation or employer liability. Use this code in conjunction with occurrence codes 24, 50, or 51 to document coordination of benefits with Workers’ Compensation insurance or an employer. Only services not covered by Workers’ Compensation may be considered for payment by Medicaid.
05 | Other accident | Enter the date of an accident not described by the above codes. Use this code to report no other casualty related payers have been determined.
06 | Crime victim | Enter the date on which a medical condition resulted from alleged criminal action.
10 | Last menstrual period | Enter the date of the last menstrual period when the service is maternity-related.
11 | Onset of symptoms | Indicate the date the patient first became aware of the symptoms or illness being treated.
16 | Date of last therapy | Indicate the last day of therapy services for OT, PT, or speech therapy (ST).
17 | Date outpatient OT plan established or last reviewed | Indicate the date a plan was established or last reviewed for occupation therapy.
24 | Date other insurance denied | Enter the date of denial of coverage by a TPR.
25 | Date benefits terminated by primary payer | Enter the last date for which benefits are being claimed.
27 | Date home health plan of treatment was established | Enter the date the current plan of treatment was established.
29 | Date outpatient PT plan established or last reviewed | Indicate the date a plan of treatment was established or last reviewed for physical therapy.
30 | Date outpatient speech pathology plan established or last reviewed | Indicate the date a plan of treatment for speech pathology was established or last reviewed.
35 | Date treatment started for PT | Indicate the date services were initiated for physical therapy.
44 | Date treatment started for OT | Indicate when occupational therapy services were initiated.

<td></td>
</tr>
<tr>
<td>66</td>
<td>Discharged/transferred to a critical access hospital (CAH)</td>
<td></td>
</tr>
</tbody>
</table>
6.6.7 Filing Tips for Outpatient Claims

The following are outpatient claim filing tips:

- Use HCPCS codes in Block 44 when available and give a narrative description in Block 43 for all services and supplies provided.

**Important:** Services and supplies that exceed the 28 items per claim limitation must be submitted on an additional UB-04 CMS-1450 paper claim form and will be assigned a different claim number by TMHP. Claims may have 61 detail lines for services and supplies plus one detail line for the total amount billed.

- Combine central supplies and bill as one item. IV supplies may be combined and billed as one item. Include appropriate quantities and total charges for each combined procedure code used. Using combination procedure codes conserves space on the claim form.

- The 28-item limitation per claim: a UB-04 CMS-1450 paper claim form submitted with 28 or fewer items is given an internal control number (ICN) by TMHP. Multipage claim forms are processed as one claim for that client if all pages contain 28 or fewer items.

- Itemized Statements: Itemized statements are not used for assignment of procedure codes. HCPCS codes or narrative descriptions of procedures must be reflected on the face of the UB-04 CMS-1450 paper claim form. Attachments will only be used for clarification purposes.

- PT/OT procedures are based on time (initial 30 minutes or additional 15 minutes). Use the quantity billed to reflect the number of additional 15-minute increments.

### Line Item | Description | Quantity
--- | --- | ---
#1 | Therapeutic exercise | 1
#2 | Additional 15 minutes | 2

Refer to: Subsection 6.3.3, “Procedure Coding” in this section.

6.7 2006 American Dental Association (ADA) Dental Claim Filing Instructions

Providers billing for dental services and intermediate care facility for persons with mental retardation (ICF-MR) dental services may bill electronically or use the 2006 ADA claim form.

**Note:** TMHP is responsible for reimbursing all THSteps dental services provided by dentists, including services rendered to STAR and STAR+PLUS clients.

6.7.1 2006 ADA Dental Claim Electronic Billing

Electronic billers must submit THSteps dental claims using TexMedConnect or an approved vendor software that uses the ANSI ASC X12 837D 4010A format. Specifications are available to providers developing in-house systems and software developers and vendors. Because each software package is different, block locations may vary. Contact the software developer or vendor for this information.

Direct questions and development requirements to the TMHP EDI Help Desk at 1-888-863-3638.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for more information about electronic filing.

6.7.2 ADA Dental Claim Form (Paper) Billing

All participating THSteps dental providers are required to submit a 2006 ADA Dental claim form for paper claim submissions to Texas Medicaid. These forms may be obtained by contacting the ADA at 1-800-947-4746.
Claims must contain the billing provider’s complete name, address and a provider identifier. Claims without a provider name, address, and provider identifier cannot be processed.

### 6.7.3 2006 ADA Dental Claim Form

Samples of the ADA Dental Claim form can be found on the ADA website at www.ada.org/3017.aspx?currentTab=2.

### 6.7.4 2006 ADA Dental Claim Form Instruction Table

The following table is an itemized description of the questions appearing on the form. Thoroughly complete the 2006 ADA Dental claim form according to the instructions in the table to facilitate prompt and accurate reimbursement and reduce follow-up inquiries.

<table>

<tr>
<td>Physician assistant (PA)</td>
</tr>
</tbody>
</table>

6.8.1 Family Planning Electronic Billing

Electronic billers must submit family planning claims with TexMedConnect or approved vendor software that uses the ANSI ASC X12 837P 4010A format. Specifications are available to providers developing in-house systems, software developers, and vendors on the TMHP website at www.tmhp.com/Pages/EDI/EDI_Technical_Info.aspx. Because each software developer is different, location of fields may vary. Contact the software developer or vendor for this information. Direct questions and development requirements to the TMHP EDI Help Desk at 1-888-863-3638.

6.9 Family Planning Claim Form (Paper Billing)

Claims must contain the billing providers complete name, address, and a provider identifier. Claims without a provider name, address, and provider identifier cannot be processed.

| 3         | Provider name                      | Enter the provider’s name as enrolled with TMHP.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | V, X IX, XX|
| 4         | Eligibility date (V or XX)         | Enter the date (MM/DD/CCYY) this client was originally designated eligible for Title V or XX services. If client has V or XX eligibility from a previous visit, enter that eligibility date.  
  For a Title XX client, this information comes from the 2025 claim form.  
  For a Title V client, this information comes from the Texas Eligibility Screening System (TESS).                                                                                                                                                                                                                                                                                                                                                                                                         | V, XX    |
| 5         | Family planning no.                | Enter the client’s nine-digit family planning number, which begins with “F.”  
  If the client has Title XIX Medicaid, enter the client’s nine-digit client number from the Medicaid Identification form.  
  If this is a new family planning client, without Medicaid, leave this block blank and TMHP will assign a family planning number for the client.                                                                                                                                                                                                                                                                                                                                                     | X IX     |
<p>| 6         | Patient’s name (last name, first name, middle initial) | Enter the client’s last name, first name, and middle initial as printed on the Medicaid Identification Form, if Title XIX, or as printed in the provider’s records, if Title V, X, or XX.                                                                                                                                                                                                                                                                                                                                                                                     | V, X IX, XX|
| 7         | Address (street, city, state)      | Enter the client’s complete home address as described by the client (street, city, and state). This reflects the location where the client lives.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | V, X IX, XX|
| 7a        | ZIP Code                           | Enter the client’s ZIP Code.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | V, X IX, XX|
| 8         | County of residence                | Enter the county code that corresponds to the client’s address. Please use the HHSC county codes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | V, X IX, XX|</p>
<table>
<thead>
<tr>
<th>Block No.</th>
<th>Description</th>
<th>Guidelines</th>
<th>Required</th>
</tr>
</thead>
<tbody>
<tr>
<td>9</td>
<td>Date of birth</td>
<td>Enter numerically the month, day, and year (MM/DD/CCYY) the client was born.</td>
<td>V, X, XIX, XX</td>
</tr>
<tr>
<td>10</td>
<td>Sex</td>
<td>Indicate the client’s gender by checking the appropriate box.</td>
<td>V, X, XIX, XX</td>
</tr>
<tr>
<td>11</td>
<td>Patient status</td>
<td>Indicate if this is the client’s first visit to this family planning provider (new patient) or if this client has been to this family planning provider previously (established patient). If the provider’s records have been purged and the client appears to be new to the provider, check “New Patient.”</td>
<td>V, X, XIX, XX</td>
</tr>
<tr>
<td>12</td>
<td>Patient’s Social Security number</td>
<td>Enter the client’s nine-digit Social Security number (SSN). If the client does not have a SSN, or refuses to provide the number, enter 000-00-0001.</td>
<td>V, X, XIX, XX</td>
</tr>
<tr>
<td>13</td>
<td>Race (code #)</td>
<td>Indicate the client’s race by entering the appropriate race code number in the box. Aggregate categories used here are consistent with reporting requirements of the Office of Management and Budget Statistical Direction. Race is independent of ethnicity and all clients should be self-categorized as White, Black or African American, American Indian or Native Alaskan, Asian, Native Hawaiian or other Pacific Islander, or Unknown or Not Reported. An “Hispanic” client must also have a race category selected.</td>
<td>V, X, XIX, XX</td>
</tr>
<tr>
<td>13a</td>
<td>Ethnicity</td>
<td>Indicate whether the client is of Hispanic descent by entering the appropriate code number in the box. Ethnicity is independent of race and all clients should be counted as either Hispanic or non-Hispanic. The Office of Management and Budget defines Hispanic as “a person of Mexican, Puerto Rican, Cuban, Central, or South American culture or origin, regardless of race.”</td>
<td>V, X, XIX, XX</td>
</tr>
<tr>
<td>14</td>
<td>Marital status</td>
<td>Indicate the client’s marital status by entering the appropriate marital code number in the box.</td>
<td>V, X, XIX, XX</td>
</tr>
<tr>
<td>15</td>
<td>Family income (all)</td>
<td>Titles V, XX, XX: Use the gross monthly income calculated and reported on the eligibility assessment tool. Title XIX providers: Enter the gross monthly income reported by the client. Be sure to include all sources of income. No documentation of income is required. For clients who are married (including common-law marriages) or who are 20 years of age and older, enter the gross monthly income of all family members. For unmarried clients age 19 years and younger, enter the gross monthly income of the client only, not the income of all family members.</td>
<td>V, X, XIX, XX</td>
</tr>
</tbody>
</table>
To calculate gross monthly income for Title XIX:
If income is received in a lump sum, or if it is for a period of time greater than a month (e.g., for seasonal employment), divide the total income by the number of months included in the payment period.
If income is paid weekly, multiply weekly income by 4.33. If paid every two weeks, multiply amount by 2.165. If paid twice a month, multiply by 2.
Enter $1.00 for clients not wishing to reveal income information.

6.10 Vision Claim Form

All vision services must be billed on a CMS-1500 paper claim form or the appropriate electronic formats. Vision claims submitted on other forms are denied with EOB 01145, “Claim form not allowed for this program.”

For eyewear claims beyond program benefits, (e.g., replacing lost or destroyed eye wear), providers must have the patient sign the ”Patient Certification Form” and retain in their records. Do not submit form to TMHP.

6.11 Remittance and Status (R&S) Report

The R&S Report provides information on pending, paid, denied, and adjusted claims. TMHP provides weekly R&S Reports to give providers detailed information about the status of claims submitted to TMHP. The R&S Report also identifies accounts receivables established as a result of inappropriate payment. These receivables are recouped from claim submissions. All claims for the same provider identifier and program processed for payment are paid at the end of the week, either by a single check or with Electronic Funds Transfer (EFT). If no claim activity or outstanding account receivables exist during the cycle week, the provider does not receive an R&S Report. Providers are responsible for reconciling their records to the R&S to determine payments and denials received.

Note: Providers receive a single R&S Report that details Texas Medicaid activities and provides individual program summaries. Combined provider payments are made based on the provider’s settings for Texas Medicaid fee-for-service.

Providers must retain copies of all R&S Reports for a minimum of five years. Providers must not use R&S Report originals for appeal purposes, but must submit copies of the R&S Reports with appeal documentation.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

6.11.1 R&S Report Delivery Options

TMHP offers two options for the delivery of the R&S Report. Although providers can choose either of the following methods, a newly-enrolled provider is initially set up to receive an PDF version of the R&S Report.

The PDF version of the R&S Report can be downloaded by registered users of the TMHP website at www.tmhp.com. The report is available each Monday morning, immediately following the weekly claims cycle. Payments associated with the R&S Report are not released until all provider payments are released on the Friday following the weekly claims cycle.

In addition to the PDF R&S Report, an optional R&S Report delivery method is also available. Using HIPAA-compliant EDI standards, the Electronic Remittance & Status (ER&S) Report can be downloaded through the TMHP EDI Gateway using TexMedConnect or third party software. The ER&S Report is also available each Monday after the completion of the claims processing cycle.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for more information about EDI formats and enrollment for the ER&S Report.

6.11.2 Banner Pages

Banner pages serve two purposes:

- They identify the provider’s name and address.
- They are used to inform providers of new policies and procedures.

The title pages include the following information:

- TMHP address for submitting paper appeals
- Provider’s name, address, and telephone number
- Unique R&S Report number specific to each report
- Provider identifier (TPI, NPI, and atypical provider identifier [API])
- Report sequence number (indicates the week number of the year)
- Date of the week being reported on the R&S Report
- Tax Identification Number
• Page number (R&S Report begins with page 1)
• AIS telephone number
• Taxonomy code

6.11.3 R&S Report Field Explanation

• Patient name. Lists the client’s last name and first name, as indicated on the eligibility file.
• Claim number. The 24-digit Medicaid ICN for a specific claim. The format for the TMHP claim number is expanded to PPP/CCC/MMM/CCYY/JJJ/BBBBB/SSS.

</table>

- **Medicaid #.** The client’s Medicaid number.
- **Patient Account #.** If a patient account number is used on the provider’s claim, it appears here.
- **Medical Record #.** If a medical record number is used on the provider’s claim, it appears here.
- **Medicare #.** If the claim is a result of an automatic crossover from Medicare, the last ten digits of the Medicare claim number appears directly under the TMHP claim number.
- **Diagnosis.** Primary diagnosis listed on the provider’s claim.
- **Service Dates.** Format MMDDYYYY (month, day, year) in “From” and “To” dates of service.
- **TOS/Proc.** Indicates by code the specific service provided to the client. The one-digit TOS appears first followed by a HCPCS procedure code. A three-digit code represents a hospital accommodation or ancillary revenue code. For claims paid under prospective payment methodology, it is the code of the DRG.
- **Billed Quantity.** Indicates the quantity billed per claim detail.
- **Billed Charge.** Indicates the charge billed per claim detail.
- **Allowed Quantity.** Indicates the quantity TMHP has allowed per claim detail.
- **Allowed Charge.** Indicates the charges TMHP has allowed per claim detail. For inpatient hospital claims, the allowed amount for the DRG appears.
- **POS Column.** The R&S Report includes the POS to the left of the Paid Amount. A one-digit numeric code identifying the POS is indicated in this column. Refer to subsection 6.3.1.1, “Place of Service (POS) Coding” in this section for the appropriate cross-reference among the two-digit numeric POS codes (Medicare), alpha POS codes, and one-digit numeric code on the R&S Report. Providers using electronic claims submission should continue using the same POS codes.
• **Paid Amt.** The final amount allowed for payment per claim detail. The total paid amount for the claim appears on the claim total line.

• **EOB Codes and Explanation of Pending Status (EOPS) Codes.** These codes explain the payment or denial of the provider’s claim. The EOB codes are printed next to or directly below the claim. The EOPS codes appear only in “The Following Claims Are Being Processed” section of the R&S Report. The codes explain the status of pending claims and are not an actual denial or final disposition. An explanation of all EOB and EOPS codes appearing on the R&S Report are printed in the Appendix at the end of the R&S Report. Up to five EOB codes are displayed.

• **Benefit.** Indicates the three digit benefit code associated with the claim.

• **Modifier.** Modifiers have been developed to describe and qualify services provided. For THSteps dental services two modifiers are printed. The first modifier is the TID and the second is the SID.

Refer to: Subsection 6.2.6, “Modifier Requirements for TOS Assignment” in this section for a list of the most commonly used modifiers.

### 6.11.4 R&S Report Section Explanation

#### 6.11.4.1 Claims – Paid or Denied

The heading **Claims – Paid or Denied** is centered on the top of each page in this section. Claims in this section finalized the week before the preparation of the R&S Report. The claims are sorted by claim status, claim type, and by order of client names. The reported status of each claim will not change unless further action is initiated by the provider, HHSC, or TMHP.

The following information is provided on a separate line for all inpatient hospital claims processed according to prospective payment methodology:

- **Age.** Client’s age according to TMHP records
- **Sex.** Client’s sex according to TMHP records:
  - M = Male, F = Female, U = Unknown
- **Pat-Stat.** Indicates the client’s status at the time of discharge or the last DOS on the claim (refer to instructions for UB-04 CMS-1450 paper claim form, Block 17)
- **Proc.** ICD-9-CM code indicates the primary surgical procedure used in determining the DRG

**Important:** Only paper claims appear in this section of the R&S Report. Claims filed electronically without required information are rejected. Users are required to retrieve the response file to determine reasons for rejections.

TMHP cannot process incomplete claims. Incomplete claims may be submitted as original claims only if the resubmission is received by TMHP within the original filing deadline.

Refer to: Subsection 6.1, “Claims Information” in this section for a description of different claim types.

#### 6.11.4.2 Adjustments to Claims

**Adjustments – Paid or Denied** is centered at the top of each page in this section. Adjustments are sorted by claim type and then patient name and Medicaid number. Media types 011, 021, 031, 041, 051, 061, 071, and 081 appear in this section. An adjustment prints in the same format as a paid or denied claim.

The adjusted claim is listed first on the R&S Report. EOB 00123, “This is an adjustment to previous claim XXXXXXXXXXXXXXXXXXXXXXXXX which appears on R&S Report dated XX/XX/XX” follows this claim. Immediately below is the claim as originally processed. An accounts receivable is created for the original claim total as noted by EOB 00601, “A receivable has been established in the amount of the original payment: $XXX,XXX,XXX.XX. Future payments will be reduced or withheld until such amount...”
is paid in full.” prints below the claim indicating the amount to be recouped. This amount appears under the heading, “Financial Transactions Accounts Receivable.” EOB 06065, “Account Receivable is due to the adjusted claim listed. For details, refer to your R&S Report for the date listed within the original date field.”

Claims adjusted as a result of a rate change will be listed on the R&S Report with EOB 01154 "This adjustment is a result of a rate change."

Refer to: Subsection 6.2.6, “Modifier Requirements for TOS Assignment” in this section for a list of the most commonly used modifiers.

### 6.11.4.3 Financial Transactions

All claim refunds, reissues, voids/stops, recoupments, backup withholdings, levies, and payouts appear in this section of the R&S Report. The Financial Transactions section does not use the R&S Report form headings. Additional subheadings are printed to identify the financial transactions. The following descriptions are types of financial items:

#### 6.11.4.3.1 Accounts Receivable

This label identifies money subtracted from the provider’s current payment owed to TMHP. Specific claim data are not given on the R&S Report unless the accounts receivable control number is provided which should be referenced when corresponding with TMHP. Accounts receivable appear on the R&S Report in the following format:

- **Control Number.** A number to reference when corresponding with TMHP.
- **Recoupment Rate.** The percentage of the provider’s payment that is withheld each week unless the provider elects to have a specific amount withheld each week.
- **Maximum Periodic Recoupment Amount.** The amount to be withheld each week. This area is blank if the provider elects to have a percentage withheld each week.
- **Original Date.** The date the financial transaction was processed originally.
- **Original Amount.** The total amount owed TMHP.
- **Prior Date.** The date the last transaction on the accounts receivable occurred.
- **Prior Balance.** The amount owed from a previous R&S Report.
- **Applied Amount.** The amount subtracted from the current R&S Report.
- **Balance.** Indicates the total outstanding accounts receivable (AR) balance that remains due to TMHP.
- **FYE.** The fiscal year end (FYE) for cost reports.
- **EOB.** The EOB code that corresponds to the reason code for the accounts receivable.
- **Patient Name.** The name of the patient on the claim, if the accounts receivable are claim-specific.
- **Claim Number.** The ICN of the original claim, if the accounts receivable are claim-specific.
- **Backup Withholding Penalty Information.** A penalty assessed by the Internal Revenue Service (IRS) for noncompliance due to a B-Notice. Although the current payment amount is lowered by the amount of the backup withholding, the provider’s 1099 earnings are not lowered.
- **Control Number.** TMHP control number to reference when corresponding with TMHP.
- **Original Date.** The date the backup withholding was set up originally.
- **Withheld Amount.** Amount withheld (31 percent) of the provider’s checkwrite.
6.11.4.3.2 IRS Levies

The payments withheld from a provider’s checkwrite as a result of a notice from the IRS of a levy against the provider appear in the “IRS Levy Information” section of the R&S Report. Payments are withheld until the levy is satisfied or released. Although the current payment amount is lowered by the amount of the levy payment, the provider’s 1099 earnings are not lowered. IRS levies are reported in the following format:

- Control Number. TMHP control number to reference when corresponding with TMHP.
- Maximum Recoupment Rate. The percentage of the provider’s payment that is withheld each week, unless the provider elects to have a specific amount withheld each week.
- Maximum Recoupment Amount. The amount to be withheld periodically.
- Original Date. The date the levy was set up originally.
- Original Amount. The total amount owed to the IRS.
- Prior Balance. The amount owed from a previous R&S Report.
- Prior Date. The date the last transaction on the levy occurred.
- Current Amount. The amount subtracted from the current R&S Report and paid to the IRS.
- Remaining Balance. The amount still owed on the levy. (This amount becomes the “previous balance” on the next R&S Report.)

6.11.4.3.3 Refunds

Refunds are identified by EOB 00124, “Thank you for your refund; your 1099 liability has been credited.” This statement is verification that dollars refunded to TMHP for incorrect payments have been received and posted. The provider’s check number and the date of the check are printed on the R&S Report. Claim refunds appear on the R&S Report in the following format:

- Claim Specific:
  - ICN. The claim number of the claim to which the refund was applied this cycle.
  - Patient Name. The first name, middle initial, and last name of the patient on the applicable claim.
  - Medicaid Number. The patient’s Medicaid or CSHCN number.
  - Date of Service. The format MMDDCCYY (month, day, and year) in “From” DOS.
  - Total Billed. The total amount billed for the claim being refunded.
  - Amount Applied This Cycle. The refund amount applied to the claim.
  - EOB. Corresponds to the reason code assigned.

- Nonclaim Specific:
  - Control Number. A control number to reference when corresponding with TMHP.
  - FYE. The fiscal year for which this refund is applicable.
  - EOB. Corresponds to the reason code assigned.
6.11.4.3.4 Payouts

Payouts are dollars TMHP owes to the provider. TMHP processes two types of payouts: system payouts that increase the weekly check amount and manual payouts that result in a separate check being sent to the provider. Specific claim data are not given on the R&S Report for payouts. A control number is given, which should be referenced when corresponding with TMHP. System and manual payouts appear on the R&S Report in the following format:

- **Payout Control Number.** A control number to reference when corresponding with TMHP.
- **Payout Amount.** The amount of the payout.
- **FYE.** The fiscal year for which the payout is applicable.
- **EOB.** Corresponds to the reason code assigned.
- **Patient Name.** Name of the patient (if available).
- **PCN.** Medicaid number of the patient (if available).
- **DOS.** Date of service (if available).

6.11.4.3.5 Reissues

The provider’s 1099 earnings are not affected by reissues. A message states, “Your payment has been increased by the amount indicated below:

- **Check Number.** The number of the original check.
- **Check Amount.** The amount of the original check.
- **R&S Number.** The number of the original R&S Report.
- **R&S Date.** The date of the original R&S Report.

6.11.4.3.6 Voids and Stops

The provider’s 1099 earnings are credited by the amount of the voided/stopped payment.

- **Check Number.** The number of the voided/stopped payment.
- **Check Amount.** The amount of the voided/stopped payment.
- **R&S Number.** The number of the voided/stopped payment.
- **R&S Date.** The date of the voided/stopped payment.

6.11.4.4 Claims Payment Summary

This section summarizes all payments, adjustments, and financial transactions listed on the R&S Report. The section has two categories: one for amounts “Affecting Payment This Cycle” and one for “Amount Affecting 1099 Earnings.”

If the provider is receiving a check on this particular R&S Report, the following information is given: “Payment summary for check XXXXXXXXX in the amount of XXX,XXX,XXX.XX.” If the payment is EFT: “Payment summary for direct deposit by EFT XXXXXXXXX in the amount of XXX,XXX,XXX.XX.” The check number also is printed on the check that accompanies the R&S Report.

**Headings for the Payment Summary for “Affecting Payment This Cycle” and “Amount Affecting 1099 Earnings”**

- **Claims Paid.** Indicates the number of claims processed for the week and the year-to-date total.
- **System Payouts.** The total amount of system payouts made to the provider by TMHP.
- **Manual Payouts (Remitted by separate check or EFT).** The total amount of manual payouts made to the provider by TMHP.
• **Amount Paid to IRS for Levies.** The amount remitted to IRS and withheld from the provider’s payment due to an IRS levy.

• **Amount Paid to IRS for Backup Withholding.** The amount paid to the IRS for backup withholding.

• **Accounts Receivable Recoupments.** The total amount withheld from the provider’s payment due to accounts receivable.

• **Amounts Stopped/Voided.** The total amount of the payment that was voided or stopped with no reissuance of payment.

• **System Reissues.** The amount of the reissued payment.

• **Claim Related Refunds.** The total amount of claim-related refunds applied during the weekly cycle.

• **Nonclaim Related Refunds.** The total amount of nonclaim-related refunds applied during the weekly cycle.

• **Approved to Pay/Deny Amount.** The total amount of claim payments that were approved to pay/deny within the week. (This column will not be used at this time.)

• **Pending Claims.** The total amount billed for claims in process as of the cutoff date for the report.

### 6.11.4.5 The Following Claims are Being Processed

In the “Following Claims are Being Processed” section, the R&S Report may list up to five EOPS codes per claim. The claims listed in this section are in process and cannot be appealed for any reason until they appear in either the “Claims Paid or Denied,” or “Adjustments Paid and Denied” sections of the R&S Report. TMHP is listing the pending status of these claims for informational purposes only. The pending messages should not be interpreted as a final claim disposition. Weekly, all claims and appeals on claims TMHP has “in process” from the provider are listed on the R&S Report. The Following Claims are Being Processed claim prints in the same format as a paid or denied claim.

### 6.11.4.6 Explanation of Benefit Codes Messages

This section lists the descriptions of all EOBs that appeared on the R&S Report. EOBs appear in numerical order.

EDI ANSI X12 5010 835 files display the appropriate Claims Adjustment Reason Code (CARC), Claims Adjustment Group Code (CAGC), and Remittance Advice Remarks Code (RARC) explanation codes that are associated with EOB denials.

The 835 file includes the CARC, CAGC, and RARC explanation codes that are associated with the highest priority detail EOB to provide a clearer explanation for the denial.

### 6.11.4.7 Explanation of Pending Status Codes Appendix

This section lists the description of all EOPS codes that appeared on the R&S Report. EOPS appear in numerical order.

EOB and EOPS codes may appear on the same pending claim because some details may have already finalized while others may have questions and are pending.

**THE FOLLOWING CLAIMS ARE BEING PROCESSED**

The explanation of pending status (EOPS) codes listed are not final claim denials or payment dispositions. The EOPS codes identify the reasons why a claim is in process. Because these claims are currently in process, new information cannot be accepted to modify the claim until the claim finalizes and appears as finalized on your R&S Report. Please refer to the last section of this report for the messages that correspond to the EOPS codes used on this report.

EXPLANATION OF BENEFITS CODES MESSAGES

THE FOLLOWING ARE THE DESCRIPTIONS OF THE EOB CODES THAT APPEAR ON THIS REMITTANCE AND STATUS REPORT

00100 A CHARGE WAS NOT NOTED FOR THIS SERVICE.
00149 PROCEDURE PAYMENT BASED ON PROGRAM/BENEFIT PLAN, DATE OF SERVICE AND A MAXIMUM PAYMENT AMOUNT SET BY CMS OR HHSC.
00429 THIS SURGERY/SERVICE/SITUATION DESCRIBED IS NOT ON THE AUTHORIZATION LETTER AND IS NOT PAYABLE.
00475 PAID ACCORDING TO THE TEXAS MEDICAID REIMBURSEMENT METHODOLOGY-TMRM (RELATIVE VALUE UNIT TIMES STATEWIDE CONVERSION FACTOR)
00572 IT IS MANDATORY THAT AUTHORIZATION BE OBTAINED. DUE TO THE LACK OF APPROVAL, THE SERVICE IS NON-PAYABLE.
00757 PROCEDURE PAYMENT BASED ON PROGRAM/BENEFIT PLAN, DATE OF SERVICE AND IS CALCULATED AT THE DETAIL BILLED AMOUNT.
01004 THIS PAYMENT WAS REDUCED 2.5% IN ACCORDANCE WITH THE 78TH TEXAS LEGISLATURE, ARTICLE II OF HOUSE BILL 1, AND SECTION 2.03 OF HOUSE BILL 2292.
01147 PLEASE REFER TO OTHER EOB MESSAGES ASSIGNED TO THIS CLAIM FOR PAYMENT/DENIAL INFORMATION.

THE FOLLOWING ARE THE DESCRIPTIONS OF THE EGP CODES THAT APPEAR ON THIS REMITTANCE AND STATUS REPORT

00103 OUR FILES INDICATE AN AUTHORIZATION INFORMATION MISMATCH.
6.11.7 Provider Inquiries—Status of Claims

TMHP provides several effective mechanisms for researching the status of a claim. Weekly, TMHP provides the R&S Report reflecting all claims with a paid, denied, or pending status. Providers verify claim status using the provider’s log of pending claims.

Electronic billers allow ten business days for a claim to appear on their R&S Reports. If the claim does not appear on an R&S Report as paid, pending, or denied, a transmission failure, file rejection, or claims rejection may exist. Providers check records for transmission reports correspondence from the TMHP EDI Help Desk.

The provider allows at least 30 days for a Medicaid paper claim to appear on an R&S Report after the claim has been submitted to TMHP. If a claim has not been received by TMHP and must be submitted a second time, the second claim must also meet the 95-day filing deadline.

The provider allows TMHP 45 days to receive a Medicare-paid claim automatically transmitted for payment of deductible, coinsurance, or both. Claims that fail to cross over from Medicare may be filed to TMHP by submitting a paper MRAN received from Medicare or a Medicare intermediary, the computer generated MRANs from the CMS-approved software applications MREP for professional services or PC-Print for institutional services or the TMHP Standardized MRAN form with the completed claim form.

If the claim does not appear on an R&S Report as paid, pending, or denied, providers can use any of the following procedures to inquire about the status of the claim:

- The provider can use the claim status inquiry function of TexMedConnect on the TMHP website at www.tmhp.com.
- The provider can call AIS at 1-800-925-9126 to determine if the claim is pending, paid, denied, or if TMHP has no record of the claim.
- If any of the three options above indicates that TMHP has no record of the claim, the provider can call the TMHP Contact Center at 1-800-925-9126 and speak to a TMHP contact center representative.
- If the TMHP Contact Center has no record of a claim that was submitted within the original filing deadline, the provider can submit a copy of the original claim to TMHP for processing. Electronic billers may refile the claim electronically. For claims submitted by a hospital for inpatient services, the filing deadline is 95 days from the discharge date or the last DOS on the claim. For all other types of providers, the filing deadline is 95 days from each DOS on the claim.
- If the 95-day filing deadline has passed and the claim is still within 120 days of the date of the rejection report or the R&S Report, the provider can submit a signed copy of the claim and all of the documentation that supports the original claim submission, including any electronic rejection reports, to:

  Texas Medicaid & Healthcare Partnership  
  Inquiry Control Unit  
  12357-A Riata Trace Parkway, Suite 100  
  Austin, TX 78727

Providers must retain copies of all R&S Reports for a minimum of five years. Providers must not send original R&S Reports back with appeals. Providers must submit one copy of the R&S Report to TMHP per appeal.

Refer to: “Automated Inquiry System (AIS)” in “Preliminary Information” (Vol. 1, General Information).
6.12 Other Insurance Claims Filing
The following information must be provided in the “Other Insurance” field on the paper claim and in the appropriate field of electronic claims. On the CMS-1500 paper claim form, Fields 9 or 11, and 29 must contain the appropriate information:

- Name of the other insurance resource
- Address of the other insurance resource
- Policy number and group number
- Policyholder
- Effective date if available
- Date of disposition by other insurance resource (used to calculate filing deadline)
- Payment or specific denial information

**Important:** By accepting assignment on a claim for which the client has Medicaid coverage, providers agree to accept payment made by insurance carriers and Texas Medicaid when appropriate as payment in full. The client cannot be held liable for any balance or copays related to Medicaid-covered services.

6.12.1 Unbundled Services That Are Prior Authorized and Manually Priced Procedure Codes

Providers that submit prior authorization requests and claims to TMHP must:

- Unbundle any bundled procedure codes that have been submitted to the client’s other insurance company.
- Itemize the rates.

If prior authorization has been obtained for services that use manually priced procedure codes, providers must submit claims for the services using the MSRP that was submitted with the authorization request and the following information that is listed on the authorization letter:

- The authorization number
- The provider identifier
- The procedure codes
- The dates of service
- The types of service
- The required modifiers

If the authorization letter shows itemized details, the claim must include all rendered services as they are itemized on the authorization letter and the MSRP rate for each of those services. The procedure codes and MSRP rates that are detailed on the claim must match the procedure codes that are detailed in the authorization letter and the MSRP rates that were submitted with the authorization request. Claims processing and payment may be delayed if there is not an exact match between the detailed information on the authorization letter, the approved authorization, and the information that was submitted on the claim.

**Important:** For appropriate processing and payment, the Pay Price that is indicated on the authorization letter should not be submitted on the claim.

Prior authorization is a condition of reimbursement; it is not a guarantee of payment.
6.12.2 Other Insurance Credits

Providing other insurance payment information, even when no additional payment is expected from TMHP, provides benefit to all parties involved in Texas Medicaid. When a TPR issues a payment or partial payment to a provider, the other insurance credit must be indicated on the claim form submitted to TMHP.

This procedure benefits both providers and TMHP even if the TPR payment exceeds the Medicaid allowed amount. Although additional payment may not be issued by TMHP, informing TMHP of the other insurance credit allows TMHP to track the appropriate use of TPRs. Informing TMHP of a TPR credit provides hospitals with a more accurate standard dollar amount (SDA) rate setting and assists the program in tracking recoveries and reducing Medicaid medical expenditures by informing TMHP of liable third parties.

Providers must report TPR payments correctly in the appropriate electronic field or the paper claim form block.

</tr>
</tbody>
</table>

6.12.2.1 Deductibles

TMHP will consider deductibles for reimbursement when the original third party payor applied the payment amount directly to the clients deductible. The explanation of benefit reflecting the application of the payment by the other insurance (third party payor) and a completed signed claim copy must be submitted to TMHP for consideration.

6.12.2.2 HMO Copayments

TMHP processes and pays HMO copayments for private and Medicare HMOs as well as private and Medicare PPO copayments for clients who are eligible for reimbursement under Medicaid guidelines.

TMHP pays the copayment in addition to the service the HMO or PPO has denied, if the client is eligible for the Texas Medicaid Program and the procedure is reimbursed under Medicaid guidelines. Providers are not allowed to hold the client liable for the copayment.

An office or emergency room (ER) visit (the ER physician is paid only when the ER is not staffed by the hospital) is reimbursed a maximum copayment of $10 per visit. The hospital ER visit is reimbursed at a maximum of $50 to the facility. TMHP pays up to four copayments per day, per client. ER visits are limited to one per day, per client, and are considered one of the four copayments allowed per day.

**Important:** By accepting assignment on a claim for which the client has Medicaid coverage, providers agree to accept payment made by insurance carriers and the Texas Medicaid Program when appropriate as payment in full. The client cannot be held liable for any balance related to Medicaid-covered services.

The following Medicaid codes have been created for copayments, which are considered an atypical service:

<table>

</tr>
</tbody>
</table>
6.12.2.3 Verbal Denial

Providers may call the other insurance resource and receive a verbal denial. The other insurance record can either be updated when the provider files the claim or calls the TPL/Tort Customer Service line at 1-800-846-7307. When calling the TPL/Tort Customer Service line and when filing claims to TMHP, the provider must have the following information before any updates are made.

Verbal denial requirements:
- Date of the telephone call to the other insurance resource
- Insurance company’s name and telephone number
- Name of the individual contacted at the insurance company
- Policyholder and group information for the client
- Specific reason for the denial, including the client’s type of coverage to enhance the accuracy of future claims processing (for example, a policy that covers inpatient services or physician services only)

Providers that update a client’s insurance records through the TMHP TPL/Tort Customer Service line must follow the current appeal process once the other insurance information has been updated on the client’s file.

6.12.2.4 110-Day Rule

When a service is billed to a third party and no response has been received, Medicaid providers must allow 110 days to elapse before submitting a claim to TMHP. If a TPR has not responded or delays payment or denial of a provider’s claim for more than 110 days after the date the claim was billed, Medicaid considers the claim for reimbursement. However, the 365-day federal filing deadline requirement must still be met. The following information is required:
- Name and address of the TPR
- Date the TPR was billed
- Statement signed and dated by the provider that no disposition has been received from the TPR within 110 days of the date the claim was billed

When TMHP denies a claim because of the client’s other coverage, information that identifies the other insurance appears on the provider’s R&S Report. The claim is not to be refiled with TMHP until disposition from the TPR has been received or until 110 days have lapsed since the billing of the claim with no disposition from the TPR. A statement from the client or family member which indicates that they no longer have this resource is not sufficient documentation to reprocess the claim.
When a provider is advised by a TPR that benefits have been paid to the client, the information must be included on the claim with the date and amount of payment made to the client if available. If a denial was sent to the client, refer to the verbal denial guidelines above for required information. This enables TMHP to consider the claim for reimbursement.

**6.12.2.5 Filing Deadlines**

In accordance with federal regulations, all claims must initially be filed with TMHP within 365 days of the DOS. Claims that involve filing to a TPR have the following deadlines:

- Claims with a valid disposition (payment or denial) must be received by TMHP within 95 days of the date of disposition by the TPR and within 365 days of the DOS. Appealed claims that were originally denied with EOB 00260, which indicates that the provider files with a TPR, must be received within 95 days of the date of disposition by the TPR or within 120 days of the date on which TMHP denied the claim.
- The provider must appeal the claim to TMHP with complete other insurance information, which includes all EOBs and disposition dates. The disposition date is the date on which the other insurance company processed the payment or denial.
- If a provider submits other insurance EOBs without disposition dates, the appeal will be denied. If the other insurance disposition date appears only on the first page of an EOB that has multiple pages and the claim that is being submitted to TMHP is on a subsequent page or pages, the provider must submit the first page that shows the disposition date and all of the pages that show the claim that is being submitted to TMHP.
- If more than 110 days have passed from the date a claim was filed to the TPR without a response, the claim is submitted to TMHP for consideration of payment.

**6.12.3 Claims Forwarded to Other Insurance Carriers**

Federal and state laws require the use of Medicaid funds for the payment of most medical services only after all reasonable measures have been made to use a client’s TPR or other insurance. Providers are required to submit clients’ known other insurance to TMHP.

TMHP forwards electronic institutional claims for clients suspected of having other insurance to a contractor. The contractor researches the claims to determine the client’s possible other insurance information. If it is determined that the client has valid other insurance for the claim’s date of service and the insurance carrier is listed below, the contractor will forward the claim to the selected insurance carrier. TMHP has begun forwarding claims to the major insurance carriers for Texas.

Provider will receive a denial EOB from TMHP on the R&S Report that will indicate that the claim was forwarded to the client’s other insurance carrier.

If the other insurance carrier denies the claim, the provider should first exhaust all avenues to appeal the claim with the other insurance carrier. If the final disposition is a denial, the provider may appeal the claim to TMHP using the carrier’s EOB showing the denial. Providers must review their R&S Reports to ensure that any follow-up action is taken within the appeal deadlines.

TMHP will not forward the following claim types to the contractor:

- Electronic institutional claims that are rejected by TMHP
- Electronic institutional Texas Medicaid fee-for-service and Primary Care Case Management (PCCM) adjustments
- Suspended or finalized claims
- Claims that are part of mass adjustments originating from TMHP
• All other electronic claim types (professional and dental)

  Note: Other claim types (professional and dental) will be eligible for forwarding at a later date.

• All Medicare crossover claims
• All NPI contingent claims
• All paper claims
• School Health and Related Services (SHARS) claims
• Early Childhood Intervention (ECI) claims
• Children with Special Health Care Needs (CSHCN) Services Program claims
• County Indigent Health Care Program (CIHCP) claims
• PCS claims
• Children and Pregnant Women (CPW) claims
• Claims that are rejected by the Contractor for HIPAA validation failures
• THSteps medical and dental claims

Refer to: Subsection 4.11, “Third Party Liability (TPL)” in Section 4, “Client Eligibility” (Vol. 1, General Information) for information about filing claims for clients with other insurance.

Section 6.12.2.5, “Filing Deadlines” in this section for information about filing deadlines for clients with other insurance.

6.13 Medicare Claims

When a service is a benefit of Medicare and Medicaid, the claims must be filed with Medicare first. Providers should not file a claim with Medicaid until Medicare has dispositioned the claim. The payment received from Medicare and the coinsurance or deductible payment from Medicaid must be considered payment in full. Medicaid pays the beneficiary’s Part A and B deductibles and coinsurance liabilities on valid Medicare claims. These guidelines exclude clients living in a nursing facility.

Providers must accept Medicare assignment to received coinsurance and deductible amounts from Medicaid services provided to clients. If a provider has accepted a Medicare assignment, the provider may receive payment of the Medicare deductible and coinsurance from TMHP on behalf of the qualified Medicare beneficiary (QMB) or Medicaid qualified Medicare beneficiary (MQMB) client.

Providers accepting Medicare or Medicaid assignment cannot legally require the client to pay the Medicare coinsurance or deductible amounts.

Medicare primary claims filed to Medicare Administrative Contractors (MACs) may be transferred electronically to TMHP through a Coordination of Benefits Contractor (COBC) for claims processed as assigned. Providers should contact their MAC for more information. This benefit allows providers to receive disposition from both carriers while only filing the claim once. Providers allow 60 days from the date of Medicare’s disposition for a claim to be shown on the Medicaid R&S Report. Claims totally denied by Medicare are not automatically transferred to TMHP.

For crossover claims that are not transferred electronically, providers must submit a paper claim to TMHP.

Refer to: Subsection 2.6, “Medicare Crossover Claim Reimbursement” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information).
6.13.1 Medicare Advantage Plans (MAPs) Claims

TMHP processes certain claims for clients enrolled in a MAP for Medicare Qualified Medicaid Beneficiary (MQMB) clients.

TMHP considers a claim for reimbursement for services that are a benefit of Texas Medicaid if claims are denied by the MAP for not a benefit or services exceed benefit limitations.

Claims must first be submitted to the MAP. If the MAP issues a denial that indicates “not a benefit” or “exceeds benefit limitations,” the claim can be submitted to TMHP with a copy of the MAP explanation of benefits (EOB) attached. TMHP will not process claims that were denied by the MAP for reasons other than “not a benefit” or “exceeds benefit limitations.”

6.13.1.1 Copayments:

Claims for Medicare copayments can also be submitted to TMHP.

Refer to: Subsection 6.12.2.2, “HMO Copayments” in this section for additional information.

6.13.1.2 Coinsurance and Deductible Claims for Contracted MAPs

Some MAPs have contracted with HHSC to receive a monthly payment for each client the MAP enrolls. HHSC’s payments to these MAPs include all Medicaid costs associated with serving MQMB clients.

A list of MAPs that are contracted with HHSC is available in the EDI section of the TMHP website at www.tmhp.com. The list will be updated as additional plans receive approved contracts.

6.13.1.3 Coinsurance and Deductible Reimbursement for Noncontracted MAPs

TMHP processes claims for coinsurance and deductibles for dual-eligible clients who are enrolled in a MAP that is not contracted with HHSC. A list of contracted plans can be found on the TMHP website at www.tmhp.com. Providers must submit claims for coinsurance and deductibles using the MRAN/MAP Template. Providers must attach the appropriate paper claim form to the completed MRAN form:

Providers must attach a copy of the completed CMS-1500 or UB-04 CMS-1450 paper claim form to the completed MRAN form. The templates and instructions are available on the TMHP website at www.tmhp.com/Pages/Medicaid/Medicaid_Medicare.aspx.

The MRAN/MAP template must be submitted with a completed claim form, must be legible, and must identify only one client per page. Providers must not submit handwritten MRAN/MAP templates. Claims that do not meet these standards will not be processed and will be returned to the provider.

6.13.2 Medicare/Medicaid Filing Deadlines

TMHP Standardized MRAN forms, paper MRANs from Medicare or a Medicare intermediary or computer generated MRANs from the CMS-approved software applications MREP for professional services or PC-Print for institutional services must be received by TMHP within 95 days of the Medicare date of disposition in order to be considered for processing. Providers may also submit Medicare adjusted claims by submitting the adjusted computer generated MRANs from the CMS-approved software applications MREP for professional services or PC-Print for institutional services or paper adjusted MRAN received by Medicare or a Medicare intermediary.

Refer to: Subsection 2.6, “Claims Filing and Reimbursement” in Hospital Services Handbook (Volume 2, Provider Handbooks) for additional information on Hospital Medicare claims filing requirements.

6.14 Filing Medicare Primary Paper Claims

Providers are allowed to file Medicare primary paper claims to TMHP for payment of coinsurance or deductible for claims that fail to cross over from Medicare electronically.
Providers that receive paper MRANs from Medicare or a Medicare intermediary or MRANs using the CMS-approved software MREP, for professional services, or PC-Print, for institutional services, may submit these MRAN to TMHP. Providers that submit these MRANs are not required to submit the TMHP Standardized MRAN Form.

Providers that cannot retrieve the MRAN from MREP or PC-Print, or who don’t receive a paper MRAN from Medicare or a Medicare intermediary, must submit the TMHP Standardized MRAN Form.

Providers that submit paper crossover claims must submit only one of the approved MRAN formats—MREP, PC-Print, paper MRAN from Medicare or a Medicare intermediary or TMHP Standardized MRAN form along with a completed claim form. Paper crossover claims that contain multiple MRAN forms with conflicting information are returned to the provider or denied.

Effective 03192007 - Revised 05312007
6.14.2 Crossover Claim Type 30 Instructions

Providers who bill professional services on the CMS-1500 paper claim form may submit the Crossover Claim Type 30 template with a copy of a completed claim form. All fields (excluding Medicaid information fields) on the form must be completed using the Remittance Advice or Remittance Notice received from Medicare. In addition, all details from the Medicare Remittance Advice/Remittance Notice must be included in the template, regardless if a deductible or coinsurance is due.

The TMHP Standardized MRAN Form must be typed or computer-generated. Handwritten TMHP Standardized MRAN Forms will not be accepted and will be returned to the provider.

The following are the requirements for the Crossover Claim Type 30 template:

<table>

Crossover Claim Types 31 and 50
TMHP Standardized Medicare Remittance Advice Notice Form

Effective 03192007 - Revised 05312007
### 6.14.4 Crossover Claim Types 31 and 50 Instructions

Providers who bill inpatient and outpatient crossover claims on a UB-04 CMS-1450 paper claim form may submit the Crossover Claim Types 31 and 50 template with a copy of a completed claim form. All fields (excluding Medicaid information fields) on the form must be completed using the Remittance Advice or Remittance Notice received from Medicare, regardless if a deductible or coinsurance is due.

The TMHP Standardized MRAN Form must be typed or computer-generated. Handwritten TMHP Standardized MRAN Forms will not be accepted and will be returned to the provider.

The following are the requirements for the Crossover Claim Types 31 and 50 template:

<table>
<thead>
<tr>
<th>Field Description</th>
<th>Guidelines</th>

<td>Enter the DRG amount listed on the Medicare Remittance Advice/Remittance Notice for inpatient claims, if applicable.</td>
</tr>
<tr>
<td></td>
<td><strong>Note:</strong> Outpatient claims do not require a DRG amount.</td>
</tr>
</tbody>
</table>

6.14.5 Filing a Medicare-Denied Claim

Claims denied by Medicare because the services are not a benefit of the Medicare program or because Medicare benefits have been exhausted can be submitted to TMHP for MQMB clients.

The Medicare EOB that contains the relevant claim denial must be submitted to TMHP with the completed claim from within 95 days from the Medicare disposition date and 365 days from the date of service. These claims will be processed as Medicaid-only claims.

**Exception:** Claims that are denied by Medicare for administrative reasons must be appealed to Medicare before they are submitted to Texas Medicaid.

6.14.6 Filing a Medicare-Adjusted Claim

Providers should use an adjusted Medicare Remittance Advice or Remittance Notice and complete a TMHP Standardized MRAN to submit a Medicare-adjusted claim. Providers must ensure that the information on the Medicare Remittance Advice or Remittance Notice matches the information submitted on the TMHP Standardized MRAN form and attach a completed claim form.

Providers can also submit Medicare-adjusted claims using the paper MRAN received from Medicare or a Medicare intermediary or the adjusted computer generated MRANs from the CMS-approved software applications MREP for professional services or PC-Print for institutional services.

6.15 Medically Needy Claims Filing

TMHP must receive claims for unpaid bills not applied toward spend down within 95 days from the date eligibility was added to the TMHP client eligibility file (add date). These bills must be on the appropriate claim form (for example, CMS-1500 or UB-04 CMS-1450). Providers are allowed to submit completed CMS claim forms directly to the Medically Needy Clearinghouse (MNC) or to applicants for the Medically Needy Program (MNP) to be used to meet spend down. The completed CMS claim forms used to meet spend down are held for ten calendar days by the MNC, then forwarded to TMHP claims processing. Claims for services provided after the spend down is met must be received within 95 days from the date eligibility is added. Inpatient hospital facility claims must be received within 95 days from the date of discharge or last DOS on the claim. This applies when eligibility is not retroactive.

The client’s payment responsibilities are as follows:

- If the entire bill was used to meet spend down, the client is responsible for payment of the entire bill.
- If a portion of one of the bills was used to meet the spend down, the client is responsible for paying the portion applied toward the spend down, unless it exceeds the Medicaid allowable amount.
The claim must show the total billed amount for the services provided. Charges for ineligible days or spend down amounts should not be deducted or noncovered on the claim.

A client’s payment toward spend down is not reflected on the claim submitted to TMHP.

A client is not required to pay the spend down amount before a claim is filed to Medicaid.

Payments made by the client for services not used in the spend down but were incurred during an eligible period must be reimbursed to the client before the provider files a claim to TMHP.

Services that require prior authorization and are provided before the client becomes eligible for Medicaid by meeting spend down are not reimbursable by Texas Medicaid.

If a bill or a completed CMS claim form was not used to meet spend down and the dates of service are within the client’s eligible period, submit the total bill to TMHP.

When eligibility has been established, a TP 55 with spend down client can receive the same care and services available to all other Medicaid clients. If eligibility is established through TP 30 with spend down, the client’s Medicaid eligibility is restricted to coverage for an emergency medical condition only. Emergency medical condition is defined under Subsection 4.4.2.2, “Exceptions to Limited Status” in section 4, “Client Eligibility” (Vol. 1, General Information).

### 6.16 Claims for Medicaid Hospice Clients Not Related to the Terminal Illness

When the services are unrelated to the terminal illness, providers must submit a claim for Medicaid services to TMHP. The claim must include a statement and documentation from the hospice that the services billed are not related to the client's terminal illness.

If TMHP denies the claim, the following information must be submitted with the providers appeal.

- A copy of the R&S Report, with the client or claim number in question circled
- Clinical records, which may be obtained from the hospice provider
- Supporting documentation giving reasons the services billed are not related to the terminal illness

Refer to: Subsection 4.4.3, “Hospice Program” in Section 4, “Client Eligibility” (Vol. 1, General Information) for more information related to Medicaid hospice client benefits and eligibility.

### 6.16.1 Medical Services When Client is Discharged From Hospice

Submit claims to TMHP for Medicaid services with a statement that the services billed were provided after the client was discharged from the Hospice Program. The provider must obtain a copy of Form 3071, Medicaid Hospice Cancellation, from the Hospice Program to support the discharge.

If TMHP denies the claim, the provider may appeal the decision with the following information:

- A copy of the R&S Report, with the client or claim number in question circled
- Supporting documentation stating that the client was not in hospice at the time

### 6.16.2 Claims Address for Medicaid Hospice Clients Not Related to the Terminal Illness

Mail paper claims to the following address:

Texas Medicaid & Healthcare Partnership
PO Box 200105
Austin, TX 78720-0105
Appeal claims by writing to the following address:

Texas Medicaid & Healthcare Partnership
PO Box 200645
Austin, TX 78720-0645

6.16.3 Lab and X-Ray
Submit claims for services unrelated to the terminal illness to TMHP. Submit claims for services related to the terminal illness to the hospice provider.

6.17 Children’s Health Insurance Program (CHIP) Perinatal Claims
Claims for services provided to CHIP Perinatal Program clients are submitted to and considered for reimbursement as follows:

For women with income at or below 185 percent FPL:
- Hospital facility charges are paid through Emergency Medicaid and processed by TMHP.
- Professional service charges are paid through the CHIP Perinatal Program and processed through CHIP.

Note: Delivery-related professional services claims denied by the CHIP Perinatal health plan will be considered for reimbursement through Emergency Medicaid and will require the CHIP Perinatal health plan denial notice. These claims should be submitted through the existing Medicaid appeals process within 95 days from the date of the CHIP Perinatal Health plan denial notice. The provider must provide a copy of the complete explanation of benefits that includes the complete description of the reason for denial.

For newborns with a family income at or below 185 percent FPL:
- Hospital facility charges are paid through Medicaid and processed by TMHP
- Professional service charges are paid through Medicaid and processed by TMHP.

Inpatient services (limited to labor with delivery) for unborn children and women with income between 186 and 200 percent of FPL will be covered under CHIP Perinatal, and these claims will be paid by the CHIP Perinatal health plan.

6.17.1 CHIP Perinatal Newborn Transfer Hospital Claims
TMHP processes CHIP Perinatal newborn transfer hospital claims even if the claim from the initial hospital stay has not been received.

The hospital transfer must have occurred within 24 hours of the discharge date from the initial delivery hospital stay. This change applies only to CHIP Perinatal newborns with a family income at or below 185 percent of the FPL.

Transfer claims must be filed with TMHP on an electronic institutional claim or the UB-04 CMS-1450 paper claim form using admission type 1, 2, 3, or 5 in block 14, source of admission code 4 or 6 in block 15, and the actual date and time the client was admitted in block 12 of the UB-04 CMS-1450 paper claim form.

6.18 Forms
XUB Computer Billing Service, Inc.
4040 Main Street
Anytown, USA 11111

Dear Sir:

This letter authorizes the XUB Computer Billing Service, Inc. to use my signature and to attest on my behalf to the requirements authorized in the following paragraphs, when submitting Medicaid claims on my behalf.

This is also to certify that information appearing on billings submitted by me for the Texas Medical Assistance Program is and will be true, accurate, and complete. I understand that payment of any Texas Medical Assistance Program claim will be from federal and state funds and that any falsification or concealment of a material fact may be prosecuted under federal and state laws. These certifications are made in accordance with requirements found at 42 Code Federal Regulations 455.18 and 455.19.

I also certify that the items billed to the Texas Medical Assistance Program are and will be for services that have been and will be personally provided by me or under my personal direction, and in cases of physician services, the services, supplies, or other items billed have been and will be medically necessary for the diagnosis or treatment of the condition of the patients, and are provided without regard to race, color, sex, national origin, age, or handicap.

Additionally, I agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the Texas Medical Assistance Program. I also agree to furnish them at no cost and provide access to information regarding any payments claimed for providing such services as the State Agency, Attorney General’s Office, and Department of Health and Human Services (HHS) Office may request for five years from date of service (6 years for freestanding rural health clinic; 10 years for hospital-based rural health clinic), or until any dispute is settled, whichever occurs first.

I agree to accept the amounts paid by the Medicaid Program as full payment for the services rendered for which a Medicaid benefit is provided under the Texas Medical Assistance Program.

This letter, to be retained in your files, bears my true and original signature:

7.1 Appeal Methods

An appeal is a request for reconsideration of a previously dispositioned claim.

Providers may use three methods to appeal Medicaid claims to Texas Medicaid & Healthcare Partnership (TMHP): electronic, Automated Inquiry System (AIS), or paper.

TMHP must receive all appeals of denied claims and requests for adjustments on paid claims within 120 days from the date of disposition of the Remittance and Status (R&S) Report on which that claim appears. If the 120-day appeal deadline falls on a weekend or holiday, the deadline is extended to the next business day.

Standard administrative requests and medical appeals must be sent first to TMHP or the claims processing entity as a first-level appeal. After the provider has exhausted all aspects of the appeals process for the entire claim, the provider may submit a second-level appeal to HHSC.

1) A first-level appeal is a provider's initial standard administrative or medical appeal of a claim that has been denied or adjusted by TMHP. This appeal is submitted by the provider directly to TMHP for adjudication and must contain all required information to be considered.

2) A second-level appeal is a provider's final medical or standard administrative appeal to HHSC of a claim that meets all of the following requirements:
   - It has been denied or adjusted by TMHP.
   - It has been appealed as a first-level appeal to TMHP.
   - It has been denied again for the same reason(s) by TMHP.

This appeal is submitted by the provider to HHSC, which may subsequently require TMHP to gather information related to the original claim and the first-level appeal. HHSC is the sole adjudicator of this final appeal.

All providers must submit second-level administrative appeals and exceptions to the 95-day filing deadline appeals to the following address:

Texas Health and Human Services Commission
HHSC Claims Administrator Contract Management
Mail Code 91X
PO BOX 204077
Austin, Texas 78720-4077

Note: TMHP is not responsible for managing appeals resulting from utilization review (UR) decisions by the HHSC Office of Inspector General (OIG) UR Unit. These must be submitted to HHSC Medical and UR Appeals.

Refer to: Subsection 7.3.4, “Utilization Review Appeals” in this section.

7.1.1 Electronic Appeal Submission

Electronic appeal submission is a method of submitting appeals using a personal computer. The electronic appeals feature can be accessed by a business organization (e.g., billing agents) interfacing directly with the TMHP Electronic Data Interchange (EDI) Gateway or through TexMedConnect, the free web-based application available from TMHP.

The Health Insurance Portability and Accountability Act (HIPAA) standard American National Standards Institute (ANSI) ASC X12 837 format is accepted by TMHP EDI.

For other information, contact the TMHP EDI Help Desk at 1-888-863-3638.
### 7.1.1 Advantages of Electronic Appeal Submission

Using electronic appeal submission provides the following advantages to the users:

- Increased accuracy of appeals filed to potentially improve cash flow.
- Maintained audit trails through print and download capabilities.
- Appeal submission windows can be automatically filled in with electronic R&S (ER&S) Report information, thereby reducing data entry time.

### 7.1.1.2 Disallowed Electronic Appeals

The following claims may not be appealed electronically:

- Claims that require supporting documentation (e.g., operative report, medical records, home health, hearing aid, and dental X-rays).
- Diagnosis-related group (DRG) assignment.
- Medicare crossovers.
- Claims listed as pending or in process with explanation of pending status (EOPS) messages.
- Claims denied as past filing deadline except when retroactive eligibility deadlines apply.
- Claims denied as past the payment deadline.
- Claims with additional quantity billed changes in the claims details.

**Exception:** Inpatient hospital claims denied for lack of a Hysterectomy Acknowledgment Statement or a Sterilization Consent Form may be appealed electronically if the requested form has been faxed according to the instructions in Form GN.5, “Hysterectomy Acknowledgement Form” in Gynecological and Reproductive Health, Obstetrics, and Family Planning Services Handbook (Vol. 2, Provider Handbooks).

### 7.1.2 Resubmission of TMHP Electronic Data Interchange (EDI) Rejections

TMHP EDI transactions that fail HIPAA edits are rejected, and the submitter receives a TMHP EDI Rejected Transaction Report. The Rejected Transaction Report lists activity by submitter, provider, and payer. Each rejection report includes member identifier, patient last name and first initial, patient control number (PCN), document control number (DCN), type of bill or place of service, charge, transaction from and to dates, receipt date, rejection code, and rejection description.

Providers who receive TMHP EDI Rejected Transaction Reports may resubmit an electronic claim within 95 days of the date of service. A paper appeal may also be submitted with a copy of the transaction rejection report within 120 days of the transaction rejection report to meet the filing deadline. A copy of the Rejected Transaction Report must accompany each corrected claim that is submitted on paper.

### 7.1.3 Automated Inquiry System (AIS) Appeals

The following appeals may be submitted using AIS:

- **Client Eligibility.** The client’s correct Medicaid number, name, and date of birth are required.
- **Provider Information (Excluding Medicare Crossovers).** The correct provider identifier is required for the billing provider, performing provider, referring provider, and limited provider. The name and address of the provider are required for the facility and outside laboratory.
- **Claim Corrections.** Providers may correct the following:
  - Patient control number (PCN)
  - Date of birth
  - Date of onset
The following appeals may not be appealed through AIS:

- Claims listed on the R&S Report as Incomplete Claims
- Claims listed on the R&S Report with $0 allowed and $0 paid
- Claims requiring supporting documentation (for example, operative report, medical records, home health, hearing aid, and dental X-rays)
- DRG assignment
- Procedure code, modifier, or diagnosis code
- Medicare crossovers
- Claims listed as pending or in process with EOPS messages
- Claims denied as past filing deadline except when retroactive eligibility deadlines apply
- Claims denied as past the payment deadline
- Inpatient Hospital claims requiring supporting documentation
- Third Party Liability (TPL)/Other insurance

Providers may appeal these denials either electronically or on paper.

Refer to: Subsection 7.1.1.2, “Disallowed Electronic Appeals” in this section to determine if these appeals can be billed electronically. If these appeals cannot be billed electronically, a paper claim must be submitted.

Exception: Inpatient hospital claims denied for lack of a Hysterectomy Acknowledgment Statement or a Sterilization Consent Form may be appealed if the requested form has been faxed according to the instructions under subsection 5.10, “Hysterectomy Services” in the Gynecological and Reproductive Health, Obstetrics, and Family Planning Services Handbook (Vol. 2, Provider Handbooks).

7.1.4 Automated Inquiry System Automated Appeals Guide

To access the AIS automated appeals guide, providers can call 1-800-925-9126. Providers may submit up to three fields per claim and 15 appeals per call. If during any step invalid information is entered three times, the call transfers to the TMHP Contact Center for assistance.

7.1.5 Paper Appeals

Claim appeal requests that cannot be appealed electronically or by using AIS may be appealed on paper. Completed claim forms are not required to be submitted with paper appeals. Providers who submit paper appeals must clearly document on the attached R&S Report the information that is being appealed and identify the claim being appealed.

If a provider determines that a claim cannot be appealed electronically or through AIS, the claim may be appealed on paper by completing the following:

1) Submit a copy of the R&S Report page on which the claim is paid or denied. A copy of other official notification from TMHP may also be submitted.
2) Submit one copy of the R&S Report for each claim appealed.
3) Circle only one claim per R&S Report page.
4) Identify the reason for the appeal.
5) If applicable, indicate the incorrect information and provide the corrected information that should be used to appeal the claim.
6) Attach a copy of any supporting medical documentation that is required or has been requested by TMHP. Supporting documentation must be on a separate page and not copied on the opposite side of the R&S Report.

**Note:** It is strongly recommended that providers submitting paper appeals retain a copy of the documentation being sent. It also is recommended that paper documentation be sent by certified mail with a return receipt requested. This documentation, along with a detailed listing of the claims enclosed, provides proof that the claims were received by TMHP, which is particularly important if it is necessary to prove that the 120-day appeals deadline has been met. If a certified receipt is provided as proof, the certified receipt number must be indicated on the detailed listing along with the Medicaid number, billed amount, date of service (DOS), and a signed claim copy. The provider may need to keep such proof regarding multiple claims submissions if the provider identifier is pending.

Medicare crossovers and inpatient hospital appeals related to medical necessity denials or DRG assignment/adjustment must be submitted on paper with the appropriate documentation.

Submit correspondence, adjustments, and appeals (including routine inpatient hospital claims) to the following address:

Texas Medicaid & Healthcare Partnership
Appeals/Adjustments
PO Box 200645
Austin, TX 78720-0645

**Exception:** Hospitals appealing HHSC OIG UR Unit final technical denials, admission denials, DRG revisions, continued-stay denials for Tax Equity and Fiscal Responsibility Act (of 1982) (TEFRA) Hospitals, or cost/day outliers must appeal to HHSC at the following address:

Texas Health and Human Services Commission
Medical and UR Appeals, H-230
PO Box 85200
Austin, TX 78708-5200

All other provider fields on the claim forms (referring, facility, admitting, operating, and other) require only an NPI.

Providers that choose to appeal the claim with NPI information must continue submitting both a TPI and an NPI until the claim is finalized.

**7.1.5.1 Texas Medicaid Fee-for-Service DRG Adjustment Appeal**

Texas Medicaid fee-for-service hospital providers who are appealing a DRG adjustment (higher weight DRG) must provide the original and revised UB-04 CMS-1450, the complete medical record, and a statement defining the reason for the requested change. Hospitals have 120 days from the date of the R&S Report to request an addition of a diagnosis or procedure resulting in a DRG adjustment. Providers appealing a DRG that has not been revised by the OIG Utilization Review Unit should appeal to TMHP.

**Refer to:** Subsection 7.3.4, “Utilization Review Appeals” in this section.
7.1.5.2 Medical Necessity Denial Appeals

Appeals of denials relating to medical necessity decisions made for all medical services with the exception of HHSC Inpatient UR cases may be submitted for further review if providers find denials are inappropriate. All necessary documentation must accompany the request for review. Incomplete appeals and adjustment requests are denied by TMHP with an explanation of benefits (EOB) code requesting additional information.

TMHP reviews each appeal (DRG adjustment and medical necessity) and forwards written notice of final action in the form of a letter or an adjustment transaction on the R&S Report.

7.1.5.3 Other Insurance Appeals

To appeal a claim denial due to other insurance coverage, the provider must submit complete other insurance information including the disposition date. The disposition date indicates when the other insurance company processed the payment or denial. An appeal submitted without this information will be denied.

If submitting a paper appeal the provider must submit EOBs containing disposition dates. If the disposition date appears only on the first page of an EOB that has multiple pages and the claim that being appeal is on a subsequent page, the provider must also include the first page of the EOB that shows the disposition date.

7.1.6 Appeals Submitted Incorrectly

If an incomplete appeal is received, it is returned to the sender with further appeal instructions and a request for more information. Documentation (either by letter or facsimile) that does not clearly indicate the reason for submission is returned to the sender for clarification.

If an appeal is received that may be more appropriately addressed in another department, the appeal is forwarded to the appropriate department for research and response.

If the TMHP Medical Director or designee identifies a pattern of ineffective use of the appeals process, the provider may be referred to a provider relations representative for assistance.

7.2 Refunds to TMHP

The TMHP Cash Reimbursement Unit is responsible for processing financial adjustments when any of the following occur: overpayment, duplicate payment, payment to incorrect providers, and overlapping payments by Medicaid and a TPR.

Providers have the option of refunding payments by issuing a check to TMHP or requesting a recoupment through the paper appeal process. The paper appeal process does not require a provider to issue a check because the refund amount is reduced on the R&S Report. To accurately process claim refunds, the TMHP Cash Reimbursement Unit requests that the refund check be accompanied by Form 7.2, “Texas Medicaid Refund Information Form” in this section, with the following information:

- Refunding provider’s name and provider identifier.
- Client’s name and Medicaid ID number.
- Date of service.
- A copy of the R&S Report showing the claim to which the refund is being applied.
- The specific reason for the refund.
- Name and address of the attorney or casualty insurance company (including the policy and claim number).
- TPR subscriber information.
- Amount of insurance payment.
To request the forms, contact the TMHP Contact Center at 1-800-925-9126, or write to the following address:

Texas Medicaid & Healthcare Partnership
Contact Center
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727

Refer to: Subsection 4.11, “Third Party Liability (TPL)” in Section 4, Client Eligibility (Vol. 1, General Information) for additional TPL information.

### 7.2.1 Refunds Resulting from Other Insurance Payments

Providers are prohibited from receiving payment from Medicaid, billing a TPR, and then refunding the lesser of the two payments to Medicaid.

Refunds owed to TMHP must not be held until the end of an accounting year. If within 12 months of the date of service a provider identifies a TPR and wants to submit a claim for payment, the provider must refund any amounts previously paid by TMHP before submitting the claim to the third party.

If private insurance paid for the services submitted on the claim, the provider must provide the exact amount paid, the insurance company’s name and address, and the client’s policy number and group number.

Providers are limited to the Medicaid payable amount and are required to accept the amount paid by TMHP as payment in full if:

- A claim for payment has been paid by TMHP.
- The provider failed to refund the payment to TMHP before submitting a claim for payment to a third party as outlined above.

Third party payments received after receipt of the TMHP payment must be refunded to TMHP in full, even if the amount paid by the third party insurer exceeds the Medicaid payment.

If the amount paid by a third party health insurer is less than the amount payable for the service by Medicaid, providers may bill TMHP for the difference between the amount paid by the third party health insurer and the Medicaid payable amount if the claim is filed timely and in accordance with all the applicable rules.

In accordance with Title 1 Texas Administrative Code (TAC) §§354.2321 [g] and 354.2322 [i], providers that do not follow TPR rules “may be referred for investigation and prosecution for violations of state or federal Medicaid or false claims laws.” Providers should refer to the full text of these rules for a full description of payment requirements.

### 7.3 Appeals to HHSC Texas Medicaid Fee-for-Service and PCCM

#### 7.3.1 Administrative Claim Appeals

An administrative appeal is a request for review of (not a hearing on) claims denied by TMHP or claims processing entity for technical and non medical reasons. There are two types of administrative appeals:

- **Exception requests to the 95-day filing deadline or 120-day appeal deadline.** A provider’s formal written request for review of (not a hearing on) a claim that is denied or adjusted by TMHP for failure to meet the 95-day filing deadline or 120-day appeal deadline. Exception requests to the 95-day filing deadline should meet one of the five exceptions in subsection 7.3.1.2, “Exceptions to the 95-Day Filing Deadline” in this section. Exceptions to the 120-day appeal deadline should meet one of the situations in subsection 7.3.1.3, “Exceptions to the 120-day Appeal Deadline” in this section.

- **Standard Administrative Appeal.** A provider’s formal written request for review of (not a hearing on) a claim or prior-authorization that is denied by TMHP for technical or non-medical reasons.
An administrative claims appeal is a request for a review as defined in Title 1 TAC §354.2201(2).

An administrative appeal must be:

- Submitted in writing to HHSC Claims Administrator Contract Management by the provider delivering the service or claiming reimbursement for the service.
- Received by HHSC Claims Administrator Contract Management after the appeals process with TMHP or the claims processing entity has been exhausted, and must contain evidence of appeal dispositions from TMHP or the claims processing entity:
  - All correspondence and documentation from the provider to TMHP or the claims processing entity including copies of supporting documentation submitted during the appeal process.
  - All correspondence from TMHP or the claims processing entity to the provider including TMHP’s final decision letter or such from the claims processing entity.
- Complete and contain all of the information necessary for consideration and determination by HHSC Claims Administrator Contract Management to include the following:
  - A written explanation specifying the reason/request for appealing the claim.
  - Supporting documentation for the request.
  - All R&S Reports identifying the claims/services in question.
  - Identification of the incorrect information and the corrected information that is to be used to appeal the claim.
  - A copy of the original claim, if available. Claim copies are helpful when the appeal involves medical policy or procedure coding issues. Also provide a corrected signed claim.
  - A copy of supporting medical documentation that is necessary or requested by TMHP.
  - Provider’s internal notes and logs or ticket numbers from the TMHP Contact Center when pertinent (cannot be used as proof of timely filing).
  - Memos from the state, TMHP, or claims processing entity indicating any problems, policy changes, or claims processing discrepancies that may be relevant to the appeal.
  - Other documents, such as receipts (i.e., certified mail along with a detailed listing of the claims enclosed), in-service notes, minutes from meetings, if relevant to the appeals. Receipts can be helpful when the issue is late filing.
- Received by HHSC Claims Administrator Contract Management within 120 days from the date of disposition by TMHP or the claims processing entity as evidenced by the weekly R&S Report.

Providers who have submitted their claims electronically must identify the batch submission ID with the date on the electronic claims report. This report must indicate the TMHP assigned batch ID. In addition, this report must include the individual claim that is being appealed. The claim information on the batch report, including date of service and billed amount, must match the information on the claim that is being appealed. This required information constitutes proof of timely filing.

**Note:** Only reports accepted/rejected from TMHP or the claims processing entity to the vendor will be honored unless the provider is a direct submitter (TexMedConnect). Office notes indicating claims were submitted on time or personal screen prints of claim submissions are not considered proof of timely filing.

HHSC Claims Administrator Contract Management only reviews appeals that are received within 18 months from the DOS. All claims must be paid within 24 months from the DOS as outlined in 1 TAC §354.1003.
Providers must adhere to all filing and appeal deadlines for an appeal to be reviewed by HHSC Claims Administrator Contract Management. The filing and appeal deadlines are described in 1 TAC §354.1003.

Additional information requested by HHSC Claims Administrator Contract Management must be returned to HHSC Claims Administrator Contract Management within 21 calendar days from the date of the letter from HHSC Claims Administrator Contract Management. If the information is not received within 21 calendar days, the case is closed.

A determination made by HHSC Claims Administrator Contract Management is the final decision for claim appeals. No additional consideration is available. Therefore, ensure that all documents pertinent to the appeal are submitted. New evidence is required for an additional appeal to HHSC Claims Administrator Contract Management.

Mail appeal requests to the following address:

Texas Health and Human Services Commission
HHSC Claims Administrator Contract Management
Mail Code-91X
PO Box 204077
Austin, Texas 78720-4077

7.3.1.1 Requirements for Exception Requests

HHSC Claims Administrator Contract Management makes the final decision on whether claims fall within one of the exceptions to the 95-day or 120-day filing deadlines.

Providers must submit the following documentation for all exception requests:

- Exception requests must be in writing and mailed directly to HHSC.
- Adequate back-up documentation must accompany the exception request. Failure to provide adequate documentation results in the case being closed. Providers are notified of the reason for denial.
- All claims that are to be considered for an exception must accompany the request. HHSC will consider only the claims that are attached to the request.
- Additional claims cannot be added to an exception request after the exception request has been completed by HHSC. Additional claims must be submitted as a separate request and must include all required documentation. Information from a previous request will not be linked by HHSC to process additional claims.
- All exception requests must include an affidavit or statement from the provider stating the details of the cause for the delay, the exception being requested, and verification that the delay was not caused by neglect, indifference, or lack of diligence of the provider or the provider’s employee or agent. This affidavit or statement must be made by the person with personal knowledge of the facts.
- Multiple requests submitted simultaneously must be sorted by provider identifier first, and then alphabetically by client name. The orderly submission of exception requests facilitates the review process. Exception requests are returned to the provider if not submitted in the required format.

HHSC may request additional information which must be received within 21 calendar days from the date of the letter from HHSC. If the information is not received within 21 calendar days, the case will remain closed.

HHSC notifies providers about the outcome of the case upon completion of an exception request review.
7.3.1.2 Exceptions to the 95-Day Filing Deadline

HHSC Claims Administrator Contract Management is responsible for reviewing requests for exceptions to the 95-day filing deadline (Texas Medicaid fee-for-service and Primary Care Case Management [PCCM]). Only providers can submit exception requests. Requests from billing companies, vendors, or clearinghouses are not accepted unless accompanied by a signed authorization from the provider (with each appeal). Without provider authorization, these requests are returned without further action.

HHSC will only consider exceptions to the 95-day filing deadline for claims that are submitted within the 365-day federal filing deadline from the date of service as outlined in 1 TAC §354.1003.

Exceptions to the filing deadline are considered when one of the following situations exists:

- Catastrophic event that substantially interferes with normal business operations of the provider, or damage or destruction of the provider’s business office or records by a natural disaster, including, but not limited to, fire, flood, or earthquake; or damage or destruction of the provider’s business office or records by circumstances that are clearly beyond the control of the provider, including, but not limited to, criminal activity. The damage or destruction of business records or criminal activity exception does not apply to any negligent or intentional act of an employee or agent of the provider because these persons are presumed to be within the control of the provider. The presumption can only be rebutted when the intentional acts of the employee or agent lead to termination of employment and filing of criminal charges against the employee or agent.

  Providers requesting an exception for catastrophic events must include independent evidence of insurable loss; medical, accident, or death records; or police or fire report substantiating the exception of damage, destruction, or criminal activity.

- Delay or error in the eligibility determination of a client, or delay due to erroneous written information from HHSC, its designee, or another state agency.

  Providers requesting an exception for the delay or error in the eligibility determination of a client or delay due to erroneous written information from HHSC, its designee, or another state agency must include the written document from HHSC or its designee that contains the erroneous information or explanation of the delayed information.

- Delay due to electronic claim or system implementation problems experienced by HHSC, its designee, or Texas Medicaid providers.

  Providers requesting an exception for the delay due to electronic claim or system implementation problems experienced by HHSC, its designee, or Texas Medicaid providers must include the written repair statement, invoice, computer or modem generated error report (indicating attempts to transmit the data failed for reasons outside the control of the provider), or the explanation for the system implementation problems.

  The documentation must include a detailed explanation made by the person making the repairs or installing the system, specifically indicating the relationship and impact of the computer problem or system implementation to claims submission, and a detailed statement explaining why alternative billing procedures were not initiated after the delay in repairs or system implementation was known.

If the provider is requesting an exception based upon an electronic claim or system implementation problem experienced by HHSC or its designee, the provider must submit a written statement outlining the details of the electronic claim or system implementation problems experienced by HHSC or its designee that caused the delay in the submission of claims by the provider, any steps
taken to notify the state or its designee of the problem, and a verification that the delay was not caused by the neglect, indifference, or lack of diligence on the part of the provider or its employees or agents.

- Submission of claims occurred within the 365-day federal filing deadline, but the claim was not filed within 95 days from the date of service because the service was determined to be a benefit of the Medicaid program, and an effective date for the new benefit was applied retroactively.

Providers requesting an exception for claims that were submitted within the 365-day federal filing deadline, but were not filed within the 95-days of the date of service because the service was determined to be a benefit of Texas Medicaid and an effective date for the new benefit was applied retroactively, must include a written, detailed explanation of the facts and documentation to demonstrate the 365-day federal filing deadline for the benefit was met.

- Client eligibility is determined retroactively and the provider is not notified of retroactive coverage.

Providers requesting an exception for client eligibility determined retroactively and the provider is not notified of retroactive coverage must include a written, detailed explanation of the facts and activities illustrating the provider's efforts in requesting eligibility information for the client. The explanation must contain dates, contact information, and any responses from the client.

### 7.3.1.3 Exceptions to the 120-day Appeal Deadline

HHSC must receive a written exception request within 120 days of TMHP’s final action. HHSC shall consider exceptions to the 120-day appeal deadline for the situations listed below. This is a one-time exception request; therefore, all claims that are to be considered within the request for an exception must accompany the request. Claims submitted after HHSC’s determination has been made for the exception will be denied consideration because they were not included in the original request.

- An exception request must be received by HHSC within 18 months from the date of service to be considered. This requirement will be waived for the exceptions listed in the following bullets (b) and (c), as well as the situation listed under “Exceptions to the 24-month deadline.”

- The following exceptions to the 120-day appeal deadline are considered if the criteria in the previous bullet is met and there is evidence to support one of the bullets below:
  - (a) Errors made by a third party payor that were outside the control of the provider. The provider must submit a statement outlining the details of the cause for the error, the exception being requested, and verification that the error was not caused by neglect, indifference, or lack of diligence of the provider, the provider’s employee, or agent. This affidavit or statement should be made by the person with personal knowledge of the facts. In lieu of the above affidavit or statement from the provider, the provider may obtain an affidavit or statement from the third party payor including the same information, and provide this to HHSC as part of the request for appeal.
  
  - (b) Errors made by the reimbursement entity that were outside the control of the provider. The provider must submit a statement from the original payor outlining the details of the cause of the error, the exception being requested, and verification that the error was not caused by neglect, indifference, or lack of diligence on the part of the provider, the provider’s employee, or agent. In lieu of the above reimbursement entity’s statement, the provider may submit a statement including the same information and provide this to HHSC as part of the request for appeal.
  
  - (c) Claims were adjudicated, but an error in the claim’s processing was identified after the 120-day appeal deadline. The error is not the fault of the provider. An error occurred in the claims processing system that is identified after the 120-day appeal deadline has passed.
7.3.1.4 Exceptions to the 24-Month Payment Deadline

HHSC shall consider exceptions to the 24-month claims payment deadline for the situations listed below. The final decision about whether a claim falls within one of the exceptions will be made by HHSC.

- **Refugee Eligible Status**: The payable period for all Refugee Medicaid-eligible client claims is the federal fiscal year in which each date of service occurs plus one additional federal fiscal year. The date of service for inpatient claims is the discharge date.

- **Medicare/Medicaid Eligible Status**: The payable period for Medicaid-Medicare-eligible client claims filed electronically is 24 months from the date the file is received from Medicare by TMHP or the claims processing entity. The payable period for Medicaid-Medicare-eligible client claims filed on paper is 24 months from the date listed on the Medicare Remittance Advice.

- **Retroactive Supplemental Security Income (SSI) Eligible**: The payable period for SSI Medicaid-eligible clients when the Medicaid eligibility is determined retroactively is 24 months from the date the Medicaid eligibility is added to the eligibility file. The date is referred to as the “add date.”

Mail exception requests to HHSC at the following address:

Texas Health and Human Services Commission  
HHSC Claims Administrator Contract Management  
Mail Code 91X  
PO Box 204077  
Austin, TX 78720-4077

**Note:** Medicaid health maintenance organization (HMO) providers must communicate with their respective HMOs regarding appeals related to the filing deadline or any exception request policy. HHSC Claims Administrator Contract Management does not have the authority to manage these appeals.

7.3.2 Medical Necessity Appeals

Medical necessity appeals are defined as disputes regarding medical necessity of services. Providers must appeal to TMHP and exhaust the appeal/grievance process before submitting an appeal to HHSC.

Medical necessity appeals related to UR decisions made by the HHSC OIG UR Unit *must* be appealed to HHSC *not* TMHP.

When filing appeals to HHSC, providers must submit copies of all supporting documentation, including information sent to TMHP.

**Refer to:** Subsection 7.1.5.1, “Texas Medicaid Fee-for-Service DRG Adjustment Appeal” in this handbook for additional information.

7.3.3 PCCM DRG Adjustment Appeals

PCCM-contracted hospitals may appeal to the HHSC Medical & UR Appeals Unit only if they have followed the prior authorization process with TMHP. The Medical and UR Appeals Unit must receive the written appeal request within 120 days of the date of the last R&S Report. If the request is not received within 120 days, the appeal is not conducted, and the TMHP decision is considered final. The request must include a copy of the complete medical record, an original, signed, properly completed, and notarized affidavit in the format approved by HHSC (see Form 7.1, “Business Records Affidavit Form” in this section), and a letter explaining the reason for the appeal. Extensions of time are not granted for filing the written appeal request, submitting the complete medical record, or submitting the original, properly completed, and notarized affidavit in the format approved by HHSC.

**Important:** Only claims denied for medical necessity may be appealed to and reviewed by the HHSC Medical & UR Appeals Unit. Claims that received a technical denial are not reviewed by the HHSC Medical & UR Appeals Unit.
Refer to: Subsection 8.6.17.9, “Appeals of Denied Requests for Authorization” in Section 8, “Managed Care” (Vol. 1, General Information) for additional information about the PCCM inpatient authorization process.

7.3.4 Utilization Review Appeals

Hospitals may appeal adverse UR decisions made by the HHSC OIG UR Unit to the HHSC Medical and UR Appeals Unit. The written appeal request, with complete medical record and approved affidavit in section 6.5 of this handbook, must be received by the Medical and UR Appeals Unit within 120 days of the date of the original HHSC OIG UR decision letter. If the request is not received within 120 days, the appeal is not conducted, and the HHSC OIG UR decision is considered final. Any claim the facility may have to the Medicaid funds at issue are barred. Extensions of time are not granted for filing the written appeal request, submission of the complete medical record, or the original, properly completed, notarized affidavit in the format approved by HHSC. Procedures and specific requirements for appealing these decisions can be found in the sections that follow.

Hospitals may appeal adverse HHSC OIG UR Unit determinations to the following address:

Texas Health and Human Services Commission
Medical and UR Appeals, H-230
PO Box 85200
Austin, TX 78708-5200

Note: UR Admission Denials, Continued Stay Denials, DRG Revisions, Cost/Day Outlier Denials, or Technical Denials issued by Medicaid managed care organizations (MCOs) must be appealed to the appropriate health plan. The HHSC Medical and UR Appeals Unit does not have the authority to manage these appeals.

7.3.4.1 Admission Denials, Continued Stay Denials for TEFRA Hospitals, DRG Revisions, and Cost/Day Outlier Denials

If a hospital is dissatisfied with the original retrospective review conducted by the HHSC OIG UR Unit, it may submit a written request for an appeal to the HHSC Medical and Utilization Review Appeals Unit. The HHSC Medical and UR Appeals Unit is responsible for conducting an independent review in response to a provider’s appeal. The professional staff uses only the documentation submitted in the medical record to determine whether an inpatient admission was appropriate and whether the diagnoses and procedures were correct. The HHSC UR and Medical Appeals physician performs a complete review for the medical necessity of inpatient admission, DRG validation, quality of care, continued stay medical necessity, and ancillary charges (TEFRA cases) using the medical record documentation submitted on appeal. After completion of the review, the physician renders a final decision on the case. The final decision may include determinations regarding multiple aspects of the admission. The hospital is notified in writing of the final decision. Inpatient admission denials cannot be rebilled as outpatient claims except as noted in subsection 2.3.3.7, “Hospital Outpatient Observation Room Services” in Hospital Services Handbook (Vol. 2, Provider Handbooks).

The request for an appeal must include a copy of the complete medical record, a letter explaining the reasons why the HHSC OIG UR decision is incorrect, a copy of the HHSC OIG UR decision letter, and an original, properly completed, and notarized affidavit in the format approved by HHSC. The affidavit allows the hospital to certify the record as a business and legal document. Complete medical records must be provided to HHSC at no charge. A complete medical record must include, but is not limited to, a discharge summary, history and physical, emergency room record, operative report, pathology report, anesthesia record, consultation reports, physician progress notes, physician orders, laboratory reports, X-ray reports, special diagnostic reports, nurses’ notes, and medication records.

Refer to: Form 7.1, “Business Records Affidavit Form” in this section.
The HHSC Medical UR Unit will notify hospitals if a complete medical record or a properly completed, notarized affidavit is not submitted with the initial appeal request. The hospital has 21 calendar days from the date of notification to submit the requested information. If the required documentation is not received within this time frame, the case is closed without an opportunity for further review, and the original HHSC OIG UR decision is considered the final decision.

If the hospital is displeased with the appeals decision, the attending physician or medical director of the hospital may request an educational conference with the HHSC Medical and UR Appeals physician. The educational conference is held by telephone between the physician and the hospital medical director or attending physician. This is an opportunity for the physicians to discuss the deciding factors in the case and any hospital billing processes that may have affected the adjudication of the case. The educational conference will not alter the previous appeal decision.

The HHSC Medical and Utilization Review Unit recognizes that hospital staff may use guidelines, such as the American Hospital Association’s Coding Clinic, to assist them in identifying diagnoses or procedures for statistical and billing purposes. However, the HHSC Medical and Utilization Review Appeals Unit determines the appropriate diagnoses or procedures for reimbursement purposes using the documentation in the medical record (submitted on appeal) and the following guidelines:

- **Principal diagnosis assignment.** The diagnosis (condition) established after study to be chiefly responsible for causing the admission of the client to the hospital for care. The principal diagnosis must be treated or evaluated during the admission to the hospital.

- **Secondary diagnosis assignment.** Conditions that affect patient care in terms of requiring clinical evaluation, therapeutic treatment, diagnostic procedures, extended length of hospital stay, or increased nursing care or monitoring, or, in the case of a newborn (birth through 28 days of age), which the physician deems to have clinically significant implications for future health care needs. Normal newborn conditions or routine procedures should not be considered as complications or comorbidities for DRG assignment.

If the principal diagnosis, secondary diagnoses, or procedures are not substantiated in the medical record, not sequenced correctly, or have been omitted, the codes may be changed, added, or deleted by the HHSC Medical and UR Appeals physician. When it is determined the diagnoses or procedures are substantiated and sequenced correctly, a final DRG assignment is made.

### 7.3.4.2 Final Technical Denials

Hospitals may submit a request for a written appeal to HHSC Medical and UR Appeals only if the hospital has evidence that the HHSC OIG UR Unit issued a final technical denial in error, or did not provide proper notification of the preliminary technical denial. The request must include a letter explaining the reasons why the HHSC OIG UR decision is incorrect and a copy of the HHSC OIG UR decision letter.

The written appeal request must be received by HHSC Medical and UR Appeals within 120 days of the date of the original HHSC OIG UR decision letter. If the request is not received within the 120 days, the appeal is not conducted and the HHSC OIG UR decision is considered final. Any claim the facility may have to the Medicaid funds at issue are barred. Extensions of time are not granted for filing the written appeal request.

If the appeal time frame is met, the HHSC Medical and UR Appeals Unit reviews all the documentation and renders a final decision on the case. If it is determined the technical denial was issued correctly by the HHSC OIG UR Unit, HHSC’s decision is upheld. The hospital is notified in writing of the decision. This decision is the final decision.

If it is determined that the final technical denial decision should be overturned, the HHSC Medical and UR Appeals Unit will request a copy of the complete medical record and an original, properly completed, notarized affidavit in the format approved by HHSC. The affidavit allows the hospital to certify the record as a business and legal document. The HHSC Medical and UR Appeals physician
performs a complete review for the medical necessity of the admission, DRG validation, quality of care or continued stay, and ancillary charges (for TEFRA Hospitals) using only the medical record documentation. After completion of the review, the physician renders a final decision on the case. The hospital is notified in writing of the final decision.

If the requested documentation is not received within the required 21-day time frame, the case is closed without further opportunity for review and the original HHSC OIG UR decision is considered final.

7.3.5 Provider Complaints

TMHP provides for due process for resolving all provider complaints. A complaint is defined as any dissatisfaction expressed by telephone or in writing by the provider, or on behalf of that provider, concerning Texas Medicaid. The definition of complaint does not include a misunderstanding or a problem of misinformation that is resolved promptly by clearing up the misunderstanding or supplying the appropriate information to the provider’s satisfaction. The definition also does not include a provider’s oral or written dissatisfaction with an adverse determination or appeals regarding claim payments and denials.

Procedures governing the provider complaints process are designed to identify and resolve provider complaints in a timely and satisfactory manner. Most complaints are resolved within 30 calendar days. Complaints to TMHP may be submitted using the following methods:

- By telephone at 1-800-925-9126 or 1-888-834-7226 for PCCM complaints
- By fax to 1-888-235-8399
- In writing to:

  TMHP
  Complaints Resolution Department
  PO Box 204270
  Austin, TX 78720-4270

Questions regarding the complaint process or the status of a complaint should be directed to the TMHP Contact Center at 1-800-925-9126, or the PCCM Helpline at 1-888-834-7226.

7.3.5.1 Provider Complaint Policy

TMHP takes seriously and acts on each provider complaint. Depending on the level and nature of the complaint, TMHP works with the provider to resolve the issue or directs the complaint to the appropriate department.

