A separate affiliation letter is required for each Texas Medicaid client to be served by the nonschool SHARS provider. A nonschool SHARS provider is required to have a separate two-digit suffix for each school district with which it is affiliated. For example, if a nonschool SHARS provider has written agreements with Anywhere Independent School District (ISD) for two students and with Somewhere ISD for one student, then the nonschool SHARS provider would submit its claims for the two students from Anywhere ISD under provider identifier 1234567-01 and associated National Provider Identifier (NPI) number if submitting a paper claim. The SHARS provider would submit its claims for the one student from Somewhere ISD under provider identifier 1234567-02 and associated NPI number if submitting a paper claim. The nonschool SHARS provider would submit two affiliation letters from Anywhere ISD to TMHP Provider Enrollment (one for each student served) and one affiliation letter from Somewhere ISD.

Since nonschool SHARS providers are private, nonpublic entities, they should select “private entity” on the enrollment application.

Nonschool SHARS services include audiology services, counseling services, nursing services, OT, PT, ST services, and psychological services delivered in an individual setting. Nonschool SHARS services do not include evaluation/assessment, physician services, personal care services, or transportation.

### 3.2.3 Private School Enrollment
A private school may not participate in the SHARS program as a SHARS provider or as a nonschool SHARS provider.

### 3.2.4 Medicaid Managed Care Enrollment
SHARS providers do not enroll with the Medicaid Managed Care health plans. SHARS providers deliver services to all eligible Medicaid SHARS clients, including clients of the Medicaid Managed Care health plans. SHARS services are not covered by the Medicaid Managed Care health plans. SHARS services that are rendered to clients of Medicaid Managed Care are covered and may be reimbursed by TMHP. Students who are 20 years of age and younger and on a Medicaid 1915(c) waiver program are covered and may be reimbursed by TMHP.

### 3.3 Services/Benefits, Limitations, and Prior Authorization
All of the SHARS procedures listed in the following sections require a valid International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM) diagnosis code. SHARS include audiology services, counseling, physician services, nursing services, OT, PT, psychological services, ST services, personal care services, and transportation.

**Reminder:** SHARS are the services determined by the ARD committee to be medically necessary and reasonable to ensure that children with disabilities who are eligible for Medicaid and who are 20 years of age and younger receive the benefits accorded to them by federal and state law in order to participate in the educational program.

### 3.3.1 Audiology
Audiology and hearing aid services for clients who are 20 years of age and younger with suspect or permanent hearing loss may only be reimbursed to appropriately-enrolled audiologists and hearing aid providers, not SHARS providers.

**Refer to:** Subsection 2.2.3, “Audiology and Audiometry Evaluation and Diagnostic Services” and subsection 2.2.3.4, “SHARS Audiology Services” in the Vision and Hearing Services Handbook (Vol. 2, Provider Handbooks).

Audiology evaluation services include:

- Identification of children with hearing loss
• Determination of the range, nature, and degree of hearing loss, including the referral for medical or other professional attention for the habilitation of hearing

• Determination of the child’s need for group and individual amplification

Audiology therapy services include the provision of habilitation activities, such as language habilitation, auditory training, audiological maintenance, speech reading (lip reading), and speech conversation.

Audiology services must be provided by a professional who holds a valid state license as an audiologist or by an audiology assistant who is licensed by the state when the assistant is acting under the supervision of a qualified audiologist. State licensure requirements are equal to American Speech-Language-Hearing Association (ASHA) certification requirements.

Audiology evaluation is billable on an individual (procedure code 92506) basis only. Audiology therapy is billable on an individual (procedure code 92507) and group (procedure code 92508) basis. Only the time spent with the student present is billable; time spent without the student present is not billable. Session notes for evaluations are not required; however, documentation must include the billable start time, billable stop time, and total billable minutes with a notation of the activity performed (e.g., audiology evaluation). Session notes are required for therapy. Session notes must include the billable start time, billable stop time, total billable minutes, activity performed during the session, student observation, and the related IEP objective.

**3.3.1.1 Audiology Billing Table**

</table>

*Place of Service: 1=office; 2=home; 9=other locations

Providers must use a 15-minute unit of service for billing.

Refer to: Subsection 3.5.1.2, “Billing Units Based on 15 Minutes” in this handbook.

The recommended maximum billable time for audiology evaluation is three hours, which may be billed over several days. The recommended maximum billable time for direct audiology therapy (group or individual) is one hour per day. Providers must submit documentation of the reasons for the additional time, if more than the recommended maximum time is billed.

**3.3.2 Counseling Services**

Counseling services are provided to help a child with a disability benefit from special education and must be listed in the IEP. Counseling services include, but are not limited to, the following:

• Assisting the child or parents in understanding the nature of the child’s disability

• Assisting the child or parents in understanding the special needs of the child

• Assisting the child or parents in understanding the child’s development

• Health and behavior interventions to identify the psychological, behavioral, emotional, cognitive, and social factors that are important to the prevention, treatment, or management of physical health problems

• Assessing the need for specific counseling services
Counseling services must be provided by a professional who has one of the following certifications or licensures: a licensed professional counselor (LPC), a licensed clinical social worker (LCSW), or a licensed marriage and family therapist (LMFT).

Counseling services are billable on an individual (procedure code 96152) or group (procedure code 96153) basis. Session notes are required and documentation must include the billable start time, billable stop time, total billable minutes, activity performed during the session, student observation, and the related IEP objective.

School districts may receive reimbursement for emergency counseling services as long as the student’s IEP includes a behavior improvement plan that documents the need for emergency services.

<td>96153 with modifier UB</td>
<td>Group</td>
</tr>
</tbody>
</table>

*Place of Service: 1 = Office; 2 = Home; 9 = Other Locations

Providers must use a 15-minute unit of service for billing.

Refer to: Subsection 3.5.1.2, “Billing Units Based on 15 Minutes” in this handbook.

The recommended maximum billable time (individual or group) is one hour per day. Providers must submit documentation of the reasons for the additional time, if more than the recommended maximum time is billed.

### 3.3.3 Psychological Testing and Services

#### 3.3.3.1 Psychological Testing

Evaluations/assessments include activities related to the evaluation of the functioning of a student for the purpose of determining eligibility, the needs for specific SHARS services, and the development or revision of IEP goals and objectives. An evaluation/assessment is billable if it leads to the creation of an IEP for a student with disabilities who is eligible for Medicaid and who is 20 years of age or younger, whether or not the IEP includes SHARS.

Evaluations/assessments (procedure code 96101) must be provided by a professional who is a licensed specialist in school psychology (LSSP), a licensed psychologist, or a licensed psychiatrist in accordance with 19 TAC §89.1040(b)(1) and 34 CFR §300.136(a)(1).

Evaluation/assessment billable time includes the following:

- Psychological, educational, or intellectual testing time spent with the student present
- Necessary observation of the student associated with testing
- A parent/teacher consultation with the student present that is required during the assessment because a student is unable to communicate or perform certain activities
- Time spent without the student present for the interpretation of testing results

Time spent gathering information without the student present or observing a student is not billable evaluation/assessment time.

Session notes are not required; however, documentation must include the billable start time, billable stop time, total billable minutes, and must note which assessment activity was performed (e.g., testing, interpretation, or report writing).
Psychological Testing Billing
The recommended maximum billable time for psychological testing is eight hours (8.0 units) over a 30 day period. Time spent for the interpretation of testing results without the student present is billable time. Providers must submit documentation of the reasons for the additional time, if more than the recommended maximum time is billed.

One unit (1.0) is equivalent to one hour or 60 minutes. Providers may bill in partial hours, expressed as 1/10th of an hour (six-minute segments). For example, express 30 minutes as a billed quantity of 0.5.

Refer to: Subsection 3.5.1.2, “Billing Units Based on 15 Minutes” in this handbook.

When billing, minutes of Evaluations/Assessments are not accumulated over multiple days. Minutes of Evaluations/Assessments can only be billed per calendar day.

3.3.3.2 Psychological Services
Psychological services are counseling services provided to help a child with a disability benefit from special education and must be listed in the IEP.

Psychological services must be provided by a licensed psychiatrist, a licensed psychologist, or an LSSP. Nothing in this rule prohibits public schools from contracting with licensed psychologists and licensed psychological associates who are not LSSPs to provide psychological services, other than school psychology, in their areas of competency. School districts may contract for specific types of psychological services, such as clinical psychology, counseling psychology, neuropsychology, and family therapy, that are not readily available from the LSSP who is employed by the school district. Such contracting must be on a short-term or part-time basis and cannot involve the broad range of school psychological services listed in 22 TAC §465.38(1)(B).

All psychological services are billable on an individual (procedure code 96152) or group (procedure code 96153) basis. Session notes are required. Session notes must include the billable start time, billable stop time, total billable minutes, activity performed during the session, student observation, and the related IEP objective.

School districts may receive reimbursement for emergency psychological services as long as the student’s IEP includes a behavior improvement plan that documents the need for the emergency services.

<td>96153 with modifier AH</td>
<td>Group</td>
</tr>
</tbody>
</table>

*Place of Service: 1=office; 2=home; 9=other locations

Providers must use a 15-minute unit of service for billing.

Refer to: Subsection 3.5.1.2, “Billing Units Based on 15 Minutes” in this handbook.

The recommended maximum billable time for direct psychological therapy (group or individual) is a total of one hour per day for nonemergency situations. Providers must maintain documentation of the reasons for the additional time, if more than the recommended maximum time is billed.

3.3.4 Nursing Services
Nursing services are skilled nursing tasks, as defined by the Texas Board of Nursing (BON), that are included in the student’s IEP. Nursing services may be direct nursing care or medication administration. Examples of reimbursable nursing services include, but are not limited to, the following:

- Inhalation therapy
• Ventilator monitoring
• Nonroutine medication administration
• Tracheostomy care
• Gastrostomy care
• Ileostomy care
• Catheterization
• Tube feeding
• Suctioning
• Client training
• Assessment of a student’s nursing and personal care services needs

Direct nursing care services are billed in 15-minute increments and medication administration is reimbursed on a per-visit increment. The RN or APRN determines whether these services must be billed as direct nursing care or medication administration.

Nursing services must be provided by an RN, an APRN (including nurse practitioners [NPs] and clinical nurse specialists [CNSs]), licensed vocational nurse/licensed practical nurse (LVN/LPN), or a school health aide or other trained, unlicensed assistive person delegated by an RN or APRN.

Nursing services are billable on an individual or group basis. Only the time spent with the student present is billable. Time spent without the student present is not billable. Session notes are not required for nursing services; however, documentation must include the billable start time, billable stop time, total billable minutes, and must note the type of nursing service that was performed.

<td></td>
</tr>
</tbody>
</table>

*Place of Service: 1=office; 2=home; 9=other locations
Modifier TD = nursing services provided by an RN or APRN
Modifier U7 = nursing services delivered through delegation.
Modifier TE = nursing services delivered by an LVN/LPN
Modifier UD = nursing services delivered on a group basis
The Medicaid-allowable fee is determined based on 15-minute increments. Providers must use a 15-minute unit of service for billing.

All of the nursing services minutes that are delivered to a student during a calendar day must be added together before they are converted to units of service. Do not convert minutes of nursing services separately for each nursing task that was performed.

Minutes of nursing services cannot be accumulated over multiple days. Minutes of nursing services can only be billed per calendar day. If the total number of minutes of nursing services is less than eight minutes for a calendar day, then no unit of service can be billed for that day, and that day’s minutes cannot be added to minutes of nursing services from any previous or subsequent days for billing purposes.

Refer to: Subsection 3.5.1.2, “Billing Units Based on 15 Minutes” in this handbook.

The recommended maximum billable time for direct nursing services is four hours per day. The recommended maximum billable units for procedure code T1502 with modifier TD, T1502 with modifier U7, or T1502 with modifier TE is a total of four medication administration visits per day. Providers must submit documentation of the reasons for the additional time, if more than the recommended maximum time is billed.

3.3.5 Occupational Therapy (OT)

In order for a student to receive OT through SHARS, the name and complete address or the provider identifier of the licensed physician who prescribed the OT must be provided.

OT evaluation services include determining what services, assistive technology, and environmental modifications a student requires for participation in the special education program.

OT includes:

- Improving, developing, maintaining, or restoring functions impaired or lost through illness, injury, or deprivation
- Improving the ability to perform tasks for independent functioning when functions are impaired or lost
- Preventing, through early intervention, initial or further impairment or loss of function

OT must be provided by a professional who is licensed by the Texas Board of Occupational Therapy Examiners or a certified occupational therapist assistant (COTA) acting under the supervision of a qualified occupational therapist.

OT evaluation is billable on an individual (procedure code 97003) basis only. OT is billable on an individual (procedure code 97530) or group (procedure code 97150) basis. The occupational therapist or COTA can only bill for time spent with the student present, including time spent assisting the student with learning to use adaptive equipment and assistive technology. Time spent without the student present, such as training teachers or aides to work with the student (unless the student is present during the training time), report writing, and time spent manipulating or modifying the adaptive equipment is not billable. Session notes are not required for procedure code 97003; however, documentation must include the billable start time, billable stop time, total billable minutes, and must note the activity that was performed (e.g., OT evaluation). Session notes are required for procedure codes 97530 and 97150. Session notes must include the billable start time, billable stop time, total billable minutes, activity performed during the session, student observation, and the related IEP objective.
3.3.5.1 Occupational Therapy Billing Table

Providers must use a 15-minute unit of service for billing.

Refer to: Subsection 3.5.1.2, “Billing Units Based on 15 Minutes” in this handbook.

The recommended maximum billable time for OT evaluation is three hours, which may be billed over several days. The recommended maximum billable time for direct therapy (group or individual) is a total of one hour per day. Providers must submit documentation of the reasons for the additional time, if more than the recommended maximum time is billed.

3.3.6 Personal Care Services

Personal care services are provided to help a child with a disability or chronic condition benefit from special education. Personal care services include a range of human assistance provided to persons with disabilities or chronic conditions which enables them to accomplish tasks that they would normally do for themselves if they did not have a disability. An individual may be physically capable of performing activities of daily living (ADLs) and instrumental ADLs (IADLs) but may have limitations in performing these activities because of a functional, cognitive, or behavioral impairment.

Refer to: Subsection 2.8, “Personal Care Services (PCS) (CCP)” in this handbook for a list of ADLs and IADLs.

For personal care services to be billable, they must be listed in the student’s IEP. Personal care services are billable on an individual (procedure code T1019 with modifier U5 or U6) or group (procedure code T1019 with modifier U5 and UD or U6 and UD) basis. Session notes are not required for procedure codes T1019 with modifier U5 or T1019 with modifier U5 and UD; however, documentation must include the billable start time, billable stop time, total billable minutes, and must note the type of personal care service that was performed. Procedure codes T1019 with modifier U6 and T1019 with modifier U6 and UD are billed using a one-way trip unit of service.

3.3.6.1 Personal Care Services Billing Table

Refer to: Subsection 3.5.1.2, “Billing Units Based on 15 Minutes” in this handbook.
The recommended maximum billable units for T1019 with modifier U6 or T1019 with modifier U6 and UD is a total of four one-way trips per day. Providers must submit documentation of the reasons for the additional time, if more than the recommended units of service are billed.

### 3.3.7 Physical Therapy (PT)

In order for a student to receive PT through SHARS, the name and complete address or the provider identifier of the licensed physician who prescribes the PT must be provided.

PT evaluation includes evaluating the student’s ability to move throughout the school and to participate in classroom activities and the identification of movement dysfunction and related functional problems.

PT is provided for the purpose of preventing or alleviating movement dysfunction and related functional problems.

PT must be provided by a professional who is licensed by the Texas Board of Physical Therapy Examiners or a licensed physical therapist assistant (LPTA) acting under the supervision of a qualified physical therapist.

PT evaluation is billable on an individual (procedure code 97001) basis only. PT is billable on an individual (procedure code 97110) or group (procedure code 97150) basis. The physical therapist can only bill time spent with the student present, including time spent helping the student to use adaptive equipment and assistive technology. Time spent without the student present, such as training teachers or aides to work with the student (unless the student is present during the training time) and report writing, is not billable. Session notes are not required for procedure code 97001; however, documentation must include the billable start time, billable stop time, total billable minutes, and must note the activity that was performed (e.g., PT evaluation). Session notes are required for procedure codes 97110 and 97150. Session notes must include the billable start time, billable stop time, total billable minutes, activity performed during the session, student observation, and the related IEP objective.

<td>Licensed/certified assistant</td>
</tr>
</tbody>
</table>

*Place of Service: 1=office; 2=home; 9=other locations

Providers must use a 15-minute unit of service for billing.

**Refer to:** Subsection 3.5.1.2, “Billing Units Based on 15 Minutes” in this handbook.

The recommended maximum billable time for PT evaluation is three hours, which may be billed within a 30 day period. The recommended maximum billable time for direct therapy (group or individual) is a total of one hour per day. Providers must submit documentation of the reasons for the additional time, if more than the recommended maximum time is billed.

### 3.3.8 Physician Services

Diagnostic and evaluation services are reimbursable under SHARS physician services. Physician services must be provided by a licensed physician (M.D. or D.O.). A physician prescription is required before PT or OT services may be reimbursed under SHARS. ST services require either a physician prescription or a referral from a licensed speech-language pathologist (SLP) before the ST services may be reimbursed under the SHARS program. The school district must maintain the prescription/referral. The
prescription/referral must relate directly to specific services listed in the IEP. If a change is made to a service on the IEP that requires a prescription/referral, the prescription/referral must be revised accordingly.

The expiration date for the physician prescription is the earlier of either the physician’s designated expiration date on the prescription or three years, in accordance with the IDEA three-year re-evaluation requirement.

SHARS physician services are billable only when they are provided on an individual basis. The determination as to whether or not the provider needs to see the student while reviewing the student’s records is left up to the professional judgment of the provider. Therefore, billable time includes the following:

- The diagnosis/evaluation time spent with the student present
- The time spent without the student present reviewing the student’s records for the purpose of writing a prescription/referral for specific SHARS services
- The diagnosis/evaluation time spent with the student present, or the time spent without the student present reviewing the student’s records for the evaluation of the sufficiency of an ongoing SHARS service to see whether any changes are needed in the current prescription or referral for that service

Session notes are not required for procedure code 99499; however, documentation must include the billable start time, billable stop time, total billable minutes, and must note the medical activity that was performed.

### 3.3.8.1 Medical Services Billing Table

<table>
<thead>
<tr>
<th>POS*</th>

</tr>
</thead>
<tbody>
<tr>
<td>1, 2, or 9</td>
<td>99499</td>
</tr>
</tbody>
</table>

*Place of Service: 1 = Office; 2 = Home; 9 = Other Locations

Providers must use a 15-minute unit of service for billing.

Refer to: Subsection 3.5.1.2, “Billing Units Based on 15 Minutes” in this handbook.

The recommended maximum billable time is one hour per day. Providers must submit documentation of the reasons for the additional time, if more than the recommended maximum time is billed.

### 3.3.9 Speech Therapy (ST)

#### 3.3.9.1 Referral

The name and complete address or the provider identifier or license number of the referring licensed physician or licensed SLP is required before ST services can be billed under SHARS. A licensed SLP’s evaluation and recommendation for the frequency, location, and duration of ST serves as the speech referral.

#### 3.3.9.2 Description of Services

ST evaluation services include the identification of children with speech or language disorders and the diagnosis and appraisal of specific speech and language disorders. ST services include the provision of speech and language services for the habilitation or prevention of communicative disorders.

ST evaluation is billable on an individual (procedure code 92506) basis only. ST is billable on an individual (procedure code 92507) or group (procedure code 92508) basis. Providers can only bill time spent with the student present, including assisting the student with learning to use adaptive equipment and assistive technology. Time spent without the student present, such as report writing and training teachers or aides to work with the student (unless the student is present during training), is not billable. Session notes are not required for procedure code 92506; however, documentation must include the billable start time, billable stop time, total billable minutes, and must note the activity that was
performed (e.g., speech evaluation). Session notes are required for procedure codes 92507 and 92508. Session notes must include the billable start time, billable stop time, total billable minutes, activity performed during the session, student observation, and the related IEP objective.

### 3.3.9.3 Provider and Supervision Requirements

ST services are eligible for reimbursement when they are provided by a qualified SLP, who holds a Texas license or an ASHA-equivalent SLP (has a master’s degree in the field of speech-language pathology and a Texas license). ST services are also eligible for reimbursement when provided by an SLP with a state education agency certification, a licensed SLP intern, or a grandfathered SLP when acting under the supervision or direction of an SLP.

The supervision must meet the following provisions:

- The supervising SLP must provide supervision that is sufficient to ensure the appropriate completion of the responsibilities that were assigned.
- The direct involvement of the supervising SLP in overseeing the services that were provided must be documented.
- The SLP who provides the direction must ensure that the personnel who carry out the directives meet the minimum qualifications set forth in the rules of the State Board of Examiners for Speech-Language Pathology and Audiology which relate to Licensed Interns or Assistants in Speech-Language Pathology.

CMS interprets “under the direction of a speech-language pathologist,” as an SLP who:

- Is directly involved with the individual under his direction.
- Accepts professional responsibility for the actions of the personnel he agrees to direct.
- Sees each student at least once.
- Has input about the type of care provided.
- Reviews the student’s speech records after the therapy begins.
- Assumes professional responsibility for the services provided.

*Place of Service: 1=office; 2=home; 9=other locations

Providers must use a 15-minute unit of service for billing.

Refer to: Subsection 3.5.1.2, “Billing Units Based on 15 Minutes” in this handbook.
The recommended maximum billable time for evaluation is three hours, which may be billed over several days. The recommended maximum billable time for direct therapy (group or individual) is a total of one hour per day. Providers must submit documentation of the reasons for the additional time, if more than the recommended maximum time is billed.

3.3.10 Transportation Services in a School Setting

Transportation services in a school setting may be reimbursed when they are provided on a specially adapted vehicle and if the following criteria are met:

- Provided to or from a Medicaid-covered service on the day for which the claim is made
- A child requires transportation in a specially adapted vehicle to serve the needs of the disabled
- A child resides in an area that does not have school bus transportation, such as those in close proximity to a school
- The Medicaid services covered by SHARS are included in the student’s IEP
- The special transportation service is included in the student’s IEP

A specially adapted vehicle is one that has been physically modified (e.g., addition of a wheelchair lift, addition of seatbelts or harnesses, addition of child protective seating, or addition of air conditioning). A bus monitor or other personnel accompanying children on the bus is not considered an allowable special adaptive enhancement for Medicaid reimbursement under SHARS specialized transportation. Specialized transportation services reimbursable under SHARS requires the Medicaid-eligible special education student has the following documented in his or her IEP:

- The student requires a specific physical adaptation or adaptations of a vehicle in order to be transported
- The reason the student needs the specialized transportation

Children with special education needs who ride the regular school bus to school with other nondisabled children are not required to have the transportation services in a school setting listed in their IEP. Also, the cost of the regular school bus ride cannot be billed to SHARS. Therefore, the fact that a child may receive a service through SHARS does not necessarily mean that the transportation services in a school setting may be reimbursed for them.

Reimbursement for covered transportation services is on a student one-way trip basis. If the student receives a billable SHARS service (including personal care services on the bus) and is transported on the school’s specially adapted vehicle, the following one-way trips may be billed:

- From the student’s residence to school
- From the school to the student’s residence
- From the student’s residence to a provider’s office that is contracted with the district
- From a provider’s office that is contracted with the district to the student’s residence
- From the school to a provider’s office that is contracted with the district
- From a provider’s office that is contracted with the district to the student’s school
- From the school to another campus to receive a billable SHARS service
- From the campus where the student received a billable SHARS service back to the student’s school

Covered transportation services from a child’s residence to school and return are not reimbursable if, on the day the child is transported, the child does not receive Medicaid services covered by SHARS (other than transportation). Documentation of each one-way trip provided must be maintained by the school district (e.g., trip log). This service must not be billed by default simply because the student is transported on a specially adapted bus.
3.3.10.1 Transportation Services in a School Setting Billing Table

<table>
<thead>
<tr>
<th>POS*</th>
<th>Procedure Code</th>
<th>Unit of Service</th>
</tr>
</thead>
<tbody>
<tr>
<td>1, 2, or 9</td>
<td>T2003</td>
<td>Per one-way trip</td>
</tr>
</tbody>
</table>

*Place of Service: 1=office; 2=home; 9=other locations

The recommended maximum billable units for procedure code T2003 is a total of four one-way trips per day.

3.3.11 Prior Authorization

Prior authorization is not required for SHARS services.

3.4 Documentation Requirements

3.4.1 Record Retention

Student-specific records that are required for SHARS become part of the student’s educational records and must be maintained for seven years rather than the five years required by Medicaid. All records that are pertinent to SHARS billings must be maintained by the school district until all audit questions, appeal hearings, investigations, or court cases are resolved. Records must be stored in a readily accessible location and format and must be available for state or federal audits.

The following is a checklist of the minimum documents to collect and maintain:

- IEP
- Current provider qualifications (licenses)
- Attendance records
- Prescriptions and referrals
- Medical necessity documentation (e.g., diagnoses and history of chronic conditions or disability)
- Session notes or service logs, including provider signatures
- Supervision logs
- Special transportation logs
- Claims submittal and payment histories
- If applicable, nonschool SHARS provider’s affiliation letter and signed agreement with the district.

All services require documentation to support the medical necessity of the service rendered, including SHARS services. SHARS services are subject to retrospective review and recoupment if documentation does not support the service billed.

3.5 Claims Filing and Reimbursement

3.5.1 Claims Information

Claims for SHARS must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

Claims must be submitted within 365 days from the date of service or no later than 95 days after the end of the Federal Fiscal Year, whichever comes first.

Claims for each SHARS Cost Report Year are due on or before January 3, following the end of the of the SHARS Cost Report Year.
Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.
Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

3.5.1.1 Appealing Denied SHARS Claims
SHARS providers that appeal claims denied for exceeding benefit limitations must submit documentation of medical necessity with the appeal. Documentation submitted with an appeal must include the pages from the IEP and ARD documents that show the authorization of the services, including the specified frequency and duration and the details of the need for additional time or the reasons for exceeding the benefit limitations.

Each page of the documentation must have the client’s name and Medicaid number.

3.5.1.2 Billing Units Based on 15 Minutes
All claims for reimbursement are based on the actual amount of billable time associated with the SHARS service. For those services for which the unit of service is 15 minutes (1 unit = 15 minutes), partial units must be rounded up or down to the nearest quarter hour.

Reminder: Enter the number of billing units in Block 24G of the CMS-1500 paper claim form. Claims without this information may be reimbursed as a unit of 1.

To calculate billing units, count the total number of billable minutes for the calendar day for the SHARS student, and divide by 15 to convert to billable units of service. If the total billable minutes are not divisible by 15, the minutes are converted to one unit of service if they are greater than seven and converted to 0 units of service if they are seven or fewer minutes.

For example, 68 total billable minutes/15 = 4 units + 8 minutes. Since the 8 minutes are more than 7 minutes, those 8 minutes are converted to one unit. Therefore, 68 total billable minutes = 5 units of service.

Examples:

<table>
<thead>
<tr>
<th>Minutes</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 min–7 mins</td>
<td>0 units</td>
</tr>
<tr>
<td>8 mins–22 mins</td>
<td>1 unit</td>
</tr>
<tr>
<td>23 mins–37 mins</td>
<td>2 units</td>
</tr>
<tr>
<td>38 mins–52 mins</td>
<td>3 units</td>
</tr>
<tr>
<td>53 mins–67 mins</td>
<td>4 units</td>
</tr>
<tr>
<td>68 mins–82 mins</td>
<td>5 units</td>
</tr>
</tbody>
</table>

3.5.1.3 Billing Units Based on an Hour
All claims for reimbursement are based on the actual amount of billable time associated with the SHARS service. For those services for which the unit of service is an hour (1 unit = 60 minutes = one hour), partial units must be billed in tenths of an hour and rounded up or down to the nearest six-minute increment.

Enter the number of billing units in Block 24G of the CMS-1500 paper claim form. Claims without this information may be reimbursed as a unit of 1.
To calculate billing units, count the total number of billable minutes for the calendar day for the SHARS student and divide by 60 to convert to billable units of service. If the total billable minutes are not divisible by 60, the minutes are converted to partial units of service as follows:

<table>
<thead>
<tr>
<th>Minutes</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 mins–3 mins</td>
<td>0 units</td>
</tr>
<tr>
<td>4 mins–9 mins</td>
<td>0.1 unit</td>
</tr>
<tr>
<td>10 mins–15 mins</td>
<td>0.2 unit</td>
</tr>
<tr>
<td>16 mins–21 mins</td>
<td>0.3 unit</td>
</tr>
<tr>
<td>22 mins–27 mins</td>
<td>0.4 unit</td>
</tr>
<tr>
<td>28 mins–33 mins</td>
<td>0.5 unit</td>
</tr>
<tr>
<td>34 mins–39 mins</td>
<td>0.6 unit</td>
</tr>
<tr>
<td>40 mins–45 mins</td>
<td>0.7 unit</td>
</tr>
<tr>
<td>46 mins–51 mins</td>
<td>0.8 unit</td>
</tr>
<tr>
<td>52 mins–57 mins</td>
<td>0.9 unit</td>
</tr>
</tbody>
</table>

Other examples:

<table>
<thead>
<tr>
<th>Minutes</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>58 mins–63 mins</td>
<td>1 unit</td>
</tr>
<tr>
<td>64 mins–69 mins</td>
<td>1.1 units</td>
</tr>
<tr>
<td>70 mins–75 mins</td>
<td>1.2 units</td>
</tr>
<tr>
<td>76 mins–81 mins</td>
<td>1.3 units</td>
</tr>
<tr>
<td>82 mins–87 mins</td>
<td>1.4 units</td>
</tr>
<tr>
<td>88 mins–93 mins</td>
<td>1.5 units</td>
</tr>
</tbody>
</table>

### 3.5.2 Reimbursement

SHARS providers are reimbursed in accordance with 1 TAC §355.8443.

School districts can access their district-specific interim rates on the HHSC website at [www.hhsc.state.tx.us/rad/acute-care/shars/shars-2011-payment-rate-alert.shtml](http://www.hhsc.state.tx.us/rad/acute-care/shars/shars-2011-payment-rate-alert.shtml). Click on the link titled View the SHARS Interim Rates Table.

SHARS providers must participate in and comply with all Random Moment Time Study (RMTS) requirements to be eligible to bill and receive Medicaid reimbursement for delivering SHARS services. For each annual SHARS Cost Report period (October 1 through September 30), if a school district does not participate in one of the three required quarterly RMTS, that school district cannot be a SHARS provider for that annual cost report period and will be required to return any Medicaid payments received for SHARS delivered during that annual cost report period. The school district can return to the SHARS program the following annual cost report period.

SHARS providers can contact the HHSC Time Study Unit via e-mail at TimeStudy@hhsc.state.tx.us or by telephone at 1-512-491-1715.

Refer to: Subsection 2.2, “Reimbursement Methodology” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for more information.

3.5.2.1 Random Moment Time Study (RMTS)

CMS requires SHARS providers to participate in the RMTS to be eligible to submit claims and receive reimbursement for SHARS services. SHARS providers must comply with the Texas Time Study Guide, which includes, but is not limited to: Mandatory Annual RMTS Contact training, certification of RMTS participants for all three annual RMTS quarters, and compliance with participation requirements for selected sampled moments. The three annual RMTS quarters are October through December, January through March, and April through June. A July through September RMTS is not conducted.

An existing school district can only become a SHARS provider effective October 1, each year and they must participate in all three RMTS quarters for that annual period. SHARS providers that do not participate in all three required RMTS quarters, or are RMTS non-compliant, cannot be a SHARS provider for that entire annual period (October 1 through September 30) and will be required to return any Medicaid payments received for SHARS services delivered during that annual cost report period. The school district can return to participating in the SHARS program the following federal fiscal year beginning on October 1.

A new school district (i.e., a newly formed district that began operations after October 1) can become a SHARS provider effective with the first day of the federal quarter in which it participates in the RMTS. New SHARS providers may not submit claims or be reimbursed for SHARS services provided prior to the RMTS quarter in which they begin to participate and they must participate in all remaining RMTS quarters for that annual period.

School districts can access the Texas Time Study Guide, on the HHSC website at www.hhsc.state.tx.us/rad/time-study/ts-isd.shtml and refer to the link titled Guides/Manuals.

SHARS providers can contact the HHSC Time Study Unit via e-mail at TimeStudy@hhsc.state.tx.us or by telephone at 1-512-491-1715.

3.5.2.2 Certification of Funds

SHARS providers are required to certify on a quarterly basis the amount reimbursed during the previous federal fiscal quarter. TMHP Provider Enrollment mails the quarterly Certification of Funds statement to SHARS providers after the end of each quarter of the federal fiscal year (October 1 through September 30). The purpose of the statement is to verify that the school district incurred costs on the dates of service that were funded from state or local funds in an amount equal to or greater than the combined total of its interim rates times the paid units of service. While the payments were received the previous federal fiscal quarter, the actual dates of service could have been many months prior. Therefore, the certification of public expenditures is for the date of service and not the date of payment.

In order to balance amounts in the Certification of Funds, providers will receive or have access to the Certification of Funds Claims Information Report which shows that quarter’s combined total payments for Medicaid fee-for-service claims and Medicaid PCCM claims. For help balancing the amounts in the statement, providers can contact their Provider Relations representative or the TMHP Contact Center at 1-800-925-9126.

Refer to: “TMHP Provider Relations” in “Preliminary Information” (Vol 1, General Information) for more information about provider relations representatives.

The Certification of Funds statement must be:

- Signed by the business officer or other financial representative who is responsible for signing other documents that are subject to audit
- Notarized
- Returned to TMHP within 25 calendar days of the date printed on the letter
Failure to do so may result in recoupment of funds or the placement of a vendor hold on the provider’s payments until the signed Certification of Funds statement is received by TMHP. Providers must contact the TMHP Contact Center at 1-800-925-9126 if they do not receive their Certification of Funds statement.

On an annual basis, SHARS providers are required to certify through their cost reports their total, actual, incurred costs, including the federal share and the nonfederal share.

### 3.5.2.3 Cost Reporting

CMS requires annual cost reporting, cost reconciliation, and cost settlement processes for all Medicaid SHARS services delivered by school districts. CMS requires that school districts, as public entities, not be paid in excess of their Medicaid-allowable costs and that any overpayments be recouped through the cost reconciliation and cost settlement processes. In an effort to minimize any potential recoupments, HHSC has assigned district-specific interim rates that are as close as possible to each district’s Medicaid-allowable costs for providing each SHARS service.

Each SHARS provider is required to complete an annual cost report for all SHARS that were delivered during the previous federal fiscal year (October 1 through September 30). The cost report is due on or before April 1 of the year following the reporting period.

**Refer to:** [www.hhsc.state.tx.us/Medicaid/programs/rad/acute-care/shars/index.shtml](http://www.hhsc.state.tx.us/Medicaid/programs/rad/acute-care/shars/index.shtml)

The annual cost report includes two certification forms which must be completed to certify the provider’s incurred actual costs:

- Cost report certification
- Claimed expenditures

The certification forms received by HHSC for the cost report must be:

- The original certification pages
- Signed by the business officer or other financial representative who is responsible for legally binding the district
- Notarized

The primary purpose of the cost report is to document the provider’s costs for delivering SHARS, including direct costs and indirect costs, and to reconcile the provider’s interim payments for SHARS with its actual total Medicaid-allowable costs. All annual SHARS cost reports that are filed are subject to desk review by HHSC or its designee.

### 3.5.2.4 Cost Reconciliation and Cost Settlement

The cost reconciliation process must be completed within 24 months of the end of the reporting period covered by the annual SHARS cost report. The total Medicaid-allowable costs are compared to the provider’s interim payments for SHARS delivered during the reporting period, which results in a cost reconciliation.

If a provider has not complied with all cost report requirements or a provider’s interim payments exceed the actual certified Medicaid-allowable costs of the provider for SHARS to Medicaid clients, HHSC will recoup the federal share of the overpayment by one of the following methods:

- Offset all future claims payments to the provider until the amount of the federal share of the overpayment is recovered
- Recoup an agreed-upon percentage from future claims payments to the provider to ensure recovery of the overpayments within one year
• Recoup an agreed-upon dollar amount from future claims payments to ensure recovery of the overpayment within one year

If the actual certified Medicaid-allowable costs of a provider for SHARS exceed the provider’s interim payments, HHSC will pay the federal share of the difference to the provider in accordance with the final, actual certification agreement and submit claims to CMS for reimbursement of that payment in the federal fiscal quarter following payment to the provider.

HHSC issues a notice of settlement that denotes the amount due to or from the provider.

An ISD or the Superintendent, Chief Financial Officer, Business Officer, or other ISD Official with legal authority who disagrees with the adjustments made during the cost reconciliation process has the right to request an informal review of the adjustments. Requests for informal reviews must be sent by certified mail and received by HHSC within the time frame designated on the settlement notice. Furthermore, the request for informal review must include a concise statement of the specific actions or determinations the district disputes, the ISD’s recommended resolution, and any supporting documentation deemed relevant to the dispute. Failure to follow these instructions will result in the denial of the request for an informal review.

4. TEXAS HEALTH STEPS (THSTEPS) DENTAL

Medicaid dental services rules are described under Title 25 Texas Administrative Code (TAC) Part 1, Chapter 33. The online version of TAC is available at the Secretary of State’s website at www.sos.state.tx.us/tac/index.shtml. All dental providers must comply with the rules and regulations of the Texas State Board of Dental Examiners (TSBDE), including standards for documentation and record maintenance as stated in 22 TAC §108.7, Minimum Standard of Care, General, and §108.8, Records of the Dentist.

4.1 Enrollment

To become a provider of THSteps) or intermediate care facility for persons with mental retardation (ICF-MR) dental services, a dentist must:

Currently be licensed with an active status by the Texas State Board of Dental Examiners (TSAID) or currently be licensed in the state where the service was performed.

Practice within the scope of the provider’s professional licensure.

Complete the Dental Provider Enrollment Application and return it to TMHP.

Providers can download and print dental provider enrollment application forms from the TMHP website at www.tmhp.com or call the TMHP Contact Center at 1-800-925-9126 to request them.

All owners of a dental practice must maintain an active license status with the TSBDE to receive reimbursement from Texas Medicaid. Any change in ownership or licensure status for any enrolled dentist must be immediately reported in writing to TMHP Provider Enrollment and will affect reimbursement by Texas Medicaid.

A dental provider cannot be enrolled if his or her dental license is due to expire within 30 days; a current license must be submitted. Dental licensure for owners of a dental practice is a requirement of the Occupations Code, Vernon’s Texas Codes Annotated (VTCA), Subtitle D, Chapters 251-267 (the Texas Dental Practice Act).

A dentist must complete the Dental Provider Enrollment Application for each separate practice location and will receive a unique provider identifier for each practice location if the application is approved.

The application form includes a written agreement with HHSC.
Dental providers may enroll in the THSteps Dental program and ICF-MR Dental Programs or as a Doctor of Dentistry Practicing as a Limited Physician, or both. The enrollment requirements are different with respect to the category of enrollment.

- All dental providers must declare one or more of the following categories:
  - General practice
  - Pediatric dentist
  - Periodontist
  - Endodontist
  - Oral and maxillofacial surgeon
  - Orthodontist
  - Other (prosthodontist, public health, and others)

Refer to: Section 1: Provider Enrollment and Responsibilities (Vol. 1, General Information).

4.1.1 THSteps Dental Eligibility
The client must be Medicaid- and Texas Health Steps (THSteps)-eligible (birth through 20 years of age) at the time of the service request and service delivery. However, Medicaid-approved orthodontic services already in progress may be continued even after the client loses Medicaid eligibility if the orthodontic treatment is:

- Begun before the loss of Medicaid eligibility.
- Begun before the day of the client's 21st birthday.
- Completed within 36 months of the beginning date.

When a client is due for a THSteps periodic medical or dental checkup, a message is present on the Medicaid Identification Form (H3087 or H3087 STAR) under the client's name to remind the parent or guardian. This reminder is not a statement of eligibility for dental services. This message is printed on the H3087 form when the client has not received any preventative dental services for six months.

The client is not eligible for a THSteps medical checkup or THSteps dental benefits if the client's Medicaid Identification Form (Form H3087) or Medicaid Eligibility Verification Form (Forms H1027 and H1027-A-C) states any of the following:

- Emergency care only
- Presumptive eligibility (PE)
- Qualified Medicare beneficiary (QMB)
- Women's Health Program

4.1.2 Categories of Practice
All dental providers must declare one or more of the following categories:

- General practice
- Pediatric dentist
- Periodontist
- Endodontist
- Oral and maxillofacial surgeon
• Orthodontist
• Other (prosthodontist, public health, and others)

4.1.3 THSteps Dental and ICF-MR Dental Services
A provider may enroll as an individual dentist, a group practice, or both. Regardless of the category of practice designation under THSteps Dental, providers can only submit claims for THSteps and ICF-MR Dental Services.

4.1.4 THSteps Dental Checkup and Treatment Facilities
All THSteps dental checkup and treatment policies apply to examinations and treatment completed in a dentist’s office, a health department, clinic setting, or in a mobile/satellite unit. Enrollment of a mobile/satellite unit must be under a dentist or clinic name. Mobile units can be a van or any temporary site away from the primary office and are considered extensions of that office and are not separate entities. The physical setting must be appropriate so that all elements of the checkup or treatment can be completed. The checkup must meet the requirements detailed in subsection D.5, “Parental Accompaniment” in Appendix D, “Texas Health Steps Statutory State Requirements,” of this handbook. The provider with a mobile unit or who uses portable dental equipment must obtain a permit for the mobile unit from the TSBDE.

4.1.5 Doctor of Dentistry Practicing as a Limited Physician
Dentists who serve clients and submit claims using medical (CPT) procedure codes, such as oral-maxillofacial surgeons, may enroll as a doctor of dentistry practicing as a limited physician. Providers may enroll as an individual dentist or as a dental group. To enroll as a doctor of dentistry practicing as a limited physician, a dentist must:
• Be currently licensed by the TSBDE or currently licensed in the state where the service was performed.
• Have a Medicare provider identification number before applying for a Medicaid provider identifier.
• Enroll as a Medicaid provider with a limited physician provider identifier.

4.1.6 Medicaid Managed Care Enrollment
THSteps, ICF-MR, and emergency dental service providers do not need to enroll in Medicaid managed care. All claims for services provided by a dentist for THSteps and ICF-MR clients are submitted to TMHP, except for claims for foster care children; these claims are submitted to the health plan organization responsible for foster care children’s services.

If a client is enrolled in Medicaid managed care, the dentist must request precertification or approval from the client’s managed care organization (MCO) for general anesthesia and facility use charges if the dental services are to be provided in an ambulatory surgical center (ASC) a hospital ambulatory surgical center (HASC), or as an inpatient or outpatient at a hospital. The dentist must use the MCO’s contracted facility and anesthesia provider. These services are included in the capitation rates paid to MCOs, and the facility/anesthesiologist risks nonpayment from the MCO without such prior approval. Coordination of all specialty care is the responsibility of the client’s primary care provider. The primary care provider must be notified by the dentist or the MCO of the planned services.

4.1.7 Client Rights
Dental providers enrolled in Texas Medicaid enter into a written contract with HHSC to uphold the following rights of the Medicaid client:
• To receive dental services that meet or exceed the standards of care established by the laws relating to the practice of dentistry and the rules and regulations of the TSBDE.
• To receive information following a dental examination about the dental diagnosis; scope of proposed treatment, including alternatives and risks; anticipated results; and the need and risks for administration of sedation or anesthesia.

• To have full participation in the development of the treatment plan and the process of giving informed consent.

• To have freedom from physical, mental, emotional, sexual or verbal abuse, or harm from the provider or staff.

• To have freedom from overly aggressive treatment in excess of that required to address documented medical necessity.

A provider’s failure to ensure any of the client rights may result in termination of the provider agreement or contract and other civil or criminal remedies.

4.1.8 Complaints and Resolution
Complaints regarding dental services are typically received through the TMHP Contact Center, although a complaint is accepted from any source. A complaint is researched by TMHP and resolved or escalated as appropriate. Examples of complaints from clients regarding providers include:

• The provider did not consult with the client, explain what services were necessary, or obtain parent or guardian informed consent.

• The treating provider refused to make the child’s record available to the new provider.

• The provider did not give the child the appropriate local anesthesia or pain medication.

• The provider did not use sterile procedures; the facility or equipment were not clean.

• The provider or his staff were verbally abusive.

• The client did not receive a service, but the provider submitted a claim to Texas Medicaid.

• The provider charged a Medicaid client for benefits covered by Medicaid.

4.2 Services/Benefits, Limitations, and Prior Authorization

4.2.1 THSteps Dental Services
THSteps is the Texas version of the Medicaid program known as Early and Periodic Screening, Diagnosis, and Treatment (EPSDT).

THSteps dental services are mandated by Medicaid to provide for the early detection and treatment of dental health problems for Medicaid-eligible clients who are from birth through 20 years of age. THSteps dental service standards are designed to meet federal regulations and incorporate the recommendations of representatives of national and state dental professional organizations.

THSteps’ designated staff (Texas Department of State Health Services [DSHS], Department of Assistive and Disability Services [DADS], or contractor), through outreach and informing, encourage eligible children to use THSteps dental checkups and services when children first become eligible for Medicaid, and each time children are periodically due for their next dental checkup.

Children within Medicaid have free choice of Medicaid-enrolled providers and are given names of enrolled providers. A list of THSteps dental providers in a specific area can be obtained using the Online Provider Lookup on the TMHP website at www.tmhp.com, or by calling 1-877-847-8377.

Upon a provider’s request, DSHS (or its contractor) will assist eligible children with the scheduling of free transportation to their dental appointment or clients can call the Medical Transportation Program at 1-877-633-8747.
Refer to: Appendix D, Medical Transportation (Vol. I, General Information) for information about transportation arrangements.

4.2.1.1 Eligibility for THSteps Dental Services
A client is eligible for THSteps dental services from birth through 20 years of age. The eligibility period is determined by the client’s age on the first of the month. If a client’s birthday is not on the first of a month, the new eligibility period begins on the first day of the following month. When the client turns 21 years of age during a month, the client is eligible for THSteps dental non-CCP services through the end of that month.

A client is eligible for Comprehensive Care Program (CCP) dental services until their 21st birthday. The eligibility period ends on their 21st birthday and does not continue through the end of the month in which the birthday falls.

4.2.1.2 Parental Accompaniment
Children who are 14 years of age and younger must be accompanied to THSteps dental appointments by a parent, legal guardian, or another adult who is authorized by the parent or guardian unless the services are provided by an exempt entity as defined by the Human Resources Code. For additional information and exceptions, see subsection D.5, “Parental Accompaniment” in Appendix D, “Texas Health Steps Statutory State Requirements,” in this handbook.

4.2.2 Comprehensive Care Program (CCP)
The Omnibus Budget Reconciliation Act (OBRA) of 1989 mandated the expansion of the federal EPSDT program to include any service that is medically necessary and for which FFP is available, regardless of the limitations of Texas Medicaid. This expansion is referred to as the Comprehensive Care Program (CCP).

CCP services are provided only for those clients who are birth through 20 years of age who are eligible to receive THSteps services. When the client becomes 21 years of age, all CCP benefits stop. Dental services that are a benefit through CCP are designated in the Limitations column of the Medicaid dental fee schedules beginning in subsection 4.2.11, “Diagnostic Services” of this handbook, with the notation “CCP.”

4.2.3 ICF-MR Dental Services
ICF-MR dental services are mandated by Medicaid. Reimbursement is provided for treatment of dental problems for Medicaid-eligible residents of ICF-MR facilities who are 21 years of age and older. Residents of ICF-MR facilities who are 20 years of age and younger receive services through the regular THSteps Program. Eligibility for ICF-MR services is determined by DADS.

Procedure codes that do not have a CCP designation in the Limitations column of the dental fee schedule may be submitted in a routine manner for ICF-MR clients. These procedures must be documented as medically necessary and appropriate. ICF-MR clients are not subject to periodicity for preventive care. For procedure codes that have a CCP designation, a provider may request authorization with documentation or provide documentation on the submitted claim.

Refer to: Subsection 4.2.10, “Medicaid Dental Benefits, Limitations, and Fee Schedule” of this handbook.

4.2.3.1 THSteps and ICF-MR Provision of Dental Services
All THSteps and ICF-MR dental services must be performed by the Medicaid-enrolled dental provider except for permissible work that is delegated to a licensed dental hygienist, dental assistant, or dental technician in a dental laboratory on the premises where the dentist practices, or in a commercial laboratory registered with the Texas State Board of Dental Examiners (TSBDE). The Texas Dental
Practice Act and the rules and regulations of the TSBDE (22 TAC, Part 5) define the scope of work that dental auxiliary personnel may perform. Any deviations from these practice limitations shall be reported to the TSBDE and HHSC, and could result in sanctions or other actions imposed against the provider.

THSteps and ICF-MR clients must receive:

- Dental services specified in the treatment plan that meet the standards of care established by the laws relating to the practice of dentistry and the rules and regulations of the TSBDE.
- Dental services free from abuse or harm from the provider or the provider’s staff.
- Only the treatment required to address documented medical necessity that meets professionally recognized standards of health care.

4.2.3.2 Children in Foster Care

Clients in foster care receive services from Superior HealthPlan’s dental contractor, Delta Dental. The telephone number for Delta Dental is 1-866-287-3252.

Paper claims and requests for prior authorization must be mailed to:

Delta Dental of California
State Government Programs
PO Box 537030
Sacramento, CA. 95853-7030

4.2.4 Written Informed Consent and Standards of Care

As outlined in 22 TAC §108.7, the dental provider must maintain written informed consent signed by the patient, or a parent or legal guardian of the patient if the patient is a minor, or a legal guardian of the patient if the patient has been adjudicated incompetent to manage the patient’s personal affairs.

Such consent is required for all treatment plans and procedures where a reasonable possibility of complications from the treatment planned or a procedure exists, and such consent should disclose risks or hazards that could influence a reasonable person in making a decision to give or withhold consent.

Written consent must be given within the one-year period prior to the date the services are provided, and must not have been revoked. THSteps clients or their parents or legal guardians who can give written informed consent must receive information following a dental examination about the dental diagnosis, scope of proposed treatment, including alternatives and risks, anticipated results, and need for and risks of the administration of sedation or anesthesia. Additionally, they must receive a full explanation of the treatment plan and give written informed consent before treatment is initiated. The parent or guardian being present at the time of the dental visit facilitates the provider obtaining written informed consent. Dentists must comply with TSBDE Rule 22 TAC §108.2, “Fair Dealing.”

4.2.5 First Dental Home

Based on the American Academy of Pediatric Dentistry’s (AAPD) definition, Texas Medicaid defines a dental home as the dental provider who supports an ongoing relationship with the client that includes all aspects of oral health care delivered in a comprehensive, continuously accessible, coordinated, and family-centered way. Establishment of a client’s dental home begins no later than 6 months of age and includes referrals to dental specialists when appropriate.

In providing a dental home for a client, the dental provider enhances the ability to assist clients and their parents in obtaining optimum oral health care. The first dental home visit can be initiated as early as 6 months of age and must include, but is not limited to, the following:

- Comprehensive oral examination
- Oral hygiene instruction with primary caregiver
- Dental prophylaxis, if appropriate
• Topical fluoride varnish application when teeth are present
• Caries risk assessment
• Dental anticipatory guidance

Clients who are from 6 through 35 months of age may be seen for dental checkups by a certified First Dental Home provider.

First Dental Home services are submitted using procedure code D0145. The dental home provider must retain supporting documentation for procedure code D0145 in the client’s record. The supporting documentation must include, but is not limited to, the following:

• Oral and physical health history review
• Dental history review
• Primary caregiver’s oral health
• Oral evaluation
• Caries risk assessment
• Dental prophylaxis, which may include a toothbrush prophylaxis
• Oral hygiene instruction with parent/caregiver
• Fluoride varnish application
• An appropriate preventive oral health regimen (recall schedule)
• Anticipatory guidance communicated to the client’s parent, legal guardian, or primary caregiver to include the following:
  • Oral health and home care
  • Oral health of primary caregiver/other family members
  • Development of mouth and teeth
  • Oral habits
  • Diet, nutrition, and food choices
  • Fluoride needs
  • Injury prevention
  • Medications and oral health
  • Any referrals, including dental specialist’s name

Procedure code D0145 is limited to individual dentists certified by the DSHS Oral Health Program to perform this service. Training for certification as a First Dental Home provider is available as a free continuing education course on the THSteps website at www.txhealthsteps.com.

Procedure codes D0120, D0150, D0160, D0170, D0180, D1120, D1203, D1206, and D8660 are denied if procedure code D0145 is submitted for the same DOS by any provider. A First Dental Home examination is limited to ten services per client lifetime with at least 61 days between visits by any provider to prevent denials of the service.

4.2.6 Dental Referrals by THSteps Primary Care Providers
Dental providers may receive referrals for clients who are 6 months of age and older from THSteps primary care providers. The primary care provider must provide information about the initiation of routine dental services with the recommendation to the client’s parent or guardian that an appointment be scheduled with a dental provider in order to establish a dental home. If a THSteps dental checkup
reveals a dental health condition that requires follow-up diagnosis or treatment, the provider performing the dental checkup should assist the client in planning follow-up care within their practice or in making a referral to another qualified dental provider.

If the client is enrolled in a Medicaid managed care health maintenance organization (HMO) for their medical care, the dental care will be provided by Texas Medicaid fee-for-service THSteps dental providers. However, other providers, such as the facility and anesthesiology care, must be HMO network providers. Facility and anesthesiology services must be pre-approved by the HMO.

**Note:** Clients who are 20 years of age and younger may refer themselves for dental services.

### 4.2.7 Change of Provider

A provider may refer a client to another dental provider for treatment for any of the following reasons:

- Treatment by a dental specialist such as a pediatric dentist, periodontist, oral surgeon, endodontist, or orthodontist is indicated and is in the best interests of the THSteps client.
- The services needed are outside the skills or scope of practice of the initial provider.

A provider may discontinue treatment if there is documented failure to keep appointments by the client, noncompliance with the treatment plan, or conflicts with the client or other family members. In any such action to discontinue treatment, providers must comply with 22 TAC §108.5, “Patient Abandonment.”

The client also may select another provider, if desired. HHSC may refer the client to another provider as a result of adverse information obtained during a utilization review or resolution of a complaint from either provider or client.

#### 4.2.7.1 Interrupted or Incomplete Orthodontic Treatment Plans

Authorizations for orthodontic or extensive restorative treatment plans that have been prior authorized for a provider are not transferable to another provider. If a client’s treatment plan is interrupted and the services are not completed, the original or new provider must request a new prior authorization to complete the interrupted, incomplete, and prior authorized treatment plan.

To complete the treatment plan, the client must be eligible for Medicaid with a current client Medicaid Identification Form (Form H3087) or Medicaid Eligibility Verification Form (Form H1027).

If the client does not return for the completion of services and there is a documented failure to keep appointments by the client, the dental provider who initiated the services may submit a claim for reimbursement in compliance with the 95-day filing deadline.

Refer to: Subsection 4.2.24.4, “Transfer of Orthodontic Services” in this handbook.

### 4.2.8 Periodicity for THSteps Dental Services

For clients who are 6 months through 20 years of age, dental checkups may occur at 6-month (181-day) intervals. Texas Medicaid has adopted the AAPD’s “Guideline on Periodicity of Examination, Preventive Dental Services, Anticipatory Guidance, and Oral Treatment for Children” to serve as a guide and reference for dentists when scheduling and providing services to THSteps clients.

In November 2004, the American Dental Association (ADA), in conjunction with the U.S. Food and Drug Administration, established “Guidelines for Prescribing Dental Radiographs.” The guidelines include type of encounters relevant to the client’s age and dental developmental stage. Texas Medicaid has adopted the ADA guidelines to serve as a guide and reference for dentists who treat THSteps clients.

Refer to: Subsection G.1, “American Academy of Pediatric Dentistry Periodicity Guidelines (9 Pages)” and subsection G.2, “American Dental Association Guidelines for Prescribing Dental Radiographs (3 Pages)” in this handbook.
THSteps dental providers may provide any medically necessary dental services such as emergency, diagnostic, preventive, therapeutic, and orthodontic services that are within the Texas Medicaid guidelines and limitations specified for each area as long as the client’s Medicaid eligibility is current for the date that dental services are being provided.

4.2.8.1 Exceptions to Periodicity

If a periodic dental checkup has been conducted within the last six months, the client still may be able to receive another periodic dental checkup in the same six-month period by any provider. For THSteps clients, exceptions to the six-month periodicity schedule for dental checkup services may be approved for one of the following reasons:

- Medically necessary service, based on risk factors and health needs (includes clients who are from birth through 6 months of age).
- Required to meet federal or state exam requirements for Head Start, daycare, foster care, preadoption, or to provide a checkup prior to the next periodically-due checkup if the client will not be available when due. This includes clients whose parents are migrant or seasonal workers.
- Clients’ choice to request a second opinion or change service providers (not applicable to referrals).
- Subsequent therapeutic services necessary to complete a case for clients who are 5 months of age and younger when initiated as emergency services, for trauma, or early childhood caries.
- Medical checkup prior to a dental procedure requiring general anesthesia.
- A First Dental Home client can be seen up to 10 times within the age of 6 through 35 months.

The provider should determine if the client is Medicaid-eligible for the date that dental services are to be provided. If the client’s Medicaid Identification Form (Form H3087) indicates that the client is eligible for dental services, the client is requesting a periodic dental checkup, and the provider’s records indicate that they have provided a periodic checkup within the current 6-month (181-day) interval, the provider may not provide a second periodic checkup unless the provider can document medical necessity for the second periodic checkup. However, the provider may still provide any other necessary dental services that are a benefit.

When the need for an exception to periodicity is established, a narrative explaining the reason for the exception to periodicity limitations must be documented in the client’s file and on the claim submission. For claims filed electronically, check “yes” when prompted. For claims filed on paper, place comments in Block 35.

For ICF-MR clients who are 21 years of age and older, the periodicity schedule for preventive dental procedures (exams, prophylaxis, fluoride, and radiographs) does not apply.
4.2.9 Tooth Identification (TID) and Surface Identification (SID) Systems

Claims are denied if the procedure code is not compatible with TID or SID. Use the alpha characters to describe tooth surfaces or any combination of surfaces. For SID designation on anterior teeth, use facial (F) and incisal (I). For SID purposes, use buccal (B) and occlusal (O) designations for posterior teeth.

4.2.9.1 Supernumerary Tooth Identification

Each identified permanent tooth and each identified primary tooth has its own identifiable supernumerary number. This developed system can be found in the CDT published by the ADA.

The TID for each identified supernumerary tooth will be used for paper and electronic claims and can only be submitted for payment with the following procedure codes:

- For primary teeth only: D7111.
- For both primary and permanent teeth the following codes can be submitted: D7140, D7210, D7220, D7230, D7240, D7241, D7250, D7285, D7286, and D7510.

4.2.10 Medicaid Dental Benefits, Limitations, and Fee Schedule

For THSteps clients, dental procedure limitations may be waived when all the following have been met. The dental procedure is:

- Medically necessary and FFP is available for it.
- Prior authorized by the TMHP Dental Director.
- Properly documented in the client’s record.

Refer to: Subsection 4.3, “Documentation Requirements” in this handbook.

For ICF-MR clients, services designated as CCP-type are available. In the Limitations column of the fee schedule, abbreviations indicate the age range limitations and documentation requirements. The following abbreviations also appear in a table at the bottom of each page of the fee schedule:

4.2.11 Diagnostic Services

Diagnostic services should be performed for all clients, starting within the first six months of the eruption of the first primary tooth, but no later than one year of age.

<table>

<tr>
<td>Procedure codes D0140, D0160, D0170, and D0180 are limited dental codes and may be paid in addition to a comprehensive oral exam (procedure code D0150) or periodic oral exam (procedure code D0120), when submitted within a six-month period. When submitting a claim for procedure code D0140, D0160, D0170, or D0180, the provider must indicate documentation of medical necessity on the claim. These claims are subject to retrospective review. If no comments are indicated on the claim form, the payment may be recouped.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

A = Age range limitations, N = Narrative required, FMX = Full-mouth radiographs (nonpanoramic), MTID = Missing tooth ID(s), PPXR = Preoperative and postoperative radiographs required, PXR = Preoperative radiographs required, PHO = Preoperative and postoperative photographs required, PC = Periodontal charting required, PATH = Pathology report required and be retained in the client’s record, CCP = Comprehensive Care Program, NC = No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter
The provider must document medical necessity and the specific tooth or area of the mouth on the claim for procedure codes D0140, D0160, and D0170.

Documentation supporting medical necessity for procedure codes D0140, D0160, and D0170 must also be maintained by the provider in the client’s medical record and must include the following:

- The client complaint supporting medical necessity for the examination
- The specific area of the mouth that was examined or the tooth involved
- A description of what was done during the visit
- Supporting documentation of medical necessity which may include, but is not limited to, radiographs or photographs

Documentation supporting medical necessity for procedure code D0180 must be maintained by the provider in the client’s medical record and must include the following:

- The client complaint supporting medical necessity for the examination
- A description of what was done during the treatment

<td>Requires documentation of the type of instructions, number of appointments, and content of instructions. This procedure refers to services above and beyond routine brushing and flossing instruction and requires that additional time and expertise have been directed toward the client’s care. Denied when billed for the same DOS as dental prophylaxis (D1110, D1120) or topical fluoride treatments (D1203, D1204, and D1206) by the same provider. Limited to once per client, per year by any provider.</td>
<td>$12.50</td>
</tr>
<tr>
<td>D1351*</td>
<td>Sealants may be applied to the occlusal, buccal, and lingual pits and fissures of any tooth that is at risk for dental decay and is free of proximal caries and free of restorations on the surface to be sealed. Sealants are a benefit when applied to deciduous (baby or primary) teeth or permanent teeth. Indicate the tooth numbers and surfaces on the claim form. Reimbursement will be considered on a per-tooth basis, regardless of the number of surfaces sealed. Denied when billed for the same DOS as any D4000 series periodontal procedure code. Sealants and replacement sealants are limited to one every 3 years per tooth by the same provider or provider group.</td>
<td>$28.82</td>
</tr>
</tbody>
</table>

### Space Maintenance (Passive Appliances)

Space maintainers are a benefit of Texas Medicaid after premature loss of primary or secondary molars (TID A, B, I, J, K, L, S, and T for clients who are 1 through 12 years of age, and after loss of permanent molars (TID 3, 14, 19, and 30) for clients who are 3 through 20 years of age. Limited to 1 space maintainer per TID per client.

When procedure code D1510 or D1515 have been previously reimbursed, the recementation of space maintainers (procedure code D1550) may be considered for reimbursement to either the same or different THSteps dental provider. Replacement space maintainers may be considered upon appeal with documentation supporting medical necessity. Removal of a fixed space maintainer is not payable to the provider or dental group practice that originally placed the device.

4.2.13 Therapeutic Services

Medicaid reimbursement is contingent on compliance with the following limitations:

- Documentation requirements

  **Refer to**: Subsection 4.3, “Documentation Requirements” in this handbook.

- Total restorative fee per tooth on primary teeth cannot exceed $156.06, which is the fee for a stainless steel crown (exceptions: D2335 and D2933).

- All fees for tooth restorations include local anesthesia and pulp protective media, where indicated, without additional charges. These services are considered part of the restoration.

- More than one restoration on a single surface is considered a single restoration.

- Multiple surface restorations must show definite crossing of the plane of each surface listed for each primary and permanent tooth completed.

- A multiple surface restoration cannot be submitted as two or more separate one-surface restorations.

- Restorations and therapeutic care are provided as a Medicaid service based on medical necessity and reimbursed only for therapeutic reasons and not preventive purposes (refer to CDT).

All dental restorations and prosthetic appliances that require lab fabrication may be submitted for reimbursement using the date the final impression was made as the DOS. If the client did not return for final seating of the restoration or appliance, a narrative must be included on the claim form and in the client’s chart in lieu of a postoperative radiograph. The 95-day filing deadline is in effect from the date of the final impression. If the client returns to the office after the claim has been filed, the dentist is obligated to attempt to seat the restoration or appliance at no cost to the client or Texas Medicaid. For records retention requirements, refer to subsection 4.3, “Documentation Requirements” in this handbook.

Direct pulp caps may be reimbursed separately from any final tooth restoration performed on the same tooth (as noted by the TID) on the same DOS by the same provider.

4.2.14 Restorative Services

### Crowns—Single Restorations Only

For procedure codes D2710 through D2799, single crown restorations (permanent teeth only) the following limitations apply:

- Porcelain is allowed on all teeth.
- Prior authorization is required for any combination of inlays/onlays or permanent crowns that exceed the limit of four inlays/onlays or permanent crowns.

Stainless steel crowns and permanent all-metal cast crowns are not reimbursed on anterior permanent teeth (6-11, 22-27).

4.2.15 Endodontics Services

Therapeutic pulpotomy (procedure code D3220) and apexification and recalcification procedures (procedure codes D3351, D3352, and D3353) are considered part of the root canal (procedure codes D3310, D3320, and D3330) or retreatment of a previous root canal (procedure codes D3346, D3347, and D3348). When therapeutic pulpotomy or apexification and recalcification procedures are submitted with root canal codes, the reimbursement rate is adjusted to ensure that the total amount reimbursed does not exceed the total dollar amount allowed for the root canal procedure.

Reimbursement for a root canal includes all appointments necessary to complete the treatment. Pulpotomy and radiographs performed pre, intra, and postoperatively are included in the root canal reimbursement.

Root canal therapy that has only been initiated, or taken to some degree of completion, but not carried to completion with a final filling, may not be submitted as a root canal therapy code. It must be submitted using code D3999 with a narrative description of what procedures were completed in the root canal therapy.

Documentation supporting medical necessity must be kept in the client’s record and include the following: the medical necessity as documented through periapical radiographs of tooth treated showing pre-treatment, during treatment, and post-treatment status; the final size of the file to which the canal was enlarged; and the type of filling material used. Any reason that the root canal may appear radiographically unacceptable must be documented in the client’s record.

If the client is pregnant and does not want radiographs, use alternative treatment (temporary) until after delivery.

A=Age range limitations, N=Narrative required, FMX=Full-mouth radiographs (nonpanoramic), MTID=Missing tooth ID(s), PXR=Preoperative and postoperative radiographs required, PPHO=Preoperative and postoperative photographs required, PC=Periodontal charting required, PATH=Pathology report required and must be retained in the client’s record, CCP=Comprehensive Care Program, NC=No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter.
4.2.16 Periodontal Services

Procedure codes D4210 and D4211, when submitted for clients who are 12 years of age and younger, will be initially denied, but may be appealed with documentation of medical necessity. Preoperative and postoperative photographs are required for the following procedure codes: D4210, D4211, D4270, D4271, D4273, D4275, D4276, D4355, and D4910.

Preoperative and postoperative photographs are required when medical necessity is not evident on radiographs for the following procedure codes: D4240, D4241, D4245, D4266, and D4267. Documentation is required when medical necessity is not evident on radiographs for the following procedure codes: D4210, D4211, D4240, D4241, D4245, D4266, D4267, D4270, D4271, D4273, D4275, D4276, D4267, D4355, and D4910.

Claims for preventive dental procedure codes D1110, D1120, D1203, D1204, D1206, and D1351 will be denied when submitted for the same DOS as any D4000 series periodontal procedure codes.

Procedure codes D4266 and D4267 may be appealed with documentation of medical necessity. Medical necessity for third molar sites are:

- Medical or dental history documenting need due to inadequate healing of bone following third molar extraction, including the date of third molar extraction.
- Secondary procedure several months postextraction.
- Position of the third molar preoperatively.
- Postextraction probing depth to document continuing bony defect.
- Postextraction radiographs documenting continuing bony defect.
- Bone graft and barrier material used.

Medical necessity for other than third molar sites are:

- Medical or dental history documenting comorbid condition (e.g., juvenile diabetes, cleft palate, avulsed tooth or teeth, traumatic oral injuries).
- Intra- or extra-oral radiographs of treatment site(s).
- If not radiographically evident, intraoral photographs are optional unless requested preoperatively by HHSC or its agent.
- Periodontal probing depths.
- Number of intact walls associated with an angular bony defect.
- Bone graft and barrier material used.

### 4.2.18 Implant Services

All of the following implant services codes require prior authorization. Procedure codes D6092 and D6093 do not require prior authorization.

Refer to: Subsection 4.2.29, “Mandatory Prior Authorization” in this handbook for documentation requirements.

Periapical radiographs are required for each tooth involved in the authorization request. The criteria used by the TMHP Dental Director are:

Prosthodontic (Fixed) Services

Prosthodontic procedure codes require prior authorization.

Refer to: Subsection 4.2.29, “Mandatory Prior Authorization” in this handbook for documentation requirements.

Periapical radiographs are required for each tooth involved in the authorization request. The criteria used by the TMHP Dental Director are:

- At least one abutment tooth requires a crown (based on traditional requirements of medical necessity and dental disease).
- The space cannot be filled with a removable partial denture.
- The purpose is to prevent the drifting of teeth in all dimensions (anterior, posterior, lateral, and the opposing arch).
- Each abutment or each pontic constitutes a unit in a bridge.
- Porcelain is allowed on all teeth.

4.2.22 Dental Therapy Under General Anesthesia

Providers must comply with TSBDE Rules and Regulations, Chapter 8, Subsection C and 22 TAC §108.30 - 108.35. Any anesthesia type services are paid only to the provider. The dental provider is responsible for determining whether a client meets the minimum criteria necessary for receiving general anesthesia. A local anesthesia fee is not paid in addition to other restorative, operative, or surgical procedure fees.

Prior authorization is required for the use of general anesthesia while rendering treatment (to include the anesthesia fee and the facility fee), regardless of place of service, for a client who does not meet the requirements of the “Criteria for Dental Therapy Under General Anesthesia” (22 point threshold) and the “Criteria for Dental Therapy Under General Anesthesia, Attachment 1” forms. Supporting documentation, including the appropriate narrative, must be submitted to TMHP for prior authorization. Prior authorization is required for medically necessary dental general anesthesia that exceeds once per six months, per client, per provider. The dental provider is responsible for obtaining prior authorization for the services performed under general anesthesia. Hospitals, ASC’s, and anesthesiologists must obtain the prior authorization number from the dental provider.

Refer to: Form CH.16, “THSteps Dental Criteria for Dental Therapy Under General Anesthesia (2 Pages)” in this handbook. Dental rehabilitation or restoration services requiring general anesthesia are performed in an outpatient facility.

Surgical services related to THSteps dental services requiring general anesthesia must be coded as follows:

- Procedure code 00170 with modifier EP is for the anesthesiologist or certified registered nurse anesthetist (CRNA) to use on the claim form.
- Procedure code 41899 with modifier EP is for the facility to use on the claim form. Procedure code 41899 does not require prior authorization for ASCs and HASCs.
- An appropriate diagnosis code, such as 52100 or 5220, must be used on the claim form.
- Modifier EP identifies that the service is associated with THSteps.

The claim forms used are the CMS-1500 or the UB-04 CMS-1450 paper claim forms. The examining physician, anesthesiologist, hospital, ASC, or HASC must submit claims to TMHP or the appropriate MCO separately for the medical and facility components of their services.

Refer to: Form CH.15, “THSteps Dental Mandatory Prior Authorization Request Form” in this handbook.

4.22.2 Criteria for Dental Therapy Under General Anesthesia, Attachment 1

Medicaid Dental Policy Regarding Criteria for Dental Therapy Under General Anesthesia–Attachment 1

Purpose: To justify I.V. Sedation or General Anesthesia for Dental Therapy, the following documentation is required in the Child’s Dental Record.

Elements: Note those required* and those as appropriate**:
1) The medical evaluation justifying the need for anesthesia
2) Description of relevant behavior and reference scale
3) Other relevant narrative justifying the need for general anesthesia.
4) Client’s demographics, including date of birth.
5) Relevant dental and medical history.
6) Dental radiographs, intraoral/perioral photography and/or diagram of dental pathology.
7) Proposed Dental Plan of Care.
8) Consent signed by parent/guardian giving permission for the proposed dental treatment and acknowledging that the reason for the use of IV sedation or general anesthesia for dental care has been explained.
10) The parent/guardian dated signature on the Criteria for Dental Therapy Under General Anesthesia form attesting that they understand and agree with the dentist’s assessment of their child’s behavior.
11) Dentist’s attestation statement and signature, which may be put on the bottom of the Criteria for Dental Therapy Under General Anesthesia form or included in the record as a stand alone form.

“I attest that the client’s condition and the proposed treatment plan warrant the use of general anesthesia. Appropriate documentation of medical necessity is contained in the client’s record and is available in my office.”

REQUESTING DENTIST’S SIGNATURE: _________________________ DATE: ________________
4.2.23 Hospitalization and ASC/HASC

Dental services performed in an ASC, HASC, or a hospital (either as an inpatient or an outpatient) may be benefits of THSteps based on the medical or behavioral justification provided, or if one of the following conditions exist:

- The procedures cannot be performed in the dental office.
- The client is severely disabled.

To satisfy the preadmission history and physical examination requirements of the hospital, ASC, or HASC, a THSteps medical checkup for dental rehabilitation or restoration may be performed by the child’s primary care provider. Physicians who are not enrolled as THSteps medical providers must submit claims for the examination of a client before the procedure with the appropriate evaluation and management procedure code from the following table:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Place of Service (POS)</th>
</tr>
</thead>
<tbody>
<tr>
<td>99202</td>
<td>POS 1 (office)</td>
</tr>
<tr>
<td>99222</td>
<td>POS 3 (inpatient hospital)</td>
</tr>
<tr>
<td>99282</td>
<td>POS 5 (outpatient hospital)</td>
</tr>
</tbody>
</table>

Refer to: Subsection 5.3.1.6, “Exception-to-Periodicity Checkups” in this handbook.

Note: The dental provider must submit claims to TMHP using the ADA Dental Claim Form to be considered for reimbursement through THSteps Dental Services.

The dental provider is responsible for obtaining prior authorization for the services performed under general anesthesia. Hospitals, ASC’s, and anesthesiologists must obtain the prior authorization number from the dental provider.

Contact the individual HMO for precertification requirements related to the hospital procedure. If services are precertified, the provider receives a precertification number effective for 90 days.

In those areas of the state with Medicaid managed care, the provider should contact the managed care plan for specific requirements or limitations. It is the dental provider’s responsibility to obtain precertification from the client’s HMO or managed care plan for facility and general anesthesia services if precertification is required.

To be reimbursed by the HMO, the provider must use the HMO’s contracted facility and anesthesia provider. These services are included in the capitation rates paid to HMOs, and the facility or anesthesiologist risk nonpayment from the HMO without such approval. Coordination of all specialty care is the responsibility of the client’s primary care provider. The primary care provider must be notified by the dentist or the HMO of the planned services.

Dentists providing sedation or anesthesia services must have the appropriate current permit from the TSBDE for the level of sedation or anesthesia provided.

The dental provider must be in compliance with the guidelines detailed in General Information.

Note: Post-treatment authorization will not be approved for codes that require mandatory prior authorization.

4.2.24 Orthodontic Services (THSteps)

Orthodontic services for cosmetic purposes only are not a benefit of Texas Medicaid. Orthodontic services are limited to the treatment of children who are 12 years of age and older with severe handi-capping malocclusion, children who are birth through 20 years of age with cleft palate, or other special medically necessary circumstances as outlined in Benefits and Limitations, which follows.
4.2.24.1 Benefits and Limitations

Orthodontic services include the following:

- Correction of severe handicapping malocclusion as measured on the Handicapping Labiobuccal Deviation (HLD) Index. A minimum score of 26 points is required for full banding approval (only permanent dentition cases are considered).

Refer to: Subsection 4.2.26, “Handicapping Labio-lingual Deviation (HLD) Index” in this handbook.

Exception: Retained deciduous teeth and cleft palates with gross malocclusion that will benefit from early treatment. Cleft palate cases do not have to meet the HLD 26-point scoring requirement. However, it is necessary to submit a sufficient narrative or outline of the proposed treatment plan when requesting authorization for orthodontic services on cleft palate cases.

- Crossbite therapy.
- Head injury involving severe traumatic deviation.

The following limitations apply for orthodontic services:

- Orthodontic services for cosmetic purposes only are not a benefit of Texas Medicaid or THSteps.
- Orthognathic surgery, to include extractions, required or provided in conjunction with the application of braces must be completed while the client is Medicaid-eligible in order for reimbursement to be considered.
- Except for procedure code D8660, all orthodontic procedures require prior authorization for consideration of reimbursement.
- The THSteps client must be Medicaid THSteps-eligible when authorization is requested and the orthodontic treatment plan is initiated. It is the provider’s responsibility to verify that the client has a current Medicaid Identification Form (Form H3087) or Medicaid Eligibility Verification Form (Forms H1027 and H1027-A-C); that the date of birth on the form indicates the client is 20 years of age or younger; and that no limitations are indicated.
- Prior authorization is issued to the requesting provider only and is not transferable to another provider. If the client changes providers or if the provider ceases to be a Medicaid provider for any reason, a new prior authorization must be requested by the new provider.

Refer to: Subsection 4.2.24.4, “Transfer of Orthodontic Services” in this handbook.

The following procedure codes, policies, and limitations are applied to the processing and payment of orthodontic services under THSteps dental services:

- Procedure code D8660 is allowed when:
  - The client is referred to a dental provider to determine whether orthodontic services are indicated and to determine the appropriate time to initiate such services.
  - The client is referred to a dental provider and elects to receive services from another orthodontic provider for justifiable reasons.
  - Repeat visits at different age levels are required to determine the appropriate time to initiate orthodontic treatment.
  - If procedure code D8660 is submitted within six months of procedure code D8080, procedure code D8080 will be reduced by the amount that was paid for procedure code D8660.
  - Procedure code D8680 is payable for one retainer per arch, per lifetime, and each retainer may be replaced once because of loss or breakage (prior authorization is required).
• Procedure code D8670 must be submitted only when an adjustment to the appliances is provided and may not be submitted before the date on which the orthodontic adjustment was performed. The number of visits for monthly adjustments to the appliances is restricted to the number that was authorized in the treatment plan. However, the number of monthly visits may be amended with appropriate documentation of medical necessity while the client is Medicaid eligible.

• Procedure code D8670 is paid only in conjunction with a history of braces (code D8080), unless special circumstances exist.

• All orthodontic procedure codes and appliances are global fees.

• Separate fees for adjustments to retainers are not payable.

• The appropriate procedure code must be submitted for those appliances required as part of the treatment of cleft palate cases.

Special orthodontic appliances may also be used with full banding and crossbite therapy with approval by the TMHP Dental Director.

• Procedure codes D5951, D5952, D5953, D5954, D5955, D5958, D5959, and D5960 are to be used as applicable with documentation of medical necessity. Otherwise, use the appropriate special orthodontic appliance code.

• Full banding is allowed on permanent dentition only, and treatment should be accomplished in one stage and is allowed once per lifetime.

**Exception:** Cases of mixed dentition when the treatment plan includes extractions of remaining primary teeth or cleft palate.

• Crossbite therapy is allowed for primary, mixed, or permanent dentition.

• Providers must not request crossbite correction (limited orthodontics) for a mixed dentition client when there is a need for full banding in the adult teeth. Crossbite therapy is an inclusive charge for treating the crossbite to completion, and additional reimbursement is not provided for adjustments or maintenance.

• If a case is not approved, the dentist may file a claim for payment of the diagnostic workup for procedure codes used that were necessary to request the prior authorization (procedure codes D0330, D0340, D0350, and D0470). The dentist may receive payment under these procedure codes for no more than two cases out of every ten cases denied. The dentist should determine if the client’s condition meets orthodontic benefit criteria before performing a diagnostic workup.

• Procedure codes D8080, D8050, and D8060, are limited to one per lifetime.

• Comprehensive orthodontic services (procedure code D8080) are restricted to clients who are 12 years of age and older or clients who have exfoliated all primary dentition. Crossbite therapy includes diagnostic cast services.

4.2.24.2 Completion of Treatment Plan

If a client reaches 21 years of age or loses Medicaid eligibility before the authorized orthodontic treatment is completed, reimbursement is provided to complete the orthodontic treatment that was authorized and initiated while the client was 20 years of age or younger, eligible for Medicaid THSteps, and completed within 36 months. Any orthodontic-related service requested in the prior authorization request (e.g., extractions or surgeries) must be completed before the loss of client eligibility. Services cannot be added or approved after Medicaid THSteps eligibility has expired.

**Exception:** Medicaid will not reimburse for any orthodontic services during a period of time when a THSteps client is incarcerated. During a period of incarceration, the facility is responsible for any and all dental services, including orthodontic services.
4.2.24.3 Premature Removal of Appliances

The overall fee for orthodontic treatment (D8080) includes the removal of orthodontic brackets and treatment appliances. Procedure code D7997 may be used only when the appliances were placed by a different provider with an unaffiliated practice (not a partner or office-sharing arrangement) and one of the following conditions exist:

- There is documentation of a lack of cooperation from the client.
- The client requests premature removal and a release of liability form has been signed by the parent, guardian, or client if he is at least 18 years of age.

Providers must keep a copy of the release of liability form on file and are responsible for this documentation during a review process.

4.2.24.4 Transfer of Orthodontic Services

Prior authorization that has been issued to a dental provider for orthodontic services is not transferable to another dental provider. The new provider must submit to TMHP a new prior authorization request to get approval to complete the orthodontic treatment that was initiated by the original provider.

To complete the treatment plan, the client must be eligible for Medicaid with a current client Medicaid Identification Form (Form H3087) or Medicaid Eligibility Verification Form (Form H1027).

If the client does not return for the completion of services and there is documented failure to keep appointments by the client, the dental provider who initiated the services may submit a claim for reimbursement. The claim must be received by TMHP within the 95-day filing deadline from the last DOS.

The following supporting documentation must accompany the new request for orthodontic services and must include the DOS the orthodontic diagnostic tools were completed and include:

- All of the documentation as required for the original provider.
- The reason the client left the previous provider, if known.
- An explanation of the treatment status.
- A complete treatment plan addressing all procedures for which authorization is being requested (such as the number of monthly adjustments or retainers required to complete the case).
- A full diagnostic workup (procedure code D8080) with an HLD Index. The score of 26 points will be modified according to any progress achieved.

**Exception:** The prior authorization requests for clients who initiate orthodontic services before becoming eligible for Medicaid do not require models or the HLD score sheet, nor does the client have to meet the HLD Index of 26 points. However, a complete plan of treatment is required.

**Note:** If Medicaid clients initiate orthodontic services outside of Medicaid because they do not score 26 points on the HLD, they are not eligible to have their orthodontic services transferred to or reimbursed by Medicaid.

Providers who want to request prior authorization to complete orthodontic treatment that was initiated by another provider must complete a THSteps Dental Mandatory Prior Authorization Request Form and send it with the complete plan of treatment, and the appropriate documentation for orthodontic services or crossbite therapy to the TMHP Dental Director at the following address:

Texas Medicaid & Healthcare Partnership
THSteps Dental Prior Authorization Unit
PO Box 202917
Austin, TX 78720-2917
4.2.24.5 Comprehensive Orthodontic Treatment

Comprehensive orthodontic services (procedure code D8080) are restricted to clients who are 12 years of age and older or clients who have exfoliated all primary dentition. Crossbite therapy includes diagnostic cast services.

National procedure codes do not allow for any work-in-progress or partial submission of a claim by separating the three orthodontic components: diagnostic workup, orthodontic appliance (upper), or orthodontic appliance (lower).

When submitting claims for comprehensive orthodontic treatment, procedure code D8080, three local codes must be submitted as remarks codes along with procedure code D8080. Local codes (procedure codes Z2009, Diagnostic workup approved; Z2011, Orthodontic appliance, upper; or Z2012, Orthodontic appliance, lower) must be placed in the Remarks Code field on electronic claims or Block 35 on paper claims.

Note: If the remarks code and procedure code D8080 are not submitted, the claim will be denied.

Each remarks code pays the correct reimbursement rate which, when combined, totals the maximum payment of $775. Procedure code D8080 must be submitted on three separate details, with the appropriate remarks code, even if the claim submission is for the workup and full banding. Submission of only one detail for a total of $775 will not be accepted.

Example 1: A client is approved for full banding, but after the initial workup, the client discontinues treatment. This provider would submit the national procedure code D8080 and place the local code Z2009, Diagnostic workup approved, in the Remarks/comment field. The claim would pay $175.

Example 2: A client is approved for full banding. The provider continues treatment and places the maxillary bands. The provider would submit the national procedure code D8080 and place the local procedure code Z2009, Diagnostic workup approved, and Z2011, Maxillary bands, in the Remarks/comment field. The claim would pay $475.

All electronic claims for procedure code D8080 must have the appropriate remarks code associated with the procedure code.

Providers must adhere to the following guidelines for electronic claim submission so TMHP can accurately apply the correct remarks code to the appropriate claim detail.

A Diagnostic Procedure Code (DPC) remarks code must be submitted, only once, in the first three bytes of the NTE02 at the 2400 loop.

Example 1: For a claim with one detail, submitted with procedure code D8080 and remarks code Z2009, enter the information as follows: DPCZ2009. The total submitted would be $175.

Example 2: For a claim with two details, where details one and two are procedure code D8080 and the remarks codes are Z2009 and Z2011, enter the information as follows: DPCZ2009Z2011. The total submitted would be $475.

Example 3: For a claim with three details, where all three details are submitted separately with procedure code D8080, enter the remarks code based on the order of the claim detail as follows: DPCZ2009Z2011Z2012. The total submitted would be $775.

This method ensures accurate and appropriate payment for services rendered and addresses the need for submission of a partial claim.
4.2.24.6 Orthodontic Procedure Codes and Fee Schedule

When submitting claims for orthodontic procedures, use the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Limitations</th>
<th>Maximum Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>Orthodontic Services</td>
<td></td>
<td></td>
</tr>
<tr>
<td>D0330*, D0340*, D0350*, and D0470*</td>
<td>When requested orthodontic cases are submitted for authorization and denied, two out of ten denials will be paid. These four procedure codes, when submitted together for denied cases, replace local procedure code Z2010.</td>
<td>$100.00</td>

4.2.25 Special Orthodontic Appliances

All removable or fixed special orthodontic appliances must be prior authorized. The prior authorization request must include both the national code and remarks code. However, prior authorization requests may omit the DPC prefix to the eight-digit remarks code.
All removable or fixed special orthodontic appliances must be submitted with national procedure code D8210 or D8220. Dental models must be submitted when requesting prior authorization of a thumb-sucking or tongue thrust appliance. To ensure appropriate claims processing, the DPC remarks code (local procedure code) reflecting the specific service is also required. The appropriate remarks codes must be entered on the prior authorization request form. Failure to follow the following steps will cause the claims to deny. Failure to enter the DPC remarks code and the appropriate procedure code will not result in claim denial; however, manual intervention is required to process the claim, which may result in a delay of payment.

For paper claim submissions, providers must enter the local procedure code in Block 35 (Remarks) of the 2006 ADA claim form.

For electronic submissions, providers enter the DPC remarks code in the Comments field to ensure correct authorization, accurate records, and reimbursement.

For electronic submissions other than TexMedConnect submissions, providers must follow the steps below to ensure TMHP accurately applies the correct local procedure code to the appropriate claim detail:

- The DPC prefix must be submitted, only once, in the first three bytes of the NTE02 at the 2400 loop.
- In bytes 4-8, providers must submit the remark code (local procedure code) based on the order of the claim detail. Do not enter any spaces or punctuation between remark codes, unless to designate the detail is not submitted with D8210 or D8220.

**Example:** For a claim with three details, where details one and three are submitted with procedure code D8210 and detail two is not, enter the following information in the NTE02 at the 2400 loop: DPC1014D 1046D. (The space shows that detail two needs no local code.) If all details require a local code, enter DPC, no spaces, and the appropriate local codes.

To submit using TexMedConnect, providers must enter the local code into the Remarks Code field, located under the details header. The Remarks Code field is the field directly after the Procedure Code field. TexMedConnect submitters are not required to manually enter the DPC prefix as it is placed in the appropriate field on the TexMedConnect electronic claim.

The following table identifies the appropriate DPC remarks codes to use when requesting prior authorization or submitting a claim for procedure code D8210 or D8220:

<table>
<thead>
<tr>
<th>Procedure Code</th>

4.2.26 Handicapping Labio-lingual Deviation (HLD) Index

The orthodontic provider must complete and sign the diagnosis (Angle class).

### Cleft Palate

Reimbursement for a cleft palate case in the mixed dentition will be considered only if narrative justification supports treatment before the client reaches full dentation.

*Note: Intermittent treatment requests may exceed the allowable 26 reimbursable treatment visits.*

* = Services payable to an FQHC for a client encounter.
Severe Traumatic Deviations
Refers to facial accidents only. Points cannot be awarded for congenital deformity. Severe traumatic deviations do not include traumatic occlusions for crossbites.

Overjet in Millimeters
Score the case exactly as measured. The measurement must be recorded from the most protrusive incisor, then subtract 2 mm (considered the norm), and enter the difference as the score.

Overbite in Millimeters
Score the case exactly as measured. The measurement must be recorded from the labio-incisal edge of the overlapped anterior tooth or teeth to the point of maximum coverage, then subtract 3 mm (considered the norm), and enter the difference as the score. This would be double-counting.

Mandibular Protrusion in Millimeters
Score the client exactly as measured. The measurement must be recorded from the “line of occlusion” of the permanent teeth, not from the ectopically erupted teeth in the anterior segment. Caution is advised in undertaking treatment of open bites in older teenagers because of the frequency of relapse.

Open Bite in Millimeters
Score the case exactly as measured. Measurement must be recorded from the line of occlusion of the permanent teeth, not from ectopically erupted teeth in the anterior segment. Caution is advised in undertaking treatment of open bites in older teenagers, because of the frequency of relapse.

Ectopic Eruption
An unusual pattern of eruption, such as high labial cuspids or teeth that are grossly out of the long axis of the alveolar ridge.

Note: Record the more serious condition. Do not include (score) teeth from an arch if that arch is to be counted in the category of Anterior Crowding. For each arch, either the ectopic eruption or anterior crowding may be scored, but not both.

Anterior Crowding
Anterior teeth that require extractions as a prerequisite to gain adequate room to treat the case. If the arch expansion is to be implemented as an alternative to extraction, provide an estimated number of appointments required to attain adequate stabilization. Arch length insufficiency must exceed 3.5 mm to score for crowding on any arch. Mild rotations that may react favorably to stripping or moderate expansion procedures are not to be scored as crowded.

Labio-lingual Spread in Millimeters
The score for this category must be the total, in millimeters, of the anterior spaces.

Providers should be conservative in scoring. Liberal scoring will not be helpful in the evaluation and approval of the case. The case must be considered dysfunctional and have a minimum of 26 points on the HLD index to qualify for any orthodontic care other than crossbite correction. Half-mouth cases cannot be approved.

The intent of the program is to provide orthodontic care to clients with handicapping malocclusion to improve function. Although aesthetics is an important part of self-esteem, services that are primarily for aesthetics are not within the scope of benefits of this program.

The proposals for treatment services should incorporate only the minimal number of appliances required to properly treat the case. Requests for multiple appliances to treat an individual arch will be reviewed for duplication of purpose.

If attaining a qualifying score of 26 points is uncertain, providers must include a brief narrative when submitting the case. The narrative may reduce the time necessary to gain final approval and reduce shipping costs incurred to resubmit records.
Providers must properly label and protect all records (especially plaster diagnostic models) when shipping. If plaster diagnostic models are requested by and shipped to TMHP, the provider should assure that the models are adequately protected from breakage during shipping. TMHP will return intact models to the provider.

### 4.2.26.1 HLD Score Sheet

This sheet and a Boley Gauge are required to score.

**Procedure:**
- Occlude client or models in centric position.
- Record all measurements rounded-off to the nearest millimeter.
- Enter a score of 0 if the condition is absent.

**PLEASE PRINT CLEARLY:**

4.2.27 Emergency or Trauma Related Services for All THSteps Clients and Clients Who Are 5 Months of Age and Younger

THSteps clients who are birth through 5 months of age are not eligible for routine dental checkups; however:

- They can be seen for emergency dental services by the dentist at any time for trauma, early childhood caries, or other oral health problems.
- They may be referred to a dentist by their primary care provider when a medical checkup identifies the medical necessity for dental services.

Prior authorization is not required for emergency or trauma-related dental services. Claims for these dental services must be filed separately from nonemergency dental services. Only one emergency or trauma-related dental claim per client, per day, may be considered for reimbursement. Routine therapeutic procedures are not considered emergency or trauma-related procedures.

When submitting a claim for emergency or trauma-related dental services, the provider must:

- Enter the word “Emergency” or “Trauma” in the description field (Block 30) of the claim form (also enter a brief description of the Current Dental Terminology [CDT] procedure code used). Claims are subject to retrospective review. If no comments are indicated on the claim form, the payment may be recouped.
- If checking the Other Accident box, briefly describe in the Remarks field, Block 35 of the claim form, what caused the emergency or trauma.
- Check the appropriate box in Block 45, Treatment Resulting From, of the claim form (the options to check are Occupational Illness/Injury, Auto Accident, or Other Accident).

Documentation to support the diagnosis and treatment of trauma must be retained in the client’s record.

**Note:** Indicating Trauma in the description field allows the provider to be reimbursed for treatment on an emergency, continuing, and long-term basis without regard to periodicity, subject to the client’s eligibility and program limitations. An exception to periodicity for THSteps dental services is granted automatically for immediate treatment and any future follow-up treatment, as long as each claim submitted for payment is marked “Trauma” in the Description field, Block 30, and the original date of treatment or incident is referenced in the Remarks field, Block 35.

**Refer to:** Subsection 6.7, “2006 American Dental Association (ADA) Dental Claim Filing Instructions” in Section 6, “Claims Filing” (Vol. 1, General Information).

Subsection 4.2.10, “Medicaid Dental Benefits, Limitations, and Fee Schedule” of this handbook.

4.2.28 Emergency Services for Medicaid Clients Who Are 21 Years of Age and Older

Limited dental services are available for clients who are 21 years of age and older (not residing in an ICF-MR facility) whose dental diagnosis is secondary to and causally related to a life-threatening medical condition.

4.2.28.1 Long Term Care (LTC) Emergency Dental Services

The Department of Aging and Disability Services (DADS) provides a limited range of dental services for Medicaid-eligible residents of LTC facilities. All claims for dental services provided to LTC residents are submitted to DADS. For information, providers should contact the appropriate LTC facility or DADS at 1-512-438-2633.

4.2.28.2 Laboratory Requirements

Dental laboratories must be registered with TSBDE laboratories, and technicians must not be under restrictions imposed by TSBDE or a court.

4.2.29 Mandatory Prior Authorization

Mandatory prior authorization is required for consideration of reimbursement to dental providers who render the following services:

- Orthodontia
- Implants
- Fixed prosthetic services
- Dental general anesthesia
- A combination of inlays/onlays or permanent crowns in excess of four per client
- Procedure code D4276
- Procedure code D7272
- Procedure code D7472
- Limited dental services for clients who are 21 years of age and older (not residing in an ICF-MR facility) whose dental diagnosis is secondary to and causally related to a life-threatening medical condition
- Cone beam imaging

Approved orthodontic treatment plans must be initiated before the client’s loss of Medicaid eligibility and before the 21st birthday, and must be completed within 36 months of the authorization date. Authorization for other procedures is valid for up to 90 days.

To obtain prior authorization for implants and fixed prosthodontics, a prior authorization form together with documentation supporting medical necessity and appropriateness must be submitted. Required documentation includes, but is not limited to:

- The THSTeps Dental Mandatory Prior Authorization Request Form.
- Appropriate pretreatment radiographs.
- Necessary radiographs of each involved tooth, such as periapical views. Panoramic films are inadequate to document caries.
- Documentation supporting that the mouth is free of disease; no untreated periodontal or endodontic disease, or rampant caries.
- Documentation supporting only one virgin abutment tooth; at least one tooth must require a crown unless a Maryland Bridge is being considered.
- Tooth Identification (TID) System noting only permanent teeth.
• Documentation supporting that a removable partial is not a viable option to fill the space between the teeth.

Prior authorization will not be given when films show two abutment teeth (virgin teeth do not require a crown, except for Maryland Bridge) or there is untreated periodontal or endodontic disease, or rampant caries which would contraindicate the treatment.

The prior authorization number is required on claims for processing. If the client is not eligible for Medicaid on the DOS or the claim is incomplete, it will affect reimbursement. Prior authorization is a condition for reimbursement; it is not a guarantee of payment.

Note: Post-treatment authorization will not be approved for codes that require mandatory prior authorization.

Refer to: Form CH.15, “THSteps Dental Mandatory Prior Authorization Request Form” in this handbook.

4.2.29.1 Cone Beam Imaging

Prior authorization is required for procedure codes D0360, D0362, and D0363. Cone beam imaging is used to determine the best course of treatment for cleft palate repair, skeletal anomalies, post-trauma care, implanted or fixed prosthodontics, and orthodontic or orthognathic procedures. Cone beam imaging is limited to initial treatment planning, surgery, and postsurgical follow up.

To obtain prior authorization, a THSteps Dental Mandatory Prior Authorization Request Form must be submitted with documentation supporting medical necessity and appropriateness. Required documentation includes, but is not limited to, the following:

• Presenting conditions
• Medical necessity
• Status of the client’s treatment

4.2.29.2 General Anesthesia for Dental Treatment

Prior authorization is required for the use of general anesthesia while rendering treatment (to include the dental service fee, the anesthesia fee and facility fee), regardless of place of service. A client must meet the minimum requirement of 22 total points on the Criteria for Dental Therapy Under General Anesthesia form.

Refer to: Subsection 4.2.22.1, “Criteria for Dental Therapy Under General Anesthesia” in this handbook.

In those areas of the state with Medicaid Managed Care, precertification or approval is required from the client’s health maintenance organization (HMO) for anesthesia and facility charges. It is the dental provider’s responsibility to obtain precertification from the client’s HMO or managed care plan for facility and general anesthesia services. A medical checkup prior to a dental procedure requiring general anesthesia is considered an exception to THSteps periodicity. A referral to the client’s primary care physician is not required. Prior authorization is available for exceptions to periodicity. Providers must include all appropriate supporting documentation with the submittal. The criteria for general anesthesia applies only to treatment of clients who are 20 years of age and younger or ICF-MR program clients.
4.2.29.3 Orthodontic Services

Prior authorization is required for all THSteps orthodontic services except for procedure code D8660. The prior authorization request must contain the DOS that the orthodontic diagnostic tools were produced. If the request is approved, the date that the records were produced is considered to be the date on which orthodontic treatment begins.