- Medical Affairs Division. Complaints that relate to utilization of services (including ER use), denial of continued stay, and all clinical and access issues. This includes provider’s appeal of an adverse authorization decision.
- PCCM Administration. Complaints that concern the relationship between a provider and any PCCM staff person or complaints about overall plan management.

If the complaint relates to a medical issue, the Medical Affairs Division staff may assist in resolving the complaint. The provider complaints process applies only to the resolution of disputes within the control of Texas Medicaid and PCCM, such as administrative or medical issues. The provider complaint process does not apply to allegations of negligence against third parties, including other Texas Medicaid or PCCM providers. These complaints are referred to HHSC for review and evaluation and are resolved by HHSC.
7.3.5.2 Provider Complaint Process

The TMHP Complaints Resolution Department Unit handles all provider complaints. The processing of a provider’s complaint is described as follows:

- Providers must submit their complaint by telephone or in writing (mail or fax). All requests to remove clients from panel reports must be submitted in writing (see subsection 8.1.7.3, “Provider-Initiated PCP Changes” in Section 8, “Managed Care” (Vol. 1, General Information).
- Providers will receive a written acknowledgement letter from TMHP within five business days of receipt of the complaint.
- Referrals to other departments, such as Provider Relations or Medical Affairs, are made when appropriate.
- Complaints dealing with the quality of, access to, or continuity of care are referred to the PCCM Primary Care Provider Contract Compliance Department for follow up and inclusion in the provider file.
- If the complaint cannot be resolved within 30 calendar days, the provider is notified in writing of the status of the complaint.

Providers who believe they did not receive due process regarding their complaint from TMHP may file a complaint with HHSC. Providers are encouraged to utilize the appeals/grievance process with TMHP before filing a complaint with HHSC.

Refer to: Subsection 8.1.11, “Medicaid Managed Care Complaints and Fair Hearings” in Section 8, “Managed Care” (Vol. 1, General Information).

7.3.5.3 Complaints to HHSC—Texas Medicaid Fee-for-Service and PCCM

Texas Medicaid fee-for-service and PCCM providers may file complaints to the HHSC Claims Administrator Contract Management if they find they did not receive full due process from TMHP in the management of their appeal. Texas Medicaid fee-for-service and PCCM providers must exhaust the appeals/grievance process with TMHP before filing a complaint with the HHSC Claims Administrator Contract Management.

Refer to: Subsection 7.3, “Appeals to HHSC Texas Medicaid Fee-for-Service and PCCM” in this section for information about submission of an appeal to HHSC.

A complaint is defined as any dissatisfaction expressed in writing by the provider, or on behalf of that provider, concerning Texas Medicaid. The term complaint does not include the following:

- A misunderstanding or a problem of misinformation that is resolved promptly by clearing up the misunderstanding or supplying the appropriate information to the provider’s satisfaction.
- A provider’s oral or written dissatisfaction with an adverse determination.

Under the complaint process, the HHSC Claims Administrator Contract Management works with TMHP and providers to verify the validity of the complaint, determine if the established due process was followed in resolving appeals and grievances, and addresses other program and contract issues, as applicable.

Complaints must be in writing and received by the HHSC Claims Administrator Contract Management within 60 calendar days from TMHP’s written notification of the final appeal decision.

When filing a complaint, providers must submit a letter explaining the specific reasons they believe the final appeal decision by TMHP is incorrect and copies of the following documentation:

- All correspondence and documentation from the provider to TMHP, including copies of supporting documentation submitted during the appeal process.
- All correspondence from TMHP to the provider, including TMHP’s final decision letter.
• All R&S Reports of the claims/services in question, if applicable.
• Provider’s original claim/billing record, electronic or manual, if applicable.
• Provider’s internal notes and logs when pertinent.
• Memos from the state or TMHP indicating any problems, policy changes, or claims’ processing discrepancies that may be relevant to the complaint.
• Other documents, such as certified mail receipts, original date-stamped envelopes, in-service notes, or minutes from meetings if relevant to the complaint. Receipts can be helpful when the issue is late filing.

Complaint requests may be mailed to the following address:

Texas Health and Human Services Commission
HHSC Claims Administrator Contract Management
Mail Code 91X
PO Box 204077
Austin, TX 78720-4077

7.3.5.4 Complaints to HHSC—HMO Services

Medicaid Managed Care providers (HMOs) may file complaints to HHSC Health Plan Management if they find they did not receive full due process from the HMOs. HHSC is only responsible for the management of complaints from managed care providers. Appeals/grievances, hearings, or dispute resolutions are the responsibility of the health plans. Providers must exhaust their appeals/grievance process with their health plan before filing a complaint with HHSC.

A complaint is defined as any dissatisfaction expressed in writing by the provider, or on behalf of that provider, concerning any aspect of Texas Medicaid.

The term complaint does not include the following:

• A misunderstanding or a problem of misinformation that is resolved promptly by clearing up the misunderstanding or supplying the appropriate information to the provider’s satisfaction.
• A provider’s oral or written dissatisfaction with an adverse determination.

Under the complaint process, HHSC works with the health plans and providers to verify the validity of the complaint, determine if the established due process was followed in resolving appeals and grievances, and addresses other program/contract issues, as applicable.

Complaints must be in writing and received by HHSC within 60 calendar days from the health plan’s written notification of the final action.

When filing a complaint, providers must submit a letter explaining the specific reasons they believe the final appeal decision by the health plan is incorrect and copies of the following documentation:

• All correspondence and documentation from the provider to the health plan, including copies of supporting documentation submitted during the appeals process.
• All correspondence from the health plan to the provider. Correspondence includes the initial determination letter; all appeal determination letters, and the final decision letter.
• All R&S Reports of the claims/services in question, if applicable.
• Provider’s original claim/billing record, electronic or manual, if applicable.
• Provider’s internal notes and logs when pertinent.
• Memos from the state or the health plan indicating any problems, policy changes, or claims processing discrepancies that may be relevant to the complaint.
• Other documents such as certified mail receipts, original date-stamped envelopes, in-service notes, or minutes from meetings if relevant to the complaint. Receipts can be helpful when the issue is late filing.

Complaint requests for HMOs may be mailed to the following address:

Texas Health and Human Services Commission
Re: Provider Complaint
Health Plan Management, H-320
PO Box 85200
Austin, TX 78708

7.3.5.5 Complaints to DSHS—BHO Services

Medicaid Managed Care providers for NorthSTAR may file complaints to any of the following 3 entities:

• ValueOptions (the NorthSTAR behavioral health organization [BHO])
• DSHS NorthSTAR Enrollee Provider Services
• North Texas Behavioral Health Authority (NTBHA)

A complaint is defined as any dissatisfaction expressed in writing by the provider, or on behalf of that provider, concerning any aspect of Texas Medicaid. The term complaint does not include a misunderstanding or a problem of misinformation that is resolved promptly by clearing up the misunderstanding or supplying the appropriate information to the provider’s satisfaction.

Providers must exhaust the appeals process with the BHO. Appeals or complaints to the BHO may be mailed or submitted by phone to:

ValueOptions NorthSTAR
ATTN: Complaint and Grievance Coordinator
1199 South Beltline Road, Suite 100
Coppell, TX 75019
1-888-800-6799

If the provider disagrees with the final appeal decision by the BHO, they can contact DSHS NorthSTAR Enrollee and Provider services or NTBHA for further review. Providers should submit documentation stating the specific reasons why they disagree with the final appeal decision by the BHO and copies of the following documentation:

• All correspondence and documentation from the provider to the BHO, including copies of supporting documentation submitted during the appeals process.
• All correspondence from the BHO to the provider

Note: Correspondence includes the initial determination letter, all appeal determination letters, and the final decision letter.

• The provider’s original claim or billing record, if applicable
• The provider’s internal notes and logs, if applicable
• Memos from the state or the BHO indicating any problems, policy changes, or claims processing discrepancies that may be relevant to the appeal
Complaints may be mailed or submitted by phone to:

Texas Department of State Health Services  
ATTN: NorthSTAR Enrollee and Provider Services  
Mail Code 2012  
P.O. Box 149347  
Austin, TX 78714-9347  
1-800-252-8154  
1-512-206-5551

North Texas Behavioral Health Authority  
1201 Richardson Drive, Ste. 270  
Richardson, TX 75080  
1-877-653-6363

7.4 Cost Report Settlement Appeal Process
A provider who is dissatisfied with the determination contained in the Notice of Program Reimbursement (NPR) from TMHP Medicaid Audit may request an appeal as follows:

- The request for appeal must be in writing.
- The request for appeal must be filed within 180 calendar days from the date of receipt of the NPR.
- If the amount in controversy is at least $1,000, the request for the appeal must be filed with TMHP Medicaid Audit.
- If the NPR shows that the provider is indebted to Texas Medicaid, TMHP must take the necessary action to recover the overpayment, including a suspension of interim payments. This process will take place even if an appeal has been requested.

7.4.1 Appeals to TMHP Medicaid Audit
A provider’s request to appeal his or her NPR must include the following:

- Identify specific individual items in TMHP Medicaid Audit’s determination with which the provider disagrees.
- Give the reasons the provider believes these are incorrect.
- Identify the amount in controversy for each item and provide a calculation of that amount.

The appeal may include any materials the provider believes will support its position.

TMHP Medicaid Audit completes a desk review of the appeal within six months of the date of receipt of complete documentation supporting the appeal. TMHP does the following:

- Reviews the materials submitted by the provider.
- Informs the provider if it appears that the request for an appeal was not timely or the amount of controversy is not at least $1,000.
- Reviews the record that formed the basis for the determination of the total payment due to the provider.
- Attempts to resolve as many points in controversy as possible with the provider and inform him or her in writing the issues that have been resolved and those that the provider may appeal to HHSC.
- Ensures all available documentation in support of the provider or TMHP Medicaid Audit is part of the record.
To appeal to TMHP Medicaid Audit, send the written notice within 120 days of receipt of the NPR letter to the following address:

Texas Medicaid & Healthcare Partnership
Medicaid Audit Operations Director
PO Box 200345
Austin, TX 78720-0345

8.1 Medicaid Managed Care

Texas Medicaid, administered by the Texas Health and Human Services Commission (HHSC), operates the Medicaid managed care program under the authority of federal waivers and state plan amendments approved by the Centers for Medicare & Medicaid Services (CMS).

8.1.1 Overview

The Texas Medicaid managed care program was originally called the State of Texas Access Reform (STAR) Program and was established to explore different methods of building a framework of managed care around segments of Texas Medicaid. In 1995, the Texas Legislature adopted Senate Bill 10 and related legislation that authorized HHSC to undertake a comprehensive restructuring of Texas Medicaid to incorporate managed care delivery systems statewide.

Currently, the Medicaid managed care program consists of two types of health-care delivery systems: health maintenance organizations (HMOs) and Primary Care Case Management (PCCM). The STAR, STAR+PLUS, and STAR Health programs use HMOs to deliver services, but PCCM does not use HMOs. STAR and STAR+PLUS provide services in a select grouping of counties known as service areas (SAs). STAR is available in 9 SAs comprised of 52 metropolitan counties and STAR+PLUS is available in 5 SAs comprised of 29 metropolitan counties. PCCM provides services in the remaining rural 202 counties that consists of 11 regions. Medicaid managed care also uses a behavioral health organization (BHO) in the NorthSTAR program. NorthSTAR provides behavioral health services in the Dallas Service Area. STAR Health is available statewide for some children in foster care.

The principle objectives of Medicaid managed care are to emphasize early intervention and to promote improved access to quality care, thereby significantly improving health outcomes for the target population, with a special focus on prenatal and well-child care.

Clients enrolled in any of the Medicaid managed care programs may reside in metropolitan or rural areas. These programs include:

- **The STAR Program.** Operates under a 1915(b) waiver and provides acute care medical assistance in a Medicaid managed care environment for clients who reside in the Bexar, Dallas, El Paso, Harris, Harris Expansion, Lubbock, Nueces, Tarrant, and Travis SAs (see subsection 8.2, “STAR Program” in this section).

- **The STAR+PLUS Program.** Operates under a 1915(b) waiver and 1915(c) waiver and provides integrated acute and long term services and supports in a Medicaid managed care environment for clients who reside in the Bexar, Harris, Harris Expansion, Nueces, and Travis SAs (see subsection 8.3, “STAR+PLUS Program” in this section).

- **The NorthSTAR Program.** Administered by the Department of State Health Services (DSHS), operates under a 1915(b) waiver and provides integrated behavioral health services under contract with a behavioral health organization (BHO) for clients who reside in the Dallas SA (see subsection 8.4, “NorthSTAR Program” in this section).

- **The PCCM Program.** Administered by Texas Medicaid & Healthcare Partnership (TMHP), operates under a state plan amendment and provides acute care services for clients who reside in the 202 rural Texas counties (see subsection 8.6, “PCCM” in this section).

- **STAR Health.** Administered by Superior HealthPlan Network, operates under a 1915(a) waiver, and is a Medicaid managed care program that manages the health care for some children who are enrolled in foster care. Some foster care clients are enrolled in the Permanency Care Assistance (PCA) program and are not considered eligible for enrollment in Medicaid managed care. STAR Health provides services statewide (see subsection 8.5, “STAR Health Program” in this section).

The goals of Medicaid managed care are to:

- Improve access to care for clients enrolled in the programs.
• Increase quality and continuity of care for clients.
• Decrease inappropriate usage of the health-care delivery system, such as emergency rooms (ERs) for nonemergencies.
• Achieve cost-effectiveness and efficiency for the state.
• Promote provider and client satisfaction.

Additional goals for the STAR+PLUS program include:
• Integrating acute and long-term services and supports.
• Coordinating Medicare services for clients who are dual eligible.

Higher use of medical services by Texas Medicaid fee-for-service clients occurs when clients obtain care through ERs or access duplicate services for the same medical condition. In Medicaid managed care, clients assume a responsible role in achieving their personal health care by choosing a primary care provider (PCP), then actively participating with their PCP to access preventive primary care services. This collaborative approach to health-care delivery usually achieves cost savings for Texas Medicaid by reducing duplicate services and unnecessary emergency and inpatient care.

Although many of the Medicaid managed care requirements are similar, each program has established specific objectives, eligibility and enrollment requirements, and claims filing processes, which are detailed in this section.

8.1.2 Texas Medicaid Benefits by Program

The following table lists information about some of the Texas Medicaid benefits and limitations:

### 8.1.3 Authorizations and Claim Processing Exceptions by Program

- **The STAR Program.** MCO authorizes and pays most claims, except for carve outs and Supplemental Security Income (SSI) client claims (El Paso and Lubbock). For STAR SSI clients, the MCOs authorize the services and TMHP pays the claims.

- **The STAR+PLUS Program.** MCO authorizes and pays professional claims. MCO authorizes inpatient services, TMHP pays the inpatient claim (inpatient claims with behavioral health diagnoses are authorized and paid by the MCO). TMHP pays for carve out services, coinsurance and deductibles, for Traditional Medicare and Medicaid dual eligibles. If the client has a Medicare Advantage Plan, (MAP) the premium is paid by HHSC to the Medicare Advantage Special Needs Plan (MASNP), TMHP no longer pays coinsurance, deductibles or copays for these clients.

For STAR+PLUS dual eligible clients covered by fee-for-service Medicare, TMHP pays for coinsurance and deductibles and copays. If the client is covered by a MAP that collects a per member
per month premium from HHSC, TMHP no longer pays coinsurance or deductible, but will consider reimbursements for Medicaid only services and copays. If the client is covered by a MAP that has a Trading Partner relationship with TMHP (similar to those of the Traditional Medicare Fiscal Intermediaries), TMHP will consider coinsurance and deductible reimbursement if the plan has delivered a Health Insurance Portability and Accountability Act of 1996 (HIPAA) compliant electronic claim to TMHP. Claims for Medicaid only services and copays may be billed directly to TMHP by the provider.

- **The NorthSTAR Program.** The Behavioral Health Organization (BHO) is responsible for processing claims. The NorthSTAR Program is known as a behavioral health carve-out of the STAR Program in the Dallas SA.
- **PCCM.** TMHP authorizes inpatient and outpatient services requiring an authorization, and processes all PCCM claims.
- **STAR Health (Foster Care).** MCO authorizes and pays most claims. Refer to subsection 8.5.6, “STAR Health Claims Filing” for information on STAR Health Claims Filing and carve outs.

### 8.1.4 Third Party Liability (TPL)

The Third Party Liability program helps reduce Medicaid costs by shifting claims expenses to third party payers. Third party payers are entities or individuals that are legally responsible for paying the medical claims of Medicaid clients. As a condition of eligibility, Medicaid clients assign their rights (and the rights of any other eligible individuals on whose behalf he or she has legal authority under state law to assign such rights) to medical support and payment for medical care from any third party to Medicaid. Federal law and regulations require states to ensure Medicaid clients use all other resources available to them to pay for all or part of their medical care before turning to Medicaid. Medicaid pays only after the third party has met its legal obligation to pay (i.e., Medicaid is the payer of last resort). A third party is any individual, entity, or program that is, or may be, liable to pay for any medical assistance provided to a client under the approved state Medicaid plan. Third parties may include any of the following:

- Private health insurance
- Employment-related health insurance
- Medical support from absent parents
- Casualty coverage resulting from an accidental injury such as automobile or property insurance (including no-fault insurance)
- Court judgments or settlements from a liability insurer
- State workers’ compensation
- First party probate-estate recoveries
- Other federal programs (e.g., Indian Health, Community Health, and Migrant Health programs), unless excluded by statute

To report a client’s changes to private health insurance, refer to “Other Insurance Form” (*Vol. 1, General Information*).

To report a client’s accident or injury, refer to “Tort Response Form” (*Vol. 1, General Information*).

TMHP is responsible for determining whether third party liability exists and for recouping payment from the third party resources (TPR) for Texas Health Steps (THSteps) and intermediate care facilities for persons with intellectual disabilities (ICF-MR) dental claims.

When the client’s Medicaid Identification Form (Form H3087) shows a P in the TPR column indicating the presence of other health insurance, THSteps and ICF-MR dental providers are not required to pursue the TPR. The P does not distinguish between medical or dental. Dental providers are to bill TMHP for reimbursement.
THSteps providers should not bill private insurance for dental services. THSteps and ICF-MR dental providers should file the claim directly to TMHP even if the provider knows that the client has private insurance. TMHP will reimburse the claim and pursue payment from any other TPR. If a recoupment is made from another payment resource, TMHP will make the appropriate post-payment reconciliation with the dental provider.

**Note:** Adoption agencies or foster parents are no longer considered a TPR. Medicaid is primary in the STAR Health program (except when court-ordered to provide health insurance). This is an exception to the rule that Medicaid is payer of last resort. Providers must not bill other health insurance unless there is a court order that places this responsibility elsewhere.

### 8.1.5 The Health Insurance Premium Payment Program

Health Insurance Premium Payment (HIPP) Program clients should access their benefits through Texas Medicaid fee-for-service and should not be enrolled in managed care unless they choose to leave the HIPP program.

**Note:** STAR Health program clients should be removed from the HIPP program and continue to receive benefits through the STAR Health program.

**Refer to:** Subsection 4.12, “Health Insurance Premium Payment (HIPP) Program” in Section 4, “Client Eligibility” (Vol. 1, General Information).

### 8.1.6 Client Enrollment

HHSC has targeted specific client groups within the Texas Medicaid population for managed care enrollment. Refer to each program in this section for enrollment information.

In most cases, Medicaid managed care enrollment is not retroactive. For exceptions, including enrollment of newborns, see subsection 8.2.3, “Client Enrollment” and subsection 8.2.3.1, “Expeditied Enrollment of Pregnant Women (Program Type 40)” in this section.

#### 8.1.6.1 Managed Care Eligibility and Effective Date

Providers must validate a client’s eligibility and membership within an identified HMO or PCCM. Providers must then pursue any prior authorization or administrative requirements specific to that HMO or PCCM.

A client who has been determined to be eligible for Medicaid benefits may be certified and begin to receive benefits under Texas Medicaid fee-for-service on the same day. Claims for these services are billed to TMHP. If the client is also determined to be eligible for managed care, a second and separate enrollment process takes place. Once managed care enrollment is effective, the provider must bill the HMO for all capitated services for clients enrolled in an HMO or TMHP for clients enrolled in PCCM. Providers continue to bill noncapitated services to TMHP.

**Note:** All claims for SSI clients in STAR are billed to TMHP.

Benefits under the STAR and STAR+PLUS programs usually begin on the first day of the next month following selection of a plan and PCP.

#### STAR/STAR+PLUS Chart Example 1

<table>
<thead>
<tr>
<th>STAR and STAR+PLUS Example 1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Client certified for Texas Medicaid</td>
</tr>
<tr>
<td>Medicaid benefits begin</td>
</tr>
<tr>
<td>Client selects health plan and PCP</td>
</tr>
<tr>
<td>Managed care benefits begin</td>
</tr>
</tbody>
</table>
If a client selects a plan and PCP after the cut-off date (approximately the 15th of the month) they will not be enrolled in managed care nor appear on a PCP’s panel until the second month after their Medicaid effective date.

**STAR/STAR+PLUS Chart Example 2**

<table>
<thead>
<tr>
<th>STAR and STAR+PLUS Example 2</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Client certified for Texas Medicaid</td>
<td>January 1</td>
</tr>
<tr>
<td>Medicaid benefits begin</td>
<td>January 1</td>
</tr>
<tr>
<td>Client selects health plan and PCP</td>
<td>January 20</td>
</tr>
<tr>
<td>Managed care benefits begin</td>
<td>March 1</td>
</tr>
</tbody>
</table>

**Exception:** Newborn enrollments are retroactive to the date of birth (DOB). Expedited enrollments of pregnant women (program type 40) into the STAR Program may be retroactive.

When a client in a PCCM area is determined Medicaid-eligible and is a mandatory enrollee, the client is automatically enrolled in PCCM. Enrollment in PCCM is prospective.

Benefits under the PCCM program usually begin on the first day of the next month following Medicaid eligibility.

**PCCM Chart Example 1**

<table>
<thead>
<tr>
<th>PCCM Example</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Client certified for Texas Medicaid</td>
<td>January 2</td>
</tr>
<tr>
<td>Medicaid benefits begin</td>
<td>January 1</td>
</tr>
<tr>
<td>PCCM benefits begin (automatic enrollment)</td>
<td>February 1</td>
</tr>
</tbody>
</table>

If a client in PCCM is determined Medicaid eligible after the cut-off date (approximately the 15th of the month) the PCCM enrollment will be effective the second month after their Medicaid enrollment effective date.

**PCCM Chart Example 2**

<table>
<thead>
<tr>
<th>PCCM Example</th>
<th></th>

<td>January 20</td>
</tr>
<tr>
<td>NorthSTAR benefits begin</td>
<td>January 1</td>
</tr>
</tbody>
</table>

### 8.1.6.2 Automatic Reenrollment

If a client loses Medicaid eligibility and then regains eligibility within six months, the client is automatically reassigned to the same health plan and PCP that the client had before the client lost Medicaid eligibility. In PCCM, a client may be reenrolled under a default ID of PCCPCCM01 or PCCNEWB01 until a PCP is selected by the client or auto-assigned.

Refer to: Subsection 8.6.7.1, “Selecting a PCP” in this section.

### 8.1.7 Primary Care Provider (PCP) Changes

#### 8.1.7.1 Client-Initiated PCP Changes

Clients enrolled in HMOs or PCCM may request a PCP change at any time and for any reason.

#### 8.1.7.2 STAR, STAR+PLUS, and PCCM PCP Changes

PCP changes for PCCM, STAR, and STAR+PLUS can be received up to the last business day of the month and made effective the first day of the next calendar month, as shown in the following example:

<table>
<thead>
<tr>
<th>STAR, STAR+PLUS, and PCCM PCP Changes</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Request received</td>
<td>May 28</td>
</tr>
<tr>
<td>Change effective</td>
<td>June 1</td>
</tr>
</tbody>
</table>

HMOs can affect a PCP change immediately if necessary. However, the Medicaid ID cards and systems may not reflect the change immediately.

#### 8.1.7.2.1 STAR Health

In STAR Health, the Medical Consenter can request a PCP change at any time and for any reason without limitation. PCP changes are effective immediately.

#### 8.1.7.3 Provider-Initiated PCP Changes

A provider may request a client be reassigned to another PCP for any of the following reasons:

- The client is not included in the PCP’s scope of practice.
- The client is noncompliant with medical advice.
- The client consistently displays unacceptable office decorum.
- The client/PCP relationship is not mutually agreeable.

Any request by a provider to reassign a client to another PCP must be processed through the applicable Medicaid managed care health plan or PCCM. Before a request for reassignment can be initiated, reasonable measures must be taken to correct the client’s behavior. Reasonable measures may include...
education or counseling by health plan or PCCM staff. The health plan or PCCM will notify the client of the reassignment if all attempts to remedy the situation have failed. Providers should also notify the client about the reassignment in writing and send a copy of the notification to the health plan or PCCM.

8.1.7.4 Medicaid Managed Care-Initiated PCP Changes

In addition, a client may be reassigned to another PCP for any of the following reasons:

- The PCP is sanctioned by HHSC.
- The PCP exhibits a documented pattern of unacceptable quality of care.
- The PCP inappropriately reduces the client’s right to access specialty services covered under Medicaid managed care.
- The provider leaves Medicaid.
- The provider retires.
- Death of the provider.

8.1.8 Health Plan Changes

8.1.8.1 Client-Initiated HMO Plan Changes

Clients have the right to change plans.

Clients must call the Enrollment Broker at 1-800-964-2777 to initiate a plan change. If a plan change request is received before the middle of the month, the plan change is effective on the first day of the following month. If the request is received after the middle of the month, the plan change will be effective on the first day of the second month following the request, as shown below.

<table>
<thead>
<tr>
<th>Request received on or before</th>
<th>Change effective</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mid-May</td>
<td>June 1</td>
</tr>
</tbody>
</table>

Note: All plan change requests must be processed by the Enrollment Broker.

PCCM and STAR Health programs only have one plan choice available. As a result, clients cannot change plans, but may change PCPs within their assigned STAR Health HMO or PCCM.

8.1.8.2 Health Plan Managed Care Administrator-Initiated Changes

Each health plan has a limited right to request that a client be disenrolled without the client’s consent. HHSC must approve any request for such disenrollment.

A health plan may request that a client be disenrolled for the following reasons:

- The client loans his or her Medicaid Identification Form (Form H3087) to another person to obtain services.
- The client continually disregards the advice of his PCP.
- The client repeatedly uses the ER inappropriately.
- Client is disruptive, unruary, threatening, or uncooperative to the extent that client’s membership seriously impairs HMO’s or provider’s ability to provide services to the client or to obtain new patients, and the client’s behavior is not caused by a physical or behavioral health condition.
- Client refuses to comply with managed care restrictions (e.g., repeatedly using emergency room in combination with refusing to allow HMO to treat the underlying medical condition).
For STAR+PLUS HMOs, under limited conditions, the HMO may request disenrollment of members who are totally dependent on a ventilator or who have been diagnosed with End Stage Renal Disease.

Before a request for disenrollment can be initiated, reasonable measures must be taken to correct the client’s behavior. Reasonable measures may include education or counseling conducted by health plan staff. HHSC will notify the client in writing of the disenrollment if all attempts to remedy the situation have failed. HHSC will also notify the client in writing of the availability of appeal procedures and the HHSC fair hearing process.

Neither the health plan or a provider may request a client’s disenrollment based on an adverse change in the client’s health or the utilization of services which are medically necessary for the treatment of a client’s condition.

8.1.9 Client Rights and Responsibilities

8.1.9.1 Client Rights

In Texas, Medicaid managed care clients have defined rights and responsibilities. Each health plan and PCP share the responsibility to ensure and protect client rights and to assist clients in understanding and fulfilling their responsibilities as plan clients.

Medicaid managed care clients have the right to:

• Be treated fairly and with dignity and respect.
• Know that their medical records and discussions with their providers will be kept private and confidential.
• Request changes to their medical records (if incorrect).
• A reasonable opportunity to choose a health-care plan and PCP (the doctor or health-care provider they will see most of the time and who will coordinate their care) and to change to another plan or provider in a reasonably easy manner. These opportunities include the right to:
  • Be informed of available health plans and PCPs in their areas.
  • Be informed of how to choose and change health plans and PCPs.
  • Choose any health plan that is available in their area and choose a PCP.
  • Change their PCP.
  • Change health plans without penalty.
  • Be educated about how to change health plans or PCPs.
  • Know that doctors, hospitals, and others who provider care can advise clients about their health status, medical care, and treatment. The health plan cannot prevent them from giving clients this information, even if the care or treatment is not a covered service.”
  • Know that clients are not responsible for paying for covered services. Doctors, hospitals, and others cannot require clients to pay copayments or any other amounts for covered services.
  • Ask questions and get answers about anything the client doesn’t understand, and that includes the right to:
    • Have their provider explain their health-care needs to them and talk to them about the different ways their health-care problems can be treated.
    • Be told why care or services were denied and not given.
• Consent to or refuse treatment and actively participate in treatment decisions, and that includes the right to:
  • Work as part of a team with their provider in deciding what health care is best for them.
  • Say yes or no to the care recommended by their provider.
• Utilize each available complaint and appeal process through the MCO and through Medicaid, receive a timely response to complaints, appeals, and fair hearings. These processes include the right to:
  • Make a complaint to their health plan or to the state Medicaid program about their health-care, provider, or health plan.
  • Receive a timely answer to their complaint.
  • Access the health plan appeal process and the procedures for doing so.
  • Request a fair hearing from the state Medicaid program and request information about the process for doing so.
• Timely access to care that does not have any communication or physical access barriers. They have the right to:
  • Have telephone access to a medical professional 24 hours a day, 7 days a week in order to obtain any needed emergency or urgent care.
  • Receive medical care in a timely manner.
  • Be able to get in and out of a health-care provider’s office, including barrier free access for persons with disabilities or other conditions limiting mobility, in accordance with the Americans with Disabilities Act.
  • Have interpreters, if needed, during appointments with their providers and when talking to their health plan. Interpreters include people who can speak in their native language, assist with a disability, or help them understand the information.
  • Be given an explanation they can understand about their health plan rules, including the health-care services they can get and how to get them.
• Not be restrained or secluded when doing so is for someone else’s convenience, or is meant to force them to do something they are unwilling to do, or to punish them.

8.1.9.2 Client Responsibilities
Medicaid managed care health plans and PCPs should help clients understand their responsibilities. These include the responsibility to:
• Learn and understand each right they have under Medicaid. That includes the responsibility to:
  • Learn and understand their rights under the Medicaid program.
  • Ask questions if they do not understand their rights.
  • Learn what choice of health plan is available in their area.
• Abide by the health plan and Medicaid managed care policies and procedures. That includes the responsibility to:
  • Learn and follow their health plan rules and Medicaid rules.
  • Choose their health plan and a PCP.
  • Make any changes in their health plan and PCP in the ways established by Medicaid managed care and by the health plan.
• Keep their scheduled appointments.
• Cancel appointments in advance when they cannot keep them.
• Always contact their PCP first for nonemergency medical needs.
• Be sure they have approval from their PCP before going to a specialist (except for self-referred services).
• Understand when they should and should not go to the ER.
• Share information relating to their health status with their PCP and become fully informed about service and treatment options. That includes the responsibility to:
  • Tell their PCP about their health.
  • Talk to their providers about their health-care needs and ask questions about the different ways their health-care problems can be treated.
  • Help their providers get their medical records.
• Actively participate in decisions relating to service and treatment options, make personal choices, and take action to maintain their health. That includes the responsibility to:
  • Work as a team with their providers in deciding what health care is best for them.
  • Understand how the things they do can affect their health.
  • Do the best they can to stay healthy.
  • Treat providers and staff with respect.

8.1.9.3 Advance Directives

Federal and state law require providers to maintain written policies and procedures for informing and providing written information to all adult clients who are 18 years of age and older about their rights under state and federal law, in advance of their receiving care (Social Security Act §§1902[a][57] and 1903[m][1][A]). The written policies and procedures must contain procedures for providing written information regarding the client’s right to refuse, withhold, or withdraw medical treatment advance directives.

These policies and procedures must comply with provisions contained in 42 Code of Federal Regulations (CFR) §§434.28 and 489, SubPart I, relating to the following state laws and rules:
• A client’s right to self-determination in making health-care decisions.
• The Advance Directives Act, Chapter 166, Texas Health and Safety Code, which includes:
  • A client’s right to execute an advance written directive to physicians and family or surrogates, or to make a nonwritten directive to administer, withhold or withdraw life-sustaining treatment in the event of a terminal or irreversible condition.
  • A client’s right to make written and nonwritten Out-of-Hospital Do-Not-Resuscitate Orders.
  • A client’s right to execute a Medical Power of Attorney to appoint an agent to make health-care decisions on the client’s behalf if the client becomes incompetent.
• The Declaration for Mental Health Treatment, Chapter 137, Texas Civil Practice and Remedies Code, which includes a Member’s right to execute a Declaration for Mental Health Treatment in a document making a declaration of preferences or instructions regarding mental health treatment.
These policies can include a clear and precise statement of limitation if a participating provider cannot or will not implement a client’s advance directive. A statement of limitation on implementing a client’s advance directive should include at least the following information:

- A clarification of the provider’s conscience objections.
- Identification of the state legal authority permitting a provider’s conscience objections to carrying out an advance directive.
- A description of the range of medical conditions or procedures affected by the conscience objection.

A provider cannot require a client to execute or issue an advance directive as a condition for receiving health-care services. A provider cannot discriminate against a client based on whether or not the client has executed or issued an advance directive.

A provider’s policies and procedures must require the provider to comply with the requirements of state and federal law relating to advance directives.

8.1.10 PCP Requirements and Information

Under Medicaid managed care, eligible Medicaid clients choose a PCP. The PCP furnishes primary care-related services, arranges for and coordinates referrals for all medically necessary specialty services, and is available for urgent or emergency care, directly or through on-call arrangements, 24 hours a day, 7 days a week (see subsection 8.1.10.1, “Continuous Access” in this section). Primary care includes ongoing responsibility for preventive health care, health maintenance, treatment of illness and injuries, and the coordination of access to needed specialist providers or other services.

PCPs can choose to contract with PCCM and HMO health plans simultaneously.

Providers should remember that contracting with one or more HMOs does not require providers to terminate their contracts with PCCM.

PCCM providers in the metropolitan areas are encouraged to continue to provide ongoing health-care services to PCCM clients who live in contiguous areas. There may be instances where PCCM clients may choose a PCCM PCP in a metropolitan SA.

Provider types who are eligible to serve as a PCP include:

- Pediatricians
- Family/general practitioners
- Internists
- Obstetrician/gynecologists
- Advanced Practice Registered Nurses (APRNs) under the supervision of a physician
- Certified nurse-midwives (CNM) practicing under the supervision of a physician
- Physician assistants (PAs) practicing under the supervision of a physician
- Rural health clinics (RHCs)
- Federally Qualified Health Centers (FQHCs)
- Community Clinics
- Specialists willing to provide medical homes to clients who have special needs

The PCP either furnishes or arranges for most of the client’s health-care needs, including well-checkups, office visits, referrals, outpatient surgeries, hospitalizations, and health-related services.
Although PCPs are encouraged to assist clients in accessing these services, Medicaid managed care enrollees may self-refer for the following services:

- Emergency services
- Annual adult well-check (self-referred for PCCM clients only)
- FQHC/RHC after-hours care (self-referred for PCCM clients only)
- Family planning
- THSteps Medical and Dental services
- Immunizations
- Early Childhood Intervention (ECI) targeted case management
- Case management for Children and Pregnant Women (CPW)
- Obstetric or gynecological services
- School Health and Related Services (SHARS)
- Department of Assistive and Rehabilitative Services (DARS) case management
- DSHS case management
- Department of Aging and Disability Services (DADS) case management
- Behavioral health services (contact client’s health plan for specific requirements)
- Vision care (including ophthalmologic or therapeutic optometry)

Refer to: Subsection 8.6.11.1, “Self-Referred Services” in this section.

The following are self-referred services for PCCM clients and the claim requirements that FQHC providers must use when submitting claims for these services. FQHC providers may use their facility provider ID when submitting:

<table>
<thead>
<tr>
<th>FQHC Self-Referred Service</th>
<th>Claim Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Emergency services</td>
<td>Emergency diagnosis</td>
</tr>
<tr>
<td>Family planning (FP)</td>
<td>FP diagnosis and procedure codes</td>
</tr>
<tr>
<td>THSteps services</td>
<td>THSteps medical services procedure codes with EP modifier</td>
</tr>
<tr>
<td>Immunizations</td>
<td>Immunization and immunization administration codes</td>
</tr>
<tr>
<td>Case management for Children and Pregnant Women (CPW)</td>
<td>Case management codes</td>
</tr>
<tr>
<td>Obstetric services</td>
<td>TH modifier</td>
</tr>
<tr>
<td>Gynecological services</td>
<td>GY modifier</td>
</tr>
<tr>
<td>Behavioral health services</td>
<td>Psychological procedure code</td>
</tr>
</tbody>
</table>

RHC providers may submit claims for the following self-referred services using their facility provider ID:

<table>
<thead>
<tr>
<th>RHC Self-Referred Service</th>
<th>Claim Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Obstetric services</td>
<td>TH modifier</td>
</tr>
<tr>
<td>Gynecological services</td>
<td>GY modifier</td>
</tr>
<tr>
<td>Behavioral health services</td>
<td>Psychological diagnosis code</td>
</tr>
</tbody>
</table>
Providers performing services at an RHC location may submit claims for the following self-referred services using their individual provider ID:

<table>
<thead>
<tr>
<th>RHC Self-Referred Service</th>
<th>Claim Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Emergency services</td>
<td>Emergency diagnosis</td>
</tr>
<tr>
<td>Family planning</td>
<td>FP diagnosis and procedure codes</td>
</tr>
<tr>
<td>THSteps services</td>
<td>THSteps procedure codes with National Place of service 72</td>
</tr>
<tr>
<td>Immunizations</td>
<td>Immunization and Immunization administration codes</td>
</tr>
</tbody>
</table>

**Reminder:** Unless providing after-hours care, claims submitted for services other than those listed above that are provided to PCCM clients who are not assigned on a panel report for an FQHC or RHC must include the client’s required PCP information, including National Provider Identifier (NPI), in the Referring Provider field on the appropriate claim form for outpatient hospital or professional services.

Claims that are not submitted accordingly are subject to claims denial.

THSteps providers must be enrolled with Medicaid to be reimbursed for services provided to clients. THSteps services are self-referred. Medicaid HMOs determine how their clients will access THSteps services. The HMO may require the client to go to an in-network THSteps provider or may allow the client to go to any Medicaid THSteps provider, whether or not they are in the HMO’s network. Clients in PCCM are encouraged to access their PCP for THSteps services, but may self-refer to any Medicaid THSteps provider. Providers who perform THSteps must work in collaboration with the client’s PCP to ensure continuity of care.

PCPs are encouraged to complete the THSteps medical checkup as part of the medical home for their clients who are enrolled in PCCM. Providers that refer these clients to a THSteps provider for a THSteps medical checkup must document that THSteps medical checkup in their client’s medical record. If a client self-refers to a THSteps provider for a THSteps medical checkup, the provider who performs THSteps medical checkup services must work in collaboration with the client’s PCP and provide the THSteps medical checkup results to the PCP to ensure continuity of care.

THSteps providers are required to bill claims as an exception to periodicity when the clients visit is outside of the periodicity schedule because of extenuating circumstances. For more information on billing an exception-to-periodicity checkup, providers can refer to Section 5, “THSteps Medical”, subsection 5.3.1.6, “Exception-to-Periodicity Checkups”, and subsection 4.2.8.1, “Exceptions to Periodicity” in the Children’s Services Handbook (Vol. 2, Provider Handbooks).

**Behavioral Health**

PCCM operates an open-specialty network; therefore, behavioral health providers do not have to enroll with PCCM. PCCM clients may access behavioral health services from any Medicaid-enrolled behavioral health provider.

Providers cannot enroll Medicaid clients; however, educating clients is encouraged. Medicaid clients who choose to enroll in a Medicaid managed care health plan must enroll through the official state enrollment form or by calling the Enrollment Broker at 1-800-964-2777.

Providers should follow these rules when educating clients:

- Providers may not influence clients to choose one HMO health plan over another or one PCCM provider over another.
- HMO providers must inform clients of all Medicaid managed care health plans in which the providers participate.
• HMO providers participating in a Medicaid managed care HMO may display state-approved, health-related marketing materials in their offices, provided it is done equally for all HMOs in which they participate. HMO providers cannot give out or display plan-specific marketing items or giveaways to clients.

• Providers and subcontractors may only directly contact potential clients with whom they have an established relationship.

• HMO providers may inform clients of special services offered by all Medicaid managed care health plans in which the providers participate.

• HMO providers may inform clients of particular hospital services, specialists, or specialty care available in all plans in which the providers participate.

• HMO providers may assist a client by contacting a plan (or plans) to determine if a particular specialist or service is available, if the client requests this information.

• HMO providers may not influence clients based on reimbursement rates or methodology used by a particular plan.

• At the member’s request, HMO providers can provide the necessary information for the client to contact a particular plan but cannot promote any plan over another.

• In no instances can HMO providers stock, reproduce, assist in filling out, or otherwise handle the enrollment form. Information can be provided as outlined on the previous page, and clients can be reminded that they can easily enroll over the telephone with the enrollment broker. However, the call must be made by the client, not by the HMO provider or the provider’s agent.

• HMO providers may assist clients with completing the Medicaid application.

• PCCM providers may stock PCP selection forms and provide a blank PCP selection form to the client. They may assist the client in filling out the selection forms. However, they may not in any way influence or coerce the client in making a PCP selection. Each client must personally complete, sign, and mail their individual form. Providers are prohibited from supplying provider-identified stationary or envelopes to the client for this purpose.

• HMO providers may display stickers indicating they participate in a particular Medicaid managed care health plan as long as they do not indicate anything more than “(health plan) is accepted or welcomed here” (provided the sticker meets Medicaid/CHIP Marketing Guidelines regarding size limitations).

Behavioral health providers must enroll with each HMO to be reimbursed for services provided to managed care clients. Although managed care clients may self-refer for behavioral health services, HMO health plan providers should contact the client’s health plan for specific in-network requirements. If a behavioral health provider practices in the Dallas SA, they must be enrolled as a network provider in the NorthSTAR BHO to be reimbursed for services provided to STAR clients.

Refer to: Section 8.4 “NorthSTAR Program” in this section.

8.1.10.1 Continuous Access

Continuous access is an important feature of Medicaid managed care. Twenty-four-hour PCP availability enables clients to access and use services appropriately, instead of relying on ERs for after-hours care.

Continuous access can be provided through direct access to a PCP’s office or through on-call arrangements with another office or service. Clients should be informed of the PCP’s normal office hours and should be instructed how to access urgent medical care after normal office hours.
8.1.10.1.1 After-Hours Guidelines

PCPs are required to have at least one of the following arrangements in place to provide 24-hour, 7-day a week access for managed care clients.

One of the following is required for PCCM:

- An office telephone answered after hours by a medical exchange or a professional answering service. If an answering service is used, the following must be met:
  - The answering exchange or service must be able to contact the PCP or a designated back-up provider for immediate assistance.
  - The PCP, or designated back-up provider, must be notified of all calls.
  - All calls must be returned in a timely manner by the PCP or designated back-up.
  - The answering service must meet the language requirements of the major Medicaid population groups in the PCP’s area.

- An office telephone answered after office hours by an answering machine that instructs the client (in the language of the major Medicaid population groups) to do one of the following:
  - Call the name and telephone number of a medical facility where the client can request to speak with a medical professional to determine whether emergency treatment is appropriate.
  - Call another number where the PCP can be reached.
  - Call the name and telephone number of a medical professional serving as designated back-up. In this situation, the client must be able to speak with the back-up provider or a clinician who can offer immediate assistance.

- An office telephone transferred after hours to another location where someone will answer and be able to contact the PCP or designated back-up provider.

One of the following is required for HMOs:

- The office telephone is answered after-hours by an answering service, which meets language requirements of the major population groups and which can contact the PCP or another designated medical practitioner. All calls answered by an answering service must be returned within 30 minutes.

- The office telephone is answered after normal business hours by a recording in the language of each of the major population groups served, directing the patient to call another number to reach the PCP or another provider designated by the PCP. Someone must be available to answer the designated provider’s telephone. Another recording is not acceptable.

- The office telephone is transferred after office hours to another location where someone will answer the telephone and be able to contact the PCP or another designated medical practitioner, who can return the call within 30 minutes.

8.1.10.1.2 Unacceptable Telephone Arrangements

The telephone answering procedures listed below are not acceptable for PCCM:

- An office telephone that is answered only during office hours.

- An office telephone that is answered by a recording or an answering service that directs clients to go to the ER.

- An office telephone answered after hours by an answering machine recording that tells clients to leave a message.
• An office telephone answering machine recording that informs clients of regular office hours and requests that they call back during those hours.
• PCCM providers may not direct clients to call the PCCM nurse helpline in order to meet the PCP 24-hour continuous coverage requirements.

The telephone answering procedures listed below are not acceptable for HMOs:
• The office telephone is only answered during office hours.
• The office telephone is answered after-hours by a recording that tells patients to leave a message.
• The office telephone is answered after-hours by a recording that directs patients to go to an Emergency Room for any services needed.
• Returning after-hours calls outside of 30 minutes.

8.1.10.2 Cultural Competency and Sensitivity
HHSC values the diversity of the Texas Medicaid population and requires Medicaid managed care to provide programs to support clients from diverse cultural backgrounds:
• Helplines are staffed by both Spanish- and English-speaking customer service representatives who, at any time, may access a multi-language translation service for assistance.
• Articles in the Texas Medicaid Bulletin and educational workshops include topics that focus on cultural sensitivity and the need for culturally competent staff in PCP offices.

Providers are expected to comply with the laws concerning discrimination on the basis of race, color, national origin, or sex.

8.1.10.2.1 Limited English Proficiency
Medicaid providers are required to provide services in the languages of the major Medicaid population groups they serve and to ensure quality appropriate translations. Title VI, section 601, of the Civil Rights Act of 1964 states that “no person in the United States shall on the basis of race, color, or national origin, be excluded from participating in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance.”

HHSC requires Medicaid providers to ensure persons with limited English proficiency have equal access to the medical services to which they are legally entitled.

Meeting the requirements of Title VI may require the PCP to take all or some of the following steps at no cost or additional burden to the beneficiary with limited English proficiency:
• Have a procedure for identifying the language needs of patients/clients.
• Have access to proficient interpreters during hours of operation (HMOs arrange interpreters).
• Develop written policies and procedures regarding interpreter services (HMOs arrange interpreters).
• Disseminate interpreter policies and procedures to staff and ensure staff awareness of these policies and procedures and of their Title VI obligations to persons with limited English proficiency.

In order to meet interpretation requirements, providers may choose to incorporate into their business practice any of the following (or equally effective) procedures:
• Hire bilingual staff. (Does not apply to HMOs.)
• Hire staff interpreters. (Does not apply to HMOs.)
• Use qualified volunteer staff interpreters. (Does not apply to HMOs.)
• Arrange for the services of volunteer community interpreters—excluding the client’s family or friends. (Does not apply to HMOs.)
• Contract with an outside interpreter service. (HMO must provide.)
• Use a telephone interpreter service.
• Develop a notification and outreach plan for beneficiaries with limited English proficiency.

It is the provider’s responsibility to ensure that interpretive services are available to his practice to meet requirements on limited English proficiency and communication disabilities. Interpretive services include language and American Sign Language (ASL) interpreters. When interpretive services are necessary to ensure effective communications for treatment, medical history, and health education, PCCM providers can contact Language Line Services.

Language Line Services operate 24 hours a day, 7 days a week. Language Line Services provides over-the-telephone interpretation, video interpreting, document translation, interpreter testing and training, and other language products as well. Language Line Services charges a fee for the service. For complete details about their billing practices and services, providers should visit the Language Line Services website at www.languageline.com or call 1-800-752-6096.

Complaints and reports of non-compliance with Title VI regulations are handled by the Office for Civil Rights (OCR). Additional information, including the complete guidance memorandum on prohibition of discrimination against persons with limited English proficiency issued by the OCR, can be found on the Internet at www.hhs.gov/ocr/civilrights/resources/specialtopics/lep/index.html.

Note: HMOs are responsible for providing interpreter services.

8.1.10.3 PCP-to-Client Ratio and Capacity (Does Not Apply to HMOs)
HHSC oversees all Medicaid managed care providers for accessibility and quality of care. If HHSC determines that providers do not have, or fail to maintain, the capacity or capability of providing quality, accessible care, HHSC may limit new enrollments to the provider’s panel. HHSC may reassign current clients from the provider’s panel roster or adjust the panel size to ensure that required accessibility and quality of care to clients is maintained.

8.1.11 Medicaid Managed Care Complaints and Fair Hearings
Medicaid managed care providers may file complaints with HHSC if they find they did not receive full due process from the respective managed care health plan.

Appeals, grievances, or dispute resolution is the responsibility of each managed care HMO or PCCM. Providers must exhaust the complaints or grievance process with their managed care HMO or PCCM before filing a complaint with HHSC.

Refer to the respective HMO or PCCM for information about specific complaint policies and procedures. For PCCM, see subsection 8.6.20, “Provider Complaints and Appeals” in this section. For NorthSTAR, see subsection 8.4.6, “Complaints and Appeals” in this section. For HMO appeals and fair hearing process, refer to the respective health plan’s policies and procedures. For paper appeals, refer to subsection 7.1.5, “Paper Appeals” in Section 7, “Appeals” (Vol. 1, General Information).

Complaint requests may be mailed to the following address:

Texas Health and Human Services Commission
HHSC Claims Administrator Contract Management
Mail Code 91X
PO Box 204077
Austin, TX 78720-4077
STAR, STAR+PLUS and STAR Health complaint requests may be mailed to the following address:

Health and Human Services Commission
Health Plan Management
11209 Metric Blvd., Bldg. H
MC H320
Austin, TX 78758

Or e-mail complaint requests to:

- HPM_Complaints@hhsc.state.tx.us for STAR and STAR+PLUS
- STAR.Health@hhsc.state.tx.us for STAR Health

### 8.1.12 Prior Authorizations

Prior authorizations do not transfer with the client between health plans. Providers are required to obtain prior authorization through the health plan in which the client is enrolled for the actual date of service (DOS) in order for payment to be considered.

*Refer to:* Subsection 8.6.18.1, “Requesting Prior Authorization” in this section for information about requesting prior authorization for the PCCM program.

### 8.1.13 TMHP Claims Filing Information

TMHP processes claims for the following clients and programs:

- All PCCM claims (whether Temporary Assistance for Needy Families [TANF], TANF-related, or SSI)
- All SSI clients who are in the STAR Program
- The following services for PCCM, STAR+PLUS, STAR Health, or STAR clients:
  - ECI targeted case management
  - Targeted case management
  - DSHS case management (except for the Dallas SA where STAR clients are enrolled in NorthSTAR)
  - DADS services (See NorthSTAR client eligibility section for excluded DADS clients)
  - CPW case management
  - SHARS
  - DARS
  - THSteps dental (dentist services only) except for STAR Health, in which all dental claims are submitted to the MCO’s dental contractor
  - Tuberculosis services provided by DSHS-approved providers
  - Vendor Drug Program (VDP) (out-of-office drugs)
  - Personal Care Services for clients who are 20 years of age and younger
  - Audiology services and authorization transactions for Texas Medicaid clients of all ages

*Note:* Hearing screening services are provided through the THSteps Program. TMHP now processes all hearing services claims and authorization transactions for Texas Medicaid clients of all ages. This includes hearing services other than the THSteps periodic medical checkup hearing screening.

A claim must be submitted to TMHP for processing for a client who was classified as SSI on the date of admission to a hospital. However, if the client was an HMO client as of the date of admission to the hospital and was admitted as TANF or TANF-related (i.e., not SSI-certified), but changed to SSI during the same hospital stay, the claim must be submitted to the client’s HMO for payment of the entire hospital stay.

8.1.13.1 TMHP Paper Claims Submissions

Paper claims submissions require a Texas Provider Identifier (TPI) and National Provider Identifier (NPI) for the performing and billing provider. The performing provider’s TPI is required in block 24J in the shaded area, and NPI in block 24J in the unshaded area of the CMS-1500 claims form. The billing provider’s TPI is required in block 33b in the shaded area, and the NPI in block 33a in the unshaded area. An NPI is required in all other NPI provider identifier blocks. If the NPI and TPI are not in the proper blocks on the claim form and if the NPI is missing from any of the other NPI required blocks, the claim will be denied.

Paper claims submissions for the referring provider require the complete name of the referring provider in block 17a and an NPI in block 17b. The referring provider for a managed care client must be the client’s PCP. If there is not a referral from the PCP, a valid prior authorization number must be on the claim in the appropriate block.

If the provider of services is not the client’s assigned PCP, the PCP’s name and NPI number must be entered in the Referring Provider field of the approved electronic format. If the PCP’s TPI and NPI are missing and the treating provider is not the assigned PCP on the dates of service, the claim will be denied. If a PCCM client has selected a PCP, but the PCP change is pending, the pending PCP rendering services should call the PCCM provider helpline to obtain a referral prior to billing the claim.

Providers submitting claims for SSI voluntary clients must follow the client’s individual HMO requirements for referrals, authorization, admission notification, and concurrent review. The HMO is responsible for notifying TMHP of the services that they have approved so those claims can be processed accordingly. Claims for SSI clients enrolled in PCCM or an HMO will be paid at Texas Medicaid fee-for-service rates.

All Texas Medicaid fee-for-service processing guidelines are followed in processing these claims including the 95-day filing deadline. Send claims through regular mail to the following address:

Texas Medicaid & Healthcare Partnership  
PO Box 200555  
Austin, TX 78720-0555

Claims delivered by UPS or other courier methods are to be addressed to the following:

Texas Medicaid & Healthcare Partnership  
12357-B Riata Trace Parkway, Suite 150  
Austin, TX 78727

8.1.13.2 Termination of Inactive TPIs Without Claims or Encounters for at Least 24 Months

Medicaid providers, including those for PCCM or HMOs, who have not submitted a claim for a period of at least 18 months will be mailed a reminder letter by TMHP. Providers who are mailed these reminder letters will have six months from the date of the letter to submit a claim using the TPI referenced in the letter. If a TPI referenced in the reminder letter has had no claims activity within six months from the letter date, TMHP will apply a payment denial code to that TPI.

If a TPI has gone 24 months without claims activity, TMHP will notify the provider in writing that the referenced TPI has been terminated. When a provider’s Medicaid TPI is terminated, any enrollments into the PCCM program or HMOs associated with that TPI will also be terminated. To reactivate a TPI that has been terminated, the provider must complete an enrollment application.
8.1.13.3 TMHP Electronic Claims Submission

Electronic claims submission is available to providers who are filing claims for PCCM clients and all SSI voluntary clients in STAR HMOs. Electronic claims submission is available to providers who are filing claims for STAR+PLUS inpatient hospital clients. Electronic claims submissions require an NPI only. If an electronic claim is submitted without an NPI, the claim will be denied. If a claim is submitted electronically with a TPI instead of the NPI, the claim will be denied. For assistance with enrollment for filing electronic claims, contact the TMHP Electronic Data Interchange (EDI) Help Desk at 1-888-863-3638, or a provider representative. Contact individual plans for information on electronic claims submissions to STAR, STAR+PLUS, or STAR Health HMOs.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

8.1.13.4 National Drug Code (NDC) Claims

8.1.13.5 Claims for Pregnant Women in STAR Program (Program Type 40)

Claims for pregnant women who participate in program type 40 should be directed to the HMO listed on the Medicaid Identification Form (Form H3087). In some instances, a PCP will not be assigned for the first month of eligibility. These claims should be filed with the temporary PCP number PCCTP4001, as the referring provider. For clients who do not have a PCP assigned, call the client’s HMO for more information. If an HMO name does not appear on a STAR client’s Medicaid Identification Form (Form H3087), call the Enrollment Broker at 1-800-964-2777.

8.2 STAR Program

8.2.1 Overview

The principal objectives of the STAR Program are to emphasize early intervention and to promote improved access to quality care, thereby significantly improving health outcomes for the target populations, with a special focus on prenatal and well-child care.

Currently, the STAR Program consists of only one type of health-care delivery system (HMO) in select Texas counties. The select grouping of counties is known as a Service Area (SA).

8.2.1.1 STAR HMO Model

In the STAR HMO model, each HMO is responsible for contracting with PCPs, hospitals, and other providers to create a health-care delivery network. Mandatory clients who reside in one of the counties in the SA where this model is available are required to select a health plan and a PCP. The client selects the PCP from the HMO provider directory.

8.2.2 Client Eligibility

HHSC has targeted these client groups within the Texas Medicaid population for STAR Program enrollment:

<table>
<thead>
<tr>
<th>Base Plan</th>
<th>Category</th>
<th>Program Type</th>
<th>Description</th>
<th>SA Group 1 Counties</th>
<th>SA Group 2 Counties</th>
</tr>
</thead>

<td></td>
</tr>
</tbody>
</table>

V= Voluntary, M= Mandatory, X= Not Eligible,
*SA Group 1 Counties= Bexar, Harris, Harris Expansion, Nueces, and Travis,
**SA Group 2 Counties= El Paso and Lubbock
To ensure reimbursement, it is essential that all health-care providers verify eligibility before medical care is provided to STAR Program clients, except in cases of emergency. In situations where emergency care must be provided, the client’s STAR HMO and PCP should be determined as soon as possible.

V= Voluntary, M= Mandatory, X= Not Eligible, *SA Group 1 Counties= Bexar, Harris, Harris Expansion, Nueces, and Travis, **SA Group 2 Counties= El Paso and Lubbock
STAR Program clients’ Medicaid Identification Forms (Form H3087) will indicate their participation in the STAR Program. Additionally, STAR HMOs provide their clients an HMO identification card. Both forms of identification should be requested when determining whether or not the client is a STAR Program client.

Refer to: Subsection 4.2, “Eligibility Verification” in Section 4, “Client Eligibility” (Vol. 1, General Information).

8.2.3 Client Enrollment
A STAR Program client chooses a STAR HMO and PCP. To maximize enrollment, the STAR Program offers four alternative ways that clients can enroll:

- **Telephone Enrollment.** A client can enroll in the STAR Program by calling 1-800-964-2777. A customer care representative will provide essential education about the program and details needed for enrollment.

- **Mail-in Enrollment.** If calling is not convenient, a client may enroll by completing the STAR Program enrollment form and dropping it in the mail using the postage-paid, self-addressed envelope. Enrollment forms are mailed to all eligible mandatory clients along with a brochure explaining the program and provider directories for each health plan.

- **Onsite Enrollment.** In addition to telephone and mail-in enrollment, clients can enroll by talking with a STAR Program customer care representative at a local HHSC office, at Women, Infants, and Children (WIC) classes, community facilities, or during enrollment events.

- **Default Enrollment.** The final method of enrollment is through an assignment process. If a client does not exercise the right to choose a STAR HMO and PCP, the client will be assigned to a health plan and PCP. The following factors are considered when processing a default enrollment:
  - Client’s past claims history, taking into account an established relationship with a STAR participating PCP
  - Client’s age
  - Client’s sex
  - Client’s geographic proximity to the PCP

STAR Help Line (Enrollment Broker)
The STAR Help Line is available 8 a.m. to 8 p.m., Central Time, Monday through Friday, by calling one of the following numbers:

- Telephone: 1-800-964-2777
- Telecommunications device for the deaf (TDD): 1-800-267-5008

8.2.3.1 Expedited Enrollment of Pregnant Women (Program Type 40)
A pregnant woman who applies for program type 40 has 16 days from the date of application to choose a STAR HMO. If she does not choose a STAR HMO, one will be chosen for her.

The Enrollment Broker contacts the client to begin the enrollment process and assists the client in selecting an HMO. The client may also contact the Enrollment Broker directly at 1-800-964-2777 (STAR Help Line). To protect continuity of care and client choice, the Enrollment Broker will work with each pregnant woman to select a health plan that includes her current prenatal care provider or to choose an obstetrical care provider that meets her needs.

Until Medicaid managed care coverage begins in an HMO, clients will be covered under Texas Medicaid fee-for-service. Clients may initially receive a Medicaid Identification Form (Form H3087) that shows them to be enrolled in the STAR program but does not list the HMO plan name. To ensure proper
billing, providers should call the Enrollment Broker at 1-800-964-2777 (STAR Help Line) to obtain the name of the client’s health plan. The health plan name should appear on the Medicaid Identification Form (Form H3087) the following month. However, client eligibility should always be verified.

Women certified for Medicaid program type 40 may be retroactively enrolled in STAR. Women who are certified for Medicaid program type 40 on or before the 10th of the month will be enrolled in STAR beginning the first of the month of certification. Those who are certified after the 10th of the month will be on Texas Medicaid fee-for-service the month of certification and will be enrolled in STAR beginning the first of the month following the month of certification.

There are two exceptions to this rule:

- Women who are certified at any time in their estimated month of delivery will be enrolled in STAR the first of the following month (prospective enrollment).

- Women who are certified at any time in their actual month of delivery (if known by HHSC before certification) will be enrolled in STAR the first of the following month (prospective enrollment).

It is important that providers call the number listed on the Medicaid Identification Form (Form H3087) for plan and provider information.

The following examples show when benefits begin in relation to certification:

<table>
<thead>
<tr>
<th>Example 1: Woman Certified in Her 6th Month</th>

<td>STAR Program benefits begin</td>
</tr>
</tbody>
</table>

Within 14 days of enrolling in an HMO, a plan representative will contact the new client to help arrange the first prenatal appointment. Providers should also expect contact from the health plans to facilitate prenatal appointments for new clients. Physicians and other prenatal care providers are encouraged to make prenatal appointments within two weeks.

**8.2.3.1.1 Enrollment of Newborns**

In the STAR Program, newborns are automatically assigned to the STAR HMO the mother is enrolled with at the time of the newborn’s birth for at least 90 days following the date of birth unless the mother requests a plan change as a special condition. The effective date of the newborn’s enrollment is the same as the newborn’s DOB. STAR HMOs are responsible for all covered services provided to newborn members.

As with the Texas Medicaid fee-for-service program, there may be a delay of up to several months from the DOB for a newborn to receive a Medicaid client number. Providers should check with each STAR HMO for claim filing requirements.
If the newborn has not yet been assigned a PCP, the Medicaid Identification Form (Form H3087) will indicate that the client is “Newborn” and instruct the provider to “Call Plan” to inquire about filing a claim.

Refer to: Subsection 8.2.6.1, “Newborn Claims Submission” in this section.

8.2.3.1.2 Timely Notification and Assignment of Medicaid ID for Newborns

Hospitals that submit their birth certificate information utilizing the DSHS, Bureau of Vital Statistics (BVS) electronic Certificate Manager software and the Hospital Report (Newborn Child or Children) (Form 7484), receive a rapid and efficient assignment of a newborn Medicaid identification number. This process expedites reimbursement to hospitals and other providers involved in newborn care including pharmacies providing outpatient prescription benefits for medically-needy newborns.

For more information or to comment on this process, call 1-512-458-7367.

8.2.4 Service Areas and STAR HMO Choices

8.2.5 STAR Program Benefits

STAR Program clients receive all the benefits of Texas Medicaid fee-for-service and the following additional benefits:
• Removal of the inpatient spell of illness limitation for adults
• Unlimited medically necessary prescription drugs for adults

Refer to: Appendix B: Vendor Drug Program (Vol. 1, General Information) for information about outpatient prescription drugs.

8.2.5.1 Spell of Illness

STAR clients are not limited to the 30-day spell of illness. The spell of illness limitation is defined as 30 days of inpatient hospital care, which may accrue intermittently or consecutively. After 30 days of inpatient care is provided, reimbursement for additional inpatient care is not considered until the client has been out of an acute care facility for 60 consecutive days. All Medicaid clients who are 20 years of age and younger already are not limited to the 30-day spell of illness.

8.2.5.2 Prescriptions

STAR Program clients who are 21 years of age and older receive unlimited medically necessary prescription drugs. The elimination of the three prescription limit per month for adult clients enrolled in STAR allows the provider greater flexibility in treating and managing a client’s health-care needs. Prescription reimbursement continues to be processed through the VDP. All Medicaid clients who are 20 years of age and younger already receive unlimited medically necessary prescription drugs.

Refer to: Appendix B: Vendor Drug Program (Vol. 1, General Information) for information about outpatient prescription drugs and the Medicaid VDP.

8.2.5.3 National Drug Code

All STAR providers that submit professional or outpatient claims with physician-administered prescription drug procedure codes are required to use the associated NDC. Drug claims submitted with procedure codes in the “A” code series do not require an NDC. The NDC is only required on outpatient hospital claims and physician claims.

N4 can be entered before the NDC on claims. The NDC is an 11-digit number on the package or container from which the medication is administered.

8.2.6 Claims Filing Information

Claims for Medicaid managed care clients enrolled in a STAR HMO must be submitted to the STAR HMO in which the client is enrolled at the time of service (or date of admission for inpatient hospital claims). The STAR HMO, as a secondary payor, does not determine payment based on the primary payor’s authorization of services or approval of hospital stays.

A provider must file a claim with the MCO or its Subcontracted Claims Processor within 95 days of the DOS. If a claim is not received by the MCO within 95 days, the claim will be denied.

If the provider files with the wrong plan within the 95 day submission requirement (e.g., State Claims Administrator but not with the MCO) and produces documentation to that effect, the MCO must honor the initial filing date and process the claim without denying the resubmission for the sole reason of passing the filing timeframe. The provider must file the claim with the correct MCO within 95 days of the date on the Remittance and Status (R&S) Report from the other (wrong) carrier.

When a service is billed to a third party insurance resource other than the MCO, the claim must be refiled and received by the MCO within 95 days from the date of disposition by the other insurance resource. The MCO will determine, as a part of its provider claims filing requirements, the documentation required when a provider refiles these types of claims with the MCO.
MCOs are subject to the requirements related to coordination of benefits for secondary payers in the Texas Insurance Code section 843.349 (e) and (f).

**Exception:** TMHP processes some claims for HMO clients. See subsection 8.1.13, “TMHP Claims Filing Information” in this section for details. Personal care services for STAR clients who are 20 years of age and younger are authorized and processed by TMHP.

8.2.6.1 Newborn Claims Submission

Newborns are automatically assigned to the STAR HMO the mother is enrolled with at the time of the newborn’s birth. The effective date of the newborn’s enrollment is the same as the newborn’s DOB. Claims for services provided to newborns should be filed with the mother’s STAR HMO. Providers filing claims for services provided to newborns are still responsible for meeting the Medicaid filing deadlines, which in most cases is within 95 days of each DOS.

8.2.6.1.1 HMO Newborn Claims Filing

Claims for newborns who are members of an HMO should be filed directly with the member’s HMO. Health-care providers should file newborn claims using the newborn’s Medicaid identification number as soon as it is made available to them.

HMOs must pay providers for inpatient and professional services related to neonatal care for up to 48 hours after vaginal delivery and 96 hours after cesarean delivery. (Prior authorizations and PCP assignment cannot be a reason for denial of claims.)

HMOs may require prior authorizations for hospital and professional services beyond the 48-hour and 96-hour time limits.

Authorization requests, utilization review questions, and claim status inquiries and appeals should be directed to the STAR HMO in which the client is enrolled.

**Note:** Telephone numbers and addresses for claims submission and appeals for STAR HMOs can be found in the appropriate HMO provider policies and procedures manual for the appropriate SA.

8.3 STAR+PLUS Program

8.3.1 Overview

The STAR+PLUS program is designed to improve access to care, provide care in the least restrictive setting, and provide more accountability and control on costs. The STAR+PLUS program integrates acute care and long-term care services and supports into a Medicaid managed care delivery system for SSI-eligible Medicaid clients.

Clients eligible for Medicaid under the SSI Program and who reside in the Bexar, Harris, Harris Expansion, Nueces, and Travis SAs can enroll in STAR+PLUS. Enrollment in STAR+PLUS is mandatory for clients who are 21 years of age and older and voluntary for clients who are 20 years of age and younger.

8.3.1.1 STAR+PLUS HMO Model

In the STAR+PLUS HMO model, the STAR+PLUS HMO is responsible for contracting with providers and delegated networks to create a health-care provider delivery network. SSI clients who reside in one of the SA counties where this model is an option, and who have selected an HMO, are required to select a PCP from the HMO provider directory if they are not covered by Medicare. SSI clients who are also covered by Medicare (dual eligible clients) must select a STAR+PLUS HMO to receive Medicaid community based long term care. The HMO must furnish a service coordinator to all STAR+PLUS clients who request one or when the HMO determines the need through an assessment. A service coordinator is the person with primary responsibility for providing service coordination and care management to STAR+PLUS clients.
Children born to STAR+PLUS clients will be enrolled with the STAR HMO operated by the same STAR+PLUS HMO if available. If the STAR+PLUS HMO does not also operate a STAR HMO, the newborn is automatically enrolled into Texas Medicaid fee-for-service, and the mother is given the opportunity to choose a STAR HMO for the newborn.

### 8.3.1.2 Enrollment of Newborns

In the STAR+PLUS Program, newborns are enrolled in the STAR HMO offered by the mother’s STAR+PLUS HMO, if available. If the STAR+PLUS HMO does not also provide STAR services in the SA, the newborn is automatically enrolled in Texas Medicaid fee-for-service until the mother select a STAR HMO for the newborn. If an HMO is not chosen, one will be chosen for her.

Refer to: Subsection 8.3.5, “Claims Filing Information” in this section for information about claims filing for STAR+PLUS.

### 8.3.1.3 Service Areas

The STAR+PLUS Program is mandatory for SSI clients who are 21 years of age and older and voluntary for SSI clients who are 20 years of age and younger and reside in the following SAs: Bexar, Harris/Harris Expansion, Nueces, and Travis.

The following STAR+PLUS HMOs are available:

<table>
<thead>
<tr>

### 8.3.1.4 Client Eligibility

HHSC has targeted these client groups within the Texas Medicaid population for STAR+PLUS Program enrollment:

- Enrollment for category 01, 03, 04 (SSI, aged, blind and disabled clients) and the following program types are mandatory for STAR+PLUS:

<table>
<thead>
<tr>
<th>Program Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>02</td>
<td>Medicaid Buy-In.</td>
</tr>
<tr>
<td>03</td>
<td>Denied SSI clients who are Medicaid-eligible under Pickle provisions.</td>
</tr>
</tbody>
</table>
• Enrollment for category 03 and 04, SSI blind and disabled children, and program type 19, Medicaid and community-based waiver program for children who are 20 years of age and younger, may enroll in a STAR+PLUS HMO.

Refer to: Subsection 8.2.3, “Client Enrollment” in this section for more information on eligibility effective dates.

8.3.1.5 Dual Eligible Clients

Many STAR+PLUS clients are eligible for Medicaid and Medicare. STAR+PLUS HMOs are not at risk for the delivery of acute care services needed by these clients.

Most STAR+PLUS clients with Medicare and Medicaid are Medicaid Qualified Medicare Beneficiaries (MQMBs). MQMBs receive Medicare benefits through a Medicare risk product (HMO) or Medicare fee-for-service insurance program. To reduce confusion, HHSC has mandated that STAR+PLUS MQMBs continue to receive all their acute care services as they do today, with Medicare being the primary payer and Texas Medicaid fee-for-service, through TMHP, the secondary payer. MQMBs qualify for Medicaid benefits not covered by Medicare in addition to Medicaid payment of Medicare deductible and/or coinsurance. Providers are to continue billing for Medicare acute care services through the client’s Medicare HMO or fee-for-service insurer following the rules of the Medicare insurer. If the client is in both a Medicare and Medicaid HMO, the client uses the Medicare PCP, and providers follow the Medicare HMO’s medical management rules for authorization, concurrent review, etc. MQMBs choose a Medicaid HMO but do not choose a Medicaid PCP.

Refer to: Section 4.9 “Medicare and Medicaid Dual Eligibility” in Section 4, “Client Eligibility” (Vol. 1, General Information) for more information and further MQMB instructions.

Subsection 8.3.5, “Claims Filing Information” in this section for MQMB reimbursement requirements.

Dual eligible adults continue to be limited to three prescriptions unless they have joined the Medicare HMO also offered by their STAR+PLUS HMO. With the implementation of the Medicare prescription benefit in January 2006, dual eligible clients no longer receive any prescription benefit through Medicaid.

8.3.1.6 Ineligible Clients

Clients not eligible for STAR+PLUS who will remain in Texas Medicaid fee-for-service includes clients who are:

- Participating in a Home and Community-Based Waiver other than the Nursing Facility Waiver:
  - Community Living Assistance and Support Services (CLASS) Waiver Program
  - Medically Dependent Children’s Program (MDCP) Waiver Program
  - Home- and Community-Based Services (HCS) Waiver Program
  - Mental Retardation Local Authority (MRLA) Waiver Program

<table>

</tr>
</tbody>
</table>
• Deaf/Blind Multiple Disabled Waiver Program
• Texas Home Living Waiver Program (TxHmL)
• Residents in a nursing facility
• Residents in an ICF-MR
• Residents of state hospitals or institutions for mental diseases
• Frail Elderly (or 1929B) Program clients
• In-Home and Family Support Program Services clients
• Qualified Medicare Beneficiaries (QMBs) that do not receive Medicaid benefits other than Medicare deductible and coinsurance liabilities
• Undocumented aliens
• Clients who receive limited Medicaid benefits and do not qualify for participation in the VDP

8.3.2 Client Enrollment
A STAR+PLUS Program client chooses a STAR+PLUS HMO and PCP. To maximize enrollment, the STAR+PLUS Program offers four alternative ways that clients can enroll:

• Telephone Enrollment. A client can enroll in the STAR+PLUS Program by calling 1-800-964-2777. A customer care representative will provide essential education about the program and details needed for enrollment.

• Mail-in Enrollment. A client may enroll by completing the STAR+PLUS Program enrollment form and dropping it in the mail using the postage-paid, self-addressed envelope. Enrollment forms are mailed to all eligible mandatory clients along with a brochure that explains the program and provider directories for each health plan.

• Onsite Enrollment. Clients can enroll by talking with a STAR+PLUS Program customer care representative at a local HHSC office, at Women, Infants, and Children (WIC) classes, community facilities, or during enrollment events.

• Default Enrollment. If a client does not exercise the right to choose a STAR+PLUS HMO plan and PCP, the client will be assigned to an HMO and PCP. The following factors are considered when processing a default enrollment:
  • Client’s past claims history, taking into account an established relationship with a STAR+PLUS participating PCP
  • Client’s age
  • Client’s sex
  • Client’s geographic proximity to the PCP

STAR+PLUS Help Line (Enrollment Broker)
The STAR+PLUS Help Line is available 8 a.m. to 8 p.m., Central Time, Monday through Friday by calling one of the following numbers:

• Telephone: 1-800-964-2777
• Telecommunications device for the deaf (TDD): 1-800-267-5008

8.3.3 STAR+PLUS Program Benefits
STAR+PLUS Program clients receive all the benefits of Texas Medicaid fee-for-service along with the prescriptions benefits defined in subsection 8.2.5.2, “Prescriptions” in this section (for STAR+PLUS members who are not dual-eligible)
Note: HIPP Program clients should access their benefits through Texas Medicaid fee-for-service, and should not be enrolled in managed care unless they choose to leave the HIPP program.

8.3.4 Spell of Illness Limitation
The spell of illness limitation is defined as 30 days of inpatient hospital care, which may accrue intermit-tently or consecutively. After 30 days of inpatient care is provided, reimbursement for additional inpatient care is not considered until the client has been out of an acute care facility for 60 consecutive days. The State waives the 30 day spell of illness limit for inpatient behavioral health services.

8.3.5 Claims Filing Information
The claims filing guidelines found in subsection 8.1.12, “Prior Authorizations” in this section, also apply to STAR+PLUS.

In addition to the claim types found in subsection 8.1.12, TMHP processes claims for the following STAR+PLUS clients and programs:

- All crossovers for deductibles and coinsurance on STAR+PLUS MQMBs
- All claims for Medicaid-only services (e.g., refractions, hearing exams, etc.) provided to STAR+PLUS MQMBs

TMHP will process and consider for payment inpatient hospital accommodations and related inpatient services (anything billed on an inpatient UB-04 CMS-1450 claim form). These services must be prior authorized by the client’s HMO. After the provider requests prior authorization from the HMO, the HMO will forward the authorization to TMHP, and claims will be processed and considered for payment against the services authorized by the HMO. Claims received by TMHP without a prior authorization from the HMO will be denied.

For STAR+PLUS clients, the HMO will be responsible for processing and paying professional services. All authorizations, if required, for these claims must be submitted to the HMO and all claims for professional services must be submitted to the HMO.

STAR+PLUS MQMBs receive services and have their acute care claims processed as though they are not in a Medicaid managed care program. TMHP is responsible for reimbursing all Medicare coinsurance and deductibles that meet Medicaid payment criteria, as well as for all services that are a benefit of the Medicaid program (refractions, hearing exams, etc.) that are not covered under the Medicare program.

PCS services will not be processed or authorized for STAR+PLUS MCO clients. The STAR+PLUS MCOs will continue to deliver PCS to their clients.

8.3.5.1 STAR+PLUS Mental Health Claims
Freestanding psychiatric facility claims and inpatient claims with a behavioral health primary diagnosis submitted for clients who are enrolled in a STAR+PLUS plan will be processed by the STAR+PLUS HMOs. TMHP will deny these claims. Providers must file these types of claims with the appropriate HMO.

Claims for mental health case management and rehabilitative services that are delivered by mental health and mental retardation (MHMR) facilities are not included, since they remain carved out of the managed care model.

Note: This does not include claims for mental health case management and rehabilitative services delivered by MHMR facilities. Those services remain carved out of this managed care model.
8.4 NorthSTAR Program

8.4.1 Overview
NorthSTAR, in the Dallas SA, provides behavioral health services (mental health, chemical dependency, and substance abuse treatment) for Medicaid enrollees through a BHO. NorthSTAR also serves a clinically and financially eligible non-Medicaid population.

NorthSTAR is known as a behavioral health carve-out of the STAR Program in the Dallas SA. Medicaid provides access to physical health care while NorthSTAR provides mental health and chemical dependency (behavioral health) services.

NorthSTAR provides easier access to a comprehensive array of behavioral health services and providers. The program’s goal is to provide clinically necessary behavioral health services to enrollees, through a network of qualified and credentialed providers.

In the NorthSTAR Program, ValueOptions is the sole BHO and is responsible for contracting with providers and maintaining a behavioral health-care provider delivery network. The BHO also:

- Offers education and support to the provider network.
- Performs utilization management through authorization of services, concurrent review, and special studies.
- Performs quality assurance monitoring and activities.
- Provides client services including education and outreach.
- Processes claims.

8.4.2 Provider Requirements and Information
In the STAR Program, clients select a PCP from among the providers who have contracted with a STAR HMO or PCCM. In the NorthSTAR Program, a client may have several different providers for different specialty behavioral health services. The BHO will arrange behavioral health services and make referrals to specific providers within the BHO network.

Providers are encouraged to coordinate care with physical health providers in the Medicaid managed care and Texas Medicaid fee-for-service programs. Behavioral health providers may do this by notifying the Medicaid managed care or Texas Medicaid fee-for-service provider. Behavioral health providers may also notify the BHO that the client is receiving services.

Providers interested in becoming a ValueOptions network provider can obtain additional information by contacting ValueOptions at 1-888-800-6799.

Note: If a behavioral health provider practices in the Dallas SA, he must be enrolled as a network provider in the NorthSTAR BHO (ValueOptions) to provide services to NorthSTAR enrollees. Providers who serve NorthSTAR enrollees without being in the provider network or without prior authorization in nonemergency situations risk non-payment of claims.

8.4.3 Service Area
The NorthSTAR Program is available in the Dallas SA. The following counties are included: Collin, Dallas, Ellis, Hunt, Kaufman, Navarro, and Rockwall.

The ValueOptions Provider Services telephone number is 1-888-800-6799.

8.4.3.1 Client Eligibility
Most Medicaid clients residing in the Dallas SA must enroll in NorthSTAR. All STAR Program enrollees are subject to mandatory enrollment in NorthSTAR. Once enrolled in NorthSTAR, ValueOptions will coordinate enrollee behavioral health services.
Refer to: Subsection 4.1, “Client Medicaid Identification (Form H3087)” in Section 4, Client Eligibility (Vol. 1, General Information).

Note: NorthSTAR Program enrollment information is not reflected on the Medicaid Identification Form (Form H3087), but enrollment can be confirmed by the BHO or the enrollment broker.

Medicaid clients residing in the Dallas SA that are not eligible to enroll in a NorthSTAR BHO are:

- Medicaid clients living in a nursing facility
- Medicaid clients living in an ICF-MR
- Medicaid clients living in state hospitals’ Institutions for Mental Disease Over Age 65 Program
- Children who are in the custody of the Department of Family and Protective Services (DFPS) (in foster care)
- Certain Medicaid clients that are ineligible for NorthSTAR such as program type 55

Refer to: Subsection 8.2.3, “Client Enrollment” in this section for further information on STAR Program eligible client program types and for further information on STAR Program eligibility effective dates.

8.4.4 Client Enrollment

When a Medicaid enrollee requests services, the provider should contact ValueOptions or the Enrollment Broker to verify enrollment in NorthSTAR. If the client is not currently enrolled in NorthSTAR, the provider may give the client the telephone number of the Enrollment Broker so the client may become enrolled in NorthSTAR.

The Enrollment Broker staff is trained to assist potential clients in their understanding of both the STAR and NorthSTAR programs.

Medicaid clients must enroll via the Enrollment Broker during regular business hours. If it is an emergency and after regular business hours, the NorthSTAR BHO can enroll a Medicaid client into NorthSTAR.

Medicaid clients may also mail in their enrollment using the NorthSTAR enrollment form. Non-Medicaid clients may be enrolled by NorthSTAR at designated enrollment sites.

Client enrollment is retroactive to the NorthSTAR eligibility certification date. For example:

<table>
<thead>
<tr>
<th>NorthSTAR Example</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Client certified for Texas Medicaid in the NorthSTAR SA</td>
<td>January 1</td>
</tr>
<tr>
<td>Medicaid benefits begin</td>
<td>January 1</td>
</tr>
<tr>
<td>Client enrolls in NorthSTAR</td>
<td>January 20</td>
</tr>
<tr>
<td>NorthSTAR benefits begin</td>
<td>January 1</td>
</tr>
</tbody>
</table>

8.4.4.1 NorthSTAR Enrollment Broker

The NorthSTAR Enrollment Broker is available 8 a.m. to 8 p.m., Central Time, Monday through Friday by calling one of the following numbers:

- Telephone: 1-800-964-2777
- Telecommunications device for the deaf (TDD): 1-800-267-5008

8.4.4.2 Guidelines for Working with NorthSTAR Clients

Clients enrolled in NorthSTAR, like any other clients, have these rights:

- To be treated with respect, dignity, privacy and confidentiality, and without discrimination.
• To consent to or refuse treatment and actively participate in treatment decisions.
• To use each available complaint process and to receive a timely response to complaints.
• To receive timely access to care that does not have any communication or physical access barriers.

8.4.5 Claims Filing Information
All behavioral health claims for NorthSTAR enrollees in the Dallas SA must be filed to the NorthSTAR BHO, ValueOptions. Behavioral health specialists and hospitals are not to bill TMHP for behavioral health services provided to clients who are enrolled in or eligible for enrollment in the NorthSTAR Program.

Exception: Claims with a primary diagnosis of developmental disability (mental retardation, autism, pervasive developmental disorder) are submitted to TMHP.

If a behavioral health claim is submitted to TMHP for any diagnosis other than a developmental disability, it is denied. If a behavioral health claim is paid erroneously, TMHP will recoup it.

8.4.5.1 Hospital Billing
In the Dallas SA, SSI clients are subject to mandatory enrollment in Medicaid managed care through the NorthSTAR Program. In some instances, general acute care hospitals treat a NorthSTAR client with a primary behavioral health diagnosis. In that instance, the general acute care hospital needs to seek authorization and reimbursement from ValueOptions using the CMS-1500 form for outpatient services and UB-04 CMS-1450 for inpatient services.

8.4.5.2 Behavioral Health Billing
Services provided under the STAR Program are billed to the STAR HMO in which the client is enrolled. The STAR Program in the Dallas SA covers medically necessary physical health-care services and behavioral health services that are delivered by medical providers, such as primary care physicians, FQHCs, and RHCs. STAR also covers ambulatory laboratory and ancillary services required to diagnose or treat behavioral health conditions and psychological testing for certain non-behavioral health diagnoses.

The program-related forms are the CMS-1500 and UB-04 CMS-1450.

8.4.5.3 Prior Authorization Requirements
To receive payment for services provided to ValueOptions clients, providers must be enrolled with ValueOptions. (Exceptions include emergency care and medically necessary treatment episodes that began before the client joined NorthSTAR.) ValueOptions requires that the provider obtain prior authorization for most nonemergency services. If the provider does not obtain prior authorization, they may not get payment for services. These rules apply whether the provider’s practice or facility is located in or out of the Dallas SA.

8.4.6 Complaints and Appeals
A complaint is defined as any dissatisfaction expressed in writing by the provider, or on behalf of that provider, concerning any aspect of the health plan. The term complaint does not include a misunderstanding or a problem of misinformation that is resolved promptly by clearing up the misunderstanding or supplying the appropriate information to the provider’s satisfaction.

Appeals and grievances, hearings, or dispute resolution is the responsibility of ValueOptions. Providers must exhaust the appeals and grievance process with ValueOptions before filing a complaint with NorthSTAR Provider Relations. Under the complaint process, NorthSTAR Provider Relations works with ValueOptions and providers to verify the validity of the complaint, determine if the established due process was followed in resolving appeals and grievances, and addresses other program/contract issues,
as applicable. When filing a complaint, providers must submit a letter explaining the specific reasons they believe the final appeal decision by the NorthSTAR health plan is incorrect and copies of the following documentation as appropriate:

- All R&S Reports of the claims and services in question, if applicable
- Provider’s claims and billing records (electronic or manual) related to the complaint
- Provider’s internal notes and logs when pertinent
- Memos from the state or the health plan indicating any problems, policy changes, or claims processing
- Discrepancies that may be relevant to the complaint
- Other documents such as receipts (e.g., certified mail)
- Original date-stamped envelopes, in-service notes
- Minutes from meetings, etc., if relevant to the complaint

All NorthSTAR providers must exhaust the ValueOptions complaint and appeals process first. After this process is exhausted and if the outcome is unsatisfactory, NorthSTAR providers may file complaints or appeals with NorthSTAR Provider Relations at the following address:

Department of State Health Services
NorthSTAR Enrollee/Provider Relations
PO Box 149347
Mail Code 2012
Austin, TX 78714-9347

8.4.6.1 Quality Improvement Monitoring

Direct quality of care concerns to ValueOptions or NorthSTAR Provider Relations at the following address:

ValueOptions
Attn: Complaint and Grievance Coordinator
1199 South Beltline, Suite 100
Coppell, TX 75019

Refer to: Subsection 7.1.5, “Paper Appeals” in Section 7, “Appeals” (Vol. 1, General Information) for more information on paper appeals.

8.5 STAR Health Program

8.5.1 Overview

The STAR Health program ensures that children taken into state conservatorship are able to receive the examinations, assessments, and care coordination they need immediately upon entry into conservatorship.

Superior HealthPlan Network manages the health care for children who are enrolled in the foster care managed care program, STAR Health.

8.5.2 STAR Health Model

HHSC has selected Superior HealthPlan as the MCO for this program. Superior HealthPlan is responsible for assigning a PCP to clients when they are enrolled in the STAR Health Program. Foster care families are given the opportunity to change their PCP after this initial assignment.
8.5.3 Client Eligibility

All Medicaid clients in foster care are placed in this program with the following exceptions: children adjudicated and placed in a Texas Youth Commission (TYC) or Texas Juvenile Probation Commission (TJPC) facility; children from other states who are placed in Texas Children in Medicaid-paid facilities such as children in nursing homes, ICF-MRs, or State-Supported Living Centers; children who are dual eligible clients in Medicare and Medicaid; children who are active SSI-related Medicaid clients; children who are in state conservatorship who are placed outside of Texas; and children who are in adoption assistance.

Clients who participate in the Medicaid for Transitioning Foster Care Youth (MTFCY) program and the Former Foster Care in Higher Education (FFCHE) program are eligible for the STAR Health program.

The following table shows the age ranges for clients who may be eligible for the STAR Health program:

<table>
<thead>
<tr>
<th>Group Clients Belong to</th>
<th>Age Ranges</th>
</tr>
</thead>
<tbody>
<tr>
<td>Client under DFPS conservatorship</td>
<td>DFPS can retain conservatorship through the month of the client’s 18th birthday. (Eligibility ends the month conservatorship ends.)</td>
</tr>
<tr>
<td>Clients who voluntarily continue in a foster care placement after DFPS conservatorship ends</td>
<td>18 through 21 years of age (Eligibility ends the month of their 22nd birthday.)</td>
</tr>
<tr>
<td>Clients who are participating in the MTFCY program</td>
<td>18 through 20 years of age (Eligibility ends the month of their 21st birthday.)</td>
</tr>
<tr>
<td>Clients who are participating in the FFCHE program</td>
<td>21 through 22 years of age (Eligibility ends the month of their 23rd birthday.)</td>
</tr>
</tbody>
</table>

STAR Health members can gain eligibility on any day of the month. To ensure the accurate confirmation of STAR Health eligibility, it is essential that all health-care providers verify eligibility by contacting the STAR Health HMO. The STAR Health HMO receives updated eligibility information on a daily basis, so it will have the most current eligibility information.

The Department of Family and Protective Services (DFPS) Form 2085 as well as Medicaid Identification Form (Form H3087) may also be used to verify eligibility in the STAR Health Program.

8.5.4 Enrollment of Newborns

Newborns born to a mother who is enrolled in the STAR Health program are automatically enrolled in STAR Health.

Newborns born to a mother who is enrolled in STAR Health through the Former Foster Care in Higher Education (FFCHE) Program are not eligible to be enrolled in STAR Health.

Newborns that are taken into State conservatorship while still in the hospital will be enrolled in STAR Health on the date the State takes conservatorship.

8.5.5 STAR Health Program Benefits

STAR Health Program clients receive all the benefits of traditional Texas Medicaid as well as service coordination to assist in making appointments and accessing services; and service management to assist with managing the health care of those with ongoing and serious medical needs. Unlimited medically necessary prescription drugs are available for adults eligible for the STAR Health Program through the Medicaid VDP.

Refer to: Appendix B: Vendor Drug Program for information about out-patient prescription drugs.
8.5.6 STAR Health Claims Filing

Most Medicaid foster care claims are capitated services and must be submitted to Superior HealthPlan. The following services are non-capitated services that are paid by TMHP:

- ECI targeted case management
- Case management for Children and Pregnant Women (CPW)
- DADS mental retardation case management
- SHARS
- DARS Blind Children’s Vocational Discovery and Development Program
- Tuberculosis (TB) services
- County Indigent Health Care Program (CIHCP)
- Indian Health Services (IHS)
- PCS
- Long-term care (LTC) services currently paid by the TMHP Claims Management System
- DSHS Mental Health Targeted Case Management
- DFPS Targeted Case Management
- Medicaid Medical Transportation
- DADS hospice services (all clients are disenrolled from their health plan upon enrollment into hospice)
- Audiology services and hearing aids for members through hearing services for children (hearing screening services are provided through the THSteps Program and are capitated)

All THSteps dental, medical, vision, and mental health providers should submit claims for services rendered to foster care clients to Superior HealthPlan’s dental, vision, and mental health contractors.

For general provider information, contact STAR Health at 1-866-439-2042.

For authorizations, contact:

**Note:** HIPP program clients who are enrolled in STAR HEALTH should be removed from the HIPP program and continue to receive their benefits under the STAR Health program.
Refer to: Subsection 4.12, “Health Insurance Premium Payment (HIPP) Program” in Section 4, “Client Eligibility” (Vol. 1, General Information), for more information about outpatient prescription drugs that are provided by VDP contracted pharmacies. Appendix B: Vendor Drug Program (Vol. 1, General Information) for information about VDP.

8.5.6.1 STAR Health Mental Health Rehabilitation Mental Health Claims Submissions

STAR Health providers must submit their mental health rehabilitation claims for Superior HealthPlan foster care clients to IMHS at the following address:

IMHS Claims
PO Box 6300
Farmington, MO 63640-3806

Providers should submit their electronic claims to one of the clearinghouses that are trading partners with IMHS. Information about these clearinghouses can be found on the Cenpatico website at www.cenpatico.com. Click Providers, click Resources, and then click Electronic Transactions (EDI). Texas mental health providers can use Emdeon or Availity with Payer ID 68053 (Texas only).

For more information on the use of other clearinghouses, providers should call IMHS at 1-877-730-2117 or visit the Cenpatico website at www.cenpatico.com.

The following procedure codes and modifier combinations must be submitted to IMHS for mental health rehabilitation services:

<table>

The services listed above may be reimbursed when rendered to clients who satisfy the criteria of the mental health, priority population and who are determined to need inpatient rehabilitation. These services may be provided to a person with a single severe mental disorder (excluding mental retardation, pervasive developmental disorder, or substance use disorder) or a combination of severe mental disorders as defined in the *American Psychiatric Association Diagnostic and Statistical Manual of Mental Disorders*, Fourth Edition, Text Revision (DSM-IV-TR).

### 8.6 PCCM

#### 8.6.1 Overview

PCCM is not an HMO. PCCM is a service delivery model under the Texas Medicaid managed care program and is administered by TMHP. PCCM is a network of PCPs and hospitals under contract with HHSC. PCCM PCPs and hospitals contract directly with HHSC. PCCM clients select or are assigned a PCP from among those who have contracted with HHSC. PCCM was originally implemented as one of the health-care delivery options available under the STAR Program, but is no longer part of the STAR Program.

PCCM is available in the following counties:

<table>

The Southeast Region (Chambers, Hardin, Jefferson, Liberty, and Orange Counties) previously was part of the STAR Program. Culberson, Hudspeth, and Blanco Counties, previously STAR HMO counties, changed to PCCM-only counties on September 1, 2005.

### 8.6.2 Contact Numbers

**PCCM Provider Helpline: 1-888-834-7226**
Assistance available to PCCM providers for a broad range of Medicaid and PCCM issues.  
7 a.m. to 7 p.m., Central Time, Monday through Friday  
Choose Option 5, then Option 1, then Option 5  
Fax: 1-512-506-7002

**PCCM Client Helpline: 1-888-302-6688**
The primary resource for PCCM clients seeking information or answers to nonclinical questions.  
7 a.m. to 7 p.m., Central Time, Monday through Friday

**PCCM Inpatient/Outpatient Prior Authorization Line: 1-888-302-6167**
Outpatient and Prior Authorization, Notifications, Prior Authorizations and Updates to Existing Authorizations  
7 a.m. to 7 p.m., Central Time, Monday through Friday  
Fax: 1-512-302-5039

**Community Health Services (CHS) Helpline: 1-888-276-0702**
Case Management and Health and Program Benefit Education (for PCCM clients only)  
7 a.m. to 7 p.m., Central Time, Monday through Friday  
(Voice mail is available outside of normal business hours.)  
Fax: 1-512-302-0318

**The Nurse Helpline: 1-800-304-5468**
Clinical helpline staffed by nurses who assess PCCM client symptoms and guide PCCM clients to the appropriate care setting.  
24 hours a day, 7 days a week

</tr>
<tr>
<td>61</td>
<td>TANF state program</td>
<td>M</td>
</tr>
</tbody>
</table>

M = Mandatory, V = Voluntary, M* = Mandatory for adults who are 21 years of age and older

To verify a client’s eligibility and PCP, use one or more of the following eligibility resources:

- Medicaid Identification Form (Form H3087) and PCP change notification letter (letter can only be used to verify PCP; see subsection 8.6.7.2, “Changing a PCP” in this section)
- Monthly panel report
- Daily PCP change list
- TMHP website at www.tmhp.com
- TMHP EDI
- Automated Inquiry System (AIS) at 1-800-925-9126, Option 1
- PCCM Provider Helpline at 1-888-834-7226
- TMHP Contact Center at 1-800-925-9126, Option 5

Providers have multiple options by which to verify a PCCM client’s Medicaid eligibility. Providers must verify eligibility through another source listed above even if a client presents a Medicaid Identification Form (Form H3087) and a PCP change notification letter. Services should not be denied to PCCM clients solely because a client does not present their H3087 or H1027 Medicaid identification forms.
In some situations, an eligibility response may indicate that the provider should contact PCCM to verify the PCP information. For more information, call the TMHP Contact Center at 1-800-925-9126 or the PCCM Provider Helpline at 1-888-834-7226.

### 8.6.4 Client Enrollment

Enrollment into PCCM is mandatory for Medicaid clients residing in one of the PCCM counties and who meet the following criteria:

- Low-income families (primarily women and children)
- Blind and disabled individuals who receive SSI and are 21 years of age and older

Children who are 20 years of age and younger and receive SSI may enroll on a voluntary basis. Elderly and disabled Medicaid clients who live in a nursing home or who are enrolled in community based long-term care will remain in Texas Medicaid fee-for-service. Clients on Medicare and individuals enrolled in the Medically Needy Program are not eligible for PCCM enrollment.

**Note:** HIPP program clients should access their benefits through Texas Medicaid fee-for-service and should not be enrolled in managed care unless they choose to leave the HIPP program.

**Refer to:** Subsection 4.12, "Health Insurance Premium Payment (HIPP) Program" in Section 4, “Client Eligibility” (Vol. 1, General Information).

### 8.6.5 Client Rights and Responsibilities

#### 8.6.5.1 Client Rights

PCCM clients have defined rights and responsibilities. PCCM and PCPs share the responsibility to ensure and protect client rights and to assist clients in understanding and fulfilling their responsibilities as plan clients.

PCCM clients have the right to:

- Be treated fairly and with dignity and respect.
- Know that their medical records and discussions with their providers will be kept private and confidential.
- A reasonable opportunity to choose a PCP (the doctor or health-care provider they will see most of the time and who will coordinate their care) and to change to another provider in a reasonably easy manner. These opportunities include the right to:
  - Be informed of available PCPs in their areas.
  - Be informed of how to choose and change PCPs.
  - Change their PCP.
- Ask questions and receive answers about anything they don’t understand, which includes the right to:
  - Have their provider explain their health-care needs to them and talk to them about the different ways their health-care problems can be treated.
  - Be told why care or services were denied and not given.
- Consent to or refuse treatment and actively participate in treatment decisions, which includes the right to:
  - Work as part of a team with their provider in deciding what health care is best for them.
  - Say yes or no to the care recommended by their provider.
• Utilize each available complaint and appeal process through PCCM and through Medicaid, receive a timely response to complaints, appeals, and fair hearings. These processes include the right to:
  • Make a complaint to PCCM or to Texas Medicaid about their health-care, provider, or PCCM.
  • Receive a timely answer to their complaint.
  • Access the PCCM appeal process and the procedures for doing so.
  • Request a fair hearing from Texas Medicaid and request information about the process for doing so.
• Timely access to care that does not have any communication or physical access barriers. That includes the right to:
  • Have telephone access to a medical professional 24 hours a day, 7 days a week in order to obtain any needed emergency or urgent care.
  • Receive medical care in a timely manner.
  • Be able to get in and out of a health-care provider’s office, including barrier free access for persons with disabilities or other conditions limiting mobility, in accordance with the Americans with Disabilities Act.
  • Have interpreters, if needed, during appointments with their providers and when talking to PCCM. Interpreters include people who can speak in their native language, assist with a disability, or help them understand the information.
  • Be given an explanation they can understand about PCCM rules, including the health-care services they can get and how to get them.
• Not be restrained or secluded when doing so is for someone else’s convenience, or is meant to force them to do something they do not want to do, or to punish them.

8.6.5.2 Client Responsibilities
PCCM and PCPs should help clients understand their responsibilities. These include the responsibility to:
• Learn and understand each right they have under the Medicaid program. That includes the responsibility to:
  • Learn and understand their rights under the Medicaid program.
  • Ask questions if they do not understand their rights.
• Abide by PCCM and Medicaid managed care policies and procedures. That includes the responsibility to:
  • Learn and follow PCCM rules and Medicaid rules.
  • Choose a PCP.
  • Make any changes in their PCP in the ways established by Medicaid managed care.
  • Keep their scheduled appointments.
  • Cancel appointments in advance when they cannot keep them.
  • Always contact their PCP first for nonemergency medical needs.
  • Be sure they have approval from their PCP before going to a specialist (except for self-referred services).
  • Understand when they should and should not go to the ER.
• Share information relating to their health status with their PCP and become fully informed about service and treatment options. That includes the responsibility to:
  • Tell their PCP about their health.
  • Talk to their providers about their health-care needs and ask questions about the different ways their health-care problems can be treated.
  • Help their providers get their medical records.
• Actively participate in decisions relating to service and treatment options, make personal choices, and take action to maintain their health. That includes the responsibility to:
  • Work as a team with their provider in deciding what health care is best for them.
  • Understand how the things they do can affect their health.
  • Do the best they can to stay healthy.
  • Treat providers and staff with respect.

8.6.6 Online Provider Lookup

The online provider lookup (OPL) is available on the public access portion of the TMHP website at www.tmhp.com. Provider information can be viewed by providers, clients, and anyone who accesses the TMHP website.

Providers can use the online update function to update their demographic information on the website. This allows users to view the most current information about the provider. To update demographic information online, authorized users log in to the TMHP website by clicking Log In on the homepage. Periodically, administrators may be required to verify their address when logging in to their account. This verification must be completed before the administrator can proceed to the secured portion of the website. The “My Account” page has a link to the Provider Demographic Update web page. Current information will be displayed with a button to allow editable fields to be changed. Demographic information may be updated only by authorized administrators. This authorization is controlled through the Permissions Management link, also located on the “My Account” page. Fields that can be updated online include the following:

• Address
• Telephone numbers
• Office hours
• Accepting new clients
• Additional sites where services are provided
• Languages spoken
• Additional services offered
• Medicaid waiver programs
• Client age or gender limitations
• Counties served
• Specialty
• Sub-specialty
The provider’s name, gender, and group or plan affiliation cannot be changed online. Contact TMHP Provider Enrollment at 1-800-925-9126, Option 2, regarding changes to this information. The PCCM Provider Directories of the OPL also includes symbols (which are located in the legend) that indicate whether a provider is a children's hospital or has a designated children's unit.

Clients using the OPL will use drop-down boxes to select search criteria. An initial list will display all providers that meet the specified search criteria. Clicking on any name in that list will display the provider’s specific information, including a map of the office location. Clients can also search for hospitals that include children's units on the OPL search page.

Links to HMO websites are also provided, enabling clients to search each HMO’s network of participating providers. The OPL supports both English and Spanish language users, and search results can be printed.

**Note:** For family planning services, clients (regardless of Medicaid eligibility) have the freedom of choice to obtain services from any Medicaid-enrolled provider.

### 8.6.7 PCP Selection and Changes

#### 8.6.7.1 Selecting a PCP

The PCP selection process allows new PCCM clients to choose their PCP before one is auto-assigned. Clients can select a PCP by calling the PCCM Client Helpline at 1-888-302-6688 or by mailing the PCCM PCP Selection form to TMHP. Clients are allowed to call the PCCM Client Helpline from a provider’s office to request a PCP change.

PCCM clients have up to 75 days to select a PCP and up to 105 days to select a PCP for their newborn. If clients do not make a selection within the specified time period, a PCP will be auto-assigned.

If a client chooses to select the same PCP for another family member (e.g., a newborn child or a family member who has been under the care of a different PCP) and the request is denied due to a closed panel, clients are instructed to notify their PCP. TMHP will open the panel by PCP request only.

#### 8.6.7.1.1 Auto-Assignment

If a client does not exercise the right to choose a PCCM PCP, the client will be auto-assigned a PCP. The following factors are considered when processing an auto-assignment:

- Client’s past claims history, taking into account an established relationship with a PCCM PCP
- Client’s age
- Client’s sex
- Client’s geographic proximity to the PCP

PCCM clients are required to obtain health care from their selected or assigned PCP. If the Medicaid Identification Form (Form H3087) lists either PCCNEWB01 (newborns) or PCCPCCM01 (all clients except newborns) as the PCP, any PCCM or Medicaid enrolled provider can render health-care services to the client.

#### 8.6.7.2 Changing a PCP

PCCM clients may change their PCP at any time, by calling the PCCM Client Helpline at 1-888-302-6688 or by submitting the Primary Care Case Management (PCCM)- Medicaid Primary Care Provider Selection Form in this handbook and on the PCCM web page on the TMHP website at www.tmhp.com.

PCCM clients receive a PCP change notification letter after requesting a change to their PCP.

If a client request for a PCP change is successful, the notification letter will list the name of the new PCP and the effective date of the change. Clients will be instructed to take both the notification letter and their Medicaid Identification Form (Form H3087) to the new PCP’s office.
Successful requests for PCP changes that are received through the last business day of the month usually become effective on the first day of the next month and are reflected on the following:

- All eligibility verification systems
- The claims payment system
- The client’s PCP change notification letter

Clients will also receive a notification letter if their PCP request is unsuccessful. If a change request is unsuccessful, the notification letter provides possible reasons that the request was not processed and a number for the client to call for assistance.

Refer to: Subsection 8.1.7.1, “Client-Initiated PCP Changes” in this section for information about effective dates of PCP changes.

8.6.7.3 Provider Initiated PCP Changes

Occasionally, the relationship between a client and their PCP may become unsatisfactory to one or both parties. A provider may request a client be reassigned to another PCP for any of the following reasons:

- The client is not included in the PCP’s scope of practice.
- The client is noncompliant with medical advice.
- The client consistently displays unacceptable office decorum.
- The relationship between the client and PCP is not mutually agreeable.

If the relationship with the client is unsatisfactory due to behavioral issues on the client’s part, the PCP should contact PCCM CHS at 1-888-276-0702 to request assistance in resolving the problem. A community health coordinator can intervene and help providers with non-adherent and disruptive patients in most instances. The referral can also be made by submitting the PCCM Community Health Services Referral Request Form by fax to PCCM CHS at 1-512-302-0318.

Refer to: Form 8.3, PCCM Community Health Services Referral Request Form in this section.

If the relationship with the client cannot be improved, the provider must notify TMHP in writing to request reassignment of a client to another PCP before the request can be processed. The PCP must also notify the client in writing stating the reason for the reassignment. A copy of the letter to the client may serve as notification to TMHP.

TMHP will notify the client of the reassignment in writing and request that the client choose another PCP. PCP requests to reassign a client usually take 60 days before the change is made. During this time, the PCP is responsible for providing primary care to the client or referring the client to another provider for medically necessary care.

8.6.8 Provider Enrollment

PCPs can choose to contract with PCCM and HMO health plans simultaneously. A PCCM PCP’s contractual obligations are identified in the contract between HHSC and each PCP. PCCM PCP obligations are in addition to those required for Medicaid program participation and are intended to ensure that PCCM clients have access to quality health care from trained and credentialed providers.

Refer to: Subsection 8.1.10, “PCP Requirements and Information” in this section.

Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).

Important: All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities (Vol. 1, General Information). In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid Program rules when a provider fails to provide health-care services or items to Medicaid clients in accor-
dance with accepted medical community standards and standards that govern occupations, as explained in 1 TAC §371.1617(a)(6)(A). Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.

Note: All hospitals that are enrolled in the PCCM program must remain active in Texas Medicaid as a condition of continued participation in the PCCM program.

8.6.8.1 Credentialing Committee

The Credentialing Committee is charged with the responsibility of reviewing each provider applicant’s file to ensure that enrolling physicians and other health-care professionals are qualified to perform services as PCCM providers.

The committee reviews each provider applicant’s file and decides whether the provider should be recommended to the HHSC Medical Director as a PCP in the PCCM provider network. If HHSC approves the recommendation, the provider is accepted as a participating provider for three years.

The Credentialing Committee is also charged with the responsibility of recredentialing PCCM providers, which occurs every three years after initial credentialing.

The Credentialing Committee also reviews and approves credentialing policies and procedures for PCCM.

8.6.8.2 Members of the Credentialing Committee

The Credentialing Committee is comprised of the following members:

- Chair. Medical Director, HHSC Medicaid and Children’s Health Insurance Program (CHIP)
- Co-Chair. Associate Medical Director, HHSC Medicaid and CHIP Programs
- Co-Chair. Medical Director, TMHP
- Associate Medical Director, TMHP
- Contracting and Credentialing Manager, TMHP
- Quality Services Officer, TMHP

If a committee member is unable to attend a meeting, the member may appoint a designee.

8.6.8.3 Credentialing Committee Frequency and Logistics

The Credentialing Committee meets monthly, or as required, to review new applications for credentialing and recredentialing. The PCCM Contracting and Credentialing staff will have previously completed the initial screening for each provider in accordance with the standards of the National Committee for Quality Assurance (NCQA).

8.6.8.4 Credentialing Committee Action

The TMHP Medical Director, as the Co-Chair, is charged with implementing the credentialing and recredentialing standards for participating providers in PCCM. The HHSC Medical Director also reviews submitted documentation and recommends acceptance or rejection of each provider.

When a PCP’s PCCM credentialing file is complete, the TMHP Medical Director and Credentialing Committee verify all credentials and present their findings to the HHSC Medical Director for Medicaid and CHIP Programs (HHSC Medical Director), at the Credentialing Committee meeting. The HHSC
Medical Director reviews the credentials and determines whether the applicant meets HHSC credentialing criteria. The decision to accept a provider as a PCCM PCP is made by HHSC in accordance with basic credentialing standards.

Based on this action, HHSC executes the contract of approved providers. PCCM then notifies each approved applicant in writing of the application’s status. For approved providers, the notification includes:

- A fully executed provider contract.
- The date upon which the contract is effective.
- Conditions of participation in PCCM.
- Recredentialing requirements.

**8.6.8.5 Credentialing Grievance Committee**

The Credentialing Grievance Committee reviews provider requests for reconsideration of credentialing decisions. Applicants who are not approved are notified by certified mail of the denial, the reason for the denial, and the process for reconsideration. Applicants may request reconsideration by submitting evidence that the deficiencies for which the original application was denied have been corrected.

A provider has 30 days to request a reconsideration of a recredentialing denial to the Credentialing Grievance Committee. Such requests must be in writing and submitted to the following address:

Primary Care Case Management  
Credentialing Grievance Committee  
Credentialing Mail Code MC-B05  
PO Box 204270  
Austin, TX 78720-4270

**8.6.8.5.1 Members of the Credentialing Grievance Committee**

The Credentialing Grievance Committee is composed of the following members:

- Medical Director, HHSC Medicaid and CHIP Programs, or designee
- Medical Director, TMHP
- Contracting and Credentialing Manager, TMHP
- Provider Services Director, TMHP
- Staff person from HHSC Medicaid/CHIP/PCCM

**8.6.8.5.2 Credentialing Grievance Committee Frequency/Logistics**

The Credentialing Grievance Committee convenes within 60 days after receipt of a grievance or request for reconsideration. The provider is notified of the date, time, and location of the grievance hearing before the Credentialing Grievance Committee. The provider may attend the grievance hearing.

**8.6.8.5.3 Notification of the Credentialing Grievance Committee’s Decision**

The provider is notified in writing of the decision of the Credentialing Grievance Committee within 45 days after adjournment of the hearing. The Credentialing Grievance Committee forwards its recommendations to HHSC following the hearing.

A decision of the Credentialing Grievance Committee may be submitted for reconsideration to:

Texas Health and Human Services Commission  
Office of General Counsel  
4900 N. Lamar, 4th Floor  
Austin, TX 78751
8.6.8.6 **PCP Termination/Disenrollment**

PCPs may terminate the PCCM agreement by providing 90 days prior written notice. Ninety days prior notice is requested to allow sufficient time to complete the reassignment process of clients in a PCP’s panel to new PCPs.

Individual provider agreements will terminate automatically upon a provider’s death, the sale of the provider’s practice, or termination as a participant in Texas Medicaid.

HHSC may terminate a provider agreement by providing 30 days prior written notice. An HHSC initiated provider termination would be instituted for a provider who does not consistently meet plan requirements.

Refer to: Subsection 8.6.14, “Monitoring Provider Performance” in this section.

Clinics must notify PCCM within 30 days when a provider employee leaves the employ of or terminates his contract with the clinic, or is no longer willing to function as a PCP.

Termination or disenrollment notification should be sent to the following address:

Primary Care Case Management  
Contracting and Credentialing Department MC-B05  
PO Box 204270  
Austin, TX 78720-4270

All correspondence must include the PCP’s contracted provider identifier on signed letterhead or providers should contact the Provider Enrollment/Contracting and Credentialing Department at 1-800-925-9126, Option 2, to request a Provider Information Change (PIC) form.

8.6.8.7 **Additional Criteria for PCPs**

All PCCM PCPs must meet credentialing/recredentialing criteria. PCPs are also required to meet the following criteria:

- **Ability to Perform or Supervise the Ambulatory Primary Care Services of Clients.** Provider performance is monitored on an ongoing basis. The PCCM Administrator follows up on evidence of poor performance and addresses identified problems immediately to ensure that high-quality care is delivered to clients.

- **Admitting Privileges.** The PCP must maintain admitting privileges with a hospital that is a participating provider in PCCM, or make arrangements with another Texas licensed physician who is an eligible Medicaid provider and who maintains admitting privileges with a contracted PCCM hospital.

8.6.8.8 **Miscellaneous Provisions**

Several other provisions apply to PCP participation in PCCM:

- A PCP agreement may be modified only by written agreement signed by all parties.

- A PCP agreement is not assignable by a PCP, either in whole or in part, without the prior written consent of the HHSC.

- PCP agreements shall be governed and construed in accordance with the laws of the state of Texas.

- A PCP shall be required to bring all legal proceedings against HHSC in the Texas state courts.

- An agreement shall become effective only upon the PCP’s completion of the provider credentialing process and a determination by the HHSC or its designee that the PCP meets all of the requirements for participation in PCCM.
8.6.8.9 **PCCM Hospital Enrollment**

All hospitals that are enrolled in the PCCM program must remain active in Texas Medicaid as a condition of continued participation in the PCCM program.

8.6.9 **PCCM Reimbursement**

In addition to Texas Medicaid fee-for-service payments, providers enrolled as PCCM PCPs receive a case management fee of $4.95 per client, per month. The fee-for-service reimbursement for PCCM is based on the Texas Medicaid Reimbursement Methodology (TMRM) structure.

8.6.9.1 **Case Management Fee**

The case management fee of $4.95 per client, per month is administrative compensation for managing the medical care of PCCM clients who have either selected or who have been assigned to the PCP’s practice as their *medical home*. Each assigned PCCM client will appear on the PCP’s monthly panel report.

The case management fee:
- Is paid to the PCP whether or not the client is seen that month.
- Is paid to the PCP in a separate check no later than the 10th state business day of each month.

Two reports are made available to PCPs on a monthly basis. The client panel report, which lists the PCCM clients who have selected or who have been assigned to each PCP’s practice. This report is available electronically at www.tmhp.com, or in hard copy by calling the PCCM Provider Helpline at 1-888-834-7226. The second report, a case management summary, is produced by TMHP and accompanies the monthly case management fee check.

If there are any discrepancies in either report, providers are to contact their TMHP provider relations representative. Providers should call the Provider Helpline at 1-888-834-7226 prior to returning a check. This allows PCCM to perform the necessary research and offer provider assistance.

8.6.9.2 **Primary Care Case Management (PCCM) Outpatient Services Cost Reporting**

PCCM Outpatient Services are subject to cost report settlements.

Subsection 2.6.6, “Provider Cost and Reporting” in the Hospital Services Handbook (Vol. 2, Provider Handbooks).

8.6.10 **Support Services**

8.6.10.1 **Provider Support Services**

PCCM core support services to PCPs include:

- **Provider Helpline.** The PCCM Provider Helpline at 1-888-834-7226 is available to assist PCCM providers with a broad range of Medicaid and PCCM issues. Toll-free customer service lines are available 7 a.m. to 7 p.m., Central Time, Monday through Friday, and are answered directly by call center representatives.

- **Provider Relations Representatives.** Provider relations representatives conduct informational and educational workshops, group meetings, and in-office training sessions for individual practices, groups, and hospital staff when requested, and can assist in enrolling new PCPs in PCCM. To contact the provider relations representative serving your area, call the TMHP Contact Center at 1-800-925-9126 or visit the TMHP website at www.tmhp.com.
• **Medical Director Services.** The TMHP Medical Director maintains overall responsibility for utilization management procedures, quality improvement activities and reporting, health education for both clients and providers, authorization requirements, and claim appeals related to the appropriateness of specific medical procedures or services. To contact the Medical Director, call 1-512-506-7000, and press “0” for the operator.

• **Primary Care Provider and Hospital List.** PCCM prepares and distributes to clients a listing of all PCCM providers. This listing identifies those providers who are accepting new patients, those who are accepting established patients only, and those who provide THSteps services. This listing is updated on a quarterly basis. To request a copy of the listing, contact the PCCM Provider Helpline at 1-888-834-7226 or visit the TMHP website at www.tmhp.com.

• **Monthly Panel Report.** PCCM provides to PCPs a list of clients who have selected or who have been assigned to the PCP for management and coordination of their health care. This list is available online at www.tmhp.com, or by calling the PCCM Provider Helpline at 1-888-834-7226. Clients on this list are eligible for PCCM services throughout the entire month.

The new and improved PCCM panel report now features the following:

• The panel report can be exported into a Microsoft® Excel® format and sorted according to the provider’s preference.

• The number of clients for whom the provider will receive payment is located on the first page of the report.

• An indicator of “new” in the new client’s column identifies PCCM clients who are new to the provider’s panel for in the current month. An indicator of a “star in a circle” in the Check for THSteps column identifies THSteps clients who are new to the provider’s panel for the current month.

• A change summary located at the end of the panel report lists PCCM clients who were removed from the provider’s panel in the current month.

• Panel reports from the previous three months can be accessed with a drop-down menu.

**Community Health Services.**

CHS staff includes registered nurses, social workers, nutritionists, and health educators from all over Texas who can provide counseling for clients who do not keep appointments, or who inappropriately use the ER. CHS staff can also educate PCCM clients about the role of a PCP, the referral process, or the Medicaid change from Texas Medicaid fee-for-service to managed care. CHS staff can also provide information about disease prevention, care coordination, and location of resources. CHS staff is available to meet with clients in a provider’s office. Providers can refer clients for CHS services by calling the CHS toll-free number at 1-888-276-0702, 7 a.m. to 7 p.m., Central Time, Monday through Friday. A message can be left after 7 p.m. and before 7 a.m.

**Refer to:** Form 8.3, PCCM Community Health Services Referral Request Form in this section.

**8.6.10.2 Client Support and Education**

PCCM provides educational services to its clients. The most significant of these are three helplines.

**8.6.10.2.1 Client Helpline.**

The nonclinical Client Helpline at 1-888-302-6688 is the primary resource for clients seeking information or answers to questions. Clients may call the helpline to discuss concerns and file complaints regarding the operation and management of PCCM. The helpline operates from 7 a.m. to 7 p.m., Central Time, Monday through Friday. After hours, a recorded message instructs clients who need assistance with clinical, urgent, or emergent situations to contact the PCCM nurse helpline at 1-800-304-5468.
8.6.10.2.2 Community Health Services.

The goal of the PCCM CHS program is to facilitate the coordination of health related services required by PCCM clients. This means collaborating with providers, clients, and their families in identifying problems and resources, and removing barriers in accessing treatment and services. PCCM community health coordinators are located in all PCCM SAs. Services offered by staff include the following examples:

- Provide counseling for clients who miss appointments.
- Provide counseling for clients who inappropriately use the ER.
- Educate clients about obtaining PCCM services.
- Management of high-risk pregnancies in conjunction with the client’s physician.
- Pediatric care coordination and education services for acute and chronically ill children.
- Case management for all chronic or complex cases identified and eligible for CHS.
- Assistance in accessing state and community resources.
- Assistance in improving healthy behaviors and treatment compliance.
- Provide health education on a variety of health-related topics.

By offering the above services, PCCM assists both providers and clients with early, expedited access and intervention, increasing the likelihood of improved health outcomes.

Clients can be referred for health-care management and education on the following subjects:

- A newly diagnosed condition
- Asthma management
- Coronary artery disease
- Chronic obstructive pulmonary disease
- Dental health
- Diabetes management
- Effective use of benefits
- Hypertension
- Nutrition
- Otitis media
- Prenatal education
- Parenting and child development
- Puberty education
- Safety
- Smoking cessation

Community health coordinators assist clients in obtaining food, clothing, and other resources by linking them with public and/or private community organizations.
8.6.10.2.3 Nurse Helpline.

PCCM provides a toll-free clinical nurse helpline at 1-800-304-5468 for all PCCM clients. The nurse helpline is staffed (nationally) by registered nurses who use physician-developed, symptom-based algorithms and 1,200 sets of self-care instructions to provide information, triage, and clinical assessment services for health plan clients 24 hours a day, 7 days a week. The nurse helpline nurses do not diagnose; they assess the client’s symptoms and guide the client to the most appropriate care setting. The nurse helpline number is widely publicized to PCCM clients. The nurse helpline can:

- Provide triage, assistance, and reassurance to clients.
- Direct clients to the most appropriate care setting.
- Coordinate interpretive language services necessary to ensure effective communications regarding treatment, medical history, or health education.

If a nurse determines that a client needs emergency care, the nurse will direct the client to the nearest emergency facility or contact 9-1-1 on the client’s behalf.

8.6.10.2.4 Linguistic Services

It is the provider’s responsibility to ensure that interpretive services are available to his practice. Interpretive services include language interpreters, American Sign Language (ASL) interpreters, and Relay Texas (TDD) access. When interpretive services are necessary to ensure effective communications regarding treatment, medical history, or health education, PCCM providers may contact the PCCM nurse helpline at 1-800-304-5468. The nurse helpline is a free service. Clients who are hearing impaired, can call Relay Texas (TDD) at 1-800-735-2988. Relay Texas is also a free service.

If the provider’s staff is in need of translation services to meet requirements on limited English proficiency, call Language Line Services at 1-800-752-6096.

Language Line Services operate 24 hours a day, 7 days a week. Language Line Services provides over-the-phone interpretation, video interpreting, document translation, interpreter testing and training, and other language products as well.

Language Line Services charges a fee for service. Use of Language Line Services is billed in one-minute increments and charges begin when the interpreter is connected to the call. The electronic bill that is sent to the provider will list the date, time and duration of the call, language, interpreter number, the personal code of the person placing the call and a Language Line Services internal reference number.

Refer to: Subsection 8.6.12, “Provider Responsibilities” in this section.
Subsection 8.1.10.2, “Cultural Competency and Sensitivity” in this section.

8.6.10.3 Monthly Client Panel Report

PCPs can obtain their monthly panel report containing a list of clients assigned to them by accessing the TMHP website at www.tmhp.com, or providers may request a paper panel report by calling the PCCM Provider Helpline at 1-888-834-7226. Providers are strongly encouraged to obtain their panel report from the TMHP website as it contains other valuable information only available electronically. The panel report verifies client assignments for the current month and identifies those who may be eligible for THSteps services.

Clients appearing on the monthly panel report are eligible for services for the entire calendar month.

Based on the number of clients appearing on the monthly panel report, the PCP receives a monthly case management fee check issued by TMHP.

Refer to: Subsection 8.6.21, “Claims Filing Information” in this section.
8.6.10.3.1 Panel Status

PCCM PCPs can establish their panels by doing one of the following:

- Accept new clients
- Accept established clients only
- Do not accept clients (closed panels)

PCCM PCPs can make changes to their panels in real time by using the OPL that is located on the TMHP website at www.tmhp.com. These changes include opening, closing, making modifications to a panel, or for a suspension of new enrollments or assignments to their practice.

Providers who do not use the OPL to make the changes listed above should submit a Provider Information Change Form in this handbook or contact the PCCM Provider Enrollment, Contracting/Credentialing Department in writing or by fax. If a provider submits a request to reopen, accept established clients only, make panel modifications or close a panel in writing, the process takes up to 30 days. All correspondence must include the provider’s contracted provider identifier on signed letterhead and must be mailed or faxed to the following:

Texas Medicaid & Healthcare Partnership (TMHP)
Provider Enrollment
PO Box 200795
Austin, TX. 78720-0795
Fax: 512-512-4214

TMHP cannot add new clients when a PCP has a closed panel. If a client chooses to select the same PCP for another family member (e.g., a newborn child or a family member who has been under the care of a different PCP) and the request is denied due to a closed panel, clients are instructed to notify their PCP. TMHP will open a panel only at the written request of a PCP.

Providers must submit a completed Provider Information Change (PIC) form that indicates they would like to open their panel to Accepting Clients. After the request has been received, TMHP will open the PCP’s panel and it will remain open until the provider submits another PIC form to close the panel.

PIC forms are available on the TMHP website at www.tmhp.com. PIC forms can be faxed to 1-888-235-8399 or can be mailed to the following address:

PCCM Credentialing
PO Box 200795
Austin, TX 78720-0795

For questions about this process, contact TMHP Provider Enrollment at 1-800-925-9126.

8.6.11 Covered Services

PCCM clients are entitled to all medically necessary services that are benefits of Texas Medicaid. PCPs shall provide (directly or through referrals) all Medicaid-covered services as specified below.

Refer to: Subsection 8.6.15, “Referrals” in this section.

Spell of Illness

Reimbursement to hospitals for adult inpatient services is limited to the patient “spell of illness.” The spell of illness is defined as “30 days of inpatient hospital care, which may accrue intermittently or consecutively.” After 30 days of inpatient care have been provided, reimbursement for additional inpatient care is not considered until the patient has been out of an acute care facility for 60 consecutive days.
**Prescriptions**
As in Texas Medicaid fee-for-service, adult PCCM clients who are 21 years of age and older are limited to three medicine prescriptions each month with the exception of some drugs and supplies, such as family planning drugs, syringes used to administer insulin, and smoking cessation drugs. These drugs and supplies are exempt from the three-drug limit in PCCM and Texas Medicaid fee-for-service. When more than three prescriptions per month are needed, providers may prescribe maintenance medications to cover more than a one month supply. PCCM clients who are 20 years of age and younger are exempt from the three prescription limitation. Prescription pharmacy benefits are provided through Texas Medicaid VDP.

*Refer to:* Appendix B: Vendor Drug Program (*Vol. 1, General Information*) for information about out-patient prescription drugs.

**Annual Adult Well-Check**
Annual adult well-checks were previously excluded for PCCM and Texas Medicaid fee-for-service, but effective January 1, 2010 it became a benefit for both PCCM and Medicaid fee-for-service.

An annual adult well-check performed by the client’s PCP is a benefit of the PCCM program for clients who are 21 years of age and older. The annual adult well-check is performed in addition to family planning services. This service is provided to healthy individuals for the purpose of promoting health and preventing injury or illness.

*Refer to:* Subsection 8.2.57.1.2, “Preventive Care Visits” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2 Provider Handbooks*) for more information about preventive care service.

**8.6.11.1 Self-Referred Services**
PCCM clients may select any Medicaid-enrolled provider to access the following services without a referral:

- *Emergency Services.* In case of a medical emergency, clients may seek emergency medical services from the nearest facility. To ensure continuity of care, the emergency facility is asked to contact the client’s PCP within 24 hours or the next business day after providing services. PCPs or a PCP’s designee must be available to respond to an ER call promptly. If the emergency visit results in an admission, the facility also must notify PCCM to receive authorization prior to claims submission.

*Refer to:* Subsection 8.6.17, “PCCM Inpatient Authorization Process” in this section.

- *Annual Adult Well-Checks.* Annual adult well-checks are provided to healthy individuals for the purpose of promoting health and preventing injury or illness. Preventive care services are included in adult well-checks and are comprehensive visits that may include counseling, anticipatory guidance, and risk factor reduction interventions. Documentation must indicate the anticipatory guidance rendered. The annual adult well-check should be age and health-risk appropriate and should include all the clinically indicated elements of history, physical examination, laboratory/diagnostic examination, and patient counseling. Adult preventive services may be billed by physicians, family planning clinics, federally qualified health centers (FQHCs) advanced practice registered nurses (APRNs), and physician assistants in the office and outpatient hospital setting.

- *OB/GYN Services.* PCCM clients may select a PCCM-contracted OB/GYN as their PCP. As a PCP, the OB/GYN is responsible for providing or arranging all medically necessary services. PCCM clients may also seek direct services of any Medicaid-enrolled OB/GYN, family practitioner, or internal medicine provider who is not their PCP for the following services:
  - One well-woman examination per year.
  - Care related to pregnancy.
• Care for all active gynecological conditions.

• Diagnosis, treatment, and referral to a Medicaid-enrolled specialist for any disease or condition within the scope of the designated professional practice of a licensed obstetrician or gynecologist, including treatment of medical conditions concerning the breasts.

  **Note:** A referral from the PCCM client’s PCP is not required as long as the provider rendering services is a Medicaid-enrolled OB/GYN, family practitioner, or internal medicine provider.

• **Family Planning Services.** Family planning services include preventive health, medical counseling, and educational services that assist individuals in planning or preventing pregnancy and achieving optimal reproductive and general health. PCPs are encouraged to provide these services if requested by a client. Clients are not required to obtain family planning services through their PCP. Family planning is a service that does not require a PCP referral. Clients may go to a DSHS Family Planning state-contracted Medicaid facility for family planning services. Inpatient services must be delivered in a PCCM-contracted hospital or facility.

• **THSteps.** PCCM clients may select any THSteps-enrolled Texas Medicaid provider to perform THSteps medical and dental services. If a THSteps medical checkup is performed by a provider who is not the client’s PCP, this information should be forwarded to the client’s PCP so that the client’s medical record can be updated.

  **Refer to:** Section 5, “THSteps Medical” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks).*

• **Vision Services.** Clients do not need a referral to access necessary covered vision services. Covered vision services are:
  
  • One eye exam each state fiscal year (September 1 through August 31) for clients who are 20 years of age and younger unless there is a diopter change of 0.5 or more.
  
  • Replacement of lost or damaged eyeglasses for clients who are 20 years of age and younger.
  
  • One eye exam every 24 months for assessing the need for eyeglasses for adults.
  
  • Unlimited medically necessary eye exams for a diagnosis of illness or injury.

  Medicaid clients can select an ophthalmologist or therapeutic optometrist for Medicaid eye care benefit services (not surgery) without a referral from a PCP or any other type of prior authorization.

  PCCM clients may also select therapeutic optometrists for the services listed below without a referral from a PCP or any other type of prior authorization:

  **Note:** Licensed psychological associates (LPAs) are not Medicaid-enrolled providers, but they can render services and file claims under the supervising psychologist’s provider number. See each individual section below for benefits and limitations.

  **Refer to:** Section 7, “Physician, Psychologist, and Licensed Psychological Associate (LPA) Providers” in *Behavioral Health, Rehabilitation, and Case Management Services Handbook (Vol. 2, Provider Handbooks).*
Section 5, “Licensed Clinical Social Worker (LCSW), Licensed Marriage and Family Therapist (LMFT), and Licensed Professional Counselor (LPC)” in Behavioral Health, Rehabilitation, and Case Management Services Handbook (Vol. 2, Provider Handbooks).

- Behavioral Health Services. Behavioral health services do not require a PCP referral. These services include mental health and substance abuse services by a Medicaid-enrolled psychiatrist, psychologist, licensed professional counselor (LPC), licensed clinical social worker (LCSW), licensed marriage and family therapist (LMFT), and Chemically Dependent Treatment Facilities (CDTF).

- SHARS. Clients may select any qualified provider to access medically necessary and reasonable services to ensure that Medicaid-eligible children with disabilities receive the benefits mandated by federal and state legislation that guarantees a free and appropriate public education.

- ECI clients can self-refer to local ECI Service Providers without a referral from the client’s PCP.

- School-Based Clinic Services. Clients may receive services from school-based clinics without a referral from their PCP.

- FQHC and RHC After-Hours Care. After-hours care provided by FQHCs and RHCs do not require a referral from the client’s PCP. After-hours care for FQHCs and RHCs is defined as care provided on weekends, on federal holidays, or before 8 a.m. and after 5 p.m., Monday through Friday. FQHCs and RHCs that provide after-hours services to PCCM clients must submit claims with modifier TU.

- Out-of-State or Border-State Providers Who Perform Services to Migrant Farm Workers. Out-of-state or border-state providers that render services to migrant farm workers, their children and family members who are PCCM clients do not need a PCP referral. Claims must be submitted with modifier UC from out-of-state or border-state providers that render services to migrant farm workers and their children and family members who are PCCM clients.

8.6.11.2 Behavioral Health Services

Behavioral health services are provided for the treatment of mental disorders, emotional disorders, and chemical dependency disorders. Behavioral health services do not require a PCP referral. PCCM clients may self-refer to any Medicaid-enrolled behavioral health provider for treatment. A referral from the client’s PCP is not required. A PCP may, in the course of treatment, refer a patient to a behavioral health provider for an assessment or for treatment of an emotional, mental, or chemical dependency disorder. A PCP may also provide behavioral health services within the scope of his practice.
PCCM clients may receive any behavioral health service that is medically necessary, currently covered by Texas Medicaid, and provided by a Medicaid-enrolled behavioral health provider. Behavioral health providers include psychiatrists, psychologists, LCSWs, LPCs, LMFTs, and CDTF licensed facilities.

**Note:** Licensed psychological associates (LPAs) are not Medicaid-enrolled providers, but they can render services and file claims under the supervising psychologist’s provider number. See each of the following individual sections for benefits and limitations.

**Refer to:** Section 7, “Physician, Psychologist, and Licensed Psychological Associate (LPA) Providers” in the Behavioral Health, Rehabilitation, and Case Management Services Handbook (Vol. 2, Provider Handbooks).

Section 5, “Licensed Clinical Social Worker (LCSW), Licensed Marriage and Family Therapist (LMFT), and Licensed Professional Counselor (LPC)” in the Behavioral Health, Rehabilitation, and Case Management Services Handbook (Vol. 2, Provider Handbooks).

In addition, many services are offered through DADS and DSHS that do not require a referral. These include case management for mental health and mental retardation, mental health rehabilitative services, and mental retardation diagnosis and assessment.

Behavioral health providers are encouraged to contact a client’s PCP to discuss the patient’s general health. PCPs are encouraged to maintain contact with the behavioral health provider to document behavioral health assessments and treatments and to inform the behavioral health provider of any condition the client may have that could impact the behavioral health service delivery. However, client approval for any exchange of information between the PCP and behavioral health provider is required. Providers must use the Primary Care Case Management (PCCM) Behavioral Health Consent Form in this section.

PCPs are responsible for documenting referrals to behavioral health providers and any known self-referrals for behavioral health services in each client’s medical record.

### 8.6.11.2.1 Outpatient Services

Initial outpatient behavioral health visits must be provided within 14 days of a request. All outpatient behavioral health services that exceed 30 visits per client, per calendar year must be prior authorized by TMHP. Providers can refer to the individual provider sections listed below for information on additional encounters or visits that extend beyond the 30 visits per client per calendar year, prior authorization requirements benefits and limitation requirements:

**Refer to:** Subsection 5.2.1, “Prior Authorization” in Behavioral Health, Rehabilitation, and Case Management Services Handbook (Vol. 2, Provider Handbooks).

Section 5, “Licensed Clinical Social Worker (LCSW), Licensed Marriage and Family Therapist (LMFT), and Licensed Professional Counselor (LPC)” in Behavioral Health, Rehabilitation, and Case Management Services Handbook (Vol. 2, Provider Handbooks).
8.6.11.2.2 Inpatient Services

PCCM requires notification for urgent or emergent inpatient psychiatric care in an acute care facility prior to claims submission for in-network facilities. Scheduled admissions for psychiatric care require prior authorization. Out-of-network admissions require notification within the next business day and submission of clinical information to determine appropriateness for transfer to a contracted facility. Fax the completed Primary Care Case Management (PCCM) Inpatient/Outpatient Authorization Form from this section, to the PCCM Inpatient Prior Authorization Department at 1-512-302-5039 or call 1-888-302-6167.

Prior authorization is required for psychiatric admissions of patients who are 20 years of age and younger to a freestanding psychiatric facility. Fax the completed Psychiatric Inpatient Initial Admission Request Form in the Children’s Services Handbook (Vol. 2, Provider Handbooks) to 1-512-514-4211 to obtain authorization. Inpatient psychiatric admissions to freestanding facilities for clients who are 21 years of age and older are not covered under Texas Medicaid.

Refer to: Subsection 2.11, “Inpatient Psychiatric Hospital/ Facility (Freestanding) (CCP)” in the Children’s Services Handbook (Vol. 2, Provider Handbooks) for additional information concerning the requirements of freestanding psychiatric admissions, or contact the TMHP Comprehensive Care Inpatient Psychiatric (CCIP) Unit at 1-800-213-8877.

8.6.11.3 Substance Use Disorder (SUD) Treatment Services for PCCM Clients

SUD treatment services are age-appropriate services that are designed to treat an individual’s substance use disorder.

8.6.11.3.1 Assessment

PCCM clients must be assessed by a qualified, credentialed Medicaid-enrolled chemical dependency treatment facility (CDTF) counselor to determine the severity of an individual’s SUD and identify their needs for treatment. PCCM clients can obtain their assessment from any Medicaid-enrolled CDTF. Ambulatory detoxification benefits are available to clients of all ages. Clients who are 20 years of age and younger already have access to these benefits.

8.6.11.3.2 Prior Authorization Requirements

Prior authorization, except for PCCM urgent or emergent inpatient services, may be considered when it is requested within three business days of admission. Authorization for PCCM urgent or emergent inpatient detoxification services must be obtained before the claim is submitted. Scheduled PCCM inpatient admissions for detoxification require authorization before admission. Prior authorization requests for PCCM clients may be submitted to the PCCM Outpatient Prior Authorization Department on the TMHP website, by telephone at 1-888-302-6167, or by fax at 1-512-302-5039.

Services for PCCM clients who require inpatient hospital detoxification may be authorized if:

- The client has complicated comorbid conditions that necessitate hospitalization for stabilization.
- There is limited availability of detoxification services in the client’s service area.
- The client can be effectively treated with appropriate substance abuse services following detoxification.

Providers must submit the appropriate prior authorization request form for the initial or continuation of ambulatory (outpatient) or residential detoxification treatment and residential treatment services. Authorization will be considered for the least restrictive environment appropriate to the client’s medical need as determined in the client’s plan of care and based on national standards.

Providers must submit one of the following forms to obtain prior authorization:

- Ambulatory (Outpatient) Substance Abuse Counseling Extension Request Form
• Ambulatory (Outpatient) Detoxification Authorization Request Form
• Residential Substance Abuse Treatment Authorization Request Form
• Residential Detoxification Authorization Request Form

**Note:** Prior Authorization forms are available on the Forms web pages of the TMHP website at www.tmhp.com.

**Refer to:** Section 12, “Forms” in the Behavioral Health, Rehabilitation, and Case Management Services Handbook (Vol 2, Provider Handbooks) for behavioral health and SUD related forms.

Section 9, “Substance Use Disorder (SUD) Services (Abuse and Dependence)” in the Behavioral Health, Rehabilitation, and Case Management Services Handbook (Vol 2, Provider Handbooks) for more information about SUD benefits and limitations.

### 8.6.12 Provider Responsibilities

In addition to the requirements listed in subsection 8.4.2, “Provider Requirements and Information” in this section, PCCM PCPs have clearly defined roles, responsibilities, and contractual requirements.

#### 8.6.12.1 Verifying PCP Assignment

At the time that an appointment is made, the provider should ask the client for the name of their PCP. If the client has recently changed their PCP, the pending PCP on record may provide services to the client, but must call the PCCM Provider Helpline at 1-888-834-7226 to obtain a referral.

**Note:** Providers may not request PCP changes for their clients. Federal guidelines prohibit influence by providers on a patient’s choice of their PCP.

#### 8.6.12.2 PCP Services

PCCM defines the services to be provided and the responsibilities to be assumed by a PCCM PCP as follows:

- The PCP agrees to provide primary care services to PCCM clients. Primary care services are all medical services required by a client for the prevention, detection, treatment and cure of illness, trauma, or disease, which are covered or required services under Texas Medicaid. The PCP must ensure that clients birth through 20 years of age receive all services required by the THSteps program. Preventative health services, including well-child checkups, should be offered to clients birth through 20 years of age in accordance with the THSteps Program periodicity schedule. Newly enrolled members who are birth through 20 years of age, should be offered upcoming well-child checkups, including THSteps medical checkups as soon as practicable, but no later than 14 days of enrollment for newborns, and no later than 60 days of enrollment for all other eligible child members. All services must be provided in compliance with all generally accepted medical standards for the community in which services are rendered.
- Provide or arrange for medically necessary care within the following guidelines:
  - **Emergency Services.** Provided upon member presentation at the time the service delivery site, including at non-network and area facilities.
  - **Urgent care.** Within 24 hours after the request.
  - **Routine care.** Within two weeks after the request.
  - **Initial outpatient behavioral health visits.** Provided within 14 days of request.
  - **Physical/wellness exams.** Within four to eight weeks after the request.
• **Prenatal care.** Initial visit within 14 calendar days of the request or by the 12th week of gestation except for high-risk pregnancies or new members in the third trimester for whom an appointment must be offered within 5 days, or immediately, if an emergency exists.

• Refer clients to an approved Texas Medicaid provider or PCCM-contracted facility when the needed services are not available through the PCP’s office or clinic. Routine specialty care referrals must be provided within 30 days of request. Specialists to whom PCPs refer clients should also schedule appointments within the timeframes described above. PCPs may contact the PCCM Provider Helpline at 1-888-834-7226 for a list of contracted facilities.

• Coordinate, monitor, and document medical treatment and covered services delivered by all providers to each client, including treatment during inpatient stays.

• Comply with all authorization and notification requirements of PCCM.

• Verify the eligibility of each client prior to providing covered services to determine whether the client is eligible for services under PCCM on the DOS.

• Coordinate care for children receiving services from or who have been placed in the conservatorship of DFPS. PCPs are responsible for furnishing or arranging for all medically necessary services while the child is under the conservatorship of DFPS and until the child is placed in foster care and is no longer eligible for PCCM enrollment.

• Cooperate with and participate in PCCM utilization management (UM) programs.

• Maintain hospital admitting privileges at a PCCM-contracted facility as applicable or maintain a referral relationship with a provider with admitting privileges.

• Provide preventive services using clinically accepted guidelines and standards.

**8.6.12.3 Office and Medical Records Standards**

To ensure that each onsite office or facility used to deliver health care to PCCM clients is safe, sanitary, and accessible, PCCM has defined standards for offices and other facilities:

• A site visit is conducted for each location as part of the evaluation process.

• An office compliance audit ensures that the facility meets defined standards.

• Evaluators use the visit as an opportunity to interact with the provider and office staff.

• Evaluators are prepared to explain the program and promote a strong network relationship.

For a provider to be considered for PCCM participation, all office sites must be in compliance with the “conditions of participation” stipulated in the provider contract. PCCM staff conducts an office onsite review at each primary care site prior to the acceptance of the provider into PCCM. Subsequently, Provider Relations staff performs routine audits at primary care office sites every two years.

Form 8.7, Primary Care Case Management (PCCM) Pre-Contractual/Recredentialing Site and Medical Record Evaluation Form in this section is used to evaluate a provider’s office:

• Offices that are found to be marginally acceptable receive a follow-up visit within 90 days.

• PCCM may recommend that HHSC cancel a provider’s contract if office conditions do not meet defined standards after notice of required corrective action has been provided, and time to make changes has been made available.

**8.6.12.4 Medical Records Standards**

A PCCM provider is required to maintain comprehensive and accurate medical records to ensure quality and continuity of care. Each provider must maintain and make available medical records in accordance with the applicable provider agreement.
8.6.12.4.1 Content of Medical Record

Each patient’s medical record must include patient identification information, progress notes, and laboratory, referral, and consultation notes. Data to be maintained includes:

- **Patient identification information:**
  - Patient’s full name, address, and telephone number
  - Patient’s history, including: past and present medical condition of patient and family, past illnesses and surgeries, X-ray and lab tests, immunizations, documentation of discussion of Advance Directives (patients who are 21 years of age and older)

- **Present physiological condition:**
  - Drug or allergy sensitivities
  - Current medications

- **Progress notes:**
  - Patient’s complaint or reason for visit
  - Results of physical examinations
  - Tests, procedures, and medications ordered by physician
  - Diagnoses and problems identified
  - Health education/preventive services performed

- **Laboratory, referral, and consultation notes:**
  - Laboratory and X-ray reports
  - Consultation and referral consultation reports

- **Copies of reports concerning hospital admissions including:**
  - Authorizations
  - Surgical reports
  - Discharge summaries

Refer to: Subsection 1.4.10, “General Medical Record Documentation Requirements” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).

In addition, PCCM providers performing THSteps comprehensive medical checkups must document all components of the checkup. These documentation requirements are detailed in subsection 5.4.1, “THSteps Medical Checkups—Documentation of Completed Checkups” in the Children’s Services Handbook (Vol. 2, Provider Handbooks).

Upon request, a provider will supply PCCM staff with copies of client medical records, as outlined in the provider agreement, for implementation of utilization management, quality improvement, and grievance programs.

8.6.12.4.2 Confidentiality of Medical Records

The relationship and all communication between physician and patient are privileged. Accordingly, the medical record containing information about the relationship is confidential.

A physician’s code of ethics, as well as Texas and federal laws, protect against the disclosure of the contents of medical records to persons or agencies that are not properly authorized to receive such information.
For a provider to release the contents of a patient’s medical record to a third party, the patient must first authorize the disclosure by signing and dating an authorization form. If the record is for a deceased individual, the executor of the estate must authorize the release.

PCCM’s policy is to allow only medical personnel and health professionals who are directly involved in the delivery or evaluation of a patient’s records to access the medical record. All requests for medical record information must be handled according to policy and law.

The client’s authorization for release of such information is not required when the release is requested by and made to DADS, HHSC, DSHS, TMHP, DFPS, DARS, HHSC Office of Inspector General (OIG), the Texas Attorney General’s Medicaid Fraud Control Unit (MFCU) or Antitrust and Civil Fraud Division, or HHS.

Refer to: Subsection 1.4.4, “Release of Confidential Information” in Section 1, “Provider Enrollment” (Vol. 1, General Information).

8.6.12.4.3 Medical Records Audits

PCCM Provider Relations staff performs a general medical record review of the PCP’s practice as part of the credentialing and recredentialing process and as part of the quality improvement program. Primary Care Case Management (PCCM) Pre-Contractual/Recredentialing Site and Medical Record Evaluation Form in this section is used to evaluate provider medical records as part of the credentialing and recredentialing process.

Medical record audit results are submitted to the Medical Director and, if necessary, to the Credentialing Committee for review. Depending upon review findings, the Credentialing Committee will assist the Medical Director in concluding the audit in one of three ways:

- Recommending that HHSC accept the provider.
- Recommending that HHSC reject the provider on the basis of poor medical record documentation and procedures.
- Recommending that HHSC accept the provider conditionally with the provision that certain changes must be made and standards must be met within a specified timeframe.

These recommendations apply to audits of an initial review of a provider as well as those of subsequent reviews.

If a provider has been found to be marginally in compliance with requirements, the provider will be given training and education directed at correcting the deficiency. PCCM will establish a system to audit this provider every 60 days for a maximum of three follow-up audits:

- Each audit must show substantial improvement over the previous audit.
- Following the third follow-up audit, if no improvement has been noted, PCCM will work with HHSC to apply sanctions and monitor performance closely.
- Subsequent to these measures, if the provider is still not in full compliance, PCCM will recommend to HHSC that the provider be terminated from the plan.

Medical records may also be reviewed in conjunction with provider profiling to identify opportunities to improve care and services.
8.6.12.4.4 Access and Availability Standards

PCCM staff routinely evaluates and monitors provider compliance with scheduling requirements. These scheduling requirements are designed to enhance access to health services and to provide assurance of service availability based on the urgency of need:

- **THSteps.** Preventative health services, including well-child checkups, should be offered to clients birth through 20 years of age in accordance with the THSteps Program periodicity schedule. Newly enrolled members who are birth through 20 years of age, should be offered overdue or upcoming well-child checkups, including THSteps medical checkups as soon as practicable, but no later than 14 days of enrollment for newborns, and no later than 60 days of enrollment for all other eligible child members.

- **Emergency Services.** Provided upon member presentation at the time the service delivery site, including at non-network and area facilities.

- **Urgent care.** Within 24 hours after the request.

- **Routine care.** Within two weeks after the request.

- **Initial outpatient behavioral health visits.** Provided within 14 days of request.

- **Physical/wellness exams.** Within four to eight weeks after the request.

- **Prenatal care.** Initial visit within 14 calendar days of the request or by the 12th week of gestation except for high-risk pregnancies or new members in the third trimester for whom an appointment must be offered within five (5) days, or immediately, if an emergency exists.

Refer to: Subsection 8.1.10, “PCP Requirements and Information” in this section.

8.6.13 PCCM-Enrolled FQHCs and RHCs Must Report Medical Staff Changes to TMHP

FQHCs and RHCs that are enrolled in PCCM must inform TMHP of all changes to their medical staff so that the PCCM Provider Directory can be properly updated. Existing PCCM enrolled FQHC and RHC facilities can view their current list of associated providers on the Online Provider Information Change (PIC) form on the OPL, and make changes.

An accurate and up-to-date provider listing gives PCCM clients access to all of the staff members of these providers. FQHCs and RHCs that do not update their provider listing online must complete the Primary Care Case Management (PCCM) FQHC and RHC Medical Staff Update Form in this section. The form can be faxed to the PCCM Contract and Credentialing Department at 1-888-235-8399.

8.6.14 Monitoring Provider Performance

PCCM is responsible for monitoring quality of care and, if necessary, recommending that HHSC disenroll providers who do not meet plan requirements.

Among the indicators used to monitor PCCM providers’ performance are:

- **Client Comments and Complaints.** The PCCM Complaints Department closely monitors the activities associated with client complaints as they relate to quality assurance and utilization management reviews for specific provider performances. The reports of these activities are used to trigger separate actions and inquiries about performance.

- **Office Site Reviews.** PCCM staff undertakes a variety of assessments as part of quality improvement activities and provider service activities. The results of these reviews are made part of the file of performance factors and indicators assessed during the recredentialing process.

- **Compliance With 24-Hour Access Standards.** PCCM staff conducts audits to assess the degree of compliance with Medicaid managed care access standards. Client comments and complaints may trigger reviews of specific providers. The results of these reviews are considered in the recredentialing process.
• **Ability to Perform or Directly Supervise Ambulatory Primary Care Services for Clients.** Provider performance is monitored on an ongoing basis. PCCM staff follows up evidence of poor performance and addresses identified problems immediately to ensure that high-quality care is delivered to plan clients.

• **Admitting Privileges.** PCCM staff verifies that each provider maintains membership on the medical staff with admitting privileges at a minimum of one accredited contracted hospital or has an acceptable (timely and complete transfer of patients and records) arrangement with a PCP who has such admitting privileges.

• **Continuing Medical Education Credits.** Provider Enrollment/Contracting and Credentialing staff monitors each provider’s activities in the area of continuing medical education credits.

• **Education Sessions.** PCCM provides a series of educational sessions that include aspects of UM and case management. Provider contracts require that each PCP attend at least one educational session each year.

• **Valid Drug Enforcement Administration (DEA) Certification.** Proof of DEA certification must be submitted as part of the application process and will be maintained by PCCM in its credentialing files.

• **Performance Within Scope of Individual Licensure and PCCM Credentialing.** PCCM staff provider applications include a statement providing assurance that a certified registered nurse practitioner, nurse midwife, or PA will perform services only within the scope of his licensure, and that the individual will be disciplined immediately if this agreement is violated.

• **Compliance with Fraud and Abuse Policy.** PCCM will recommend to HHSC that a network provider be suspended immediately upon notification from any source that the provider:
  - Has been terminated or suspended from participation in the Medicaid or Medicare Program.
  - Has lost his or her license.
  - Has been convicted of a criminal act.

PCCM employs the above indicators as part of its oversight function. Findings are cataloged and analyzed for patterns of performance that require special attention. Where warranted, the results are made part of the recredentialing process. Failure to adhere to the above standards of performance will be grounds for suspension or termination.

### 8.6.15 Referrals

PCCM PCPs function as the medical home for PCCM clients. PCPs are responsible for arranging and coordinating appropriate referrals to other providers, including specialists, and for managing, monitoring, and documenting the services of other providers. Newly selected PCPs can call the TMHP Contact Center at 1-800-925-9126 to request referrals for visits. These providers can also request a specialist referral on behalf of a new client if the visit results in the need for a specialist. Referrals from the new PCP to a specialist can be issued as soon as the TMHP system reflects that a PCP change has already been confirmed.

Referrals are an integral component of PCCM’s health-care delivery program. Referrals ensure that clients gain access to all necessary and appropriate covered services and that care is delivered in the most clinically suitable and cost-effective setting.

Referral procedures are designed to capture the information needed to support and manage the utilization of services by the provider network. Proper documentation of referrals is necessary for accurate medical record keeping.
PCPs are responsible for the appropriate coordination and referral of PCCM clients for the following services:

- CPW case management services
- DARS case management services
- ECI targeted case management services
- Mental retardation targeted case management
- SHARS
- DARS Division for Blind Services
- THSteps medical case management
- THSteps dental (including orthodontics)
- Tuberculosis services
- Medicaid VDP

A PCP who has been selected by a PCCM client, but the PCP change is not yet in effect, can make referrals to specialists while the change is pending by calling the PCCM Provider Helpline at 1-888-834-7226.

8.6.15.1 Open Specialty Referral Network

PCCM operates an open specialty referral network. PCPs may refer patients to any Texas Medicaid-approved specialist within the state of Texas that accepts PCCM clients for covered health services. Medically necessary referrals to specialists do not require authorization from PCCM.

For all referrals, PCPs should furnish their provider identifier and complete information on treatment procedures and diagnostic tests performed prior to the referral. The referral should specify the following:

- Initial diagnosis/diagnoses
- Reason for the referral
- Services requested from the referral specialist
- Number of authorized visits (optional)

PCPs may make a referral to another PCP or a specialist during periods of absence or unavailability. PCPs may also make a referral if a client requests a second medical opinion.

After receiving a referral specialist’s report, if ongoing treatment for an illness is required, PCPs have the discretion to specify the period of time or number of visits authorized for ongoing treatments to be given by the specialist.

The referring PCP’s identifier must be entered on all claims submitted by the treating provider, indicating the PCP authorized the services. It is the responsibility of the treating specialist to ensure that the patient continues to be an eligible PCCM client throughout the period of treatment.

8.6.15.2 Referral Form

No form for a referral to a specialist is required. However, PCPs are encouraged to use the PCCM Referral Form. This form reflects accepted practices in the Texas medical community.

The use of this form will simplify:

- Dissemination of necessary information to the specialist.
- Documentation for the client’s medical record of the specialist’s diagnosis and treatment.

Refer to: Form 8.5, Primary Care Case Management (PCCM) Referral Form in this section.
One copy of the referral form should be given to the specialist. One copy should be maintained in the client’s medical record.

**8.6.16 Specialist Responsibilities**

Specialists are responsible for furnishing medically necessary services to PCCM clients who have been referred by their PCP for specified treatment or diagnosis. While the specialist does not contract with PCCM, all facility services should be delivered in a contracted PCCM facility.

Specialists are responsible for verifying the eligibility of the referred client prior to providing treatment.

To ensure continuity of care for clients, the specialist must maintain communication with the client’s PCP. This communication should ensure that the PCP’s medical records adequately document the specialist services provided, all results or findings, and all recommendations. The specialist may use the lower half of the PCCM Referral Form for this purpose.

When a PCP refers a client to a specialist, the specialist should review the case with the PCP to fully understand the services being requested. Services requiring more than one visit should be coordinated with the PCP for approval of additional visits. Referrals from a PCP must be documented in both the PCP’s and the specialist’s records.

If a specialist determines that a client’s condition warrants attention (e.g., hospitalization or diagnostic procedures), the specialist should seek authorization from the PCCM Inpatient/Outpatient Prior Authorization Department by telephone at 1-888-302-6167 or by fax at 1-512-302-5039.

Emergency treatment does not require authorization.

*Refer to:* Subsection 8.6.17.3, “Facility/Hospital Services” in this section.

**8.6.16.1 Specialist-to-Specialist Referrals**

Referrals from one specialist to another for a medically necessary service must be authorized by the client’s PCP or, if the client does not have a PCP, the specialist can call the PCCM Client Helpline to obtain a one-time appointment approval.

**8.6.17 PCCM Inpatient Authorization Process**

*Note:* Inpatient admissions are subject to retrospective review by the HHSC Office of Inspector General Utilization Review Unit.

**8.6.17.1 Definitions**

*Authorization.* The process of obtaining approval for the delivery of services.

*Routine/Nonemergent Condition.* A symptom or condition that is neither acute nor severe and can be diagnosed and treated immediately, or that allows adequate time to schedule an office visit for a history, physical, or diagnostic studies prior to diagnosis and treatment.

*Urgent Condition.* A symptom or condition that is not an emergency, but requires further diagnostic work-up or treatment within 24 hours to avoid a subsequent emergent situation.

*Emergent/Emergency.* A medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain) that a prudent layperson, who possesses an average knowledge of health and medicine, could reasonably expect the absence of immediate medical attention to result in the following:

- Placing the health of the individual (or, with respect to a pregnant woman, the health of the woman or her unborn child) in serious jeopardy
- Serious impairment to bodily functions
- Serious dysfunction to any bodily organ or part
Emergency services means covered inpatient and outpatient services that are as follows:

- Furnished by a provider that is qualified to furnish these services under this title
- Needed to evaluate or stabilize an emergency medical condition

**Poststabilization Services.** Covered services, related to an emergency medical condition that are provided after an enrollee is stabilized in order to maintain the stabilized condition, or to improve or resolve the enrollee’s condition.

**Observation Services.** Services received within a hospital setting, which are “reasonable and necessary” to evaluate an outpatient condition or determine the need for possible admission to the hospital as an inpatient.

**Notification.** The process by which a facility informs PCCM that a client has been admitted as an inpatient to their facility on an urgent or emergent basis. Notification for an inpatient stay is required when a prior-authorized, scheduled outpatient day surgery for a client enrolled in PCCM becomes an inpatient stay due to complications. The prior authorization for the day surgery is not valid as authorization for the inpatient stay.

**Note:** Inpatient admissions are subject to retrospective review by the HHSC OIG Utilization Review Unit.

### 8.6.17.2 Professional Services — ER Services

PCPs should become actively involved in educating PCCM clients regarding the appropriate use of the ER and other emergency services. Providers should also notify PCCM of any client who may need further education regarding the appropriate use of the ER by calling the Client Helpline at 1-888-302-6688, or by using the Primary Care Case Management (PCCM) Community Health Services Referral Request Form.

**Refer to:** Form 8.3, PCCM Community Health Services Referral Request Form in this section.

### 8.6.17.3 Facility/Hospital Services

Requests for prior authorization or notification of admissions for PCCM clients may be submitted via telephone by calling the PCCM Inpatient Prior Authorization Department at 1-888-302-6167, faxed to 1-512-302-5039 using the Primary Care Case Management (PCCM) Inpatient/Outpatient Authorization Form, or online through the TMHP website at www.tmhp.com. Online instructions for submitting authorization requests electronically can be found on the TMHP website at www.tmhp.com. Providers may request a prior authorization online for computed tomography (CT), computed tomography angiography (CTA), Magnetic resonance imaging (MRI), and magnetic resonance angiography (MRA) in addition to outpatient, nonemergency CT, CTA, MRI, or MRA for the PCCM Program. The provider must check the authorization request status before services are provided to confirm whether the authorization has been approved or denied.

**Refer to:** Subsection 5.4.1, “Prior Authorization Requests Through the TMHP Website” in Section 5, “Prior Authorization” (Vol. 1, General Information) for additional information about mandatory documentation requirements and retention.

All requests must include the following information:

- Facility name and provider identifier
- Client name, Medicaid number (PCN), and DOB
- Requesting (admitting) physician’s name and provider identifier
- Name of person completing form
- Date completed
- Telephone number
• Fax number
• Admit date
• Diagnosis codes (primary, secondary, etc.)
• Diagnosis related groups (DRG) code (for DRG facilities)
• Procedure codes
• Discharge date
• Clinical information to support medical necessity if required

Note: Submit medical records pertaining only to the service for the prior authorization that is being requested.

If the provider’s request is determined to be incomplete, the Inpatient Prior Authorization Department contacts the provider by telephone or fax requesting the specific information needed to make the authorization determination and places the request in pending status. If the requested information is not received by the second business day, the information is requested again. If the information is not received by the fourth business day from the date the request was placed in pending status, the request is denied. A denial letter is sent to the facility and the requesting physician. When the requested information is received within four business days from the original pend date, the authorization is processed.

For most admissions, a letter of notification or authorization is faxed to the requesting facility or the requesting physician once the determination is complete. For scheduled inpatient admissions, both the facility and the physician will receive faxed notification.

Authorization is a condition of reimbursement. It is not a guarantee of payment, and all inpatient admissions are subject to retrospective review by the HHSC OIG Utilization Review Unit.

If the DRG submitted on a claim does not match the DRG on the authorization, one of the following will occur:

• If the lesser of the two DRGs can be derived, the claim will be paid at the lower amount.
• If the lesser of the two DRGs cannot be derived, the claim will be denied.

Claims are adjudicated based on the authorization that was completed at the time of the claim submission. To avoid a DRG mismatch and the denial of the claim when there is a change to an existing authorization (e.g., a change to the discharge date, diagnosis, DRG, or procedure), the facility is required to submit an updated Primary Care Case Management (PCCM) Inpatient/Outpatient Authorization Form before the claim is submitted. The form can be submitted either by fax to 1-512-302-5039 or by contacting the Inpatient Prior Authorization Department at 1-888-302-6167.

Notification of urgent and emergent admissions is only required before a claim is submitted. Providers are encouraged to submit the notification after DRG information is complete to avoid updating the DRG because of a DRG mismatch and a change to the admitting diagnosis.

To ensure that day and cost outliers are reimbursed appropriately, if the client’s length of stay or services rendered are different or more complex than the ones that were authorized, providers should contact the PCCM Inpatient Prior Authorization Department to update the authorization before the claim is submitted.

For non-DRG facilities, the claim will pay at the lower number of inpatient days when the length of stay that is billed is different from the length of stay that was authorized. If there is a change to an existing authorization, providers should contact the PCCM Inpatient Prior Authorization Department with the update before the claim is submitted.
8.6.17.4 Emergency Room Services

ER providers are authorized by PCCM to furnish the medically necessary appropriate treatment of PCCM clients. The ER provider must perform the medical screening examination; i.e., assess the medical needs of a PCCM client who appears in the ER to determine the medical necessity of services and the appropriate setting for rendering services.

ER providers must determine a patient’s status based on the urgent, emergent, and nonemergent definitions noted in subsection 8.6.17.1, “Definitions” in this section. In some cases, medically necessary services are needed to determine the patient’s condition. The necessity of these services must be documented in the medical record. ER providers are paid for medically necessary services required to determine and stabilize the patient’s condition.

If a determination is made that the client has a routine or nonemergent condition, the client’s PCP should be notified by telephone, fax, or e-mail, so that follow-up care can be arranged by the PCP as appropriate.

If a determination is made that the client has an urgent condition, the client’s PCP should be notified by telephone, fax, or e-mail, so that follow-up care can be arranged within 24 hours.

If the client has an emergent condition, the ER must treat the client until the condition is stabilized or until the client can be admitted or transferred. Once the client is stabilized, the ER staff must notify the client’s PCP to arrange for medically necessary hospital admission or follow-up care. If the ER staff is unable to contact the PCP (or designated on-call provider) within one hour, the ER staff should treat the client and report the PCP’s unavailability by contacting the PCCM Provider Helpline at 1-888-834-7226.

Hospitals are eligible to bill for any services required in the medical screening examination and stabilization of a PCCM client. All services must be supported by the clinical record.

When treatment is provided to a PCCM client, professional and facility services must be billed separately. Reimbursement of emergency facility and ancillary charges for diagnostic tests, monitoring, and treatment is based on the actual services rendered. The hospital is paid at its current Medicaid reimbursement rate.

8.6.17.5 Observation Services

Observation services are those received within a hospital setting, which are “reasonable and necessary” to evaluate an outpatient condition or determine the need for possible admission to the hospital as an inpatient. Some patients, while not requiring hospital admission, may require a period of observation in the hospital environment as an outpatient. Observation services may be provided in any part of the hospital where a patient placed in observation can be assessed, examined, monitored, or treated in the course of the customary handling of patients by the facility. Observation services after the 23rd hour are not payable by Texas Medicaid. If the patient is going to be admitted, the patient’s status must be changed from observation to inpatient prior to the 24th hour.

If an inpatient admission occurs from an observation status, the Inpatient Prior Authorization Department must be notified. Notification of admission is the responsibility of the admitting facility. If necessary, notification of admission is accepted from the physician’s office. The payment for the inpatient admission includes the observation stay. Notification of admission is required prior to claim submission to avoid claim denial.

8.6.17.6 Urgent and Emergent Admissions

Notification of admission is required prior to claim submission to avoid claim denial. Notification of admission is the responsibility of the admitting facility. However, if necessary, notification of admission is accepted from the physician. Authorization/notification is required for many emergent procedures performed in an inpatient setting. Providers must ensure that procedures performed during an emergent inpatient admission are authorized prior to submitting a claim. Providers must submit a
completed Primary Care Case Management (PCCM) Inpatient/Outpatient Authorization Form to 1-512-302-5039 or call the PCCM Inpatient Prior Authorization Department at 1-888-302-6167. TMHP will not authorize procedures for which claims have already been submitted.

Notification is not required for 23-hour observation stays, unless the stay is converted to an inpatient status. The following information should be included on the notification:

- Facility name and provider identifier
- Client name, Medicaid number (PCN), and DOB
- Requesting (admitting) physician’s name and provider identifier
- Name of person completing form
- Date completed
- Telephone number
- Fax number
- Admit date
- Diagnosis codes (primary, secondary etc.)
- DRG code (for DRG facilities)
- Procedure codes
- Discharge date
- Clinical information to support medical necessity if required

*Note: Submit medical records pertaining only to the service for the prior authorization that is being requested.*

If the provider’s request is determined to be incomplete, the Inpatient Prior Authorization Department contacts the provider requesting the specific information needed to make the authorization determination and places the request in pending status. If the requested information is not received by the second business day, the information is requested again. If the information is not received by the fourth business day from the date the request was placed in pending status, the request is denied. A denial letter is sent to the facility or the requesting physician. When the requested information is received within four business days from the original pend date, the authorization is processed.

If an emergent admission is necessary, the hospital must notify PCCM prior to claim submission. Failure to notify the PCCM Inpatient Prior Authorization Department prior to claim submission will result in denial of the claim.

Notification of emergency admissions can be provided by calling the PCCM Inpatient Prior Authorization Department at 1-888-302-6167 or faxing to 1-512-302-5039.

**8.6.17.7 Obstetrical and Newborn Notification**

**Routine**
Authorization is not required for routine obstetrical and newborn care within the routine length of stay (48 hours for vaginal deliveries and 96 hours for C-section deliveries).

**Nonroutine**
All obstetrical and newborn admissions with nonroutine clinical status (complicated condition or DRG) or non-routine length of stay (over 48 hours for vaginal deliveries and 96 hours for C-section deliveries) require notification of admission and clinical documentation prior to claim submission. Notification of
admission is the responsibility of the admitting facility. However, if necessary, notification of admission is accepted from the physician. Notification of admission is required prior to claim submission to avoid claim denial.

8.6.17.8 Scheduled Inpatient Admissions

Prior authorization is required for all scheduled medical and surgical inpatient admissions. To avoid denial due to no prior authorization, the facility must confirm prior authorization has been obtained before the client’s admission. To inquire whether a scheduled admission has been prior authorized, providers may call 1-888-302-6167 and select Option 1, then Option 1 again or contact General Inquiries at 1-800-925-9126.

If a change must be made to a prior authorization due to additional or unanticipated procedures performed, the provider must submit an updated PCCM Inpatient/Outpatient Authorization Form with clinical documentation supporting the change or contact the Inpatient Prior Authorization Department with the update prior to claim submission to avoid claim denial. TMHP will not update authorizations for services that have been billed.

8.6.17.9 Appeals of Denied Requests for Authorization

If an authorization request for admission or service is denied, the requesting provider will receive a denial letter from the PCCM Prior Authorization Department. Where appropriate, the hospital or facility involved is also notified of the denial.

Requests for reconsideration for prior authorizations for inpatient services are subject to the following steps:

1) Provider submits a request for prior authorization to the prior authorization unit and obtains the authorization or a denial for the authorization from TMHP.

2) If the provider is not satisfied with the results of step 1, they can appeal step 1 by submitting additional information and documentation to TMHP. This step can be repeated multiple times as long as the provider is submitting additional information and documentation.

3) If the provider is not satisfied with the outcome determined by TMHP in step 2 and no additional information is available to submit to TMHP, the provider may submit a request for reconsideration to HHSC (only if step 1 is complete and step 2 is thoroughly exhausted).

These steps are applicable prior to filing the claim. Filing deadlines should be taken into consideration, and HHSC will not review if steps 1 and 2 were not followed.

Refer to: Section 7: Appeals (Vol. 1, General Information).

8.6.17.10 Out-of-Network Inpatient Services

Out-of-network hospitals may be reimbursed only for inpatient services provided to PCCM clients as the result of an emergency admission. Out-of-network facilities must notify the Inpatient Prior Authorization Department of a client admission within the next business day following the admission. Medical documentation must be submitted with notification to determine appropriateness for transfer to a contracted facility. Scheduled medical and surgical admissions or any nonemergent admission must be precertified indicating the reason why the patient must be admitted or transferred to an out-of-network facility (i.e., the services needed are not provided in a network facility, the patient had an emergent condition requiring admission while away from the SA).

A routine OB or newborn admission to an out of network facility does not require notification or prior authorization.

Nonroutine OB or newborn services require prior authorization within the next business day following the determination that the services are nonroutine.
Refer to: Subsection 8.6.17.7, "Obstetrical and Newborn Notification" in this section for the definition of routine and nonroutine OB or newborn services.

After a patient in an out-of-network hospital is stabilized, additional services are considered noncovered benefits. The out-of-network hospital may, however, request an exception to the stabilization policy by contacting the PCCM Inpatient Prior Authorization Department at 1-888-302-6167:

- The hospital must state the circumstances surrounding the emergency admission and provide an estimate of the additional number of days required until the patient is discharged.
- PCCM grants exceptions based on the information provided by the noncontracted hospital and issues an authorization for billing purposes if an exception is granted.
- Although in some cases the PCCM Inpatient Prior Authorization Department may require additional time to review the circumstances of the request for exception, it normally reviews the request and contacts the out-of-network hospital within 36 hours of its request. The Inpatient Prior Authorization Department will either provide the noncontracted hospital with an authorization or deny the exception request.
- Should a stabilization exception be denied, any inpatient services provided to the PCCM client at the out-of-network hospital will cease to be a covered benefit 24 hours after the hospital is notified.

Nonemergency inpatient admissions are not a covered benefit at out-of-network hospitals and are considered for reimbursement only if authorization has been received from the PCCM Inpatient Prior Authorization Department or the client would experience an undue burden traveling to a network hospital. In this case, a hardship exemption may be granted. This exemption permits reimbursement of a nonemergency admission at an out-of-network hospital.

To obtain a hardship exemption, the attending physician or designee must contact the PCCM Inpatient Prior Authorization Department at 1-888-302-6167 before any nonemergency admission to an out-of-network hospital and provide details to substantiate why the client would experience an undue burden traveling to a network hospital.

If the details substantiate undue burden, the PCCM Inpatient Prior Authorization Department will grant the exemption and issue an authorization. The physician can then admit the patient to the out-of-network hospital.

**Note:** Under no circumstances will authorization for an undue travel burden be granted after a patient has been admitted for a nonemergency condition to an out-of-network hospital.

PCPs referring clients to specialists should make the specialist aware of the PCCM non-contracted hospital admission policy.

### 8.6.18 Outpatient Prior Authorization Process

The following outpatient procedures require prior authorization:

- All laser surgeries
- CT
- CTA
- MRI
- MRA
- pH probe tests
- Some endoscopic procedures
- Some podiatry procedures
- Some surgical procedures
Prior authorization for clients with retroactive eligibility must be obtained by the PCCM provider within 95 days of the add date and before claims submission.

**Refer to:** Subsection 3.2.5, “Authorization Requirements for CT, CTA, MRI, fMRI, MRA, PET, and Cardiac Nuclear Imaging Services” in the *Radiology and Laboratory Services Handbook* (*Vol. 2, Provider Handbooks*) for more information about MRI/MRA and CT/CTA authorizations.

The following outpatient procedures do not require prior authorization:

- Anesthesia services (type of service 7)
- Surgeries performed on an outpatient emergent basis (retrospective authorization must occur for claims payment)
- Application or removal of casts, splints, or strapping (excluding podiatry office procedures and services)
- Burns—local treatment (does not include skin grafts or long-term wound care)
- Catheterization of blood vessels (excluding heart catheterizations) for diagnosis or therapy (includes venous access, puncture of shunt, etc.)
- Cholecystectomy
- Circumcision, newborn and for phimosis (20 years of age and younger)
- Fractures or dislocations (closed or open treatment)
- Incision and drainage of abscesses
- Injection procedures for radiology or in conjunction with surgical procedures
- Intubation or tracheostomy tube changes
- Polysomnography
- Removal of foreign bodies
- Insertion or removal of pressure equalization tubes (myringotomy and tympanostomy)
- Repair of lacerations or wounds (includes the eye)
- Replacement of gastrostomy tubes
- Replantation of digits
- Sterilization procedures (male and female)
- Urodynamics
- Esophageal manometry
- Ultrasounds
- Holter monitors
- Tympanostomy
- Tonsillectomy for clients who are 11 years of age and younger
- Adenoidectomy for clients who are 11 years of age and younger
- Bronchoscopy
- Sigmoidoscopy
- Proctosigmoidoscopy
• Permanent removal of nail or nail matrix
• Colonoscopy (except with endoscopic ultrasound exam or fine needle biopsy)
• Esophageal Endoscopy (except for ablation procedures)
• Appendectomy for ruptured appendix or incidental removal
• Hernia repair (except initial repair)
• Upper GI Endoscopy (except for drainage of pseudocyst or placement of gastrostomy tube)

8.6.18.1 Requesting Prior Authorization

Requests for prior authorization of outpatient services may be made by faxing a completed Primary Care Case Management (PCCM) Inpatient/Outpatient Authorization Form to the Outpatient Prior Authorization Department at 1-512-302-5039, by calling 1-888-302-6167, or through the TMHP website at www.tmhp.com. Forms other than the PCCM Inpatient/Outpatient Authorization Form will not be accepted for outpatient prior authorizations or updates.

Refer to: Subsection 5.4.1, “Prior Authorization Requests Through the TMHP Website” in Section 5, “Prior Authorization” (Vol. 1, General Information).

The request must include the following information:

• Facility name and provider identifier
• Client name, Medicaid number (PCN), and DOB
• Requesting (admitting) physician’s name and provider identifier (if requesting authorization by paper)

Note: Online authorization requests submitted on the TMHP website require an NPI. TPIs can no longer be submitted for authorization requests through the TMHP website.

• Name of person completing form
• Date completed
• Telephone and fax number
• Admit date
• Diagnosis codes (primary, secondary, etc.)
• Procedure codes
• Clinical information to support medical necessity is required

If the prior authorization request is determined to be incomplete, the Outpatient Prior Authorization Department faxes the provider a letter requesting the specific information needed to make the prior authorization determination and places the request in pending status. At least two additional attempts to call or fax the provider to obtain this information will be made during the next four business days. If the requested information is not received by the fourth business day, a letter is sent to the client stating that the prior authorization request cannot be processed until the provider responds with the specific information necessary to complete the prior authorization request. This client letter is sent along with a copy of the initial letter to the provider that lists the specific information necessary to make the prior authorization determination. If the provider does not submit the information necessary to complete the prior authorization request within seven calendar days from the date the letter was sent to the client, a letter is sent to the provider and the client notifying them of the denial of service due to incomplete or missing information.

A letter of authorization determination is faxed to the requesting provider once the request is completed. Authorization is a condition of reimbursement. It is not a guarantee of payment.
Claims are processed based on the authorization completed at the time of claim submission.

If there is a change in an existing authorization (i.e., change in diagnosis or change in procedure), the facility or provider is required to submit an updated Primary Care Case Management (PCCM) Inpatient/Outpatient Authorization Form with clinical documentation supporting the change or contact the Outpatient Prior Authorization Department with the update prior to claim submission to avoid claim denial.

Providers performing urgent or emergent outpatient procedures that require authorization must contact the PCCM Outpatient Prior Authorization Department within seven calendar days to obtain the authorization.

8.6.19 Transportation Services

8.6.19.1 Nonemergency Transportation

Nonemergency transportation services are available to eligible Medicaid clients who have no other means of transportation. Clients or their advocates should call the statewide Medical Transportation Program (MTP) toll-free number at 1-877-633-8747, to request transportation services.

Refer to: Appendix D: Medical Transportation (Vol. 1, General Information) for more information about nonemergency transportation.

8.6.20 Provider Complaints and Appeals

8.6.20.1 Conflict Resolution

The relationship between client and PCP may become unsatisfactory to one or both parties. The PCP should contact the PCCM Provider Helpline or write to request assistance in resolving the situation.

PCCM will initiate one or more of the following steps:

- Contact the client and the provider to assess the situation and provide educational information that may clarify the situation, if applicable.
- Refer the situation to CHS staff for education or to help clarify the situation.
- Refer the situation to the Complaint Resolution Team, if applicable.
- Begin complaint/grievance resolution.
- Reassign the client to another PCP.

8.6.20.2 Provider Complaints

Refer to: Section 7: Appeals (Vol. 1, General Information).

8.6.20.2.1 Provider Complaint Policy

PCCM takes seriously, and acts on, each provider complaint. Depending on the level and nature of the complaint, PCCM works with the provider to resolve the issue or directs the complaint to the appropriate PCCM department.

- Complaints Unit. Complaints that concern the relationship between a provider or provider’s staff and a client.
- Medical Affairs Division. Complaints that relate to utilization of services (including ER use), denial of continued stay, and all clinical and access issues. This includes provider’s appeal of an adverse authorization decision.
- PCCM Administration. Complaints that concern the relationship between a provider and any PCCM staff person or complaints about the overall plan management.

If the complaint relates to a medical issue, the Medical Affairs staff may assist in the resolution of the complaint.
The provider complaint process applies only to the resolution of disputes within the control of PCCM, such as administrative or medical issues. The provider complaint process does not apply to allegations of negligence against third parties, including other participating providers. These complaints are referred to HHSC for review and evaluation and are resolved by HHSC staff with support from PCCM staff.

8.6.20.2.2 Provider Complaint Procedures

The PCCM Complaints Unit handles all provider complaints. The processing of provider complaints is described below:

- Providers must submit their complaint in writing or by telephone. All requests to remove clients from their panel must be in writing (see subsection 8.1.7.3, “Provider-Initiated PCP Changes” in this section).
- Providers will receive a written acknowledgement letter from PCCM within five business days of receipt of the complaint.
- Referrals to other departments, such as Provider Services or Medical Affairs, are made as appropriate.
- Complaints dealing with the quality of, access to, or continuity of care are referred to the PCCM Primary Care Provider Contract Compliance Department for follow up and inclusion in the provider file.
- If the complaint cannot be resolved within 30 calendar days, the provider is notified in writing or by telephone of the status of the complaint.

If the provider believes he or she did not receive due process from PCCM, the provider may file a complaint with HHSC. However, providers must exhaust the appeals and grievance process with PCCM before filing a complaint with HHSC.

8.6.20.2.3 Complaints to HHSC-PCCM

PCCM providers may file complaints to HHSC Claims Administrator Contract Management if they find they did not receive full due process from TMHP in the management of their appeal. PCCM providers must exhaust the appeals and grievance process with TMHP before filing a complaint with HHSC Claims Administrator Contract Management.

Refer to: Subsection 7.3, “Appeals to HHSC Texas Medicaid Fee-for-Service and PCCM” in Section 7, “Appeals” (Vol. 1, General Information) for information about submission of an appeal to HHSC.

A complaint is defined as any dissatisfaction expressed in writing by the provider, or on behalf of that provider, concerning Texas Medicaid. The term complaint does not include the following:

- A misunderstanding or a problem of misinformation that is resolved promptly by clearing up the misunderstanding or supplying the appropriate information to the provider’s satisfaction.
- A provider’s oral or written dissatisfaction with an adverse determination.

Under the complaint process, HHSC Claims Administrator Contract Management works with TMHP and providers to verify the validity of the complaint, determine if the established due process was followed in resolving appeals and grievances, and addresses other program and contract issues, as applicable.

Complaints must be written and received by HHSC Claims Administrator Contract Management within 60 calendar days from TMHP’s written notification of the final appeal decision.
When filing a complaint, providers must submit a letter explaining the specific reasons they believe the final appeal decision by TMHP is incorrect and must supply copies of the following documentation:

- All correspondence and documentation from the provider to TMHP, including copies of:
  - Supporting documentation submitted during the appeal process.
  - All correspondence from TMHP to the provider, including TMHP’s final decision letter.
- All R&S Reports of the claims/services in question, if applicable.
- Provider's original claim/billing record, electronic or manual, if applicable.
- Provider’s internal notes and logs when pertinent.
- Memos from the state or TMHP indicating any problems, policy changes, or claims’ processing discrepancies that may be relevant to the complaint.
- Other documents, such as certified mail receipts, original date-stamped envelopes, in-service notes, minutes from meetings, if relevant to the complaint. Receipts can be helpful when the issue is late filing.

Complaint requests may be mailed to the following address:

Texas Health and Human Services Commission  
HHSC Claims Administrator Contract Management  
Mail Code 91X  
PO Box 204077  
Austin, TX 78720-4077

Refer to:  Subsection 8.1.11, “Medicaid Managed Care Complaints and Fair Hearings” in this section.  
Subsection 7.3.5.3, “Complaints to HHSC—Texas Medicaid Fee-for-Service and PCCM” in Section 7, “Appeals” (Vol. 1, General Information).

8.6.20.3 Authorization Appeals

A denial is issued when an authorization or update to an existing request by a physician or a facility is not approved by the TMHP Medical Director or designee.

A medical necessity denial is issued when the documentation provided fails to support the need for requested service or the client’s condition or service requested does not warrant the level or location of care the provider requested.

A denial is also issued when the provider has failed to comply with PCCM policies and procedures. These include failure to:

- Notify of an inpatient stay.
- Obtain authorization for an elective or scheduled service prior to the delivery of service.