Refer to: Form CH.15, “THSteps Dental Mandatory Prior Authorization Request Form” in this handbook.

If orthodontic treatment is medically indicated, providers are responsible for obtaining prior authorization for a complete orthodontic treatment plan while the client is eligible for Medicaid and THSteps and who is 20 years of age or younger.

Submission of diagnostic casts are not required when requesting prior authorization for procedure codes D8050, D8060, or D8080, however, diagnostic casts must be retained for retrospective review.

Prior authorization is a condition of reimbursement; it is not a guarantee of payment.

Upon receipt of prior authorization of complete treatment plans, providers are to advise clients that they will be able to receive the approved treatment services (e.g., orthodontic adjustments, bracket replacements, and retainers), even if they lose Medicaid eligibility or reach 21 years of age. Approved orthodontic treatment must be initiated before the loss of Medicaid eligibility and completed within 36 months of the authorization date, unless the client is incarcerated. Medicaid does not pay for any dental services, including orthodontic, while the client is incarcerated.

Note: Providers must submit all orthodontic services for Medicaid managed care clients following these guidelines. Claims for dental services provided to children in foster care must be filed with StarDent, the claims processor for Superior Health Plan. STAR and STAR+PLUS are not responsible for orthodontic services.

4.2.30 THSteps and ICF-MR Dental Prior Authorization

Submit claims, dental correspondence, and THSteps and ICF-MR prior authorization requests to the appropriate address listed in the table below:

4.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including dental services. Dental services are subject to retrospective review and recoupment if documentation does not support the service submitted for payment.

The provider must educate all staff members, including dentists, about the following documentation requirements and charting procedures:

- For THSteps and ICF-MR dental claims, providers are not required to submit preoperative and postoperative radiographs unless these are specifically requested by HHSC, the TMHP Dental Director, or are needed for prior authorization or pre-payment review.
• Documentation of all restorative, operative, crown and bridge, and fixed and removable prosthodontics procedures must support the services that were performed and must demonstrate medical necessity that meets the professional standards of health care that are recognized by TSBDE. Documentation must include appropriate pretreatment, precementation and postcementation radiographs, study models and working casts, laboratory prescriptions, and invoices. Documentation must include the correct DOS. A panoramic radiograph without additional bitewing radiographs is considered inadequate as a diagnostic tool for caries detection. OIG may retrospectively recoup payment if the documentation does not support the services submitted for payment.

• All documentation must be maintained in the client’s record for a period of five years to support the medical necessity at the time of any post-payment utilization review. All documentation, including radiographs, must be of diagnostic and appropriate quality.

• In any situation where radiographs are required but cannot be obtained, intraoral photographs must be in the chart.

• Any complications, unusual circumstances encountered, morbidity, and mortality must be entered as a complete narrative in the client’s record.

• A provider must maintain a minimum standard of care through appropriate and adequate records, including a current history, limited physical examination, diagnosis, treatment plan, and written informed consent as a reasonable and prudent dentist would maintain. These records, as well as the actual treatment, must be in compliance with all state statutes, the Dental Practice Act, and the TSBDE Rules.

• Documentation for endodontic therapy must include the following: the medical necessity, pretreatment, during treatment, and post-treatment periapical radiographs, the final size of the file to which the canal was enlarged, and the type of filling material used. Any reason that the root canal may appear radiographically unacceptable must be entered in the chart. Endodontic therapy must be in compliance with the American Association of Endodontists quality assurance guidelines.

• Documentation for most periodontal services requires a six-point per tooth depth of pocket charting, a complete mouth series of periapical and bitewing radiographs, and any other narratives or supporting documentation consistent with the nationally accepted standards of care of the specialty of periodontics, and which conform to the minimum standard of care for periodontal treatment required of Texas dentists. A panoramic radiograph without additional bitewing or periapical radiographs is considered inadequate for diagnosis of periodontal problems.

• Documentation for surgical procedures requiring a definitive diagnosis for submitting a claim for a specific CDT code necessitates that a pathology report and a written record of clinical observations be present in the chart, together with any appropriate radiographs, operative reports, and appropriate supporting documentation. All impactions, surgical extractions, and residual tooth root extractions require appropriate preoperative periapical or panoramic radiographs (subject to limitations) be present in the chart.

• Any documentation requirements or limitations not mentioned in this manual that are present in the CDT are applicable. The written documentation requirements or limitations in this manual supercede those in the CDT.

4.3.1 General Anesthesia

The dental provider is required to maintain the following documentation in the client’s dental record:

• The medical evaluation justifying the need for anesthesia
• Description of relevant behavior and reference scale
• Other relevant narratives justifying the need for general anesthesia
• Client’s demographics, including date of birth
• Relevant dental and medical history
• Dental radiographs, intraoral/perioral photography, or diagram of dental pathology
• Proposed dental plan of care
• Consent signed by parent or guardian giving permission for the proposed dental treatment and acknowledging that the reason for the use of IV sedation or general anesthesia for dental care has been explained
• Completed Criteria for Dental Therapy Under General Anesthesia form
• The parent or guardian dated signature on the Criteria for Dental Therapy Under General Anesthesia form attesting that they understand and agree with the dentist’s assessment of their child’s behavior
• Dentist’s attestation statement and signature, which may be put on the bottom of the Criteria for Dental Therapy Under General Anesthesia form or included in the record as a stand alone form

4.3.2 Orthodontic Services

Requests for orthodontic services must be accompanied by all of the following documentation:

• An orthodontic treatment plan. The treatment plan must include all procedures required to complete full treatment (e.g., extractions, orthognathic surgery, upper and lower appliance, monthly adjustments, anticipated bracket replacements, appliance removal if indicated, special orthodontic appliances). The treatment plan should incorporate only the minimal number of appliances required to properly treat the case. Requests for multiple appliances to treat an individual arch are reviewed for duplication of purpose.

• Cephalometric radiograph with tracing models.

• Completed and scored HLD sheet with diagnosis of Angle class (26 points required for approval of non-cleft palate cases).

• Facial photographs.

• Full series of radiographs or a panoramic radiograph; diagnostic-quality films are required (copies are accepted and radiographs will not be returned to the provider).

• Any additional pertinent information as determined by the dentist or requested by TMHP’s Dental Director. Requests for crossbite therapy require properly trimmed models to be retained in the office and must demonstrate the following criteria:
  • Posterior teeth. Not end-to-end, but buccal cusp of upper teeth should be lingual to buccal cusp of lower teeth.
  • Anterior teeth. The incisal edge of upper should be lingual to the incisal of the opposing arch.

The dentist should be certain that radiographs, photographs, and other information are properly packaged to avoid damage. TMHP is not responsible for lost or damaged materials.

Refer to: Form CH.15, “THSteps Dental Mandatory Prior Authorization Request Form” in this handbook.

4.4 Utilization Review

HHSC or a designated entity may conduct utilization reviews through automated analysis of a provider’s pattern(s) of practice, including peer group analysis. Such analysis may result in a subsequent on-site utilization review. HHSC or its claims processing contractor may conduct utilization reviews at the direction of the Office of Inspector General (OIG), according to HHSC rules.
DSHS may also conduct dental utilization reviews of randomly selected THSteps dental providers. These reviews compare Medicaid dental services that have been reimbursed to a dental provider to the results of an oral examination of the client as conducted by DSHS regional dentists.

Refer to: 25 TAC, §33.72 for more information about utilization review.

4.5 Claims Filing and Reimbursement

4.5.1 Reimbursement
The Medicaid rates for dentists are calculated as access-based fees in accordance with 1 TAC §§355.8081, 355.8085, 355.8441(11), and 355.455(b). See the applicable fee schedule on the TMHP website at www.tmhp.com. To request a hard copy of the fee schedule, call the TMHP Contact Center at 1-800-925-9126.

Effective for dates of service on or after September 1, 2010, Texas Medicaid implemented a 1-percent reduction in the final payment amounts for inpatient, professional, and outpatient services. TEFRA-reimbursed inpatient hospitals (children’s and state teaching hospitals) are excluded from the 1-percent reimbursement reduction.

4.5.2 Third Party Resources (TPR)
For THSteps and ICF-MR dental claims, TMHP is responsible for determining if a third party resource (TPR) exists and for recouping payment from the TPR.

When the client’s Medicaid Identification Form (Form H3087) shows a P in the TPR column indicating the presence of other health insurance, THSteps and ICF-MR dental providers are not required to pursue TPR. The P does not distinguish between medical or dental. Dental providers are to submit claims to TMHP for reimbursement.

THSteps providers should not submit claims to private insurance for dental services. THSteps and ICF-MR dental providers should file the claim directly to TMHP even if the provider knows that the client has private insurance. TMHP will reimburse the claim and pursue payment from any other TPR. If a recoupment is made from another payment resource, TMHP will make the appropriate post-payment reconciliation with the dental provider.

Refer to: “Automated Inquiry System (AIS)” in “Preliminary Information” (Vol. 1, General Information).

4.5.3 Claim Submission After Loss of Eligibility
The Texas Medicaid 95-day filing deadline applies to all THSteps and ICF-MR dental services. If a client has lost Medicaid eligibility or turned 21 years of age, continue to file claims for services provided on the DOS the client was eligible. Indicate the actual DOS on the claim form, and enter the authorization number in the appropriate block on each claim filed.

4.5.4 Claims Information
Dental services must be submitted to TMHP in an approved electronic format or on the ADA Dental Claim Form. Providers may purchase ADA Dental claim forms from the vendor of their choice. TMHP does not supply the forms. A sample of the ADA Dental Claim form can be found on the ADA website at www.ada.org/prof/resources/topics/claimform.asp.

When completing an ADA Dental claim form, all required information must be included on the claim, as TMHP does not key information from attachments. Superbills, or itemized statements, are not accepted as claim supplements.
All THSteps and ICF-MR claims must be received by TMHP within 95 days from each DOS and submitted to the following address:

Texas Medicaid & Healthcare Partnership  
PO Box 200555  
Austin, TX 78720-0555

Claims for emergency, orthodontic, or routine dental services must each be filed on separate forms. A claim submitted for either emergency or orthodontic services must be identified as such in Block 35 (Remarks) of the claim form.

A THSteps and ICF-MR dental provider cannot submit claims to Texas Medicaid under his individual performing provider identifier for the services provided by one or more associate dentists practicing in his office as employees or independent contractors with specific employer-employee or contractual relationships. All dentists providing services to Medicaid clients must enroll as THSteps dental providers regardless of employer relationships. The individual provider submitting claims may be reimbursed into a single accounting office to maintain these described relationships.

Claims submitted by newly-enrolled providers must be received within 95 days of the date the new provider identifier is issued, and within 365 days of the DOS.

Providers should submit claims to Texas Medicaid for their usual and customary fees.

Claims for dental services provided to children in foster care must be filed with Delta Dental, the dental claims processor for Superior HealthPlan.

Refer to: Subsection 4.2.3.2, “Children in Foster Care” in this handbook.

Claims must not be submitted to Texas Medicaid for appointments missed by clients. A client with Medicaid cannot be billed for failure to keep an appointment. Only claims for actual services rendered are considered for payment.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information)

Subsection 1.4.9, “Billing Clients” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).

4.5.5 Claim Appeals

A claim denied because of age restrictions or other limitations listed in the Medicaid dental fee schedule may be considered for reimbursement on appeal when client medical necessity is provided to the TMHP Dental Director.

All denied claim appeals (see Section 7: Appeals in Vol. 1, General Information) must be submitted to TMHP with the exception of a request to waive late filing deadlines. TMHP does not have the authority to waive state or federal mandates regarding claim filing deadlines.

If, after all appeal processes at TMHP have been exhausted, the provider remains dissatisfied with TMHP’s decision concerning the appeal, the provider may file a complaint with the HHSC Claims Administrator Contract Management Unit.

Refer to: Subsection 7.3.1, “Administrative Claim Appeals” in Section 7, “Appeals” (Vol. 1, General Information).

Note: Providers must exhaust the appeals process with TMHP before filing a complaint to the HHSC Claims Administrator Contract Management Unit.

Refer to: Subsection 7.1.5, “Paper Appeals” in Section 7, “Appeals” (Vol. 1, General Information).
Providers may use one of three methods to appeal Medicaid claims to TMHP: telephone (AIS), paper, or electronic.

All appeals of denied claims or requests for adjustments on paid claims must be received by TMHP within 120 days of the date of disposition of the R&S Report on which the claim appears. If the 120-day appeal deadline falls on a weekend or TMHP-recognized holiday, the deadline will be extended to the next business day.

Certain claims must be appealed on paper; they cannot be appealed either electronically or by telephone.

Refer to: Subsection 7.1.1.2, “Disallowed Electronic Appeals” in Section 7, “Appeals” (Vol. 1, General Information) for information about appeals that may not be appealed electronically.

Subsection 7.1.3, “Automated Inquiry System (AIS) Appeals” in Section 7, “Appeals” (Vol. 1, General Information) for information about claims that may not be appealed through AIS.

To appeal in writing:

If a claim cannot be appealed electronically or by telephone, appeal the claim on paper by completing the following steps:

1) Provide a copy of the R&S Report page where the claim is reported.
2) Circle one claim per R&S Report page.
3) Identify the information that was incorrectly provided and note the correct information that should be used to appeal the claim. If necessary, specify the reason for appealing the claim.
4) Attach radiographs or other necessary supporting documentation.
5) If available, attach a copy of the original claim. Claim copies are helpful when the appeal involves dental policy or procedure coding issues.
6) Do not copy supporting documentation on the opposite side of the R&S Report.
7) It is strongly recommended that providers submitting paper appeals retain a copy of the documentation being sent. It is also recommended that paper documentation be sent via certified mail with a return receipt requested to establish TMHP’s receipt of the claim and the date the claim was received. The provider is urged to retain copies of multiple claim submissions if the Medicaid provider identifier is pending.

Note: Claims submitted by newly-enrolled providers must be received within 95 days of the date the new provider identifier is issued, and within 365 days of the DOS.

8) Submit the paper appeal with supporting documentation and any radiographs and adjustment requests to the following address:

Texas Medicaid & Healthcare Partnership
Inquiry Control Unit
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727

To appeal by telephone:

1) Contact the Dental Line at 1-800-568-2460.
2) For each claim in question, have the R&S Report listing the claim and any supporting documents readily available.
3) Identify the claim submitted for appeal. The internal control number (ICN) will be requested.
4) Supply the information necessary to correct the claim, such as the missing tooth number or letter, the corrected procedure code, surface ID, or Medicaid number.

The appeal will appear as finalized or pending on the following week’s R&S Report.

Providers may also appeal electronically.
Electronic appeal submission is a method of submitting Texas Medicaid appeals using a personal computer (PC). The electronic appeals feature can be accessed directly through the TMHP EDI Gateway or by using TexMedConnect. For additional information, contact the TMHP EDI Help Desk at 1-888-863-3638.

Electronic appeals can increase accuracy of claims processing, resulting in a more efficient case flow to the provider:

- Download and printout capabilities help maintain audit trails for the provider.
- Appeal submission windows can be automatically filled in with electronic R&S Report information, thereby reducing data entry time.

### 4.5.6 Frequently Asked Questions About Dental Claims

**Q** Why is routine dental treatment not a benefit when performed at the same visit as an emergency visit?

**A** The following are reasons routine dental treatment is not a benefit when performed at the same visit as an emergency visit:

- The purpose of an emergency claim is to allow the provider to treat a true emergency without the concern that routine dental procedures may be denied.
- Medicaid program policy guidelines do not allow payment for both emergency and routine services to the same provider at the same visit. True emergency claims process through the audit system correctly when “emergency” is checked on either the paper or electronic claim and the Remarks or Narrative section of the claim form describes the nature of the emergency.

**Q** Why are some claims for oral exams and emergency exams on the same date for the same client denied?

**A** Medicaid program policy does not allow claims for an initial oral exam and an emergency exam to be submitted for the same DOS for the same client. An emergency exam performed by the same provider in the same six-month time period as an initial exam may be considered for reimbursement only when the claim for the emergency exam indicates it is an emergency and the emergency block is marked and the Remarks or Narrative section of the claim form describes the nature of the emergency. If the claim is not marked as an emergency, the claim will be denied.

**Q** How are orthodontic bracket replacements reimbursed? Can the client be charged for bracket replacements?

**A** The provider must use orthodontic procedure code D8690 to claim reimbursement for bracket replacement. Medical necessity must be documented in the client record. Payment is subject to retrospective review. The client with current Medicaid eligibility must not be charged for bracket replacement. If the provider charges the client erroneously, the provider must refund any amount paid by the client.

**Q** Why could an appeal of a denied claim take a long time?

**A** An appeal can take a long time if TMHP is required to research the denied claim and determine the reason the claim did not go through the system. For faster results, providers should submit appeals as soon as possible and not use the entire 120 days allowed to submit the appeal. The following are guidelines on filing claims efficiently:

- Use R&S Report dates to track filed claims.
- File claims electronically through TMHP EDI. Electronic claims submission does not allow a claim with an incorrect date to be accepted and processed, which saves time for the provider submitting claims and TMHP in processing claims. Call 1-888-863-3638, for more information about TMHP EDI.
• File claims with the correct information included. Most denied claims result from the omission of dates, signature, or narrative, or incorrect ID numbers such as client Medicaid numbers or provider identifiers.

Q Why are only ten appeals allowed per call?
A There is a limit on appeals per call to allow all providers equal access.

Q Why do reimbursement checks sometimes take a long time to arrive?
A Reimbursement may be delayed if a provider fails to submit claims in a timely manner.

Q Does electronic claims submission result in delayed payment?
A No. Providers who submit claims electronically report faster results than when submitting claims on paper. Providers are encouraged to use TMHP EDI for claims submission.

The following are helpful hints to a more efficiently processed claim:

• Ensure the provider identifier is on all claims.
• Include the performing provider’s signature on all paper claims.
• Verify client eligibility for procedures.
• Verify if the procedure code requires a narrative on the claim; the narrative is for medical necessity.
• Include the required client information, including name, birth date, and client number.
• Dental auxiliary staff (i.e., the hygienist or the chairside assistant) cannot enroll in Texas Medicaid; therefore, they cannot submit claims to Texas Medicaid. Any procedure performed by the auxiliary must be submitted by the supervising dentist, using the dentist’s provider identifier.

Claim Submission Reminders:

• Procedure code D8660 is allowed at different age levels, per provider. If a claim for procedure code D8660 is submitted within six months of procedure code D8080, procedure code D8080 will be reduced by the amount that was paid for procedure code D8660.
• Prior authorization is required with documentation of medical necessity when replacing lost or broken orthodontic retainers (procedure code D8680). Clients may not be billed for covered services.
• Prior authorization of orthodontic services is nontransferable. If a client changes an orthodontic provider for any reason, or a provider ceases to be a Medicaid provider, the new orthodontic services provider must submit a separate request for prior authorization. The provider requesting and receiving authorization for the service also must perform the service and submit the claim. Codes listed on the authorization letters are the only codes considered for payment. All other codes submitted for payment are denied. Providing the authorization number on the submitted claim results in more efficient claims processing.
• General anesthesia (provided in the dentist office, ambulatory service clinic, and inpatient/outpatient hospital settings) does not require prior authorization, unless the client does not meet the minimum required points for general anesthesia in subsection 4.2.22.1, “Criteria for Dental Therapy Under General Anesthesia” in this handbook. All THSteps dental charts for dental general anesthesia are subject to retrospective, random review for compliance with the Criteria for Dental Therapy Under General Anesthesia and requirements for chart documentation.
• Providers must not bill a client unless a formal denial for the requested item/service has been issued by TMHP stating the service is not a benefit of Texas Medicaid and the client has signed the Client Acknowledgment Statement in advance of the service being provided for that specific item or service. A provider must not bill Medicaid clients if the provided service is a benefit of Texas Medicaid.
Refer to: Subsection 1.4.9.1, “Client Acknowledgment Statement” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).

THSteps clients must receive:

- Dental services specified in the treatment plan that meet the standards of care established by the laws relating to the practice of dentistry and the rules and regulations of the TSBDE.
- Dental services free from abuse or harm from the provider or the provider’s staff.
- Only the treatment required to address documented medical necessity that meets professionally recognized standards of health care.

5. THSTEPS MEDICAL

5.1 THSteps Medical and Dental Administrative Information

5.1.1 Overview

This section describes the administrative requirements for THSteps, including provider requirements, client eligibility requirements, and billing and claims processing information. Providers needing additional information may call 1-800-757-5691 or refer to Appendix F: THSteps Quick Reference Guide in this handbook for a more specific list of resources and telephone numbers. Providers may also contact the Texas Department of State Health Services (DSHS) THSteps Provider Relations staff located in DSHS regional offices by calling the appropriate regional office as listed in subsection A.6, “DSHS Health Service Region Contacts” in Appendix A, “State and Federal Offices Communication Guide” (Vol. 1, General Information).

In addition, THSteps has developed online educational modules to provide additional information about the program, components of the medical checkup, and other information. These modules provide free continuing education hours for a variety of providers. Providers do not have to be enrolled in THSteps. These courses may be accessed at www.txhealthsteps.com.

The Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) service is Medicaid’s comprehensive preventive child health service for clients who are birth through 20 years of age. In Texas, EPSDT is known as THSteps. EPSDT was defined by federal law as part of the Omnibus Budget Reconciliation Act (OBRA) of 1989 legislation and includes periodic screening, vision, hearing, and dental preventive and treatment services. The periodic screening for a checkup consists of the federally required components as notated on the THSteps Periodicity Schedule. In addition, Section 1905(r)(5) of the Social Security Act (SSA) requires that any medically necessary health-care service listed in the Act be provided to THSteps clients even if the service is not available under the state’s Medicaid plan to the rest of the Medicaid population. A service is medically necessary when it corrects or ameliorates the client’s disability, physical or mental illness, or chronic condition. These additional services are available through the Comprehensive Care Program (CCP). CCP services are the diagnosis and treatment components of THSteps. For questions about coverage, providers can call CCP at 1-800-846-7470.

5.1.2 Statutory Requirements

Several specific legislative requirements affect THSteps and the providers participating in the program. These include, but are not limited to, the following:

- Newborn Screening, Health and Safety Code, Chapter 37.
- Requirements for Reporting Abuse or Neglect, as outlined in subsection 1.4.1, “Compliance with Texas Family Code” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).
• Early Childhood Intervention (ECI), 34 Code of Federal Regulations (CFR) Part 303; Chapter 73, Texas Human Resources Code, and Title 40 Texas Administrative Code (TAC), Chapter 108.

• Newborn Hearing Screening, Health and Safety Code, Chapter 47.

• Teen Confidentiality Issues. There are many state statutes that may affect consent to medical care for a minor, depending on the facts of the situation. Among the relevant statutes are Chapters 32, 33, 153, and 266 of the Texas Family Code. Providers may want to consult an attorney, their licensing board, or professional organization if guidance is needed or questions arise on matters of medical consent.

Refer to: Appendix D: Texas Health Steps Statutory State Requirements of this handbook for more information.

5.1.3 Texas Vaccines for Children (TVFC) Program

For Medicaid clients who are birth through 18 years of age, vaccines must be obtained from the Texas Vaccines for Children (TVFC) Program. The TVFC program provides free vaccines that are recommended according to the Recommended Childhood and Adolescent Immunization Schedule (Advisory Committee on Immunization Practices [ACIP], American Academy of Pediatrics [AAP], and the American Academy of Family Physicians [AAFP]). Medicaid does not reimburse for vaccines/toxoids that are available from TVFC. To obtain free vaccines for clients who are birth through 18 years of age, THSteps providers must enroll in TVFC at DSHS. Providers may not charge Texas Medicaid for the cost of the vaccines obtained from TVFC; however the administration fee, not to exceed $14.85, is considered for reimbursement.

When single antigen vaccine(s)/toxoid(s) or comparable antigen vaccine(s)/toxoid(s) are available for distribution through TVFC, but the provider chooses to use an ACIP-recommended product that is not distributed through TVFC, the vaccine/toxoid will not be covered; however, the administration fee will be considered.

Note: Administered vaccines/toxoids must be reported to DSHS with parental consent. DSHS submits all vaccines/toxoids reported with parental consent to a centralized repository of immunization histories for clients younger than 18 years of age. This repository is known in Texas as ImmTrac.

For additional information about immunizations, providers can refer to the THSteps online educational module “Immunization” at www.txhealthsteps.com.

Refer to: Appendix B: Immunizations in this handbook.

Form CH.65, “TVFC Provider Enrollment (3 Pages)” in Appendix A, “THSteps Forms,” of this handbook for more information about enrolling as a TVFC provider.

5.1.4 Vaccine Adverse Event Reporting System (VAERS)

The National Childhood Vaccine Injury Act (NCVIA) requires health-care providers to report:

• Any reaction listed by the vaccine manufacturer as a contraindication to subsequent doses of the vaccine.

• Any reaction listed in the Reportable Events Table that occurs within the specified time period after vaccination.

The National Childhood Vaccine Injury Act of 1986 requires health care providers to report certain adverse events that occur following vaccination. As a result, the Vaccine Adverse Event Reporting System was established by CDC and FDA in 1990. VAERS provides a mechanism for the collection and analysis of adverse events (side effects) associated with vaccines currently licensed in the United States. Adverse events are defined as health effects that occur after immunization that may or may not be related to the vaccine. VAERS data are monitored continually to detect unknown adverse events or increases in known side effects.
A copy of the Reportable Events Table can be obtained by calling VAERS at 1-800-822-7967 or by downloading it from www.dshs.state.tx.us/immunize/forms/vaers_table.pdf.

Clinically significant adverse events should be reported even if it is unclear whether a vaccine caused the event. For additional information about NCVIA, providers can refer to www.dshs.state.tx.us/immunize/forms/11-11246.

5.1.5 Referrals for Medicaid-Covered Services

When a provider performing a checkup determines that a referral for diagnosis or treatment is necessary for a condition found during the medical checkup, that information must be discussed with the parents/guardians. A referral must be made to a provider who is qualified to perform the necessary diagnosis or treatment services. If the performing provider is competent to treat the condition found, a referral elsewhere is not necessary, unless it is to the primary care provider to assure continuity of care. Medicaid managed care clients must be referred to their designated primary care provider for further treatment or referral.

Providers that need assistance finding a specialist who accepts clients with Medicaid coverage can call the THSteps Hotline at 1-877-847-8377, or they can find one using the Online Provider Lookup on the TMHP website at www.tmhp.com.

Continuity of care is an important aspect of providing services and follow-up. Efforts should be made to determine that the appointment was kept and that the provider who received the referral has provided a diagnosis and recommendations for further care to the referring provider.

In addition to referrals for conditions discovered during a checkup or for specialized care, the following referrals may be used:

- **Case Management for Children and Pregnant Women (CPW).** CPW provides health-related case management services to eligible children and pregnant women. CPW services include assessing the needs of eligible clients, formulating a service plan, making referrals, problem-solving, advocacy, and follow-up regarding family and client needs. For more information about eligibility and client referral, see subsection 3.1.1, “Eligibility” or 3.1.2, “Referral Process” in Behavioral Health, Rehabilitation, and Case Management Services Handbook (Vol. 2, Provider Handbooks).

- **Hearing Services referrals.** If the hearing screening returns abnormal results, the client must be referred to a Texas Medicaid provider who is a licensed audiologist or physician who provides audiology services. Clients who are birth through 20 years of age must be referred to a Texas Medicaid provider who is an audiologist or physician who is experienced with the pediatric population and who offers auditory services.

- **Routine Dental Referrals.** Routine dental referrals are required at 3-month intervals for all clients who are 6 through 35 months of age, based on their caries risk assessment. Routine dental referrals are then performed at 6-month intervals for clients who are 36 months of age through 20 years of age (see subsection 5.1.7, “THSteps Dental Services” in this handbook). When possible, clients should be referred to provider who has completed the required benefit education and is certified by the DSHS Oral Health Program to perform First Dental Home services. Clients who are birth through 5 months of age are not eligible for routine dental examinations.

- **Referrals for Dental Treatment.** If a THSteps medical provider identifies the medical necessity of dental services, the provider must refer the client to a THSteps dental provider. The THSteps medical provider can accomplish this by providing the parent/guardian a listing of THSteps dentists from the Online Provider Lookup. The parent/guardian can receive assistance in locating a THSteps dentist and assistance with scheduling of dental appointments by contacting the THSteps toll-free helpline at 1-877-847-8377. Clients who are birth through 5 months of age also can be seen for emergency dental services by the dentist at any time for trauma, early childhood caries or other oral health problems. Clients who are birth through 20 years of age may self-refer for dental care.
• **Emergency Dental Referrals.** If a medical checkup provider identifies an emergency need for dental services, such as bleeding, infection, or excessive pain, the client may be referred directly to a participating dental provider. Emergency dental services are covered at any time for all Medicaid clients who are birth through 20 years of age.

**Note:** Assistance in coordinating dental referrals can be obtained from the THSteps Hotline at 1-877-847-8377 or the DSHS Regional THSteps Coordinator for the respective region (lists are provided in subsection A.6, “DSHS Health Service Region Contacts” in Appendix A, “State and Federal Offices Communication Guide” (Vol. 1, General Information)). In cases of both emergency and nonemergency dental services, clients have freedom of choice in selecting a dental provider who is participating in the THSteps Dental Program.

• **Family Planning and Genetic Services Referrals.** For people eligible for Medicaid needing genetic services or family planning services, a referral should be made. Information about Medicaid-covered genetic services is available in Section 5, “Geneticists” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (Vol. 2, Provider Handbooks) and information about family planning services is available in Section 2, “Medicaid Title XIX family planning services” in *Gynecological and Reproductive Health and Family Planning Services Handbook* (Vol. 2, Provider Handbooks). If a THSteps medical provider also provides family planning, the provider may inform clients that these services are available.

• **Early Childhood Intervention (ECI) Referrals.** Federal and state law requires providers to refer children within two business days of identification of a suspected developmental delay or disability to the local ECI program for children who are birth through 35 months of age regardless if a referral was made to another qualified provider. The provider may call the local ECI Program or the DARS Inquiries Line at 1-800-628-5115 to make referrals. Children who are 3 years of age and older with a suspected developmental delay or disability should be referred to the local school district.

• **Women, Infants, and Children (WIC) Referrals.** Clients who are birth through 5 years of age or who are pregnant are eligible for WIC and should be referred to WIC.

**Refer to:** Subsection 8.1, “Medicaid Managed Care” in Section 8, “Managed Care” (Vol. 1, General Information) for more information about referrals for providers in areas of the state covered by Medicaid Managed Care.

### 5.1.6 THSteps Medical Checkup Facilities

All THSteps medical checkup policies apply to checkups completed in a physician’s office, a health department, clinic setting, or in a mobile/satellite unit. Enrollment of a mobile/satellite unit must be under a physician or clinic name. Mobile units can be a van or any area away from the primary office and are considered extensions of that office and are not separate entities.

The physical setting must be appropriate so that all elements of the checkup can be completed. For specific information, review the policy narrative included in this manual and the periodicity schedules.

### 5.1.7 THSteps Dental Services

Access to THSteps dental services is mandated by Texas Medicaid and provides reimbursement for the early detection and treatment of dental health problems, including oral health preventive services, for Medicaid clients who are from birth through 20 years of age. THSteps dental service standards are designed to meet federal regulations and to incorporate the recommendations of representatives of national and state dental professional groups.

OBRA of 1989 mandated the expansion of the federal EPSDT program to include any service that is medically necessary and for which federal financial participation (FFP) is available, regardless of the limitations of Texas Medicaid. This expansion is referred to as CCP.

**Refer to:** Section 2, “Medicaid Children’s Services Comprehensive Care Program (CCP)” in this handbook for more information.
5.1.7.1 How the THSteps Dental Program Works

THSteps-designated staff (HHSC, DSHS, or its designee), through outreach and education, encourage the parents or caregivers of eligible clients to use THSteps dental checkups and preventive care when clients first become eligible for Medicaid and each time clients are due for their next periodic dental checkup.

Upon request, THSteps-designated staff (HHSC, DSHS, or its designee) assist the parents or caregivers of eligible clients with scheduling appointments and transportation. Medicaid clients have freedom of choice of providers and are given names of enrolled providers. Call the THSteps Hotline at 1-877-847-8377 for a list of THSteps dental providers in a specific area.

When a client is due for a THSteps periodic dental checkup, a message is present on the Medicaid Identification Form (H3087 or H3087 STAR) under the client’s name to remind the parent or guardian. If the client or caregiver believes the client is due for a dental checkup and a message is not present, the provider may contact TMHP through the TMHP website at www.tmhp.com or AIS at 1-800-925-9126 to verify that the client is due for a dental checkup.

Clients may be referred to a dental home provider beginning at 6 months of age to establish a dental home. Clients who are from 6 through 35 months of age may be seen at 3-month intervals based on their caries risk assessment and at 6-month intervals thereafter through 20 years of age. Clients may be referred to a dental provider beginning at 6 months of age or at any age if the medical checkup identifies medical necessity.

All THSteps clients who are birth through 20 years of age can be seen by the dentist at any time for emergency dental services for trauma, early childhood caries (ECCs), or any other appropriate dental or therapeutic procedure.

Clients who are birth through 20 years of age may self-refer for dental services.

Note: Clients enrolled in Medicaid Managed Care are required to choose a medical provider in their health plan’s network. The health plan does not reimburse for services rendered by nonparticipating providers. Please contact the specific health plan for enrollment information.

For additional information about dental health, providers can refer to the THSteps online educational modules “Dental Health For Primary Care Providers” and “Dental Screening by Dental Professionals” at www.txhealthsteps.com.

5.2 Enrollment

5.2.1 THSteps Medical Provider Enrollment

To provide THSteps medical checkups, providers must be enrolled in Texas Medicaid and must be one of the following:

- A physician (doctor of medicine [M.D.] and doctor of osteopathy [D.O.]) who is currently licensed in the state where the service is provided
- A rural health clinic (RHCs) or federally qualified health center (FQHC)
- A health-care provider or facility (public or private) that is capable of performing the required medical checkup procedures under a physician’s direction, such as a regional or local health department, family planning clinic, migrant health clinic, community-based hospital or clinic, maternity clinic, home health agency, or school district. In the case of a clinic, a physician is not required to be present in the clinic at all times during the hours of operation; however, a physician must assume responsibility for the clinic’s operation.
- An APRN who is recognized by the Texas BON and nationally certified to perform in at least one of the following areas of practice:
  - Pediatrics
• Family practice
• Adult health (adolescents only)
• Women’s health (adolescent females only)
• Certified nurse midwife (newborns and adolescent females only)

• Physician assistants (PAs)—It is recommended that PAs have expertise or additional education in the areas of comprehensive pediatric assessment.

Residents may provide medical checkups in a teaching facility under the personal guidance of the attending staff as long as the facility’s medical staff by-laws and requirements of the Graduate Medical Education (GME) Program are met, and the attending physician has determined the intern or resident to be competent in performing these functions. THSteps does not require the supervising physician to examine the client as long as these conditions are met.

An RN without an advance practice certification may not enroll independently, but may perform THSteps medical checkups only under the supervision of a physician. The physician ensures that the RN has appropriate training and adequate skills for performing the procedures for which they are responsible.

Providers cannot be enrolled if their professional license is due to expire within 30 days of application. Facility providers must submit a current copy of the supervising practitioner’s license. To provide Medicaid services, each nurse practitioner (NP) must be licensed as a registered nurse (RN) and recognized as an advanced practice registered nurse (APRN) by the Texas Board of Nursing (BON).

Refer to: Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for information about enrollment procedures.

5.2.1.1 Additional Education Requirements for Registered Nurses (RNs)

The educational requirements have changed for RNs who complete the physical assessment portion of the THSteps medical checkup.

THSteps has developed online education modules that contain new courses approved for continuing education units (CEU) for RNs and must be completed prior to providing checkups. THSteps online education modules may be accessed at www.txhealthsteps.com.

Before a physician delegates a THSteps checkup to an RN, the physician must establish the RN’s competency to perform the service as required by the physician’s scope of practice. The delegating physician is responsible for supervising the RN who performs the services. The delegating physician remains responsible for any service provided to a client.

The RN or the employer must maintain documentation that the available required courses were completed, including the following:

• Texas Health Steps: Overview
• Adolescent health screening
• Case management services in Texas
• Cultural competence
• Oral health for primary care providers
• Developmental screening
• Immunization
• Introduction to the medical home
• Mental health screening
- Newborn hearing screening
- Newborn screening
- Nutrition
- Hearing and vision screening
- Management of Overweight and Obesity in Children

RNs who have completed the previously required courses are encouraged, but not required, to take the online courses.

Refer to: Subsection 5.2.1, “THSteps Medical Provider Enrollment” in this handbook for more information about enrollment procedures.

5.2.1.2 Medicaid Managed Care Enrollment

The Medicaid Managed Care program consists of two types of health-care delivery systems: Primary Care Case Management (PCCM) and health maintenance organizations (HMOs).

Clients enrolled in PCCM receive both THSteps medical and dental checkup services. PCCM clients may call 1-877-847-8377 to seek assistance in finding a THSteps provider. THSteps medical providers do not have to enroll with PCCM to be reimbursed for THSteps medical checkup services provided to PCCM clients, although coordination with the client’s primary care provider is required.

Medicaid HMOs in the STAR and STAR+PLUS programs provide medical checkup services to their members. The Medicaid HMO in the STAR Health program provides both medical and dental checkups to its members. Medicaid HMO clients should check with their HMO to see whether they must select a provider in the network for THSteps checkups prior to receiving the services. Medicaid HMO providers must meet contractual obligations established by their respective HMOs with regards to providing medical checkups to THSteps clients. Medicaid HMO providers are reimbursed for THSteps medical checkup services through their HMO.

THSteps providers should encourage clients to see their primary care provider as their medical home. If the client’s primary care provider is not a THSteps medical provider, the checkup provider must send the primary care provider the records from all THSteps medical checkups performed for the client.

All primary care providers are encouraged to enroll as THSteps medical providers. This allows the client to receive both acute care services and preventive THSteps services from the same provider.

Refer to: Section 8: Managed Care (Vol. 1, General Information).

5.3 Services/Benefits, Limitations, and Prior Authorization

5.3.1 THSteps Medical Checkups

THSteps medical checkups reflect the federal and state requirements for a preventative checkup. Preventive care medical checkups are a benefit of the THSteps program if they are provided by enrolled THSteps providers and all of the required components are completed. An incomplete periodic medical checkup is not a benefit. The THSteps periodicity schedule specifies screening procedures required at each stage of the client’s life to ensure that health screenings occur at age-appropriate points in a client’s life.

To receive services, the client must be eligible to receive Medicaid services and must be birth through 20 years of age at the time services are delivered. When a client turns 21 years of age after the first of a month, the client remains eligible for a checkup through the end of that month.
Components of a medical checkup that have an available CPT code are not reimbursed separately on the same day as a medical checkup, with the exception of developmental and autism screening.

**Reminder:** Incomplete medical checkups are subject to recoupment unless there is documentation supporting why a component was not completed.

Sports physical examinations are not a benefit of Texas Medicaid. If the client is due for a THSteps medical checkup and a comprehensive medical checkup is completed, a THSteps medical checkup may be reimbursed and the provider may complete the documentation for the sports physical.

**Refer to:** Subsection 5.3.1.9, “THSteps Medical Checkups Periodicity Schedule” in this handbook for information about the components required at specific ages.

Checkups should be scheduled, to the extent possible, based on the ages on the periodicity schedule to accommodate the need for flexibility when scheduling checkup appointments. A periodic age range is available with 11 billable visits possible in the first two years of the client’s life.

The following table lists the number of visits allowed at each age range:

<table>
<thead>
<tr>
<th>Age Range</th>
<th>Number of Visits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Birth through 11 months (does not include 12 month checkup)</td>
<td>7</td>
</tr>
<tr>
<td>1 through 4 years</td>
<td>7</td>
</tr>
<tr>
<td>5 through 11 years</td>
<td>7</td>
</tr>
<tr>
<td>12 through 17 years</td>
<td>6</td>
</tr>
<tr>
<td>18 through 20 years</td>
<td>3</td>
</tr>
</tbody>
</table>

All of the checkups listed on the periodicity schedule were developed according to the recommendations of the AAP and in consultation with recognized authorities in pediatric preventive health. In Texas, THSteps has modified the AAP periodicity schedule based on the scheduling of laboratory or other tests in federal EPSDT or state regulations.

If the provider that performs the medical checkup provides treatment for an identified condition on the same day, the provider may submit a separate claim for an acute care established-client office visit. The separate claim must include the established-client procedure code that is appropriate for the diagnosis and treatment of the identified problem. Treatment of minor illnesses or conditions (e.g., follow-up of a mild upper respiratory infection) during the THSteps medical checkup may not warrant additional billing.

Medicaid managed care (including PCCM) clients must be referred to their designated primary care provider for further treatment or referral if they are receiving a THSteps checkup outside the medical home.

For more information about conducting a THSteps checkup, providers can refer to the THSteps online educational modules at www.txhealthsteps.com.

### 5.3.1.1 Medical Home Concept

Texas Medicaid defines a medical home as a model of delivering care that is accessible, continuous, comprehensive, family-centered, and coordinated. HHSC and DSHS encourage the provision of the THSteps medical checkup as part of a medical home.

For additional information on the medical home, providers can refer to the “Medical Home” module provided by THSteps at www.txhealthsteps.com.
5.3.1.2 Mobile Units and the Medical Home

Medical checkup providers with mobile units should encourage the families to establish a medical home for their child(ren) and obtain future checkups from their primary care provider. If the mobile unit is not the primary care provider, the mobile unit must also send the primary care provider the records from the medical checkup.

5.3.1.3 Eligibility for a Medical Checkup

Through outreach, THSteps staff (DSHS, HHSC, or contractors) encourage clients to use THSteps preventive medical checkup services when they first become eligible for Medicaid and each time thereafter when they are periodically due for their next medical checkup.

Providers are encouraged to perform checkups on any client they identify as due for medical checkups. They also are encouraged to notify clients when they are due for the next checkup according to the THSteps periodicity schedule.

A THSteps statement under the client’s name on the regular client Medicaid Identification (Form H3087) and the STAR Identification (Form H3087 STAR) indicates the THSteps services for which the client is currently eligible. A check mark on the identification form indicates eligibility for the particular service, such as eye exam, eye glasses, hearing aid, dental, prescriptions, and medical services. A blank space denotes that the client is not eligible for the particular service based on available data.

A client is due for a medical checkup as determined by the client’s age on the first day of the month. If a client’s birthday is not on the first of a month, the client will not be due until the first day of the following month. If a client turns 21 years of age during a month, the client continues to be eligible for THSteps services through the end of that month.

Checkups that are necessary when a THSteps statement does not indicate a medical checkup is due must be billed as an exception to the periodicity checkup.

Refer to: Subsection 5.3.1.6, “Exception-to-Periodicity Checkups” in this handbook for additional details about billing for a checkup performed as an exception-to-periodicity checkup.

Although the Medicaid Eligibility Verification Letter (Form H1027) identifies eligible clients when the client Form H3087 is lost or has not yet been issued, Form H1027 does not indicate if the client is due for medical checkup services. Providers can call the TMHP Contact Center at 1-800-925-9126 or check the TMHP website at www.tmhp.com to verify a client’s eligibility for Medicaid and if due for medical checkup services.

5.3.1.4 Verification of Medical Checkups

The first source of verification that a THSteps medical checkup has occurred is a paid claim or encounter. THSteps encourages providers to file a claim either electronically or on a CMS-1500 paper-claim form as soon as possible after the date of service (DOS), as the paid claim updates client information, including the Medicaid Identification (Form H0387).

A second source of acceptable verification is a physician’s written statement that the checkup occurred. If the provider chooses to give the client written verification, it must include the client’s name, Medicaid ID number, date of the medical checkup, and a notation that a complete THSteps medical checkup was performed.

Note: Verification of medical checkups must not be sent to THSteps but must be maintained by the client to be provided as needed by an HHSC eligibility caseworker.

If neither the first nor the secondary source of verification is available, a THSteps outreach worker may contact the provider’s office for verification.
5.3.1.5 Medical Checkups for Infants, Children, and Adolescents (Birth Through 20 Years of Age)

The following information gives descriptions and requirements for each pediatric assessment and test that must be performed during a THSteps medical checkup in accordance with the federal requirements as represented on the periodicity schedule. The checkup includes face-to-face contact with the client’s parents or guardians.

Refer to: Subsection 5.3.1.9, “THSteps Medical Checkups Periodicity Schedule” in this handbook.

The expected required components of a medical checkup must be age-appropriate and include the following:

- Comprehensive health and developmental history including:
  - Nutrition screening
  - Developmental screening
  - Mental health
  - Tuberculosis screening
- Comprehensive unclothed physical examination, including graphic recording of measurements including:
  - Height/length and weight
  - Body mass index (BMI) calculated beginning at 2 years of age
  - Fronto-occipital circumference through the first 24 months of age
  - Blood pressure beginning at 3 years of age
- Sensory screening
  - Vision screening
  - Hearing screening
- Immunizations
  - Status
  - Administration, as necessary
- Laboratory testing
  - Anemia screening
  - Blood lead screening
  - Age-appropriate laboratory testing
  - Risk-based laboratory testing
- Dental referral
- Health Education including anticipatory guidance

Note: Growth charts may be found at www.cdc.gov/growthcharts/who_charts.htm.

Centers for Disease Control and Prevention (CDC) recommends that health-care providers use the World Health Organization (WHO) growth standards to monitor growth for infants and children who are birth through 2 years of age in the U.S. and use the CDC growth charts to monitor growth for children who are 2 years of age and older in the U.S.
The following table includes the procedure codes for checkups and the referral and condition indicators. Condition indicators must be used to describe the results of a checkup. A condition indicator must be submitted on the claim with the periodic medical checkup visit procedure code. Indicators are required whether a referral was made or not. If a referral is made, then providers must use the Y referral indicator. If no referral is made, then providers must use the N referral indicator.

A checkup must be submitted with diagnosis code V202.

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>Referral Indicator</th>
<th>Condition Indicator</th>
</tr>
</thead>
<tbody>
<tr>
<td>99381, 99382, 99383, 99384, and 99385 (new client preventive visit) or 99391, 99392, 99393, 99394, and 99395 (established client preventive visit)</td>
<td>N (no referral given)</td>
<td>NU (not used)</td>
</tr>
<tr>
<td>99381, 99382, 99383, 99384, and 99385 (new client preventive visit) or 99391, 99392, 99393, 99394, and 99395 (established client preventive visit)</td>
<td>Y (yes THSteps or EPSDT referral was given to the client)</td>
<td>S2 (under treatment) or ST* (new services requested)</td>
</tr>
</tbody>
</table>

*The ST condition indicator should only be used when a referral is made to another provider or the client must be rescheduled for another appointment with the same provider. It does not include treatment initiated at the time of the checkup.

When performed for a THSteps preventive care medical checkup, procedure codes 99385 and 99395 are restricted to clients who are 18 through 20 years of age.

Modifier AM, SA, TD, or U7 must be submitted with the THSteps medical checkups procedure code to indicate the practitioner who performed the unclothed physical examination during the medical checkup.

<table>

</tbody>
</table>

THSteps medical checkups performed in an FQHC or RHC setting are paid an all-inclusive rate per encounter including any immunizations or developmental screening procedures. When submitting claims for THSteps checkups and services, RHC providers must use the national place-of-service (POS) code 72, and FQHC providers must use modifier EP in addition to the modifiers used to identify who performed the medical checkup. In accordance with the federal rules for RHCs and FQHCs, an RN in an RHC or FQHC may not perform THSteps checkups independently of a physician's interactions with the client.

**Refer to:** Section 5, “Federally Qualified Health Center (FQHC)” in *Outpatient Services Handbook (Vol. 2, Provider Handbooks)* for information related to billing.

Section 8, “Rural Health Clinic” in *Outpatient Services Handbook (Vol. 2, Provider Handbooks)* for information related to billing.

Checkups, exception-to-periodicity checkups, and follow-up visits are limited to once per day any provider.
A checkup and the associated follow-up visit may not be reimbursed on the same date of service. The follow-up visit will be denied.

An incomplete checkup is subject to recoupment unless there is documentation to support why the component was not completed as part of the checkup.

A new patient is one who has not received any professional services within the preceding three years from the provider or from another provider of the same specialty who belongs to the same group practice. As an exception, a new preventive care medical checkup (procedure code 99381, 99382, 99383, 99384, or 99385) may be billed when no prior checkups have been billed by the same provider or provider group, even if an acute care new patient E/M service was previously performed by the same provider.

An additional new checkup is allowed only when the client has not received any professional services in the preceding three years from the same provider or another provider who belongs to the same group practice, because subsequent acute care visits to the new patient THSteps checkup continues the established relationship with the provider.

### 5.3.1.5.1 Acute Care Visits

If a new patient checkup has been billed within the preceding three years, subsequent checkups and acute care visits billed as new patient services will be denied when billed by the same provider or provider group.

For a client that is a new patient, an acute care visit and checkup visit may be reimbursed on the same date of service by the same provider or provider group. The checkup visit must be billed as a new patient checkup and the acute care visit as an established visit.

Providers must use modifier 25 to describe circumstances in which an acute care E/M visit was provided at the same time as a checkup. Providers must submit modifier 25 with the E/M procedure code when the rendered services are distinct and provided for a different diagnosis. Providers must bill an appropriate level E/M procedure code with the diagnosis that supports the acute care visit. The medical record must contain documentation that supports the medical necessity and the level of service of the E/M procedure code that is submitted for reimbursement.

An acute care E/M visit for an insignificant or trivial problem or abnormality billed on the same date of service as a checkup or exception-to-periodicity checkup is subject to recoupment.

### 5.3.1.6 Exception-to-Periodicity Checkups

Exception-to-periodicity checkups are complete medical checkups completed outside the timeframes listed in the THSteps Periodicity Schedule due to extenuating circumstances. A THSteps medical checkup is allowed outside of the regular THSteps Periodicity Schedule (exception to periodicity) when:

- Medically necessary, for example, for a client with developmental delay, suspected abuse, or other medical concerns or a client in a high-risk environment, such as living with a sibling with elevated blood lead.
- Required to meet state or federal exam requirements for Head Start, day care, foster care, or preadoption.
- When needed before a dental procedure requiring general anesthesia.
- The provider is aware that the client is not due for a checkup, the visit must be submitted as an exception to periodicity.

**Note:** A sports physical is not a reason for an exception-to-periodicity checkup.
When billing for an exception-to-periodicity visit, provider must also include the most appropriate exception-to-periodicity modifiers. Claims for periodic THSteps medical checkups exceeding periodicity that do not include one for these modifiers will be denied as exceeding periodicity.

<table>
<thead>
<tr>
<th>Modifier</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>SC</td>
<td>Medically necessary service or supply</td>
</tr>
<tr>
<td>23</td>
<td>Unusual Anesthesia: Occasionally, a procedure that usually requires either no anesthesia or local anesthesia must be done under general anesthesia because of unusual circumstances. This circumstance may be reported by adding the modifier “-23” to the procedure code of the basic service or by use of the separate 5-digit modifier code 09923.</td>
</tr>
<tr>
<td>32</td>
<td>Mandated Services: Services related to mandated consultation or related services (e.g., PRO, third party payer, governmental, legislative, or regulatory requirement) may be identified by adding the modifier “-32” to the basic procedure or the service may be reported by use of the 5-digit modifier code 09932.</td>
</tr>
</tbody>
</table>

Refer to: Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (Vol. 1, General Information) for billing instructions.

THSteps medical exception-to-periodicity services must be billed with the same procedure codes, provider type, modifier, and condition indicators as a medical checkup. Additionally, providers must use modifiers 23, 32, and SC to indicate the exception.

5.3.1.7 Follow-up Medical Checkup

Use procedure code 99211 with the THSteps provider identifier and THSteps benefit code when billing for a follow-up visit.

A follow-up visit may be required to complete necessary procedures related to a THSteps medical checkup or exception-to-periodicity checkup, such as:

- Reading the tuberculosis (TB) skin test.
- Transportation and outreach work required by the provider for verification of a presumptive TB skin test.
- Administering immunizations in cases where the client’s immunizations were not up-to-date or medically contraindicated on the initial visit.
- Collection of specimens for laboratory testing that were not obtained during the original THSteps medical checkup or the original specimen could not be processed.
- Completing sensory or developmental screening that was not completed at the time of the THSteps medical checkup due to the client’s condition.

Note: If the parent/guardian did not give consent for a component, then no follow-up visit is necessary.

A return visit to follow up on treatment initiated during a checkup or to make a referral is not a follow-up visit but is considered an acute care visit under an appropriate E/M procedure code for an established client.

5.3.1.8 Newborn Examination

Providers do not have to be enrolled as THSteps providers to bill newborn examination procedure codes 99460, 99461, and 99463.

Newborn examinations that are billed with procedure code 99460, 99461, or 99463 may qualify as a THSteps medical checkup when all required components are completed according to the THSteps Periodicity Schedule and documented in the medical record.
If a brief newborn examination is performed that does not fulfill THSteps medical checkup criteria, providers may bill procedure code 99460, 99461, or 99463 with modifier 52, which does not count as a THSteps medical checkup.

Providers must use their Medicaid provider identifier when billing newborn examination services.

**Note:** In Texas, the mandated newborn hearing screening and newborn screening test is included as part of the in-hospital newborn exam.

Providers billing these newborn codes are not required to be THSteps providers, but they must be enrolled as Medicaid providers. TMHP encourages THSteps enrollment for all providers that offer a medical home for clients and provide them with medical checkups and immunizations. Physicians and hospital staff are encouraged to inform parents eligible for Medicaid that the next THSteps checkup on the periodicity schedule should be scheduled at 3 to 5 days of age and that regular checkups should be scheduled during the first year and after.

A newborn examination provided in the home must be delegated by the discharging or medical home clinician by prescription before discharge and the provider completing the medical examination must provide a timely report of findings and recommendations to the infant’s medical home.

**Refer to:** Subsection 8.2.43, “Newborn Services” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (Vol. 2, Provider Handbooks) for additional information on inpatient newborn services.

THSteps online education module “Newborn Hearing Screening” on the THSteps website at www.txhealthstpes.com for additional information about conducting a newborn hearing screen.

**5.3.1.9 THSteps Medical Checkups Periodicity Schedule**

The client is periodically eligible for medical checkup services based on the THSteps Medical Checkups Periodicity Schedule. All the checkups listed on the periodicity schedule have been developed based on recommendations of the AAP and recognized authorities in pediatric preventive health. In Texas, THSteps has modified the AAP periodicity schedule based on the scheduling of a laboratory or other test in federal EPSDT or state regulations.
### Comprehensive Health Screening* - THSteps Medical Checkup Periodicity Schedule for Infants, Children, and Adolescents (Birth through 10 Years of Age)

*Comprehensive Health Screening is defined as: both an objective screening with the use of standardized procedures or screening tools and a subjective screening of those components when a standardized procedure or screening tool is not required (e.g., visits when audiometric hearing screening is not required). The screening must be age-appropriate and based on recognized national standards such as the National Center for Education in Maternal and Child Health (NCMCH) Bright Futures. The absence of a symbol indicates that subjective screening is appropriate unless the provider determines that an objective screen or test is necessary. Refer to the Texas Medicaid Provider Procedure Manual (TMPPM) for further detail.

**Legend of Symbols**
- Indicates that a component is mandatory and must be completed during the checkup. If a component is not completed at the required age, then the provider must complete it at the next checkup, if it is age-appropriate, or whenever it is medically necessary.
- TB screening: In counties that have been designated as having a high incidence of TB, administer an intradermal skin test at 1 and 4 years of age and the DSHS-approved questionnaire annually beginning at 2 years of age. In all other counties, administer the DSHS-approved questionnaire annually beginning at 1 year of age.

Revised 07122010
### Comprehensive Health Screening* - THSteps Medical Checkup Periodicity Schedule for Infants, Children, and Adolescents (11 through 20 Years of Age)

*Comprehensive Health Screening is defined as: both an objective screening with the use of standardized procedures or screening tools and a subjective screening of those components when a standardized procedure or screening tool is not required (e.g., visits when audiometric hearing screening is not required). The screening must be age-appropriate and based on recognized national standards such as the National Center for Education in Maternal and Child Health (NCEMCH) Bright Futures. The absence of a symbol indicates that subjective screening is appropriate unless the provider determines that an objective screen or test is necessary. Refer to the Texas Medicaid Provider Procedure Manual (TMPPM) for further detail.

5.3.2 Screening Components With Additional Requirements

5.3.2.1 Developmental Screening

Developmental screening is a required component of every checkup for clients who are birth through 6 years of age.

As a THSteps medical service, developmental screenings (procedure code 96110) or autism screenings (procedure code 96110 with modifier U6) is limited to once per day, per client, by the same provider or provider group. This service will be denied unless submitted by the same provider or provider group for the same date of service as a checkup, exception-to-periodicity checkup, or follow-up visit.

Standardized developmental screening is required at the ages listed in the table below. Providers must use a standardized tool when performing a developmental or autism screening. A standardized screen is not required at other checkups up to and including the 6-year checkup; however, developmental screening is required at these visits and includes a review of milestones (gross and fine motor skills, communication skills, speech-language development, self-help/care skills, and social, emotional, and cognitive development) and mental health and is not considered a separate service.

Providers may be reimbursed separately for the recommended screening tools listed in the table below in addition to the checkup visit at specific age visits. THSteps accepts the following recommended standardized tools at the following ages:

<table>
<thead>
<tr>
<th>Screening Ages</th>

<td></td>
</tr>
<tr>
<td>4 years</td>
<td>ASQ, ASQ-SE, or PEDS</td>
<td></td>
</tr>
</tbody>
</table>

Through August 31, 2011, providers may choose to use a standardized screening tool that is not listed in the Required Screening Ages and Recommended Tools table to complete the requirements of a medical checkup visit; however, providers may only submit a claim for a developmental screening tool that is listed in the table. If a standardized screen that is not listed is billed, it will be subject to recoupment.

Autism screening is required at 18 months of age.

If a developmental or autism screening that is required in the Required Screening Ages and Recommended Tools table is not completed during a checkup, the provider must document the reason why the screening was unable to be completed and schedule a follow-up appointment to complete the screening as soon as possible.

The provider must also complete a standardized screening when seeing a client who is 6 months through 6 years of age for the first time at any checkup.
If a provider administers a standardized developmental screening at additional checkups other than those listed in the Required Screening Ages and Recommended Tools table, the provider must document the rationale for the additional screening, which may be due to provider or parental concerns. Developmental screening that is completed without the use of one of the recommended standardized screening tools is not a separately payable benefit.

Standardized developmental screening for acute care or a medical checkup is not covered when completed to meet day care, Head Start, or school program requirements unless completed during an acute care visit in a clinic setting.

Standardized developmental screening may be performed outside a THSteps medical checkup as part of development and neurological assessment testing outside a THSteps medical checkup.

Refer to: Subsection 8.2.23, “Developmental and Neurological Assessment and Testing” in the Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2 Provider Handbooks) for information related to developmental screening testing outside a THSteps medical checkup.

Administration of the Mini Mental State Examination (MMSE) is considered part of an E/M service and is not separately reimbursed.

5.3.2.2 Referrals for Developmental Assessment

Referral for an in-depth developmental evaluation is determined by the criteria of the specific tool, which the screener should understand. Referral for in-depth evaluation of development should be provided when parents express concern about their client’s development, regardless of scoring on a standardized development screening tool.

An ECI program serves clients who are birth through 35 months of age with disabilities or developmental delays. Under federal and state regulations, all health-care professionals are required to refer children to the Texas ECI program within two business days of identifying a disability or a suspected delay in development, even if referred to an appropriate provider for further testing. If the client is 3 years of age or older, referral should be made to the local school district's special education program. Referrals may be based on professional judgment or a family's concern. A medical diagnosis or a confirmed developmental delay is not required for referrals.

Refer to: Appendix D: Texas Health Steps Statutory State Requirements of this handbook for more information.

5.3.2.3 Mental Health

Mental health screening is a required component of THSteps checkups for every age. Whenever a mental health crisis is suspected, every effort must be made to secure a prompt mental health evaluation and any medically necessary treatment for the client.

An emergency mental health referral for evaluation or treatment must always be made when any of the following are identified during a mental health screening:

- Suicidal thoughts, threats, or behaviors
- Homicidal thoughts, threats, or behaviors

When the clinician conducting the mental health screen has the appropriate training and credentials to conduct the mental health evaluation and provide the mental health treatment (mental or behavioral health problems, mental illnesses, or substance abuse or dependence), the clinician may choose to provide the mental health services or refer the client to an appropriate clinician. Clinicians who do not have these qualifications must refer clients to a qualified mental health specialists for such care.

For additional information about conducting a mental health screen, providers can refer to the THSteps online educational module “Mental Health Screening” at www.txhealthsteps.com.
5.3.2.4 Sensory Screenings

Vision and hearing screening are not covered when completed to meet day care, Head Start, or school program requirements unless completed during an acute care visit in a clinic setting.

Documentation of test results from a school vision or hearing screening program may replace the required objective screening if the test is conducted within 12 months of the checkup.

5.3.2.4.1 Vision Screening

Vision screening is a required component of a THSteps medical checkup for clients who are birth through 20 years of age. Vision screening may also be completed at any medical checkup or office visit upon request of a parent or referral from a school vision screening program or school nurse.

Clients Who Are Birth Through 2 Years of Age
All clients must be screened for vision problems by history, observation, and physical exam and referred to an ophthalmologist if at high risk for eye abnormalities.

Note: Clients who are birth through 35 months of age and who have a suspected or confirmed eye abnormalities must be referred to ECI within two business days of being identified, even if they are referred to an appropriate provider for further testing.

Clients Who Are 3 Through 20 Years of Age—Objective Screening
All clients who are 3, 4, 5, 6, 8, 10, 12, 15, and 18 years of age must be screened for vision acuity using an age-appropriate standardized vision chart. Standardized vision acuity must also be performed upon parental request.

Clients Who Are 3 Through 20 Years of Age—Subjective Screening
A vision acuity screen is not required for other ages listed on the THSteps Periodicity Schedule; however, subjective screening for vision problems is required at all other checkups and includes client history, physical assessment, and observation of the client for signs of vision difficulty.

- Clients with abnormal screening results must be referred to an optometrist or ophthalmologist experienced with the pediatric population.
- Clients who are at high risk for eye abnormality must be referred to an ophthalmologist experienced with the pediatric population.

Refer to: Section 4, “Vision Care Professionals” in Vision and Hearing Services Handbook (Vol. 2, Provider Handbooks) for additional vision services.

5.3.2.4.2 Hearing Screening

Hearing screening must be completed during each THSteps medical checkup. Clients with abnormal screening results must be referred to an appropriate provider. Audiometric screening procedure codes 92551 and 92552 are denied if billed on the same day by the same provider as a medical checkup.

Inpatient Hearing Screening — Newborn Hearing Screening
Health Safety Code, Chapter 47, Vernon’s Texas Codes Annotated mandates that a hearing screening must be offered at the birthing facility before hospital discharge. The hospital is responsible for the purchase of equipment, training of personnel, screening of the newborns, certification of the program in accordance with DSHS standards, and notification to the provider, parents, and DSHS of screening results. There is no additional Medicaid reimbursement for the hearing screening, as the procedure is part of the newborn diagnosis-related group (DRG). Hospitals must use the International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM) procedure code 09547 to report this newborn hearing screen on the UB-04 CMS-1450 paper claim form.

This facility-based screening also meets the physician’s required component for hearing screening in the inpatient newborn THSteps medical checkup. The physician must assure that the hearing screening is offered or completed before discharging the newborn unless the birthing facility is exempt under the law
from performing hearing screenings. In that case, the physician must assure there is an appropriate referral for a hearing screening to a birthing facility participating in the Newborn Hearing Screening Program.

The physician should discuss the screening results with the parents, especially if the hearing screening results are abnormal, and should order an appropriate referral for further diagnostic testing. If the results are abnormal, parent/legal guardian consent must be obtained to send information to DSHS for tracking and follow-up purposes. Results are received via the online Texas Early Hearing Detection and Intervention (TEHDI) system. For further information see the TEHDI website at www.dshs.state.tx.us/audio/newbornhear.shtm.

**Clients Who Are Birth Through 3 Years of Age**

THSteps hearing screening for this age group consists of all of the following:

- Observation and history recording obtained from a responsible adult familiar with the client
- Completion of the Hearing Checklist for Parents form
- Referral of high-risk clients to a physician who renders audiology services

**Note:** Clients who are birth through 35 months of age and who have a suspected or confirmed hearing loss must be referred to ECI within two business days of being identified, even if they are referred to an appropriate provider for further testing.

**Clients Who Are 4 Through 20 Years of Age — Objective Screening**

All clients who are 4, 5, 6, 8, and 10 years of age must be screened for hearing loss with pure tone audiometric threshold screening. Pure tone audiometric threshold screening must also be performed upon parental request.

**Clients Who Are 4 Through 20 Years of Age — Subjective Screening**

A standardized screen is not required for other ages listed on the THSteps Periodicity Schedule; however, subjective hearing screening is required at these visits and includes client history and observation of the client for the ability to answer questions and follow directions.

**Refer to:** Section 2, “Nonimplantable Hearing Aid Devices and Related Services” in *Vision and Hearing Services Handbook* (Vol. 2, Provider Handbooks) for newborn hearing screening requirements and additional hearing services.

### 5.3.2.5 Tuberculosis Screening

In areas of low TB prevalence, administer the Tuberculosis (TB) Screening and Education Tool annually beginning at one year of age. In areas of high prevalence, administer the TB skin test at one year of age, once between 4 through 6 years of age, and once between 11 through 17 years of age. Administer the TB Questionnaire annually beginning at two years of age and thereafter at other medical checkups.

A listing of counties with a high prevalence of TB is available at www.dshs.state.tx.us/idcu/disease/tb/statistics/hiprev/.

Providers can also call the TB program at 1-512-458-7447 for more information.

A follow-up visit (procedure code 99211) is required to read all TB skin tests. The provider may bill the follow-up visit with a provider identifier and THSteps benefit code.

A TB skin test is billed when administered according to the THSteps Periodicity Schedule with the procedure code, 86580 to document the use of the supplies provided by DSHS.

If further evaluation is required to diagnose either latent TB infection or active TB disease, the provider may bill the appropriate E/M office visit code. Diagnosis and treatment are provided as a medical office visit.

5.3.2.6 Administrations and Immunizations

Providers must screen the immunization status at every medical checkup. The necessary vaccines and toxoids must be administered at the time of the checkup unless medically contraindicated or because of parent’s reasons of conscience including religious beliefs.

Vaccines and toxoids must be administered according to the current ACIP “Recommended Childhood and Adolescent Immunization Schedule - United States.”

Providers must not refer clients to the local health department or other entity for immunization administration. Vaccines/toxoids must be obtained from TVFC for clients who are birth through 18 years of age.

The specific diagnosis necessitating the vaccine/toxoid is required when billing with the following administration procedure codes in combination with an appropriate vaccine/toxoid procedure code. Diagnosis procedure code V202 may be used unless a more specific diagnosis code is appropriate:

<table>
<thead>
<tr>
<th>Administration Procedure Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>90465</td>
</tr>
</tbody>
</table>

Immunization administration fees are reimbursed based on the number of state-defined components administered per injection and may or may not require the use of one of the following modifiers. Combined antigen vaccines (e.g., DTaP or MMR) are considered as one dose.

<table>
<thead>
<tr>
<th>Modifier</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>U2</td>
<td>State-defined modifier: Administration of vaccine/toxoid with two state-defined components</td>
</tr>
<tr>
<td>U3</td>
<td>State-defined modifier: Administration of vaccine/toxoid with three state-defined components</td>
</tr>
</tbody>
</table>

The following vaccines are defined as having one state-defined component and the administrative procedure code does not require a modifier.

<table>
<thead>
<tr>
<th>Vaccine Procedure Codes With One State-Defined Component</th>
</tr>
</thead>
<tbody>
<tr>
<td>90632</td>
</tr>
<tr>
<td>90658*</td>
</tr>
<tr>
<td>90713*</td>
</tr>
<tr>
<td>90744*</td>
</tr>
</tbody>
</table>

*TVFC-distributed vaccine/toxoid

Note: Vaccines that are not identified as being distributed through TVFC are not reimbursed separately.
The following vaccines are defined as having two state-defined components and the administrative procedure code must be billed with the state-defined modifier U2.

<table>
<thead>
<tr>
<th>Vaccine Procedure Codes With Two State-Defined Components</th>
</tr>
</thead>
<tbody>
<tr>
<td>90636*</td>
</tr>
</tbody>
</table>

* TVFC-distributed vaccine/toxoid
Note: Vaccines that are not identified as being distributed through TVFC are not reimbursed separately.

The following vaccines are defined as having three state-defined components and the administrative procedure code must be billed with the state-defined modifier U3.

<table>
<thead>
<tr>
<th>Vaccine Procedure Code With Three State-Defined Components</th>
</tr>
</thead>
<tbody>
<tr>
<td>90698*</td>
</tr>
</tbody>
</table>

* TVFC-distributed vaccine/toxoid
Note: Vaccines that are not identified as being distributed through TVFC are not reimbursed separately.

Providers may use the state-defined modifier U1 in addition to the associated administered vaccine procedure code for clients who are birth through 18 years of age and the vaccine was unavailable through TVFC.

<table>
<thead>
<tr>
<th>Modifier</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>U1</td>
<td>State-defined modifier: Vaccine(s)/toxoid(s) privately purchased by provider when TVFC vaccine/toxoid is unavailable</td>
</tr>
</tbody>
</table>

**Note:** “Unavailable” is defined as a new vaccine approved by the Advisory Committee on Immunization Practices (ACIP) that has not been negotiated or added to a TVFC contract, funding for new vaccine that has not been established by TVFC, or national supply or distribution issues. Providers will be informed if a vaccine meets the definition of ‘not available’ from TVFC and when the provider’s privately purchased vaccine may be billed with modifier U1.

Modifier U1 may not be used for failure to enroll in TVFC, maintain sufficient TVFC vaccine/toxoid inventory or clients who are 19 through 20 years of age.

For all immunizations, if only one immunization is administered during a checkup or visit, providers must bill the appropriate administration procedure code with a quantity of one in addition to the appropriate immunization procedure code administered.

When two or more immunizations are administered, the provider must bill the appropriate administration codes. The first immunization is billed using codes 90465, 90467, 90471, or 90473 with a quantity of one. Additional immunizations must include codes 90466, 90468, 90472, or 90474 with a quantity of one or more depending on the number of vaccines administered, and the procedure codes that describe each immunization administered.

When a vaccine given has more than one state-defined component, the provider must bill the corresponding administration code with the appropriate modifier. Providers should separate administration codes with different modifiers on different details lines. Provider can bill on one-detail line administration codes with no modifier or the same modifier.

**Example:** Provider submitting claims for vaccine procedure codes 90648, 90723, 90680, and 90649. Procedure code 90723 has three state-defined components; procedure codes 90648 and 90649 each have one state-defined component; and procedure code 90680 was administered orally. To bill for these four procedure codes, the provider should bill the following: For procedure code 90723, bill administration procedure code 90471 and modifier U3 with a quantity of 1;
for procedure codes 90648 and 90649, bill administration procedure code 90472 with a quantity of 2; and for procedure code 90680, bill oral administration procedure code 90473 with a quantity of 1.

5.3.2.6.1 Vaccine Information Statement (VIS)

A VIS is required by federal mandate to inform parents and vaccine recipients of the risks and benefits of the vaccine they are about to receive. Not only is it important to explain the risks and benefits before a vaccine is administered, it is also important that providers use the most current forms available. For more about immunizations, vaccine-preventable diseases, or literature and forms, providers can call the DSHS Immunization Branch at 1-800-252-9152 or review information at www.dshs.state.tx.us/immunize/.

Refer to: Appendix B: Immunizations in this handbook.

Form CH.65, “TVFC Provider Enrollment (3 Pages)” in Appendix A, “THSteps Forms,” of this handbook for more information on enrolling as a TVFC provider.

Subsection B.2, “Recommended Childhood Immunization Schedule” in Appendix B, “Immunizations,” of this handbook.

The THSteps online education module “Immunizations,” which is located on the THSteps website at www.txhealthsteps.com, for more information about immunizations.

5.3.2.7 Laboratory Procedures

The complete medical checkup includes laboratory testing. The DSHS Laboratory provides supplies for specimen collection and mailing and shipping; and reporting of test results to enrolled THSteps medical providers that submit specimens to the DSHS Laboratory. These services and supplies are limited to THSteps medical checkup laboratory services provided in the course of a medical checkup to THSteps clients. Unauthorized use of services and supplies is a violation of federal regulations.

5.3.2.7.1 Laboratory Services

Age-appropriate laboratory testing, as noted on the THSteps Medical Checkup Periodicity Schedule (including the footnotes), is considered part of the THSteps medical checkup.

DSHS laboratory services are available at no cost to all enrolled THSteps medical providers for THSteps medical checkups only. THSteps laboratory services provided by a private laboratory and a medical provider are not reimbursed.

Example: If a provider needs immediate results for the anemia screening, the specimen may be processed in the office/clinic, and the test results must be documented in the client’s medical record but will not be reimbursed.

Exception: Specimens related to screening for Type 2 diabetes, hyperlipidemia, HIV, and syphilis may be sent to the laboratory of the provider’s choice for processing and analysis, including those obtained for managed care clients.

Documented laboratory test results obtained within the preceding month may be used to meet the laboratory testing requirement and must include:

- The dates of service (DOS).
- Clear reference to the previous visit by the same provider or results obtained from another provider.

The date of service for the laboratory testing is to be the date the specimen was obtained as part of the medical checkup, follow-up visit, or exception-to-periodicity visit.

The procedure codes for any laboratory testing services other than screening for Type 2 diabetes, hyperlipidemia, HIV, and syphilis are informational when obtained on the same day a checkup is completed, even if an acute care visit is performed on the same date of service.
If the laboratory testing as identified on the THSteps Medical Checkup Periodicity Schedule is obtained as part of an E/M visit on a different date of service than a checkup, the services may be considered as separate services and may be sent to the laboratory of the provider’s choice.

Laboratory specimens obtained for diagnostic evaluation, rather than for screening purposes and performed on the same day as a checkup, may be considered as separate services unless the test is required as part of a checkup. If the test is required as part of the checkup, the laboratory specimens, with the exception of screening tests for hyperlipidemia, Type 2 diabetes, HIV and syphilis, must be submitted to the DSHS Laboratory for testing. Diagnostic specimens that are not part of the checkup can be sent to the laboratory of the provider’s choice.

Laboratory services that are related to a THSteps medical checkup are available from the DSHS Laboratory and may not be billed separately with an office visit or consultation on the same day as a THSteps medical checkup.

Providers can refer to the laboratory test procedure codes table below for tests listed on the THSteps Periodicity Schedule that are available from the DSHS Laboratory.

The following procedure codes may not be billed separately with an office visit or consultation on the same day as a THSteps medical checkup either by a provider or laboratory. Claims for procedure codes listed below submitted by a provider or a commercial laboratory for the same DOS as a THSteps medical checkup are denied and are subject to retrospective review:

<table>

</tr>
</thead>
<tbody>
<tr>
<td>83020</td>
</tr>
<tr>
<td>88143</td>
</tr>
<tr>
<td>88167</td>
</tr>
</tbody>
</table>

The following procedure codes are related to laboratory testing for hyperlipidemia, Type 2 diabetes, HIV, and syphilis that may be sent to the DSHS Laboratory or to a laboratory of the provider’s choice. Laboratories that bill for these procedure codes on the same date of service as a medical checkup visit may be reimbursed separately. Providers who obtain and process these specimens in-house are not reimbursed separately.

5.3.2.7.2 Laboratory Supplies

The DSHS Laboratory verifies enrollment of THSteps medical providers before sending laboratory supplies and the informational packet to the medical providers. Newly enrolled providers should contact the DSHS Laboratory to request laboratory supplies. Upon request, the DSHS Laboratory provides THSteps medical providers with laboratory supplies associated with specimen collection, submission, and mailing and shipping of required laboratory tests related to medical checkups. Requests for specimen requisition forms are routed to the DSHS Laboratory reporting staff and mailed separately to the providers. The Child Health Laboratory Supplies Order Form lists the laboratory supplies that the DSHS Laboratory provides to THSteps medical providers.

To obtain a THSteps (Child Health Laboratory Supplies Order Form), providers can call 1-512-458-7661 or 1-888-963-7111, ext. 7661, or download the form online at www.dshs.state.tx.us/lab/MRS_forms.shtm.
5.3.2.7.3 Newborn Screening Supplies

Providers that perform newborn screening (NBS) can order supplies by submitting a Newborn Screening Supplies Order Form to the DSHS Laboratory. The Newborn Screening Supplies Order Form lists the NBS supplies that the DSHS Laboratory provides to medical providers.

**Note:** For newborn screening, only the specimen collection form (NBS-3), mailing envelope and provider address labels are provided. Lancets, mailing, and shipping costs are the responsibility of the submitter.

To obtain a Newborn Screening Supplies Order Form, medical providers can call 1-512-458-7661 or 1-888-963-7111, ext. 7661, or download the form online at www.dshs.state.tx.us/lab/MRS_forms.shtm.

Contact information for requesting laboratory supplies:

- Container Preparation
- Laboratory Services Section, MC 1947
- Department of State Health Services
- PO Box 149347
- Austin, TX 78714-93471
- 1-512-458-7661 or 1-888-963-7111, Ext. 7661
- Fax: 1-512-458-7672

5.3.2.7.4 Laboratory Submission

All required laboratory testing for THSteps clients must be performed by the Department of State Health Services (DSHS) Laboratory in Austin, TX, with the following exceptions:

- Specimens collected for Type 2 diabetes, hyperlipidemia, HIV, and syphilis screening may be sent to the laboratory of a provider’s choice or to the DSHS Laboratory in Austin if submission requirements can be met.
- Specimens for cervical cancer, gonorrhea, and chlamydia screening are processed by the Women’s Health Laboratories (WHL) in San Antonio, TX. Information regarding collection, handling, and submission of these specimens is available from the WHL.

THSteps medical checkup laboratory specimens submitted to the DSHS Laboratory must be accompanied with the DSHS Laboratory Specimen Submission Request Form (Newborn Screening NBS 3 or G-THSTEPS as appropriate) for tests requested. All forms must include the client’s name and Medicaid number as they appear on the Medicaid Identification (Form H3087). If a number is not currently available but is pending (i.e., a newborn or a newly certified client verified by a Medicaid Eligibility Verification [Form H1027] as eligible for Medicaid), providers must write “pending” in the Medicaid number space, which is located in the payor source section of the laboratory specimen submission form.

Laboratory specimens received at the DSHS Laboratory without a Medicaid number or the word “pending” written on the accompanying specimen submission form will be analyzed, and the provider will be billed.

Specimens submitted to the laboratory must also meet specific acceptance criteria. For additional information on specimen submission, providers can refer to the DSHS Laboratory web page at: www.dshs.state.tx.us/lab/MRS_specimens.shtm.

**Note:** If an extreme health problem exists and telephone results are needed quickly, providers should make a request on the laboratory form. With the exception of weekends and holidays, routine specimens are analyzed and reported within three business days after receipt by the DSHS Laboratory. Critical abnormal test results (e.g., hemoglobin equal to or below 7g/dL or blood lead levels greater than or equal to 40 mcg/dL) are identified in the laboratory within 36 hours after receipt of specimens and are reported to the submitter by telephone within one hour of confirmation.
The THSteps laboratory specimens that can be mailed at ambient temperature can be sent to the DSHS Laboratory Services Section through the U.S. Postal Service at no cost using the provided business reply labels:

DSHS Laboratory Services Section
Walter Douglass
PO Box 149163
Austin, TX 78714-9803
1-512-458-7318 or 1-888-963-7111 Ext. 7318
Fax: 1-512-458-7294

THSteps laboratory specimens that require overnight shipping on cold packs through a courier service must be sent to the DSHS Laboratory Services Section at:

DSHS Laboratory Services Section, MC-1947
1100 West 49th Street
Austin, TX 78756-3199

Newborn Screening specimens can be sent through the U.S. Postal Service to:

Texas Department of State Health Services
Laboratory Services Section
PO Box 149341
Austin, TX 78714-9341

5.3.2.7.5 Send Comments
Providers with comments or feedback about THSteps specimen collection supplies should contact the DSHS Laboratory. Supplies are evaluated continually, and feedback from supply users is useful. Documented comments may support, justify, or initiate a change in a provided item. Providers can send a brief letter or fax to the following address:

Quality Assurance Unit
Laboratory Services Section, MC 1947
Department of State Health Services
PO Box 149347
Austin, TX 78714-9347
Fax: 1-512-458-7672

5.3.2.7.6 Required Laboratory Tests Related to Medical Checkups
The following laboratory screening procedures are required components of the THSteps medical checkup and are to be performed in accordance with the age and frequency specified on the THSteps medical checkup periodicity schedule. Due to changes in specimen collection, handling, and submission criteria, providers should contact the DSHS Laboratory for the most current specimen requirements by calling 1-888-963-7111, Ext. 7430 or visiting the DSHS website at www.dshs.state.tx.us/lab/MRS_labtests_toc.shtm.

Hemoglobin or Hematocrit
Hemoglobin or hematocrit levels are required at ages as noted on the THSteps Periodicity Schedule. These tests may be completed in a provider’s office if there is an urgent need for test results. These test results must be documented in the client’s medical record.

Lead Screening and Testing
In accordance with current federal regulations, THSteps requires screening for lead poisoning between 6 months of age and 6 years of age as notated on the THSteps Periodicity Schedule.

Providers may download the Pb-110: Risk Assessment for Lead Exposure: Parent Questionnaire, which is provided in both English and Spanish at www.dshs.state.tx.us/lead.
Providers may obtain more information about the medical and environmental management of lead poisoned children from the DSHS Childhood Lead Poisoning Prevention Program by calling 1-800-588-1248 or visiting the web page at www.dshs.state.tx.us/lead.

Refer to: Appendix C: Lead Screening in this handbook for more information on lead screening procedures and follow-up.

Hemoglobin Type/Hemoglobin Electrophoresis
If the hemoglobin type was performed as a part of newborn screening and results are documented on the chart, the test does not need to be repeated. Results from dates of service on or after July 12, 2002, are available from the DSHS Laboratory. The test may also be performed at the provider’s discretion, as appropriate for age and population groups.

Hyperlipidemia
Screening for hyperlipidemia is based on risk assessment. THSteps does not provide a formal risk assessment tool. Providers may refer to the AAP policy statement on cholesterol screening for more information. Specimens may be sent to the laboratory of the provider’s choice, including the DSHS Laboratory.

Diabetes
Screening for risk of Type 2 diabetes is based on risk assessment. THSteps does not provide a formal risk assessment tool. Specimens may be sent to the laboratory of the provider’s choice, including the DSHS Laboratory.

Newborn Screening
The mandated newborn screen repeated at one to two weeks of age is a required component of the THSteps medical checkup. Clients may not be referred to the local health department or other providers for this service.

Health and Safety Code, Chapter 33, Vernon’s Texas Codes Annotated, requires testing for the disorders recommended by the American College of Medical Genetics (ACMG) on all newborns. This testing is the responsibility of any provider attending the newborn. All newborns must be tested at 24-48 hours of age and a second time at 1 to 2 weeks of age. If there is any doubt that a client younger than 12 months of age was properly tested, the provider should submit the blood sample on the appropriate DSHS Form NBS 3 to the DSHS Newborn Screening Laboratory.

Note: The results are mailed to the address that the provider indicated on Form NBS 3. Recommendations for necessary follow-up procedures are included with the report. The NBS Clinical Care Coordination (Case Management) staff will contact providers when there are significant abnormalities.

The newborn screening should only be obtained prior to one week of age if a first newborn screen was not obtained before discharge from the hospital. The second newborn screening should be completed at the one- or two-week visit. For further information, access the Newborn Screening Program website at www.dshs.state.tx.us/newborn/default.shtm.

5.3.2.7.7 Additional Required Laboratory Tests Related to Medical Checkups for Adolescents
The following is a list of required laboratory tests related to medical checkups for adolescents and guidelines for testing for sexually transmitted diseases (STDs).

Communicable Disease Reporting
Diagnoses of sexually transmitted diseases (STDs), including HIV, are reportable conditions under 25 TAC, Chapter 97. Providers must report confirmed diagnoses of STDs as required by 25 TAC $97.132.
Testing for Sexually Transmitted Diseases (STDs)

Syphilis Testing
Syphilis testing should be performed on adolescents that are at high risk for infection. Specimens may be sent to the laboratory of the provider’s choice, including the DSHS Laboratory.

Gonorrhea and Chlamydia Infection Testing
Testing for gonorrhea and chlamydia should be performed on adolescents that are at high risk for infection. Specimens must be sent to the Women’s Health Lab in San Antonio.

HIV Testing
It is critical to maintain confidentiality when caring for clients, as well as their specimens. Testing should be performed only after informed consent is obtained from the adolescent. Informed consent does not have to be written as long as there is documentation in the medical record that the test has been explained and consent has been obtained. Specimens may be sent to the laboratory of the provider’s choice, including the DSHS Laboratory.

The CDC guidelines state that routine HIV screening should occur for everyone between 13 and 64 years of age. HIV testing is not required at these ages, but the offer should be made beginning at 13 years of age and, if not performed at that time, should be offered at subsequent ages according to risk.

HIV testing may be performed for adolescents without requirement of parental consent. Adolescents at risk for HIV infection should be offered confidential HIV screening. If the client refuses the HIV test, the provider may not perform the test and must explain the option of anonymous testing and refer the client to a testing facility that offers anonymous testing. A notation must be made in the medical record that notification of the HIV test and the right to refuse was given. Providers may call the HIV/STD InfoLine for referrals to HIV/AIDS testing sites; prevention, case management, and treatment providers; STD clinics; and other related service organizations. The HIV/STD InfoLine is 1-800-299-2437. This toll-free HIV/Acquired Immunodeficiency Syndrome (AIDS) and STD information and referral service is available for English- and Spanish-speaking callers and for those who are hearing-impaired.

Cervical Cancer Screening
The first Pap smear should be obtained at 21 years of age, 3 years from the onset of sexual activity, or at any other age based on provider discretion.

Mailing Specimens and Ordering Supplies for PAP Screen Testing
THSteps providers can call for information, mail specimens to, or order supplies for obtaining Pap smear specimens for THSteps adolescent screening from the following laboratory:

Women’s Health Laboratories
2303 SE Military Drive, Suite 1
San Antonio, TX 78223
Customer Service: 1-888-440-5002 or 1-210-531-4596
Fax: 1-210-531-4506
www.dshs.state.tx.us/lab/whl.shtm

Providers must submit their THSteps provider number (TPI) when ordering supplies. To order supplies, providers may:

- Use order Form AG-30.
- Fax the supply order form or include in the specimen packaging.
- Request supplies by telephone or e-mail.
The following cervical cancer screening supplies are available for order:

<table>
<thead>
<tr>
<th>Conventional Pap Smears</th>
<th>Surepath Liquid-Based Pap Smears</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pap kits</td>
<td>Cervex brush</td>
</tr>
<tr>
<td>M-47 forms</td>
<td>Cytorich preservative vial</td>
</tr>
<tr>
<td>Cardboard boxes</td>
<td>M-47 form</td>
</tr>
<tr>
<td>Labels</td>
<td>Zip-lock biohazard transport bag</td>
</tr>
<tr>
<td>WHL supply order form</td>
<td>WHL supply order form</td>
</tr>
</tbody>
</table>

Providers that are already on the automated system through the DSHS Pharmacy are encouraged to continue using this system. Larger numbers of supplies are sent through the DSHS Pharmacy. Providers with consistent monthly workload volumes can request to be set up with a standard monthly order that is shipped at the same time each month.

5.3.2.7.8 Laboratory Reporting

A computer-generated result report is mailed or faxed to the submitting THSteps medical checkup provider. A statistical report is mailed quarterly to providers documenting their total number of submissions by diagnosis and adequacy. The DSHS Laboratory has web-based services (remote order and result reporting) available for THSteps and Newborn Screening laboratory services. For more information, providers can visit the DSHS website at www.dshs.state.tx.us/lab/remoteData.shtm or call 1-888-963-7111, Ext. 6030.

5.3.2.8 Dental Screening and Intermediate Oral Evaluation with Fluoride Varnish Application in the Medical Home

Based on the American Academy of Pediatric Dentistry’s (AAPD) definition of a dental home, Texas Medicaid defines a dental home as the dental provider who supports an ongoing relationship with the client that is inclusive of all aspects of oral health care delivered in a comprehensive, continuously accessible, coordinated, and family-centered way. In Texas, establishment of a client’s dental home should begin at 6 months of age but no later than 12 months of age and includes referral to dental specialists when appropriate.

The physician must refer clients to a dental home for dental checkups beginning at 6 months of age and at each medical checkup thereafter. A parent/guardian of the client may self-refer for dental services at any age, including younger than 12 months of age, and may choose any THSteps dental provider.

5.3.2.8.1 Dental Screening

Dental screening is a part of the medical checkup physical examination and must include:

- Inspection of teeth for signs of early childhood caries.
- Inspection of the oral soft tissues for any abnormalities.
- Anticipatory guidance to include:
  - The need for thorough daily oral hygiene practices.
  - Potential gingival manifestations for clients with diabetes and clients under long-term medications therapy.
  - Information that THSteps eligibility qualifies the client for dental services.

5.3.2.8.2 Intermediate Oral Evaluation with Fluoride Varnish Application

An intermediate oral evaluation with fluoride varnish application (procedure code 99429) is a benefit for clients who are 6 through 35 months of age.
The intermediate oral evaluation with fluoride varnish application must be billed on the same date of service as a medical checkup visit and is limited to six services per lifetime by any provider. Procedure code 99429 must be billed with modifier U5 and diagnosis code V202.

An intermediate oral evaluation with fluoride varnish application is limited to THSteps medical checkup providers who have completed the required benefit education and are certified by DSHS Oral Health Program to perform an intermediate oral evaluation with application of fluoride varnish. Training for certification is available as a free continuing education course on the THSteps website at www.txhealth-steps.com. The intermediate oral evaluation with fluoride varnish application add-on includes the following components:

- Intermediate oral evaluation
- Fluoride varnish application
- Dental anticipatory guidance to include:
  - The need for thorough daily oral hygiene practices
  - Education in potential gingival manifestations for clients with diabetes and clients under long-term medication therapy
  - THSteps eligibility qualifies the client for dental services
  - Diet, nutrition, and food choices
  - Fluoride needs
  - Injury prevention
  - Antimicrobials, medications, and oral health

If the client has no erupted teeth, additional dental anticipatory guidance is expected.

*Note:* The physician must complete the intermediate oral evaluation but can delegate all other components.

### 5.3.2.9 Anticipatory Guidance

Anticipatory guidance is a federally mandated component of the THSteps medical checkup and includes health education and counseling. Face-to-face health education and counseling with parents or guardians and clients are required to assist parents in understanding what to expect in terms of the client’s development and to provide information about the benefits of healthy lifestyles and practices, and accident and disease prevention. Written material also may be given but does not replace face-to-face counseling.

### 5.4 Documentation Requirements

All THSteps services require documentation to support the medical necessity of the services rendered including THSteps medical services. THSteps services are subject to retrospective review and recoupment if documentation does not support the services billed.

#### 5.4.1 THSteps Medical Checkups—Documentation of Completed Checkups

To assure completion of comprehensive medical checkups and the quality of care provided, providers must document all components of the THSteps medical checkups as they are completed. Clinical charts are subject to quality review activities including random chart review and focused studies of well-child care. Documentation must support services provided according to nationally recommended standards of care.

The required components of the medical checkup must be documented in the client’s medical records. If the component cannot be completed due to extenuating circumstances, such as the client’s illness or lack of cooperation or the parent’s refusal to give consent for a specific component, the provider must
document in the client’s medical record why the component was not completed and must schedule a follow-up visit as appropriate. A checkup is considered complete if the provider has attempted to complete all required components and documentation supports the reason why the required component could not be completed.

Documentation for a follow-up visit must include:

- Reason for the visit(s)
- Component(s) completed

Documentation of the questions contained in the following screening tools are required for THSteps risk identification:

- Hearing Checklist for Parents
- Tuberculosis (TB) Screening and Education Tool
- Form Pb-110, Risk Assessment for Lead Exposure: Parent Questionnaire

Documentation of these screening tools must be included in the client’s medical record as follows:

- If another program requires the screening tool to be submitted, it must be completed and included in the client’s medical record.
- If another program does not require the screening tool to be submitted, it must have one of the following forms of documentation included in the client’s medical record:
  - The completed screening tool(s) with results
  - The completed questions to the tool(s) within a provider-created medical record
  - The results of the completed screening tool(s)
- Providers may be asked to provide the screening tool used to complete the screening.

All other THSteps forms are optional.

Any component of the checkup obtained within the preceding month may be used to meet the checkup requirement and must include:

- The date(s) of service
- Clear reference to the previous visit by the same provider or results obtained from another provider

In addition to the required documentation for a checkup, the client’s medical record must include the reason for the exception-to-periodicity checkup.

5.4.1.1 Separate Identifiable Acute Care Evaluation and Management Visit

If an acute or chronic condition that requires E/M beyond the required components for a medical checkup is discovered, a separate E/M procedure code may be considered for reimbursement for the same date of service as a checkup or the client can be referred for further diagnosis and treatment.

- The client’s medical record must contain documentation that the separate identifiable service(s) were medically necessary and include a diagnosis other than V202 (routine infant or child health check) and treatment. Documentation must be made available to Texas Medicaid upon request.
- An insignificant or trivial problem/abnormality that is encountered in the process of performing a checkup and does not require additional work and performance of the key components of a problem-oriented E/M service cannot be considered a separate established patient E/M acute care visit.
5.5 Claims Filing and Reimbursement

Providers may refer to Volume 1 for general information regarding claims filing and reimbursement.

Refer to:
Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Section 2: Texas Medicaid Reimbursement (Vol. 1, General Information) for more information about reimbursement.

5.5.1 THSteps Medical Checkups

5.5.1.1 Claims Information

THSteps providers do not have to bill private insurance for a medical checkup; they can bill TMHP directly even if they know that the client has private insurance. For THSteps medical checkups, TMHP is responsible for determining whether a third party resource (TPR) exists and for seeking payment from the TPR.

Providers should bill their usual and customary fee except for vaccines obtained from TVFC. Providers may not charge Medicaid or clients for the vaccine received from TVFC. Providers may charge a usual and customary fee not to exceed $14.85 for vaccine administration when providing immunizations to a client eligible for TVFC. Providers are reimbursed the lesser of the billed amount or the maximum allowable fee.

THSteps medical checkups may be billed electronically or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms. Providers may request information about electronic billing or the paper claim form by contacting the TMHP THSteps Contact Center at 1-800-757-5691.

All procedures, including the informational-only procedures, must have a billed amount associated with each procedure listed on the claim. Informational-only procedure codes must be billed in the amount of at least $.01.

Providers must record the following on the CMS-1500 claim form to receive reimbursement for a medical checkup:

- The provider identifier and benefit code EP1
- The appropriate THSteps medical checkup procedure code (all ages) with diagnosis code V202
  - The condition indicator codes, which must be placed in 24C (ST, S2, or NU only)
  - The provider type modifiers
  - The exception-to-periodicity modifier, when applicable
- A TB skin test procedure code if a test was administered (1 through 20 years of age)
- The immunization administration and vaccine procedure codes if any were administered (all ages)
- The place of service must be 72 for RHCs
• The EP modifier must be used for FQHCs

Immunizations performed outside of a THSteps medical checkup must be billed under the provider’s provider identifier.

5.5.1.2 Reimbursement

THSteps-enrolled providers are reimbursed for THSteps medical checkups and administration of immunizations in accordance with 1 TAC §355.8441.

THSteps medical checkups provided in an FQHC are reimbursed in accordance with 1 TAC §355.8261.

RHCs are reimbursed using visit rates calculated in accordance with 1 TAC §355.8101.

Providers may refer to the online fee lookup (OFL) or the applicable fee schedule on the TMHP website at www.tmhp.com.

7. CONTACT TMHP

For a complete list of TMHP communications, refer to the TMHP Telephone and Address Guide (Vol. 1, General Information).

7.1 Automated Inquiry System (AIS)

AIS (1-800-925-9126, Option 1) is available 7 days a week, 23 hours a day, with scheduled downtime between 3 a.m. and 4 a.m., and is the main point of contact for client eligibility information. AIS requires the use of a touch-tone phone in order to access the system.

7.2 TMHP Website

Additional information about Medicaid enrollment, general customer service, and provider education/training is available on the TMHP website at www.tmhp.com.
7.3 (Dental) Information and Assistance
For assistance with claims, dental providers may contact a TMHP Contact Center representative on the Dental Inquiry Line (1-800-568-2460).

7.3.1 Dental Inquiry Line
The Dental Inquiry Line (1-800-568-2460) is available Monday through Friday, 7 a.m. to 7 p.m., Central Time, and is the main point of contact for information regarding dental services and appeals.

Any dental service claim denial may be appealed by telephone if it was not denied as an incomplete claim and does not require one of the following items or conditions:

- Narratives
- Radiographs
- Models
- Other tangible documentation
- Review by the TMHP Dental Director

7.4 (THSteps) Information and Assistance
Providers with questions, concerns, or problems about claims should contact the TMHP Contact Center (1-800-925-9126). For contact information for their regional TMHP Provider Representative, providers can refer to the TMHP website at www.tmhp.com. Click on the Regional Support link.

7.4.1 THSteps Inquiry Line
The THSteps Medical Inquiry Line (1-800-757-5691) is available Monday through Friday, 7 a.m. to 7 p.m., Central Time, and is the main point of contact for information regarding THSteps medical services.

7.5 Assistance with Program
Providers with questions, concerns, or problems with program rules, policies, or procedures should contact DSHS regional program staff. THSteps staff contact numbers can be found in Appendix A, subsection A.6, “DSHS Health Service Region Contacts” (Vol. 1, General Information), on the THSteps website at www.dhs.state.tx.us/thsteps/default.shtm, or by calling THSteps (1-512-458-7745).

THSteps regional staff make routine contact with providers to educate and assist them with THSteps policies and procedures.