A denial may also be issued if:

- The provider or the location of service is not within the network.
- The patient is no longer eligible for coverage.
- The service is not a benefit of Texas Medicaid.

The appeals or authorization reconsideration process affords the provider the opportunity to dispute a denial and explain or justify the original request.

Refer to:  Section 7: Appeals (Vol. 1, General Information).
8.6.20.3.1 Appeal Procedures for Denials Other Than Medical Necessity

Level I: Review by TMHP
If the provider has evidence that they complied with policy, the provider may request a reconsideration of a denial by resubmitting the authorization request with additional information to support the reconsideration and a copy of the denial letter by fax to the PCCM Inpatient or Outpatient Prior Authorization Department that issued the denial prior to submitting the claim.

Level II: Additional Review by TMHP
If the provider is not satisfied with the results of the Level 1 review, they can appeal by submitting additional information or documentation to TMHP.

Level III: Review by HHSC
If a provider believes he or she did not receive full consideration under the appeals process, the provider may file an appeal with HHSC. Providers must exhaust the appeals process with TMHP before filing an appeal with HHSC.

Refer to: Subsection 7.3.5.3, “Complaints to HHSC—Texas Medicaid Fee-for-Service and PCCM” in Section 7, “Appeals” (Vol. 1, General Information).

If it is determined that the provider did not receive full consideration, HHSC will work with the provider and PCCM to ensure that a proper review of the appeal is conducted.

Hospitals may appeal to the HHSC Medical and UR Appeals Unit only if they have followed the prior authorization process with TMHP. The Medical and UR Appeals Unit must receive the written appeal request within 120 days from the date of the last R&S Report. If the request is not received within 120 days, the appeal is not conducted, and the TMHP decision is considered final. This request must include a copy of the complete medical record, an original signed, properly completed, notarized Affidavit (see Form 7.1, Business Records Affidavit Form in Section 7, “Appeals” (Vol. 1, General Information)), and a letter explaining the reason for the appeal. Extensions of time are not granted for filing the written appeal request, submission of the complete medical record, or the original properly completed notarized affidavit in the format approved by HHSC.

8.6.20.3.2 Appeal Procedures for Medical Necessity Denials

Level I: Review by TMHP
Providers can appeal medical necessity denials by resubmitting the authorization request with additional clinical information to support the appeal and a copy of the denial letter by fax to the PCCM Inpatient or Outpatient Prior Authorization Department that issued the denial prior to submitting the claim.

Upon receipt of the request:
- The Medical Director or designee reviews the information and makes a determination.
- After the determination is made, the Medical Affairs nurse sends the resolution letter to the appealing provider.

If dissatisfied with the reconsideration decision, a provider can request another reconsideration by resubmitting the authorization request with additional clinical information not previously submitted to support the requested services and a copy of the denial letter by fax to the PCCM Inpatient or Outpatient Prior Authorization Department that issued the denial prior to submitting the claim.

Once a provider has submitted a claim for services, reconsiderations for medical necessity cannot be performed by the PCCM Prior Authorizations Departments. The provider will need to follow the process for administrative claims appeals.

Refer to: Subsection 7.3, “Appeals to HHSC Texas Medicaid Fee-for-Service and PCCM” in Section 7, “Appeals” (Vol. 1, General Information).
Level II: Additional Review by TMHP
If the provider is not satisfied with the results of the Level 1 review, they can appeal by submitting additional information or documentation to TMHP.

Level III: Review by HHSC
Providers must exhaust the appeals process with TMHP before filing a complaint with HHSC.

If a provider believes he did not receive full consideration under the appeals process, the provider may file a complaint with HHSC.

Refer to:
- Subsection 7.3.5.3, “Complaints to HHSC—Texas Medicaid Fee-for-Service and PCCM” in Section 7, “Appeals” (Vol. 1, General Information).
- Subsection 8.1.11, “Medicaid Managed Care Complaints and Fair Hearings” in this section.
- Subsection 7.1.5, “Paper Appeals” in Section 7, “Appeals” (Vol. 1, General Information) for more information on paper appeals.

8.6.21 Claims Filing Information
All PCCM claims are submitted to TMHP, whether TANF or SSI.

Electronic claims submissions require an NPI only. If an electronic claim is submitted without an NPI, the claim will be denied. If a claim is submitted electronically with a TPI, the claim will be denied.

Paper claims submissions require a TPI and NPI for the performing and billing provider. The performing provider’s TPI is required in block 24J in the shaded area, and NPI in block 24J in the unshaded area of the CMS-1500 claims form. The billing provider’s TPI is required in block 33b in the shaded area, and the NPI in block 33a in the unshaded area. An NPI is required in all other NPI provider identifier blocks. If the NPI and TPI are not in the proper blocks on the claim form and if the NPI is missing from any of the other NPI required blocks, the claim will be denied.

Paper claims submissions for the referring provider require the complete name of the referring provider in block 17a and an NPI in block 17b. The referring provider for a managed care client must be the client’s PCP. If there is not a referral from the PCP, a prior authorization number must be on the claim.

Medicaid, PCCM, and MCO providers who have not submitted a claim for a period of at least 18 months will be mailed a reminder letter by TMHP. Providers who are mailed these reminder letters will have six months from the date of the letter to submit a claim using the TPI referenced in the letter. If a TPI referenced in the reminder letter has had no claims activity within six months from the letter date, TMHP will apply a payment denial code to that TPI.

If a TPI has gone 24 months without claims activity, TMHP will notify the provider in writing that the referenced TPI has been terminated. When a provider’s Medicaid TPI is terminated, any enrollments into the PCCM Program or MCOs associated with that TPI will also be terminated. To reactivate a TPI that has been terminated, the provider must complete an enrollment application.

FQHC and RHC After-Hours Care. After-hours care provided by FQHC and RHC providers do not require a referral from the client’s PCP. After-hours care by FQHCs and RHCs is defined as care provided on weekends, on federal holidays, or before 8 a.m. and after 5 p.m., Monday through Friday. FQHCs and RHCs that provide after-hours services to PCCM clients must submit claims with modifier TU.

FQHC and RHC submitting claims for Gynecological services. FQHC and RHC providers rendering services to PCCM clients for gynecological services must submit claims with modifier GY.

Refer to:
Subsection 8.2.1, “Freestanding and Hospital-Based RHC Services” in the Outpatient Services Handbook (Vol. 2, Provider Handbooks) for information about gynecological services for RHC providers.

**Out-of-State or Border-State Providers Who Perform Services to Migrant Farm Workers.** Out-of-state and border-state providers do not need a referral from a client’s PCP when they render services to Primary Care Case Management (PCCM) clients who are migrant farm workers and their children and family members who are PCCM clients. Out-of-state or border-state providers that submit claims for services rendered to these clients must include modifier UC.

**8.6.21.1 PCCM Newborn Claims Filing**

PCCM newborns are automatically assigned to PCCM at the time of the newborn’s birth. The effective date of the newborn’s enrollment is the same as the newborn’s date of birth. Claims filing procedures for PCCM newborns will continue to be handled under Texas Medicaid fee-for-service billing guidelines through TMHP.

Health care providers should file newborn claims using the newborn’s Medicaid Identification number as soon as it is made available to them. A referring provider identifier is not required when submitting claims for clients who have PCCNEWB01 on their Medicaid Identification Form (Form H3087). Any Medicaid provider can see the newborn. Claims submitted for newborns will be accepted even if a PCP has not been selected or assigned. Parents of a newborn have up to 105 days to select a PCP for their baby. If parents do not select a PCP, a PCP is selected for the newborn on the basis of claims history.

Once the baby is assigned a PCP and a Medicaid number, normal billing and referral procedures will be in effect.

Refer to: Subsection 6.5.5, “CMS-1500 Instruction Table” in Section 6, “Claims Filing” (Vol. 1, General Information). Referring Physician field (boxes 17a and 17b) for specific services that require a referring provider number.

**8.6.21.2 Personal Care Services**

PCS are authorized and may be reimbursed by TMHP for PCCM.

Refer to: Subsection 2.8, “Personal Care Services (PCS) (CCP)” in the Children’s Services Handbook (Vol. 2, Provider Handbooks).

**8.6.21.3 Migrant Farm Workers**

Out-of-state and border state providers do not need a referral from a client’s PCP when they render services to PCCM clients who are migrant farm workers and their children and family members who are PCCM clients. Out-of-state or border-state providers that submit claims for services rendered to these clients must include modifier UC.

**8.6.21.4 Network Hospitals**

A network hospital is one that is contracted to provide services to PCCM clients. Individual reimbursement arrangements are negotiated for HHSC by PCCM Hospital Contracting.

For all SAs, all inpatient services to PCCM clients, including services provided to PCCM clients receiving SSI benefits, are reimbursed at the PCCM rate.

**8.6.21.5 Out-of-Network Hospitals**

An out-of-network hospital is one that is not contracted to provide services to PCCM clients:

- Out-of-network hospitals may be reimbursed only for inpatient services provided to PCCM clients as the result of an emergency admission. Inpatient services are reimbursed at the rate paid by the Texas Medicaid fee-for-service program.
- Reimbursement for emergency treatment will be made at the current Medicaid rates.
Hospitals that are not contracted with PCCM are reimbursed according to Texas Medicaid fee-for-service rates.

**8.6.21.6 Emergency Outpatient Services**

If the client presents at a hospital emergency outpatient facility, the physician should provide the medically necessary medical screening examination and stabilization services immediately, and the client should be referred back to the PCP for follow-up care. Reimbursement for emergency outpatient services requires that the medical record document the medically necessary services.

The hospital should contact the client’s PCP within 24 hours or the next business day to advise that emergency treatment has been provided. In addition, if a procedure requiring authorization was performed while in the emergency department, the hospital must contact the PCCM Outpatient Prior Authorization Department within seven calendar days to obtain the authorization. If the condition results in an inpatient admission, the hospital must notify the PCCM Inpatient Prior Authorization Department prior to claim submission. Reimbursement in cases of emergency treatment will be based on the actual services rendered. The hospital will be reimbursed at its current Medicaid reimbursement rate.

*Refer to:* Subsection 8.6.17, “PCCM Inpatient Authorization Process” in this section.

**8.6.21.7 Nonemergency Outpatient Clinic Services**

All hospitals are reimbursed for outpatient clinic services at their current Medicaid outpatient reimbursement rate.

**8.6.21.8 PCCM Claims Details**

To avoid PCCM claim denials, the PCP’s complete and correct name, and provider identifier must be entered in the referring provider field of the appropriate claim form, indicating a referral from the PCP if the treating provider is not the client’s PCP at the time of service.

If this information is missing or invalid and the treating provider is not the assigned PCP on the DOS, the claim will be denied.

For services requiring authorization, enter the authorization number in block 23, when submitting claims on the CMS-1500 paper claim form. This block is the prior authorization field. The Primary Care Case Management (PCCM) Inpatient/Outpatient Authorization Form is not required with the claims submission. Online authorization requests submitted on the TMHP website require an NPI.

*Refer to:* Subsection 8.6.17, “PCCM Inpatient Authorization Process” in this section.

**8.6.21.9 National Drug Code (NDC)**

**8.6.21.10 Claims for Specialist Services**

Specialists may bill for health-care services provided to PCCM clients if the patient was referred by the client’s PCP. Electronic claims submissions by specialists require a referral from the PCCM client’s PCP. The specialist can submit claims electronically by including the complete, correct name of the referring provider who is also the PCCM client’s PCP, and the referring provider’s NPI number in the NPI required blocks. An NPI only is required for electronic claims submissions. If a TPI is submitted on an electronic claim, the claim will be denied. Paper claims submissions by specialists also require a referral from the PCCM client’s PCP. To indicate a referral from the client’s PCP, the PCP’s name, NPI, and provider identifier must be included in the Referring Physician field (blocks 17a and 17b) on the CMS-1500 claim form. A referral is not required if a specialist is providing a service that does not require a referral from a PCP.
Reimbursement for specialists is based on the current Texas Medicaid fee-for-service rates.

**Refer to:** Subsection 8.6.15, “Referrals” in this section.

Subsection 8.6.11.1, "Self-Referral Services" in this section.

PCS are authorized and may be reimbursed by TMHP for PCCM.

For claims filing purposes, the PCS provider must bill place of service 2 (home) when submitting claims to TMHP. Texas Medicaid will not reimburse providers for PCS that duplicate services that are the legal responsibility of school districts.

### 8.7 Forms
### Primary Care Case Management (PCCM) Behavioral Health Consent Form

**DIRECTIONS:** This is an authorization for the release of information to your primary care provider.

**PLEASE FILL OUT THE INFORMATION BELOW:**

<table>
<thead>

**from (date) ____________________ to (date) ____________________,** the following information:

Please indicate what, if any, information you would like to release.

- [ ] Total Medical Records to be released to primary care provider
- [ ] Medication Information Only to be released to primary care provider
- [ ] Medical Records to health plan

I understand that my records are protected under Federal (42 CFR Part 2) and/or State Confidentiality Regulations. This authorization may be withdrawn at any time in writing except to the extent that the program or person which is to make this disclosure has acted in reliance on it. Upon revocation of authorization, further release of information shall cease immediately. File copy is considered equivalent to the original. This release of information expires in thirty (30) days or sixty (60) days following completion or termination of treatment, whichever is later.

I further acknowledge that the information to be released was fully explained to me and this consent is given of my own free will.

**EXECUTED THIS _______________ DAY OF _______________**

(Parent, Guardian, or Authorized Representative, if required)

The person signing this authorization is entitled to a copy.

---

TO THE INDIVIDUAL FILLING THIS OUT:

You have the right to ask us about this form. You also have the right to review the information you give us on the form. (There are a few exceptions.) If the information is wrong, you can ask us to correct it. The Health and Human Services Commission has a method for asking for corrections. You can find it in Title 1 of the Texas Administrative Code, section 351.17 through 351.23. To talk to someone about this form or ask for corrections, please contact the Texas Medicaid & Healthcare Partnership (TMHP). You can write to the Texas Medicaid & Healthcare Partnership (TMHP), Attention: State Action Request Support Manager, MC-C094, PO Box 204270, Austin, TX 78720-4270. You can also call the Texas Medicaid & Healthcare Partnership PCCM Client Helpline at 1-888-902-6688.

TO THE RECIPIENT OF CONFIDENTIAL INFORMATION, PROHIBITION ON DISCLOSURE:

If the information disclosed to you is related to substance abuse treatment, these records’ confidentiality is protected by Federal Law. Federal regulations (42 CFR Part 2) prohibit you from making any further disclosure of it without the specific written consent of the person to whom it pertains, or as otherwise permitted by such regulations. A general authorization for the release of medical or other information is not sufficient to release substance abuse records. The Federal Rules restrict any use of the information to criminally investigate or prosecute any substance abuse patient. State laws may also protect the confidentiality of patient’s records.

Revised June 12, 2005

</tr>
</tbody>
</table>

Initial consultations are for one visit only for evaluation and development of a treatment plan unless otherwise specified. All consultations require a written report (preferably typed and attached to this form) to the primary care provider and phone conferences as necessary to assure continuity of care. Referrals are valid for 30 days from the time of issue and it is the consulting provider’s responsibility to verify eligibility prior to delivering services. Consulting providers may not authorize secondary referrals. All requests for additional services or visits to other providers must come through the primary care provider. All claims are subject to retrospective review for purposes of determining eligibility, benefit coverage, appropriateness, and medical necessity. Claims payment may be affected by review findings.

Consultant comments:

Consultant signature: Date / / 

Please return findings and report to the primary care provider listed above.

8.6 Primary Care Case Management (PCCM) FQHC and RHC Medical Staff Update Form

Primary Care Case Management
Federally Qualified Health Centers or Rural Health Clinics
Medical Staff Update Form

It is important for Primary Care Case Management (PCCM) clients to have up-to-date information about your medical staff. Timely reporting of staff changes helps to maintain an accurate and current provider list.

Please use this form to update your medical staff roster. Using the appropriate column, list the name of each provider that should be added to or removed from the PCCM Primary Care Provider and Hospital Listing.

Please fax this form to the PCCM Contract and Credentialing Department at 1-888-235-8399.

Si necesita apuntar más nombres, complete la forma al otro lado de esta página (inglés o español).

Yo (el cliente) acuerdo que sólo iré a mi proveedor de cuidado primario para recibir cualquier servicio de Medicaid, a menos que me medico principal me haya enviado a otro proveedor, o que necesite atención médica en una emergencia, servicios de planificación familiar u otros servicios que no requieran derivación enumerados en el Manual para los clientes de PCCM. Para personas menores de 21 años, no se requiere permiso de mi medico principal para los chequeos médicos, dentales o tratamientos dentales de Pasos Sanos de Texas.

Tiene el derecho de preguntarnos sobre esta forma. También tiene el derecho de revisar la información que nos da en la forma. (Hay algunas excepciones). Si la información no está correcta, puede pedir que la corrijamos. La Comisión de Salud y Servicios Humanos tiene un método para pedir correcciones. Se encuentra en el Título 1 del Código Administrativo de Texas, artículos 351.17 a 351.23. Para hablar con alguien sobre esta forma o pedir su corrección, llame a PCCM al 1-888-302-6688. La llamada es gratis.

</tbody>
</table>
Instructions for Completing the Provider Information Change Form

Signatures

- The provider’s signature is required on the Provider Information Change Form for any and all changes requested for individual provider numbers.
- A signature by the authorized representative of a group or facility is acceptable for requested changes to group or facility provider numbers.

Address

- Performing providers (physicians performing services within a group) may not change accounting information.
- For Texas Medicaid fee-for-service and the CSHCN Services Program, changes to the accounting or mailing address require a copy of the W-9 form.
- For Texas Medicaid fee-for-service, a change in ZIP Code requires copy of the Medicare letter for Ambulatory Surgical Centers.

Tax Identification Number (TIN)

- TIN changes for individual practitioner provider numbers can only be made by the individual to whom the number is assigned.
- Performing providers cannot change the TIN.

Provider Demographic Information

An online provider lookup (OPL) is available, which allows users such as Medicaid clients and providers to view information about Medicaid-enrolled providers. To maintain the accuracy of your demographic information, please visit the OPL at www.tmhp.com. Please review the existing information and add or modify any specific practice limitations accordingly. This will allow clients more detailed information about your practice.

General

- TMHP must have either the nine-digit Texas Provider Identifier (TPI), or the National Provider Identifier (NPI)/Atypical Provider Identifier (API), primary taxonomy code, physical address, and benefit code (if applicable) in order to process the change. Forms will be returned if this information is not indicated on the Provider Information Change Form.
- The W-9 form is required for all name and TIN changes.
- Mail or fax the completed form to:
  Texas Medicaid & Healthcare Partnership (TMHP)
  Provider Enrollment
  PO Box 200795
  Austin, TX 78720-0795
  Fax: 512-514-4214

Effective Date: 01/01/2009; Revised Date: 01/21/2010

  B.3.1 Participating Palivizumab Distribution Pharmacies ....................... B-5
B.1 Vendor Drug Program

The Texas Medicaid Vendor Drug Program (VDP) makes payment for prescriptions of covered outpatient drugs only to those pharmacy providers contracted with the VDP. In-state pharmacies licensed as Class A or C by the Texas State Board of Pharmacy are eligible for enrollment in the VDP. Out-of-state pharmacies and pharmacies holding any other class of pharmacy license are considered for inclusion in the program on a case-by-case basis, relative to the benefits made available to a client eligible for Texas Medicaid. Contracts are not granted to applicants unless additional benefits to the recipient are established.

VDP provides statewide access to prescription drugs as prescribed by treating physician or other healthcare provider for clients eligible for:

- Medicaid
- Children’s Health Insurance Program (CHIP)
- Children with Special Health Care Needs (CSHCN) Services Program
- Kidney Health Care (KHC)

B.1.1 VDP Benefits

The Medicaid drug benefit is limited to three prescriptions per month, per client with the following exceptions that have unlimited prescriptions:

- Clients enrolled in waiver programs such as managed care, Community Living Assistance (CLASS), Community-Based Alternatives (CBA)
- Texas Health Steps (THSteps)-eligible clients (clients who are 20 years of age and younger)
- Clients in skilled nursing facilities
- Clients enrolled in the State of Texas Access Reform (STAR) Program, and residing in a STAR Program service area,

Refer to: Subsection 8.2.4, “Service Areas and STAR HMO Choices” in Section 8, “Managed Care” (Vol. 1, General Information).

Note: Prescriptions for family planning drugs and supplies are not subject to the three-prescription limit.

The following categories of drugs do not count against the three prescription per month limit:

- Family planning drugs
- Smoking cessation drugs
- Insulin syringes

Clients can be “locked-in” to a specific pharmacy. Clients who are not “locked-in” to a specific pharmacy may obtain their drugs or supplies from any contracted Medicaid provider of pharmaceutical services.

Refer to: Subsection 4.4.2, “Client Limited Program” in Section 4, “Client Eligibility” (Vol. 1, General Information) for more information about lock-in limitations.

Family planning services are excluded from lock-in limitation. Though TMHP reimburses family planning agencies and physicians for family planning drugs and supplies, the following family planning drugs and supplies are also available through the VDP and are not subject to the three-prescription limit:

- Diaphragms
- Oral contraceptives
- Jellies, creams, foams, suppositories, vaginal contraceptive film, and contraceptive sponge
• Medication for treatment of vaginal/cervical/genital infections (subject to the three-prescription limit)

The VDP does not reimburse claims for nutritional products (enteral or parenteral), medical supplies, or equipment other than insulin syringes.

B.1.2 Vendor Drug Program Formulary Information

VDP drug formulary information is available to health-care providers to help their clients efficiently get their medications. Information includes which state health-care program covers the drug, whether a drug on the Medicaid Preferred Drug List (PDL), whether a Medicaid non-preferred prior authorization (PA) or clinical PA is required, and other important drug information. VDP drug formulary information is available:

• Online at www.txvendordrug.com (All state health-care program formulary information with PA type (PDL or clinical) required indicator)

• Online at www.smartformulary.com/tx. Here providers can find Medicaid drug formulary and Preferred Drug List (PDL) information with links attached to selected non-preferred drugs that will guide providers to the preferred drugs in that therapeutic class.

• Through Epocrates, a free drug information service that can be downloaded to your Palm, BlackBerry, Windows Mobile phone, or iPhone. In addition to listing a drug’s preferred status, Epocrates includes drug monographs, dosing information, and warnings. For more information, go to www.epocrates.com. All providers are also eligible to register for Epocrates.

B.1.3 Obtaining Outpatient Prescribed Drug Prior Authorization

To obtain prior authorization for any VDP medication, prescribing providers or their representatives should call the Texas Prior Authorization Hotline at 1-877-PA-TEXAS (1-877-728-3927). The Hotline is available Monday through Friday, 7:30 a.m. to 6:30 p.m. (CST). To submit an online VDP prior authorization request, prescribing providers must first register online at https://paxpress.txpa.hidinc.com. For Synagis PA, see section B.3 in this handbook.

Note: Pharmacists cannot obtain prior authorization for medications. If the client arrives at the pharmacy without prior authorization for a non-preferred drug, the pharmacist will alert the provider’s office and ask the provider to get prior authorization.

B.1.4 Dispensing Life of Medicaid and CSHCN Services Program Prescriptions

Change

The Centers for Medicare & Medicaid Services (CMS) has approved the state’s amendment to increase the dispensing life of all Medicaid prescriptions for non-controlled substances from six months to one year. The amendment allows a maximum of up to 11 refills of non-controlled substances within a one-year period. The Vendor Drug Program (VDP) has implemented these changes.

The increase of prescription dispensing life also applies to prescriptions for the CSHCN Services Program, Children’s Health Insurance Program (CHIP), and Kidney Health Care Program (KHC).

B.1.5 VDP Contact Information

<table>
<thead>
<tr>
<th>Vendor Drug Area</th>

</tr>
</tbody>
</table>
B.1.6 72-Hour Emergency Supply
Federal and Texas law requires that a 72-hour emergency supply of a prescribed drug be provided when a medication is needed without delay and prior authorization is not available. This rule applies to non-preferred drugs on the Preferred Drug List (PDL) and any drug that is affected by a clinical or therapeutic prior authorization edit and needs the prescriber’s prior approval.

B.1.7 Cost Avoidance Coordination of Benefits
Cost avoidance coordination of benefits (COB) for pharmacy claims was implemented in 2009 in two phases. Phase I of cost avoidance, which was implemented on January 20, 2009, included only a limited number of clients who were 21 years of age and older. Phase II, which was implemented July 20, 2009, included all the Medicaid client population. The Texas Medicaid VDP implemented this new process to ensure compliance with federal Centers for Medicare & Medicaid Services (CMS) regulations. Under federal rules, Medicaid agencies must be the payer of last resort. The cost avoidance model checks for other known insurance at the point of sale, preventing Medicaid from paying a claim until the pharmacy attempts to obtain payment from the client’s third party insurance.

For more information on Cost Avoidance, visit the Texas Vendor Drug website at www.txvendordrug.com/providers/tamper-resistant.shtml.

B.1.8 Tamper-Resistant Prescription Pads
Providers are required by federal law (Public Law 110-28) to use a tamper-resistant prescription pad when writing a prescription for any drug for Medicaid clients. Pharmacies are required to ensure that all written Medicaid prescriptions submitted for payment to the VDP were written on a compliant tamper resistant pad.

CMS has stated that special copy-resistant paper is not a requirement for electronic medical records (EMRs) or ePrescribing-generated prescriptions. These prescriptions may be printed on plain paper and will be fully compliant if they contain at least one feature from each of the following three categories:

- Prevents unauthorized copying of completed or blank prescription forms
- Prevents erasure or modification of information written on the prescription form
- Prevents the use of counterfeit prescription forms

Two features that can be incorporated into computer-generated prescriptions printed on plain paper to prevent passing a copied prescription as an original prescription are as follows:

- Use a very small font that is readable when viewed at 5x magnification or greater and illegible when copied.
- Use a "void" pantograph accompanied by a reverse "Rx," which causes a word such as "Void" to appear when the prescription is photocopied.

For more information, refer to the HHSC Vendor Drug website at www.txvendordrug.com/providers/tamper-resistant.shtml.

B.1.9 Schedule II Controlled Substances (CII) through Schedule V Controlled Substances (CV)
Effective September 1, 2008, pharmacies must report all CIII, CIV, and CV prescriptions to the Texas Department of Public Safety (DPS) in addition to the CII prescriptions that are already being reported. This DPS process requires reporting by the DPS registration number of the practitioner issuing the
prescription. The prescription forms for Schedule CII controlled substances that are issued by the Texas Department of Public Safety (DPS) under the Texas Prescription Program meet the baseline standards set forth above.

Refer to: The DPS website at www.txdps.state.tx.us/RegulatoryServices/narcotics/narccsr.htm.

B.1.10 Free Delivery of Medicaid Prescriptions

Many Medicaid pharmacies across the state offer free delivery of prescriptions to Medicaid clients. To find out which pharmacies offer home delivery, refer clients to the HHSC website at www.txvendordrug.com/delivery-pharmacies.pdf or the PCCM Client Helpline at 1-888-302-6688. Contracted Medicaid pharmacy providers are reimbursed a delivery fee that is included in the medication dispensing fee formula. The delivery fee is paid to HHSC-approved pharmacy providers that have certified that delivery services meet minimum conditions for payment of the delivery fee.

The conditions include:

- Making deliveries to individuals rather than to institutions, such as nursing homes.
- Offering no-charge prescription delivery to all Medicaid clients who request it in the same manner as to the general public.
- Displaying publicly the availability of prescription delivery services at no charge in a prominent place in the pharmacy store (window or door).
- Providing the delivery service without requiring retention of the Client Medicaid Identification (Form H3087).

This delivery fee is not applicable for mail-order prescriptions.

For more information, call the Vendor Drug Resolution Help Desk at 1-800-435-4165 and ask for Pharmacy Contracts.

B.2 Services Available for Children and Adolescents

Medically necessary drugs and supplies that are not covered by the VDP may be available to children and adolescents (birth through 20 years of age) through the CCP (i.e., some over the counter drugs, nutritional products, diapers, and disposable or expendable medical supplies).

The Prior Authorization fax number is 1-512-514-4212.

Refer to: Subsection 2.5.1.1, “Pharmacies (CCP)” in the Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information about pharmacy enrollment in CCP.

B.3 Palivizumab (Synagis) Available Through the VDP

Palivizumab is available to physicians for administering to Medicaid clients through the VDP. This option enables physicians to have palivizumab shipped directly to their office from a network pharmacy. Physicians will not need to purchase the drug. Physicians who obtain palivizumab through the VDP may not bill Medicaid for the drug.

B.3.1 Participating Palivizumab Distribution Pharmacies

For a list of participating pharmacies, refer to the HHSC Vendor Drug website at www.txvendordrug.com.

Providers can refer to the following forms:

**Note:** The Texas Medicaid Palivizumab (Synagis) Prior Authorization Request Form is required if the prescribing provider purchases the drug and bills TMHP.

The Texas Medicaid Vendor Drug Program for Outpatient Pharmacies Synagis (Palivizumab) Prior Authorization Request & Prescription Form for 2010 is required when the prescribing provider obtains the drug through VDP.
APPENDIX C: HIV/AIDS

   C.2.7 State Agencies Listed Under Health and Safety Code (HSC) §85.113 .............. C-5
   C.2.8 Routine HIV Testing Procedure Code ............................................................... C-6
C.1 CDC Revised Recommendations for HIV Testing of Adults, Adolescents, and Pregnant Women in Health-Care Settings

The revised Centers for Disease Control and Prevention (CDC) recommendations advocate routine voluntary human immunodeficiency virus (HIV) screening as a normal part of medical practice, similar to screening for other treatable conditions. Screening is a basic public health tool used to identify unrecognized health conditions so treatment can be offered before symptoms develop and, for communicable diseases, so interventions can be implemented to reduce the likelihood of continued transmission. HIV screening should be offered as an opt-out test in accordance with CDC testing guidelines, which may be viewed at www.cdc.gov/mmwr/preview/mmwrhtml/rr5514a1.htm.

C.2 Model Workplace Guidelines for Businesses, State Agencies, and State Contractors

C.2.1 Purpose

The purpose of this policy is to protect the employment rights and privileges of individuals infected with HIV and acquired immunodeficiency syndrome (AIDS) through compliance with federal, state, and local laws. This policy will provide Texas employers, especially state agencies, with a uniform approach to developing policies and education programs that address HIV/AIDS in the workplace. The Department of State Health Services (DSHS) encourages all employers to establish workplace policies concerning persons with HIV/AIDS. Employers can adapt this model to fit the particular needs of their organization, work force, and clients; however, the content and intent must remain consistent with this document and the Health and Safety Code (HSC).

C.2.2 Authority

The model workplace guidelines, developed by the DSHS HIV/Sexually Transmitted Disease (STD) Comprehensive Services Branch, as required by HSC §85.012, “Model Workplace Guidelines,” and adopted as HIV/STD Policy No. 090.021, are considered the minimum standards for the development of guidelines for state agencies. This policy also serves as the minimum standard for contractors of certain designated state agencies and organizations funded by those state agencies (HSC §85.113).

These guidelines are also the standard for health-care facilities licensed by DSHS and the Department of Aging and Disability Services (DADS) as stated in HSC §85.010, “Educational Course for Employees and Clients of Health Care Facilities.”

C.2.3 Who Must Use Workplace Guidelines

C.2.3.1 State Agencies

State law requires that each state agency adopt and carry out workplace guidelines. The agency’s workplace guidelines should incorporate, at a minimum, the DSHS model workplace guidelines in this policy.

C.2.3.2 State Contractors

A program that involves direct client contact and that contracts with or is funded by any of the state agencies listed in subsection C.2.7, “State Agencies Listed Under Health and Safety Code (HSC) §85.113” in this Appendix will adopt and carry out workplace guidelines as stated in HSC §85.113.
C.2.4 Why Have Guidelines

Employers should develop and carry out policies and education programs concerning potentially limiting medical conditions before a crisis arises. Such policies and education programs help reduce employees’ fears and misconceptions about HIV/AIDS and help to:

- Provide current and accurate scientific evidence that people with HIV infection do not pose a risk of transmitting the virus to coworkers through ordinary workplace contact.
- Provide workers with current information about HIV risk reduction for employees and their families.
- Avoid conflict between the infected employee and the employer regarding discrimination or other employment issues.
- Prevent work disruption and rejection of the infected employee by coworkers.
- Inform employees that they have rights regarding work continuation, confidentiality of medical and insurance records, and general health and safety.
- Provide specific and ongoing education and equipment to employees in health-care settings who are at risk of exposure to HIV, and to assure that appropriate infection-control procedures are used.
- Reduce the financial impact, legal implications, and other possible effects of HIV/AIDS in the workplace.

C.2.5 Development of Workplace Policy Content

Individuals infected with HIV have the same rights and opportunities as other individuals. While some employers prefer a policy specific to HIV/AIDS and its unique issues, others prefer a general policy concerning illnesses and disabilities. A general policy should address HIV/AIDS in the same way as other major illnesses. Use of the following statements in agency policy is encouraged:

- Use of a person’s HIV status to decide employment status, service delivery, or to deny services to HIV-infected individuals is not acceptable. Employees who believe that they have been discriminated against because of HIV or AIDS should contact the personnel office to discuss the matter, or initiate action through the agency’s grievance procedure. Other legal options may also be available.
- This policy is consistent with current information from public health authorities, such as the CDC of the U.S. Public Health Service, and with state and federal laws and regulations.

While the approach and resolution of each employee’s situation may vary, similar issues may arise. A workplace policy should address the following issues about HIV/AIDS and other life-threatening illnesses or disabilities:

- **Discrimination.** The Americans with Disabilities Act of 1990 prohibits discrimination against people with disabilities, which includes HIV and AIDS, in employment, public accommodations, public transportation, and other situations. A specific policy statement that no one will be denied employment or employment opportunities because of a disability, satisfies the employer and employee’s need to address discrimination. Such a statement might be, “This agency complies with the Americans with Disabilities Act protections of all people with disabilities against discrimination in job application procedures, hiring, promotions, discharge, compensation, job training, and other terms or conditions of employment.” Managers may want to define ways in which they will deal with discriminatory actions.

- **Desire and Ability to Work.** A workplace policy should address the infected employee’s desire and need to work and the infected employee’s value to the workplace. Such a statement reassures employees that the employer supports them. The health status of someone with HIV may vary from healthy to critically ill. In the work setting, the ultimate concern is whether or not the employee can satisfy job expectations. A policy statement may say, for example, “Procedures may be adapted to provide reasonable accommodation so that
people with disabilities may remain employed and productive for as long as possible. All employees, however, are expected to perform the essential functions of their job with or without reasonable accommodation.”

- **Performance Standards.** The *Americans with Disabilities Act* provides protections for disabled persons *qualified* to perform their jobs. And although an employer may be expected to provide reasonable accommodation to a disabled employee or applicant; employers may terminate employees and refuse to hire individuals who cannot perform the essential functions of the job, with or without the reasonable accommodation.

One suggested statement is, “While the *Americans with Disabilities Act* does protect disabled employees from employment discrimination, all employees, those with and without disabilities, have the same performance and conduct standards regarding hiring, promotion, transfer, and dismissal.”

- **Reasonable Accommodation.** The *Americans with Disabilities Act* requires employers to provide reasonable accommodations for employees with disabilities. Employers do not have an obligation to provide any accommodation that imposes an undue hardship on the employer. Specific questions about the issue of reasonable accommodation and undue hardship should be directed to staff responsible for coordinating the requirements of the *Americans with Disabilities Act*. Such a policy statement might read, “The following options may be considered for people with HIV/AIDS: possible assignment or reassignment of job duties, working at home, leaves of absence, and flexible work schedules.”

- **Confidentiality and Privacy.** Organizations that receive funds from a state agency for residential or direct client services or programs shall develop and use confidentiality guidelines to protect their clients’ HIV/AIDS-related medical information (HSC §85.115, “Confidentiality Guidelines”). Organizations that fail to adopt and use confidentiality guidelines are ineligible to receive state funds. Employees are not required to reveal their HIV status to employers. All medical information that an HIV-infected employee provides to medical or management personnel is confidential and private. Employers may not reveal this information without the employee’s knowledge and written consent, except as provided by law (HSC §81.103, “Confidentiality; Criminal Penalty”).

A suggested policy statement might be, “This agency will protect the confidentiality of employee medical records and information. Written consent of the employee must be obtained to share any confidential information with other staff. Those with access to confidential information must maintain strict confidentiality and privacy, separating this information from employees’ personnel records. Individuals who fail to protect these employee rights commit a serious offense, which may be cause for litigation resulting in both civil and criminal penalties, and may result in dismissal.”

- **Coworker Concerns.** Employers need to be aware of the concerns that coworkers may have about an HIV-infected coworker. A policy statement that acknowledges employee concerns and offers HIV/AIDS education helps to increase awareness and decrease fear. Equally important is a policy statement that clarifies the limits of an employer’s response to coworker concerns, e.g., “Employees do not have the right to refuse to work with someone who has any disability.”

- **Employee Education.** Any health-care facility licensed by DSHS or DADS must require its employees to complete an educational course about HIV infection (HSC §85.010). A suggested policy statement may be: “All employees will receive education about methods of transmission and prevention of HIV infection and related conditions.” In response to HSC, §85.004, “Educational Programs,” DSHS developed model education program guidelines. These are available from DSHS, HIV/STD Comprehensive Services Branch, 1100 W. 49th St., Austin, TX. 78756-3199, 1-512-533-3000. Employers may also find the CDC’s educational kit, *Business Responds to AIDS*, useful in developing educational courses. HIV/AIDS education should address employee concerns about HIV communicability to themselves, their families, and coworkers. Experience shows that educated coworkers usually respond to persons with HIV/AIDS with support, rather than with fear and ostracism due to misconceptions.
Education programs must stress that agency employees who provide direct client services may face occupational exposure to a client’s blood, semen, vaginal secretions, or other body fluids that are considered to be high-risk for transmission of blood born pathogens, including HIV/AIDS. All individuals receiving direct services are clients and include individuals who are physically or mentally impaired and individuals confined to correctional or residential facilities. All state agencies should have, as part of their employee education program, comprehensive policies and protocols based on universal precautions, body substance isolation, and barrier methods. These precautions prevent the spread of infection in clinical settings. The employer’s careful planning will reflect a commitment to the health and well-being of the work force and the community being served.

**Assistance.** Some employers have designated benefits programs available to employees and family members with HIV infection. Such programs may:

- Make referrals for testing, counseling, medical, and psychosocial services.
- Provide HIV/AIDS workplace training for managerial staff.
- Serve as a liaison between management and the employer’s clinical and occupational health programs.
- Provide counseling for employees who irrationally fear coworkers or clients.

Employers who have no employee assistance program may consider working with other organizations that provide assistance. Some of these groups include local health departments, AIDS services organizations, American Red Cross chapters, community support groups, clinical treatment and counseling services, and the religious community.

A suggested policy statement might be: “An employee who wants assistance concerning a disability or a life-threatening illness should contact the Personnel Office. This agency offers the following resources to help employees and managers deal with these issues: education and information concerning HIV/AIDS; confidential referral to supportive services for employees and dependents affected by life-threatening illnesses; and benefits consultation to help employees effectively manage health, leave, and other benefits.”

### C.2.6 Where to Go for Help

Employees may call 2-1-1 for HIV/STD testing locations in Texas. For questions related to issues such as transmission, signs and symptoms, or other concerns about HIV or other sexually transmitted infections, employees may call 1-800-CDC-INFO (English/Español) or 1-888-232-6348 (TTY).

### C.2.7 State Agencies Listed Under Health and Safety Code (HSC) §85.113

HSC §85.113, “Workplace Guidelines for State Contractors” states “An entity that contracts with or is funded by… to operate a program involving direct client contact shall adopt and implement workplace guidelines similar to the guidelines adopted by the agency that funds or contracts with the entity.” H.B. 2292, 78th Leg., abolished 10 of the 12 existing health and human services agencies and transferred their powers and duties to three new state agencies and to HHSC, which rendered the state agency list found in HSC §85.113 obsolete. The list below reflects the state agency consolidation brought about by H.B. 2292 and identifies the state agencies to which HSC §85.113 applies.

- DADS
- Department of Assistive and Rehabilitative Services (DARS)
- DSHS
- Health and Human Services Commission (HHSC)
- Texas Department of Criminal Justice
- Texas Juvenile Probation Commission
- Texas Youth Commission
C.2.8 Routine HIV Testing Procedure Code

APPENDIX D: MEDICAL TRANSPORTATION

D.1 Medical Transportation Program .................................................. D-2
D.2 MTP Eligibility ........................................................................... D-2
D.3 Program Services ....................................................................... D-2
D.4 Program Requirements ................................................................. D-2
   D.4.1 Verification of Service ............................................................. D-2
   D.4.2 Form H3113, Health Care Provider Statement of Medical Need .......... D-3
D.5 Contacting MTP ......................................................................... D-3
D.6 MTP Program Limitations ............................................................. D-3
D.1 Medical Transportation Program
The Medical Transportation Program (MTP) is funded with federal and state dollars to arrange nonemergency transportation to medical or dental appointments for eligible clients and their attendants. When eligible clients and their attendants have no other means of transportation, HHSC MTP arranges the most cost-effective mode of transportation that meet the client’s needs.

D.2 MTP Eligibility
Texas Medicaid and Children with Special Health Care Needs (CSHCN) Services Program clients and their attendants are eligible to receive MTP services. To be eligible for MTP services, clients must have no other means of transportation.

Medicaid clients (20 years of age and younger) and CSHCN Services Program clients are eligible to receive funds for travel-related expenses in advance of a scheduled health-care service. For example, if a health-care service requires an eligible client to remain overnight, MTP may advance funds for meals and lodging for the eligible client and attendant. CSHCN clients who are 21 years of age and older and diagnosed with cystic fibrosis may also qualify for these services.

D.3 Program Services
MTP provides for the following general services:

- Mass transit (intercity and intracity)—Passes or tickets for client transport within a city and from city to city. Air travel is also an allowable service.
- Demand response transportation—Common carriers such as taxi, wheelchair van, and other transportation according to contractual requirements.
- Mileage reimbursement (through the individual transportation provider)—Mileage reimbursement for enrolled provider. The enrolled individual transportation provider can be the responsible party, family member, friend, neighbor, or client.
- Meals—Contracted vendors (e.g., hospital cafeteria.)
- Lodging—Contracted hotels and motels.
- Advanced funds—Financial services contractor.
- Attendant—Responsible party, parent/guardian, etc. who accompanies the client to a health-care service.

D.4 Program Requirements
D.4.1 Verification of Service
Medicaid federal regulations require that MTP verify that eligible clients are transported to an enrolled Medicaid provider for the purpose of receiving a covered Medicaid service. To continue to receive transportation services, Medicaid clients request their health-care providers to sign verification of receipt of services forms or to provide a statement on an official letterhead attesting that the client received services on a specific date of service.

It is the responsibility of the client to request verification of services. To verify transportation services, clients must submit the following forms for signature:

- Form H3103, Individual Transportation Provider Service Record
- Form H3111, Verification of Travel to Healthcare Service by Mass Transit
- Form H3131, Authorization and Request for Advance Funds—Travel
The Medicaid-enrolled health-care provider must complete and sign these forms upon the client’s request. The health-care provider’s signature attests to the accuracy and authenticity of the information included on the form or in the statement.

**D.4.2 Form H3113, Health Care Provider Statement of Medical Need**

In some cases, the client’s attending provider is asked to complete Form H3113, Health Care Provider Statement of Need. Form H3113 is required to determine appropriate mode of transportation, the need for special accommodation (e.g., attendant), or the necessity for long distance travel to a provider outside of the client’s residential transportation area.

Medicaid health-care providers completing Form H3113 must complete the form based on the client’s medical need, not the client’s preferences.

**D.5 Contacting MTP**

If health-care providers have MTP-eligible patients who express difficulty accessing health-care services, the clients or their advocates must be advised to call the statewide MTP toll-free number (1-877-633-8747) to request transportation services. For routine medical transportation requests, clients or their advocates must call the MTP office at least two business days before the scheduled appointment. For special medical transportation requests, clients or their advocates must call the MTP office at least five business days before the scheduled appointment. The client must provide the following information to the intake operator at the time of the call:

- Medicaid number, CSHCN number, or Social Security number (SSN)
- Name and address
- Telephone number, if available
- Name, address, and telephone number of the health-care provider
- Purpose of the trip
- Affirmation that no other means of transportation is available
- Special needs, wheelchair lift, or attendant need

**D.6 MTP Program Limitations**

Clients and their attendants are not eligible to receive medical transportation services under the following circumstances (this list is not all-inclusive):

- Transportation for children who are 17 years of age and younger and not accompanied by a parent or legal guardian, unless one of the following conditions exists:
  - Emergency transportation or nonemergency ambulance services
  - Transportation to or from a day activity health services facility, personal care home, state institution, nursing facility (unless the client requires dialysis treatment), or a facility participating in another Title XIX Program for which the reimbursement rate structure includes transportation funds

- Transportation when the client or another person or entity providing care for the client receives direct payment from workers' compensation benefits, U.S. Department of Veterans Affairs benefits, or other third party resources for transportation to health-care services on the client’s behalf
- Transportation when the client is an inpatient in a health-care facility
- Transportation of deceased clients
- Transportation passenger assistance beyond that which is necessary to ensure that clients enter and exit vehicles safely
Refer to: Title 1, Part 15, Chapter 380 of the Texas Administrative Code (TAC) for more information.

Index .................................................................................. AM-31

Note: A comprehensive Index, including Volume 1 and all handbooks from Volume 2, is included at the end of Volume 1 (General Information).
1. GENERAL INFORMATION

The information in this handbook is intended for Texas Medicaid ambulance providers. The handbook provides information about Texas Medicaid’s benefits, policies, and procedures applicable to emergency and nonemergency ambulance transports.

**Important:** All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1617(a)(6)(A). Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.

**Refer to:** Section 1: Provider Enrollment and Responsibilities (Vol. 1, General Information) for more information about enrollment procedures. Section 8: Managed Care (Vol. 1, General Information).

2. AMBULANCE SERVICES

2.1 Enrollment

To enroll in Texas Medicaid, ambulance providers must operate according to the laws, regulations, and guidelines governing ambulance services under Medicare Part B; equip and operate under the appropriate rules, licensing, and regulations of the state in which they operate; acquire a license from the Texas Department of State Health Services (DSHS) approving equipment and training levels of the crew; and enroll in Medicare.

A hospital-operated ambulance provider must be enrolled as an ambulance provider and submit claims using the ambulance provider identifier, not the hospital provider identifier.

**Refer to:** Subsection 2.4.3, “Medicare and Medicaid Coverage” in this handbook.

**Note:** Air ambulance providers are not required to enroll with Medicare.

**Reminder:** When ambulance providers enroll in Texas Medicaid, they accept Medicaid payment as payment in full. They cannot bill clients for Texas Medicaid-covered benefits.

2.1.1 Subscription Plans

The Texas Insurance Code does not apply to ambulance providers who finance, in part or in whole, an ambulance service by subscription plan. DSHS’s license requirements do not permit providers of membership or subscription programs to enroll Medicaid clients. Emergency Medical Services (EMS) Subscription Programs are regulated by the DSHS-EMS Compliance Group. An EMS provider must have specific approval to operate a subscription program.

For more information, providers should contact the DSHS Office of EMS/Trauma Systems Coordination at 1-512-834-6700. A list of EMS office and contact information is available at www.dshs.state.tx.us/emstraumasystems/about.shtm.
2.2 Services/Benefits, Limitations, and Prior Authorization

Texas Medicaid reimburses for nonemergency and emergency transports.

Cardiopulmonary resuscitation (CPR) is included in ambulance transport when needed and is not a separately billable service. Claims during transport for CPR will be denied. If CPR is performed during a nonemergency transport, the advanced life support (ALS) procedure code must be billed.

Reimbursement for disposable supplies is separate from the established global fee for ambulance transports and is limited to one billable code per trip.

Medical necessity and coverage of ambulance services are not based solely on the presence of a specific diagnosis. Medicaid payment for ambulance transportation may be made only for those clients whose condition at the time of transport is such that ambulance transportation is medically necessary. For example, it is insufficient that a client merely has a diagnosis such as pneumonia, stroke, or fracture to justify ambulance transportation. In each of those instances, the condition of the client must be such that transportation by any other means is medically contraindicated. In the case of ambulance transportation, the condition necessitating transportation is often an accident or injury that has occurred giving rise to a clinical suspicion that a specific condition exists (for instance, fractures may be strongly suspected based on clinical examination and history of a specific injury).

It is the provider’s responsibility to supply the contractor with information describing the condition of the client that necessitated ambulance transportation. Medicaid recognizes the limitations of ambulance personnel establishing a diagnosis and recognizes, therefore, that diagnosis coding of a client’s condition using International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM) codes when reporting ambulance services may be less specific than for services reported by other professional providers. Providers who submit ICD-9-CM diagnosis codes must choose the code that best describes the client’s condition at the time of transport. As a reminder to providers of ambulance services, “rule out” or “suspected” diagnoses must not be reported using specific ICD-9-CM codes. In such instances where a diagnosis is not confirmed, it is correct to use a symptom, finding, or injury code.

The ambulance provider may be sanctioned, including exclusion from the Medicaid Title XIX programs, for completing or signing a claim form that includes false or misleading representations of the client’s condition or the medical necessity of the transport.

2.2.1 Emergency Ambulance Transport Services

An emergency ambulance transport service is a benefit when the client has an emergency medical condition. An emergency medical condition is defined, according to 1 TAC §354.1111, as a medical condition (including emergency labor and delivery) manifesting itself by acute symptoms of sufficient severity (including severe pain, psychiatric disturbances, or symptoms of substance abuse) such that a prudent layperson with an average knowledge of health and medicine, could reasonably expect the absence of immediate medical attention to result in one of the following:

- Placing the client’s health (or, with respect to a pregnant woman, the health of the woman or her unborn child) in serious jeopardy
- Serious impairment to bodily functions
- Serious dysfunction of any bodily organ or part

Facility-to-facility transport may be considered an emergency if emergency treatment is not available at the first facility and the client still requires emergency care. The transport must be to an appropriate facility, meaning the nearest medical facility equipped in terms of equipment, personnel, and the capacity to provide medical care for the illness or injury of the client involved.

Transports to out-of-locality providers (one-way transfers of 50 or more miles from the point of pickup to the point of destination) are covered if a local facility is not adequately equipped to treat the condition. Transports may be cut back to the closest appropriate facility.
2.2.1.1 Prior Authorization for Emergency Out-of-State Transport

All emergency out-of-state (air, ground, or specialized vehicle) transports require authorization before the transport is considered for payment.

Prior authorization for emergency transport is required for out-of-state providers with the exception of those providers located within 200 miles of the Texas border.

Refer to: Subsection 2.5, “Out-of-State Medicaid Providers” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for additional information on providers who are not considered out-of-state providers.

To initiate the prior authorization process, providers must call 1-800-540-0694.

TMHP is responsible for processing prior authorization requests for all Medicaid clients, Primary Care Case Management (PCCM) clients, and all State of Texas Access Reform (STAR)+PLUS Medicaid Qualified Medicare Beneficiaries (MQMBs).

2.2.2 Nonemergency Ambulance Transport Services

According to 1 TAC §354.1111, nonemergency transport is defined as ambulance transport provided by an ambulance provider for a Medicaid client to or from a scheduled medical appointment, to or from a licensed facility for treatment, or to the client’s home after discharge from a hospital when the client has a medical condition such that the use of an ambulance is the only appropriate means of transportation (i.e., alternate means of transportation are medically contraindicated).

According to Human Resource Code (HRC) §32.024 (t), a Medicaid-enrolled physician, nursing facility, health-care provider, or other responsible party is required to obtain authorization before an ambulance is used to transport a client in circumstances not involving an emergency.

Refer to: Appendix D: Medical Transportation (Vol. 1, General Information) for more information about the Medical Transportation Program.

2.2.2.1 Nonemergency Ambulance Transport Prior Authorization

Facilities and other providers must request and obtain prior authorization before contacting the ambulance provider for nonemergency ambulance services. HRC states that a provider of nonemergency ambulance transport may be entitled to payment from the nursing facility, health-care provider, or other responsible party that requested the service if payment under the Medical Assistance Program is denied because of lack of prior authorization and the ambulance provider submits a copy of the bill for which payment was denied.

TMHP responds to nonemergency transport prior authorization requests within two business days of receipt of the request. It is recommended that all requests for a prior authorization number (PAN) be submitted in sufficient time to allow TMHP to issue the PAN before the date of the requested transport. If the client’s medical condition is not appropriate for transport by ambulance, nonemergency ambulance services are not a benefit. Prior authorization is a condition for reimbursement but is not a guarantee of payment. The client and provider must meet all of the Medicaid requirements, such as client eligibility and claim filing deadlines.

These prior authorization requirements also apply to Medicaid providers who participate in PCCM. Medicaid providers who participate in one of the Medicaid Managed Care Health Maintenance Organization (HMO) plans must follow its requirements.

The TMHP Ambulance Unit reviews the prior authorization request to determine whether the client’s medical condition is appropriate for transport by ambulance. Incomplete information may cause the request to be denied.
The following information assists TMHP in determining the appropriateness of the transport:

- An explanation of the client’s physical condition that establishes the medical necessity for transport. The explanation must clearly state the client’s condition requiring transport by ambulance.
- The necessary equipment, treatment, or personnel to be used during the transport.
- The origination and destination points of the client’s transport.

Prior authorization is required when an extra attendant is needed for any nonemergency transport. When a client’s condition changes, such as a need for oxygen or an extra attendant for transport, the prior authorization request must be updated.

Refer to: Subsection 2.4.8, “Extra Attendant” in this handbook.

2.2.2.1.1 Prior Authorization Types, Definitions

**One-Time, Nonrepeating**

One-time, nonrepeating requests (one day) for prior authorization must be submitted on the Nonemergency Ambulance Prior Authorization Request (2 Pages) form, which can be found in this handbook. The physician’s signature is not needed for one-time, nonrepeating requests.

**Short Term**

Short-term requests (two to 60 days) for prior authorization are reserved for those clients whose transportation needs are short-term and are not anticipated to last longer than 60 days. Short-term requests must be submitted on the Nonemergency Ambulance Prior Authorization Request (2 Pages) form, which can be found in this handbook. The request must include the physician’s original signature and date signed. The signature must be current, unaltered, original, and handwritten. Computerized or stamped signatures will not be accepted. Without a signature and date, the form is considered incomplete.

**Long Term**

Long-term requests (61 to 180 days) are reserved for those clients whose transportation needs extend beyond 60 days. Long-term requests must be submitted on the Nonemergency Ambulance Prior Authorization Request (2 Pages) form, which can be found in this handbook. The request must include the physician’s original signature and date signed. The signature must be current, unaltered, original, and handwritten. Computerized or stamped signatures will not be accepted. Without a signature and date, the form is considered incomplete.

2.2.2.2 Nonemergency Prior Authorization Process

Prior authorization is required for all nonemergency ambulance transport. The special evening and weekend hours for submitting prior authorization requests by telephone ended on September 1, 2009. Providers may submit prior authorization requests on the TMHP website at www.tmhp.com or may fax the new Nonemergency Ambulance Prior Authorization Request (2 Pages) form, which can be found in this handbook, to the TMHP Ambulance Unit at 1-512-514-4205.

Medicaid providers may request prior authorization using one of the following methods:

- The client’s physician, nursing facility, intermediate care facility for persons with intellectual disabilities (ICF-MR), health-care provider, or other responsible party completes the online prior authorization request on the TMHP website at www.tmhp.com.
- Hospitals may call TMHP at 1-800-540-0694 to request prior authorization Monday through Friday, 7 a.m. to 7 p.m., Central Time. A request may be submitted up to 60 days before the date on which the nonemergency transport will occur. A request for a one-day transport may be submitted on the next business day following the transport in some circumstances; however, every attempt should be made to obtain prior authorization before the transport takes place.
Authorization requests for one day transports submitted beyond the next business day will be denied. A request for a recurring transport must be submitted before the client is transported by ambulance.

Clients requiring hospital-to-hospital and hospital-to-outpatient medical facility transports are issued a PAN for that transport only.

Refer to: Subsection 2.3.4.1, “Nonemergency Ambulance Transport Prior Authorization” in Hospital Services Handbook (Vol. 2, Provider Handbooks) for more information on nonemergency prior authorization for hospitals.

TMHP reviews all of the documentation it receives. An online prior authorization request submitted on the TMHP website at www.tmhp.com is responded to with an online approval or denial. Alternately, a letter of approval or denial is faxed to the requesting provider. The client is notified by mail if the authorization request is denied or downgraded. Reasons for denial include documentation that does not meet the criteria of a medical condition that is appropriate for transport by ambulance, or the client is not eligible for the dates of services requested. Clients may appeal prior authorization request denials by contacting TMHP Client Notification at 1-800-414-3406. Providers may not appeal prior authorization request denials.

The requesting provider must contact the transporting ambulance provider with the PAN and the dates of service that were approved.

Refer to: Subsection 5.4.1, “Prior Authorization Requests Through the TMHP Website” in Section 5, “Prior Authorization” (Vol. 1, General Information) for additional information, including mandatory documentation requirements and retention.

Providers are not required to fax medical documentation to TMHP; however, in certain circumstances, TMHP may request that the hospital fax the supporting documentation.

Incomplete online or faxed request forms are not considered a valid authorization request and are denied.

A Nonemergency Ambulance Prior Authorization Request form that is completed and signed after the service is rendered is not considered documentation and should not be sent with a claim or appeal. A nonemergency transport will be denied when a claim is submitted with a Nonemergency Ambulance Prior Authorization Request form completed and signed after the service is rendered. In addition, a Nonemergency Ambulance Prior Authorization Request form completed and signed after the service is rendered will not be accepted on appeal of the denial.

Emergency transports that use an extra attendant do not require prior authorization. Modifier ET must be billed with the extra attendant procedure code A0424.

The hospital must maintain documentation of medical necessity, including a copy of the authorization from TMHP in the client’s medical record for any item or service that requires prior authorization. The services provided must be clearly documented in the medical record with all pertinent information regarding the client’s condition to substantiate the need and medical necessity for the services.

Refer to: Subsection 2.3.4.4, “Nonemergency Prior Authorization and Retroactive Eligibility” in the Hospital Services Handbook (Vol. 2, Provider Handbooks).

2.2.2.3 Nonemergency Prior Authorization and Retroactive Eligibility

Retroactive eligibility occurs when the effective date of a client’s Medicaid coverage is before the eligibility “add date.” The date the client’s Medicaid eligibility is added to TMHP’s eligibility file is called the “add date.”

For clients with retroactive eligibility, prior authorization requests must be submitted after the client’s add date and before a claim is submitted to TMHP.
For services provided to fee-for-service Medicaid and PCCM clients during the client’s retroactive eligibility period (i.e., the period from the effective date to the add date), prior authorization must be obtained within 95 days of the client’s add date and before a claim for those services is submitted to TMHP. For services provided on or after the client’s add date, the provider must obtain prior authorization within 3 business days of the date of service.

The provider is responsible for verifying eligibility. The provider is strongly encouraged to access the Automated Inquiry System (AIS) or TMHP EDI frequently while providing services to the client. If services are discontinued before the client’s add date, the provider must still obtain prior authorization within 95 days of the add date to be able to submit claims.

If a client’s Medicaid eligibility is pending, a PAN must be requested before a nonemergency transport. Initially this request will be denied for Medicaid eligibility. When Medicaid eligibility is established, the requestor has 95 days from the date on which the eligibility was added to TMHP’s files to contact the TMHP Ambulance Unit and request that authorization be considered.

To inquire about Medicaid eligibility, providers can contact AIS at 1-800-925-9126.

**2.2.3 Oxygen**
Reimbursement for oxygen (procedure code A0422) is limited to one billable code per transport.

**2.2.4 Types of Transport**

**2.2.4.1 Multiple Client Transports**
Multiple client transports occur when more than one client with Medicaid coverage is transported simultaneously in the same vehicle. A claim for each client must be completed and must reference multiple transfers with the names and Medicaid numbers of other clients sharing the transfer in Block 19 of the CMS-1500 paper claim form. Providers must enter charges on a separate claim for each client. TMHP adjusts the payment to 80 percent of the allowable base rate for each claim and divides mileage equally among the clients who share the ambulance.

*Important:* Mileage determinations are based on the Official State Mileage Guide. All ground ambulance transports must be billed with mileage procedure code A0425.

**2.2.4.2 Air or Specialized Vehicle Transports**
Air ambulance transport services, by means of either fixed or rotary wing aircraft, and other specialized emergency medical services vehicles may be covered only if one of the following conditions exists:

- The client’s medical condition requires immediate and rapid ambulance transportation that could not have been provided by standard automotive ground ambulance.
- The point of client pick up is inaccessible by standard automotive ground vehicle.
- Great distances or other obstacles are involved in transporting the client to the nearest appropriate facility.

**2.2.4.3 Specialty Care Transport (SCT)**
SCT (procedure code A0434) is the interfacility transport of a critically injured or ill client by a ground ambulance vehicle, including the provision of medically necessary supplies and services, at a level of service beyond the scope of the emergency medical technician (EMT) or paramedic. SCT is necessary when a client’s condition requires ongoing care that must be furnished by one or more health professionals in an appropriate specialty area, for example, emergency or critical-care nursing, emergency medicine, respiratory care, cardiovascular care, or a paramedic with additional training.
2.2.4.4 Transports for Pregnancies

Transporting a pregnant woman may be covered as an emergency transfer if the client’s condition is documented as an emergency situation at the time of transfer.

Claims documenting an emergency home delivery or delivery en route are considered emergency transfers. Premature labor and early onset of delivery (less than 37 weeks gestation) may also be considered an emergency. Active labor without more documentation of an emergency situation is not payable as an emergency transport.

The first day of the client’s last menstrual period (LMP) or the estimated date of delivery (EDD) must be included in Block 14 of the CMS-1500 paper claim form and on the documentation.

If the pregnant client is transported in an ambulance for a nonemergency situation, all criteria for nonemergency prior authorization must be met.

2.2.4.5 Transports to or from State Institutions

Ambulance transports to or from a state-funded hospital for admission or following discharge are covered when nonemergency transfer criteria are met. Ambulance transfers of clients while they are inpatients of the institution are not covered. The institution is responsible for routine nonemergency transportation.

2.2.4.6 Not Medically Necessary Transports

Providers must use the GY modifier to submit claims for instances when the provider is aware no medical necessity existed. When billing for this type of transportation, ambulance providers must maintain a signed Client Acknowledgment Statement indicating that the client was aware, prior to service rendered, that the transport was not medically necessary. The Client Acknowledgment Statement is subject to retrospective review.

Refer to: Subsection 1.4.9.1, “Client Acknowledgment Statement” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).

2.2.4.7 Transports for Nursing Facility Residents

Nursing facilities are responsible for providing or arranging transportation for their residents. Arranging transportation for Medicaid clients includes obtaining prior authorizations for nonemergency ambulance transports. Ambulance providers may assist nursing facilities in obtaining prior authorizations (e.g., faxing the required documentation to TMHP). Ambulance providers, however, may not call TMHP’s Ambulance Prior Authorization Unit to request prior authorization.

Transports from a nursing facility to a hospital are covered if the client’s condition meets emergency criteria. Nonemergency transport for the purpose of required diagnostic or treatment procedures that are not available in the nursing facility (such as dialysis treatments at a freestanding facility) are also allowable only for clients whose medical condition is such that the use of an ambulance is the only appropriate means of transport (e.g., alternate means of transport are medically contraindicated).

The nursing facility is responsible for providing routine nonemergency transportation for services not provided in the nursing facility. The cost of such transportation is included in the nursing facility vendor rate. This nonemergency transport requires the nursing facility to request and obtain a PAN from the TMHP Ambulance Unit before contacting the ambulance company for the transport.

Transports of nursing facility residents for rehabilitative treatment (e.g., physical therapy) to outpatient departments or physicians’ offices for recertification examinations for nursing facility care are not reimbursable ambulance services.

Claims for services to nursing facility residents must indicate the medical diagnosis or problem requiring treatment, the medical necessity for use of an ambulance for the transport, and the type of treatment rendered at the destination (e.g., admission or X-ray).
If a client is returned by ambulance to a nursing facility following inpatient hospitalization, the acute condition requiring hospitalization must be noted on the ambulance claim form. This transport is considered for payment only if the client’s medical condition is appropriate for transport by ambulance. This nonemergency transport requires the nursing facility to request and obtain a PAN from the TMHP Ambulance Unit before contacting the ambulance company for the transport.

Ambulance providers may bill a nursing facility or client for a nonemergency ambulance transport only under the following circumstances:

- **Providers may bill the nursing facility** when the nursing facility requests the nonemergency ambulance transport without a PAN.

- **Providers may bill the client** only when the client requests transport that is not an emergency and the client does not have a medical condition such that the use of an ambulance is the only appropriate means of transport (i.e., alternate means of transport are medically contraindicated). The provider must advise the client of acceptance as a private pay patient at the time the service is provided, and the client is responsible for payment of all services. Providers are encouraged to have the client sign the **Private Pay Agreement**.

Providers may refer questions about a nursing facility’s responsibility for payment of a transport to the TMHP Contact Center at 1-800-925-9126 or TMHP provider relations representatives.

### 2.2.4.8 Emergency Transports Involving a Hospital

Hospital-to-hospital transports that meet the definition of an emergency transport do not require prior authorization.

Providers must use modifier ET and one of the facility-to-facility transfer modifiers (HH, HI, or IH) on each procedure code listed on the claim.

<table>
<thead>
<tr>
<th>Modifier</th>
<th>Transport Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>HH</td>
<td>From hospital to hospital</td>
</tr>
<tr>
<td>HI</td>
<td>From hospital to site of transfer</td>
</tr>
<tr>
<td>IH</td>
<td>From site of transfer to hospital</td>
</tr>
</tbody>
</table>

### 2.2.4.9 No Transport

Texas Medicaid does not reimburse ambulance providers for services that do not result in a transport to a facility, regardless of whether any medical care was rendered. If a client contacts an ambulance provider, but the call does not result in a transport, the provider should have the client sign an acknowledgment statement and may bill the client for services rendered.

### 2.3 Documentation Requirements

Supporting documentation must be maintained by both the ambulance provider and the requesting provider including a physician, nursing facility, health-care provider, or other responsible party.

An ambulance provider is required to maintain documentation that represents the client’s medical condition and other clinical information to substantiate medical necessity, the level of service, and the mode of transportation requested. This supporting documentation is limited to documents developed or maintained by the ambulance provider.

Physicians, nursing facilities, health-care providers, or other responsible parties are required to maintain physician orders related to requests for prior authorization of nonemergency and out-of-state ambulance services. These providers must also maintain documentation of medical necessity for the ambulance transport.
In hospital-to-hospital transports or hospital-to-outpatient medical facility transports, the TMHP Ambulance Unit considers information by telephone from the hospital. Providers are not required to fax medical documentation to TMHP; however, in certain circumstances, TMHP may request that the hospital fax the supporting documentation. Hospitals are allowed to release a client’s protected health information (PHI) to a transporting emergency medical services provider for treatment, payment, and health-care operations.

The hospital must maintain documentation of medical necessity, including a copy of the authorization from TMHP in the client’s medical record for any item or service that requires prior authorization. The services provided must be clearly documented in the medical record with all pertinent information regarding the client’s condition to substantiate the need and medical necessity for the services.

2.4 Claims Filing and Reimbursement

2.4.1 Claims Information
Emergency and nonemergency claims may be billed electronically. For electronic billers, the hospital’s provider identifier must be entered in the Facility ID field. Providers should consult their software vendor for the location of this field on the electronic claim form.

2.4.2 Reimbursement
Ground and air ambulance providers are reimbursed in accordance with 1 TAC §355.8600. Providers can refer to the Online Fee Lookup (OFL) or the applicable fee schedule on the TMHP website at www.tmhp.com.

Refer to: Subsection 2.2, “Reimbursement Methodology” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for more information about reimbursement methodologies.

Subsection 1.7, “Texas Medicaid Limitations and Exclusions” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for information on Medicaid exclusions.

2.4.2.1 Ambulance Disposable Supplies
Ambulance disposable supplies are included in the global fee for specialty care transport and must not be billed separately.

Reimbursement for basic life support (BLS) or ALS disposable supplies (procedure codes A0382 and A0398 respectively) is separate from the established fee for ALS and BLS ambulance transports and is limited to one billable procedure code per transport.

2.4.3 Medicare and Medicaid Coverage
Medicaid is the secondary payor to other health insurance sources, including Medicare. Ambulance claims for Medicaid and Medicare Part B claims must be filed with Medicare first. MQMBs are eligible for Medicaid benefits such as ambulance transports. Qualified Medicare Beneficiaries (QMBs) are not eligible for Medicaid benefits. Texas Medicaid is only required to pay for coinsurance or deductibles for QMBs. Therefore, providers should not request prior authorization for ambulance services for QMB clients.

Important: Providers must use national procedure codes when billing Texas Medicaid.

Refer to: Subsection 4.9, “Medicare and Medicaid Dual Eligibility” in Section 4, “Client Eligibility” (Vol. 1, General Information).
2.4.3.1 Medicare Services Paid

Assigned claims filed with and paid by Medicare should automatically transfer to TMHP for payment of the deductible and coinsurance liability. Providers must submit Medicare-paid claims that do not cross over to TMHP for the coinsurance and deductible. Providers must send the Medicare Remittance Advice Notice (MRAN) with the client information circled in black ink.

2.4.3.2 Medicare Services Denied

All claims denied by Medicare for administrative reasons must be appealed to Medicare before they are sent to Texas Medicaid. An assigned claim that was denied by Medicare because the client has no Part B benefits or because the transport destination is not allowed can be submitted to TMHP for consideration. Providers must send claims to TMHP on a CMS-1500 paper claim form with the ambulance provider identifier, unless they are a hospital-based provider. Hospital-based ambulance providers must send Medicare denied claims to TMHP on a CMS-1500 paper claim form with the ambulance provider identifier and a copy of the MRAN.

Note: All claims for STAR+PLUS clients with Medicare and Medicaid must follow the same requirements used for obtaining prior authorization for Medicaid-only services from TMHP. The STAR+PLUS HMO is not responsible for reimbursement of these services.

2.4.4 Ambulance Claims Coding

Providers must submit claims for emergency transport with the ET modifier on each procedure code submitted. Any procedure code submitted on the claim for emergency transport without the ET modifier will be subject to prior authorization requirements.

2.4.4.1 Place of Service Codes

The place of service (POS) for all ambulance transports is the destination. POS codes 41 and 42 (other) are national POS codes that are accepted by Texas Medicaid only for electronic claims. Paper claims must be submitted using POS 9.

2.4.4.2 Origin and Destination Codes

All claims submitted on paper or electronically must include the two-character origin and destination codes for every claim line. The origin is the first character, and the destination is the second character. The following are the origin and destination codes accepted by Texas Medicaid:

<table>
<thead>
<tr>
<th>Origin and Destination Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>D</td>
<td>Diagnostic or therapeutic site/freestanding facility (e.g., radiation therapy center) other than P or H</td>
</tr>
<tr>
<td>E</td>
<td>Residential/domiciliary/custodial facility (e.g., nonskilled facility)</td>
</tr>
<tr>
<td>G</td>
<td>Hospital-based dialysis facility (hospital or hospital-related)</td>
</tr>
<tr>
<td>H</td>
<td>Hospital (e.g., inpatient or outpatient)</td>
</tr>
<tr>
<td>I</td>
<td>Site of transfer (e.g., airport or helicopter pad) between modes of ambulance transport</td>
</tr>
<tr>
<td>J</td>
<td>Non-hospital-based dialysis facility</td>
</tr>
<tr>
<td>N</td>
<td>Skilled Nursing Facility (SNF) (swingbed is considered an SNF)</td>
</tr>
<tr>
<td>P</td>
<td>Physician’s office (includes HMO and nonhospital facility)</td>
</tr>
<tr>
<td>R</td>
<td>Residence (client’s home or any residence)</td>
</tr>
<tr>
<td>S</td>
<td>Scene of accident or acute event</td>
</tr>
<tr>
<td>X</td>
<td>Intermediate stop at physician’s office en route to the hospital (destination code only)</td>
</tr>
</tbody>
</table>
Nonemergency claims filed electronically must include the PAN in the appropriate field. For nonemergency hospital-to-hospital transfers, indicate the services required from the second facility and unavailable at the first facility in Block 19 of the CMS-1500 paper claim form. If the destination is a hospital, enter the name and address and the provider identifier of the facility in Block 32.

For nonemergency transports, ambulance providers must enter the ICD-9-CM diagnosis code to the highest level of specificity available for each diagnosis observed in Block 21 of the claim form.

Reminder: Providers must submit multiple transports for the same client on the same date of service through one claim submission. Additional claims information can be found within individual topics in this section.

Providers should consult their software vendor for the location of the field on the electronic claim form. Providers must submit ambulance services to TMHP on a CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from a vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as TMHP does not key information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (Vol. 1, General Information). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

2.4.5 Air or Specialized Vehicle Transports

Procedure codes A0430 and A0435 or A0431 and A0436 are used to bill air transport. Procedure code A0999 is used to bill for specialized vehicle transports. Transport claims may be submitted electronically with a short description of the client’s physical condition in the comment field. If the client’s condition cannot be documented, providers must file a paper claim with supporting documentation.

Refer to: Subsection 2.2.4.2, “Air or Specialized Vehicle Transports” in this handbook for more information about how to meet the specific criteria for reimbursement consideration for air or specialized transport claims.

2.4.6 Emergency Transport Billing

Emergency transport is a benefit when billed with the ET modifier and the most appropriate emergency medical condition codes. The ET modifier must be included on every claim line in the first position.

The following procedure codes are for emergency transport:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>A0382</td>
</tr>
<tr>
<td>A0433</td>
</tr>
</tbody>
</table>

*A0425 is denied if it is billed without A0429

An emergency medical condition code is required on all ambulance claims and must be listed in Box 21 of the CMS-1500 claim form.
While ICD-9-CM codes are not precluded from use on ambulance claims, they are currently not required (per the Health Insurance Portability and Accountability Act [HIPAA] of 1996) on most ambulance claims and the use of these codes generally does not trigger a payment or a denial of a claim.

</tbody>
</table>
Claims for emergency transports that are denied for not meeting the emergency criteria will be considered on appeal with additional documentation to support the emergency nature of the transport. Claims that have denied for not meeting emergency transport criteria cannot be appealed for reimbursement as a nonemergency claim.

Refer to: Subsection 2.4.1, “Claims Information” in this handbook.

### 2.4.7 Nonemergency Transport Billing

The following procedure codes are used when billing for nonemergency ambulance services:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>A0382</td>
</tr>
</tbody>
</table>

*A0425 is denied if it is billed without A0428.

### 2.4.8 Extra Attendant

The use of additional attendants must be related to extraordinary circumstances when the basic crew is unable to transport the client safely.

An extra attendant on a nonemergency transport must be prior authorized. On an emergency transport, the billing provider’s medical documentation must clearly indicate the services the attendant performs along with a rationale for the services to indicate medical necessity of the attendant.

The information supporting medical necessity must be kept in the billing provider’s medical record and is subject to retrospective review.
Situations when an extra attendant may be required beyond the basic crew include, but are not limited to:

- Necessity of additional special medical equipment or treatment en route to destination (describe what special treatment and equipment is required and why it requires an attendant).
- Client behavior that may be a danger to self or ambulance crew or that requires, or may require, restraints.
- Extreme obesity of client (provide weight and client’s functional limitations).

2.4.8.1 Emergency Transports

Emergency transports that use an extra attendant do not require prior authorization. Modifier ET must be billed with the extra attendant procedure code A0424.

The billing provider’s medical documentation must clearly indicate the services the attendant performed along with rationale for the services to indicate the medical necessity of having the attendant. The billing provider must keep the information that supports medical necessity in the client’s medical record, which will be subject to retrospective review.

When more than one client is transported at the same time in the same vehicle, the use of an extra attendant may be required when each client who is being transported requires medical attention or close monitoring.

2.4.8.2 Nonemergency Transports

Prior authorization is required when an extra attendant is needed for any nonemergency transport. When a client’s condition changes, such as a need for oxygen or an extra attendant for transport, the prior authorization request must be updated.

To receive prior authorization, the requesting provider must prove medical necessity and identify attendant services that could not be provided by the basic crew. The information supporting medical necessity must be kept in the requesting provider’s medical record and is subject to retrospective review.

Texas Medicaid does not reimburse for an extra attendant based only on an ambulance provider’s internal policy.

An extra attendant (procedure code A0424) will be denied if billed with air transports (procedure code A0430 or A0431).

2.4.9 Night Call

Texas Medicaid does not reimburse an extra charge for a night call.

2.4.10 Waiting Time

Procedure code A0420 may be billed when it is the general billing practice of local ambulance companies to charge for unusual waiting time (longer than 30 minutes). Providers must use the following procedures:

- Separate charges must be billed for all clients, Medicaid and non-Medicaid, for unusual waiting time.
- The circumstances requiring waiting time and the exact time involved must be documented in Block 24 of the CMS-1500 paper claim form.
- The amount charged for waiting time must not exceed the charge for a one-way transfer.

**Important:** Waiting time is reimbursed up to one hour.
2.4.11 Appeals

Only a denial of prior authorization may be appealed. Clients may appeal prior authorization request denials by contacting TMHP Client Notification at 1-800-414-3406. The Nonemergency Ambulance Prior Authorization Request form is not considered to be documentation after the service has been rendered.

Claims denied due to an inappropriate emergency medical condition code may be resubmitted with the appropriate emergency medical condition code.

On appeal, supporting documentation is critical for determining the client’s condition. Ambulance providers who file paper claims must include all information that supports the reason for the transport and attach a copy of the run sheet to the claim. The EMT who transported the client must sign the documentation.

Refer to: Subsection 2.3, “Documentation Requirements” in this handbook.

2.4.12 Relation of Service to Time of Death

Medicaid benefits cease at the time of the client’s death. However, if the client dies in the ambulance while en route to the destination, Texas Medicaid covers the transport. If a physician pronounces the client dead after the ambulance is called, Texas Medicaid covers the ambulance service (base rate plus mileage) to the point of pick up. Providers must indicate the date and time the client died in Block 9 of the CMS-1500 paper claim form. If a physician or coroner pronounces the client dead before the ambulance is called, the service is not covered.

Equipment and nondisposable supplies are included in the base rate. These items are not separately reimbursable and are considered part of another procedure. Therefore, equipment and supplies cannot be billed to the client.

2.5 Claims Resources

Providers may refer to the following sections or forms when filing claims:

<table>
<thead>
<tr>
<th>Resource</th>
<th>Location</th>
</tr>

The TMHP Contact Center at 1-800-925-9126 is available Monday–Friday from 7 a.m. to 7 p.m., Central Time.

3. FORMS
### Nonemergency Ambulance Prior Authorization Request

**Texas Medicaid Program**

<table>
<thead>
<tr>
<th>1.) Is an ambulance the only appropriate means of transport?</th>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.) If no, this client does not qualify for nonemergency ambulance transport.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>3.) If yes, please complete the remainder of the form.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

In order for this service to be covered, the service must be medically necessary and reasonable. Medical necessity is established when the client's medical condition is such that the use of an ambulance is the only appropriate means of transport, and other alternate means of transport are medically contraindicated. Alternate means of transport include services provided through Medicaid's Medical Transportation Program or services included in the rate for Long Term Care - Nursing Facilities.

This form is to be completed by the provider requesting nonemergency ambulance transportation. [Reference: Chapter 32.024(t) Texas Human Resources Code]

Provider Instructions for Nonemergency Ambulance Prior Authorization Request Form

All nonemergency ambulance transportation must be medically necessary. Texas Medicaid and Medicare have similar requirements for this service to qualify for reimbursement. This form is intended to accommodate both programs’ requirements. The criteria for determining medical necessity include: the client is bed-confined and other methods of transportation are contraindicated, or the client’s condition is such that transportation by ambulance is medically required. For additional information and changes to this policy and process refer to the respective program information: Texas Medicaid’s Provider Procedures Manual, bulletins and Banner Messages; and to Medicare’s manuals, newsletters and other publications.

1. Request Date—Enter the date the form is submitted.
2. Requesting Provider Information—Enter the name of the entity requesting authorization. (i.e., hospital, nursing facility, dialysis facility, physician).
3. Requesting Provider Identifiers—Enter the following information for the requesting provider (facility or physician):
   - Enter the Texas Provider Identifier (TPI) number.
   - Enter the National Provider Identifier (NPI) number. An NPI is a ten-digit number issued by the National Plan and Provider Enumeration System (NPPES).
   - Enter the primary national taxonomy code. This is a ten-digit code associated with your provider type and specialty. Taxonomy codes can be obtained from the Washington Publishing Company website at www.wpc-edi.com.
4. Ambulance Provider Identifier—Enter the TPI or NPI number of the requested ambulance provider. If the ambulance provider changes from the provider you originally requested, notify TMHP of the new provider by phone (1-800-925-9126, Option 3) or fax (1-512-514-4205).
5. Client’s Current Condition—This section must be filled out to indicate the client’s current condition and not to list all historical diagnoses. Do not submit a list of the client’s diagnoses unless the diagnoses are relevant to transport (i.e., if client has a diagnosis of hip fracture, the date the fracture was sustained must be included in documentation). It must be clear to TMHP when reviewing the request form, exactly why the client requires transport by ambulance and cannot be safely transported by any other means.
6. Isolation Precautions—Vancomycin-Resistant Enterococci (VRE) and Methicillin-Resistant Staphylococcus Aureus (MRSA) are just two examples of isolation precautions. Please indicate in the notes exactly what type of precaution is indicated.
7. Details for Checked Boxes—For each checked answer, a detailed explanation is required (i.e., if contractures is checked, please give the location and degree of contracture[s]). If a client has a decreased tolerance for sitting time, please indicate why the client has a decreased tolerance as well as the maximum length of time the client is able to sit upright. Additional documentation can be submitted with this request form if needed.
8. Request Type—Check the box for the request type. A One Time, non-repeating request is for a one day period. A Short Term request is for a period of 2-60 days when repeated transports are expected to occur; both Medicaid and Medicare permit short-term requests. A Long Term request is for a period of 61-180 days when repeated transports are expected to occur; Medicare does not permit a Long Term request. Medicaid requires a physician signature for Short Term and Long Term requests. Enter the begin and end dates of the authorization period for short and long-term requests.
9. Transport Time—This field must be filled out for all hospital discharge requests. The anticipated time of transport must be entered in order to ensure the request was initiated prior to the actual time of transport.
10. Name of Person Signing the Request—All request forms require a signature, date, and title of the person signing the form. A One Time request must be signed and dated by a physician, physician assistant (PA), nurse practitioner (NP), clinical nurse specialist (CNS), registered nurse (RN), or discharge planner with knowledge of the client’s condition. A request of a Short Term or Long Term authorization period must be signed and dated by the physician. The signature must be dated not earlier than the 60th day before the date on which the request for authorization is made.
11. Signing Provider Identifier—This field is for the TPI or NPI number of the requesting facility or provider signing the form. The signature must be dated no earlier than 60 days prior to the transport.

Note: A comprehensive Index, including Volume 1 and all handbooks from Volume 2, is included at the end of Volume 1 (General Information).
1. GENERAL INFORMATION

The information in this handbook is intended for the Case Management for the Blind Children’s Vocational Discovery and Development Program (BCVDDP), Case Management for Children and Pregnant Women (CPW), Early Childhood Intervention (ECI) Targeted Case Management services, and services provided by a licensed clinical social worker (LCSW), licensed marriage and family therapist (LMFT), licensed professional counselor (LPC), Mental Health and Mental Retardation Center (MHMR), or psychologist.

All providers are required to report suspected child abuse or neglect as outlined in subsection 1.4.1.2, “Reporting Child Abuse or Neglect” and subsection 1.4.1.5, “Training” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).

Important: All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1617(a)(6)(A). Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure to deliver, at all times, healthcare items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.

Refer to: Section 1: Provider Enrollment and Responsibilities (Vol. 1, General Information).

Subsection 8.1, “Medicaid Managed Care” in Section 8, “Managed Care” (Vol. 1, General Information).

Appendix B: Vendor Drug Program (Vol. 1, General Information) for information about outpatient prescription drugs and the Medicaid Vendor Drug Program.

2. BLIND CHILDREN’S VOCATIONAL DISCOVERY AND DEVELOPMENT PROGRAM (BCVDDP)

2.1 Overview

BCVDDP services are provided to help children who are blind and visually impaired to develop their individual potential. This program offers a wide range of services that are tailored to each child and their family’s needs and circumstances. By working directly with the entire family, this program can help children develop the concepts and skills needed to realize their full potential.

BCVDDP services include the following:

- Assisting the client in developing the confidence and competence needed to be an active part of their community
• Providing support and training to children in understanding their rights and responsibilities throughout the educational process
• Assisting family and children in the vocational discovery and development process
• Providing training in areas like food preparation, money management, recreational activities, and grooming
• Supplying information to families about additional resources

2.2 Enrollment
The Department of Assistive and Rehabilitative Services (DARS) Division for Blind Services (DBS) is the Medicaid provider of case management for clients who are 15 years of age and younger and blind or visually impaired. Providers must meet educational and work experience requirements that are commensurate with their job responsibilities and must be trained in DBS case management activities.

Refer to: Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for more information about procedures for enrolling as a Medicaid provider.

2.2.1 Medicaid Managed Care Enrollment
DARS DBS providers are not required to enroll in Medicaid managed care. All claims for service provided by DARS DBS are submitted to TMHP for all Medicaid clients, including Medicaid managed care clients.

2.3 Services, Benefits, Limitations, and Prior Authorization
Services eligible for reimbursement are limited to one contact per month, per client, regardless of the number of contacts that are made during the month. DARS DBS providers should bill procedure code G9012.

A contact is defined as “an activity performed by a case manager with the client or with another person or organization on behalf of the client to locate, coordinate, and monitor necessary services.”

2.3.1 Prior Authorization
Prior authorization is not required for BCVDDP case management services.

2.4 Documentation Requirements
All services require documentation to support the medical necessity of the service rendered, including BCVDDP services.

BCVDDP services are subject to retrospective review and recoupment if documentation does not support the service billed.

2.5 Claims Filing and Reimbursement
BCVDDP case management services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.
When completing a CMS-1500 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills or itemized statements are not accepted as claim supplements. Providers must not submit a claim when or after the client turns 16 years of age.

Any child who has a suspected or diagnosed visual impairment may be referred to BCVDDP. DARS DBS assesses the impact the visual impairment has on the child’s development and provides blindness-specific services to increase the child’s skill level in the areas of independent living, communication, mobility, social, recreational, and vocational discovery and development. For more information, visit the DARS website at www.dars.state.tx.us.

Case management services for BCVDDP are reimbursed at a fixed rate in accordance with 1 TAC §355.8381. Providers can refer to the Online Fee Lookup (OFL) or the applicable fee schedule on the TMHP website at www.tmhp.com.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

3. CASE MANAGEMENT FOR CHILDREN AND PREGNANT WOMEN (CPW)

3.1 Overview

Case management services are provided to help eligible clients get necessary medical, social, educational, and other services; encourage cost-effective health and health-related care; discourage overutilization or duplication of services; and make appropriate referrals to providers. Case managers assess a client’s need for medical, social, educational, and other services and then develop a service plan to address those needs.

3.1.1 Eligibility

To be eligible for services, a person must:

- Be eligible for Texas Medicaid.
- Be a pregnant woman who has a high-risk condition or a child (birth through 20 years of age) who has a health condition or health risk.
- Be in need of services to prevent illnesses or medical conditions, to maintain function, or to slow further deterioration.
- Want to receive case management services.

Pregnant women who have a high-risk condition are defined as women who are pregnant and have one or more high-risk medical or psychosocial conditions during pregnancy. Children with a health condition are defined as children who have a health condition or health risk or children who have or are at risk for a medical condition, illness, injury, or disability that results in the limitation of function, activities, or social roles in comparison with healthy same-age peers in the general areas of physical, cognitive, emotional, or social growth and development.
3.1.2 Referral Process
To refer a Medicaid client for CPW services, providers may do one of the following:

- Visit www.dshs.state.tx.us/caseman/default.shtm to obtain a CPW referral form and fax the completed form to the Texas Health Steps (THSteps) Special Services Unit at 1-512-533-3867.
- Call THSteps toll free at 1-877-847-8377 from 8 a.m. to 8 p.m., Central Time, Monday through Friday.
- Contact a CPW provider directly at www.dshs.state.tx.us/caseman/providerRegion.shtm. A case management provider will contact the family to offer a choice of providers and obtain information necessary to request prior authorization for case management services.

A referral for CPW services can be received from any source.

3.2 Enrollment
Enrollment for CPW providers is a two-step process.

Step 1
Potential providers must submit a Department of State Health Services (DSHS) Case Management for CPW provider application to the DSHS Health Screening and Case Management Unit.

Both registered nurses who have an associate’s, bachelor’s, or advanced degree and social workers who have a bachelor’s or advanced degree are eligible to become case managers if they are currently licensed by their respective Texas licensure boards and the license is not temporary in nature. To be eligible, case managers must also have at least two years of cumulative, paid, full-time work experience or two years of supervised full-time, educational, internship/practicum experience in the past ten years. The experience must be with pregnant women or with children who are 20 years of age and younger. The experience must include assessing psychosocial and health needs and making community referrals for these populations.

For more information about provider qualifications and enrollment, contact DSHS at 1-512-458-7111, Ext. 2168, visit the case management website at www.dshs.state.tx.us/caseman/default.shtm, or write to the following address:

Department of State Health Services
Case Management for Children and Pregnant Women (CPW)
PO Box 149347, MC 1938
Austin, TX 78714-9347

Note: Before providing services, each case manager must attend DSHS case manager training. Training is conducted by DSHS regional staff.

Step 2
Upon approval by DSHS, potential providers must enroll as a Medicaid provider for CPW and submit a copy of their DSHS approval letter. Facility providers must enroll as a CPW group, and each eligible case manager must enroll as a performing provider for the group. Federally Qualified Health Center (FQHC) facilities that provide CPW services will use their FQHC number and should not apply for an additional provider number for CPW.

Refer to: Subsection 1.1, "Provider Enrollment" in Section 1, "Provider Enrollment and Responsibilities" (Vol. 1, General Information) for more information about the procedures for enrolling as a Medicaid provider.
3.2.1 Medicaid Managed Care Enrollment

CPW providers are not required to enroll in Medicaid managed care. All claims for services provided by CPW providers are submitted to TMHP for all Medicaid clients, including Medicaid managed care clients. Medicaid managed care health plans are not responsible for reimbursing CPW program services.

3.3 Services, Benefits, Limitations, and Prior Authorization

CPW services are limited to one contact per day per client. Additional provider contacts on the same day are denied as part of another service rendered on the same day.

Procedure code G9012 is to be used for all CPW services. Modifiers are used to identify which service component is provided.

<table>

</tr>
<tr>
<td>Follow-up telephone</td>
<td>G9012 with modifier TS</td>
</tr>
</tbody>
</table>

Providers must adhere to CPW case management program rules, policies, and procedures.

Note: CPW providers are not required to file claims with other health insurance before filing with Medicaid.

Reminder: Billable services are defined in program rule 25 TAC §27.5.

CPW services are not billable when a client is an inpatient at a hospital or other treatment facility. Reimbursement will be denied for services rendered by providers who have not been approved by the DSHS Health Screening and Case Management Unit.