Clients who are eligible for Medicaid and have questions about THSteps, need to locate medical or dental providers, or need assistance with arranging transportation to appointments should call the THSteps Hotline (1-877-847-8377). Clients with questions about their Medicaid eligibility for THSteps should be directed to their caseworker at the local HHSC office or site.

8. FORMS
**CCP Prior Authorization Request Form Instructions**

**General Instructions**
This form must be completed and signed as outlined in the instructions below before providers contact TMHP Comprehensive Care Program (CCP) for prior authorization.

Either the requesting Medicaid provider or the prescribing physician may initiate the form. The completed form with the original dated signature must be retained by the prescribing physician in the client’s medical record. A copy of the signed and dated form must be maintained by the requesting provider in the client’s medical record. The form is subject to retrospective review.

The Medicaid provider or prescribing physician may complete the following sections:
- Request for Services check boxes
- Client Information section
- Supplier/Vendor Information section
- Dates of Service
- Healthcare Common Procedure Coding System (HCPCS) Procedure Code, Brief Description of Requested Services, and Retail Price

The prescribing physician must complete the following sections:
- Diagnosis and Medical Necessity of Requested Services
- Primary Practitioner’s Certifications

All fields must be filled out completely.

### Request for Services
Check the appropriate type of service being requested. Only one box may be selected.

<table>
<thead>
<tr>
<th>Request for:</th>
<th>DME</th>
<th>Supplies</th>
<th>Private Duty Nursing</th>
<th>Inpatient Rehabilitation</th>
<th>Other</th>
</tr>
</thead>
</table>

### Client Information
Enter the client’s name, Medicaid number, and date of birth as indicated on the Texas Medicaid eligibility card or form.

| Client Name (Last, First, MI): |
| Medicaid Number (PCN): |
| Date of Birth: / / |

### Supplier/Vendor Information
Enter the name, telephone, fax number, address, TPI, and NPI of the Medicaid Provider who will be providing the requested service or benefit.

| Supplier Name: | Telephone: | Fax Number: |
| Supplier Address: |
| TPI: | NPI: | Taxonomy: | Benefit Code: |

### Diagnosis and Medical Necessity of Requested Services
The prescribing physician must include an ICD-9 diagnosis code with a brief description and complete justification for determination of medical necessity for the requested items or services. If applicable, the prescribing physician should include the client’s height/weight, wound/stage/dimensions, and functional/mobility, or any other documentation to support the medical necessity.

### Date of Service of Requested Services
Enter the From: and To: dates of service for requested services.

| Dates of Service | From: / / | To: / / |
HCPCS Code, Brief Description of Requested Services, and Retail Price
Enter the appropriate and most specific HCPCS code and brief description of the requested item or service.
Enter the appropriate quantity based on the physician’s prescription.
Enter the AWP or MSRP for DME or supplies that have no maximum fee listed in the Texas Medicaid Fee Schedule.
If the item requested is beyond the quantity limit or a custom item, additional documentation must be provided to support determination of medical necessity.

<table>
<thead>
<tr>
<th>HCPCS Code</th>

<td></td>
</tr>
</tbody>
</table>

**Note:** HCPCS codes and descriptions must be provided.

Primary Practitioner’s Certifications
To be completed by the prescribing physician.
The prescribing physician must check all applicable boxes to certify the services or benefits are appropriate for client.

- By prescribing the identified DME and/or medical supplies, I certify to the following:
  - □ The client is under 21 years of age AND
  - □ The prescribed items are appropriate and can safely be used by the client when used as prescribed
  - For Private Duty Nursing, I certify:
    - □ The client’s medical condition is sufficiently stable to permit safe delivery of private duty nursing as described in the plan of care.

The prescribing physician must sign and date the form and print or type physician name.
The prescribing physician’s TPI (if a Texas Medicaid provider), NPI, and license number must be documented. Physicians must indicate their professional license number. If the prescribing physician is out of state, the physician must provide the license number and state of professional licensure. Texas Medicaid TPI and unique physician identifier number (UPIN) numbers are not acceptable as licensure.

**Note:** Signatures from nurse practitioners, physician assistants, and chiropractors will not be accepted. Signature stamps and date stamps are not acceptable.

**Signature of prescribing physician:**

**Printed or typed name of physician:**

### CCP Prior Authorization Private Duty Nursing 6-Month Authorization

<table>
<thead>
<tr>
<th>Client name:</th>
<th>Client Medicaid number:</th>
<th>Date: / /</th>
</tr>
</thead>
</table>

The following criteria must be met before seeking a 6-month authorization of private duty nursing (PDN) services. Remember that authorization is a condition for reimbursement; it is not a guarantee. Each nurse provider should verify the continued Medicaid coverage for each client for each month of service.

- [ ] Client has received PDN services for at least 3 months.
- [ ] Client has had no new significant diagnosis, treatment, illness/injury or hospitalization in at least 6 months that would be expected to affect the need for PDN services.
- [ ] Client’s physician and client/parent/guardian do not anticipate any significant changes in the client’s condition for the requested authorization period.
- [ ] The nurse provider will ensure that a new physician plan of care is obtained within 30 calendar days of the authorization expiration date and will be maintained with the client’s record.
- [ ] The nurse provider will advise TMHP-CCP of any significant changes in the client’s condition, treatments or physician orders which occur during the authorization period if the number of PDN hours needs to change.
- [ ] The client’s physician, client/parent/guardian, and nurse provider understand that the authorization may be changed during the authorization period if the client’s condition or skilled needs change significantly.

**All required acknowledgments must be signed and dated**

I have read and understand the above information.

/ /

Signature of the client/parent/guardian Date

Brief statement of why a maximum 6-month recertification is appropriate for this client:

I have discussed the above information with the client/parent/guardian.

/ /

Signature of nurse provider Date

**To be completed by the client’s physician**

Fax number:

Mailing address City, State, and ZIP code

Your provider has sent you some medical equipment. We want to make sure that you got what you wanted and that it works well. We need to talk to you about the equipment before we can pay for it.

**Call TMHP at 1-888-276-0702.**

Please call us toll-free at 1-888-276-0702 as soon as you can. We are open Monday through Friday from 8 a.m. to 5 p.m., Central Time. If you call us after hours, you can leave a message. Tell us your name, phone number, and the best time to call you back.

**Required Information**

Please have this information with you when you call:

- Name
- Medicaid Number
- Date of birth
- Address (street, city, state, ZIP)
- Provider’s name
- Date you got the equipment
- Details about the equipment

Su proveedor le envió equipo médico. Queremos saber si recibió lo que pidió y si funciona bien. Necesitamos hablar con usted sobre este equipo antes de que paguemos por él.

**Llámenos al 1-888-276-0702.**

Por favor, llámenos gratis lo antes posible al 1-888-276-0702. Nuestras oficinas están abiertas de lunes a viernes, de 8 a.m. a 5 p.m., Hora del Centro. Si nos llama después de estas horas, puede dejar un mensaje con su nombre, número de teléfono y el mejor momento para volver a llamarlo.

**Información que necesitamos**

Cuando llame, tenga esta información a la mano:

- Nombre.
- Número de Medicaid.
- Fecha de nacimiento.
- Dirección (calle, ciudad, estado, código postal).
- Nombre del proveedor.
- Fecha en que recibió el equipo.
- Detalles sobre el equipo.
# Donor Human Milk Request Form

## Part A

The physician must keep up-to-date documentation of medical necessity and the signed written consent form in the child’s clinical record to be considered for Medicaid reimbursement.

- **▢** The medical necessity for breast milk* is:
  - Child’s diagnosis:
  
- **▢** Date of last feeding trial: / /
  
- **▢** Reason donor milk is the only appropriate source of human milk for this client:
  
  *This information must be substantiated by written documentation in the clinical record of why the particular infant cannot survive and gain weight on any appropriate formula, such as an elemental formula or enteral nutritional product, other than donor human breast milk, and that a clinical feeding trial of an appropriate, nutritional product has been considered with each authorization.

- **▢** The parent/guardian has signed and dated an informed consent that the risks and benefits of using banked donor human milk has been discussed with them.

## Part B

The particular donor human milk bank adheres to quality guidelines consistent with the Human Milk Banking Association of North America, or other standards established by HHSC.

- **▢** Milk Bank Name:  
  - Milk Bank Fax Number:

</tbody>
</table>

The external insulin pump must be ordered by, and the client’s follow-up care must be managed by, a physician with experience managing clients with insulin infusion pumps and who works closely with a team including nurses, diabetic educators, and dieticians who are knowledgeable in the use of insulin infusion pumps.

The following information is the minimum documentation required for consideration of medical necessity and must be submitted with a completed, signed, and dated Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form. (Attach additional documentation as needed.)

1. Lab values to include current and past blood glucose levels and glycosylated hemoglobin (Hb/A1C) levels including the date of lab draws.

2. Client history of severe glycemic excursions, hypoglycemic/hyperglycemic reactions, nocturnal hypoglycemia, any extreme insulin sensitivity, and/or very low insulin requirements.

3. Client history of any wide fluctuations in blood glucose level before mealtimes.

4. Client history of any dawn phenomenon where fasting blood glucose level often exceeds 200 mg/dL.
**CH.8 Home Health Plan of Care (POC)**

Write legibly or type. Claims will be denied if POC is illegible or incomplete.

### Nursing Addendum to Plan of Care (CCP)—1 of 7

<table>
<thead>
<tr>
<th>Client name:</th>
<th>Medicaid number:</th>
<th>Date: / /</th>
</tr>
</thead>
</table>

#### Documentation Requirements

All of the following documents must be complete and received by Texas Medicaid Healthcare Partnership (TMHP) before review or authorization of PDN services can occur:

1. All components of the Nursing Addendum to Plan of Care (CCP) completed and submitted with
2. The Home Health Plan of Care (POC) form, and
3. CCP Prior Authorization Request Form (*additional information may be attached*).

- If the client is under 18 years of age, he/she must reside with an identified responsible adult/parent/guardian who is either trained to provide nursing care, or is capable of initiating an identified contingency plan when the scheduled PDN is unexpectedly unavailable.

<table>
<thead>
<tr>
<th>Name:</th>
<th>Relationship:</th>
<th>Telephone:</th>
</tr>
</thead>
</table>

- The client has an identified contingency plan.
- The client has a primary physician who provides ongoing health care and medical supervision.
- The place(s) where PDN services will be delivered supports the health and safety of the client.
- If applicable, there are necessary backup utilities, communication, fire, and safety systems available and functional.

#### 1. Nursing Care Plan Summary

PDN services are based on a nursing assessment and nursing care plan established by the nurse provider in collaboration with the physician, client, and family. The nursing care plan provides a systematic way to document care given, client responses to interventions, and progress toward the goals of care.

**Problem list:**

#### 2. Summary of Recent Health History—For initial authorization or 90-day summary for extension of PDN services

Include recent hospitalizations, emergency room visits, surgery (may submit a discharge summary), illnesses, changes in condition, changes in medication or treatment, parent/guardian update, other pertinent observations.

#### 3. Rationale for PDN Hours—To either increase, decrease, or stay the same. Also address plans to decrease PDN hours.

#### 5. Acknowledgement

**Must be signed by the client/parent/guardian and the nurse provider.**

By signing this form, the client/parent/guardian and the nurse provider acknowledge:

- Discussion and receipt of information about the CCP Private Duty Nursing service,
- PDN services may increase, decrease, stay the same, or be terminated based on a client’s need for skilled care,
- PDN is not authorized for respite, child care, activities of daily living, or housekeeping,
- All required criteria from the first page of this addendum are met, and completed documentation is submitted to TMHP,
- Participation in the development of the Nursing Care Plan for this client, and
- Emergency plans are part of the client’s care plan and include telephone numbers for the client’s physician, ambulance, hospital, and equipment supplier and information on how to handle emergency situations.

The client/parent/guardian agrees to follow through with the plan of care as prescribed by the client’s physician.

New device provided for purchase? □ Yes □ No

Equipment designated for clinical use only is not considered appropriate for use in the home

Note: Oxygen dependent is defined as ongoing, regular need for use of supplemental oxygen for a significant portion of the day to maintain oxygen saturation. This does not include: PRN use; use only when sick; use only when suctioning; use for desaturation that occurs only when crying; use for desaturation that occurs only with seizure activity.

The following information must be completed by the physician

Diagnosis and Basis for Medical Necessity of requested services:

Dates of Service requested for Prior Authorization From: / / To: / /

□ Client is ventilator and/or oxygen dependent

□ Client is ventilator dependent hours per day □ Client is oxygen dependent hours per day

□ Client is weaning from oxygen and/or a ventilator

□ Anticipated length of monitor need: □ Months: □ 1-3 years □ More than 3 years

□ Who will respond to the monitor alarm?

□ Can the patient’s medical needs be met with intermittent “spot check” of oxygen saturations? □ Yes □ No

□ What is the medical basis for need of continuous monitoring?

□ Is the client receiving any nursing services such as PDN, Home Health Visits, MDCP, CBA, or Private Insurance?

Effective Date_01012009/Revised Date_12172008
Medicaid Dental Policy Regarding Criteria for Dental Therapy Under General Anesthesia–Attachment 1

Purpose: To justify I.V. Sedation or General Anesthesia for Dental Therapy, the following documentation is required in the Child’s Dental Record.

Elements: Note those required* and those as appropriate**:

1) The medical evaluation justifying the need for anesthesia
2) Description of relevant behavior and reference scale
3) Other relevant narrative justifying the need for general anesthesia.
4) Client’s demographics, including date of birth.
5) Relevant dental and medical history.
6) Dental radiographs, intraoral\perioral photography and/or diagram of dental pathology.
7) Proposed Dental Plan of Care.
8) Consent signed by parent\ guardian giving permission for the proposed dental treatment and acknowledging that the reason for the use of IV sedation or general anesthesia for dental care has been explained.
10) The parent\ guardian dated signature on the Criteria for Dental Therapy Under General Anesthesia form attesting that they understand and agree with the dentist’s assessment of their child’s behavior.
11) Dentist’s attestation statement and signature, which may be put on the bottom of the Criteria for Dental Therapy Under General Anesthesia form or included in the record as a stand alone form.

“I attest that the client’s condition and the proposed treatment plan warrant the use of general anesthesia. Appropriate documentation of medical necessity is contained in the client’s record and is available in my office.”

REQUESTING DENTIST’S SIGNATURE: ____________________________DATE: _____________

Effective Date_01012009/Revised Date_12172008
The referral form assists in relaying correct and pertinent information to the person or agency receiving the referral. It may be mailed or hand-carried by the client. When the form is returned, it should be placed in the client’s record.

**Receiving/Referring Agencies**
The name and address of both agencies should be completed to allow communication if additional information is necessary and to return a completed referral. If the referral is to a physician and the client is not able to name the physician who will be seen, this space may be completed MD/DO.

**Identifying Information**
This section concerning patient information should be as complete as possible. This section will assist the receiving agency to locate the client.

**Reason for Referral**
This section should contain information which is relevant to the referral. It may contain an assessment with request for further evaluation, or a request for intervention by a physician, hospital, or other agency involved with the client. Other information pertinent to the referral, such as family history or involvement with other agencies, may also be included.

**Release of Information**
This section must be signed.

**Findings/Services Rendered**
This final section provides the receiving agency the vehicle with which to transmit information back to originator of referral. Form may be mailed or carried by the client.

**Certification**

I attest that this client's health care is medically complex and multidisciplinary.

Medically complex is the health care needed by a Medicaid beneficiary achieves the designation of "medically complex" when the approved plan of care necessitates a clinical professional, practicing within the scope of their license and in the context of a medical home, coordinate ongoing treatment to ensure its safe and effective delivery.

Multidisciplinary Care is the coordination of clinician ordered medically necessary health care that requires the collaboration of two or more medical, educational, social, developmental or other professionals in order to properly devise and implement the clinician-developed plan of medical care. For Medicaid coverage, multidisciplinary health care must include medically necessary services provided by program-enrolled clinical providers. Development and implementation of the plan of medical care may, in addition, need to take into account other related care provided by nonclinical providers as required to address the overall health needs of a client.

DATE of my last Face-to-Face inpatient or outpatient evaluation and management visit with the client: _____/_____/____

I request a six-month authorization from _____/_____/_____ to _____/_____/_____ for non-face-to-face care coordination services for the client named on this form. I attest that these services are essential to provide quality health care for the identified client. I request authorization for the following types of services in the stated six-month period (check all that apply):

- ☐ Non-face-to-face prolonged services (authorization and reimbursement are limited to a maximum of 90 minutes once per client per provider*).
  - ☐ 99358  ☐ 99359

  * I understand that I may submit a statement of medical necessity or progress note with a claim or with this authorization form for consideration of authorization of services that exceed the Texas Medicaid Program limits indicated above. Documentation must support a significant change in the client's clinical condition.

- ☐ Care plan oversight:  
  - Home or other  ☐ Home health**  ☐ Hospice**  ☐ Nursing Facility
  - ☐ 99339  ☐ 99374  ☐ 99377  ☐ 99379
  - ☐ 99340  ☐ 99375  ☐ 99378  ☐ 99380

  (Authorization and reimbursement are limited to one service a month per six-month authorization period without exception.)

- ☐ Team conferences (authorization and reimbursement are limited to a maximum of one service per six-month authorization period. Authorization of additional team conferences may be considered for a client when there is documentation on this form of a change in the client’s medical home provider.)  ☐ 99367

Effective Date_10/24/2008/Revised Date_04/07/2010
### Client Information

<table>
<thead>
<tr>
<th>First name:</th>
<th>Last name:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Medicaid number (PCN):**

### Certification (continued)

I attest that I am the medical home provider for the client and, as such, in coordination with the family and client, I have generated or updated (within the prior 12 months), a comprehensive care plan for the client which is documented in the client’s medical record, has been shared with the family or client, and includes the following components, at a minimum:

- A current medical summary, encompassing all disciplines and all aspects of the client’s care, and containing key information about the client’s health (e.g., conditions, complexity, medications, allergies, past surgical procedures, etc.).
- A current list of the main concerns, issues, and problems as well as key strengths or assets and the related current clinical information including a list of all diagnoses with ICD-9-CM diagnosis codes. Planned action steps to improve or enhance health outcomes.
- Planned action steps and interventions to address the concerns and to sustain or build strengths, with the expected outcomes.
- Disciplines involved with the client’s care and how the multiple disciplines will work or are working together to meet the client’s needs. Explain how the multidisciplinary approach will benefit the client’s needs.
- Short-term and long-term goals with timeframes.

### Documentation

One of the following forms of documentation must be submitted with this request in order to obtain prior authorization for non-face-to-face care coordination services:

- Formal and written care plan.
- A progress note detailing care coordination planning and activities.
- A letter stating medical necessity for care coordination, including information on the care plan and care coordination services.

A current wheelchair seating assessment conducted by a physician, physical or occupational therapist must be completed for purchase of or modifications (including new seating systems) to a customized wheelchair. Please attach manufacturer information, descriptions, and an itemized list of retail prices of all additions that are not included in base model price.

Complete Sections I-VI for manual wheelchairs. Complete Sections I-VII for power wheelchairs.

**Client Information**

<table>
<thead>
<tr>
<th>First name:</th>
<th>Last name:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Medicaid number:</td>
<td>Date of birth:</td>
</tr>
<tr>
<td>Diagnosis:</td>
<td></td>
</tr>
<tr>
<td>Height:</td>
<td>Weight:</td>
</tr>
</tbody>
</table>

**I. Neurological Factors**

Indicate client’s muscle tone: ☐ Hypertonic ☐ Absent ☐ Fluctuating ☐ Other

Describe client’s muscle tone:

Describe active movements affected by muscle tone:

Describe passive movements affected by muscle tone:

Describe reflexes present:
### II. Postural Control

<table>
<thead>
<tr>
<th></th>
<th>Good</th>
<th>Fair</th>
<th>Poor</th>
<th>None</th>
</tr>
</thead>
<tbody>

</tr>
</tbody>
</table>

### III. Medical/Surgical History And Plans:

- **Is there history of decubitis/skin breakdown?**
  - Yes
  - No
  
  *If yes, please explain:*

- **Describe orthopedic conditions and/or range of motion limitations requiring special consideration (i.e., contractures, degree of spinal curvature, etc.):**

- **Describe other physical limitations or concerns (i.e., respiratory):**

- **Describe any recent or expected changes in medical/physical/functional status:**

- **If surgery is anticipated, please indicate the procedure and expected date:**

### IV. Functional Assessment:

- **Ambulatory status:**
  - Nonambulatory
  - With assistance
  - Short distances only
  - Community ambulatory

- **Indicate the client’s ambulation potential:**
  - Expected within 1 year
  - Not expected
  - Expected in future within ___ years
IV. Functional Assessment:

Wheelchair Ambulation:  Is client totally dependent upon wheelchair?  
☐ Yes  ☐ No  
*If no, please explain:*

Indicate the client’s transfer capabilities:  
☐ Maximum assistance  ☐ Moderate assistance  
☐ Minimum assistance  ☐ Independent  

Is the client tube fed?  
☐ Yes  ☐ No  
*If yes, please explain:*

Feeding:  
☐ Maximum assistance  ☐ Moderate assistance  
☐ Minimum assistance  ☐ Independent  

Dressing:  
☐ Maximum assistance  ☐ Moderate assistance  
☐ Minimum assistance  ☐ Independent  

Describe other activities performed while in wheelchair:

V. Environmental Assessment

Describe where client resides:

Is the home accessible to the wheelchair?  
☐ Yes  ☐ No  

Are ramps available in the home setting?  
☐ Yes  ☐ No  

Describe the client’s educational/vocational setting:

Is the school accessible to the wheelchair?  
☐ Yes  ☐ No  

Are there ramps available in the school setting?  
☐ Yes  ☐ No  

If client is in school, has a school therapist been involved in the assessment?  
☐ Yes  ☐ No  

Name of school therapist:
### V. Environmental Assessment

Describe how the wheelchair will be transported:

Describe where the wheelchair will be stored (home and/or school):

Describe other types of equipment which will interface with the wheelchair:

### VI. Requested Equipment:

Describe client’s current seating system, including the mobility base and the age of the seating system:

Describe why current seating system is not meeting client’s needs:

Describe the equipment requested:

Describe the medical necessity for mobility base and seating system requested:

Describe the growth potential of equipment requested in number of years:

Describe any anticipated modifications/changes to the equipment within the next three years:

A.1 Claim Forms

Providers must order CMS-1500 and ADA Dental Claims Forms from the vendor of their choice. Copies cannot be used. Claims filing instructions and examples of the claim forms are located in Section 6: Claims Filing (Vol. 1, General Information).

A.2 Child Health Clinical Records

The use of forms ECH 1–7 is optional. These forms were developed to help providers document all components of the medical checkup. THSteps requires the following forms: Hearing Checklist for Parents, Tuberculosis (TB) Questionnaire, Risk Assessment for Lead Exposure, and the DSHS State Laboratory forms. All of these forms can be downloaded from the THSteps website at http://dshs.state.tx.us/thsteps/forms.shtm. Lead poisoning screening questionnaires can be downloaded from the Texas Childhood Lead Poisoning Prevention Program (TX CLPPP) website at www.dshs.state.tx.us/lead/providers.shtm.

Forms CH-9W through CH-12W may be downloaded from the Centers for Disease Control and Prevention (CDC) website at www.cdc.gov/growthcharts/clinical_charts.htm.

For forms for documenting medical checkups for adolescents, please refer to sources such as Bright Futures: Guidelines for Health Supervision of Infants, Children, and Adolescents (2nd edition, revised), located at www.brightfutures.org or the Guidelines for Adolescent Preventive Services (GAP) Implementation Materials located at www.ama-assn.org/ama/pub/category/1981.html. For nutritional screening for all ages, refer to Bright Futures.
A.3 Guidelines for Tuberculosis Skin Testing
For information on procedures for tuberculosis skin testing, refer to the Department of State Health Services (DSHS) tuberculosis web page at www.dshs.state.tx.us/idcu/disease/tb/. Tuberculosis screening questionnaires can be downloaded from the Tuberculosis Elimination Division website at www.dshs.state.tx.us/idcu/disease/tb/forms/default.asp#clinic.

A.4 Laboratory Forms
For information on procedures for submission of laboratory forms, refer to the DSHS Laboratory Services Section’s web page at www.dshs.state.tx.us/lab/MRS_forms.shtm.
## Child Health History

### Department of State Health Services
### Child Health Record

#### Preventive Health Visit

**Pregnancy and Birth**
- G ____  P ____  AB ____
- Total number of living children ______
- Weight gain/loss ______
- Mother's age at birth ______
- Number of years between previous pregnancy and this child ______
- Trimester Prenatal Care Began: 1 2 3

**Prenatal Care Provider**:________

**Vitamins**: Y  N
**Iron**: Y  N

If child over 5 years: uncomplicated pregnancy, labor, delivery and nursery course: Y  N *

*If yes, proceed with "Child's Medical History."

#### Maternal Complications
- Vaginal bleeding

Mental Health Interview Tool/Referral Form (Ages 0–2 Years)

For this age group you will obtain information from the parent/caregiver and from your own observations of the child. Circle items of concern. * The presence of any of these symptoms or behaviors may signal that the child is in crisis, and efforts should be made to secure prompt evaluation.

**Feelings:** Does your child display feelings that concern you or seem out of the ordinary?

- Anxious
- Cries excessively
- Cries too little

**Behavior:** Does your child display behavior that concerns you or seems out of the ordinary for his/her age?

- Overactive
- Listlessness

**Social Interaction:** Do you have concerns about how your child gets along with you? Other family members or adults? Siblings?

- No eye contact or smile
- Stiffens and arches
- Not responsive

**Thinking:** Do you think your child’s development is normal for age?

- No communication skills (pointing to request an object) or efforts to make words

**Physical Problems:** Do you have any concerns about your child’s physical health? If physical problems exist, have they been medically evaluated?

- Low weight or weight loss
- Frequent vomiting
- Eating problem (poor appetite, eats nonfoods)
- Sleeping problem (frequent night waking)
- Lethargic

**Other:** Are there any situations which are causing your family particular stress at this time? Has this child or his/her parents been subject to neglect, physical, sexual, or emotional abuse? If yes, what form, when, treatment initiated, etc.? Did the mother of this child use drugs or drink alcohol during the pregnancy?

**Comments:**

**Signature/Title:** ___________________________________________________________
Mental Health Interview Tool/Referral Form (Ages 3–9 Years)

Child’s Name: _______________________
Birth Date: _________________________
Ages 3 to 9 Date: _______________________

For this age group you will obtain information from the parent/caregiver and from your own observations of the child’s behavior. If possible, interview the parent alone when asking questions about sexual or physical abuse. Circle items of concern. * The presence of any of these symptoms or behaviors may signal that the child is in crisis, and efforts should be made to secure prompt evaluation.

Feelings:
Does your child display feelings that concern you or seem out of the ordinary for age?

- Restless
- Sad or cries easily
- Excessively guilty
- Lack of remorse
- Irritable, angers or temper tantrums easily
- Sulen
- Fearful or anxious

Behavior:
Does your child frequently display behavior that seems out of the ordinary for age?

- Problems in school
- * Harms other children or animals
- Lacks interest in things s/he used to enjoy
- Engages in sexual play with others, toys, animals
- * Destroys possessions or other property
- Steals
- Refuses to talk
- * Sets fires
- Overactive
- * Self-destructive
- * Has been in trouble with the police (older child)

Social Interaction:
Do you have concerns about how child gets along with you, other family members, playmates, other adults?

- Withdraws including no eye contact
- Clings excessively
- Difficulty making and keeping friends
- Defiant, a discipline problem
- Severe or frequent tantrums
- Aggressive
- Argues excessively
- Refuses to go to school
- Prefers to be alone

Thinking:
Have you noticed any of the following to be a problem for your child?

- * Frequently confused
- Daydreams excessively
- Distracted, doesn’t pay attention
- * Bizarre thoughts
- Mistrustful
- * Sees or hears things that are not there (excluding imaginary friends in younger children)
- Blames others for his/her misdeeds or thoughts
- * Talks about death
- * Frequent memory loss
- Schoolwork is slipping (grades going down)

Physical Problems:
Do you have any concerns about the following physical signs?

- Daytime wetting
- Soils pants
- Refusal to eat
- Headaches
- Excessive weight loss or gain
- Sleep problems, nightmares, sleep-walking, early waking
- Vomits frequently
- Frequent stomachaches
- Lacks energy

Other:
Is this child accident-prone?
Are there any situations that are causing your family particular stress?
Has this child or his/her parents been subject to neglect, physical, sexual or emotional abuse? If yes, what type, when, treatment, etc.
* Is this child at risk for out-of-home placement because of behavior problems?

Comments:

Signature/Title: ____________________________________________
## Mental Health Interview Tool/Referral Form (Ages 10–12 Years)

**Mental Health Interview Tool/Referral Form**

| Child’s Name: ____________________________ |
| **Birth Date:** __________________________ |

**Ages 10 to 12**

Date: _____________________________________

Both child and parent will be able to provide information, and it is important to incorporate the child into the interview process. In each section, a sample question is directed toward the parent. To the extent possible, elicit the child's perception of the parent's response with a question such as “Do you agree with what your Mom is saying?” It may be useful to allow time for discussion with the caregiver alone. The child should be interviewed alone when asking questions about sexual or physical abuse and about substance abuse. Circle items of concern.

* The presence of any of these symptoms or behaviors may signal that the child is in crisis, and efforts should be made to secure prompt evaluation.

### Feelings:

Does your child (do you) have feelings that concern you or seem out of the ordinary for age?

- Restless
- Sad or cries easily
- Guilty
- Irritable or angers easily
- Sullen
- Fearful or anxious
- Bored

### Behavior:

Does your child (do you) behave in ways that seems out of the ordinary for age?

- Problems in school
- * Threatens or harms other children or animals
- Lacks interest in things s/he used to enjoy
- Engages in sexual play with others, toys, animals
- * Destroys possessions or other property
- Steals
- Refuses to talk
- * Sets fires
- Overactive
- * Has been in trouble with the police
- * Self-destructive

### Social Interaction:

Do you have concerns about how your child (you) gets along with family members, other adults or children?

- Prefers to be alone
- Difficulty making and keeping friends
- Defiant, a discipline problem
- Aggressive
- Argues excessively
- Refuses to go to school

### Thinking:

Have you noticed any of the following to be a problem for your child (you)?

- * Frequently confused
- Daydreams excessively
- Distracted, doesn’t pay attention
- Mistrustful
- * Sees or hears things that are not there
- Blames others for his/her misdeeds or thoughts
- * Talks about death or suicide
- * Frequent memory loss
- * Bizarre thoughts
- Schoolwork is slipping (grades going down)

### Physical Problems:

Do you have any concerns about the following physical signs? Has this been evaluated?

- Lacks energy
- Uses laxatives
- Vomits frequently
- Food refusal, secretive eating
- Frequent stomachaches
- Headaches
- Excessive weight loss or gain
- Sleep problems, nightmares, sleep-walking, early waking, frequent night waking

### Other:

Is this child (are you) accident-prone?

Are there any situations that are causing your family particular stress?

- Has this child or his/her parents been subject to neglect, physical, sexual or emotional abuse? If yes, what type, when, treatment, etc.
- * Is this child at risk for out-of-home placement because of behavior problems?
- Has the child (have you) been treated for mental health problems or substance abuse?

### Substance Abuse Questions:

(May want to use screens such as the TACE, CAGE, MAST to obtain information concerning substance abuse.)

- Has been identified as a problem

### Comments:

Mental Health Interview Tool/Referral Form (Ages 13–20 Years)

Child’s Name: ________________________
Birth Date: ___________________________
Date: ________________________________

You may begin with a joint interview or begin with separate interviews with the parent/caregiver and adolescent. It is preferable to interview the adolescent first. Circle items of concern. * The presence of any of these symptoms or behaviors may signal that the child is in crisis, and efforts should be made to secure prompt evaluation.

Feelings:
Do you (does your teen) have feelings that concern you or seem out of the ordinary for (their) age?

- Restless
- Sad or cries easily
- Guilty
- Irritable or angers easily
- Sullen
- Fearful or anxious
- Bored

Behavior:
Do you (does your child) behave in ways that seems out of the ordinary for your (their) age?

- Problems at school or work
- * Threatens or harms other children or animals
- Lacks interest in things s/he used to enjoy
- Engages in sexual play with others, toys, animals
- * Destroys possessions or other property
- Steals
- Refuses to talk
- * Sets fires
- Overactive
- * Has been in trouble with the police
- * Self-destructive

Social Interaction:
Do you have concerns about how (you) your child gets along with family members, other adults, or peers?

- Prefers to be alone
- Difficulty making and keeping friends
- Defiant, a discipline problem
- Aggressive
- Argues excessively
- Refuses to go to school

Thinking:
Have you noticed any of the following to be a problem for you (your child)?

- * Frequently confused
- Daydreams excessively
- Distracted, doesn’t pay attention
- Mistrustful
- * Sees or hears things that are not there
- Blames others for his/her misdeeds or thoughts
- * Talks about death or suicide
- * Frequent memory loss
- * Bizarre thoughts
- Schoolwork is slipping (grades going down)

Physical Problems:
Do you have any concerns about the following physical signs? Has this been evaluated?

- Lacks energy
- Uses laxatives
- Vomits frequently
- Food refusal, secretive eating
- Frequent stomachaches
- Headaches
- Excessive weight loss or gain
- Sleep problems, nightmares, sleep-walking, early waking, frequent night waking

Other:
Are you (is this child) accident-prone?
Are there any situations that are causing your family particular stress?
Have you (has this child) or your (his/her) parents been subject to neglect, physical, sexual or emotional abuse? If yes, what type, when, treatment, etc.?

- * Are you (is this child) at risk for out-of-home placement because of behavior problems?
- Have you (has this child) been treated for mental health problems or substance abuse?

Substance Abuse Questions:
(May want to use screens such as the TACE, CAGE, MAST to obtain information concerning substance abuse.)

- Has been identified as a problem

**To the Parent:** If you will assist us by filling out this form, we can help you find your child's strengths and any problem areas, too. Your answers will help us to know if we need to talk with you and find out more about your child. Please check all items below that are true for your child. Some of the behaviors noted may be normal but if you are concerned please let us know.

- **Infants**
  - Fearful
  - Cries too much
  - Cries too little

- **1 to 2 Years**
  - Is irritable
  - Is angry
  - Is sad
  - Is sullen

- **Infants**
  - Is overactive
  - Is listless (has little energy)

- **1 to 2 Years**
  - Is overactive
  - Is listless (has little energy)
  - Harms others
  - Has temper tantrums often

- **Infants**
  - (>8 months) Does not point to or ask for things or try to make words

- **1 to 2 Years**
  - Does not trust others
  - Has problems concentrating or paying attention
|**Physi** | Do you have any concerns about these things?  ❑ Yes   ❑ No  
|**cals** | If you think your child may have a health problem, has he/she seen a doctor  
|         | or nurse about the problem?  ❑ Yes   ❑ No  
|         | Infants to 2 Years  
|         | ❑ Is low weight or has a lot of weight  
|         | ❑ Vomits (throws up) often  
|         | ❑ Has eating problems  
|         | (poor appetite, eats non-foods)  
|         | ❑ Has sleeping problems (wakes a lot at night)  
|         | ❑ Has little energy  

|**Ot** | Is anything causing your family stress right now?  ❑ Yes   ❑ No

### Mental Health Parent Questionnaire (Ages 10–12 Years)

#### Mental Health Parent Questionnaire

**Child’s Name:** __________________________

**Birth Date:** __________________________

**Today’s Date:** __________________________

**Ages 10 to 12 Years**

**To the Parent:** If you will assist us by filling out this form, we can help you find your child’s strengths and any problem areas, too. Your answers will help us to know if we need to talk with you and find out more about your child. Please check all items below that are true for your child. Some of the behaviors noted may be normal but if you are concerned please let us know.

<table>
<thead>
<tr>
<th><strong>Feelings</strong></th>
<th></th>
<th><strong>Behavior</strong></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>✓ Is restless</td>
<td>✓ Is sullen</td>
<td>✓ Has problems in school</td>
<td>✓ Refuses to talk</td>
</tr>
<tr>
<td>✓ Is sad or cries easily</td>
<td>✓ Is fearful</td>
<td>✓ Threatens or harms other children or animals</td>
<td>✓ Sets fires</td>
</tr>
<tr>
<td>✓ Is guilty</td>
<td>✓ Is bored</td>
<td>✓ Lacks interest in things s/he used to enjoy</td>
<td>✓ Is overactive</td>
</tr>
<tr>
<td>✓ Is irritable or angers easily</td>
<td></td>
<td>✓ Is involved in sexual activity</td>
<td>✓ Hurts himself or herself</td>
</tr>
</tbody>
</table>

**Social Interaction**

Do you have any concerns about how your child (you) get(s) along with family members? ✓ Yes ✓ No

With other adults? ✓ Yes ✓ No

With other children? ✓ Yes ✓ No

- Prefers to be alone
- Has a hard time making and keeping friends
- Is defiant, a disciplinary problem
- Picks on others a lot or often gets into fights (hitting, etc.)
- Argues too much
- Will not go to school

**Thinking**

Are any of these a problem for your child (you)? ✓ Yes ✓ No

- Is frequently confused (does not understand what is going on)
- Daydreams a lot
- Is distracted, doesn’t pay attention
- Has very strange thoughts
- Schoolwork is slipping (grades going down)
- Does not trust others
- Sees or hears things that are not there
- Blames others for his/her misdeeds or thoughts
- Talks about death or suicide a lot
- Often cannot remember things

De 13 a 20 Años de Edad

Para los Padres: Si nos ayuda llenando este formulario, podremos ayudarle a encontrar las áreas fuertes que tenga su hijo y también cualquier área problemática. Sus respuestas nos ayudarán a saber si necesitamos hablar con su hijo y saber más sobre él. Favor de marcar todas las características abajo que son ciertas para su hijo. Algunos de los comportamientos en las listas tal vez sean normales, pero si usted está preocupado, favor de informarnos.

Parentesco con el paciente:_________________________________________
The risk assessment questionnaire contains 6 questions that appear on page 2, and is designed to be administered to the parent by the healthcare provider. Questions are in English and Spanish to assist with Spanish speaking parents.

Instructions:
- This questionnaire may be used with any child, whether or not enrolled in Texas Health Steps.
- Medicaid requires a blood lead test for all Texas Health Steps patients at 12 months and 24 months. For children less than 6 years of age, complete a blood lead test at any first checkup after age 12 and 24 months if there is no evidence of a previous blood lead test.
- At any visit, you may choose to perform a blood lead test rather than use the risk assessment questionnaire.
- Refer to the table below for scheduling use of the risk assessment questionnaire.
- A “yes” or “don’t know” answer to any question on the risk assessment questionnaire indicates that a blood lead test should be administered.

Contamination from a parent, relative, or friend with jobs or hobbies like these?

- Radiator repair
- Pottery making
- Lead smelting
- Welding
- Making fishing weights
- Chemical construction or repair
- Battery manufacture or repair
- Burning lead-painted wood
- Automotive repair shop or junkyard
- Going to a firing range or reloading bullets

Sources of lead in food and remedies?

- Imported or glazed pottery such as a Mexican bean pot
- Imported candy, (like Chaca Chaca) especially from Mexico
- Chemical preparation
- Valve and pipe fittings
- Brass/copper foundry
- Refinishing furniture
- Other:
- Foods canned or packaged outside the U.S.
- Remedies such as greta, azarcon, alarcon, alkohl, bal golfi, coral, ghasard, liga, pay-loo-ah, rueda

Cuestionario de Padre

<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Contaminación de un padre, pariente, o amigo con trabajos o pasatiempos como estas?

- Reparación de radiadores
- Fabricación de cerámica
- Industria del plomo
- Soldadura
- Fabricación de pesas para pescar
- Construcción o reparación de casas
- Fabricación o reparación de baterías
- Quema de madera pintada con plomo
- Taller mecánico para autos o lote de chatarra
- Ir a un campo de tiro o recargar balas

Fuentes de plomo en comidas y remedios?

- Productos de cerámica importada o con recubrimiento de barniz, como una olla para frijoles de México
- Productos enlatados o empacados fuera de los Estados Unidos
- Dulces importados, (como Chaca Chaca) especialmente de México
- Remedios tradicionales como greta, azarcon, alarcon, alkohl, bal golfi, coral, ghasard, liga, pay-loo-ah, rueda
- Pildoras alimenticias con excepción de las vitaminas

A.5 Tuberculosis Screening and Education Tool

This screening tool for tuberculosis (TB) exposure risk is to be used annually to determine the need for tuberculin skin testing. In areas of high TB prevalence, the screening tool need not be done at visits for which tuberculin skin testing is required: 1 year of age, once between 4 years of age and 6 years of age, and once between 11 years of age and 17 years of age.

The questions in this screening tool are intended as a minimum screen. Follow-up questions may be necessary to clarify hesitant or ambiguous responses. Questions specific to TB exposure risks in the client’s community may need to be added.

- If all the answers are unqualified negatives, the client is considered at low risk for exposure to TB and will not need tuberculin skin testing.
- If the answer to any question is “Yes” or “I don’t know,” the client should be tuberculin skin tested.
- In the case of the client for whom an answer in the past of “Yes” or “I don’t know” prompted a skin test, which was negative, the skin test may not have to be repeated annually.
- The decision to administer a skin test must be made by the medical provider based upon an assessment of the possibility of exposure. A negative tuberculin skin test never excludes tuberculosis infection or active disease.
- Bacillus of Calmette and Guérin (BCG) vaccinated clients should also have the screening tool administered annually. Previous BCG vaccination is not a contraindication to tuberculin skin testing. Positive tuberculin skin tests in BCG vaccinated children are interpreted using the same guidelines used for non-BCG vaccinated children.
- Clients who have had a positive TB skin test in the past (whether treated or not), should be re-evaluated at least annually by a physician for signs and symptoms of TB.

Care of clients who are newly discovered to be tuberculin skin test positive includes:

- An evaluation for signs and symptoms of TB.
- A chest X-ray to rule out active disease.
- Oral medications to prevent progression to active disease or multi-drug therapy if active disease is present.
- Referral for consultation by a pediatric TB specialist is recommended if active disease is present.
- A report to the local health authority for investigation to find the source of the infection.

Feel free to photocopy the screening and education tool from this publication.
TB Questionnaire

Name of Child ___________________________________________ Date of Birth ________________

Organization administering questionnaire ____________________________ Date _______________________

Tuberculosis (TB) is a disease caused by TB germs and is usually transmitted by an adult person with active TB lung disease. It is spread to another person by coughing or sneezing TB germs into the air. These germs may be breathed in by the child.

Adults who have active TB disease usually have many of the following symptoms: cough for more that two weeks duration, loss of appetite, weight loss of ten or more pounds over a short period of time, fever, chills and night sweats.

A person can have TB germs in his or her body but not have active TB disease (this is called latent TB infection or LTBI).

Tuberculosis is preventable and treatable. TB skin testing (often called the PPD or Mantoux test) is used to see if your child has been infected with TB germs. No vaccine is recommended for use in the United States to prevent tuberculosis. The skin test is not a vaccination against TB.

We need your help to find out if your child has been exposed to tuberculosis.

EF12-11494 TB Questionnaire for Children (Rev. 08/04)
Cuestionario de Tuberculosis

Nombre del niño o niña ____________________________
Organización ________________________________________ Fecha __________________________

La Tuberculosis (TB) es una enfermedad causada por gérmenes de TB y en la mayoría de los casos es trasmitida por una persona adulta con tuberculosis pulmonar activa. Se transmite a otra persona por la tos y por el estornudo al expelir gérmenes de TB al aire que pueden ser respirados por los niños.

Los adultos que tienen la enfermedad activa casi siempre tienen varios de los siguientes síntomas: tos con duración de más de dos semanas, pérdida de apetito, pérdida de peso de diez libras o más en un período corto de tiempo, fiebre, escalofríos y sudores nocturnos.

Una persona puede tener gérmenes de TB en su cuerpo pero no tener la enfermedad activa. Esto se llama infección latente de TB (o LTBI por su sigla en inglés).

La TB es prevenible y curable. La prueba tuberculínica, también llamada PPD o prueba de Mantoux, se utiliza para saber si su niño o niña ha sido infectado/a con el germen de TB. No se recomienda ninguna vacuna para prevenir la tuberculosis. La prueba tuberculínica no es una vacuna contra la tuberculosis.

Necesitamos de su ayuda para saber si su niño/niña ha sido expuesto/a a la tuberculosis.

In order to receive State-supplied PPD at no cost to me, I, on behalf of myself and any and all practitioners associated with this medical office, group practice, health department, community/migrant/rural health clinic, or other organization of which I am the physician in charge or equivalent, agree to the following:

1. I agree to provide/arrange training for all personnel in administering, reading, and recording the TB skin test results. I agree to instruct all patients that the TB skin test is a two (2)-part test and they must return in 48 to 72 hours for their test to be read by trained personnel so the test result can be documented. I agree to have all results documented in millimeters and a negative test will be recorded as 0 mm not negative. I agree to supply written documentation of the training to administer TB skin testing, reading and recording upon request of the health department issuing the PPD.

2. I agree to do the screening for TB risk factors on each patient and ONLY place the TB skin test on those patients that have a TB risk factor or have some other medical necessity that is documented in their chart or are entering foster care.

3. I agree to submit TB-400 forms or refer clients to the health department for medical evaluation or additional follow-up when they have latent TB infection (positive skin test result and a negative chest x-ray).

4. In accordance with the Texas Administrative Code, Title 25, Part 1, Chapter 97, Subchapter A, I shall report to the local health authority any known or suspected case of TB within one working day and any new diagnosis of latent TB infection within one week.

5. I agree to submit the Monthly Tuberculin Skin Testing Form (EF12-12168). This form will be sent at the first of each month showing our TB testing numbers for the previous month. I agree to monitor my stock levels so that emergency orders will be kept to a minimum.

6. As a private clinic or health care facility, I agree to use this PPD only for TB screening of children as part of a Texas Health Steps medical check-up and to identify and document TB risk factors before placing the PPD.

7. Either the State or I may terminate this agreement at any time. My failure or the failure of any others outlined above to comply with these requirements will be grounds for the State to terminate this agreement.

TVFC Patient Eligibility Screening Record

TEXAS VACCINES FOR CHILDREN PROGRAM (TVFC)
PATIENT ELIGIBILITY SCREENING RECORD

Purpose: To determine eligibility and the source of funds for the Texas Department of State Health Services to be reimbursed for vaccines. A record must be kept in the office of the health-care provider that reflects the status of all children 18 years of age or younger who receive immunizations through the Texas Vaccines for Children Program. The record may be completed by the parent, guardian, or individual of record. This same record may be used for all subsequent visits as long as the child’s eligibility status has not changed. While verification of responses is not required, it is necessary to retain this or a similar record for each child receiving vaccines.

Date of Screening: ________________________________

Child’s Name:

Last Name:                                                First Name:                         MI

Child’s Date of Birth: __/__/____

Parent/Guardian/Individual of Record:

Last Name:                                                First Name:                         M

Provider’s/Clinic’s Name:

______________________________

Please select one of the following categories (check the first category that applies, check only one) to determine if the child is TVFC eligible:

☐ (a) is enrolled in Medicaid, or
☐ (b) does not have health insurance, or
☐ (c) is an American Indian, or
☐ (d) is an Alaskan Native, or
☐ (e) is a patient who receives benefits from the Children’s Health Insurance Plan (CHIP), or
☐ (f) is underinsured (has health insurance that Does Not pay for vaccines, has a co-pay or deductible the family cannot meet, or has insurance that provides limited wellness or prevention coverage), or
☐ (g) is a patient who is served by any type of public health clinic and does not meet any of the above criteria (a-f), or
☐ (h) has private insurance, or is paying for services.

CH.64  TVFC Patient Eligibility Screening Record (Spanish)

TEXAS VACCINES FOR CHILDREN PROGRAM (TVFC)
[EL PROGRAMA DE VACUNAS PARA LOS NIÑOS DE TEXAS, TVFC, por sus siglas en inglés]
ARCHIVO QUE DETERMINA LA ELEGIBILIDAD DEL PACIENTE

Propósito: El determinar la elegibilidad y el origen de los fondos para rembolsar al Texas Department of State Health Services (Departamento Estatal de Servicios de Salud de Texas) por las vacunas. Un archivo debe guardarse en la oficina del proveedor de atención médica, el cual refleja el estatus de todos los niños de 18 años de edad o menores quienes reciben inmunizaciones a través del Programa de Vacunas Para los Niños de Texas. El formulario puede ser llenado por el padre, la madre, el tutor legal o el individuo del registro. Este mismo formulario puede utilizarse para todas las visitas subsiguientes con tal de que el estatus de elegibilidad del niño no haya cambiado. Aunque la verificación de las respuestas no es requerida, es necesario retener éste, o un archivo similar, para cada niño que reciba vacunas.

Fecha de determinación: __________________________

Nombre del niño:

Apellido Primer nombre Inicial del segundo nombre

Fecha de nacimiento del niño: __________/________/________
(mes/día/año)

Padre / Madre / Tutor legal / Individuo del registro:

Apellido Primer nombre Inicial del segundo nombre

Nombre del proveedor / nombre de la clínica:

Sirvase seleccionar una de las categorías siguientes ( marque la primera categoría que se aplica; marque solamente una) para determinar si el niño cumple los requisitos para recibir vacunas del TVFC:

☐ (a) está inscrito en Medicaid, o
☐ (b) no tiene seguro médico, o
☐ (c) es Indio-Americano, o
☐ (d) es nativo de Alaska, o
☐ (e) es un paciente que recibe beneficios del Children’s Health Insurance Plan (Plan de seguro médico para niños, CHIP, por sus siglas en inglés), o
☐ (f) no tiene seguro médico suficiente (tiene seguro médico que NO paga por las vacunas; tiene un copago o un deducible que la familia no puede pagar; o tiene un seguro que proporciona una cobertura limitada para el bienestar o la prevención), o
☐ (g) es un paciente que recibe servicios de cualquier clínica de salud pública y no reúne ninguno de los criterios indicados anteriormente (a-f), o
☐ (h) tiene seguro privado o está pagando por servicios.

This office/facility will screen patients for VFC eligibility at all immunization encounters, and administer VFC-purchased vaccine only to children 18 years of age or younger who meet one or more of the following criteria: (1) is an American Indian or Alaska Native; (2) is enrolled in Medicaid; (3) has no health insurance; (4) is underinsured: children who have commercial (private) health insurance but the coverage does not include vaccines, children whose insurance covers only selected vaccines (VFC-eligible for non-covered vaccines only), children whose insurance caps vaccine coverage at a certain amount (once that coverage amount is reached, these children are categorized as underinsured), or has insurance with a co-pay or deductible the family cannot meet, (5) is a patient who receives benefits from the Children’s Health Insurance Plan (CHIP); (6) is a patient who is served by any type of public health clinic and does not meet any of the above criteria.

This office/facility will comply with the appropriate vaccination schedule, dosage, and contraindications, as established by the Advisory Committee on Immunization Practices, unless (a) in making a medical judgment in accordance with accepted medical practice, this office/facility deems such compliance to be medically inappropriate, or (b) the particular requirement is not in compliance with Texas Law, including laws relating to religious and medical exemptions.

This office/facility will provide Vaccine Information Statements (VIS) to the responsible adult, parent, or guardian and maintain records in accordance with the National Childhood Vaccine Injury Act which include reporting clinically significant adverse events to the Vaccine Adverse Event Reporting System (VAERS). Signatures are required for informed consent. (The Texas Addendum portion of the VIS may be used to document informed consent.)

This office/facility will not charge for vaccines supplied by DSHS and administered to a child who is eligible for the TVFC.

This office/facility may charge a vaccine administration fee to non-Medicaid VFC-eligible patients not to exceed $14.85. Medicaid patients cannot be charged for the vaccine, administration of vaccine, or an office visit associated with Medicaid services. For Medicaid patients, this office/facility agrees to accept the reimbursement for immunization administration set by the state Medicaid agency or the contracted Medicaid health plans.

This office/facility will not deny administration of a TVFC vaccine to a child because of the inability of the child’s parent or guardian/individual of record to pay an administrative fee.

This office/facility will comply with the State’s requirements for ordering vaccine and other requirements as described by DSHS, and operate within the VFC program in a manner intended to avoid fraud and abuse.

This office/facility or the State may terminate this agreement at any time for failure to comply with these requirements. If the agreement is terminated for any reason this office/facility agrees to properly return any unused vaccine.

In order to participate in the Texas Vaccines for Children Program and/or to receive federally- and state-supplied vaccines provided to me at no cost, I, on behalf of myself and any and all practitioners associated with this medical office, group practice, health department, community/migrant/rural health clinic, or other organization, agree to the following:

1) This office/facility will maintain all records related to the VFC program, including parent/guardian/authorized representative’s responses on the clinic, or other organization, agree to the following:

2) This office/facility will comply with the State's requirements for ordering vaccine and other requirements as described by DSHS, and operate within the VFC program in a manner intended to avoid fraud and abuse.

3) This office/facility may charge a vaccine administration fee to non-Medicaid VFC-eligible patients not to exceed $14.85. Medicaid patients cannot be charged for the vaccine, administration of vaccine, or an office visit associated with Medicaid services. For Medicaid patients, this office/facility agrees to accept the reimbursement for immunization administration set by the state Medicaid agency or the contracted Medicaid health plans.

4) This office/facility will allow DSHS (or its contractors) to conduct on-site visits as required by VFC regulations.

5) This office/facility will not charge for vaccines supplied by DSHS and administered to a child who is eligible for the TVFC.

6) This office/facility may charge a vaccine administration fee to non-Medicaid VFC-eligible patients not to exceed $14.85. Medicaid patients cannot be charged for the vaccine, administration of vaccine, or an office visit associated with Medicaid services. For Medicaid patients, this office/facility agrees to accept the reimbursement for immunization administration set by the state Medicaid agency or the contracted Medicaid health plans.

7) This office/facility will not deny administration of a TVFC vaccine to a child because of the inability of the child’s parent or guardian/individual of record to pay an administrative fee.

8) This office/facility will comply with the State’s requirements for ordering vaccine and other requirements as described by DSHS, and operate within the VFC program in a manner intended to avoid fraud and abuse.

9) This office/facility or the State may terminate this agreement at any time for failure to comply with these requirements. If the agreement is terminated for any reason this office/facility agrees to properly return any unused vaccine.

10) This office/facility will allow DSHS (or its contractors) to conduct on-site visits as required by VFC regulations.

In order to participate in the Texas Vaccines for Children Program and/or to receive federally- and state-supplied vaccines provided to me at no cost, I, on behalf of myself and any and all practitioners associated with this medical office, group practice, health department, community/migrant/rural health clinic, or other organization, agree to the following:

1) This office/facility will maintain all records related to the VFC program, including parent/guardian/authorized representative’s responses on the clinic, or other organization, agree to the following:

2) This office/facility will comply with the State's requirements for ordering vaccine and other requirements as described by DSHS, and operate within the VFC program in a manner intended to avoid fraud and abuse.

3) This office/facility may charge a vaccine administration fee to non-Medicaid VFC-eligible patients not to exceed $14.85. Medicaid patients cannot be charged for the vaccine, administration of vaccine, or an office visit associated with Medicaid services. For Medicaid patients, this office/facility agrees to accept the reimbursement for immunization administration set by the state Medicaid agency or the contracted Medicaid health plans.

4) This office/facility will allow DSHS (or its contractors) to conduct on-site visits as required by VFC regulations.

5) This office/facility will not charge for vaccines supplied by DSHS and administered to a child who is eligible for the TVFC.

6) This office/facility may charge a vaccine administration fee to non-Medicaid VFC-eligible patients not to exceed $14.85. Medicaid patients cannot be charged for the vaccine, administration of vaccine, or an office visit associated with Medicaid services. For Medicaid patients, this office/facility agrees to accept the reimbursement for immunization administration set by the state Medicaid agency or the contracted Medicaid health plans.

7) This office/facility will not deny administration of a TVFC vaccine to a child because of the inability of the child’s parent or guardian/individual of record to pay an administrative fee.

8) This office/facility will comply with the State’s requirements for ordering vaccine and other requirements as described by DSHS, and operate within the VFC program in a manner intended to avoid fraud and abuse.

9) This office/facility or the State may terminate this agreement at any time for failure to comply with these requirements. If the agreement is terminated for any reason this office/facility agrees to properly return any unused vaccine.

10) This office/facility will allow DSHS (or its contractors) to conduct on-site visits as required by VFC regulations.

Questions and Answers

Texas Vaccines For Children Program (TVFC)

Question 1: What is the TVFC?

Answer: This is our version of the Federal Vaccines For Children (VFC) Program. The TVFC was initiated by the passage of the Omnibus Budget Reconciliation Act of 1993. This legislation guaranteed vaccines would be available at no cost to providers, in order to immunize children (birth - 18 years of age) who meet the eligibility requirements.

Why Enroll?

Question 2: Why should a health care provider enroll in the TVFC?

Answer: • You can get free vaccine for your eligible patients.
• You will not need to refer patients to public clinics for vaccines.
• You can provide vaccinations to your patients as part of a comprehensive care package; this will enhance the opportunity for patients to find a medical home.

Patients Served

Question 3: Once enrolled, are providers required to immunize children who are not their patients?

Answer: No, you control whom you see in your practice.

Children Who Qualify

Question 4: Which children qualify for free vaccines?

Answer: All children (birth - 18 years of age) are eligible for free vaccine, except:
• Children with insurance that pays for immunization services, and
• Children whose parents or guardians are able to pay the co-pay or deductibles for immunization services.
Questions and Answers

Children’s Health Insurance Program (CHIP) Enrollment

Question 5: Are children who are enrolled in CHIP eligible?

Answer: Yes, through special arrangement CHIP children are also eligible.

Medicaid Enrollment

Question 6: To participate in TVFC, must providers enroll as a Texas Medicaid Provider?

Answer: No, however, if you are enrolled in the Texas Medicaid Program, you must enroll in TVFC in order to receive free vaccine.

Question 7: Will the Texas Medicaid Program reimburse private providers for vaccines administered to Medicaid patients?

Answer: The Texas Medicaid Program will not reimburse providers for the cost of the vaccine. However, the Texas Medicaid Program will reimburse providers for the administration of the vaccine.

Vaccine Related Fees

Question 8: Why are there fee caps on what providers can charge for administering vaccine?

Answer: Federal Legislation requires fee caps for administration on a statewide basis that balance the provider’s financial need and the patient’s ability to pay.

Question 9: Will TVFC reimburse an administration fee for non-Medicaid, TVFC eligible children?

Answer: No, for non-Medicaid TVFC eligible children, providers may charge a maximum of $14.85 per vaccine directly to the patient; administration fees may not exceed this amount. (Combination vaccines such as DTaP are considered one vaccine.)
Questions and Answers

**Question 10:** Will providers be required to increase the amount of vaccine information materials they provide to parents because of the TVFC?

**Answer:** No, materials required of all providers through the National Childhood Vaccine Injury Act are sufficient.

**Eligibility Status**

**Question 11:** Must providers screen patients for eligibility status each time they come for a vaccination visit?

**Answer:** Yes, providers must screen patients for eligibility status each time they come for a vaccination visit. However, a new eligibility form does not need to be completed unless the patient’s eligibility status has changed.

**Question 12:** How are providers expected to verify responses for TVFC eligibility?

**Answer:** Providers are not expected to do anything more than ask the patient what the child’s eligibility status is and then record the response. TVFC provides a Patient Eligibility Screening Form that can be used for this.

**Question 13:** Why must providers complete a Provider Profile describing patients by eligibility category?

**Answer:** This information allows the Texas Department of State Health Services to determine how the cost of vaccine will be divided among state and federal funds. Each year, you may find your profile information has changed. The Provider Profile must be updated annually, in accordance with Federal requirements.

    B.3.4.3 Obtaining Parental Consent for Registry Participation ........ CH-358

B.4 Texas Vaccines for Children Program Packet .......................... CH-358
B.1 Immunizations Overview

Clients who are 17 years of age and younger must be immunized according to the Recommended Childhood Immunization Schedule for the United States. If the immunizations are due as part of a THSteps medical checkup, the medical checkup provider is responsible for the administration of immunizations and may not refer clients to local health departments. The Department of State Health Services (DSHS) requires that immunizations be administered during the Texas Health Steps (THSteps) medical checkup, unless they are medically contraindicated or excluded from immunization for reasons of conscience, including a religious belief.

Providers, in both public and private sectors, are required by federal mandate to provide a Vaccine Information Statement (VIS) to the responsible adult accompanying a client for an immunization. These statements are specific to each vaccine and inform the responsible adult about the risks and benefits. It is important that providers use the most current VIS.

Providers interested in obtaining copies of current VISs and other immunization forms or literature may call the DSHS Immunization Branch at 1-512-458-7284. VISs may also be downloaded from the DSHS Immunization Branch’s website at www.immunizetexas.com.

B.1.1 Vaccine Adverse Event Reporting System (VAERS)

The National Childhood Vaccine Injury Act of 1986 (NCVIA) requires health-care providers to report:

- Any reaction listed by the vaccine manufacturer as a contraindication to subsequent doses of the vaccine.
- Any reaction listed in the Reportable Events Table that occurs within the specified time period after vaccination.

Clinically significant adverse events should be reported even if it is unclear whether a vaccine caused the event.

*Note:* Documentation of the injection site is recommended but not required.
For additional information regarding documentation, providers can refer to www.vaers.hhs.gov.

A copy of the Reportable Events Table can be obtained by calling VAERS at 1-800-822-7967 or by downloading it from http://vaers.hhs.gov/resources/vaersmaterialspublications.

B.1.2 TVFC Versus Non-TVFC Vaccines/Toxoids

When single antigen vaccine(s)/toxoid(s) or comparable antigen vaccine(s)/toxoid(s) are available for distribution through the Texas Vaccines for Children (TVFC) Program, but the provider chooses to use a different Advisory Committee on Immunization Practices (ACIP)-recommended product, the vaccine/toxoid will not be reimbursed; however, the administration fee will be considered.

*Note:* All administered vaccines/toxoids must be reported to DSHS. DSHS submits all vaccines/toxoids reported with consent to a centralized immunization registry, known as ImmTrac.

Refer to: Subsection B.3.4, “How to Report Immunization Records to ImmTrac, the Texas Immunization Registry” in this appendix.

B.1.3 Exemption from Immunization for School and Child-Care Facilities

Parents may obtain an exemption from immunization requirements for school and childcare entry for reasons of conscience or religious beliefs. An exemption is also available for clients who are medically contraindicated from receiving a vaccine. For more information on exemptions call 1-512-458-7284, or visit www.immunizetexas.com.

Refer to: Section 5, “THSteps Medical” in this handbook.
B.2 Recommended Childhood Immunization Schedule

The Recommended Childhood Immunization Schedule indicates the recommended age for routine administration of currently licensed childhood vaccines. This schedule was developed and approved by ACIP, the American Academy of Pediatrics (AAP), and the American Academy of Family Physicians (AAFP).

Some combination vaccines are available and may be used whenever any component of the combination is indicated and its other components are not contraindicated. Providers should consult the manufacturers package insert for detailed recommendations.

Vaccines should be administered at the recommended ages. Any dose not given at the recommended age should be given as a catch-up immunization on any subsequent visit when indicated and feasible.

A current copy of the Recommended Childhood Immunization Schedule can be accessed at www.cdc.gov/vaccines/recs/schedules/default.htm.
This schedule includes recommendations in effect as of December 15, 2009. Any dose not administered at the recommended age should be administered at a subsequent visit, when indicated and feasible. The use of a combination vaccine generally is preferred over separate injections of its equivalent component vaccines.

Considerations should include provider assessment, patient preference, and the potential for adverse events. Providers should consult the relevant Advisory Committee on Immunization Practices statement for detailed recommendations: http://www.cdc.gov/vaccines/pubs/acip-list.htm. Clinically significant adverse events that follow immunization should be reported to the Vaccine Adverse Event Reporting System (VAERS) at http://www.vaers.hhs.gov or by telephone, 800-822-7967.

### 1. Hepatitis B vaccine (HepB).

**Hepatitis B immune globulin (HBIG)** within 12 hours of birth. Determine mother's HBsAg status as soon as possible and, if HBsAg-positive, administer HBIG (no later than age 1 week).

#### After the birth dose:
- **The HepB series should be completed with either monovalent HepB or a combination vaccine containing HepB.** The second dose should be administered at age 1 or 2 months. Monovalent HepB vaccine should be used for doses administered before age 6 months. The final dose should be administered no earlier than age 24 weeks.
- **Infants born to HBsAg-positive mothers should be tested for HBsAg and antibody to HBsAg 1 to 2 months after completion of at least 3 doses of the HepB series, at age 9 through 18 months (generally at the next well-child visit).**
- **Administration of 4 doses of HepB to infants is permissible when a combination vaccine containing HepB is administered after the birth dose. The fourth dose should be administered no earlier than age 24 weeks.**

### 2. Rotavirus vaccine (RV).

**Administration of the first dose at age 6 through 14 weeks (maximum age: 14 weeks 6 days).** Vaccination should not be initiated for infants aged 15 weeks 0 days or older.

**The maximum age for the final dose in the series is 8 weeks 0 days**

**If Rotarix is administered at ages 2 and 4 months, a dose at 6 months is not indicated.**

### 3. Diphtheria and tetanus toxoids and acellular pertussis vaccine (DTaP).

**Minimum age: 6 weeks**
- The fourth dose may be administered as early as age 12 months, provided at least 6 months have elapsed since the third dose.
- Administer the final dose in the series at age 4 through 6 years.

### 4. Haemophilus influenza type b conjugate vaccine (Hib).

**Minimum age: 6 weeks**
- If PRP-OMP (PedvaxHib or Comvax [HepB-Hib]) is administered at ages 2 and 4 months, a dose at age 6 months is not indicated.
- If HibTITER (DTaP/Hib) and Hiberix (PRP-T) should not be used for doses at ages 2, 4, or 6 months for the primary series but can be used as the final dose in children aged 12 months through 4 years.
- See MMWR 1997;46(No.RR-8).

### 5. Pneumococcal vaccine.

**Minimum age: 6 weeks**
- PCV is recommended for all children aged younger than 5 years.
- Administer 1 dose of PCV to all healthy children aged 2 through 59 months who are not completely vaccinated for their age.
- Administer PPSV 2 or more months after last dose of PCV to children aged 2 years or older with certain underlying medical conditions, including a cochlear implant.

### 6. Inactivated poliovirus vaccine (IPV)

**Minimum age: 6 weeks**
- The final dose in the series should be administered on or after the fourth birthday and at least 6 months following the previous dose.
- If 4 doses are administered prior to age 4 years a fifth dose should be administered at age 4 through 6 years. See MMWR 2008;56(30):829–30.

### 7. Influenza vaccine (seasonal)

**Minimum age: 6 months for trivalent inactivated influenza vaccine (TIV) 2 years for live, attenuated influenza vaccine (LAIV)**
- Administer annually to children aged 6 months through 18 years.
- For healthy children aged 2 through 6 years (i.e., those who do not have underlying medical conditions that predispose them to influenza complications), either LAIV or TIV may be used, except LAIV should not be given to children aged 2 through 4 years who have had wheezing in the past 12 months.
- Children receiving TIV should receive 0.25 mL if aged 6 through 35 months or 0.5 mL if aged 3 years or older.
- Administer 2 doses (separated by at least 4 weeks) to children aged younger than 9 years who are receiving influenza vaccine for the first time or who were vaccinated for the first time during the previous influenza season but only received 1 dose.
- For recommendations for use of influenza A (H1N1) 2009 monovalent vaccine see MMWR 2009;58(No. RR-10).

### 8. Measles, mumps, and rubella vaccine (MMR).

**Minimum age: 12 months**
- Administer the second dose routinely at age 4 through 6 years. However, the second dose may be administered before age 4, provided at least 28 days have elapsed since the first dose.

**Minimum age: 12 months**
- Administer the second dose routinely at age 4 through 6 years. However, the second dose may be administered before age 4, provided at least 3 months have elapsed since the first dose.
- For children aged 12 months through 12 years the minimum interval between doses is 3 months. However, if the second dose was administered at least 28 days after the first dose, it can be accepted as valid.

### 10. Hepatitis A vaccine (HepA).

**Minimum age: 12 months**
- Administer to all children aged 1 year (i.e., aged 12 through 23 months).
- Administer 2 doses at least 6 months apart.
- Children not fully vaccinated by age 2 years can be vaccinated at subsequent visits.
- HepA also is recommended for older children who live in areas where vaccination programs target older children, who are at increased risk for infection, or for whom immunity against hepatitis A is desired.

### 11. Meningooccal vaccine.

**Minimum age: 2 years** for meningococcal conjugate vaccine (MCV4) and for meningococcal polysaccharide vaccine (MPSV4)
- Administer MCV4 to children aged 2 through 10 years with persistent complement deficiency, anatomic or functional asplenia, and certain other conditions placing them at high risk.
- Children previously vaccinated with MCV4 or MPSV4 after 3 years if first dose administered at age 2 through 6 years. See MMWR 2009;58:1042–3.

This schedule includes recommendations in effect as of December 15, 2009. Any dose not administered at the recommended age should be administered at a subsequent visit, when indicated and feasible. The use of a combination vaccine generally is preferred over separate injections of its equivalent component vaccines. Considerations should include provider assessment, patient preference, and the potential for adverse events. Providers should consult the relevant Advisory Committee on Immunization Practices statement for detailed recommendations: http://www.cdc.gov/vaccines/pubs/acip-list.htm. Clinically significant adverse events that follow immunization should be reported to the Vaccine Adverse Event Reporting System (VAERS) at http://vaers.hhs.gov or by telephone, 800-822-7967.

1. Tetanus and diphtheria toxoids and acellular pertussis vaccine (Tdap). (Minimum age: 10 years for Boostrix and 11 years for Adacel)
   - Administer at age 11 or 12 years for those who have completed the recommended childhood DTP/DTap vaccination series and have not received a tetanus and diphtheria toxoid (Td) booster dose.
   - Persons aged 13 through 18 years who have not received Tdap should receive a dose.
   - Any dose not administered at the recommended age should be administered at a later age, provided the child is not at increased risk for pertussis and immunity is needed.

2. Human papillomavirus vaccine (HPV). (Minimum age: 9 years)
   - Two HPV vaccines are licensed: a quadrivalent vaccine (HPV4) for the prevention of cervical, vaginal and vulvar cancers (in females) and genital warts (in females and males), and a bivalent vaccine (HPV2) for the prevention of cervical cancers in females.
   - HPV vaccines are most effective for both males and females when given before exposure to HPV through sexual contact.
   - HPV4 or HPV2 is recommended for the prevention of cervical precancers and cancers in females.
   - HPV4 is recommended for the prevention of cervical, vaginal and vulvar precancers and cancers and genital warts in females.
   - Administer the first dose to females at age 11 or 12 years.
   - Administer the second dose 1 to 2 months after the first dose and the third dose 6 months after the first dose (at least 24 weeks after the first dose).
   - Administer the series to females at age 13 through 18 years if not previously vaccinated.
   - HPV4 may be administered in a 3-dose series to males aged 9 through 18 years to reduce their likelihood of acquiring genital warts.

3. Meningococcal conjugate vaccine (MCV4).
   - Administer at age 11 or 12 years, or at age 13 through 18 years if not previously vaccinated.
   - Administer to previously unvaccinated college freshmen living in a dormitory.
   - Administer MCV4 to children aged 2 through 10 years with persistent complement component deficiency, anatomic or functional asplenia, or certain other conditions placing them at high risk.
   - Administer to children previously vaccinated with MCV4 or MCV5 who remain at increased risk after 3 years (if first dose administered at age 2 through 6 years) or after 5 years (if first dose administered at age 7 years or older). Persons whose only risk factor is living in on-campus housing are not recommended to receive an additional dose. See MMWR 2009;58:1042–3.

4. Influenza vaccine (seasonal).
   - Administer annually to children aged 6 months through 18 years.
   - For healthy nonpregnant persons aged 7 through 18 years (i.e., those who do not have underlying medical conditions that predispose them to influenza complications), either LAIV or TIV may be used.
   - Administer 2 doses (separated by at least 4 weeks) to children aged younger than 9 years who are receiving influenza vaccine for the first time or who were vaccinated for the first time during the previous influenza season but only received 1 dose.
   - For recommendations for use of influenza A (H1N1) 2009 monovalent vaccine. See MMWR 2009;58(No. RR-10).

5. Pneumococcal polysaccharide vaccine (PPSV).
   - Administer to children with certain underlying medical conditions, including a cochlear implant. A single revaccination should be administered after 5 years to children with functional or anatomic asplenia or an immunocompromising condition. See MMWR 1997;46(No. RR-8).

6. Hepatitis A vaccine (HepA).
   - Administer 2 doses at least 6 months apart.
   - HepA is recommended for children aged older than 23 months who live in areas where vaccination programs target older children or who are at increased risk for infection or for whom immunity against hepatitis A is desired.

7. Hepatitis B vaccine (HepB).
   - Administer the 3-dose series to those not previously vaccinated.
   - A 2-dose series (separated by at least 4 months) of adult formulation Recombivax HB is licensed for children aged 11 through 15 years.

8. Inactivated poliovirus vaccine (IPV).
   - The final dose in the series should be administered on or after the fourth birthday and at least 6 months following the previous dose.
   - If both OPV and IPV were administered as part of a series, a total of 4 doses should be administered, regardless of the child’s current age.

   - If not previously vaccinated, administer 2 doses or the second dose for those who have received only 1 dose, with at least 28 days between doses.

10. Varicella vaccine.
    - For persons aged 7 through 18 years without evidence of immunity (see MMWR 2007;56[No. RR-4]), administer 2 doses if not previously vaccinated or the second dose if only 1 dose has been administered.
    - For persons aged 7 through 12 years, the minimum interval between doses is 3 months. However, if the second dose was administered at least 28 days after the first dose, it can be accepted as valid.
    - For persons aged 13 years and older, the minimum interval between doses is 28 days.

### Additional Notes

1. Hepatitis B vaccine (HepB).
   - Administer the 3-dose series to those not previously vaccinated.
   - A 2-dose series (separated by at least 4 months) of adult formulation Recombivax HB is licensed for children aged 11 through 15 years.

2. Rotavirus vaccine (RV).
   - The maximum age for the first dose is 14 weeks 6 days. Vaccination should not be initiated for infants aged 15 weeks 0 days or older.
   - The maximum age for the final dose in the series is 8 months 0 days.
   - If Rotarix was administered for the first and second doses, a third dose is not indicated.

3. Diphtheria and tetanus toxoids and acellular pertussis vaccine (DTaP).
   - The fifth dose is not necessary if the fourth dose was administered at age 4 years or older.

4. Haemophilus influenzae type b conjugate vaccine (Hib).
   - Hib vaccine is not generally recommended for persons aged 5 years or older. No efficacy data are available on which to base a recommendation concerning use of Hib vaccine for older children and adults. However, studies suggest good immunogenicity in persons who have sickle cell disease, leukemia, or HIV infection, or who have had a splenectomy; administering 1 dose of Hib vaccine to these persons who have not previously received Hib vaccine is not contraindicated.
   - If the first 2 doses were PRP-OMP (PedvaxHIB or Comvix), and administered at age 11 months or younger, the third (and final) dose should be administered at age 12 through 15 months and at least 8 weeks after the second dose.
   - If the first dose was administered at age 7 through 11 months, administer the second dose at least 4 weeks later and a final dose at age 12 through 15 months.

5. Pneumococcal vaccine.
   - Administer 1 dose of pneumococcal conjugate vaccine (PCV) to all healthy children aged 24 through 59 months who have not received at least 1 dose of PCV on or after age 12 months.
   - For children aged 24 through 59 months with underlying medical conditions, administer 1 dose of PCV if 3 doses were received previously or administer 2 doses of PCV at least 8 weeks apart if fewer than 3 doses were received previously.
   - Administer pneumococcal polysaccharide vaccine (PPSV) to children aged 2 years or older with certain underlying medical conditions, including a cochlear implant, at least 8 weeks after the last PCV dose.

6. Inactivated poliovirus vaccine (IPV).
   - The final dose in the series should be administered on or after the fourth birthday and at least 6 months following the previous dose.

### Additional Information

- A fourth dose is not necessary if the third dose was administered at age 4 years or older and at least 6 months following the previous dose.
- If in the first 6 months of life, minimum age and minimum intervals are only recommended if the person is at risk for imminent exposure to circulating poliovirus (i.e., travel to a polio-endemic region or during an outbreak).
- Measles, mumps, and rubella vaccine (MMR).
  - Administer the second dose routinely at age 4 through 6 years. However, the second dose may be administered before age 4, provided at least 28 days have elapsed since the first dose.
  - If not previously vaccinated, administer 2 doses with at least 28 days between doses.

### Other Vaccines

7. Variella vaccine.
   - Administer the second dose routinely at age 4 through 6 years. However, the second dose may be administered before age 4, provided at least 3 months have elapsed since the first dose.
   - For persons aged 12 months through 12 years, the minimum interval between doses is 3 months. However, if the second dose was administered at least 28 days after the first dose, it can be accepted as valid.
   - For persons aged 13 years and older, the minimum interval between doses is 28 days.

8. Hepatitis A vaccine (HepA).
   - HepA is recommended for children older than 23 months who live in areas where vaccination programs target older children, who are at increased risk for infection, or who are traveling to countries where hepatitis A is endemic.

9. Tetanus and diphtheria toxoids vaccine (Td) and tetanus and diphtheria toxoids and acellular pertussis vaccine (Tdap).
   - Doses of Td/Tdap are counted as part of the Td/Tdap series.
   - Tdap should be substituted for a single dose of Td in the catch-up series or as a booster for children aged 10 through 18 years; use Td for other doses.

    - Administer the series to females at age 13 through 18 years if not previously vaccinated.
    - Use recommended routine dosing intervals for series catch-up (i.e., the second and third doses should be administered at 1 to 2 and 6 months after the first dose). The minimum interval between the first and second doses is 4 weeks. The minimum interval between the second and third doses is 12 weeks, and the third dose should be administered at least 24 weeks after the previous dose.
B.3 General Recommendations

For information about vaccine administration, dosing, and contraindications, immunization providers should consult vaccine package inserts and the December 1, 2006, issue of the Morbidity and Mortality Weekly Report (MMWR), General Recommendations on Immunization, Recommendations of the Advisory Committee on Immunization Practices at www.cdc.gov/mmwr/PDF/rr/rr5515.pdf. For copies of the General Recommendations on Immunization or the MMWR, contact the Immunization Branch at 1-512-458-7284.

B.3.1 How to Obtain Free Vaccines

TVFC provides routinely recommended ACIP vaccines for immunization of THSteps and other Medicaid- and TVFC-eligible clients free of charge to providers who are enrolled in TVFC. The local health department/district or DSHS regional office provides information on how to order, account for, and inventory vaccines. Monthly reports are required in order to receive state-purchased vaccines. Physicians who request and accept state-supplied vaccines must complete and sign the provider enrollment and profile forms annually. The provider may not charge Medicaid or the client for vaccines obtained from TVFC.

Additional information can be found at www.immunizetexas.com.

B.3.2 Administrations and Immunizations

The following administration procedure codes must be submitted in combination with an appropriate vaccine/toxoid procedure code. Diagnosis procedure code V202 may be used unless a more specific diagnosis code is appropriate.

<table>
<thead>
<tr>
<th>Administration Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>90465</td>
</tr>
<tr>
<td>90473</td>
</tr>
</tbody>
</table>

Vaccine/toxoid administration fee for clients birth through 20 years of age will be reimbursed based on the number of state-defined components administered per injection and may or may not require the use of one of the following modifiers. Combined antigen vaccines (e.g., DTaP or MMR) are considered as one dose. The provider may not charge in excess of $14.85 for administration of vaccines to a TVFC-eligible client.

<table>
<thead>
<tr>
<th>Modifier</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>U2</td>
<td>State-defined modifier: Administration of vaccine/toxoid with two state defined components</td>
</tr>
<tr>
<td>U3</td>
<td>State-defined modifier: Administration of vaccine/toxoid with three state defined components</td>
</tr>
</tbody>
</table>

B.3.2.1 Vaccine Procedure Codes and State-Defined Components

The following vaccines are defined as having one state-defined component, and the administrative procedure code does not require a modifier.

<table>
<thead>
<tr>
<th>Vaccine Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>90632</td>
</tr>
<tr>
<td>90658*</td>
</tr>
<tr>
<td>90713*</td>
</tr>
<tr>
<td>90744*</td>
</tr>
</tbody>
</table>

* TVFC distributed vaccine/toxoid.

Note: Vaccines that are identified as being distributed through TVFC are not reimbursed separately.
The following vaccines are defined as having two state-defined components and the administrative procedure code must be billed with the state-defined modifier U2.

<table>
<thead>
<tr>
<th>Vaccine Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>90636*</td>
</tr>
<tr>
<td>90696*</td>
</tr>
<tr>
<td>90710*</td>
</tr>
<tr>
<td>90721*</td>
</tr>
<tr>
<td>90748*</td>
</tr>
</tbody>
</table>

* TVFC distributed vaccine/toxoid.
Note: Vaccines that are identified as being distributed through TVFC are not reimbursed separately.

The following vaccines are defined as having three state-defined components and the administrative procedure code must be billed with the state-defined modifier U3.

<table>
<thead>
<tr>
<th>Vaccine Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>90698*</td>
</tr>
<tr>
<td>90723*</td>
</tr>
</tbody>
</table>

* TVFC distributed vaccine/toxoid.
Note: Vaccines that are identified as being distributed through TVFC are not reimbursed separately.

Providers may use the state-defined modifier U1 in addition to the associated administered vaccine procedure code for clients birth through 18 years of age and the vaccine was unavailable through TVFC.

<table>
<thead>
<tr>
<th>Modifier</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>U1</td>
<td>State-defined modifier: Vaccine(s)/toxoid(s) privately purchased by provider when TVFC vaccine/toxoid is unavailable</td>
</tr>
</tbody>
</table>

**Note:** “Unavailable” is defined as a new vaccine approved by the Advisory Committee on Immunization Practices (ACIP) that has not been negotiated or added to a TVFC contract, funding for new vaccines that have not been established by TVFC, or national supply or distribution issues. Providers will be informed if a vaccine meets the definition of ‘not available’ from TVFC and when the provider’s privately purchased vaccine may be billed with modifier U1.

Modifier U1 may not be used for failure to enroll in TVFC, maintain sufficient TVFC vaccine/toxoid inventory or for clients who are 19 years of age through 20 years of age.

### B.3.3 Requirements for TVFC Providers

By enrolling, public and private providers agree to:

- Screen patients for TVFC eligibility at all immunization encounters, and administer TVFC-purchased vaccines only to clients who are 18 years of age and younger who meet one or more of the following criteria:
  - Is an American Indian or Alaska Native.
  - Is enrolled in Medicaid.
  - Has no health insurance.
  - Is underinsured: clients who have other health insurance, but the coverage does not include vaccines, clients whose insurance covers only selected vaccines (TVFC-eligible for non-covered vaccines only), clients whose insurance caps vaccine coverage at a certain amount (once that coverage amount is reached, these clients are categorized as underinsured), or has insurance with a co-pay or deductible the family cannot meet.
  - Is a client who receives benefits from the Children’s Health Insurance Program (CHIP).
  - Is a client who is served by any type of public health clinic and does not meet any of the above criteria.
• Maintain all records related to the TVFC program, including parent/guardian/authorized representative’s responses to screening for patient’s eligibility for at least three years. If requested, the provider will make such records available to DSHS, the local health department authority, or the U.S. Department of Health and Human Services (HHS).

• Comply with the appropriate vaccination schedule, dosage, and contraindications, as established by ACIP, unless (a) in making a medical judgment in accordance with accepted medical practice, the provider deems such compliance to be medically inappropriate, or (b) the particular requirement is not in compliance with Texas law, including laws relating to religious and medical exemptions.

• Provide VISs to the responsible adult, parent, or guardian, and maintain records in accordance with the NCVIA which include reporting clinically significant adverse events to VAERS. Signatures are required for informed consent. (The Texas Addendum portion of the VIS may be used to document informed consent.)

• Not charge for vaccines supplied by DSHS and administered to a client who is eligible for TVFC.

• Charge a vaccine administration fee to Texas Medicaid but not impose a charge for the administration of the vaccine in any amount higher than the maximum administration fee established by DSHS (providers may charge a vaccine administration fee to Medicaid, but not a fee for the vaccine). Medicaid clients cannot be charged any out-of-pocket expense for the vaccine or the administration of the vaccine.

• Not deny administration of a TVFC vaccine to a client because of the inability of the client’s parent or guardian/individual of record to pay an administration fee.

• Comply with the state’s requirements for ordering vaccines and other requirements as described by DSHS, and operate within the TVFC program in a manner intended to avoid fraud and abuse.

• Allow DSHS (or its contractors) to conduct onsite visits as required by TVFC regulations.

The provider or the state may terminate the agreement at any time for failure to comply with the requirements listed above. If the agreement is terminated for any reason, the provider agrees to properly return any unused vaccine.

B.3.4 How to Report Immunization Records to ImmTrac, the Texas Immunization Registry

Texas law requires all medical providers and payors to report all immunizations administered to clients who are 17 years of age and younger, to ImmTrac, the Texas immunization registry operated by DSHS (Texas Health and Safety Code §§161.007-161.009). Providers must report all immunization information within 30 days of administration of the vaccine, and payors must report within 30 days of receipt of data elements from a provider. Prior to reporting immunizations to ImmTrac, providers must first register for registry participation and access.

ImmTrac is a centralized repository of immunization histories for clients of all ages and is a free service and benefit available to all Texans. Registry information is confidential, and by law, may be released only to:

• The client or client’s parent, legal guardian, or managing conservator.

• The client’s physician, school, or licensed child-care facility in which the client is enrolled.

• Public health districts or local health departments.

• The insurance company, health maintenance organization, or other organization that pays for the provision of the client’s health-care benefits.

• A health-care provider authorized to administer a vaccine.

• A state agency that has legal custody of the client.
ImmTrac offers two methods for reporting immunizations to DSHS: direct internet entry into ImmTrac’s internet application and electronic data transfer (import).

**B.3.4.1 Direct Internet Entry**

This method allows providers to access and review clients’ immunization histories prior to administering vaccines. Providers then update their client’s immunization record directly into the ImmTrac web application after administering vaccines to the patient.

**B.3.4.2 Electronic Data Transfer (Import)**

This method allows providers to report immunizations from an electronic medical record (EMR) software application via extract file for import into ImmTrac. Providers may still have access to the ImmTrac web application to access and review their clients’ immunization histories before administering any vaccines.

Regardless of reporting option selected, all providers must first register for ImmTrac access and receive login credentials from ImmTrac Customer Support. To register for ImmTrac access, providers may obtain and complete an ImmTrac Registration Packet (for providers and schools) from www.immtrac.com or request it from ImmTrac Customer Support at 1-800-348-9158.

**B.3.4.3 Obtaining Parental Consent for Registry Participation**

Before including a client’s immunization information in ImmTrac, DSHS must verify that written consent for registry participation has been granted by the client’s parent, legal guardian, or managing conservator. Most parents grant consent for ImmTrac participation during the birth certificate registration process. Written parental consent for ImmTrac participation applies to all past, present, and future immunizations. Texas law also permits a parent, managing conservator, or guardian to withdraw consent for ImmTrac participation at any time.

Providers may offer parents the opportunity to grant consent for their child’s participation in ImmTrac using the pre-filled, ImmTrac-generated Immunization Registry (ImmTrac) Consent Form or the manual version (#C-7) of this form, also available from the ImmTrac application. Providers should retain the consent form and affirm parental consent via ImmTrac to establish the client’s ImmTrac record and report all immunizations administered and/or add any historical immunization information to the client’s record. Entering administered immunizations and/or historical immunization information to the client’s record constitutes “reporting” to ImmTrac as required by current Texas law.

**B.4 Texas Vaccines for Children Program Packet**

C.6 Lead Poisoning Prevention Educational Materials and Forms .................. C-365
C.1 Blood Lead Screening Procedures and Follow-up Testing

Every Texas child should have a blood lead test at 12 months of age and 2 years of age. For all children who are enrolled in the Texas Health Steps (THSteps) Program, blood lead testing is mandatory when they are 12 months of age and 2 years of age or whenever they receive their first checkup (up to and including the 6-year checkup). Documentation of the questions contained in the Form Pb-110, Risk Assessment for Lead Exposure: Parent Questionnaire, is required for the THSteps checkup. A provider-created medical record must contain the completed questions on the Risk Assessment for Lead Exposure screening tool and the results based on the questions on the completed form. If the completed form is not retained in the medical record, a copy of the form must be available for review. The questionnaire should be administered to the parent by the provider at all subsequent visits when a blood lead test is not performed for clients birth through 6 years of age. A “yes” or “don’t know” answer to any question on the risk assessment questionnaire indicates that a blood lead test should be administered.

C.2 Symptoms of Lead Poisoning

Children with elevated blood lead levels (EBLLs) in the range of 10–45μg/dL may be asymptomatic, although impairment of neurodevelopment may become evident as they get older. Very high lead levels may cause colic, constipation, anorexia, or vomiting. Children with venous blood lead levels (BLLs) over 44μg/dL are eligible for medical intervention. However, it is important not to equate the absence of symptoms with the absence of toxicity.

C.3 Measuring Blood Lead Levels

A blood lead test is the only definitive method to detect recent or ongoing exposure. BLLs are measured as micrograms of lead per deciliter (μg/dL) of whole blood. The Centers for Disease Control and Prevention (CDC) define a blood lead level of 10μg/dL as a level of concern. This is the measurement standard in Texas for an EBLL and requires follow-up. The blood lead “level of concern” should not be interpreted as a definitive toxicological threshold. Mounting evidence suggests adverse health effects in children with BLLs below 10μg/dL.

Blood lead tests, in order of occurrence:

- Screening test—A blood lead test that indicates whether a client may have an EBLL.
- Diagnostic test—A venous blood lead test that is performed within recommended guidelines to determine the status of a client who has previously had an EBLL on a screening test (See Pb:109 for recommended guidelines). Unless the diagnostic test is performed within four weeks of the screening date, it is not a diagnostic test but rather a new screening test.
- Follow-up test—A venous blood lead test to monitor the status of a client with a previously elevated diagnostic test for lead.

Note: A follow-up test is not related to the THSteps follow-up visit. A visit to monitor a child with EBLL would be submitted as an acute care evaluation and management (E/M) visit.

Providers are responsible for conducting a diagnostic test when a screening test finds a lead level of 10μg/dL or greater. Blood for a screening test may be drawn from a venous or capillary site. A venous blood draw is strongly recommended and preferred. To order free venous sample supplies from the DSHS Laboratory, call (toll free) 1-888-963-7111, Ext. 7661.

Note: The capillary lead screen analysis is subject to a false positive result from skin lead contamination during collection. A soap and water wash of the patient’s hands or feet and the collector’s hands (or the wearing of gloves) must be performed to minimize the chance of contamination. Alcohol cleansing alone is not sufficient.
If the screening test is 10μg/dL or above, recalling a client for a diagnostic sample may be billed as a THSteps follow-up visit. If the screening test was rejected due to clotting, insufficient quantities, or perceived contamination, the provider must repeat the sample as a diagnostic test. Again, the provider may bill the visit and analysis as an E/M visit. Providers can submit the specimen to the DSHS Clinical Chemistry Laboratory using the appropriate Department of State Health Services (DSHS) Laboratory Specimen Submission form (the same way as for all other THSteps laboratory blood specimens). If the initial blood lead test is collected as part of a THSteps medical checkup, it must be submitted to the DSHS Laboratory; diagnostic and follow-up tests for the same client may be sent to a private laboratory.

Refer to: Subsection C.5, “Form Pb-109: Reference for Follow-up Blood Lead Testing and Medical Case Management” in this appendix for interpretation of laboratory test results and guidelines for follow-up for clients with elevated blood lead levels.

Subsection 5.3.2.7.6, “Required Laboratory Tests Related to Medical Checkups” in this handbook.

Subsection 5.3.1.8, “Newborn Examination” in this handbook.

Providers can find more information about the medical and environmental management of lead-poisoned children on the DSHS Texas Childhood Lead Poisoning Prevention Program (TX CLPPP) website at www.dshs.state.tx.us/lead or by calling 1-800-588-1248.

C.4 Environmental Lead Investigation (ELI) Services

C.4.1 Enrollment

State and local health departments that employ or contract certified lead risk assessors must be enrolled with Texas Medicaid as a THSteps provider to perform ELI services.

- State and local health departments that are currently enrolled in Texas Medicaid must complete the THSteps Provider Enrollment Application.
- State and local health departments that are not currently enrolled in Texas Medicaid must complete the Texas Medicaid Provider Enrollment Application and the THSteps Provider Enrollment Application.

C.4.2 Services/Benefits, Limitations and Prior Authorization

ELI services must be billed with procedure code T1029, which is restricted to diagnosis codes V1586 and 9849. Texas Medicaid may only reimburse a state or local health department for the certified lead risk assessor’s time and activities during an onsite investigation of a client’s home or primary residence. Laboratory analysis of environmental substances (e.g., water, paint, or soil) is not a benefit of Texas Medicaid.

Children who have confirmed and persistent EBLLs may require an ELI to determine the source of the lead exposure. An ELI is completed in a client’s home or primary residence by a certified lead risk assessor to determine whether a lead hazard exists and, if so, whether the lead source could be the cause of the EBLL.

C.4.2.1 Requesting an ELI

For the purpose of requesting an ELI, a lead screening provider is a physician, nurse practitioner (NP), clinical nurse specialist (CNS), or physician’s assistant (PA) who conducts blood lead tests for a THSteps client. Lead screening providers may submit a request for an ELI after a blood lead test has been conducted and there is evidence of persistent and confirmed EBLLs for the client. An EBLL is defined as a BLL of 10μg/dL or higher.
An ELI may be considered medically necessary if the results of the most recent blood lead test indicate any of the following:

- A venous BLL result of 10μg/dL to 19μg/dL from two separate specimens conducted at least 12 weeks apart
- A venous BLL result of 20μg/dL or greater from one specimen

**Note:** The ELI must be requested as soon as possible and no later than 30 days after obtaining the most recent BLL that indicates medical necessity. The lead screening provider must maintain in the client’s medical record the ELI request and the documentation of the BLLs that indicates medical necessity.

The lead screening provider can request an ELI by completing Form Pb-101 ”Environmental Lead Investigation Request” and submitting it to the TX CLPPP. TX CLPPP will review the request and determine whether the criteria for an ELI have been met. If an ELI request meets the TX CLPPP criteria, TX CLPPP sends a referral for an ELI to a state or local health department that is enrolled as a THSteps provider so that it can be assigned to a certified lead risk assessor.

An ELI can be performed under one of the following circumstances:

- No previous investigation of the current home or primary residence has been performed.
- There is a change in the client’s current home or primary residence.

If a previous investigation of the current home or primary residence has been performed and there has been a change in the client’s residential environment, TX CLPPP will determine whether the criteria have been met for an additional ELI.

**C.4.2.2 Prior Authorization**

Prior Authorization is not required for ELI services.

**C.4.3 Documentation Requirements**

The state or local health department that is responsible for conducting the investigation must maintain the following documentation in the client’s medical record:

- The TX CLPPP fax transmittal cover sheet that refers the ELI request to the local health department. The cover sheet must include:
  - The site to be assessed.
  - A statement that identifies the site as the client’s primary place of residence.
- A completed Form Pb-101: Environmental Lead Investigation Request (two pages) that includes the:
  - Name of the referring lead screening provider.
  - BLLs that indicate medical necessity.
  - Client’s diagnosis (code V1586 or 9849).
- A completed Form Pb-103: Elevated Blood Lead Level Investigation Questionnaire (all pages) that includes the:
  - Date and location of the investigation.
  - Name of the client who received the investigation.
  - Identifying information and signature of the certified lead risk assessor who conducted the investigation. The person listed as the assessor must be the same person who signs the report.

**Note:** Forms Pb-101 and Pb-103 are located on the TX CLPPP website at www.dshs.state.tx.us/lead/providers.shtm.
C.4.4 Claims Filing and Reimbursement

C.4.4.1 Claims Filing

ELI services must be submitted to TMHP in a approved electronic format or on the CMS-1500 paper claim form. Providers can purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

The following documentation must be submitted with the claim:

- The TX CLPPP fax transmittal cover sheet that refers the ELI request to the state or local health department. The cover sheet must include:
  - The site to be assessed.
  - A statement that identifies the site as the client's primary place of residence.
- A completed Form Pb-101: Environmental Lead Investigation Request
- The first and last page of Form Pb-103: Elevated Blood Lead Level Investigation Questionnaire, which has been completed by the lead risk assessor

An ELI is subject to retrospective review and may be recouped if the documentation maintained by the lead screening and ELI providers does not support medical necessity.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information about electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” Section 6, “Claims Filing” (Vol. 1, General Information) for instructions on completing paper claims.

C.4.4.2 Reimbursement

Providers can refer to the online fee lookup (OFL) or the applicable fee schedule on the TMHP website at www.tmhp.com.
C.5 Form Pb-109: Reference for Follow-up Blood Lead Testing and Medical Case Management

Reference for Follow-up Blood Lead Testing and Medical Case Management

**Healthcare Provider:**
- Immediately retest the child if the blood lead test result is invalid due to “Clotted” or “Insufficient Quantity.”
- Follow the flowchart below to determine if or when follow-up testing and medical case management is necessary.

*Blood Lead Screening and Testing Guidelines for Texas Children: Quick Reference Guide.* Go to: www.dshs.state.tx.us/lead. *aThe higher the BLL on the screening test, the more urgent the need for diagnostic testing. *bHealth care providers should consult with an expert in the management of these lead levels before administering chelation. Chelation therapy should never be administered before a venous diagnostic is obtained. Contact your local Poison Control Center or contact Texas CLPPP for a referral. *cTables adapted from Managing Elevated Blood Lead Levels Among Young Children: CDC, March 2002*
C.6 Lead Poisoning Prevention Educational Materials and Forms

Providers may order lead poisoning prevention educational materials and forms by written request to the DSHS warehouse or by contacting the warehouse online at webds.dshs.state.tx.us/mamd/litcat/default.asp. Other materials are available for download from the Texas CLPPP website at www.dshs.state.tx.us/lead.

Written requests for warehoused materials can be faxed to 1-512-458-7269 or mailed to the DSHS warehouse at:

DSHS Literature and Forms
Attn: Warehouse Manager
1100 West 49th Street
Austin, TX 78756-3199

Providers should include the catalog number, title of item, quantity needed, and return mailing address.

The following table lists materials available to providers at no cost.

APPENDIX D: TEXAS HEALTH STEPS STATUTORY STATE REQUIREMENTS

D.1 Legislative Requirements ................................................................. CH-368
D.2 Texas Health Steps (THSteps) Program ........................................... CH-368
D.3 Communicable Disease Reporting ..................................................... CH-368
D.4 Early Childhood Intervention (ECI) Referrals .................................... CH-368
D.5 Parental Accompaniment ................................................................. CH-368
D.6 Newborn Blood Screening ................................................................. CH-369
D.7 Abuse and Neglect ................................................................. CH-369
   D.7.1 Requirements for Reporting Abuse or Neglect ........................ CH-369
   D.7.2 Procedures for Reporting Abuse or Neglect ............................... CH-369
      D.7.2.1 Staff Training on Reporting Abuse and Neglect ................ CH-370
D.1 Legislative Requirements
Several specific legislative requirements affect Texas Health Steps (THSteps) and the provider’s participation in Texas Medicaid. The legislation includes, but is not limited to, those included in this Appendix.

D.2 Texas Health Steps (THSteps) Program
The Texas Medicaid Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) Program is mandated by Title XIX of the Social Security Act. EPSDT is a program of prevention, diagnosis, and treatment for Texas Medicaid clients birth through 20 years of age.

In Texas, EPSDT is known as THSteps. The Texas Department of State Health Services (DSHS), by authorization of Texas Department of Health and Human Services (HHSC), operates and administers the outreach and informing, medical and dental checkup, dental treatment utilization components of this program. State authority is found in Title 25 Texas Administrative Code (TAC), Part 1, Chapter 33, Subchapter A, Rule §33.1.

D.3 Communicable Disease Reporting
Diagnosis of sexually transmitted diseases (STDs), including human immunodeficiency virus (HIV), are reportable conditions under 25 TAC, Chapter 97, Subchapter F. Providers must report confirmed diagnosis of STDs as required by 25 TAC §§97.132-134.

D.4 Early Childhood Intervention (ECI) Referrals
All health-care professionals are required by state and federal legislation to refer clients birth through 35 months of age to early childhood intervention services provided under the authority of the Department of Assistive and Rehabilitative Services (DARS). In addition, other primary referral sources must refer clients birth through 35 months of age whom they suspect could have a developmental delay or disability. Referrals must take place within two business days of identifying a delay in development, and the referral must be made to an ECI contracted provider for evaluation and assessment of the client.

A medical diagnosis or a confirmed developmental delay is not needed for a referral. A referral can be based on professional judgment or a family’s concern.

Texas ECI programs serve families who have children who are birth through 35 months of age and have developmental delays or disabilities. ECI provides family support and specialized services to strengthen the family’s ability to access resources and improve their child’s development through daily activities. ECI provides services in all Texas counties through contracts with local community agencies and organizations.

To refer for services, call the local ECI program or the DARS Inquiries Line at 1-800-628-5115. For additional ECI information, visit the Department of Assistive and Rehabilitative Services (DARS) website at www.dars.state.tx.us/ecis. Persons who are hearing impaired can call the TDD/TTY line at 1-866-581-9328.

D.5 Parental Accompaniment
HRC §§32.024(s)-(s-1) requires that, as a condition for provider reimbursement, a client who is 14 years of age or younger be accompanied by the client’s parent, guardian, or other authorized adult during medical and dental checkups and dental treatment. DSHS implemented this requirement through rules found in 25 TAC §33.2 (Definitions) and 25 TAC §33.6 (THSteps Provider Responsibilities).

The DSHS rules require that the parent, guardian, or authorized adult accompany the client to the checkup, and that the parent, guardian, or authorized adult must wait for the client while the checkup, treatment, or service takes place.
Providers will not be required to submit documentation to TMHP to verify compliance with this policy in order for TMHP to process claims. By submitting the claim for reimbursement, the provider acknowledges compliance with all Medicaid requirements. Additional assurances are not necessary.

**Exception:** School health clinics, Head Start programs, and childcare facilities are exempt from this policy if the clinic, program, or facility encourages parental involvement in the health care of the client and obtains written consent for the services. The consent from the client’s parent or guardian must have been received within the one-year period before the date on which the services are provided and must not have been revoked.

**Refer to:** HRC §§32.024(s)-(s-1) 25 TAC §33.2 and §33.6.

### D.6 Newborn Blood Screening

The *Health and Safety Code* (HSC), Chapter 33, Section §33.011, implemented by the rules found at 25 TAC, Part 1, Chapter 37, Subchapter D, requires testing of all newborns. A current list of disorders can be found at www.dshs.state.tx.us/newborn/quickreference.shtml.

This testing is the responsibility of the physician who is attending a newborn client (defined as up to 30 days of age by rule in 25 TAC, Chapter 37, Subchapter D, §37.52) or the person who is attending the delivery of a newborn client who is not attended by a physician to screen for the disorders within 24 to 48 hours of birth.

All infants must be tested a second time at 1 to 2 weeks of age. If there is any doubt that a client who is 12 months of age or younger was properly tested, the provider should submit the blood sample on the appropriate DSHS Form NBS3 to the DSHS Newborn Screening Laboratory.

### D.7 Abuse and Neglect

#### D.7.1 Requirements for Reporting Abuse or Neglect

Providers are required to report abuse or neglect as outlined in subsection 1.4, "Provider Responsibilities" in Section 1, "Provider Enrollment and Responsibilities" (*Vol. 1, General Information*).

Additionally, the *General Appropriations Act*, Article II, Rider 23 under DSHS, and Rider 13 under HHSC, of Senate Bill (S.B.) 1, 79th Legislative Regular Session, 2007, require that DSHS and HHSC distribute or provide appropriated funds only to recipients who show good faith efforts to comply with all child abuse and reporting requirements set forth in the *Texas Family Code* (TFC), Chapter 261, relating to investigations of reports of child abuse and neglect.

#### D.7.2 Procedures for Reporting Abuse or Neglect

Professionals, as defined in TFC §261.101 (b), are required to report abuse or neglect no later than the 48th hour after the hour in which the professional first has cause to believe the client has been or may be abused or is the victim of the offense of indecency with a child.

Nonprofessionals shall immediately make a report when the nonprofessional has cause to believe that the client’s physical or mental health or welfare has been adversely affected by abuse.

A report must be made regardless of whether the provider staff suspects that a report may have previously been made. Reports of abuse or indecency with a child should be made to one of the following:

- Texas Department of Family and Protective Services (DFPS), if the alleged or suspected abuse involves a person responsible for the care, custody, or welfare of the child (DFPS Texas Abuse Hotline, 1-800-252-5400, 24 hours a day, 7 days a week).
- Call the DFPS Texas Abuse Hotline if:
  - You believe your situation requires action in less than 24 hours.
  - You prefer to remain anonymous.
• You have insufficient data to complete the required information on the report.
• You do not want an e-mail to confirm your report.

Note: Providers can also report nonemergency abuse online at www.txabusehotline.org.

• Any local or state law enforcement agency or the state agency that operates, licenses, certifies, or registers the facility in which the alleged abuse or neglect occurred.
• The agency designated by the court to be responsible for the protection of children.

The law requires that the report include the following:
• Name and address of the minor, if known.
• Name and address of the minor’s parent or the person responsible for the care, custody, or welfare of the child if not the parent, if known.
• Any other pertinent information concerning the alleged or suspected abuse, if known.

A provider may not reveal whether the client has been tested or diagnosed with HIV or acquired immunodeficiency syndrome (AIDS). If the minor’s identity is unknown (e.g., the minor is at the provider’s office to receive testing for HIV or an STD anonymously), no report is required.

D.7.2.1 Staff Training on Reporting Abuse and Neglect

All providers shall develop training for all staff on the policies and procedures in regard to reporting child abuse, including sexual abuse and neglect. New staff shall receive this training as part of their initial training or orientation.

Training shall be documented. As part of the training, staff shall be informed that the staff person who conducts the screening and has cause to suspect abuse has occurred is legally responsible for reporting. A joint report may be made with the supervisor.

Several specific legislative requirements affect THSteps and the provider’s participation in Texas Medicaid. The legislation includes, but is not limited to, those included in this appendix.

  - Report Services – TEHDI

Report Services – TEHDI
1. Birth Screen
   - Parental permission is required.
   - Test is either Auditory Brainstem Response (ABR) or Transient or Distortion Product Otoacoustic Emissions (OAE).
   - A second screen is done before discharge if the first is not passed.
   - Written results are given to the parents and the baby’s doctor.
   - Results are reported to DSHS but identifying information is removed for infants who pass; parental permission is given for identified results to be reported.
   - Referral to a local audiology/hearing resource is made for outpatient re-screen when an infant does not pass the second screen.

2. Outpatient Re-Screen
   - ABR or OAE tests are used.
   - If the infant does not pass, referrals are made to an audiologist for diagnostic hearing testing and to Early Childhood Intervention (ECI) at 1-800-628-5115.
   - Hearing services are available for children who are eligible through the Texas Medicaid Program and Children with Special Healthcare Needs (CSHCN).

3. Audiologic Evaluation
   - Diagnostic ABR and, to verify cochlear involvement, OAE if not previously done.
   - The Texas Pediatric Protocol for Evaluation is used; see www.dhs.state.tx.us/tehdi/assumpt.shtm.
   - Results are reported to the referral source and to TEHDI.
   - Referral is made to ECI upon the diagnosis of hearing loss.
   - Referral to an otologist for a medical examination of the ear.
   - Fitting of hearing aids by an audiologist when appropriate.
   - Ongoing audiological assessment and monitoring as needed.

4. Referral to ECI
   - Must be within two working days of the diagnosis of hearing loss.
   - Service coordination is provided by ECI.
   - Parents may refuse ECI services.
   - An Individual Family Services Plan (IFSP) will be developed by ECI within 45 days of referral.
   - ECI and the Local Education Agency (LEA) have shared service responsibility for children with hearing loss.

5. Deaf Education and other special education services are available from ages 3 – 21 when determined by the Individual Education Plan (IEP).

6. For children who must pass the newborn hearing screen, the Medical Home/physician continues to monitor for developing hearing loss; see http://pediatrics.aappublications.org/cgi/content/full/120/4/898 for suggested monitoring protocols.

E.2 Texas Early Hearing Detection and Intervention (TEHDI) Process

The following processes for early hearing detection and intervention are addressed in this section:

- Birth screen
- Outpatient rescreen
- Evaluation using Texas Pediatric Protocol for Audiology
- Referral to an Early Childhood Intervention (ECI) program
- Periodic monitoring by the physician or medical home

E.2.1 Birth Screen

The hearing screen at birth will be either screening auditory brainstem response (ABR) or transient or distortion product otoacoustic emissions (OAE). The following items apply:

- A newborn’s hearing is screened at the birth facility. If a newborn does not pass the screen, hearing is rescreened before discharge.
- The birth facility reports results to the Department of State Health Services (DSHS) using the web-based eScreener Plus (eSP™) system.
- The newborn’s family and physician/medical home receive a written report of the hearing screen outcome.
- If a newborn passes the screen, the physician monitors hearing as part of well child visits.
- If a newborn does not pass the second screen, a referral is made to a local resource who is experienced with the pediatric population for outpatient rescreen.

E.2.2 Outpatient Rescreen

If an outpatient rescreen is necessary, either ABR or OAE will be used. The following items apply:

- The physician/medical home receives the written report of results from the birth facility.
- The screener/physician reports results to the DSHS contractor, OZ Systems, using the web-based eSP™ system, by calling 1-866-427-5768 or faxing 1-817-385-3939.
- If the newborn passes the outpatient rescreen, the physician monitors hearing as part of well child visits.
- If a newborn does not pass the outpatient rescreen, a referral is made to an audiologist for evaluation using the Texas Pediatric Protocol for Evaluation. Visit www.dshs.state.tx.us/audio/assumpt.shtm for more information.
- Hearing services for clients who are birth through 20 years of age are administered through the Texas Medicaid hearing services benefit. Clients may use the Online Provider Lookup (OPL) to locate a Texas Medicaid provider who provides hearing services for children (clients who are birth through 20 years of age).

E.2.3 Evaluation using Texas Pediatric Protocol for Audiology

These evaluations will be diagnostic ABR and, if not previously done, OAE to verify cochlear involvement. The following items apply:

- Audiologists use equipment norms for newborns, preferably ones that they have collected on their equipment.
- Protocols include air and bone conduction results using tone burst ABR, as well as click ABR, so the amplification may be appropriately fit.
• The physician/medical home receives results and makes the referral to Early Childhood Intervention (ECI) using the web-based eSP™ system, by calling 1-800-628-5115, or by e-mailing the Texas Department of Assistive and Rehabilitative Services (DARS) at dars.inquiries@dars.state.tx.us.

• The physician/medical home monitors the child. See the American Academy of Pediatrics Position Statement at http://pediatrics.aappublications.org/cgi/content/full/113/Supplement_4/1545.

• The audiologist reports results to the DSHS contractor as noted above and makes the referral to ECI.

• Fitting of hearing aids by an audiologist when appropriate.

• Continued audiological assessment and/or monitoring as needed (usually monitor each three months for the first year of hearing aid use).

E.2.4 Referral to an ECI Program
The client will be referred to an ECI program by an audiologist or physician within two working days of identification of hearing loss as required by law. The following items apply:

• Service coordination provided by ECI.

• ECI will refer to the Local Education Agency (LEA) for auditory impairment (AI) services as outlined in the Memorandum of Understanding between TEA and DARS ECI.

• An evaluation and Individual Family Service Plan (IFSP) will occur within 45 days of referral to ECI.

• ECI services are available to clients birth through 35 months of age when determined by an IFSP.

• ECI and LEA will coordinate transition services upon the child’s third birthday.

E.2.5 Periodic Monitoring by the Physician or Medical Home
The physician/medical home will continue to monitor the client periodically and may consult or use the following:

• Providers may refer to the Joint Committee on Infant Hearing (JCIH) 2007 Position Statement for suggested monitoring protocols at http://pediatrics.aappublications.org/cgi/content/full/120/4/898.

• Deaf education and/or other special education services available from 3 years of age through 20 years of age when determined by an individualized education program.

• Regional specialists from Deaf and Hard of Hearing Services at the Department of Assistive and Rehabilitative Services (DARS) will provide technical assistance to birth facilities, audiologists, and ear, nose, and throat (ENT) physicians to ensure reporting of screening and evaluation results. Providers can call 1-512-407-3250 for assistance.

E.3 JCIH 2007 Position Statement
The JCIH 2007 position statement is available on the JCIH website at www.jcih.org/posstatemnts.htm. The 2007 position statement lists the indicators that are associated with permanent congenital, delayed-onset or progressive hearing loss in childhood.

Guideline on Periodicity of Examination, Preventive Dental Services, Anticipatory Guidance/Counseling, and Oral Treatment for Infants, Children, and Adolescents

Originating Committee
Clinical Affairs Committee

Review Council
Council on Clinical Affairs

Adopted
1991

Revised

Purpose
The American Academy of Pediatric Dentistry (AAPD) intends this guideline to help practitioners make clinical decisions concerning preventive oral health interventions, including anticipatory guidance and preventive counseling, for infants, children, and adolescents.

Methods
This guideline is a compilation of related policies and guidelines developed by the AAPD, in addition to pediatric oral health literature and national reports and recommendations. The related policies and guidelines provide additional references for individual recommendations.

Background
Professional care is necessary to maintain oral health. The AAPD emphasizes the importance of initiating professional oral health intervention in infancy and continuing through adolescence and beyond. The periodicity of professional oral health intervention and services is based on a patient’s individual needs and risk indicators. Each age group has distinct developmental needs to be addressed at specific intervals as part of a comprehensive evaluation. Continuity of care is based on the assessed needs of the individual patient and assures appropriate management of all oral conditions, dental disease, and injuries. The early dental visit to establish a dental home provides a foundation upon which a lifetime of preventive education and oral health care can be built. Anticipatory guidance and counseling are essential components of the dental visit.

Recommendations
This guideline addresses periodicity and general principles of examination, preventive dental services, anticipatory guidance/counseling, and oral treatment for children who have no contributory medical conditions and are developing normally. An accurate, comprehensive, and up-to-date medical history is necessary for correct diagnosis and effective treatment planning. Recommendations may be modified to meet the unique requirements of patients with special needs.

Clinical oral examination
The first examination is recommended at the time of the eruption of the first tooth and no later than 12 months of age. The developing dentition and occlusion should be monitored throughout eruption at regular clinical examinations. Unrecognized dental disease can result in exacerbated problems which lead to more extensive and expensive care whereas early detection and management of oral conditions can improve a child’s oral health, general health and well-being, and school readiness. Early diagnosis of developing malocclusions may allow for timely therapeutic intervention.

Components of a comprehensive oral examination include assessment of:
- General health/growth
- Pain
- Extraoral soft tissue
- Temporomandibular joint
- Intraoral soft tissue
- Oral hygiene and periodontal health
- Intraoral hard tissue
- The developing occlusion
- Caries risk
- Behavior of child

Based on the visual examination, the dentist may employ additional diagnostic aids (e.g., radiographs, photographs, pulp testing, laboratory tests, study casts).

The most common interval of examination is 6 months; however, some patients may require examination and preventive

Copyright © American Association of Pediatric Dentistry. Reprinted by permission.
services at more frequent intervals, based upon historical, clinical, and radiographic findings.\textsuperscript{5,22-24} Caries and its sequelae are among the most prevalent health problems facing infants, children, and adolescents in America.\textsuperscript{1} Caries is cumulative and progressive and, in the primary dentition, is highly predictive of caries occurring in the permanent dentition.\textsuperscript{25-28} Reevaluation and reinforcement of preventive activities contribute to improved instruction for the caregiver of the child or adolescent, continuity of evaluation of the patient's health status, and repetitive exposure to dental procedures, potentially allaying anxiety and fear for the apprehensive child or adolescent.

**Caries-risk assessment**
Risk assessment is the key element of contemporary preventive care for infants, children, adolescents, and persons with special health care needs. Its goal is to prevent disease by identifying and minimizing causative factors (eg, microbial burden, dietary habits, plaque accumulation) and optimizing protective factors (eg, fluoride exposure, oral hygiene, sealants).\textsuperscript{29} A caries-risk assessment tool (CAT) simplifies and clarifies the process.\textsuperscript{29} Sufficient evidence demonstrates certain groups of children at greater risk for development of early childhood caries (ECC) would benefit from infant oral health care.\textsuperscript{12,22-24,30} Infants and young children have unique caries-risk factors such as ongoing establishment of oral flora and host defense systems, susceptibility of newly erupted teeth, and development of dietary habits. Children are most likely to develop caries if mutans streptococci are acquired at an early age.\textsuperscript{30,31} The characteristics of ECC and the availability of preventive methods support anticipatory guidance/counseling as an important strategy in addressing this significant pediatric health problem. ECC can be a costly, devastating disease with lasting detrimental effects on the dention and systemic health.\textsuperscript{12,13,27} Adolescence can be a time of heightened caries activity due to an increased intake of cariogenic substances and inattention to oral hygiene procedures.\textsuperscript{31,42} Risk assessment can assure preventive care is tailored to each individual's needs and direct resources to those for whom preventive interventions provide the greatest benefit. Because a child's risk for developing dental disease can change over time due to changes in habits (eg, diet, home care), oral microflora, or physical condition, risk assessment must be repeated regularly and frequently to maximize effectiveness.

**Prophylaxis and topical fluoride treatment**
The interval for frequency of professional preventive services is based upon assessed risk for caries and periodontal disease. Gingivitis is nearly universal in children and adolescents\textsuperscript{43}; it usually responds to thorough removal of bacterial deposits and improved oral hygiene.\textsuperscript{43,44} Self-administered plaque control programs without periodic professional reinforcement are inconsistent in providing long-term inhibition of gingivitis.\textsuperscript{44} Many patients lack the skill or motivation to become and remain plaque-free for a significant time.\textsuperscript{45} Hormonal fluctuations, including those occurring during the onset of puberty, can modify the gingival inflammatory response to dental plaque.\textsuperscript{45} Children can develop any of the several forms of periodontitis, with aggressive periodontitis occurring more commonly in children and adolescents than adults.\textsuperscript{45}

Caries risk may change quickly during active dental eruption phases. Newly erupted teeth may be at higher risk of developing caries, especially during the post-eruption maturation process. Children who exhibit higher risk of developing caries would benefit from recall appointments at greater frequency than every 6 months. This allows increased professional fluoride therapy application, microbial monitoring, antimicrobial therapy reapplication, and reevaluating behavioral changes for effectiveness.\textsuperscript{44} An individualized preventive plan increases the probability of good oral health by demonstrating proper oral hygiene methods/techniques and removing plaque, stain, calculus\textsuperscript{46}, and the factors that influence their build-up.\textsuperscript{38-39}

Professional topical fluoride treatments should be based on caries risk assessment.\textsuperscript{31,43,45-55} A pumice prophylaxis is not an essential prerequisite to this treatment.\textsuperscript{44} Appropriate precautionary measures should be taken to prevent swallowing of any professionally-applied topical fluoride. Children at moderate caries risk should receive a professional fluoride treatment at least every 6 months; those with high caries risk should receive greater frequency of professional fluoride applications (eg, every 3-6 months).\textsuperscript{52,53,57,62} Ideally, this would occur as part of a comprehensive preventive program in a dental home.\textsuperscript{11}

**Fluoride supplementation**
Fluoride contributes to the prevention, inhibition, and reversal of caries.\textsuperscript{32,42,47} The AAPD encourages optimal fluoride exposure for every child, recognizing fluoride in the community water supplies as the most beneficial and inexpensive preventive intervention. Fluoride supplementation should be considered when fluoride exposure is not optimal.\textsuperscript{32} Supplementation should be in accordance with the guidelines jointly recommended by the AAPD\textsuperscript{52}, the American Academy of Pediatrics\textsuperscript{45}, and the American Dental Association (ADA)\textsuperscript{46}, and endorsed by the Centers for Disease Control and Prevention.\textsuperscript{14}

**Anticipatory guidance/counseling**
Anticipatory guidance is the process of providing practical, developmentally-appropriate information about children's health to prepare parents for the significant physical, emotional, and psychological milestones.\textsuperscript{53} Appropriate discussion and counseling should be an integral part of each visit. Topics to be included are oral hygiene and dietary habits, injury prevention, nonnutritive habits, substance abuse, intraoral/personal piercing, and speech/language development.

Oral hygiene counseling involves the parent and patient. Initially, oral hygiene is the responsibility of the parent. As the child develops, home care is performed jointly by parent and child. When a child demonstrates the understanding and ability to perform personal hygiene techniques, the health care professional should counsel the child. The effectiveness of home care should be monitored at every visit and includes a discussion on the consistency of daily preventive activities.\textsuperscript{11}
High-risk dietary practices appear to be established early, probably by 12 months of age, and are maintained throughout early childhood.66-67 Frequent bottle feeding at night, breastfeeding on demand, and extended and repetitive use of a no-spill training cup are associated with, but not consistently implicated in, ECC.49 The role of carbohydrates in caries initiation is unequivocal. Acids in carbonated beverages can have a deleterious effect (ie, erosion) on enamel. Excess consumption of carbohydrates, fats, and sodium contribute to poor systemic health. Dietary analysis and the role of dietary choices on oral health, malnutrition, and obesity should be addressed through nutritional and preventive oral health counseling at periodic visits.13 The US Department of Agriculture’s Food Pyramid68 and Center for Disease Control and Prevention/National Center for Health Statistics’ Growth Charts69 provide guidance for parents and their children and promote better understanding of the relationship between healthy diet and development.

Facial trauma that results in fractured, displaced, or lost teeth can have significant negative functional, aesthetic, and psychological effects on children.70 Practitioners should provide age-appropriate injury prevention counseling for orofacial trauma.71-74 Initially, discussions would include play objects, pacifiers, car seats, and electrical cords. As motor coordination develops, the parent/patient should be counseled on additional safety and preventive measures, including mouthguards for sporting activities. The greatest incidence of trauma to the primary dentition occurs at 2 to 3 years of age, a time of increased mobility and developing coordination.72 The most common injuries to permanent teeth occur secondary to falls, followed by traffic accidents, violence, and sports.75-78 Dental injuries could have improved outcomes if the public were aware of first-aid measures and the need to seek immediate treatment.

Nonnutritive oral habits (eg, digital and pacifier habits, bruxism, abnormal tongue thrusts) may apply forces to teeth and dentoalveolar structures.79 Although early use of pacifiers and digit sucking are considered normal, habits of sufficient frequency, intensity, and duration can contribute to deleterious changes in occlusion and facial development. It is important to discuss the need for early additional sucking, then the need to wean from the habits before malocclusion or skeletal dysplasias occur. Early dental visits provide an opportunity to encourage parents to help their children stop sucking habits by age 3 years or younger. For school-aged children and adolescent patients, counseling regarding any existing habits (eg, fingernail biting, clenching, bruxism) is appropriate.78

Speech and language is an integral component of a child’s early development.77 Deficiencies and abnormal delays in speech and language production can be recognized early and referral made to address the concerns appropriately. Communication and coordination of appliance therapy with a speech and language professional can assist in the timely treatment of these disorders.

Smoking and smokeless tobacco use almost always are initiated and established in adolescence.79-81 During this time period, children may be exposed to opportunities to experiment with other substances that negatively impact their health and well-being. Practitioners should provide education regarding the serious health consequences of tobacco use and exposure to second hand smoke.82 The practitioner may need to obtain information regarding tobacco use and alcohol/drug abuse confidentially from an adolescent patient.5 When substance abuse has been identified, referral for appropriate intervention is indicated.

Complications from intraoral/perioral piercings can range from pain, infection, and tooth fracture to life-threatening conditions of bleeding, edema, and airway obstruction.83 Although piercings most commonly are observed in the teenaged pediatric dental patient, education regarding pathologic conditions and sequelae associated with these piercings should be initiated for the preteen child/parent and reinforced during subsequent periodic visits.

Radiographic assessment
Appropriate radiographs are a valuable adjunct in the oral health care of infants, children and adolescents.84,85 Timing of initial radiographic examination should not be based upon the patient’s age.86 Rather, after review of an individual’s history and clinical findings, judicious determination of radiographic needs and examination can optimize patient care while minimizing radiation exposure.87,88 The US Food and Drug Administration/ADA guidelines were developed to assist the dentist in deciding under what circumstances specific radiographs are indicated.89

Treatment of dental disease/injury
Healthcare providers who diagnose oral disease or trauma should either provide therapy or refer the patient to an appropriately-trained individual for treatment.90 Immediate intervention is necessary to prevent further dental destruction, as well as more widespread health problems. Postponed treatment can result in exacerbated problems that may lead to the need for more extensive care.90-92 Early intervention could result in savings of health-care dollars for individuals, community health care programs, and third party payors.

Treatment of developing malocclusion
Guidance of eruption and development of the primary, mixed, and permanent dentitions is an integral component of comprehensive oral health care for all pediatric dental patients.93 Early diagnosis and successful treatment of developing malocclusions can have both short-term and long-term benefits, while achieving the goals of occlusal harmony and function and dentofacial esthetics.94-95 Early treatment is beneficial for many patients, but may not be indicated for every patient. When there is a reasonable indication that an oral habit will result in unfavorable sequelae in the developing permanent dentition, any treatment must be appropriate for the child’s development, comprehension, and ability to cooperate. Use of an appliance is indicated only when the child wants to stop the habit and would benefit from a reminder.96 At each stage of occlusal development, the objectives of intervention/treatment include: (1) reversing adverse growth;
(2) preventing dental and skeletal disharmonies; (3) improving esthetics of the smile; (4) improving self-image; and (5) improving the occlusion.36

**Sealants**

Sealants reduce the risk of pit and fissure caries in susceptible teeth and are cost-effective when maintained.38,39 They are indicated for primary and permanent teeth with pits and fissures that are predisposed to plaque retention. At-risk pits and fissures should be sealed as soon as possible. Because caries risk may increase at any time during a patient’s life due to changes in habits (eg, dietary, home care), oral microflora, or physical condition, unsealed teeth subsequently might benefit from sealant application.40 The need for sealant placement should be reassessed at periodic preventive care appointments. Sealants should be monitored and repaired or replaced as needed.

**Third Molars**

Panoramic or periapical radiographic assessment is indicated during late adolescence to assess the presence, position, and development of third molars. 41,42 A decision to remove or retain third molars should be made before the middle of the third decade. 43 Consideration should be given to removal when there is a high probability of disease or pathology and/or the risks associated with early removal are less than the risks of later removal. 44

**Referral for regular and periodic dental care**

As adolescent patients approach the age of majority, it is important to educate the patient and parent on the value of transitioning to a dentist who is knowledgeable in adult oral health care. At the time agreed upon by the patient, parent, and pediatric dentist, the patient should be referred to a specific practitioner in an environment sensitive to the adolescent’s individual needs. 45 Until the new dental home is established, the patient should maintain a relationship with the current care provider and have access to emergency services. Communication and records transfer allow for consistent and continuous care for the patient.

**Recommendations by Age**

**6 to 12 months**

1. Complete the clinical oral examination with adjunctive diagnostic tools (eg, radiographs as determined by child’s history, clinical findings, and susceptibility to oral disease) to assess oral growth and development, pathology, and/or injuries; provide diagnosis.
2. Provide oral hygiene counseling for parents, including the implications of the oral health of the caregiver.
3. Remove supragingival and subgingival stains or deposits as indicated.
4. Assess the child’s systemic and topical fluoride status (including type of infant formula used, if any, and exposure to fluoridated toothpaste) and provide counseling regarding fluoride. Prescribe systemic fluoride supplements, if indicated, following assessment of total fluoride intake from drinking water, diet, and oral hygiene products.

5. Assess appropriateness of feeding practices, including bottle and breast-feeding, and provide counseling as indicated.
6. Provide dietary counseling related to oral health.
7. Provide age-appropriate injury prevention counseling for orofacial trauma.
8. Provide counseling for nonnutritive oral habits (eg, digit, pacifiers).
9. Provide required treatment and/or appropriate referral for any oral diseases or injuries.
11. Consult with the child’s physician as needed.
13. Determine the interval for periodic reevaluation.

**12 to 24 months**

1. Repeat 6 to 12-month procedures every 6 months or as indicated by individual patient’s risk status/susceptibility to disease.
2. Assess appropriateness of feeding practices—including bottle, breast-feeding, and no-spill training cups—and provide counseling as indicated.
3. Review patient’s fluoride status—including any childcare arrangements which may impact systemic fluoride intake—and provide parental counseling.
4. Provide topical fluoride treatments every 6 months or as indicated by the individual patient’s needs.

**2 to 6 years**

1. Repeat 12- to 24-month procedures every 6 months or as indicated by individual patient’s risk status/susceptibility to disease. Provide age-appropriate oral hygiene instructions.
2. Scale and clean the teeth every 6 months or as indicated by individual patient’s needs.
3. Provide pit and fissure sealants for caries-susceptible primary molars and permanent molars, premolars, and anterior teeth.
4. Provide counseling and services (eg, mouthguards) as needed for orofacial trauma prevention.
5. Provide assessment/treatment or referral of developing malocclusion as indicated by individual patient’s needs.
6. Provide required treatment and/or appropriate referral for any oral diseases, habits, or injuries as indicated.
7. Assess speech and language development and provide appropriate referral as indicated.

**6 to 12 years**

1. Repeat 2- to 6-year procedures every 6 months or as indicated by individual patient’s risk status/susceptibility to disease.
2. Provide substance abuse counseling (eg, smoking, smokeless tobacco).
3. Provide counseling on intraoral/perioral piercing.
12 years and older
1. Repeat 6- to 12-year procedures every 6 months or as indicated by individual patient's risk status/susceptibility to disease.
2. During late adolescence, assess the presence, position, and development of third molars, giving consideration to removal when there is a high probability of disease or pathology and/or the risks associated with early removal are less than the risks of later removal.
3. At an age determined by patient, parent and pediatric dentist, refer the patient to a general dentist for continuing oral care.

Recommendations for Pediatric Oral Health Assessment, Preventive Services, and Anticipatory Guidance/Counseling

Since each child is unique, these recommendations are designed for the care of children who have no contributing medical conditions and are developing normally. These recommendations will need to be modified for children with special health care needs or if disease or trauma manifests variations from normal. The American Academy of Pediatric Dentistry (AAPD) emphasizes the importance of very early professional intervention and the continuity of care based on the individualized needs of the child. Refer to the text of this guideline for supporting information and references.

1. First examination at the eruption of the first tooth and no later than 12 months. Repeat every 6 months or as indicated by child’s risk status/susceptibility to disease. Includes assessment of pathology and injuries.
2. By clinical examination.
3. Must be repeated regularly and frequently to maximize effectiveness.
4. Timing, selection, and frequency determined by child’s history, clinical findings, and susceptibility to oral disease.
5. Consider when systemic fluoride exposure is suboptimal. Up to at least 16 years.
6. Appropriate discussion and counseling should be an integral part of each visit for care.
7. Initially, responsibility of parent; as child matures, jointly with parent; then, when indicated, only child.
8. At every appointment; initially discuss appropriate feeding practices, then the role of refined carbohydrates and frequency of snacking in caries development and childhood obesity.
9. Initially play objects, pacifiers, car seats; when learning to walk; then with sports and routine playing, including the importance of mouthguards.
10. At first, discuss the need for additional sucking: digits vs pacifiers; then the need to wean from the habit before malocclusion or skeletal dysplasia occurs. For school-aged children and adolescent patients, counsel regarding any existing habits such as fingernail biting, clenching, or bruxism.
11. For caries-susceptible primary molars, permanent molars, premolars, and anterior teeth with deep pits and fissures, placed as soon as possible after eruption.

G.2 American Dental Association Guidelines for Prescribing Dental Radiographs (3 Pages)

Guideline on Prescribing Dental Radiographs for Infants, Children, Adolescents, and Persons with Special Health Care Needs

Originating Committee
Ad Hoc Committee on Pediatric Radiology

Review Council
Council on Clinical Affairs

Adopted
1981

Revised

Reaffirmed
1997

Purpose
The American Academy of Pediatric Dentistry (AAPD) intends this guideline to help practitioners make clinical decisions concerning appropriate selection of dental radiographs as part of an oral evaluation of infants, children, adolescents, and persons with special health care needs. The guideline can be used to optimize patient care, minimize radiation burden, and allocate health care resources responsibly.

Methods
The American Dental Association (ADA) initiated a review of The Selection of Patients for X-ray Examinations: Dental Radiographic Examinations1 in 2002. The AAPD, along with other dental specialty organizations, participated in the review and revision of these guidelines. The Food and Drug Administration (FDA) accepted them in November 2004. This review included a new systematic literature search of the MEDLINE/Pubmed electronic database using the following parameters: Terms: dental radiology, dental radiographs, dental radiography, cone beam computed tomography AND guidelines, recommendations; Fields: all fields; Limits: within the last 10 years, humans, and English. In 2006, the ADA Council on Scientific Affairs published an update to their recommendations for dental radiographs. The AAPD continues to endorse the ADA/FDA's recommendations.

Background
Radiographs are valuable aids in the oral health care of infants, children, adolescents, and persons with special health care needs. They are used to diagnose oral diseases and to monitor dentofacial development and the progress of therapy. The recommendations in the ADA/FDA guidelines were developed to serve as an adjunct to the dentist's professional judgment. The timing of the initial radiographic examination should not be based upon the patient's age, but upon each child's individual circumstances. Because each patient is unique, the need for dental radiographs can be determined only after reviewing the patient's medical and dental histories, completing a clinical examination, and assessing the patient's vulnerability to environmental factors that affect oral health.

Radiographs should be taken only when there is an expectation that the diagnostic yield will affect patient care. The AAPD recognizes that there may be clinical circumstances for which a radiograph is indicated, but a diagnostic image cannot be obtained. For example, the patient may be unable to cooperate or the dentist may have privileges in a health care facility lacking intraoral radiographic capabilities. If radiographs of diagnostic quality are unobtainable, the dentist should confer with the parent to determine appropriate management techniques (eg, preventive/restorative interventions, advanced behavior guidance modalities, deferral, referral), giving consideration to the relative risks and benefits of the various treatment options for the patient.

Because the effects of radiation exposure accumulate over time, every effort must be made to minimize the patient's exposure. Good radiological practices (eg, use of lead apron, thyroid collars, and high-speed film; beam collimation) are important. The dentist must weigh the benefits of obtaining radiographs against the patient's risk of exposure.

New imaging technologies [ie, cone beam computed tomography (CBCT)] have added 3-dimensional capabilities that have many applications in dentistry. Evidence-based guidelines and policies currently are under development by organizations such as the American Academy of Oral and

</tbody>
</table>

### *Clinical situations for which radiographs may be indicated include but are not limited to:*

**A. Positive Historical Findings**
1. Previous periodontal or endodontic treatment
2. History of pain or trauma
3. Familial history of dental anomalies
4. Postoperative evaluation of healing
5. Remineralization monitoring
6. Presence of implants or evaluation for implant placement
7. Dental/periodontal infections
8. Malposed or impacted teeth
9. Sinus tract ("Bilater")
10. Growth abnormalities
11. Oral involvement in known or suspected systemic disease
12. Positive neurologic findings in the head and neck
13. Evidence of foreign objects
14. Pain and/or dysfunction of the temporomandibular joint
15. Facial asymmetry
16. Abnormal teeth for fixed or removable partial prosthesis
17. Unexplained bleeding
18. Unexplained sensitivity of teeth
19. Unusual eruption, spacing or migration of teeth
20. Unusual tooth morphology, calcification or color
21. Unexplained absence of teeth
22. Clinical erosion

**B. Positive Clinical Signs/Symptoms**
1. Clinical evidence of periodontal disease
2. Large or deep restorations
3. Deep carious lesions
4. Malposed or clinically impacted teeth
5. Swelling
6. Evidence of dental/periodontal trauma
7. Mobility of teeth
8. Sinus tract ("Bilateral")
9. Clinically suspected sinus pathology
10. Growth abnormalities
11. Oral involvement in known or suspected systemic disease
12. Positive neurologic findings in the head and neck
13. Evidence of foreign objects
14. Pain and/or dysfunction of the temporomandibular joint
15. Facial asymmetry
16. Abnormal teeth for fixed or removable partial prosthesis
17. Unexplained bleeding
18. Unexplained sensitivity of teeth
19. Unusual eruption, spacing or migration of teeth
20. Unusual tooth morphology, calcification or color
21. Unexplained absence of teeth
22. Clinical erosion

**Factors increasing risk for caries may include but are not limited to:**
1. High level of caries experience or demineralization
2. History of recurrent caries
3. High titer of cariogenic bacteria
4. Existing restoration(s) of poor quality
5. Poor oral hygiene
6. Inadequate fluoride exposure
7. Prolonged nursing (bottle or breast)
8. Frequent high sucrose content in diet
9. Poor family dental health
10. Developmental or acquired enamel defects
11. Developmental or acquired disability
12. Xerostomia
13. Genetic abnormality of teeth
14. Many multisurface restorations
15. Chemoradiation therapy
16. Eating disorders
17. Drug/alcohol abuse
18. Irregular dental care

---

**Endorsements** 251
Maxillofacial Radiology (AAOMR).\(^4\) The usefulness and future of CBCT have been reviewed with an introduction to issues related to criteria, ramifications, and medico-legal considerations.\(^5\) Certain principles clearly are emerging and point to the need for standards of provisions of care. Because this technology has potential to produce vast amounts of data and imaging information beyond initial intentions, it is important to interpret all information obtained, including that which may be beyond the immediate diagnostic needs of the practitioner.

**Recommendations**

The recommendations of the ADA/FDA guidelines are contained within the accompanying table. “The recommendations in this chart are subject to clinical judgment and may not apply to every patient. They are to be used by dentists only after reviewing the patient’s health history and completing a clinical examination. Because every precaution should be taken to minimize radiation exposure, protective thyroid collars and aprons should be used whenever possible. This practice is strongly recommended for children, women of childbearing age, and pregnant women.”\(^6\)

Although standards are not officially developed for the use of CBCT, this advance in orofacial dental imaging is an excellent adjunct for improvements in dental care. The executive opinion statement of the AAOMR provides initial guidance for the use of this technology.\(^4\) Their recommendations relate to the need for practices of qualified individuals to use this technology with selection criteria which include clear indications that minimize radiation exposure while maximizing diagnostic information obtained. When using CBCT, the resulting imaging is required to be supplemented with a written report placed in the patient’s records that includes full interpretation of the findings.

Note: A comprehensive Index, including Volume 1 and all handbooks from Volume 2, is included at the end of Volume 1 (General Information).
1. GENERAL INFORMATION

The information in this handbook is intended for Texas Medicaid home health Durable Medical Equipment (DME), DME medical supplier, and medical supply company providers. This handbook provides information about Texas Medicaid’s benefits, policies, and procedures applicable to these providers.

All providers are required to report suspected child abuse or neglect as outlined in subsection 1.4.1.2, “Reporting Child Abuse or Neglect” in Section 1, “Provider Enrollment and Responsibilities” (Vol 1, General Information).

**Important:** All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in 1 Texas Administrative Code (TAC) §371.1617(a)(6)(A). Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.

**Refer to:** Section 1: Provider Enrollment and Responsibilities (Vol. I, General Information) for more information about enrollment procedures.

2. TEXAS MEDICAID (TITLE XIX) HOME HEALTH SERVICES

2.1 Enrollment

Enrolled providers of DME and medical supplies will be issued a DME-Home Health Services (DMEH) provider identifier that is specific to home health providers. Providers will also be issued a separate DME/Medical Supplier provider identifier that is specific to the Comprehensive Care Program (CCP). All DME providers must be Medicare-certified before applying for enrollment in Texas Medicaid.

Providers may download the Texas Medicaid Provider Enrollment Application at www.tmhp.com or request a paper application form by contacting TMHP directly at 1-800-925-9126.

Providers may also obtain the paper enrollment application by writing to the following address:

Texas Medicaid & Healthcare Partnership
Provider Enrollment
PO Box 200795
Austin, TX 78720-0795
1-800-925-9126
Fax: 1-512-514-4214
Providers may request prior authorization for home health services by contacting:

Texas Medicaid & Healthcare Partnership
Home Health Services
PO Box 202977
Austin, TX 78720-2977
1-800-925-8957
Fax: 1-512-514-4209

2.1.1 Change of Address or Telephone Number
A current physical and mailing address and telephone number must be on file for the agency or company to receive Remittance & Status (R&S) reports, reimbursement checks, Medicaid provider procedures manuals, the Texas Medicaid Bulletin (bimonthly update to the Texas Medicaid Provider Procedures Manual), and all other TMHP correspondence. Promptly send all address and telephone number changes to TMHP Provider Enrollment at the address listed above under subsection 2.1, “Enrollment” in this handbook.

2.1.2 Pending Agency Certification
DMEH suppliers submitting claims before the enrollment process is complete or without prior authorization for services issued by the TMHP Home Health Services Prior Authorization Department will not be reimbursed. The effective date of enrollment is when all Medicaid provider enrollment forms are received and approved by TMHP.

Upon the receipt of notice of Medicaid enrollment, the supplier must contact the TMHP Home Health Services Prior Authorization Department before serving a Medicaid client for services that require a prior authorization number. Prior authorization cannot be issued before Medicaid enrollment is complete. Regular prior authorization procedures are followed at that time.

Providers must not submit home health services claims for payment until Medicaid certification is received and a prior authorization number is assigned.

Refer to: Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks).

2.2 Services, Benefits, Limitations and Prior Authorization
Home health services include Home Health Skilled Nursing (SN), Home Health Aide (HHA), Physical Therapy (PT) and Occupational Therapy (OT) services, DME, and expendable medical supplies that are provided to eligible Medicaid clients at their place of residence.

Note: THSteps-eligible clients who qualify for medically necessary services beyond the limits of this Home Health Services benefit may receive those services through CCP.

Refer to: Subsection 5.1.1, “Overview” in Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information on clients birth through 20 years of age.

Section 3, “Home Health Services For Nursing and Therapy” in the Nursing and Therapy Services Handbook (Vol. 2, Provider Handbooks) for more information on nursing and therapy services.

2.2.1 Home Health Services
The benefit period for home health professional services is up to 60 days with a current Plan of Care (POC). For all DME and medical supplies with or without prior authorization requirements, providers must complete a Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form except as outlined in subsection 2.2.10 of this handbook. In chronic and stable situations, the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form is valid for up to, but no more than, 6 months from the date of the physician’s signature on the form. If necessary, DME and supplies ordered on a Home Health Services
(Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form may be prior authorized for up to 6 months with medical necessity determination. Because a Medicaid client's eligibility period is for one month, providers must bill for a one month supply at a time, even though prior authorization may be granted for up to 6 months. This extended prior authorization period begins on the date that clients receive their first prior authorized home health service. Texas Medicaid allows additional DME or supplies that have been determined to be medically necessary and have been prior authorized by TMHP Home Health Services Prior Authorization Department. Providers must retain all orders, signed and dated Title XIX forms, delivery slips, and invoices for all supplies provided to a client and must disclose them to the HHSC or its designee on request. These records and claims must be retained for a minimum of five years from the date of service (DOS) or until audit questions, appeals, hearings, investigations, or court cases are resolved. Use of these services is subject to retrospective review.

2.2.1.1 Client Eligibility

Home health clients do not need to be homebound to qualify for services.

The Medicaid client must be eligible on the DOS and must meet all the following requirements to qualify for Home Health Services:

- Have a medical need for home health professional services, DME, or supplies that is documented in the client’s POC and considered a benefit under Home Health Services
- Receive services that meet the client’s existing medical needs and can be safely provided in the client’s home
- Receive prior authorization from TMHP for most home health professional services, DME, or supplies

Certain DME/supplies may be obtained without prior authorization although providers must retain a Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form reviewed, signed, and dated by the treating physician for these clients.

Refer to: “Automated Inquiry System (AIS)” in “Preliminary Information” (Vol. 1, General Information).

Section 6: Claims Filing in Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information on clients who are 20 years of age and younger.

2.2.1.2 Prior Authorization Requests for Clients with Retroactive Eligibility

Retroactive eligibility occurs when the effective date of a client’s Medicaid coverage is before the date the client's Medicaid eligibility is added to TMHP’s eligibility file, which is called the “add date.”

For clients with retroactive eligibility, prior authorization requests must be submitted after the client’s add date and before a claim is submitted to TMHP.

For services provided to fee-for-service Medicaid and Primary Care Case Management (PCCM) clients during the client’s retroactive eligibility period, i.e., the period from the effective date to the add date, prior authorization must be obtained within 95 days from the client’s add date and before a claim for those services is submitted to TMHP. For services provided on or after the client’s add date, the provider must obtain prior authorization within 3 business days of the date of service.

The provider is responsible for verifying eligibility. The provider is strongly encouraged to access the Automated Inquiry System (AIS) or TexMedConnect to verify eligibility frequently while providing services to the client. If services are discontinued before the client’s add date, the provider must still obtain prior authorization within 95 days of the add date to be able to submit claims.

Refer to: Section 4: Client Eligibility (Vol. 1, General Information).
2.2.1.3 Prior Authorization

Prior authorization must be obtained for some supplies and most DME from TMHP within three business days of DOS. Although providers may supply some DME and medical supplies to a client without prior authorization, they must still retain a copy of the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form that has Section B completed, signed, and dated by the client’s attending physician.

The following prior authorization requests can be submitted on the TMHP website at www.tmhp.com:

- External Insulin Pump
- Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form
- Home Health Services POC
- Medicaid Certificate of Medical Necessity for CPAP/BiPAP or Oxygen Therapy
- Medicaid Certificate of Necessity for Chest Physiotherapy Device Form—Initial Request
- Medicaid Certificate of Necessity for Chest Physiotherapy Device Form—Extended Request
- Statement for Initial Wound Therapy System In-Home Use
- Statement for Recertification of Wound Therapy System In-Home Use
- Wheelchair/Scooter/Stroller Seating Assessment Form (CCP/Home Health Services) (Attachments will be sent separately due to size and detailed information)

Refer to: Subsection 5.4.1, “Prior Authorization Requests Through the TMHP Website” in Section 5, “Prior Authorization” (Vol. 1, General Information) for more information, including mandatory documentation requirements.

If a client’s primary coverage is private insurance, and Medicaid is secondary, prior authorization is required for Medicaid reimbursement. If the primary coverage is Medicare and Medicare approves the service, and Medicaid is secondary, prior authorization is not required. TMHP will pay only the coinsurance or deductible. If Medicare denied the service, then Medicaid prior authorization is required. TMHP must receive a prior authorization request within 30 days of the date of Medicare’s final disposition. The medicare remittance advice notice (MRAN) containing Medicare’s final disposition must accompany the prior authorization request. If the service is a Medicaid-only service, prior authorization is required within three business days of the DOS. The provider is responsible for determining if eligibility is effective by using AIS or an electronic eligibility inquiry through TMHP EDI gateway.

The provider must contact the TMHP Home Health Services Prior Authorization Department within three business days of the DOS for DME/medical supplies to obtain prior authorization.

If inadequate or incomplete information is provided or medical necessity is lacking, the provider will be requested to furnish additional documentation as required to make a decision on the request. Because it often must be obtained from the client’s physician, providers have two weeks to submit the requested documentation. If the additional documentation is received within the two-week period, prior authorization can be considered for the original date of contact. If the additional documentation is received more than two weeks from the request for the documentation, prior authorization is not considered before the date the additional documentation is received. It is the DME supplier’s responsibility to contact the physician to obtain the requested additional documentation. The physician must maintain documentation of medical necessity in the client’s record.

TMHP Home Health Services toll-free number is 1-800-925-8957.
Refer to: Subsection 2.2.2.2, “Prior Authorization” in this handbook for DME prior authorization information.

Subsection 2.3.1, “Medicaid Relationship to Medicare” in this handbook.

Client eligibility for Medicaid is for one month at a time. Providers should verify eligibility every month. Prior authorization does not guarantee payment.

2.2.2 Durable Medical Equipment (DME) and Supplies

Texas Medicaid defines DME as:

*Medical equipment or appliances that are manufactured to withstand repeated use, ordered by a physician for use in the home, and required to correct or ameliorate a client’s disability, condition, or illness.*

Since there is no single authority, such as a federal agency, that confers the official status of “DME” on any device or product, HHSC retains the right to make such determinations with regard to DME benefits of Texas Medicaid. DME benefits of Texas Medicaid must have either a well-established history of efficacy or, in the case of novel or unique equipment, valid, peer-reviewed evidence that the equipment corrects or ameliorates a covered medical condition or functional disability.

Requested DME may be a benefit when it meets the Medicaid definition of DME. The majority of DME and expendable supplies are covered Home Health Services. If a service cannot be provided for a client who is 20 years of age or younger through Home Health Services, these services may be covered through CCP if they are determined to be medically necessary.

To be reimbursed as a home health benefit:

- The client must be eligible for home health benefits.
- The criteria listed for the requested equipment or supply must be met.
- The requested equipment or supply must be medically necessary, and Federal Financial Participation (FFP) must be available.
- The client’s health status would be compromised without the requested equipment or supply.
- The requested equipment or supplies must be safe for use in the home.
- The client must be seen by a physician within one year of the DOS.

The provider must sign and have the client sign Form DM.1, “DME Certification and Receipt Form (3 pages)" in this handbook for all purchased DME for Medicaid clients before submitting a claim for payment. The client’s signature means the DME is the property of the client. The certification form must include the date the client received the DME, the name of the item, and the printed names and signatures of the provider and the client or primary caregiver. This form must be maintained by the DME provider in the client’s record.

The signed and dated DME Certification and Receipt Form must be submitted to TMHP for claims and appeals for DME that meet or exceed a billed amount of $2,500.00. The form must also be submitted when multiple items that meet or exceed a total billed amount of $2,500.00 are billed for the same DOS. The form is required in addition to obtaining prior authorization, when applicable.

If the DME Certification and Receipt Form is not submitted to TMHP, the claim payment or appeal will be reviewed and will be eligible for recoupment. Incomplete forms will be returned to the provider for correction and resubmission.

TMHP will contact clients that received DME that meets or exceeds a billed amount of $2,500.00 to verify that services were rendered. If the delivery of the equipment cannot be verified by the client, the claim payment will be eligible for recoupment.
The provider must keep all Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Forms and Addendum to Home Health Services (Title XIX) DME/Medical Supplies Physician Order Forms on file. Providers must retain delivery slips or invoices and the signed and dated DME Certification and Receipt Form documenting the item and date of delivery for all DME provided to a client and must disclose them to HHSC or its designee on request.

- The DME must be used for medical or therapeutic purposes, and supplied through an enrolled DMEH provider in compliance with the client’s POC.

- These records and claims must be retained for a minimum of five years from the DOS or until audit questions, appeals, hearings, investigations, or court cases are resolved. Use of these services is subject to retrospective review.

**Note:** *All purchased equipment must be new upon delivery to client. Used equipment may be utilized for lease, but when purchased, must be replaced with new equipment.*

HHSC/TMHP reserves the right to request the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form or Addendum to Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form at any time.

DME must meet the following requirements to qualify for reimbursement under Home Health Services:

- The client received the equipment as prescribed by the physician.

- The equipment has been properly fitted to the client or meets the client’s needs.

- The client, the parent or guardian of the client, or the primary caregiver of the client, has received training and instruction regarding the equipment’s proper use and maintenance.

DME must:

- Be medically necessary due to illness or injury or to improve the functioning of a body part, as documented by the physician in the client’s POC or the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form.

- Be prior authorized by the TMHP Home Health Services Prior Authorization Department for rental or purchase of supplies for most equipment. Some equipment does not require prior authorization. Prior authorization for equipment rental can be issued for up to six months based on diagnosis and medical necessity. If an extension is needed, requests can be made up to 60 days before the start of the new prior authorization period with a new Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form.

- Meet the client’s existing medical and treatment needs.

- Be considered safe for use in the home.

- Be provided through an enrolled DMEH provider or supplier.

**Note:** *THSteps-eligible clients who qualify for medically necessary services beyond the limits of this home health benefit will receive those services through CCP.*

DME that has been delivered to the client’s home and then found to be inappropriate for the client’s condition will not be eligible for an upgrade within the first six months following purchase unless there has been a significant change in the client’s condition, as documented by the physician familiar with the client. All adjustments and modifications within the first six months after delivery are considered part of the purchase price.

All DME purchased for a client becomes the Medicaid client’s property upon receipt of the item. This property includes equipment delivered which will not be prior authorized or reimbursed in the following instances:
• Equipment delivered to the client before the physician signature date on the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form or Addendum to Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form.

• Equipment delivered more than three business days before obtaining prior authorization from the TMHP Home Health Services Prior Authorization Department and meets the criteria for purchase.

Additional criteria:

• A determination as to whether the equipment will be rented, purchased, replaced, repaired, or modified will be made by HHSC or its designee based on the client’s needs, duration of use, and age of the equipment.

• Periodic rental payments are made only for the lesser of either the period of time the equipment is medically necessary, or when the total monthly rental payments equal the reasonable purchase cost for the equipment.

• Purchase is justified when the estimated duration of need multiplied by the rental payments would exceed the reasonable purchase cost of the equipment or it is otherwise more practical to purchase the equipment.

• If a DME/medical supply provider is unable to deliver a prior authorized piece of equipment or supply, the provider should allow the client the option of obtaining the equipment or supplies from another provider.

Items or services are reimbursed at the lesser of:

• The provider’s billed charges

• The published fee determined by HHSC

• Manual pricing as determined by HHSC based on one of the following:
  • The MSRP less 18 percent
  • The provider’s documented invoice cost

If an item is manually priced, providers must submit documentation of one of the following for consideration of purchase or rental with the appropriate procedure codes:

• The MSRP or AWP, whichever is applicable

• The provider’s documented invoice cost

Those who supply DME equipment and supplies to Medicaid Managed Care clients must obtain a prior authorization form. Services and supplies for STAR+PLUS Medicaid Qualified Medicare Beneficiary (MQMB) clients must be billed to Medicare first. If denied, submit them to TMHP for consideration. The STAR+PLUS health plan is not responsible for these services.

Purchased DME is anticipated to last a minimum of 5 years, unless otherwise noted, and may be considered for replacement when the time has passed or the equipment is no longer functional or repairable. A copy of the police or fire report, when appropriate, and the measures to be taken to prevent reoccurrence must be submitted.

2.2.2.1 Repairs

A DME repair will be considered based on the age of the item and cost to repair it.

A request for repair of DME must include a statement or medical information from the attending physician substantiating that the medical appliance or equipment continues to serve a specific medical purpose and an itemized estimated cost list from the vendor or DME provider of the repairs. Rental equipment may be provided to replace purchased medical equipment for the period of time it will take to make necessary repairs to purchased medical equipment.
Repairs will not be prior authorized in situations where the equipment has been abused or neglected by the client, client’s family, or caregiver. Routine maintenance of rental equipment is the provider’s responsibility. For clients requiring wheelchair repairs only, the date last seen by physician does not need to be filled in on the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form.

2.2.2.2 Prior Authorization

Prior authorization is required for most DME and supplies provided through Home Health Services. These services include accessories, modifications, adjustments, and repairs for the equipment.

Providers must submit a completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form to the TMHP Home Health Services Prior Authorization Department.

A completed Home Health Services (Title XIX) Durable Medical Equipment (DME) or Medical Supplies Physician Order Form prescribing the DME or supplies must be signed and dated by a physician and by the representative of the DME/Medical Supply provider familiar with the client before requesting prior authorization for all DME equipment and supplies. All signatures and dates must be current, unaltered, original, and handwritten. Computerized or stamped signatures or dates will not be accepted. A current signature and date is valid for no more than 90 days prior to the date of the requested prior authorization or the initiation of service. The completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form must include the procedure codes and numerical quantities for services requested.

The completed, signed, and dated form must be maintained by the DME provider and the prescribing physician in the client’s medical record. The completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form with the original dated signature must be maintained by the prescribing physician.

To complete the prior authorization process by paper, the provider must fax or mail the completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form to the Home Health Services Prior Authorization Department and retain a copy of the signed and dated form in the client’s medical record at the provider’s place of business.

To complete the prior authorization process electronically, the provider must submit the prior authorization requirements through any approved electronic methods and retain a copy of the signed and dated Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form in the client’s medical record at the provider’s place of business.

Retrospective review may be performed to ensure that the documentation included in the client’s medical record supports the medical necessity of the requested services.

The date last seen by the physician must be within the past 12 months unless a physician waiver is obtained. The physician’s signature on the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form is only valid for 90 days before the initiation of services. The requesting provider may be asked for additional information to clarify or complete the request.

Providers must obtain prior authorization within three business days of providing the service by calling TMHP Home Health Services Prior Authorization Department or faxing the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form.

To facilitate a determination of medical necessity and avoid unnecessary denials when requesting prior authorization, the physician must provide correct and complete information supporting the medical necessity of the equipment or supplies requested, including:

- Accurate diagnostic information pertaining to the underlying diagnosis/condition as well as any other medical diagnoses/conditions, to include the client’s overall health status.
• Diagnosis/condition causing the impairment resulting in a need for the equipment or supplies requested.

Prior authorization is required for replacement.

Prior authorization for equipment replacement is considered within five years of equipment purchase when one of the following occurs:

• There has been a significant change in the client’s condition such that the current equipment no longer meets the client’s needs.

• The equipment is no longer functional and either cannot be repaired or it is not cost-effective to repair.

Replacement of equipment is also considered when loss or irreparable damage has occurred. The following must be submitted with the prior authorization request:

• A copy of the police or fire report, when appropriate

• A statement about the measures to be taken in order to prevent reoccurrence

Payment may be prior authorized for repair of purchased DME. Maintenance of rental equipment (including repairs) is the supplier’s responsibility. The toll-free number for the TMHP Home Health Services Prior Authorization Department is 1-800-925-8957. Requests for repairs must include the cost estimate, reasons for repairs, age of equipment, and serial number.

2.2.3 Medical Supplies

Medical supplies are benefits of the Home Health Services Program if they meet the following criteria:

• A completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form, prescribing the DME or supplies must be signed and dated by a physician familiar with the client and by the representative of the DME/Medical Supply provider before requesting prior authorization for all DME and supplies. All signatures and dates must be current, unaltered, original, and handwritten. Computerized or stamped signatures/dates will not be accepted. A current signature and date is valid for no more than 90 days prior to the date of the requested prior authorization or the initiation of service. The completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form must include the procedure codes and numerical quantities for the services requested.

• The provider must contact TMHP within 3 business days of providing the supplies to the client and obtain prior authorization, if required.

• The requesting provider and ordering physician must keep all Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Forms and Addendum to Home Health Services (Title XIX) DME/Medical Supplies Physician Order Forms on file. The physician must maintain the original signed and dated Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form in their records.

• Providers must retain individual delivery slips or invoices for each DOS that document the date of delivery for all supplies provided to a client and must disclose them to HHSC or its designee upon request. Documentation of delivery must include one of the following:

  • Delivery slip or invoice signed and dated by client or caregiver.

  • A dated carrier tracking document with shipping date and delivery date must be printed from the carrier’s website as confirmation that the supplies were shipped and delivered. The dated carrier tracking document must be attached to the delivery slip or invoice.
The dated delivery slip or invoice must include the client’s full name and address to which supplies were delivered, and an itemized list of goods that includes the descriptions, and numerical quantities of the supplies delivered to the client. This document could also include prices, shipping weights, shipping charges, and any other description.

All claims submitted for DME supplies must include the same quantities or units that are documented on the delivery slip or invoice and on the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form. They must reflect the number of units by which each product is measured. For example, diapers are measured as individual units. If one package of 300 diapers is delivered, the delivery slip or invoice and the claim must reflect that 300 diapers were delivered and not that one package was delivered. Diaper wipes are measured as boxes/packages. If one box of 200 wipes is delivered, the delivery slip or invoice and the claim must reflect that one box was delivered and not that 200 individual wipes were delivered. There must be one dated delivery slip or invoice for each claim submitted for each client. All claims submitted for DME supplies must reflect the same date as the delivery slip or invoice and the same timeframe covered by the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form. The DME Certification and Receipt Form is still required for all equipment delivered.

Note: These records and claims must be retained for a minimum of five years from the DOS or until audit questions, appeals, hearings, investigations, or court cases are resolved. Use of these services is subject to retrospective review.

• The requesting provider or ordering physician must document medical supplies as medically necessary in the client’s POC or on a completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form and Addendum to Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form.

HHSC/TMHP reserves the right to request the signed and dated Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form or Addendum to Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form at any time.

Note: Client eligibility can change monthly. Providers are responsible for verifying eligibility before providing supplies.

The DOS is the date on which supplies are delivered to the client or shipped by a carrier to the client as evidenced by the dated tracking document attached to the invoice for that date. The provider must maintain the signed and dated records supporting documentation that an item was not billed before delivery. These records are subject to retrospective review.

Note: THSteps-eligible clients who qualify for medically necessary services beyond the limits of this home health benefit will receive those services through CCP.

Refer to: Form DM.3, “Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form Instructions (2 pages)” in this handbook.

Form DM.4, “Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form” in this handbook.

Subsection 2.5, “Durable Medical Equipment (DME) Supplier (CCP)” in Children’s Services Handbook (Vol. 2, Provider Handbooks) for specific information about certain DME and medical supplies.

Subsection 2.2.1.1, “Client Eligibility” in this handbook.

2.2.3.1 Supply Procedure Codes

When submitting supplies on the CMS-1500 claim form, itemize the supplies, including quantities, and also provide the Healthcare Common Procedure Coding System (HCPCS) national procedure codes.
Refer to: Subsection 6.3.3, “Procedure Coding” in Section 6, “Claims Filing” (Vol. 1, General Information) for more information about HCPCS procedure codes.

2.2.3.2 Prior Authorization

TMHP must prior authorize most medical supplies. They must be used for medical or therapeutic purposes, and supplied through an enrolled DMEH provider in compliance with the client’s POC.

Some medical supplies may be obtained without prior authorization; however, the provider must retain a copy of the completed POC or Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form in the client’s file. For medical supplies not requiring prior authorization, a completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form may be valid for a maximum of six months, unless the physician indicates the duration of need is less. If the physician indicates the duration of need is less than six months, then a new Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form is required at the end of the determined duration of need.

For a list of DME/medical supplies that do not require prior authorization, providers can refer to Subsection 2.2.25, “Procedure Codes That Do Not Require Prior Authorization” in this handbook.

Clients with ongoing needs may receive up to six months of prior authorizations for some expendable medical supplies under Home Health Services when requested on a Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form. Providers may deliver medical supplies as ordered on a Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form for up to six months from the date of the physician’s signature. In these instances, a review of the supplies requested by the physician familiar with the client’s condition, and a new Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form is required for each new prior authorization request. Requests for prior authorization can be made up to 60 days before the start of the new prior authorization period. Professional Home Health Services prior authorization requests require a review by the physician familiar with the client’s condition and a physician signature every 60 days when requested on a POC.

Note: These records and claims must be retained for a minimum of five years from the DOS or until audit questions, appeals, hearings, investigations, or court cases are resolved. Use of these services is subject to retrospective review.

2.2.3.3 Cancelling a Prior Authorization

The client has the right to choose his DME/medical supply provider and change providers. If the client changes providers, TMHP must receive a change of provider letter with a new Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form. The client must sign and date the letter, which must include the name of the previous provider and the effective date for the change. The client is responsible for notifying the original provider of the change and the effective date. Prior authorization for the new provider can only be issued up to three business days before the date TMHP receives the change of provider letter and the new Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form.

2.2.4 Augmentative Communication Device (ACD) System

An ACD system, also known as an augmentative and alternative communication (AAC) device system, allows a client with an expressive speech language disorder to electronically represent vocabulary and express thoughts or ideas in order to meet the client’s functional speech needs.

Digitized speech devices and synthesized speech devices are benefits of Texas Medicaid Title XIX Home Health Services.

A digitized speech device, sometimes referred to as a “whole message” speech output device, uses words or phrases that have been recorded by someone other than the ACD system user for playback upon command by the ACD system user.
Providers must use procedure codes E2500, E2502, E2504, and E2506 when billing for a digitized speech device.

A synthesized speech device uses technology that translates a user’s input into device-generated speech using algorithms representing linguistic rules. Users of synthesized speech ACD systems are not limited to prerecorded messages, but can independently create messages as their communication needs dictate. Some synthesized speech devices require the user to make physical contact with a keyboard, touch screen, or other display containing letters.

Providers must use procedure code E2508 when billing for a synthesized speech device.

Other synthesized devices allow for multiple methods of message formulation and multiple methods of device access. Multiple methods of message formulation must include message selection by two or more of the following methods:

- Letters
- Words
- Pictures
- Symbols

Multiple methods of access must include the capability to access the device by direct physical contact with a keyboard or touch screen and one or more of the following indirect selection techniques:

- Joystick/switches
- Head mouse
- Optical head pointer
- Light pointer
- Infrared pointer
- Scanning device
- Morse code

**Note:** ACD systems that do not meet the criteria through Title XIX Home Health Services may be considered for clients birth through 20 years of age under CCP.

Providers must use procedure code E2510 when billing for other synthesized speech devices.

Items included in the reimbursement for an ACD system and not reimbursed separately include, but are not limited to, the following:

- ACD
- Basic, essential software (except for software purchased specifically to enable a client-owned computer or personal digital assistant [PDA] to function as an ACD system)
- Batteries
- Battery charger
- Power supplies
- Interface cables
- Interconnects
- Sensors
- Moisture guard
- Alternating current (A/C) or other adapters
• Adequate memory to allow for system expansion within a three-year timeframe
• Access device, when necessary
• Mounting device, when necessary
• All basic operational training necessary to instruct the client and family/caregivers in the use of the ACD system
• Manufacturer’s warranty

2.2.4.1 ACD System Accessories

Accessories are a benefit of Texas Medicaid if the criteria for ACD system prior authorization are met and the medical necessity for each accessory is clearly documented in the speech language pathologist (SLP) evaluation.

All accessories necessary for proper use of an ACD system, including those necessary for the potential growth and expansion of the ACD system (such as a memory card), must be included in the initial prescription/Title XIX form. The following accessories for an ACD system may be covered:

• Access devices for an ACD system include, but are not limited to, devices that enable selection of letters, words, or symbols via direct or indirect selection techniques such as optical head pointers, joysticks, and ACD scanning devices.
• Gross motor access devices, such as switches and buttons, may be considered for clients with poor fine motor and head control.
• Fine motor, head control access devices, such as laser or infrared pointers, may be considered for clients with poor hand control and good head control.

Mounting systems are devices necessary to place the ACD system, switches and other access devices within the reach of the client. Mounting devices may be considered for reimbursement when used to attach an ACD system or access device to a wheelchair or table.

A request for prior authorization of a wheelchair mounting device must include the manufacturer name, model, and purchase date of the wheelchair. One additional mounting device, separate from the one included in the system, may be considered for prior authorization for the same client.

Providers must use procedure codes E2512 and E2599 when billing for ACD system accessories.

2.2.4.1.1 Carrying Case

Carrying cases may be considered for separate reimbursement with supporting documentation of medical necessity.

Providers must use procedure code E2599 and modifier U1 when billing for the carrying case. Carrying cases are limited to one every three years.

Carrying cases may be considered for prior authorization. The prior authorization request must include the make, model, and purchase date of the ACD system.

2.2.4.1.2 Nonwarranty Repairs

Nonwarranty repairs of an ACD system may be considered for prior authorization using procedure code V5336 with documentation from the manufacturer explaining why the repair is not covered by the warranty.

2.2.4.1.3 Trial Period

In order to ensure the client’s needs are met in the most cost effective manner and to ascertain the most appropriate system and access device for the client, the ACD system is prior authorized for purchase only after the client has completed a three-month trial period that includes experience with the requested system.
The ACD system for the trial period may be obtained through the rental, the school setting, or another setting determined by the licensed SLP.

In the situation where an ACD system is not available for rental and the client has recent documented experience with the requested ACD system, purchase can be considered.

A trial period is not required when replacing an existing ACD system, unless the client’s needs have changed and another ACD system or access device is being considered.

2.2.4.1.4 Rental

Prior authorization may be provided for rental during this trial period. All components necessary for use of the device, such as access devices, mounting devices, and lap trays, must be evaluated during this trial period.

2.2.4.1.5 Purchase

Purchase of an ACD system may be considered for prior authorization when all of the following ACD system criteria are met:

• The evaluation/re-evaluation includes documentation that the client has had sufficient experience with the requested ACD system through trial, rental, school, or another setting. When the SLP has confirmed the appropriateness of a specific device for the client, the trial/rental period may be cancelled.

• A Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form listing the prescribed ACD system, access device, and accessories (such as a mounting device) must be completed, signed by the physician, and dated.

ACD systems, equipment, and accessories that have been purchased are anticipated to last a minimum of three years.

2.2.4.1.6 Replacement

Prior authorization for replacement may be considered within three years of purchase when one of the following occurs:

• There has been a significant change in the client’s condition such that the current device no longer meets his or her communication needs.

• The ACD system is no longer functional and either cannot be repaired or it is not cost effective to repair.

• Three years have passed and the equipment is no longer repairable.

Note: Replacements for clients birth through 20 years of age that do not meet the criteria above may be considered through CCP.

2.2.4.1.7 Software

Computer software that enables a client’s computer or PDA to function as an ACD system may be covered as an ACD system. Providers must use procedure code E2511 when billing for a speech generating software. Requests for ACD software may be considered for prior authorization if the software is more cost effective than an ACD system.

If an ACD system is more cost effective than adapting the client’s computer or PDA, an ACD system may be prior authorized instead of the ACD software.

Laptop or desktop computers, PDAs, or other devices that are not dedicated ACD systems are not a benefit of Texas Medicaid, because they do not meet the definition of DME.
2.2.4.2 Non-Covered ACD System Items

Noncovered items that are not necessary to operate the system and are unrelated to the ACD system or software components are not benefits of Texas Medicaid. These items include, but are not limited to:

- Printer
- Wireless Internet access devices

2.2.4.3 Prior Authorization

Prior authorization is required for ACD systems provided through Home Health Services. The prior authorization also includes all related accessories and supplies. The physician must provide information supporting the medical necessity of the equipment or supplies requested, including:

- Accurate diagnostic information pertaining to the underlying diagnosis or condition and any other medical diagnoses or conditions, including the client’s overall physical and cognitive limitations.
- Diagnosis or condition causing the impairment of speech.

Prior authorization for an ACD system and accessories (rental or purchase) must be requested using the following information:

- Medical diagnosis and how it relates to the client’s communication needs.
- Any significant medical information pertinent to ACD system use.
- Limitations of the client’s current communication abilities, systems, and devices.
- Statement as to why the prescribed ACD system is the most effective, including a comparison of benefits using other alternatives.
- Complete description of the ACD system with all accessories, components, mounting devices, or modifications necessary for client use (must include manufacturer’s name, model number, and retail price).
- Documentation that the client is mentally, emotionally, and physically capable of operating the device.
- An evaluation and assessment must be conducted by a licensed SLP in conjunction with other disciplines, such as physical or occupational therapies. The prescribing physician must base the prescription on the professional evaluation and assessment.

The prior authorization request must include the specifications for the ACD system, all component accessories necessary for the proper use of the ACD, and all necessary therapies or training. It is recommended that the preliminary evaluation for an ACD system include the involvement of an occupational therapist or physical therapist to address the client’s seating/postural needs and the motor skills required to utilize the ACD system.

The prescribing physician familiar with the client must review the SLP evaluation of the client’s cognitive and language abilities and base the prescription and treatment plan on the SLP’s recommendations.

An evaluation and assessment by a licensed SLP must be signed and dated before the date on the physician’s prescription or the Title XIX form and include the following information:

- Documentation of medical necessity for an ACD system, including a formal written evaluation performed by a licensed SLP.
- Medical status or condition and medical diagnoses underlying the client’s expressive speech-language disorder that justifies the need for an ACD system.
- Current expressive speech-language disorder, including the type, severity, anticipated course, and present language skills.
• Description of the practical limitations of the client’s current aided and unaided modes of communication.

• Other forms of therapy or intervention that have been considered and ruled out.

• Rationale for the recommended ACD system and each accessory, including a statement as to why the recommended device is the most appropriate and least costly alternative for the client and how the recommended system will benefit the client.

• Documentation that the client possesses the cognitive and physical abilities to use the recommended system.

• Comprehensive description of how the ACD system will be integrated into the client’s everyday life, including home, school, or work.

• Treatment plan that includes training in the basic operation of the recommended ACD system necessary to ensure optimal use by the client (if appropriate, the client’s caregiver) and a therapy schedule for the client to gain proficiency in using the ACD system.

• Description of the client’s speech-language goals and how the recommended ACD system will assist the client in achieving these goals.

• Description of the anticipated changes, modifications, or upgrades with projected time frames of the ACD system necessary to meet the client’s short- and long-term speech-language needs.

• Identification of the assistance or support needed by, and available to, the client to use and maintain the ACD system.

• Statement that the licensed SLP is financially independent of the ACD system manufacturer/vendor.

• Speech- and language- skills assessment that includes the prognosis for speech or written communication.

• Interactional/behavioral and social abilities.

• Capabilities, including intellectual, postural, sensory (visual and auditory), and physical status.

• Motivation to communicate.

• Residential, vocational, and educational setting.

• Alternative ACD system considered with comparison of capabilities.

• Ability to meet projected communication needs, growth potential, and length of time it will meet the client’s needs.

2.2.5 Bath and Bathroom Equipment

Bath and bathroom equipment is DME that is included in a treatment protocol, serves as a therapeutic agent for life and health maintenance, and is required to treat an identified medical condition. Bath and bathroom equipment may be considered for reimbursement for those clients who have physical limitations that do not allow for bathing, showering, or bathroom use without assistive equipment.

Note: THSteps-eligible clients who qualify for medically necessary services beyond the limits of this Home Health Services benefit may be considered under CCP.

Bath seats are not considered for clients who are younger than one year of age or weighing less than 30 pounds.

Rental of equipment includes all necessary supplies, adjustments, repairs, and replacement parts.
2.2.5.1 Hand-Held Shower Wand

A hand-held shower wand with attachments may be considered for prior authorization only if the client currently owns or meets the criteria for a bath or shower chair, tub stool or bench, or tub transfer bench. Prior authorization of a hand-held shower wand includes all attachments and accessories. Providers must use procedure code E1399 when billing for a hand-held shower wand. Hand-held shower wands with attachments are limited to one every five years.

2.2.5.2 Bath Equipment

2.2.5.2.1 Bath or Shower Chairs, Tub Stool or Bench, Tub Transfer Bench

A bath or shower chair is a stationary or mobile seat with or without upper body or head support used to support a client who is unable to stand or sit independently in the shower or tub.

Bath/shower chairs are grouped into three levels of design to assist the client based on their physical condition and mobility status:

- Level 1 - standard bath or shower chair is defined as stationary equipment.
- Level 2 - intermediate bath or shower chair is defined as mobile equipment with or without a commode cut out.
- Level 3 - complex bath or shower chair is defined as custom equipment (either stationary or mobile) with or without a commode cut out.

A tub stool or bench is a stationary seat or bench used to support a client who is unable to stand or sit independently in the shower or tub.

A tub transfer bench is a stationary bench that sits in the tub and extends outside the tub. It is used to support a client who is unable to stand or sit independently in the shower or tub and allows the client to scoot or slide over the side of the tub.

Bath or shower chairs, tub stools or benches, and tub transfers are limited to one every five years.

A custom bath or shower chair may be considered for prior authorization only if the client does not also have any type of commode chair.

Level 1 Group

A Level 1 device may be considered if the client:

- Is either unable to stand independently or is unstable while standing, or
- Is unable to independently enter or exit the shower or tub due to limited functional use of the upper or lower extremities, and
- Maintains the ability to ambulate short distances (with or without assistive device), or
- Has a condition that is defined as a short-term disability without a concomitant long-term disability (including, but not limited to postoperative status).

Providers must use procedure code E0240 without a modifier when billing for Level 1 group bath or shower chairs.

Level 2 Group

A Level 2 device may be considered if the client:

- Has good upper body stability, and
- Has impaired functional ambulation, including, but not limited to lower body paralysis, osteoarthritis, or
- Is nonambulatory.
The client must have a shower that is adapted for rolling equipment; ramps will not be prior authorized for access to showers.

Providers must use procedure code E0240 and modifier TF (Intermediate Level) when billing for Level 2 group bath or shower chairs.

**Level 3 Group**
A Level 3 device may be considered if the client requires:

- Trunk or head or neck support, or
- Positioning to accommodate conditions, including, but not limited to spasticity, or frequent and uncontrolled seizures.

Providers must use procedure code E0240 and modifier TG (Complex/high Level) when billing for Level 3 group bath/shower chairs.

A bath or shower chair may be prior authorized for clients who meet the Level 1, 2, or 3 criteria. A Level 3 custom bath or shower chair may be prior authorized only if the client does not also have any type of commode chair. The client must have a shower that is adapted for rolling equipment; ramps will not be prior authorized for access to showers.

A tub stool or bench may be prior authorized for clients who meet the Level 1 criteria. Providers must use procedure code E0245 when billing for a tub stool or bench.

A tub transfer bench may be considered for clients who meet the Level 1 or 2 criteria. Providers must use procedure code E0247 when billing for a tub transfer bench.

A heavy duty tub transfer bench may be considered for clients who meet the Level 1 or 2 criteria and who weigh more than 200 pounds. Providers must use procedure code E0248 when billing for a heavy duty tub transfer bench.

### 2.2.5.3 Bathroom Equipment

#### 2.2.5.3.1 Non-fixed Toilet Rail, Bathtub Rail Attachment, and Raised Toilet Seat
Nonfixed toilet rails are limited to two every five years. A bathtub rail is limited to one every five years.

Raised toilet seats are limited to one every five years. Nonfixed toilet rails, bathtub rail attachments, and raised toilet seats may be considered for prior authorization for a client who has decreased functional mobility and is unable to safely self-toilet or self-bathe without assistive equipment. Providers must use procedure code E0243 when billing for non-fixed toilet rails, procedure code E0244 when billing for raised toilet seats, and procedure code E0246 when billing for bathtub rails.

#### 2.2.5.3.2 Toilet Seat Lifts
A toilet seat lift mechanism is designed for the top of the toilet to assist lifting the body from a sitting position to a standing position.

A toilet seat lift mechanism must be prior authorized. To qualify for prior authorization, clients must meet all the following criteria:

- The client must have severe arthritis of the hip or knee or have a severe neuromuscular disease.
- The toilet seat lift mechanism must be a part of the physician's course of treatment and be prescribed to correct or ameliorate the client’s condition.
- Once standing, the client must have the ability to ambulate.
- The client must be completely incapable of standing up from a regular armchair or any chair in the client’s home.
The client’s difficulty or incapability of getting up from a chair is not sufficient justification for a toilet seat lift mechanism. Almost all clients who are capable of ambulating can get out of an ordinary chair if the seat height is appropriate and the chair has arms.

Prior authorization will be given for either mechanical or powered toilet assist devices, not for both. If a client already owns one or more mechanical toilet-assist devices, a powered toilet seat lift mechanism will not be prior authorized unless there has been a documented change in the client’s condition such that the client can no longer use the mechanical equipment.

Toilet seat lift mechanisms are limited to those types that operate smoothly, can be controlled by the client, and effectively assist a client in standing up and sitting down without other assistance. A toilet seat lift operated by a spring release mechanism with a sudden, catapult-like motion that jolts the client from a seated to a standing position is not a benefit of Texas Medicaid.

Providers must use procedure code E0172 when billing for a toilet seat lift mechanism. A toilet seat lift mechanism is limited to one purchase every five years.

2.2.5.3.3 Commode Chairs and Foot Rests

Commode chairs, foot rests, and replacement commode pails or pans may be considered as benefits, depending on the client’s level of need. The client must meet the criteria for the level of commode chair or foot rest requested.

A commode chair with or without a foot rest may be considered a benefit for the client who also has a stationary bath chair without a commode cutout.

Documentation must support medical necessity for a customized commode chair or the addition of attachments to a standard commode chair.

**Level 1: Stationary Commode Chair**

A Level 1 commode chair is defined as a stationary commode chair with fixed or removable attachments to support the arms.

A stationary commode chair with fixed or removable arms may be considered for prior authorization when the following criteria are met:

- The client has a medical condition that results in an inability to ambulate to the bathroom safely (with or without mobility aids).

Providers must use procedure code E0163 or E0165 when billing for a stationary and mobile commode chair.

**Level 2: Mobile Commode Chair**

A Level 2 commode chair is defined as a mobile commode chair with fixed or removable attachments to support the arms.

A mobile commode chair with fixed or removable arms may be considered for prior authorization when the following criteria are met:

- In addition to meeting the criteria for a Level 1 commode chair, the client must be on a bowel program and require a combination commode or bath chair for performing the bowel program and bathing after.
- A mobile commode chair will be considered for reimbursement with prior authorization only if the client does not also have any type of bath chair. If the client meets the criteria for a stationary bath chair, prior authorization of a stationary chair may be considered.

**Level 3: Custom Commode Chair**

A Level 3 commode chair is defined as a custom commode chair with all of the following characteristics:

- Is stationary or mobile
• Has fixed or removable attachments to support the arms, head, neck, or trunk.

A custom stationary or mobile commode chair with fixed or removable arms and head, neck, and/or trunk support attachments may be considered for prior authorization when the following criteria are met:

• In addition to meeting the criteria for a Level 1 or 2 commode chair, the client must have a medical condition that results in an inability to support their head, neck, or trunk without assistance.

• A mobile custom commode chair may be considered for reimbursement only if the client does not also have any type of bath chair.

Providers must use procedure code E0163 or E0165 with modifier TG when billing for a custom stationary or mobile commode chair.

**Extra-wide and Heavy-Duty Commode Chair**

An extra-wide, heavy-duty commode chair is defined as one with a width greater than or equal to 23 inches, and capable of supporting a client who weighs 300 pounds or more.

An extra-wide or heavy-duty commode chair may be considered for prior authorization when the following criteria are met:

The client meets the criteria for a Level 1, 2, or 3 commode chair and weigh 300 pounds or more.

Providers must use procedure code E0168 and the appropriate modifiers when billing for an extra-wide or heavy-duty commode chair. Use modifier TF when billing for a mobile extra-wide, heavy-duty commode chair. Use modifier TG when billing for a custom extra-wide, heavy-duty commode chair.

**Commode Chair With Integrated Seat Lift**

A commode chair with integrated seat lift is designed to assist lifting the body from a sitting position to a standing position.

A commode chair with integrated seat lift mechanism for top of the commode must be prior authorized for clients who meet all the following criteria:

• The client must have severe arthritis of the hip or knee or have a severe neuromuscular disease.

• The client must be completely incapable of standing up from a regular toilet, commode, or any chair in their home.

• The commode chair with integrated seat lift must be a part of the physician’s course of treatment and be prescribed to correct or ameliorate the client’s condition.

• Once standing, the client must have the ability to ambulate independently for a short distance of no more than ten feet.

*Note: The fact that a client has difficulty or is even incapable of getting up from a chair, particularly a low chair, is not sufficient justification for a seat lift mechanism. Almost all clients who are capable of ambulating can get out of an ordinary chair if the seat height is appropriate and the chair has arms.*

Providers must use procedure code E0170 or E0171 when billing for a commode chair with integrated seat lift. The purchase of a commode chair with integrated seat lift is limited to one every five years.

**Replacement Commode Pail or Pan**

Replacement commode pails or pans may be considered for prior authorization once per year. Additional quantities may be considered for prior authorization with documentation of medical necessities.

Providers must use procedure code E0167 when billing for a commode pail or pan.
Foot Rest
A foot rest is used to support feet during use of the commode chair.

A foot rest may be considered for prior authorization when:

The client meets the criteria for a Level 1, 2, or 3 commode chair and the foot rest is necessary to support contractures of the lower extremities; for a client who is paraplegic or quadriplegic.

Providers must use procedure code E0175 when billing for a foot rest.

2.2.5.3.4 Portable Sitz Bath
Portable sitz baths that fit over commode seats are limited to two per year. A portable sitz bath, may be considered for prior authorization if the client requires any of the following:

- Cleaning, irrigation, or pain relief of a perianal wound.
- Relief of pain associated with the pelvic area (hemorrhoids, bladder, vaginal infections, prostate infections, herpes, testicle disorders).
- Muscle toning for bowel and bladder incontinence.

Providers must use procedure codes E0160 or E0161 when billing for portable sitz baths.

2.2.5.3.5 Bath Lifts
The purchase of a bath lift is limited to one every five years. The rental of a bath lift is limited to one per month.

The two types of bath lifts that are considered for reimbursement include:

- An outside the tub bath lift which is a portable transfer system used to move a nonambulatory client a short distance from bed or chair to bath and is designed to accommodate the smaller space. This type of lift is either hydraulic or electric and consists of a base with wheels or casters and a sling which can transfer the client in and out of the bath.

- An inside the tub bath lift is a portable transfer system used to lower and raise a nonambulatory client into and out of the bath tub. This type of lift is either hydraulic or electric and consists of a base which adheres to the tub surface using suction cups and a seat that will lower and raise the client into and out of the tub.

Providers must use procedure code E0625 with the appropriate modifier (U1, U2, or U3) if necessary when billing for a bath lift.

The bath lift must be free standing, it cannot be attached to the floor, walls, or ceiling. Home adaptation for use of medical equipment is not a benefit of Home Health Services.

A hydraulic bath lift is for a client who is unable to assist in their own transfers and is operated by the weight or pressure of a liquid.

An electric bath lift is operated by electricity and may be considered when a hydraulic lift will not meet the client’s needs.

A bath lift is not a benefit for the convenience of a caregiver.

There are four levels of bath lifts:

- Level 1 - an outside the tub bath lift (hydraulic or electric) and must accommodate a client weighing up to 300 pounds. Providers must use procedure code E0625 when billing for the purchase of a Level 1 bath lift.

- Level 2 - an in-tub bath lift (hydraulic or electric) and must accommodate a client weighing up to 300 pounds. Providers must use procedure code E0625 and the U1 modifier when billing for the purchase of a Level 2 bath lift.
• Level 3 - a bariatric lift (hydraulic or electric, out of tub type) designed to lift a client weighing greater than 300 pounds. Providers must use procedure code E0625 and the U2 modifier when billing for the purchase of a Level 3 bath lift.

• Level 4 - a bariatric lift (hydraulic or electric, in tub type) designed to lift a client weighing greater than 300 pounds. Providers must use procedure code E0625 and the U3 modifier when billing for the purchase of a Level 4 bath lift.

A bath lift may be considered for prior authorization if the client:

• Has an inability to transfer to the bathtub or shower independently using assistive devices (including but not limited to, a cane, walker, bathtub rails).

• Requires maximum assistance by the caregiver to transfer to the bathtub or shower.

• Has bathroom and tub or shower that meets the manufacturer’s recommended depth, width, and height for safe bath lift installation and operation.

Providers must use procedure code E0621 when billing for a lift sling. The purchase of a lift sling is limited to one every five years.

The following are payable procedure codes for bath and bathroom equipment:

</table>

2.2.5.4 Prior Authorization

Prior authorization is required for all bath and bathroom equipment and related supplies, including any accessories, modifications, adjustments, replacements and repairs to the equipment. The bath and bathroom equipment must be able to accommodate a 20 percent change in the client’s height or weight.
2.2.5.4.1 Modifications, Adjustments, and Repairs

Modifications are the replacement of components because of changes in the client’s condition, not replacement because the component is no longer functioning as designed. All modifications and adjustments within the first six months after delivery are considered part of the purchase price.

Modifications to custom equipment may be prior authorized should a change occur in the client’s needs, capabilities, or physical and mental status which cannot be anticipated.

Documentation must include the following:

- All projected changes in the client’s mobility needs
- The date of purchase, and serial number of the current equipment
- The cost of purchasing new equipment versus modifying the current equipment

All modifications within the first six months after delivery are considered part of the purchase price.

Adjustments do not require supplies. Adjustments made within the first six months after delivery will not be prior authorized. Adjustments made within the first six months after delivery are considered part of the purchase price. A maximum of one hour of labor for adjustments may be prior authorized as needed after the first six months following delivery.

Repairs to client-owned equipment may be prior authorized as needed with documentation of medical necessity. Technician fees are considered part of the cost of the repair. Repairs require the replacement of components that are no longer functional. Providers are responsible for maintaining documentation in the client’s medical record specifying the repairs and supporting medical necessity.

Bathroom and toilet lift rentals may be prior authorized during the period of repair up to a maximum of four months per lifetime per client.

Prior authorization will not be considered for modifications, adjustments, or repairs to bath or bathroom equipment delivered to a client’s home and then found to be inappropriate for the client’s condition within the first six months after delivery. This applies unless there is a significant change in the client’s condition that is documented by a physician familiar with the client.

Routine maintenance of rental equipment is the provider’s responsibility.

2.2.5.4.2 Accessories

Equipment accessories including, but not limited to, pressure support cushions, may be prior authorized with documentation of medical necessity.

2.2.5.5 Documentation Requirements

To request prior authorization for bath or bathroom equipment, the following documentation must be provided:

- Accurate diagnostic information pertaining to the underlying diagnosis or condition, including the client’s overall health status, any other medical needs, developmental level, and functional mobility skills and why regular bath or bathroom equipment will not meet the client’s needs
- The age, height, and weight of the client.
- Assessment of the client’s home to ensure the requested equipment can be safely accommodated.
- Anticipated changes in the client’s needs, including anticipated modifications or accessory needs and the growth potential of any custom shower and bath equipment.

2.2.5.5.1 Toilet Seat Lifts

The submitted documentation for a toilet seat lift must include an assessment completed by a physician, physical therapist, or occupational therapist that includes all of the following:
• A description of the client’s current level of function without the device
• An explanation why a nonmechanical toilet elevation device, such as toilet rails or elevated toilet seat, will not meet the client’s needs
• Documentation that identifies how the toilet seat lift mechanism will improve the client’s function

A list of the mobility related activities of daily living (MRADLs) the client will be able to perform with the toilet seat lift mechanism that the client is unable to perform without the toilet seat lift mechanism and how the device will increase the client’s independence

• The client’s goals for use of the toilet seat lift mechanism

Supporting documentation must be kept in the client’s record that all appropriate therapeutic modalities (e.g., medication or physical therapy) have been tried and that they failed to enable the client to transfer from a chair to a standing position.

2.2.6 Blood Pressure Devices

Blood pressure devices are a benefit of Home Health Services when:

• The devices are medically necessary and appropriate.
• The devices are prescribed by a physician.

A manual blood pressure device requires manual cuff inflation with real-time visualization of the results displayed on the manometer and does not require prior authorization for purchase when provided for one of the diagnosis codes listed in the table below. Providers must use procedure code A4660 when billing for a manual blood pressure device.

An automated blood pressure device inflates the cuff manually or automatically, displays the blood pressure results on a small screen, and does not require prior authorization for purchase when provided for one of the diagnosis codes listed in the table below. Providers must use procedure code A4670 when billing for an automated blood pressure device.

Repair of equipment may be considered with documentation of why the equipment needs repair. Providers must use procedure code A4660 when billing for the replacement of other components or repair of equipment.

Finger cuff automated blood pressure devices and ambulatory blood pressure devices for diagnostic purposes are not a benefit of Texas Medicaid.

If the client is not eligible for home health services, blood pressure devices may be provided under CCP for clients who are 20 years of age and younger.

2.2.6.1 Prior Authorization

Procedure codes A4660 and A4670 do not require prior authorization if they are billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>4010</td>
</tr>
<tr>
<td>40291</td>
</tr>
<tr>
<td>40401</td>
</tr>
<tr>
<td>40491</td>
</tr>
<tr>
<td>40599</td>
</tr>
<tr>
<td>4168</td>
</tr>
<tr>
<td>4253</td>
</tr>
<tr>
<td>4263</td>
</tr>
</tbody>
</table>
Manual and automated blood pressure devices should last at least one year and may be considered for replacement after one year has passed. If it is medically necessary to replace nonfunctional and irreparable equipment before one year has passed, providers can submit prior authorization requests with documentation of medical necessity that explains the need for the replacement.

Prior authorization is required in the following situations:

- Another blood pressure device is medically necessary within the same year. Replacement of equipment within the same year as the purchase requires prior authorization. If equipment must be replaced before the end of the anticipated lifespan, the provider must submit a copy of the police or fire report, when appropriate, and the measures that will be taken to prevent reoccurrence.
- The diagnosis code is not in the table above. If the diagnosis code is not one of those listed in the table above, providers must submit a request for the prior authorization of the initial or replacement device and must include all of the documentation necessary to support the medical necessity of the blood pressure device.

### 2.2.7 Breast Pumps

A manual or non hospital-grade electric breast pump may be considered for purchase only with the appropriate documentation supporting medical necessity. The purchase of a breast pump is limited to one every three years. Providers must use procedure code E0602 or E0603 when billing for the purchase of a manual or non hospital-grade electronic breast pump. A hospital-grade breast pump (procedure code E0604) may be considered for rental, not purchase. Rental of a breast pump is not time-limited. If more than one type of breast pump is billed on the same day by the same provider, only one will be reimbursed.

The following procedure codes for replacement parts are benefits of Texas Medicaid: A4281, A4282, A4283, A4284, A4285, and A4286.

Breast pumps are also available through the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC).

#### 2.2.7.1 Prior Authorization

Breast pumps and replacement parts require prior authorization. The replacement parts may be reimbursed if the client already owns a breast pump device (procedure code E0602 or E0603). The prior authorization request must include documentation of a client-owned device. Additional documentation such as the purchase date, serial number, and purchasing entity of the device may be required. Replacement of the breast pump will be considered when loss or irreparable damage has occurred, with a copy of the police or fire report when appropriate, and with the measures to be taken to prevent reoccurrence. Replacement will not be authorized in situations where the equipment has been abused or neglected by the client, the client’s family, or the caregiver.
2.2.8 Cochlear Implants

The following cochlear implant procedure codes may be reimbursed in the home setting to home health DME and medical supplier (DME) providers: L8615, L8616, L8617, L8618, and L8619.

Refer to: Subsection 8.2.21, “Cochlear Implants” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information about cochlear implant services.

2.2.9 Continuous Passive Motion (CPM) Device

A CPM device is reimbursed on a daily basis and is limited to once per day. Reimbursement includes delivery, set-up and all supplies. Providers must use procedure code E0935 when billing for a CPM machine. THSteps-eligible clients who qualify for medically necessary services beyond the limits of this Home Health Services benefit may be considered under CCP.

2.2.9.1 Prior Authorization

A CPM device may be considered for prior authorization through Home Health Services. Reimbursement for a CPM device is considered after joint surgery, such as knee replacement, when prescribed by a physician and submitted with clinical documentation of medical necessity and appropriateness.

2.2.10 Diabetic Equipment and Supplies

Diabetic equipment and supplies are a benefit through Home Health Services and do not require prior authorization unless otherwise specified.

An internal insulin pump will not be prior authorized as it is considered part of the surgery to place the pump.

2.2.10.1 Glucose Testing Supplies

Glucose testing supplies may be reimbursed without prior authorization, up to the quantities listed in the procedure code table below, when provided for clients with a diagnosis from the diagnosis table below. The quantity of blood testing supplies billed for a one-month supply must relate to the number of tests ordered per day by the physician.

For items that do not require prior authorization, the prescribing provider must indicate on a completed detailed written order how many times a day the client is required to test blood glucose or ketone levels when applicable (not all supplies are related to testing glucose or urine [i.e. batteries]).

Blood glucose test or reagent strips (procedure code A4253) and home glucose disposable monitors with test strips (procedure code A9275) are limited to a combined total of four per month without prior authorization.

Glucose tablets or gel may be considered with prior authorization using procedure code A9150.

</tbody>
</table>
Note: THSteps-eligible clients who qualify for medically necessary services beyond the limits of this home health benefit will receive those services through CCP.

Glucose testing supplies no longer require a signed Title XIX form and may be obtained through a verbal order or a detailed written order.

2.2.10.1.1 Verbal Orders

If the provider does not have a detailed written order, then the provider is required to have a verbal or written order on file until the detailed written order is received from the authorized prescribing provider and before providing glucose testing supplies. The practitioner’s order may be a written (original, fax, or electronic) or verbal order and must include all of the following components:

- A description of the items
- The client’s name
- The name of the physician or authorized prescribing provider
- The date of the order

2.2.10.1.2 Detailed Written Orders

A detailed written order must be received by the DME supplier within 90 days from the date of the prescribing provider’s signature.