3.3.1 Prior Authorization

All services must be prior authorized. One comprehensive visit is approved for all eligible clients. Follow-up visits are authorized based on contributing factors. Additional visits can be requested and may be authorized based on a continuing need for services. A prior authorization number is required on all claims for CPW services.

Note: Prior authorization is a condition of reimbursement, not a guarantee of payment.

Approved case management providers may request prior authorization from DSHS by fax at 1-512-458-7574 or on the website at www.dshs.state.tx.us/caseman/subpaweb.shtm.

3.4 Technical Assistance

Providers may contact DSHS program staff as needed for assistance with program concerns. Providers should contact TMHP provider relations staff as needed for assistance with claims problems or concerns.

3.4.1 Assistance with Program Concerns

Providers who have questions, concerns, or problems with program rule, policy, or procedure may contact DSHS program staff. Contact names and numbers can be obtained from the case management website at www.dshs.state.tx.us/caseman/default.shtm, or by calling 1-512-458-7111, Ext. 2168.

Regional staff make routine contact with providers to ensure providers are delivering services as required.
3.5 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including CPW services.

CPW services are subject to retrospective review and recoupment if documentation does not support the service billed.

3.6 Claims Filing and Reimbursement

3.6.1 Claims Information

CPW services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

CPW providers are reimbursed in accordance with 1 TAC §355.8401. Providers can refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.
Subsection 2.2, “Reimbursement Methodology” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for more information about reimbursement.

4. EARLY CHILDHOOD INTERVENTION (ECI) TARGETED CASE MANAGEMENT SERVICES

4.1 Overview

ECI Targeted Case Management services are provided to Medicaid-eligible children who have been determined to be eligible for ECI services by the ECI program providers. ECI Targeted Case Management services help eligible children and their families get needed medical, social, educational, developmental, and other appropriate services. Services include a comprehensive needs assessment, development of a care plan, referral and related activities, and the coordination, monitoring, and follow-up activities that are necessary to meet the needs of the child.

The Texas ECI Program is available statewide to families of children who are birth through 35 months of age and who have disabilities or developmental delays. The state agency responsible for ECI services is DARS. DARS contracts local ECI programs to take referrals, determine clients’ eligibility for ECI, and provide services, including case management services, to ECI-eligible children.

ECI programs use evaluations and assessments to determine eligibility. Children are eligible for ECI if they are birth through 35 months of age and meet one or more of the following criteria:

- Developmental delay—A delay in the development of cognitive, motor, communication, social-emotional, or self-help skills.
• Atypical development—Patterns of development that are unusual or different from their peers, including unusual sensory-motor or language patterns, auditory impairments, and visual impairments.

• Medically diagnosed condition that has a high probability of resulting in developmental delay—Diagnoses that have a high probability of resulting in developmental delay include, but are not limited to, Down syndrome and spina bifida.

Families and professionals work together to develop an Individualized Family Service Plan (IFSP) and a Case Management Care Plan (CMCP) for appropriate services that are based on the unique needs of the child and the child’s family.

Other ECI services include physical, occupational, and speech-language therapy; vision services; audiology services; developmental services; nutrition services; psychological services; social work; family education and training; counseling; behavioral intervention; health services; transportation; and assistive technology.

4.2 Enrollment

To be a qualified provider, the provider must be contracted with the DARS ECI Program and must comply with all of the applicable federal and state laws and regulations that govern the ECI program. ECI providers are eligible to enroll as Texas Medicaid Targeted Case Management providers and to render services to children who are birth through 35 months of age and who have a disability or developmental delay, as defined by ECI criteria. After meeting the case management criteria of the Texas ECI Program, providers must request a Medicaid application from TMHP Provider Enrollment.

To participate in Texas Medicaid, an ECI provider must comply with all applicable federal, state, local laws, and regulations about the services provided. Contractors must be certified by the Texas ECI Program and must submit a copy of the current contract award from the Texas ECI Program.

Refer to: Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for more information about the procedures for enrolling as a Medicaid provider.

4.2.1 Medicaid Managed Care Enrollment

ECI Targeted Case Management providers do not need to enroll in Medicaid managed care. Providers must file all claims for ECI Targeted Case Management services to TMHP, including those for Medicaid managed care clients. Medicaid managed care health plans are not responsible for reimbursing ECI Targeted Case Management services.

4.2.2 Renal Dialysis Facilities-Method I Composite Rate

The composite rate includes all necessary equipment, supplies, and services per treatment for the client receiving dialysis whether in the home or in the facility.

4.3 Services, Benefits, Limitations, and Prior Authorization

ECI providers are reimbursed for Targeted Case Management services that are rendered to children who are:

• Birth through 35 months of age

• Eligible for Medicaid

• Have a disability or developmental delay as defined by ECI criteria

Targeted Case Management services can be billed only one time per month, per eligible child, regardless of the number of contacts during the month. Targeted Case Management services must be stated in the child’s care plan. Providers must submit claims for ECI Targeted Case Management Services using procedure code G9012. Children lose their eligibility for ECI services on their third birthday.
A contact is defined as an activity performed by the assigned service coordinator (case manager) with the client or with another person or organization on behalf of the client to locate, coordinate, and facilitate access to necessary services.

4.3.1 ECI Referral Requirement

All health-care professionals are required by federal and state regulations to refer children who are birth through 35 months of age to the Texas ECI Program within 2 business days of identifying a disability or suspected delay in development.

Referrals can be based on professional judgment or a family’s concern. A medical diagnosis or a confirmed developmental delay is not required for referrals.

To refer families for services, providers can call their local ECI program, or they can call the DARS Inquiries Line at 1-800-628-5115. For additional ECI information, providers can visit the DARS website at www.dars.state.tx.us/ecis. Persons who are deaf or hard of hearing can call the TDD/TTY Line at 1-866-581-9328.

4.3.2 Prior Authorization

Prior authorization is not required for ECI Targeted Case Management services.

4.4 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including ECI case management services.

ECI services are subject to retrospective review and recoupment if documentation does not support the service billed.

4.5 Claims Filing and Reimbursement

Claims for Targeted Case Management services that have been rendered by an ECI provider must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a CMS-1500 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills or itemized statements are not accepted as claim supplements.

ECI Targeted Case Management services are reimbursed according to a maximum allowable fee established by HHSC. See the applicable fee schedule on the TMHP website at www.tmhp.com.

Texas Medicaid reimburses covered ECI services, which are mostly provided in the child’s natural environments. Natural environments are defined as settings that individual families identify as natural or normal for their family, including the home, neighborhood, and community settings in which children without disabilities participate. ECI Targeted Case Management services may be provided in the following places of service (POS): office/facility (POS 1), home (POS 2), and other locations (POS 9). The POS for ECI Targeted Case Management is determined by the service coordinator’s location at the time the service is rendered.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (Vol. 1, General Information) to find the instructions for completing paper claims.
5. LICENSED CLINICAL SOCIAL WORKER (LCSW), LICENSED MARRIAGE AND FAMILY THERAPIST (LMFT), AND LICENSED PROFESSIONAL COUNSELOR (LPC)

5.1 Enrollment

5.1.1 LCSW
To enroll in Texas Medicaid, whether as an individual or as part of a group, an LCSW must be licensed by the Texas State Board of Social Worker Examiners. LCSWs must also be enrolled in Medicare or obtain a pediatric practice exemption from TMHP Provider Enrollment. If a pediatric-based LCSW is enrolling as part of a Medicare-enrolled group, then the LCSW must also be enrolled in Medicare. Providers that hold a temporary license are not eligible to enroll in Medicaid. LCSWs cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

5.1.2 LMFT
To enroll in Texas Medicaid, whether as an individual or as part of a group, an LMFT must be licensed by the Texas State Board of Examiners of Licensed Marriage and Family Therapists. LMFTs are covered as Medicaid-only providers; therefore, enrollment in Medicare is not a requirement. LMFTs can enroll as part of a multi-specialty group whether or not they are enrolled in Medicare. Providers that hold a temporary license are not eligible to enroll in Medicaid. LMFTs cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

5.1.3 LPC
To enroll in Texas Medicaid, whether as an individual or as part of a group, an LPC must be licensed by the Texas Board of Examiners of Professional Counselors. LPCs are covered as Medicaid-only providers; therefore, enrollment in Medicare is not a requirement. LPCs can enroll as part of a multi-specialty group whether or not they are enrolled in Medicare. Providers that hold a temporary license are not eligible to enroll in Medicaid. LPCs cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

Refer to: Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for more information about procedures for enrolling as a Medicaid provider.

Section 8: Managed Care (Vol. 1, General Information) for more information, or contact the client’s behavioral health organization (BHO).

5.2 Services, Benefits, Limitations, and Prior Authorization
Psychotherapy and counseling services that are provided by LCSWs, LMFTs, and LPCs are benefits of Texas Medicaid for clients of any age who are experiencing a significant behavioral health issue that is causing distress, dysfunction, or maladaptive functioning as a result of a confirmed or suspected psychiatric condition as defined in the American Psychiatric Association Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition, Text Revision (DSM-IV-TR).

Psychotherapy and counseling services can be provided in the office, home, skilled nursing or intermediate care facility (SNF/ICF), outpatient hospital, extended care facility (ECF), or in other locations.
LCSWs, LMFTs, and LPCs must not bill for services that were provided by people under their supervision, including services provided by students, interns, and licensed professionals. Services may only be billed to Texas Medicaid if they were provided by a licensed LCSW, LMFT, or LPC who is a Medicaid-enrolled practitioner. LCSWs, LMFTs, and LPCs who are employed by or remunerated by another provider may not bill Texas Medicaid directly for counseling services if that billing would result in a duplicate payment for the same services.

If more than one type of session is provided on the same date of service (outpatient individual, group, or family psychotherapy/counseling), each session type will be reimbursed individually. The only services that can be reimbursed are those provided to the Medicaid-eligible client per session.

Services that are provided by a psychiatric nurse, mental health worker, psychiatric assistant, or psychological assistant (excluding a Masters-level licensed psychological associate [LPA]) are not covered by Texas Medicaid and cannot be billed under the provider identifier of any other outpatient behavioral health provider.

Documentation of the face-to-face time with the client must be maintained in the client’s medical record to support the procedure code billed. All entries must be documented clearly, be legible to individuals other than the author, and be dated (month/date/year) and signed by the performing provider.

Documentation must include the following:

- The times at which the session began and ended
- All of the pertinent information about the client’s condition that is necessary to substantiate the need for services, including, but not limited to, the following:
  - A complete diagnosis, as listed in the DSM-IV-TR
  - Background, symptoms, impression
  - Narrative description of the assessment
  - Behavioral observations made during the session
  - Narrative description of the counseling session
  - Treatment plan and recommendations

All payments are subject to recoupment if the required documentation is not maintained in the client’s medical record.

Family psychotherapy and counseling is reimbursed for only one Medicaid-eligible client per session, regardless of the number of family members present during that session. When providing family counseling services, the Texas Medicaid client and a family member must be present during the face-to-face encounter or visit.

According to the definition of “family” provided by HHSC Household Determination Guidelines, only specific relatives are allowed to participate in family counseling services. These guidelines also address the roles of relatives in the supervision and care of children with Temporary Assistance for Needy Families (TANF). The following specific relatives are included in family counseling services:

- Father
- Mother
- Grandfather
- Grandmother
- Brother
- Sister
Behavioral health services are limited to a total of four hours per client, per day, regardless of the provider.

Outpatient behavioral health services are limited to 30 encounters/visits per client, per calendar year (January 1 through December 31) regardless of provider, unless prior authorized. This limitation includes encounters/visits by all practitioners. School Health and Related Services (SHARS) behavioral rehabilitation services, MHMR services, laboratory, radiology, and medication monitoring services are not counted toward the 30-encounter/visit limitation. An encounter/visit is defined as any/all behavioral health services (such as examinations, therapy, psychological or neuropsychological testing) by any provider, in the office, outpatient hospital, nursing home, or home settings. This limitation includes encounters/visits by all behavioral health practitioners.

Each individual practitioner is limited to performing a combined total of 12 hours of behavioral health services per day. Claims submitted with a prior authorization number are not exempt from the 12-hour limitation.

HHSC and TMHP routinely perform retrospective review of all providers’ billing practices. Retrospective review may include all behavioral health procedure codes included in the 12-hour system limitation.

Behavioral health services subject to the 12-hour system limitation and retrospective review will be based on the provider’s Texas Provider Identifier (TPI) base (the first 7 digits of the TPI). The location where the services occurred will not be a basis for exclusion of hours. If a provider practices at multiple locations and has a different suffix for the various locations, but has the same TPI base, all services identified for restriction to the provider 12-hour limit will be counted regardless of whether they were performed at different locations.

Refer to: Subsection 7.3, “The 12-Hour System Limitation” in this handbook for details about the 12-hours-per-day behavioral health services limitation.

LCSWs, LMFTs, and LPCs must bill therapy/counseling services with procedure code 90804, 90806, 90808, 90847, or 90853.

Note: LMFTs must use modifier U8 when billing these procedure codes.
Psychotherapy/counseling services (procedure codes 90804, 90806, 90808, 90847, and 90853) must be submitted with one of the following diagnosis codes:

5.2.1 Prior Authorization

5.2.1.1 Initial Prior Authorization Request for Encounters or Visits beyond the 30-Encounter/Visit Limit

Each Medicaid client is limited to 30 encounters/visits per calendar year. It is anticipated that this limitation, which allows for 6 months of weekly therapy or 12 months of biweekly therapy, is adequate for 75 to 80 percent of clients. Clinicians should plan therapy with this limit in mind. However, it may be medically necessary for some clients to receive extended encounters or visits. In these situations, prior authorization is required.

A provider who sees a client regularly and who anticipates that the client will require encounters or visits beyond the 30-encounter/visit limit must submit the request for prior authorization before the client's 25th encounter/visit.
It is recognized that a client may change providers in the middle of the year, and the new provider may not be able to obtain complete information on the client. In these instances, prior authorization may be made before rendering services when the request is accompanied by an explanation as to why the provider was not able to submit the prior authorization request by the client’s 25th encounter/visit.

After the 30 encounter/visit annual limitation has been met, prior authorization will be considered in increments of up to 10 additional encounters/visits per request. All requests for prior authorization of extensions beyond the 30 initial encounter/visit annual limit must be submitted on a completed Outpatient Psychotherapy/Counseling Request Form, which must include the following:

- Client name and Medicaid number, date of birth, age, and sex
- Provider name and identifier
- A complete diagnosis as listed in the DSM-IV-TR
- History of substance abuse
- Current medications
- Current living condition
- Clinical update, including specific symptoms and response to past treatment, treatment plan (measurable short term goals for the extension, specific therapeutic interventions to be used in therapy, measurable expected outcomes of therapy, length of treatment anticipated, and planned frequency of encounters/visits)
- Number, type of services requested, and the dates based on the frequency of encounters or visits that the services will be provided
- Date on which the current treatment is to begin
- Indication of court-ordered or Department of Family and Protective Services (DFPS)-directed services, when appropriate

Refer to: Form BH. 3, “Outpatient Psychotherapy/Counseling Request Form” in this handbook.

Note: All areas of the request form must be completed with the information required by the form. If additional room is needed for a particular section of the form, providers may state “see attached,” in that section and attach the additional pages to the form. The attachment must contain the specific information required in that section of the form.

A prior authorization request for initial extended encounters or visits must be submitted no sooner than 30 days before the date of service being requested, so that the most current information is provided.

Prior authorization requests will be reviewed by HHSC or its designee’s Medical Director. The number of encounters or visits that are prior authorized will depend upon the client’s symptoms and response to past treatment. If the client requires additional extensions, the provider must submit a new request for prior authorization at the end of each extension period. The additional request(s) must include the following new documentation concerning the patient’s current conditions.

5.2.1.1.1 Client Condition Requirements

The following documentation requirements indicating the client’s condition(s) must be submitted when requesting prior authorization of initial outpatient services beyond the 30-encounter or visit annual limitation:

- A description of why treatment is being sought at the present time
- A mental status examination that verifies that a diagnosis is listed in the DSM-IV-TR
- A description of any existing psychosocial or environmental problems
- A description of the current level of social and occupational or educational functioning
5.2.1.1.2 Initial Assessment Requirements
There must be a pertinent history containing the following assessment requirements:

- A chronological psychiatric, medical and substance use history with time frames of prior treatment and the outcomes of that treatment
- A social and family history
- An educational and occupational history

5.2.1.1.3 Active Treatment Plan Requirements
The treatment plan must contain the following:

- A description of the primary focus of the treatment
- Clearly defined discharge goals that indicate that treatment can be successfully accomplished
- The expected number of sessions it will take to reach the discharge goals, which must be based on the standards of practice for the client’s diagnosis
- Family therapy services are appropriately planned unless there are valid clinical contraindications

5.2.1.1.4 Discharge Plan Requirements
Discharge planning must reflect the following:

- A plan for concluding the client’s treatment based on an assessment of the client’s progress in meeting the discharge goals
- Identification of the client’s aftercare needs that includes a plan of transition

5.2.1.2 Subsequent Prior Authorization Request for Encounters/Visits after the Initial Prior Authorized Encounters

5.2.1.2.1 Client Condition Requirements
The following documentation requirements indicating the client’s condition(s) must be submitted when requesting prior authorization for subsequent encounters or visits.

All of the requirements for the initial authorized treatment sessions must be met in addition to an assessment of the client’s response to treatment, which indicates one of the following:

- The client has not achieved the discharge goal(s) necessary to conclude treatment, but the description of the client’s progress indicates that treatment can be concluded within a short period of time.
- The client’s psychiatric condition has not responded to a trial of short-term outpatient therapy and there is potential for serious regression or admission to a more intensive setting without ongoing outpatient management (requiring several months or longer of outpatient therapy).
- The client’s condition is one that includes long-standing, pervasive symptoms or patterns of maladaptive behavior.

5.2.1.2.2 Active Treatment Plan Requirements
There must be an assessment that explains why the client was unable to achieve the expected treatment objectives that were previously set. The assessment must address the following:

- Factors that interfered or are interfering with the client’s ability to make progress as expected
- The continued appropriateness of the treatment goals
- The continued appropriateness of the type of therapy being utilized
• The need for obtaining consultation
• The current diagnosis and the need for revisions or additional assessments
• The ongoing treatment plan must reflect the initial treatment plan requirements, and the additional information must include:
  • Changes in primary treatment focus or discharge goals have been identified and are consistent with the client’s current condition
  • The expected progress toward the discharge goals is described within the extended time frame
  • Appropriate adjustments have been made in the medication regimen based on the client’s therapeutic response
  • No contraindications to the use of the prescribed medications are present

5.2.1.2.3 Discharge Plan Requirements
Discharge planning must reflect the following:
• A plan for concluding the client’s treatment based on an assessment of the client’s progress in meeting the discharge goals
• An identification of the client’s aftercare needs that includes a plan of transition

5.2.1.2.4 Prior Authorization for Court-Ordered and Department of Family and Protective Services (DFPS)-Directed Services
A request for prior authorization of court-ordered or DFPS-directed services must be submitted no later than seven calendar days after the date on which the services began.

Court-ordered services for outpatient behavioral health services may be prior authorized as mandated by the court. Prior authorization requests must be accompanied by a copy of the court document signed by the judge. If the requested services differ from or go beyond the court order, the additional services will be reviewed for medical necessity.

Specific DFPS-directed services for outpatient behavioral health services may be prior authorized as directed. Prior authorization requests must be accompanied by a copy of the directive or summary signed by the DFPS employee. If the requested services differ from or go beyond the DFPS direction, the additional services will be reviewed for medical necessity.

Court-ordered or DFPS-directed services will be prior authorized with modifier H9.

Mail or fax prior authorization request to:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax: 1-512-514-4213

Providers can submit requests for extended outpatient psychotherapy or counseling through the TMHP website at www.tmhp.com.

Refer to: Subsection 5.4.1, “Prior Authorization Requests Through the TMHP Website” in Section 5, “Prior Authorization” (Vol. 1, General Information) for additional information, including mandatory documentation and retention requirements.

5.3 Documentation Requirements
All services require documentation to support the medical necessity of the service rendered, including behavioral health services.
Behavioral health services are subject to retrospective review and recoupment if documentation does not support the service billed.

5.4 Claims Filing and Reimbursement
Providers must bill Medicare before Medicaid when clients are eligible for services under both programs. Medicaid's responsibility for the coinsurance or deductible is determined in accordance with Medicaid benefits and limitations. Providers must check the client's Medicare card for Part B coverage before billing Medicaid. When Medicare is primary, it is inappropriate to bill Medicaid without first billing Medicare. Medicaid is responsible for the coinsurance and deductible of Medicare-allowed services on a crossover basis only.

Refer to: Subsection 2.6.2, “Part B” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information)

Subsection 4.9.2, “Medicare Part B Crossovers” in Section 4, “Client Eligibility” (Vol. 1, General Information)

LCSW, LMFT, and LPC services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a CMS-1500 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (Vol. 1, General Information). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

According to 1 TAC §355.8091, the Texas Medicaid rate for LCSWs, LMFTs, and LPCs is 70 percent of the rate paid to a psychiatrist or psychologist for a similar service per 1 TAC §355.8085. Providers can refer to the Online Fee Lookup (OFL) or the applicable fee schedule on the TMHP website at www.tmhp.com. Under 1 TAC §355.8261, an FQHC is reimbursed according to its specific prospective payment system (PPS) rate per visit for LCSW services.

Refer to: Subsection 2.2, “Reimbursement Methodology” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for more information about reimbursement.

Subsection 7.3, “The 12-Hour System Limitation” in this handbook for details about the 12-hours-per-day behavioral health services limitation.

6. MENTAL HEALTH REHABILITATION, MENTAL HEALTH CASE MANAGEMENT, AND MENTAL RETARDATION SERVICE COORDINATION

6.1 Enrollment
To enroll in Texas Medicaid, MH providers must contact DSHS at 1-512-206-5810. Entities that provide services to clients who have MR must contact the Texas Department of Aging and Disability Services (DADS) at 1-512-438-3011 to be approved.
Local MR providers are eligible to enroll for MR service coordination with the approval of DADS. Local MH providers are eligible to enroll for MH rehabilitative services with the approval of DSHS.

A community mental health center (CMHC) can enroll in Texas Medicaid without the approval of DSHS, but must be enrolled in Medicare.

### 6.1.1 Medicaid Managed Care Enrollment

MR service coordination, MH case management, and MH rehabilitative services providers are not required to enroll in Medicaid managed care. Claims for MR and MH services are submitted to TMHP for all Medicaid clients including Medicaid managed care clients.

**Exception:** MH providers in the Dallas service area must join the NorthSTAR BHOs to provide services to NorthSTAR clients.

**Refer to:** Section 8: Managed Care (Vol. 1, General Information).

### 6.2 Services, Benefits, Limitations, and Prior Authorization

#### 6.2.1 Service Coordination and Case Management

Texas Medicaid provides the following service coordination and case management services:

- Service coordination for people who have MR or a related condition (adult or child) per consumer, per month. Persons who have a related condition are eligible only if they are being enrolled into the home and community based waiver (HCS); the Texas Home Living Waiver; or an intermediate care facility for persons who have mental retardation (ICF-MR) facility.

- Case management for people who have serious emotional disturbance (child, 3 to 17 years of age)

- Case management for people who have severe and persistent mental illness (adult, 18 years of age or older)

Providers must use the following procedure code and applicable modifiers for MR targeted case management:

<table>
<thead>
<tr>
<th>Service</th>
<th>Procedure Code</th>
<th>Modifier</th>
<th>Limitations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Service coordination for clients with mental retardation or related condition (adult or child)</td>
<td>G9012</td>
<td>N/A</td>
<td>Once per calendar month</td>
</tr>
</tbody>
</table>

An MR service coordination reimbursable contact is the provision of a service coordination activity by an authorized service coordinator during a face-to-face meeting with an individual who is eligible for service coordination. To bill and be paid for one unit of service coordination per month, at least one face-to-face meeting between the service coordinator and the eligible individual must occur during the month billed.

Providers must use the following procedure code and applicable modifiers for MH targeted case management:

<table>
<thead>
<tr>
<th>Service</th>
<th>Procedure Code</th>
<th>Modifier</th>
<th>Limitations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Routine mental health targeted case management (adult)</td>
<td>T1017</td>
<td>TF and HZ</td>
<td>32 units (8 hours) per calendar day for clients who are 18 years of age and older</td>
</tr>
</tbody>
</table>
An MH case management reimbursable contact is the provision of a case management activity by an authorized case manager during a face-to-face meeting with an individual who is authorized to receive that specific type of case management. A billable unit of case management is 15 continuous minutes of contact.

Service coordination and case management services are not reimbursable when they are provided to a client who is eligible for Medicaid and who receives services through the HCS waiver. These services are included in the waiver. Claims submitted to TMHP for people who receive services under the HCS waiver are identified quarterly by DADS and payments are recouped.

Texas Medicaid must not be billed for service coordination or case management services provided to people who are residents or inpatients of:

- Nursing facilities (for people not mandated by the Omnibus Budget Reconciliation Act [OBRA] of 1987).
- An ICF-MR.
- State-supported living centers.
- State MH facilities.
- Title XIX participating hospitals, including general medical hospitals.
- Private psychiatric hospitals.
- A Texas Medicaid-certified residence not already specified.
- An institution for mental diseases, such as a hospital, nursing facility, or other institution of more than 16 beds that is primarily engaged in providing the diagnosis, treatment, or care of people who have mental diseases, including medical attention, nursing care, and related services.
- A jail or public institution.

Note: A contact by the service coordinator to assist in the discharge planning of some of the above may be reimbursed, if it is provided within 180 days before discharge. Service coordination services provided to people who are on predischARGE furlough to the community from a nursing facility, intermediate care facility, or state-supported living centers may be reimbursed. Service coordination services provided to people who are on trial placement from a state MR facility to the community may be reimbursed if the person remains eligible for Texas Medicaid upon release from the facility and receives regular Texas Medicaid coverage.

Texas Medicaid must not be billed for MH case management services provided before the establishment of a diagnosis of mental illness and the authorization of services.

<table>
<thead>
<tr>
<th>Service</th>
<th>Procedure Code</th>

</tr>
<tr>
<td>Intensive case management (child and adolescent)</td>
<td>T1017</td>
<td>TG, HA, and HZ</td>
<td></td>
</tr>
</tbody>
</table>
Refer to: Subsection 8.1, “Medicaid Managed Care” in Section 8, “Managed Care” (Vol. 1, General Information) for more information or contact the client’s BHO. Do not bill TMHP for MH case management services rendered to NorthSTAR clients.

Note: For more information about billing for MH Case Management, providers should refer to 25 TAC, Part 1, Chapter 412-Subchapter I and the Mental Health Case Management Billing Guidelines available through the DSHS Mental Health and Substance Abuse Program Services Division.

6.2.2 MH Rehabilitative Services

The following rehabilitative services may be provided to individuals who satisfy the criteria of the MH priority population and who are determined to need rehabilitative services. These services may be provided to a person who has a single severe mental disorder (excluding MR, pervasive developmental disorder, or substance abuse) or a combination of severe mental disorders as defined in the DSM-IV-TR:

<table>
<thead>
<tr>
<th>Service</th>
<th>Procedure Code</th>
<th>Modifier</th>

<tr>
<td>Skills training and development, child and adolescent, with other, individual</td>
<td>H2014</td>
<td>HA and HZ</td>
<td></td>
</tr>
</tbody>
</table>
6.2.2.1 Rehabilitative Services Limitations

Texas Medicaid must not be billed for the following:

- Rehabilitative services provided:
  - Before the establishment of a diagnosis of mental illness and authorization of services.
  - Rehabilitative services provided to individuals who reside in an institution for mental diseases.
  - Rehabilitative services provided to general acute care hospital inpatients.
- Vocational services
- Educational services
- Nursing facility residents who are not mandated to need services by OBRA of 1987
- Services provided to individuals in jail or a public institution

With the exception of Crisis Intervention Services and Psychological Rehabilitation Services delivered in a crisis situation, no reimbursement is available for a combination of MH rehabilitative services delivered in excess of eight hours per individual, per day.

Refer to: 25 TAC, Part I, Chapter 419, Subchapter L and the Medicaid MH rehabilitative billing guidelines, which are available through the DSHS Mental Health and Substance Abuse Division, for more information.

6.2.2.2 Billing Units

All claims for reimbursement for rehabilitative services are based on the actual amount of time the eligible individual or primary caregiver or legal guardian of an eligible individual is engaged in face-to-face contact with a service provider. The billable units are individual, group (15 continuous minutes), and day programs (45 to 60 continuous minutes). No reimbursement is available for partial units of service.

6.2.3 Prior Authorization

Prior authorization is not required for MHMR services.

6.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including MH and MR services.

MH and MR services are subject to retrospective review and recoupment if documentation does not support the service billed.
6.4 Claims Filing and Reimbursement

MR coordination services and MH case management and rehabilitative services must be submitted to TMHP in an approved electronic claims format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply them.

When completing a CMS-1500 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

MHMR are cost reimbursed in accordance with 1 TAC §§355.743, 355.746, and 355.781. Providers can refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com.

Refer to:
- Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.
- Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (Vol. 1, General Information). Blocks that are not referenced are not required for processing by TMHP and may be left blank.
- Subsection 2.2, “Reimbursement Methodology” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for more information about reimbursement and the federal matching percentage.

7. PHYSICIAN, PSYCHOLOGIST, AND LICENSED PSYCHOLOGICAL ASSOCIATE (LPA) PROVIDERS

7.1 Enrollment

7.1.1 Physicians

To enroll in Texas Medicaid to provide medical services, physicians (doctor of medicine [MD] or doctor of osteopathy [DO]) and doctors (doctor of dental medicine [DMD], doctor of dental surgery [DDS], doctor of optometry [OD], and doctor of podiatric medicine) must be authorized by the licensing authority of their profession to practice in the state where the services are performed at the time they are provided.

Providers cannot be enrolled in Texas Medicaid if their licenses are due to expire within 30 days. A current Texas license must be submitted.

Important: The Centers for Medicare & Medicaid Services (CMS) guidelines mandate that physicians who provide durable medical equipment (DME) products such as spacers or nebulizers are required to enroll as Texas Medicaid DME providers.

All physicians except gynecologists, pediatricians, pediatric subspecialists, pediatric psychiatrists, and providers performing only Texas Health Steps (THSteps) medical or dental checkups must be enrolled in Medicare before enrolling in Medicaid. TMHP may waive the Medicare enrollment prerequisite for pediatricians or physicians whose type of practice and service may never be billed to Medicare.

7.1.2 Psychologists

To enroll in Texas Medicaid, whether as an individual or as part of a group, a psychologist must be licensed by the Texas State Board of Examiners of Psychologists (TSBEP). Psychologists must also be enrolled in Medicare or obtain a pediatric practice exemption from TMHP Provider Enrollment. If a pediatric-based psychologist is enrolling as part of a Medicare-enrolled group, then the psychologist...
must also be enrolled in Medicare. Psychologists cannot be enrolled if they have a license that is due to expire within 30 days. A current license must be submitted. Texas Medicaid accepts temporary licenses for psychologists.

Refer to: Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for more information about procedures for enrolling as a Medicaid provider.

Section 8:Managed Care (Vol. 1, General Information) for more information, or contact the client’s BHO.

7.1.3 Licensed Psychological Associate (LPA)

LPAs must be licensed by TSBEP. LPAs are expected to abide by their scope and standards of practice. Services performed by an LPA are a Medicaid-covered benefit when the following conditions are met:

- The services must be performed under the direct supervision of a licensed, Medicaid-enrolled psychologist.
- The supervising psychologist must be in the same office, building, or facility when the service is provided and must be immediately available to furnish assistance and direction.
- The LPA performing the behavioral health service must be an employee of either the licensed psychologist or the legal entity that employs the licensed psychologist.

The TSBEP requires an LPA to work under the direct supervision of a licensed psychologist and does not allow an LPA to engage in independent practice. Therefore, an LPA will not be independently enrolled in the Medicaid program and must provide services under the delegating psychologist’s provider identifier.

LPAs may perform the same outpatient behavioral health services as licensed psychologists when the licensed psychologist delegates the services and directly supervises the LPA. These services include psychiatric diagnostic interviews, psychological and neuropsychological testing, and psychotherapy/counseling (including individual, group, or family counseling.) A modifier must be used to identify whether the psychologist or the LPA performed the service.

Psychological services provided by a psychologist or LPA must be billed with a modifier. Any claim submitted without a modifier will be denied.

Modifiers to be used with procedure codes for licensed psychologist services:

<table>
<thead>
<tr>
<th>Modifier</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AH</td>
<td>Identifies services provided by a clinical psychologist</td>
</tr>
<tr>
<td>UC</td>

</tbody>
</table>

Psychological services provided by an LPA must be billed under the supervising psychologist’s Medicaid identifier or the Medicaid identifier of the legal entity employing the supervising psychologist.

Services performed by an LPA and billed with modifier UC must include the LPA license number. Any claim submitted with modifier UC indicating services provided by an LPA and billed without a license number will be denied.

Retrospective review may be performed to validate that services performed on the same client are not billed for the same time and date of service, and that modifiers billed match the provider performing the services.

Services performed by the LPA will be reduced to 70 percent of the psychologist reimbursement fee schedule rate.
7.2 Services, Benefits, Limitations, and Prior Authorization

7.2.1 Physicians
Behavioral health services, including diagnostic interviews, psychotherapy/counseling (including individual, group, or family counseling), psychological and neuropsychological testing, pharmacological regimen oversight, pharmacological management, and chemical dependency treatment in chemical dependency treatment facilities (CDTF), are benefits of Texas Medicaid when these services are provided to clients who are experiencing a significant behavioral health issue that is causing distress, dysfunction, or maladaptive functioning as a result of a confirmed or suspected psychiatric condition, as defined in the current edition of the DSM-IV-TR.

7.2.2 Psychologists and LPAs
Psychologists who are licensed by the TSBEP and enrolled as Medicaid providers and LPAs who are under the direct supervision of a psychologist are authorized to perform counseling and testing for mental illness or debility. Treatment does not include the practice of medicine.

The services provided by a licensed chemical dependency counselor (LCDC), social worker, psychiatric nurse, or mental health worker are not covered by Texas Medicaid and cannot be billed under the provider identifier of any other outpatient behavioral health provider.

Psychologists must not bill for services performed by students, interns, or licensed professionals under their supervision except for services provided by LPAs. For mental health services, only the licensed psychologist and other Medicaid enrolled provider actually performing the service may bill Texas Medicaid. The services provided by an LCSW, LPC, or LMFT are reimbursable directly to the LCSW, LPC, or LMFT.

7.3 The 12-Hour System Limitation
The following provider types are limited in the Medicaid claims processing system to reimburse for a maximum combined total of 12-hours per day, per provider system limitation for inpatient and outpatient behavioral health services:

- Clinical Nurse Specialist (CNS)
- LCSW
- LMFT
- LPC
- Nurse Practitioner (NP)
- Physician assistant (PA)
- Psychologist

Because MDs and DOs can delegate and may submit claims in excess of 12 hours per day, they are not subject to the 12-hour system limitation.

Providers who perform group therapy may possibly submit claims in excess of 12 hours in a given day due to the manner in which group therapy is billed.

Because a psychologist can delegate to multiple LPAs and may submit claims for LPA services in excess of 12 hours per day, LPAs are not subject to the 12-hour system limitation.

All providers, including MDs and DOs and each provider to whom they delegate, are subject to retrospective review as outlined below, including the following:

- MDs and DOs and each provider to whom they delegate
- LPAs performing services under the direct supervision of a psychologist.
Court-ordered services are not subject to the 12-hour system limitation per provider, per day when billed with modifier H9.

7.3.1 Retrospective Review of Behavioral Health Services Billed in Excess of 12 Hours per Day

HHSC and TMHP routinely perform retrospective review of all providers. In addition, all provider types including MDs and DOs and each provider to whom they delegate are subject to retrospective review for the total hours of services performed and billed in excess of 12 hours per day.

Retrospective review of any behavioral health provider may include:

- All behavioral health procedure codes included in the 12-hour system limitation
- All evaluation and management (E/M) procedure codes, including those listed in the E/M section of the Current Procedural Terminology (CPT), billed with a psychiatric diagnosis
- All remaining behavioral health procedure codes not included in the 12-hour system limitation such as group therapy and pharmacological management

Documentation requirements for all services billed are listed for each individual specialty in this handbook. If inappropriate payments are identified on retrospective review for any provider type, the reimbursement will be recouped.

Behavioral health services subject to the 12-hour system limitation and retrospective review will be based on the provider’s TPI base (the first seven digits of the TPI). The location where the services occurred will not be a basis for exclusion of hours. If a provider practices at multiple locations and has a different suffix for the various locations, but has the same TPI base, all services identified for restriction to the provider 12-hour limit will be counted regardless of whether they were performed at different locations.

7.3.2 Procedure Codes included in the 12-hour System Limitation

The table below lists the inpatient and outpatient behavioral health procedure codes included in the system limitation, along with the time increments the system will apply based on the billed procedure code. The time increments applied will be used to calculate the 12-hour per day system limitation.

<table>
<thead>
<tr>
<th>Procedure Code</th>

<td>11.8 hours</td>
</tr>
</tbody>
</table>

**7.3.3 Formula Applied**

For client L on the table below, 80 billed minutes are applied, but the provider only has 40 available minutes before reaching the 12-hour daily limit (720 minutes); therefore, only 40 minutes are considered for reimbursement. The 40 allowed minutes are divided into the 80 applied minutes to get an allowed unit of 0.5 for payment.

</tbody>
</table>
Reminder: The procedure codes listed above have time ranges built in, so the quantity billed should be reflected in quantities of one, versus the actual amount of time spent with the client, i.e., procedure code 90804 is for 20 to 30 minutes of time spent with the client. The provider would bill a quantity of one when submitting a claim.

If a claim is adjusted and causes additional minutes to be available to the provider for that day, the system does not automatically reprocess any previously denied or cutback claims that would now be payable. It is up to the provider to request reprocessing of the denied or cutback claims.

Claims submitted for psychological evaluation or testing performed by a qualified provider at the request of the DFPS, or by a court order, are not counted against the benefit limitations. These claims must be submitted with the following information:

- The provider must submit the claim using modifier H9 with the procedure code(s) billed.
- If psychological services are court ordered, the claim must include a copy of the court order for outpatient treatment signed by the judge, and documentation of medical necessity.
- If psychological services are directed by DFPS, the claim must include the name and telephone number of the DFPS employee who provided the direction, the reason for the DFPS request, and documentation of medical necessity.

Texas Medicaid does not cover treatment for chronic diagnoses such as mental retardation and organic brain syndrome. Psychiatric daycare is not a covered service.

Refer to: Subsection 2.2, “Reimbursement Methodology” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for more information about reimbursement methodologies.

Section 8: Managed Care (Vol. 1, General Information).

Form BH. 3, “Outpatient Psychotherapy/Counseling Request Form” in this handbook.

Section 5, “Licensed Clinical Social Worker (LCSW), Licensed Marriage and Family Therapist (LMFT), and Licensed Professional Counselor (LPC)” in this handbook.
7.4 Outpatient Behavioral Health Services

Outpatient behavioral health services performed by the following providers are benefits to clients of any age who have a diagnosis as outlined below when provided in the office, home, skilled nursing or intermediate care facility, outpatient hospital, extended care facility, or in other locations:

- CNS
- LCSW
- LPC
- LMFT
- Licensed Psychologist
- Licensed LPA under the direct supervision of a psychologist in accordance with the TSBEP
- PA
- Physicians/psychiatrist
- NP

7.4.1 Annual Encounters/Visits Limitations

Outpatient behavioral health services without prior authorization are limited to 30 encounters or visits per client, for each calendar year. An encounter or visit is defined as any outpatient behavioral health services (i.e., examination, therapy, psychological and/or neuropsychological testing) by any provider, in the office, outpatient hospital, nursing home, or home settings. This limitation includes outpatient encounters or visits by all practitioners.

Each individual encounter or visit and each hour of psychological/neuropsychological testing will count toward the 30-encounter/visit limitation even when services are performed by different providers on the same date of service.

Services exceeding 30 encounters or visits per calendar year per client must be prior authorized. Prior authorization must be obtained before providing the 25th service in a calendar year.

7.4.2 Prior Authorization Requirements after the Annual Encounter/Visit Limitations Have Been Met

All outpatient behavioral health services for all provider types approved to deliver outpatient services will require prior authorization with the exception of the following:

- CDTF services, except as outlined in this handbook
- County Indigent Health Care Program (CIHCP) services
- FQHC and rural health clinic (RHC) services
- Laboratory and radiology services
- MHMR services
- Pharmacological regimen oversight (procedure code M0064) and pharmacological management (procedure code 90862)
- SHARS behavioral health rehabilitation services
- One psychiatric diagnostic interview (procedure code 90801 or 90802) per year, per client, per provider (same provider)

Prior authorization will be considered in increments of up to 10 services per request once the annual encounter/visit limitation has been met. If the client changes providers during the year and the new provider is unable to obtain complete information about the client, prior authorization may be made
when the request is accompanied by an explanation as to why the provider was not able to submit the prior authorization request by the 25th encounter or visit and before rendering services. This information must be submitted in addition to the usual medical necessity information.

All requests for prior authorization with the exception of psychological and neuropsychological testing must include a completed Outpatient Psychotherapy/Counseling Request Form dated and signed by the performing provider with the following information:

- Client name, Medicaid number, date of birth, age, and sex
- Provider name and identifier
- A complete diagnosis as listed in the DSM-IV-TR
- History of substance abuse
- Current medications
- Current living condition
- Clinical update, including specific symptoms and responses to past treatment, treatment plan (measurable short term goals for the extension of services, specific therapeutic interventions to be used, measurable expected outcomes of therapy, anticipated length of treatment, and the planned frequency of encounters/visits)
- Number of services requested for each type of therapy and the dates based on the frequency of encounters/visits for the services to be provided
- The date on which current treatment is to begin
- An indication of court-ordered or DFPS-directed services

The Outpatient Psychotherapy/Counseling Request Form may be mailed to the TMHP Special Medical Prior Authorization Department at:

Texas Medicaid & Healthcare Partnership  
Special Medical Prior Authorization Department  
12357-B Riata Trace Parkway, Suite 150  
Austin, TX 78727

The form may also be faxed to 1-512-514-4214 or submitted online on the TMHP website at www.tmhp.com.

All of the required areas on the request form must be completed. If additional space is needed for a particular section of the form, providers may state “see attached” in that section and attach the additional pages to the form. The attachment must contain the specific information required in that section of the form.

The request must be signed and received no later than the start date listed on the request form and no earlier than 30 days prior to the start date listed on the form.

To avoid unnecessary denials, the provider must provide correct and complete information, including accurate documentation of medical necessity for the services requested. The provider must maintain documentation of medical necessity in the client’s medical record. The requesting provider may be asked for additional information to clarify or complete a request for outpatient behavioral health services.

The diagnosis code that supports medical necessity for the billed outpatient behavioral health service must be referenced on the claim.

7.5 Court-Ordered and DFPS-Directed Services

A request for prior authorization of court-ordered or DFPS-directed services must be submitted no later than seven calendar days after the date on which the services began.
If the client requires more than four hours of psychological or neuropsychological testing per day or more than eight hours of psychological or neuropsychological testing per calendar year, additional documentation is required to support the medical necessity for the additional hours. Additional psychological or neuropsychological testing hours may be considered when supported by a court-order or DFPS-direction, or as an exception on a case-by-case basis. All documentation must be maintained by the provider in the client’s record.

Court-ordered services are not subject to the five-day admission limitation or the seven-day continued stay limitation. Court-ordered services include:

- Mental health commitments
- Condition of probation (COP)

For court-ordered admissions, a copy of the doctor’s certificate and all court-ordered commitment papers signed by the judge must be submitted with the psychiatric hospital inpatient form.

Specific court-ordered services for evaluations, psychological or neuropsychological testing, or treatment may be prior authorized as mandated by the court. Prior authorization requests must be accompanied by a copy of the court document signed by the judge. If the requested services differ from or go beyond the court order, the additional services will be reviewed for medical necessity.

Specific DFPS-directed services for evaluations, psychological or neuropsychological testing, or treatment may be prior authorized as directed. Prior authorization requests must be accompanied by a copy of the directive or summary signed by the DFPS employee. If the requested services differ from the DFPS direction, the additional services will be reviewed for medical necessity. Requested services beyond those directed by DFPS are subject to medical necessity review.

Court-ordered services are not subject to the 12-hour system limitation per provider, per day when billed with modifier H9.

Retrospective review may occur for both the total hours of services performed per day and for the total hours of services billed per day.

### 7.6 Electroconvulsive Therapy (ECT)

ECT (procedure code 90870) is the induction of convulsions by the passage of an electric current through the brain. It is used in the treatment of certain psychiatric disorders. ECT treatments are limited to one per day.

ECT performed by the following providers may be provided in the office, outpatient hospital, and inpatient hospital setting:

- Physicians
- CNS
- PA
- NP

Authorization is not required for ECT services.

Psychotherapy billed in addition to ECT on the same day will be denied as part of another procedure on the same day.

Hospital subsequent care (procedure codes 99231, 99232, or 99233) billed on the same day as ECT is not separately payable. Hospital subsequent care for diagnoses unrelated to the ECT will be considered on appeal.
7.7 Family Therapy/Counseling Services

When providing family counseling services (procedure code 90847), the client and a family member must be present during the face-to-face visit.

According to the definition of family provided by the HHSC Household Determination Guidelines, only specific relatives are allowed to participate in family counseling services. The following specific relatives are included in family counseling services:

- Father
- Mother
- Grandfather
- Grandmother
- Brother
- Sister
- Uncle
- Aunt
- Nephew
- Niece
- First cousin
- First cousin once removed
- Stepfather
- Stepmother
- Stepbrother
- Stepsister
- Foster parent
- Legal guardian

Regardless of the number of family members present per outpatient session, family counseling/psychotherapy (procedure code 90847) is reimbursed for only one Medicaid-eligible client per session.

Procedure code 90847 is limited to one outpatient service per family, per day.

Psychiatric diagnostic interviews (procedure code 90801 or 90802), pharmacological regimen oversight (procedure code M0064), pharmacological management (procedure code 90862), and any E/M service will be denied as part of family outpatient psychotherapy/counseling (procedure code 90847).

7.8 Pharmacological Regimen Oversight and Pharmacological Management Services

Pharmacological regimen oversight (procedure code M0064) and pharmacological management (procedure code 90862) services are a benefit of Texas Medicaid when provided by a physician, CNS, NP, or PA and are limited to the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>29040</td>
</tr>
<tr>
<td>29182</td>
</tr>
</tbody>
</table>
The focus of a pharmacological management encounter or visit is the use of medication to treat a client’s signs and symptoms of mental illness. When the client continues to experience signs and symptoms of mental illness necessitating discussion beyond minimal outpatient psychotherapy/counseling in a given day, the focus of the service is broader and would be outpatient psychotherapy/counseling rather than pharmacological management.

Pharmacological regimen oversight and pharmacological management services do not count towards the 12-hour per day, per provider system limitation or the 30 encounter/visit annual limitation.

### 7.8.1 Indications for Pharmacological Regimen Oversight and Pharmacological Management Services

Pharmacological regimen oversight refers to a brief, face-to-face office encounter or visit for the sole purpose of evaluating, monitoring, or changing drug prescriptions or simple drug dosage adjustments and is a lesser level of drug monitoring than pharmacological management.

Pharmacological management refers to the in-depth management of psychopharmacological agents, which are medications with potentially significant side effects, and represents a very skilled aspect of client care. It is intended for use for clients who are being managed primarily by psychotropics, antidepressants, ECT, or other types of psychopharmacologic medications. Pharmacological management cannot be billed when only a brief office encounter or visit to evaluate the client’s state is provided. Pharmacological management can be provided in both the inpatient and outpatient settings.
Pharmacological management must be provided during a face-to-face encounter or visit with the client and any inpatient or outpatient psychotherapy/counseling provided during the pharmacological management encounter or visit must be less than 20 minutes.

Pharmacological management and pharmacological regimen oversight describes a physician service and cannot be provided by a nonphysician or “incident to” a physician service, with the exception of CNSs, NPs, and PAs whose scope of license in this state permits them to prescribe.

7.8.2 Prior Authorization
Pharmacological regimen oversight and pharmacological management do not require prior authorization.

7.8.3 Documentation Requirements
Documentation of medical necessity for pharmacological management must be dated (month/date/year) and signed by the performing provider and address all of the following information in the client’s medical record in legible format:

- A complete diagnosis as listed in the current edition of the DSM-IV-TR
- Medication history
- Current symptoms and problems to include presenting mental status or physical symptoms that indicate the client requires a medication adjustment
- Problems, reactions, and side effects, if any, to medications or ECT
- Description of optional minimal psychotherapeutic intervention (less than 20 minutes), if any
- Any medication modifications
- The reason(s) for medication adjustments/changes or continuation
- Desired therapeutic drug levels, if applicable
- Current laboratory values, if applicable
- Anticipated physical and behavioral outcome(s)

Documentation of medical necessity for pharmacological regimen oversight must address all of the following in the client’s medical record:

- The client is evaluated and determined to be stable, but continues to have a psychiatric diagnosis that needs close monitoring of therapeutic drug levels.
- The client requires evaluation for prescription renewal, a new psychiatric medication, or a minor medication dosage adjustment.
- Provider has documented the medication history in the client’s records with current signs and symptoms, new medication modifications with anticipated outcome(s).

The treating provider must document the medical necessity of the chosen treatment, and must list on the claim and in the client’s medical record the DSM-IV-TR diagnosis code that most accurately describes the condition of the client that necessitated the provision of pharmacological regimen oversight or pharmacological management. The DSM-IV-TR diagnosis code must be referenced on the claim. The medical record (hospital or outpatient records, reports, or progress notes) must be clear and concise, documenting the reason(s) for the pharmacological regimen oversight or pharmacological management treatment and the outcome.

7.8.4 Reimbursement
Texas Medicaid does not reimburse pharmacological regimen oversight or pharmacological management for the actual administration of medication, or for observation of the client taking an oral medication. Administration and supply of oral medication are noncovered services.
Only one pharmacological regimen oversight or pharmacological management procedure code will be reimbursed for the same date of service. If the two procedure codes are billed for the same date of service by any provider, procedure code M0064 will be denied as part of procedure code 90862.

Pharmacological regimen oversight, pharmacological management, neurobehavioral status exam (procedure code 96116), and any E/M service will be denied as part of a diagnostic interview (procedure code 90801 or 90802) when billed for the same date of service by the same provider.

E/M services include pharmacological regimen oversight and pharmacological management. Pharmacological regimen oversight or pharmacological management will be denied as part of any E/M service billed for the same date of service, by the same provider.

If the primary reason for the office encounter or visit is for inpatient or outpatient psychotherapy or counseling, then the specific inpatient or outpatient psychotherapy/counseling procedure code must be billed. Pharmacological regimen oversight or pharmacological management will be denied as part of any outpatient psychotherapy/counseling service billed for the same date of service, by the same provider. Pharmacological management will be denied as part of any inpatient psychotherapy/counseling service billed for the same date of service, by the same provider.

Pharmacological regimen oversight or pharmacological management is limited to one service per day, per client, by any provider in any setting. Pharmacological regimen oversight is limited to the office setting.

Anesthesia for ECT (procedure code 00104) will be denied as part of pharmacological management when billed on the same date of service by the same provider.

### 7.9 Psychiatric Diagnostic Interviews

Psychiatric diagnostic interviews (procedure code 90801 or 90802) are benefits of Texas Medicaid when provided by psychiatrists, psychologists, NPs, CNSs, and PAs when performed in the inpatient and outpatient setting.

Procedure codes 90801 and 90802 are limited to the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>29040 29041 29042 29043 2910 2911 2912 2913 2915 29181</td>

</tr>
</tbody>
</table>
An interactive psychiatric diagnostic interview (procedure code 90802) may be covered to the extent that it is medically necessary. Examples of medical necessity include, but are not limited to, clients whose ability to communicate is impaired by expressive or receptive language impairment from various causes, such as conductive or sensorineural hearing loss, deaf mutism, or aphasia.

A psychiatric diagnostic interview may be incorporated into an E/M service provided the required elements of the E/M service are fulfilled. An E/M procedure code may be appropriate when the level of decision making is more complex or advanced than that commonly associated with a psychiatric diagnostic interview.

Due to the nature of these encounters or visits, the general time frame for such a diagnostic interview visit is one hour. A psychiatric diagnostic interview or an interactive psychiatric diagnostic interview examination counts towards the 12-hour per day, per provider system limitation.

### 7.9.1 Prior Authorization

Psychiatric diagnostic interviews performed in the inpatient setting are not limited to once per year, but must be based on medical necessity.

Psychiatric diagnostic interviews are limited to once per client by the same provider per year and do not require prior authorization when performed in the office, home, nursing facility, outpatient hospital, or other settings. Psychiatric diagnostic interviews are limited to once per day, per client, by any provider, regardless of the number of professionals involved in the interview.

Additional psychiatric diagnostic interviews may be considered for prior authorization on a case-by-case basis when submitted with supporting documentation, including but not limited to the following:

- A court order or a DFPS directive
- If a new episode of illness occurs after a hiatus

### 7.9.2 Documentation Requirements

In addition to the inpatient and outpatient psychotherapy/counseling documentation requirements outlined in this section, supporting documentation for psychiatric diagnostic interview examinations must include:

- Reason for referral/presenting problem
- Prior history, including prior treatment
- Other pertinent medical, social, and family history
- Clinical observations and mental status examinations
- A complete diagnosis as listed in the current edition of the DSM-IV-TR
• Recommendations, including expected long term and short term benefits
• For the interactive psychiatric diagnostic interview (procedure code 90802), the medical record must indicate the adaptations utilized in the session and the rationale for employing these interactive techniques

7.9.3 Domains of a Clinical Evaluation
The following domains must be included in the evaluation documentation:

• Reason for the evaluation
• History of the present illness
• Past psychiatric history
• History of alcohol and other substance use
• General medical history
• Developmental, psychosocial, and sociocultural history
• Occupational and military history
• Legal history
• Family history of psychiatric disorder
• Mental status examination

The treating provider must document the medical necessity of the chosen treatment and list the diagnosis code that most accurately describes the condition of the client that necessitated the psychiatric diagnostic interview (procedure code 90801 or 90802) in the client's medical record. The medical record (inpatient or outpatient hospital records, reports, or progress notes) must be signed and dated by the performing provider, and must be clear and concise, documenting the reason(s) for the psychiatric diagnostic interview and the outcome.

7.9.4 Reimbursement
A psychiatric diagnostic interview will be denied as part of an interactive psychiatric diagnostic interview when billed for the same date of service by the same provider.

Psychiatric diagnostic interviews will be denied as part of another service when billed within 30 days of any consultation (procedure codes 99241, 99242, 99243, 99244, 99245, 99251, 99252, 99253, 99254, and 99255) by the same provider.

Psychiatric diagnostic interviews and pharmacological management will be denied as part of another service when billed for the same date of service by the same provider as inpatient psychotherapy (procedure code 90816, 90817, 90818, 90819, 90821, 90822, 90823, 90824, 90826, 90827, 90828, 90829, 90835, or 90857), narcosynthesis for psychiatric diagnostic and therapeutic purposes (procedure code 90865), and ECT (procedure code 90870).

Psychiatric diagnostic interviews, insight oriented behavior modifying and/or supportive psychotherapy (procedure code 90816), pharmacological management, and any E/M service will be denied as part of another service when billed for the same date of service by the same provider as individual psychotherapy 20-30 minutes with medical E/M services (procedure code 90817).

Psychiatric diagnostic interviews, insight oriented behavior modifying or supportive psychotherapy (procedure code 90816 or 90817), and pharmacological management will be denied as part of another service when billed for the same date of service by the same provider as individual psychotherapy 45 to 50 minutes (procedure code 90818).
Psychiatric diagnostic interviews, insight oriented behavior modifying or supportive psychotherapy (procedure code 90816, 90817, or 90818), pharmacological management, and any E/M service will be denied as part of another service when billed for the same date of service by the same provider as individual psychotherapy 45 to 50 minutes with medical E/M services (procedure code 90819).

Psychiatric diagnostic interviews, insight oriented behavior modifying or supportive psychotherapy (procedure code 90816, 90817, or 90818), and pharmacological management will be denied as part of another service when billed for the same date of service by the same provider as individual psychotherapy 75 to 80 minutes (procedure code 90821).

Psychiatric diagnostic interviews, insight oriented behavior modifying or supportive psychotherapy (procedure code 1-90816, 1-90817, 1-90818, or 1-90819), pharmacological management, and any E/M service will be denied as part of another service when billed for the same date of service by the same provider as individual psychotherapy 75 to 80 minutes with medical E/M services (procedure code 90822).

Psychiatric diagnostic interviews, interactive psychotherapy (procedure code 90823), pharmacological management, and any E/M service will be denied as part of another service when billed for the same date of service by the same provider as interactive psychotherapy 20 to 30 minutes with medical E/M (procedure code 90824).

Psychiatric diagnostic interviews, interactive psychotherapy (procedure code 90823 or 90824), and pharmacological management will be denied as part of another service when billed for the same date of service by the same provider as interactive psychotherapy 45 to 50 minutes (procedure code 90826).

Psychiatric diagnostic interviews, interactive psychotherapy (procedure code 90824 or 90826), pharmacological management, and any E/M service will be denied as part of another service when billed for the same date of service by the same provider as interactive psychotherapy 45 to 50 minutes with medical E/M (procedure code 90827).

Psychiatric diagnostic interviews, interactive psychotherapy (procedure code 90826), and pharmacological management will be denied as part of another service when billed for the same date of service by the same provider as interactive psychotherapy 75 to 80 minutes (procedure code 90828).

Psychiatric diagnostic interviews, interactive psychotherapy (procedure code 90828), pharmacological management, and any E/M service will be denied as part of another service when billed for the same date of service by the same provider as interactive psychotherapy 75 to 80 minutes with medical E/M (procedure code 90829).

Psychiatric diagnostic interviews, pharmacological regimen oversight, pharmacological management, and any E/M service will be denied as part of another service when billed for the same date of service by the same provider as narcosynthesis (procedure code 90865).

Pharmacological regimen oversight, pharmacological management, a neurobehavioral status exam (procedure code 96116), and any E/M service will be denied as part of a psychiatric diagnostic interview when billed for the same date of service by the same provider.

Psychiatric diagnostic interviews, pharmacological management, and any E/M service will be denied as part of group outpatient psychotherapy/counseling (procedure code 90853 or 90857).
7.10 Psychological and Neuropsychological Testing
Psychological testing (procedure code 96101) and neuropsychological testing (procedure code 96118) are covered services when provided by a psychiatrist, psychologist, or LPA under the direct supervision of the psychologist and are limited to the following diagnosis codes:

<table>

</table>

* These diagnosis codes are only payable to procedure code 96118.
Psychologists licensed by the TSBEP and enrolled as Medicaid providers are authorized to perform counseling and testing for mental illness or debility.

Psychological and neuropsychological testing are not covered benefits when provided by a CNS, NP, or PA. Each hour of psychological or neuropsychological testing counts toward the 12-hour per day, per provider system limitation.

### 7.10.1 Prior Authorization

Psychological or neuropsychological testing requires prior authorization for services rendered in any place of service except the inpatient setting under the following circumstances:

- After the 30 encounter/visit annual limitation has been met
- If more than four hours of testing per day, or more than eight hours of testing per calendar year, are medically necessary

Prior authorization must include documentation of medical necessity, and must be submitted on a Psychological/Neuropsychological Testing Request Form.

If the client requires more than four hours of testing per day, or more than eight hours of psychological or neuropsychological testing per calendar year, additional documentation is required to support the medical necessity for the additional hours. Additional testing hours may be considered as an exception on a case-by-case basis when supported by medical necessity. The number of hours prior authorized are based on the client’s medical necessity as supported by the documentation provided. All documentation must be maintained by the provider in the client’s medical record.

### 7.10.2 Documentation Requirements

The treating provider must document the medical necessity of the chosen treatment and list the DSM-IV-TR diagnosis code that most accurately describes the condition of the client that necessitated the psychological or neuropsychological testing in the client’s medical record. The medical record (inpatient or outpatient hospital records, reports, or progress notes) must be signed and dated by the performing provider, and must be clear and concise, documenting the reasons for the psychological or neuropsychological testing and the outcome.

In addition, the following documentation must be maintained by the provider in the client’s medical record:

- The Psychological/Neuropsychological Testing Request Form
- The name of the tests that were performed (e.g., Wechsler Adult Intelligence Scale–Revised [WAIS-R], Rorschach, Minnesota Multiphasic Personality Inventory [MMPI])
- How the tests were scored
- The location at which the test was performed
- The name and credentials of each of the providers who were involved in the preparation, administration and interpretation of the test
- The interpretation of the test, which must include narrative descriptions of the findings of the tests

---

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>85404</td>
</tr>
<tr>
<td>V113</td>
</tr>
<tr>
<td>V6285</td>
</tr>
</tbody>
</table>

* These diagnosis codes are only payable to procedure code 96118.
• The length of time that each provider spent in face-to-face administration, interpretation, reporting
the test, integrating the test interpretation, and writing the comprehensive report based on the
integrated data
• The treatment being administered, including how the test results affect the prescribed treatment
• Any recommendation for further testing, including an explanation that substantiates its necessity
• An explanation of any rationale or extenuating circumstance that kept the test from being
completed, including, but not limited to, situations in which the client’s condition required testing
over a two-day period and the client did not return or the client’s condition precluded the
completion of the test

7.10.3 Reimbursement
Psychological (procedure code 96101) and neuropsychological (procedure code 96118) testing is limited
to a total of four hours per day, and eight hours per client, per calendar year for any provider. Hours
billed beyond four hours per day will be denied without prior authorization. All supporting documen-
tation must be maintained by the provider in the client’s medical record.

Claims for psychological and neuropsychological testing may be reimbursed for both the face-to-face
time spent administering the test and the time spent scoring and interpreting the test.

If the administration, interpretation, and scoring of a test occurs over more than one date of service,
providers must bill the services on a single claim and must use a separate detail for each date of service.
Claims must not be submitted until the administration, interpretation, and scoring of the test has been
completed.

The correct modifier AH or UC must be appended to the procedure code to identify who rendered the
service. If both the LPA and psychologist perform services on the same date, one detail must be
submitted for each provider with each detail accurately representing the time spent by the psychologist
or LPA. Time billed for services performed on the same client must not be billed for the same time and
date of service.

Services provided by both the psychologist and LPA count toward the total four hours of testing allowed
per client, per day.

Psychological and neuropsychological testing will not be reimbursed to a CNS, NP, or a PA. Behavioral
health testing may be performed during an assessment by a CNS, NP, or a PA, but will not be reimbursed
separately. The most appropriate office encounter/visit procedure code must be billed. Behavioral health
testing performed by a CNS, NP, or a PA during an assessment will be denied as part of another service.
Psychological or neuropsychological testing may be reimbursed on the same date of service as an initial
psychiatric diagnostic interview or interactive psychiatric diagnostic interview examination.

Psychological testing performed on the same date of service as neuropsychological testing will be denied
as part of another service. All documentation must be maintained by the provider in the client’s medical
record.

Providers must bill the preponderance of each half hour of testing and indicate that number of units on
the claim form.

7.11 Psychotherapy/Counseling
Psychotherapy/counseling is the treatment for mental illness and behavioral disturbances in which the
clinician establishes a professional contract with the client and, through definitive therapeutic commu-
nication or therapeutic interactions, attempts to alleviate the emotional disturbances, reverse or change
maladaptive patterns of behavior, and encourage personality growth and development.
Psychotherapy/counseling is limited to the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>29040</td>
</tr>
<tr>
<td>29182</td>
</tr>
<tr>
<td>29285</td>

</tr>
<tr>
<td>29570</td>
</tr>
<tr>
<td>29621</td>
</tr>
<tr>
<td>29634</td>
</tr>
<tr>
<td>29650</td>
</tr>
<tr>
<td>29663</td>
</tr>
<tr>
<td>2988</td>
</tr>
<tr>
<td>30013</td>
</tr>
<tr>
<td>3004</td>
</tr>
<tr>
<td>3014</td>
</tr>
<tr>
<td>3024</td>
</tr>
<tr>
<td>30281</td>
</tr>
<tr>
<td>30420</td>
</tr>
<tr>
<td>30540</td>
</tr>
<tr>
<td>30722</td>
</tr>
<tr>
<td>30747</td>
</tr>
<tr>
<td>3077</td>
</tr>
<tr>
<td>3093</td>
</tr>
<tr>

</tr>
<tr>
<td>31400</td>
</tr>
<tr>
<td>317</td>
</tr>
<tr>
<td>79959</td>
</tr>
<tr>
<td>V6103</td>
</tr>
<tr>
<td>V6282</td>
</tr>
</tbody>
</table>

The appropriate service is chosen based on the type of inpatient or outpatient psychotherapy/counseling, the place of service, the face-to-face time spent with the client during inpatient or outpatient psychotherapy/counseling, and whether E/M services are furnished on the same date of service as inpatient or outpatient psychotherapy/counseling.

The treating provider must document the medical necessity of the chosen treatment and list the diagnosis code that most accurately describes the condition of the client that necessitated the psychotherapy/counseling in the client’s medical record. The medical record (inpatient and outpatient hospital records, reports, or progress notes) must be clear and concise, documenting the reason(s) for the psychotherapy/counseling and the outcome.

Inpatient and outpatient psychotherapy/counseling counts towards the 12-hour per day, per provider system limitation.
7.11.1 Prior Authorization

Prior authorization for inpatient psychotherapy/counseling is not required for 30 encounters/visits per calendar year.

After the annual limitation has been met, prior authorization for additional encounters or visits will be considered in increments of up to ten per request. All prior authorization requests for additional encounters/visits must include a completed Outpatient Psychotherapy/Counseling Request Form, including:

- Client name and Medicaid number, date of birth, age, and sex
- Provider name and identifier
- A complete diagnosis as listed in the current edition of the DSM-IV-TR
- History of substance abuse
- Current medications
- Current living condition
- Clinical update, including specific symptoms and response to past treatment, treatment plan (measurable short term goals, specific therapeutic interventions to be used in therapy, measurable expected outcomes of therapy, length of treatment anticipated, and planned frequency of encounters/visits)
- Number, type of services requested, and the dates based on the frequency of encounters/visits for which the services will be provided
- Date on which the current treatment is to begin
- Indication of court-ordered or DFPS-directed services

All areas of the request form must be completed with the required information. If additional space is needed for a particular section of the form, providers may state, “see attached,” in that section and attach the additional pages to the form. The attachment must contain the specific information required in that section of the form.

A request for outpatient behavioral health services must be submitted no sooner than 30 days before the date of service being requested, so that the most current information is provided.

The number of encounters or visits authorized will be dependent upon the client’s symptoms and response to past treatment. The provider must submit a new prior authorization request for each new series of required encounters/visits. The additional request(s) must include new documentation concerning the client’s current condition.

Prior authorization requests will be reviewed by HHSC or its designee’s Medical Director.

7.11.2 Documentation Requirements

Each client for whom services are provided must have supporting documentation included in their medical record. All entries must be documented clearly, be legible to individuals other than the author, and be dated (month/date/year) and signed by the performing provider. Those services not supported by the documentation in the client’s medical record are subject to recoupment. Documentation must include the following:

- Notations of the session beginning and ending times
- All pertinent information regarding the client’s condition to substantiate the need for services, including, but not limited to, the following:
  - A complete diagnosis as listed in the current edition of the DSM-IV-TR
  - Background, symptoms, impression
• Narrative description of the assessment
• Behavioral observations during the session
• Narrative description of the counseling session
• Treatment plan and recommendations

7.11.3 Initial Outpatient Psychotherapy/Counseling for an Individual, Group, or Family

Client Condition Requirements
The following documentation requirements must be submitted when requesting prior authorization for outpatient services:

- A description of why treatment is being sought at the present time
- A mental status examination, which validates a diagnosis as listed in the current edition of the DSM-IV-TR
- A description of any existing psychosocial or environmental problems
- A description of the current level of social and occupational/educational functioning

Initial Assessment Requirements
There must be a pertinent history that contains all of the following:

- A chronological psychiatric, medical and substance use history with time frames of prior treatment and the outcomes of that treatment
- A social and family history
- An educational and occupational history

Active Treatment Plan Requirements
The treatment plan must contain the following elements:

- A description of the primary focus of the treatment
- Clearly defined discharge goals that indicate treatment can be successfully accomplished
- The expected number of sessions it will take to reach the discharge goals, and standards of practice for the client’s diagnosis
- Family therapy services are appropriately planned unless there are valid clinical contraindications

When a medication regimen is planned by a psychiatrist, PA, NP, or CNS, it must meet the following:

- Guidelines specific to the medication or medications prescribed
- Accepted standard of practice for the diagnosis for which it is prescribed
- Accepted standard of practice for the age group for which it is prescribed

Discharge Plan Requirements
Discharge planning must reflect the following:

- A plan for concluding the client’s treatment based on an assessment of the client’s progress in meeting the discharge goals
- Identification of the client’s aftercare needs that includes a transition plan
7.11.4 Subsequent Outpatient Psychotherapy/Counseling for an Individual, Group or Family

Client Condition Requirements
All of the requirements for the first authorized treatment sessions must be met in addition to an assessment of the client’s response to treatment that indicates one of the following:

- The client has not achieved the discharge goal necessary to conclude treatment, but the description of the client’s progress indicates that successful treatment can be concluded within a short period of time.
- The client’s psychiatric condition has not responded to a trial of short-term outpatient therapy and there is potential for serious regression or admission to a more intensive setting without ongoing outpatient management (requiring several months or longer of outpatient therapy).
- The client’s condition is one that includes long standing, pervasive symptoms or patterns of maladaptive behavior.

7.11.4.1 Active Treatment Plan Requirements
There must be an assessment, which explains the client’s inability to achieve the treatment objectives as expected. This assessment must address the following:

- Factors that interfered or are interfering with the client’s ability to make progress as expected
- The continued appropriateness of the treatment goals
- The continued appropriateness of the type of therapy being utilized
- The need for obtaining consultation
- The current diagnosis and the need for revisions or additional assessments

The ongoing treatment plan must reflect the initial treatment plan requirements, and the following additional information must be included:

- Changes in primary treatment focus or discharge goals have been identified and are consistent with the client’s current condition
- The expected progress toward the discharge goals is described within the extended time frame
- Appropriate adjustments have been made in the medication regimen based on the client’s therapeutic response
- No contraindications to the use of the prescribed medication(s) are present

7.11.4.2 Discharge Plan Requirements
Discharge planning must reflect the following:

- A plan for concluding the client’s treatment based on an assessment of the client’s progress in meeting the discharge goals
- Identification of the client’s aftercare needs that includes a transition plan

7.11.5 Reimbursement
The following procedure codes may be submitted when billing for inpatient psychotherapy/counseling services: 90816, 90817, 90818, 90819, 90821, 90822, 90823, 90824, 90826, 90827, 90828, 90829, and 90847.

Outpatient psychotherapy/counseling is limited to no more than four hours per client, per day.
When more than one type of session is provided on the same date of service (inpatient/outpatient individual, group, or family psychotherapy/counseling) each session type will be reimbursed individually. Services are reimbursed only for the Medicaid eligible client per session.

When multiples of each type of session is billed, the most inclusive procedure code from each type of session is paid and the others are denied.

A CNS, NP, PA, or psychiatrist may bill an E/M visit if less than 20 minutes of outpatient psychotherapy/counseling is provided.

Only the CNS, LCSW, LMFT, LPC, NP, or PA actually performing the mental health service may bill Texas Medicaid. The CNS, LCSW, LMFT, LPC, NP, or PA must not bill for services performed by people under their supervision. A psychiatrist may bill for services performed by people under their supervision. A psychologist may bill for services performed by a LPA under their direct supervision.

The services of a psychiatric nurse or behavioral health worker are not covered by the Texas Medicaid program and cannot be billed under the provider identifier of any other outpatient behavioral health provider.

Interpretation and documentation time, including time to document test results in the client's medical record, is not reimbursed separately. Reimbursement is included in the covered procedure codes. Providers must bill the preponderance of each half hour of group counseling sessions and indicate that number of units on the claim form.

A psychiatric diagnostic interview, pharmacological regimen oversight, pharmacological management, or any E/M service will be denied as part of narcosynthesis (procedure code 90865).

Procedure codes 90804, 90847, 90853, and 90857 will be denied as part of narcosynthesis when billed on the same date of service by the same provider.

Psychotherapy will be denied as part of narcosynthesis when billed for the same date of service by the same provider.

7.11.6 Insight Oriented Behavior Modifying and/or Supportive Outpatient Psychotherapy/Counseling

Psychiatric diagnostic interviews, pharmacological regimen oversight, and pharmacological management will be denied as part of the following outpatient psychotherapy/counseling services when billed on the same date of service by the same provider in addition to the limitations detailed below by procedure code:

- Insight oriented outpatient psychotherapy/counseling without medical E/M services (procedure code 90804, 90806, or 90808):
  - Procedure codes 36640, 90801, 90802, 90862, and M0064 will be denied as part of procedure code 90804 (20 to 30 minutes)
  - Procedure codes 36640, 90801, 90802, 90804, 90805, 90862, and M0064 will be denied as part of procedure code 90806 (45 to 50 minutes)
  - Procedure codes 36640, 90801, 90802, 90804, 90805, 90806, 90807, 90862, and M0064 will be denied as part of procedure code 90808 (75 to 80 minutes)

- Insight oriented outpatient psychotherapy/counseling with medical E/M services (procedure code 90805, 90807, or 90809):
  - Procedure codes 36640, 90801, 90802, 90804, 90862, M0064, and any E/M service will be denied as part of procedure code 90805 (20 to 30 minutes)
  - Procedure codes 36640, 90801, 90802, 90804, 90805, 90806, M0064, and any E/M service will be denied as part of procedure code 90806 (45 to 50 minutes)
• Procedure codes 36640, 90801, 90802, 90804, 90805, 90806, 90807, 90808, 90862, M0064, and any E/M service will be denied as part of procedure code 90809 (75 to 80 minutes)

• Interactive outpatient psychotherapy/counseling without medical E/M services (procedure code 90810, 90812, or 90814):
  • Procedure codes 36640, 90801, 90802, 90862, and M0064 will be denied as part of procedure code 90810 (20 to 30 minutes)
  • Procedure codes 36640, 90801, 90802, 90804, 90805, 90862, and M0064 will be denied as part of procedure code 90812 (45 to 50 minutes)
  • Procedure codes 36640, 90801, 90802, 90812, 90862, and M0064 will be denied as part of procedure code 90814 (75 to 80 minutes)

• Interactive outpatient psychotherapy/counseling with medical E/M services (procedure code 90811, 90813, or 90815):
  • Procedure codes 36640, 90801, 90802, 90810, 90862, M0064, and any E/M service will be denied as part of procedure code 90811 (20 to 30 minutes)
  • Procedure codes 36640, 90801, 90802, 90811, 90812, 90862, M0064, and any E/M service will be denied as part of procedure code 90813 (45 to 50 minutes)
  • Procedure codes 36640, 90801, 90802, 90812, 90813, 1-90814, 90862, M0064, and any E/M service will be denied as part of procedure code 90815 (75 to 80 minutes)

7.12 Narcosynthesis
Narcosynthesis (procedure code 90865) is a benefit of Texas Medicaid when billed by a physician.

7.13 Noncovered Services
The following services are not benefits of Texas Medicaid:
  • Adult and individual activities
  • Day-care
  • Family psychotherapy without client present (procedure code 90846)
  • Hypnosis
  • Intensive outpatient program services (excluding substance use disorder [SUD] services)
  • Marriage counseling
  • Multiple family group psychotherapy (procedure code 90849)
  • Music/dance therapy
  • Psychiatric day treatment program services
  • Psychiatric services for chronic disease, such as MR
  • Psychoanalysis (procedure code 90845)
  • Recreational therapy
  • Services provided by a psychiatric nurse, mental health worker or psychiatric assistant (excluding Master’s level LPA), or licensed chemical dependency counselor (LCDC)
  • Thermogenic therapy
  • CDTF services for caffeine or nicotine withdrawal
7.14 Psychiatric Services for Hospitals

Inpatient admissions to acute care hospitals for adults and children for psychiatric conditions are a benefit of Texas Medicaid. Admissions must be medically necessary and are subject to the Texas Medicaid’s retrospective UR requirements. The UR requirements are applicable regardless of the hospital’s designation of a unit as a psychiatric unit versus a medical/surgical unit.

Clients who are 20 years of age and younger may be admitted to a freestanding psychiatric facility or a state psychiatric facility. Clients who are 21 years of age and older may be admitted only to an acute care facility. A certification of need must be completed and placed in the client’s medical record within 14 days of the admission or once the client becomes Medicaid-eligible while in the facility.

Inpatient psychiatric treatment is a benefit of Texas Medicaid if all the following apply:

- The client has a psychiatric condition that requires inpatient treatment.
- The inpatient treatment is directed by a psychiatrist.
- The inpatient treatment is provided in a nationally accredited facility or hospital.
- The provider is enrolled in Texas Medicaid.

Inpatient admissions for the single diagnosis of chemical dependency or abuse (such as alcohol, opioids, barbiturates, and amphetamines) without an accompanying medical complication are not benefits of Texas Medicaid. Additionally, admissions for chronic diagnoses such as mental retardation, organic brain syndrome, or chemical dependency or abuse are not covered benefits for acute care hospitals without an accompanying medical complication or medical condition. The UB-04 CMS-1450 paper claim form must indicate all relevant diagnoses that necessitate the inpatient stay.

Supporting documentation (certification of need) must be documented in the client’s medical record. This documentation must be maintained by each facility for a minimum of five years and be readily available for review when requested by HHSC or its designee.

Additional coverage through the Comprehensive Care Program (CCP) may be allowed for Medicaid-eligible clients who are 20 years of age and younger. Use revenue code 124 to bill for inpatient psychiatric services.

7.14.1 Prior Authorization Requirements

Prior authorization is not required for fee-for-service clients who are admitted to psychiatric units in acute care hospitals. Prior authorization is required for Primary Care Case Management (PCCM) clients who are admitted to acute care hospitals. Urgent or emergent admissions for inpatient PCCM psychiatric services require retroactive authorization. Out-of-network admissions require notification within the next business day and submission of clinical information to determine appropriateness for transfer to a contracted facility.

For clients who are 20 years of age and younger, initial admission to a state psychiatric facility or freestanding psychiatric facility may be prior authorized through CCIP for a maximum of five days based on Medicaid eligibility and documentation of medical necessity. Court-ordered services are not subject to the five-day admission limitation.

**Note:** NorthSTAR is a managed care program in the Dallas service area that covers behavioral health services. Psychiatrists who provide behavioral health services to clients in NorthSTAR must be members of the NorthSTAR BHO.

**Refer to:** Subsection 2.11.3, “Prior Authorization and Documentation Requirements” in the Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information about inpatient psychiatric services.

Section 8: Managed Care (Vol. 1, General Information) for more information, or contact the client’s BHO.
Providers rendering services to STAR and STAR+PLUS clients must contact the respective managed care plan.

**7.14.2 Documentation Requirements**

Documentation of medical necessity for inpatient psychiatric care must specifically address the following issues:

- Why the ambulatory care resources in the community cannot meet the treatment needs of the client.
- Why inpatient psychiatric treatment under the care of a psychiatrist is required to treat the client’s acute episode.
- How the services can reasonably be expected to improve the client’s condition or prevent further regression of the client’s condition in a proximate time period.

**7.14.3 Psychological and Neuropsychological Testing Services**

Psychological (procedure code 96101) and neuropsychological (procedure code 96118) testing, when performed in an acute care hospital or in a freestanding or state psychiatric facility, do not require prior authorization; however, these facilities must maintain documentation that supports medical necessity for the testing and the testing results of any psychological or neuropsychological testing that are performed while the client is an inpatient. Psychological and neuropsychological testing services are diagnosis restricted.

**7.14.4 Inpatient Hospital Discharge**

Procedure codes 99238 and 99239 must be submitted when billing for a hospital discharge.

Procedure code 99238 will be denied as part of another service when billed for the same date of service by the same provider as procedure code 99239.

**7.14.5 Inpatient Consultations**

Procedure codes 99251, 99252, 99253, 99254, and 99255 will be denied as part of another service when billed for the same date of service by the same provider as pharmacological management (procedure code 90862).

**7.15 Claims Filing and Reimbursement**

Providers must bill Medicare before billing Medicaid. Medicaid’s responsibility for the coinsurance or deductible is determined in accordance with Medicaid benefits and limitations. Providers must check the client’s Medicare card for Part B coverage before billing Texas Medicaid. When Medicare is primary, it is inappropriate to bill Medicaid without first billing Medicare. Texas Medicaid is responsible for the coinsurance and deductible of Medicare allowed services on a crossover basis only.

Claims for behavioral health services must be submitted to TMHP in an approved electronic format or on the CMS-1500 or UB-04 CMS-1450 claim form. Providers may purchase CMS-1500 and UB-04 CMS-1450 claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a CMS-1500 or UB-04 CMS-1450 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

The Medicaid rates for psychologists are calculated in accordance with 1 TAC §355.8081 and §355.8085. Providers can refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com. An FQHC is reimbursed for psychological services according to its specific Prospective Payment System (PPS) rate per visit calculated in accordance with 1 TAC §355.8261.

A freestanding psychiatric hospital or facility is reimbursed for psychological services in accordance with 1 TAC §355.8060.
8. SCREENING, BRIEF INTERVENTION, AND REFERRAL TO TREATMENT (SBIRT)

SBIRT is a comprehensive, public health approach to the delivery of early intervention and treatment services for clients who have substance use disorders and those who are at risk of developing such disorders. Substance abuse includes, but is not limited to, the abuse of alcohol and the abuse of, improper use of, or dependency on illegal or legal drugs. SBIRT is used for intervention directed to individual clients and not for group intervention.

SBIRT is targeted to clients who are 14 years through 20 years of age and who present to the hospital emergency department for a traumatic injury, condition, or accident related to substance abuse. SBIRT may also be medically necessary for clients who are 10 years through 13 years of age.

The first SBIRT session, including screening and brief intervention, must be billed by the hospital using an appropriate revenue code and procedure code H0050. Brief treatment is performed during the second, third, and fourth sessions, outside of the hospital. The second, third, and fourth sessions cannot be billed if clients were not referred from the hospital.

Additional services, outside the four sessions, will not be provided as SBIRT.

Refer to: Section 9, “Substance Use Disorder (SUD) Services (Abuse and Dependence)” in this handbook for additional information on SUD treatment.

8.1 Screening

Screening to identify clients who have problems related to substance use must be performed during the first session in the hospital emergency department or inpatient setting, but will not be separately reimbursed. Screening may be completed through interview and self-report, blood alcohol content, toxicology screen, or by using a standardized tool. Standardized tools that may be used include, but are not limited to, the following:

- Alcohol, Smoking, and Substance Involvement Screening Test (ASSIST)
8.2 Brief Intervention

Brief intervention is performed during the first session in the ED or inpatient hospital setting following a positive screen or a finding of at least a moderate risk for substance or alcohol abuse. Brief intervention is directed to the client and involves motivational discussion that is focused on raising the client’s awareness of his or her substance use and its consequences. The session is also focused on motivating the client toward behavioral change.

Successful brief intervention encompasses support of the client’s empowerment to make behavioral changes. A client who is found to have a moderate risk for substance or alcohol abuse should be referred for brief treatment of up to three sessions. Upon determination that the client has a severe risk for substance or alcohol abuse, the client should also be referred for more extensive treatment to the appropriate chemical dependency treatment center or outpatient behavioral health provider. If the client is currently under the care of a behavioral health provider, the client must be referred back to that provider.

SBIRT documentation for the first session must include:

- The client has an alcohol or drug-related traumatic injury or condition.
- Positive screening by a standardized screening tool.
- Laboratory results such as blood alcohol content, toxicology screen, or other measures showing at least a moderate risk for alcohol or substance abuse.
- The name, address, and telephone number of the provider to which the client is referred, if a referral is made.

The provider who performed the screening must document that a follow-up appointment was made for a subsequent session.

8.3 Brief Treatment

A client found to have a moderate-to-high risk for substance abuse should be referred for brief treatment. Brief treatment is performed during the second, third, and fourth sessions, outside of the hospital emergency department or inpatient setting.

Brief treatment, although it includes a motivational discussion and client empowerment, is a more comprehensive intervention than the first session. Brief treatment includes assessment, education, problem solving, coping mechanisms, building a supportive social environment, goal setting, and a plan of action.

Procedure code H0050 will be eligible for reimbursement to the following provider types for the second, third, and fourth sessions:

- NP
- CNS
- PA
- LPC
- Social worker enrolled in CCP
• Physician and physician group
• Psychologist and psychologist group
• LCSW

8.4 Referral to Treatment

If the provider determines that the client is in need of more extensive treatment or has a severe risk for substance abuse, the client must be referred to an appropriate chemical dependency treatment center or outpatient behavioral health provider.

Referral to more extensive treatment is a proactive process that facilitates access to care for clients who require a more extensive level of service than SBIRT provides. Referral is an essential component of the SBIRT intervention because referral ensures that all clients who are screened have access to the appropriate level of care.

Referral to more extensive treatment must be integrated during the second, third, and fourth SBIRT sessions, if necessary, unless the client’s condition changes. Referral to more extensive treatment may also occur during the first session.

Providers must refer the client to more extensive treatment as soon as the need is determined.

8.5 Reimbursement and Limitations

SBIRT is limited to clients who are 10 years through 20 years of age.

SBIRT is limited to a maximum of three dates of service following the first session, per calendar year, by any provider. If a client requires more than three dates of services per year, the client must be referred for chemical dependency treatment.

Procedure code H0050 must be submitted in 15-minute increments, with a maximum of 3 units (45 minutes) per date of service by any provider. The reimbursement rate for procedure code H0050 is $26.93 per 15 minutes.

Procedure code H0050 will be denied if it is billed for the same date of service, by the same provider, as any of the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>90801 90802 90804 90805 90806 90807 90808 90809 90810 90811</td>
</tr>
<tr>
<td>90812 90813 90814 90815 90847 90853 90857 90862 90865 90870</td>
</tr>
<tr>
<td>96101 96118 H0004 H0005 M0064</td>
</tr>
</tbody>
</table>

8.6 Documentation Requirements

Client record documentation must support medical necessity for the services provided and must be maintained and made readily available for review when requested by the Health and Human Services Commission (HHSC) or its designee. SBIRT documentation must include the following:

• An indication that the client has an alcohol or drug-related traumatic injury or condition
• Positive screening by a standardized substance abuse screening tool
• Laboratory results, such as blood alcohol content, toxicology screen, or other measures, that show at least a moderate risk for substance abuse
• If a referral is made, the name, address, and telephone number of the provider to whom the client was referred
• A written, client-centered plan for the delivery of medically necessary SBIRT. The plan must be completed at the time the client is admitted to the second session (referral). The plan must include the following:
  • Real-life goals expected
  • Strategies to achieve the goals
  • Support system such as family members, a legal guardian, friends, or anyone the client identifies as important to them, who can help the client achieve their goals
  • A mechanism for following up with the client to ensure that the client keeps appointments for additional sessions

The provider who performed the screening must document that a follow-up appointment was made for a subsequent session.

If inappropriate payments are identified on retrospective review for any provider, the payments will be recouped.

8.7 Claims Filing and Reimbursement

SBIRT services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a CMS-1500 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to:
Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Texas Medicaid rates for Hospitals are calculated according to 1 TAC §355.8061.

According to 1 TAC §355.8091, the Medicaid rate for LCSWs, LMFTs, and LPCs is 70 percent of the rate paid to a psychiatrist or psychologist for a similar service per 1 TAC §355.8085. Providers can refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com.

The Medicaid rates for psychologists are calculated in accordance with 1 TAC §355.8081 and §355.8085. Providers can refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com.

Texas Medicaid rates for physicians and certain other practitioners are calculated in accordance with TAC §355.8085. Providers can refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com.

Texas Medicaid rates for Nurse Practitioners and Clinical Nurse Specialists are calculated in accordance with TAC §355.8281. Providers can refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com.

According to 1 TAC §355.8093, the Medicaid rate for PAs is 92 percent of the rate paid to a physician (MD or DO) for the same professional service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections. Services performed by a PA and billed under a physician’s or RHC’s provider identifier are reimbursed according to the Texas Medicaid Reimbursement Methodology (TMRM) for physician services. Providers can refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com.
9. SUBSTANCE USE DISORDER (SUD) SERVICES (ABUSE AND DEPENDENCE)

9.1 Overview

Treatment for SUD is a benefit of Texas Medicaid. SUD treatment services are age-appropriate medical and psychotherapeutic services designed to treat a client's substance use disorder and restore function. Services and provider requirements associated with this benefit are found in Texas Department of Insurance (TDI) regulations (28 TAC, part 1 subchapter 3 subcategory HH) and TAC §448.902. Medical necessity for substance abuse services will be determined based on the TDI regulations and nationally recognized standards such as those from the American Society of Addiction Medicine (ASAM) or the Center for Substance Abuse Treatment (CSAT).

The following SUD services are a benefit of Texas Medicaid:

- Assessment by a CDTF for admission into a SUD treatment program.
- Detoxification services that are provided in an acute care hospital, residential, or ambulatory CDTF setting.
  
  **Note:** Crisis stabilization is not a component of detoxification. Crisis stabilization for a mental health condition may be provided as needed when the service is medically necessary and the clinical criteria for psychiatric care are met.
- Residential SUD treatment services.
- Ambulatory SUD treatment services provided by a CDTF.
- Medicaid assisted therapy (MAT) in an outpatient setting.

SUD services provided by a CDTF are limited to those provided by facilities that are licensed and regulated by DSHS to provide SUD services within the scope of that facility’s DSHS license.

9.2 Enrollment

9.2.1 CDTFs

Only CDTFs licensed by DSHS are eligible to enroll and participate in Texas Medicaid. Each facility must submit a copy of its DSHS license with the enrollment packet. Facilities that are maintained or operated by the federal government or directly operated by the state of Texas are exempt from the licensing requirements.

**Refer to:** Subsection 1.1, “Provider Enrollment” in section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for information on the provider enrollment process.

9.3 Assessment

Clients must be assessed by a Medicaid-enrolled CDTF for treatment services to begin. Clients who are in fee-for-service Medicaid and PCCM can obtain their assessment from any Medicaid-enrolled CDTF. Clients who are in the STAR or STAR+PLUS managed care programs must go to a CDTF that is in their health plan’s network for their assessment.

CDTF assessment must be performed by a qualified credentialed counselor (QCC) (as defined by the DSHS licensure standard) to determine the severity of a client’s SUD and identify their treatment needs. Assessments are limited to once per episode of care. An assessment must be billed with procedure code H0001 and modifier HF.

Documentation of the QCC assessment must be maintained in the client’s medical record.
9.4 Detoxification Services
Detoxification services are a set of interventions aimed at managing acute physiological substance dependence. According to TAC § 448.902 detoxification services include, but are not limited to, the following components:

- Evaluation
- Monitoring
- Medication
- Daily interactions

All clients who are admitted to a detoxification program must meet the current DSM criteria for physiological substance dependence and must meet the admission requirements based on a nationally-recognized standard.

9.4.1 Ambulatory (Outpatient) Detoxification Services
Ambulatory (outpatient) detoxification is appropriate when the client’s medical needs do not require close monitoring.

Ambulatory (outpatient) detoxification is not a stand-alone service and must be provided in conjunction with ambulatory (outpatient) substance abuse treatment services.

Ambulatory (outpatient) detoxification services must be billed with procedure codes H0016, H0050, or S9445 and modifier HF.