The detailed written order for diabetic glucose testing supplies is valid for 6 months from the date of the order or the date of the prescribing provider’s signature whichever is earlier for initial orders, and from the start date for renewal orders. In absence of a start date then the authorized prescribing signature date will be the beginning DOS.

                   *Combined total with A4253 |
A completed detailed written order must be signed and dated by the authorized prescribing provider. All signatures and dates must be current, unaltered, original, and either handwritten or electronic. Stamped signatures and dates will not be accepted.

**Note:** An authorized prescribing provider includes a physician, physician assistant (PA), nurse practitioner (NP), clinical nurse specialist (CNS), or certified nurse midwife (CNM).

A completed detailed written order must contain all of the following components:

- The client’s name
- The date of the verbal order if different from the date the authorized prescribing provider signed the written order
- Description of item(s) to be provided
- Quantity to dispense (quantity required per day or month)

Before submitting a claim to Medicaid, DME providers must have a detailed written order with the required information in the client’s medical record. No other documentation is required.

The prescribing provider is required to retain a copy of the signed and dated order in the client’s medical record. The DME provider must retain the faxed, photocopied, electronic, or pen and ink signed and dated detailed written order in the client’s medical record.

### 2.2.10.1.3 Prior Authorization

Glucose tablets or gel (procedure code A9150) requires prior authorization with documentation supporting medical necessity.

Glucose testing supplies may be considered for prior authorization with documentation of medical necessity for quantities beyond the limits listed in the procedure code table above or for diagnoses other than those listed in the diagnosis code table above in subsection 2.2.10.1, “Glucose Testing Supplies”. Quantities will be prior authorized based on the documentation of medical necessity related to the number of tests ordered per day by the physician.

Quantities for glucose testing supplies beyond those listed in the procedure code table above, glucose monitors with integrated voice synthesizer, and glucose monitors with integrated lancing blood sample may be considered for prior authorization with the submission of the following:

- A completed and signed prescription
- A Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician order Form with Section A completed

**Note:** A completed and signed prescription satisfies the requirement for additional documentation for requests for quantities beyond quantity limits.

### 2.2.10.2 Blood Glucose Monitors

Home blood glucose monitors (procedure codes E0607, E2100, and E2101) are benefits of Home Health Services and are allowed reimbursement once every three years. A blood glucose monitor is a portable battery-operated meter used to determine the level of blood sugar (glucose).

Standard home glucose monitors (procedure code E0607):

- Do not require prior authorization.
- Are limited to the diagnoses listed above.
- May be obtained through a completed, signed, and dated prescription.
- Diagnoses not listed above may be considered for prior authorization with supporting documentation of medical necessity.
Blood glucose monitors with integrated voice synthesizers (procedure code E2100) and blood glucose monitors with integrated lancing blood sample (procedure code E2101) may be considered for prior authorization with documentation of medical necessity.

Invasive continuous glucose monitoring (CGM) is used for diagnostic purposes to assist the clinician in establishing or modifying the client’s treatment plan. A CGM device is worn up to 72 hours for the diagnostic purpose of collecting continuous blood sugar readings. These are later analyzed by the clinician.

Refer to: Subsection 8.2.22, “Continuous Glucose Monitoring (CGM)” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for additional information.

2.2.10.2.1 Prior Authorization

Blood glucose monitors with special features (procedure code E2100 or E2101) may be considered for prior authorization with documentation supporting medical necessity for the special feature requested.

Purchase of a blood glucose monitor with integrated voice synthesizer (procedure code E2100) may be prior authorized with documentation that includes a diagnosis of diabetes and significant visual impairment.

Purchase of a blood glucose monitor with integrated lancing and blood sample (procedure code E2101) may be prior authorized with documentation that includes a diagnosis of diabetes and significant manual dexterity impairment related but not limited to neuropathy, seizure activity, cerebral palsy, or Parkinson’s disease.

The invasive CGM device will not be prior authorized as it is considered part of the physician interpretation and report for CGM.

2.2.10.3 Insulin and Insulin Syringes

Insulin and insulin syringes, all sizes, are reimbursed through the Medicaid Vendor Drug Program pursuant to a physician’s prescription. The Medicaid Vendor Drug Program (VDP) enrolls pharmacies only.

Refer to: Appendix B: Vendor Drug Program (Vol. 1, General Information) for more information about VDP.

2.2.10.4 External Insulin Pump and Supplies

An external insulin infusion pump is a programmable, battery-powered mechanical syringe or reservoir device controlled by a micro computer to provide a basal continuous subcutaneous insulin infusion (CSII) and release a “bolus” dose at meals and at programmed intervals. The pump is connected to an infusion set with an attached small needle or cannula that is inserted into the subcutaneous tissue. The purpose of the insulin pump is to provide an accurate, continuous, controlled delivery of insulin which can be regulated by the user to achieve intensive glucose control and prevent the metabolic complications of hypoglycemia, hyperglycemia and diabetic ketoacidosis. The typical external insulin pump capacity is two to three days of insulin.

An external insulin pump and supplies may be considered through Title XIX Home Health Services for prior authorization with documentation of medical necessity.

The external insulin pump must be ordered by, and the client’s follow-up care must be managed by, a physician with experience managing clients with insulin infusion pumps and who works closely with a team including nurses, diabetic educators, and dieticians who are knowledgeable in the use of insulin infusion pumps.
The following procedure codes for the external insulin pumps and associated supplies are a benefit of Texas Medicaid and may be considered through Home Health Services. Note that a replacement leg bag may be requested with prior authorization using procedure code A9900. The initial leg bag is included in the purchase of the pump.

**External Insulin Pump and Supplies Procedure Codes and Limitations**

The external insulin pump supplies are not included in the external insulin pump rental. The routine maintenance of rental equipment is the provider’s responsibility.

**2.2.10.4.1 Prior Authorization**

Prior authorization is required for external insulin pumps (procedure code E0784) with carrying cases and their related supplies. The external insulin pump supplies may be considered separately when an external insulin pump is rented.

The external insulin pump may be considered for prior authorization of purchase after it has been rented for three months. The physician must provide documentation that it is appropriate equipment for the client and the client is compliant with its use. This documentation and a newly completed Title XIX form and new External Insulin Pump form must be submitted to TMHP Home Health Services Prior Authorization Department.

Documentation of continued medical necessity of the external insulin infusion pump requires that the client be evaluated by the treating physician as medically necessary, but no less frequently than every 3 to 4 months during the first year and annually thereafter.

Replacement leg bag (procedure code A9900) must be prior authorized with documentation that supports medical necessity.

**2.2.10.4.2 Documentation Requirements**

The following information, which must be documented on the External Insulin Infusion Pump form, is the minimum documentation required for consideration of medical necessity:

- Lab values, current and past blood glucose levels, including glycosylated hemoglobin (Hb/A1C) levels
- History of severe glycemic excursions, hypoglycemic or hyperglycemic reactions, nocturnal hypoglycemia, any extreme insulin sensitivity or very low insulin requirements
- Any wide fluctuations in blood glucose before mealtimes
- Any Dawn phenomenon where fasting blood glucose level often exceeds 200 mg/dL
- Day-to-day variations in work schedule, mealtimes, or activity level which require multiple insulin injections
• Possesses the cognitive and physical abilities to use the recommended insulin pump
• An understanding of cause and effect and object permanence
• A family or caregivers willing to support the client in the use of the external insulin pump
• History of gestational diabetes, or anticipation of pregnancy within three months in a previously diagnosed diabetic with one of the following indications:
  • Erratic blood sugars in spite of maximal compliance and split dosing
  • Other evidence that adequate control is not being achieved
• Training plan and schedule. Clients with history of poor control due to challenges following a daily schedule of multiple injections can show improved compliance with pump therapy, but require additional training with the pump.

2.2.11 Hospital Beds and Equipment
A hospital bed and related equipment are considered for reimbursement for the diagnosis or treatment of illness or injury or to improve the functioning of a malformed body member. A hospital bed is not one that is typically sold as home furniture.

The following items are a benefit of Home Health Services with prior authorization:
• Hospital bed
• Air-fluidized bed
• Pressure pads or a nonpowered pressure-reducing mattress overlay
• Nonpowered pressure-reducing mattress
• Powered pressure-reducing mattress overlay system
• Powered pressure-reducing mattress
• Advanced nonpowered pressure-reducing mattress overlay
• Powered pressure-reducing mattress overlay
• Advanced nonpowered pressure-reducing mattress
• Sheepskin and lamb’s wool pads
• Decubitus care accessories

  Note: For clients who are 20 years of age and younger and do not meet criteria through Title XIX Home Health Services, hospital beds and equipment may be considered through CCP.

Side rails or mattresses may be considered for replacement only and may be considered if it is a client-owned hospital bed and the client’s condition requires a replacement of an innerspring mattress or side rails.

2.2.11.1 Prior Authorization
Hospital beds may be considered for prior authorization for clients who cannot safely utilize a regular bed.

A fixed-height bed may be considered for prior authorization when the following criteria is met:
• The client requires the head of the bed to be elevated more than 30 degrees most of the time due to conditions such as congestive heart failure, chronic pulmonary disease, or problems with aspiration. Pillows or wedges must have been used and found to be ineffective.
A variable-height hospital bed may be considered for prior authorization if the client meets the criteria for a fixed-height hospital bed and requires a bed height different than a fixed-height hospital bed to permit transfers to a chair or wheelchair or to a standing position.

A semi-electric hospital bed may be considered for prior authorization if the client meets the criteria for a variable-height bed and requires frequent changes in body position or has a need for rapid changes in body position.

A fully-electric bed may be considered for prior authorization with documentation that the bed will promote the client’s independence with self-care. A fully-electric bed will not be authorized for the convenience of the caregiver.

The following hospital beds may be considered for prior authorization if the client meets the criteria for a hospital bed and the weight requirements for a bariatric bed as listed below:

- Heavy-duty, extra-wide hospital bed (procedure code E0303) capable of supporting a client who weighs more than 350 pounds, but no more than 600 pounds
- Extra heavy-duty, extra-wide hospital bed (procedure code E0304) capable of supporting a client who weighs more than 600 pounds

### 2.2.11.2 Documentation Requirements

To request prior authorization for a hospital bed, the following documentation must be submitted:

- Accurate diagnostic information pertaining to the underlying medical diagnoses or conditions (e.g., gastrostomy feeding, suctioning, ventilator dependent, other respiratory equipment or ventilation assistance devices) to include the client’s overall health status
- Client height and weight
- Client functional mobility status
- Client use of any pressure-reducing support surfaces, if applicable

### 2.2.11.3 Mattresses and Support Surfaces

A pressure-reducing support surface includes three separate groups of mattress or mattress-like equipment designed to assist in the healing of wounds. These devices are used in conjunction with conventional wound care therapy to prevent the occurrence of said wounds in susceptible clients. Pressure-reducing support surfaces are designed to prevent skin breakdown or to promote the healing of pressure ulcers by reducing or eliminating tissue interface pressure. Most of these devices reduce interface pressure by conforming to the contours of the body so that pressure is distributed over a larger surface area rather than concentrated on a more circumscribed location.

For all types of pressure-reducing support surfaces, the support surface provided for the client should be one in which the client does not “bottom out.” The Centers for Medicare and Medicaid Services (CMS) define “bottoming out” as: when an outstretched hand, palm up, between the undersurface of the overlay or mattress and in an area under the bony prominence can readily palpate the bony prominence (coccyx or lateral trochanter). This “bottoming out” criterion should be tested with the client in the supine position with head flat, in the supine position with head slightly elevated (no more than 30 degrees), and in the sidelying position.

Pressure-reducing support surfaces containing multiple components are categorized according to the clinically predominant component (usually the top-most layer of a multi-layer product) and the presence and stage of pressure ulcers.

The staging of pressure ulcers is as follows:

**Stage I:** Observable pressure related alteration of intact skin whose indicators are as follows:
• Compared to the adjacent or opposite area on the body may include changes in one or more of the following: skin temperature (warmth or coolness), tissue consistency (firm or boggy feel), or sensation (pain, itching).

• The ulcer appears as a defined area of persistent redness in lightly pigmented skin, whereas in darker skin tones, the ulcer may appear with persistent red, blue, or purple hues.

**Stage II:** Partial thickness skin loss involving epidermis, dermis, or both. The ulcer is superficial and presents clinically as an abrasion, blister, or shallow crater.

**Stage III:** Full thickness skin loss involving damage to, or necrosis of, subcutaneous tissue that may extend down to, but not through, underlying fascia. The ulcer presents clinically as a deep crater with or without undermining of adjacent tissue.

**Stage IV:** Full thickness skin loss with extensive destruction, tissue necrosis, or damage to muscle, bone, or supporting structures (e.g., tendon, joint capsule). Undermining and sinus tracts also may be associated with Stage IV pressure ulcers.

2.2.11.3.1 **Documentation Requirements**

A support surface that does not meet the characteristics specified in the criteria for grouping levels may be denied and considered to be not medically necessary.

To request prior authorization for a pressure-reducing support surface, the following documentation must be provided:

- Client’s overall health status and all other medical diagnoses or conditions (e.g., history of decubitus)
- Documentation of the client’s limited mobility or confinement to a bed
- History of previous use and results of pressure-reducing support surfaces, (e.g., wound improvement, stasis, or degradation)
- Current wound therapy, if any

2.2.11.3.2 **Group 1 Support Surfaces**

A group 1 Support Surface may be considered for prior authorization with documentation of medical necessity if the client is completely immobile without assistance, or the client has limited mobility or existing pressure ulcer on the pelvis or trunk and at least one of the following conditions:

- Impaired nutritional status
- Fecal or urinary incontinence
- Altered sensory perception
- Compromised circulatory status

Each of the support surfaces described below are considered a benefit of the Home Health Services Program when medical necessity criteria for Group 1 support surfaces are met.

Pressure pads or a nonpowered pressure-reducing mattress overlay for mattresses with the following features may be considered for reimbursement with documentation of medical necessity:

- A gel or gel-like layer with a height of two inches or greater
- An air mattress overlay with interconnected air cells that are inflated with an air pump and a cell height of three inches or greater
- A water mattress overlay with a filled height of three inches or greater
- A foam mattress overlay with all the following features:
• Base thickness of two inches or greater and peak height of three inches or greater if it is a convoluted overlay (e.g., eggcrate) or an overall height of at least three inches if it is a nonconvoluted overlay

• Foam with a density and other qualities that provide adequate pressure reduction

• Durable, waterproof cover

Nonpowered pressure-reducing mattresses, with the following features, may be considered for reimbursement with documentation supporting medical necessity:

• A foam mattress with all the following features may be considered with documentation supporting medical necessity. Documentation must include all of the following features:

  • A foam height of five inches or greater

  • Foam with a density and other qualities that provide adequate pressure reduction

  • Durable, waterproof cover

  • Can be placed directly on a hospital bed frame

• An air, water, or gel mattress with all the following features may be considered for reimbursement:

  • A height of five inches or greater

  • Durable, waterproof cover

A powered pressure reducing mattress overlay system, with all the following features, may be considered for reimbursement when documentation supports medical necessity:

• The system includes an air pump or blower which provides either sequential inflation and deflation of air cells, or a low interface pressure throughout the overlay.

• Inflated cell height of the air cells through which air is being circulated is 2.5 inches or greater.

• Height of the air chambers, proximity of the air chambers to one another, frequency of air cycling (for alternating pressure overlays), and air pressure provide adequate client lift, reduces pressure, and prevents bottoming out.

2.2.11.3.3 Group 2 Support Surfaces

A Group 2 support surface may be considered for prior authorization with documentation of medical necessity if the client has multiple stage II ulcers on the trunk or pelvis and has been on a comprehensive ulcer treatment program for at least the past month which has included the use of a Group 1 support surface.

The client must also have at least one of the following:

• The ulcers have remained the same or worsened over the past month.

• There are large or multiple stage III or IV pressure ulcers on the trunk or pelvis.

• Received a myocutaneous flap or skin graft for a pressure ulcer on the trunk or pelvis within the last 60 days, and have been prescribed or placed on a Group 2 or 3 support surface immediately before discharge (within the last 30 days) from the hospital or a nursing facility

Each of the support surfaces described below are considered a benefit of the Home Health Services Program when medical necessity criteria for Group 2 support surfaces are met.
The powered pressure reducing mattress (alternating pressure low air loss, or powered flotation without air loss) device with all the following features may be considered for reimbursement when documentation supports medical necessity:

- The system includes an air pump or blower which provides either sequential inflation and deflation of the air cells or a low interface pressure throughout the mattress.
- Inflated cell height of the air cells through which air is being circulated is five inches or greater.
- Height of the air chambers, proximity of the air chambers to one another, frequency of air cycling (for alternating pressure mattress), and air pressure to provide adequate client lift, reduce pressure, and prevent bottoming out.
- A surface designed to reduce friction and shear.

A semi-electric hospital bed with fully integrated powered pressure-reducing mattress that has all of the features described above may be considered for reimbursement when documentation supports medical necessity.

The advanced nonpowered pressure-reducing mattress overlay device with all the following features may be considered for reimbursement when documentation supports medical necessity:

- Height and design of individual cells which provide significantly more pressure reduction than Group 1 overlay and prevent bottoming out
- Total height of 3 inches or greater
- A surface designed to reduce friction and shear
- Manufacturer product information that substantiates the product is effective for the treatment of conditions described by the coverage criteria for Group 2 support surfaces

The powered pressure-reducing mattress overlay device with all the following features may be considered for reimbursement when documentation supports medical necessity:

- The system includes an air pump or blower that provides either sequential inflation and deflation of the air cells or a low interface pressure throughout the overlay.
- Inflated cell height of the air cells through which air is being circulated is three and a half inches or greater.
- Height of the air chambers, proximity of the air chambers to one another, frequency of air cycling (for alternating pressure overlays), and air pressure to provide adequate client lift, reduce pressure and prevent bottoming out.

The advanced nonpowered pressure-reducing mattress device with all the following features may be considered for reimbursement when documentation supports medical necessity:

- Height and design of individual cells designed to provide significantly more pressure than a Group 1 mattress and prevent bottoming out
- Total height of 5 inches or greater
- A surface designed to reduce friction and shear
- Documented evidence substantiates that the product is effective for the treatment of conditions described by the coverage criteria for Group 2 support surfaces

Sheepskin and lambs wool pads are considered a benefit of the Home Health Services Program under the same conditions as alternating pressure pads and mattresses (Group 2 pressure-reducing support surfaces) when prior authorized.
2.2.11.3.4 Group 3 Support Surfaces

A Group 3 support surface may be considered for prior authorization with documentation of medical necessity when all the following criteria are met:

- There is a presence of a stage III or IV ulcer.
- Severely limited mobility rendering the client bed or chair bound.
- Without an air-fluidized bed, the client would be institutionalized.
- The client has been placed on a Group 2 support surface for at least a month before ordering the air-fluidized bed with the ulcers not improving or worsening.
- There has been at least weekly assessment of the wound by the physician, a nurse or other licensed health-care professional and the treating physician has done a comprehensive evaluation of the client’s condition within the week before ordering the air-fluidized bed.
- A trained adult caregiver is available to assist the client with activities of daily living, maintaining fluid balance, supplying dietary needs, aiding in repositioning and skin care, administering prescribed treatments, recognizing and managing altered mental status, and managing the air-fluidized bed system and its potential problems, such as leakage.
- The physician continues to re-evaluate and direct the home treatment regimen monthly.
- All other alternative equipment has been considered and ruled out.

The existence of any one of the following conditions may result in noncoverage of the air-fluidized bed:

- Coexisting pulmonary disease (the lack of firm back support can render coughing ineffective and dry air inhalation thickens pulmonary secretions).
- Wounds requiring moist wound dressings that are not protected with an impervious covering such as plastic wrap or other occlusive material (if wet-to-dry dressings are being utilized, dressing changes must be frequent enough to maintain their effectiveness).
- For clients who are 21 years of age and older, the caregiver is unwilling or unable to provide the type of care required by the client who uses an air-fluidized bed.
- The home’s structural support or electrical system cannot safely accommodate the air-fluidized bed.

Initial prior authorization for a Group 3 pressure-reducing support surface will be for no more than 30 days. Prior authorized extensions may be considered for reimbursement in increments of 30-day periods, up to a maximum of four months, when documentation supports continued significant improvement in wound healing. Coverage beyond four months will be on a case-by-case basis after review by the medical director or designee.

Air-fluidized beds may be considered for reimbursement when the medical necessity criteria for Group 3 support surfaces are met.

2.2.11.4 Equipment and Other Accessories

The following equipment or accessories may be considered with documentation of medical necessity:

- Positioning devices
- Heel or elbow protectors
- Bed cradle (keeps bed covers from touching affected skin)
- Trapeze bars
2.2.11.4.1 Prior Authorization
Positioning cushions or pillows (procedure code E0190) and heel or elbow protectors (procedure code E0191) may be considered with documentation of medical necessity that the item will provide pressure relief and positioning in the treatment of decubiti, burns, or musculoskeletal injuries. Documentation must include a listing of other devices that have been used and why the devices proved ineffective.

A trapeze bar attached to a bed (procedure code E0910 or E0911) may be considered if the client requires this device to sit up, to change body position, to get in or out of bed, or for other medical reasons with documentation of medical necessity.

“Free-standing” trapeze equipment (procedure code E0940 or E0912) may be considered if the client does not have an eligible hospital bed, but the client needs this device to sit up, to change body position, to get in or out of bed, or for other medical reasons with documentation of medical necessity.

An over-bed table (procedure code E0315) may be considered if the client is bed-bound and needs the over-bed table for treatments.

2.2.11.5 Decubitus Care Accessories
For prior authorization of decubitus care accessories, the following documentation must be provided:
- Wound measurements including location, length, width, and depth
- Any undermining or tunneling
- Odor, if applicable

2.2.11.6 Replacement
Beds rails and frames that have been purchased are anticipated to last a minimum of five years.

2.2.11.6.1 Prior Authorization
Prior authorization for replacement may be considered within five years of purchase when one of the following occurs:
- There has been a significant change in the client’s condition, such that the current equipment no longer meets the client’s needs.
- The equipment is no longer functional and cannot be repaired or it is not cost effective to repair.

Replacement of equipment may be considered when loss or irreparable damage has occurred. A copy of the police or fire report, when appropriate, and the measures to be taken to prevent reoccurrence must be submitted.

In situations where the equipment has been abused or neglected by the client, the client’s family, or the caregiver, a referral to the Department of State Health Services (DSHS) Health Screening and Case Management unit will be made by the Home Health Services prior authorization unit for clients who are 20 years of age and younger. Providers will be notified that the state will be monitoring this client’s services to evaluate the safety of the environment for both the client and equipment.

2.2.11.7 Non-covered Items
A safety enclosure (procedure code E0316) used to prevent a client from leaving the bed is not a benefit of Home Health Services. A safety enclosure may be considered through CCP.

A hospital bed without side rails or mattress is not a benefit of Home Health Services.

Traction equipment (procedure codes E0890, E0947, and E0948) is not a benefit of Home Health Services.

2.2.12 Incontinence Supplies

Incontinence supplies billed for a one-month period must be based on the frequency or quantity ordered by the physician on the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form.

Note: THSteps-eligible clients who qualify for medically necessary services beyond the limits of this Home Health benefit will receive those services through CCP.

Refer to: Subsection 2.2.1.1, “Client Eligibility” in this handbook.
2.2.12.1 Skin Sealants, Protectants, Moisturizers, and Ointments

For clients who are 4 years of age and older, skin sealants, protectants, moisturizers, and ointments may be considered for prior authorization for a quantity of 2 per month, when the client has a documented medical condition that results in chronic incontinence and increased risk of skin breakdown. Additional quantities may be considered with documentation of medical necessity.

Providers must use procedure code A6250 instead of procedure code A5120 when billing for skin sealants, protectants, moisturizers, and ointments.

2.2.12.2 Diapers, Briefs, Pull-ons, and Liners

Diapers and briefs are defined as incontinence items attached with tabs. Pull-ons are defined as incontinence items that do not attach with tabs and are slip-on items, such as “pull-ups.” Liners are intended to be worn inside diapers, briefs, and pull-ons to increase absorbency. Reusable diapers or briefs are not a benefit of Home Health Services.

For clients who are 4 years of age and older and have a medical condition that results in chronic incontinence, up to a maximum total combination of 300 per month of diapers, briefs, or liners may be considered without prior authorization. Quantities in excess of 300 per month may be considered with documentation of medical necessity and prior authorization.

**Note:** Gloves used to change diapers and briefs are not considered medically necessary unless the client has skin breakdown or a documented disease that may be transmitted through the urine or stool.

2.2.12.3 Diaper Wipes

For clients who are 4 years of age and older and are receiving diapers/briefs/pull-ons, up to 2 boxes of diaper wipes do not require prior authorization. Exceptions will not be considered through Title XIX Home Health Services. Quantities in excess of 2 boxes per month may be considered through CCP for clients who are 20 years of age and younger with documentation of medical necessity and prior authorization.

Providers must use procedure code A4335 instead of procedure code A5120 when billing for diaper wipes.

2.2.12.4 Underpads

For clients who are 4 years of age and older and are receiving diapers/briefs/pull-ons/liners/urine collection devices/bowel management supplies, up to a maximum of 150 underpads per month may be considered without prior authorization. Quantities in excess of 150 per month may be considered with documentation of medical necessity and prior authorization.

Reusable underpads are not a benefit of Home Health Services.

**Note:** The Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form for the supplies listed above must reflect no more than a one-month’s supply of the incontinence product. The Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form must not reflect more than the maximum allowed quantity per month without requesting prior authorization.

2.2.12.5 Ostomy Supplies

The physician must specify the type of ostomy device or system to be used and how often it is to be changed on the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form. The quantity of ostomy supplies billed for a one-month period must relate to the number of changes per month based on the frequency ordered by the physician.

Ostomy supplies may be considered for reimbursement without prior authorization.
2.2.12.6 Indwelling or Intermittent Urine Collection Devices

The home setting is considered a clean environment, not a sterile one. Sterile incontinence supplies, (including the supplies in procedure codes A4311, A4312, A4313, A4314, A4315, A4316, and A4353) are a benefit in the home setting when requested for the following:

- Indwelling urinary catheters
- Intermittent catheters for clients who:
  - Are immunosuppressed
  - Have radiologically documented vesico-ureteral reflux
  - Are pregnant and have a neurogenic bladder due to spinal cord injury
  - Have a history of distinct, recurrent urinary tract infections, defined as a minimum of two within the prior 12-month period, while on a program of clean intermittent catheterization

Nonsterile or sterile gloves for use by a health-care provider in the home setting, such as a registered nurse (RN), licensed vocational nurse (LVN), or attendant, are not a benefit of Home Health Services.

2.2.12.6.1 Indwelling Catheters and Related Insertion Supplies

Indwelling catheters and related supplies may be considered without prior authorization up to a maximum of 2 per month for clients who have a medical condition that results in an impairment of urination. Quantities in excess of 2 per month may be considered with documentation of medical necessity and prior authorization.

2.2.12.6.2 Intermittent Catheters and Related Insertion Supplies

Intermittent catheters and related supplies, up to a maximum of 150 per month, may be considered without prior authorization for clients who have a medical condition that results in an impairment of urination. Quantities in excess of 150 per month may be considered with documentation of medical necessity and prior authorization.

Nonsterile gloves are a benefit with prior authorization when a family member or friend is performing the catheterization.

Providers must use procedure codes A4351 or A4352 when billing for intermittent catheters. Providers must use procedure code A4353 when billing for intermittent catheters with insertion supplies. When billing these codes for intermittent hydrophilic catheters, providers must use the SC modifier.

2.2.12.6.3 External Urinary Collection Devices

For clients who are 4 years of age and older and have a medical condition that results in a permanent impairment of urination, external urinary collection devices, including, but not limited to, male external catheters, female collection devices, and related supplies may be considered without prior authorization. Male external catheters are limited to 31 per month. Female collection devices are limited to 4 per month. Male external catheters in excess of 31 per month and female collection devices in excess of 4 per month may be considered with documentation of medical necessity and prior authorization.

2.2.12.6.4 Urinals and Bed Pans

Urinals and bed pans may be considered without prior authorization for clients who have a medical condition that results in an inability to ambulate to the bathroom safely (with or without mobility aids) up to a limit of 2 per year. Quantities in excess of 2 per year may be considered with documentation of medical necessity and prior authorization.

Urinals and bed pans are purchase only.
2.2.12.7 Prior Authorization
Prior authorization is required for incontinence supplies if amounts greater than the maximum limits are medically necessary.

2.2.12.8 Documentation Requirements
To request prior authorization for incontinence supplies and equipment, the following documentation must be provided:

- Diagnostic information pertaining to the underlying diagnosis or condition, the diagnosis causing incontinence, and any other medical diagnoses or conditions, including the client’s overall health status
- Weight and height or waist size, when applicable
- Number of times per day the physician has ordered the supply be used
- Quantity of disposable supplies requested per month by the physician

Additional information may be requested to clarify or complete a request for the supplies.

2.2.12.9 Incontinence Procedure Codes with Limitations
Any service or combination of services, except diaper wipes, requires prior authorization if the maximum limitation is exceeded. Requests for prior authorization of diaper wipes that exceed more than two boxes per month will not be considered through Home Health Services.

2.2.13 Intravenous (IV) Therapy Equipment and Supplies

The following equipment and supplies are used in the delivery of IV therapy and are a benefit of Home Health Services. Additional supply procedure codes may be considered with documentation of medical necessity:

Types of IV access devices include but are not limited to:
- Peripheral IV lines.
- Central IV lines, including but not limited to, peripherally-inserted central catheters, subclavian catheters, and vena cava catheters.
- Central venous lines, including but not limited to, tunneled and peripherally inserted central venous catheters.
- Implantable ports, including but not limited to, access devices with subcutaneous ports.

Stopcocks increase the risk of infection and should not be routinely used for infusion administration. Routine use of in-line filters is not recommended for infection control.

*Note: Nonsterile or sterile gloves for use by a health-care provider in the home setting, such as an RN, LVN, or attendant, are not a benefit of Home Health Services.*

Stationary infusion pumps may be a benefit when the infusion rate must be more consistent and cannot be obtained with gravity drainage. Ambulatory infusion pumps may be a benefit when the length of infusion is greater than two hours, the client must be involved in activities away from home, and when the infusion rate must be more consistent and cannot be obtained with gravity drainage. Elastomeric infusion pumps may be a benefit for short-term use when the caregiver cannot administer the infusion via pump. Dial flow regulators are a benefit and are incorporated into IV extension sets or IV tubing. Elastomeric devices may be reimbursed using procedure codes A4305 and A4306.

Rental of an infusion pump may be prior authorized on a monthly basis for a maximum of four months per lifetime. Purchase of an infusion pump (ambulatory or stationary) may be prior authorized with documentation of medical necessity that supports repeated IV administration for a chronic condition.

For clients who require cardiovascular medications, infusion pumps will be rented, but not purchased.

Repairs to client-owned equipment may be prior authorized as needed with documentation of medical necessity. Technician fees are considered part of the cost of the repair. Providers are responsible for maintaining documentation in the client’s medical record that specifies the repairs and supports medical necessity. All repairs and replacement parts within the first six months after delivery are considered part of the purchase price. Batteries for client-owned equipment require prior authorization. Additional documentation, such as the purchase date, serial number, and manufacturer’s information, may be required.

IV therapy, supplies, and equipment are not considered a benefit when the infusion or medication being administered:
- Is not considered medically necessary to the treatment of the client’s illness.
- Exceeds the frequency or duration ordered by the physician.
- Is a chemotherapeutic agent or blood product.
• Is not FDA-approved, unless the physician documents why the off-label use is medically appropriate and not likely to result in an adverse reaction. In order to consider coverage of an off-label (non-FDA approved) use of a drug, documentation must include why a drug usually indicated for the specific diagnosis or condition has not been effective for the client.

Routine maintenance of rental equipment is included in the rental price.

Repairs or replacement parts may be reimbursed with documentation of a client-owned device.

Replacement batteries (procedure codes K0601, K0602, K0603, K0604, and K0605) for client-owned pumps are limited to one battery per 180 days.

2.2.13.1 Prior Authorization

Prior authorization of IV equipment and supplies may be considered when administration of the drug in the home is medically necessary and is appropriate in the home setting. IV equipment may be prior authorized for rental or purchase depending on the clinician’s predicted length of treatment.

The following standards are used when considering prior authorization of IV supplies:

• The aseptic technique is acceptable for IV catheter insertion and site care; the sterile technique is not required:
  • Nonsterile gloves are acceptable for the insertion of a peripheral IV catheter and for changing any IV site dressing.
  • The sterile technique may be medically necessary. Examples of medical necessity include, but are not limited to, a client who is immuno-compromised.
  • A peripheral IV site is rotated no more frequently than every 72 hours, but it is rotated at least weekly.
  • The IV administration set (with or without dial flow regulator), extension set (with or without dial flow regulator), and any add-on devices are changed every 72 hours.
  • One IV access catheter is used per insertion.
  • Saline or heparin-locked catheters:
    • Use one syringe to flush the catheter before administration of an intermittent infusion to assess.
    • Use two syringes to flush the catheter after the intermittent infusion—one to clear the medication and one to infuse the anticoagulant or other medication used to maintain IV patency between doses, including, but not limited to, heparin.
  • An injection port is cleaned before administering an intermittent infusion and capped after the infusion.
  • IV catheter site care:
    • Disinfect the site with an appropriate antiseptic (including but not limited to 2 percent chlorhexidine-based preparation, tincture of iodine, or 70 percent alcohol).
    • Cover with sterile gauze, transparent dressing, or semi-permeable dressing.
    • Replace the dressing if it becomes damp, loosened, or visibly soiled.

Elastomeric devices and dial flow regulators are specialized infusion devices that may be considered for prior authorization when the device:

• Will be used for short-term medication administration (less than two weeks duration).
• Is expected to increase client compliance.
• Will better facilitate drug administration.
• Costs less than the cost of pump rental or tubing.
• The caregiver can not administer the infusion via pump.

The following criteria must be met for prior authorization of a stationary infusion pump:
• An infusion pump is required to safely administer the drug.
• The standard method of administration of the drug is through prolonged infusion or intermittent infusion, and the infusion rate must be more consistent than can be obtained with gravity drainage.
• The drug being administered requires IV infusion (i.e., the drug cannot be administered orally, intramuscularly, or by push technique).

The following criteria must be met for prior authorization of an ambulatory infusion pump:
• An infusion pump is required to safely administer the drug.
• The standard method of administration of the drug is through prolonged infusion or intermittent infusion and the infusion rate must be more consistent than can be obtained with gravity drainage.
• The drug being administered requires IV infusion (i.e., the drug cannot be administered orally, intramuscularly, or via push technique).
• The infusion administration is more than two hours and the client is involved in activities away from home, including but not limited to, physician visits.

2.2.13.2 Documentation Requirements
To request prior authorization for IV supplies and equipment, the following documentation must be provided:
• Diagnostic information pertaining to the underlying diagnosis or condition
• A physician’s order and documentation supporting medical necessity
• The medication and dose being administered, the duration of drug therapy, and the frequency of administration

If additional supplies are needed beyond the standards listed, prior authorization may be considered with documentation supporting medical necessity.
• For additional IV access catheters, supporting documentation must have evidence that includes, but is not limited to, the following:
  • Dehydration
  • Vein scarring
  • Fragile veins, including but not limited to, clients who are infants or elderly
• For more frequent IV site changes, supporting documentation must have evidence that includes, but is not limited to, the following:
  • Phlebitis
  • Infiltration
  • Extravasation
• For more frequent IV tubing or add-on changes, supporting documentation must have evidence that includes, but is not limited to, the following:
  • Phlebitis
  • IV catheter-related infection
• The administered infusion requires more frequent tubing changes

2.2.14 Mobility Aids
Medical appliances and equipment including mobility aids such as canes, crutches, walkers, and wheelchairs (standard manual or power and custom manual or power, including those optimally configured for propulsion or custom seating) are reimbursed to assist clients to move about in their environment.

  **Note:** A mobility aid for a client who is 20 years of age or younger is medically necessary when it is required to correct or ameliorate a disability or physical illness or condition.

2.2.14.1 Canes, Crutches, and Walkers
Canes, crutches, or walkers may be prior authorized as a home health service with documentation supporting medical necessity and appropriateness of the requested item. This documentation by a physician familiar with the client must include information on the clients impaired mobility.

2.2.14.2 Feeder Seats, Floor Sitters, Corner Chairs, and Travel Chairs
Feeder seats, floor sitters, corner chairs, and travel chairs are not considered medically necessary devices and are not a benefit of Texas Medicaid. If a child requires seating support and meets the criteria for a seating system, a stroller may be considered for reimbursement with prior authorization through CCP or a wheelchair may be considered for reimbursement with prior authorization from TMHP Home Health Services Prior Authorization Department.

2.2.14.3 Wheelchairs
A standard manual wheelchair may be prior authorized for rental or purchase if the client owns, or is requesting, a standard or custom power wheelchair (PWC).

A custom manual wheelchair may be prior authorized for rental or purchase if the client owns, or is requesting a custom PWC.

Prior authorization for labor to create a custom-molded seating system is limited to a maximum of 15 hours.

2.2.14.3.1 Prior Authorization
A wheelchair may be prior authorized for short-term use or for purchase with documentation supporting medical necessity and an assessment of the accessibility of the client’s residence to ensure that the wheelchair is usable in the home (i.e., doors and halls wide enough, no obstructions). The wheelchair must be able to accommodate a 20 percent change in the client’s height or weight. This documentation by a physician familiar with the client must include information on the client’s impaired mobility and physical requirements.

In addition, the following information must be submitted with documentation of medical necessity:

• Why the client is unable to ambulate a minimum of 10 feet due to their condition (including AIDS, sickle cell anemia, fractures, a chronic diagnosis, or chemotherapy).

• If the client is able to ambulate further than 10 feet, why a wheelchair is required to meet the client’s needs.

• A completed Wheelchair/Scooter/Stroller Seating Assessment Form with seating measurements that includes documentation supporting medical necessity, except when requesting a standard sling seat or sling back wheelchair.

• An itemized component list for custom manual or PWCs.

A standard manual wheelchair is defined as a manual wheelchair that:

• Weighs more than 36 pounds.
• Does not have features to appropriately accept specialized seating or positioning.
• Has a weight capacity of 250 pounds or less.
• Has a seat depth of between 15 and 19 inches.
• Has a seat width of between 15 and 19 inches.
• Has a seat height of 19 inches or greater.
• Is fixed height only, fixed, swing away, or detachable armrest.
• Is fixed, swing away, or detachable footrest.

A standard hemi (low seat) wheelchair is defined as a manual wheelchair that:
• Has the same features as a standard manual wheelchair.
• Has a seat to floor height of less than 19 inches.

A standard reclining wheelchair is defined as a manual wheelchair that:
• Has the same features as a standard or hemi manual wheelchair.
• Has the ability to allow the back of the wheelchair to move independently of the seat to provide a change in orientation by opening the seat-to-back angle and, in combination with leg rests, open the knee angle.

A tilt-in-space wheelchair is defined as a manual wheelchair that:
• Has the ability to tilt the frame of the wheelchair greater than or equal to 45 degrees from horizontal while maintaining a constant back to seat angle to provide a change of orientation and redistribute pressure from one area (such as the buttocks and the thighs) to another area (such as the trunk and the head).
• Adult size has a weight capacity of at least 250 pounds.
• Pediatric size has a seat width or depth of less than 15 inches.

2.2.14.4.1 Prior Authorization
A standard manual wheelchair may be considered for prior authorization for short-term rental or purchase when all the following criteria are met:
• The client has impaired mobility and is unable to ambulate more than 10 feet.
• The client does not require specialty seating components.
• The client is not expected to need powered mobility within the next 5-year period.

A standard hemi wheelchair may be considered for prior authorization for short-term rental or purchase when the client meets criteria for a standard manual wheelchair and the following criteria is met:
• The client requires a low seat-to-floor height.
• The client must use their feet to propel the wheelchair.

A standard reclining wheelchair may be considered for prior authorization for short-term rental or purchase when the client meets criteria for a standard manual wheelchair and one or more of the following criteria are met:
• The client develops fatigue with longer periods of sitting upright.
• The client is at increased risk of pressure sores with prolonged upright position.
• The client requires assistance with respirations in a reclining position.
• The client needs to perform activities of daily living (ADLs) in a reclining position.
- The client needs to improve venous return from lower extremity in a reclining position.
- The client has severe spasticity.
- The client has excess extensor tone of the trunk muscles.
- The client has quadriplegia.
- The client has a fixed hip angle.
- The client must rest in a reclining position two or more times per day.
- The client has the inability or has great difficulty transferring from wheelchair to bed.
- The client has trunk or lower extremity casts or braces that require the reclining feature for positioning.

A tilt-in-space wheelchair may be considered for prior authorization for short-term rental or purchase when all the following criteria are met:

- The client meets criteria for a standard manual wheelchair.
- The client has a condition that meets criteria for a tilt-in-space feature, including, but not limited to:
  - Severe spasticity.
  - Hemodynamic problems.
  - Quadriplegia.
  - Excess extensor tone.
  - Range of motion limitations that prohibit a reclining system, such as hip flexors, hamstrings, or even heterotopic ossification.
  - The need to rest in a recumbent position two or more times per day and the client has an inability to transfer between bed and wheelchair without assistance.
  - Documented weak upper extremity strength or a disease that will lead to weak upper extremities.
  - Risk for skin break down because of inability to reposition body in chair to relieve pressure areas.

### 2.2.14.5 Manual Wheelchairs—Lightweight and High-Strength Lightweight

A lightweight manual wheelchair is defined as a manual wheelchair that:

- Has the same features as a standard or hemi manual wheelchair.
- Weighs 34 to 36 pounds.
- Has available arm styles that are height adjustable.

A high-strength lightweight wheelchair is defined as a manual wheelchair that:

- Has the same features as a lightweight manual wheelchair.
- Weighs 30 to 34 pounds.
- Has a lifetime warranty on side frames and cross braces.

### 2.2.14.5.1 Prior Authorization

A lightweight manual wheelchair may be considered for prior authorization for rental or purchase when all the following criteria are met:

- The client is unable to propel a standard manual wheelchair at home.
- The client is capable of independently propelling a lightweight wheelchair to meet their mobility related activities of daily living (MR-ADLs) at home.
A high-strength lightweight wheelchair may be considered for prior authorization for rental or purchase when all the following criteria are met:

- The client meets all the criteria for a lightweight manual wheelchair and meets one or more of the following:
  - The high-strength lightweight wheelchair will allow the client to self-propel while engaging in frequently performed activities that cannot otherwise be completed in a standard or lightweight wheelchair.
  - The client requires frame dimensions (seat width, depth, or height) that cannot be accommodated in a standard, lightweight, or hemi wheelchair and the wheelchair is used at least 2 hours a day.

### 2.2.14.6 Manual Wheelchairs—Heavy-Duty and Extra-Heavy-Duty

A heavy duty wheelchair is defined as a manual wheelchair that:

- Meets the standard manual wheelchair definition.
- Has a weight capacity greater than 250 pounds.

An extra-heavy-duty wheelchair is defined as a manual wheelchair that:

- Meets the standard manual wheelchair definition.
- Has a weight capacity greater than 300 pounds.

#### 2.2.14.6.1 Prior Authorization

A heavy-duty wheelchair may be considered for prior authorization for short-term rental or purchase when the client has severe spasticity or all the following criteria are met:

- The client meets criteria for a standard manual wheelchair.
- The client weighs between 250 and 300 pounds.

An extra-heavy-duty wheelchair may be considered for prior authorization for short-term rental or purchase when all the following criteria are met:

- The client meets criteria for a standard manual wheelchair.
- The client weighs more than 300 pounds.

### 2.2.14.7 Manual Wheelchairs—Pediatric Size

A pediatric sized wheelchair is defined as a manual standard/custom wheelchair (including those optimally configured for propulsion or custom seating) that has a seat width or depth of less than 15 inches.

### 2.2.14.8 Manual Wheelchairs—Custom (Includes Custom Ultra-Lightweight)

A custom ultra-lightweight wheelchair is defined as an optimally configured wheelchair for independent propulsion which cannot be achieved in a standard lightweight or high-strength lightweight wheelchair that:

- Meets the high-strength lightweight definition and weighs less than 30 pounds.
- Has one or more of the following features to appropriately accept specialized seating or positioning:
  - Adjustable seat-to-back angle
  - Adjustable seat depth
  - Independently adjustable front and rear seat-to-floor dimensions
  - Adjustable caster stem hardware
• Adjustable rear axle
• Adjustable wheel camber
• Adjustable center of gravity
• Lifetime warranty on side frames and cross braces

2.2.14.8.1 Prior Authorization

A custom (ultra lightweight) manual wheelchair may be considered for prior authorization for rental or purchase when the client meets all the criteria for a lightweight manual wheelchair and one or more of the following criteria:

• The client is able to self-propel, will have independent mobility with the use of an optimally configured chair, and meets all of the following criteria:
  • The client uses the wheelchair for a significant portion of their day to complete MR-ADLs.
  • The client uses the wheelchair in the community to complete MR-ADLs.
  • Powered mobility is not anticipated within the next 5-year period.

• The client is able to self-propel, will have independent mobility with the use of an optimally configured chair, has a medical condition that cannot be accommodated by the seating available on a standard, lightweight, or high-strength lightweight wheelchair and one or more of the following features needed by the client to ensure optimal independence with MR-ADLs:
  • Adjustable seat to back angle.
  • Adjustable seat depth.
  • Independently adjustable front and rear seat-to-floor dimensions.
  • Adjustable caster stem hardware.
  • Adjustable rear axle (adjustable center of gravity).
  • Powered mobility is not anticipated within the next 5-year period.

• The client meets all of the following criteria:
  • The client is unable to self-propel.
  • The client has a documented condition that requires custom seating, including, but not limited to:
    • Poor trunk control.
    • Contractures of elbow or shoulders.
    • Muscle spasticity.
    • Tone imbalance through shoulders or back.
    • Kyphosis or Lordosis.
    • Lack of flexibility in pelvis or spine.
  • The client requires custom seating that cannot be accommodated on a standard, lightweight, or hemi-wheelchair.

2.2.14.9 Seating Assessment for Manual and Power Custom Wheelchairs

A seating assessment and seating measurements including specifications for exact mobility/seating equipment and all necessary accessories, must be completed by a physician, licensed occupational therapist, or licensed physical therapist.
The accessibility of the client’s residence must be assessed and included in the prior authorization of the wheelchair/mobility device. This assessment must include measurements of the doorways, hallways, and main living areas such as bedroom(s) and bathroom(s). The vendor must verify that the main living areas are wheelchair accessible and available to the client while in the mobility device.

**Note:** If a client who is birth through 20 years of age requires seating support and meets the criteria for a seating system, a stroller may be considered through CCP, or a wheelchair may be considered through Texas Medicaid Title XIX Home Health Services.

### 2.2.14.9.1 Prior Authorization

Seating assessments must be prior authorized.

### 2.2.14.9.2 Documentation Requirements

A seating assessment and seating measurements must be completed, signed, and dated, by a physician or a licensed occupational or physical therapist before requesting prior authorization. All signatures and dates must be current, unaltered, original, and handwritten. Computerized or stamped signatures and dates will not be accepted.

To request prior authorization for a custom manual/PWC, a Wheelchair/Scooter/Stroller Seating Assessment Form must be completed by a physician or a licensed physical or occupational therapist using the procedure codes 97001 and 97003.

The following documentation must be provided:

- A seating evaluation and seating measurements, performed by a physician or a licensed occupational or physical therapist, which includes specifications for exact mobility and seating equipment, all necessary accessories, and how the client or family will be trained in the use of the equipment.
- Anticipated changes in the client’s needs, anticipated modifications, or accessory needs, as well as the growth potential of the wheelchair. A wheelchair must have a growth potential that will accommodate a 20-percent change in the client’s height or weight.
- Significant medical information pertinent to mobility and requested equipment including intellectual, postural, physical, sensory (visual and auditory), and physical status. Address trunk and head control, balance, arm and hand function, existence and severity of orthopedic deformities, as well as any recent changes in the client’s physical or functional status, and any expected or potential surgeries that will improve or further limit mobility.
- A description of the current mobility or seating equipment, how long the client has been in the current equipment and why it no longer meets the client needs.
- Client’s height, weight, and a description of where the equipment is to be used. Include the accessibility of the client’s residence.
- Manufacturer’s retail pricing information, with itemized pricing including the description of the specific base, any attached seating system components and any attached accessories as well as the manufacturer’s retail pricing information and itemized pricing for manually priced components.

If the wheelchair assessment form is completed by a physician, reimbursement is considered part of the physician office visit and will not be prior authorized using the above therapy procedure codes.

### 2.2.14.10 PWC- Group 1 through Group 5

A PWC is a professionally manufactured device that provides motorized wheeled mobility and body support specifically for individuals with impaired mobility. PWCs are four- or six-wheeled motorized vehicles whose steering is operated by an electronic device or joystick to control direction, turning, and alternative electronic functions, such as seat controls.
The following definitions apply to PWCs:

- **No-Power Option** - A category of PWCs that cannot accommodate a power tilt, recline, or seat elevation system. A PWC that can accept only power-elevating leg rests is considered to be a no-power-option chair.

- **Single-Power Option** - A category of PWCs that can accept and operate a power tilt, power recline, or a power seat elevation system, but not a combination power tilt and recline seating system. A single-power-option PWC might be able to accommodate power elevating leg rests, or seat elevator, in combination with a power tilt or power recline. A PWC does not have to be able to accommodate all features to meet this definition.

- **Multiple-Power Option** - A category of PWCs that can accept and operate a combination power tilt and recline seating system. A multiple-power-option PWC might also be able to accommodate power elevating leg rests, or a power seat elevator. A PWC does not have to accommodate all features to qualify to meet this definition.

Each PWC must include all of the following basic components that may not be billed separately:

- Lap belt or safety belt (This does not include multiple-attachment-point positioning belts or padded belts.)
- Battery charger, single mode
- Batteries (initial)
- Complete set of tires and casters, any type
- Leg rests
- Foot rests or foot platform
- Arm rests
- Any weight-specific components (braces, bars, upholstery, brackets, motors, gears, and so on) as required by client weight capacity
- Controller and input device

### 2.2.14.10.1 Documentation Requirements

Prior authorization for a PWC requires the following documentation in addition to all documentation required for a custom manual wheelchair:

- The client’s physical and mental ability to receive and follow instructions related to responsibilities of using equipment. The client must be able to operate a PWC independently. The therapist must provide written documentation that the client is physically and cognitively capable of managing a PWC.
- How the PWC will be operated (i.e., joystick, head pointer, puff-and-go).
- The capability of the client to understand how the PWC operates.
- The capability of the caregiver or client to care for the PWC and accessories.

### 2.2.14.10.2 Group 1 PWCs

All Group 1 PWCs must have all the specified basic components and meet all the following requirements:

- Standard integrated or remote proportional joystick
- Nonexpandable controller
- Incapable of upgrade to expandable controller
• Incapable of upgrade to alternative control devices
• May have cross brace construction
• Accommodates nonpowered options and seating systems (e.g., recline-only backs, manually elevating leg rests [except captains chairs])
• Length - less than or equal to 40 inches
• Width - less than or equal to 24 inches
• Minimum top end speed - 3 mph
• Minimum range - 5 miles
• Minimum obstacle climb - 20 mm
• Dynamic stability incline - 6 degrees

**Prior Authorization Requirements**
A Group 1 PWC may be considered for prior authorization for rental or purchase when all the following criteria are met:

- The client will use the PWC for less than 2 hours per day.
- The client will use the PWC indoors on smooth, hard surfaces.
- The client will not encounter obstacles in excess of 75 inch.

2.2.14.10.3 **Group 2 PWCs**
All Group 2 PWCs must have all the specified basic components and meet all the following requirements:

- Standard integrated or remote proportional joystick
- May have cross brace construction
- Accommodates seating and positioning items (e.g., seat and back cushions, headrests, lateral trunk supports, lateral hip supports, medical thigh supports [except captains chairs])
- Length - less than or equal to 48 inches
- Width - less than or equal to 34 inches
- Minimum top end speed - 3 mph
- Minimum range - 7 miles
- Minimum obstacle climb - 40 mm
- Dynamic stability incline - 6 degrees

**Prior Authorization Requirements**
A Group 2 PWC may be considered for prior authorization for rental or purchase when the following criteria are met:

- The client will use the PWC for 2 or more hours per day.
- The client will not routinely use the PWC for MRADLs outside the home.
- The client will not encounter obstacles in excess of 1.5 inches.
2.2.14.10.4 Group 3 PWCs

All Group 3 PWCs must have all the specified basic components and meet all the following requirements:

- Standard integrated or remote proportional joystick
- Nonexpandable controller
- Capable of upgrade to expandable controller
- Capable of upgrade to alternative control devices
- May not have cross brace construction
- Accommodates seating and positioning items (e.g., seat and back cushions, headrests, lateral trunk supports, lateral hip supports, medial thigh supports [except captains chairs])
- Drive wheel suspension to reduce vibration
- Length - less than or equal to 48 inches
- Width - less than or equal to 34 inches
- Minimum top end speed - 4.5 mph
- Minimum range - 12 miles
- Minimum obstacle climb - 60 mm
- Dynamic stability incline - 7.5 degrees

Prior Authorization Requirements

A Group 3 PWC may be considered for prior authorization for rental or purchase when the following criteria are met:

- The client’s mobility limitation is due to a neurological condition, myopathy, or congenital skeletal deformity.
- The client may routinely use the PWC for MRADLs outside of the home.
- The client will use the PWC primarily on smooth or paved surfaces.
- The client will not encounter obstacles in excess of 2.5 inches.

2.2.14.10.5 Group 4 PWCs

All Group 4 PWCs must have all the specified basic components and meet all the following requirements:

- Standard integrated or remote proportional joystick
- Nonexpandable controller
- Capable of upgrade to expandable controller
- Capable of upgrade to alternative control devices
- May not have cross brace construction
- Accommodates seating and positioning items (e.g., seat and back cushions, headrests, lateral trunk supports, lateral hip supports, medial thigh supports [except captains chairs])
- Drive wheel suspension to reduce vibration
- Length - less than or equal to 48 inches
- Width - less than or equal to 34 inches
• Minimum top end speed - 6 mph
• Minimum range - 16 miles
• Minimum obstacle climb - 75 mm
• Dynamic stability incline - 9 degrees

Prior Authorization Requirements
A Group 4 PWC may be considered for prior authorization for rental or purchase when all the following criteria are met:

• In addition to using the PWC in the home, the client will routinely use the PWC for MRADLs outside the home.
• The client will routinely use the PWC on rough, unpaved or uneven surfaces.
• The client will encounter obstacles in excess of 2.25 inches.
• The client has a documented medical need for a feature that is not available on a lower level PWC.

Documentation Requirements
The submitted documentation for a Group 4 PWC must include a completed assessment that is signed and dated by a physician or a licensed physical or occupational therapist and includes the following:

• A description of the environment where the PWC will be used in the routine performance of MRADLs.
• A listing of the MRADLs that would be possible with the use of a Group 4 PWC that would not be possible without the Group 4 PWC.
• The distance the client is expected to routinely travel on a daily basis with the Group 4 PWC.

Note: The enhanced features found on a Group 4 PWC must be medically necessary to meet the client's routine MRADL and will not be approved for leisure or recreational activities.

In addition to meeting criteria for Group 2 through Group 4 PWCs, the submitted documentation of medical necessity must demonstrate that the client requires the requested power option as defined above in subsection 2.2.14.10, “PWC- Group 1 through Group 5” (e.g., the need for a power recline or tilt in space, or a combination power tilt and power recline) the no-power option, single-power option, or multiple-power option.

2.2.14.10.6 Group 2 through Group 4 No-Power Option
Group 2 through Group 4 no-power option PWCs must have all the specified basic components and meet all the following requirements:

• Nonexpandable controller
• Incapable of upgrade to expandable controller
• Incapable of upgrade to alternative control devices
• Meets the definition of no-power option
• Accommodates nonpowered options and seating systems (e.g., recline-only backs, manually elevating leg rests [except captains chairs])

2.2.14.10.7 Group 2 through Group 4 Single-Power Option
Group 2 through Group 4 single-power option PWCs must have all the specified basic components and meet all the following requirements:

• Nonexpandable controller
• Capable of upgrade to expandable controller
• Capable of upgrade to alternative control devices
• Meets the definition of single-power option

### 2.2.14.10.8 Group 2 through Group 4 Multiple-Power Option

Group 2 through Group 4 multiple-power option PWCs must have all the specified basic components and meet all the following requirements:

- Nonexpandable controller
- Capable of upgrade to expandable controller
- Meets the definition of multiple-power option
- Accommodates a ventilator

### 2.2.14.10.9 Group 5 PWCs

All Group 5 PWCs must have all the specified basic components and meet all the following requirements:

- Standard integrated or remote joystick
- Nonexpandable controller
- Capable of upgrade to expandable controller
- Seat width - minimum of 5 one-inch options
- Seat depth - minimum of 3 one-inch options
- Seat height - adjustment requirements = 3 inches
- Back height - adjustment requirements minimum of 3 options
- Seat-to-back angle range of adjustment - minimum of 12 degrees
- Accommodates nonpowered options and seating systems
- Accommodates seating and positioning items (e.g., seat and back cushions, headrests, lateral trunk supports, lateral hip supports, medial thigh supports)
- Adjustability for growth (minimum of 3 inches for width, depth, and back height adjustment)
- Special developmental capability (i.e., seat to floor, standing, etc.)
- Drive wheel suspension to reduce vibration
- Length - less than or equal to 48 inches
- Width - less than or equal to 34 inches
- Minimum top end speed - 4 mph
- Minimum range - 12 miles
- Minimum obstacle climb - 60 mm
- Dynamic stability incline - 9 degrees
- Passed crash test

### Prior Authorization Requirements

A Group 5 pediatric PWC may be considered for prior authorization for rental or purchase when all the following criteria are met:

- The client weighs less than 125 pounds.
• The client is expected to grow in height.
• The client may require growth of up to 5 inches in width.
• The client may require a change in seat to floor height up to 3 inches.
• The client may require a seat to back angle range of adjustment in excess of 12 degrees.
• The client requires special developmental capability (i.e., seat to floor, standing, etc.).

2.2.14.10.10 Group 5 Single-PWCs

Group 5 single-power option PWC must have all the specified basic components and meet all the following requirement:

• Has the capability to accept and operate a power tilt or recline or seat elevation system, but not a combination power tilt and recline seating system, and may be able to accommodate power elevating leg rests, or seat elevator, in combination with a power tilt or power recline.

Prior Authorization Requirements

A Group 5 pediatric PWC with single power option may be considered for prior authorization for rental or purchase when all the following criteria are met:

• The client meets criteria for a Group 5 PWC.
• The client requires a drive control interface other than a hand or chin-operated standard proportional joystick (examples include but are not limited to head control, sip and puff, switch control).

2.2.14.10.11 Group 5 Multiple-PWCs

Group 5 multiple-power option PWC must have all the specified basic components and meet all the following requirements:

• Has the capability to accept and operate a combination power tilt and recline seating system, and may also be able to accommodate power elevating leg rests, or a power seat elevator.
• Accommodates a ventilator.

Prior Authorization Requirements

A Group 5 pediatric PWC with multiple power option may be considered for prior authorization for rental or purchase when the following criteria are met:

• The client meets criteria for a Group 5 PWC.
• The client requires a drive control interface other than a hand or chin-operated standard proportional joystick (examples include but are not limited to head control, sip and puff, switch control).
• The client has a documented medical need for a power tilt and recline seating system and the system is being used on the wheelchair or the client uses a ventilator which is mounted on the wheelchair.

2.2.14.11 Power Elevating Leg Lifts

Power elevating leg lifts may be prior authorized for clients who have compromised upper extremity function that limits the client’s ability to use manual elevating leg rests. The client must meet criteria for a PWC with a reclining back and at least one of the following:

• The client has a musculoskeletal condition such as flexion contractures of the knees and legs, or the placement of a brace that prevents 90-degree flexion at the knee.
• The client has significant edema of the lower extremities that requires elevating the client’s legs.
• The client experiences hypotensive episodes that require frequent positioning changes.
• The client needs power tilt-and-recline and is required to maintain anatomically correct positioning and reduce exposure to skin shear.
2.2.14.11 Documentation Requirements
The submitted documentation must include an assessment completed, signed, and dated by a physician, physical therapist, or occupational therapist that includes the following:

- A description of the client’s current level of function without the device
- Documentation that identifies how the power elevating leg lifts will improve the client’s function
- A list of MRADLs the client will be able to perform with the power elevating leg lifts that the client is unable to perform without the power elevating leg lifts and how the device will increase independence
- The duration of time the client is alone during the day without assistance
- The client’s goals for use of the power elevating leg lifts

2.2.14.12 Power Seat Elevation System
A power seat elevation system may be prior authorized to promote independence in a client who meets all of the following criteria:

- The client does not have the ability to stand or pivot transfer independently.
- The client requires assistance only with transfers across unequal seat heights, and as a result of having the power seat elevation system, the client will be able to transfer across unequal seat heights unassisted.
- The client has limited reach and range of motion in the shoulder or hand that prohibits independent performance of MRADLs (such as, dressing, feeding, grooming, hygiene, meal preparation, and toileting).

2.2.14.12.1 Documentation Requirements
The submitted documentation must include an assessment completed, signed, and dated by a physician, physical therapist, or occupational therapist that includes the following:

- A description of the client’s current level of function without the device
- Documentation that identifies how the power seat elevation system will improve the client’s function
- A list of MRADLs the client will be able to perform with the power seat elevation system that the client is unable to perform without the power seat elevation system and how the device will increase independence
- The duration of time the client is alone during the day without assistance
- The client’s goals for use of the power seat elevation system

Note: A power seat elevation system option will not be authorized for the convenience of a caregiver, or if the device will not allow the client to become independent with MRADLs and transfers.

2.2.14.13 Seat Lift Mechanisms
A seat lift mechanism may be prior authorized for clients who meet all the following criteria:

- The client must have severe arthritis of the hip or knee or have a severe neuromuscular disease.
- The seat lift mechanism must be a part of the physician’s course of treatment and be prescribed to correct or ameliorate the client’s condition.
- Once standing, the client must have the ability to ambulate.
The client must be completely incapable of standing up from a regular armchair or any chair in his or her home.

Note: The fact that a client has difficulty or is even incapable of getting up from a chair, particularly a low chair, is not sufficient justification for a seat lift mechanism. Almost all clients who are capable of ambulating can get out of an ordinary chair if the seat height is appropriate and the chair has arms.

Seat lift mechanisms are limited to those types that operate smoothly, can be controlled by the client, and can effectively assist a client in standing up and sitting down without other assistance. A seat lift operated by a spring release mechanism with a sudden, catapult-like motion and jolts the client from a seated to a standing position is not a benefit of Texas Medicaid.

2.2.14.13.1 Documentation Requirements

The submitted documentation must include an assessment completed, signed, and dated by a physician, physical therapist, or occupational therapist that includes the following:

- A description of the client’s current level of function without the device
- Documentation that identifies how the seat lift mechanism will improve the client’s function
- A list of MRADLs the client will be able to perform with the seat lift mechanism that the client is unable to perform without the seat lift mechanism and how the device will increase independence
- The duration of time the client is alone during the day without assistance
- The client’s goals for use of the seat lift mechanism

Supporting documentation must be kept in the client’s record that shows that all appropriate therapeutic modalities (such as medication, physical therapy) have been tried and that they failed to enable the client to transfer from a chair to a standing position.

2.2.14.14 Batteries and Battery Charger

A battery charger and initial batteries are included as part of the purchase of a PWC.

Batteries and battery chargers will not be prior authorized for replacement within six months of delivery. Replacement batteries or a battery charger may be considered for reimbursement under Home Health Services if they are no longer under warranty. A maximum of one hour of labor may be considered for reimbursement to install new batteries. Labor is not reimbursed with the purchase of a new PWC, or with replacement battery chargers.

2.2.14.14.1 Documentation Requirements

To request prior authorization for replacement batteries or a battery charger, the provider must document the date of purchase and serial number of the currently-owned wheelchair as well as the reason for the replacement batteries or battery charger.

Documentation required supporting the need to replace the batteries or battery charger must include:

- Why the batteries are no longer meeting the client’s needs, or
- Why the battery charger is no longer meeting the client’s needs

2.2.14.15 Scooters

A scooter is a professionally manufactured three- or four-wheeled motorized base operated by a tiller with a professionally manufactured basic seating system for clients who have little or no positioning needs.

A scooter must meet all the following requirements:

- Length- less than or equal to 48 inches
• Width - less than or equal to 28 inches
• Minimum top end speed - 3 mph
• Minimum range - 5 miles
• Minimum obstacle climb - 20 mm
• Radius pivot turn of less than or equal to 54 inches
• Dynamic stability incline - 6 degrees

Scooters may be approved for a short-term rental or initial three-month trial rental period based on documentation supporting the medical necessity and appropriateness of the device. Scooters may be considered for reimbursement for ambulatory impaired clients with good head, trunk and arm/hand control, without a diagnosis of progressive illness such as progressive neuromuscular diseases (e.g., amyotrophic lateral sclerosis). All scooters must have a growth potential, which must accommodate 20 percent of height and weight changes. Custom seating for scooters is not a benefit of Home Health Services. Repairs to scooters may be considered only for those scooters purchased by Texas Medicaid.

2.2.14.15.1 Prior Authorization
Assessment of the accessibility of the client’s residence must be completed and included in the prior authorization documentation to ensure that the scooter is usable in the home, such as doors and halls are wide enough and have no obstructions. To request prior authorization for a scooter the client must not own or be expected to require a PWC within five years of the purchase of a scooter.

2.2.14.15.2 Documentation Requirements
When requesting prior authorization for a scooter, all documentation required for a standard PWC must be provided, along with the following documentation:

• The client’s physical and mental ability to receive and follow instructions related to the responsibilities of using the equipment
• The ability of the client to physically and cognitively operate the scooter independently
• The capability of the client to care for the scooter and understand how it operates
• A completed Wheelchair/Scooter/Stroller Seating Assessment Form with seating measurements that includes documentation supporting medical necessity, except when requesting a standard sling seat/sling back wheelchair

2.2.14.16 Client Lift
A client lift will not be prior authorized for the convenience of a caregiver. Hydraulic lifts and electric lifts are a benefit of Home Health Services.

Note: Portable hydraulic or electric lifts that can be used outside the home setting are not a benefit through Title XIX Home Health Services. For clients who are birth through 20 years of age, portable lifts that can be used outside the home setting may be considered through CCP.

2.2.14.17 Electric Lift
Prior authorization for an electric lift may be considered when the client meets criteria for a hydraulic lift and additional documentation explains why a hydraulic lift will not meet the client’s needs.

2.2.14.18 Hydraulic Lift
Hydraulic lifts require prior authorization.
2.2.14.18.1 Documentation Requirements
Prior authorization for a hydraulic lift may be considered with the following documentation:

- The inability of the client to assist in his own transfers
- The weight of the client and the weight capacity of the requested lift
- The availability of a caregiver to operate the lift
- Training by the provider to the client and the caregiver on the safe use of the lift

2.2.14.19 Stander
Standers, including all accessories, require prior authorization. Standers and gait trainers will not be prior authorized for a client within one year of each other.

2.2.14.19.1 Documentation Requirements
Prior authorization may be considered for the standers with the following documentation:

- Diagnosis relevant to the requested equipment, including functioning level and ambulatory potential
- Anticipated benefits of the equipment
- Frequency and duration of the client’s standing program
- Anticipated length of time the client will require this equipment
- Client’s height, weight, and age
- Anticipated changes in the client’s needs, anticipated modifications, or accessory needs, as well as the growth potential of the stander

2.2.14.20 Gait Trainers
Prior authorization for a gait trainer may be considered with documentation supporting medical necessity and an assessment of the accessibility of the client’s residence to ensure that the gait trainer is usable in the home (i.e., doors and halls are wide enough and have no obstructions), when a physician familiar with the client documents that the client has ambulatory potential and will benefit from a gait training program, and when the client meets the criteria for a stander.

2.2.14.21 Accessories
Accessories, modifications, adjustments, and repairs are benefits as outlined below. All modifications, adjustments, and repairs within the first six months after delivery are considered part of the purchase price. Equipment accessories, including pressure support cushions, may be prior authorized with documentation of medical necessity.

2.2.14.22 Modifications
Modifications are replacement of components due to changes in the client’s condition, not replacement due to the component no longer functioning as designed. Prior authorization may be considered for modifications to custom equipment should a change occur in the client’s needs, capabilities, or physical/mental status that cannot be anticipated. Documentation must include the following:

- All projected changes in the client’s mobility needs
- The date of purchase and serial number of the current equipment and the cost of purchasing new equipment versus modifying current equipment

All modifications within the first six months after delivery are considered part of the purchase price and will not be considered for prior authorization.
2.2.14.23 Adjustments

Adjustments must be prior authorized. Adjustments do not require supplies. A maximum of 1 hour of labor for adjustments may be considered for reimbursement through Home Health Services as needed after the first 6 months from delivery. All adjustments within the first 6 months after delivery are considered part of the purchase price and will not be considered for prior authorization.

2.2.14.24 Repairs

Repairs require replacement of components that are no longer functional. Repairs to client-owned equipment may be prior authorized as needed with documentation of medical necessity. Repairs to client-owned equipment may be considered for reimbursement with prior authorization under Home Health Services. Technician fees are considered part of the labor cost on the repair. Providers are responsible for maintaining documentation in the client’s medical record specifying repairs. Rentals may be considered for reimbursement during the period of repair. Routine maintenance of rental equipment is the provider’s responsibility.

2.2.14.25 Replacement

A request for replacement of equipment or accessories may be considered for reimbursement and must include an order from the prescribing physician familiar with the client and an assessment by a physician, licensed occupational or physical therapist with documentation supporting why the current equipment is no longer meeting the client’s needs. Replacement, adjustments, modifications, and repairs will not be prior authorized in situations where the equipment has been abused or neglected by the client, client’s family, or caregiver.

2.2.14.26 Wheelchair Ramp—Portable and Threshold

A portable ramp is defined as a ramp that is able to be carried as needed to access a home, weighs no more than 90 pounds, or measures no more than 10 feet in length. A threshold ramp provides access over elevated thresholds.

One portable and one threshold ramp for wheelchair access may be considered for prior authorization when documentation supports medical necessity. The following documentation supporting medical necessity is required:

- The date of purchase and serial number of the client’s wheelchair or documentation of a wheelchair request being reviewed for purchase
- Diagnosis with duration of expected need
- A diagram of the house showing the access points with the ground-to-floor elevation and any obstacles

Ramps may be considered for rental for short term disabilities and for purchase for long term disabilities. Mobility aid lifts for vehicles and vehicle modifications are not a benefit of Texas Medicaid.

Note: Permanent ramps, vehicle ramps, and home modifications are not a benefit of Texas Medicaid.

Texas Medicaid does not reimburse separately for associated DME charges, including battery disposal fees or state taxes. Reimbursement for associated charges is included in the reimbursement for the specific piece of equipment. White canes for the blind are considered self help adaptive aids and are not a benefit of Home Health Services.

**Note:** THSteps-eligible clients who have a medical need for services beyond the limits of this Home Health Services benefit may be considered under CCP.

**Refer to:** Subsection 2.2.1.1, “Client Eligibility” in this handbook.

### 2.2.15 Nutritional (Enteral) Products, Supplies, and Equipment

Enteral nutritional products are those food products that are included in an enteral treatment protocol. They serve as a therapeutic agent for health maintenance and are required to treat an identified medical condition. Nutritional products, supplies, and equipment may be a benefit when provided in the home under Home Health Services.

#### 2.2.15.1 Enteral Nutritional Products, Feeding Pumps, and Feeding Supplies

Enteral nutritional products and related feeding supplies and equipment are a benefit through Home Health Services for clients who are 21 years of age and older and require tube feeding as their primary source of nutrition. The enteral product, supply, or equipment must be part of the medical POC outlined and maintained by the treating physician.

Enteral nutritional products may be reimbursed with the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>B4100</td>
</tr>
</tbody>
</table>

Enteral nutritional supplies and equipment may be reimbursed with the following procedure codes and limitations:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>Limitations</th>
</tr>
</thead>
<tbody>
<tr>
<td>A4322</td>
<td>4 per month</td>
</tr>
<tr>
<td>A5200</td>

<td>4 per month</td>
</tr>
</tbody>
</table>

*Appropriate limitations for miscellaneous procedure codes B9998 and T1999 are determined on a case-by-case basis through prior authorization. Specific items may be requested using procedure code B9998 using the modifiers outlined in the table above.
A backpack or carrying case for a portable enteral nutrition infusion pump may be a benefit of Home Health Services, when medically necessary and prior authorized, using procedure code B9998.

### 2.2.15.2 Prior Authorization Requirements

Prior authorization is required for most enteral products, supplies, and equipment provided through Home Health Services. Requests are reviewed for medically necessary amounts based on caloric needs as indicated by the client’s physician.

Enteral nutrition and related supplies and equipment may be considered for prior authorization for clients who are 21 years of age and older when all or part of the client’s nutritional intake is received via a feeding tube, and the enteral formula is:

- The client’s sole source of nutrition, or
- The client’s primary source of nutrition
  - An enteral tube feeding is considered the primary source of nutrition when it comprises more than 70 percent of the caloric intake needed to maintain the client’s weight.
  - The percent of calories provided by an enteral formula may be calculated by dividing the client’s daily calories supplied by the enteral formula by the daily caloric intake ordered by the physician to maintain the client’s weight. The result is multiplied by 100 to determine the percentage of calories provided by the enteral formula.

Related supplies and equipment may be considered for prior authorization when criteria for nutritional products are met, and medical necessity is included for each item requested.

Renewal of the prior authorization will be considered based on medical necessity.

Prior authorization may be given for up to 6 months. Prior authorization may be recertified with documentation supporting ongoing medical necessity for the nutritional products requested.

#### 2.2.15.2.1 Enteral Formulas

Enteral formulas require prior authorization. Requests for prior authorization must include the necessary product information.

Enteral formulas consisting of semi-synthetic intact protein or protein isolates (procedure codes B4150 and B4152) are appropriate for the majority of clients requiring enteral nutrition.

Special enteral formulas or additives (procedure code B4104) may be considered for prior authorization with supporting documentation submitted by the client’s physician indicating the client’s medical needs for these special enteral formulas. Special enteral formula may be reimbursed with the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>B4149</td>
</tr>
</tbody>
</table>

Pediatric nutritional products (procedure codes B4103, B4158, B4159, B4160, B4161, and B4162) are restricted to clients who are 20 years of age and younger.
Food thickener may be considered for clients with a swallowing disorder.

**2.2.15.2.2 Nasogastric, Gastrostomy, or Jejunostomy Feeding Tubes**

Feeding tubes require prior authorization.

Additional feeding tubes may be prior authorized if documentation submitted supports medical necessity, such as infection at gastrostomy site, leakage, or occlusion.

**2.2.15.2.3 Enteral Feeding Pumps**

Enteral feeding pumps, with and without alarms, require prior authorization.

Enteral feeding pumps may be considered for prior authorization for lease or purchase with documentation of medical necessity indicating that the client meets the following criteria:

- Gravity or syringe feedings are not medically indicated
- The client requires an administration rate of less than 100 ml/hr
- The client requires night-time feedings
- The client has one of the following medical conditions (this list is not all-inclusive):
  - Reflux or aspiration
  - Severe diarrhea
  - Dumping syndrome
  - Blood glucose fluctuations
  - Circulatory overload

**2.2.15.2.4 Enteral Supplies**

Enteral supplies require prior authorization, with the exception of irrigation syringes (procedure code A4322) and percutaneous catheter or tube anchoring devices (procedure code A45200) within the allowable limits.

Procedure code B4034 will not be prior authorized for use in place of procedure code A4322 for irrigation syringes when they are not part of a bolus administration kit.

Gravity bags and pump nutritional containers are included in the feeding supply kits and will not be prior authorized separately.

Specific items may be considered for prior authorization using miscellaneous procedure code B9998 and modifiers U1, U2, U3, or U5.

Requests for a backpack or carrying case for a portable enteral feeding pump may be considered for prior authorization for purchase only, under miscellaneous code B9998, for clients who meet all of the following medical necessity criteria:

- The client requires enteral feedings lasting greater than eight hours continuously, or feeding intervals exceed the time that the client must be away from home to:
  - Attend school or work.
  - Participate in extensive, physician-ordered outpatient therapies.
  - Attend frequent, multiple medical appointments.
  - The client is ambulatory, or uses a wheelchair which will not support the use of a portable pump by other means, such as an IV pole.
  - The portable enteral feeding pump is client owned.
Reimbursement for feeding supply kits is limited to 31 per month, per client by any provider. Providers must bill a quantity no greater than the number of days in the month in which they are billing. Providers billing in excess of the number of days in the month are subject to recoupment.

2.2.15.3 Documentation Requirements
To request prior authorization for nutritional formula, supplies, or equipment, the following documentation must be provided:

- Accurate diagnostic information pertaining to the underlying diagnosis or condition as well as any other medical diagnoses or conditions, to include the client’s overall health status
- Diagnosis or condition (including the appropriate International Classification of Diseases, Ninth Revision, Clinical Modification [ICD-9-CM] code)
- A statement from the ordering physician noting that enteral nutritional products for tube feedings are the client’s sole or primary source of nutrition
- The goals and timelines on the medical POC
- Total caloric intake prescribed by the physician
- Acknowledgement that the client has a feeding tube in place

2.2.16 Osteogenic Stimulation
A noninvasive electrical osteogenic stimulator (procedure codes E0747 and E0748) and noninvasive ultrasound osteogenic stimulator (procedure code E0760) are benefits of Texas Medicaid for home health DME and medical supplier DME providers when provided in the home setting. An invasive electrical osteogenic stimulator (procedure code E0749) is a benefit of Texas Medicaid for freestanding and hospital-based ambulatory surgical centers when provided in the outpatient setting.

Electrical and ultrasonic osteogenic stimulator devices for the treatment of orthopedic and neurosurgical conditions are a benefit for Texas Medicaid clients when the client experiences nonunion of a fracture, requires an adjunct to spinal fusion surgery, or experiences congenital pseudoarthroses.

Nonunion is defined as a fractured bone that fails to heal completely. Diagnosis of nonunion is established when a minimum of six months has passed since the injury and the fracture site shows no progressive signs of healing for a minimum of three months and is not complicated by a synovial pseudoarthrosis. Serial radiographs must confirm that fracture healing has ceased for three months or longer before the client begins treatment with the osteogenic stimulator.

2.2.16.1 Ultrasound Osteogenic Stimulator
Procedure code E0760 is a benefit for the treatment of nonunion fractures, excluding fractures of the skull or vertebra, or fractures related to malignancy. The nonunion fracture must have occurred within five years of treatment with the ultrasound osteogenic stimulator.

The ultrasonic osteogenic stimulator will not be covered for the following indications:

- Fresh fractures
- Nonunion fractures of the skull, vertebrae and those that are tumor-related
- When used concurrently with other noninvasive osteogenic devices
2.2.16.2 Professional Services

Procedure codes 20974, 20975, and 20979 are a benefit of Texas Medicaid for the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>73381</td>
</tr>
</tbody>
</table>

Procedure codes 20974, 20975, and 20979 are limited to 1 per 6 months. During the 6-month limitation period, a subsequent fracture that meets the above criteria for an osteogenic stimulator may be reimbursed after the submission of an appeal with documentation of medical necessity that demonstrates the criteria have been met.

2.2.16.3 Prior Authorization

Procedure codes E0747, E0748, E0749, and E0760 require prior authorization.

2.2.16.3.1 Noninvasive Electrical Osteogenic Stimulator

Procedure codes E0747 and E0748 may be prior authorized for the following conditions:

- Nonunion of long bone fractures. Long bones include, but are not limited to, the humerus, femur, radius, ulna, tibia, fibula, clavicle, fifth metatarsal (when significant pain is present), carpal, and tarsal bones.
- Failed fusion when a minimum of nine months has passed since the first surgery.
- Delayed unions of fractures or failed arthrodesis at high-risk sites (e.g., open or segmental tibial fractures, carpal navicular fractures).
- Congenital pseudoarthroses.
- As an adjunct to spinal fusion surgery for clients who are at high-risk for pseudoarthrosis because of previously failed spinal fusion at the same site or for clients who are undergoing multiple level fusion. A multiple level fusion involves three or more vertebrae (e.g., L3-L5, L4-S1).

A noninvasive electrical osteogenic stimulator may be prior authorized when one of the following criteria is met:

- There is no evidence of healing progression for six months or longer despite appropriate fracture care following a nonunion, failed fusion, or congenital pseudoarthrosis.
- Serial radiographs have demonstrated that there is no evidence of healing progression after a delayed union of fracture or a failed arthrodesis. Serial radiographs must include a minimum of two sets of radiographs separated by a minimum of 90 days. Each set must include multiple views of the fracture site.
- A radiograph demonstrates that the fracture gap is 1 cm or less, and the individual can be adequately immobilized and is likely to comply with non-weight-bearing requirements.
- The client has experienced a failed spinal fusion or is at high risk for fusion failure, and one of the following criteria is met:
  - The client has Grade III or higher spondylolisthesis.
  - A multiple level fusion with extensive bone grafting is required, and other risk factors exist. Other risk factors include, but are not limited to, gross obesity, degenerative osteoarthritis, severe spondylolisthesis, current smoking, previous spinal fusion, previous disc surgery, or gross instability.
2.2.16.3.2 Invasive Electrical Osteogenic Stimulator

Procedure code E0749 may be prior authorized for the following conditions:

- Nonunion of long bone fractures.
- As an adjunct to spinal fusion surgery for clients who are at high-risk for pseudoarthrosis because of previously failed spinal fusion at the same site or for clients who are undergoing multiple level fusion. A multiple level fusion involves three or more vertebrae (e.g., L3–L5, L4–S1).

An invasive electrical osteogenic stimulator may be prior authorized when one of the following criteria is met:

- There is no evidence of healing progression for six months or longer despite appropriate fracture care following a nonunion.
- The client has experienced a failed spinal fusion or is at high-risk for pseudoarthrosis because of previously failed spinal fusion at the same site.
- Client has multiple level fusion involving three or more vertebrae (e.g., L3–L5, L4–S1).
- Serial radiographs have demonstrated that there is no evidence of healing progression. Serial radiographs must include a minimum of two sets of radiographs separated by a minimum of 90 days. Each set must include multiple views of the fracture site.

2.2.16.3.3 Ultrasound Osteogenic Stimulator

Procedure code E0760 may be prior authorized when all of the following criteria are met:

- There is demonstrated proof of skeletal maturity.
- A radiograph demonstrates that the fracture gap is 1 cm or less.
- Serial radiographs have demonstrated that there is no evidence of healing progression. Serial radiographs must include a minimum of two sets of radiographs separated by a minimum of 90 days. Each set must include multiple views of the fracture site.
- At least one surgical or medical intervention for the treatment of the fracture has failed.

2.2.16.4 Documentation Requirements

A summary of the radiology reports and the date the fracture occurred must be submitted with the prior authorization request for any osteogenic stimulator. The manufacturer will replace the osteogenic stimulator during the course of treatment should the device become nonfunctional. Repairs to purchased equipment will not be prior authorized. All repairs are considered part of the purchase price. Osteogenic stimulators may be replaced during the course of treatment if the device becomes nonfunctional. Repairs to purchased equipment are not prior authorized. All repairs are considered part of the purchase price. A new osteogenic stimulator may be considered for prior authorization with documentation supporting treatment of a different fracture site.

Documentation supporting medical necessity for an osteogenic stimulator is subject to retrospective review. Osteogenic stimulators that do not meet the criteria for coverage through Texas Medicaid (Title XIX) Home Health Services may be considered through CCP for clients who are 20 years of age and younger.

2.2.17 Phototherapy Devices

Phototherapy devices are not a benefit of Title XIX Home Health Services. Phototherapy devices are a benefit of Texas Medicaid through CCP for clients who are birth through 20 years of age.

Refer to: Subsection 2.5.12, “Phototherapy Devices” in the Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information on phototherapy devices.
2.2.18 Reflux Slings and Wedges
Home Health Services may cover reflux slings or wedges for clients who are 11 months of age and younger. These may be used as positioning devices for infants who require elevation after feedings when prescribed by a physician as medically necessary and appropriate. If the client is not eligible for home health services, reflux slings and wedges may be provided under CCP. Providers must use procedure code E1399 when billing for the purchase of reflux slings and wedges.

2.2.18.1 Prior Authorization
Reflux slings, wedges, or covers require prior authorization.

2.2.19 Respiratory Equipment and Supplies
Respiratory equipment and supplies may be provided in the home under Home Health Services. Rental of equipment includes all necessary supplies, adjustments, repairs, and replacement parts.

Note: Respiratory equipment and related supplies that are not considered a benefit under Home Health Services may be considered for reimbursement through CCP for clients who are 20 years of age and younger, who are CCP eligible (e.g., clients who are residing in residential treatment centers).

2.2.19.1 Prior Authorization
Most respiratory equipment and supplies require prior authorization.

2.2.19.2 Nebulizers
Nebulizers may be reimbursed for purchase only, and that purchase is limited to 1 every 5 years. Providers must use procedure code E0570 when billing for the purchase of the nebulizer.

Medications for use with the nebulizer will not be reimbursed to a DME company. These medications may be considered under the Vendor Drug Program.

Refer to: Appendix B: Vendor Drug Program (Vol. 1, General Information) for more information about VDP.

2.2.19.2.1 Prior Authorization
Nebulizers do not require prior authorization for the diagnoses listed below. Other diagnoses require prior authorization and may be considered based on review of documentation by HHSC or its designee.

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>1363 27700 27701 27702 27703 27709 46611 46619 4801 4803</td>
</tr>
<tr>
<td>48242 486 48801 48802 48811 48812 4910 4911 49120 49121</td>
</tr>
<tr>
<td>49122 4918 4919 4920 4928 49300 49301 49302 49310 49311</td>
</tr>
<tr>
<td>49312 49320 49321 49322 49381 49382 49390 49391 49392 4940</td>

</tr>
<tr>
<td>4959 496 5070 5071 5078 5533 7707</td>
</tr>
</tbody>
</table>

The following nebulizer supplies may be billed with the diagnosis codes listed above:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>A4617 A7003 A7004 A7005 A7006 A7007 A7011 A7013 A7015 A7018</td>
</tr>
</tbody>
</table>
Ultrasonic nebulizers do not require prior authorization for diagnoses codes listed with documentation for failure of standard therapy. Providers must use procedure code E0574 or E0575 when billing for the purchase of the ultrasonic nebulizer. The ultrasonic nebulizer may be reimbursed only for diagnosis codes 1363, 27700, 27701, 27702, 27703, and 27709. The ultrasonic nebulizer requires prior authorization for all other diagnoses.

Providers must use procedure code A7009, A7014, or A7016 when billing supplies with an ultrasonic nebulizer.

### 2.2.19.3 Vaporizers

Vaporizers may be reimbursed for purchase only, and that purchase is limited to 1 every 5 years.

Providers must use procedure code E0605 when billing for vaporizers. Vaporizer use is associated with a risk of bronchospasm, infection, edema of the airway, and client, caregiver, parent or guardian exposure to airborne microorganisms.

#### 2.2.19.3.1 Prior Authorization

Vaporizers require prior authorization for limited indications that includes one of the following:

- Laryngotracheobronchitis
- Subglotic edema
- Post-extubation edema
- Postoperative management of the upper airway
- The need for sputum specimens or mobilization of secretions
- The presence of a bypass upper airway

Prior authorization for use beyond the clinical indications listed above are only considered with clinical documentation that the benefit of the use of the device outweighs the noted risks.

### 2.2.19.4 Humidification Units

Humidification units for nonmechanically ventilated clients may be purchased when a purchase is determined to be more cost effective than leasing the device with supplies. Providers must use procedure code E1399 when billing for the purchase of humidification units for nonmechanically ventilated clients. Procedure code E1399 will be reimbursed with a maximum fee of $1,230.00 or MSRP less 18 percent, which ever is the lesser cost. Supplies to be used with client owned humidification units may be considered for purchase and must be billed with the appropriate HCPCS code for each item requested. Documentation of medical necessity must be included with submission of the request.

### 2.2.19.5 Secretion Clearance Devices

#### 2.2.19.5.1 Incentive Spirometer

Incentive spirometers, including electronic spirometers, are a benefit of Home Health Services.

#### 2.2.19.5.2 Intermittent Positive-Pressure Breathing (IPPB) Devices

Rental of the IPPB device includes all supplies, such as humidification and tubing.

Purchase of the IPPB device is not a benefit.

#### 2.2.19.5.3 Mucous Clearance Valve

Providers must use procedure code S8185 when billing for the purchase of a mucous clearance valve.
The mucous clearance valve may be reimbursed for the following diagnosis codes only:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>27700</td>
</tr>
<tr>
<td>4918</td>
</tr>
<tr>
<td>49320</td>
</tr>
<tr>
<td>4950</td>
</tr>
<tr>
<td>496</td>
</tr>
</tbody>
</table>

Other diagnoses may be considered based on review of documentation by HHSC or its designee. Hypertonic saline 7 percent for inhalation therapy is a benefit of Texas Medicaid for clients with a diagnosis of cystic fibrosis. Hypertonic saline 7 percent for inhalation therapy may be billed using procedure code T1999 and requires prior authorization. To request prior authorization, providers must submit either the MSRP, the provider’s invoice cost, or the AWP. Providers may be reimbursed 82 percent of the MSRP or 85 percent of the AWP per ampoule or the provider’s invoice cost if the MSRP is not available.

2.2.19.5.4 Prior Authorization

**IPPB Devices**
The rental of IPPB, procedure code E0500, requires prior authorization and may be given with documentation of ineffective response with other modalities such as treatment with a cough assist device for four months or longer.

The IPPB device may be prior authorized for the following diagnoses:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>27700</td>
</tr>
<tr>
<td>35922</td>
</tr>
</tbody>
</table>

Other diagnoses may be considered based on review of documentation by HHSC or its designee.

**Mucous Clearance Valve**
The mucous clearance valve requires prior authorization and may be reimbursed for purchase only, and that purchase is limited to one every five years.

2.2.19.6 Electrical Percussor

The purchase of an electrical percussor is limited to one every 5 years and a rental is limited to once per month for a maximum of four months per lifetime. Providers must use procedure code E0480 when billing for the percussor.

2.2.19.6.1 Prior Authorization

The electrical percussor device requires prior authorization and may be reimbursed for rental or purchase depending on the physician’s predicted length of treatment. In addition to the completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form, a description of all previous courses of therapy and why they did not adequately assist the client in airway mucus clearance is required to obtain prior authorization for an electrical percussor.

2.2.19.7 Chest Physiotherapy Devices

Either a cough-stimulating device (cofflator) or the High-Frequency Chest Wall Compression System (HFCWCS) generator with vest may be prior authorized. These systems are not prior authorized simultaneously.
Chest physiotherapy to promote bronchial drainage that is performed by a therapist or any other healthcare professional, including a private duty nurse, will not be prior authorized during the period of time that the HFCWCS or cough-stimulating device is prior authorized.

Intrapulmonary percussive ventilation (IPV) is not a benefit of Texas Medicaid.

2.2.19.7.1 HFCWCS

An HFCWCS is limited to the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>27700</td>
</tr>
</tbody>
</table>

| 3432 | 3433 | 3434 | 3438 | 3439 | 34489 | 3591 | 515 |

Other diagnoses may be considered based on review of documentation by HHSC or its designee.

A HFCWCS may be reimbursed only when it is demonstrated that other mechanical devices or chest physiotherapy by a client, parent, guardian, or caregiver have been ineffective.

Rental cost of the HFCWCS applies toward the purchase price. A HFCWCS generator purchase and vest purchase may be reimbursed only once per lifetime, due to the lifetime warranty provided by the manufacturer. Requests for a vest replacement due to growth may be considered with appropriate documentation.

Prior authorization for the rental or purchase of equipment in this section requires a Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form and the Medicaid Certificate of Medical Necessity for Chest Physiotherapy Device Initial Request or Extended Request form. These signed and dated forms must be maintained by the provider and prescribing physician in the client's medical record.

Providers must use procedure code E0483 when billing for HFCWCS for either a rental or purchase.

2.2.19.7.2 Cough-Stimulating Device (Cofflator)

Providers must use procedure code E0482 when requesting rental of a cofflator.

2.2.19.7.3 Prior Authorization

**HFCWCS**

The HFCWCS requires prior authorization. An initial three-month rental may be authorized for the HFCWC. If the HFCWC is documented to be effective, at the end of the initial three-month rental, purchase of the system may be prior authorized. If at the end of the initial three-month rental a determination of purchase cannot be made, an additional three month rental may be given.

**Cough-Stimulating Device (Cofflator)**

The cofflator requires prior authorization and may be reimbursed for monthly rental only and includes all supplies. The cofflator may be prior authorized for those clients with chronic pulmonary disease or neuromuscular disorders that affect the respiratory musculature.

2.2.19.7.4 Documentation Requirements

**HFCWCS**

To obtain prior authorization for the initial three-month rental of a HFCWCS generator and vest, all of the following information must be provided:

- A description of all previous therapy courses that have been tried and why these treatments did not adequately assist the client in airway mucus clearance. This must include the information that the client has used electrical percussor therapy for a minimum of four months before the request and that this therapy has been ineffective.
• A physician’s statement of a trial of the HFCWCS in a clinic, hospital, or the home setting
documenting the effectiveness and tolerance of the system, including a statement that the client has
not exacerbated any gastrointestinal manifestations, nor caused aspiration and exacerbation of
pulmonary manifestations, nor an exacerbation of seizure activity secondary to the use of the
system.
• Diagnosis and background history including complications, medications used, history of any IV
antibiotic therapy with dosage, frequency and duration, history of recent hospitalizations or history
of school, work, or extracurricular activity absences due to diagnosis-related complications.
• Any recent illnesses or complications.
• Medical diagnosis or other limitations preventing the client or caregiver from doing chest
physiotherapy.

Prior authorization for an extension of another three months rental may be considered with the above
documentation. Requests for prior authorization of the purchase of a HFCWCS generator may be
considered based on the outcome of a six-month rental period and the following required documen-
tation. Documentation of vest tolerance and positive outcomes/results of therapy, including:
• Physician’s description or assessment of the effectiveness such as decreased medication use, shorter
hospital length of stay, decreased hospitalizations, and fewer school, work, or extracurricular
activity absences due to diagnosis related complications.
• The frequency and compliance graphs for the six-month period showing use of the system at least
50 percent of the maximum time prescribed by the physician for each day.
• Respiratory status, including any recent hospitalization.
• A statement that the client has not exacerbated any gastrointestinal manifestations, nor caused
aspiration and exacerbation of pulmonary manifestations, nor an exacerbation of seizure activity
secondary to the use of the system.

Cough-Stimulating Device (Cofflator)
The cofflator may be approved initially for a three-month rental period based on the following required
documentation:
• Diagnosis and background history including recent illnesses, complications, medications used,
history of recent hospitalizations, results of pulmonary function studies if applicable, or history of
school, work, or extracurricular activity absences due to diagnosis related complications.
• Medical reasons why the client, parent, or guardian/caregiver cannot do chest physiotherapy.

Requests for prior authorization of an extension must include documentation by the physician familiar
with the client that the client is compliant with the use of the equipment and that the treatment is
effective.

2.2.19.8 Positive Airway Pressure System Devices
In addition to the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical
Supplies Physician Order Form, a Medicaid Certificate of Medical Necessity for CPAP/BiPAP or
Oxygen Therapy Form must be signed and dated by the physician familiar with the client and submitted
by the provider for all positive pressure system devices. The original signed copy must be kept in the
medical record.

2.2.19.8.1 Prior Authorization

Heated and Non-heated Humidification For Use With Positive Airway Pressure System
Humidification devices require prior authorization. Documentation of medical necessity including the
diagnosis and expected outcome must be submitted with the request for prior authorization.
2.2.19.9 Continuous Positive Airway Pressure (CPAP) System

Purchase is limited to a maximum of once every five years with medical necessity. Reimbursement for rental is limited to once per month and includes all supplies and accessories.

Headgear, tubing, and filters are considered part of the rental and will not be reimbursed separately.

Providers must use procedure code E0601 when requesting prior authorization for the rental or purchase of the CPAP system.

2.2.19.9.1 Adult CPAP (19 years of age and older)

CPAP may be approved initially for three months for adults if one of the following conditions are met:

- A Sleep Study Respiratory Disturbance Index (RDI) or Apnea/Hypopnea Index (AHI) greater than or equal to 15 per hour
- A Sleep Study RDI or AHI greater than 5 per hour and at least one of the following:
  - Excessive daytime sleepiness (documented by either Epworth greater than 10 or multiple sleep latency test (MSLT) less than 6
  - Documented symptoms of impaired cognition, mood disorders, or insomnia
  - Documented hypertension (systolic blood pressure greater than 140 mm Hg or diastolic blood pressure greater than 90 mm Hg)
  - Documented ischemic heart disease
  - Documented history of stroke
  - Greater than 20 episodes of oxygen desaturation less than 85 percent during a full night sleep study
  - Any one episode of oxygen desaturation less than 70 percent

2.2.19.9.2 Pediatric CPAP Criteria

One of the following AHI or oxygen saturation levels may be used for clients who are 18 years of age and younger:

- Polysomnography documentation AHI greater than 1
- An oxygen saturation less than 92 percent, taken upon exertion breathing room air

2.2.19.9.3 Prior Authorization

The CPAP system requires prior authorization and may be prior authorized for rental or purchase depending on the physician’s predicted length of treatment. Headgear, tubing, and filters used with patient owned positive airway pressure devices do not require prior authorization. Humidifiers may be prior authorized when used with a CPAP with documentation of medical necessity. Clients who have a current prior authorization for a CPAP/BiPAP S may continue to rent these items until the prior authorization period expires. After the current prior authorization period expires, then the criteria in the following paragraph applies to any further prior authorizations of CPAP/BiPAP. Providers must supply a new CPAP/BiPAP to clients at the beginning of the new prior authorization period.

The CPAP system may be approved initially for a three-month rental period based on documentation supporting the medical necessity and appropriateness of the device.

CPAP Prior Authorization Renewal

Prior authorization for purchase after the initial three-month rental period may be granted if the client is continuing to use the equipment at a minimum of four hours per night and symptoms are improved as documented by a physician familiar with the client. This documentation of compliance and effectiveness must be provided with a new completed Home Health Services (Title XIX) Durable Medical
Equipment (DME)/Medical Supplies Physician Order Form and a Medicaid Certificate of Medical Necessity for CPAP/BiPAP or Oxygen Therapy form. Rental of a CPAP/BiPAP system includes all supplies. CPAP/BiPAP S may be rented up to a maximum of 13 months. The equipment is considered purchased after 13 months rental.

2.2.19.10 Bi-level Positive Airway Pressure System (BiPAP S) Without Backup

Purchase is limited to a maximum of once every five years with medical necessity. Reimbursement for rental is limited to once per month and includes all supplies.

Providers must use procedure code E0470 when requesting prior authorization for the rental or purchase of the BiPAP S.

The BiPAP S may be approved initially for a three-month rental period based on documentation supporting the medical necessity and appropriateness of the device.

The BiPAP S may be approved initially for three months if the following conditions are met:

- The client has demonstrated the inability to tolerate the CPAP system.
- The duration of symptoms is at least six months.
- The Sleep Study RDI or AHI is greater than 15 per hour.
- The Sleep Study RDI or AHI greater than 10 per hour with the lowest oxygen saturation during study is less than 80 percent.
- Oxygen saturation is equal to or less than 92 percent for clients who are 20 years of age and younger.

Rental of CPAP/BiPAP S includes all supplies. CPAP/BiPAP S may be rented up to a maximum of 13 months. The equipment is considered purchased after 13 months rental.

2.2.19.1.1 Prior Authorization

The BiPAP S requires prior authorization and may be reimbursed for rental or purchase depending on the physician’s predicted length of treatment. The BiPAP S will not be prior authorized once a CPAP is purchased. Clients who have a current prior authorization for a CPAP/BiPAP S may continue to rent these items until the prior authorization period expires. After the current prior authorization period expires, then the criteria in the following paragraph applies to any further prior authorizations of CPAP/BiPAP. Providers must supply a new CPAP/BiPAP to clients at the time of purchase, if the item is purchased after a rental period.

Prior authorization for purchase after the initial three-month rental period may be granted if the client is continuing to use the equipment at a minimum of four hours per night and symptoms are improved as documented by a physician familiar with the client. This documentation of compliance and effectiveness must be provided with a new completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form and a Medicaid Certificate of Medical Necessity for CPAP/BiPAP or Oxygen Therapy form.

2.2.19.11 Bi-level Positive Airway Pressure System With Backup (BiPAP ST)

Purchase of a BiPAP ST is not a benefit. The BiPAP ST may be approved initially for a three-month rental period based on documentation supporting the medical necessity and appropriateness of the device. Providers must use either procedure code E0471 or E0472 when requesting prior authorization for the rental of the BiPAP ST.

BiPAP ST may be approved initially for three months if the following conditions are met:

- A diagnosis of central sleep apnea or a neuromuscular disease producing respiratory insufficiency, and
- Sleep study records central apnea greater than 5 RDI or AHI per hour, or
• For clients who are 18 years of age and younger with:
  • Central apneas greater than 20 seconds regardless of bradycardia
  • Desaturation or central apneas of less than 20 seconds with desaturation greater than 4 percent
  • Bradycardia
• The client has an arterial PO2 at or below 56 mm Hg, or an arterial oxygen saturation at or below 89 percent by transcutaneous oximetry associated with a diagnosis of neuromuscular respiratory insufficiency or failure (not COPD).

2.2.19.11.1 Prior Authorization
The rental of a BiPAP ST requires prior authorization and may be reimbursed only once per month. Continued prior authorization for rental after the initial three-month rental period may be granted if the client is continuing to use the equipment at a minimum four hours per night and has a transcutaneous saturation greater than 88 percent while using the equipment as documented by a physician familiar with the client or 92 percent or less for clients who are 20 years of age and younger. This documentation of compliance and effectiveness must be provided with the above documentation plus a new completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form and a Medicaid Certificate of Medical Necessity for CPAP/BiPAP or Oxygen Therapy form.

2.2.19.12 Home Mechanical Ventilation Equipment
Continuous use ventilators are used for 12 or more hours per day. Intermittent use ventilators are used for less than 12 hours per day. Mechanical ventilation is either provided by positive pressure ventilation (volume ventilator) or negative pressure ventilation (iron lung).

2.2.19.12.1 Prior Authorization
All ventilators require prior authorization. The completed, signed, and dated Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form must specify all ventilator settings and must be maintained by the DME provider and the prescribing physician in the client’s medical record.

2.2.19.13 Volume Ventilators
A volume ventilator may be operated in any of the following:

2.2.19.13.1 Ventilation Modes
• Control
• Assist control
• Synchronized intermittent mandatory ventilation (SIMV)
• CPAP

2.2.19.13.2 Breath Types
• Spontaneous (client triggered and cycled)
• Ventilator assisted (client or machine triggered or cycled) (e.g., pressure support or pressure-assisted)
• Mandatory (machine triggered or machine cycled)

The monthly ventilator rental includes all ventilator supplies, such as (but not limited to):
• Internal filters
• External filters
• Ventilator circuits with an exhalation valve
• High and low pressure alarms
• All humidification systems including supplies and solutions (i.e., sterile or distilled water)
• Compressors and supplies
• Tracheostomy filters/heat moisture exchangers
• Humidifiers

Note: Oxygen rental is not considered a ventilator supply and may be considered for separate prior authorization.

2.2.19.13.3 Prior Authorization
The volume ventilator may be prior authorized for rental only for those clients who have a tracheostomy. Providers must use procedure codes E0450, E0463, and E0464 when requesting prior authorization for the rental of a volume ventilator.

2.2.19.14 Negative Pressure Ventilators
The ventilator rental includes all component parts (pillow, mattress, gaskets, etc.). Providers must use procedure code E0460 when requesting prior authorization for the rental of a negative pressure ventilator.

Application devices may be purchased following the initial three-month rental period depending on the physician's predicted length of treatment and the client's compliance.

The purchase of a chest shell (cuirass) and chest wrap is limited to a maximum of 1 every 5 years. Reimbursement for rental is limited to once per month for a total of 4 months.

2.2.19.14.1 Prior Authorization
Negative pressure ventilators may be prior authorized for rental only for individuals who have the ability to speak, eat, drink, and do not have a tracheostomy. One of the following devices may be prior authorized with a portable negative pressure ventilator using procedure codes E0457 and E0459. These devices may be reimbursed for an initial three-month rental period. Application devices may be prior authorized for rental of an initial period of three months.

2.2.19.15 Ventilator Service Agreement
A ventilator service agreement may be reimbursed only once per month. Providers must use procedure code A9900 when requesting the ventilator service agreement. The ventilator service agreement contract may be considered for renewal every six months.

The provider must agree to include all of the following components in the ventilator service agreement:
• Ensure that all routine service procedures as outlined by the ventilator manufacturer are followed
• Provide all internal filters, external filters, and tracheostomy filters
• Provide all ventilator circuits (with the exhalation valve) as a part of the ventilator service agreement
• Provide a respiratory therapist and back-up ventilator on a 24-hour call basis
• Provide monthly home visits by a certified respiratory therapist to verify proper functioning of the ventilator system and the client’s status (and maintain documentation of monthly visits)
• Provide a substitute ventilator while the manufacturer’s recommended preventive maintenance is being performed on the client-owned ventilator
2.2.19.15.1 Prior Authorization
A ventilator service agreement may be prior authorized for a client who owns their own ventilator, when documentation supports medical necessity/appropriateness for continued ventilator usage. A ventilator service agreement requires prior authorization, which must include submission of a completed Title XIX form and the ventilator service agreement. The completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form must include all venti- lator settings.

2.2.19.15.2 Documentation Requirements
The completed, signed, and dated Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form and the Ventilator Service Agreement form must be maintained by the provider and the prescribing physician in the client’s medical record. The client-owned ventilator must be functional at the time of the request for prior authorization and documentation must include the make, model number, serial number, and the date of ventilator purchase and all ventilator settings. Requests for a continued six-month prior authorization of a ventilator service agreement must include the above documentation and the following:

- The recommended preventive maintenance schedule for the ventilator make and model
- Documentation of the monthly ventilator and client assessments
- Documentation of all service performed during the previous service agreement

2.2.19.16 Oxygen Therapy
Oxygen therapy home delivery systems may be reimbursed for rental only once per month.
Moisture exchangers for use with non-mechanically ventilated clients may be considered for reimbursement when billed with procedure code A9900.

Rental of oxygen equipment includes all supplies and refills.

One of the following clinical indications must be present when requesting approval for in-home oxygen therapy:

- Bronchopulmonary dysplasia and other respiratory diagnoses due to prematurity.
- Respiratory failure or insufficiency.
- Musculoskeletal weakness, such as that caused by Duchenne’s or spinal muscle atrophy.
- Diagnosis of cluster headaches.
- Hypoxemia-related symptoms and findings that might be expected to improve with oxygen therapy (examples of these symptoms and findings are pulmonary hypertension, recurring congestive heart failure due to chronic cor pulmonale, erythrocytosis, impairment of the cognitive process, nocturnal restlessness, and morning headache).
- Severe lung disease, such as COPD, diffuse interstitial lung disease, whether known or unknown etiology such as cystic fibrosis, bronchiectasis or widespread pulmonary neoplasm.

2.2.19.17 Oxygen Therapy Home Delivery System
Providers must use procedure code E1390 when billing for the rental of an oxygen concentrator system. The reimbursement payment for the rental of the oxygen concentrator system includes, but is not limited to, cannula or mask, tubing, and humidification. These items will not be reimbursed separately.

If other types of oxygen therapy home delivery systems are required, documentation of medical necessity exception must be provided.
Other types of delivery systems include:

- Compressed gas cylinder systems (nonportable tanks) (procedure code E0424)
- Liquid oxygen reservoir systems (procedure code E0439)

  **Note:** The reimbursement for compressed gas cylinder and liquid oxygen reservoir systems includes all of the supplies that are noted in the procedure code description.

- Portable oxygen systems—Portable oxygen therapy may be prior authorized if the medical necessity conditions are met and the medical documentation indicates that the client requires the use of oxygen in the home and would benefit from the use of a portable oxygen system when traveling outside the home environment.

- Portable oxygen systems are not considered a benefit of the Home Health Services Program for clients who qualify for oxygen solely based on blood gas studies obtained during sleep.

- Providers must use procedure codes E0431, E0434, and K0738 when billing for the portable oxygen systems. When procedure code K0738 is billed for the same dates of service as procedure code E0431, procedure code E0431 will be denied.

Rental of the portable oxygen system includes all supplies and refills. Refills for a client-owned system must be obtained from a DSHS-licensed vendor.

### 2.2.19.18 Prior Authorization

All oxygen therapy, supplies, and related equipment requires prior authorization. Humidifiers may not be prior authorized separately for rental for use with oxygen equipment. Multiple oxygen delivery systems (e.g., liquid or gas) will not be prior authorized concurrently. Supplies and refills may be prior authorized for those clients who own their own oxygen systems.

  **Note:** In addition to the completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form, a Medicaid Certificate of Medical Necessity for CPAP/BiPAP or Oxygen Therapy form must be completed, signed, and dated by the physician familiar with the client and submitted by the provider.

### 2.2.19.19 Documentation Requirements

Prior authorization of home oxygen therapy for the initial period of three months will be granted if the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form and the Medicaid Certificate of Medical Necessity for CPAP or BiPAP or Oxygen Therapy form is completed and all of the following conditions are met:

- Symptoms have a duration of at least three months (or less with special circumstances).
- For clients who are 20 years of age and younger, one of the following parameters must be used:
  - An oxygen saturation of 89 to 92 percent, taken at rest, breathing room air.
  - An oxygen saturation less than 92 percent with documentation of medical necessity provided by a physician familiar with the client.
  - An arterial PO2 at or below 56 mm Hg or an arterial oxygen saturation at or below 89 percent, taken at rest, breathing room air, or during sleep and associated with signs or symptoms reasonably attributed to hypoxemia.
- Hypoxemia associated with obstructive sleep apnea must be unresponsive to CPAP or BiPAP S therapy before oxygen therapy can be approved. In these cases, coverage is provided only for use of oxygen during sleep, and then only one type of delivery system will be considered a benefit under the Home Health Services Program.
• Portable oxygen systems are considered a benefit of the Home Health Services Program when the medical documentation indicates that the client requires the use of oxygen in the home and would benefit from the use of a portable oxygen system when traveling outside the home environment. Portable oxygen systems are not considered a benefit of the Home Health Services Program when traveling outside the home environment for clients who qualify for oxygen usage based solely on oxygen saturation levels during sleep.

• A client who demonstrates an arterial PO2 at or above 56 mm Hg, or an arterial oxygen saturation at or above 89 percent, during the day while at rest and who subsequently experiences a decreased arterial PO2 of 55 mm Hg or below, or decreased arterial oxygen saturation of 88 percent or below during exercise. In this case supplemental oxygen can be provided if there is evidence that the use of oxygen improves the hypoxemia that was demonstrated during exercise when the client was breathing room air.

In-home oxygen therapy can be approved for cluster headaches with the documentation of both the following clinical indications:

• Neurological evaluation with diagnosis
• Documented failed medication therapy

**Note:** Lab values are not indicated with this diagnosis

### 2.2.19.19.1 Oxygen Therapy Recertification

Prior authorization of oxygen therapy after an initial three-month rental period may be granted with the submission of a new completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form and a new Medicaid Certificate of Medical Necessity for CPAP/BiPAP or Oxygen Therapy form and the following:

• Documentation of continued need
• Documentation of client compliance by the physician familiar with the client

**Note:** The initial Medicaid Certificate of Medical Necessity for CPAP/BiPAP or Oxygen Therapy Form cannot be used for recertification purposes.

### 2.2.19.20 Tracheostomy Tubes

A tracheostomy tube may be reimbursed for purchase only and is limited to one per month. Add modifier TF when billing a tracheostomy with specialized functions. Add modifier TG when billing a custom made tracheostomy. The MSRP information and a physician statement addressing the reason the client cannot use a standard tracheostomy tube are required when requesting prior authorization.

Disposable tracheostomy inner cannula’s are considered a convenience item and are not a benefit.

#### 2.2.19.20.1 Prior Authorization

Prior authorization requests for tracheostomy tubes must provide sufficient information to support the determination of medical necessity for the requested item. Prior authorization for a tracheostomy tube will be considered with procedure codes A7520, A7521, or A7522. Providers must use procedure code A4623 when requesting prior authorization for the tracheostomy tube inner cannula. An inner cannula is limited to one per month and will not be prior authorized when a custom manufactured tracheostomy tube (procedure code A7520-TG or A7521-TG) is requested.

### 2.2.19.21 Pulse Oximetry

Pulse oximeters are not a benefit of Title XIX Home Health Services. Pulse oximeters are a benefit of Texas Medicaid through CCP for clients who are birth through 20 years of age.

**Refer to:** Subsection 2.5.6, “Croup Tent/Pulse Oximeter” in the *Children’s Services Handbook* *(Vol. 2, Provider Handbooks)* for more information on pulse oximeters.
2.2.19.21.1 Prior Authorization

Pulse oximeter sensor probes (procedure code A4606) for client owned equipment are limited to four per month without prior authorization. If additional sensor probes are needed, prior authorization must be requested through Home Health Services with documentation supporting medical necessity.

2.2.20 Special Needs Car Seats and Travel Restraints

Special needs car seats and travel restraints are not services available under Home Health Services.

Refer to: Subsection 2.5.13, “Special Needs Car Seats and Travel Restraints” in *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for details about coverage through CCP.
2.2.21 Subcutaneous Injection Ports

A subcutaneous injection port is a sterile medication delivery device through which physician-prescribed medications can be injected directly into the subcutaneous tissue using a standard syringe and needle, an injection pen, or other manual injection device. The device can be used for multiple subcutaneous injections for a period of up to 72 hours, thereby avoiding repeated needle punctures of the skin. The device cannot be used with an injection pump.

A subcutaneous injection port, such as the I-Port or Insuflon, is a benefit of Texas Medicaid as a Title XIX Home Health service with prior authorization. Claims for a subcutaneous injection port must be submitted with procedure code A4211 and modifier U4.

Texas Medicaid may reimburse the device for clients who require multiple daily injections of a physician-prescribed medication and who meet the medical necessity criteria.

The subcutaneous injection port is not a benefit of Texas Medicaid as an item of convenience or for clients who are already receiving the medication through an ambulatory infusion pump. The device is considered an item of convenience if the client does not meet the criteria for medical necessity.

2.2.21.1 Prior Authorization

Prior authorization is required for a subcutaneous injection port. Initial prior authorizations will be issued for a trial period of up to 3 months. Prior authorizations that are issued after the successful completion of the initial trial period may be issued for a period of up to 6 months. Prior authorizations for subcutaneous injection ports are limited to a quantity of 10 individual ports per month. Additional ports will be considered for prior authorization with documentation of medical necessity.

2.2.21.2 Documentation Requirements

The initial request for prior authorization must include documentation that indicates the client meets the following criteria for medical necessity:

- The client has a medical condition that requires multiple (i.e., 2 or more) subcutaneous, self-administered injections on a daily basis and has a current prescription for the injectable medication. Documentation must indicate the specific medical condition that is being treated, the name of the injectable medication, and the dosage and frequency of the injections.

  **Note:** “Self-administered” includes those injections administered by the client through a subcutaneous injection or by the caregiver to the client through a subcutaneous injection.

- The client or the caregiver has been unsuccessful with the self-administration of injections using a standard needle and syringe because the client demonstrates trypanophobia (i.e., severe needle phobia), as evidenced by documented physical or psychological symptoms. Documented symptoms may include, but are not limited to, the following:

<table>
<thead>
<tr>
<th>Condition</th>
<th>Possible Exhibited Symptoms</th>
</tr>
</thead>
<tbody>
<tr>
<td>Vaso-vagal trypanophobia</td>
<td>Physical symptoms such as changes in blood pressure, syncope, sweating, nausea, pallor, and tinnitus</td>
</tr>
<tr>

<td>Signs and symptoms such as combativeness, elevated heart rate, high blood pressure, and violent resistance to procedures involving needles or injections</td>
</tr>
</tbody>
</table>
The prescribing physician must include with the prior authorization request a written statement of medical necessity that identifies the client as an appropriate candidate for the subcutaneous injection port device. The physician’s statement or medical record documentation that is submitted with the prior authorization request must indicate the following:

- The client or caregiver has received instruction during an office visit on the proper placement and use of the device, with successful return demonstration. (Prior authorization requests for skilled nursing visits for the sole purpose of client instruction on the use of the subcutaneous injection port device will not be approved. Necessary instruction must be performed as part of the office visit with the prescribing physician.)
- The client has no known allergies or sensitivities to adhesives, silicone, or similar materials.
- The client has no skin infection at potential injection sites.
- The client’s most recent lab results related to the medical condition requiring treatment with daily subcutaneous injections must also be submitted with the prior authorization request. Lab results may include, but are not limited to, hemoglobin A1c (HbA1c) levels for clients with insulin dependent diabetes mellitus (IDDM) and partial thromboplastin time (PTT) for clients who are receiving anticoagulant therapy.

Requests for the renewal of the prior authorization after the initial trial period has ended must include documentation of the following:

- Ongoing signs and symptoms associated with the client’s trypanophobia.
- Improved compliance with the physician-prescribed injection regimen.
- Successful use of the device with no persistent pattern of the client’s dislodging the device during the initial trial period.
- Results of relevant lab tests performed upon completion of the initial trial period, including, but not limited to, HbA1c levels for clients with IDDM and PTT for clients who are receiving anticoagulant therapy.

**Note:** For clients with IDDM, if the HbA1c level has not declined with use of the subcutaneous injection port, additional documentation must be submitted by the physician who documents the clinical determination about the lack of significant improvement in the HbA1c level. The renewal of the prior authorization will not be approved without this information.

### 2.2.22 Total Parenteral Nutrition (TPN) Solutions

In-home TPN is a benefit for eligible clients who require long-term nutritional support. “Long-term nutritional support” refers to treatment lasting 30 days or longer.

Conditions that may require TPN include, but are not limited to the following:

- Bowel disease or disorder
- Cancer
- AIDS
- Coma
- Burns
- Peritonitis

**Note:** Conditions or a duration of need not listed above may be considered by HHSC or its designee with documentation of medical necessity.

TPN services are not a benefit when oral or enteral intake will maintain adequate nutrition.
Parenteral nutrition solution services may be reimbursed using the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>B4164 B4168 B4172 B4176 B4178 B4180 B4185 B4189 B4193 B4197</td>
</tr>
<tr>
<td>B4199 B4216 B5000 B5100 B5200</td>
</tr>
</tbody>
</table>

Parenteral nutrition supplies may be reimbursed using the following procedure codes: B4220, B4222, B4224, and B9999.

Parenteral nutrition infusion pumps may be reimbursed using procedure codes B9004 and B9006.

A backpack or carrying case for a portable parenteral nutrition infusion pump may be a benefit of Home Health Services, when medically necessary and prior authorized, using procedure code B9999.

In-home TPN for clients who are 20 years of age and younger that do not meet the criteria through Title XIX Home Health Services may be considered through CCP. No more than a one-week supply of solutions and additives may be reimbursed if the solutions and additives are shipped and not used because of the client’s loss of eligibility, change in treatment, or inpatient hospitalization. Any days that the client is an inpatient in a hospital or other medical facility or institution must be excluded from the daily billing. Payment for partial months will be prorated based upon the actual days of administration.

The administration of intravenous fluids and electrolytes cannot be billed as in-home TPN.

Claims for TPN must contain the 9-character prior authorization number in Block 23. Providers must consult with their vendor for the location of this field in the electronic claims format. The prescribing physician name and provider identifier must be in Block 17 and 17a or in the appropriate field of the provider's electronic software.

### 2.2.22.1 Prior Authorization

TPN solutions, lipids, supply kits, and infusion pumps must be prior authorized.

### 2.2.22.2 Documentation Requirements

Requests for prior authorization must include the following information:

- Medical condition necessitating the need for TPN and long-term nutritional support.
- Documentation of any trials with oral or enteral feedings.
- Percent of daily nutritional needs from TPN.
- A copy of the TPN formula or prescription, including amino acids and lipids, signed and dated by the physician.
- A copy of the most recent laboratory results (to include potassium, calcium, liver function studies and albumin).

The requesting provider may be asked for additional information to clarify or complete a request for TPN services.

Prior authorization requests for a portable parenteral nutrition infusion pump (procedure code B9004) must also include documentation of medical necessity demonstrating that:

- The client requires continuous feedings
- Feeding intervals exceed the time that the client must be away from home to:
  - Attend school or work.
  - Participate in extensive, physician-ordered outpatient therapies.
  - Attend frequent, multiple medical appointments.
Prior authorization for parenteral nutrition infusion pumps will be limited to one portable pump (procedure code B9004) or one stationary pump (procedure code B9006) at any one time, unless medical necessity for two infusion pumps is established. Supporting documentation for the additional pump must be included with the prior authorization request.

Prior authorization requests for miscellaneous procedure code B9999 must include the following:

- A detailed description of the requested item or supply.
- Documentation supporting the medical necessity for the requested item or supply.

Requests for a carrying case or backpack for the portable infusion pump will be considered for prior authorization under miscellaneous code B9999, for clients who meet the medical necessity criteria for the portable pump as outlined above. The following additional criteria apply:

- The client is ambulatory, or uses a wheelchair which will not support the use of a portable pump by other means, such as an intravenous (IV) pole.
- The portable enteral feeding pump is client-owned.

Renewal of the prior authorization will be considered based on medical necessity.

Refer to: Form DM.4, “Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form” in this handbook.

2.2.23 Wound Care Supplies or Systems

Wound care supplies and wound care systems are a benefit through Home Health Services when provided to clients in the home setting. Wound care supplies and wound care systems are designed to assist in the healing of wounds in conjunction with an individualized wound care therapy regimen prescribed by a physician.

Wounds are recognized as acute or chronic:

- Acute wounds are defined as wounds taking less than up to 30 days for complete healing.
- Chronic wounds are defined as wounds taking more than 30 days for complete healing.

Skin ulcers represent the majority of chronic wounds. Skin ulcers include but are not limited to:

- Venous ulcers: are also known as venous insufficiency ulcers, stasis ulcers, or varicose veins, and are due to sustained venous hypertension, which results from chronic venous insufficiency or an impaired muscle pump.
- Arterial insufficiency ulcers: are due to insufficient arterial flow resulting in ischemia and eventual necrosis. Atherosclerosis is the most common cause of arterial ulcers. Other arterial vascular diseases include vasospastic disease and vasculitis. Arterial ulcers are frequently found at the most distal point of arterial perfusion. No drainage is apparent unless the ulcer is infected.
- Pressure ulcers: are any skin wound caused by unrelieved pressure resulting in damage to various sections of the skin structure that worsen over time.
- Diabetic ulcers: are skin lesions associated with clients with Type 1 and Type 2 diabetes mellitus. The majority of all amputations in diabetic clients are preceded by an infected ulcer.

Wound care includes:

- Optimization of nutritional status
- Debridement by any means to remove devitalized tissue
- Maintenance of a clean, moist bed of granulation tissue
- Any necessary treatment to resolve any infection that may be present
Based on the specific type of wound, wound care may include:

- Use of a compression system for clients with a venous ulcer
- Establishment of adequate circulation for a client with an arterial ulcer
- Frequent repositioning of a client with a pressure ulcer
- Off-loading pressure and good glucose control for a client with a diabetic ulcer

Measurable signs of improved healing include:

- A decrease in wound size, either in surface area or volume
- A decrease in amount of exudate
- A decrease in amount of necrotic tissue

First line wound care therapy may include the following:

- Cleansing, antibiotics, and pressure off-loading
- Debridement
- Dressings
- Compression

Second line wound care therapy may include:

- Negative pressure wound therapy (NPWT)
- Irrigation, including pulsatile jet irrigation

2.2.23.1 **Wound Care Supplies**

Medically necessary wound care supplies are designed to assist in wound healing, and include, but are not limited to: dressings, cleansers, enzymatic debriders, and fillers.

Wound dressings include:

- Absorptive dressings
- Alginates
- Antimicrobials
- Collagen dressings
- Compression dressings and wraps
- Composite dressings
- Contact layers
- Foam dressings
- Hydrocolloid dressings
- Hydrofiber dressings
- Hydrogel dressings, including sheets and impregnated gauze
- Odor absorbing dressings
- Transparent films
2.2.23.2 Wound Care System

A medically necessary wound care system includes a medical device and its component supplies, and is designed to assist in healing of wounds unresponsive to conventional wound care therapy.

A wound care system may be considered for reimbursement for clients with a Stage III or IV chronic, non-healing wound (such as a pressure, arterial or venous stasis, diabetic ulcer), post-surgical wound dehiscence, non-adhering skin grafts, or surgical flaps required for covering such wounds.

Types of wound care systems include the following:

- NPWT system
- Pulsatile jet irrigation wound care system

2.2.23.2.1 NPWT System

NPWT systems and associated supplies (procedure codes E2402 and A6550) are benefits of Home Health Services.

An NPWT system provides and maintains a moist wound environment, and protects the wound during the healing process by sealing it with an adhesive drape and applying continuous or intermittent suction.

An NPWT system consists of a cell foam dressing that is placed in the wound bed, a suction catheter tip, an adhesive drape to cover the wound, suction tubing, and a computerized vacuum pump. An NPWT system uses continuous or intermittent sub-atmospheric pressure to evacuate the excess interstitial fluid and remove growth factor inhibitors. The removal of inhibitors allows the growth factor to stimulate cell proliferation and migration. Removal of excess fluid also helps decrease periwound induration.

Dressing changes associated with an NPWT system are performed every one to three days depending on the amount of exudate produced by the wound. The computerized vacuum pump is rented on a monthly basis. A licensed health-care provider with appropriate training is required to perform an NPWT system dressing change.

2.2.23.2.2 Pulsatile Jet Irrigation Wound Care System

Pulsatile jet irrigation wound care systems (procedure code E1399) are a benefit of Home Health Services for rental only.

A pulsatile jet irrigation wound care system uses antibiotics or water under pressure to irrigate the wound and uses suction to remove the irrigation fluid and debris.

A pulsatile jet irrigation wound care system consists of a pistol-style hand piece with a trigger to control the pulsatile jet. A suction pump is used to remove the fluid. The wound is then dressed using standard wound care supplies.

Dressing changes associated with a pulsatile jet irrigation wound care system are performed every one to three days depending on the amount of exudate produced by the wound. A licensed health-care provider with appropriate training is required to perform a pulsatile jet irrigation wound care system dressing change.

2.2.23.3 Noncovered Services

The following services are not a benefit of Texas Medicaid:

- Wound care supplies for use in the office or outpatient setting. Supplies provided in an outpatient setting, such as a wound care clinic, are part of the facility fee and are not separately reimbursed.
- Equipment and supplies for stand-by use.
- Portable hyperbaric oxygen chambers (procedure code A4575) that are placed directly over the wound and provide higher concentrations of oxygen to the damaged tissue.
- Metabolically active skin equivalents or skin equivalents used in wound care, in the home setting.
• Non-contact normothermic wound therapy (NNWT) systems and associated supplies (procedure codes A6000, E0231, and E0232).

• Non-sterile gloves (procedure code A4927), when the gloves are for use by a health care provider, such as a RN, LVN, or attendant, in the home setting.

• Rental or purchase of an electrical stimulation or electromagnetic wound treatment device (procedure code E0769), for use by the client or caregiver in the home setting.

2.2.23.4 Prior Authorization

Prior authorization is required for all wound care supplies and wound care systems addressed below with the exception of procedure code A4455.

**Note:** THSteps-eligible clients who qualify for medically necessary services beyond the limits of this home health benefit will receive those services through CCP.

The requesting provider may be asked for additional information to clarify or complete a prior authorization request for the wound care supplies or wound care system.

Retrospective review may be performed to ensure documentation supports the medical necessity of the requested wound care supplies or system.

Recertification will be considered based on medical necessity, with a new prior authorization request.

Providers should only bill for a one month supply at a time, even though prior authorization may be granted for up to six months.

2.2.23.4.1 Wound Care Supplies

Nonsterile/clean wound care supplies may be considered for prior authorization for use in the home setting when documentation supports medical necessity.

**Note:** The home setting is considered a clean environment, not a sterile environment.

Sterile wound care supplies, other than those required with a wound care system, may be considered for prior authorization for use in the home setting when documentation supports medical necessity and justifies that nonsterile/clean wound care supplies will not meet the client’s needs.

**Note:** Established tracheostomies or gastrostomies/buttons are not considered wounds, therefore dressing supplies will not be considered for prior authorization. Dressing supplies for tracheostomies or gastrostomies may be considered for prior authorization with documentation of medical necessity.

Nonsterile gloves may be considered for prior authorization when a family member or friend is performing the medical wound care.

2.2.23.4.2 Wound Care System

Prior authorization for a wound care system may be considered for reimbursement for an initial 30-day period.

Medically necessary prior authorized recertifications may be considered for additional 30-day periods at a time, up to a maximum of four, when documentation supports continued significant improvement in wound healing. Wound care systems may be considered for reimbursement beyond four months of treatment on a case-by-case basis after review of the medical necessity documentation by the medical director or designee.

Wound care system supplies are limited to a maximum of:

• 15 dressing kits or supplies per wound per month unless documentation supports that the wound size requires more than one dressing kit for each dressing change, or if the physician has ordered more frequent dressing changes.
• 10 disposable canisters (procedure code A7000) per month, unless documentation provided indicates medical necessity for additional canisters.

  **Note:** When documentation supports evidence of high-volume drainage, defined as greater than 90 milliliters (ml) per day, a stationary pump with the largest capacity canister must be used. Extra canisters related to the equipment failure are not considered medically necessary.

Wound care systems and related supplies will not be prior authorized nor considered for reimbursement when:

• The client has one of the following contraindications:
  • A fistula to the body
  • Wound ischemia
  • Gangrene
  • Skin cancer in the wound margins
  • Presence of necrotic tissue, including bone (this does not apply to the pulsatile jet irrigation wound care system)
  • Osteomyelitis (unless it is being treated; the treatment must be identified)
• In the judgment of the treating physician, adequate wound healing has occurred and the wound care system is no longer required.
• No measurable wound healing has occurred over the previous 30-day period.
• A wound care system was used for four months or more in the inpatient setting prior to discharge, except when documentation supports continued significant improvement in wound healing.
• The wound care equipment and supplies are no longer being used by the client.

### 2.2.23.5 Documentation Requirements

#### 2.2.23.5.1 Wound Care Supplies

To request prior authorization for wound care supplies, the following documentation must be provided with the completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form:

• Accurate diagnostic information pertaining to the underlying diagnosis/condition as well as any other medical diagnoses/conditions, to include the client's overall health status
• Appropriate medical history related to the current wound including:
  • Wound measurements to include length, width and depth, any tunneling or undermining
  • Wound color, drainage (type and amount), and odor, if present
  • The prescribed wound care regimen, to include frequency, duration and supplies needed
  • Treatment for infection, if present
  • All previous wound care therapy regimens, if appropriate
• The client's use of a pressure reducing support surface, when appropriate
• Identification of the client or caregiver who will be instructed how to perform the wound care, and will be responsible for the wound care
2.2.23.5.2 Wound Care Systems

To request prior authorization for a wound care system, the documentation listed below must be provided on the Statement for Initial Wound Therapy System In-Home Use Form for an initial request or on the Statement for Recertification of Wound Therapy System In-Home Use Form for a recertification request, in addition to the Title XIX form.

The prescribing physician and provider must submit the appropriate initial or recertification form, which must also be maintained in the client's medical record.

The following documentation must be submitted with the prior authorization request, and must be maintained in the client's medical record:

- Accurate diagnostic information pertaining to the underlying diagnosis/condition and all other medical diagnoses/conditions, including the client's overall health status.
- The client's use of a pressure reducing support surface, when appropriate.
- Albumin level within the last 30 days:
  - If the albumin level is below 3.0, documentation must show that a nutritional supplement has been prescribed, and that the client is compliant with its use.
- Hemoglobin A1c obtained within last 30 days, if the client has a diagnosis of diabetes mellitus.
- Appropriate medical history related to the current wound, including:
  - Documentation that the wound is free of necrotic tissue and infection, or if infection is present, that it is being treated with antibiotics.
  - Wound measurements to include length, width, and depth, any tunneling or undermining.
  - Wound characteristics, including color, wound drainage (type and amount), and odor if present.
  - The prescribed wound care regimen, to include frequency, duration and supplies needed.
- Identification of the caregiver who agrees to be available to assist the client during this time and agreement of this person not to operate the negative pressure or the pulsatile jet irrigation system if used.
- Documentation that a licensed health-care provider who has received the appropriate training in the use of the wound care system is performing the wound care when a negative pressure or pulsatile jet irrigation wound care system is used. All requirements for skilled nursing care must be met.
- For recertification, documentation that the wound is improving.

### 2.2.24 Limitations, Exclusions

Payment cannot be made for any service, supply or equipment for which FFP is not available. For clients who are 20 years of age and younger and who are eligible to receive THSteps services, refer to subsection 2.2, “CCP Overview” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* to find which of these items are a benefit for CCP.

Home Health Services does not cover the following:

- Adaptive strollers, travel seats, push chairs, and car seats
- Administration of non-FDA-approved medications/treatments or the supplies and equipment used for administration
- Any services, equipment, or supplies furnished to a client who is a resident of a public institution or a client in a hospital, SN facility, or intermediate care facility
- Any services or supplies furnished to a client before the effective date of Medicaid eligibility as certified by HHSC or after the date of termination of Medicaid eligibility
- Any services or supplies furnished without prior approval by TMHP, except as listed
- Any supplies or equipment used in a physician’s office, or inserted by a physician (e.g., low profile gastrostomy tube)
- Apnea monitors

• Shipping, freight, delivery travel time
• Structural changes to homes, domiciles, or other living arrangements
• Vehicle mechanical or structural modifications, such as wheelchair lifts

Refer to: Subsection 1.7, “Texas Medicaid Limitations and Exclusions” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).

2.2.25 Procedure Codes That Do Not Require Prior Authorization

The procedure codes listed in the following table do not require prior authorization for clients who are receiving services under Home Health Services. Although prior authorization is not required, providers must retain a completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form for these clients. For medical supplies not requiring prior authorization, a completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form may be valid for a maximum of six months unless the physician indicates the duration of need is less. If the physician indicates the duration of need is less than six months, then a new Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form is required at the end of the duration of need. It is expected that reasonable, medically necessary amounts will be provided.
The use of these services is subject to retrospective review. This is not an all inclusive list.

* Prior authorization is required for certain diagnoses and if limitations are exceeded. Refer to Subsection 2.2.19.2, “Nebulizers” in this handbook.

** Prior authorization is required for some procedure codes if the maximum limitation is exceeded. Refer to Subsection 2.2.12.9, “Incontinence Procedure Codes with Limitations” in this handbook.

### 2.3 Other/Special Provisions

#### 2.3.1 Medicaid Relationship to Medicare

**2.3.1.1 Possible Medicare Clients**

It is the provider’s responsibility to determine the type of coverage (Medicare, Medicaid, or private insurance) that the client is entitled to receive. Home health providers must follow these guidelines:

- Clients who are 64 years of age and younger without Medicare Part A or B:
  - If the agency erroneously submits an SOC notice to Medicare and does not contact TMHP for prior authorization, TMHP does not assume responsibility for any services provided before contacting TMHP. The SOC date is no more than three business days before the date the agency contacts TMHP. Visits made before this date are not considered a benefit of the Home Health Services Program.

- Clients who are 65 years of age and older without Medicare Part A or Part B and clients with Medicare Part A or B regardless of age:
  - In filing home health claims, home health providers may be required to obtain Medicare denials before TMHP can approve coverage. When TMHP receives a Medicare denial, the SOC is determined by the date the agency requested coverage from Medicare. If necessary, the 95-day claims filing deadline is waived for these claims, provided TMHP receives notice of the Medicare denial within 30 days of the date on the MRAN containing Medicare's final disposition.
  - If the agency receives the MRAN and continues to visit the client without contacting TMHP by telephone, mail, or fax within 30 days from the date on the MRAN, TMHP will provide coverage only for services provided from the initial date of contact with TMHP. The SOC date is determined accordingly. TMHP must have the MRAN before considering the request for prior authorization.

**2.3.1.2 Benefits for Medicare/Medicaid Clients**

For eligible Medicare/Medicaid clients, Medicare is the primary coinsurance and providers must contact Medicare first for prior authorization and reimbursement. Medicaid pays the Medicare deductible on Part B claims for qualified home health clients.
Home health service prior authorizations may be given for HHA services, certain medical supplies, equipment, or appliances suitable for use in the home in one of the following instances:

- When an eligible Medicaid client (enrolled in Medicare) who does not qualify for home health services under Medicare because SN care, PT, or OT are not a part of the client’s care.
- When the medical supplies, equipment, or appliances are not a benefit of Medicare Part B and are a benefit of Home Health Services.

Federal and state laws require the use of Medicaid funds for the payment of most medical services only after all reasonable measures have been made to use a client’s third party resources or other insurance.

**Note:** If the client has Medicare Part B coverage, contact Medicare for prior authorization requirements and reimbursement. If the service is a Part B benefit, do not contact TMHP for prior authorization. Texas Medicaid will only pay the coinsurance and deductible on the electronic crossover claim.

TMHP will not prior authorize or reimburse the difference between the Medicare payment and the retail price for Medicare Part B eligible clients.

**Refer to:** Subsection 4.11, “Third Party Liability (TPL)” in Section 4, “Client Eligibility” (Vol. 1, General Information).

### 2.3.1.3 Medicare and Medicaid Prior Authorization

Contact TMHP for prior authorization of Medicaid services (based on medical necessity and benefits of Home Health Services) within 30 days of the date on the MRAN.

**Note:** For MQMB clients, do not submit prior authorization requests to TMHP if the Medicare denial reason states “not medically necessary.” Medicaid only will consider prior authorization requests if the Medicare denial states “not a benefit” of Medicare.

Qualified Medicare Beneficiaries (QMB) are not eligible for Medicaid benefits. Texas Medicaid is only responsible for premiums, coinsurance, or deductibles on these clients. Providers should not submit prior authorization requests to the TMHP Home Health Services Prior Authorization Department these clients.

To ensure Medicare benefits are used first in accordance with Texas Medicaid regulations, the following procedures apply when requesting Medicaid prior authorization and payment of home health services for clients.

Contact TMHP for prior authorization of Medicaid services (based on medical necessity and benefits of Home Health Services) within 30 days of the date on the MRAN. Fax a copy of the original Medicare MRAN and the Medicare appeal review letter to the TMHP Home Health Services Prior Authorization Department for prior authorization.

**Note:** Claims for STAR+PLUS MQMB clients (those with Medicare and Medicaid) must always be submitted to TMHP as noted on these pages. The STAR+PLUS health plan is not responsible for these services if Medicare denies the service as not a benefit.

When the client is 65 years of age and older or appears otherwise eligible for Medicare such as blind and disabled, but has no Part A or Part B Medicare, the TMHP Home Health Services Prior Authorization Department uses regular prior authorization procedures. In this situation, the claim is held for a midyear status determined by HHSC. The maximum length of time a claim may be held in a “pending status” for Medicare determination is 120 days. After the waiting period, the claim is paid or denied. If denied, the EOB code on the R&S report indicates that Medicare is to be billed.

**Refer to:** Subsection 3.2.3, “Home Health Skilled Nursing (SN) Services” in Nursing and Therapy Services Handbook (Vol. 2, Provider Handbooks).
2.4 Claims Filing and Reimbursement

2.4.1 Claims Information

Providers must use only type of bill (TOB) 331 in Form Locator (FL) 4 of the UB-04 CMS-1450. Other TOBs are invalid and result in claim denial.

Home Health services must be submitted to TMHP in an approved electronic format or on a CMS-1500 or a UB-04 CMS-1450 paper claim form. Submit home health DME and medical supplies to TMHP in an approved electronic format, or on a CMS-1500 or on a UB-04 CMS-1450 paper claim form. Providers may purchase UB-04 CMS-1450 and CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply them.

When completing a CMS-1500 or a UB-04 CMS 1450 paper claim form, providers must include all required information on the claim, as TMHP does not key information from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to:
Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.
Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Outpatient claims must have the appropriate revenue code and, if appropriate, the corresponding HCPCS code or narrative description. The prior authorization number must appear on the UB-04 CMS-1450 claim in Block 63 and in Block 23 of the CMS-1500 claim. The certification dates or the revised request date on the POC must coincide with the DOS on the claim. Prior authorization does not waive the 95-day filing deadline requirement.

2.4.1.1 Benefit Code

Home health DME providers must use benefit code DM2 on all claims and authorization requests. All other providers must use benefit code CSN on all claims and authorization requests.

2.4.2 Reimbursement

DME and expendable medical supplies are reimbursed in accordance with 1 TAC §355.8021. Providers can refer to the Online Fee Lookup (OFL) or the applicable fee schedule on the TMHP website at www.tmhp.com. Providers may also request a hard copy of the fee schedule by contacting the TMHP Contact Center at 1-800-925-9126.

DME and expendable supplies, other than nutritional products, that have no established fee, are subject to manual pricing at the documented MSRP less 18 percent or the provider’s documented invoice cost. Nutritional products that have no established fee are subject to manual pricing at the documented AWP less 10.5 percent or at the provider’s documented invoice cost.

For reimbursement, providers must note the following:

- Claims are approved or denied according to the eligibility, prior authorization status, and medical appropriateness.
- Claims must represent a numerical quantity of 1 month for supplies according to the billing requirements.
• DME/supplies must be provided by either a Medicaid enrolled home health agency’s Medicaid/DME supply provider or an independently-enrolled Medicaid/DME supply provider. Both must enroll and bill using the provider identifier enrolled as a DME supplier. File these services on a CMS-1500 claim form.

Note: Medical social services and speech-language pathology services are available to clients who are 20 years of age and younger and are not a benefit of Home Health Services. These services may be considered a benefit for clients who qualify for CCP.

Texas Medicaid does not reimburse separately for associated DME charges, including but not limited to, battery disposal fees or state taxes. Reimbursement for any associated charges is included in the reimbursement for a specific piece of equipment.

Refer to: Subsection 2.2, “Reimbursement Methodology” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for more information about reimbursement.

2.4.3 Prohibition of Medicaid Payment to Home Health Agencies Based on Ownership

Medicaid denies home health services claims when TMHP records indicate that the physician ordering treatment has a significant ownership interest in, or a significant financial or contractual relationship with, the nongovernmental home health agency billing for the services. Federal regulation Title 42 CFR §424.22 (d) states that “a physician who has a significant financial or contractual relationship with, or a significant ownership in a nongovernmental home health agency may not certify or recertify the need for home health services care services and may not establish or review a plan of treatment.”

A physician is considered to have a significant ownership interest in a home health agency if either of the following conditions apply:

• The physician has a direct or indirect ownership of five percent or more in the capital, stock, or profits of the home health agency.
• The physician has an ownership of five percent or more of any mortgage, deed of trust, or other obligation that is secured by the agency, if that interest equals five percent or more of the agency’s assets.

A physician is considered to have a significant financial or contractual relationship with a home health agency if any of the following conditions apply:

• The physician receives any compensation as an officer or director of the home health agency.
• The physician has indirect business transactions, such as contracts, agreements, purchase orders, or leases to obtain services, supplies, equipment, space, and salaried employment with the home health agency.
• The physician has direct or indirect business transactions with the home health agency that, in any fiscal year, amount to more than $25,000 or 5 percent of the agency’s total operating expenses, whichever is less.

When providing CCP services and general home health services, the provider must file these on two separate UB-04 CMS-1450 paper claim forms with the appropriate prior authorization number, and must send them to the appropriate address.

Claims denied because of an ownership conflict will continue to be denied unless the home health agency submits documentation indicating that the ordering physician no longer has a significant ownership interest in, or a significant financial or contractual relationship with, the home health agency providing services. Documentation must be sent to TMHP Provider Enrollment at the address indicated in “Written Communication With TMHP” in TMHP Telephone and Address Guide (Vol. 1, General Information).

Your provider has sent you some medical equipment. We want to make sure that you got what you wanted and that it works well. We need to talk to you about the equipment before we can pay for it.

**Call TMHP at 1-888-276-0702.**

Please call us toll-free at 1-888-276-0702 as soon as you can. We are open Monday through Friday from 8 a.m. to 5 p.m., Central Time. If you call us after hours, you can leave a message. Tell us your name, phone number, and the best time to call you back.

**Required Information**

Please have this information with you when you call:

- Name
- Medicaid Number
- Date of birth
- Address (street, city, state, ZIP)
- Provider’s name
- Date you got the equipment
- Details about the equipment

Su proveedor le envió equipo médico. Queremos saber si recibió lo que pidió y si funciona bien. Necesitamos hablar con usted sobre este equipo antes de que paguemos por él.

**Llámenos al 1-888-276-0702.**

Por favor, llámenos gratis lo antes posible al 1-888-276-0702. Nuestras oficinas están abiertas de lunes a viernes, de 8 a.m. a 5 p.m., Hora del Centro. Si nos llama después de estas horas, puede dejar un mensaje con su nombre, número de teléfono y el mejor momento para volver a llamarlo.

**Información que necesitamos**

Cuando llame, tenga esta información a la mano:

- Nombre.
- Número de Medicaid.
- Fecha de nacimiento.
- Dirección (calle, ciudad, estado, código postal).
- Nombre del proveedor.
- Fecha en que recibió el equipo.
- Detalles sobre el equipo.

The external insulin pump must be ordered by, and the client’s follow-up care must be managed by, a physician with experience managing clients with insulin infusion pumps and who works closely with a team including nurses, diabetic educators, and dieticians who are knowledgeable in the use of insulin infusion pumps. The following information is the minimum documentation required for consideration of medical necessity and must be submitted with a completed, signed, and dated Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form. (Attach additional documentation as needed.)

1. Lab values to include current and past blood glucose levels and glycosylated hemoglobin (Hb/A1C) levels including the date of lab draws.

2. Client history of severe glycemic excursions, hypoglycemic/hyperglycemic reactions, nocturnal hypoglycemia, any extreme insulin sensitivity, and/or very low insulin requirements.

3. Client history of any wide fluctuations in blood glucose level before mealtimes.

4. Client history of any dawn phenomenon where fasting blood glucose level often exceeds 200 mg/dL.
Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form Instructions

General Instructions
This form must be completed and signed as outlined in the instructions below before DME/medical supplies providers contact TMHP Home Health Services for prior authorization.

Either the DME supplier/Medicaid provider or the prescribing physician may initiate the form. This completed form must be retained in the records of both the DME supplier/medical provider and the prescribing physician, and is subject to retrospective review. This form becomes a prescription when the physician has signed section B.

Note: This form cannot be accepted beyond 90 days from the date of the prescribing physician’s signature.

The supplier or prescribing physician can complete Section A. Include the most appropriate procedure code description using the Healthcare Common Procedure Coding System (HCPCS). In addition, include the appropriate quantity and the manufacturer’s suggested retail price (MSRP) if the item requires manual pricing. A price is not required for those items with a maximum fee listed in the Texas Medicaid Fee Schedule. The appropriate box must be completed to indicate whether this section was completed by the physician or the supplier. If the item requested is beyond the quantity limit or a custom item, additional documentation must be provided to support determination of medical necessity.

All fields must be filled out completely. The prescribing physician’s TPI (if a Texas Medicaid provider), NPI, and license number must be indicated.

Section A: Requested Durable Medical Equipment and Supplies
The supplier or prescribing physician can complete Section A. Include the most appropriate procedure code description using the Healthcare Common Procedure Coding System (HCPCS). In addition, include the appropriate quantity and the manufacturer’s suggested retail price (MSRP) if the item requires manual pricing. A price is not required for those items with a maximum fee listed in the Texas Medicaid Fee Schedule. The appropriate box must be completed to indicate whether this section was completed by the physician or the supplier. If the item requested is beyond the quantity limit or a custom item, additional documentation must be provided to support determination of medical necessity.

Physicians must indicate their professional license number. If the prescribing physician is out of state, the physician must provide the license number and state of professional licensure. Texas Medicaid TPI and UPIN numbers are not acceptable as licensure. The Addendum to the Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form must be used when prescribing more than 5 items. The Addendum to the Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form must accompany the Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form.

Note: Addendums received without this form will not be accepted.

Reminder: Home health services are not a benefit for clients residing in a nursing facility, hospital, or intermediate care facility.

Note for DME: The DME company must also complete the DME Certification and Receipt Form. All equipment is to be assembled, installed, and used pursuant to the manufacturer’s instructions and warning.

Effective Date_10212008/Revised Date_12022010
# Home Health Services (Title XIX) DME/Medical Supplies
## Physician Order Form Instructions

### Section B: Diagnosis and Medical Information

Section B is a prescription for DME/supplies and must be filled out by the prescribing physician.

The prescribing physician must indicate the corresponding item number requested from Section A, appropriate ICD-9 code with a brief description, and complete justification for determination of medical necessity for the requested item(s). If applicable, include height/weight, wound stage/dimensions and functional/mobility.

**Note:** The date last seen must be within the past 12 months.

The prescribing physician must indicate the duration of need for the prescribed supplies/DME. The estimated duration of need must specify the amount of time the supplies/DME will be needed, such as six weeks, three months, lifetime, etc. The prescribing physician's TPI (if a Texas Medicaid provider), NPI, and license number must be indicated.

**Note:** Signatures from nurse practitioners, physician assistants, and chiropractors will not be accepted. Signature stamps and date stamps are not acceptable.

1. If “Yes,” additional documentation must be provided to support determination of medical necessity.

☐ Check if additional documentation is attached as outlined in the TMPPM.

Is the DME Provider Medicare certified? YES ☐ NO ☐

If yes, indicate Medicare number: _______ __________

### Section B: Diagnosis and Medical Need Information

This is a prescription for DME/supplies and must be filled out by the prescribing physician.

<table>
<thead>
<tr>
<th>Item Number</th>
<th>ICD-9 Page (From Section A)</th>
<th>Brief Diagnosis Descriptor</th>
<th>Complete justification for determination of medical necessity for requested item(s)? (Refer to Section A, footnote 1)</th>
</tr>
</thead>
</table>

2. Each item requested in Section A must have a correlating diagnosis and medical necessity justification.

Enter all Item numbers from the table in Section A that pertain to each diagnosis.

If applicable, include height/weight, wound stage/dimensions and functional/mobility status in table below.

<table>
<thead>
<tr>
<th>Height</th>
<th>Weight</th>
<th>Wound stage/dimensions</th>
<th>Functional/mobility status</th>

</thead>
</table>

Note: The “Date last seen” and “Duration of need” items below must be filled in.

Date last seen by physician: _______ __________

Duration of need for DME: _______ __________ month(s) Duration of need for supplies: _______ __________ month(s)

By signing this form, I hereby attest that the information completed in Section “A” is consistent with the determination of the client’s current medical necessity and prescription. By prescribing the identified DME and/or medical supplies, I certify the prescribed items are appropriate and can safely be used in the client’s home when used as prescribed.

Signature and attestation of prescribing physician: Date: _______ __________

Signature stamps and date stamps are not acceptable

Prescribing physician’s license number: _______ __________

Prescribing physician’s TPI: _______ __________

Prescribing physician’s NPI: _______ __________

☐ Check if all of the information in Section A was complete at the time of the prescribing provider signature.

## Home Health Services Prior Authorization Checklist

**Contact Medicaid Home Health Services at 1-800-925-8957**

To facilitate the authorization process, the home health agency nurse must have completed the following tasks before contacting TMHP for prior authorization of home health services:

- Completion of this optional form
- Evaluation of the client in the home (preferably by the same nurse requesting services)

**PLEASE DO NOT SUBMIT THIS FORM TO TMHP.**

<table>
<thead>
<tr>

### Section B: To be completed by the physician

- □ High frequency chest wall compression system (HFCWCS)
- □ Cough stimulating device (cofflator)

- ☐ Client had respiratory illness or complication in the past 6 months (provide additional information in narrative section, i.e., nebs for respiratory secretions, I.V. antibiotics, hospitalizations).
  - Yes □ No □

- ☐ Client or family unable to do chest physiotherapy (provide medical reasons in narrative section).
  - Yes □ No □

- ☐ Client has tried other modes of chest physiotherapy, including the use of electrical percussor therapy or flutter valve for a minimum of four months prior to the request and that the therapy has been ineffective (provide information on other therapies and why they are ineffective in narrative section).
  - Yes □ No □

- ☐ Device use has not resulted in, nor exacerbated any gastrointestinal, manifestations, aspiration, pulmonary manifestation, nor seizure activity.
  - Yes □ No □

- ☐ Client had pulmonary function studies in last 6 months, if applicable (provide results in narrative section).
  - Yes □ No □

- ☐ Client has frequently missed work, school or extracurricular activities in the last 6 months due to respiratory illnesses and ineffective chest physiotherapy (provide medical reasons in narrative section).
  - Yes □ No □

**Clients can have only one chest physiotherapy device at a time. The HFCWCS is available for purchase after the initial rental period with additional documentation. Use of these devices may affect the number of private duty nursing hours for chest physiotherapy the client is receiving through the Comprehensive Care Program (CCP). Refer to the complete policy in the Texas Medicaid (Title XIX) Home Health Services section of the Texas Medicaid Provider Procedures Manual.**

### Section C: The physician prescribing a chest physiotherapy device must complete the narrative information regarding the medical necessity as requested above, or attach a letter with this information.

**Narrative note for medical necessity (write legibly):**

<p>| |</p>

### Section B: To be completed by the physician

#### Device requested

- [ ] High frequency chest wall compression system (HFCWCS)
- [ ] Cough stimulating device (cofflator)

- [ ] Client had respiratory illness or complications since initial authorization (include additional information in narrative section, i.e., nebs for respiratory secretions, I.V., antibiotics, and hospitalizations).
- [ ] Physicians description/assessment of the effectiveness indicates decreased medication use, shorter hospital length of stay (LOS), decreased hospitalizations, and fewer school, work, or extracurricular activity absences due to diagnosis related complications.
- [ ] System has not exacerbated any gastrointestinal manifestations, nor caused aspiration and exacerbation of pulmonary manifestation, nor an exacerbation of seizure activity.
- [ ] Client has been compliant in use of device (document minutes logged per treatment, times per day of treatments, and number of days used for entire trial period).
- [ ] Client has achieved the desired health outcome with device.

Clients can have only one chest physiotherapy device at a time. The HFCWCS is available for purchase after the initial rental period with additional documentation. Use of these devices may affect the number of private duty nursing hours for chest physiotherapy the client is receiving through the Comprehensive Care Program (CCP). Refer to the complete policy in the Texas Medicaid (Title XIX) Home Health Services section of the Texas Medicaid Provider Procedures Manual.

### Section C: The physician prescribing a chest physiotherapy device must complete the narrative information regarding the medical necessity as requested above, or attach a letter with this information.

*Wound Type: A=Stage III or Stage IV pressure ulcer B=Preoperative myocutaneous flap/graft C=Recent (within 14 days) myocutaneous flap/graft  D=DM ulcer E=Chronic open wound (30 days or longer) G=Other: please document wound type ____________

**Wound Bed Description: A=Beefy B=Dull pink/red C=White/grey/yellow/brown slough  D=Black eschar Give the percentage of wound bed for each type identified (e.g., A: 100%)

NOTE: Include above information for each wound if more than one.

Indicators for Wound Therapy

Must be reviewed and signed by the physician familiar with the client and who is prescribing the wound care system. Answer "Yes" or "No" for each question and check any answers that apply.

2. The patient’s history reflects one or more of the following: Yes ☐ No ☐

☐ Previous failed wound care interventions. How long ago? ____________ How was this resolved? __________________________

☐ Coexisting chronic illness

☐ Frequent reoccurrence of advanced pressure ulcers relating to severely limited mobility

☐ Wound care therapy was initiated in the hospital or skilled nursing facility (SNF).

If "yes," provide the following:

Admission date: ____________ Admitting diagnosis: __________________________

Discharge date: ____________
# Statement for Initial Wound Therapy System In-Home Use

3. The patient uses a pressure-reducing surface: **Yes** ☐ **No** ☐
   - Non-powered mattress overlay ☐
   - Powered mattress replacements ☐
   - Non-powered mattress replacement ☐
   - Powered bed system ☐
   - Powered mattress overlay ☐
   - Air fluidized bed ☐

**NOTE:** If “No,” why not?

4. The patient has an albumin greater than 3 mg/dl: **Yes** ☐ **No** ☐
   - Date of last albumin (within the past 30 days): _____________  Results: _____________

**NOTE:** If the patient has an albumin level of less than 3 mg/dl, please list the albumin level and describe the type of nutritional treatment the patient is receiving:

5. The patient has diabetes mellitus: **Yes** ☐ **No** ☐
   - Hemoglobin A1c level: _____________  Date Hemoglobin A1c drawn _____________ (within the past 30 days)

6. The patient’s wound is free of necrotic tissue: **Yes** ☐ **No** ☐

   - Surgical  Date _____________  Physical  Date _____________
   - Chemical  Date _____________  Autolytic  Date _____________

**NOTE:** If the wound has recently been debrided, identify the type and date of debridement:

7. The patient’s wound is free of infection: **Yes** ☐ **No** ☐

   - **NOTE:** If the wound is infected, identify the wound treatment, including the name, dosage, frequency, route, and duration of any medications:

8. The patient’s overall health status will allow wound healing: **Yes** ☐ **No** ☐

   - Describe all medical conditions which might affect wound healing. Address incontinence, if applicable, and what is being done to decrease contamination of the wound:

**Contraindicators to Initial Wound Therapy**

(Check any that apply)

9. Does the patient have any of the following conditions?: **Yes** ☐ **No** ☐
   - Fistulas to the body ☐
   - Wound is ischemic ☐
   - Gangrene ☐
   - Osteomyelitis (unless being treated—describe below) ☐
   - Skin cancer in the margins ☐
   - No demonstrable improvement in wound over past 30 days ☐
   - Presence of necrotic tissue, including bone ☐

10. Name of family member/friend/caregiver who agrees to be available to assist patient:

**Physician Review and Certification**

I have reviewed the information provided on this form, and certify that the wound care system ordered for the client is medically necessary.

**Wound Type:**

- A=Stage III or Stage IV pressure ulcer
- B=Preoperative myocutaneous flap/graft
- C=Recent (within 14 days) myocutaneous flap/graft
- D=DM ulcer
- E=Chronic open wound (30 days or longer)
- F=Venous stasis ulcer
- G=Other: please document wound type

**. Wound Bed Description:**

- A=Beefy
- B=Dull pink/red
- C=White/grey/yellow/brown slough
- D=Black eschar

Give the percentage of wound bed for each type identified (e.g., A: 100%)

**NOTE:** Include above information for each wound if more than one.

2. Has the wound status improved over the last 30 days? Yes ☐ No ☐

In addition to the recertification request form, please submit documentation describing treatment measures taken, and the medical necessity for continued wound therapy.

4. The patient continues to use a pressure-reducing surface. Yes □ No □

**NOTE:** If “no,” why not? ____________________________________________

5. Name of family member/friend/caregiver who continues to agree to assist patient: ________________________________

### Contraindicators to Continuation of Treatment

(Check any that apply)

- Fistulas to the body
- Wound is ischemic
- Gangrene
- Osteomyelitis (unless being treated – describe below)
- Skin cancer in the margins
- No demonstrable improvement in wound over past 30 days
- Presence of necrotic tissue, including bone

### Physician Review and Certification

I have reviewed the information provided on this form regarding the client’s wound progress, and certify that the client continues to meet medical necessity criteria for the wound care system.

<td></td>
</tr>
<tr>
<td>Model number:</td>
<td></td>
</tr>
</tbody>
</table>

**Service Agreement**

The Manufacturer’s recommended preventive maintenance schedule for the ventilator make and model must be submitted with the Ventilator Service Agreement request.

If this is a renewal Ventilator Service Agreement, in addition to the above, the following documentation must also be submitted:

1. Documentation of the monthly ventilator service procedures performed by a respiratory therapist and client assessments by a respiratory therapist.
2. Description of ventilator preventive maintenance performed during the last ventilator service agreement period.

**Provider Responsibilities**

Provider responsibilities for maintaining the ventilator service agreement include:

1. Ensure routine service procedures outlined by the ventilator manufacturer are followed.
2. Provide all internal filters, all external filters and all ventilator circuits, (with the exhalation valve), as part of the ventilator service agreement payment.
3. Provide a respiratory therapist and a back-up ventilator on a 24-hour on call basis.
4. Provide monthly visits to the client’s home by a respiratory therapist to perform routine service procedures, monitor functioning of the ventilator system and assess client’s status. The provider must maintain documentation of monthly visits in accordance with Medicaid Records Retention Policy.
5. Provide a substitute ventilator while the manufacturers recommended preventative maintenance is being performed on the client owned ventilator.

The ventilator service agreement must be prior authorized every six (6) months.

**Provider Representative Signature:**

Effective Date_01152008/Revised Date_08072007
## Instructions

A current wheelchair seating assessment conducted by a physician, physical or occupational therapist must be completed for purchase of or modifications (including new seating systems) to a customized wheelchair. Please attach manufacturer information, descriptions, and an itemized list of retail prices of all additions that are not included in base model price.

Complete Sections I-VI for manual wheelchairs. Complete Sections I-VII for power wheelchairs.

## Client Information

*Note:* A comprehensive Index, including Volume 1 and all handbooks from Volume 2, is included at the end of Volume 1 (General Information).
1. GENERAL INFORMATION

The information in this handbook is intended for Texas Medicaid Title XIX family planning providers and DSHS Titles V, X, and XX providers. The handbook provides information about Texas Medicaid’s benefits, policies, and procedures applicable to these service providers.

**Important:** All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1617(a)(6)(A). Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver healthcare items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.

**Refer to:** The Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information about providing services to Texas Medicaid/Texas Health Steps (THSteps) clients.

**Refer to:** Section 6.1, “Provider Enrollment” in the Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for information about physician provider enrollment.

2. MEDICAID TITLE XIX FAMILY PLANNING SERVICES

2.1 Title XIX Provider Enrollment

Physician, FQHC, and RHC providers may provide Title XIX family planning services for Texas Medicaid clients under the provider’s Texas Medicaid provider number. No additional enrollment is required to provide Title XIX family planning services.

**Refer to:** Section 6.1, “Provider Enrollment” in the Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for information about physician provider enrollment.
Family planning agencies must apply for enrollment with TMHP to receive an agency provider identifier. To be enrolled in Texas Medicaid, family planning agencies must meet the following requirements:

- Complete an agency enrollment application.
- Ensure that all services are furnished by, prescribed by, or provided under the direction of a licensed physician in accordance with the Texas Medical Board or Texas BON.
- Have a medical director who is a physician currently licensed to practice medicine in Texas, and submit a current copy of the medical director’s physician license.
- Have an established record of performance in the provision of both medical and educational counseling of family planning services as verified through client records, established clinic hours, and clinic site locations.
- Provide family planning services in accordance with DSHS standards of client care for family planning agencies.
- Be approved for family planning services by the DSHS Family Planning Program.

Note: A rural health clinic (RHC) can also apply for enrollment as a family planning agency.

The effective date for participation is the date an approved provider agreement with Medicaid is established and the provider is assigned a Medicaid provider identifier.

Providers cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

Refer to: Section 1: Provider Enrollment and Responsibilities (Vol. 1, General Information) for more information about enrollment procedures.

Subsection 6.3.6, “Benefit Code” in Section 6, “Claims Filing” (Vol. 1, General Information) for more information about benefit codes.

2.2 Family Planning Overview

TMHP processes family planning claims and encounters for four different funding sources administered through DSHS and the Health and Human Services Commission (HHSC). These funding sources include Titles XIX, V and XX, and X.

Agencies across Texas are awarded contracts for Titles V, X, and XX to provide services to low-income individuals who may not qualify for Texas Medicaid services. These awards are granted through a competitive procurement process. DSHS contracts with a variety of providers, including local health departments, universities, medical schools, private nonprofit agencies, RHCs, and hospital districts.

Some contractors receive more than one type of funding. All contractors serve Texas Medicaid-eligible clients. Client eligibility requirements, reimbursement methodologies, client copayment guidelines, and covered services differ for each funding source. Titles XIX, V and XX, and X funding can not be used for elective abortion services.

- Title XIX funds are available for family planning services provided to Texas Medicaid clients including limited family planning services provided to Women’s Health Program (WHP) clients. TMHP processes Title XIX claims and reimburses eligible services on a fee-for-service basis for family planning providers and a prospective payment system basis for FQHC and RHC providers.
• Titles V and XX funds are granted annually by DSHS to contracted family planning providers. TMHP processes Titles V and XX claims and reimburses providers for services to eligible clients according to the individually granted funds.

• Title X encounters do not result in payments to the providers. To receive payment, providers must submit monthly or quarterly Financial Status Reports (FSRs) forms, along with a paper payment voucher, to the DSHS Contract Development and Support Branch and Claims Processing Unit. Title X providers continue to receive reimbursement from the Comptroller.

2.2.1 Guidelines for Family Planning Providers

The following guidelines apply for all family planning services:

• Family planning services may be provided by a physician or under the direction of a physician, not necessarily personal supervision. A physician provides direction for family planning services through written standing delegation orders and medical protocols. The physician is not required to be on the premises for the provision of family planning services by a registered nurse (RN), physicians assistant (PA), nurse practitioner (NP), clinical nurse specialist (CNS) or CNM.

• Services must be provided without regard to age, marital status, sex, race, ethnicity, parenthood, handicap, religion, national origin, or contraceptive preference.

• Texas Medicaid clients, including limited and managed care clients, are allowed to choose any enrolled family planning service provider.

• Family planning clients must be allowed freedom of choice in the selection of contraceptive methods as medically appropriate.

• Family planning clients must be allowed the freedom to accept or reject services without coercion.

• Only family planning clients, not their parents, spouses, or any other individuals, may consent to the provision of family planning services funded by Title X, XIX, or combined X and XX funds; however, counseling should be offered to adolescents that encourages them to discuss their family planning needs with a parent, an adult family member, or other trusted adult.

• For family planning services provided by Title V or Title XX-only clinics, the consent of a parent or other adult is governed by the Texas Family Code, Section 32. Sterilization services cannot be provided to any person under the age of 21. For more information, providers may refer to the DSHS website at www.dshs.state.tx.us/famplan/rules.shtm. Sterilization services can not be provided to any person 20 years of age or younger.

2.2.2 Family Planning Services for Undocumented Aliens

Undocumented aliens are identified on the client eligibility card as having limited Medicaid eligibility by the classification of Type Program (TP) 30, 31, 34, and 35. Under Texas Medicaid, these clients are only eligible for emergency services, including emergency labor and delivery. Texas Medicaid emergency-only services do not cover family planning services.

2.3 Services, Benefits, Limitations, and Prior Authorization

This section includes information on family planning services funded through Title XIX Medicaid. WHP, which is also a benefit of Title XIX, is covered in Section 3, “Women’s Health Program (Title XIX Family Planning)” in this handbook.

Family planning services are preventive health, medical, counseling, and educational services that assist individuals in managing their fertility and achieving optimal reproductive and general health. Title XIX services include:

• Family planning annual exams

• Other family planning office or outpatient visits
• Laboratory procedures
• Radiology services
• Contraceptive devices and related procedures
• Drugs and supplies
• Medical counseling and education
• Sterilization and sterilization-related procedures (i.e., tubal implants, tubal ligation, vasectomy, and anesthesia for sterilization)

Providers must use one of the following diagnosis codes in conjunction with all family planning procedures and services:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>V2501</td>
</tr>
<tr>
<td>V2542</td>
</tr>
</tbody>
</table>

One of the diagnosis codes in this table must be included in Block 24 E of the CMS-1500 claim form referencing the appropriate procedure code. The choice of diagnosis code must be based on the type of family planning service performed.

Note: Title XIX family planning services are exempt from the limited program and rules.

2.3.1 Family Planning Annual Exams
An annual family planning exam consists of a comprehensive health history and physical examination, including medical laboratory evaluations as indicated, an assessment of the client’s problems and needs, and the implementation of an appropriate contraceptive management plan.

Family planning providers must bill the most appropriate evaluation and management (E/M) visit procedure code for the complexity of the annual family planning examination provided. To bill an annual family planning examination, one of the following procedure codes must be billed with modifier FP and a family planning diagnosis code:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99201</td>
</tr>
</tbody>
</table>

Important: Only the annual family planning examination requires modifier FP. All other family planning office visits do not. One annual family planning examination is allowed per year. Claims filed incorrectly may be denied.

The following table summarizes the uses for the E/M procedure codes and the corresponding billing requirements for the annual examination:

<table>
<thead>
<tr>
<th>Billing Criteria</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>New patient: Most appropriate E/M procedure code (99201–99205) with modifier FP and a family planning diagnosis code</td>
<td>One new patient E/M code every 3 years following the last E/M visit provided the client by that provider or a provider of the same specialty in the same group</td>
</tr>
<tr>
<td>Established patient: Most appropriate E/M procedure code (99211–99215) with modifier FP and a family planning diagnosis code</td>
<td>Once a year*</td>
</tr>
</tbody>
</table>

* The established patient procedure code will be denied if a new patient procedure code has been billed in the same year.
An annual family planning examination (billed with modifier FP) will not be reimbursed when submitted with the same date of service as a surgical procedure or an additional E/M visit.

If another condition requiring an evaluation and management (E/M) office visit beyond the required components for the annual examination is discovered, the provider may submit a claim for the additional visit using Modifier 25 to indicate that the client’s condition required a significant, separately identifiable E/M service. Documentation supporting the provision of a significant, separately identifiable E/M service must be maintained in the client’s medical record and made available to Texas Medicaid upon request.

2.3.1.1 FQHC Reimbursement for Family Planning Annual Exams

To receive their encounter rate for the annual family planning examination, FQHCs must use the most appropriate E/M procedure code for the complexity of service provided as indicated in the previous table in subsection 2.3.1, “Family Planning Annual Exams” in this handbook.

The annual exam is allowed once per fiscal year, per client, per provider. Two additional family planning office or outpatient visits may be billed within the same year for the same client.

A new patient visit for the annual exam may be reimbursed once every three years following the last E/M visit provided to the client by that provider or a provider of the same specialty in the same group. The annual examination must be billed as an established patient visit if E/M services have been provided to the client within the last three years.

Reimbursement for services payable to an FQHC is based on an all-inclusive rate per visit.

2.3.2 Other Family Planning Office or Outpatient Visits

Other family planning E/M visits are allowed for routine contraceptive surveillance, family planning counseling and education, contraceptive problems, suspicion of pregnancy, genitourinary infections, and evaluation of other reproductive system symptoms.

During any visit for a medical problem or follow-up visit, the following must occur:

- An update of the client’s relevant history
- Physical exam, if indicated
- Laboratory tests, if indicated
- Treatment or referral, if indicated
- Education and counseling, or referral, if indicated
- Scheduling of office or clinic visit, if indicated

Title XIX family planning providers must use one of the following procedure codes based on the complexity of the visit with a family planning diagnosis for other family planning office or outpatient visits:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99201</td>
</tr>
</tbody>
</table>

**Important:** Family planning E/M office and outpatient visits should not be billed with modifier FP. Claims filed incorrectly may be denied.
The following table summarizes the uses for the E/M procedure codes and the corresponding billing requirements for each type of visit:

<table>
<thead>
<tr>
<th>Billing Criteria</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>New patient:</strong> Most appropriate E/M procedure code (99201–99205) with a family planning diagnosis code</td>
<td>One new patient E/M code every 3 years following the last E/M visit provided the client by that provider or a provider of the same specialty in the same group</td>
</tr>
<tr>
<td><strong>Established patient:</strong> Most appropriate E/M procedure code (99211–99215) with a family planning diagnosis code</td>
<td>As needed*</td>
</tr>
</tbody>
</table>

* The established patient procedure code will be denied if a new patient procedure code has been billed in the same year.

Refer to: Subsection 2.3, “Services, Benefits, Limitations, and Prior Authorization” in this handbook for the list of family planning diagnosis codes.

A general family planning office or outpatient visit (billed without modifier FP) will not be reimbursed when submitted with the same date of service as a surgical procedure or an additional E/M visit. If another condition requiring an evaluation and management (E/M) office visit beyond the required components for an office visit, family planning visit, or surgical procedure is discovered, the provider may submit a claim for the additional visit using Modifier 25 to indicate that the client’s condition required a significant, separately identifiable E/M service. Documentation supporting the provision of a significant, separately identifiable E/M service must be maintained in the client’s medical record and made available to Texas Medicaid upon request.

### 2.3.2.1 FQHC Reimbursement for Other Family Planning Office or Outpatient Visits

FQHCs may be reimbursed for three family planning encounters per year, per client, regardless of the reason for the encounter. The three encounters may include any combination of general family planning, annual family planning exams, or services (procedure code J7300, J7302, or J7307).

A family planning diagnosis code must be billed along with the most appropriate informational procedure codes for the services that were rendered. Reimbursement for services payable to an FQHC is based on an all-inclusive rate per visit.

Refer to: Section 5, “Federally Qualified Health Center (FQHC)” in the Outpatient Services Handbook (Vol. 2, Provider Handbooks) for more information about FQHC services.

### 2.3.3 Laboratory Procedures

All family planning laboratory services must be billed with a family planning diagnosis code.

#### 2.3.3.1 CLIA Requirement

All providers of laboratory services must comply with the rules and regulations of the CLIA. Providers who are not in compliance with CLIA will not be reimbursed for laboratory services. Only the office or lab that holds the appropriate CLIA certificate and that actually performs the laboratory test procedure may be reimbursed for the procedure.

Refer to: Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)

### 2.3.3.2 Medical Record Documentation

Medicaid family planning service providers must document in the client’s medical record the medical necessity of all ordered laboratory services. The medical record documentation must also reference an appropriate diagnosis.
2.3.3.3 Lab Specimen Handling and Testing

Any test specimen sent to a laboratory may be reimbursed to the laboratory who performs the test and not to the referring family planning provider.

If the provider who obtains the specimen does not perform the laboratory procedure, the provider who obtains the specimen may be reimbursed one lab handling fee per day, per client, for the handling or conveyance of the specimen from the provider’s office to a laboratory using procedure code 99000 and a family planning diagnosis code. More than one lab handling fee may be reimbursed per day if multiple specimens are obtained and sent to different laboratories.

Handling fees are not paid for Pap smears or cultures. The appropriate procedure code may be reimbursed for Pap smear interpretations when billed with modifier SU in the office setting indicating that the screening and interpretation were actually performed in the office.

2.3.3.4 Providing Information to the Reference Laboratory

When sending any specimen, including Pap smears, to the reference laboratory, the family planning provider must provide the reference laboratory with the client’s name, address, Texas Medicaid number, and a family planning diagnosis so the laboratory may bill Texas Medicaid for its family planning lab services.

2.3.4 Radiology Services

Procedure codes 74000, 74010, and 76830 may be reimbursed for services performed for the purpose of localization of an intrauterine device (IUD).

2.3.5 Contraceptive Devices and Related Procedures

2.3.5.1 External Contraceptives

Procedure codes A4261 (cervical cap) and A4266 (diaphragm) may be reimbursed separately from the fitting and instruction (procedure code 57170).

Procedure codes A4261 and A4266 may be reimbursed when they are billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>V2501</td>
</tr>
</tbody>
</table>

2.3.5.2 Intrauterine Device

2.3.5.2.1 Insertion of the IUD

The IUD and the insertion of the IUD may be reimbursed using procedure code J7300 or J7302 with procedure code 58300. The following reimbursement may apply:

- Procedure code J7300 or J7302 may be reimbursed at full allowance.
- Procedure code 58300 may be reimbursed at full allowance.

An IUD insertion (procedure code 58300) may be reimbursed when billed with the same date of service as a dilation and curettage (procedure code 58120). The following reimbursement may apply:

- Procedure code 58120 (dilation and curettage) may be reimbursed at full allowance.
- Procedure code 58300 (IUD insertion) may be reimbursed at half the allowed amount.
- Procedure code J7300 or J7302 (IUD device) may be reimbursed at full allowance.
When a vaginal, cervical, or uterine surgery (e.g., cervical cauterization) is billed for the same date of service as the insertion of the IUD, the following reimbursement will apply:

- The other vaginal, cervical, or uterine surgical procedure may be reimbursed at full allowance.
- Procedure code 58300 (IUD insertion) may be reimbursed at half the allowed amount.

Procedure code J7302 may be reimbursed when it is billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>V2502</td>
</tr>
</tbody>
</table>

2.3.5.2.2 Removal of the IUD

Procedure code 58301 may be reimbursed when an IUD is extracted from the uterine cavity. An office visit will not be reimbursed when billed on the same date of service as procedure code 58301.

When a vaginal, cervical, or uterine surgery procedure code is submitted with the same date of service as the IUD removal procedure code or the IUD replacement procedure code, the following reimbursement may apply:

- The other vaginal, cervical, or uterine surgical procedure may be reimbursed at full allowance.
- The removal or the replacement of the IUD will be denied.

2.3.5.3 Contraceptive Capsules

The contraceptive capsule and the implantation of the contraceptive capsule may be reimbursed using procedure code J7307 and procedure code 11975 (insertion) or 11977 (removal with reinsertion).

Procedure code 11975 may be reimbursed when it is billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99632</td>
</tr>
<tr>
<td>V2543</td>
</tr>
</tbody>
</table>

Procedure code 11977 may be reimbursed when it is billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99632</td>
</tr>
<tr>
<td>V255</td>
</tr>
</tbody>
</table>

Progesterone-containing subdermal contraceptive capsules (Norplant) were previously used for birth control. Although subdermal contraceptive capsules are no longer approved by the Food and Drug Administration (FDA), the removal of the implanted contraceptive capsule may be considered for reimbursement with procedure code 11976 (removal). Procedure code 11976 may be reimbursed when it is billed with diagnosis code V2543.

2.3.6 Drugs and Supplies

The following procedure codes may be reimbursed for drugs and supplies:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>A4267</td>
</tr>
</tbody>
</table>

* Procedure code J3490 may be reimbursed when a prescription medication to treat a genital infection is provided to the client.
Procedure codes A4268, A4269, and S4993 may be reimbursed when they are billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>V2501</td>
</tr>
<tr>
<td>V2549</td>
</tr>
</tbody>
</table>

Procedure code A9150 for the medication to treat a monilia infection is not reimbursed through Title XIX Medicaid. The drug is available through the Medicaid Vendor Drug Program with a prescription.

Refer to: Appendix B: Vendor Drug Program (Vol. 1, General Information) for information about outpatient prescription drugs and the Medicaid Vendor Drug Program.

2.3.6.1 Prescriptions and Dispensing Medication

Family planning agencies may do one or both of the following:

- Dispense family planning drugs and supplies directly to the client and bill accordingly.
- Write a prescription for the client to take to a pharmacy.

Family planning drugs and supplies that are dispensed directly to the client must be billed to TMHP or to the client’s Medicaid managed care organization (MCO). Only family planning agencies may be reimbursed for dispensing family planning drugs and supplies. Family planning agencies may be reimbursed for dispensing up to a one year supply of contraceptives in a 12-month period using procedure code J7303, J7304, or S4993. The appropriate family planning diagnosis code must be included on the claim.

Title XIX clients may have prescriptions filled at the clinic pharmacy or at another pharmacy. Pharmacies under the Vendor Drug Program are allowed to fill all prescriptions as prescribed. Family planning drugs and supplies are exempt from the three prescriptions-per-month rule for up to a six-month supply.

2.3.6.2 Injection Administration

Injection administration billed by a provider is reimbursed separately from the medication. If billed without procedure code J1055, procedure code 96372 must be billed with a family planning diagnosis and a description of the medication in the Remarks field of the claim. Injection administration is not payable to outpatient hospitals.

Refer to: Subsection 2.3, “Services, Benefits, Limitations, and Prior Authorization” in this handbook for a list of family planning diagnosis codes.

2.3.7 Medical Counseling and Education

Procedure code H1010 for the instruction in natural family planning methods may be reimbursed once per day, per person or per couple, when billed by any provider with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>V2501</td>
</tr>
<tr>
<td>V2541</td>
</tr>
</tbody>
</table>

Procedure code H1010 is intended to instruct a couple or an individual in methods of natural family planning. Two sessions (one per client) may be billed for separate, individual sessions, or one session may be billed for counseling and education if provided in a joint session. Each session may be billed separately or the two sessions may be billed together with a total charge for both sessions.
2.3.8 Sterilization and Sterilization-Related Procedures
For a complete list of Title XIX sterilization procedures, providers can refer to the Texas Medicaid fee schedules located on the TMHP website at http://public.tmhp.com/FeeSchedules/Default.aspx.

2.3.8.1 Sterilization Consent
Per federal regulation 42 CFR 50, Subpart B, all sterilization procedures require an approved Sterilization Consent Form.

Note: Hysterectomy Acknowledgment forms are not sterilization consents.

Refer to: Form GN.2, “Sterilization Consent Form (English)” in this handbook.
Form GN.3, “Sterilization Consent Form (Spanish)” in this handbook.
Form GN.1, “Sterilization Consent Form Instructions (2 pages)” in this handbook.

2.3.8.2 Anesthesia for Sterilization
Procedure codes 00840, 00851, and 00940 may be reimbursed for anesthesia for sterilization services in accordance with standard anesthesia billing requirements. Procedure codes 00840 and 00940 must also be billed with a family planning diagnosis code.

Refer to: Subsection 6.2.6.2, “Anesthesia” in Section 6, “Claims Filing” (Vol. 1, General Information) for more information about anesthesia modifiers.

2.3.8.3 Occlusive Sterilization Device
Procedure code A4264 may be reimbursed for the occlusive sterilization system (micro-insert), and may be reimbursed separately from the surgery (procedure code 58565) to place the device.

2.3.8.4 Tubal Ligation
Procedure code 58600, 58615, 58670, or 58671 may be reimbursed for tubal ligations.

2.3.8.5 Vasectomy
Procedure code 55250 may be reimbursed for any sterilization procedure that is performed on a male by a family planning agency. This procedure code may be reimbursed as a global fee to include preoperative, intra-operative, and postoperative services by all parties involved. Vasectomies are considered to be permanent, once-per-lifetime procedures. If a vasectomy has previously been reimbursed for the client, providers may appeal with documentation that supports the medical necessity for the repeat sterilization.

2.3.8.6 Facility Fees for Sterilization
Hospital-based and freestanding ambulatory surgical centers (HASCs/ASCs) may be reimbursed for procedure code 55200, 55250, 58565, 58600, 58615, 58670, 58671, or A4264. An appropriate family planning diagnosis code must be billed when reporting facility fees for procedure codes 55200, 58565, or 58670.

Refer to: Form OP.4, “Ambulatory Surgical Center” in the Outpatient Services Handbook (Vol. 2, Provider Handbooks) for more information about ASC billing procedures.

2.3.9 Prior Authorization
Prior authorization is not required for family planning services, including sterilization and sterilization-related procedures.

2.4 Documentation Requirements
All services require documentation to support the medical necessity of the service rendered, including gynecological and reproductive health, obstetrics, and family planning services.
Gynecological and reproductive health, obstetrics, and family planning services are subject to retrospective review and recoupment if documentation does not support the service billed.

2.5 Claims Filing and Reimbursement

2.5.1 Claims Information

Providers may use the following claim forms to submit claims to TMHP or the client’s MCO:

<table>
<thead>
<tr>
<th>Providers</th>
<th>Forms</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Medicaid Fee-For-Service Claims Submitted to TMHP</strong></td>
<td></td>
</tr>
<tr>
<td>All family planning services provided by physicians, PAs, NPs, CNSs, and family planning agencies who also contract with DSHS for Title V, X, or XX</td>
<td>Family Planning 2017 claim form or approved electronic format</td>
</tr>
<tr>
<td>Medicaid family planning providers who do not contract with DSHS for Title V, X, or XX</td>
<td>Family Planning 2017 claim form, CMS-1500 claim form, or approved electronic format of either form</td>
</tr>
<tr>
<td>Hospitals</td>
<td>UB-04 CMS-1450 claim form or approved electronic format</td>
</tr>
<tr>
<td>FQHCs not contracted with DSHS to provide Title V, X, or XX</td>
<td>UB-04 CMS-1450, Family Planning 2017 claim form, or approved electronic format of either form</td>
</tr>
<tr>
<td>FQHC also contracts with DSHS to provide Title V, X, or XX family planning services</td>
<td>Family Planning 2017 claim form or approved electronic format</td>
</tr>
</tbody>
</table>

| Medicaid Managed Care Claims Submitted to TMHP | |
| Physicians and other nonfacility family planning providers | Family Planning 2017 claim form or approved electronic format |
| Hospitals | UB-04 CMS-1450 claim form |

| Medicaid Managed Care Claims Submitted to the HMO | |
| Medicaid managed care organizations, including STAR+PLUS HMOs, are responsible for reimbursing providers for family planning benefits. A family planning provider does not have to contract with the client’s HMO to be reimbursed for family planning services. Title XIX family planning providers should contact the client’s health plan for billing instructions. | |
| Physicians and other nonfacility family planning providers | CMS-1500 |
| Hospitals | UB-04 CMS-1450 |

The following applies when filing claims:

- All claims and Sterilization Consent Forms submitted by family planning agencies must be submitted with benefit code FP3.
- Family planning services billed by RHCs must include modifier AJ, AM, SA, or U7. These services must be billed using the appropriate national place of service (72) for an RHC setting.
- When completing a Family Planning 2017, CMS-1500, or UB-04 CMS-1450 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.
- All claims must be filed within approved filing deadlines.
- Denied claims may be appealed.

Providers may copy Form GN.6, “Family Planning 2017 Claim Form” in this handbook or download it from the TMHP website at www.tmhp.com.
Providers may purchase CMS-1500 and UB-04 CMS-1450 claim forms from the vendor of their choice. TMHP does not supply the forms.

**Refer to:** Section 3: TMHP Electronic Data Interchange (EDI) (*Vol. 1, General Information*) for information on electronic claims submissions.

- Section 6: Claims Filing (*Vol. 1, General Information*) for general information about claims filing.
- Subsection 6.5.5, “CMS-1500 Instruction Table” in Section 6, “Claims Filing” (*Vol. 1, General Information*).
- Subsection 6.6.4, “UB-04 CMS-1450 Instruction Table” in Section 6, “Claims Filing” (*Vol. 1, General Information*).
- Section 7: Appeals (*Vol. 1, General Information*) for information about appealing claims.

Blocks that are not referenced are not required for processing by TMHP and may be left blank.

RHCs must use their National Provider Identifier (NPI), the appropriate benefit code as applicable, and the appropriate modifier and place of service as outlined in this section.

### 2.5.1.1 Family Planning and Third Party Liability

Federal and state regulations mandate that family planning client information be kept confidential. Because seeking information from third party insurance may jeopardize the client’s confidentiality, prior insurance billing is not a requirement for billing family planning for any title program.

### 2.5.1.2 Claims Filing For Title X-Supported Clinics

The following information applies to claims filing for Title X-supported clinics:

<table>
<thead>
<tr>
<th>Filing Media</th>
<th>Additional Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>Electronic TexMedConnect Claims</td>
<td>All claims and encounters for clients at Title X clinics must have Title X checked in the Title X Payment Level section under the Patient tab of the electronic claim form. This selection ensures that the required fields on the claim form are completed. Electronic claims filed for services provided to clients eligible for Title V, XIX, or XX must have the Funding Source box to which the claim is billed (Family Planning Program Block) checked on the Patient tab. The level of practitioner, in the General section of the Claim tab of the electronic claim form, must also be selected by a clinic that uses Title X funds. For Title X-only, the Title X box must be checked and the payment level must be selected in the Title X Payment Level block under the Patient tab. Depending on family size and income, the agency designates Title X clients as full pay, partial pay, or no pay for services. The Level of Practitioner in the General section of the Claim tab of the electronic claim form must also be selected.</td>
</tr>
</tbody>
</table>
2.5.2 Billing Procedures for Nonfamily Planning Services Provided During a Family Planning Visit (Title XIX Only)

When a nonfamily planning service is provided during a family planning visit or the client is offered family planning services during a medical visit, the following billing process must be used:

- A family planning agency must bill for nonfamily planning services using the performing provider’s identifier. The agency provider identifier is used to bill family planning services only.

- The performing provider or FQHC must bill both family planning services and nonfamily planning services, using the correct provider identifier.

- An RHC may bill a rural health encounter for a nonfamily planning medical condition or use the physician’s or NP’s provider identifier to bill for family planning services. If the RHC also is enrolled as a family planning agency, the family planning services may be billed using the agency’s family planning provider identifier and the appropriate national place of service (72) for an RHC setting.

2.5.3 National Drug Code

3. WOMEN’S HEALTH PROGRAM (TITLE XIX FAMILY PLANNING)

3.1 Women’s Health Program (WHP) Provider Enrollment

Providers who deliver family planning services, have completed the Medicaid-enrollment process through TMHP, and do not perform elective abortions are eligible to participate. The following provider types may bill family planning services under WHP:

- Physician
- PA
- NP
- CNS
- CNM
- FQHC
- Family planning agency

Additional Information

<table>
<thead>
<tr>
<th>Filing Media</th>
<th>Additional Information</th>
</tr>
</thead>
<tbody>
<tr>
<td>Family Planning 2017 paper claim forms</td>
<td>Claims filed for services provided to clients eligible for Title V, XIX, or XX must have the funding source to which the claim is billed checked in Block 1 of the Family Planning 2017 claim form. Block 28, Level of Practitioner, must be completed for every Family Planning 2017 claim form submitted by a clinic that uses Title X funds. For Title X-only, the payment level must be selected in the Title X Only section of Block 1a. Depending on family size and income, the agency designates Title X clients as full pay, partial pay, or no pay for services. Block 28, Level of Practitioner, must also be completed.</td>
</tr>
<tr>
<td>Other Electronic Claims (other than TexMedConnect)</td>
<td>Electronic claims that are not submitted through TexMedConnect must follow the specifications for electronic claim submission. Providers should contact their commercial software vendor or TMHP through the TMHP website at <a href="http://www.tmhp.com">www.tmhp.com</a> or call the TMHP Electronic Data Interchange (EDI) Help Desk at 1-888-863-3638 for more information.</td>
</tr>
</tbody>
</table>
• ASCs and HASCs (for tubal ligations and other sterilization procedures)
• Laboratory
• RHC

Refer to: Section 1: Provider Enrollment and Responsibilities (Vol. 1, General Information) for more information about enrollment procedures.

Subsection 2.1, “Title XIX Provider Enrollment” in this handbook.

3.2 WHP Overview

WHP was authorized by the 79th Texas Legislature in 2005 and implemented by HHSC in January 2007. The Centers for Medicare & Medicaid Services (CMS) granted HHSC a demonstration waiver to operate WHP from January 1, 2007, through December 31, 2011. The goal of the program is to expand access to family planning services to reduce unintended pregnancies in the eligible population. WHP participants receive a limited family planning benefit that supports the goal of the program. WHP participants do not have access to full Texas Medicaid coverage. Not all Texas Medicaid family planning benefits are payable under WHP.

Refer to: Subsection 2.2, “Family Planning Overview” in this handbook for an overview of family planning funding sources.

3.2.1 Guidelines for WHP Family Planning Providers

WHP provides an annual family planning exam, family planning services, and contraception for women who meet the following qualifications:

- Must be 18 through 44 years of age
- Must be a United States citizen or eligible immigrant
- Must be a resident of Texas
- Does not currently receive full Medicaid benefits including Medicaid for pregnant women, Children’s Health Insurance Program (CHIP), or Medicare Part A or B.
- Does not have other insurance that covers family planning services, or has insurance that covers family planning services, but filing a claim on the health insurance would cause physical, emotional or other harm from a spouse, parent, or other person
- Has a household income at or below 185 percent of the federal poverty level
- Is not pregnant
- Is not sterile, infertile, or unable to get pregnant because of medical reasons

Note: Women who have received a sterilization procedure, but have not been confirmed to be sterile, may be eligible for sterilization follow-up services.

Family planning services are provided by a physician or under physician direction, not necessarily personal supervision. A physician provides direction for family planning services through written standing delegation orders and medical protocols. The physician is not required to be on the premises for the provision of family planning services by an RN, PA, NP, or CNS. WHP participants may receive services from any provider that participates in the WHP.

Family planning clients must be allowed freedom of choice in the selection of contraceptive methods as medically appropriate. They must also be allowed the freedom to accept or reject services without coercion. All FDA-approved methods of contraception must be made available to the client, either directly or by referral to another provider of contraceptive services. Services must be provided without
regard to age, marital status, sex, race, ethnicity, parenthood, handicap, religion, national origin, or contraceptive preference. Only family planning clients, not their parents, spouses, or any other individuals may consent to the provision of family planning services funded by Title XIX.

3.2.2 Referrals
Per federal government requirements, if a WHP provider identifies a health problem such as diabetes or high blood pressure, the provider must refer the WHP patient to another doctor or clinic that can treat her. As mandated by Section 32.0248, Human Resources Code, WHP does not reimburse for office visits where WHP clients are referred for elective abortions.

HHSC prefers that clients be referred to local indigent care services. However, the toll-free Information and Referral hotline, 2-1-1 can assist clients and providers with locating low-cost health services for clients in need.

3.2.2.1 Referrals for Breast and Cervical Cancer Screening, Diagnostics, and Treatment
The Breast and Cervical Cancer Services program (BCCS) offers breast and cervical cancer screening and diagnostic services, and cervical dysplasia treatment throughout Texas at no or low-cost to eligible women.

3.2.2.2 Referrals for Clients Diagnosed with Breast or Cervical Cancer
Medicaid for Breast and Cervical Cancer (MBCC) provides access to cancer treatment through full Medicaid benefits for qualified women diagnosed with breast or cervical cancer. Health facilities that contract with BCCS are responsible for assisting women with the MBCC application.

To find a BCCS provider, call 2-1-1. For questions about the BCCS program, contact the state office at 1-512-458-7796, or visit www.dshs.state.tx.us/bcccs/.

3.2.3 Abortions
Elective and non-elective abortions are not reimbursable services under the WHP.

In addition, Section 32.0248, Human Resources Code, prohibits payment of WHP funds to a provider that performs elective abortions. A provider that performs elective abortions (through either surgical or medical methods) for any patient is ineligible to serve WHP clients and cannot be reimbursed for those services. This prohibition has been in effect since September 1, 2005. This prohibition only applies to providers delivering services to WHP clients. The prohibition does not impact services delivered to Medicaid clients not enrolled in the WHP.

“Elective abortion” means the use of any means to terminate the pregnancy of a female whom the attending physician knows to be pregnant with the intention that the termination of the pregnancy by those means is reasonably likely to cause the death of the fetus, except that the term does not include an abortion: (1) to terminate a pregnancy that resulted from an act of rape or incest; or (2) in the case where a woman suffers from a physical disorder, physical injury, or physical illness, including a life-endangering physical condition caused by or arising from the pregnancy itself, that would, as certified by a physician, place a woman in danger of death unless an abortion is performed.

Each year, WHP providers must disclose to TMHP, in writing, whether or not they have performed elective abortions within the past calendar year. WHP providers must complete the WHP Provider Certification form with an original signature. Providers may also use the TMHP website to disclose the required information. The written form must be completed and submitted with an original handwritten signature, even if the information is additionally submitted online.

Submitting the certification online will display for clients on the Online Provider Lookup (OPL) that the provider renders WHP services.
3.3 Services, Benefits, Limitations, and Prior Authorization

This section includes information on family planning services funded through WHP. WHP benefits are limited Title XIX benefits including:

- Family planning annual exams
- Other family planning office or outpatient visits
- Laboratory procedures
- Radiology services
-Contraceptive devices and related procedures
- Drugs and supplies
- Medical counseling and education
- Sterilization and sterilization-related procedures (i.e., tubal ligation and anesthesia for sterilization)

For WHP family planning claims to process correctly, providers must use one of the following diagnosis codes in conjunction with all WHP family planning procedures and services:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>V2501</td>
</tr>
<tr>
<td>V2542</td>
</tr>
</tbody>
</table>

The choice of diagnosis code must be based on the type of family planning service performed.

3.3.1 Family Planning Annual Exams

Family planning providers must bill the most appropriate E/M visit procedure code for the complexity of the annual family planning examination provided. To bill an annual family planning examination, one of the following procedure codes must be billed with modifier FP and a WHP diagnosis code:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99201</td>
</tr>
</tbody>
</table>

Important: Only the annual family planning examination requires modifier FP. All other family planning office visits do not. One annual family planning examination is allowed per year. Claims filed incorrectly may be denied.