9.4.2 Residential Detoxification Services
Residential detoxification is appropriate when the client’s medical needs do not warrant an acute inpatient hospital admission, but the severity of the anticipated withdrawal requires close monitoring.

Residential detoxification services must be billed with procedure codes H0031, H0032, H0047, H2017, or S9445 and modifier HF.

Medically-supervised hospital inpatient detoxification is appropriate when one of the following criteria is met:

- The client has complex medical needs or complicated comorbid conditions that necessitate hospitalization for stabilization
- The services that are provided to a client are incidental to other medical services that are provided as a component of an acute care hospital stay.

9.5 Treatment Services
Treatment may be provided by a CDTF in a residential facility or as an ambulatory (outpatient) service.

Note: MAT is considered part of treatment services provided in a residential facility and is not separately reimbursed. MAT may be separately reimbursed in the ambulatory (outpatient) setting and may be provided during the treatment period in conjunction with other ambulatory (outpatient) treatment services.

9.5.1 Residential Treatment Services
Residential treatment services include counseling and psycho-education and must be billed with procedure codes H0047 and H2035 and modifier HF.

9.5.2 Ambulatory (Outpatient) Treatment Services
Ambulatory (outpatient) treatment services must be billed with procedure codes H0004 or H0005.
Procedure code H0004 billed with modifier HF identifies individual counseling services that are provided in 15-minute increments.

Procedure code H0005 billed with modifier HF identifies group counseling services that are provided in one-hour increments.

Procedure codes H0004 and H0005 are limited to the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>29181</td>
<td>Alcohol withdrawal</td>
</tr>
<tr>
<td>2919</td>
<td>Unspecified alcohol-induced mental disorders</td>

</tbody>
</table>

**9.6 Medication Assisted Therapy (MAT)**

MAT is a benefit of Texas Medicaid when using a drug or biological recognized in the treatment of SUD and provided as a component of a comprehensive treatment program according to TAC § 448.902. MAT is considered part of treatment services that are provided in a residential facility and is not separately reimbursed. MAT may be separately reimbursed in the ambulatory (outpatient) setting and may be provided during the treatment period in conjunction with other ambulatory (outpatient) treatment services. MAT is also a benefit as a conjunctive treatment regimen for clients who are addicted to substances that can be abused who meet the current DSM criteria for a SUD.

Documentation requirements supporting the medical necessity for MAT must be maintained in the client’s medical record according to the requirements in Federal Regulation 42 CFR 8. MAT must be performed by a physician; however, the physician may delegate this responsibility to other licensed...
personnel under his supervision. Documentation must include the name and title of the physician performing or delegating other MAT services. The client’s medical records are subject to retrospective review.

Clients who are 18 years of age and younger may not be admitted to a narcotic maintenance program unless a parent, legal guardian, or responsible adult designated by the relevant state authority consents in writing to such treatment. To be eligible for narcotic maintenance treatment, clients who are 18 years of age and younger must have had two documented attempts at short-term detoxification or drug-free treatment. A waiting period of no less than seven days is required between the first and the second short-term detoxification treatment.

Every exception to the general age requirement must be clinically justified and documented in writing by a QCC. The facility must maintain the supporting documentation, including the QCC admission approval in the client’s medical record.

MAT for the treatment of opioid addiction must comply with the requirements in Federal Regulation 42 CFR 8.

MAT services must be billed with procedure codes H0020 (methadone administration/service) and H2010 (non-methadone administration/service).

Procedure code H2010 must be billed with one of the following modifiers for MAT:

- HG- Opioid addiction treatment program (use for opioid addiction when using drugs other than methadone).
- HF- Substance abuse program (use for the treatment of non-opioid addiction).

9.7 Prior Authorization

The following services do not require prior authorization:

- Assessment
- Ambulatory (outpatient) treatment services
- MAT
- Inpatient hospital detoxification for fee-for-service clients

The following services require prior authorization:

- Ambulatory (outpatient) detoxification services
- Ambulatory (outpatient) treatment for clients who are 20 years of age and younger and who exceed the benefit limitation of 135 hours of group service and 26 hours of individual services per calendar year
- Inpatient hospital detoxification for PCCM clients
- Residential detoxification services
- Residential treatment services

Providers must submit the appropriate prior authorization request form for the initial or continuation of ambulatory (outpatient) or residential detoxification treatment and residential treatment services.

Providers must submit one of the following forms to obtain prior authorization:

- Ambulatory (Outpatient) Detoxification Authorization Request Form
- Ambulatory (Outpatient) Substance Abuse Counseling Extension Request Form
- Residential Detoxification Authorization Request Form
• Residential Substance Abuse Treatment Authorization Request Form

Prior authorization for ambulatory or residential detoxification or treatment services will not be issued for clients who are 13 years of age and younger unless the request is accompanied by a waiver from DSHS Regulatory and Licensing Division.

Prior authorization will be considered for the least restrictive environment appropriate to the client’s medical need as determined in the client’s plan of care (POC), based on national standards.

Prior authorization requests for clients who are 20 years of age and younger for services beyond the limitations outlined in this section, may be considered with documentation from a physician (who does not need to be affiliated with the CDTF) supporting the medical necessity for continuation of the treatment.

9.7.1 Prior Authorization for Fee-for-Service Clients

Prior authorization requests for fee-for-service clients may be submitted to the TMHP Prior Authorization Unit by fax at 1-512-514-4211 or by mail to:

Texas Medicaid & Healthcare Partnership
TMHP Prior Authorization Department
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727

Providers may contact the TMHP Prior Authorization Unit by telephone at 1-800-213-8877, Option 2, to obtain information about substance use disorder benefits, the prior authorization process, or the status of a prior authorization request. Prior authorization for substance use disorder services cannot be obtained through this line.

Requests for a continuation of services must be received on or before the last day that was authorized or denied. The TMHP Prior Authorization Unit will notify the provider by fax. If the date of the prior authorization unit determination letter is on or after the last date authorized or denied, the request for continuation is due by 5 p.m. of the next business day.

Requests for a continuation of services will be denied if they are not received on or before the last day of the current authorization period. Online prior authorization requests for substance use disorder services are not currently available.

9.7.2 Prior Authorization for PCCM Clients

Prior authorization, except for PCCM urgent or emergent inpatient services, may be considered when requested and approved within three business days of admission. Prior authorization for PCCM urgent or emergent inpatient detoxification services must be obtained before the claim is submitted. Scheduled PCCM inpatient admissions for detoxification require authorization before admission.

Services for PCCM clients who require inpatient hospital detoxification may be authorized if:

• The client has complicated co-morbid conditions that necessitate hospitalization for stabilization.
• There is limited availability of detoxification services in the client’s service area.
• The client can be effectively treated with appropriate substance abuse services following detoxification.

Prior authorization requests for PCCM clients may be submitted to the PCCM Outpatient Prior Authorization Department online at www.tmhp.com, by telephone at 1-888-302-6167, or by fax at 1-512-302-5039.
9.7.3 Prior Authorization for STAR and STAR+PLUS Clients
Prior authorization and extensions for Medicaid managed care clients in STAR or STAR+PLUS are handled by the client’s health plan. Contact the client’s health plan for more information. Prior authorization is not required for substance use disorder services for dual eligible clients enrolled as STAR PLUS MQMBs.

9.7.4 Prior Authorization for Ambulatory (Outpatient) Detoxification Services
Ambulatory (outpatient) detoxification services may be prior authorized for up to 21 days. The level of service and number of days that are prior authorized will be based on the substance(s) of abuse, level of intoxication and withdrawal potential, and the client’s medical needs.

9.7.4.1 Admission Criteria for Ambulatory (Outpatient) Detoxification Services
To be considered eligible for treatment for ambulatory detoxification services, the client must meet the following conditions:

Chemical Substance Withdrawal
- The client is expected to have a stable withdrawal from alcohol or drugs.
- The diagnosis must meet the criteria for the definition of substance (chemical) dependence, as detailed in the most current revision of the ICD-9-CM, or the most current revision of the Diagnostic and Statistical Manual for Professional Practitioners, accompanied by evidence that some of the symptoms have persisted for at least one month or have occurred repeatedly over a longer period of time.

Medical Functioning
The client must meet all of the following criteria with regards to medical functioning:
- No history of recent seizures or past history of seizures during withdrawal.
- No clinical evidence of altered mental state as manifested by disorientation to self, alcoholic hallucinations, toxic psychosis, or altered level of consciousness (clinically significant obtundation, stupor, or coma).
- The symptoms are due to withdrawal and not due to a general medical condition. Absence of any presumed new asymmetric or focal findings (i.e., limb weakness, clonus, spasticity, unequal pupils, facial asymmetry, eye ocular movement paresis, papilledema, or localized cerebellar dysfunction, as reflected in asymmetrical limb coordination).
- Stable vital signs as interpreted by a physician. The client must also be without a previous history of complications from acute chemical substance withdrawal and judged to be free of a health risk as determined by a physician.
- No evidence of a coexisting serious injury or systemic illness either newly discovered or progressive in nature.
- Absence of serious disulfiram-alcohol (Antabuse) reaction with hypothermia, chest pains, arrhythmia, or hypotension.
- Clinical condition that allows for a comprehensive and satisfactory assessment.

Family, Social, or Academic Dysfunction
The client must meet at least one of the following criteria with regards to family, social, or academic dysfunction:
- The client’s social system and significant other(s) are supportive of recovery to the extent that the client can adhere to a treatment plan and treatment service schedules without substantial risk of reactivating the client’s addiction.
• The client’s family or significant other(s) are willing to participate in the ambulatory (outpatient) detoxification treatment program.

• The client may or may not have a primary or social support system to assist with immediate recovery, but the client has the social skills to obtain such a support system or to become involved in a self-help fellowship.

• The client does not live in an environment where licit or illicit mood altering substances are being used. A client living in an environment where licit or illicit mood altering substances are being used may not be a candidate for this level of care.

**Emotional and Behavioral Status**

The client must meet all of the following criteria with regards to emotional and behavioral status:

• Client is coherent, rational, and oriented for treatment.

• The mental state of the client does not preclude the client’s ability to comprehend and understand the materials presented, and the client is able to participate in the ambulatory (outpatient) detoxification treatment process.

• Documentation exists in the medical record that the client expresses an interest to work toward ambulatory (outpatient) detoxification treatment goals.

• Client has no neuropsychiatric condition that places the client at imminent risk of harming self or others (e.g. pathological intoxication or alcohol idiosyncratic intoxication).

• Client has no neurological, psychological, or uncontrolled behavior that places the client at imminent risk of harming self or others (depression, anguish, mood fluctuations, overreactions to stress, lower stress tolerance, impaired ability to concentrate, limited attention span, high level of distractibility, negative emotions, or anxiety).

• Client has no documented DSM-IV Axis I condition or disorder that, in combination with alcohol or drug use, compounds a pre-existing or concurrent emotional or behavioral disorder and presents a major risk to the client.

• The client has no mental confusion or fluctuating orientation.

**Chemical Substance Use**

The client must meet the criteria in at least one of the following conditions with regards to recent chemical substance use:

• The client’s chemical substance use is excessive, and the client has attempted to reduce or control it but has been unable to do so (as long as chemical substances are available).

• The client is motivated to stop using alcohol or drugs and is in need of a supportive, structured treatment program to facilitate withdrawal from chemical substances.

9.7.4.2 **Continued Stay Criteria for Ambulatory (Outpatient) Detoxification Services**

A client is considered eligible for continued stay in the ambulatory (outpatient) detoxification treatment service when the client meets at least one of the conditions for either chemical substance withdrawal or psychiatric or medical complications.

**Chemical Substance Withdrawal**

The client must meet at least one of the following conditions with regards to chemical substance withdrawal complications:

• The client, while physically abstinent from chemical substance use, is exhibiting incomplete stable withdrawal from alcohol or drugs, as evidenced by psychological and physical cravings.

• The client, while physically abstinent from chemical substance use, is exhibiting incomplete stable withdrawal from alcohol or drugs, as evidenced by significant drug levels.
Psychiatric or Medical Complications
The client must meet the following condition:

- Documentation in the medical record indicates an intervening medical or psychiatric event that was serious enough to interrupt ambulatory (outpatient) detoxification treatment, but also that the client is again progressing in treatment.

9.7.5 Prior Authorization for Residential Detoxification Services
Detoxification services may be prior authorized for up to 21 days. The level of service and number of prior authorized days will be based on the substance(s) of abuse, level of intoxication and withdrawal potential, and the client’s medical needs.

Requests for detoxification services for clients who are 20 years of age and younger and who need more than 21 days of residential detoxification require Medical Director review with documentation of medical necessity from a physician who is familiar with the client.

9.7.5.1 Admission Criteria for Residential Detoxification Services
Clients are eligible for admission to a residential detoxification service when they have failed two previous individual treatment episodes of ambulatory (outpatient) detoxifications or when they have a diagnosis that meets the criteria for the definition of chemical dependence, as detailed in either the most current revision of the ICD-9-CM, or the most current revision of the Diagnostic and Statistical Manual for Professional Practitioners.

In addition, the client must meet at least one of the following criteria for chemical substance withdrawal, major medical complication, or major psychiatric illness for admission to residential treatment for detoxification:

Chemical Substance Withdrawal

- Impaired neurological functions as evidenced by:
  - Extreme depression (e.g., suicidal).
  - Altered mental state with or without delirium as manifested by disorientation to self; alcoholic hallucinosis, toxic psychosis, altered level of consciousness, as manifested by clinically significant obtundation, stupor, or coma.
  - History of recent seizures or past history of seizures on withdrawal.
  - The presence of any presumed new asymmetric and/or focal findings (i.e., limb weakness, clonus, spasticity, unequal pupils, facial asymmetry, eye ocular movement paresis, papilledema, or localized cerebellar dysfunction, as reflected in asymmetrical limb incoordination).
  - Unstable vital signs combined with a history of past acute withdrawal syndromes that are interpreted by a physician to be indication of acute alcohol or drug withdrawal.
  - Evidence of coexisting serious injury or systemic illness, newly discovered or progressive.
  - Clinical condition (e.g., agitation, intoxication, or confusion) that prevents satisfactory assessment of the above conditions and indicates placement in residential detoxification service may be justified.
  - Neuropsychiatric changes of such severity and nature that they put the client at imminent risk of harming self or others (e.g., pathological intoxication or alcohol idiosyncratic intoxication, etc.).
  - Serious disulfiram-alcohol (Antabuse) reaction with hypothermia, chest pains, arrhythmia, or hypotension.
Major Medical Complications
The client must meet the following condition with regards to major medical complications:

- The individual must present a documented condition or disorder that, in combination with alcohol or drug use, presents a determined health risk (e.g., gastrointestinal bleeding, gastritis, severe anemia, uncontrolled diabetes mellitus, hepatitis, malnutrition, cardiac disease, hypertension, etc.).

Major Psychiatric Illness
The client must meet at least one of the following conditions with regards to major psychiatric illness:

- Documented DSM III-R AXIS I condition or disorder that, in combination with alcohol or drug use, compounds a pre-existing or concurrent emotional or behavioral disorder and presents a major risk to the individual.
- Severe neurological and psychological symptoms: (e.g., anguish, mood fluctuations, overreactions to stress, lowered stress tolerance, impaired ability to concentrate, limited attention span, high level of distractibility, extreme negative emotions, or extreme anxiety).
- Danger to others or homicidal.
- Uncontrolled behavior that endangers self or others, or documented neuropsychiatric changes of a severity and nature that place the individual at imminent risk of harming self or others.
- Mental confusion or fluctuating orientation.

9.7.5.2 Continued Stay Criteria for Residential Detoxification Services
Eligibility for continued stay for residential detoxification services is based on the client meeting at least one of the criteria for chemical substance withdrawal, major medical complications, or major psychiatric complications.

Chemical Substance Withdrawal
The client must exhibit one of the following conditions with regards to chemical substance withdrawal complications:

- Incomplete medically stable withdrawal from alcohol or drugs, as evidenced by documentation of at least one of the following conditions:
  - Unstable vital signs
  - Continued disorientation
  - Abnormal laboratory findings related to chemical dependency
  - Continued cognitive deficit related to withdrawal so that the client is unable to recognize alcohol or drug use as a problem
  - Laboratory finding that, in the judgment of a physician, indicates that a drug has not sufficiently cleared the client’s system

Major Medical Complications
The client must meet the following condition with regards to major medical complications:

- Documentation in the medical record must indicate that a medical condition or disorder (e.g., uncontrolled diabetes mellitus) continues to present a health risk and is actively being treated.

Major Psychiatric Complications
The client must meet at least one of the following with regards to major psychiatric complications:

- Documentation in the medical record that a DSM III-R AXIS I psychiatric condition or disorder that, in combination with alcohol or drug use, continues to present a major health risk, is actively being treated.
• Documentation in the medical record that severe neurological or psychological symptoms have not been satisfactorily reduced but are actively being treated.

9.7.6 Prior Authorization for Residential Treatment Services
Residential treatment may be prior authorized for up to 35 days per episode of care, with a maximum of two episodes of care per rolling six-month period, and four episodes of care per rolling year.

9.7.6.1 Admission Criteria for Residential Treatment Services
The diagnosis must meet the criteria for the definition of chemical dependence, as detailed in the most current revision of the ICD-9-CM, or the most current revision of the *Diagnostic and Statistical Manual for Professional Practitioners*, accompanied by evidence that some of the symptoms have persisted for at least one month or have occurred repeatedly over a longer period of time.

Clients must meet the following conditions in order to receive treatment in a residential treatment service program:

Medical Functioning
The following must be present with regards to medical functioning:

• Documented medical assessment following admission (except in instances where the client is being referred from an inpatient service) indicates that the client is medically stable and not in acute withdrawal.

• The client is not bed-confined and has no medical complications that would hamper participation in the residential service.

Family, Social, or Academic Dysfunction and Logistic Impairments
At least one of the following must be present with regards to family, social, or academic dysfunction and logistic impairments:

• The client manifests severe social isolation or withdrawal from social contacts.

• The client lives in an environment (social and interpersonal network) in which treatment is unlikely to succeed (e.g., a chaotic family dominated by interpersonal conflict, which undermines client’s efforts to change).

• Client’s family or significant other(s) are opposed to the client’s treatment efforts and are not willing to participate in the treatment process.

• Family members or significant other(s) living with the client manifest current chemical dependence disorders and are likely to undermine treatment.

• Logistic impairments (e.g., distance from treatment facility or mobility limitations) preclude participation in a partial hospitalization or ambulatory (outpatient) treatment service.

Emotional and Behavioral Status
The client must meet all three of the following criteria with regards to emotional and behavioral status:

• Client is coherent, rational, and oriented for treatment.

• Mental state of the client does not preclude the client’s ability to comprehend and understand the materials presented and participate in rehabilitation or treatment process.

• The medical record contains documentation that with continued treatment the client will be able to improve or internalize the client’s motivation toward recovery within the recommended length of stay time frames (e.g., becoming less defensive, verbalizing, and working on alcohol or drug related issues). Interventions, treatment goals, or contracts are in place to help the client deal with or confront the blocks to treatment (e.g., family intervention or employee counseling confrontation).
Chemical Substance Use
The client must meet at least one of the following criteria with regards to chemical substance use:

- The client’s chemical substance use is excessive, and the client has attempted to reduce or control it but has been unable to do so (as long as chemical substances are available).
- Virtually all of the client’s daily activities revolve around obtaining, using, or recuperating from the effects of chemical substances, and the client requires a secured environment to control the client’s access to chemical substances.

9.7.6.2 Residential Treatment Services for Adolescents
Clients who are 13 through 17 years of age must meet all above conditions and the following conditions in order to receive treatment in an adolescent residential treatment service program.

- At the maturation level, the adolescent client must meet both of the following criteria:
  - The client is assessed as manifesting physical maturation at least in middle adolescent range (i.e., post-pubescent; not growth-retarded).
  - The history of the adolescent reflects cognitive development of at least 11 years of age.
- The adolescent client must display at least one of the following with regards to developmental status:
  - Documented history of inability to function within the expected age norms despite normal cognitive and physical maturation (e.g., refusal to interact with family members, overt prostitution, felony, or other criminal charges).
  - A recent history of moderate to severe conduct disorder, as defined in the Diagnostic and Statistical Manual for Professional Practitioners, or impulsive disregard for social norms and rights of others.
  - Documented difficulty in meeting developmental expectations in a major area of functioning (e.g., social, academic, or psychosexual) to an extent that interferes with the capacity to remain behaviorally stable.

9.7.6.3 Continued Stay Criteria for Residential Treatment Services
At least one of the following conditions must be present for continued stay in a residential treatment program:

Chemical Dependency Rehabilitation or Treatment Complications

- The client recognizes or identifies with the severity of the alcohol or drug problem but demonstrates minimal insight into the client’s defeating the use of alcohol or drugs. However, documentation in the medical record indicates that the client is progressing in treatment.
- The client identifies with the severity of the alcohol or drug problem and manifests insight into the client’s personal relationship with mood-altering chemicals, yet does not demonstrate behaviors that indicate the development of problem-solving skills that are necessary to cope with the problem.
- The client would predictably relapse if moved to a lesser level of care.

Psychiatric or Medical Complications:
- Documentation in the medical record indicates an intervening medical or psychiatric event that was serious enough to interrupt rehabilitation or treatment, but the client is again progressing in treatment.
- Documentation in the medical record indicates that the client is being held pending an immediate transfer to a psychiatric, acute medical service, or inpatient detoxification alcohol or drug service.
9.7.7 Prior Authorization for Ambulatory (Outpatient) Treatment Services for Clients Who Are 20 Years of Age and Younger

Prior authorization for ambulatory (outpatient) treatment services beyond the annual limitation of 135 hours of group services and 26 hours of individual services per calendar year, may be considered for clients who are 20 years of age and younger with documentation from a physician (who does not need to be affiliated with the CDTF) of the supporting medical necessity for continued treatment services.

Requests must be submitted before providing the extended services. The documentation must include the following information:

- The client is meeting treatment goals.
- The client demonstrates insight and understanding into relationship with mood altering chemicals, but continues to present with issues addressing the life functions of work, social, or primary relationships without the use of mood-altering chemicals.
- One of the following:
  - Although physically abstinent from chemical substance use, the client remains mentally preoccupied with such use to the extent that the client is unable adequately to address primary relationships or social or work tasks. Nevertheless, there are indications that, with continued treatment, the client will effectively address these issues.
  - Although other psychiatric or medical complications exist that affect the client’s treatment, documentation exists that the client continues to show treatment progress and that there is evidence to support the benefits of continued treatment.

9.8 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including SUD services.

SUD services are subject to retrospective review and recoupment if documentation does not support the service billed.

9.9 Reimbursement and Limitations

9.9.1 Detoxification Services

Inpatient detoxification is reimbursed by the reimbursement methodology specific to the inpatient hospital. Separate reimbursement may be provided for physician services performed during an inpatient stay.

Residential detoxification (procedure codes H0031, H0032, H2017, and S9445) are limited to once per day.

Residential detoxification (procedure codes H0031, H0032, H0047, or S9445) will be denied if billed without procedure code H2017.

Room and board for residential detoxification (procedure code H0047) is limited to once per date of service. Procedure code H0047 is reimbursed for clients who are 21 years of age and older as an access-based fee, and as an informational detail for clients who are 20 years of age and younger.

Ambulatory (outpatient) detoxification (procedure codes H0016, H0050, and S9445) are limited to once per day and may be reimbursed on the same date of service as ambulatory (outpatient) SUD treatment by the same or different provider when medically necessary and identified in the client’s treatment plan.

Ambulatory (outpatient) detoxification (procedure codes H0050 and S9445) will be denied if billed without procedure code H0016.
Separate reimbursement may be provided for physician services, excluding MAT, during a residential stay.

**9.9.2 Treatment Services**
Ambulatory (outpatient) treatment (procedure codes H0004 and H0005) is reimbursed at a time-based rate.

Ambulatory (outpatient) treatment services are limited to 135 hours of group counseling and 26 hours of individual counseling per calendar year when provided by a CDTF.

Residential treatment services (procedure code H2035) are limited to one per day and are allowed up to a maximum of 35 days.

Ambulatory (outpatient) treatment (procedure codes H0004 and H0005) will be denied if billed on the same date of service as residential detoxification (procedure codes H0031, H0032, H0047, and H2017) or residential treatment (procedure code H2035).

Procedure code H0047 will be denied if billed without procedure code H2035.

**9.9.3 MAT Services**
Claims billed for MAT must include the client’s substance use disorder diagnosis.

MAT provided in an ambulatory (outpatient) setting (procedure code H2010 with modifier HG and procedure code H2010 with modifier HF), is limited to a maximum of one hour (four units) per date of service by any provider.

MAT services (procedure codes H0020 and H2010) will be denied as part of another service when billed for the same date of service as procedure codes H0016, H0031, H0032, H0047, H0050, H2017, H2035, and S9445.

Injectable administration is considered part of MAT and is not reimbursed separately. Procedure code 96372 will be denied when billed for the same date of service by any provider as procedure code H0020 or H2010.

**9.10 Noncovered Services**
The following SUD services are not a benefit of Texas Medicaid:

- Aftercare
- Occupational therapy as part of a residential detoxification or treatment program
- Services for which the client fails to meet the treatment eligibility or authorization criteria, or which are not clinically appropriate in the setting requested based on the client’s medical condition
- Services for tobacco and caffeine addiction
- Detoxification services and MAT for hashish or marijuana addiction
- Detoxification with an opioid when the client has had two or more unsuccessful opioid detoxification episodes (has left the program against medical advice) within a 12-month period (see 42 CFR Section 8)
- Detoxification or substance abuse counseling services provided by electronic means such as telemedicine, e-mail, or telephone
9.11 Claims Filing

Claims for SUD services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a CMS-1500 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to:  
Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

**Factors for Admission (for admission complete all sections except section V)**

- Impaired neurological functions / altered mental state as evidenced by:
  - Failure of two previous treatment episodes of outpatient detoxification: Yes ☐ No ☐
- Extreme depression: Yes ☐ No ☐
- Disorientation to self: Yes ☐ No ☐
- Alcoholic hallucinosis: Yes ☐ No ☐
- Toxic psychosis: Yes ☐ No ☐
- Altered level of consciousness: Yes ☐ No ☐
- Serious diisulfiram-alcohol (Antabuse) reaction with hypothermia, chest pains arrhythmia, or hypotension: Yes ☐ No ☐

**Medical Complications (e.g., GI bleeding; gastritis; anemia, severe; diabetes mellitus, uncontrolled; hepatitis; malnutrition; cardiac disease, hypertension, etc.)**

**Psychiatric Symptoms**

- Severe neurological and/or psychological symptoms: Yes ☐ No ☐
- Danger to self or others: Yes ☐ No ☐
- Mental confusion and/or fluctuating orientation: Yes ☐ No ☐

**Continued Stay (complete only sections I, V, VI and VII if additional detoxification days are required)**

- Unstable vital signs: Yes ☐ No ☐
- Continued disorientation: Yes ☐ No ☐
- Abnormal laboratory findings related to chemical dependency: Yes ☐ No ☐
- Cognitive deficit related to withdrawal affecting the client's ability to recognize alcohol/drug use as a problem: Yes ☐ No ☐
- Laboratory finding that a drug has not sufficiently cleared the client's system: Yes ☐ No ☐
- Major medical complications continuing to present a health risk:

Major psychiatric complication continuing to present a health risk or severe neurological and/or psychological symptoms have not been satisfactorily reduced:

</tbody>
</table>

II. Factors for Admission (For admission complete all sections except section IV)

Client is medically stable and not in acute withdrawal: Yes ☐ No ☐
Client is coherent, rational, and oriented for treatment: Yes ☐ No ☐
Client is not bed-confined or has no medical complications that would hamper participation in the residential service: Yes ☐ No ☐
Client manifests severe social isolation or withdrawal from social contacts: Yes ☐ No ☐
Client lives in an environment (social and interpersonal network) in which treatment is unlikely to succeed: Yes ☐ No ☐
Client's family/significant others are opposed to the client's treatment efforts and are not willing to participate in the treatment process: Yes ☐ No ☐
Family members/significant other(s) living with the client manifest current chemical dependence disorders, and are likely to undermine treatment: Yes ☐ No ☐
Interventions, treatment goals, and/or contracts are in place to help the client deal with or confront the blocks to treatment: Yes ☐ No ☐
Client's chemical substance use is excessive, and the client has attempted to reduce or control it, but has been unable to do so: Yes ☐ No ☐
Logistic impairments preclude participation in an outpatient treatment service: Yes ☐ No ☐
Client's daily activities revolve around obtaining, using, and/or recuperating from the effects of chemical substances and the client requires a secured environment to control the client's access to chemical substances: Yes ☐ No ☐

III. Adolescent Clients Only

Adolescent is assessed as manifesting physical maturation at least in middle adolescent range: Yes ☐ No ☐
History of the adolescent reflects cognitive development of at least 11 years of age: Yes ☐ No ☐
History of inability to function within the expected age norms despite normal cognitive and physical maturation: Yes ☐ No ☐
Recent history of moderate/severe conduct disorder/impulsive disregard for social norms and rights of others: Yes ☐ No ☐
Difficulty in meeting developmental expectations in a major area of functioning to an extent which interferes with the capacity to remain behaviorally stable: Yes ☐ No ☐

IV. Continued Stay (complete only sections I, IV, V and VI if additional residential days are required)

Client recognizes/identifies with the severity of the alcohol/drug problem, but demonstrates minimal insight into defeating use of alcohol/drugs and the client is progressing in treatment: Yes ☐ No ☐
Client identifies severity of alcohol/drug problem and manifests insight into relationship with mood-altering chemicals, yet does not demonstrate behaviors indicating problem solving skills necessary to cope with the problem: Yes ☐ No ☐
Client would predictably relapse if moved to a lesser level of care: Yes ☐ No ☐
Documentation in the medical record indicates an intervening medical or psychiatric event which was serious enough to interrupt rehabilitation/treatment, but the client is again progressing in treatment: Yes ☐ No ☐
Documentation in the medical record indicates that the client is being held pending an immediate transfer to a psychiatric, acute medical service, or inpatient detoxification alcohol/drug service: Yes ☐ No ☐

CHILDREN’S SERVICES HANDBOOK

1. GENERAL INFORMATION

The information in this handbook is intended for dentists, school districts, physicians, physician assistants (PAs), rural health clinics (RHCs), federally qualified health centers (FQHCs), advanced practice registered nurses (APRNs), home health agencies (HHAs), durable medical equipment (DME) suppliers, hospitals, and clinics. The handbook provides information about Texas Medicaid’s benefits, policies, and procedures applicable to these providers.

Important: All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in 1 Texas Administrative Code (TAC) §371.1617(a)(6)(A). Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver healthcare items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.

All providers are required to report suspected child abuse or neglect as outlined in subsection 1.4, “Provider Responsibilities” in Section 1, “Provider Enrollment and Responsibilities” (Vol 1, General Information).

1.1 Medical Transportation Program

The Medical Transportation Program (MTP) is funded with federal and state dollars to arrange nonemergency transportation to medical or dental appointments for eligible clients and their attendants.

Refer to: Appendix D: Medical Transportation (Vol. 1, General Information) for more information on enrollment.

2. MEDICAID CHILDREN’S SERVICES COMPREHENSIVE CARE PROGRAM (CCP)

2.1 Early Childhood Intervention (ECI) (CCP)

The Texas ECI program is available statewide to families of children who are birth through 35 months of age and who have disabilities or developmental delays. The state agency responsible for ECI services is the Department of Assistive and Rehabilitative Services (DARS). DARS contracts with local ECI programs to take referrals, determine clients’ eligibility for ECI, and provide services to ECI-eligible children.

To participate in Texas Medicaid, ECI providers must comply with all applicable federal, state, and local laws and regulations pertaining to ECI services. The ECI providers must provide services in accordance with IDEA, Part C and Title 40 TAC, Part 2, Chapter 101, Subchapter 1 and Title 40 TAC, Part 2, Chapter 108.
ECI providers enroll as CCP providers. ECI CCP providers who complete occupational therapy (OT), physical therapy (PT), or speech therapy (ST) evaluations and re-evaluations for children in the non-managed care areas of the state must submit their claims to TMHP. ECI CCP providers who complete OT, PT, or ST evaluations and re-evaluations for children enrolled in Medicaid Managed Care plans must submit their claims to the appropriate Health Maintenance Organization (HMO).

For the children who qualify for Developmental Rehabilitation Services (DRS), the ongoing OT, PT, or ST services and developmental services are considered bundled services that are billed outside of the TMHP claims payment system. These ongoing therapy and developmental services, as stated on the child’s IFSP, are reimbursed through the ECI provider’s contract with DARS. ECI DRS are reimbursed in accordance with 1 TAC §355.113.

Nutrition, audiology, counseling, and psychological services provided to eligible children by ECI CCP providers are reimbursed through TMHP for children in the non-managed care areas of the state or the appropriate HMO if the child is enrolled in a Medicaid Managed Care health plan.

Other ECI services, as defined in Title 40 Texas Administrative Code (TAC), Part 2, Chapter 108, Subchapter E, §108.3 include case management services, vision services, social work, family education and training, assistive technology, behavioral intervention, and health services.

ECI Referrals and Assistance to ECI Enrolled Children
Medicaid professionals can assist families enrolled in ECI by:

- Making referrals to the ECI program (refer to Appendix D.4 Early Childhood Intervention (ECI) Referrals).
- Promptly scheduling appointments for well-child exams.
- Providing documentation of the well-child exam and medical information to the ECI program upon request.
- Providing prescriptions, when necessary.

For more information on ECI services, providers may visit the ECI website at www.dars.state.tx.us/ecis/index.shtml.

Refer to: Subsection 2.10, “Therapy Services (CCP)” in this handbook for more information. Subsection 2.6, “Medical Nutrition Counseling Services (CCP)” in this handbook for more information.

2.2 CCP Overview
CCP is an expansion of the Early Periodic Screening, Diagnosis, and Treatment (EPSDT) service as mandated by the Omnibus Budget Reconciliation Act (OBRA) of 1989, which requires all states to provide all medically necessary treatment for correction of physical or mental problems to Texas Health Steps (THSteps)-eligible clients when federal financial participation (FFP) is available, even if the services are not covered under the state’s Medicaid plan.

The following CCP provider sections describe the specific requirements of each area of responsibility:

- Subsection 2.3, “Clinician-Directed Care Coordination Services (CCP)” in this handbook.
- Subsection 2.4, “Comprehensive Outpatient Rehabilitation Facilities (CORFs)/Outpatient Rehabilitation Facilities (ORFs)” in this handbook.
- Subsection 2.5, “Durable Medical Equipment (DME) Supplier (CCP)” in this handbook.
• Subsection 2.1, “Early Childhood Intervention (ECI) (CCP)” in this handbook.
• Subsection 2.6, “Medical Nutrition Counseling Services (CCP)” in this handbook.
• Subsection 2.7, “Orthotic and Prosthetic Services (CCP)” in this handbook.
• Subsection 2.8, "Personal Care Services (PCS) (CCP)” in this handbook.
• Subsection 2.9, "Private Duty Nursing (CCP)” in this handbook.
• Subsection 2.10, “Therapy Services (CCP)” in this handbook for more information.
• Subsection 2.11, “Inpatient Psychiatric Hospital/Facility (Freestanding) (CCP)” in this handbook.
• Subsection 2.12, “Inpatient Rehabilitation Hospital (Freestanding) (CCP)” in this handbook.

2.2.1 Client Eligibility
The client must be from birth through 20 years of age and eligible for THSteps on the date of service. If the client’s Medicaid Identification (Form H3087) states “Emergency Care,” “PE,” or “QMB,” the client is not eligible for CCP benefits.

Clients are ineligible for CCP services beginning the day of their 21st birthday.

2.2.2 Enrollment
CCP providers must meet Medicaid/Health and Human Services Commission (HHSC) participation standards to enroll in the program. All CCP providers must be enrolled in Texas Medicaid to be reimbursed for services. Provider enrollment inquiries and application requests must be sent to the TMHP Provider Enrollment department at:

Provider Enrollment
Texas Medicaid & Healthcare Partnership
PO Box 200555
Austin, TX 78720-0555

Home and community support services agencies (HCSSAs) that want to provide CCP private-duty nursing (PDN), OT, PT, or ST services under the licensed-only home health (LHH) category must first enroll with TMHP. To enroll with TMHP in the LHH category, an HCSSA must:

• Complete a provider enrollment form, which can be found on the TMHP website at www.tmhp.com, provide its license information, and check the “Only CCP services” box on the form.
• Obtain a Texas Provider Identifier (TPI) for CCP services.
• Provide CCP PDN, OT, PT, or ST services only to eligible CCP clients and use the TPI number assigned for CCP services. Texas Medicaid home health services must be delivered under the licensed and certified home health (LCHH) category.

Refer to: Section 8: Managed Care (Vol. 1, General Information).

2.2.3 Services/Benefits and Limitations
Payment is considered for any health-care service that is medically necessary and for which FFP is available. CCP benefits are allowable services not currently covered under Texas Medicaid (e.g., speech-language pathology [SLP] services for nonacute conditions, PDN, prosthetics, orthotics, apnea monitors and some durable medical equipment [DME], some specific medical nutritional products, medical nutrition services, inpatient rehabilitation, travel strollers, and special needs car seats). CCP benefits also include expanded coverage of current Texas Medicaid services where services are subject to limitations (e.g., diagnosis restrictions for total parenteral nutrition [TPN] or diagnosis restrictions for attendant care services).
Requests for services that require a prior authorization must be submitted to TMHP. Prior authorization is a condition for reimbursement, not a guarantee of payment. For information about specific benefits, providers can refer to provider-specific sections of this manual.

Payment cannot be made for any service, supply, or equipment for which FFP is not available. The following are some examples:

- Vehicle modification, mechanical, or structural (such as wheelchair lifts)
- Structural changes to homes, domiciles, or other living arrangements
- Environmental equipment, supplies, or services, such as room dehumidifiers, air conditioners, filters, space heaters, fans, water purification systems, vacuum cleaners, and treatments for dust mites, rodents, and insects
- Ancillary power sources and other types of standby equipment (except for technology-dependent clients such as those who are ventilator-dependent for more than six hours per day)
- Educational programs, supplies, or equipment (such as a personal computer or software)
- Equine or hippotherapy
- Exercise equipment, home spas or gyms, toys, therapeutic balls, or tricycles
- Tennis shoes
- Respite care (relief to caregivers)
- Aids for daily living (toothbrushes, spoons, reachers, and foot stools)
- Take-home drugs from hospitals (Eligible hospitals may enroll in and bill Vendor Drug Program (VDP). Pharmacies that want to enroll should call 1-512-491-1429)
- Therapy involving any breed of animal

### 2.2.4 Prior Authorization and Documentation Requirements

**Prior authorization is a condition for reimbursement; it is not a guarantee of payment.** A prior authorization number (PAN) is a TMHP-assigned number establishing that a service or supply has been determined to be medically necessary and for which FFP is available. It is each provider’s responsibility to check the client’s Medicaid Identification (Form H3087) at the time each service is provided to verify eligibility. Any service provided while the client is not eligible cannot be reimbursed by TMHP. The responsibility for payment of services is determined by private arrangements made between the provider and client.

Prior authorization of CCP services may be requested in writing by completing the appropriate request form, attaching any necessary supportive documentation, and mailing or faxing it to the TMHP-CCP department. Prior authorization may also be requested through the TMHP website. (Providers can refer to subsection 5.4.1, “Prior Authorization Requests Through the TMHP Website” in Section 5, “Prior Authorization” (Vol. 1, General Information) for additional information to include, mandatory documentation, and retention requirements). All requested information on the form must be completed, or the request is returned to the provider. Incomplete forms are not accepted. If prior authorization is granted, the potential service provider (such as the DME supplier, pharmacy, registered nurse (RN), or physical therapist) receives a letter that includes the PAN, the procedures prior authorized, and the length of the authorization. Providers are notified in writing when additional information is needed to process the request for services.

Written requests for prior authorization are mandatory for the following services:

- The purchase of apnea monitors and the rental of apnea monitors for clients who are 5 months of age and older or after an initial two months of rental
- Diapers, wipes, and underpads for clients who are birth through 3 years of age
- Customized and noncustomized DME not authorized under Texas Medicaid (Title XIX) Home Health Services
- Formula for a client who is birth through 20 years of age if the client does not have a gastrostomy (G-tube)/jejunostomy or nasogastric tube or a metabolic disorder
- Inpatient freestanding psychiatric services
- Inpatient freestanding rehabilitation services
- Gastrostomy buttons (G-buttons) not authorized under Texas Medicaid (Title XIX) Home Health Services
- Non-face-to-face clinician-directed care coordination services
- Orthotics and prosthetics
- PDN
- PCS—Prior authorization requests for PCS services can only be submitted by DSHS. Providers can refer to subsection 2.8, “Personal Care Services (PCS) (CCP)” in this handbook for the authorization criteria.
- OT, PT, ST services
- TPN

Providers must submit a CCP Prior Authorization Request Form and documentation to support medical necessity to the CCP department before providing services. Providers must submit the CCP Prior Authorization Request Form when requesting a medically necessary service if the service is not addressed in the Texas Medicaid Provider Procedures Manual and the client is 20 years of age or younger.

**Important:** Documentation to support medical necessity of the service, equipment, or supply (such as a prescription, letter, or medical records) must be current, signed, and dated by a physician (M.D. or D.O.) before services are performed. Providers must keep the information on file.

**Refer to:** CCP provider-specific sections for prior authorization requirements of specific services.

### 2.2.4.1 Diagnosis Coding

All providers must obtain the client’s medical diagnosis from the physician. This information must be reflected on each claim submitted to TMHP using ICD-9-CM coding.

### 2.2.4.2 Drug and Medical Device Approval

Manufacturers may request to have drug or medical device products added as a CCP benefit by sending the information in writing to the following address:

```plaintext
HHSC
1100 West 49th Street
Austin, TX 78756-3179
```

HHSC reviews the information. Requests for consideration must not be sent to TMHP.

### 2.2.4.3 Physician Signature

The dated signature of the physician (M.D. or D.O.) on a prescription or CCP Authorization Request Form must be current to the service date(s) of the request, i.e., the signature must always be on or before the service start date and no older than three months before the current date(s) of service requested. Physician signatures dated after the service start date on initial requests cannot be accepted as documentation supporting medical necessity for dates of service prior to the signature date. A request for prior
authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply. If services begin as a result of a verbal order before the physician’s dated signature, proof of the verbal order must be submitted with the request.

Stamped signatures and dates are not accepted on CCP Authorization Request Forms or prescriptions for CCP prior authorized services, supplies, or equipment. Verbal orders must be cosigned and dated by a physician (M.D. or D.O.) within two weeks, per provider policy. Signatures of nurse practitioners (NPs), clinical nurse specialists (CNSs), physician assistants (PAs), or doctors of philosophy (PhDs) are not accepted on CCP Authorization Request Forms or prescriptions for CCP prior authorized services.

Physician prescriptions must be specific to the type of service requested. For example, if the provider is requesting PT, the prescription must request physical therapy, not just therapy.

2.3 Clinician-Directed Care Coordination Services (CCP)

2.3.1 Services/Benefits and Limitations

Clinician-directed (physician, APRN, and PA) care coordination services are a benefit of CCP for eligible clients who are birth through 20 years of age and have special health needs. These services are payable only to the clinician (primary care, specialist, or sub-specialist) who provides the medical home for the client.

To provide a medical home for the client, the primary care clinician directs care coordination together with the client and family. Care coordination consists of managing services and resources for clients with special health needs and their families to maximize the clients’ potential and provide them with optimal health care.

Clinician-directed care coordination services (face-to-face and non-face-to-face) must include the following components:

- A written care plan (either a formal document or documentation contained in the client’s progress notes) developed and revised by the medical home clinician, in partnership with the client, family, and other agreed-upon contributors. This plan is shared with other providers, agencies, and organizations involved with the care of the client, including educational and other community organizations with permission of the client or family. The care plan must be maintained by the medical home clinician and reviewed every six months or more frequently as necessary for the client’s needs.

- Care among multiple providers that are coordinated through the clinician.

- A central record or database maintained by the medical home clinician containing all pertinent medical information, including hospitalizations and specialty care.

- Assistance for the client or family in communicating clinical issues when a client is referred for a consultation or additional care, such as evaluation, interpretation, implementation, and management of the consultant recommendations for the client or family in partnership and collaboration with other providers, the client, or family.

Clinician-directed care coordination services must also include the supervision of the development and revision of the client’s emergency medical plan in partnership with the client, the family, and other providers for use by emergency medical services (EMS) personnel, utility service companies, schools, other community agencies, and caregivers.

Face-to-face care coordination services are encompassed within the various levels of evaluation/management E/M encounters and prolonged services.

Non-face-to-face clinician-directed care coordination services include:

- Prolonged services (procedure codes 99358 and 99359).

- Medical team conference (procedure code 99367).
• Care plan oversight/supervision, including telephone consultations with a specialist or subspecialist (procedure codes 99339, 99340, 99374, 99375, 99377, 99378, 99379, and 99380).

• Specialist or subspecialist telephone consultations (procedure code 99499 with modifier U9)

Non-face-to-face clinician-directed care coordination services are not considered case management by Texas Medicaid.

Specifically, non-face-to-face medical home clinician oversight/supervision of the development or revision of a client’s care plan may include the following activities, which do not have to be contiguous:

• Review of charts, reports, treatment plans, and lab or study results, except for the initial interpretation or review of lab or study results ordered during or associated with a face-to-face encounter.

• Telephone calls with other Medicaid-enrolled health-care professionals (not employed in the same practice) involved in the care of the client.

• Telephone or face-to-face discussions with a pharmacist about pharmacological therapies (not just ordering a prescription).

• Medical decision-making.

• Activities to coordinate services, if the coordination activities require the skill of a clinician.

• Documenting the services provided, which includes writing a note in the client’s chart describing the services provided, decision-making performed, and the amount of time spent performing the countable services, including the start and stop times and time spent by the physician working on the care plan after the nurse has conveyed pertinent information from agencies/facilities to the physician.

The following activities are not covered as non-face-to-face clinician supervision of the development or revision of the client’s care plan (care plan oversight services):

• Time that the staff spends getting or filing charts, calling home health agencies or clients, and similar administrative actions.

• Clinician telephone calls to client or family, except when necessary to discuss changes in client’s care plan.

• Clinician time spent telephoning prescriptions to a pharmacist (does not require clinician work and does not require a clinician to perform).

• Clinician time getting or filing the chart, dialing the telephone, or time on hold (does not require clinician work and does not meaningfully contribute to the treatment of the illness or injury).

• Travel time.

• Time spent preparing claims and for claims processing.

• Initial interpretation or review of lab or study results that were ordered during or associated with a face-to-face encounter.

• Services included as part of other evaluation and management (E/M) services.

• Consultations with health professionals not involved in the client’s case.

• Work included in hospital discharge day management (procedure codes 99238 and 99239) and discharge from observation (procedure code 99217).

2.3.1.1 Non-Face-to-Face Services

2.3.1.1.1 Non-Face-to-Face Medical Conferences

Procedure code 99367 must be used when billing for medical team conferences.
2.3.1.1.2 Non-Face-to-Face Clinician Supervision of a Home Health Client
Procedure code 99374 or 99375 must be used when billing for services requiring interaction with a home health agency.

2.3.1.1.3 Non-Face-to-Face Clinician Supervision of a Hospice Client
Procedure code 99377 or 99378 must be used when billing for services requiring interaction with a hospice.

2.3.1.1.4 Non-Face-to-Face Clinician Supervision of a Nursing Facility Client
Procedure code 99379 or 99380 must be used when billing for services requiring interaction with a nursing facility.

2.3.1.1.5 Other Non-Face-to-Face Supervision
Procedure code 99339 or 99340 must be used when billing for services requiring interaction with an independently-enrolled nurse or other provider (e.g., not a home health agency, nursing facility, or hospice provider).

2.3.1.1.6 Non-Face-to-Face Prolonged Services
Procedure code 99358 or 99359 must be used when billing for prolonged services without face-to-face contact. This service is to be reported in addition to other clinician services, including E/M services at any level, or health-care professionals outside of an home health agency, hospice, or nursing facility.

Non-face-to-face prolonged services are limited to a maximum of 90 minutes once per client by the same provider unless one of the following significant changes in the client’s clinical condition occurs:

- The client will soon be, or has recently been, discharged from a prolonged and complicated hospitalization that required coordination of complex care with multiple providers in order for the client to be adequately cared for in the home.
- The client has experienced recent trauma resulting in new medical complications that require complex interdisciplinary care.
- The client has a new diagnosis of a medically complex condition requiring additional interdisciplinary care with additional specialists.

Procedure code 99359 must be billed on the same date of service as procedure code 99358. Additional prolonged non-face-to-face services may be authorized if the provider submits supporting documentation for authorization.

Procedure code 99358 must be used to report the first hour of prolonged services and must be billed with the appropriate physician E/M procedure code listed in the table below. Prolonged services of less than 30 minutes are considered part of the first hour.

<td>99245 99251 99252 99253 99254 99255 99304 99305 99306 99307</td>
</tr>
<tr>
<td>99308 99309 99310 99318 99324 99325 99326 99327 99328 99334</td>
</tr>
<tr>
<td>99335 99336 99337 99341 99342 99343 99344 99345 99347 99348</td>
</tr>
<tr>
<td>99349 99350</td>
</tr>
</tbody>
</table>

Procedure code 99359 is used to report an additional 15 to 30 minutes of prolonged non-face-to-face services beyond the first hour. Prolonged services of less than 15 minutes beyond the first hour are considered part of the first hour.
2.3.1.1.7 Non-Face-to-Face Specialist or Subspecialist Telephone Consultation

Telephone consultations are limited to two every six months to the same provider and will not be reimbursed to the clinician providing the medical home.

The clinician providing the medical home must have an authorization on file for one of the following procedure codes before the specialist or subspecialist can be reimbursed:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99339</td>
</tr>
</tbody>
</table>

Because the specialist or sub-specialists cannot be reimbursed without the medical home clinician’s current prior authorization information, the clinician providing the medical home should provide their information to the specialist or subspecialist.

The specialist or subspecialist will not be separately reimbursed for the telephone consultation if he or she is the medical home clinician because care plan oversight by the medical home provider includes telephone consultations. The referring provider identifier and prior authorization number must be submitted on the claim.

2.3.1.1.8 General Requirements for Non-Face-to-Face Clinician-Directed Care Coordination Services

These services may be reimbursed for the medical home clinician time involved in this coordination. The clinician billing the services must personally perform the services. Care coordination services delegated to or performed by others do not count towards care coordination reimbursement. Care coordination provided during post-surgical care is a benefit if the care is unrelated to the surgery.

2.3.1.1.9 Non-Face-to-Face Care Plan Oversight

The medical home clinician who bills for the care plan oversight must be the clinician who signed the POC in the home or domiciliary (procedure codes 99339 and 99340), home health agency (procedure codes 99374 and 99375), hospice (procedure codes 99377 and 99378), or nursing facility (procedure codes 99379 and 99380).

Procedure code 99339 is denied when billed on the same date of service by the same provider as procedure code 99340.

Procedure code 99374 is denied when billed on the same date of service by the same provider as procedure code 99375.

Procedure code 99377 is denied when billed on the same date of service by the same provider as procedure code 99378.

Procedure code 99379 is denied when billed on the same date of service by the same provider as procedure code 99380.

Care plan oversight services may be reimbursed for the clinician time involved in this coordination. The clinician billing the services must personally perform the services. Care coordination services delegated to or performed by others do not count towards care coordination reimbursement.

Only two clinician-directed care plan oversight services (procedure codes 99339 or 99340, 99374 or 99375, 99377 or 99378, and 99379 or 99380) are reimbursed every six months.

Payment is made only to one clinician per client per calendar month for procedure code 99374 or 99375.

The medical home clinician may not have a significant financial or contractual relationship with the home health agency as defined in 42 CFR §424.

The medical home clinician may not be the medical director or employee of the hospice and may not furnish services under arrangements with the hospice, including volunteering.
2.3.1.10 Medical Team Conference

One medical team conference (procedure code 99367) may be reimbursed once every six months when the medical home coordinating clinician attests that they are providing the medical home for the client. The coordinating clinician may be the client’s primary care provider or a specialist.

Additional medical team conferences may be considered with documentation of a change in the client’s medical home.

The medical team conference time must be documented in the client’s record.

2.3.1.2 Face-to-Face Services

2.3.1.2.1 General Requirements for Face-to-Face Clinician-Directed Care Coordination Services

Providers must use the most appropriate face-to-face E/M procedure codes to bill for care coordination services.

- When counseling or care coordination requires more than 50 percent of the client or family encounter (face-to-face time in the office or other outpatient setting, or floor/unit time in the hospital), then time may be considered the key or controlling factor to qualifying for a particular level of E/M service.

- Counseling is a discussion with the client or family concerning diagnostic studies or results, prognosis, risks and benefits, management options, importance of adhering to the treatment regimen, and client and family education.

Modifiers must be used as appropriate for billing.

Any face-to-face inpatient or outpatient E/M procedure code that is a benefit of Texas Medicaid, except hospital discharge-day management (procedure codes 99238 and 99239) and discharge from observation (procedure code 99217), may be billed on the same day as the following non-face-to-face clinician-directed care coordination procedure codes when the procedure requires significant, separately-identifiable E/M services by the same physician on the same day.

<table>

</tr>
</thead>
<tbody>
<tr>
<td>99339</td>
</tr>
<tr>
<td>99380</td>
</tr>
</tbody>
</table>

2.3.2 Prior Authorization and Documentation Requirements

Non-face-to-face clinician-directed care coordination services provided by the medical home require prior authorization. Providers must submit a request for prior authorization within seven business days of the date of service. Prior authorization is limited to a maximum of six months. Prior authorization is required to recertify the client for additional six-month periods and requires submission of a new request with documentation supporting medical necessity for ongoing services.

Prior authorization for initial non-face-to-face clinician-directed care coordination requires documentation of at least one covered face-to-face inpatient or outpatient E/M visit by the medical home clinician directing the care coordination during the six months preceding the provision of the first non-face-to-face care coordination service.

Prior authorization for subsequent non-face-to-face clinician-directed care coordination services requires at least one covered face-to-face inpatient or outpatient E/M visit by the medical home clinician directing the care coordination during the previous 12 months or more frequently as indicated by the client’s condition.
Prior authorization of CCP services may be requested in writing by completing a CCP Prior Authorization Request Form, attaching the necessary supportive documentation as detailed below, and mailing or faxing it to the TMHP-CCP department:

Texas Medicaid & Healthcare Partnership
Comprehensive Care Program
PO Box 200735
Austin, TX 78720-0735
Fax: 1-512-514-4212

For prior authorization to be considered, clients must require complex and multidisciplinary care modalities involving regular clinician development or revision of care plans, review of subsequent reports of client status, and review of related laboratory and other studies.

- **Medically complex**: The health care needed by a Medicaid client achieves the designation of medically complex when the approved POC necessitates a clinical professional practicing within the scope of his or her license and in the context of a medical home to coordinate ongoing treatment to ensure its safe and effective delivery. The diagnosis must be covered under Texas Medicaid and be characterized by one of the following:
  - Significant and interrelated disease processes that involve more than one organ system (including behavioral health diagnoses) and require the services of two or more licensed clinical professionals, specialists, or subspecialists.
  - Significant physical or functional limitations that require the services of two or more therapeutic or ancillary disciplines, including, but not limited to, nursing, nutrition, OT, PT, ST, orthotics, and prosthetics.
  - Significant physical, developmental, or behavioral impairment that requires the integration of two or more medical or community-based providers, including, but not limited to, educational, social, and developmental professionals, that impact the care of the client.

- **Multidisciplinary Care**: Care is multidisciplinary when the medically necessary covered services of an approved POC include the need to coordinate the assessment, treatment, or services of a Medicaid-enrolled clinical provider with two or more additional medical, educational, social, developmental, or other professionals impacting the health care of the client.

Prior authorization is effective for care coordination services provided over a period of six months. Medical home clinicians must submit a revised care plan for subsequent periods of prior authorization.

Documentation of the following components must be submitted with the prior authorization form to obtain an initial authorization or renewal:

- A current medical summary, encompassing all disciplines and all aspects of the client’s care, and containing key information about the client’s health, including conditions, complexity, medications, allergies, past surgical procedures, and so on.
- A current list of the main concerns/issues/problems as well as key strengths/assets and the related current clinical information including a list of all diagnoses with ICD-9-CM diagnosis codes.
- Planned action steps/interventions to address the concerns and to sustain/build strengths, with the expected outcomes.
- Disciplines involved with the client’s care and how the multiple disciplines will work/are working together to meet the client’s need. Providers must explain how the multidisciplinary approach will/do benefit the client’s needs.
- Short-term and long-term goals with timeframes.
The supporting documentation can be any of the following:

- A formal written care plan
- Progress note detailing the care coordination planning
- A letter of medical necessity detailing the care plan oversight and care coordination

Clinician-directed care coordination services must be documented in the client’s medical record. Documentation must support the services being billed and must include a record of the medical home clinician’s time spent performing specific care coordination activities, including start and stop times. The documentation must also include a formal care plan and an emergency services plan. The supporting documentation maintained in the client’s medical records must be dated and include the following components and requirements:

- Problem list
- Interventions
- Short-term and long-term goals
- Responsible parties

Client medical records are subject to retrospective review.

Documentation for care coordination provided during post-surgical care must clearly indicate the care coordination is unrelated to the surgery.

2.3.2.1 Documentation Requirements for the Medical Home Clinician for a Telephone Consult with a Specialist

The clinician providing the medical home must maintain the following documentation in the client’s medical record:

- Start and stop times showing that the consultation was at least 15 minutes
- The reason for the call
- The specialist’s or subspecialist’s medical opinion
- The recommended treatment or laboratory services
- The name of the specialist or subspecialist

2.3.2.2 Documentation Requirements for the Specialist or Subspecialist for a Telephone Consult with the Medical Home Clinician

Specialists or subspecialists must complete and retain the Specialist or Subspecialist Telephone Consultation Form for Non-Face-to-Face Clinician Directed Care Coordination Services-CCP. These records are subject to retrospective review. The supporting documentation must include, but is not limited to the following:

- The client’s name, date of birth, and Medicaid identification number
- Start and stop times indicating the consultation lasted at least 15 minutes
- The reason for the call
- The specialist’s or subspecialist’s medical opinion
- The recommended treatment or laboratory services
- The name and phone number of the clinician providing the medical home
- Provider information for the specialist’s or subspecialist’s and the clinician providing the medical home
2.3.3 Claims Information

Claims for clinician-care coordination services must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

2.3.4 Reimbursement

Clinician-directed care coordination services are reimbursed in accordance with 1 TAC §355.8441.

2.4 Comprehensive Outpatient Rehabilitation Facilities (CORFs)/Outpatient Rehabilitation Facilities (ORFs)

2.4.1 Enrollment

CORFs and ORFs must be certified by Medicare, have a valid provider agreement with HHSC, and have documentation that the TMHP enrollment process has been completed.

For questions about enrollment or billing, call the TMHP Contact Center at 1-800-925-9126.

Refer to: Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for information about enrollment procedures.

2.4.2 Services/Benefits and Limitations

CORFs and ORFs can bill only outpatient rehabilitation services to Texas Medicaid for CCP clients and all CORF and ORF services require prior authorization.

Medicaid clients who are birth through 20 years of age are entitled to all medically necessary services under the following conditions:

- The requested services correct or ameliorate the client’s disability, physical or mental illness, or condition.
- No third party resource (TPR) is financially responsible for the services.
- The documentation must support medical necessity clearly and consistently and must describe the client’s current diagnosis, functional status, and condition.

Providers must consistently describe the treatment throughout the documentation and provide a sufficient explanation as to how the requested services correct or ameliorate the client’s disability, physical or mental illness, or condition.

The client must be eligible for CCP and under a physician’s treatment for consideration of reimbursement.

Clients receiving therapy services reimbursed by CCP must have conditions that require ongoing medical supervision. To establish medical necessity, a physician’s prescription and a revised therapy treatment plan are required at least once every six months. Therapy evaluations and treatment must be provided according to the current written orders of a physician and based on medical necessity. The physician must maintain documentation of medical necessity, including treatment plan and therapy evaluation or re-evaluation. Therapy services for acute conditions are reimbursed by Texas Medicaid.
OT, PT, and ST services require prior authorization. Providers must use modifier GN (ST), GO (OT), or GP (PT) to identify the type of therapy being requested. Providers must file claims with these modifiers to identify the type of therapy performed. Claims received without the appropriate modifiers are denied with the explanation of benefit (EOB), “This procedure requires a modifier. Please appeal claim with the appropriate modifier.”

OT, PT, and ST evaluations must be billed using appropriate procedure codes. These procedure codes must be billed with a quantity of one for each type of therapy performed (OT, PT, or ST), regardless of the time spent with the client.

OT, PT, and ST must be billed in increments of 15 minutes (i.e., a quantity of 1 equals 15 minutes; a quantity of 2 equals 30 minutes, and so on).

Refer to: Subsection 2.10, “Therapy Services (CCP)” for information about billing 15-minute increments.

Providers can only bill for time spent with the client present, including assisting the client with learning to use adaptive equipment and assistive technology. The evaluation and re-evaluation procedure codes are inclusive payments that include the written report and other administrative tasks. Time spent without the client present, such as report writing and training aides to work with the client (unless the client is present during training), is not billable.

Evaluations and re-evaluations are reimbursed per evaluation or re-evaluation with a quantity of one. An evaluation and therapy of the same discipline/type are not reimbursable when they are performed on the same date of service, e.g., PT evaluation and PT are not payable for the same date of service. OT, PT, and ST evaluations are limited to once every 180 days, any provider. OT, PT, and ST re-evaluations are limited to once every 30 days, any provider. An evaluation or re-evaluation performed on a more frequent basis would be outside the current benefit limitations and would only be considered for reimbursement with prior authorization or written documentation of medical necessity. CORFs and ORFs are subject to a maximum of eight units (two hours) each of OT, PT, or ST services per date of service, per client.

The documentation retained in the client’s file must include the billable start time, billable stop time, total billable minutes, and activity that was performed.

The procedure codes below may be payable to CORFs and ORFs based on a PPS fee schedule.

2.4.3 Prior Authorization and Documentation Requirements

A request for prior authorization must include documentation from the provider that supports the medical necessity of the service.

The initial therapy request must include the following:

- A Request for Initial Outpatient Therapy (Form TP-1) that has been signed and dated by the therapist and physician.
- A copy of the current evaluation that has been signed and dated by the therapist.
- Documentation that indicates the treatment goals.
- Documentation that indicates the anticipated measurable progress toward goals.
- Documentation that explains the client’s gross or fine motor delays or expressive or receptive delays in years or months compared to chronological age.

The extension of the therapy request must include the following:

- A Request for Extension of Outpatient Therapy (Form TP-2) signed and dated by the therapist and physician.
- A summary statement of measurable progress made during the treatment period.

</tbody>
</table>
• Documentation indicating new treatment goals.
• Documentation indicating anticipated measurable progress for the next treatment period.

All physician signatures on the TP-1 and TP-2 forms, physician orders, and other documentation must be current, unaltered, original, handwritten, and dated. Computerized or stamped signatures and dates are not accepted. Electronic signatures from an RN or the therapist are acceptable.

Refer to: Form CH.13, “Request for Initial Outpatient Therapy (Form TP-1)” in this handbook.
Form CH.14, ”Request for Extension of Outpatient Therapy (Form TP-2) (2 Pages)” in this handbook.

If a provider discontinues therapy with a client and a new provider begins therapy during an existing authorization period, a new evaluation must be submitted. Prior authorization is mandatory and is not a guarantee of payment. Providers must adhere to filing guidelines for payment consideration.

2.4.4 Claims Information

Providers must submit services provided by CORFs and ORFs in an approved electronic claims format or on the UB-04 CMS-1450 paper claim form. Providers may purchase these claim forms from the vendor of their choice. TMHP does not supply the forms. Submit electronic claims with a PAN. Failure to provide a PAN on an electronic claim results in claim denial.

Refer to: Subsection 2.4, “Comprehensive Outpatient Rehabilitation Facilities (CORFs)/Outpatient Rehabilitation Facilities (ORFs)” in this handbook for more information about PANs.

Revenue and Current Procedural Terminology (CPT) procedure codes are used when submitting claims for CORF and ORF services. The only POS is outpatient facility (POS 5).

The PAN must be identified in Block 63 of the UB-04 CMS-1450 claim form or the appropriate field of the electronic software.

Refer to: Form CH.22, “Comprehensive Outpatient Rehabilitation Facility (CORF) (CCP Only)” in this handbook for a claim form example.

Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

2.4.5 Reimbursement

CORFs and ORFs are reimbursed in accordance with 1 TAC 355.8441. See the applicable fee schedule on the TMHP website at www.tmhp.com.

2.5 Durable Medical Equipment (DME) Supplier (CCP)

2.5.1 Enrollment

To be eligible to participate in CCP, providers of DME (including customized or non-basic medical equipment) and expendable medical supplies must be enrolled in Medicare.

Home health agencies that provide DME and supplies should refer to subsection 2.1, “Enrollment” in Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks) to enroll as DME–Home Health Services (DMEH) providers.
2.5.1.1 Pharmacies (CCP)

Pharmacy providers are eligible to participate in CCP. To be enrolled in CCP, the pharmacy must also be enrolled in the Vendor Drug Program (VDP).

This enrollment allows pharmacy providers to bill for those medications and supplies payable by Medicaid for clients who are birth through 20 years of age but not covered by VDP (e.g., some over-the-counter drugs, some nutritional products, diapers, and disposable or expendable medical supplies). Pharmacy providers must continue to bill HHSC for drugs covered under VDP.

Refer to: Subsection 2.2.2, “Enrollment” in this handbook for more information about CCP enrollment procedures.

Appendix B: Vendor Drug Program (Vol. 1, General Information).

Section 2, “Texas Medicaid (Title XIX) Home Health Services” in Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks) for details about coverage through Texas Medicaid (Title XIX) Home Health Services.

2.5.2 Services/Benefits and Limitations

Medicaid clients who are birth through 20 years of age are entitled to all medically necessary DME and expendable medical supplies. DME or supplies are medically necessary when required to correct or ameliorate disabilities or physical or mental illnesses or conditions. Any numerical limit on the amount of a particular item of DME or expendable medical supply can be exceeded if medically necessary for Medicaid clients who are birth through 20 years of age. Likewise, time periods for replacement of DME and expendable medical supplies do not apply to Medicaid clients who are birth through 20 years of age if the replacement is medically necessary.

DME is defined as medical equipment that is manufactured to withstand repeated use, ordered by a physician for use in the home, and required to correct or ameliorate the client’s disability, condition, or illness.

Because there is no single authority (such as a federal agency) that confers the official status of “DME” on any device or product, HHSC retains the right to make such determinations with regard to DME covered by Texas Medicaid. DME covered by Texas Medicaid must either have a well-established history of efficacy or, in the case of novel or unique equipment, valid peer-reviewed evidence that the equipment corrects or ameliorates a covered medical condition or functional disability.

Requested DME may be a benefit of Texas Medicaid when it meets the Medicaid definition of DME.

The majority of DME and expendable medical supplies are covered through Texas Medicaid (Title XIX) Home Health Services.

If a service cannot be provided through Texas Medicaid (Title XIX) Home Health Services, the service may be covered through CCP if it is determined to be medically necessary for the client and if FFP is available.

If a DME provider is unable to deliver a piece of equipment, the provider must allow the client the option of obtaining the DME or expendable medical supplies from another provider.

Periodic rental payments are made only for the lesser of the following:

- The period of time the equipment is medically necessary
- The total monthly rental payments equal the reasonable purchase cost for the DME

DME will be purchased when a purchase is determined to be medically necessary and more cost effective than leasing the device with supplies. Only new, unused equipment will be purchased. When a provider is replacing a piece of rental DME with purchased DME, the provider must supply a new piece of DME to the client.
Purchase is justified when the estimated duration of need multiplied by the rental payments would exceed the reasonable purchase cost of the equipment or it is otherwise more practical to purchase the equipment.

DME repair will be considered based on the age of the item and cost to repair it. A request for repair of DME must include:

- A statement or medical information that is provided by the attending physician and that substantiates the medical appliance or equipment continues to serve a specific medical purpose.
- An itemized estimated cost list from the vendor or DME provider who will make the repairs.

Rental equipment may be provided to replace purchased medical equipment for the period of time it will take to make necessary repairs to purchased medical equipment.

All adjustments and modifications that are made within the first six months after delivery are considered part of the purchase price. However, DME that has been delivered to the client’s home and then found to be inappropriate for the client’s condition will not be eligible for an upgrade within the first six months following purchase unless there had been a significant change in the client’s condition, as documented by the physician familiar with the client.

Rental reimbursement to the same provider cannot exceed the purchase price, except as addressed in specific policies.

All DME purchased for a client becomes the Medicaid client’s property upon receipt of the item. Delivered equipment will become the Medicaid client’s property in the following instances even though it will not be prior authorized or reimbursed:

- Equipment delivered to the client before the physician signature date on the CCP Prior Authorization Form or prescription.
- Equipment delivered more than three business days before obtaining prior authorization from TMHP that meets the criteria for purchase.

As long as the client is eligible for CCP services on the date the custom equipment is ordered from the manufacturer, the provider must use the order date as the date of service since custom equipment is client specific and cannot be used for another client.

To establish medical necessity of the equipment for the client, the provider must have on file in the client’s records current documentation that is signed by a physician (e.g., signed and dated prescription) showing the following:

- A diagnosis relative to each item requested.
- The specific type of supply needed.
- The length of time needed.

**2.5.2.1 Purchase Versus Equipment Rental**

When providing equipment not prior authorized under Texas Medicaid (Title XIX) Home Health Services for CCP clients with long-term or chronic conditions, it is more cost-effective, in many cases, to purchase the equipment rather than rent it. The client’s condition and length of time the equipment will be used must be carefully assessed before prior authorization for rental or purchase is requested. CCP nurses determine whether the equipment will be rented, purchased, repaired, or modified based on the client’s needs, the duration of use, and the age of the equipment.

CCP does not pay for the purchase of certain types of equipment; consequently, long-term rental may be considered. Most other equipment is rented for only four months initially. During this time, the provider must assess whether the equipment should be purchased before the rental lapses. Rentals and purchases must be prior authorized.
After prior authorization is obtained for purchase, new equipment must be provided and the rental discontinued. CCP does not purchase used equipment.

Providers of customized or nonbasic medical equipment also must be enrolled as Medicare DME providers.

2.5.3 Prior Authorization and Documentation Requirements

Providers can request prior authorization for most DME through the TMHP website. Providers that make written requests for prior authorization must complete Form CH.2, “CCP Prior Authorization Request Form” in this handbook, and they must attach the documentation necessary to support the request. The documentation must include a current prescription that has been signed and dated by a physician (M.D. or D.O.), and it must be mailed or faxed to TMHP with the prior authorization request. For specific policy information not contained in this manual related to the purchase of DME, providers can call TMHP-CCP Customer Service at 1-800-846-7470.

A completed CCP Prior Authorization Request Form prescribing the DME or medical supplies must be signed and dated by the prescribing physician familiar with the client before requesting prior authorization. All signatures and dates must be current, unaltered, original, and handwritten. Computerized or stamped signatures and dates are not accepted. The completed CCP Prior Authorization Request Form must be maintained by the requesting provider and the prescribing physician. The original signature copy must be kept in the physician’s medical record for the client.

To avoid unnecessary denials, the physician must provide correct and complete information, including accurate documentation of the medical necessity for the equipment/services requested. The physician must maintain documentation of medical necessity in the client’s medical record. The requesting provider may be asked for additional information to clarify or complete a request for the mobility aid.

A determination is made by the CCP nurses as to whether the equipment will be rented, purchased, repaired, or modified based on the client’s needs, duration of use, and age of equipment.

A request for prior authorization must include documentation from the provider to support the medical necessity of the service, equipment, or expendable medical supply. Physician prescriptions must be specific to the item requested. For example, if the provider is requesting a customized wheelchair, the prescription must request a customized wheelchair, not just a wheelchair. Providers must submit a CCP Prior Authorization Request Form and documentation to support medical necessity to the CCP department before providing services. Providers must obtain prior authorization within three business days of the requested date of service.

2.5.3.1 Equipment Accessories

CCP may consider prior authorization of equipment accessories, such as ventilator and oxygen trays and positioning inserts, when supporting documentation takes into account all the client’s needs, capabilities, and physical/mental status.

2.5.3.2 Equipment Modifications

A modification is the replacement of a component due to changes in the client’s condition, not the replacement of a component that is no longer functioning.

DME that has been delivered to the client’s home and then found to be inappropriate for the client’s condition will not be eligible for an upgrade within the first six months following purchase. All modifications that are made within the first six months after delivery are considered part of the purchase price. However, CCP may consider prior authorization of modifications to custom equipment if a change occurs in the client’s needs, capabilities, or physical/mental status that cannot be anticipated. Documentation must include:

- All projected changes in the client’s needs.
• The age of the current equipment, and the cost of purchasing new equipment versus modifying current equipment.

2.5.3.3 Equipment Adjustments
Adjustments do not require supplies.

Labor for adjustments within the first six months after delivery are not prior authorized because these are considered part of the purchase price.

Up to one hour of labor for adjustments may be considered for reimbursement with prior authorization through CCP as needed after the first six months. Providers must use procedure code K0739 for adjustments.

2.5.3.4 Equipment Repairs
Repairs require replacement of components that are no longer functional. Repairs to client-owned equipment may be considered for reimbursement with prior authorization through CCP.

Technician fees are considered part of the cost of the repair. Providers must use procedure code K0739.

Repairs for non-warranty DME may be billed using procedure code K0739. Non-warranty DME repairs will require prior authorization. Providers are responsible for maintaining documentation in the client’s medical record that specifies the repairs and supporting medical necessity.

Rentals may be considered for reimbursement during the repair period of the client’s owned equipment.

Routine maintenance of rental equipment is the provider’s responsibility.

2.5.3.5 DME Certification and Receipt Form
The DME Certification and Receipt Form is required and must be completed before reimbursement can be made for any DME delivered to a client. The certification form must include the name of the item, the date the client received the DME, and the signatures of the provider and the client or primary caregiver.

The DME provider must maintain the signed and dated form in the client’s medical record.

DME claims and appeals that meet or exceed a billed amount of $2,500 for the same date of service will suspend for verification of client receipt of the DME item(s). The DME Certification and Receipt Form must be faxed to 1-512-506-6615. If the claim is submitted without the form or if receipt of the DME item(s) cannot be verified, the DME item(s) on the claim will be denied. TMHP may contact the client that received the product for verification of services rendered.

Refer to: Form CH.5, “DME Certification and Receipt Form (3 Pages)” in this handbook.

2.5.3.6 Documentation of Supply Delivery
Providers must retain individual delivery slips or invoices for each date of service to document the date of delivery for all supplies provided to a client. Providers must disclose this documentation to HHSC or its designee upon request. These records and claims must be retained for a minimum of five years from the date of service (DOS) or until all audit questions, appeals, hearings, investigations, or court cases are resolved. The DOS is the date on which supplies are delivered to the client or shipped by a carrier to the client as evidenced by the dated tracking document attached to the invoice for that date.

Documentation of delivery must include one of the following:

• Delivery slip or invoice signed and dated by client/caregiver.

• A dated carrier tracking document with shipping date and delivery date. The dated carrier tracking document must be attached to the delivery slip or invoice.
The dated delivery slip or invoice must include the client’s full name and address to where supplies were delivered, and an itemized list of goods that includes the descriptions and numerical quantities of the supplies delivered to the client. This document could also include prices, shipping weights, shipping charges, and any other description.

### 2.5.3.7 Specific CCP Policies

Most DME and expendable medical supplies are available under Texas Medicaid (Title XIX) Home Health Services. If the service is not available under Texas Medicaid (Title XIX) Home Health Services, CCP may cover the requested service, if the client is CCP-eligible and the service is medically necessary, requested by a physician, and for which FFP is available.

Refer to: Form DM.1, “DME Certification and Receipt Form (3 pages)” in *Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook* (Vol. 2, Provider Handbooks).

Section 2, “Texas Medicaid (Title XIX) Home Health Services” in *Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook* (Vol. 2, Provider Handbooks) for specific policies.

### 2.5.4 Blood Pressure Devices

#### 2.5.4.1 Services/Benefits and Limitations

The following blood pressure devices and their components are benefits of CCP in the home setting for self-monitoring when the equipment is prescribed by a physician:

- **Manual blood pressure device**: A device that requires manual cuff inflation with real-time visualization of the results displayed on the manometer.

- **Automated blood pressure device**: A device that inflates the cuff manually or automatically and displays the blood pressure results on a small screen.

  Note: *Finger cuff automated blood pressure devices for diagnostic purposes are not a benefit of Texas Medicaid.*

- **Hospital-grade blood pressure device**: A device that includes memory for continuous recording, has an alarm system to notify the caregiver of abnormal readings, and is capable of frequent or continuous automatic blood pressure and heart rate monitoring with correction of motion artifact.

Documentation that supports medical necessity of the requested equipment, including the diagnosis, must be maintained in the client’s medical record and is subject to retrospective review.

#### 2.5.4.1.1 Manual and Automated Blood Pressure Devices

Providers must use procedure code A4660 or A4670 when billing for manual or automated blood pressure devices.

Manual and automated blood pressure devices that have been purchased are anticipated to last a minimum of one year and may be considered for replacement when one year has passed or when the equipment is not functional and not repairable.

Manual and automated blood pressure devices may be reimbursed when billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>4010</td>
</tr>
</tbody>
</table>
2.5.4.1.2 Hospital-Grade Blood Pressure Devices

Providers must use procedure code A9279 with modifier U1 when billing for hospital-grade blood pressure devices.

Hospital-grade blood pressure devices that have been purchased are anticipated to last a minimum of three years and may be considered for replacement when three years have passed or when the equipment is not functional and not repairable.

For clients who are birth through 11 months of age, the rental or purchase of a hospital-grade blood pressure device is a benefit when documentation supports medical necessity and includes an explanation of why the client cannot use a standard automated blood pressure device.

For clients who are 12 months of age and older, the rental or purchase of a hospital-grade blood pressure device is a benefit on a case-by-case basis. Supporting documentation of medical necessity must be provided.

The following indications are recognized by Texas Medicaid for hospital-grade blood pressure devices:

- Hypotension
- Essential hypertension
- Hypertensive heart disease
- Hypertensive renal disease
- Acute pulmonary heart disease
- Chronic pulmonary heart disease
- Cardiomyopathy
- Conduction disorders
- Cardiac dysrhythmias
- Heart failure
- Acute kidney failure
- Chronic kidney disease
- Hydronephrosis
• Vesicoureteral reflux with neuropathy
• Bulbus cordis anomalies and anomalies of cardiac septal closure

All rental costs of the hospital-grade blood pressure device apply toward the purchase price.

2.5.4.1.3 Blood Pressure Device Components, Replacements, and Repairs

The following may be considered for reimbursement of blood pressure device:

• Replacement of blood pressure cuffs (procedure code A4663)
• Replacement of other components (procedure code A4660)
• Repairs of the equipment (procedure code A4660)

2.5.4.2 Prior Authorization and Documentation Requirements

A CCP Prior Authorization Request Form, signed and dated by the physician, must be submitted with the documentation supporting medical necessity for the device. Supporting documentation of medical necessity must include the diagnosis.

2.5.4.2.1 Manual and Automated Blood Pressure Devices

Prior authorization is not required for manual and automated blood pressure devices except when the following situations apply:

• Another blood pressure device is medically necessary within the same year. Replacement of equipment within the same year as the purchase requires prior authorization. When equipment needs to be replaced sooner than the anticipated lifespan, the provider must submit a copy of the police or fire report, when appropriate, and the measures to be taken to prevent reoccurrence.
• The client has a diagnosis code other than those in the diagnosis table listed above. If the client has a diagnosis code other than those listed in the above table, a request for prior authorization for an initial or replacement device with all necessary documentation supporting medical necessity of the blood pressure device.

2.5.4.2.2 Hospital-Grade Blood Pressure Devices

Prior authorization is required for the rental or purchase of a hospital-grade blood pressure device. A determination will be made by HHSC or its designee as to whether the equipment will be rented, purchased, repaired, or modified based on the client’s needs, duration of use, and age of the equipment. Repairs and modifications can only be performed on purchased equipment.

Documentation of medical necessity for the hospital-grade blood pressure device must support the client’s need for self-monitoring and address why an automated blood pressure device will not meet the client’s needs. The documentation must include:

• All pertinent diagnoses
• Initial evaluation
• Symptoms
• Duration of symptoms
• Any recent hospitalizations (within past 12 months)
• Comorbid conditions
• How frequent/continuous self-monitoring will affect treatment
• All pertinent laboratory and radiology results
• Client’s weight
- A family or caregiver(s) who has an understanding of cause and effect and object permanence and who has agreed to accept the responsibility to be trained to use the hospital-grade monitor.

Prior authorization may be granted for a six-month rental period when the request is submitted with documentation of medical necessity supporting the client’s need for self-monitoring and addressing why an automated blood pressure device will not meet the client’s needs.

Recertification for an additional six-month period may be considered when the physician provides current documentation that supports the ongoing medical necessity for self-monitoring and confirms the client or family is compliant with its use.

A hospital-grade blood pressure device will not be considered for prior authorization of purchase until the client has completed a six-month trial period.

Purchase of a hospital-grade blood pressure device may be prior authorized when all of the following criteria are met:
- The client is 12 months of age or older.
- Documentation of medical necessity supports the client’s need for ongoing self-monitoring and addresses why an automated blood pressure device will not meet the client’s needs.

2.5.4.2.3 Blood Pressure Device Components, Replacements, and Repairs

Replacement of blood pressure cuffs and other components may be considered for purchase with prior authorization with documentation of medical necessity that explains the need for the replacement.

Repair of equipment must be prior authorized when irreparable damage has occurred and documentation exists that supports the need for repair. Repair of equipment will be considered after the factory warranty has expired.

2.5.5 Cardiorespiratory (Apnea) Monitor

2.5.5.1 Services/Benefits and Limitations

Apnea monitors are a benefit of CCP for infants. The purchase of an apnea monitor (procedure code E0618 or E0619) is limited to once every five years. The rental of an apnea monitor (procedure code E0619) is limited to once per month.

The rental of an apnea monitor with recording feature may be considered for two months without prior authorization for infants up to 4 months of age with one of the following diagnosis codes.

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>33700</td>
</tr>
<tr>
<td>33709</td>
</tr>
<tr>
<td>4260</td>

<td>77982</td>
</tr>
<tr>
<td>7850</td>
</tr>
<tr>
<td>78603</td>
</tr>
<tr>
<td>V198</td>
</tr>
</tbody>
</table>

Diagnosis code 42789 includes atrial tachycardia (SVT, AV nodal reentry, nodal, and sinoauricular) and bradycardia (nodal, sinoatrial).

Other diagnoses may be considered for prior authorization based on medical necessity. Use of diagnosis code V198 may be considered on appeal, and requires submission of additional documentation to support medical necessity.

Procedure code 94774 may be used by the physician to bill for the interpretation of the apnea monitor recordings.

Electrodes and lead wires (procedure codes A4556 and A4557) for the apnea monitor are a benefit only if the apnea monitor is owned by the client. Additional documentation such as the purchase date, the serial number, and purchasing entity may be requested. Procedure code A4556 may be considered for
purchase for a maximum of 15 pairs per month. Procedure code A4557 may be considered for purchase for a maximum of two pairs per month. Additional lead wires may be requested on appeal with documentation of medical necessity. The physician must provide medical necessity for the electrodes, lead wires, and a statement that the client owns the monitor. If the apnea monitor is rented, the electrodes and lead wires are considered part of the rental fee.

The apnea monitor/pulse oximeter combination device is not a benefit of Texas Medicaid.

2.5.5.2 Prior Authorization and Documentation Requirements

Prior authorization for the purchase of an apnea monitor with or without recording features may be considered for use in the home with one of the diagnosis codes listed in the table above.

Prior authorization is required for rental of an apnea monitor, and may be considered for clients who are birth through 20 years of age that are CCP-eligible when documentation submitted clearly shows that the equipment is medically necessary and will correct or ameliorate the client’s disability or physical or mental illness or condition. Documentation must include one of the following:

- The client is 5 months of age or older.
- A documented cardiorespiratory episode occurred during the initial two-month rental period requiring continued monitoring.

Clients who are 5 months of age and older must have demonstrated an apparent life-threatening event, tracheostomy, anatomic abnormality of the airway, chronic lung disease requiring oxygen or ventilatory support, or other diagnoses based on documented medical necessity.

Prior authorization must be obtained in writing and must include all of the following:

- A completed CCP Prior Authorization Request Form signed and dated by the physician
- Documentation to support medical necessity and appropriateness of the apnea monitor
- A physician interpretation, signed and dated by the physician, of the most recent two month’s apnea monitor downloads if the client has used an apnea monitor

Apnea monitors are not prior authorized if the documentation does not support medical necessity.

2.5.6 Croup Tent/Pulse Oximeter

2.5.6.1 Services/Benefits and Limitations

2.5.6.1.1 Croup Tent

The croup tent consists of a plastic tent and humidification system placed over a crib or bed to provide a high humidity environment.

The rental of a croup tent (procedure code E1399) is a benefit of Texas Medicaid through CCP. Rental of the croup tent includes purchase of the croup tent canopy, rental of a compressor, setup charge, and supplies.

Separate payment is not made for individual components.

2.5.6.1.2 Pulse Oximeter

A pulse oximeter (procedure code E0445) is a benefit of Texas Medicaid through CCP. A higher-level pulse oximeter (procedure code E0445 with modifier TF or TG) may be reimbursed based on documentation of medical necessity. Modifier TF or TG must be submitted in addition to procedure code E0445 depending on the level of care. Modifier TF is used for intermediate level of care, and modifier TG for complex/high level of care.
A pulse oximeter rental is limited to once per month for a maximum of six months. For those clients who require long-term monitoring, recertification may be considered for up to a maximum of six additional months. Purchase may be considered when it is determined to be medically necessary and more cost-effective than leasing the device with supplies. Before purchase, the provider must supply a new pulse oximeter to the client.

A pulse oximeter may be reimbursed for purchase once every five years.

The provider is responsible for retaining a current prescription.

The rental of equipment includes all necessary supplies, adjustments, repairs, and replacement parts. Pulse oximeter sensor probes (procedure code A4606) for client-owned equipment are limited to four per month without prior authorization.

2.5.6.2 Prior Authorization and Documentation Requirements

2.5.6.2.1 Croup Tent

A croup tent requires prior authorization. A completed CCP prior authorization form and documentation to support medical necessity must be submitted to CCP prior authorization unit.

Reimbursement for the croup tent is limited to monthly rental, regardless of whether the therapy is medically necessary for only one day or one week.

2.5.6.2.2 Pulse Oximeter

A pulse oximeter requires prior authorization.

A pulse oximeter may be considered for prior authorization for clients who are birth through 20 years of age who are CCP-eligible when documentation submitted clearly shows that the equipment is medically necessary and will correct or ameliorate the client’s disability or physical or mental illness or condition. Documentation must include the following for the level requested:

- **Level One.** Basic level monitoring capable of spot checks and heart rate. Applicable if there is a caregiver or medical provider identified and present who has been trained in use of the oximeter and how to respond to readings in a medically safe way and the client meets at least one of the following criteria:
  - Client is oxygen- or ventilator-dependent (Less than eight hours per day).
  - Client is clinically stable and able to wean from oxygen or ventilator.
  - Client has other medically necessary condition(s) requiring monitoring of oxygen saturation.

- **Level Two.** Providers must use modifier TF when the oximeter device is for intermediate level of care and continuous monitoring, alarm, memory, and correction of motion artifact. Applicable if the client meets all the following criteria:
  - Client is oxygen- or ventilator-dependent a significant portion of the day (e.g., 8 to 16 hours per day).
  - Client needs continuous monitoring of oxygen saturation during sleep or to maintain optimal levels.
  - There is a caregiver or medical provider identified and present who has been trained in use of the oximeter and how to respond to readings in a medically safe way.

- **Level Three.** Providers must use modifier TG if the oximeter device is for a serious condition and there is critical need for continuous monitoring. Applicable if the client meets all the following criteria:
  - Client has frequent need for changes in oxygen and ventilator settings.
  - Client is oxygen- or ventilator-dependent (e.g., 16 to 24 hours per day).
• Client is in the weaning process from oxygen or ventilator and experiencing respiratory complications.

• Client requires equipment that is motion-sensitive or that has more complex readouts or monitoring capabilities.

• There is a caregiver or medical provider identified and present who has been trained in use of the oximeter and how to respond to readings in a medically safe way.

For all requests providers must:

• Submit the completed Form CH.12, “Pulse Oximeter Form” and Form CH.2, “CCP Prior Authorization Request Form” in this handbook.

• Clearly indicate medical necessity using the TF and TG modifiers on the Pulse Oximeter Form.

• Continue to use the current code for lease (E0445 with modifier RR) and purchase (E0445 with modifier NU).

A pulse oximeter rental includes the system, the sensor probes, and all necessary supplies.

Pulse oximeter sensor probes (procedure code A4606) for client-owned equipment are limited to four per month without prior authorization. Providers may obtain additional probes for clients who are birth through 20 years of age with documentation of medical necessity. Additional probes require prior authorization through CCP.

2.5.7 Donor Human Milk

2.5.7.1 Services/Benefits and Limitations

Donor human milk is a benefit of CCP for eligible THSteps clients who are birth through 11 months of age who are CCP-eligible when documentation submitted clearly shows that it is medically necessary and will correct or ameliorate the client’s disability or physical or mental illness or condition. Documentation must include all of the following:

• The requesting physician has documented medical necessity and appropriateness.

• The parent or guardian has signed and dated an informed consent form indicating that the risks and benefits of using banked donor human milk have been discussed with them.

• The donor human milk bank adheres to quality guidelines consistent with the Human Milk Bank Association of North America or such other standards as may be adopted by HHSC.

Additional donor human milk benefits beyond the limitations listed above may be available to clients who are birth through 20 years of age with documentation of medical necessity.

Procedure code B9998 must be used when requesting or billing for human donor milk.

Donor human milk is reimbursed at a maximum fee determined by HHSC or manual pricing.

Donor human milk is only reimbursed to a Texas Medicaid-enrolled donor milk bank and only for children who are in the home setting.

The physician must address the benefits and risks of using donor human milk, such as HIV, freshness, effects of pasteurization, nutrients, and growth factors to the parent. The physician also must address donor screening, pasteurization, milk storage, and transport of the donor milk. The physician may obtain this information from the donor milk bank.

2.5.7.2 Prior Authorization and Documentation Requirements

Donor human milk may be considered for a maximum of six months per authorization. The authorization may be extended with documentation of medical necessity.
Prior authorization is required for donor human milk provided through Texas Medicaid CCP Services. To obtain prior authorization, providers must complete the CCP Prior Authorization Request Form and a Donor Human Milk Request Form every 180 days. Both the ordering physician and the providing milk bank must maintain copies of the form in the client’s medical records.

The physician ordering the donor human milk must complete all of the fields in Part A of the original form, including the documentation of medical necessity. This information must be substantiated by written documentation in the clinical report. The physician must specify the quantity and the time frame in the Quantity Requested field (e.g., cubic centimeters per day or ounces per month). All of the fields in Part B of the form must be completed by the donor milk bank providing the donor human milk.