The following table summarizes the uses for the E/M procedure codes and the corresponding billing requirements for the annual examination:

<table>
<thead>
<tr>
<th>Billing Criteria</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>New patient: Most appropriate E/M procedure code (99201–99205) with modifier FP and a WHP diagnosis code</td>
<td>One new patient E/M code every 3 years following the last E/M visit provided the client by that provider or a provider of the same specialty in the same group</td>
</tr>
<tr>
<td>Established patient: Most appropriate E/M procedure code (99211–99215) with modifier FP and a WHP diagnosis code</td>
<td>Once a year*</td>
</tr>
</tbody>
</table>

Refer to: Subsection 3.3, “Services, Benefits, Limitations, and Prior Authorization” in this handbook for the list of WHP diagnosis codes.
### 3.3.1.1 FQHC Reimbursement for Family Planning Annual Exams

To receive their encounter rate for the annual family planning examination for WHP clients, FQHCs must use the most appropriate E/M procedure code for the complexity of service provided as indicated in the previous tables in subsection 3.3.1, “Family Planning Annual Exams” in this handbook.

The annual exam is allowed once per fiscal year, per client, per provider. Other family planning office or outpatient visits may be billed within the same year.

A new patient visit for the annual exam may be reimbursed once every three years following the last E/M visit provided to the client by that provider or a provider of the same specialty in the same group. The annual examination must be billed as an established patient visit if E/M services have been provided to the client within the last three years.

Reimbursement for services payable to an FQHC is based on an all-inclusive rate per visit.

### 3.3.2 Other Family Planning Office or Outpatient Visits

WHP only covers office or other outpatient family planning visits if the primary purpose of the visit is related to contraceptive management, as indicated by the allowable diagnosis codes previously listed. WHP does not cover office or other outpatient family planning visits when the primary purpose of the visit is not related to contraceptive management, such as visits for the purpose of pregnancy testing only, sexually transmitted infection testing, or a repeat Pap test after an abnormal result.

A provider is allowed to bill clients for services that are not a benefit of WHP.

Refer to: Subsection 1.4.9.1, “Client Acknowledgment Statement” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1. General Information).

For office or other outpatient family planning E/M visits, providers must bill one of the following procedure codes based on the complexity of the visit with a WHP family planning diagnosis code:

| Procedure Codes |
|-----------------|-----------------|-----------------|-----------------|-----------------|-----------------|-----------------|-----------------|-----------------|-----------------|
| 99201 | 99202 | 99203 | 99204 | 99205 | 99211 | 99212 | 99213 | 99214 | 99215 |

**Important:** Family planning E/M office and outpatient visits **should not be billed with modifier FP. Claims filed incorrectly may be denied.**

The following table summarizes the uses for the E/M procedure codes and the corresponding billing requirements for each type of visit:

<table>
<thead>
<tr>
<th>Billing Criteria</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>New patient:</strong> Most appropriate E/M procedure code (99201–99205) with a WHP diagnosis code</td>
<td>One new patient E/M code every 3 years following the last E/M visit provided the client by that provider or a provider of the same specialty in the same group</td>
</tr>
<tr>
<td><strong>Established patient:</strong> Most appropriate E/M procedure code (99211–99215) with a WHP diagnosis code</td>
<td>As needed*</td>
</tr>
</tbody>
</table>

*The established patient procedure code will be denied if a new patient procedure code has been billed in the same year.*

Refer to: Subsection 3.3, “Services, Benefits, Limitations, and Prior Authorization” in this handbook for the list of WHP diagnosis codes.

Family planning services provided during a WHP visit in which only family planning services were provided must be submitted with these procedure codes and the most appropriate informational procedure codes for services that were rendered.
The procedure codes in the previous table are allowed for routine contraceptive surveillance, family planning counseling and education, and contraceptive problems. Depending on the extent of the services provided during the office visit, providers may bill for the maximum allowable fees.

During any visit for a medical problem or follow-up visit the following must occur:

- An update of the client’s relevant history
- Physical exam, if indicated
- Laboratory tests, if indicated
- Treatment or referral, if indicated
- Education and counseling, or referral, if indicated
- Scheduling of office or clinic visit, if indicated

3.3.2.1 FQHC Reimbursement for Other Family Planning Office or Outpatient Visits

FQHCs may be reimbursed for three family planning encounters per client, per year regardless of the reason for the encounter. The three encounters may include any combination of general family planning encounters, an annual family planning examination, or procedure code J7300, J7302, or J7307.

A WHP diagnosis code must be billed along with the most appropriate informational procedure codes for the services that were rendered. Reimbursement for services payable to an FQHC is based on an all-inclusive rate per visit.

Refer to: Section 5, “Federally Qualified Health Center (FQHC)” in the Outpatient Services Handbook, (Volume 2, Provider Handbooks) for more information about FQHC services.

3.3.3 Laboratory Procedures

If the provider who obtains the specimen does not perform the laboratory procedure, the provider who obtains the specimen may be reimbursed one lab handling fee per day, per client. The fee for the handling or conveyance of the specimen for transfer from the provider’s office to a laboratory may be reimbursed using procedure code 99000 and a family planning diagnosis code. More than one lab handling fee may be reimbursed per day if multiple specimens are obtained and sent to different laboratories.

Handling fees are not paid for Pap smears or cultures. When billing for Pap smear interpretations, the claim must indicate that the screening and interpretation were actually performed in the office by using the modifier SU, procedure performed in physician’s office.

Providers must forward the client’s name, address, Medicaid number, and a family planning diagnosis with any specimen, including Pap smears, to the reference laboratory so the laboratory may bill the WHP for its family planning lab services.

When family planning test specimens, such as Pap smears, are collected, providers must direct the laboratory to indicate that the claim for the test is to be billed as a family planning service (i.e., procedure must be billed with a WHP qualifying diagnosis code).

Refer to: Subsection 2.3.3, “Laboratory Procedures” in this handbook for more information about family planning laboratory services.

WHP laboratory services may be submitted using the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>80061</th>
<th>81000</th>
<th>81001</th>
<th>81002</th>
<th>81003</th>
<th>81015</th>
<th>81025</th>
<th>82947</th>
<th>82948</th>
<th>84443</th>
</tr>
</thead>
<tbody>
<tr>
<td>84702</td>
<td>84703</td>
<td>85013</td>
<td>85014</td>
<td>85018</td>
<td>85025</td>
<td>85027</td>
<td>85028</td>
<td>86318</td>
<td>86580</td>
<td>86592</td>
</tr>
<tr>
<td>86689</td>
<td>86695</td>
<td>86696</td>
<td>86701</td>
<td>86703</td>
<td>86762</td>
<td>86803</td>
<td>86900</td>
<td>86901</td>
<td>87070</td>
<td></td>
</tr>
<tr>
<td>87086</td>
<td>87088</td>
<td>87102</td>
<td>87110</td>
<td>87205</td>
<td>87210</td>
<td>87220</td>
<td>87252</td>
<td>87340</td>
<td>87480</td>
<td></td>
</tr>
<tr>
<td>87490</td>
<td>87491</td>
<td>87510</td>
<td>87590</td>
<td>87591</td>
<td>87621</td>
<td>87660</td>
<td>87797</td>
<td>87800</td>
<td>87810</td>
<td></td>
</tr>
<tr>
<td>87850</td>
<td>88142</td>
<td>88150</td>
<td>88164</td>
<td>88175</td>
<td>99000</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Appropriate documentation must be kept in the client’s record.

Procedure code 87797 will be denied if submitted for the same date of service as procedure code 87800. Providers are reminded to code to the highest level of specificity with a diagnosis to support medical necessity when submitting procedure code 87797. Claims may be subject to retrospective review if they are submitted with diagnosis codes that do not support medical necessity.

If more than one of procedure codes 87480, 87510, 87660, or 87800 is submitted by the same provider for the same client with the same date of service, all of the procedure codes will be denied.

### 3.3.4 Radiology

The following procedure codes may be reimbursed for radiology services:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>74000</th>
<th>74010</th>
<th>74740</th>
<th>76830</th>
<th>76856</th>
<th>76857</th>
<th>76880</th>
<th>76881</th>
<th>76882</th>
</tr>
</thead>
</table>

### 3.3.5 Contraceptive Devices and Related Procedures

The following procedure codes may be reimbursed for contraceptive devices and related procedures:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>11975</th>
<th>11976</th>
<th>11977</th>
<th>57170</th>
<th>58300</th>
<th>58301</th>
<th>A4261</th>
<th>A4266</th>
<th>J7300</th>
<th>J7302</th>
</tr>
</thead>
</table>

Procedure code 11975 may be reimbursed when it is billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
<th>V2501</th>
<th>V2502</th>
<th>V2504</th>
<th>V2509</th>
<th>V252</th>

</tbody>
</table>

Procedure code 11976 may be reimbursed when it is billed with diagnosis code V2543.

Procedure code 11977 may be reimbursed when it is billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
<th>V2501</th>
<th>V2502</th>
<th>V2509</th>
<th>V252</th>

Procedure code J7302 may be reimbursed when it is billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>V2502</td>
</tr>
<tr>
<td>V2511</td>
</tr>
<tr>
<td>V2542</td>
</tr>
<tr>
<td>V259</td>
</tr>
</tbody>
</table>

Procedure codes J7300 or J7302 must be billed with procedure code 58300 on the same date of service to receive reimbursement for the IUD and the insertion of the IUD.

An E/M procedure code will not be reimbursed when it is billed with the same date of service as procedure code 58301.

3.3.6 Drugs and Supplies

Procedure codes A4267, A4268, A4269, J1055, J7303, J7304, and S4993 may be reimbursed for drugs and supplies.

Procedure codes A4268, A4269, and S4993 may be reimbursed when they are billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>

</thead>
<tbody>
<tr>
<td>V2549</td>
</tr>
</tbody>
</table>

3.3.6.1 Prescriptions and Dispensing Medication

Family planning agencies may do one or both of the following:

- Dispense family planning drugs and supplies directly to the client and bill TMHP.
- Write a prescription for the client to take to a pharmacy.

Family planning drugs and supplies that are dispensed directly to the client must be billed to TMHP. Only family planning agencies may be reimbursed for dispensing family planning drugs and supplies. Family planning agencies may be reimbursed for dispensing up to a one year supply of contraceptives in a 12-month period using procedure code J7303, J7304, or S4993. The appropriate family planning diagnosis code must be included on the claim.

Pharmacies under the Vendor Drug Program are allowed to fill all prescriptions as prescribed. Family planning drugs and supplies are exempt from the three prescriptions-per-month rule for up to a six-month supply.

Refer to: Appendix B: Vendor Drug Program (Vol. 1, General Information) for information about outpatient prescription drugs and the Vendor Drug Program.

3.3.7 Instruction in Natural Family Planning Methods

Procedure code H1010 is a benefit of WHP and is limited to one service per day when billed by any provider with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>V2501</td>
</tr>
<tr>
<td>V2509</td>
</tr>
<tr>
<td>V2512</td>
</tr>
<tr>
<td>V2540</td>
</tr>
</tbody>
</table>
Procedure code H1010 is intended to instruct a couple or an individual in methods of natural family planning and may consist of two sessions. Each session may be billed separately or the two sessions may be billed together with a total charge for both sessions.

### 3.3.8 Sterilization and Sterilization-Related Procedures

Sterilization services may be reimbursed separately to family planning agencies or physicians. Sterilizations are considered to be permanent, once per lifetime procedures. Denied claims may be appealed with documentation that supports the medical necessity for a repeat sterilization.

The sterilization services that are available to WHP clients include surgical or nonsurgical sterilization, follow-up office visits related to confirming the sterilization, and any necessary short-term contraception. No other services are covered for WHP clients who have been sterilized.

The WHP covers sterilization as a form of birth control. To be eligible for a sterilization procedure through the WHP, the client must be 21 years of age or older and must complete and sign a Sterilization Consent Form within at least 30 days of the date of the surgery but no more than 180 days. In the case of an emergency, there must be at least 72 hours between the date on which the consent form is signed and the date of the surgery. Operative reports that detail the need for emergency surgery are required.

The WHP may reimburse providers for a follow-up visit that includes a hysterosalpingogram to ensure tubal occlusion, which is recommended three months after a hysteroscopic sterilization procedure. The WHP may also reimburse providers for short-term contraceptives dispensed following the insertion of an occlusive sterilization system.

#### 3.3.8.1 Sterilization Consent

Per federal regulation 42 Code of Federal Regulations (CFR) 50, Subpart B, all sterilization procedures require an approved Sterilization Consent Form.

**Note:** *Hysterectomy Acknowledgment forms are not sterilization consents.*

**Refer to:**
- Form GN.2, “Sterilization Consent Form (English)” in this handbook.
- Form GN.3, “Sterilization Consent Form (Spanish)” in this handbook.
- Form GN.1, “Sterilization Consent Form Instructions (2 pages)” in this handbook.

#### 3.3.8.2 Tubal Ligation

Procedure code 58600, 58611, 58615, 58670, or 58671 may be reimbursed for tubal ligations.

#### 3.3.8.3 Anesthesia for Sterilization

Procedure code 00851 must be used when reporting anesthesia services for a tubal ligation sterilization procedure.

#### 3.3.8.4 Facility Fees for Sterilization

Hospital-based and freestanding ASCs may be reimbursed for procedure code 58565, 58600, 58615, 58670, 58671, or A4264. An appropriate WHP diagnosis code must be billed when reporting facility fees related to tubal ligation.

**Refer to:** Section 2, “Ambulatory Surgical Center and Hospital Ambulatory Surgical Center” in the *Outpatient Services Handbook (Vol. 2, Provider Handbooks)* for more information about ASC billing procedures.
3.3.8.5 Hysteroscopic Sterilization

Providers must use procedure code 58340 or procedure code 58565 with diagnosis code V252 to submit claims for the fallopian tube occlusion sterilization. Procedure code 58565 is considered bilateral.

The occlusive sterilization system (micro-insert) is a benefit when billed with procedure code A4264. Procedure code A4264 may be reimbursed for females 10 years through 55 years of age.

3.3.8.6 WHP Services After Sterilization

A hysterosalpingogram is recommended three months after a hysteroscopic sterilization procedure to ensure tubal occlusion. Procedure code 74740 and 58340 are considered for reimbursement in this circumstance when billed with diagnosis code V252.

Federally qualified health center (FQHC) and rural health center (RHC) providers may bill procedure codes 99201 and 99211 with an appropriate WHP diagnosis code to receive their encounter reimbursement for follow-up services to confirm the sterilization of WHP clients. FQHC providers may be reimbursed up to three encounter rates per calendar year, per client. RHC providers may be reimbursed one encounter rate per calendar year, per client for family planning visits provided through WHP.

3.3.9 WHP Client Eligibility

3.3.9.1 Clients Who Have Received Sterilization Services

After the sterilization and all related services have been completed, the client is no longer eligible for WHP services and should disenroll from the program. Clients who have been sterilized cannot enroll in the WHP unless they are seeking to have the sterilization confirmed. Clients may enroll in the WHP to confirm the sterilization, but must disenroll afterwards.

Providers must inform WHP clients who seek sterilization that, after the sterilization procedure, the WHP covers only the follow-up visit to confirm the sterilization and the short-term contraceptives that are dispensed for the 12-week period following the insertion of an occlusive sterilization system.

A client who has been approved for WHP coverage remains enrolled in the program for 12 continuous months even if a sterilization procedure has been performed during the 12-months of coverage. After sterilization has been confirmed, a client is not eligible to renew WHP coverage.

After an occlusive sterilization procedure, if the client’s 12-month WHP coverage lapses before the sterilization is confirmed, the client may reapply for coverage in order to access short-term contraceptives and the hysterosalpingography necessary to confirm that the fallopian tubes are blocked. If it has not been confirmed that the occlusive sterilization system is blocking the fallopian tubes, the client is not considered to have been sterilized.

A WHP client can be disenrolled from the program before the 12-month term ends only in the following cases:

- The client dies.
- The client voluntarily withdraws from the WHP.
- The client becomes eligible for full Medicaid, the Children’s Health Insurance Program (CHIP), or another publicly-funded health coverage program that is more comprehensive than WHP.
- HHSC discovers the client gave fraudulent information on the application.
- The client moves out of Texas.
If it is discovered during the visit that the client has received a surgical or nonsurgical sterilization procedure before enrolling with the WHP, but the client did not indicate that information on the WHP application (e.g., because she filled out the WHP application incorrectly, she misunderstood the question), the provider should:

- Inform the client that she is no longer eligible to receive WHP services and that she is responsible for all of the fees for services rendered.
- Encourage the client to call 1-866-993-9972 to voluntarily withdraw from the WHP.

If a provider suspects that a WHP client has committed fraud on the application, the provider should report the client to the Health and Human Services (HHSC) Office of Inspector General (OIG) at 1-800-436-6184.

### 3.3.9.2 Eligibility Verification

The WHP Medicaid Identification card (Form H3087) visibly indicates the program in the black box in the upper right area of the card. The card also contains a notice to providers that WHP-covered services are limited to an annual visit and exam and contraception, except emergency contraception.

Client eligibility may be verified using the following sources:

- www.tmhp.com
- Automated Inquiry System (AIS)
- TexMedConnect

Refer to: Subsection 4.5.3, “Client Eligibility Verification” in Section 4, “Client Eligibility” (Vol. 1, General Information).

WHP clients will have the following identifiers on the feedback received from the stated source:

- Medicaid Coverage: W - MA - WHP
- Program Type: 68 - MEDICAL ASSISTANCE - WOMEN’S HEALTH PR
- Program: 100 - MEDICAID
- Benefit Plan: 100 - Traditional Medicaid

### 3.3.10 Prior Authorization

Prior authorization is not required for WHP services.

### 3.4 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including WHP services.

WHP services are subject to retrospective review and recoupment if documentation does not support the service billed.

### 3.5 WHP Claims Filing and Reimbursement

#### 3.5.1 Claims Information

Providers must use the appropriate claim form to submit WHP claims to TMHP.

Refer to: Subsection 2.5, “Claims Filing and Reimbursement” in this handbook for more information about filing family planning claims.
3.5.1.1 WHP and Third Party Liability
Federal and state regulations mandate that family planning client information be kept confidential. Because seeking information from third party insurance may jeopardize the client’s confidentiality, third party billing for WHP is not allowed.

3.5.2 Reimbursement
Services provided under WHP are reimbursed according to Medicaid rules at standard Medicaid rates.

3.5.3 National Drug Code

4. DEPARTMENT OF STATE HEALTH SERVICES (DSHS) TITLES V, X, AND XX FAMILY PLANNING SERVICES

4.1 Provider Enrollment for Titles V, X, and XX Contractors
Agencies that submit claims or encounters for Title V, X, or XX Family Planning services must have a contract with DSHS. The DSHS Community Health Services Section determines client eligibility and services policy. Refer to the DSHS Title V, X, and XX Family Planning Manual for specific eligibility and policy information at www.dshs.state.tx.us/famplan.

Refer to: Section 1: Provider Enrollment and Responsibilities (Vol. 1, General Information) for more information about enrollment procedures.

Subsection 2.1, “Title XIX Provider Enrollment” in this handbook.

4.2 Family Planning Providers
TMHP processes family planning claims and encounters for four different funding sources administered through DSHS and HHSC. These funding sources include Titles V, X, XIX, and XX.

Refer to: Subsection 2.2, “Family Planning Overview” in this handbook for more information about family planning funding sources, guidelines for family planning providers, and family planning services for undocumented aliens and legalized aliens.

4.3 Services, Benefits, Limitations, and Prior Authorization
This section contains information about family planning services funded through Titles V, X, and XX funding sources including:

- Family planning annual exams
- Other family planning office or outpatient visits
- Laboratory procedures
- Radiology services
- Contraceptive devices and related procedures
- Drugs and supplies
- Medical counseling and education
- Sterilization and sterilization-related procedures (i.e., tubal ligation, vasectomy, and anesthesia for sterilization)
For Title V, X, or XX claims, providers are encouraged to include one of the following family planning diagnosis codes on the claim in conjunction with all family planning procedures and services:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>V2501</td>
</tr>
<tr>
<td>V2542</td>
</tr>
</tbody>
</table>

One of the diagnosis codes in this table may be included in Block 24 E of the CMS-1500 claim form referencing the appropriate procedure code. The choice of diagnosis code must be based on the type of family planning service performed.

### 4.3.1 Titles V and XX Family Planning Annual Exams

An annual family planning exam consists of a comprehensive health history and physical examination, including medical laboratory evaluations as indicated, an assessment of the client’s problems and needs, and the implementation of an appropriate contraceptive management plan.

Titles V and XX family providers must bill the most appropriate E/M visit procedure code for the complexity of the annual family planning examination provided. To bill an annual family planning examination, one of the following procedure codes must be billed with modifier FP:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>Title V Fee</th>
<th>Title XX Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>99201</td>
<td>$22.64</td>
<td>$22.64</td>
</tr>
<tr>
<td>99202</td>
<td>$35.73</td>
<td>$35.73</td>
</tr>
<tr>
<td>99203</td>
<td>$48.28</td>
<td>$48.28</td>
</tr>
<tr>
<td>99204</td>
<td>$70.64</td>
<td>$70.64</td>
</tr>
<tr>
<td>99205</td>
<td>$87.83</td>
<td>$87.83</td>
</tr>
<tr>
<td>99211</td>
<td>$11.73</td>
<td>$11.73</td>
</tr>
<tr>
<td>99212</td>
<td>$19.64</td>
<td>$19.64</td>
</tr>
<tr>
<td>99213</td>
<td>$29.52</td>
<td>$29.52</td>
</tr>
<tr>
<td>99214</td>
<td>$41.46</td>
<td>$41.46</td>
</tr>
<tr>
<td>99215</td>
<td>$63.83</td>
<td>$63.83</td>
</tr>
</tbody>
</table>

The following table summarizes the uses for the E/M procedure codes and the corresponding billing requirements for the annual examination:

<table>
<thead>
<tr>
<th>Billing Criteria</th>
<th>Frequency</th>
</tr>
</thead>
<tbody>
<tr>
<td>New patient: Procedure codes 99201–99205 with modifier FP</td>
<td>One new patient E/M code every three years following the last E/M visit provided the client by that provider or a provider of the same specialty in the same group</td>
</tr>
<tr>
<td>Established patient: Procedure codes 99211–99215 with modifier FP</td>
<td>Once a year*</td>
</tr>
</tbody>
</table>

* The established patient procedure code will be denied if a new patient procedure code has been billed for the annual examination in the same year.

For appropriate claims processing, providers are encouraged to use a family planning diagnosis code to bill the annual family planning exam for Titles V and XX clients.

Refer to: Subsection 4.3, “Services, Benefits, Limitations, and Prior Authorization” in this handbook for the list of family planning diagnosis codes.
An annual family planning examination ( billed with modifier FP) will not be reimbursed when submitted with the same date of service as an additional E/M visit. If another condition requiring an E/M office visit beyond the required components for an office visit, family planning visit, or surgical procedure is discovered, the provider may submit a claim for the additional visit using Modifier 25 to indicate that the client’s condition required a significant, separately identifiable E/M service. Documentation supporting the provision of a significant, separately identifiable E/M service must be maintained in the client’s medical record and made available to Texas Medicaid upon request.

4.3.1.1 FQHC Reimbursement for Titles V and XX Family Planning Annual Exams

To receive the encounter rate for the annual family planning examination, FQHCs must use the most appropriate E/M procedure code for the complexity of service provided as indicated in the previous table in subsection 4.3.1, “Titles V and XX Family Planning Annual Exams” in this handbook and must use modifier FP.

The annual exam is allowed once per fiscal year, per client, per provider. Other family planning office or outpatient visits may be billed within the same year.

A new patient visit for the annual exam may be reimbursed once every three years following the last E/M visit provided to the client by that provider or a provider of the same specialty in the same group. The annual examination must be billed as an established patient visit if E/M services have been provided to the client within the last three years.

Reimbursement for services payable to an FQHC is based on an all-inclusive rate per visit.

4.3.2 Title V and XX Family Planning Office or Outpatient Visits

Other family planning E/M visits are allowed for routine contraceptive surveillance, family planning counseling and education, contraceptive problems, suspicion of pregnancy, genitourinary infections, and evaluation of other reproductive system symptoms.

During any visit for a medical problem or follow-up visit, the following must occur:

- An update of the client’s relevant history
- Physical exam, if indicated
- Laboratory tests, if indicated
- Treatment or referral, if indicated
- Education and counseling, or referral, if indicated
- Scheduling of office or clinic visit, if indicated

For general family planning visits, Titles V and XX family providers must bill one of the following, most appropriate E/M procedure code:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>Title V Fee</th>
<th>Title XX Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>99201</td>
<td>$22.64</td>
<td>$22.64</td>
</tr>
<tr>
<td>99202</td>
<td>$35.73</td>
<td>$35.73</td>
</tr>
<tr>
<td>99203</td>
<td>$48.28</td>
<td>$48.28</td>
</tr>
<tr>
<td>99204</td>
<td>$70.64</td>
<td>$70.64</td>
</tr>
<tr>
<td>99205</td>
<td>$87.83</td>
<td>$87.83</td>
</tr>
<tr>
<td>99211</td>
<td>$11.73</td>
<td>$11.73</td>
</tr>
<tr>
<td>99212</td>
<td>$19.64</td>
<td>$19.64</td>
</tr>
<tr>
<td>99213</td>
<td>$29.52</td>
<td>$29.52</td>
</tr>
<tr>
<td>99214</td>
<td>$41.46</td>
<td>$41.46</td>
</tr>
</tbody>
</table>
The following table summarizes the uses for the E/M procedure codes and the corresponding billing requirements for general family planning office or outpatient visits:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>Title V Fee</th>
<th>Title XX Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>99215</td>
<td>$63.83</td>
<td>$63.83</td>
</tr>
</tbody>
</table>

For appropriate claims processing, providers are encouraged to use a family planning diagnosis code to bill the annual family planning exam for Titles V and XX clients.

Refer to: Subsection 4.3, “Services, Benefits, Limitations, and Prior Authorization” in this handbook for the list of family planning diagnosis codes.

**4.3.2.1 FQHC Reimbursement for Title V and XX Family Planning Office or Outpatient Visits**

To receive the encounter rate for a general family planning visit FQHCs must use the most appropriate E/M procedure code for the complexity of service provided as indicated previously in the tables in subsection 3.5.3, ”National Drug Code“ in this handbook.

FQHCs may be reimbursed for three family planning encounters per client, per year regardless of the reason for the encounter. The three encounters may include any combination of general family planning encounters, an annual family planning examination, or procedure code J7300, J7302, or J7307.

The new patient procedure codes will be limited to one new patient E/M procedure code three years following the last E/M visit provided to the client by that provider or a provider of the same specialty in the same group. The annual examination must be billed as an established patient visit if E/M services have been provided to the client within the last three years.

Reimbursement for services payable to an FQHC is based on an all-inclusive rate per visit.

A general family planning office or outpatient visit (billed without modifier FP) will not be reimbursed when submitted with the same date of service as an additional E/M visit. If another condition requiring an E/M office visit beyond the required components for an office visit, family planning visit, or surgical procedure is discovered, the provider may submit a claim for the additional visit using Modifier 25 to indicate that the client’s condition required a significant, separately identifiable E/M service. Documentation supporting the provision of a significant, separately identifiable E/M service must be maintained in the client’s medical record and made available to Texas Medicaid upon request.

Refer to: Section 5, “Federally Qualified Health Center (FQHC)” in the Outpatient Services Handbook, (Volume 2, Provider Handbooks) for more information about FQHC services.

**4.3.3 Laboratory Procedures**

**4.3.3.1 Title V Only**

Laboratory tests for Title V clients may be sent to the DSHS laboratory or one of its designated affiliates for processing at no cost to the provider. This cost is covered by the Title V Program and the DSHS Laboratory.
Providers who choose not to use the DSHS laboratories can send their specimens to another laboratory of their choice, but they are not reimbursed by DSHS for those services. These tests, whether provided by DSHS or another laboratory facility, must be documented on the Family Planning claim form to track the services provided and to collect accurate statewide data.

4.3.3.2 **Titles V and XX**

The following procedure codes may be reimbursed for Titles V and XX family planning laboratory services:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Title V Fee</th>
<th>Title XX Fee</th>

<td>$11.16</td>
</tr>
</tbody>
</table>

* Title V providers do not receive reimbursement for services performed free of charge by the DSHS Laboratory. For correct tracking of services performed, providers are required to include these services on their Title V Family Planning claims filed with TMHP.
Appropriate documentation must be maintained in the client's record.

Refer to: Subsection 3.3.3, "Laboratory Procedures" in this handbook for more information about family planning laboratory services requirements.

### 4.3.4 Radiology

The following radiology services may be reimbursed for services performed for the purpose of localization of an IUD:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Title V Fee</th>
<th>Title XX Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>74000</td>
<td>$16.64</td>
<td>$16.64</td>
</tr>
<tr>
<td>74010</td>
<td>$25.91</td>
<td>$25.91</td>
</tr>
</tbody>
</table>

* Title V providers do not receive reimbursement for services performed free of charge by the DSHS Laboratory. For correct tracking of services performed, providers are required to include these services on their Title V Family Planning claims filed with TMHP.
4.3.5 Contraceptive Devices and Related Procedures

4.3.5.1 External Contraceptives

The following procedure codes may be reimbursed separately from the fitting and instruction (procedure code 57170):

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Title V Fee</th>
<th>Title XX Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>57170</td>
<td>$37.37</td>
<td>$37.37</td>

<td>$50.84</td>
<td>$50.84</td>
</tr>
<tr>
<td>A4266 (diaphragm)</td>
<td>$34.11</td>
<td>$34.11</td>
</tr>
</tbody>
</table>

4.3.5.2 IUD

Procedure codes J7300, J7302, 58300, and 58301 may be reimbursed as follows:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Title V Fee</th>
<th>Title XX Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>58300</td>
<td>$39.00</td>
<td>$39.00</td>

</tbody>
</table>

4.3.5.2.1 Insertion of an IUD

The IUD and the insertion of the IUD may be reimbursed using procedure code J7300 or J7302 with procedure code 58300.

The following reimbursement may apply:

- Procedure code J7300 or J7302 may be reimbursed at full allowance.
- Procedure code 58300 may be reimbursed at full allowance.

When a vaginal, cervical, or uterine surgery (e.g., cervical cauterization) is billed for the same date of service as the insertion of the IUD, the following reimbursement will apply:

- The other vaginal, cervical, or uterine surgical procedure may be reimbursed at full allowance.
- Procedure code 58300 (IUD insertion) may be reimbursed at half the allowed amount.

4.3.5.2.2 Removal of the IUD

Procedure code 58301 may be reimbursed when an IUD is extracted from the uterine cavity.
When a vaginal, cervical, or uterine surgery procedure code is submitted with the same date of service as the IUD removal procedure code or the IUD replacement procedure code, the following reimbursement may apply:

- The other vaginal, cervical, or uterine surgical procedure may be reimbursed at full allowance.
- The removal or the replacement of the IUD will be denied.

### 4.3.5.3 Contraceptive Capsules

Procedure codes J7307, 11975, 11976, and 11977 may be reimbursed as follows:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Title V Fee</th>
<th>Title XX Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>11975</td>
<td>$152.25</td>
<td>$152.25</td>
</tr>
<tr>
<td>11976</td>
<td>$152.25</td>
<td>$152.25</td>
</tr>
<tr>
<td>11977</td>
<td>$304.50</td>
<td>$304.50</td>
</tr>
<tr>
<td>J7307</td>
<td>$607.19</td>
<td>$607.19</td>
</tr>
</tbody>
</table>

The contraceptive capsule and the implantation of the contraceptive capsule may be reimbursed using procedure code J7307 and procedure code 11975 (insertion) or 11977 (removal).

Progesterone-containing subdermal contraceptive capsules (Norplant) were previously used for birth control. Although subdermal contraceptive capsules are no longer approved by the FDA, the removal of the implanted contraceptive capsule (diagnosis code V2543) may be considered for reimbursement with procedure code 11976 (removal).

### 4.3.5.4 Medroxyprogesterone Acetate/Estradiol Cypionate

Medroxyprogesterone acetate/estradiol cypionate has been approved by the FDA as a method of contraception. Intramuscular injections of medroxyprogesterone acetate/estradiol cypionate given at 28- to 30-day intervals has been proven to be a short-term method to prevent pregnancy and will be limited to no more frequently than every 28 days.

### 4.3.6 Title V and XX Drugs and Supplies

The following drug and supply procedure codes may be reimbursed as:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Title V Fee</th>
<th>Title XX Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>A4267</td>
<td>$0.54</td>
<td>$0.54</td>
</tr>
<tr>
<td>A4268</td>
<td>$2.83</td>
<td>$2.83</td>
</tr>
<tr>
<td>A4269</td>
<td>$12.26</td>
<td>$12.26</td>
</tr>
<tr>
<td>A9150</td>
<td>$14.00</td>
<td>$14.00</td>
</tr>
<tr>
<td>J1055</td>
<td>$53.48</td>
<td>$53.48</td>
</tr>
<tr>
<td>J3490</td>
<td>$5.90</td>
<td>$5.90</td>
</tr>
<tr>
<td>J7303</td>

<td>$56.85</td>
</tr>
<tr>
<td>J7304</td>
<td>$21.26</td>
<td>$21.26</td>
</tr>
<tr>
<td>S4993</td>
<td>$20.88</td>
<td>$20.88</td>
</tr>
</tbody>
</table>

Procedure code J3490 may be reimbursed when a prescription medication to treat a genital infection is provided to the client. Procedure code A9150 may be reimbursed when a nonprescription medication to treat a monilia infection is provided to the client.

### 4.3.6.1 Prescriptions and Dispensing Medication

Family planning agencies may do one or both of the following:
• Dispense family planning drugs and supplies directly to the client and bill TMHP.
• Write a prescription for the client to take to a pharmacy.

Family planning drugs and supplies that are dispensed directly to the client must be billed to TMHP.
Only family planning agencies may be reimbursed for dispensing family planning drugs and supplies.
Family planning agencies may be reimbursed for dispensing up to a one-year supply of contraceptives
in a 12-month period using procedure code J7303, J7304, or S4993.

Title V, X, and XX clients may have their prescriptions filled at the clinic pharmacy.
Providers who also contract with DSHS for Title V, X, or XX should refer to the DSHS Title V, X, and
XX Family Planning Policy Manual for additional guidance on dispensing medication to Title V, X, or
XX clients.

**Note:** Pharmacies under the Medicaid Vendor Drug Program are allowed to fill all prescriptions as
prescribed. Family planning drugs and supplies are exempt from the three-prescriptions-per-
month rule for up to a six-month supply.

**Refer to:** Appendix B: Vendor Drug Program (Vol. 1, General Information) for Information about
outpatient prescription drugs and the Medicaid Vendor Drug Program.

### 4.3.7 Family Planning Education

The reimbursement rate for medical counseling and education procedure code H1010 for Titles V and
XX is $10.91.

#### 4.3.7.1 Medical Nutrition Therapy

For clients requiring intensive nutritional guidance, medical nutritional therapy can be provided as an
allowable and billable service using procedure code 97802. Medical nutritional therapy, however, must
be provided by a registered dietician in order to be reimbursed. Procedure code 97802 may only be billed
up to four times per state fiscal year for the same client by the same provider.

The reimbursement rate for procedure code 97802 for Titles V and XX is $17.18.

#### 4.3.7.2 Title V and XX Instruction in Natural Family Planning Methods

Procedure code H1010 is a benefit of Title V and XX and is intended to instruct a couple or an individual
in methods of natural family planning and is limited to twice a year.

### 4.3.8 Sterilization and Sterilization-Related Procedures

#### 4.3.8.1 Sterilization Consent

Per federal regulation 42 CFR 50, Subpart B, all sterilization procedures require an approved Steril-
ization Consent Form.

**Note:** Hysterectomy Acknowledgment forms are not sterilization consents.

**Refer to:** Form GN.2, “Sterilization Consent Form (English)” in this handbook.

Form GN.3, “Sterilization Consent Form (Spanish)” in this handbook.

Form GN.1, “Sterilization Consent Form Instructions (2 pages)” in this handbook.

#### 4.3.8.2 Title V and XX Incomplete Sterilizations

Sterilizations are considered to be permanent, once per lifetime procedures. If the claim is denied
indicating a sterilization procedure has already been reimbursed for the client, the provider may appeal
with documentation that supports the medical necessity for the repeat sterilization.
4.3.8.3 *Titles V, X, and XX Tubal Ligation*
Procedure code 58600 may be reimbursed for any sterilization procedure performed on a female client by a family planning agency using Title V, X, or XX. Reimbursement for procedure code 58600 includes all preoperative, intra-operative, and postoperative services by all parties involved (i.e., physician, anesthesiologist, facility, laboratory, and so on). The reimbursement rate for procedure code 58600 for Titles V and XX is $1,800.00.

4.3.8.4 *Vasectomy*
Procedure code 55250 may be reimbursed for any sterilization procedure performed on a male by a family planning agency using Title V, X, or XX. Reimbursement for procedure code 55250 includes preoperative, intra-operative, and postoperative services by all parties involved (i.e., physician, anesthesiologist, facility, laboratory, and so on). The reimbursement rate for procedure code 55250 for Titles V and XX is $262.94.

Vasectomies are considered to be permanent, once-per-lifetime procedures. If the claim is denied indicating a vasectomy procedure has already been reimbursed for the client, the provider may appeal with documentation that supports the medical necessity for the repeat sterilization.

4.3.9 *Prior Authorization*
Prior authorization is not required for sterilization and sterilization-related procedures.

4.3.10 *Title XX Reimbursement for WHP Wrap-Around Services*
FQHC providers may receive Title XX reimbursement for WHP wrap-around services that are rendered during a visit where the primary purpose of the visit is not related to contraception and is not reimbursed by WHP.

FQHC providers may receive Title XX reimbursement for the following services that are rendered to WHP clients when the primary diagnosis is not related to contraception:

- Follow-up Pap tests. To receive Title XX reimbursement, DSHS contractors must file a separate Title XX claim with diagnosis code 6229. DSHS contractors may be reimbursed for the Pap test, an appropriate counseling code, and the appropriate visit code.
- Follow-up visits for STD/STI testing. To receive Title XX reimbursement for a visit that is strictly for the purposes of STD/STI testing for a WHP client, DSHS contractors must file a separate Title XX claim with a diagnosis code of V016. DSHS contractors may be reimbursed for STD/STI tests and STD/STI-related services.
- Pregnancy-test-only visits. To receive Title XX reimbursement for a visit that is for a pregnancy test only, DSHS contractors must file a separate Title XX claim with diagnosis code V7240.

Claims that are submitted by FQHC providers for wrap-around services, but are considered part of a WHP encounter, will be subject to retrospective review as these claims are not eligible for Title XX reimbursement. Any wrap-around services that are determined to have been paid in error may be recouped.

4.4 *Documentation Requirements*
All services require documentation to support the medical necessity of the service rendered, including gynecological and reproductive health, obstetrics, and family planning services.

Gynecological and reproductive health, obstetrics, and family planning services are subject to retrospective review and recoupment if documentation does not support the service billed.
4.5 Claims Filing and Reimbursement

4.5.1 Claims Information

Providers must use the appropriate claim form to submit Titles V and XX claims to TMHP.

Refer to: Subsection 2.5, “Claims Filing and Reimbursement” in this handbook for more information about filing family planning claims.

4.5.1.1 Filing Deadlines

The following table summarizes the filing deadlines for Titles V, X, and XX claims:

<table>
<thead>
<tr>
<th>Title</th>
<th>Deadline</th>
<th>Appeals</th>
</tr>
</thead>
<tbody>
<tr>
<td>V, X, XX</td>
<td>95 days from the date of service on the claim or date of any third party insurance explanation of benefits (EOB)</td>
<td>120 days from the date of the Remittance and Status (R&amp;S) Report on which the claim reached a finalized status</td>
</tr>
</tbody>
</table>

Note: As stated in the DSHS Policy and Procedure Manual for Title V, Title X, and Title XX Family Planning Services, all claims and appeals must be submitted and processed within 60 days after the end of the contract period.

4.5.1.2 Third Party Liability

Federal and state regulations mandate that family planning client information be kept confidential. Because seeking information from third party insurance may jeopardize the client’s confidentiality, prior insurance billing is not a requirement for billing family planning for any title program.

4.5.1.3 Title X Encounter Filing

In clinics supported by Title X funds, it is important to collect encounter data (such as demographics and services provided) for all family planning clients served, even for full-pay clients, regardless of the funding source to which the claim is billed. This data is used to compile some of the elements of the Family Planning Annual Report. Certain fields on the claim form must be completed for all clients seen at Title X clinics, regardless of the funding source to which the claim is billed. Based on clinic information submitted in the provider’s most recent Title X or Title XX request for proposal (RFP), Compass21 rejects all claims from Title X clinics when the claims do not contain all the required information, regardless of the title being billed.

Clients who receive services in a Title X clinic are considered Title X-only clients if their services are not billed to another funding source. In some instances (such as when all Title V or XX funds are expended), services provided to a client normally eligible for another funding source are not billed to that funding source. A client whose income according to family size falls outside the eligibility guidelines for Titles V or XX would also be a Title X-only client. In these cases, a sliding fee scale that has been approved by the DSHS Community Health Services Section must be used to assess client fees for services received.

While it will not result in a payment from DSHS, a Family Planning 2017 Claim Form with Title X encounter information must be submitted to TMHP for all Title X-only clients, so that required encounter data (demographics, and so on) are collected. Encounter forms for Title X clients are filled out the same way as for the other funding sources. Diagnosis information must be entered, and each of the services or tests provided to that client during the visit must be listed on the claim form. Sterilizations provided to Title X clients who are partial pay or no pay must follow the federal guidelines for sterilizations, and a completed Sterilization Consent Form must be faxed to TMHP at 1-512-514-4229.

Providers must forward completed encounter forms to TMHP for processing. Payment for Title X services follows the current voucher submittal process outlined by the DSHS Claims Processing Unit.
4.5.2 Reimbursement
Reimbursement for family planning procedures is available on the DSHS web site at
www.dshs.state.tx.us/famplan/contractor/default.shtm#code.

4.5.2.1 Title X Payments
Title X encounters submitted do not result in payments to the providers. To receive payment, providers
must submit monthly or quarterly FSR forms, along with a paper payment voucher, to the DSHS
Contract Development and Support Branch and Claims Processing Unit. Title X providers continue to
receive reimbursement from the Comptroller.

4.5.3 National Drug Code
Refer to: Subsection 6.3.4, “National Drug Code (NDC)” in Section 6, “Claims Filing” (Vol. 1,
General Information).

5. GYNECOLOGICAL HEALTH SERVICES

5.1 Services, Benefits, Limitations, and Prior Authorization
Gynecological examinations, surgical procedures, and treatments are benefits of Texas Medicaid.
The following gynecological procedures and services are benefits of Texas Medicaid:
- Assays for the diagnosis of vaginitis
- Endometrial cryoablation
- Uterine suspension
- Salpingostomy
- Diagnostic hysteroscopy
- Abortion (Criteria is described in a later section)
- Laminaria insertion
- Examination under anesthesia
- Hysterectomy
- Surgery for masculinized female
- Pap smear (cytopathology studies)

Refer to: Section 2, “Medicaid Title XIX family planning services” in this handbook for information
about contraception, sterilizations, and family planning annual examinations.

5.2 Endometrial Cryoablation
Endometrial cryoablation (procedure code 58356) is a benefit of Texas Medicaid.
If procedure codes 58356 and 58353 are billed on the same date of service by the same provider,
procedure code 58356 will be considered for reimbursement and procedure code 58353 will be denied.

5.3 Uterine Suspension
Uterine suspension (procedure codes 58400 and 58410) is a benefit of Texas Medicaid.
If procedure codes 58400 and 58410 are billed on the same date of service by the same provider,
procedure code 58410 will be reimbursed and procedure code 58400 will be denied.
In addition, the following procedure codes will be denied if billed with the same date of service by the same provider as procedure code 58400 or 58410:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>36000</td>
</tr>
<tr>
<td>36640</td>
</tr>
<tr>
<td>49010</td>
</tr>
<tr>
<td>62318</td>
</tr>
<tr>
<td>64416</td>
</tr>
<tr>
<td>64447</td>
</tr>
<tr>
<td>64510</td>
</tr>
<tr>
<td>94250</td>
</tr>
<tr>
<td>95829</td>
</tr>
</tbody>
</table>

5.4 Salpingostomy

Salpingostomy (procedure code 58770) is a benefit of Texas Medicaid.

The following procedure codes will be denied if billed with the same date of service by the same provider as procedure code 58770:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>36400</td>
</tr>
<tr>
<td>37202</td>
</tr>
<tr>
<td>49255</td>
</tr>
<tr>
<td>58900</td>
</tr>
<tr>
<td>64412</td>
</tr>
<tr>
<td>64435</td>
</tr>
<tr>
<td>64483</td>
</tr>
<tr>
<td>93318</td>
</tr>
<tr>
<td>95816</td>
</tr>
<tr>
<td>96376</td>
</tr>
</tbody>
</table>

5.4.1 Prior Authorization for Salpingostomy

Prior authorization is required for salpingostomy.

The prior authorization request must include documentation of one or more of the following conditions:

- Ectopic pregnancy
- Hydrosalpinx unrelated to infertility
- Salpingitis unrelated to infertility
- Torsion of the fallopian tube
- Abscess of the fallopian tube
- Peritubal adhesions unrelated to infertility
- Cyst or tumor of the fallopian tube unrelated to infertility
• Hematosalpinx

5.5 Assays for the Diagnosis of Vaginitis
Vaginitis assay procedure codes 87480, 87510, 87660, 87797, and 87800 are benefits of Texas Medicaid. If more than one of procedure code 87480, 87510, 87660, or 87800 is submitted by the same provider for the same client with the same date of service, all of the procedure codes are denied. Only one procedure code (87480, 87510, 87660, or 87800) may be submitted for reimbursement, and providers must submit the most appropriate procedure code for the test provided:

• Single organism test. A single test must be submitted for reimbursement using the appropriate procedure code (87480, 87510, or 87660) that describes the organism being isolated.

• Multiple organism test. When testing for multiple vaginal pathogens, providers must submit procedure code 87800 for reimbursement. Procedure code 87800 is inclusive of procedure codes 87480, 87510, and 87660 and is the most appropriate code to request reimbursement for multiple tests.

If the claim is denied because more than one procedure code was submitted with the same date of service, the provider must appeal the denied claim with a statement indicating which procedure code is most appropriate and should be considered for reimbursement. Procedure codes 87800, 87480, 87510, and 87660 should not be submitted for reimbursement by the same provider with the same date of service for the same client on the same claim form or on separate claim forms.

Procedure code 87797 is denied if it is submitted for the same date of service as procedure code 87800. Providers are reminded to code to the highest level of specificity with a diagnosis to support medical necessity when submitting procedure code 87797.

Claims may be subject to retrospective review if they are submitted with diagnosis codes that do not support medical necessity.

If a positive test result was not treated, documentation must be present indicating why treatment was not rendered.

5.6 Diagnostic Hysteroscopy
Diagnostic hysteroscopy (procedure code 58555) is a benefit of Texas Medicaid when submitted with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>2180</td>
</tr>
</tbody>
</table>

5.7 Abortions
According to a revision of the Hyde Amendment, under Public Law 103–112, HHSC implemented the federal directive pertaining to Medicaid reimbursement for abortions. Federal funding is available for a non-elective abortion to save the life of the mother and to terminate pregnancies resulting from rape or incest. Reimbursement is based on the physician’s certification that the abortion was performed to save the mother’s life, to terminate a pregnancy resulting from rape, or to terminate a pregnancy resulting from incest.

The following procedure codes may be used to submit claims for non-elective abortion procedures:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>59830</td>
</tr>
</tbody>
</table>
In accordance with federal law, providers are required to use specific language regarding the reason the mother’s condition is life-threatening. An abortion for a life-threatening condition must be due to a physical disorder, injury, or illness, including a life-endangering physical condition caused by or arising from the pregnancy itself that would place the woman in danger of death unless an abortion was performed.

Reimbursement of an abortion is based on the physician’s certification that the abortion was performed to save the life of the mother, to terminate pregnancy resulting from rape, or to terminate pregnancy resulting from incest.

One of the following statements signed by the physician is mandatory for any abortion performed. Substitute wording will not be accepted. One of these statements must accompany any claim for an abortion to be considered for reimbursement:

- “I, (physician’s name), certify that on the basis of my professional judgment, an abortion procedure is necessary because (client’s full name, Medicaid number, and complete address) suffers from a physical disorder, injury, or illness, including a life-endangering physical condition caused by or arising from the pregnancy itself, that would place her in danger of death unless an abortion is performed.” (A signature is required.)

- “I, (physician’s name), certify that on the basis of my professional judgment, an abortion procedure for (client’s full name, Medicaid number, and complete address) is necessary to terminate a pregnancy that was the result of rape. I have counseled the client concerning the availability of health and social support services and the importance of reporting the rape to the appropriate law enforcement authorities.” (A signature is required.)

- “I, (physician’s name), certify that on the basis of my professional judgment, an abortion procedure for (client’s full name, Medicaid number, and complete address) is necessary to terminate a pregnancy that was the result of incest. I have counseled the client concerning the availability of health and social support services and the importance of reporting the incest to the appropriate law enforcement authorities.” (A signature is required.)

A stamped or typed physician signature is not acceptable on the original certification statement. The physician’s signature must be an original signature. A copy of the signed certification statement must be submitted with each claim for reimbursement. Faxes and electronic billing are not acceptable or available at this time. The physician must maintain the original certification statement in the client’s files.

Abortion services must be billed with modifier G7 and one of the following modifiers as applicable:

<table>
<thead>
<tr>
<th>Modifier</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>W1</td>
<td>Endangerment of the mother’s life</td>
</tr>
<tr>
<td>W2</td>
<td>Rape</td>
</tr>
<tr>
<td>W3</td>
<td>Incest</td>
</tr>
</tbody>
</table>

Performing physicians, facilities, anesthesiologists, and CRNAs must submit modifier G7 with the appropriate procedure code when requesting reimbursement for abortion procedures that are within the scope of the rules and regulations of Texas Medicaid. Modifier G7 must be entered next to the procedure code that identifies the abortion services.

### 5.7.1 Prior Authorization for Abortions

Refer to: Form GN.4, “Abortion Certification Statements Form” in this handbook.

Important: To bill a Texas Medicaid client for a service that TMHP denies as not medically necessary, the billing provider must ensure that the client or client’s guardian has signed an acknowledgment statement obtained by the physician who has contact with the client.
5.8 Examination Under Anesthesia
Pelvic examination under anesthesia (procedure code 57410) is considered part of another gynecological surgery performed the same day.

If the examination is performed as an independent procedure or at the time of a nongynecological surgery, the procedure may be reimbursed.

5.9 Laminaria Insertion
Insertion of a laminaria or dilateria (procedure code 59200) is a benefit of Texas Medicaid.

5.10 Hysterectomy Services
Texas Medicaid reimburses hysterectomies when they are medically necessary. Texas Medicaid does not reimburse hysterectomies performed for the sole purpose of sterilization.

Providers can use any of the following procedure codes to submit claims for hysterectomy procedures:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>51925 58150 58152 58180 58200 58210 58240 58260 58262 58263</td>
</tr>
<tr>
<td>58267 58270 58275 58280 58285 58290 58291 58292 58293 58294</td>
</tr>
<tr>
<td>58541* 58542* 58543* 58544* 58548* 58550* 58552* 58553* 58554* 58570</td>
</tr>
<tr>
<td>58571 58572 58573 59135 59525</td>
</tr>
</tbody>
</table>

*Assistant surgeons may be reimbursed for these procedures

5.10.1 Hysterectomy Acknowledgment Form
Hysterectomy services are considered for reimbursement when a signed Hysterectomy Acknowledgment Form is faxed to TMHP, the claim is filed with a signed Hysterectomy Acknowledgment Form, or documentation supporting that the Hysterectomy Acknowledgment Form could not be obtained or was not necessary.

All Texas Medicaid clients (including those in a STAR or STAR+PLUS Program health plan) receiving hysterectomy services must sign a Hysterectomy Acknowledgment Form. The acknowledgment must be submitted to TMHP with the claim or to the client’s health plan.

A Hysterectomy Acknowledgement Statement must be signed and dated by the client. The statement must indicate that the client was informed both orally and in writing before the surgery that the hysterectomy would leave her permanently incapable of bearing children.

The client’s eligibility file is updated upon receipt of the signed Hysterectomy Acknowledgment Form. Claims for services related to the hysterectomy cannot be reimbursed unless the signed Hysterectomy Acknowledgement Form is on file; therefore to avoid claim denials, each individual provider involved in the hysterectomy procedure is encouraged to submit a copy of the valid Hysterectomy Acknowledgement Form rather than relying on another provider to do so.

The provider is responsible for maintaining the original, signed copy of the Hysterectomy Acknowledgement Form in the client’s medical record when a claim is submitted for consideration of payment. These records are subject to retrospective review.

When a hysterectomy, whether abdominal or vaginal, is performed without a client’s acknowledgement form:

- The hysterectomy procedure code is denied.
- The other surgical procedures are evaluated for their clinical relevance.
- Multiple procedures are processed according to the multiple surgery guidelines.
A Hysterectomy Acknowledgment Form is not required if the performing physician certifies that at least one of the following circumstances existed before the surgery:

- The patient was already sterile before the hysterectomy, and the cause of the sterility is stated (e.g., congenital disorder, sterilized previously, or postmenopausal). Providers must use a postmenopause or sterilization diagnosis code on the claim form. If the provider submits a claim and does not attach the acknowledgment, the provider must maintain the signed statement in the client’s records, and the physician’s signature will not be required on the claim form. These records are subject to retrospective review.

- The patient requires a hysterectomy on an emergency basis because of a life-threatening situation. The physician must state the nature of the emergency and certify that it was determined that prior acknowledgment was not possible. Because the acknowledgment may be signed the day of or an hour before surgery, an emergency situation requires that the patient be unconscious or under sedation and unable to sign the acknowledgment.

Although the hysterectomy acknowledgement statement is not required if the criteria previously listed are met, the performing physician must certify that one or more of the circumstances existed prior to the surgery. This certification may be submitted before the claim is submitted or attached to the claim and signed by the performing provider.

Refer to: Title 42 of CFR 441.255 and 25 TAC Part 1, Chapter 29, Subchapter F, section 25.501 for more information.

Form GN.5, “Hysterectomy Acknowledgement Form” in this handbook.

Faxing Forms
All Medicaid providers may fax Hysterectomy Acknowledgment Forms to 1-512-514-4218. The form must include the client’s Texas Medicaid number. All consent forms should be faxed with a cover sheet that identifies the provider and includes the telephone number and address. If the fax is incomplete or the consent form is invalid, the form is returned by mail or fax for correction. Completed consent forms that are faxed for adjustments or appeals are validated in the TMHP system. However, claims associated with the consent forms must be appealed through the mail to Appeals/Adjustments at the following address:

Texas Medicaid & Healthcare Partnership  
Attn: Appeals/Adjustments  
PO Box 200645  
Austin, TX 78720-0645

5.11 Pap Smear (Cytopathology Studies)
Pap smears are benefits of Texas Medicaid for early detection of cancer. Family planning clients are eligible for annual Pap smears. Procurement and handling of the Pap smear are considered part of the E/M of the client and are not reimbursed separately.

The following procedure codes are reimbursed only to pathologists and CLIA-certified laboratories (whose directors providing technical supervision of cytopathology services are pathologists):

| Procedure Codes |
|-----------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|
| 88141*          | 88142          | 88143          | 88147          | 88148          | 88150          | 88152          | 88153          |
| 88155**         | 88164          | 88165          | 88166          | 88167          | 88174          |

* Procedure code 88141 must be used to bill the interpretation portion of any gynecological cytopathology test, and is reimbursed in addition to the other procedure codes in this table.

** Procedure code 88155 is not reimbursed when billed in addition to any of the procedure codes in this table except 88141.
These procedure codes must be billed with the place of service where the Pap smear is interpreted.

The Pap smears procedure codes are not reimbursed separately to either the physician or a laboratory when submitted with the same date of service as a THSteps medical checkup visit (procedure code 99381, 99382, 99383, 99384, 99385, 99391, 99392, 99393, 99394, or 99395).

Refer to: Subsection 5.3.2.7.7, “Additional Required Laboratory Tests Related to Medical Checkups for Adolescents” in the Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information about THSteps and laboratory procedure benefits.

5.12 Surgery for Masculinized Females
Masculinized females possess ovaries and are female by genetic sex but the external genitalia are not those of a normal female. Surgical correction of abnormalities of the external genitalia is the only indicated treatment for this disorder. Procedure codes 56805 and 57335 may be considered for reimbursement for female clients who are 20 years of age and younger when submitted for reimbursement with diagnosis code 2552, 25950, 25951, 25952, or 7527.

5.13 Documentation Requirements
All services require documentation to support the medical necessity of the service rendered, including gynecological services.

Gynecological health services are subject to retrospective review and recoupment if documentation does not support the service billed.

5.14 Claims Filing and Reimbursement
Gynecological services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a CMS-1500 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Super-bills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Texas Medicaid rates for physicians and certain other practitioners are calculated in accordance with TAC §355.8085. Providers can refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com.

Refer to: Subsection 2.2.1.1, “Physician Services in Outpatient Hospital Setting” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information).

Section 104 of the Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982 requires that Medicare and Medicaid limit reimbursement for those physician services furnished in outpatient hospital settings (e.g., clinics and emergency situations) that are ordinarily furnished in physician offices.

5.15 National Drug Code

8. FORMS
Sterilization Consent Form Instructions

Per Title 42 Code of Federal Regulations (CFR) 50, Subpart B, all sterilizations require a valid consent form regardless of the funding source. Ensure all required fields are completed for timely processing.

Fax or mail the Sterilization Consent Form five business days before submitting the associated claim(s) to expedite the processing of the Sterilization Consent Form and associated claim(s).

Fax fully completed Sterilization Consent Forms to Texas Medicaid & Healthcare Partnership (TMHP) at 1-512-514-4229. Claims and appeals are not accepted by fax. Only send family planning sterilization correspondence to this fax number.

Note: Hysterectomy Acknowledgment forms are not sterilization consents and should be faxed to 1-512-514-4218.

Clients must be at least 21 years of age when the consent form is signed. If the client was not 21 years of age when the consent form was signed, the consent will be denied. Changing signature dates is considered fraudulent and will be reported to the Office of the Inspector General (OIG).

There must be at least 30 days between the date the client signs the consent form and the date of surgery, with the following exceptions:

Exceptions: (1) Premature delivery - There must be at least 72 hours between the date of consent and the date of surgery. The informed consent must have been given at least 30 days before the expected date of delivery. (2) Emergency Abdominal Surgery - There must be at least 72 hours between the date of consent and the date of surgery. Operative reports detailing the need for emergency surgery are required.

Listed below are field descriptions for the Sterilization Consent Form. Completion of all sections is required to validate the consent form, with only two exceptions:

Exceptions: Race and Ethnicity Designation is requested but not required. The Interpreter's Statement is not required as long as the consent form is written in the client's language, or the person obtaining the consent speaks the client's language. If this section is partially completed, the consent will be denied for incomplete information.

This Sterilization Consent Form may be copied for provider use. Providers are encouraged to frequently recopy the original form to ensure legible copies and to expedite consent validation.

Required Fields

All of the fields must be legible in order for the consent form to be valid. Any illegible field will result in a denial of the submitted consent form. Resubmission of legible information must be indicated on the consent form itself. Resubmission with information indicated on a cover page or letter will not be accepted.

Consent to Sterilization

• Name of Doctor or Clinic.
• Name of the Sterilization Operation.
• Client’s Date of Birth (month, day, year).
• Client's Name (first and last names are required).
• Name of Doctor or Clinic.
• Name of the Sterilization Operation.
• Client’s Signature.
• Date of Client Signature - Client must be at least 21 years of age on this date. This date cannot be altered or added at a later date.
**Interpreter’s Statement (If applicable)**
- Name of Language Used by Interpreter.
- Interpreter’s Signature.
- Date of Interpreter’s Signature (month, day, year).

**Statement of Person Obtaining Consent**
- Client's Name (first and last names are required).
- Name of the Sterilization Operation.
- Signature of Person Obtaining Consent - The statement of person obtaining consent must be completed by the person who explains the surgery and its implications and alternate methods of birth control. The signature of person obtaining consent must be completed at the time the consent is obtained. The signature must be an original signature, not a rubber stamp.
- Date of the Person Obtaining Consent’s Signature (month, day, year) - Must be the same date as the client's signature date.
- Facility Name - Clinic/office where the client received the sterilization information.
- Facility Address - Clinic/office where the client received the sterilization information.

**Physician’s Statement**
- Client’s Name (first and last names are required).
- Date of Sterilization Procedure (month, day, year) - Must be at least 30 days and no more than 180 days from the date of the client’s consent except in cases of premature delivery or emergency abdominal surgery.
- Name of the Sterilization Operation.
- Expected Date of Delivery (EDD) - Required when there are less than 30 days between the date of the client consent and date of surgery. Client’s signature date must be at least 30 days prior to EDD.
- Circumstances of Emergency Surgery - Operative report(s) detailing the need for emergency abdominal surgery are required.
- Physician’s Signature - Stamped or computer-generated signatures are not acceptable.
- Date of Physician’s Signature (month, day, year) - This date must be on or after the date of surgery.

**Paperwork Reduction Act Statement**
This is a required statement and must be included on every Sterilization Consent Form submitted.

**Additional Required Fields**
- Medicaid or Family Planning Number - Clients submitted as Titles V, X, and XX may not have a Family Planning number. Please simply indicate the appropriate Title below.
- Date Client Signed the Consent (month, day, year).
- The following provider identification numbers will be required to expedite the processing of the consent form:
  - TPI
  - NPI
  - Taxonomy
  - Benefit Code
- Provider/Clinic Phone Number.
- Provider/Clinic Fax Number (If available).
- Family Planning Title for Client - Indicate by circling V, X, XIX (Medicaid), or XX.

Effective Date_07302007/Revised Date_03102010
Sterilization Consent Form
(Fax Consent Form to 1-512-514-4229)

Client Medicaid or Family Planning Number: / / (month/day/year)
Date Client Signed / / (month/day/year)
Notice: Your decision at any time not to be sterilized will not result in the withdrawal or withholding of any benefits provided by programs or projects receiving federal funds.

Consent to Sterilization

I have asked for and received information about sterilization from _____________________________ (doctor or clinic). When I first asked for the information, I was told that the decision to be sterilized is completely up to me. I was told that I could decide not to be sterilized. If I decide not to be sterilized, my decision will not affect my right to future care or treatment. I will not lose any help or benefits from programs receiving Federal funds, such as Temporary Assistance for Needy Families (TANF) or Medicaid that I am now getting or for which I may become eligible.

I understand that the sterilization must be considered permanent and not reversible. I have decided that I do not want to become pregnant, bear children or father children.

I was told about those temporary methods of birth control that are available and could be provided to me which will allow me to bear or father a child in the future. I have rejected these alternatives and chosen to be sterilized.

I understand that I will be sterilized by an operation known as a _____________________________ (specify type of operation). The discomforts, risks and benefits associated with the operation have been explained to me. All my questions have been answered to my satisfaction.

I understand that the operation will not be done until at least 30 days after I sign this form. I understand that I can change my mind at any time and that my decision at any time not to be sterilized will not result in the withholding of any benefits or medical services provided by federally funded programs.

I am at least 21 years of age and was born on ____ (month), ____(day), ____ (year). I, __________________________________________, hereby consent of my own free will to be sterilized by __________________________ (doctor or clinic) by a method called _____________________________ (specify type of operation).

My consent expires 180 days from the date of my signature below.

I also consent to the release of this form and other medical records about the operation to: Representatives of the Department of Health and Human Services or Employees of programs or projects funded by that Department but only for determining if Federal laws were observed. I have received a copy of this form.

Physician’s Statement

Before ____________________________________________ (client’s full name), signed the consent form, I explained to him/her the nature of the sterilization operation _____________________________ (specify type of operation), the fact that it is intended to be a final and irreversible procedure and the discomforts, risks and benefits associated with it.

I also consent to the release of this form and other medical records about the operation to: Representatives of the Department of Health and Human Services or Employees of programs or projects funded by that Department but only for determining if Federal laws were observed. I have received a copy of this form.

Race and Ethnicity Designation

Ethnicity
☐ Not Hispanic or Latino  ☐ Native Hawaiian or Other Pacific Islander  ☐ Black or African American
☐ Hispanic or Latino  ☐ American Indian or Alaska Native  ☐ Asian  ☐ White

Interpreter’s Statement

If an interpreter is provided to assist the individual to be sterilized:

I have translated the information and advice and presented orally to the individual to be sterilized by the person obtaining this consent. I have also read him/her the consent form in ______________________ language and explained its contents to him/her. To the best of my knowledge and belief, he/she has understood this explanation.

Interpreter’s Signature: / / (month/day/year)
Date of Signature: / / (month/day/year)

Statement of Person Obtaining Consent

Before ____________________________________________ (client’s full name), signed the consent form, I explained to him/her the nature of the sterilization operation _____________________________ (specify type of operation), the fact that it is intended to be a final and irreversible procedure and the discomforts, risks and benefits associated with it.

I informed the individual to be sterilized that alternative methods of birth control are available which are temporary. I explained that sterilization is different because it is permanent.

I informed the individual to be sterilized that his/her consent can be withdrawn at any time and that he/she will not lose any health services or any benefits provided by Federal funds.

To the best of my knowledge and belief the individual to be sterilized is at least 21 years old and appears mentally competent. He/She knowingly and voluntarily requested to be sterilized and appears to understand the nature and consequence of the procedure.

Signature of Person Obtaining Consent: / / (month/day/year)
Facility Name: 
Facility Address:

Physician’s Statement

Shortly before I performed a sterilization operation upon ____________________________________________ (name of individual to be sterilized), on ____ / ____ / ____ (date of sterilization), I explained to him/her the nature of the sterilization operation _____________________________ (specify type of operation), the fact that it is intended to be a final and irreversible procedure and the discomforts, risks and benefits associated with it.

I also consent to the release of this form and other medical records about the operation to: Representatives of the Department of Health and Human Services or Employees of programs or projects funded by that Department but only for determining if Federal laws were observed. I have received a copy of this form.

Paperwork Reduction Act Statement

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0937-0166. The time required to complete this information collection is estimated to average 1 hour 15 minutes per response, including the time to review requirements, search existing data resources, gather the data needed, and complete and review the information collection. If you have comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: U.S. Department of Health & Human Services, OS/OCIO/PRA, 200 Independence Ave., S.W., Suite 537-H, Washington D.C. 20201, Attention: PRA Reports Clearance Officer

GN-3 Sterilization Consent Form (Spanish)

Sterilization Consent Form (Spanish) (Fax Consent Form to 1-512-514-4229)

Client Medicaid or Family Planning Number: / / (month/day/year)

Notas: La decisión de no esterilizarse que usted puede tomar en cualquier momento, no causará el reto o la reacción de ningún beneficio que le sea proporcionado por programas o proyectos que reciban fondos federales.

Consentimiento para Esterilización

Yo he solicitado y he recibido información de   (médico o clínica) sobre la esterilización. Cuando inicialmente solicité esta información, me dijeron que la decisión de ser esterilizada es completamente mía. Me dijeron que yo podía decidir no ser esterilizada. Si decidí no esterilizarme, mi decisión no afectará mi derecho a recibir tratamiento o cuidados médicos en el futuro. No perderé ninguna asistencia o beneficios de programs patrocinados con fondos federales, tales como Asistencia Temporal para Familias Necesitadas o Medicaid, que recibo actualmente o para los cuales podría calificar.

Entiendo que la esterilización se considera procedimiento permanente e irreversible. Yo he decidido que no quiero quedarme embarazada, no quiero tener hijos o no quiero procrear hijos. Me informaron sobre otros métodos de anticoncepción disponibles que son temporales y que permitirán que pueda tener o procrear hijos en el futuro. He rechazado estas opciones y he decidido ser esterilizada.

Entiendo que seré esterilizada/o por medio de una operación conocida como   (específicar el tipo de operación). Me han explicado las molestias, los riesgos y los beneficios asociados con la operación. Han respondido satisfactoriamente a todas mis preguntas.

Entiendo que la operación no se llevará a cabo hasta que hayan pasado 30 días, como mínimo, a partir de la fecha en la que firme esta Forma. Entiendo que puedo cambiar de opinión en cualquier momento y que mi decisión en cualquier momento de no ser esterilizada no resultará en la retenición de beneficios o servicios médicos proporcionados a través de programas que reciben fondos federales.

Tengo por lo menos 21 años y nací el   (mes),   (día),   (año). Yo,   (médico o clínica) por medio de la presente doy mi consentimiento de mi libre voluntad para ser esterilizada/o por   (específicar el tipo de operación).

Mi consentimiento vence 180 días a partir de la fecha que aparece abajo con mi firma.

También doy mis consentimientos para que se presente esta Forma y otros expedientes médicos sobre la operación a: Representantes del Departamento de Salud y Servicios Sociales, o Empleados de programas o proyectos financiados por ese Departamento, pero sólo para que puedan determinar si se han cumplido las leyes federales. He recibido una copia de esta Forma.

Firma: Fecha:   /   / (mes, día, año)

Declaración De La Persona Que Obtiene Consentimiento

Antes de que   (nombre completo del cliente) firmara la Forma de Consentimiento para la Esterilización, le he explicado a ella/el los detalles de la operación   (específicar el tipo de operación), para la esterilización, el hecho de que el resultado de este procedimiento es final e irreversible, y las molestias, los riesgos y los beneficios asociados con este procedimiento. He aconsejado a la persona que será esterilizada que hay disponibles otros métodos de anticoncepción que son temporales. Le he explicado que la esterilización es diferente porque es permanente. Le he explicado a la persona que será esterilizada que puede retirar su consentimiento en cualquier momento y que ella/el no perderá ningún servicio de salud o beneficio proporcionado con el patrocinio de fondos federales. A mi mejor saber y entender, la persona que será esterilizada tiene por lo menos 21 años de edad y parece ser mentalmente competente. Ella/el ha solicitado con conocimiento de causa y por libre voluntad, ser esterilizada/o y parece entender la naturaleza del procedimiento y sus consecuencias.

Firma de la persona que obtiene el consentimiento: Fecha:   /   / (mes, día, año)

Declaración Del Médico

Un poco antes de realizar la operación para la esterilización a   (nombre de persona por ser esterilizada/o), en   /   / (fecha de esterilización), le explicué a ella/el los detalles de esta operación para la esterilización   (específicar el tipo de operación), del hecho de que es un procedimiento con un resultado final e irreversible, y las molestias, los riesgos y los beneficios asociados con esta operación.

Le aconsejé a la persona que sería esterilizada que hay disponibles otros métodos de anticoncepción que son temporales. Le explicué que la esterilización es diferente porque es permanente. Le informé a la persona que sería esterilizada que podía retirar su consentimiento en cualquier momento y que ella/el no perdería ningún servicio de salud o beneficio proporcionado con el patrocinio de fondos federales. A mi mejor saber y entender, la persona que será esterilizada tiene a lo menos 21 años de edad y parece ser mentalmente competente. Ella/el ha solicitado con conocimiento de causa y por libre voluntad, ser esterilizada/o y parece entender el procedimiento y las consecuencias de este procedimiento. (Instrucciones para uso alternativo de párrafos finales: Utilice el párrafo 1 que se presenta a continuación, excepto para casos de parto prematuro y cirugía abdominal de emergencia cuando se ha realizado la esterilización a menos de 30 días después de la fecha en la que la persona firmó la Forma de Consentimiento para la Esterilización. Para esos casos, utilice el párrafo 2 que se presenta más adelante. Tache con una X el párrafo que no se aplique).

(1) Han transcurrido por lo menos 30 días entre la fecha en la que la persona firmó esta Forma de Consentimiento y la fecha en la que se realizó la esterilización.

(2) La operación para la esterilización se realizó a menos de 30 días, pero a más de 72 horas, después de la fecha en la que la persona firmó la Forma de Consentimiento debido a las siguientes circunstancias (marque la casilla apropiada y escriba la información requerida):

- Parto prematuro - Fecha prevista de parto   /   / (mes, día, año)
- Cirugía abdominal de urgencia (Describa las circunstancias):   

Firma del médico: Fecha:   /   / (mes, día, año)

Declaración Sobre Ley De Reducción De Trámites

De acuerdo con la Ley de Reducción de Trámites de 1995, ninguna persona está obligada a responder a una solicitud de información a menos que muestre un número de control válido de OMB. El número de control válido de OMB para esta solicitud es 0937-0166. Se ha estimado que el tiempo promedio necesario para completar esta recogida de información es 1 hora y 15 minutos por respuesta, incluido el tiempo para revisar las instrucciones, buscar fuentes de información existentes, reunir los datos necesarios y completar y revisar la recolección de información. Si tiene algún comentario sobre la exactitud del cálculo (s) del tiempo o sugerencias para mejorar esta forma, por favor escriba a: U.S. Department of Health & Human Services, OS/OCR/PRA, 200 Independence Ave., S.W., Suite 537-H, Washington D.C. 20001. Atención: PRA Reports Clearance Officer.

GN.4 Abortion Certification Statements Form

The signature of the physician must be original script (not stamped or typed). A copy of the signed certification statement must be submitted with each claim for reimbursement. Faxes are not acceptable at this time.

“I, (physician’s name), certify that on the basis of my professional judgment, an abortion procedure is necessary because (client’s full name, Medicaid number, and complete address) suffers from a physical disorder, injury, or illness, including a life-endangering physical condition caused by or arising from the pregnancy itself, that would place her in danger of death unless an abortion is performed.”

Signature __________________________________________________________________________

“I, (physician’s name), certify that on the basis of my professional judgment, an abortion procedure for (client’s full name, Medicaid number, and complete address) is necessary to terminate a pregnancy that was the result of rape. I have counseled the client concerning the availability of health and social support services and the importance of reporting the rape to the appropriate law enforcement authorities.”

Signature __________________________________________________________________________

“I, (physician’s name), certify that on the basis of my professional judgment, an abortion procedure for (client’s full name, Medicaid number, and complete address) is necessary to terminate a pregnancy that was the result of incest. I have counseled the client concerning the availability of health and social support services and the importance of reporting the incest to the appropriate law enforcement authorities.”

Signature __________________________________________________________________________
GN.5  Hysterectomy Acknowledgement Form

MEDICAID CLIENT IDENTIFICATION NUMBER  / / / / / / / / /

Hysterectomy Acknowledgment

I hereby acknowledge that I was, prior to surgery ________________ (month, day, year), informed both orally and in writing that a hysterectomy (surgical removal of the uterus) will render the individual on whom that procedure is performed permanently incapable of bearing children.

________________________________________ ____________________
Signature of Client or Designated Representative Date

Reconocimiento

Yo afirmo haber sido informada verbalmente y por escrito, antes de la cirugía ________________ (mes, día, año) que una histerectomía (extracción quirúrgica del útero) dejará a la persona a la cual se haya operado permanentemente, incapaz de tener hijos.

**Note:** A comprehensive Index, including Volume 1 and all handbooks from Volume 2, is included at the end of Volume 1 (General Information).
1. GENERAL INFORMATION

The information in this handbook is intended for Texas Medicaid hospital (medical and surgical acute care facility) providers and covers services that take place only in a hospital setting. The handbook provides information about Texas Medicaid’s benefits, policies, and procedures applicable to acute care hospitals, including military hospitals. Services offered in settings such as rural health clinics (RHCs), Federally Qualified Health Centers (FQHCs), dialysis centers, and other similar facilities are detailed in the Outpatient Services Handbook (Vol. 2, Provider Handbooks).

**Note:** Although Medicaid Managed Care providers must provide all medically necessary Medicaid-covered services to eligible clients, these providers must refer to the respective health plan documentation for specific information about hospital services, claims filing, etc.

**Refer to:** Subsection 8.6, “PCCM,” in Section 8, “Managed Care” (Vol. 1, General Information).

**Important:** All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1617(a)(6)(A). Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.

1.1 National Drug Codes (NDC)

**Refer to:** Subsection 6.3.4, “National Drug Code (NDC),” in Section 6, “Claims Filing” (Vol. 1, General Information).

2. HOSPITAL (MEDICAL/SURGICAL ACUTE CARE FACILITY)

2.1 Introduction

While this section contains some claims filing information, hospitals are to refer to Section 6: Claims Filing and Section 7: Appeals (Vol. 1, General Information) for more comprehensive information about these subjects. Hospital providers are encouraged to review other handbooks for applicable information, prior authorization requirements, and for specific requirements for special programs such as the Texas Health Steps Comprehensive Care Program (THSteps CCP) in the Children’s Services Handbook (Vol. 2, Provider Handbooks).

2.2 Enrollment

2.2.1 Inpatient and Outpatient Enrollment

To be eligible to participate in Texas Medicaid, a hospital must be certified by Medicare, have a valid provider agreement with Health and Human Services Commission (HHSC), and have completed the Texas Medicaid and Healthcare Partnership (TMHP) enrollment process.
All providers of laboratory services must comply with the rules and regulations of the *Clinical Laboratory Improvement Amendments* (CLIA). Providers not complying with CLIA will not be reimbursed for laboratory services.

**Refer to:** Subsection 1.1, “Provider Enrollment,” in Section 1, “Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information about enrollment procedures.

Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA),” in *Radiology and Laboratory Services Handbook* (*Vol. 2, Provider Handbooks*) for more information about CLIA.

Section 8: Managed Care (*Vol. 1, General Information*).

### 2.2.1.1 Hospital Eligibility Through Change of Ownership

Under procedures set forth by the Centers for Medicare & Medicaid Services (CMS) and the U.S. Department of Health and Human Services (HHS), a change in ownership of a hospital does not terminate Medicare eligibility; therefore, Medicaid participation may be continued if the hospital obtains recertification as a Title XVIII (Medicare) hospital and a new Title XIX (Medicaid) agreement between the hospital and HHSC.

**Note:** To obtain the Medicaid hospital participation agreement, call the TMHP Contact Center at 1-800-925-9126, Monday through Friday, 7 a.m. to 7 p.m., Central Time.

**Refer to:** Subsection 1.3, “Provider Reenrollment,” in Section 1, “Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

### 2.2.1.2 Hospital-Operated Ambulance

A hospital that provides ambulance services must enroll as a provider of ambulance services separately from the hospital. Claims must be submitted using the ambulance provider identifier, not the hospital provider identifier.

**Refer to:** Subsection 2.1, “Enrollment,” in *Ambulance Services Handbook* (*Vol. 2, Provider Handbooks*).

### 2.3 Services/Benefits, Limitations and Prior Authorization

#### 2.3.1 Ambulance Services

According to 1 TAC §354.1111, nonemergency transport is defined as ambulance transport provided by an ambulance provider for a Medicaid client to or from a scheduled medical appointment, to or from another licensed facility for treatment, or to the client’s home after discharge from a hospital. Nonemergency ambulance services are a benefit for the transport of a Texas Medicaid client whose medical condition is such that the use of an ambulance is the only appropriate means of transportation (e.g., alternate means of transportation are medically contraindicated).

**Refer to:** Subsection 2.3.4.1, “Nonemergency Ambulance Transport Prior Authorization,” in this handbook.

#### 2.3.2 Inpatient Benefits and Limitations

Inpatient hospital services include medically necessary items and services ordinarily furnished by a Medicaid hospital or by an approved out-of-state hospital under the direction of a physician for the care and treatment of patients. Texas Medicaid also reimburses for medically necessary services in the outpatient setting to include day surgery and outpatient observation. Services must be medically necessary and are subject to Texas Medicaid’s Utilization Review (UR) requirements. Claims for services must also be submitted to TMHP per Medicaid policy and procedures. All Primary Care Case Management (PCCM) inpatient admissions require authorization.
Inpatient hospital services include the following:

- Bed and board in semiprivate accommodations or in an intensive care or coronary care unit including meals, special diets, and general nursing services; and an allowance for bed and board in private accommodations including meals, special diets, and general nursing services up to the hospital’s charge for its most prevalent semiprivate accommodations. Bed and board in private accommodations are provided in full if required for medical reasons as certified by the physician. Additionally, the hospital must document the medical necessity for a private room such as the existence of a critical or contagious illness or a condition that could result in disturbance to other patients. This type of information must be included in Block 80 of the UB-04 CMS-1450 paper claim form or added as an attachment to the claim submission.

- Whole blood and packed red blood cells reasonable and necessary for treatment of illness or injury provided they are not available without cost.

- Maternity care (includes usual and customary care for all female clients).

- All medically necessary services and supplies ordered by a physician to include laboratory, radiology, and pathology.

- Newborn care (includes routine newborn care, routine screenings, and specialized nursery care for newborns with specific problems).

Circumstances requiring the mother and newborn to remain in the hospital longer than two days for a routine vaginal delivery or four days for a cesarean section must be documented. Continuation of hospitalization is a benefit for the infant when the mother is required to remain hospitalized for medical reasons and must be documented.

Take-home drugs, self-administered drugs, or personal comfort items are not separately reimbursable to hospitals. Take-home drugs and supplies are a benefit when supplied by prescription through the Vendor Drug Program (VDP).

Reimbursement to hospitals for inpatient services is limited to the Medicaid spell of illness. The spell of illness is defined as 30 days of inpatient hospital care, which may accrue intermittently or consecutively. After 30 days of inpatient care is provided, reimbursement for additional inpatient care is not considered until the client has been out of an acute care facility for 60 consecutive days.

Exceptions to the spell of illness are as follows:

- A prior-approved solid organ transplant: The 30-day spell of illness for transplants begins on the date of the transplant, allowing additional time for the inpatient stay.

- THSteps-eligible clients who are 20 years of age and younger when a medically necessary condition exists.

- Some Medicaid Managed Care clients.

Refer to: Subsection 8.1.2, “Texas Medicaid Benefits by Program,” in Section 8, “Managed Care” (Vol. 1, General Information).

Medicaid reimbursement for acute care inpatient hospital services is limited to $200,000 per client, per benefit year (November 1 through October 31). Claims are reviewed retrospectively, and payments exceeding $200,000 are recouped. This limitation does not apply to services related to certain organ transplants or services to THSteps clients when provided through CCP.

Note: Dollar or day limitations are not applicable for clients who are 20 years of age and younger.

2.3.2.1 Hysterectomy Services

Hysterectomy services are considered for reimbursement when the claim is filed with a signed Hysterectomy Acknowledgment Form or documentation is submitted supporting that the Hysterectomy Acknowledgment Form could not be obtained or was not necessary. A hysterectomy acknowledgement
statement is not required if the client is already sterile or the client requires a hysterectomy on an emergency basis because of a life-threatening situation and the physician determines that prior acknowledgment is not possible. The acknowledgment must be submitted to TMHP or to the client’s health plan with the claim.

The client’s eligibility is updated upon receipt of the signed Hysterectomy Acknowledgement Form. Claims for services related to the hysterectomy cannot be reimbursed unless the signed Hysterectomy Acknowledgement Form is on file; consequently, to avoid claim denials, each individual provider is encouraged to submit a copy of the valid Hysterectomy Acknowledgement Form and not rely on another provider to do so. The provider is responsible for maintaining the original, signed copy of the Hysterectomy Acknowledgement Form in the client’s medical record when a claim is submitted for consideration of payment. These records are subject to retrospective review.

Refer to: Form MD.4, “Hysterectomy Acknowledgment Form” in this handbook.

2.3.2.2 Maternity Care/Children’s Health Insurance Program (CHIP) Perinatal Coverage

CHIP perinatal services coverage includes hospital charges related to the delivery for a CHIP perinatal services client. Preterm or false labor that does not result in a birth are not covered benefits.

For women with a family income at or below 185 percent of the Federal Poverty Level (FPL), hospital facility charges are paid through Emergency Medicaid. A client must be determined eligible for Emergency Medicaid by HHSC for a claim to be paid to a Medicaid provider. Claims are sent to TMHP for processing.

Inpatient services limited to labor with delivery for women with income between 186 and 200 percent of FPL will be covered under CHIP perinatal. Newborn services will also be covered under CHIP perinatal.

TMHP will process CHIP perinatal newborn transfer hospital claims regardless if the claim from the initial hospital stay has been received. The hospital transfer must have occurred within 24 hours of the discharge date from the initial delivery hospital stay. This only applies to CHIP perinatal newborns with a family income at or below 185 percent of the federal poverty level. Transfer claims must be filed to TMHP using the admission type 1, 2, 3, or 5 in block 14; source of admission code 4 or 6 in block 15; and the actual date and time the client was admitted in block 12 of the UB-04 CMS-1450 paper claim form.

2.3.2.3 Newborn Services

2.3.2.3.1 Eligibility Process

A child is deemed eligible for Texas Medicaid through 12 months of age if the mother is receiving Medicaid at the time of the child’s birth, the child continues to live with the mother, and the mother continues to be eligible for Medicaid or would be eligible for Medicaid if she were pregnant. Therefore, it is not acceptable for a hospital to require a deposit for newborn care from a Medicaid client. The child’s eligibility ends if the mother relinquishes her parental rights or if it is determined that the child is no longer part of the mother’s household.

Hospitals must complete Form HS.1, “Hospital Report (Newborn Child or Children) (Form 7484)” in this handbook to provide information about each child born to a mother eligible for Medicaid. If the newborn’s name is known, the name must be on the form. The use of Baby Boy or Baby Girl delays the assignment of a number. The form must be completed by the hospital no later than five days after the child’s birth and sent to HHSC at the address identified on the form. The form should not be completed for stillbirths. Hospitals should duplicate the form as needed, because they are not supplied by HHSC, the Department of Aging and Disability Services (DADS) or TMHP.
Hospitals that submit the birth certificate information utilizing the Department of State Health Services (DSHS), Vital Statistics Unit (VSU) Texas Electronic Registrar for Birth software and the HHSC Form 7484, receive a rapid and efficient assignment of a newborn Medicaid identification number. This process expedites reimbursement to hospitals and other providers involved in newborn care including pharmacies providing outpatient prescription benefits for medically-needy newborns. Additional information about obtaining a newborn Medicaid identification number can be found on the HHSC website at www.hhsc.state.tx.us/medicaid/mc/proj/newid/newid.html. Providers may also call 1-888-963-7111, Ext. 7368 or 1-512-458-7368 for additional information or to comment about this process.

After receiving a completed form, HHSC verifies the mother’s eligibility and within 10 days sends notices to the hospital, mother, caseworker, and attending physician, if identified. The notice includes the child’s Medicaid client number and the effective date of coverage. After the child has been added to the eligibility file, HHSC issues a Medicaid Identification (Form H3087).

Claims submitted for services provided to a newborn child eligible for Medicaid are filed using the newborn child’s Medicaid client number.

Newborns who are from families with an income at or below 185 percent of the FPL and who receive CHIP perinatal benefits are assigned a client number for Texas Medicaid. This number is only assigned for reimbursement of the newborn’s hospital facility charges (on a UB-04 CMS-1450 paper claim form) for the initial hospital stay after delivery. Claims for the newborn’s hospital facility charges should be sent to TMHP.

**Note:** When submitting claims for a Medicaid Managed Care client, providers must adhere to the Medicaid Managed Care health plans’ guidelines for newborn claims submission.

### 2.3.2.3.2 Newborn Hearing Screening

The state of Texas requires that a newborn hearing screening be offered to all newborns as part of their newborn hospital stay. This screening procedure is not diagnostic and will not reimburse separately from the usual newborn delivery payment. Special investigations and examination codes are not appropriate for use with hearing screening of infants.

All newborns who have abnormal screening results must be referred to a Texas Medicaid provider who is a licensed audiologist or physician who provides audiology services. Clients who are birth through 20 years of age must be referred to a Texas Medicaid provider who is an audiologist or physician who is experienced with the pediatric population and who offers auditory services.

For more information about newborn hearing screening, visit the Department of State Health Services website at www.dshs.state.tx.us/audio/default.shtm.

**Refer to:** Subsection 5.3.2.4.2, “Hearing Screening,” in Children’s Services Handbook (Vol 2. Provider Handbooks)

### 2.3.2.3.3 Newborn Hereditary/Metabolic Screening

The state of Texas requires newborn screening for genetic disorders within 24 to 48 hours of birth. Screening test cards are provided by DSHS at no charge for Medicaid-eligible or CHIP clients. Test cards can be ordered by calling 1-512-458-7661, or by faxing a request for a newborn screening kits and supplies order form to 1-512-458-7672. Mailing labels to return samples to DSHS for testing are included with the supplies. Additional information can be found at www.dshs.state.tx.us/lab/default.shtm.

Refer newborns with suspected genetic disorders or with a positive newborn screening test for a genetic work-up as appropriate.

**Refer to:** Section 5, “Geneticists” in the Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks).
The DSHS Newborn Screening Case Management website at www.dshs.state.tx.us/newborn/default.shtm

2.3.2.3.4 Hepatitis B Immunizations

Newborns must be given the first dose of hepatitis B vaccine before discharge from the hospital. Hepatitis B vaccine for newborns is provided by the Texas Vaccines for Children (TVFC) Program. Hospitals may obtain vaccine at no cost by enrolling in the TVFC Program. For more information on enrolling in the TVFC Program, refer to subsection 3.4, “Texas Vaccines for Children Program Packet” in Appendix B, “Immunizations,” in the Children’s Services Handbook (Vol. 2, Provider Handbooks) or call the DSHS Immunization Division at 1-800-252-9152.

The recommended administration of the hepatitis B vaccine to newborns before discharge from the hospital has been established as the standard of care and must not be considered as a reason to upcode to a different diagnosis related group (DRG). The reimbursement for the administration of hepatitis B vaccine to newborns is included in the DRG payment. Texas Medicaid will not reimburse for the cost of the vaccine for newborns. Providers must enroll in the TVFC Program to obtain vaccine at no cost.

Consult the vaccine package insert for information on proper administration and dosing.

Refer to: Subsection 5.3.1.8, “Newborn Examination,” in Children’s Services Handbook (Vol. 2, Provider Handbooks).

2.3.2.4 Rehabilitation Services

Inpatient rehabilitation services are a benefit of Texas Medicaid when provided as part of a general acute care inpatient admission, or with prior authorization for clients who are 20 years of age and younger in a freestanding rehabilitation facility.

Inpatient rehabilitation services in an acute care setting are included in the hospital DRG payment. All rehabilitation services are subject to Medicaid benefit limitations including the spell of illness. Exceptions to those limitations may be offered under CCP.

Refer to: Section 4, “Therapists, Independent Practitioners, and Physicians” in the Nursing and Therapy Services Handbook (Vol. 2, Provider Handbooks) for more information.

Subsection 2.12, “Inpatient Rehabilitation Hospital (Freestanding) (CCP),” in the Children’s Services Handbook (Vol. 2, Provider Handbooks).

2.3.2.5 Nursing Facility Admission

The admission Minimum Data Set (MDS) must be used for admissions to a nursing facility. There are instances in which hospital social workers and discharge nurses might also complete the admission MDS, such as:

- If the client is in a long-term care acute center.
- If the potential receiving nursing facility wants a better clinical picture of the client, a paper copy of the admission MDS is completed by the hospital staff before the client is accepted for admission into the nursing facility.

Refer to: The Long Term Care Program’s page on the TMHP website at www.tmhp.com for additional information, including instructions for all forms and assessments

2.3.2.6 Organ and Tissue Transplant Services

A facility wishing to perform organ transplants for Texas Medicaid clients must be a designated children’s hospital or a facility in continuous compliance with the criteria set forth by the Organ Procurement and Transportation Network (OPTN), the United Network for Organ Sharing (UNOS), or the National Marrow Donor Program (NMDP). Facilities whose status of “good standing” has been suspended for any reason by the national credentialing bodies will not be reimbursed by Texas Medicaid for transplant services until this status is restored.
2.3.2.6.1 Out-of-State Facilities

In order for Texas Medicaid to reimburse for an out-of-state transplant, the facility and professional providers must be enrolled as Texas Medicaid providers. The out-of-state transplant facilities must submit documentation about relevant transplant facility UNOS or NMDP certification as required by HHSC. Texas licensed physicians may request prior authorization for transplant services to be performed at out-of-state facilities when the:

- Required organ transplant is not available in Texas.
- Facilities are nationally recognized as Centers of Excellence.
- Required organ transplants are not available in Texas.
- Services are medically necessary, reasonable, and federally allowable.
- The client is enrolled in Texas Medicaid.

2.3.2.6.2 Program Limitations

If a transplant has been authorized as medically necessary by HHSC or its designee because of an emergent, life-threatening situation, a maximum of 30 days of inpatient hospital services during Title XIX spell of illness may be a benefit, beginning with the actual first day of the transplant. This benefit is in addition to covered inpatient hospital days provided before the actual first day of the transplant. This 30-day period is considered a separate inpatient hospital admission for reimbursement purposes, but is included under one hospital stay. Day limitations do not apply for clients who are 20 years of age and younger.

Dollar limitations do not apply for THSteps-eligible clients who are 20 years of age and younger.

All transplants require prior authorization. If a solid organ transplant is not prior authorized, services directly related to the transplant within the 3-day pre-operative and 6-week postoperative period will be denied, regardless of who provides the services. Services unrelated to the transplant surgery will be paid separately. The above guidelines also apply to one subsequent retransplant, because of rejection, as a lifetime benefit. A subsequent transplant is not included in the prior authorization for the initial transplant; it must be prior authorized separately.

Reimbursement for transplant is limited to an initial transplant as a lifetime benefit and one subsequent retransplant because of rejection. Expenses incurred by a living donor will not be reimbursed.

Transplants are also a benefit under the Medicare program; therefore, for clients eligible for Medicare and Medicaid, Texas Medicaid will pay only the deductible or coinsurance portion as applicable. Prior authorization must be obtained for Medicaid-only clients; authorization will not be given for Medicare/Medicaid-eligible clients. Texas Medicaid will not pay a transplant service denied by Medicare for a Medicare-eligible client.

If a Medicaid client receives a transplant in a facility that is not approved by Texas Medicaid, the client must be discharged from the facility to be considered to receive other medical and hospital benefits under Texas Medicaid. Coverage for other services needed as a result of complications of the transplant may be considered when medically necessary, reasonable, and federally allowable.

Texas Medicaid will not pay for routine post-transplant services for transplant patients in facilities that are not approved by Texas Medicaid.

Benefits are not available for any experimental or investigational services (including xenotransplantation and artificial/bioartificial liver transplants), supplies, or procedures.

The DRG payment for the transplant includes procurement of the organ and services associated with the organ procurement. The Omnibus Budget Reconciliation Act of 1986 (OBRA 86) Public Law 99-509 added Section 1138 of the Social Security Act, which defines conditions of participation for institutions in the organ procurement program. Organ procurement costs are not reimbursed to a hospital that fails
to meet the conditions of participation. The specific guidelines may be found in the appropriate areas of the Code of Federal Regulations (CFR) Title 42, Parts 405, 413, 441, 482, and 485. Documentation of organ procurement must be maintained in the hospital’s medical record.

Refer to: Subsection 2.2, “Reimbursement Methodology,” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for more information about reimbursement.

2.3.3 Outpatient Benefits and Limitations

Outpatient hospital services are diagnostic, therapeutic, and rehabilitative services that are provided to clients by or under the direction of a physician in a licensed hospital setting.

Benefits do not include drugs and biologicals provided by the hospital and taken home by the client. Supplies provided by a hospital for use in physicians’ offices are not reimbursable.

Take-home drugs and supplies are a benefit in the outpatient setting for outpatients when supplied by prescription through the VDP.

Outpatient hospital services include those services performed in the emergency room (ER), day surgery, (including hospital-based ambulatory surgical procedures) or observation room. In instances of sudden illness or injury, the client may receive treatment in the ER and be discharged, placed on observation status, or admitted as an inpatient.

Outpatient hospital services must be itemized by date of service. Procedures repeated over a period of time must be submitted for each separate date of service. Do not combine multiple dates of service on the same line detail.

Texas Medicaid pays the clinic registration fee in lieu of other benefits when a hospital provides outpatient services without charge, and if the fee is less than what the Medicaid payment would be for the service.

Refer to: Subsection 1.7, “Texas Medicaid Limitations and Exclusions,” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for more information about noncovered items/services.

2.3.3.1 Cardiac Rehabilitation

Coverage of outpatient cardiac rehabilitation is considered reasonable and necessary only for clients who have documented acute myocardial infarction, coronary artery bypass surgery (CABG), percutaneous transluminal coronary angioplasty or coronary stenting, heart valve repair/replacement, major pulmonary surgery, sustained ventricular tachycardia or fibrillation, class III or class IV congestive heart failure, or chronic stable angina within the past 12 months prior to the beginning of the program.

Note: A cardiac rehabilitation program in which the cardiac monitoring is done using telephonically transmitted electrocardiograms to a remote site is not covered by Texas Medicaid.

Cardiac rehabilitation must be provided in a facility that has the necessary cardiopulmonary, emergency, diagnostic, and therapeutic life-saving equipment (i.e. oxygen, cardiopulmonary resuscitation equipment, or defibrillator) available for immediate use. If no clinically significant arrhythmia is documented during the first three weeks of the program, the provider may have the client complete the remaining portion without telemetry monitoring by the physician’s order.

Although cardiac rehabilitation may be considered a form of physical therapy, it is a specialized program conducted by non-physician personnel who are trained in both basic and advanced cardiac life support techniques and exercise therapy for coronary disease, and provide the services under the direct supervision of a physician.
Outpatient cardiac rehabilitation begins after the client has been discharged from the hospital. A physician’s prescription is required after the acute convalescent period and after it has been determined that the client’s clinical status and capacity will allow for safe participation in an individualized progressive exercise program. Outpatient cardiac rehabilitation requires close monitoring and direct supervision by a physician and includes:

- Medical evaluation performed by the physician responsible for prescribing the client’s rehabilitation program and includes a clinical examination, a medical history, and an initial plan/goal.
- An education and counseling program to modify risk factors (nutritional counseling, stress reduction, smoking cessation, weight loss, etc.)
- Prescribed exercise concurrent with and without electrocardiogram (ECG) monitoring.
- Services performed in an approved facility by trained professionals.

**Note:** Direct supervision is met when the services are performed on hospital premises or within 250 yards of the hospital.

Cardiac rehabilitation is limited to two or three sessions per week for 12-18 weeks, not to exceed 36 sessions per rolling year. Prior authorization is not required for the initial 36 sessions.

Additional cardiac rehabilitation sessions must be prior authorized and may not exceed a total of 72 sessions for 36 weeks, including the initial 36.