The prior authorization request and all completed documentation must be submitted to the TMHP CCP Prior Authorization Unit at:

Texas Medicaid & Healthcare Partnership
Comprehensive Care Program (CCP)
PO Box 200735
Austin, TX 78720-0735
Fax: 1-512-514-4212

The documentation of medical necessity and appropriateness and the signed and dated written informed consent form must be maintained in the client’s clinical records. The documentation of medical necessity must be completed by the physician ordering the donor human milk. The clinical records are subject to retrospective review. The documentation must address all of the following:

- Medical necessity, including why the particular client cannot survive and gain weight on any appropriate formula (e.g., elemental, special, or routine formula or food), or any enteral nutritional product other than donor human milk.
- A clinical feeding trial of an appropriate nutritional product has been considered with each authorization.
- The informed consent provided to the parent or guardian details the risks and benefits of using banked donor human milk.
- A copy of the CCP Prior Authorization Request Form and the Donor Human Milk Request Form.

Refer to: Form CH.6, “Donor Human Milk Request Form” in this handbook.

Refer to: Form CH.2, “CCP Prior Authorization Request Form” in this handbook.

2.5.8 Incontinence Supplies for Clients Who Are Birth Through 3 Years of Age

2.5.8.1 Services/Benefits and Limitations

Incontinence supplies, such as diapers/briefs/pull-ons/liners, wipes, and underpads, may be considered for reimbursement through CCP for those clients who are birth through 3 years of age with a medical condition resulting in an increased urine or stool output beyond the typical output for this age group, such as celiac disease, short bowel syndrome, Crohn’s disease, thymic hypoplasia, AIDS, congenital adrenal hyperplasia, diabetes insipidus, Hirschsprung’s disease, or radiation enteritis.

Lack of bladder or bowel control is considered normal development up to 4 years of age.

Reusable diapers, briefs, pull-ons, liners, wipes, and underpads are not a benefit of CCP. Gloves used to change diapers, briefs, and pull-ons are not considered medically necessary unless the client has skin breakdown or a documented disease that may be transmitted through the urine.

Diaper wipes and underpads may be considered for clients who are receiving diapers, briefs, or pull-ons through CCP.
Skin sealants, protectants, moisturizers, and ointments may be considered for clients who have a documented medical condition that results in chronic incontinence and increased risk of skin breakdown.

External urinary collection devices, including, but not limited to, male external catheters, female collection devices, and related supplies, may be considered with a documented medical condition resulting in an increased urine or stool output beyond the typical output.

Providers must use the following procedure codes when billing for incontinence supplies for clients who are birth through 3 years of age:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

* Procedure codes are limited to a combined total of 300 per month. Requests for services exceeding the amounts listed must be submitted with documentation of medical necessity.

2.5.8.2 Prior Authorization and Documentation Requirements

Prior authorization is required for incontinence supplies through CCP.

A determination is made by HHSC or its designee as to the number of incontinence supplies prior authorized based on the client's medical needs.

A combination of diapers, briefs, pull-ons, and liners may be considered for prior authorization for clients who are birth through 3 years of age and are limited to 300 per month.
To request prior authorization for incontinence supplies, the following documentation must be provided for the item(s) requested:

- Accurate diagnostic information pertaining to the underlying diagnosis/condition as well as any other medical diagnoses/conditions, to include the client’s overall health status
- Diagnosis/condition causing increased urination/stooling
- Client’s height, weight, and waist size
- Number of times per day the physician has ordered the supply be used
- Quantity of disposable supplies requested per month

2.5.9 Mobility Aids

2.5.9.1 Services/Benefits and Limitations

Mobility aids and related supplies, including, but not limited to, strollers, special-needs car seats and travel safety restraints are a benefit to assist clients to move about in their environment. Mobility aids include, but are not limited to, the items detailed on the following pages.

Mobility aids and related supplies may be considered for reimbursement through CCP for clients who are birth through 20 years of age who are CCP-eligible when documentation submitted clearly shows that the equipment is medically necessary and will correct or ameliorate the client’s disability or physical or mental illness or condition. Documentation must include the following:

- Federal financial participation (FFP) is available.
- The client’s mobility status would be compromised without the requested equipment.
- The requested equipment or supplies are safe for use in the home.

Mobility aids may be considered through CCP if the requested equipment is not available through Texas Medicaid (Title XIX) Home Health Services or the client does not meet criteria through Texas Medicaid (Title XIX) Home Health Services.

Mobility aid lifts for vehicles and vehicle modifications are not reimbursed through Texas Medicaid in accordance with federal regulations.

Note: Permanent ramps, vehicle ramps, and home modifications are not a benefit of Texas Medicaid.

2.5.9.1.1 Portable Client Lifts for Outside the Home Setting

Providers must use procedure code E0635 with modifier TG for the purchase of the portable client lift and is limited to once per lifetime, any provider. Portable electric lifts are a benefit of Texas Medicaid if they can fold-up for transport and can be used outside the home setting if the client must attend health-related services that require an overnight stay in a non-institutional setting.

2.5.9.1.2 Strollers (a multipositional client transfer system with integrated seat, operated by care giver)

A stroller for medical needs may be considered for clients who are CCP-eligible when documentation submitted clearly shows that the equipment is medically necessary and will correct or ameliorate the client’s disability or physical or mental illness or condition. Documentation must include the following:

- The client does not own another seating system, including, but not limited to, a wheelchair.
- The client’s condition does not require another type of seating system, including, but not limited to, a wheelchair.

If the client does not meet criteria for a stroller, a wheelchair may be considered through Texas Medicaid (Title XIX) Home Health Services.
A medical stroller does not have the capacity to accommodate the client’s growth. Strollers for medical use may be considered for prior authorization when all of the following criteria are met:

- The client weighs 30 pounds or more.
- The client does not already own another seating system, including, but not limited to, a standard or custom wheelchair.
- The stroller must have a firm back and seat, or insert.
- The client is expected to be ambulatory within one year of the request date or is not expected to need a wheelchair within two years of the request date.

2.5.9.1.3 Stroller Ramps—Portable and Threshold

A portable ramp is defined as a ramp that is able to be carried as needed to access a home and weighing no more than 90 pounds and measuring no more than 10 feet in length. A threshold ramp is defined as a ramp that provides access over elevated thresholds.

Portable ramps exceeding the above criteria may be considered on a case-by-case basis with documentation of medical necessity and a statement that the requested equipment is safe for use.

Ramps may be considered for rental for short-term disabilities. Ramps may be considered for purchase for long-term disabilities.

Providers must use procedure code E1399 for a portable and threshold stroller ramps.

2.5.9.1.4 Feeder Seats, Floor Sitters, Corner Chairs, and Travel Chairs

Feeder seats, floor sitters, corner chairs, and travel chairs are not considered medically necessary and are not a benefit of CCP. If a client requires seating support and meets the criteria for a seating system, a stroller may be considered for reimbursement with prior authorization through CCP, or a wheelchair may be considered through Texas Medicaid (Title XIX) Home Health Services.

2.5.9.1.5 Scooters

Scooters may be considered for reimbursement through Texas Medicaid (Title XIX) Home Health Services.

* Procedure codes that require prior authorization
2.5.9.2 Prior Authorization and Documentation Requirements

Prior authorization is required for all mobility aids and related services, except travel safety restraints, for clients with a medical condition requiring them to be transported in either a prone or supine position.

Mobility aid equipment that has been purchased is anticipated to last a minimum of five years and may be considered for replacement with prior authorization when five years have passed or the equipment is no longer repairable. Prior authorization for replacement of mobility aid equipment may also be considered when loss or irreparable damage has occurred. A copy of the police or fire report, when appropriate, and the measures to be taken to prevent recurrence must be submitted.

When prior authorization of a mobility aid replacement is requested before five years have passed, the following information must be submitted with the request:

- A statement from the prescribing physician or licensed OT or PT
- Documentation supporting why the equipment no longer meets the client's needs

HHSC or its designee determines whether the equipment is rented, purchased, repaired, or modified based on the client's needs, duration of use, and age of equipment.

Rental of equipment includes all necessary accessories, supplies, adjustments, repairs, and replacement parts.

2.5.9.2.1 Portable Client Lifts for Outside the Home Setting

Prior authorization is required and will be considered on a case-by-case basis for portable client electric lifts that can fold-up for transport and that are necessary for use outside the home setting.

The provider must submit a prior authorization request with the following documentation for consideration of medical necessity:

- An explanation of why a home-based portable lift will not meet the client’s needs.
- A description of the circumstances, including duration of need, when the client is required to attend health-related services requiring an overnight stay in a non-institutional setting.
- The family member or caregiver(s) supporting the client in the use of the portable client lift when required to travel outside the home setting for health related visits.

2.5.9.2.2 Strollers (a multipositional client transfer system with integrated seat, operated by caregiver)

A seating assessment must be completed by a physician or licensed OT or PT, who is not employed by the equipment supplier, before requesting prior authorization. If the seating assessment is completed by a physician, reimbursement is considered part of the physician’s office visit and is not prior authorized. Other providers must use procedure codes 97001 and 97003 when billing for a seating evaluation.

The seating assessment must clearly show that the equipment is medically necessary and will correct or ameliorate the client’s disability or physical or mental illness or condition. Documentation must include the following:

- Explain how the family will be trained in the use of the equipment.
- Anticipate changes in the client’s needs and include anticipated modifications or accessory needs, as well as the anticipated width of the medical stroller to allow client growth with use of lateral/thigh supports.
- Include significant medical information pertinent to the client’s mobility and how the requested equipment will accommodate these needs, including intellectual, postural, physical, sensory (visual and auditory), and physical status.
- Address trunk and head control, balance, arm and hand function, existence and severity of orthopedic deformities, any recent changes in the client’s physical or functional status, and any expected or potential surgeries that will improve or further limit mobility.

- Include information on the client’s current mobility/seating equipment, how long the client has been in the current equipment, and why it no longer meets the client’s needs.

- Include the client’s height, weight, and a description of where the equipment is to be used. Seating measurements are required.

- Include information on the accessibility of client’s residence.

- Include manufacturer’s information, including the description of the specific base, any attached seating system components, and any attached accessories.

To request prior authorization for the purchase of procedure code E1035, the criteria must be met for the level of stroller requested:

- **Level One**: Basic Stroller. The client meets the criteria for a stroller. Providers must use procedure code E1035.

- **Level Two**: Stroller with Tray for Oxygen or Ventilator. The client meets the criteria for a level-one stroller and is oxygen- or ventilator-dependent. Providers must use procedure code E1035 with modifier TF.

- **Level Three**: Stroller with Positioning Inserts. The client meets the criteria for a level-one or level-two stroller and requires additional positioning support. Providers must use procedure code E1035 with modifier TG.

The following supporting documentation must be submitted:

- A completed Wheelchair/Stroller Seating Assessment Form CH.19 that includes documentation supporting medical necessity. This documentation must address why the client is unable to ambulate a minimum of 10 feet due to his/her condition (including, but not limited to, AIDS, sickle cell anemia, fractures, a chronic diagnosis, or chemotherapy), or if able to ambulate further, why a stroller is required to meet the client’s needs.

- If the client is 3 years of age or older, documentation must support that the client’s condition, stature, weight, and positioning needs allow adequate support from a stroller.

  **Note:** A stroller may be considered on a case-by-case basis with documentation of medical necessity for a client who does not meet the criteria listed above.

2.5.9.2.3 Stroller Ramps—Portable and Threshold

One portable and one threshold ramp for stroller access may be considered for prior authorization when documentation supports medical necessity and includes the following:

- The date of purchase and serial number of the client’s medical stroller or documentation of a medical stroller request being reviewed for purchase

- Diagnosis with duration of expected need

- A diagram of the house showing the access point(s) with the ground-to-floor elevation and any obstacles

A request for prior authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

Ramps may be considered for rental for short-term disabilities. Ramps may be considered for purchase for long-term disabilities.
Mobility aid lifts for vehicles and vehicle modifications are not reimbursed through Texas Medicaid according to federal regulations.

**Note:** *Permanent ramps, vehicle ramps, and home modifications are not a benefit of Texas Medicaid.*

### 2.5.10 Nutritional Products

#### 2.5.10.1 Services/Benefits and Limitation

Medical nutritional products including enteral formulas and food thickener, may be approved for clients who are CCP-eligible, birth through 20 years of age, and have specialized nutritional requirements. Medical nutritional products must be prescribed by a physician and be medically necessary.

Nutritional products may be reimbursed with the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>A4322</td>
</tr>
<tr>
<td>A5200</td>
</tr>
<tr>

</tr>
<tr>
<td>B9998 with modifier U5</td>
</tr>
</tbody>
</table>
| T1999* | As needed*  
If procedure code T1999 is used for a needleless syringe, the allowed amount is eight per month. |

*Appropriate limitations for miscellaneous procedure codes B9998 and T1999 are determined on a case-by-case basis through prior authorization. Specific items may be requested using procedure code B9998 and the modifiers outlined in the table above.*

The purchase of a backpack or carrying case for a portable enteral feeding pump may be a benefit of CCP, using procedure code B9998, if it is medically necessary and prior-authorized.
Clients for whom nutritional products are being requested may benefit from nutritional counseling. Nutritional counseling is a benefit of CCP if it is provided to treat, prevent, or minimize the effects of illness, injury, or other impairment.

Refer to: Subsection 2.6, “Medical Nutrition Counseling Services (CCP)” in this handbook for information about nutritional counseling.

2.5.10.2 Women, Infants and Children Program (WIC)

Generic nutritional products that have been approved by the United State Department of Agriculture (USDA) for use in the Women, Infants, and Children Program (WIC) may be approved for use by CCP clients.

While CCP does not require that a client access the WIC, it is only recommended as another source of services for clients who are 4 years of age and younger, or clients who are pregnant or breast feeding. Nutritional products are not provided to infants who are 11 months of age and younger unless medical necessity is documented.

2.5.10.3 Noncovered Services

CCP will not cover the following:

- Nutritional products that are traditionally used for infant feeding.
- Nutritional products for the primary diagnosis of failure to thrive, failure to gain weight, or lack of growth. The underlying cause of failure to thrive, gain weight, and lack of growth is required.
- Nutritional bars.
- Nutritional products for clients who could be sustained on an age-appropriate diet.

2.5.10.4 Prior Authorization and Documentation Requirements

Prior authorization for nutritional products is not required for a client who meets at least one of the following criteria:

- Client receives all or part of their nutritional intake through a tube.
- Client has a metabolic disorder that has been documented with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>

</tr>
<tr>
<td>V441 V444 V551</td>
</tr>
</tbody>
</table>

Prior authorization is required for nutritional products that are provided through CCP to clients who do not meet the criteria above and for all related supplies and equipment.
A completed CCP Prior Authorization Request Form that prescribes the DME and supplies must be signed and dated by a prescribing physician who was familiar with the client before making the authorization request. All signatures must be current, unaltered, original, and handwritten. Computerized or stamped signatures will not be accepted. The completed CCP Prior Authorization Request Form must include the procedure codes and numerical quantities for the services requested. A copy of the completed, signed, and dated CCP Prior Authorization Form must be maintained by the prescribing physician in the client’s medical record at the provider’s place of business.

Requests for prior authorization must include the following documentation:

- Accurate diagnostic information pertaining to the underlying diagnosis or condition that resulted in the requirement for a nutritional product, as well as any other medical diagnoses or conditions, including:
  - The client’s overall health status.
  - Height and weight.
  - Growth history and growth charts.
  - Why the client cannot be maintained on an age-appropriate diet.
  - Other formulas tried and why they did not meet the client’s needs.
- Diagnosis or condition (including the appropriate International Classification of Diseases, Ninth Revision, Clinical Modification [ICD-9-CM] code).
- The goals and timelines on the medical plan of care.
- Total caloric intake prescribed by the physician.
- Acknowledgement that the client has a feeding tube in place.

Related supplies and equipment for clients who require nutritional products may be considered for prior authorization when the criteria for nutritional products are met and medical necessity is included for each item requested.

Prior authorization may be given for up to 12 months. Prior authorization may be recertified with documentation that supports the ongoing medical necessity of the requested nutritional products.

A retrospective review may be performed to ensure that the documentation included in the client’s medical record supports the medical necessity of the requested service.

### 2.5.10.4.1 Nutritional Products

Requests for prior authorization, when required, must include the necessary product information.

Enteral formulas consisting of semi-synthetic intact protein or protein isolates (procedure codes B4150 and B4152) are appropriate for the majority of clients who require enteral nutrition.

Special enteral formula or additives (procedure code B4104) may be considered for prior authorization with supporting documentation submitted by the client’s physician indicating the client’s medical needs for these special enteral formulas. Special enteral formula may be reimbursed with the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>B4149</td>
</tr>
</tbody>
</table>

Food thickener may be considered for clients with a swallowing disorder.
Prior authorization of nutritional pudding products may be considered for children who have a documented oropharyngeal motor dysfunction and receive greater than 50 percent of their daily caloric intake from a nutritional pudding product.

Requests for electrolyte replacement products, such as Pedialyte or Oralyte, require documentation of medical necessity, including:

- The underlying acute or chronic medical diagnoses or conditions that indicate the need to replace fluid and electrolyte losses.
- The presence of mild to moderate dehydration due to the persistent mild to moderate diarrhea or vomiting.

Electrolyte replacement products are not indicated for clients with:

- Intractable vomiting
- Dynamic ileus
- Intestinal obstruction or perforated bowel
- Anuria, oliguria, or impaired homeostatic mechanism
- Severe, continuing diarrhea, when intended for use as the sole therapy

**Nasogastric, Gastrostomy, or Jejunostomy Feeding Tube**

Feeding tubes require prior authorization. Additional feeding tubes may be prior authorized if the submitted documentation supports medical necessity, such as documentation of an infection at the gastrostomy site, leakage, or occlusion.

**Enteral Feeding Pumps**

The prior authorization of the lease or purchase of enteral feeding pumps may be considered with documentation of medical necessity that indicates that the client meets the following criteria:

- Gravity or syringe feedings are not medically indicated.
- The client requires an administration rate of less than 100 ml. per hr.
- The client requires night-time feedings.
- The client has one of the following medical conditions (this list is not all-inclusive):
  - Reflux or aspiration.
  - Severe diarrhea.
  - Dumping syndrome.
  - Blood glucose fluctuations.
  - Circulatory overload.

**Enteral Supplies**

Enteral supplies require prior authorization, with the exception of irrigation syringes (procedure code A4322) and percutaneous catheter/tube anchoring devices (procedure code A5200) with the allowable limits.

Additional enteral feeding supply kits beyond the stated benefit limitation may be considered for prior authorization on a case-by-case basis with documentation of medical necessity.

Procedure code B4034 will not be prior authorized for use in place of procedure code A4322 for irrigation syringes if they are not part of a bolus administration kit. Gravity bags and pump nutritional containers are included in the feeding supply kits and will not be prior authorized separately.
Specific items may be considered for prior authorization using miscellaneous procedure code B9998 and modifier U1, U2, U3, or U5.

Requests for a backpack or carrying case or for a portable enteral feeding pump will be considered for prior authorization for clients who meet all of the following medical necessity criteria:

- The client requires enteral feedings that last more than eight continuous hours, or feeding intervals that are greater than the time that the client must be away from home to:
  - Attend school or work.
  - Participate in extensive, physician-ordered outpatient therapies.
  - Attend frequent, multiple medical appointments.
- The client is ambulatory or uses a wheelchair that will not support the use of a portable pump by other means, such as an intravenous (IV) pole.
- The portable enteral feeding pump is client-owned.

2.5.11 Pediatric Hospital Beds, Cribs, and Equipment

2.5.11.1 Services/Benefits and Limitations

The following items may be considered under CCP:

- Pediatric hospital cribs and beds
- Enclosed beds
- Enclosure frame/canopy/bubble tops
- Positioning pillows or cushions
- Reflux wedges
- Reflux slings

Non-pediatric hospital cribs/enclosed beds can be considered through Texas Medicaid (Title XIX) Home Health Services.

The items listed above may be a benefit for clients who are CCP-eligible when documentation submitted clearly shows that the equipment is medically necessary and will correct or ameliorate the client’s disability or physical or mental illness or condition. Documentation must include the following:

- FFP must be available.
- The client’s respiratory status would be compromised without the requested equipment.
- The requested equipment or supplies must be safe for use in the home.

The following procedure codes are used when billing for the rental or purchase of pediatric hospital beds, cribs, and equipment:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>E0190* E0300 E0316 E0328 E0329 E1399 K0739*</td>
</tr>
</tbody>
</table>

* Purchase only

Note: Procedure code E1399 may be used for reflux slings or pediatric hospital beds or cribs that fail to meet the HCPCS criteria described above for procedure codes E0300, E0328, or E0329.

The purchase of a safety enclosure frame/canopy/bubble top (procedure code E0316) may be a benefit when the protective crib top/bubble top is for safety use. It is not considered a benefit when it is used as a restraint or for the convenience of family or caregivers.
Procedure code E0316 may be used in conjunction with procedure codes E0328 or E0329 to request a pediatric fully-enclosed bed with a canopy.

Fully-enclosed is defined as four side enclosures and a top cover. A hospital bed with side rails that extend greater than 24 inches above the mattress spring is considered a crib.

Enclosed bed systems that are not approved by the Food and Drug Administration (FDA) are not a covered benefit.

Reflux slings or wedges may be considered for clients who are birth through 11 months of age. Reflux slings or wedges may be used as positioning devices for infants who require elevation after feedings when prescribed by a physician as medically necessary and appropriate.

Procedure code E0190 with modifier UD must be used to bill the purchase of reflux wedges and positional devices (positioning pillows and cushions). This code and modifier will require manual pricing. Procedure code E0190 is limited to once per three years, per client, any provider.

Procedure code K0739 may be reimbursed for the repair of equipment.

2.5.11.2 Prior Authorization and Documentation Requirements

Prior authorization is required for all DME and services provided through CCP, including any accessories, modifications, adjustments, replacements, and repairs to the equipment.

To be considered for prior authorization, the provider must include all of the following to support medical necessity:

- The diagnosis, medical needs, treatments, developmental level, and functional skills of the child. A diagnosis alone is insufficient information to consider prior authorization of the requested equipment.
- The age, length, and weight of the child.
- A description of any other devices that have been used, the length of time used, and why they were ineffective.
- How the requested equipment will correct or ameliorate the client’s condition beyond that of a standard child’s crib, regular bed, or standard hospital bed.
- The name of the manufacturer and the manufacturer’s suggested retail price (MSRP).

A determination will be made by HHSC or its designee whether the equipment will be rented, purchased, repaired, or modified based on the client’s needs, duration of use, and age of equipment. All modifications, adjustments, and repairs within the first six months after delivery are considered to be part of the purchase price.

2.5.11.2.1 Hospital Beds and Safety Enclosure

A fixed height bed may be considered for prior authorization if the client requires the head of the bed to be elevated more than 30 degrees most of the time due to conditions such as congestive heart failure, chronic pulmonary disease, or problems with aspiration. Pillows or wedges must have been used and found to be ineffective.

A variable height hospital bed may be considered for prior authorization if the client meets the criteria for a fixed height hospital bed and requires a bed height different than a fixed height hospital bed to permit transfers to a chair, wheelchair, or standing position.

A semi-electric hospital bed may be considered for prior authorization if the client meets the criteria for a variable height bed and either requires frequent changes in body position or has a need for rapid changes in body position.
A fully electric bed may be considered for prior authorization with documentation that the bed will promote the client’s independence with self-care. A fully electric bed will not be authorized for the convenience of the caregiver.

The safety enclosure frame/canopy/bubble top may be considered for prior authorization with documentation that the protective canopy top/bubble will provide for the client's safety. Prior authorization will not be considered when it will be used as a restraint or for the convenience of family or caregivers.

2.5.11.2.2 Positioning Devices
Reflux slings or wedges may be considered for prior authorization for clients who are 11 months of age and younger. These may be used as positioning devices for infants who require the head of the bed or crib to be elevated greater than 30 degrees after feedings when prescribed by a physician as medically necessary and appropriate.

Positioning pillows and cushions may be considered for prior authorization with documentation of medical necessity that indicates the item will provide for or assist in the positioning needs of the client to maintain proper body alignment and skin integrity. Documentation must include what other devices have been used previously and why they proved to be ineffective.

Items used for physical therapy or rehabilitation in the home are provided by the therapist. Requests for authorization for these purposes will not be considered.

2.5.11.2.3 Repair or Replacement
Reparis require replacement of components that are no longer functional. Technician fees are considered to be part of the cost of the repair.

Reparis to client-owned equipment may be considered with documentation of medical necessity.

Providers are responsible for maintaining documentation in the client's medical record specifying the repairs and supporting medical necessity.

Rental equipment may be considered during the period of repair. Routine maintenance of rented equipment is the provider's responsibility.

Pediatric hospital cribs and beds, enclosed beds, and safety enclosure frames/canopies/bubble tops that have been purchased are anticipated to last a minimum of five years.

Prior authorization for replacement may be considered within five years of purchase if one of the following occurs:

- There has been a significant change in the client’s condition such that the current equipment no longer meets the client’s needs.
- The equipment is no longer functional and cannot be repaired or it is not cost effective to repair.

Replacement equipment may also be considered if loss or irreparable damage has occurred. A copy of the police or fire report, when appropriate, and the measures to be taken to prevent reoccurrence must be submitted.

2.5.12 Phototherapy Devices
2.5.12.1 Services/Benefits and Limitations
The rental of phototherapy devices (procedure code E0202) for use in the home are a benefit of Texas Medicaid for low-risk infants.
Low-risk infants are 35 or more weeks gestation at birth, without comorbidity, and with a total serum bilirubin (TSB) level within the following ranges:

<table>
<thead>
<tr>
<th>Infant's Gestation at Birth</th>
<th>TSB for infant 0-24 hours of age</th>
<th>TSB for infant 25-48 hours of age</th>
<th>TSB for infant 49-72 hours of age</th>
<th>TSB for infant older than 72 hours of age</th>
</tr>
</thead>
<tbody>
<tr>
<td>35-37 weeks</td>
<td>3-7</td>
<td>7-13</td>
<td>10-15</td>
<td>13-18</td>
</tr>
<tr>
<td>38 weeks or greater</td>
<td>6-11</td>
<td>12-15</td>
<td>15-18</td>
<td>18-21</td>
</tr>
</tbody>
</table>

TSB levels are expressed in milligrams per deciliter (mg/dl).

Consideration for the rental of a home phototherapy device includes, but is not limited to, the following primary diagnoses:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>7740</td>
</tr>
</tbody>
</table>

The DME provider must perform routine maintenance and provide instructions to the parent or guardian on the safe use of the phototherapy device. Rental of a phototherapy device is reimbursed as a daily global fee and is limited to one per day, per client, any provider.

Providers may not bill for those days the phototherapy device is at the client’s home and is not in use.

Skilled nursing visits for clients requiring phototherapy services may be reimbursed separately through Title XIX Home Health Services for nonroutine clinical teaching and assessment. Routine laboratory specimens are obtained during the skilled nursing visit, and may only be considered when the alternative to obtaining the specimen is to transport the client by ambulance.

If a client who is receiving private duty nursing (PDN) services requires phototherapy, instructions in the use of the equipment must be part of the existing PDN authorized hours. Skilled nursing visits will not be allowed on the same day as PDN services.

In accordance with American Academy of Pediatrics (AAP) guidelines, providers must conduct ongoing assessments for risk of severe hyperbilirubenemia for all infants who receive home phototherapy.

Initiation of home phototherapy for medium- and high-risk infants is not a benefit of Texas Medicaid. As defined by the AAP, medium- and high-risk infants should be considered for more extensive initial treatment in an inpatient setting. Medium- and high-risk infants include, but are not limited to, those who have one of the following known risk factors:

- Acidosis
- Albumin less than 3.0 g/dl
- Asphyxia
- Glucose-6-phosphate dehydrogenase (G6PD) deficiency
- Isoimmune hemolytic disease (blood group incompatibility)
- Jaundice within the first 24 hours
- Sepsis
- Significant lethargy
- Temperature instability
2.5.12.2 Prior Authorization and Documentation Requirements

Home phototherapy devices require prior authorization and are provided only for the days that are medically necessary.

For low-risk infants, prior authorization will be considered for phototherapy services that begin in the home.

For stabilized infants who began phototherapy treatment during their hospitalization and have been discharged from the hospital, prior authorization will be considered for the continuation of phototherapy services in the home. Initial prior authorization may be given for a maximum of seven days of home phototherapy. A new “CCP Prior Authorization Request Form” must be submitted to request more than seven days of home phototherapy.

The following documentation is required to support medical necessity when requesting home phototherapy services:

- A diagnostic evaluation, which must include, but is not limited to, a normal history and physical exam, and normal laboratory values for the following, as medically indicated:
  - Complete blood count with differential
  - Platelets
  - Blood smear for red blood cell morphology
  - Reticulocyte count
  - Urinalysis
  - Maternal and infant blood typing
  - Coombs test
- TSB (in mg/dl)
- Gestational age
- Documentation of adequate infant hydration, as demonstrated by 4-6 wet diapers per day and 3-4 stools per day
- Documentation stating that infant weight loss does not exceed 10% of the infant’s birth weight
- Physician’s plan of care
- Anticipated number of days the client will need the phototherapy treatment
- Documentation of parental education regarding the importance of monitoring and follow-up

When requesting prior authorization for a hospitalized infant that requires continued home phototherapy, providers must submit documentation that indicates all pre-existing medium- or high-risk factors have resolved or stabilized.

Providers must submit the following additional documentation for prior authorization requests for previously hospitalized infants that require continued home phototherapy or for more than seven days of home phototherapy:

- TSB level greater than 13 mg/dl and trending downward. TSB levels less than 13 will require medical review to determine medical necessity.

Note: According to AAP guidelines, phototherapy may be discontinued when the TSB level falls below 13–14 mg/dl; however, exceptions to the guidelines may be considered. As a result, documentation must include the rationale for not discontinuing phototherapy when the TSB level drops below 13 mg/dl.
• Birth weight and current weight demonstrating weight gain.

  **Note:** According to AAP guidelines, breast-fed infants are expected to gain 15-30 grams per day (1/2-1 ounce per day) through the first 2-3 months of life.

2.5.12.2.1 Retroactive Eligibility

Newborn babies may not have a Medicaid number at the time that services are ordered by the physician and provided by the supplier. In these cases, prior authorization may be given retroactively for services rendered between the start date and the date that the client’s Medicaid number becomes available.

- The provider is responsible for finding out the effective dates of client eligibility.
- The provider has 95 days from the date on which the client’s Medicaid number becomes available (add date) to obtain prior authorization for services that were already rendered.

2.5.13 Special Needs Car Seats and Travel Restraints

2.5.13.1 Services/Benefits and Limitations

2.5.13.1.1 Special Needs Car Seats

A special needs car seat must have a top tether installed. The top tether is essential for proper use of the car seat. The installer is reimbursed for the installation by the manufacturer.

Providers must use procedure code E1399 for a special needs car seat.

Car seat accessories available from the manufacturer may be considered for reimbursement with prior authorization when medically necessary for correct positioning.

A stroller base for a special needs car seat is not a benefit of Texas Medicaid.

2.5.13.1.2 Travel Safety Restraints

Providers must use procedure code E0700 for the purchase of travel safety restraints, such as ankle and wrist belts.

2.5.13.2 Prior Authorization and Documentation Requirements

2.5.13.2.1 Special Needs Car Seats

A special needs car seat may be considered for reimbursement with prior authorization for a client who has outgrown an infant car seat and is unable to travel safely in a booster seat or seat belt. Consideration must be given to the manufacturer’s weight and height limitations and must reflect allowances for at least 12 months of growth.

The provider must maintain a statement that has been signed and dated by the client’s parent or legal guardian in the client’s medical record that states the following:

- A top tether has been installed in the vehicle in which the client will be transported, by a manufacturer-trained vendor.
- Training in the correct use of the car seat has been provided by a manufacturer-trained vendor.
- The client’s parent or legal guardian has received instruction and has demonstrated the correct use of the car seat to a manufacturer-trained vendor.

To request prior authorization for a special needs car seat or accessories, the following documentation must be provided:

The client’s weight must be at least 40 pounds, or the client’s height must be at least 40 inches.
Supporting documentation must include the following and must be submitted for prior authorization:

- Accurate diagnostic information pertaining to the underlying diagnosis/condition as well as any other medical diagnoses/conditions, to include the client’s overall health status.
- A description of the client’s postural condition specifically including head and trunk control (or lack of control) and why a booster chair or seatbelt will not meet the client’s needs (the car seat must be able to support the head if head control is poor).
- The expected long-term need for the special needs car seat.
- A copy of the manufacturer’s certification for the installer’s training to insert the specified car seat.

A request for a client who does not meet the criteria may be considered on a case-by-case basis on review by HHSC or its designee.

2.5.13.2.2 Travel Safety Restraints

A travel safety restraint and ankle or wrist belts may be considered for reimbursement through CCP without prior authorization for clients with a medical condition requiring them to be transported in either a prone or supine position. The DME provider and the prescribing physician familiar with the client must maintain documentation in the client's medical record supporting the medical necessity of the travel safety restraint.

2.5.14 Total Parental Nutrition (TPN)

2.5.14.1 Services/Benefits and Limitation

In-home TPN is a benefit of CCP for clients who require short-term or long-term nutritional support. Covered services must be medically necessary and prescribed by the physician.

Parenteral nutrition solution, supplies, and infusion pumps services may be reimbursed with the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>Solution Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>B4164 B4168 B4172 B4176 B4178 B4180 B4185 B4189 B4193 B4197</td>
</tr>
<tr>
<td></td>
<td>B4199 B4216 B5000 B5100 B5200</td>
</tr>
<tr>
<td>Supply Procedure Codes</td>
<td>B4220 B4222 B4224 B9999</td>
</tr>
<tr>
<td>Infusion Pump Procedure Codes</td>
<td>B9004 B9006</td>
</tr>
</tbody>
</table>

If the solutions and additives are shipped and not used because of the client's loss of eligibility, change in treatment, or inpatient hospitalization, then no more than a one-week supply of solutions and additives will be reimbursed. Any days on which the client is an inpatient of a hospital or other medical facility or institution will be excluded from the daily billing. Payment for partial months will be prorated based upon the actual days of administration. The administration of intravenous fluids and electrolytes cannot be billed as in-home TPN.

A backpack or carrying case for a portable infusion pump may be a benefit when it is medically necessary and must be billed using procedure code B9999.

The infusion pump may be rented once a month or purchased once every five years.
2.5.14.2 Prior Authorization and Documentation Requirements

Prior authorization is required for TPN solutions, lipids, supply kits, and infusion pumps that are provided through CCP. Renewal of the prior authorization will be considered on the basis of medical necessity.

TPN solutions, lipids, supply kits, and infusion pumps will be considered for the prior authorization of short-term or long-term nutritional therapy for clients who are CCP-eligible when documentation submitted clearly shows that it is medically necessary and will correct or ameliorate the client’s disability or physical or mental illness or condition. Documentation must include the following:

- Conditions that result in a loss of function of the gastrointestinal (GI) tract and the inability to obtain adequate nutrition by the enteral route, such as:
  - Infections of the pancreas, intestines, or other body organs that result in a loss of GI function
  - Inflammatory bowel disease
  - Necrotizing enterocolitis
  - Malnutrition
  - Trauma
  - Overwhelming systemic infections
  - Serious burns
- Conditions that result in an inability of the bowel to absorb nutrition, such as:
  - Extensive bowel resection
  - Severe, advanced bowel disease. Examples include short bowel syndrome (SBS), chronic intestinal pseudo-obstruction (CIPS), Hirschsprung disease (HD), Crohn’s disease, and ulcerative colitis
  - Prematurity
  - Leukemias
  - Congenital gastrointestinal anomalies
  - Acquired immunodeficiency syndrome

To facilitate determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including documentation of medical necessity for the equipment and supplies requested. The physician must also maintain documentation of medical necessity in the client’s medical record.

Prior authorization requests for TPN must include the following information:

- Medical condition for which TPN is necessary
- Documentation of any trials with oral/enteral feedings
- Percent of daily nutritional needs from TPN
- A copy of the TPN formula or prescription that includes amino acids and lipids and is signed and dated by the physician
- A copy of the most recent laboratory results that includes potassium, calcium, liver function studies, and albumin

**Note:** Conditions or durations of need that are not listed above may be considered by HHSC or its designee with documentation of medical necessity.
Prior authorization requests for a portable parenteral nutrition infusion pump (procedure code B9004) must also include documentation of medical necessity that demonstrates at least one of the following:

- The client requires continuous feedings.
- Feeding intervals exceed the time that the client must be away from home to:
  - Attend school or work
  - Participate in extensive, physician-ordered outpatient therapies
  - Attend frequent, multiple, medical appointments

Prior authorization for parenteral nutrition infusion pumps are limited to one portable pump (procedure code B9004) or one stationary pump (procedure code B9006) at any one time, unless medical necessity for two infusion pumps is established. Supporting documentation for the additional pump must be included with the prior authorization request.

Prior authorization requests for miscellaneous procedure code B9999 must include the following:

- A detailed description of the requested item or supply
- Documentation that supports the medical necessity of the requested item or supply

Requests for a backpack or carrying case for the portable infusion pump will be considered for prior authorization under miscellaneous code B9999, if the clients meet the medical necessity criteria for the portable pump that are outlined above. The following criteria also apply:

- The client is ambulatory or uses a wheelchair that will not support the use of a portable pump by other means, such as an intravenous (IV) pole.
- The portable enteral feeding pump is client-owned.

The requesting provider may be asked for additional information to clarify or complete a request for TPN services.

Retrospective review may be performed to ensure that the documentation supports the medical necessity of the TPN services.

### 2.5.15 Vitamins and Minerals

#### 2.5.15.1 Services/Benefits and Limitations

Vitamins and minerals (procedure code A9150), if they are determined to be medically necessary, are a benefit through CCP for clients who are 20 years of age and younger.

Vitamins and minerals are reimbursed to enrolled CCP pharmacist providers.

#### 2.5.15.2 Prior Authorization and Documentation Requirements

Prior authorization is required for vitamins and minerals. To request prior authorization for vitamins or minerals, the prescribing provider must submit the following to an enrolled CCP pharmacy:

- A completed CCP Prior Authorization Request Form that includes the applicable diagnosis code and is signed and dated by the prescribing physician. The following information must be included on the form:
  - Client information
  - Supplier or vendor information
  - Diagnosis and documentation that supports the medical necessity for the requested vitamin or mineral
  - Date of service
• Procedure code, brief description of vitamin or mineral, and retail price
• Primary practitioner’s certification
• Physician’s signature, date, and license number

**Note:** The supplier or vendor information can be completed by the CCP pharmacy. Additionally, the AWP or MSRP can be provided by the CCP pharmacy if this information is unknown by the prescribing physician.

• A physician’s prescription with the name of the vitamin or mineral, dosage, frequency, duration, and route of administration.

Incomplete prior authorization requests will be returned to the provider.

Prior authorization requests can be submitted to the TMHP CCP Prior Authorization Unit by the CCP pharmacy by fax to 1-512-514-4212 or by mail to the following address:

Texas Medicaid & Healthcare Partnership
Comprehensive Care Program
PO Box 200735
Austin, TX 78720-0735

**2.5.16 Claims Information**

Claims for DME must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

**Refer to:** Section 3: TMHP Electronic Data Interchange (EDI) (**Vol. 1, General Information**) for information on electronic claims submissions.

Section 6: Claims Filing (**Vol. 1, General Information**) for general information about claims filing.

**2.5.17 Reimbursement**

DME and expendable medical supplies are reimbursed in accordance with 1 TAC §355.8441. See the applicable fee schedule on the TMHP website at www.tmhp.com.

Providers may be reimbursed for DME either by the lesser of the provider’s billed charges or the published fee determined by HHSC or through manual pricing. If manual pricing is used, the provider must request prior authorization and submit documentation of either of the following:

• The MSRP or AWP, whichever is applicable.
• The provider’s documented invoice cost.

Manually priced items are reimbursed as follows as is appropriate:

• MSRP less 18 percent or AWP less 10.5 percent, whichever is applicable
• The provider’s documented invoice cost

**2.6 Medical Nutrition Counseling Services (CCP)**

**2.6.1 Enrollment**

Independently practicing licensed dietitians may enroll in Texas Medicaid to provide services to CCP-eligible clients. Dietitians who provide nutrition assessments and counseling must be currently licensed by the Texas State Board of Examiners of Dietitians in accordance with the Licensed Dietitians Act, Chapter 701, Texas Occupations Code.
Refer to: Subsection 2.2.2, "Enrollment" in this handbook for more information about CCP enrollment procedures.

2.6.2 Services/Benefits and Limitations

Medical nutrition therapy (assessment, re-assessment, and intervention) and medical nutrition counseling may be beneficial for treating, preventing, or minimizing the effects of illness, injuries, or other impairments. A case manager, school counselor, or school nurse may refer a client for medical nutrition counseling services.

Medical nutrition counseling services are a benefit when all of the following criteria are met:

- The client is 20 years of age or younger
- The client is eligible for CCP
- The services are prescribed by a physician
- The services are performed by a Medicaid-enrolled licensed dietitian
- Clinical documentation supports medical necessity and medical appropriateness
- FFP is available

Medical nutrition therapy and nutrition counseling may be considered beneficial for disease states for which dietary adjustment has a therapeutic role. Such disease states include, but are not limited to, the following conditions:

- Abnormal weight gain
- Cardiovascular disease
- Diabetes or alterations in blood glucose
- Eating disorders
- Gastrointestinal disorders
- Gastrostomy or other artificial opening of gastrointestinal tract
- Hypertension
- Inherited metabolic disorders
- Kidney disease
- Lack of normal weight gain
- Multiple food allergies
- Nutritional deficiencies

Nutrition intervention for the following conditions is considered experimental and investigational and is not a benefit:

- Attention-deficit hyperactivity disorder
- Chemical sensitivities
- Chronic fatigue syndrome
- Idiopathic environmental intolerance

Medical nutrition counseling services for the diagnosis of obesity without a comorbid condition is not a benefit.
Medical nutrition therapy (procedure code 97802) is a more comprehensive service than medical nutrition counseling and is provided to individual clients for assessment and intervention. Procedure code 97802 is limited to one session per day and four units per rolling year.

Medical nutrition therapy (procedure code 97803) is provided to individual clients for a re-assessment and intervention, after the initial assessment and intervention. Procedure code 97803 may be used for direct therapy sessions with clients. These sessions are limited to 1 session per day and 12 units per rolling year.

Nutrition assessments and re-assessments are in-depth evaluations of both objective and subjective data related to an individual's food and nutrient intake, lifestyle, and medical history. Nutrition assessments and re-assessments are performed as part of medical nutrition therapy. Nutrition assessments and re-assessments may be required as a result of a medical diagnosis and may be performed in conjunction with other therapies for treatment or as a goal to help clients make and maintain dietary changes. Documentation must include the following:

- Objective and subjective data obtained
- Height, weight, body mass index (BMI), and correlating percentiles on the growth curves
- Estimated caloric needs
- Nutritional diagnosis
- Intervention and plan
- Evaluation

Medical nutrition counseling (procedure code S9470) is provided to individual clients after an initial assessment and is less comprehensive than medical nutrition therapy. Nutritional counseling may be used to discuss the plan of care or intervention and to determine whether modifications are needed. Procedure code S9470 is limited to one visit per day and four visits per rolling year.

Medical nutrition group therapy (procedure code 97804) is not a benefit in the home setting, and does not include an individual nutrition assessment. Medical nutrition group therapy is limited to eight units per rolling year.

Medical nutrition group therapy may be provided to a group of clients with the same condition. While medical nutrition group therapy must be led by a Medicaid-enrolled dietitian licensed by the Texas State Board of Examiners of Dietitians, other health-care providers may participate in the group sessions. The focus of the therapy is on nutrition and health for chronic conditions such as the following:

- Acquired acanthosis nigricans
- Diabetes
- Dysmetabolic syndrome X
- Eating disorder
- Hyperlipidemia
- Other specified hypoglycemia
- Pure hypercholesterolemia
- Pure hyperglyceridemia
Medical nutrition group therapy sessions must last at least 30 minutes, have a minimum of two clients and a maximum of ten clients, and must include the following:

- An age-appropriate presentation on nutrition issues related to the chronic condition (The presentation may include information about prevention of disease exacerbation or complications and living with chronic illness. The presentation may also offer suggestions for making healthy food choices or changing ideas about food.)
- A question-and-answer period

Client participation in medical nutrition group therapy is optional. Providers must obtain an informed consent from a client’s parent or guardian before rendering services. The medical documentation maintained in a client’s medical record must include the following:

- Physician prescription
- Referral, if applicable
- Location where the services were provided
- Services that were provided during medical nutrition group therapy
- Goals or objectives for the group therapy
- Client participation
- Beginning and ending time of the group therapy session

In the following table, the procedure codes in Column A will be denied as part of another service if they are submitted by any provider for the same date of service as the corresponding procedure codes in Column B.

<table>
<thead>
<tr>
<th>Column A: Procedure Codes Denied When Submitted With…</th>
<th>Column B: Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97803 and 97804</td>
<td>97802</td>
</tr>
<tr>
<td>97804</td>
<td>97803</td>
</tr>
<tr>
<td>S9470</td>
<td>97802, 97803, or 97804</td>
</tr>
<tr>
<td>97802, 97803, and 97804</td>

</tbody>
</table>

2.6.3 Prior Authorization and Documentation Requirements

Prior authorization is required for services that exceed the limitations for medical nutrition therapy (assessment, re-assessment, and intervention), medical nutrition group therapy, and nutrition counseling visits.

Prior authorization is also required for consideration of other health conditions that are not addressed.
The following documentation must be submitted to the CCP Prior Authorization Unit for prior authorization:

- Completed CCP Prior Authorization Request Form
- Treatment plan
- Diagnosis of a condition for which there is medical necessity for the service
- Obstacles for not meeting goals
- Interventions planned to meet goals

The prescribing physician and provider must maintain documentation of medical necessity, including the completed CCP Prior Authorization Request Form, in a client’s medical record. The physician must maintain the original signed copy of the CCP Prior Authorization Request Form. The completed CCP Prior Authorization Request Form is valid for a period of up to six months from the date of the physician’s signature.

2.6.4 Claims Information

Providers must submit services provided by licensed dietitians in an approved electronic claims format or on a CMS-1500 paper claim form from the vendor of their choice. TMHP does not supply the forms. Claims for services that have been prior authorized must reflect the PAN in Block 23 of the CMS-1500 paper claim form or its equivalent.

Refer to:
Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Form CH.28, “Medical Nutrition Counseling (CCP Only)” in this handbook for a claim form example.

2.6.5 Reimbursement

Dietitian services are reimbursed in accordance with 1 TAC §355.8441.

2.7 Orthotic and Prosthetic Services (CCP)

2.7.1 Enrollment

To be eligible to participate in CCP, providers of orthotics and prosthetics services must be enrolled in Medicare.

Texas Medicaid enrolls and reimburses orthotic and prosthetic suppliers only for CCP services and Medicare crossovers. The information in this section is applicable to CCP services only.

Refer to: Subsection 2.2.2, “Enrollment” in this handbook for more information about CCP enrollment procedures.

2.7.2 Orthotics Services

2.7.2.1 Services/Benefits and Limitations

Orthoses, including orthopedic shoes, wedges, and lifts, are a benefit of Texas Medicaid when provided by a licensed orthotist or a licensed prosthetist/orthotist through CCP for clients who are birth through 20 years of age.
The following orthoses and related services may be reimbursed when medical necessity criteria are met:

- Spinal orthoses and additions to spinal orthoses, including those for scoliosis
- Lower-limb orthoses and additions to lower-limb orthoses, including fracture orthoses
- Foot orthoses, including inserts, orthopedic shoes, surgical boots, heel lifts, and wedges
- Upper-limb orthoses and additions to upper-limb orthoses, including fracture orthoses
- Other orthopedic devices, including protective helmets and dynamic splints
- Repairs, replacements, and modifications
- Orthotic device training

**Note:** Training in the use of an orthotic device for a client who has not worn one previously, has not worn one for a prolonged period, or is receiving a different type is a benefit when the training is provided by a physical or occupational therapist.

**Refer to:** Subsection 2.10, “Therapy Services (CCP)” in this handbook for more information on physical and occupational therapy services.

To be considered for reimbursement, orthoses must be dispensed, fabricated, or modified by a licensed orthotist or licensed prosthetist/orthotist enrolled with Medicare and CCP.

- Upper extremity customized splints made with low-temperature materials and inhibitive casting may be provided by occupational or physical therapists.
- Other orthopedic devices addressed in the orthotic section may be provided by a Medicaid-enrolled DME vendor.
- Orthopedic shoes must be provided by a shoe vendor enrolled as a DME provider.

The date of service for a custom-made or custom-fitted orthosis is the date the supplier places an order for the equipment and incurs liability for the equipment. The custom-made or custom-fitted orthosis will be eligible for reimbursement as long as the service is provided during a month the client is eligible for Medicaid.

The following items and services are included in the reimbursement for an orthotic device and not reimbursed separately:

- Client evaluation, measurement, casting, or fitting of the orthosis.
- Repairs due to normal wear and tear during the 90 days following delivery.
- Adjustments or modifications of the orthotic device made when fitting the orthosis and for 90 days from the date of delivery (adjustments and modifications during the first 90 days are considered part of the purchase of the initial device).

Orthopedic shoes that are attached to a brace must be billed by the vendor that bills for the brace.

Reimbursement for lifts and wedges may include the cost of the prescription shoe.

### 2.7.2.1 Noncovered Orthotic Services

The following circumstances are not a benefit of Texas Medicaid:

- Orthoses whose sole purpose is for restraint
- Orthoses provided solely for use during sports-related activities in the absence of an acute injury or other indicated medical condition
- Orthotic devices prescribed by a chiropractor
Diagnoses that are not considered medically necessary include, but are not limited to, the following:

- Tired feet
- Fatigued feet
- Nonsevere bow legs
- Valgus deformity of the foot, except as outlined in the orthotic section
- Pes planus (flat feet), except when there is a coexisting medical condition as outlined in the orthotic section

Orthopedic shoes with deluxe features, such as special colors, special leathers, and special styles, are not considered medically necessary, and the features do not contribute to the accommodative or therapeutic function of the shoe.

A foot-drop splint and recumbent positioning device and replacement interface are not considered medically necessary in a client with foot drop who is nonambulatory, because there are other more appropriate treatment modalities.

A static ankle-foot orthosis (AFO) or AFO component is not medically necessary if:

- The contracture is fixed.
- The client has foot drop without an ankle flexion contracture.
- The component is used to address knee or hip positioning, because the effectiveness of this type of component is not established.

A pneumatic thoracic-lumbar-sacral orthosis is considered experimental and investigational and is not a benefit of Texas Medicaid.

### 2.7.2.2 Prior Authorization and Documentation Requirements

Prior authorization is required for all orthoses and related services.

Before submitting a request for prior authorization for orthosis, the orthosis provider must have a completed CCP Prior Authorization Form requesting the orthosis or related services that has been signed and dated by a physician who is familiar with the client. All signatures and dates must be current, unaltered, original, and handwritten. Computerized or stamped signatures/dates will not be accepted. The completed CCP Prior Authorization Form must include the procedure codes and quantities for requested services. A copy of the completed, signed, and dated form must be maintained by the orthosis provider in the client's medical record. The completed CCP Prior Authorization Form with the original dated signature must be maintained by the prescribing physician in the client's medical record.

- To complete the prior authorization process electronically, the orthosis provider must complete the prior authorization requirements through any approved electronic methods and retain a copy of the signed and dated CCP Prior Authorization Request form in the client's medical record at the provider's place of business.
- To complete the prior authorization process by paper, the orthosis provider must fax or mail the completed CCP Prior Authorization Request Form to the CCP prior authorization unit and retain a copy of the signed and dated CCP form in the client's medical record at the provider's place of business.

To facilitate determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including documentation for medical necessity of the equipment and supplies requested. The physician must maintain documentation of medical necessity in the client's medical record. The provider may be asked for additional information to clarify or complete a request for the service or device.
All requests for prior authorization must include documentation of medical necessity including, but not limited to, documentation that the device is needed for one of the following general indications:

- To reduce pain by restricting mobility of the affected body part.
- To facilitate healing following an injury to the affected body part or related soft tissue.
- To facilitate healing following a surgical procedure on the affected body part or related soft tissue.
- To support weak muscles or a deformity of the affected body part.

Prior authorization requests for some types of orthosis require additional documentation. See the appropriate sections for additional documentation needed for each service.

The provider must keep the following written documentation in the client's medical record:

- The prescription for the device.
- Orthotic devices must be prescribed by a physician (M.D. or D.O.) or a podiatrist. A podiatrist prescription is valid for conditions of the ankle and foot.
- The prescription must be dated on or before the initial date of the requested dates of service, which can be no longer than 90 days from the signature date on the prescription.
- Accurate diagnostic information that supports the medical necessity for the requested device. A retrospective review may be performed to ensure that the documentation included in the client's medical record supports the medical necessity of the requested service or device.

A prior authorization is valid for a maximum period of six months from the prescription signature date. At the end of the six-month authorization period, a new prescription is required for prior authorization of additional services.

The actual date of service is the date the supplier has placed an order for the equipment and has incurred liability for the equipment.

2.7.2.2.1 Spinal Orthoses

Spinal orthoses include, but are not limited to, cervical orthoses, thoracic rib belts, thoracic-lumbar-sacral orthoses (TLSO), sacroiliac orthoses, lumbar orthoses, lumbar-sacral orthoses (LSO), cervical-thoracic-lumbar-sacral orthoses (CTLSO), halo procedures, spinal corset orthoses, and spinal orthoses for scoliosis.

Spinal orthoses will be considered for prior authorization with documentation of one of the general indications.

2.7.2.2.2 Lower-Limb Orthoses

Lower-limb orthoses include, but are not limited to, hip orthoses (HO), Legg Perthes orthoses, knee orthoses (KO), ankle-foot orthoses (AFO), knee-ankle-foot orthoses (KAFO), hip-knee-ankle-foot orthoses (HKAFO), fracture orthoses, and reciprocating gait orthoses (RGO).

In addition to the general indication requirements, lower-limb orthoses will be considered for prior authorization with documentation of the following criteria for specific orthotic devices:

Ankle-Foot Orthoses (AFO)

AFOs used during ambulation will be considered for prior authorization for clients with documentation of all of the following:

- Weakness or deformity of the foot and ankle.
- A need for stabilization for medical reasons.
- Anticipated improvement in functioning during activities of daily living (ADLs) with use of the device.
AFOs not used during ambulation (static AFO) will be considered for prior authorization for clients with documentation of one of the following conditions:

- Plantar fasciitis.
- Plantar flexion contracture of the ankle, with additional documentation that includes all of the following:
  - Dorsiflexion on pretreatment passive range of motion testing is at least ten degrees.
  - The contracture is interfering or is expected to interfere significantly with the client's functioning during ADLs.
  - The AFO will be used as a component of a physician-prescribed therapy plan care, which includes active stretching of the involved muscles or tendons.
  - There is reasonable expectation that the AFO will correct the contracture.

Knee-Ankle-Foot Orthoses (KAFO)
KAFOs used during ambulation will be considered for prior authorization for clients with documentation that supports medical necessity for additional knee stabilization.

KAFOs that are custom-fabricated (molded-to-patient model) for ambulation will be considered for prior authorization when at least one of the following criteria is met:

- The client cannot be fit with a prefabricated AFO/KAFO.
- The condition that necessitates the orthosis is expected to be permanent or of long-standing duration (more than six months).
- There is a need to control the knee, ankle, or foot in more than one plane.
- The client has a documented neurological, circulatory, or orthopedic status that requires custom fabrication to prevent tissue injury.
- The client has a healing fracture that lacks normal anatomical integrity or anthropometric proportions.

Reciprocating Gait Orthoses (RGO)
Reciprocating gait orthoses will be considered for prior authorization for clients with spina bifida or similar functional disabilities.

The prior authorization request must include a statement from the prescribing physician that indicates medical necessity for the RGO, the physical therapy treatment plan, and documentation that the client/family is willing to comply with the treatment plan.

2.7.2.2.3 Foot Orthoses
Foot orthoses include, but are not limited to, foot inserts, orthopedic shoes, wedges, and lifts.

Foot orthoses will be considered for prior authorization for clients with documentation of all the following:

- The client has symptoms associated with the particular foot condition.
- The client has failed to respond to a course of appropriate, conservative treatment, including physical therapy, injections, strapping, or anti-inflammatory medications.
- The client has at least one of the following:
  - Torsional conditions, such as metatarsus adductus, tibial torsion, or femoral torsion.
  - Structural deformities.
  - Hallux valgus deformities.
• In-toe or out-toe gait.
• Musculoskeletal weakness.

In addition to the general indication requirements, foot orthoses will be considered for prior authorization with documentation of the following criteria for specific orthotic devices:

**Foot Inserts**
Removable foot inserts will be considered for prior authorization for clients with documentation of at least one of the following medical conditions:

• Diabetes mellitus.
• History of amputation of the opposite foot or part of either foot.
• History of foot ulceration or pre-ulcerative calluses of either foot.
• Peripheral neuropathy with evidence of callus formation of either foot.
• Deformity of either foot.
• Poor circulation of either foot.

Removable foot inserts may be covered independently of orthopedic shoes with documentation that the client has appropriate footwear into which the insert can be placed.

A University of California at Berkeley (UCB) removable foot insert will be considered for prior authorization with documentation that the device is required to correct or treat at least one of the following conditions:

• A valgus deformity and significant congenital pes planus with pain.
• A structural problem that results in significant pes planus, such as Down syndrome.
• Acute plantar fasciitis.

**Orthopedic Shoes**
Orthopedic shoes must be prescribed by a licensed physician (M.D. or D.O.) or a podiatrist. An orthopedic shoe is used by clients whose feet, although impaired, are essentially intact. An orthopedic shoe differs from a prosthetic shoe, which is used by clients who are missing all or most of the forefoot.

Orthopedic shoes will be considered for prior authorization when at least one of the following criteria is met:

• The shoe is permanently attached to a brace.
• The shoe is necessary to hold a surgical correction, postoperative casting, or serial or clubfoot casting.

An orthopedic shoe may be prior authorized up to one year from the date of the surgical procedure.

Only one pair of orthopedic shoes will be prior authorized every three months. Two pairs of shoes may be purchased at the same time; in such situations, however, additional requests for shoes will not be considered for another six months.

Requests for orthopedic shoes that do not meet the criteria listed above may be considered for prior authorization with documentation of medical necessity.

**Wedges and Lifts**
Wedges and lifts must be prescribed by a licensed physician (M.D. or D.O.) or a podiatrist and must be for treatment of unequal leg length greater than one-half inch.
2.7.2.2.4 Upper-Limb Orthoses

Upper-limb orthoses include, but are not limited to, shoulder orthoses (SO), elbow orthoses (EO), elbow-wrist-hand orthoses (EWHO), elbow-wrist-hand-finger orthoses (EWHFO), wrist-hand-finger orthoses (WHFO), wrist-hand orthoses (WHO), hand-finger orthoses (HFO), finger orthoses (FO), shoulder-elbow-wrist-hand orthoses (SEWHO), shoulder-elbow orthoses (SEO), and fracture orthoses.

In addition to the general indication requirements, upper-limb orthoses will be considered for prior authorization with documentation of the following criteria for specific orthotic devices:

2.7.2.2.5 Other Orthopedic Devices

Protective Helmets

Protective helmets will be considered for prior authorization for clients with a documented medical condition that makes the client susceptible to injury during ADLs. Covered medical conditions include the following:

- Neoplasm of the brain
- Subarachnoid hemorrhage
- Epilepsy
- Cerebral palsy

Requests for all conditions other than those listed above require submission of additional documentation that supports the medical necessity of the requested device.

Dynamic Splints

Dynamic splints such as Dynasplint® will be considered for prior authorization for a three-month trial period when the request is submitted with the following documentation:

- Client’s condition
- Client’s current course of therapy
- Rationale for the use of the dynamic splint
- Agreement by the client or family that the client will comply with the prescribed use of the dynamic splint

After completion of the three-month trial period, the provider may submit a request for purchase of the dynamic splint. Requests for purchase of the splint must include documentation that the three-month trial period was successful and showed improvement in the client’s condition as measured by the following:

- Demonstrated increase in range of motion
- Demonstrated improvement in the ability to complete ADL’s or perform activities outside the home

2.7.2.2.6 Related Services

Repairs, Replacements, and Modifications to Orthoses

Within the guarantee of the manufacturer, providers are responsible, without charge to the client or to Texas Medicaid, for replacement or repair of equipment or any part thereof that is found to be nonfunctional because of faulty material or workmanship.

Service and repairs must be handled under any warranty coverage an item may have. If there is no warranty, providers may request prior authorization for the necessary service and repairs.

A repair because of normal wear or a modification because of growth or change in medical status will be considered for prior authorization if it proves to be more cost effective than replacing the device.
The request for repairs must include a breakdown of charges for parts and the number of hours of labor required to complete the repairs. No charge is allowed for pickup or delivery of the item or for the assembly of Medicaid-reimbursed parts. The following information must be submitted with the request:

- The description and procedure code of the item being serviced or repaired.
- The age of the item.
- The number of times the item has been previously repaired.
- The replacement cost for the item.

The anticipated life expectancy of an orthotic device is six months. Requests for prior authorization for the replacement of a device before its usual life expectancy has ended must include documentation that explains the need for the replacement.

Replacement of orthotic equipment will be considered when the item is out of warranty and repairing the item is no longer cost-effective or when loss or irreparable damage has occurred. A copy of the police or fire report, when appropriate, and the measures to be taken to prevent reoccurrence must be submitted with the prior authorization request.

### 2.7.3 Cranial Molding Orthotics

#### 2.7.3.1 Services/Benefits and Limitations

Cranial molding orthotics may be a benefit when the following applies:

- The cranial molding orthotics are part of a treatment plan for shaping the skull in cases of post-operative plagiocephaly with synostosis or positional plagiocephaly with an associated functional impairment (or risk thereof).
- Documentation exists that the use of the cranial molding orthotic will modify or prevent the development of such impairment, including orofacial and musculoskeletal disorder, for clients who are 3 through 18 months of age.

Muscular torticollis (wry neck) characterized by tight or shortened neck muscles that result in a head tilt or turn is often associated with the secondary development of positional plagiocephaly. Clients with positional plagiocephaly and muscular torticollis must have documentation of early, aggressive treatment (stretching, positioning, or physiotherapy) before consideration for cranial orthosis.

Request for clients with a comorbid diagnosis that prohibits repositioning will be evaluated on an individual basis.

Cranial molding orthotics may be reimbursed using procedure code S1040.

#### 2.7.3.2 Prior Authorization and Documentation Requirements

Cranial molding orthotics may only be considered for prior authorization when they are part of a treatment plan for shaping the skull in cases of post-operative plagiocephaly with synostosis or positional plagiocephaly with an associated functional impairment. Documentation must be kept showing that the use of the cranial molding orthotic will modify or prevent the development of such impairment, including orofacial and musculoskeletal disorder.

Cranial molding orthotics when used as a treatment of plagiocephaly without synostosis is considered cosmetic, not medically necessary, and therefore not a benefit of Texas Medicaid.

The definition for cosmetic, as it applies to cranial molding orthotics, includes surgery or other services used primarily to improve appearance and not to restore or correct significant deformity resulting from disease, trauma, congenital or developmental anomalies or previous therapeutic process.
Requests for cranial molding orthotics will be considered for prior authorization for use after surgery for cranial deformities, including craniosynostosis. Cranial molding orthotics may be considered as a benefit of the Medicaid Program when included as part of a treatment plan to reshape a skull deformity due to pathologic processes.

Cranial molding orthotics must be prior authorized for reimbursement through CCP with documentation supporting medical necessity. Written documentation must include:

- The assessment and recommendations of the appropriate primary care physician, pediatric subspecialist, craniofacial team, or pediatric neurosurgeon.
- A full description of the physical findings, precise diagnosis, age of onset, and the etiology of the deformity.
- Reports of any radiological procedures used in making the diagnosis.
- Documentation that the client is at least 3 months of age but not greater than 18 months of age.
- Anthropometric measurements documenting greater than 10 mm of cranial asymmetry.
- For clients who are 5 months of age and younger, documentation of aggressive repositioning, with or without physical therapy, of at least three months’ duration without improvement in cranial asymmetry.

Note: Due to the mobility of children who are 6 months of age and older and the limited timeframe during which the device may be effective, repositioning is not indicated in this age group.

- Plan of treatment and or follow-up schedule

Prior authorization is denied when pricing is not included with the CCP Prior Authorization Form.

### 2.7.4 Thoracic-Hip-Knee-Ankle Orthoses (THKAO) (Vertical or Dynamic Standers, Standing Frames/Braces, and Parapodums)

#### 2.7.4.1 Services/Benefits and Limitations

THKAO (vertical or dynamic standers, standing frames or braces, and parapodums), including all accessories, require prior authorization. A THKAO may be considered if the client requires assistance to stand and remain standing.

#### 2.7.4.1.1 Parapodium

A parapodium is used to help clients with neuromuscular diseases/conditions resulting in a lack of sufficient muscle power in the trunk and lower extremities to stand with their hands free. It helps develop a sense of balance and aids in learning functional movements such as standing with the hands free. A parapodium acts as an exoskeleton, providing side struts and chest, hip, knee, and foot bracing.

A parapodium may be considered for reimbursement for one of the following levels:

- **Level One:** Small Parapodium. The client has a maximum axillary height of 35 inches and a maximum weight of 55 pounds (normal age range is 1 through 10 years of age). Providers must use procedure code L1500 or L1520.

- **Level Two:** Medium parapodium. The client has a maximum axillary height of 41 inches and a maximum weight of 77 pounds (normal age range is 5 through 12 years of age). Providers must use procedure code L1500-TF or L1520-TF.

- **Level Three:** Large parapodium. The client has a maximum axillary height of 45 inches and a maximum weight of 115 pounds (normal age range is 10 through 16 years of age). Providers must use procedure code L1500-TG or L1520-TG. Labor for parapodium assembly may be prior authorized.
2.7.4.1.2 Standing Frame or Brace

A standing frame or brace is used to help very young clients, who are 12 months of age and older, who have good head control in the upright position and who have a neuromuscular disease/condition resulting in a lack of sufficient muscle power in the trunk and lower extremities to stand with their hands free.

Providers must use procedure code L1510 for a standing frame or brace.

2.7.4.1.3 Vertical or Dynamic Stander

A vertical stander or dynamic stander is used to initiate standing for clients who cannot maintain a good standing posture or may never be able to stand independently. A vertical stander is used to develop weight bearing through the legs in order to decrease demineralization and to promote better body awareness. Documentation for these standers must address medical necessity for the standers to be mobile.

Providers must use procedure code L1510 for a vertical stander. Providers must use procedure code E0642 for the purchase of a dynamic stander.

2.7.4.2 Prior Authorization and Documentation Requirements

THKAO (vertical or dynamic standers, standing frames/braces, and parapodiums), including all accessories, requires prior authorization.

THKAO may be considered for clients who are CCP-eligible and who require assistance to stand and remain standing when documentation submitted clearly shows that it is medically necessary and will correct or ameliorate the client’s disability or physical or mental illness or condition.

Prior authorization may be considered for the THKAOs with the following documentation:

- Diagnoses relevant to the requested equipment, including functioning level and ambulatory status
- Anticipated benefits of the equipment
- Frequency and amount of time of a standing program
- Anticipated length of time the client will require this equipment
- Client’s height/weight/age
- Anticipated changes in the client’s needs, anticipated modifications, or accessory needs, as well as the growth potential of the stander

2.7.5 Prosthetic Services

2.7.5.1 Services/Benefits and Limitations

External prostheses are a benefit of Texas Medicaid when provided by a licensed prosthetist or licensed prosthetist/orthotist through CCP for clients who are birth through 20 years of age.

The following prostheses and related services may be reimbursed when medical necessity criteria are met:

- Lower limb
- Upper limb
- Craniofacial
- External breast
- Repair, replacements, and modifications
- Prosthetic Training
• Accessories to prostheses

Prosthetic training by a physical or occupational therapist for a lower limb prosthesis or an upper extremity prosthesis is a benefit for clients who have not worn one previously or for a prolonged period or who are receiving a different type.

Refer to: Subsection 2.10, “Therapy Services (CCP)” in this handbook for more information on physical and occupational therapy services.

To be considered for reimbursement, prostheses must be dispensed, fabricated, or modified by a licensed prosthetist or licensed prosthetist/orthotist enrolled with Medicare and CCP.

The date of service for a custom-made or custom-fitted prosthesis is the date the supplier places an order for the equipment and incurs a liability for the equipment. The custom-made or custom-fitted prosthesis will be eligible for reimbursement as long as the service is provided during a month the client is eligible for Medicaid.

The following items and services are included in the reimbursement for a prosthetic device and not reimbursed separately:

• Evaluation of the residual limb and gait
• Measurement, casting, or fitting of the prosthesis
• Cost of base component parts and labor contained in the base procedure code description
• Repairs due to normal wear and tear during the 90 days following delivery
• Adjustments or modifications of the prosthesis or the prosthetic component made when fitting the prosthesis or component and for 90 days from the date of delivery when the adjustments are not necessitated by changes in the residual limb or the client's functional ability

In general, base codes do not represent a complete device. To include the additional components necessary for a complete device, providers may bill additional components with a code that is used in addition to a base code. Addition codes may also be used to indicate modifications to a device. The values assigned to the additional codes do not represent the actual value of the component or modification, but only the difference between the total value and the value of the base code. As a result, reimbursement of an addition does not involve subtraction of any amounts from the base code allowance.

2.7.5.1.1 Noncovered Prosthetic Services

Prosthetic devices prescribed by a chiropractor are not a benefit of Texas Medicaid.

A vacuum-assisted socket system (procedure code L5781 or L5782), which is a specialized vacuum pump, is considered experimental and investigational, and is not a benefit of Texas Medicaid.

Myoelectric hand prostheses for conditions other the absence of forearm(s) and hand(s) are considered experimental and investigational and are not a benefit of Texas Medicaid.

A prosthetic device customized with enhanced features is not considered medically necessary if ADLs can be met with a standard prosthetic device.

Accessories that are not required for the effective use of a prosthetic device are not considered medically necessary.

2.7.5.2 Prior Authorization and Documentation Requirements

Prior authorization is required for all prosthetic devices.

A completed CCP Prior Authorization Form requesting the prosthesis must be signed and dated by a physician familiar with the client before requesting prior authorization for all prostheses. All signatures and dates must be current, unaltered, original, and handwritten. Computerized or stamped signa-
tures/dates will not be accepted. The completed CCP Prior Authorization Form must include the procedure codes and numerical quantities for services requested. A copy of the completed, signed, and dated form must be maintained by the prosthesis provider in the client’s medical record. The completed CCP Prior Authorization Form with the original dated signature must be maintained by the prescribing physician in the client’s medical record.

To complete the prior authorization process by paper, the prosthesis provider must fax or mail the completed CCP Prior Authorization Request Form to the CCP prior authorization unit and retain a copy of the signed and dated CCP form in the client’s medical record at the provider’s place of business.

To complete the prior authorization process electronically, the prosthesis provider must complete the prior authorization requirements through any approved electronic methods and retain a copy of the signed and dated CCP Prior Authorization Request form in the client’s medical record at the provider’s place of business.

To facilitate determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including documentation for medical necessity of the equipment or supplies requested. The physician must maintain documentation of medical necessity in the client’s medical record. The provider may be asked for additional information to clarify or complete a request for the service or device.

All requests for prior authorization must include documentation of medical necessity including, but not limited to, documentation that the client meets the following general indications for the requested device:

- The prosthesis replaces all or part of the function of a permanently inoperative, absent, or malfunctioning part of the limb, and identification of the specific limb that is being replaced by the prosthesis.
- The prosthesis is required for ADLs or for rehabilitation purposes, and identification of the ADLs or rehabilitation purpose for which the prosthesis is required.

The provider must keep the following written documentation in the client’s medical record:

- The prescription for the device
  - Prosthetic devices must be prescribed by a physician (M.D. or D.O.).
  - The prescription must be dated prior to or on the initial date of the requested dates of service, which can be no longer than 90 days from the signature date on the prescription.
  - Accurate diagnostic information that supports the medical necessity for the requested device (A retrospective review may be performed to ensure that the documentation included in the client’s medical record supports the medical necessity of the requested service or device).
- The specific make, model, and serial number of the prosthetic components
- The treatment plan outlining the therapy program prescribed by the treating physician, including expected goals with the use of the prosthesis
- A statement submitted by the physician that indicates that the client or client’s family or caregiver demonstrates willingness to comply with the therapy program

Prior authorization is valid for a maximum period of six months from the prescription signature date. At the end of the six-month authorization period, a new prescription is required for prior authorization of additional services.

The actual date of service is the date the supplier has placed an order for the equipment and has incurred liability for the equipment.
2.7.5.2.1 Lower-Limb Prostheses

Lower limb prostheses include, but are not limited to, the following:

- Partial foot, ankle, and knee disarticulation sockets
- Above-knee short prostheses
- Hip and knee disarticulation prostheses
- Postsurgical prostheses
- Preparatory prostheses
- Additions to lower extremity prostheses
- Replacement sockets

A basic lower limb prosthesis consists of the following:

- A socket or connection between the residual limb and the prosthesis
- A suspension mechanism attaching the socket to the prosthesis
- A knee joint that provides support during stance, smooth control during the swing phase, and unrestricted motion for sitting and kneeling
- An exoskeleton or endoskeleton pylon (tube or shell) that attaches the socket to the terminal device
- A terminal device (foot)

In addition to the general indication requirements, the following additional documentation is also required for all lower limb prostheses:

- Written documentation of the client's current and potential functional levels. A functional level is defined as a measurement of the capacity and potential of the individuals to accomplish their expected post-rehabilitation daily function. The potential functional ability is based on reasonable expectations of the treating physician and the prosthetist and includes, but is not limited to, the following:
  - The client’s history, including prior use of a prosthesis if applicable
  - The client’s current condition, including the status of the residual limb and any coexisting medical conditions
  - The client’s motivation to ambulate and ability to achieve independent transfers or ambulation with the use of a lower limb prosthesis

The following functional classification levels have been defined by the Centers for Medicare & Medicaid Services (CMS):

<table>
<thead>
<tr>
<th>Level</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Level 0</td>
<td>Does not have the ability or potential to ambulate or transfer safely with or without assistance, and a prosthesis does not enhance quality of life or mobility.</td>
</tr>
<tr>
<td>Level 1</td>
<td>Has the ability or potential to use a prosthesis for transfers or ambulation on level surfaces at fixed cadence. Typical of the limited and unlimited household ambulator</td>
</tr>
<tr>
<td>Level 2</td>
<td>Has the ability or potential for ambulation with the ability to traverse low level environmental barriers such as curbs, stairs, or uneven surfaces. Typical of the limited community ambulator.</td>
</tr>
</tbody>
</table>
A client whose functional level is zero (0) is not a candidate for a prosthetic device; the device is not considered medically necessary.

**Microprocessor-Controlled Lower Limb Prostheses**

Microprocessor-controlled lower limb prostheses (e.g., Otto Bock C-Leg, Intelligent Prosthesis, or Ossur Rheo Knee) will be considered for prior authorization for clients who have a transfemoral amputation from a nonvascular cause, such as trauma or tumor and a functional level of 3 or above, and who meet the following criteria:

- The individual has adequate cardiovascular reserve and cognitive learning ability to master the higher level of technology and to allow for faster than normal walking speed.
- The individual demonstrates the ability to ambulate at a faster than baseline rate using a standard prosthetic application with a swing and stance control knee.
- The individual has a demonstrated need for long-distance ambulation at variable rates (greater than 400 yards) on a daily basis. Use of the limb in the home or for basic community ambulation is not sufficient to justify provision of the computerized limb instead of standard limb applications.
- The individual has a demonstrated need for regular ambulation on uneven terrain or for regular use on stairs. Use of the limb for limited stair climbing in the home or employment environment is not sufficient evidence for prescription of this device over standard prosthetic application.

The licensed prosthetist or licensed prosthetist/orthotist providing the device must be trained in the fitting and programming of the microprocessor-controlled prosthetic device.

**Foot Prostheses**

The following foot prostheses will be considered for prior authorization for clients whose documented functional level is 1 or above:

- A solid ankle-cushion heel (SACH) foot
- An external keel SACH foot or single axis ankle/foot

A flexible-keel foot or multi-axial ankle/foot will be considered for prior authorization for clients whose documented functional level is 2 or above.

A flex foot system, energy storing foot, multiaxial ankle/foot, dynamic response, or flex-walk system or equivalent will be considered for prior authorization for clients whose documented functional level is 3 or above.

A prosthetic shoe will be considered for prior authorization if it is an integral part of a prosthesis for clients with a partial foot amputation.

**Ankle Prosthesis**

An axial rotation unit will be considered for prior authorization for clients whose documented functional level is 2 or above.

<table>
<thead>
<tr>
<th>Level</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Level 3</td>
<td>Has the ability or potential for ambulation with variable cadence. Typical of the community ambulator who has the ability to traverse most environmental barriers and may have vocational, therapeutic, or exercise activity that demands prosthetic utilization beyond simple locomotion.</td>
</tr>
<tr>
<td>Level 4</td>
<td>Has the ability or potential for prosthetic ambulation that exceeds basic ambulation skills, exhibiting high-impact, stress, or energy levels. Typical of the prosthetic demands of the child, active adult, or athlete.</td>
</tr>
</tbody>
</table>
Knee Prosthesis
A single-axis, constant-friction knee and other basic knee systems will be considered for prior authorization for clients whose documented functional level is 1 or above. A fluid, pneumatic, or electronic knee prosthesis will be considered for prior authorization for clients whose documented functional level is 3 or above. A high-activity knee control frame will be considered for prior authorization for clients whose documented functional level is 4.

Prosthetic Substitutions or Additions for Below-Knee Prostheses
Prosthetic substitutions or additions (procedure codes L5629, L5638, L5639, L5646, L5647, L5704, L5785, L5962, and L5980) are not considered medically necessary when an initial below-knee prosthesis (procedure code L5500) or a preparatory below-knee prosthesis (procedure codes L5510, L5520, L5530, or L5540) is provided.

Prosthetic substitutions or additions (procedure codes L5620, L5629, L5645, L5646, L5670, L5676, L5704, and L5962) are not considered medically necessary when a below-knee preparatory, prefabricated prosthesis (procedure code L5535) is provided.

Prosthetic Substitutions or Additions for Above-Knee Prostheses
Prosthetic substitutions or additions (procedure codes L5610, L5631, L5640, L5642, L5644, L5648, L5705, L5706, L5964, L5980, L5710, L5780, L5790, and L5795) are not considered medically necessary when an above-knee initial prosthesis (procedure code L5505) or an above-knee preparatory prosthesis (procedure codes L5560, L5570, L5580, L5590, L5595, or L5600) is provided.

Prosthetic substitution or additions (procedure codes L5624, L5631, L5648, L5651, L5652, L5705, L5706, L5964, and L5966) are not considered medically necessary when an above-knee preparatory, prefabricated prosthesis (procedure code L5585) is provided.

Sockets
Prior authorization for test (diagnostic) sockets for an individual prosthesis is limited to a quantity of two test sockets. Prior authorization for same-socket inserts for an individual prosthesis is also limited to a quantity of two. Requests for test sockets or same-socket inserts beyond these limitations must include documentation of medical necessity that supports the need for the additional sockets.

2.7.5.2.2 Upper-Limb Prostheses
Upper limb prostheses include, but are not limited to, the following:

- Partial hand prostheses
- Wrist and elbow disarticulation prostheses
- Shoulder and interscapular thoracic prostheses
- Immediate postsurgical or early fitting prostheses
- Preparatory prostheses
- Terminal devices
- Replacement sockets
- Inner sockets-externally powered
- Electric hand, wrist, and elbow prostheses.

Upper limb prostheses will be considered for prior authorization with documentation of all of the general indication requirements. The additional criteria in the following sections apply for specific prosthetic devices.
Myoelectric Upper Limb Prostheses
A myoelectric upper limb prosthetic device is considered medically necessary when all of the following criteria have been met:

- The client has sufficient neurological, myocutaneous, and cognitive function to operate the prosthesis effectively.
- The client has an amputation or missing limb at the wrist or above (e.g., forearm, elbow, and so on).
- The client is free of comorbidities that could interfere with maintaining function of the prostheses (e.g., neuromuscular disease).
- The client retains sufficient microvolt threshold in the residual limb to allow proper function of the prostheses.
- Standard body-powered prosthetic devices cannot be used or are insufficient to meet the functional needs of the patient in performing ADLs.
- The client does not function in an environment that would inhibit function of the prosthesis (e.g., a wet environment or a situation involving electrical discharges that would affect the prosthesis).

2.7.5.2.3 External Breast Prostheses
External breast prostheses will be considered for prior authorization for clients who have congenital absence of a breast or who have had a mastectomy.

2.7.5.2.4 Craniofacial Prostheses
Craniofacial prostheses include, but are not limited to, external nasal, ear, and facial prostheses.
Craniofacial prostheses will be considered for prior authorization with documentation that the device is necessary to correct an absence or deformity of the affected body part.

2.7.5.2.5 Related Services

Accessories to Prostheses
Accessories to prostheses, such as stump stockings and harnesses will be considered for prior authorization when they are essential to the effective use of the prosthetic device.

Repairs, Replacements and Modifications to Prostheses
Repairs due to normal wear and tear will be considered for prior authorization after 90 days from the date of delivery of the initial prosthesis, when the repair is:

- Necessary to make the equipment functional.
- More cost-effective than the replacement of the prosthetic device.

Providers must include documentation that supports medical necessity when they request prior authorization. Additional information from the provider may be requested to determine cost-effectiveness.
Replacement of prosthetic equipment will be considered for coverage when loss or irreparable damage has occurred. A copy of the police or fire report when appropriate and the measures to be taken to prevent reoccurrence must be submitted with the prior authorization request.
Socket replacements will be considered for prior authorization with documentation of functional or physiological need, including, but not limited to, changes in the residual limb, functional need changes, or irreparable damage or wear due to excessive weight or prosthetic demands of very active amputees.
Children typically require new prosthetic devices every 12 to 18 months, although the actual lifespan of a device depends on the child’s rate of skeletal growth. Prosthetic devices for children must accommodate growth and other physiological changes.
Components and systems that allow for growth or increase the lifespan of the prosthesis may include the following:

- Growth-oriented suspension systems and modifications
- Use of modular systems
- Use of flexible sockets
- Use of removable sockets (slip or triple-wall sockets)
- Use of distal pads
- Modification of socket liners
- Increasing or decreasing sock thickness

Modifications due to growth or change in medical status will be considered for prior authorization with documentation of medical necessity.

Medical necessity for requested components or additions to the prosthesis is based on the client’s current functional ability and the expected functional potential as defined by the prosthetist and the ordering physician.

**2.7.6 Claims Information**

Submit services provided by orthotic and prosthetic suppliers in an approved electronic format or on a CMS-1500 paper claim form. Providers must purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

*Important:* Attach the invoice to the claim for any specialized equipment.

Include the name of the referring physician in Block 17 of CMS-1500 paper claim form or its electronic equivalent. Orthotics or prosthetics may be billed in the office, home, or outpatient setting. Claims for services that have been prior authorized must reflect the PAN in Block 23 of the CMS-1500 paper claim form or its electronic equivalent.

*Refer to:* Form CH.30, “Orthotic and Prosthetic Services (CCP Only)” in this handbook for a claim form example.

**2.7.7 Reimbursement**

Orthotic and prosthetic services are reimbursed in accordance with 1 TAC §355.8441. Outpatient hospitals are reimbursed for THSteps DME and expendable supplies in accordance with 1 TAC §355.8061.

**2.8 Personal Care Services (PCS) (CCP)**

**2.8.1 Enrollment**

CCP providers that want to participate in the delivery of PCS to Medicaid clients must be enrolled with TMHP and have the appropriate Texas Department of Aging and Disability Services (DADS) licensure or certification.

All PCS providers must have a TPI and a National Provider Identifier (NPI).

Licensed and certified home health (LCHH) agencies that are currently enrolled through TMHP do not need to enroll as a CCP-PCS provider.
Providers that are currently contracted with DADS to administer consumer-directed services (CDS) or provide PCS through the service responsibility option (SRO), including providers currently enrolled in Texas Medicaid, are required to enroll/reenroll separately as a CDS or SRO provider. Texas Medicaid enrolls only new providers that are currently contracted with DADS to provide PCS through CDS and SRO.

Providers (other than those discussed above) that want to provide PCS to Medicaid clients must enroll through TMHP. Texas Medicaid enrollment rules for PCS participation require providers to have one of the following categories of DADS licensure prior to enrollment:

- Personal Assistance Services (PAS)
- Licensed Home Health Services (LHHS)
- Licensed and Certified Home Health Services (LCHHS)

Additionally, providers must have a TPI in one of the following enrollment categories: LHHS agency, LCHHS agency, or PCS provider.

Providers that are enrolled as any entity other than a LHHS agency or LCHHS agency are required to meet the provider enrollment rules in order to participate in the delivery of PCS through Texas Medicaid.

Refer to: Subsection 2.2.2, “Enrollment” in this handbook for more information about CCP enrollment procedures.

2.8.2 Services/Benefits and Limitations

PCS is a benefit of CCP for Texas Medicaid clients who are birth through 20 years of age and who are not inpatients or residents of a hospital, in a nursing facility or intermediate care facility for persons with intellectual disabilities (ICF-MR), or in an institution for mental disease. PCS will be denied when billed on the same date of service as an inpatient stay service. The provider may appeal the denied claim with documentation supporting that PCS was performed while the client was not in a hospital setting. PCS are support services provided to clients who meet the definition of medical necessity and require assistance with the performance of activities of daily living (ADLs), instrumental activities of daily living (IADLs), and health-related functions due to a physical, cognitive, or behavioral limitation related to a client’s disability or chronic health condition. PCS are provided by someone other than the legal responsible adult of the client who is a minor child or the legal spouse of the client.

A responsible adult is an individual who is an adult, as defined by the Texas Family Code, and who has agreed to accept the responsibility for providing food, shelter, clothing, education, nurturing, and supervision for the client. Responsible adults include, but are not limited to, biological parents, adoptive parents, foster parents, guardians, court-appointed managing conservators, and other family members by birth or marriage.

PCS are those services that assist eligible clients in performing ADLs, IADLs, and other health-related functions. The scope of ADLs, IADLs, and health-related functions includes a range of activities that healthy, non-disabled adults can perform for themselves. Typically, developing children gradually and sequentially acquire the ability to perform these ADLs, IADLs, and health-related functions for themselves. If a typically developing child of the same chronological age could not safely and independently perform an ADL, IADL, or health-related function without adult supervision, then the client’s responsible adult ensures that the client’s needs for the ADLs, IADLs, and health-related functions are met.
PCS include direct intervention (assisting the client in performing a task) or indirect intervention (cueing or redirecting the client to perform a task). ADLs, IADLs, and health-related functions include, but are not limited to, the following:

<table>
<thead>
<tr>
<th>ADLs</th>
<th>IADLs</th>
<th>Health-Related Functions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bathing</td>
<td>Accessing and utilizing health services</td>
<td></td>
</tr>
<tr>

</tr>
<tr>
<td></td>
<td>Medical transportation*</td>
<td></td>
</tr>
</tbody>
</table>

* Medical transportation includes the coordination of transportation to medical appointments and accompaniment to appointments. PCS does not include the payment for transportation or transportation vehicles since these services are available through the MTP.

**Note:** Exercise and range of motion are not available through PCS, but are services that could be provided through physical therapy, private duty nursing, or home health skilled nursing.

PCS do not include the following:

- ADLs, IADLs, or health-related functions that a typically developing child of the same chronological age could not safely and independently perform without adult supervision.
- Services that provide direct intervention when the client has the physical, behavioral, and cognitive abilities to perform an ADL, IADL, or health-related function without adult supervision.
- Services provided to an inpatient or a resident of a hospital, nursing facility, ICF-MR, or an institution for mental disease.
- Duplication of services provided by other programs.
- Services used for or intended to provide respite care or child care.

PCS is considered for reimbursement when providers use procedure code T1019 in conjunction with the appropriate modifier listed in the table above. PCS provided by a home health agency or PAS-only provider, including PCS being provided under the SRO defined in the 40 TAC Part 1, Chapter 41, must be billed in 15-minute increments. PCS provided by a consumer directed services agency (CDSA) under the consumer directed services (CDS) option defined in 40 TAC Part 1, Chapter 41, must submit the attendant fee in 15-minute increments. CDSAs must bill the administration fee once per calendar month.
per client for any month in which the client receives PCS under the CDS option and regardless of the number of PCS units of service the client receives under the CDS option during the month. PCS claims are considered for reimbursement only when TMHP has issued a valid PAN to a PCS provider.

### 2.8.2.1 Place of Services

PCS may be provided in the following settings if medically necessary:

- The client’s home
- The client’s school
- The client’s daycare facility
- Other community setting in which the client is located

**Note:** For claims filing purposes, the PCS provider must bill POS 2 (home) when submitting claims to TMHP.

Texas Medicaid does not reimburse providers for PCS that duplicate services that are the legal responsibility of school districts. The school district, through the School Health and Related Services (SHARS) program, is required to meet the client’s personal care needs while the client is at school. If those needs cannot be met by SHARS or the school district, the school district must submit documentation to the DSHS case manager indicating the school district is unable to provide all medically necessary services. When clients are receiving both PCS and PDN services from an individual person over the same span of time, the combined total number of hours for PCS and PDN are reimbursed according to the maximum allowable rate.

### 2.8.2.2 Client Eligibility

The PCS benefit is available to Texas Medicaid clients who:

- Are birth through 20 years of age.
- Are enrolled with Texas Medicaid.
- Are eligible for CCP.
- Have physical, cognitive, or behavioral limitations related to a disability or chronic health condition that inhibits the client’s ability to accomplish ADLs, IADLs, or health-related functions.

When the client has a functional condition that meets the criteria for PCS, the following needs of the client’s responsible adult will be considered:

- The responsible adult’s need to sleep, work, attend school, and meet his/her own medical needs.

* 40 TAC Part 1, Chapter 41
• The responsible adult’s legal obligation to care for, support, and meet the medical, educational, and psychosocial needs of his/her other dependents.

• The responsible adult’s physical ability to perform the PCS.

Clients who are enrolled in a DADS waiver program may also receive PCS if they are eligible for it, as long as the services that are provided through the waiver program and PCS are not duplicated. Clients who are enrolled in the following DADS waiver programs may access the PCS benefits if they meet the PCS eligibility requirements:

• Community Living Assistance and Support Services (CLASS)
• Deaf/Blind Multiple Disabilities (DBMD)
• Community-Based Alternatives (CBA)
• Consolidated Waiver Program (CWP)
• Medically Dependent Children Program (MDCP)
• Texas Home Living Waiver (TxHmL)
• Youth Empowerment Services (YES)
• Home and Community Services (HCS)

Note: Clients who receive HCS Residential Support Services, Supervised Living Services, or Foster/Companion Care Services are not eligible to receive attendant care services through PCS.

Clients must choose the program through which they receive attendant care, if they meet the eligibility requirements of both programs. Clients will be given the following options for the delivery of attendant care services:

• A client can receive all attendant care services through PCS.
• A client can decline PCS and receive all attendant care service through a waiver program, if the waiver program offers attendant care.

Clients who participate in the CDS option for PCS and for a waiver program are required to choose one CDSA to provide services through both programs. CDASs will only be permitted to file the financial management services (FMS) fee, also known as the monthly administrative fee, through one program. The CDSA must file the FMS claim through the program that provides the highest reimbursement rate.

Clients who are enrolled in State of Texas Access Reform (STAR)+PLUS receive the PCS benefit or personal attendant services through their STAR+PLUS health plan. Claims for these clients must be submitted to their STAR+PLUS health plans for payment consideration, not to TMHP. The STAR+PLUS health plans accept referrals and provide authorizations for eligible clients. The STAR+PLUS health plans process and reimburse personal attendant services claims for their clients who are 20 years of age and younger. DSHS does not assess or authorize PCS for STAR+PLUS-enrolled clients. TMHP does not process or authorize PCS for STAR+PLUS health plan clients.

TMHP processes and authorizes PCS for STAR waiver and Primary Care Case Management (PCCM) clients.

2.8.2.2.1 Accessing the PCS Benefit

Clients must be referred to DSHS before receiving the PCS benefit. A referral can be made by any person who recognizes a client may have a need for PCS, including, but not limited to, the following:

• The client, a parent, a guardian, or a responsible adult
• A primary practitioner, primary care provider, or medical home
• A licensed health professional who has a therapeutic relationship with the client and ongoing clinical knowledge of the client
• A family member
• Home health, personal assistance, or consumer-directed service agency providers

Referrals to DSHS can be made to the appropriate DSHS Health Service Region, based on the client’s place of residence in the state. Clients, parents, or guardians may also call the TMHP PCS Client Line at 1-888-276-0702 for more information on PCS. PCS providers must provide contact information for the client or responsible adult to DSHS or the TMHP PCS Client Contact Line when making a referral.

Upon receiving a referral, DSHS assigns the client a case manager, who then conducts an assessment in the client’s home with the input and assistance of the client or responsible adult. Based on the assessment, the case manager identifies whether the client has a need for PCS. If the case manager identifies a need for PCS, the client or responsible adult is asked to select a Medicaid-enrolled PCS provider in their area.

Once a provider is selected, the DSHS case manager prior authorizes a quantity of PCS based on the assessment and requests TMHP to issue a prior authorization number (PAN) to the selected PCS provider. The PCS provider uses the PAN to submit claims to TMHP for the services provided. DSHS also contacts the client’s primary practitioner (a licensed physician, APRN, or PA) or primary care provider to obtain a statement of need.

2.8.2.2.2 The Primary Practitioner’s Role in the PCS Benefit

A client who is assessed for the PCS benefit must have a primary practitioner (a licensed physician, APRN, or PA) or a primary care provider who has a therapeutic relationship and ongoing clinical knowledge of the client. The primary practitioner or primary care provider must have established a diagnosis for the client and must provide continuing care and medical supervision of the client. When the DSHS case manager has determined the client has a need for the PCS benefit, the case manager contacts the client’s primary practitioner or primary care provider to obtain a Practitioner Statement of Need (PSON). The PSON certifies the client has a physical, cognitive, or behavioral limitation related to a disability or chronic health condition and is birth through 20 years of age. The PSON must be signed and dated by the primary practitioner or primary care provider within 60 days of the initial start of care (SOC). The primary practitioner or primary care provider must mail or fax the completed PSON to the appropriate DSHS Health Services Region. DSHS keeps the signed and dated PSON in the client’s case management record for the duration of the client’s participation in the benefit.

When a behavioral health condition exists, the primary practitioner may be a behavioral health provider. The primary practitioner must maintain the PSON in the client’s medical record.

In the absence of primary practitioner medical record documentation and a Practitioner Statement of Need to support the client has a physical, cognitive or behavioral health condition impacting the client’s ability to perform an ADL or IADL PCS, payment maybe recouped.

2.8.2.3 PCS Provided in Group Settings

PCS may be provided in a provider/client ratio other than one-to-one. Only the time spent on direct PCS for each client may be billed. Total PCS billed for all clients cannot exceed the individual provider’s total number of hours spent at the POS. PCS may be provided by more than one attendant to an individual client, or PCS may be provided to more than one client by one attendant. Settings in which providers can provide PCS in a provider/client ratio other than one-to-one include homes with more than one client needing PCS, foster homes, and independent living arrangements.

A PCS provider may provide PCS to more than one client over the span of the day as long as:
• Each client’s care is based on an individualized service plan.
• Each client’s needs and service plan do not overlap with another client’s needs and service plan.
Example: If the prior authorized PCS hours for Client A is four hours, Client B is six hours, and the actual time spent with both clients is eight hours, the provider must bill for the actual one-on-one time spent with each client, not to exceed the client’s prior authorized hours or total hours worked. It would be acceptable to bill four hours for Client A and four hours for Client B, or three hours for Client A and five hours for Client B. It would not be acceptable to bill five hours for Client A and three hours for Client B. It would be acceptable to bill ten hours if the individual person actually spent ten hours onsite providing prior authorized PCS split as four hours for Client A and six hours for Client B. A total of ten hours cannot be billed if the individual person worked only eight hours.

2.8.3 Prior Authorization and Documentation Requirements

Prior authorization is required before services are provided. All PCS must be prior authorized by a DSHS case manager based upon client need, as determined by the client assessment. DSHS prior authorizes PCS for eligible clients, including clients enrolled in PCCM. The DSHS case manager notifies TMHP of the authorized quantity of PCS. TMHP sends a notification letter with the PAN to the client or responsible adult and the selected PCS provider if PCS is approved or modified. Only the client or responsible adult receives a notification letter with an explanation of denied services. PCS is prior authorized for 12-month periods. PCS providers must provide services from the start of care date agreed to by the client or responsible adult, the case manager, and the PCS provider.

A PCS provider may obtain prior authorization to provide enhanced PCS to clients with a behavioral health condition when the following criteria are met:

- The DSHS case manager completes the Personal Care Assessment Form (PCAF) and identifies the health condition.
- The PCAF indicates that the identified behavioral health condition impacts the client’s ability to perform an activity of daily living (ADL) or an instrumental activity of daily living (IADL).
- The PCAF indicates which ADL(s) or IADL(s) cannot be performed by the client without assistance.
- The DSHS case manager submits the appropriate modifier on the authorization request.

When a client experiences a change in condition, the client or responsible adult must notify the DSHS Health Service Office in the client’s region. A DSHS case manager must perform a new assessment and prior authorize any revisions in the quantity of PCS based on the new assessment. TMHP issues a revised authorization and notifications are sent to the client or responsible adult and the selected PCS provider. If the change is made during a current 12-month prior authorization period, the new prior authorization will maintain the same end date as the original 12-month prior authorization period. The revised authorization period will begin on the SOC date stated in the new assessment.

For continuing and ongoing PCS needs beyond the initial 12-month prior authorization period, a DSHS case manager must conduct a new assessment and submit a new authorization request to TMHP. TMHP sends a notification letter updating the prior authorization to the client, responsible adults, and the selected PCS provider.

Providers can call a toll-free PCS Provider Inquiry Line at 1-888-648-1517 for assistance with inquiries regarding the status of a PCS prior authorization. Providers should direct inquiries about other Medicaid services to the TMHP Contact Center at 1-800-925-9126. PCS providers should encourage the client or responsible adult to contact the appropriate DSHS Health Service Region with inquiries or concerns about the PCS assessment.

2.8.3.1 PCS Provider Responsibilities

PCS providers must comply with all applicable federal, state, and local laws and regulations.

All PCS providers must maintain written policies and procedures for obtaining consent for medical treatment in the absence of the responsible adult. The procedure and policy must meet the standards of the Texas Family Code.
Providers must accept clients only when there is a reasonable expectation the client’s needs can be adequately met in the POS. The POS must be able to support the client’s health and safety needs and adequately support the use, maintenance, and cleaning of all required medical devices, equipment, and supplies. Necessary primary and backup utility, communication, and fire safety systems must be available in the POS.

The PCS provider is responsible for the supervision of the PCS attendant as required by the PCS provider’s licensure requirements.

### 2.8.3.2 Documentation of Services Provided/Retrospective Review
Documentation elements are routinely assessed for compliance in retrospective review of client records, including the following:

- All entries are legible to people other than the author, dated (month, day, year, time), and signed by the author.
- Each page of the record documents the client’s name and Medicaid identification number.
- All attendants’ arrival/departure times are documented with signature and time.
- Documentation of services correlates with and reflects medical necessity for the services provided on any given day.
- Client’s arrival or departure from the home setting is documented with the time of arrival, departure, mode of transportation, and who accompanied the client.

### 2.8.4 Claims Information
TMHP processes PCS claims. PCS providers must submit claims for services in an approved electronic claims format or on the appropriate claim form based on their provider type. Providers, other than home health agencies, enrolled as a PAS-only provider, a CDSA, or an SRO provider must file PCS claims using CMS-1500 paper claim form. Home health agencies, including those enrolled as a CDSA, or an SRO provider, must file PCS claims using the UB-04 CMS-1450 paper claim form. TMHP does not supply the forms.

Home health agencies and consumer-directed agencies that bill for PCS using procedure code T1019 must include the prior authorization number on claims submitted for reimbursement. Additionally, providers utilizing paper, TexMedConnect, or billing through EDI must include the prior authorization number with all claims submissions.

### 2.8.5 Reimbursement
Providers of PCS are reimbursed in accordance with 1 TAC §355.8441.

### 2.9 Private Duty Nursing (CCP)

#### 2.9.1 Enrollment
Home health agencies may enroll to provide PDN under CCP. RNs and licensed vocational nurses (LVNs) may enroll independently to provide PDN under CCP.

Home health agencies must do all of the following:

- Comply with provider participation requirements for home health agencies that participate in Texas Medicaid
- Comply with mandatory reporting of suspected abuse and neglect of children or adults
- Maintain written policies and procedures for obtaining consent for medical treatment for clients in the absence of the parent/guardian
- Comply with all requirements in this manual and the *Texas Medicaid Bulletin*
Independently-enrolled RNs and LVNs must be enrolled as providers in CCP and comply with all of the following:

- The terms of the Texas Medicaid Provider Agreement
- All state and federal regulations and rules relating to Texas Medicaid
- The requirements of this manual, including all updates and revisions published in the *Texas Medicaid Bulletin*, all handbooks, standards, and guidelines published by HHSC

Independently enrolled RNs and LVNs must also:

- Provide at least 30 days’ written notice to clients of their intent voluntarily to terminate services except in situations of potential threat to the nurse’s personal safety.
- Comply with mandatory reporting of suspected abuse and neglect of children.
- Maintain written policies and procedures for obtaining consent for medical treatment for clients in the absence of the parent/guardian.

Independently enrolled RNs must:

- Hold a current license from the Texas BON or another compact state to practice as an RN.
- Agree to provide services in compliance with all applicable federal, state, and local laws and regulations, including the Texas Nursing Practice Act.
- Comply with accepted professional standards and principles of nursing practice.

Independently enrolled LVNs must:

- Hold a current license from the Texas BON to practice as an LVN.
- Agree to provide services in compliance with all applicable federal, state, and local laws and regulations, including the Texas Nursing Practice Act.
- Comply with accepted standards and principles of vocational nursing practice.
- Be supervised by an RN once per month. The supervision must occur when the LVN is present and be documented in the client’s medical record.

Refer to: Subsection 2.2.2, “Enrollment” in this handbook for more information about CCP enrollment procedures.

### 2.9.2 Services/Benefits and Limitations

Medicaid clients who are birth through 20 years of age are entitled to all medically necessary private duty nursing (PDN) services and home health skilled nursing services.

PDN is nursing services, as described by the Texas Nursing Practice Act and its implementing regulations, for clients who meet medical necessity criteria listed below and who require individualized, continuous, skilled care beyond the level of skilled nursing visits provided under Texas Medicaid (Title XIX) Home Health Services skilled nursing (SN).

Nursing services are medically necessary under the following conditions:

- The requested services are nursing services as defined by the Texas Nursing Practice Act and its implementing regulations.
- The requested services correct or ameliorate the client’s disability, physical, mental illness, or condition. Nursing services correct or ameliorate the client's disability, physical or mental illness, or condition when the services improve, maintain, or slow the deterioration of the client’s health status.
- There is no TPR financially responsible for the services.
Medically necessary nursing services maybe either PDN services or home health skilled nursing services, depending on whether the client's nursing needs can be met on a per-visit basis.

“Responsible adult” means an individual who is an adult, as defined by the Texas Family Code, and who has agreed to accept the responsibility for providing food, shelter, clothing, education, nurturing, and supervision for the recipient. Responsible adults include, but are not limited to: biological parents, adoptive parents, foster parents, guardians, court-appointed managing conservators, and other family members by birth or marriage.

PDN must be ordered or prescribed by a physician and provided by an RN, an LVN, or a licensed practical nurse (LPN).

Professional nursing provided by an RN, as defined in the Texas Nursing Practice Act, means the performance of an act that requires substantial specialized judgment and skill, the proper performance of which is based on knowledge and application of the principles of biological, physical, and social science, as acquired by a completed course in an approved school of professional nursing. The term does not include acts of medical diagnosis or the prescription of therapeutic or corrective measures. Professional nursing involves:

- The observation, assessment, intervention, evaluation, rehabilitation, care and counsel, or health teachings of a person who is ill, injured, infirm, or experiencing a change in normal health processes.
- The maintenance of health or prevention of illness.
- The administration of a medication or treatment as ordered by a physician, podiatrist, or dentist.
- The supervision of delegated nursing tasks or teaching of nursing.
- The administration, supervision, and evaluation of nursing practices, policies, and procedures.
- The performance of an act delegated by a physician.
- Development of the nursing care plan.

Vocational nursing, as defined in the Texas Nursing Practice Act, means a directed scope of nursing practice, including the performance of an act that requires specialized judgment and skill, the proper performance of which is based on knowledge and application of the principles of biological, physical, and social science as acquired by a completed course in an approved school of vocational nursing. The term does not include acts of medical diagnosis or the prescription of therapeutic or corrective measures. Vocational nursing involves:

- Collecting data and performing focused nursing assessments of the health status of an individual.
- Participating in the planning of the nursing care needs of an individual.
- Participating in the development and modification of the nursing care plan.
- Participating in health teaching and counseling to promote, attain, and maintain the optimum health level of an individual.
- Assisting in the evaluation of an individual’s response to a nursing intervention and the identification of an individual’s needs.
- Engaging in other acts that require education and training, as prescribed by board rules and policies, commensurate with the nurse’s experience, continuing education, and demonstrated competency.

Professional and vocational nursing care consists of those services that must, under state law, be performed by an RN or LVN as defined by the Texas Nursing Practice Act §301.002. These services include observation, assessment, intervention, evaluation, rehabilitation, care and counseling, and health teaching, and which are further defined as nursing services in 42 CFR §§409.32, 409.33, and 409.44.
• In determining whether a service requires the skill of a licensed nurse, consideration must be given to the inherent complexity of the service, the condition of the client, and the accepted standards of medical and nursing practice.

• The fact that the nursing care can be, or is, taught to the client or to the client’s family or friends does not negate the skilled aspect of the service when the service is performed by a nurse.

• If the service could be performed by the average nonmedical person, the absence of a competent person to perform it does not cause it to be a nursing service.

• If the nature of a service is such that it can safely and effectively be performed by the average nonmedical person without direct supervision of a licensed nurse, the services cannot be regarded as nursing care.

• Some services are classified as nursing care on the basis of complexity alone (e.g., intravenous and intramuscular injections or insertion of catheters), and if reasonable and necessary to the treatment of the client’s illness or injury, would be covered on that basis. In some cases, however, the client’s condition may cause a service that would ordinarily not be considered nursing care to be considered nursing care. This would occur when the client’s condition is such that the service can be safely and effectively provided only by a nurse.

• A service that, by its nature, requires the skills of a nurse in order for it to be provided safely and effectively, continues to be a skilled service even if it is taught to the client, the client’s family, or other caregivers.

PDN should prevent prolonged and frequent hospitalizations or institutionalization and provide cost-effective and quality care in the most appropriate, least restrictive environment. PDN provides direct nursing care and caregiver training and education. The training and education is intended to optimize client health status and outcomes and to promote family-centered, community-based care as a component of an array of service options.

A request must include documentation from the provider to support the medical necessity of the service, equipment, or supply. CCP is obligated to authorize all medically necessary PDN to promote independence and support the client living at home.

PDN cannot be considered for the primary purpose of providing respite care, childcare, activities of daily living for the client, housekeeping services, or comprehensive case management beyond the service coordination required by the Texas Nursing Practice Act.

Claims for PDN services must be submitted to TMHP as follows:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Maximum Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>T1000 with modifier TD or TE</td>
<td>15 minutes</td>
</tr>
</tbody>
</table>

**Note:** Independently-enrolled LVNs must use TE modifier, and independently-enrolled RNs must use the TD modifier.
Home health agencies that provide PDN services for clients with a tracheostomy or clients who are ventilator-dependent receive additional reimbursement. Providers must bill using procedure codes T1000, T1002, or T1003 with UA modifier and one of the following diagnosis codes.

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>51900</td>
</tr>
<tr>
<td>V4614</td>
</tr>
</tbody>
</table>

Because of the nature of the service being provided, some billing situations are unique to PDN. These billing requirements are as follows:

- All hours worked on one day must be billed together, on one detail, even if they involve two shifts. For example, if Nurse A works 7 a.m. to 11 a.m. and then returns and works 7 p.m. to 11 p.m., services must be billed for 8 hours (32 15-minute units) on one detail for that date of service.
- An individually-enrolled nurse will not be reimbursed for more than 16 hours of PDN services in one day.

PDN may be delivered in a provider/client ratio other than one-on-one. An RN or LVN may provide PDN services to more than one client over the span of the day as long as each client’s care is based on an individualized POC, and each client’s needs and POC do not overlap with another client’s needs and POC. Only the time spent on direct PDN for each client is reimbursed. Total PDN billed for all clients cannot exceed an individual provider’s total number of hours at the POS.

A single nurse may be reimbursed for services to more than one client in a single setting when the following conditions are met:

- The hours for PDN for each client have been authorized through CCP.
- Only the actual “hands-on” time spent with each client is billed for that client.
- The hours billed for each client do not exceed the total hours approved for that client and do not exceed the actual number of hours for which services were provided.

**Example:** If the prior authorized PDN hours for Client A is four hours, Client B is six hours, and the actual time spent with both clients is eight hours, the provider must bill for the actual one-on-one time spent with each client, not to exceed the client’s prior authorized hours or total hours worked. It would be acceptable to bill four hours for Client A and four hours for Client B, or three hours for Client A and five hours for Client B. It would not be acceptable to bill five hours for Client A and three hours for Client B. It would be acceptable to bill ten hours if the nurse actually spent ten hours onsite providing prior authorized PDN services split as four hours for Client A and six hours for Client B. A total of ten hours cannot be billed if the nurse worked only eight hours.

For reimbursement purposes, PDN must always be submitted with POS 2 (home) regardless of the setting in which services are actually provided. PDN may be provided in any of the following settings:

- Client’s home
- Client’s school
- Client’s daycare facility

PDN that duplicate services that are the legal responsibility of the school districts are not reimbursed. The school district, through the School Health and Related Services (SHARS) program, is required to meet the client’s skilled nursing needs while the client is at school; however, if those needs cannot be met by SHARS or the school district, documentation supporting medical necessity may be submitted to the CCP with documentation that nursing services are not provided in the school.
A responsible adult of a minor client or a client’s spouse may not be reimbursed for PDN even if the responsible adult is an enrolled provider or employed by an enrolled provider.

PDN is subject to retrospective review and possible recoupment when the medical record does not document that the provision of PDN is medically necessary based on the client’s situation and needs. The PDN provider’s record must explain all discrepancies between the service hours approved and the service hours provided. For example, the parents released the provider from all responsibility for the service hours or the agency was not able to staff the service hours. The release of provider responsibility does not indicate the client does not have a medical need for the services during those time periods.

2.9.2.1 PDN Provided During a Skill Nursing Visit for TPN Administration Education

For clients who receive PDN services and who also require TPN administration education, the intermittent SN visits may be reimbursed separately when the SN services are for client/caregiver training in TPN administration and the PDN provider is not an RN appropriately trained in the administration of TPN, and the PDN provider is not able to perform the function.

PDN and skilled nursing must not be routinely performed on the same date during the same time period.

PDN and skilled nursing will not be considered for reimbursement when the services are performed on the same date during the same time period without prior authorization approval.

If the skilled nursing visit for TPN education occurs during a time period when the PDN provider is caring for the client, both the PDN provider and the nurse educator must document in the client’s medical record the skilled services individually provided including, but not limited to:

- The start and stop time of each nursing providers specialized task(s)
- The client condition that requires the performance of skilled PDN tasks during the skilled nursing visit for TPN education
- The skilled services that each provided during that time period

Both the intermittent skilled nurse visit and the PDN services provided during the same time period may be recouped if the documentation does not support the medical necessity of each service provided.

2.9.2.2 Criteria

2.9.2.2.1 Client Eligibility Criteria

To be eligible for PDN services, a client must meet all the following criteria:

- Be birth through 20 years of age and eligible for Medicaid and THSteps
- Meet medical necessity criteria for PDN
- Have a primary physician who:
  - Provides a prescription for PDN.
  - Establishes a POC.
  - Provides documentation to support the medical necessity of PDN services.
  - Provides continuing medical care and supervision of the client, including, but not limited to, examination or treatment within 30 days (initial requests of PDN services), or examination or treatment that complies with the THSteps periodicity schedule, or is within six months of the PDN extension SOC date, whichever is more frequent (for extensions of PDN services). This requirement may be waived based on review of the client’s specific circumstances.
- Provides specific written, dated orders for the client.
• Require care beyond the level of services provided under Texas Medicaid (Title XIX) Home Health Services

Clients who are birth through 17 years of age must reside with a responsible adult who is either trained to provide nursing care or is capable of initiating an identified contingency plan when the scheduled private duty nurse is unexpectedly unavailable.

2.9.2.2.2 Medical Necessity

PDN is considered medically necessary when a client has a disability, physical, or mental illness, or chronic condition and requires continuous, skillful observations, judgments, and interventions to correct or ameliorate his or her health status.

Documentation submitted for a request for PDN must address the following questions:

• Is the client dependent on technology to sustain life?

• Does the client require ongoing and frequent skilled interventions to maintain or improve health status?

• Will delaying skilled intervention impact the health status of the client? If so, how will the health status be affected?

  • Deterioration of a chronic condition
  • Risk of death
  • Loss of function
  • Imminent risk to health status due to medical fragility

2.9.2.2.3 Place of Service (POS)

PDN is based on the need for skilled care in the client's home; however, these services may follow the client and may be provided in accordance with 42 CFR §440.80.

The POS must be able to support the client’s health and safety needs. It must be adequate to accommodate the use, maintenance, and cleaning of all medical devices, equipment, and supplies required by the client. Necessary primary and backup utilities, communication, fire, and safety systems must be available at all times.

2.9.2.2.4 Amount and Duration of PDN

The amount and duration of PDN must always be commensurate with the client’s medical needs. Requests for services must reflect changes in the client’s condition that affect the amount and duration of PDN.

2.9.3 Prior Authorization and Documentation Requirements

A request for prior authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

Requests for nursing services must be submitted on the required Medicaid authorization forms and include supporting documentation. The supporting documentation must:

• Clearly and consistently describe the client’s current diagnosis, functional status, and condition.

• Consistently describe the treatment throughout the documentation.

• Provide a sufficient explanation as to how the requested nursing services correct or ameliorate the client’s disability, physical or mental illness, or condition.
When a provider receives a referral for PDN, the provider must have an RN perform a nursing assessment of the client within the client’s home environment. This assessment must be performed before seeking prior authorization for PDN, with any request for PDN recertification, or any request to modify PDN hours.

The assessment must demonstrate the following:

- Medical necessity for PDN
- Safety of providing care in the proposed setting
- If birth through 17 years of age, the client resides with an responsible adult who is either trained to provide nursing care or is capable of initiating an identified contingency plan when the scheduled private duty nurse is unexpectedly unavailable.
- “Responsible adult” means an individual who is an adult, as defined by the Texas Family Code, and who has agreed to accept the responsibility for providing food, shelter, clothing, education, nurturing, and supervision for the recipient. Responsible adults include, but are not limited to: biological parents, adoptive parents, foster parents, guardians, court-appointed managing conservators, and other family members by birth or marriage.
- An identified contingency plan is a structured process, designed by the responsible adult and the PDN provider, by which a client will receive care when a scheduled private duty nurse is unexpectedly unavailable, and the responsible adult is unavailable, or is not trained, to provide the nursing care. The identified responsible adult must be able to initiate the contingency plan.
- The existing level of care and any additional health-care services including the following: SHARS, MDCP, OT, PT, ST, primary home care (PHC), and case management services.

*Note: Services provided under these programs do not prevent a client from obtaining all medically necessary services. Certain school services are provided to meet education needs, not medical needs. Records related to a client’s Individuals with Disabilities Education Act (IDEA) services are confidential records that clients do not have to release or provide access to.*

When an RN completes a client assessment and identifies a medical necessity for ADLs or health-related functions to be provided by a nurse, the scope of PDN services may include these ADLs or health-related functions.

*Note: CCP does not review or authorize PDN based on partial or incomplete documentation.*

PDN must be prior authorized, and requests for PDN must be based on the current medical needs of the client.

The following criteria are considered for PDN prior authorization:

- The documentation submitted with the request is complete.
- The requested services are nursing services as defined by the Texas Nursing Practice Act and its implementing regulations.
- The explanation of the client’s medical needs is sufficient to support a determination that the requested services correct or ameliorate the client’s disability, physical or mental illness, or chronic condition.
- The client’s nursing needs cannot be met on an intermittent or part-time basis through Texas Medicaid (Title XIX) Home Health Services skilled nursing services.
- There is no TPR financially responsible for the services.

Only those services that CCP determines to meet the medical necessity criteria for PDN are reimbursed. Before CCP determines the requested nursing services do not meet the criteria, the TMHP Medical Director contacts the treating physician to determine whether additional information or clarification can be provided that would allow for the prior authorization of the requested PDN. If the TMHP
Medical Director is not successful in contacting the treating physician or cannot obtain additional information or clarification, the TMHP Medical Director makes a decision based on the available information.

Providers must obtain prior authorization within three calendar days of the SOC for services that have not been prior authorized. During the prior authorization process, providers are required to deliver the requested services from the SOC date. The SOC date is the date agreed to by the physician, the PDN provider, and the client or responsible adult and is indicated on the submitted POC as the SOC date.

**Note:** *CCP does not prior authorize an SOC date earlier than seven calendar days before contact with TMHP.*

Prior authorizations for more than 16 hours per day are not issued to a single, independently-enrolled nurse. Requests for prior authorizations of PDN must always be commensurate with the client’s medical needs. Requests for services must reflect changes in the client’s condition that affect the amount and duration of PDN.

The length of the prior authorization is determined on an individual basis and is based on the goals and timelines identified by the physician, provider, and client or responsible adult. PDN is not prior authorized for more than six months at a time.

PDN is not prior authorized under any of the following conditions:

- The client does not meet medical necessity criteria.
- The client does not have a primary physician.
- The client is 21 years of age or older.
- The client’s needs are within the scope of services available through Texas Medicaid (Title XIX) Home Health Services SN or home health agency services because the needs can be met on a part-time or intermittent basis.

Intermittent skilled nursing visits for clients who receive private duty nursing (PDN) and who require TPN administration education may be considered for separate prior authorization if:

- The PDN provider is not an RN who has been appropriately trained in the administration of TPN, and the PDN provider is not able to perform the function.
- There is documentation that supports the medical need for an additional skilled nurse to perform TPN.

The skilled nursing services may be prior authorized only for the client/caregiver who will be trained in TPN administration.

### 2.9.3.1 Retroactive Client Eligibility

Retroactive eligibility occurs when the effective date of a client’s Medicaid coverage is before the date that the client’s Medicaid eligibility is added to TMHP’s eligibility file, which is called the “add date.”

For clients with retroactive eligibility, prior authorization requests must be submitted after the client’s add date and before a claim is submitted to TMHP.

For services provided to fee-for-service Medicaid and Primary Care Case Management (PCCM) clients during the client’s retroactive eligibility period, i.e., the period from the effective date to the add date, prior authorization must be obtained within 95 days from the client’s add date and before a claim for those services is submitted to TMHP. For services provided on or after the client’s add date, the provider must obtain prior authorization within three business days of the date of service.
The provider is responsible for verifying eligibility. The provider is strongly encouraged to access AIS or TexMedConnect to verify eligibility frequently while providing services to the client. If services are discontinued before the client’s add date, the provider must still obtain prior authorization within 95 days of the add date to be able to submit claims.

**2.9.3.2 Start of Care (SOC)**

The SOC is the date that care is to begin, as agreed on by the family, the client’s physician, and the provider, and as listed on the POC and the CCP Prior Authorization Request Form. Providers are responsible for determining whether they can accept the client for services.

Once the provider accepts a client for service and accepts responsibility for providing PDN, the provider is required to deliver those services beginning with the SOC date. Providers are responsible for a safe transition of services when the authorization decision is a denial or a reduction of services. Providers are required to notify the physician and the client’s family on receipt of an authorization, a denial, or a change in PDN.

Providers must submit complete documentation no later than three business days from an SOC date to obtain initial coverage for the SOC date.

*Note:* Texas Medicaid (Title XIX) Home Health Services does not authorize a SOC date earlier than three business days before contact with TMHP.

For PDN recertification, CCP must receive complete documentation no later than three business days before the SOC date. It is recommended that recertification requests be submitted up to 30 days before the current authorization ends.

During the prior authorization process for initial and recertification requests, providers are required to deliver the requested services from the SOC date.

**2.9.3.3 Prior Authorization of Initial Requests**

Completed initial requests must be received and dated by CCP within three business days of the SOC. The request must be received by CCP no later than 5 p.m., Central Time, on the third day to be considered received within three business days. If a request is received more than three business days after the SOC, or after 5 p.m., Central Time, on the third day, authorization is given for dates of service beginning three business days before receipt of the completed request.

An initial PDN prior authorization request requires all of the following:

- CCP Prior Authorization Request form
- Home Health Plan of Care (POC) form
- CCP Nursing Addendum to Plan of Care form

All forms must be completed, signed, and dated by the primary physician within 30 calendar days prior to the SOC. The RN who completes the assessment and the client, or responsible adult, must also sign the CCP Nursing Addendum to Plan of Care form.

The CCP Nursing Addendum to Plan of Care form must include all of the following:

- Updated problem list
- Updated rationale/summary page
- Contingency plan
- 24-hour daily care flowsheet
- Signed acknowledgement

Initial requests for PDN may be prior authorized for up to 90 days.
Refer to: Form CH.9, “Nursing Addendum to Plan of Care (CCP) (7 Pages)” in this handbook.
Form CH.8, “Home Health Plan of Care (POC)” in this handbook.

2.9.3.4 Authorization for Revision of Current Services

The provider may request a revision at any time during the authorization period if medically necessary. The provider must notify TMHP at any time during an authorization period if the client’s condition changes and the authorized services are not commensurate with the client’s medical needs.

Completed requests for revision of PDN hours during the current authorization period must be received by CCP within three business days of the revised SOC. The request must be received by CCP no later than 5 p.m., Central Time, on the seventh day to be considered received within three business days. If a request is received more than three business days after the revised SOC or after 5 p.m., Central Time, on the third day, authorization is given for dates of service beginning three business days before receipt of the completed request.

The revised PDN prior authorization request must include all of the following:
- CCP Prior Authorization Request form
- Home Health Plan of Care (POC) form
- CCP Nursing Addendum to Plan of Care form

The provider is responsible for ensuring that the physician reviews and signs the POC within 30 calendar days of the start date of the revised authorization period or more often if required by the client’s condition or agency licensure. The provider must maintain the physician-signed POC in the client’s medical record. PDN providers should not submit a revised POC unless they are requesting a revision.

Revision requests for PDN may be prior authorized up to six months.

If all necessary documentation is not submitted for a six-month authorization, an authorization for a period up to three months may be approved.

Revisions to a current certification must fall within the certification period. If the revision extends beyond the current certification period, new authorization documentation must be submitted to CCP.

Refer to: Form CH.9, “Nursing Addendum to Plan of Care (CCP) (7 Pages)” in this handbook.
Form CH.8, “Home Health Plan of Care (POC)” in this handbook.

2.9.3.5 Recertifications of Authorizations

Completed extension requests must be received and dated by CCP at least seven calendar days before, but no more than 30 days before, the current authorization expiration date. The request must be received by CCP no later than 5 p.m., Central Time, on the seventh day, to be considered received within seven calendar days. If a request is received less than seven calendar days before the current authorization expiration date, or after 5 p.m., Central Time, on the seventh day, authorization is given for dates of service beginning no sooner than seven calendar days after the receipt of the completed request by CCP.

Recertifications may be prior authorized for up to six months. The following criteria are required for recertification authorization:
- The client has received PDN services for at least three months.
- No significant changes in the client’s condition have occurred for at least three months.
• No significant changes in the client’s condition are anticipated.
• The client’s responsible adult, physician, and provider agree that a recertification authorization is appropriate.

The recertification process includes the following:
• All required documentation for PDN services (including the Physician POC, the Nursing Addendum to POC, and the CCP Prior Authorization Request Form)
• CCP Private Duty Nursing six-Month Authorization form, which must be signed and dated by the primary physician, nurse provider, and client, or responsible adult

The nursing care provider is responsible for ensuring that a new Physician POC is obtained within 30 calendar days of the authorization period ending and maintained in the client’s record. Providers should not submit interim POCs to CCP unless requesting a revision.

The nursing care provider must notify CCP at any time during the authorization period if the client’s condition and need for skilled nursing care significantly changes.

The nursing care provider may request a revision from TMHP at any time during the authorization period if the client’s condition requires it.

All authorization timelines apply to recertifications also.

Refer to:
Form CH.9, “Nursing Addendum to Plan of Care (CCP) (7 Pages)” in this handbook.
Form CH.8, “Home Health Plan of Care (POC)” in this handbook.

2.9.3.6 Termination of Authorization
An authorization may be terminated when the:
• Client is no longer eligible for CCP or Medicaid.
• Client no longer meets the medical necessity criteria for PDN.
• POS can no longer accommodate the client’s health and safety.
• Client or responsible adult refuses to comply with the service plan and compliance is necessary to ensure the client’s health and safety.

2.9.3.7 Client/Provider Notification
When PDN is approved as requested, the provider receives written notification. The provider is responsible for notifying the client/family and the physician of the authorized services.

CCP notifies the client and provider in writing when the following instances occur:
• PDN is denied.
• PDN hours authorized are less than the hours requested on the POC.
• PDN hours are modified (e.g., hours are requested by the week but are authorized by the day).
• CCP receives incomplete information from the provider.
• Dates of service authorized are different from those requested.
• The provider is responsible for notification and coordination with the physician and family.
2.9.3.8 Authorization Appeals

Providers may appeal denials or modifications of requested PDN with documentation to support the medical necessity of the requested PDN. A request for prior authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply. Appeals must be submitted to CCP with complete documentation and any additional information within two weeks of the date on the decision letter. If changes are made to the authorization based on this documentation, CCP goes back no more than three business days for initial or revision requests and no more than seven calendar days for recertification requests when additional documentation is submitted.

The client or responsible adult is notified of any denial or modification of requested services and is given information about how to appeal CCP's decision.

Documentation forms have been designed to improve communication between providers and CCP. The forms are available in English and Spanish.

All documentation must be submitted together, and requests are not reviewed until all documentation is received. If complete documentation is received at CCP by 3 p.m., Central Time, a response is returned to the provider within one business day. Complete documentation for initial, revision, recertification, and extension requests for PDN authorizations include all of the following:

- Form CH.2, “CCP Prior Authorization Request Form” in this handbook
- Form CH.8, “Home Health Plan of Care (POC)” in this handbook.
- Form CH.9, “Nursing Addendum to Plan of Care (CCP) (7 Pages)” in this handbook

2.9.3.9 CCP Prior Authorization Request Form

The CCP Prior Authorization Request Form must be completed, signed, and dated by the physician. The physician must mark the Private Duty Nursing box documenting the stability of the client for PDN. All requested dates of service must be included.

2.9.3.10 Home Health Plan of Care (POC)

The POC must be recommended, signed, and dated by the client’s primary physician. A POC must meet the standards outlined in the 42 CFR §484.18 related to the written POC. The primary physician must review and revise the POC, in consultation with the provider and the responsible adult, for each prior authorization, or more frequently as the physician deems necessary or the client’s situation changes.

Pursuant to 42 CFR §484.18, the POC must include the following elements:

- All pertinent diagnoses
- Client’s mental status
- Types of services requested including amount, duration, and frequency
- Medical equipment needed
- Prognosis
- Rehabilitation potential
- Functional limitations
- Activities permitted
- Nutritional requirements
- Medications, including dose, route, and frequency
- Treatments, including amount, duration, and frequency
- Safety measures needed
• Instructions for a timely discharge from service, if appropriate
• Date the client was last seen by the physician
• Other medical orders
• Start- and end-of-care dates
• Responsible adult or identified contingency plan

Note: Coverage periods do not coincide necessarily with calendar weeks or months but, instead, cover a number of services to be scheduled between a start and end date that is assigned during the prior authorization period. A week includes the day of the week on which the prior authorization period begins and continues for seven days. For example, if the prior authorization starts on a Thursday, the prior authorization week runs Thursday through Wednesday. The number of nursing hours authorized for a week must be contained in that prior authorization week. Hours billed in excess of those authorized for the PAN week are subject to recoupment.

2.9.3.11 Nursing Addendum to Plan of Care (CCP) Form

The Nursing Addendum to Plan of Care (CCP) Form addresses PDN eligibility criteria, nursing care plan summary, health history summary, 24-hour schedule, and the rationale for the hours of PDN requested.

The following is a description of the nursing care plan summary:

• The nursing care summary is not a complete nursing care plan.
• Information must be client-focused and detailed.
• The Problem List must reflect the reasons that nursing services are needed. The problem list is not the nursing care plan. Providers must identify two-to-four current priority problems from their nursing care plan. The problem does not need to be stated as a nursing diagnosis. The problems listed must focus on the primary reasons that a licensed nurse is required to care for the client. Other attached documents are not accepted in lieu of this section.
• The Goals must relate directly to the problems listed and be client-specific and measurable. Goals may be short- or long-term; however, for many clients who receive PDN, the goals generally are long-term.
• The Outcomes are the effects of the provider’s nursing interventions and must be measurable. Generally, these are more short-term than goals. For initial requests, list expected outcomes. Extension requests should note the results of nursing interventions.
• The Progress must be viewed as a “yardstick” or continuum on which progress toward goals is marked. Initial requests must state expected progress for the authorization period. Extension requests must list the progress noted during the previous authorization period. It is recognized that all progress may not be positive.
• The addendum must summarize the client’s health problems relating to the medical necessity for PDN.
• The addendum must clearly communicate a picture of the client’s overall condition and nursing care needs.
• The summary of recent health history is imperative in determining whether the client’s condition is stable or if new nursing care needs have been identified. This section gives the PDN provider an opportunity to describe the client’s recent health problems, including acute episodes of illness, hospitalizations, injuries, and so on. The summary should create a complete picture of the client’s condition and nursing care needs. The summary may cover the previous 90 days, even though the authorization period is 60 days; however, the objective of the summary is to capture the client’s
recent health problems and current health priorities. This section should not be merely a list of events. This section is the place to indicate the frequency of nursing interventions if they are different from the physician’s order on the POC, such as, the order may be for a procedure to be PRN (Pro Re Nata—”As Needed”), but it is actually being performed every two hours.

- The addendum must include the rationale for increasing, decreasing, or maintaining the level of PDN and must relate to the client’s health problems and goals.
- The addendum must include the provider’s plan to decrease hours or discharge from service (if appropriate).

2.9.3.11.1 The Client’s 24-Hour Daily Schedule

All direct-care services must be identified. It is understood that the schedule may change, as the client’s needs change. CCP does not have to be notified of changes in the schedule except as they occur when a PDN recertification is requested.

2.9.3.12 Responsible Adult or Identified Contingency Plan Requirement

For clients who are birth through 17 years of age, the client must reside with an identified responsible adult who is either trained to provide nursing care or is capable of initiating an identified contingency plan when the scheduled private duty nurse is unexpectedly unavailable.

- “Responsible adult” means an individual who is an adult, as defined by the Texas Family Code, and who has agreed to accept the responsibility for providing food, shelter, clothing, education, nurturing, and supervision for the recipient. Responsible adults include, but are not limited to: biological parents, adoptive parents, foster parents, guardians, court-appointed managing conservators, and other family members by birth or marriage.

- An identified contingency plan is a structured process, designed by the responsible adult and the PDN provider, by which a client will receive care when a scheduled private duty nurse is unexpectedly unavailable, and the responsible adult is unavailable, or is not trained, to provide the nursing care. The responsible adult must be able to initiate the identified contingency plan.

The responsible adult’s signature must be on the form acknowledging:

- Information about CCP PDN has been discussed and received.
- PDN may change or end based on a client’s need for nursing care.
- PDN is not authorized for the primary purpose of providing respite, childcare, ADLs, or housekeeping.
- All requirements have been met before seeking prior authorization for PDN.
- The responsible adult has participated in the development of the POC and the nursing care plan for the client.
- Emergency plans have been made and are part of the client’s care plan.
- The client or responsible adult agrees to follow the physician’s POC.

2.9.3.13 Documentation of Services Provided/Retrospective Review

Documentation elements that are routinely assessed for compliance in retrospective review of client records include, but are not limited to, the required documentation noted above, as well as the following:

- All entries are legible to people other than the author, dated (month, day, year, time), and signed by the author.
- Each page of the record documents the client’s name and Medicaid identification number.
- Client assessment time is documented at the beginning of each shift.
• All nurses’ arrival/departure times are documented with signature and time in the narrative section of the nurses’ notes.

• Entries in the nursing flowsheet or narrative notes must be dated and timed every 1 to 2 hours and must include the following:
  • The client’s condition
  • The name of the medication, dose, route, time given, client response, and other pertinent information is recorded when medication is administered.
  • The name of treatment, time given, route or method used, client response, and other pertinent information is provided when treatments are administered.
  • The amount, type, times given, route or method used, client response, and other pertinent information is provided when feedings are administered.

• The POC and documentation of services correlate with and reflect medical necessity for the services provided on any given day.

• A request for prior authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

• Client’s arrival or departure from the home setting is documented with the time of arrival, departure, mode of transportation, and who accompanied the client.

• Documentation of teaching the client or the client’s responsible adult includes the length of time, the subject of the teaching, the understanding of the subject matter by the person receiving the teaching, and other pertinent information.

• Supervisory visits include specifics of the visit.

• If a client is receiving skilled nursing services through another program or service in addition to CCP, such as MDCP, each provider’s shift notes designate specifically which type of service they are providing during that shift.

2.9.4 Claims Information
PDN providers must submit claims for services in an approved electronic claims format or on the appropriate claim form based on their provider type. Home health agencies must submit claims on the UB-04 CMS-1450 paper claim form. Independently enrolled nurses must submit claims on the CMS-1500 paper claim form. TMHP does not supply the forms.

Refer to:  Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

2.9.5 Reimbursement
PDN services are reimbursed in accordance with 1 TAC §355.8441.
2.10 Therapy Services (CCP)

Occupational (OT), physical (PT), and speech therapy (ST) services beyond the limitations of Texas Medicaid and Title XIX Home Health Services are benefits of the CCP for clients who are birth through 20 years of age and who are CCP eligible when:

- Therapy is prescribed by a licensed therapist.
- Documentation of medical necessity supports a condition that requires ongoing therapy or rehabilitation in the usual course, treatment, and management of the client's condition.
- Therapy services are provided by a licensed therapist.
- Therapy is provided in one of the following places of service:
  - CORF and ORF
  - Freestanding rehabilitation facility
  - Home
  - Licensed hospital
  - Medicaid-enrolled private therapist office
  - Physician office

This section does not apply to CORFs and ORFs.

Refer to: Subsection 2.4, “Comprehensive Outpatient Rehabilitation Facilities (CORFs)/Outpatient Rehabilitation Facilities (ORFs)” in this handbook.

Subsection 2.12, “Inpatient Rehabilitation Hospital (Freestanding) (CCP)” in this handbook.

Therapy may be performed by auxiliary personnel (occupational therapist, physical therapist, speech-language pathologist assistants) under the supervision of the physician or the licensed independently practicing therapist.

OT, PT, and ST may be performed in the office or home setting and may be authorized to be provided in the following locations: home of the client, home of the caregiver/guardian, client’s daycare facility, or the client’s school.

Services provided to a client on school premises are only permitted when delivered before or after school hours. The only CCP therapy that can be delivered in the client’s school during regular school hours are those delivered by school districts as School Health and Related Services (SHARS) in POS 9.

Refer to: Section 3, “School Health and Related Services (SHARS)” in this handbook for more information regarding SHARS.

PT provided in the nursing home setting is limited to the nursing facility because it must be available to nursing home residents on an “as needed” basis and must be provided directly by the staff of the facility or furnished by the facility through arrangements with outside-qualified resources. Nursing home facilities must refrain from admitting clients who need goal directed therapy if the facility is unable to provide these services.

Home health agencies that perform therapy services under CCP are allowed one visit per day per therapy type and paid at the statewide visit rate.

Services That Are Not a Benefit

The following services are not a benefit of CCP.

- Procedure code 97010 (application of a modality to one or more areas; hot or cold packs).
- Services that are not medically necessary. Examples include, but are not limited to:
- Massage therapy that is the sole therapy or is not part of a therapeutic plan of care (POC) to address an acute condition.
- Hippotherapy.
- Separate reimbursement for VitalStim® therapy for dysphagia.
- Treatment solely for the instruction of other agency or professional personnel in the client’s physical, occupational, or speech therapy program.
- Training in nonessential tasks (e.g., homemaking, gardening, recreational activities, cooking, driving, assistance with finances, scheduling).
- Emotional support, adjustment to extended hospitalization or disability, and behavioral readjustment.
- Therapy prescribed primarily as an adjunct to psychotherapy.

2.10.1 Occupational Therapy (OT)

2.10.1.1 Enrollment

HHSC allows enrollment of independently-practicing licensed occupational therapist under CCP. The information in this section applies to CCP services only.

2.10.1.2 Services/Benefits and Limitations

A procedural modifier is required when submitting claims for OT services. Providers must use modifier GO for OT services. Procedural modifiers are not required for evaluations and re-evaluations.

Evaluations (procedure code 97003) are limited to once every 180 days any provider. Re-evaluations (procedure code 97004) are limited once per 30 days, any provider.

An evaluation or re-evaluation performed on the same day as therapy from a different therapy type must be performed at distinctly separate times to be considered for reimbursement.

If a therapy evaluation or re-evaluation procedure code and like therapy procedure codes are billed for the same date of service by any provider, the like therapy evaluation or re-evaluation will be denied. Physical therapy evaluation (procedure code 97003) or re-evaluation (procedure code 97004) will be denied as part of the following occupational therapy procedure codes billed with Modifier GO.

### Procedure Codes

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97012</td>
</tr>
<tr>
<td>97034</td>
</tr>
<tr>
<td>97140</td>
</tr>
<tr>
<td>97799</td>
</tr>
</tbody>
</table>

The following procedure codes are billed in 15-minute increments:

### Procedure Codes

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97032</td>
</tr>
<tr>
<td>97124</td>
</tr>
<tr>
<td>97762</td>
</tr>
</tbody>
</table>

Procedure codes that may be billed in multiple quantities (i.e., 15 minutes each) are limited to two hours (eight units) per day individual, group, or a combination of individual and group therapy, per therapy type (two hrs. of OT and two hrs. of PT). Each 15 minutes equals one unit.
All 15-minute increment procedure codes are based on the actual amount of billable time associated with the service. For those services for which the unit of service is 15 minutes (1 unit = 15 minutes), partial units must be rounded up or down to the nearest quarter hour.

The documentation retained in the client’s file must include the billable start time, billable stop time, total billable minutes, and activity that was performed.

To calculate billing units, count the total number of billable minutes for the calendar day for the client, and divide by 15 to convert to billable units of service. If the total billable minutes are not evenly divisible by 15, minutes greater than 7 are converted to 1 unit and 7 or fewer minutes are converted to 0 unit.

For example, 68 total billable minutes/15 = 4 units + 8 minutes. Since the 8 minutes are more than 7 minutes, those 8 minutes are converted to 1 unit. Consequently, 68 total billable minutes = 5 units of service. The following table indicates the time intervals for 0 through 8 units:

<table>
<thead>
<tr>
<th>Units</th>
<th>Number of Minutes</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 units</td>
<td>0 minutes through 7 minutes</td>
</tr>
<tr>
<td>1 unit</td>
<td>8 minutes through 22 minutes</td>
</tr>
<tr>
<td>2 units</td>
<td>23 minutes through 37 minutes</td>
</tr>
<tr>
<td>3 units</td>
<td>38 minutes through 52 minutes</td>
</tr>
<tr>
<td>4 units</td>
<td>53 minutes through 67 minutes</td>
</tr>
<tr>
<td>5 units</td>
<td>68 minutes through 82 minutes</td>
</tr>
<tr>
<td>6 units</td>
<td>83 minutes through 97 minutes</td>
</tr>
<tr>
<td>7 units</td>
<td>98 minutes through 112 minutes</td>
</tr>
<tr>
<td>8 units</td>

</tr>
</tbody>
</table>

If procedure code 97750 is billed with an office visit on the same date of service by the same provider, the office visit will be denied.

Procedure code 97150 will be denied if billed on the same date of service by the same provider as procedure code 97750.

Electrical stimulation therapy (procedure code 97032) may be considered with documentation of medical necessity.

2.10.1.3 Prior Authorization and Documentation Requirements

Prior authorization is required for occupational therapy except for therapy provided in the inpatient setting, evaluations or re-evaluations, services provided through the SHARS or Early Childhood Intervention (ECI) programs.

Refer to: Section 3, “School Health and Related Services (SHARS)” in this handbook for more information regarding SHARS.

Note: It is not mandatory for ECI programs to request prior authorization for reimbursement of therapy services; however, in order to expedite claims processing providers should submit the ECI Request for Initial/Renewal Outpatient Therapy form with their claim form. All therapists involved with the client must sign and date the ECI Request for Initial/Renewal Outpatient Therapy form. When a physician does not sign the therapy form, a copy of a
separate prescription for therapies must be included with the physician’s original signature, and must be dated on or before the actual beginning date of the therapy. A physician’s prescription is required every 180 days.

The following documentation must be submitted to TMHP prior to the start of care for the current episode of therapy for consideration for prior authorization:

- A current written order by a physician based on medical necessity.
- A prescription is considered current when it is signed and dated on or no later than 60 days before the start of therapy.
- A “Request for Initial Outpatient Therapy (Form TP-1)” or “Request for Extension of Outpatient Therapy (2 Pages) (Form TP-2)” must be submitted to TMHP prior to the start of care for the current episode of therapy.
- The most recent evaluation and treatment plan. To establish medical necessity, the written treatment plan must include the following:
  - The age of the client at the time of evaluation
  - Diagnosis
  - Description of specific therapy being prescribed
  - Specific treatment goals related to the client’s individual needs. Therapy goals may include improving function, maintenance of function, or slowing of the deterioration of function.
  - For an initial request, anticipated measurable progress toward goals, the prognosis, and the client’s gross motor skills in years or months.
  - For a new request for additional therapy, documentation of all progress made from the beginning of the previous treatment period.
  - Duration and frequency of therapy
  - Requested date of service

The number of sessions per week must be supported by documentation supporting the medical necessity for the frequency requested.

A request for OT services may be prior authorized for no longer than 180 days duration. A new request must be submitted if therapy is required for a longer duration.

The GO modifier is required on all prior authorization requests for occupational therapy.

When requesting prior authorization for group occupational therapy, the provider must submit documentation supporting the group process as being medically necessary and beneficial to the client. When group therapy is authorized, weekly therapy limits will not be exceeded.

If a provider discontinues therapy with a client and a new provider begins therapy during an existing authorization period, submission of a new plan of care and documentation of the last therapy visit with the previous provider is required along with a letter from the client, or responsible adult, stating the date therapy ended with the previous provider.

2.10.1.4 Claims Information

Providers must submit claims for therapy services in an approved electronic claims format, a CMS-1500, or UB-04 CMS-1450 paper claim form from the vendor of their choice. TMHP does not supply the forms.

Providers can refer to Volume 1 for general information regarding claims filing.
Refer to:  Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.  
Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.  

2.10.1.5 Reimbursement  
OT services are reimbursed in accordance with 1 TAC §355.8441. See the online fee lookup (OFL) or the applicable fee schedule on the TMHP website at www.tmhp.com for reimbursement rates.

2.10.2 Physical Therapy (PT)  
2.10.2.1 Enrollment  
HHSC allows enrollment of independently-practicing licensed physical therapist under CCP. The information in this section applies to CCP services only.

2.10.2.2 Services/Benefits and Limitations  
A procedural modifier is required when submitting claims for PT services. Providers must use modifier GP for PT services. Procedural modifiers are not required for evaluations and re-evaluations.

Evaluations (procedure code 97001) are limited to once every 180 days any provider. Re-evaluations (procedure code 97002) are limited once per 30 days, any provider.

An evaluation or re-evaluation performed on the same day as therapy from a different therapy type must be performed at distinctly separate times to be considered for reimbursement.

If a therapy evaluation or re-evaluation procedure code and like therapy procedure codes are billed for the same date of service by any provider, the like therapy evaluation or re-evaluation will be denied. Physical therapy evaluation (procedure code 97001) or re-evaluation (procedure code 97002) will be denied as part of the following physical therapy procedure codes billed with Modifier GP.

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97012 97014 97016 97018 97022 97024 97026 97028 97032 97033</td>
</tr>
<tr>
<td>97034 97035 97036 97039 97110 97112 97113 97116 97124 97139</td>
</tr>
<tr>
<td>97140 97150 97530 97535 97537 97542 97750 97760 97761 97762</td>
</tr>
<tr>
<td>97799 S8990</td>
</tr>
</tbody>
</table>

The following procedure codes are billed in 15-minute increments:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97032 97033 97034 97035 97036 97039 97110 97112 97113 97116</td>
</tr>
<tr>
<td>97124 97139 97140 97530 97535 97537 97542 97750 97760 97761</td>
</tr>
<tr>
<td>97762 97799 S8990</td>
</tr>
</tbody>
</table>

Procedure codes that may be billed in multiple quantities (i.e., 15 minutes each) are limited to two hours (eight units) per day individual, group, or a combination of individual and group therapy, per therapy type (two hrs of OT and two hrs of PT). Each 15 minutes equals one unit.
All 15-minute increment procedure codes are based on the actual amount of billable time associated with the service. For those services for which the unit of service is 15 minutes (1 unit = 15 minutes), partial units must be rounded up or down to the nearest quarter hour.

The documentation retained in the client’s file must include the billable start time, billable stop time, total billable minutes, and activity that was performed.

To calculate billing units, count the total number of billable minutes for the calendar day for the client, and divide by 15 to convert to billable units of service. If the total billable minutes are not evenly divisible by 15, minutes greater than 7 are converted to 1 unit and 7 or fewer minutes are converted to 0 unit.

For example, 68 total billable minutes/15 = 4 units + 8 minutes. Since the 8 minutes are more than 7 minutes, those 8 minutes are converted to 1 unit. Consequently, 68 total billable minutes = 5 units of service.

Refer to: Subsection 2.10.1, “Occupational Therapy (OT)” in this handbook for 15-minute conversion table.

The following procedure codes are limited to once per day, for each therapy type (OT and PT):

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97012</td>
</tr>
</tbody>
</table>

If procedure code 97750 is billed with an office visit on the same date of service by the same provider, the office visit will be denied.

Procedure code 97150 will be denied if billed on the same date of service by the same provider as procedure code 97750.

Electrical stimulation therapy (procedure code 97032) may be considered with documentation of medical necessity.

2.10.2.3 Prior Authorization and Documentation Requirements

Prior authorization is required for physical therapy except for therapy provided in the inpatient setting, evaluations or re-evaluations, services provided through the SHARS or Early Childhood Intervention (ECI) programs.

Refer to: Section 3, “School Health and Related Services (SHARS)” in this handbook for more information regarding SHARS.

Note: It is not mandatory for ECI programs to request prior authorization for reimbursement of therapy services; however, in order to expedite claims processing providers should submit the ECI Request for Initial/Renewal Outpatient Therapy form with their claim form. All therapists involved with the client must sign and date the ECI Request for Initial/Renewal Outpatient Therapy form. When a physician does not sign the therapy form, a copy of a separate prescription for therapies must be included with the physician’s original signature, and must be dated on or before the actual beginning date of the therapy. A physician’s prescription is required every 180 days.

The following documentation must be submitted to TMHP prior to the start of care for the current episode of therapy for consideration for prior authorization:

- A current written order by a physician and based on medical necessity.
- A prescription is considered current when it is signed and dated on or no later than 60 days before the start of therapy.
- A “Request for Initial Outpatient Therapy (Form TP-1)” or “Request for Extension of Outpatient Therapy (2 Pages) (Form TP-2)” must be submitted to TMHP prior to the start of care for the current episode of therapy.
• The most recent evaluation and treatment plan. To establish medical necessity, the written treatment plan must include the following:
  • The age of the client at the time of evaluation
  • Diagnosis
  • Description of specific therapy being prescribed
  • Specific treatment goals related to the client's individual needs. Therapy goals may include improving function, maintenance of function, or slowing of the deterioration of function.
  • For an initial request, anticipated measurable progress toward goals, the prognosis, and the client’s gross motor skills in years or months.
  • For a new request for additional therapy, documentation of all progress made from the beginning of the previous treatment period.
  • Duration and frequency of therapy
  • Requested dated of service

The number of sessions per week must be supported by the medical necessity of the frequency requested.

A request for PT services may be prior authorized for no longer than 180 days duration. A new request must be submitted if therapy is required for a longer duration.

The GP modifier is required on all prior authorization requests for physical therapy.

When requesting prior authorization for group physical therapy, the provider must submit documentation supporting the group process as being medically necessary and beneficial to the client. When group therapy is authorized, weekly therapy limits will not be exceeded.

If a provider discontinues therapy with a client and a new provider begins therapy during an existing authorization period, submission of a new plan of care and documentation of the last therapy visit with the previous provider is required along with a letter from the client, or responsible adult stating the date therapy ended with the previous provider.

2.10.2.4 Claims Information

Providers must submit claims for therapy services in an approved electronic claims format, a CMS-1500, or UB-04 CMS-1450 paper claim form from the vendor of their choice. TMHP does not supply the forms.

Providers may refer to Volume 1 for general information regarding claims filing.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

2.10.2.5 Reimbursement

PT services are reimbursed in accordance with 1 TAC §355.8441.

See the online fee lookup (OFL) or the applicable fee schedule on the TMHP website at www.tmhp.com for reimbursement rates.

2.10.3 Speech Therapy (ST)

2.10.3.1 Enrollment
HHSC allows enrollment of independently-practicing licensed SLPs under CCP. The information in this section applies to CCP services only.

2.10.3.2 Services/Benefits and Limitations
A procedural modifier is required when submitting claims for ST services. Providers must use modifier GN for ST services. Procedural modifiers are not required for evaluations and re-evaluations.

Speech therapy evaluation (procedure code 92506) is limited to once every 180 days, any provider.
Speech therapy re-evaluation (procedure code S9152) is limited to once every 30 days, any provider.
Speech therapy treatment codes 92507, 92508, and 92526 are payable in 15-minute increments at a maximum of four units (one hour) per day.

All 15-minute increment procedure codes are based on the actual amount of billable time associated with the service. For those services for which the unit of service is 15 minutes (1 unit = 15 minutes), partial units must be rounded up or down to the nearest quarter hour.

The documentation retained in the client’s file must include the billable start time, billable stop time, total billable minutes, and activity that was performed.

To calculate billing units, count the total number of billable minutes for the calendar day for the client, and divide by 15 to convert to billable units of service. If the total billable minutes are not evenly divisible by 15, minutes greater than 7 are converted to 1 unit and 7 or fewer minutes are converted to 0 unit.

For example, 68 total billable minutes/15 = 4 units + 8 minutes. Since the 8 minutes are more than 7 minutes, those 8 minutes are converted to 1 unit. Consequently, 68 total billable minutes = 5 units of service.

Refer to: Subsection 2.10.1, “Occupational Therapy (OT)” in this handbook for 15-minute conversion table.

Speech therapy evaluation and re-evaluations will be denied when billed on the same date of service, any provider, as procedure codes 92507 and 92508 with modifier GN.

Procedure codes 92630 and 92633 are limited to two procedures per day, for different procedures, billed by the same provider or provider group.

Procedure codes 92526 and 92610 may be considered for reimbursement for evaluation and treatment of swallowing dysfunctions and oral functions for feeding.

Procedure code 97535 is used for speech therapy services for training for augmentative communication devices.

2.10.3.3 Prior Authorization and Documentation Requirements
Prior authorization is required for speech therapy except for therapy provided in the inpatient setting, evaluations or re-evaluations, services provided through the SHARS or Early Childhood Intervention (ECI) programs.

Refer to: Section 3, “School Health and Related Services (SHARS)” in this handbook for more information regarding SHARS.

Note: It is not mandatory for ECI programs to request prior authorization for reimbursement of therapy services; however, in order to expedite claims processing providers should submit the ECI Request for Initial/Renewal Outpatient Therapy form with their claim form. All therapists involved with the client must sign and date the ECI Request for Initial/Renewal Outpatient Therapy form. When a physician does not sign the therapy form, a copy of a
separate prescription for therapies must be included with the physician's original signature, and must be dated on or before the actual beginning date of the therapy. A physician's prescription is required every 180 days.

The following documentation must be submitted to TMHP prior to the start of care for the current episode of therapy for consideration for prior authorization:

- A current written order by a physician and based on medical necessity.
- A prescription is considered current when it is signed and dated on or no later than 60 days before the start of therapy.
- A “Request for Initial Outpatient Therapy (Form TP-1)” or “Request for Extension of Outpatient Therapy (2 Pages) (Form TP-2)” must be submitted to TMHP prior to the start of care for the current episode of therapy.
- The most recent evaluation and treatment plan. To establish medical necessity, the written treatment plan must include the following:
  - The age of the client at the time of evaluation
  - Diagnosis
  - Description of specific therapy being prescribed
  - Specific treatment goals related to the client’s individual needs. Therapy goals may include improving function, maintenance of function, or slowing of the deterioration of function.
  - For an initial request, anticipated measurable progress toward goals, the prognosis, and the client’s gross motor skills in years or months.
  - For a new request for additional therapy, documentation of all progress made from the beginning of the previous treatment period.
  - Duration and frequency of therapy
  - Requested date of service

The number of sessions per week must be supported by documentation supporting the medical necessity for the frequency requested.

A request for ST services may be prior authorized for no longer than 180 days duration. A new request must be submitted if therapy is required for a longer duration.

The GN modifier is required on all prior authorization requests for speech therapy.

When requesting prior authorization for group speech therapy, the provider must submit documentation supporting the group process as being medically necessary and beneficial to the client. When group therapy is authorized, weekly therapy limits will not be exceeded.

If a provider discontinues therapy with a client and a new provider begins therapy during an existing authorization period, submission of a new plan of care and documentation of the last therapy visit with the previous provider is required along with a letter from the client, or responsible adult, stating the date therapy ended with the previous provider.

2.10.3.4 Claims Information

Providers must submit claims for therapy services in an approved electronic claims format, a CMS-1500, or UB-04 CMS-1450 paper claim form from the vendor of their choice. TMHP does not supply the forms.

Providers may refer to Volume 1 for general information regarding claims filing.
2.10.3.5 Reimbursement

ST services are reimbursed in accordance with 1 TAC §355.8441.

See the online fee lookup (OFL) or the applicable fee schedule on the TMHP website at www.tmhp.com for reimbursement rates.

2.11 Inpatient Psychiatric Hospital/Facility (Freestanding) (CCP)

2.11.1 Enrollment

To be eligible to participate in CCP, a psychiatric hospital/facility must be accredited by the Joint Commission, have a valid provider agreement with HHSC, and have completed the TMHP enrollment process. Facilities certified by Medicare must also meet the Joint Commission accreditation requirements.

Freestanding psychiatric hospitals enrolled in Medicare may also receive payment for Medicare deductible and coinsurance amounts with the exception of clients who are 21 through 64 years of age. The information in this section is applicable to CCP services only.

All providers of laboratory services must comply with the rules and regulations of the Clinical Laboratory Improvement Amendments of 1988 (CLIA). Providers not complying with CLIA are not reimbursed for laboratory services.

2.11.1.1 Continuity of Hospital Eligibility Through Change of Ownership

Under procedures set forth by the CMS, and HHSC, a change in ownership of a hospital does not terminate Medicare eligibility. Medicaid participation may be continued subject to the following requirements:

- Recertification as a Title XVIII (Medicare) hospital is obtained if applicable.
- A new Title XIX (Medicaid) agreement between the hospital and HHSC under new ownership is obtained.

Providers can obtain the Medicaid hospital participation agreement by contacting TMHP Provider Enrollment.

Refer to: Subsection 2.2.2, “Enrollment” in this handbook for more information about CCP enrollment procedures.

Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks) for information about CLIA requirements.

2.11.2 Services/Benefits and Limitations

Note: Outpatient services for hospital-based psychiatric day treatment programs or psychiatric facilities are not a benefit of Texas Medicaid.
Inpatient psychiatric treatment in a nationally accredited freestanding psychiatric facility or a nationally accredited state psychiatric hospital is a benefit of Texas Medicaid for clients who are birth through 20 years of age at the time of the service request and service delivery if:

- The client has a psychiatric condition that requires inpatient treatment.
- The inpatient treatment is directed by a psychiatrist.
- The inpatient treatment is provided in a nationally accredited facility or hospital.
- The provider is enrolled in Texas Medicaid.

Admissions must be medically necessary except for court ordered services for mental health commitments or a condition of probation and are subject to Texas Medicaid’s retrospective utilization review (UR) requirements.

When a client requires admission or once the client becomes Medicaid eligible while in the facility, a certification of need must be completed and placed in the client’s medical record within 14 days of the admission.

Client services must be provided in the most appropriate setting and in a timely manner to meet the mental health needs of the client.

Inpatient admissions for the single diagnosis of chemical dependency or abuse (such as alcohol, opioids, barbiturates, and amphetamines) without an accompanying medical complication are not a benefit of Texas Medicaid. Additionally, admissions for chronic diagnoses such as intellectual disability, organic brain syndrome, or chemical dependency or abuse are not covered benefits for freestanding and state psychiatric facilities without an accompanying medical complication or medical condition.

Supporting documentation (certification of need) must be documented in the individual client’s record. This documentation must be maintained by each facility for a minimum of five years and be readily available for review whenever requested by HHSC or its designee.

Refer to: Subsection 2.2.4, “Prior Authorization and Documentation Requirements” in this handbook for more information about documentation requirements.

2.11.3 Prior Authorization and Documentation Requirements

Prior authorization is required under TMHP Comprehensive Care Inpatient Psychiatric Unit (CCIP) for admission to freestanding psychiatric facilities or state psychiatric hospitals for clients who are birth through 20 years of age.

A toll-free telephone and fax line are available to complete the authorization process. Contact the TMHP CCIP Unit at 1-800-213-8877 or fax to 1-512-514-4211.

Authorization procedures and approved providers may be different for managed care clients. Contact the client’s specific health care plan for details.

A completed Psychiatric Inpatient Initial Admission Request Form or Psychiatric Inpatient Extended Stay Request Form prescribing the inpatient psychiatric services must be signed and dated by the admitting physician familiar with the client prior to requesting authorization. All signatures must be current, unaltered, original, and handwritten. Computerized or stamped signatures are not accepted. The completed Psychiatric Inpatient Initial Admission Request Form or Psychiatric Inpatient Extended Stay Request Form must be maintained by the requesting provider and the prescribing physician. The original signature copy must be kept in the hospital's medical record for the client.

Documentation of medical necessity for inpatient psychiatric care must specifically address the following issues:

- Why the ambulatory care resources in the community cannot meet the treatment needs of the client.
• Why impatient psychiatric treatment under the care of a psychiatrist is required to treat the acute episode of the client.

• How the services can reasonably be expected to improve the condition or prevent further regression of the client’s condition in a proximate time period.

Psychological or neuropsychological testing performed in a freestanding or state psychiatric facility does not require prior authorization; however, the facility must maintain documentation that supports medical necessity for the testing and the testing results of any psychological or neuropsychological testing service performed while the client is an inpatient.

For initial inpatient admissions to freestanding and state psychiatric facilities, the completed Psychiatric Inpatient Initial Admission Request Form must be faxed no later than the date of the client’s admission unless the admission is after 5 P.M., on a holiday or a weekend. When the admission occurs after 5 P.M., on a holiday or a weekend, the TMHP CCIP Unit must receive the faxed request on the next business day following admission. If the admission occurs after 2 P.M., the provider must contact the TMHP CCIP Unit by telephone and fax the Psychiatric Inpatient Initial Admission Request Form to the TMHP CCIP Unit on the following business day.

• To complete the prior authorization process the provider must fax the completed Psychiatric Inpatient Admission Form to the TMHP CCIP Unit.

• To facilitate a determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including accurate documentation of medical necessity for the services requested.

Initial admissions may be prior authorized for a maximum of five days based on the client’s Medicaid eligibility and documentation of medical necessity.

• All psychiatric admission requests for clients who are 11 years of age and younger will be reviewed by a psychiatrist.

• Psychiatric admission requests for clients who are 12 through 20 years of age will be reviewed by a mental health professional. Any requests for psychiatric admissions which do not meet the criteria for admission will be referred to a psychiatrist for final determination.

Providers must submit a Psychiatric Inpatient Extended Stay Request Form to the TMHP CCIP Unit requesting prior authorization for a continuation of stay. Requests for a continuation of stay must be received on or before the last day authorized or denied. The provider is notified of the decision in writing via fax by the TMHP CCIP Unit. If the date of the TMHP CCIP Unit determination letter is on or after the last day authorized or denied, the request for continuation of stay is due by 5:00 p.m. of the next business day.

The Psychiatric Inpatient Extended Stay Request Form must reflect the need for continued stay in relation to the original need for admission. Any change in the client’s diagnosis must be noted on the request. Additional documentation or information supporting the need for continued stay may be attached to the form. Up to seven days may be authorized for an extension request.

2.11.3.1 Medicaid Clinical Criteria for Inpatient Psychiatric Care For Clients

The client must have a valid AXIS I, DSM-IV-TR diagnosis as the principle admitting diagnosis and outpatient therapy or partial hospitalization has been attempted and failed, or a psychiatrist has documented reasons why an inpatient level of care is required. The client’s Axis II diagnosis must also be included on the request for inpatient psychiatric treatment.

The client must meet at least one of the following criteria:

• The client is presently a danger to self, demonstrated by at least one of the following:
  • Recent suicide attempt or active suicidal threats with a deadly plan and an absence of appropriate supervision or structure to prevent suicide.
• Recent self-mutilative behavior or active threats of same with likelihood of acting on the threat and an absence of appropriate supervision or structure to prevent self-mutilation (i.e., intentionally cutting/burning self).

• Active hallucinations or delusions directing or likely to lead to serious self-harm or debilitating psychomotor agitation or intellectual disability resulting in a significant inability to care for self.

• Significant inability to comply with prescribed medical health regimens due to concurrent Axis I psychiatric illness and such failure to comply is potentially hazardous to the life of the client. The medical (AXIS III) diagnosis must be treatable in a psychiatric setting.

• The client is a danger to others. This behavior should be attributable to the client’s specific AXIS I or DSM-IV-TR diagnosis and can be adequately treated only in a hospital setting. This danger is demonstrated by one of the following:
  • Recent life-threatening action or active homicidal threats of same with a deadly plan and availability of means to accomplish the plan with likelihood of acting on the threat.
  • Recent serious assaultive or sadistic behavior or active threats of same with likelihood of acting on the threat and an absence of appropriate supervision or structure to prevent assaultive behavior.
  • Active hallucinations or delusions directing or likely to lead to serious harm of others.

• The client exhibits acute onset of psychosis or severe thought disorganization, or there is significant clinical deterioration in the condition of someone with a chronic psychosis, rendering the client unmanageable and unable to cooperate in treatment, and the client is in need of assessment and treatment in a safe and therapeutic setting.

• The client has a severe eating or substance abuse disorder which requires 24-hour-a-day medical observation, supervision, and intervention.

• The client exhibits severe disorientation to person, place, or time.

• The client’s evaluation and treatment cannot be carried out safely or effectively in other settings due to severely disruptive behaviors and other behaviors which may also include physical, psychological, or sexual abuse.

• The client requires medication therapy or complex diagnostic evaluation where the client’s level of functioning precludes cooperation with the treatment regimen.

• The client is involved in the legal system, manifests psychiatric symptoms, and is ordered by court to undergo a comprehensive assessment in a hospital setting to clarify the diagnosis and treatment needs.

The proposed treatment/therapy requires 24-hour-a-day medical observation, supervision, and intervention and must include all of the following:

• Active supervision by a psychiatrist with the appropriate credentials as determined by the Texas Medical Board (TMB) and with documented specialized training, supervised experience, and demonstrated competence in the care and treatment of children and adolescents.

• Implementation of an individualized treatment plan.

• Provision of services which can reasonably be expected to improve the client’s condition or prevent further regression so that a lesser level of care can be implemented.

Proper treatment of the client’s psychiatric condition requires services on an inpatient basis under the direction of a psychiatrist and is being provided in the least restrictive environment available, and ambulatory care resources available in the community do not meet the client’s needs.
2.11.3.2 Continued Stays

Continued stays are considered when the client meets at least one of the criteria from above and has a treatment/therapy regimen that includes all of the following:

- Active supervision by a psychiatrist with the appropriate credentials as determined by the TMB and with documented specialized training, supervised experience, and demonstrated competence in the care and treatment of children and adolescents. Treatment/therapy plans must be guided by the standards of treatment specified by the Texas Society of Child and Adolescent Psychiatry.
- Treatment/therapy requires an inpatient level of care.
- Initial discharge plans have been formulated and actions have been taken toward implementation, including documented contact with a local mental health provider.

Continued stays are considered for children and adolescents whose discharge plan does not include returning to their natural home: If the party responsible for placement has provided the provider with three documented placement options for which the child meets admission criteria, but which cannot accept the child, up to five days may be authorized, per request, to allow alternative placement to be located. Up to three five-day extensions may be authorized.

2.11.3.3 Court-Ordered Services

A request for prior authorization of court-ordered services must be submitted no later than seven calendar days after the date on which the services began.

Court-ordered services are not subject to the 12-hour system limitation per provider per day when billed with modifier H9.

Court-ordered services are not subject to the five day admission limitation or the seven day continued stay limitation. Court-ordered services include:

- Mental health commitments
- Condition of probation (COP)

For court-ordered admissions, a copy of the doctor’s certificate and all court-ordered commitment papers signed by the judge must be submitted with the psychiatric hospital inpatient form.

Specific court-ordered services for evaluations, psychological or neuropsychological testing, or treatment may be prior authorized as mandated by the court. A copy of the court document signed by the judge must accompany prior authorization requests. If the requested services differ from the court order, the additional services will be reviewed for medical necessity. Requested services beyond those court-ordered are subject to medical necessity review.

2.11.3.4 Denials

All prior authorization requests not submitted or received by the TMHP CCIP Unit in accordance with established policies are denied through the submission date, and claim payment is not made for the dates of service denied.

All denials may be appealed. The TMHP CCIP Unit must receive these appeals within 15 days of the TMHP CCIP Unit denial notice.

- Appeals of a denial for an initial admission or a continued stay must be accompanied by the documentation supporting medical necessity that the provider believes warrants reconsideration.
- Appeals of a denial for late submission of information must be accompanied by documentation which the provider believes supports the compliance with HHSC claims submission guidelines.
• Appeals are reviewed first by an experienced psychiatric LCSW (Licensed Clinical Social Worker) or an RN to determine if the required criteria is documented and then forwarded to a psychiatrist for final determination. The provider will be notified of all denial determinations in writing via fax by the TMHP CCIP Unit.

2.11.3.5 Utilization Review

All decisions on requests or appeals for admission or continuation of stay are responded to in writing and faxed to the provider by TMHP.

Utilization review activities of all Medicaid services provided by hospitals reimbursed under either the diagnosis-related group (DRG) prospective payment system or Tax Equity and Fiscal Responsibility Act (TEFRA) are required by Title XIX of the Social Security Act, Sections 1902 and 1903. The review activities are performed through a series of monitoring systems developed to ensure that services are appropriate to need and in the optimum quality and quantity. Clients and providers are subject to utilization review monitoring. The monitoring focuses on the appropriate screening activities, medical necessity of all services, and the quality of care reflected by the choice of services provided, type of provider involved, and settings in which care was delivered. This monitoring ensures cost-effective administration of Texas Medicaid.

A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

Utilization review may also occur by an examination of particular claims or services not within the regular screening review when a specific utilization review is requested by HHSC or the Texas Attorney General's Office.

2.11.3.6 Retrospective Utilization Review

All admissions are subject to retrospective utilization review. The complete medical record is used to evaluate the medical necessity of admission, each day of continued inpatient care, and the quality of care provided.

Reminder: Admissions and continued stays must be certified in accordance with 42 CFR, Sections 441.150 through 441.182. Certification of need must be established and maintained as documentation for each Medicaid client. Each facility must maintain this documentation and make it readily available for review whenever requested by HHSC or its designee.

For admissions of Medicaid-eligible clients or admission of clients who gain Medicaid eligibility while in the facility, the certification of need must be completed by the interdisciplinary team responsible for the POC within 14 days of admission.

Documentation of medical necessity for inpatient psychiatric care must specifically address the following issues:

• Why the ambulatory care resources in the community cannot meet the treatment needs of the client.

• Why inpatient psychiatric treatment under the care of a psychiatrist is required to treat the acute episode of the client.

• How the services can reasonably be expected to improve the condition or prevent further regression of the client’s condition in a proximate time period.

A request for authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

2.11.4 Claims Information

Providers must submit claims for inpatient psychiatric hospital services to TMHP in an approved electronic claims format or on a UB-04 CMS-1450 paper claim form. Providers must purchase the UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply the forms.
The PAN must be identified in Block 63 of the UB-04 CMS-1450 or the appropriate field of the electronic form.

Use of revenue code 124 is restricted to freestanding psychiatric hospitals. TMHP must receive claims for payment consideration according to filing deadlines for inpatient claims.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Form CH.26, “Inpatient Psychiatric Hospital/Facility (CCP Only)” in this handbook for a claim form example.

2.11.5 Reimbursement

Freestanding psychiatric facilities are reimbursed a provider-specific prospective payment system rate in accordance with 1 TAC §355.8063 subsection (v) and (w).

For more information on cost reports for their facility, providers should call Medicaid Audit at 1-512-506-6117.

2.12 Inpatient Rehabilitation Hospital (Freestanding) (CCP)

2.12.1 Enrollment

Note: Rehabilitation provided at an acute care facility is covered through Texas Medicaid fee-for-service.

To be eligible to participate in CCP, a freestanding rehabilitation hospital must be certified by Medicare, have a valid provider agreement with HHSC, and have completed the TMHP enrollment process. Texas Medicaid enrolls and reimburses freestanding inpatient rehabilitation hospitals for CCP services and Medicare deductible/coinsurance. The information in this section is applicable to CCP services only.

Refer to: Subsection 2.2.2, “Enrollment” in this handbook for more information about CCP enrollment procedures.

2.12.1.1 Continuity of Hospital Eligibility Through Change of Ownership

Under procedures set forth by the CMS and HHSC, a change in ownership of a hospital does not terminate Medicare eligibility; therefore, Medicaid participation may be continued subject to the following requirements:

- Recertification as a Title XVIII (Medicare) hospital must be obtained.
- A new Title XIX (Medicaid) agreement between the hospital and HHSC under new ownership must be obtained.

Providers can obtain the Medicaid hospital participation agreement by contacting TMHP Provider Enrollment.

2.12.2 Services/Benefits and Limitations

Note: Rehabilitation provided at an acute care facility is covered through Medicaid fee-for-service.

Inpatient rehabilitation hospital services include medically necessary items and services ordinarily furnished by a Medicaid hospital or by an approved out-of-state hospital under the direction of a physician for the care and treatment of inpatient clients. Inpatient rehabilitation will be considered for an acute problem or an acute exacerbation of a chronic problem resulting in a significant decrease in...
functional ability that will benefit from inpatient rehabilitation services. A condition is considered to be acute or an acute exacerbation of a chronic condition only during the six months from the onset date of the acute condition or the acute exacerbation of the chronic condition.

2.12.2.1 Comprehensive Treatment

The intensity of necessary rehabilitative service cannot be provided in the outpatient setting.

Comprehensive rehabilitation treatment must be under the leadership of a physician. Comprehensive rehabilitation treatment must be an active interdisciplinary team, defined as at least two types of therapies.

Comprehensive treatment must consist of at least two appropriate physical modalities designed to resolve or improve the client’s condition (OT, PT, and ST), and must be provided for a minimum of three hours per day for five days per week.

2.12.3 Prior Authorization and Documentation Requirements

Prior authorization is required. After receiving the documentation establishing the medical necessity and plan of medical care by the treating physician, prior authorization is considered by CCP for the initial service and an extension of service as applicable. A request for prior authorization must include documentation from the provider to support the medical necessity of the service.

All inpatient rehabilitation services provided to clients who are birth through 20 years of age in a freestanding rehabilitation facility require prior authorization.

Prior authorization will be considered when the client has met all of the following criteria:

- The client has an acute problem or an acute exacerbation of a chronic problem resulting in a significant decrease in functional ability that will benefit from inpatient rehabilitation services.
- The intensity of necessary rehabilitative service cannot be provided in the outpatient setting.
- The client requires, and will receive, multidisciplinary team care, defined as at least two therapies (occupational, physical, or speech therapy).
- This therapy will be provided for a minimum of three hours per day, five days per week.

The physician and the provider must maintain all documentation in the client’s medical record.

Inpatient rehabilitation may be prior authorized for up to two months when the attending physician submits documentation of medical necessity. The treatment plan must indicate that the client is expected to improve within a 60-day period and be restored to a more functional lifestyle for an acute condition or the previous level of function for an acute exacerbation of a chronic condition.

Requests for subsequent services for increments up to 60 days may be prior authorized based on medical necessity. Requests for prior authorization of subsequent services must be received before the end-date of the preceding prior authorization.

A prior authorization request for an additional 60 days of therapy will be considered with documentation supporting medical necessity.

Supporting documentation for an initial request must include the following:

- A signed physician’s order including the physician’s original handwritten signature (stamped signatures and dates are not accepted). The physician’s signature is valid for no more than 90 days prior to the requested start of care date.
- A CCP Prior Authorization Form signed and dated by the physician.
- A current therapy evaluation with the documented age of the client at the time of evaluation.
- Therapy goals related to the client’s individual needs; goals may include improving or maintaining function, or slowing of deterioration of function.
• An updated written comprehensive treatment plan established by the attending physician or by the therapist to be followed during the inpatient rehabilitation admission that:
  • Is under the leadership of a physician and includes a description of the specific therapy being prescribed, diagnosis, treatment goals related to the client’s individual needs, and duration and frequency of therapy.
  • Includes the date of onset of the illness or injury requiring the rehabilitation admission.
  • Includes the requested dates of service.
  • Incorporates an active interdisciplinary team.
  • Consists of at least two appropriate physical modalities (OT, PT, and ST) designed to resolve or improve the client’s condition.
  • Include a minimum of three hours of team interaction with the client every day, five days per week.
• In addition to the documentation for an initial request, supporting documentation for a request for subsequent services must include the following:
  • A brief synopsis of the outcomes of the previous treatment relative to the debilitating condition
  • The expected results to be achieved by an extension of the active treatment plan, and the time interval at which this extension outcome should be achieved
  • Discussion why the initial two months of inpatient rehabilitation has not met the client’s needs and why the client cannot be treated in an outpatient setting

2.12.4 Claims Information

Providers must submit inpatient rehabilitation hospital services to TMHP in an approved electronic claims format or on a UB-04 CMS-1450 paper claim form. Providers must purchase the UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

For OT, PT, and ST services, freestanding rehabilitation and acute care hospitals can use revenue codes 128, 420, 424, 430, 434, 440, and 444.

TMHP must receive claims for payment consideration according to filing deadlines for inpatient claims. Claims for services that have been authorized must reflect the PAN in Block 63 of the UB-04 CMS-1450 paper claim form or its electronic equivalent.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Form CH.27, “Inpatient Rehabilitation Hospital (CCP Only)” in this handbook for a claim form example.

2.12.5 Reimbursement

Reimbursement for care provided in the freestanding rehabilitation hospital is made under the Texas DRG Payment System.
A new provider is given a reimbursement interim rate of 50 percent until a cost audit has been performed. Payment is calculated by multiplying the standard dollar amount (SDA) for the hospital’s payment division indicator times the relative weight associated with the DRG assigned by Grouper.

**Important:** Outpatient services are not reimbursed.

The DRG payment may be enhanced by an adjusted day or cost outlier payment, if applicable. For example, the limit per spell-of-illness under Texas Medicaid guidelines is waived for clients who are birth through 20 years of age. An outlier payment may be made to compensate for unusual resource utilization or a lengthy stay.

The following criteria must be met to qualify for a day outlier payment. Inpatient days must exceed the DRG day threshold for the specific DRG. Additional payment is based on inpatient days that exceed the DRG day threshold multiplied by 70 percent of the per diem amount of a full DRG payment. The per diem amount is established by dividing the full DRG payment amount by the arithmetic mean length of stay for the DRG.

To establish a cost outlier, TMHP determines the outlier threshold by using the greater of the full DRG payment amount multiplied by 1.5 or an amount determined by selecting the lesser of the universe mean of the current base year data multiplied by 11.14 or the hospital’s SDA multiplied by 11.14.

The calculation that yields the greater amount is used in calculating the actual cost outlier payment. The outlier threshold is subtracted from the amount of reimbursement for the admission established under the TEFRA principles and the remainder multiplied by 70 percent to determine the actual amount of the cost outlier payment.

If an admission qualifies for both a day and a cost outlier, the outlier resulting in the highest payment to the hospital is paid.

The Remittance and Status (R&S) Report reflects the outlier reimbursement payment and defines the type of outlier paid, day or cost.

Providers should call the TMHP provider relations representative for their area with questions about the outlier payment.

### 2.12.5.1 Client Transfers

When more than one hospital provides care for the same case, the hospital furnishing the most significant amount of care receives consideration for a full DRG payment.

The other hospital(s) is/are paid a per diem rate based on the lesser of the mean length of stay for the DRG or eligible days in the facility. The DRG modifier PT on the R&S Report indicates per diem pricing related to a client transfer.

Client transfers within the same facility are considered one continuous stay and receive only one DRG payment. The facility must bill only one claim.

After all hospital claims have been submitted, TMHP performs a post-payment review to determine whether the hospital furnishing the most significant amount of care received the full DRG. If the review reveals that the hospital furnishing the most significant amount of care did not receive the full DRG, an adjustment is initiated.
3. SCHOOL HEALTH AND RELATED SERVICES (SHARS)

3.1 Overview

Medicaid services provided by school districts in Texas to Medicaid-eligible students are known as SHARS. The oversight of SHARS is a cooperative effort between the Texas Education Agency (TEA) and HHSC. SHARS allows local school districts, including public charter schools, to obtain Medicaid reimbursement for certain health-related services that are documented in a student’s Individualized Education Program (IEP). SHARS are provided to students who meet all of the following requirements:

- Are 20 years of age and younger and eligible for Medicaid
- Meet eligibility requirements for special education described in the Individuals with Disabilities Education Act (IDEA)
- Have IEPs that prescribe the needed services

Services covered by SHARS includes:

- Audiology services
- Counseling
- Nursing services
- Occupational therapy (OT)
- Personal care services (PCS)
- Physical therapy (PT)
- Physician services
- Psychological services, including assessments (procedure code 96101)
- Speech therapy (ST)
- Transportation in a school setting

These services must be provided by qualified personnel who are under contract with or employed by the school district. Furthermore, the school district must be enrolled as a SHARS Medicaid provider in order to bill Texas Medicaid for these services.

**Important:** The Centers for Medicare & Medicaid Services (CMS) requires SHARS providers to participate in the Random Moment Time Study (RMTS), to be eligible to bill and receive reimbursement for SHARS direct services, and submit an annual SHARS Cost Report.

3.1.1 Eligibility Verification

The following are means to verify Medicaid eligibility of students:

- Verify electronically through third party software or TexMedConnect.
- School districts may inquire about the eligibility of a student by submitting the student’s Medicaid number or two of the following: name, date of birth, or Social Security number. A search can be narrowed further by entering the county code or sex of the student. Verifications may be submitted in batches without limitations on the number of students.
- Contact the Automated Inquiry System (AIS) at 1-800-925-9126.
3.2 Enrollment

3.2.1 SHARS Enrollment

To enroll in Texas Medicaid as a SHARS provider, school districts, including public charter schools, must employ or contract with individuals or entities that meet certification and licensing requirements in accordance with the Texas Medicaid State Plan for SHARS to provide program services. Since public school districts are government entities, they should select "public entity" on the enrollment application.

SHARS providers are required to notify parents or guardians of their rights to a “freedom of choice of providers” (42 Code of Federal Regulations [CFR] §431.51) under Texas Medicaid. Most SHARS providers currently provide this notification during the initial Admission, Review, and Dismissal (ARD) process. If a parent requests that someone other than the employees or currently contracted staff of the SHARS provider (school district) provide a required service listed in the student’s IEP, the SHARS provider must make a good faith effort to comply with the parent’s request. The SHARS provider can negotiate with the requested provider to provide the services under contract. The requested provider must meet, comply with, and provide all of the employment criteria and documentation that the SHARS provider normally requires of its employees and currently contracted staff. The SHARS provider can negotiate the contracted fee with the requested provider and is not required to pay the same fee that the requested provider might receive from Medicaid for similar services. If the SHARS provider and the requested provider do not agree on a contract, the parties can determine whether a nonschool SHARS relationship in accordance with 42 CFR §431.51 is possible. If the parties do not agree to a nonschool SHARS relationship, the SHARS provider is responsible for providing the required services and must notify the parent that no contracted or nonschool SHARS relationship could be established with the requested provider.

Refer to: Subsection 2.2, “Reimbursement Methodology” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for more information.

3.2.2 Nonschool SHARS Provider Enrollment

A nonschool SHARS provider must have either a current provider identifier as a Texas Medicaid provider of the IEP service or meet all of the eligibility requirements to obtain a provider identifier as a Texas Medicaid provider of the IEP service. For example, a nonschool SHARS provider of speech therapy must meet all provider criteria to provide Texas Medicaid fee-for-service speech therapy and cannot hold only a state education certificate as a speech therapist.

To be enrolled in Texas Medicaid as a nonschool SHARS provider, the enrollment packet must contain an affiliation letter that:

- Is written on school district letterhead
- Is signed by the school district superintendent or designee
- Contains assurances that the school district will reimburse the state share to HHSC for any Texas Medicaid payments made to the nonschool SHARS provider for the listed student and service
- Lists the Medicaid number and Social Security number of the student to be served and notes the type of IEP SHARS service to be provided
- Acknowledges that the nonschool SHARS provider has agreed in writing to:
  - Provide the listed SHARS service shown in the student’s IEP
  - Provide the listed SHARS service in the least restrictive environment as set forth in the IEP
  - Maintain and submit all records and reports required by the school district to ensure compliance with the IEP and compliance with IEP documentation and billing requirements
- States the effective period for this nonschool SHARS provider arrangement