Cardiac rehabilitation may be considered medically necessary beyond 36 sessions if the client has another documented cardiac event or if the prescribing physician documents that a continuation of cardiac rehabilitation is medically necessary. To confirm that a continuation of cardiac rehabilitation is at the request of, and coordinated with, the attending physician, the medical record must include evidence of communication between the cardiac rehabilitation staff and either the medical director or the referring physician. If the physician responsible for such follow-up is the medical director, then his or her notes must be evident in each client’s chart.

Cardiac rehabilitation may be considered medically necessary beyond 36 sessions in the following circumstances:

- The medical record documentation must support the client has had another cardiac event; or
- The prescribing physician documents that a continuation of cardiac rehabilitation is medically necessary. Documentation must include the following:
  - Progress made from the beginning of cardiac rehabilitation period to the current service request date, including progress towards previous goals
  - Information that supports the client’s capability of continued measurable progress
  - A proposed treatment plan for the requested extension dates with specific goals related to the client’s individual needs.

Prior authorization must be obtained through the TMHP Special Medical Prior Authorization (SMPA) Department. Providers must send prior authorization requests, along with documentation to support medical necessity, to the following address:

Texas Medicaid & Healthcare Partnership  
Special Medical Prior Authorization  
12357-B Riata Trace Parkway  
Austin, TX 78727  
Fax: 1-512-514-4213

Requests for prior authorization can also be submitted online through the TMHP website at www.tmhp.com.
The evaluation provided by the cardiac rehabilitation team at the beginning of each cardiac rehabilitation session is not considered a separate service and will be included in the reimbursement for the cardiac rehabilitation session. Evaluation and management (E/M) services unrelated to cardiac rehabilitation may be submitted with modifier 25 appended to the E/M code when supporting documentation in the medical record demonstrates a separately identifiable E/M service was provided on the same day by the same provider rendering cardiac rehabilitation.

Physical and occupational therapy will not be reimbursed when furnished in addition to cardiac rehabilitation exercise program services unless there is also a diagnosis of a noncardiac condition requiring such therapy, i.e., where a client is recuperating from an acute phase of heart disease and may have had a stroke which would require physical and occupational therapy.

Client education services, such as formal lectures and counseling on diet, nutrition and sexual activity to assist client in adjusting living habits because of the cardiac condition, will not be separately reimbursed when provided as part of the cardiac rehabilitation program.

Hospitals submitting claims for cardiac rehabilitation must submit with both revenue code 943 (other therapeutic services-cardiac rehabilitation) and procedure code S9472 (cardiac rehabilitation program non-physician provider per diem) with one of the following diagnosis codes. Only revenue code 943 will be reimbursed.

### 2.3.3.2 Chemotherapy Administration

Hospitals must submit outpatient charges using the appropriate revenue codes for room charges, supplies, IV equipment, and pharmacy.

For chemotherapy administration, outpatient facilities must submit charges using the appropriate revenue codes, such as the revenue codes listed below:

<table>
<thead>
<tr>
<th>Revenue Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>264</td>
<td>IV therapy, IV therapy/supplies</td>
</tr>
<tr>
<td>450 or 456 or 459</td>
<td>Emergency room</td>
</tr>
<tr>
<td></td>
<td>Emergency room, urgent care</td>
</tr>
<tr>
<td></td>
<td>Emergency room-other</td>
</tr>
</tbody>
</table>
Revenue code 636 must be used to submit a claim for the drug components of chemotherapy administration. The appropriate chemotherapy procedure code must be listed on the claim.

### 2.3.3.3 Cochlear Implants

A cochlear implant is a benefit of Texas Medicaid when medically indicated. Hospital ambulatory surgical centers (HASCs) may be reimbursed for the implantation using procedure code 69930, and for the cochlear implant device using procedure code L8614.

### 2.3.3.4 Colorectal Cancer Screening

Procedure code G0104 may be reimbursed to HASCs. Procedure code G0106 may be reimbursed to inpatient and outpatient hospitals. Procedure codes G0104 and G0106 are limited to once every 5 years and to diagnosis code V1090, V1272, V7650, V7651, V7652 or V700.

Procedure code G0122 may be reimbursed to outpatient hospitals and is limited to once every 5 years for clients who are 50 years of age and older.

Procedure code G0105 may be reimbursed to HASCs. Procedure code G0120 may be reimbursed to outpatient hospitals. Both codes are limited to the following diagnosis restrictions:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>5550</td>
</tr>
<tr>
<td>55841</td>
</tr>
</tbody>
</table>

2.3.3.5 Emergency Department Services

An emergency department is defined as an organized hospital-based facility for the provision of unscheduled episodic services to clients who present for immediate medical attention. The facility must be available 24 hours a day, 7 days a week. Hospital-based emergency departments are reimbursed for services based on a reasonable cost, based on the hospital’s most recent tentative Medicaid cost report settlement. The reasonable cost is reduced by a percentage determined by the state.

Emergency department room charges may be submitted using the following revenue codes:

<table>
<thead>
<tr>
<th>Revenue Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>450 or 451 or 456 or 459</td>
<td>Emergency room or Emergency room-EMTALA emergency medical screening or Emergency room, urgent care or Emergency room-other</td>
</tr>
<tr>
<td>761</td>
<td>Treatment room</td>
</tr>
<tr>
<td>762</td>
<td>Observation room</td>
</tr>
</tbody>
</table>

If a client visits the emergency room more than once in one day, the times must be given for each visit. If the client ultimately is admitted as an inpatient within 24 hours of treatment in the ER or clinic, the ER or clinic charges must be submitted on the inpatient hospital claim form as an ancillary charge. The date of inpatient admission is the date the client initially was seen in the ER or clinic. Emergency department ancillary services include laboratory services, radiology services, respiratory therapy services, and diagnostic studies, such as ECGs, computed tomography (CT) scans, and supplies. Ancillary services must be submitted on a UB-04 CMS-1450 paper claim form using the appropriate procedure codes such as the Current Procedural Terminology (CPT) code or the Healthcare Common Procedure Coding System (HCPCS) code indicating the procedures or services performed.

According to the Emergency Medical Treatment and Active Labor Act (EMTALA) of 1986, if any individual presents at the hospital’s emergency department requesting an examination or treatment, the hospital must provide an appropriate medical screening examination and stabilization services within the capability of the hospital’s emergency department, including ancillary services routinely available to the emergency department, to determine whether an emergency medical condition exists.

EMTALA medical screening code (451) may be considered for reimbursement when submitted as a stand-alone service and provided by a qualified medical professional as designated by the facility. Ancillary, professional, or facility services will not be considered for separate reimbursement. Services beyond screening (451) can be submitted with the appropriate corresponding emergency services code (450).

Medicaid claims administrators and Medicaid Managed Care Organizations (MCOs) are prohibited from requiring prior authorization or primary care provider notification for emergency services including those needed to evaluate or stabilize an emergency medical condition or emergency behavioral health condition.
Texas Medicaid provides that certain undocumented aliens and legalized aliens who require treatment of an emergency medical condition or emergency behavioral health condition are eligible to receive that treatment. After the emergency condition requiring care is stabilized and no longer an emergency, the coverage ends. If the alien continues to receive ongoing treatment after the emergency ceases, the ongoing treatment is not a benefit.

Texas Medicaid provides for medical services for eligible clients while out-of-state. The attending physician or other provider must document that the client was treated for an emergency condition. Out-of-state emergency services are also a benefit when the client’s health would be in danger if he or she were required to travel back to Texas.

Emergency department services are subject to retrospective review.

**Screening, Brief Intervention, and Referral to Treatment (SBIRT)**

SBIRT is a comprehensive, public health approach to the delivery of early intervention and treatment services for clients with substance use disorders and those at risk of developing such disorders. Substance abuse includes, but is not limited to, the abuse of alcohol and the abuse of, improper use of, or dependency on illegal or legal drugs. SBIRT is used for intervention directed to individual clients and not for group intervention. SBIRT is targeted to clients who are from 14 years of age through 20 years of age and who present to the hospital emergency department for a traumatic injury, condition, or accident related to substance abuse. SBIRT may also be medically necessary for clients who are from 10 years of age through 13 years of age.

Claims for the first SBIRT session, including screening and brief intervention, must be submitted by the hospital using an appropriate revenue code and procedure code H0050.

Screening to identify clients with problems related to substance use must be performed during the first session in the hospital emergency department or inpatient setting, but will not be separately reimbursed. Screening may be completed through interview and self-report, blood alcohol content, toxicology screen, or by using a standardized tool. Standardized tools that may be used include, but are not limited to, the following:

- Alcohol, Smoking, and Substance Involvement Screening Test (ASSIST)
- Drug Abuse Screening Test (DAST)
- Alcohol Use Disorders Identification Test (AUDIT)
- Cut-down, Annoyed, Guilty, Eye-opener (CAGE) questionnaire
- Car, Relax, Alone, Forget, Family or Friends, Trouble (CRAFFT) questionnaire
- Binge drinking questionnaire

Brief intervention is performed during the first session following a positive screen or a finding of at least a moderate risk for substance or alcohol abuse. Brief intervention, directed to the client, involves motivational discussion focused on raising the client’s awareness of their substance use and its consequences, and motivated them toward behavioral change. Successful brief intervention encompasses support of the client’s empowerment to make behavioral changes. A client found to have a moderate risk for substance or alcohol abuse should be referred for brief treatment of up to 3 sessions. Upon determination that the client has a severe risk for substance or alcohol abuse, the client should also be referred for more extensive treatment to the appropriate chemical dependency treatment center or outpatient behavioral health provider. If the client is currently under the care of a behavioral health provider, the client must be referred back to that provider.

SBIRT documentation for the first session must include:

- The client has an alcohol or drug-related traumatic injury or condition.
- Positive screening by a standardized screening tool.
2.3.3.6 Fluocinolone Acetonide

The fluocinolone acetonide (Retisert) intravitreal implant (procedure code J7311) will be considered for reimbursement to outpatient hospitals. Procedure code 67027 for implantation may be reimbursed to HASCs. This benefit is limited to clients who are 12 years of age and older and requires prior authorization.

Refer to: Subsection 2.3.4.6, “Prior Authorization for Fluocinolone Acetonide,” in this handbook.

2.3.3.7 Hospital Outpatient Observation Room Services

Observation care is defined by the CMS as “a well-defined set of specific, clinically appropriate services, which include ongoing short term treatment, assessment, and reassessment, that are furnished while a decision is being made regarding whether clients will require further treatment as hospital inpatients or if they are able to be discharged from the hospital.”

Outpatient observation services are usually ordered for clients who present to the emergency department and who then require a significant period of treatment or monitoring in order to make a decision about their admission or discharge. The decision whether to discharge a client from the hospital following resolution of the reason for the observation care or to admit the client as an inpatient can be made in less than 48 hours, usually in less than 24 hours.

Outpatient observation services require the use of a hospital bed and periodic monitoring by the hospital’s nursing or other ancillary staff to evaluate the client’s condition and to determine the need for an inpatient admission. Outpatient observation services can be provided anywhere in the hospital. The level of care, not the physical location of the bed, dictates the observation status.

Outpatient observation services (revenue code 762) are a benefit only when medically necessary and when provided under a practitioner’s order or under the order of another person who is authorized by state licensure law and hospital bylaws to admit clients to the hospital and to order outpatient services.

Outpatient observation services are considered medically necessary if the following conditions are met (this list is not all-inclusive):

- The client is clinically unstable for discharge and one of the following additional conditions apply:
  - Laboratory, radiology, or other testing is necessary to assess the client’s need for an inpatient admission.
  - The treatment plan is not established or, based on the client’s condition, is anticipated to be completed within a period not to exceed 48 hours.
  - The client had a significant adverse response to therapeutic services, invasive diagnostic testing, or outpatient surgery and requires short-term monitoring or evaluation.

- The medical necessity for inpatient treatment is unclear, that is:
  - The client’s medical condition requires careful monitoring and evaluation, or treatment to confirm or refute a diagnosis in order to determine whether an inpatient admission is necessary
  - There is a delayed or slow progression of the client’s signs and symptoms that makes diagnosis difficult and the monitoring or treatment does not meet the criteria for an inpatient level of care.
• The client is undergoing treatment for a diagnosed condition, and continued monitoring of clinical response to therapy may prevent an inpatient admission.

• The admitting practitioner anticipates that the client will require observation care for a minimum of eight hours.

Medically necessary services that do not meet the definition of observation care should be submitted separately or included as part of the emergency department or clinic visit, and are not reimbursed as observation care.

Outpatient observation services are not a substitute for a medically appropriate inpatient admission. If a client meets the medical necessity criteria for an inpatient admission and an inpatient admission is ordered by the practitioner, an inpatient admission is a benefit regardless of the length of stay. Claims for observation services may be denied in their entirety if the services should have initially been inpatient admissions or if a reason for an inpatient admission developed, but the observation stay was not converted to inpatient.

The determination of an inpatient or outpatient status for any given client is specifically reserved to the admitting practitioner. The decision must be based on the practitioner’s expectation of the care that the client will require.

2.3.3.7.1 Categories of Outpatient Observation Services

Direct Outpatient Observation Admission
A client may be directly admitted to outpatient observation from the evaluating practitioner’s office without being seen in the emergency room by a hospital-based practitioner. The practitioner’s order should clearly specify that the practitioner wants the client to be admitted to outpatient observation status. An order for “direct admission” will be considered an inpatient admission unless otherwise specified by the practitioner’s orders.

Brief observation periods following an office visit or at the direction of an off-site practitioner that involve a simple procedure (e.g., a breathing treatment) would be more appropriately coded as a treatment room visit.

Observation Following Emergency Room
A client may be admitted to outpatient observation through the emergency room if the client presents to the facility with an unstable medical condition and the evaluating practitioner determines that outpatient observation is medically necessary to determine a definitive treatment plan. An unstable medical condition is defined as one of the following:

• A variance in laboratory values from what is considered the generally accepted, safe values for the individual client.

• Clinical signs and symptoms that are above or below those of normal range and that require extended monitoring and further evaluation.

• Changes in the client’s medical condition are anticipated, and further evaluation is necessary.

If a client is admitted to observation status from the emergency room, the hospital is reimbursed only for the observation room charges. The emergency room charges are not reimbursed separately, but must be submitted on a separate detail on the same claim as the observation room charges.

Brief observation periods following an emergency room evaluation will not be reimbursed if the service would normally have been provided within the time frames and facilities of an emergency room visit.

Observation Following Outpatient Day Surgery
If a medical condition or complication of a scheduled day surgery requires additional care beyond the routine recovery period, the client may be placed in outpatient observation. The observation period should be submitted as an outpatient claim.
Reimbursement for outpatient observation after a scheduled day surgery is limited to situations in which the client exhibits an unusual reaction to the surgical procedure and requires monitoring or treatment beyond what is normally provided in the immediate post-operative period. Examples include, but are not limited to:

- Difficulty in awakening from anesthesia.
- A drug reaction.
- Other post-surgical complications.

**Observation Following Outpatient Diagnostic Testing or Therapeutic Services**

A client may be admitted to outpatient observation if the client develops a significant adverse reaction to a scheduled outpatient diagnostic test or to a therapeutic service, such as chemotherapy, that requires further monitoring. Observation services begin when the reaction occurred and end when the practitioner determines that the client is stable for discharge, or that an inpatient admission is appropriate.

**2.3.3.7.2 Documentation Requirements for Outpatient Observation**

Documentation that supports the medical necessity of the outpatient observation services must be maintained by the facility in the client's medical record. Documentation must include:

- The order of the ordering practitioner for admission to observation care, which must be dated and timed.
- The practitioner's admission and progress notes, which must be dated and timed, confirm the need for observation care, and outline the client's condition, treatment, and response to treatment.
- Nurse's notes, which must be dated and timed, reflect the time at which the client was admitted to the observation bed, and the reason for the observation stay.
- All supporting diagnostic and/or ancillary testing reports, including orders for the testing or any preadmission testing.
- Procedure notes and operative notes that address any complication that would support admission to observation status and must be dated and timed.
- Anesthesia and recovery room/post anesthesia care unit notes from the practitioner and the nurse, which must be dated and timed and detail orders and any complications that require admission to observation status.
- Documentation related to an outpatient clinic visit or critical care service that was provided on the same date of service as the observation service. The documentation must address any need for observation services and be dated and timed.
- All of the client education that was provided during the observation stay.
- The order for discharge from observation care, which must be signed, dated, and timed.
- The discharge notes, including nurse's notes that reflect the date and time at which the client was discharged from observation.

The client must be in the care of a practitioner during the period of observation, as documented in the medical record by admission, discharge, and other appropriate progress notes that are dated, timed, written, and signed by the practitioner.

Claims submitted for outpatient procedures in which the original intention was to keep the client for an extended period of time, such as overnight or for a 24-hour period, will be denied unless significant medical necessity is documented.

Retrospective review may be performed to ensure that the documentation supports the medical necessity of the outpatient observation services. Medical records will be evaluated to determine whether the practitioner's order (practitioner intent) and the services that were actually provided were consistent.
The medical records must clearly support the medical necessity of the outpatient observation services and must include a timed order for observation services that will support the number of hours that the client was under observation care and the hours that were submitted for payment.

2.3.3.7.3 Reporting Hours of Observation

Providers must submit the number of observation hours the client was under observation care.

Observation time begins at the clock time documented in the client's medical record. This time should coincide with the time that the client is placed in a bed for the purpose of initiating observation care in accordance with the practitioner's order.

Observation time ends when all medically necessary services related to observation care are completed. The end time of observation services may coincide with the time the client is actually discharged from the hospital or is admitted as an inpatient.

Hospitals should round clock times for the beginning and end of observation to the nearest hour and submit the total number of hours for the observation stay on the claim. For the purposes of submitting claims for observation services, one unit equals one hour. Partial units/hours should be rounded up or down to the nearest hour. Claims submitted with observation room units exceeding 48 hours will be denied.

Any service that was ordered within the observation period may be included on the outpatient claim if a practitioner's order for the service was made within the observation period time frame but hospital scheduling limitations prevented the service from being performed before the 48 hours expired. Any services ordered after 48 hours must not be included on the outpatient claim nor billed to the client.

If a period of observation spans more than one calendar day (i.e., extends past midnight), all of the hours for the entire period of observation must be included on a single line, and the date of service for that line is the date on which the observation care began.

Observation time may include medically necessary services and follow-up care that is provided after the time the practitioner writes the discharge order, but before the client is discharged. Reported observation time does not include the time the client remains in the observation area after treatment is completed for reasons such as waiting for transportation home.

Observation services must not be submitted concurrently with diagnostic or therapeutic services for which active monitoring is part of the procedure. In situations where a diagnostic or therapeutic procedure interrupts the observation stay, hospitals should record for each period of observation services the beginning and ending times of the observation period and add the lengths of time for the periods of observation services together to reach the total number of units reported on the claim.

Recovery room hours that are associated with an outpatient procedure must not be submitted simultaneously with hours of observation time.

Revenue code 761 will be denied if it is submitted for the same date of service by the same provider as revenue code 760, 762, or 769.

2.3.3.7.4 Client Status Changes

When a client's status changes from outpatient observation to inpatient admission, both the outpatient observation service and the inpatient admission must be submitted as separate details on the same inpatient claim. The date of the inpatient admission is the date on which the client was admitted to inpatient status. The practitioner's order for a change in client status from outpatient observation to inpatient admission must be written, dated, and timed before the client's discharge.
When a client is admitted to the hospital as an inpatient and a subsequent internal utilization review (UR) determines that the services did not meet inpatient criteria, the hospital may change the client's status from inpatient to outpatient observation. The order to change from an inpatient to outpatient observation admission is effective for the same date and time as the inpatient order. This practice is acceptable under Texas Medicaid if all of the following conditions are met:

- The change in client status is made before discharge or release while the client is still a patient of the hospital.
- The hospital has not submitted a claim for the inpatient admission.
- The practitioner responsible for the care of the client concurs with the hospital UR committee's determination.
- The practitioner's concurrence with the UR committee's decision is documented in the client's medical record.

When the hospital has determined that it may submit an outpatient claim according to the conditions described above, the entire episode of care should be submitted as an outpatient episode of care.

2.3.3.7.5 Observation Services that are Not a Benefit

Outpatient observation services that are not medically necessary or appropriate are not benefits of Texas Medicaid, including, but not limited to, services provided under the following circumstances:

- As a substitute for an inpatient admission.
- Without a practitioner's order, including services ordered as inpatient services by the ordering practitioner, but submitted as outpatient by the billing office.
- For clients awaiting transfer to another facility, such as for nursing home placement.
- For clients with lack of or delay in transportation.
- As a convenience to the client, client's family, the practitioner, hospital, or hospital staff.
- For routine preparation before or recovery after outpatient diagnostic or surgical services.
- When an overnight stay is planned before diagnostic testing.
- To medically stable clients who need diagnostic testing or outpatient procedures that are routinely provided in an outpatient setting.
- Following an uncomplicated treatment or procedure.
- As standing orders for observation following outpatient surgery.
- For postoperative monitoring during a standard recovery period of four to six hours, which is considered part of the recovery room service.
- For outpatient blood or chemotherapy administration and concurrent services.
- For services that would normally require an inpatient admission.
- Beyond 48 hours from the time of the observation admission.
- For a medical examination for clients who do not require skilled support.

2.3.3.8 Fetal Nonstress Testing and Contraction Stress Test

Claims for nonstress and contraction stress testing conducted in the outpatient setting must be submitted with revenue code 729. Services during an inpatient hospital stay are reimbursed under the hospital's DRG.

2.3.3.9 Day Surgery

These procedures are for clients who are scheduled for a day surgery procedure and are not inpatient at the time the day surgery is performed. Claims for scheduled procedures that are performed in a HASC must be submitted using the HASC provider identifier with type of bill (TOB) 131. Claims for emergency or unscheduled procedures performed in a hospital when the client is an outpatient must be submitted using the hospital provider identifier and appropriate revenue and HCPCS code (if required) with TOB 131.

Reimbursement of HASC procedures is based on the CMS-approved Ambulatory Surgical Code Groupings (1 through 9 per CMS and Group 10 per HHSC) payment schedule. Reimbursement is limited to the lesser of the amount reimbursed to an ambulatory surgical center (ASC) for similar services, the hospital’s actual charge, or the allowable cost determined by HHSC. When multiple surgical procedures are performed on the same day, only the procedure with the highest surgical code grouping is reimbursed. A complete list of approved HASC procedure codes with the assigned payment group can be found on the TMHP website at www.tmhp.com. Click on Fee Schedules. This list can also be obtained by calling the TMHP Contact Center at 1-800-925-9126.

Refer to: Outpatient Services Handbook (Vol. 2, Provider Handbooks)

2.3.3.9.1 American Society of Anesthesiologists (ASA) Physical Status and Heart Disease Classifications

If a client is admitted for a day surgery procedure—whether scheduled or emergency—and has either an ASA Classification of Physical Status of III (P3), IV (P4), or V (P5) or Classification of Heart Disease IV (refer to Texas Medicaid Hospital Screening Criteria at www.hhs.state.tx.us/OIG/screen/SC_TOC.shtml#asa), the procedure may be considered an inpatient procedure and submitted on an inpatient claim (TOB 111) using the hospital’s provider identifier. The reason for the surgery (principal diagnosis), any additional substantiated conditions, and the procedure must be included on one inpatient claim.

The descriptions for ASA classes of physical status are as follows:

- **Class I.** A normal healthy patient, without organic, physiological, or psychiatric disturbance.
  
  **Example:** Healthy patient with good exercise tolerance.

- **Class II.** A patient with mild systemic disease, controlled medical conditions without significant systemic effects.
  
  **Example:** Controlled hypertension or diabetes mellitus without system effects, cigarette smoking without evidence of chronic obstructive pulmonary disease (COPD), anemia, mild obesity, age less than 1 or greater than 70 years, pregnancy.

- **Class III.** A patient exhibiting severe systemic disturbance that may or may not be associated with the surgical complaint and that seriously interferes with the patient’s activities.
  
  **Example:** Severely limiting organic heart disease, severe diabetes with vascular complications; moderate to severe degrees of pulmonary insufficiency; angina pectoris or healed myocardial infarction.

- **Class IV.** A patient exhibiting extreme systemic disturbance that may or may not be associated with the surgical complaint, that interferes with the patient’s regular activities, and that has already become life-threatening.
  
  **Example:** Organic heart disease with marked signs of cardiac insufficiency present (for example, cardiac decompensation); persistent anginal syndrome, or active myocarditis; advanced degrees of pulmonary, hepatic, renal, or endocrine insufficiency present.
Class V. The rare person who is moribund (in a dying state) before operation, whose pre-operative condition is such that he or she is expected to die within 24 hours even if not subjected to the additional strain of operation.

Example: Burst abdominal aneurysm with profound shock; major cerebral trauma with rapidly increasing intracranial pressure; massive embolus.

The Classification of Heart Disease consists of four classes:

- Class I. No limitation of physical activity. Ordinary physical activity does not cause undue fatigue, palpitation, dyspnea, or anginal pain.
- Class II. Slight limitation of physical activity. Comfortable at rest, but ordinary physical activity results in fatigue, palpitation, dyspnea, or anginal pain.
- Class III. Marked limitation of physical activity. Comfortable at rest, but less than ordinary activity causes fatigue, palpitation, dyspnea, or anginal pain.
- Class IV. Unable to carry on any physical activity without discomfort. Symptoms of cardiac insufficiency, or of the anginal syndrome, may be present even at rest. If any physical activity is undertaken, discomfort occurs.

Inpatients may occasionally require a surgery that has been designated as an outpatient procedure. The physician must document the need for this surgery as an inpatient procedure before the procedure is performed. These claims are subject to retrospective review.

2.3.3.9.2 HASC Global Services

The HASC payment represents a global payment and includes room charges and supplies. Claims for covered services provided are submitted as one inclusive charge. All facility services provided in conjunction with the surgery (for example, laboratory, radiology, anesthesia supplies, medical supplies) are considered part of the global payment and cannot be itemized or submitted separately.

Routine X-ray and laboratory services that are directly related to the surgical procedure that is being performed are not reimbursed separately. All nonroutine laboratory and X-ray services that are provided with emergency conditions may be submitted separately with documentation that the complicating condition arose after the initiation of the surgery.

Medical and prosthetic devices may be supplied by the HASC and implanted, inserted or otherwise applied during a covered surgical procedure and are included in the global surgery fee.

Exception: Certain pieces of equipment, such as cochlear implant, implantable infusion pumps, and neurostimulator devices may be reimbursed separately from the HASC global rate.

2.3.3.9.3 Complications Following Elective/Scheduled Day Surgeries

If a condition of the scheduled day surgery requires additional care beyond the recovery period, the client may be placed in outpatient observation (stay less than 24 hours). The observation period must be submitted on an outpatient claim (TOB 131) using the hospital’s provider identifier. If the client requires inpatient admission following the observation stay, the admission date for the inpatient claim is the date the client was placed in observation. All charges for services provided from the time of observation placement (excluding the surgical procedure) must be included on the inpatient claim (TOB 111) using the hospital’s provider identifier. The principal diagnosis to be used on the inpatient claim is the complication of the surgery that necessitated the extended stay. The day surgery procedure must still be submitted as an outpatient procedure under the HASC provider identifier.

2.3.3.9.4 Inpatient Admissions After Day Surgery

If a complication occurs for which the client requires inpatient admission immediately following the day surgery (no observation period), the day surgery must be submitted as an outpatient procedure (TOB 131), using the appropriate hospital or HASC provider identifier. The inpatient admission is to be
submitted as an inpatient claim (TOB 111), using the hospital’s provider identifier. The principal diagnosis to be used on the inpatient claim is the complication of the surgery that necessitated the extended stay. The day surgery procedure must not be included on the inpatient claim. The inpatient admission must be medically necessary and is subject to retrospective review.

2.3.3.9.5 Emergency/Unscheduled Day Surgeries

These procedures are for clients who require an unscheduled (emergency) day surgery procedure and are not inpatient at the time the day surgery is performed.

If a client is first treated in the ER and then requires emergency surgery as an outpatient, claims for emergency, unscheduled outpatient surgical procedures must be filed itemizing each service, such as room charge, laboratory, radiology, anesthesia, and supplies. Providers must submit claims for unscheduled day surgery procedures and emergency services as outpatient procedures using the hospital provider identifier. If a condition of the unscheduled day surgery requires additional care beyond the recovery period, the client may be placed on outpatient observation status. The observation period must be submitted on the same outpatient claim.

Providers must submit claims for the unscheduled day surgery procedures and emergency services as outpatient procedures (TOB 131) using the hospital’s provider identifier. If a condition of the unscheduled day surgery requires additional care beyond the recovery period, the client may be placed on outpatient observation status (stay less than 24 hours). The observation period must be submitted on the same outpatient claim (TOB 131) using the hospital’s provider identifier.

2.3.3.9.6 Complications Following Emergency/Unscheduled Day Surgery

If the client requires inpatient admission following the observation stay, the admission date for the inpatient claim is the date the client was placed in observation. All charges for services provided from the time of observation status (excluding surgical procedures and emergency services) must be included on the inpatient claim (TOB 111) using the hospital’s provider identifier. The principal diagnosis to be used on the inpatient claim is the complication of the surgery that necessitated the extended stay. The day surgery and emergency services must not be included on the inpatient claim since they are to be submitted using TOB 131 as outpatient procedures under the hospital’s provider identifier.

2.3.3.9.7 Incomplete Day Surgeries

When HASC providers submit claims to Texas Medicaid for an incomplete surgical procedure, one of the following must be included on the claim:

- Modifier 74 for a discontinued outpatient procedure after anesthesia administration or 73 for a discontinued outpatient procedure prior to anesthesia administration.
- At least one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>V641</td>
<td>Surgical or other procedure not carried out because of contraindication</td>
</tr>
<tr>
<td>V642</td>
<td>Surgical or other procedure not carried out because of patient’s decision</td>
</tr>
<tr>
<td>V643</td>
<td>Procedure not carried out for other reasons</td>
</tr>
</tbody>
</table>

Claims that are submitted with diagnosis codes V641, V642, V643 or modifier 73 or 74 suspend for review of the medical documentation submitted with the claim. Providers must submit the operative report, the anesthesia report, and state why the operation was not completed.
Reimbursement to HASC facilities for canceled or incomplete surgeries because of patient complications, is made according to the following criteria, depending on the extent to which the anesthesia or surgery proceeded:

- Reimburse at 0 percent of HASC group payment schedule for a procedure that is terminated for nonmedical or medical reasons before the facility has expended substantial resources.
- Reimburse at 33 percent of HASC group payment schedule up to the administration of anesthesia.
- Reimburse at 67 percent of HASC group payment schedule after the administration of anesthesia but before incision.
- Reimburse at 100 percent of HASC group payment schedule after incision.

Surgeries canceled because of incomplete pre-operative procedures are not reimbursed.

2.3.3.10 Lung Volume Reduction Surgery (LVRS)

LVRS surgery must be performed at a facility certified under the Disease Specific Care Certification Program for LVRS by the Joint Commission of Health Care Organization and identified by the National Heart, Lung, and Blood Institute, and at sites that have been approved by Medicare as lung transplant facilities.

LVRS surgery must be preceded and followed by a program of diagnostic and therapeutic services consistent with those provided in the National Emphysema Treatment Trial (NETT) and designed to maximize the potential to successfully undergo and recover from surgery. The program must be arranged, monitored, and performed under the coordination of the facility where the surgery takes place, and must include all of the following:

- A 6- to 10-week series of pre-operative sessions.
- A series of postoperative sessions within 8 to 9 weeks of the LVRS.
- It must be consistent with the plan of care developed by the treating physician following performance of a comprehensive evaluation of the client's medical, psychosocial, and nutritional needs.
- It must be consistent with the pre-operative and post-operative services provided in the NETT study.

Prior authorization is required for the LVRS procedure; however, prior authorization is not required for the pre-operative and post-discharge pulmonary services.

An outpatient facility must submit claims that include revenue code 469 and one of the pre-operative rehabilitation service procedure codes for preparation for LVRS (procedure code G0302, G0303, or G0304) or for the post-discharge surgery services after LVRS (procedure code G0305). These services are restricted to diagnosis code 4928.

Procedure codes G0302, G0303, and G0304 are limited to once per rolling year per client for any provider. Only one pre-operative pulmonary rehabilitation service will be reimbursed per client. Post-discharge pulmonary surgery services after LVRS (procedure code G0305) are limited to once per rolling year per client for any provider and only if a claim for procedure code 32491 has been submitted in the past 12 months. Procedure code G0305 may be considered on appeal with documentation of LVRS surgery performed in the previous 12 months.

2.3.3.11 Hyperbaric Oxygen Therapy (HBOT)

HBOT is a type of therapy that is intended to increase the environmental oxygen pressure to promote the movement of oxygen from the environment into the body tissues by means of pressurization that is greater than atmospheric pressure. Such treatment is performed in specially constructed hyperbaric chambers, which may hold one or several patients.
Note: Although oxygen may be administered by mask, cannula, or tube in addition to the hyperbaric treatment, the use of oxygen by mask, etc., or applied topically is not considered hyperbaric treatment in itself.

Authorization is not required. HBOT is diagnosis-restricted and is limited to one session per day.

Outpatient hospital clinics and freestanding facilities must use revenue code 413 to submit claims for the technical component. Revenue code 413 is limited to one session per day, per client, by any provider. HBOT is not payable to psychiatric hospitals.

Refer to: Subsection 8.2.31, “Hyperbaric Oxygen Therapy (HBOT),” in the Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)

2.3.3.12 Implantable Infusion Pump

Implantable infusion pumps may be a benefit in an outpatient hospital or HASC setting if a medical necessity exists. Implantable infusion pumps may be medically necessary in the following circumstances:

- Intrathecal administration of anti-spasmodic drugs to treat chronic intractable spasticity
- Administration of opioid drugs for treatment of severe chronic intractable pain
- Administration of intrahepatic chemotherapy on colorectal cancer with liver metastases
- Administration of intra-arterial chemotherapy in head and neck cancers

Implantable infusion pumps may be reimbursed with procedure code E0782 for a nonprogrammable infusion pump or E0783 for a programmable infusion pump.

Subsection 2.3.4.9, “Prior Authorization for Implantable Infusion Pump,” in this handbook.

2.3.3.13 Laboratory Services

Routine laboratory services, directly related to the surgical procedure being performed, are not reimbursed separately. Claims for nonroutine laboratory services provided with emergency conditions may be submitted separately with documentation that the complicating condition arose after the initiation of the surgery. Outpatient claims for laboratory services must reflect only tests actually performed by the hospital laboratory.

Exception: Hospital laboratories may submit claims for all the tests performed on a specimen if some but not all the tests are done by another laboratory on referral from the hospital submitting the claim.

The billing hospital must enter the name and provider identifier of the performing laboratory in Block 80 of the UB-04 CMS-1450 paper claim form and must enter the performing laboratory’s provider identifier next to the service provided by the performing laboratory.

Hospitals may submit claims for a handling fee (procedure code 99001) for collecting and forwarding a specimen to a referral laboratory when the laboratory handling fee is not being billed through other methods. Only one handling fee may be charged per day, per client, unless specimens are sent to two or more different laboratories; this must be documented on the claim.

Refer to: Radiology, Laboratory, and Physiological Lab Services Handbook (Vol. 2)

2.3.3.14 Neurostimulators

Neurostimulators may be a benefit in the outpatient hospital and HASC setting when medically necessary. All procedures require prior authorizations.

Subsection 2.3.4.10, “Prior Authorization for Neurostimulators,” in this handbook.

### 2.3.3.15 Occupational and Physical Therapy Services

Refer to: Nursing and Therapy Services Handbook (Vol. 2, Provider Handbooks) for more information about therapy services.

### 2.3.3.16 Electrodiagnostic (EDX) Testing

Electromyography (EMG) and nerve conduction studies (NCS), collectively known as EDX testing, must be medically indicated and may be reimbursed to outpatient hospitals. Testing must be performed using EDX equipment that provides assessment of all parameters of the recorded signals. Studies performed with devices designed only for screening purposes rather than diagnoses are not a benefit of Texas Medicaid.

NCS and EMG studies are diagnosis restricted and may require prior authorization.

### 2.3.3.17 Computed Tomography and Magnetic Resonance Imaging

Prior authorization is required for all outpatient nonemergent (i.e., those that are scheduled) CT, computed tomography angiography (CTA), magnetic resonance imaging (MRI), and magnetic resonance angiography (MRA) studies before services are rendered. Authorization is not required for the emergency department or inpatient hospital radiology services. Retroactive authorization may be required for some outpatient emergent studies.

Reimbursement for procedures with descriptions that specify “with contrast” include payment for contrast materials. Some diagnostic radiopharmaceuticals are benefits of Texas Medicaid. Outpatient hospitals may submit the total component of the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>77371</td>
</tr>
</tbody>
</table>

Procedure code 77399 may be submitted as either the total component or the technical component.

Providers can refer to the online fee lookup (OFL) or the applicable fee schedules on the TMHP website at www.tmhp.com to review the diagnostic radiopharmaceuticals that are reimbursed by Texas Medicaid.

Refer to: Subsection 2.3.4.8.1, “Computed Tomography and Magnetic Resonance Imaging,” in this handbook.

### 2.3.3.18 Hospital Radiation Therapy Services

Take-home drugs given during the course of therapy can be reimbursed separately through the VDP. Hospitals use revenue code 333, Radiation therapy, on the UB-04 CMS-1450 paper claim form when submitting charges for these services.
The following radiation therapy services provided in an outpatient setting are allowed only once per day unless documentation of medical necessity supports the need for repeated services:

- Therapeutic radiation treatment planning
- Therapeutic radiology simulation-aided field setting
- Teletherapy
- Brachytherapy isodose calculation
- Treatment devices
- Proton beam delivery/treatment
- Intracavity radiation source application
- Interstitial radiation source application
- Remote afterloading high intensity brachytherapy
- Radiation treatment delivery
- Localization, and radioisotope therapy

**Radiopharmaceuticals**

Radiopharmaceuticals may be considered for separate reimbursement when used for therapeutic treatment.

The following procedure codes are payable to outpatient hospitals

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>79403* A9542 A9543 A9545 A9563 A9564 A9600 A9699</td>
</tr>
</tbody>
</table>

*Total or technical component

Procedure codes A9542, A9543, and A9545 require prior authorization. Only one of these agents may be considered per lifetime by any provider. Procedure codes A9542, A9543, A9545 must be submitted with diagnosis code 20280.

Procedure code A9600 is limited to diagnosis 1985 and to one service per day by the same provider with a total of 10 mci intravenously injected every 90 days, by any provider.

Procedure code A9563 is limited to the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>1985 20410 20412 20422 20492 20510 20512 20522 20582 20592</td>
</tr>
<tr>
<td>20812 20822 20892 2384</td>
</tr>
</tbody>
</table>

Procedure code A9564 is limited to diagnosis 1972 or 1976. Modifier 76 must be used when submitting a claim for a radiopharmaceutical procedure code more than once per day by the same provider.

**Refer to:** Subsection 2.3.4.7, “Prior Authorization for Therapeutic Radiopharmaceuticals,” in this handbook.

2.3.3.19 Respiratory Services

2.3.3.19.1 Aerosol Treatment

Aerosol treatments, including vaporizers, humidifiers, nebulizers, and inhalers are a benefit of Texas Medicaid. Authorization is not required for aerosol treatments.

The following diagnosis codes are payable for aerosol treatments:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>1363 27700 27701 27702 27703 27709 46611 46619 4801 48242</td>
</tr>
<tr>

</tr>
<tr>
<td>4918 4919 4920 4928 49300 49301 49302 49310 49311 49312</td>
</tr>
<tr>
<td>49320 49321 49322 49381 49382 49390 49391 49392 4940 4941</td>
</tr>
<tr>
<td>4950 4951 4952 4953 4954 4955 4956 4957 4958 4959</td>
</tr>
<tr>
<td>496 5070 5071 5078 51911 51919 5533 7707 99527 99731</td>
</tr>
<tr>
<td>99739</td>
</tr>
</tbody>
</table>

Revenue code 412 may be reimbursed separately when submitted for aerosol therapy in the recovery room after outpatient surgery, as it is a necessary adjunct to the postoperative recovery of a client who has undergone general anesthesia.

Outpatient facilities must submit claims for aerosol treatments using revenue code 412. Revenue code 412 includes the inhalers listed below and is payable once per day in the outpatient setting for either the aerosol therapy or the inhaler, but not both.

- Beclomethasone dipropionate (Vanceril or Beclovent oral inhalers)
- Isoproterenol sulfate (Iso-Autohaler, Luf-ISO Inhaler, Medihaler-ISO, Norisodrine Aerohaler)
- Isoproterenol hydrochloride (Iprenol, Vapo-ISO inhalers)
- Bilateral (Proventil or Ventolin inhalers)
- Metaproterenol sulfate (Alupent Metered Dose inhaler, Metaprel inhaler, Alupent 10 mL, Alupent 30 mL)
- Epinephrine bitartrate (Medihaler-Epi and Primatene Mist Suspension inhaler)
- Phenylephrine bitartrate (Duo-Medihaler)
- Isoetharine mesylate inhalation aerosol (Bronkometer)
- Dexamethasone sodium phosphate (Turbinaire or Respihaler)

Demonstration and evaluation of client utilization of an aerosol generator, nebulizer, metered dose inhaler, or intermittent positive pressure breathing (IPPB) device will not be reimbursed separately.

IPPB treatments have been determined to be inappropriate for the treatment of most respiratory problems and are denied.

2.3.3.19.2 Pentamidine Aerosol

Aerosol pentamidine treatments are reimbursed using procedure code 94642. The provider may also be reimbursed for the medication using procedure code J2545.

Payment for aerosol pentamidine treatments is limited to the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>042 07951 07952 07953 1363 48284 5186</td>
</tr>
</tbody>
</table>
Aerosol pentamidine treatments are limited to one treatment every 28 days.

Oral trimethoprim-sulfamethoxazole is available from pharmacies for self administration at home. The use of oral trimethoprim-sulfamethoxazole is not a payable benefit of the insured portion of Texas Medicaid.

2.3.3.19.3 Pulmonary Function Studies

Pulmonary function studies considered for reimbursement to outpatient hospitals include, but are not limited to, the following procedures when submitted with the total component (TOS 5):

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>94010</td>
</tr>
<tr>
<td>94370</td>
</tr>
</tbody>
</table>

Procedure codes 94452 and 94453 must be submitted with one of the following diagnosis codes. Additionally, evidence of hypoxemia must be documented in the client’s medical record.

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>27700</td>
</tr>
<tr>
<td>4169</td>
</tr>
<tr>
<td>4920</td>
</tr>
<tr>
<td>5089</td>
</tr>
<tr>
<td>5181</td>
</tr>
</tbody>
</table>

When multiple procedure codes are submitted, the most inclusive code of the related codes will be reimbursed and all other related codes will be denied.

The procedure codes listed in these tables are subject to National Correct Coding Initiative (NCCI) relationships. Providers should refer to the TMHP website at www.tmhp.com for NCCI correct coding guidelines and specific applicable code combinations.

When unrelated pulmonary function studies are submitted together, each will be considered for reimbursement.

2.3.4 Prior Authorization

2.3.4.1 Nonemergency Ambulance Transport Prior Authorization

Facilities and other providers must request and obtain prior authorization before contacting the ambulance provider for nonemergency ambulance services. HRC states that a provider of nonemergency ambulance transport may be entitled to payment from the nursing facility, health-care provider, or other responsible party that requested the service if payment under the Medical Assistance Program is denied because of lack of prior authorization and the ambulance provider submits a copy of the bill for which payment was denied.

TMHP responds to nonemergency transport prior authorization requests within two business days of receipt of the request. It is recommended that all requests for a prior authorization number (PAN) be submitted in sufficient time to allow TMHP to issue the PAN before the date of the requested transport. If the client’s medical condition is not appropriate for transport by ambulance, nonemergency ambulance services are not a benefit. Prior authorization is a condition for reimbursement but is not a guarantee of payment. The client and provider must meet all of the Medicaid requirements, such as client eligibility and claim filing deadlines.
These prior authorization requirements also apply to Medicaid providers who participate in PCCM. Medicaid providers who participate in one of the Medicaid Managed Care Health Maintenance Organization (HMO) plans must follow the plan’s requirements.

The TMHP Ambulance Unit reviews the prior authorization request to determine whether the client’s medical condition is appropriate for transport by ambulance. Incomplete information may cause the request to be denied.

The following information assists TMHP in determining the appropriateness of the transport:

- An explanation of the client’s physical condition that establishes the medical necessity for transport. The explanation must clearly state the client’s condition(s) requiring transport by ambulance.
- The necessary equipment, treatment, or personnel used during the transport.
- The origination and destination points of the client’s transport.

Prior authorization is required when an extra attendant is needed for any nonemergency transport. When a client’s condition changes, such as a need for oxygen or an extra attendant for transport, the prior authorization request must be updated.

### 2.3.4.2 Prior Authorization Types, Definitions

**One-Time, Nonrepeating**

One-time, nonrepeating requests (1 day) for prior authorization must be submitted on the Nonemergency Ambulance Prior Authorization Request form. The physician’s signature is not needed for one-time, nonrepeating requests.

**Short Term**

Short-term requests (2 to 60 days) for prior authorization are reserved for those clients whose transportation needs are short-term and are not anticipated to last longer than 60 days. Short-term requests must be submitted on the Nonemergency Ambulance Prior Authorization Request form. The request must include the physician’s original signature and date signed. The signature must be current, unaltered, original, and handwritten. Stamped or computerized signatures and dates are not accepted. Without a signature and date, the form is considered incomplete.

**Long Term**

Long-term requests (61 to 180 days) are reserved for those clients whose transportation needs extend beyond 60 days. Long-term requests must be submitted on the Nonemergency Ambulance Prior Authorization Request form. The request must include the physician’s original signature and date signed. The signature must be current, unaltered, original, and handwritten. Stamped or computerized signatures and dates are not accepted. Without a physician’s signature and date, the form is considered incomplete.

**Refer to:** Form HS.3, “Nonemergency Ambulance Prior Authorization Request” in this handbook

Form HS.5, “Provider Instructions for Nonemergency Ambulance Prior Authorization Request Form” in this handbook.

### 2.3.4.3 Nonemergency Prior Authorization Process

Prior authorization is required for all nonemergency ambulance transport. The special evening and weekend hours for submitting prior authorization requests by telephone ended on September 1, 2009. Providers may submit prior authorization on the TMHP website at www.tmhp.com or may fax the Nonemergency Ambulance Prior Authorization Request form to the TMHP Ambulance Unit at 1-512-514-4205.

Medicaid providers may request prior authorization using one of the following methods:

- The client’s physician, nursing facility, intermediate care facility for persons with mental retardation (ICF-MR), health-care provider, or other responsible party completes the online prior authorization request on the TMHP website at www.tmhp.com.
• Hospitals may call TMHP at 1-800-540-0694 to request prior authorization Monday through Friday, 7 a.m. to 7 p.m., Central Time. A request may be submitted up to 60 days before the date on which the nonemergency transport will occur. A request for a one-day transport may be submitted on the next business day following the transport in some circumstances; however, every attempt must be made to obtain prior authorization before the transport takes place.

Authorization requests for one day transports submitted beyond the next business day period will be denied. A request for a recurring transport must be submitted before the client is transported by ambulance.

Clients requiring hospital-to-hospital and hospital-to-outpatient medical facility transports are issued a PAN for that transport only.

TMHP reviews all of the documentation it receives. An online prior authorization request submitted on the TMHP website at www.tmhp.com is responded to with an online approval or denial. Alternately, a letter of approval or denial is faxed to the requesting provider. The client is notified by mail if the authorization request is denied or downgraded. Reasons for denial include documentation that does not meet the criteria of a medical condition that is appropriate for transport by ambulance, or that the client is not eligible for the dates of services requested. Clients may appeal prior authorization request denials by contacting TMHP Client Notification at 1-800-414-3406. Providers may not appeal prior authorization request denials.

The requesting provider must contact the transporting ambulance provider with the PAN and the dates of service that were approved.

Refer to: Subsection 5.4.1, “Prior Authorization Requests Through the TMHP Website,” in Section 5, “Prior Authorization” (Vol. 1, General Information) for additional information, including mandatory documentation requirements and retention.

Providers are not required to fax medical documentation to TMHP; however, in certain circumstances, TMHP may request that the hospital fax the supporting documentation.

Incomplete online or faxed request forms are not considered a valid authorization request and are returned as a denial.

A Nonemergency Ambulance Prior Authorization Request form that is completed and signed after the service is rendered is not considered documentation and should not be sent with a claim or appeal. A nonemergency transport will be denied when a claim is submitted with a Nonemergency Ambulance Prior Authorization Request form that is completed and signed after the service is rendered. In addition, a Nonemergency Ambulance Prior Authorization Request form that is completed and signed after the service is rendered will not be accepted on appeal of the denial.

Emergency transports that use an extra attendant do not require prior authorization. Modifier ET must be billed with the extra attendant procedure code A0424.

The hospital must maintain documentation of medical necessity, including a copy of the authorization from TMHP, in the client’s medical record for any item or service that requires prior authorization. The services provided must be clearly documented in the medical record with all pertinent information regarding the client’s condition to substantiate the need and medical necessity for the services.

2.3.4.4 Nonemergency Prior Authorization and Retroactive Eligibility

Retroactive eligibility occurs when the effective date of a client’s Medicaid coverage is before the eligibility “add date.” The date the client’s Medicaid eligibility is added to TMHP’s eligibility file is called the “add date.” For clients with retroactive eligibility, prior authorization requests must be submitted after the client’s add date and before a claim is submitted to TMHP.
For services provided to fee-for-service Medicaid and PCCM clients during the client’s retroactive eligibility period (i.e., the period from the effective date to the add date), prior authorization must be obtained within 95 days of the client’s add date and before a claim for those services is submitted to TMHP. For services provided on or after the client’s add date, the provider must obtain prior authorization within 3 business days of the date of service.

The provider is responsible for verifying eligibility. The provider is strongly encouraged to access the Automated Inquiry System (AIS) or TMHP EDI frequently while providing services to the client. If services are discontinued before the client's add date, the provider must still obtain prior authorization within 95 days of the add date to be able to submit claims.

If a client's Medicaid eligibility is pending, a PAN must be requested before a nonemergency transport. Initially this request will be denied for Medicaid eligibility. When Medicaid eligibility is established, the requestor has 95 days from the date on which the eligibility was added to TMHP's files to contact the TMHP Ambulance Unit and request that authorization be considered.

To inquire about Medicaid eligibility, providers can call AIS at 1-800-925-9126.

Refer to: Form HS.3, “Nonemergency Ambulance Prior Authorization Request” in this handbook.

### 2.3.4.5 Prior Authorization for Organ/Transplant Services

All solid organ transplant services provided by facilities and professionals must be prior authorized. If a solid organ transplant is not prior authorized, services directly related to the transplant within the three day pre-operative and six-week postoperative period also will be denied, regardless of who provides the service, (e.g., laboratory services, status-post visits, and radiology services). Services unrelated to the transplant surgery will be paid separately.

A transplant request signed by a physician associated with transplant facilities is considered for prior authorization after the client has been evaluated and meets the guidelines of the institution’s transplant protocol.

### 2.3.4.6 Prior Authorization for Fluocinolone Acetonide

Procedure code J7311 is only payable with a posterior uveitis diagnosis (36320) of more than six months duration and the condition has been unresponsive to oral or systemic medication treatment. To request prior authorization, providers must submit requests by fax or mail to the SMPA Department at:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway
Austin, TX 78727
Fax: 1-512-514-4213

Requests for prior authorization can be submitted online through the TMHP website at www.tmhp.com.

Refer to: Subsection 2.3.3.6, “Fluocinolone Acetonide,” in this handbook.

### 2.3.4.7 Prior Authorization for Therapeutic Radiopharmaceuticals

Prior authorization is required for A9542, A9543, and A9545, which will be considered with documentation of all of the following:

- A diagnosis of either a low-grade follicular or transformed B-cell non-Hodgkin’s lymphoma.
- Client has failed, relapsed, or become refractory to conventional chemotherapy.
- Marrow involvement is less than 26 percent.
- Platelet count is 100,000 cell/mm³ or greater.
• Neutrophil count is 1,500 cells/mm³ or greater.
• Client has failed a trial of rituximab.

Prior authorization must be requested through the SMPA department with appropriate documentation. Requests can be mailed or faxed to:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway
Austin, TX 78727
Fax: 1-512-514-4213

Requests for prior authorization can be submitted online through the TMHP website at www.tmhp.com.

**Refer to:** Subsection 2.3.3.18, “Hospital Radiation Therapy Services,” in this handbook.

### 2.3.4.8 Prior Authorization for Hospital Radiology Services

Requests for radiology authorization must be submitted to MedSolutions electronically or by telephone, fax, or mail as follows:

Online: www.medsolutionsonline.com

**Note:** Access to the MedSolutions online prior authorization portal is also available from www.tmhp.com and the TMHP prior authorization portal.

Texas Medicaid & Healthcare Partnership
730 Cool Springs Blvd, Suite 800
Franklin, TN 37067
Telephone 1-800-572-2116
Fax 1-800-572-2119

**Refer to:** Form HS.5, “Radiology Prior Authorization Request Form” in this handbook.

### 2.3.4.8.1 Computed Tomography and Magnetic Resonance Imaging

Prior authorization is required for all outpatient nonemergent CT, CTA, MRI, and MRA studies (i.e., those that are scheduled) before services are rendered, including revenue codes 350, 351, 352, 359, 610, 611, 612, and 619. Authorization is not required for the emergency department or inpatient hospital radiology services. Intraoperative MRI does not require prior authorization.

Retrospective authorization is required for outpatient emergent studies when the physician determines a medical emergency that imminently threatens life or limb exists, and the medical emergency requires advanced diagnostic imaging (CT, CTA, MRI, or MRA). Providers must submit a retrospective authorization request no later than 14 calendar days beginning the day after the study is completed. Retroactive authorization is not required when a previously prior authorized procedure is changed by the ordering physician or radiologist to a lesser procedure of the same imaging technology (e.g., an MRI with contrast is prior authorized and the actual procedure performed is an MRI without contrast).

The addition of post 3-D reconstruction (76376 and 76377) CT, CTA, MRI, and MRA studies must be prior authorized. No additional payment will be made without prior authorization. Obstetrical 3-D reconstruction ultrasound is not a benefit of Texas Medicaid.

All medically necessary radiology services provided to hospital clients must be ordered by the client’s attending or consulting physician. These services must be documented in the client’s medical record.

Prior authorization of nonemergent and retrospective authorization of urgent or emergent CT, CTA, MRI, and MRA studies will be considered on an individual basis adhering to standard clinical evidence-based guidelines. Documentation must support medical necessity for the study and must be maintained by the ordering physician and the radiologist in the client’s record. Nationally accepted guidelines and radiology protocols based on medical literature are used in the authorization processes for both
emergent and nonemergent studies. These include: American College of Radiology (specifically, their Appropriateness Criteria), American Academy of Neurology, American Academy of Orthopedic Surgeons, American College of Cardiology, the American Heart Association, and the National Comprehensive Cancer Care Network.

2.3.4.8.2 Cardiac Nuclear Imaging

Prior authorization is required for planned or scheduled procedures before a service is rendered. Prior authorization is considered on an individual bases, adhering to standard clinical evidence-based guidelines. Documentation must support medical necessity for the study, and must be maintained in the client's medical record, both by the ordering physician and the facility. Retroactive authorization must be requested for urgent cardiac imaging studies. A request for retroactive authorization may be submitted within 14 calendar day after the day on which the study was completed.

2.3.4.9 Prior Authorization for Implantable Infusion Pump

Providers must request prior authorization for the implantable infusion pump through the SMPA department with the supporting documentation for medical necessity. Send authorization requests to:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway
Austin, TX 78727
Fax: 1-512-514-4213

Requests for prior authorization can be submitted online through the TMHP website at www.tmhp.com.

Refer to: Subsection 2.3.3.12, “Implantable Infusion Pump,” in this handbook.

2.3.4.10 Prior Authorization for Neurostimulators

All devices and related procedures for the initial application or surgical implantation of the stimulator device require prior authorization. Requests for prior authorization must be submitted to the SMPA Department.

Refer to: Subsection 2.3.3.14, “Neurostimulators,” in this handbook.

2.4 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including hospital services. Hospital services are subject to retrospective review and recoupment if documentation does not support the service that was submitted for reimbursement.

2.5 Utilization Review

UR activities of all Medicaid services provided by hospitals reimbursed under the DRG prospective payment system or the Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982 are required by Title XIX of the Social Security Act, Sections 1902 and 1903. The review activities are accomplished through a series of monitoring systems developed to ensure services are appropriate to need, of optimum quality and quantity, and rendered in the most cost-effective mode. Clients and providers are subject to UR monitoring. The monitoring focuses on the appropriate screening activities, medical necessity of all
services, and quality of care as reflected by the choice of services provided, type of provider involved, and settings in which the care was delivered. This monitoring ensures the efficient and cost-effective administration of Texas Medicaid.

2.5.1 Inpatient Utilization Review

The HHSC Office of Inspector General (OIG) UR Unit is responsible for retrospective review of inpatient DRG and TEFRA admissions. These reviews are accomplished through onsite visits or on a mail-in basis.

2.5.1.1 Utilization Review Process

The inpatient UR process for admissions reimbursed under the DRG prospective payment system consists of sampling medical records of paid Medicaid claims. The review process consists of three major components:

- **Admission review.** Determination of the medical necessity of the admission. For purposes of the Texas Medical Review Program (TMRP) and TEFRA, medical necessity means the client has a condition requiring treatment that can be safely provided only in the inpatient setting.

- **Quality review.** Assessment of the quality of care provided to determine if it meets generally accepted standards of medical and hospital care practices or puts the client at risk of unnecessary injury or death. Quality of care review includes the use of discharge screens and generic quality screens.

- **DRG validation.** Determination that the critical elements necessary to assign a DRG are present in the medical record and the diagnosis and procedures are sequenced correctly. The critical elements are age, sex, admission date, discharge date, discharge status, principal diagnosis, secondary diagnoses (complications or comorbidities), and principal and secondary procedures.

The HHSC OIG UR Unit staff reviews the complete medical record to make decisions about the medical necessity of the admission, validity of the DRG, and quality of care. The medical record must reflect that any services reimbursed by Texas Medicaid were ordered by a physician, certified nurse-midwife, or nurse practitioner.

Effective for dates of admission on or after September 1, 2006, the HHSC OIG UR Unit uses evidence-based guidelines to assist in performing retrospective UR of inpatient hospital claims for Medicaid clients. The evidence-based guidelines are Milliman Care Guidelines, which replace the physician-developed and physician-approved Medicaid hospital screening criteria addressed through a rule revision effective August 1, 2006. Reviews required by the TMRP, TEFRA, and the current LoneSTAR Select II contracting program are included.

All services, supplies, or items submitted are medically necessary for the client’s diagnosis or treatment as certified on claim submission.

Refer to: Subsection 1.4.8, “Provider Certification/Assignment,” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).

When an admission denial or a denial of continued stay is issued, or when a technical denial becomes final, all money is recouped from the hospital for the admission or days of stay that are denied. When a DRG is reassigned as a result of UR, the payment to the hospital is adjusted.

If an inpatient admission is denied, but a physician’s order is present documenting the client originally was placed in observation, the UR unit may authorize the resubmission of services rendered during the first 23 hours on an outpatient claim.

Admission Review

Effective for admissions on or after September 1, 2006, review personnel assess the medical necessity of an admission by comparing documentation present in the medical record using recognized evidence-based guidelines for inpatient screening criteria. Non-physician reviewers use the criteria as guidelines
for the initial approval or for the referral of inpatient reviews for medical necessity decisions. Cases that do not meet initial approval are referred to a physician consultant to determine the medical necessity of the inpatient admission. If the criteria are met but the medical necessity of the admission is still questionable, the case is referred to a physician consultant for a determination. If a physician consultant determines the admission is not medically necessary, a denial is issued.

Review personnel assess the medical necessity of admissions prior to September 1, 2006 by comparing documentation present in the medical record with elements in the TMRP Hospitalization Screening Criteria. For an admission to be approved, an indication for hospitalization and treatment criteria must be met. Cases that do not meet both screening criteria are referred to a physician consultant to determine the medical necessity of the inpatient admission. If the TMRP Hospitalization Screening Criteria are met but the medical necessity of the admission is still questionable, the case is referred to a physician consultant for a determination. If a physician consultant determines the admission is not medically necessary, a denial is issued.

Compliance with the DRG prospective payment system and aspects of the review as stated above are evaluated quarterly. Identified problems may result in an educational visit or action such as recoupment or referral to HHSC OIG Medicaid Program Integrity (MPI) or Sanctions Unit.

Readmission Review

If a hospital admission or readmission occurs within 30 days of a discharge from the same or a different hospital for the same or closely related diagnosis, or for a condition identified during the previous admission, it may be reviewed for medical necessity.

Transfers from one facility to another and readmissions are also subject to review.

Hospital-Based Ambulatory (HASC) Surgical Procedures

Inpatient admissions for surgical procedures listed as ambulatory surgical codes in the current fee schedule are denied if documentation does not support the need for the inpatient admission.

Quality Review

Each Medicaid case is evaluated for quality of client care, adequacy of discharge planning, and medical stability of the client at discharge. To accomplish this review, CMS Generic Quality Screens and discharge screens included in the TMRP Hospitalization Screening Criteria are used. Potential quality of care issues are identified by the physician. HHSC contracts with physician consultants to review medical records for quality of care. Physician consultants, of the specialty related to the care rendered, may make clinical recommendations or determine corrective actions when deemed appropriate. Child and adolescent psychiatrists may make recommendations based on review of inpatient psychiatric services provided to Medicaid clients younger than 21 years of age. Failure to verify completion of any corrective action recommendation within the specified time frame may result in referral of the case to the HHSC OIG MPI or Sanctions Unit.

Diagnosis-Related Group Validation

Each medical record is reviewed to validate the elements critical to the DRG assignment. These elements are the client’s age, sex, admission date, discharge date, discharge status, principal diagnosis, secondary diagnoses (complications or co-morbidities), and principal and secondary procedures. Documentation of these critical DRG elements in the medical record is evaluated for the correlation to the information provided on the claim form.

The principal diagnosis is the diagnosis (condition) established after study to be chiefly responsible for causing the admission of the client to the hospital for care. The condition must be treated or evaluated during this admission to the hospital.

The secondary diagnoses are conditions that affect client care in terms of requiring clinical evaluation, therapeutic treatment, diagnostic procedures, extended length of hospital stay, increased nursing care and monitoring, or have clinically significant implications for future health-care needs.
The coding of diagnoses that have clinically significant implications for future health-care needs applies only to newborns and must be identified by the physician. Normal newborn conditions or routine procedures are not to be considered as complications or co-morbidities for DRG assignment.

Refer to: Subsection 1.7, “Texas Medicaid Limitations and Exclusions,” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).

If the principal diagnosis, secondary diagnoses (complications or co-morbidities), or procedures are not substantiated in the medical record; sequenced correctly; or have been omitted, codes may be deleted, changed, or added. All diagnosis/procedure coding changes potentially resulting in a DRG change are referred to a physician consultant. When it is determined that the diagnoses and procedures are substantiated and sequenced correctly, the information will be entered into the applicable version of the Grouper software for a DRG determination. The CMS-approved DRG software considers each diagnosis and procedure and the combination of all codes and elements to make a determination of the final DRG assignment. When the DRG is reassigned, the payment to the provider is adjusted.

2.5.1.2 Recommendations to Enhance Compliance with Texas Medicaid Fee-for-Service Hospital Claims Submission

The following information highlights an area for physician and hospital providers where collaboration in client care delivery exists but can improve. Texas Medicaid, through its hospital UR activities, has identified this area for both compliance with provider responsibilities and the reduction of the submission of inappropriate inpatient hospital claims. To enhance compliance with Texas Medicaid fee-for-service hospital claims submission and decrease the submission of inappropriate inpatient hospital claims, providers should adhere to the following suggestions:

- Physicians and hospital personnel, primarily case managers, UR, and billing staff, should become familiar with the Hospital Inpatient Screening Criteria used by the HHSC staff in performing reviews of hospital medical records related to paid, inpatient hospital claims for admissions prior to September 1, 2006. The criteria provide guidelines for review staff to assist with the determination of medical necessity of inpatient stays. The Medicaid Hospital Inpatient Screening Criteria are available on the HHSC website at www.hhs.state.tx.us/OIG/screen/SC_TOC.shtml.

- Initially admit clients in observation status if the physician feels that it is reasonable to expect that the client may be able to be discharged within 24 hours. If the client is initially admitted in observation status (per physician order), the stay is more than 24 hours, and the hospital submits an inpatient claim, the hospital is given the opportunity to resubmit the first 24 hours of services on an outpatient claim if the inpatient claim is subsequently denied per retrospective UR.

- When a client is admitted to the hospital as an inpatient and is discharged in less than 24 hours, the hospital may request that the physician change the admission order from inpatient status to outpatient observation status. This practice is acceptable when the physician makes the changes to the admitting order before the hospital submits the claim for payment.

- This correction in admission status avoids errors in claims submission and the potential need for a more lengthy appeal process. If the physician admitting orders do not accurately reflect the services provided, the hospital inpatient claim may be denied and the inappropriate payment recovered from both the hospital and the admitting physician.

2.5.1.3 Hospitals Reimbursed Under TEFRA

For all Medicaid admissions identified for review, the TEFRA review process consists of the following major components:

- Admission review. Determination of the medical necessity of the admission. For purposes of the TMRP and TEFRA, medical necessity means the client has a condition requiring treatment that can be safely provided only in the inpatient setting.

- Continued stay review. Determination of the medical necessity of each day of stay.
• **Quality of care review.** Assessment of the quality of care provided to determine if it meets generally accepted standards of medical and hospital care practices or puts the client at risk of unnecessary injury or death. Quality of care review includes the use of discharge screens and generic quality screens.

TEFRA hospitals are required to submit all charges.

HHSC OIG UR Unit staff review the complete medical record to make decisions about the medical necessity of the admission, continued stay, and quality of care.

### 2.5.1.4 Technical Denials (DRG Prospective Payment and TEFRA)

#### On-Site Reviews

The following information describes on-site reviews:

- If the complete medical record is not made available during the on site review, a preliminary technical denial is issued on site. The hospital is allowed 60 calendar days from the date of the exit conference to provide the complete medical record to HHSC. If the complete medical record is not received by HHSC within this specified time frame, a final technical denial is issued and payment is recouped.

- If a complete medical record is made available on site, but a copy is required for further review, and the copy is not received by HHSC within the specified time frame, a preliminary technical denial is issued by certified mail or fax. The hospital has 60 calendar days from the date of receipt of the notice to submit the complete medical record. If the complete medical record is not received by HHSC within this specified time frame, a final technical denial is issued and payment is recouped.

  **Note:** A notarized business record affidavit in the format approved by HHSC is required for paper and electronic copies of requested medical records. A provider failing to provide this documentation must resubmit the requested records with the affidavit.

  **Refer to:** Subsection 1.4.3, “Retention of Records and Access to Records and Premises,” in Section 1, “Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

#### Mail-In Reviews

If the complete medical record is not received by HHSC within the specified time frame, a preliminary technical denial is issued by certified mail or fax. The hospital has 60 calendar days from the date of receipt of the notice to submit the complete medical record. If the complete medical record is not received by HHSC within this specified time frame, a final technical denial is issued and payment is recouped.

Hospital inpatient claim payments that have been recouped because of a technical denial may not be resubmitted on an outpatient claim.

  **Note:** A notarized business record affidavit in the format approved by HHSC is required for paper and electronic copies of requested medical records. A provider who fails to provide this documentation must resubmit the requested records with the affidavit.

  **Refer to:** Subsection 1.4.3, “Retention of Records and Access to Records and Premises,” in Section 1, “Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

### 2.5.1.5 Acknowledgment of Penalty Notice

Hospitals must have on file a signed acknowledgment from the physician stating that the physician received the following notice:

**Notice to Physicians:** Medicaid payment to hospitals is based, in part, on each client’s principal and secondary diagnoses and the major procedures performed on the client, as attested to by the client’s attending physician by virtue of his or her signature in the medical record. Anyone who misrepresents, falsifies, or conceals essential
information required for payment of federal or state funds, may be subject to fine, imprisonment, or civil penalty under applicable federal and state laws.

The acknowledgment of penalty notice must be specific to Texas Medicaid. Medicare penalty notices are not accepted.

2.5.1.6 Sanctions

Compliance with the DRG prospective payment system and aspects of the review as stated above are evaluated quarterly. Identified problems may result in an educational visit or action such as recoupment or referral to HHSC OIG MPI or Sanctions Unit.

2.5.1.7 Utilization Review Appeals

Hospital providers may appeal adverse decisions by HHSC OIG UR Unit to the HHSC UR Medical Appeals Unit. A UR Medical Appeals decision is the final administrative decision of HHSC. Neither HHSC OIG UR Unit nor TMHP are responsible for Medical UR appeals.

Refer to: Subsection 7.3.4, “Utilization Review Appeals,” in Section 7, “Appeals” (Vol. 1, General Information).

2.5.2 Outpatient Utilization Review

TMHP is responsible for a comprehensive integrated review process to identify misuse and inappropriate claim submission patterns by outpatient hospitals and HASCs. All providers are subject to TMHP’s UR monitoring. Providers are selected for review based on a comparison of their individual resource utilization with a peer group of similar specialty and geographic locality. The main goal of the required utilization control is to identify those providers whose practice patterns are aberrant from their peers and provide the necessary educational actions to help the provider achieve Texas Medicaid compliance. An analysis of UR data is completed by a registered nurse analyst for review by the medical director and staff. If the analyst substantiates that a provider’s practice and claim submission patterns are inconsistent with the federal requirements and Texas Medicaid’s scope of benefits, a TMHP representative contacts the provider. The purpose of the contact is to discuss appropriate claim submission guidelines and to assist the provider in resolving the inappropriate claim submission patterns identified in the review.

TMHP uses the following criteria when reviewing all hospital outpatient medical records. Services must be:

- Medically necessary.
- Ordered by a physician, signed, and dated. Signature stamps are valid if initialed and dated by the physician.
- Submitted in the quantities ordered and documented as provided.
- Program benefits.
- Specifically identified on the charge tickets or itemized statement submitted with the claim or by the HCPCS procedure code on the claim.
- Indicated by the documentation in the medical record.
- Submitted to Texas Medicaid only after other medical insurance resources have been exhausted.

Refer to: Subsection 4.11.1, “Client Medicaid Identification (Form H3087),” in Section 4, “Client Eligibility” (Vol. 1, General Information).

The determination of the TMHP UR process may result in the following:

- Educational letters/visits
- Mail-in of medical records for review
• On-site medical record review (outpatient, HASC, or inpatient records not reviewed)
• Referral of questionable claims to HHSC or HHSC OIG
• Recoupment
• Prepayment review
• The intent of these actions is to ensure the most effective and appropriate use of available services and facilities and provide appropriate, cost-effective care to clients with Medicaid coverage

2.6 Claims Filing and Reimbursement

2.6.1 Medicaid Relationship to Medicare

Texas Medicaid makes coinsurance and deductible payments on valid, assigned Part A (hospital) and Part B (medical) Medicare claims.

Exception: If the Medicare payment amount equals or exceeds the Medicaid payment rate, the HHSC is not required to pay the Medicare Part A deductible/coinsurance/copay on a crossover claim.

Texas Medicaid provides 30 inpatient benefit days per spell of illness. When the 30 days coincide with the first 30 days of the Medicare benefit period and the client is eligible for both Medicare and Medicaid, Texas Medicaid pays the:

• Inpatient hospital deductible under Medicare Part A.
• Medicare Part A deductible for the first three pints of whole blood or packed red cells.

When the client only has Medicare Part B coverage, the hospital must follow these guidelines:

• Submit to Medicare the charges for certain inpatient ancillary services on a Medicare Claim Form 1483 for payment under the client’s Part B coverage. The ancillary charges include the following:
  • Diagnostic X-ray tests, diagnostic laboratory tests, and other diagnostic tests
  • X-ray, radium, and radioactive isotope therapy, including materials and services of technicians
  • Surgical dressings, splints, casts, and other devices used for reduction of fractures and dislocations
  • Prosthetic devices (other than dental) that replace all or part of an internal body organ or member (including contiguous tissue) or all or part of the function of a permanently inoperative or malfunctioning internal body organ or member including replacement or repairs of such devices (e.g., cardiac pacemakers, breast prostheses, maxillofacial devices, colostomy bags, and prosthetic lenses)
  • Leg, arm, back, and neck braces, and artificial legs, arms, and eyes, including replacements and adjustments (if required) because of a change in the client’s physical condition
  • Physical therapy (PT) services
  • Speech pathology services
  • Dialysis treatments
• Submit to TMHP the remaining Part A charges on a UB-04 CMS-1450 paper claim form (or its electronic equivalent) indicating in Block 80 that the client is eligible for Medicare Part B benefits only. The client’s health insurance claim (HIC) number must appear on the Medicaid claim in Block 80. TMHP must receive these charges within 95 days of the last date of service on the claim.

Refer to: Subsection 2.6, “Medicare Crossover Claim Reimbursement,” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for more information.
2.6.2 Inpatient Claims Information

Medicaid present-on-admission (POA) reporting is required for all inpatient hospital claims paid under prospective payment basis methodology except for facilities that Medicare exempts or are paid for by TEFRA methodology. These facilities include the following:

- Critical access hospitals (CAH)
- Cancer hospitals
- Children’s inpatient facilities
- State-owned teaching facilities
- RHCs
- FQHCs
- Religious nonmedical health-care institutions
- Inpatient psychiatric hospitals and institutes for mental disease (IMD)
- Inpatient rehabilitation facilities (IRF)
- Military hospitals

POA is defined as present at the time the order for inpatient admission occurs. Conditions that develop during an outpatient visit, including emergency department, observation, or outpatient surgery, are considered POA.

A POA value must be submitted for each diagnosis on the claim form. Claims submitted without POA will be denied unless the facility or the diagnosis code is exempt from POA reporting.

The following table shows the POA values.

<table>
<thead>
<tr>
<th>POA Value</th>
<th>Description</th>
<th>Payment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Y</td>
<td>Diagnosis was present at the time of admission</td>
<td>Payment will be made by Medicaid when a hospital-acquired condition (HAC) is present</td>
</tr>
<tr>
<td>N</td>
<td>Diagnosis was not present at the time of admission</td>
<td>No payment will be made by Medicaid when an HAC is present</td>
</tr>
<tr>
<td>U</td>
<td>Documentation was insufficient</td>
<td>No payment will be made by Medicaid when an HAC is present</td>
</tr>
<tr>
<td>W</td>
<td>Clinically undetermined</td>
<td>Payment will be made by Medicaid when an HAC is present</td>
</tr>
<tr>
<td>X</td>
<td>Exempt from POA reporting</td>
<td>Exempt from POA reporting</td>
</tr>
</tbody>
</table>

TMHP will not recalculate the DRG based on POA indicator values for Medicare crossover claims or MCOs.

Depending on the POA indicator value, the DRG may be recalculated, resulting in a lower payment to the hospital facility provider. If the number of days on an authorization is higher than the number of days allowed as a result of a POA DRG recalculation, the lesser of the number of days will be reimbursed.

The following table includes the additional diagnosis codes that are exempt from POA reporting effective for claims with dates of service on or after October 1, 2010:

</tbody>
</table>
Claims for inpatient hospital services must be submitted to TMHP in an approved electronic format or on the UB-04 CMS-1450 paper claim form. Providers may purchase UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information)
Section 6: Claims Filing (Vol. 1, General Information)
When completing a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as TMHP does not key any information from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

In Block 44 of the UB-04 CMS-1450, enter the accommodation rate per day. Match the appropriate diagnoses listed in Blocks 67A through 67Q corresponding to each procedure. If a procedure corresponds to more than one diagnosis, enter the primary diagnosis. Each service and supply must be itemized on the claim.

Hospitals may submit information only claims to TMHP when one of the following situations exists. Hospitals must use TOB 110 to file these claims:

- Inpatient 30-day spell of illness benefit is exhausted.
- Payment made by a third party resource/other insurance exceeds the Medicaid allowed amount.

Additional claims information can be found within individual topic areas in this section.

Refer to:
- Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information)
- Section 6: Claims Filing (Vol. 1, General Information)
- Claim Form Examples in this handbook

### 2.6.3 Outpatient Claims Information

Claims for outpatient hospital services must be submitted to TMHP in an approved electronic format or on the UB-04 CMS-1450 paper claim form.

Freestanding ambulatory surgical centers must submit claims on the CMS-1500 claim form. The performing surgeon/referring physician name/number must be identified in Block 17. Identification of outpatient charges must be in Block 44 if submitting by HCPCS code. If appropriate, the revenue code must be indicated in Block 42. Texas Medicaid recommends the use of specific procedure codes for claim submission. Do not use the revenue code description in Block 43; the HCPCS narrative description must be identified in this block. For example, when submitting charges for physical therapy, do not use the description associated with revenue code 420. To receive reimbursement for physical therapy services, providers must identify the specific modality used (e.g., gait training).

### Examples:

- **Emergency Room.** Submit as “Emergency room” or “Emergency room charge per use.” If the client visits the emergency room more than once in one day, the time must be given for each visit. The time of the first visit must be identified in Block 18, using 00 to 23 hours military time (e.g., 1350 for 1:50 p.m.). Indicate other times on the same line as the procedure code. Claims for emergency CT, CTA, MRI, or MRA studies provided in the emergency department must have the appropriate corresponding emergency services revenue code (450, 451, 456, or 459) to be considered for payment.

- **Observation Room.** Submit as “observation room.” (Revenue code 762).

- **Operating Room.** Submit as “Operating Room.” (Revenue code 360, 361, or 369).

- **Recovery Room.** Submit as “Recovery Room” or “Cast Room” as appropriate. (Revenue code 710 or 719).

- **Injections.** Must have “Inj.-name of drug; route of administration; the dosage and quantity” or the injection code.

- **Drugs and Supplies.** The drug description must include the name, strength, and quantity. Take-home drugs and supplies are not a benefit of Texas Medicaid:
  - Take-home drugs must be submitted with revenue code 253.
• Take-home supplies must be submitted with revenue code 273.
• Self-administered drugs must be submitted with revenue code 637.

• Radiology. Facilities must submit claims using the most appropriate revenue and HCPCS code. The physician must submit claims for professional services by a physician separately. The license number of the ordering physician must be in Block 83. If the client receives the same radiology procedure more than once in one day, the time must be given for each visit. The time of the first visit must be identified in Block 18, using 00 to 23 hours military time (such as 1350 for 1:50 p.m.). Indicate other times on the same line as the procedure code.

• Laboratory. Provide a complete description or use the procedure codes for the laboratory procedures. The physician must submit claims for professional services by a physician separately. Blocks 78–79 must have the license number of the ordering physician. If laboratory work is sent out, enter the name of the test and name and address or Medicaid number of the laboratory where the work was forwarded. If the client receives the same laboratory procedure more than once in one day, give the time for each visit. The time of the first visit must be identified in Block 18, using 00 to 23 hours military time (e.g., 1350 for 1:50 p.m.). Indicate other times on the same line as the procedure code.

• Nuclear Medicine. Provide a complete description.

• Day Surgery. Day surgery must be submitted as an inclusive charge using TOS F. Providers must not submit claims for separate services that were provided in conjunction with the surgery (e.g., lab, radiology, and anesthesia). File claims for unscheduled emergency outpatient surgical procedures with separate charges (e.g., lab, radiology, anesthesia, and emergency room) for all services using TOB 131 and the hospital’s provider identifier.

Additional claims information can be found within individual topic areas within this section.

Charges on claims must be itemized on the face of the UB-04 CMS-1450 paper claim form instead of submitting attachments or charge details. TMHP uses information attached to the claim for clarification purposes only.

**Note:** The UB-04 CMS-1450 paper claim form is limited to 28 items per outpatient claim. This limitation includes surgical procedures from Blocks 74 and 74a-e. If necessary, combine IV supplies and central supplies on the charge detail and consider them to be single items with the appropriate quantities and total charges by dates of service. Multiple dates of service may not be combined on outpatient claims.

If a claim contains more than 28 details, continue the claim on additional UB-04 CMS-1450 paper claim forms. Total each claim form as a stand-alone claim. If you do not total each page, your claim may be denied for being over the limitation, and must be resubmitted with 28 or less details.

Providers may purchase UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as TMHP does not key any information. Superbills, or itemized statements, are not accepted as claim supplements.

**Refer to:** Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Subsection 6.6, “UB-04 CMS-1450 Paper Claim Filing Instructions,” in Section 6, “Claims Filing” (Vol. 1, General Information). Blocks that are not referenced are not required for processing by TMHP and may be left blank.
2.6.4 Inpatient Reimbursement

2.6.4.1 Prospective Payment Methodology

Inpatient hospital stays except in children’s hospitals, state-owned teaching hospitals, and psychiatric facilities (CCP) are reimbursed according to a prospective payment methodology based on diagnosis-related groups (DRGs). The reimbursement method itself does not affect inpatient benefits and limitations. Inpatient admissions must be medically necessary and are subject to Texas Medicaid’s UR requirements.

The DRG reimbursement includes all facility charges (e.g., laboratory, radiology, and pathology). Hospital-based laboratories and laboratory providers who deliver referred services outside the hospital setting must obtain reimbursement for the technical portion from the hospital. The technical portion includes the handling of specimens and the automated or technician-generated reading and reporting of results. The technical services are not billable to Texas Medicaid clients.

Texas Medicaid does not distinguish types of beds or units within the same acute care facility for the same inpatient stay (e.g., psychiatric or rehabilitation). Because all Medicaid inpatient hospitalizations are included in the DRG database that determines the DRG payment schedule, psychiatric and rehabilitation admissions are not excluded from the DRG payment methodology. To ensure accurate payment, Texas Medicaid requires that only one claim be submitted for each inpatient stay with appropriate diagnosis and procedure code sequencing. The discharge and admission hours (military time) are required on the UB-04 CMS-1450 paper claim form, to be considered for payment.

Reimbursement to acute care hospitals for inpatient services is limited to $200,000 per client, per benefit year (November 1 through October 31). Claims may be subject to retrospective review, which may result in recoupment. This limitation does not apply to services related to certain organ transplants or services to THSteps clients when provided through CCP.

In accordance with legislative direction included in the 2006–2007 General Appropriations Act (Article II, Section 49, S.B. 1, 79th Legislature, Regular Session, 2005), a rate reduction will be applied to inpatient hospital services rendered to non-Medicare Supplemental Security Income (SSI) and SSI-related Medicaid clients. The rate reduction will affect hospital providers within the Bexar, Dallas, El Paso, Lubbock, Tarrant, Nueces, Harris, and Travis service areas that are reimbursed by DRG.

Effective September 1, 2007, a hospital that is either located in a county with 50,000 or fewer persons, is a Medicare-designated rural referral center (RRC) or sole community hospital (SCH) that is not located in a metropolitan statistical area (MSA) as defined by the U.S. Office of Management and Budget, or is a Medicare-designated CAH, will be reimbursed the greater of the prospective payment system rate or a cost-reimbursement methodology authorized by the (TEFRA) using the most recent data.

A new provider is given a reimbursement inpatient interim rate of 50 percent until a cost audit has been performed. A default standard dollar amount (SDA) rate is assigned for newly enrolled providers or newly constructed facilities.

Payment is calculated by multiplying the SDA for the hospital’s payment division indicator times the relative weight associated with the DRG assigned by Grouper.

Hospital reimbursement is made in accordance with the following TAC rules:

- 1 TAC §355.8052 - Inpatient Hospital Reimbursement
- 1 TAC §355.8054 - Children’s Hospital Reimbursement Methodology
- 1 TAC §355.8056 - State-Owned Teaching Hospital Reimbursement Methodology
- 1 TAC §355.8058 - Inpatient Direct Graduate Medical Education (GME) Reimbursement
- 1 TAC §355.8060 - Reimbursement Methodology for Freestanding Psychiatric Facilities
- 1 TAC §355.8061 - Payment for Hospital Services
• 1 TAC §355.8064 - Reimbursement Adjustment for Hospitals Providing Inpatient Services to SSI and SSI-Related Clients
• 1 TAC §355.8065 - Disproportionate Share Hospital (DSH) Reimbursement Methodology
• 1 TAC §355.8068 - Supplemental Payments to Certain Urban Hospitals
• 1 TAC §355.8069 - Supplemental Payments to Certain Rural Public Hospitals
• 1 TAC §355.8070 - Supplemental Payments to Private Hospitals
• 1 TAC §355.8071 - Supplemental Payments to Children’s Hospitals
• 1 TAC §355.8072 - Supplemental Payments to State-Owned Hospitals

Medicaid providers that are cost-reimbursed are subject to cost reporting, cost reconciliation, and cost settlement processes, as defined in the following TAC rules:

• 1 TAC §355.8061 (a)(2) - Outpatient Payment for Hospital Services
• 1 TAC §355.8052 (i) - Hospitals in counties with 50,000 or fewer persons and certain other hospitals. Inpatient Hospital Reimbursement
• 1 TAC §355.8054 - Children’s Hospital Reimbursement Methodology
• 1 TAC §355.8056 - State-Owned Teaching Hospital Reimbursement Methodology

2.6.4.2 Client Transfers

2.6.4.2.1 Admission Dates
The Texas Medicaid claims processing system automatically identifies whether a client’s claim should be paid under Texas Medicaid fee-for-service, PCCM, or through the client’s HMO based on the client’s program eligibility at the time of admission. HMO claims are denied by TMHP and should be submitted by the provider to the appropriate HMO. To ensure correct payor identification, providers that receive transfer patients from another hospital must enter the actual date on which the client was admitted into each facility in Block 12 on the UB-04 CMS-1450.

2.6.4.2.2 Continuous Stays – Client Transfers and Readmissions
Client transfers within the same facility are considered one continuous stay and receive only one DRG payment. Texas Medicaid does not recognize specialty units within the same hospital as separate entities; therefore, these transfers must be submitted as one admission under the provider identifier. Readmissions to the same facility within 24 hours of a previous acute hospital or facility discharge are also considered one continuous stay and receive only one DRG payment.

Readmissions are considered a continuous stay regardless of the original or readmission diagnosis. Admissions submitted inappropriately are identified and denied during the UR process and may result in intensified review.

When more than one hospital provides care for the same client, the hospital providing the most significant amount of care receives consideration for a full DRG payment. The other hospitals are paid a per diem rate based on the lesser of either the mean length of stay for the DRG or the eligible days in the facility. The DRG modifier, PT, on the R&S report indicated per diem pricing related to a client transfer. Services must be medically necessary and are subject to Texas Medicaid’s UR requirements.

HHSC performs a postpayment review to determine if the hospital providing the most significant amount of care received the full DRG. If the review reveals that the hospital providing the most significant amount of care did not receive the full DRG, an adjustment is initiated.

To ensure correct payor identification, providers that receive transfer patients from another hospital must enter the actual date that the client was admitted into each facility in Block 12 on the UB-04 CMS-1450. Inpatient authorization requirements are based on the requirements that are specified by the
program in which the client is enrolled on the date of the original admission. Providers must adhere to the authorization requirements for claims to be considered for reimbursement. Providers are reimbursed at the rate in effect on the date of admission.

2.6.4.3 Observation Status to Inpatient Admission

When a client’s status changes from observation to inpatient admission, the date of the inpatient admission is the date the client was placed on observation status. This rule always applies regardless of the length of time the client was in observation (less than 48 hours) or whether the date of inpatient admission is the following day. All charges including the observation room are submitted on the inpatient claim (TOB 111).

2.6.4.4 Outliers

TMHP makes outlier payment adjustments to DRG hospitals for admissions that meet the criteria for exceptionally high costs or exceptionally long lengths of stay for clients who are 20 years of age and younger as of the date of the inpatient admission. If a client’s admission qualifies for both a day and a cost outlier, the outlier resulting in the higher payment to the hospital is paid.

To ensure that day and cost outliers are reimbursed appropriately, if the client’s length of stay and services rendered are different or more complex than the ones that were authorized, providers must contact the PCCM Inpatient Prior Authorization Department to update the authorization before the claim is submitted.

Providers can view their day and cost outlier payment information for inpatient hospital claims on the Electronic Remittance and Status (ER&S) Report. The R&S Report reflects the outlier reimbursement payment and defines the type of outlier paid. To view the day and cost outlier payment information, providers, facilities, and third party vendors may need to update their 835 electronic file format. For information about how to update the 835 electronic file format, refer to the revised electronic data interchange (EDI) companion guide (ANSI ASC X12N 835 Healthcare Claim Payment/Advice-Acute Care Companion Guide) on the TMHP website at www.tmhp.com.

2.6.4.4.1 Day Outliers

The following criteria must be met to qualify for a day outlier payment:

- Inpatient days must exceed the DRG day threshold for the specific DRG.
- Additional payment is based on inpatient days that exceed the DRG day threshold multiplied by 70 percent of the per diem amount of a full DRG payment.
- The per diem amount is established by dividing the full DRG payment amount by the arithmetic mean length of stay for the DRG.

Hospitals must use the following formula to calculate the day outliers. To calculate the day outlier payment amount, the number of outlier days must first be determined:

Number of Days Allowed-DRGs Threshold = Outlier Days

\[
\frac{SDA \times DRG \text{ relative weight}}{(Divided \ by) \ Mean \ length \ of \ stay} \times Outlier \ Days \times 0.70 = \text{Day outlier amount}
\]

2.6.4.4.2 Cost Outliers

To establish a cost outlier, TMHP determines the outlier threshold by using the full DRG payment amount multiplied by 1.5 or an amount determined by selecting the lesser of the universal mean of the current base year data multiplied by 11.14 or the hospital’s SDA multiplied by 11.14. The calculation that
yields the greater amount is used in calculating the actual cost outlier payment. The outlier threshold is subtracted from the amount of reimbursement for the admission established under TEFRA principles, and the remainder multiplied by 70 percent to determine the actual amount of the cost outlier payment.

Hospitals must use the following formulas to calculate the day outliers. Effective for claims with dates of admission on or after November 1, 2010, the Universal Mean is $5,573.90.

To calculate the cost outlier amount, the cost threshold must first be determined. Three calculations and two comparisons are necessary:

A) 11.14 x Universal Mean ($5,573.90) = $62,093.25.
B) 11.14 x SDA = _____________________

Comparison 1: Take lesser of number A or B.
C) 1.5 x DRG Relative Weight x SDA = _______________

Comparison 2: Greater of number C and comparison 1 is the cost threshold.

Allowed amount x reimbursement rate = ______________

Result of A minus cost threshold = ___________________

Result of B x 0.70 = cost outlier amount.

2.6.4.5 Children’s Hospitals

Inpatient hospital stays in designated children’s hospitals are reimbursed according to the TEFRA reimbursement principles on a reasonable cost basis. Designated children’s hospitals are reimbursed on a percentage of the hospital’s standard charges derived from the hospital’s most recent tentative or final Medicaid cost report settlement.

To be designated as a children’s hospital, the hospital must have a provider agreement with Medicare and be engaged in delivering services to patients who are predominantly younger than 18 years of age. A designated children’s hospital is excluded from the Medicare/Medicaid prospective payment system per 42 Code of Federal Regulations (CFR) (Subsection) 412.23.

Note: Children’s hospitals that are reimbursed according to the TEFRA methodology may submit interim claims before discharge and must submit an interim claim if the client remains in the hospital past the hospital’s fiscal year end.

2.6.4.6 State-owned Teaching Hospitals

Inpatient hospital stays in designated state-owned teaching hospitals are reimbursed according to the TEFRA reimbursement principles on a reasonable cost basis. Designated state-owned teaching hospitals are reimbursed on a percentage of the hospital’s standard charges derived from the hospital’s most recent tentative or final Medicaid cost report settlement.

State-owned teaching hospitals are defined specifically in 1 TAC §355.8052 as the following hospitals: University of Texas Medical Branch (UTMB); University of Texas Health Center Tyler; and M.D. Anderson Hospital. A designated children’s hospital is excluded from the Medicaid prospective payment system.

Note: State-owned teaching hospitals that are reimbursed according to the TEFRA methodology may submit interim claims before discharge and must submit an interim claim if the client remains in the hospital past the hospital’s fiscal year end.

2.6.5 Outpatient Reimbursement

Outpatient services are reimbursed on a reasonable cost based on a percentage of the hospital’s most recent tentative Medicaid cost report settlement.
Reimbursement for outpatient hospital services for high-volume providers is 84.48 percent of allowable cost. For the remaining providers, reimbursement for outpatient hospital services is 80.3 percent of allowable cost. High-volume providers are eligible for additional payments on Texas Medicaid fee-for-service and PCCM claims. A high-volume outpatient hospital provider is defined as one that was paid at least $200,000 during calendar year 2004.

All clinical laboratory services are reimbursed at 60 percent of the prevailing charge except for those hospitals identified by Medicare as sole community hospitals. These hospitals are reimbursed at 62 percent of the prevailing charges for services provided to clients in the outpatient setting and 60 percent to clients in the inpatient setting. Clinical pathology consultations continue to be allowed for reimbursement.

Effective for dates of service on or after September 1, 2010, Texas Medicaid implemented a 1-percent reduction in the final payment amounts for inpatient, professional, and outpatient services. TEFRA-reimbursed inpatient hospitals (children’s and state teaching hospitals) are excluded from the 1-percent reimbursement reduction.

Refer to: Subsection 2.6.6, “Provider Cost and Reporting,” in this handbook for more information about the calculation of the interim rate.

Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA),” in Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks) for important information.

2.6.6 Provider Cost and Reporting

The method of determining reasonable cost is similar to that used by Title XVIII (Medicare). Hospitals must include inpatient and outpatient costs in the cost reports submitted annually. The provider must prepare one copy of the applicable CMS Cost Report Form along with the required PCCM supplemental worksheets. The PCCM supplemental worksheets include the Inpatient PCCM D-4 worksheet, available from CMS, and the Outpatient PCCM D, Part V worksheet. A sample of the Outpatient PCCM D, Part V is available on the TMHP website at www.tmhp.com.

If a change of ownership or provider termination occurs, the cost report is due within five months after the date of the change in ownership or termination. Any request for an extension of time to file must be made on or before the cost report due date and sent to TMHP Medicaid Audit at the address indicated under “Written Communication With TMHP” in “TMHP Telephone and Address Guide” (Vol. 1, General Information). For questions or assistance, call TMHP Medicaid Audit at 1-512-514-3648.

Annual cost reports must be filed as follows:

- Submit one copy of the cost report to TMHP Medicaid Audit within five months of the end of the hospital’s fiscal year along with any amount due to Texas Medicaid.
- TMHP Medicaid Audit performs a desk review of the cost report and makes a tentative settlement with the hospital. A tentative settlement letter requests payment for any balance due to Texas Medicaid or instructs TMHP to pay the amount due to the provider. Interim payment rates are changed at this time based on the cost report.
- Field audits are conducted when necessary.
- Medicaid final settlement is made after a copy of all the following information is received from the provider or the Medicare intermediary. The provider must send TMHP a copy of one of the following:
  - Audited or settled without audit Medicare Cost Report
  - Medicare Notice of Amount of Program Reimbursement
Medicaid hospitals may request copies of their claim summaries for their cost reporting fiscal year. The summaries for tentative settlements include three additional months of claim payments for the fiscal year. The summaries for final settlements include ten months of claim payments for the fiscal year. TMHP Medicaid Audit uses this data to determine the tentative and final settlements and interim rates.

The Medicaid claim summary data are only generated once each month, and the logs are received by the 15th of the following month. Requests for tentative settlement logs are submitted within 30 days after the fiscal year-end. Final settlement log requests are submitted within nine months after the fiscal year-end.

The Medicaid logs can be requested through the provider’s administrator account on the TMHP website at www.tmhp.com. Medicaid logs can also be requested by calling 1-512-506-6117 or by sending a written request to the following address:

Texas Medicaid & Healthcare Partnership  
Medicaid Audit  
PO Box 200345  
Austin, TX 78720-0345

Allow 45 days for receipt of these logs.

**2.6.6.1 Primary Care Case Management (PCCM) Outpatient Services Cost Reporting**

PCCM Outpatient Services are subject to cost report settlements. PCCM outpatient services providers are not required to submit any additional forms or reports, because HHSC has required providers to submit the necessary PCCM supplemental worksheets along with the CMS form number CMS-2552-96, “Cost Report for Electronic Filing of Hospitals,” for hospital cost reports that end on or after October 1, 2007. The PCCM supplemental worksheets include the Inpatient PCCM D-4 worksheet and the Outpatient PCCM D, Part V worksheet.

The interim cost report settlement process will be completed within six months of the date on which the TMHP Medicaid Audit Department receives the workable cost report. The cost settlement is determined by comparing the total Medicaid-allowable costs to the provider's interim payments for PCCM outpatient hospital services that were delivered during the reporting period. HHSC will then issue a notice of settlement that specifies the amount due to or from the PCCM outpatient hospital.

**2.6.7 Revenue Codes (Outpatient Hospital)**

UB-04 CMS-1450 revenue codes must be used to submit claims for outpatient hospital facility services. In some instances, a HCPCS procedure code is required in addition to the revenue code for accurate claims processing:

2.6.8 Third Party Liability

Hospitals and providers enrolled in Texas Medicaid are required to inform TMHP about circumstances that may result in third party liability for health-care claims. After receiving this information, TMHP pursues reimbursement from responsible third parties.

Hospitals and providers must mail or fax the Other Insurance Form for Health Insurance or the Tort Response Form for accidents to the following address:

Texas Medicaid & Healthcare Partnership
TPL Correspondence
Third Party Liability Unit PO Box 202948
Austin, TX 78720-2948
Fax: 1-512-514-4225

Refer to: Subsection 4.11, “Third Party Liability (TPL),” in Section 4, “Client Eligibility” (Vol. 1, General Information) for more information.

Form 4.6, “Tort Response Form” in Section 4, “Client Eligibility” (Vol. 1, General Information).
3. MILITARY HOSPITALS

3.1 Military Hospital Enrollment

To enroll in Texas Medicaid, a military hospital must be certified by Medicare, have a valid provider agreement with HHSC, and have completed the TMHP enrollment process. Veterans Administration (VA) hospitals are eligible to receive Texas Medicaid payment only on claims that have crossed over from Medicare.

Military hospital providers must comply with the rules and regulations of the CLIA rules and regulations. Providers who do not comply with CLIA will not be reimbursed for laboratory services.

3.2 Services/Benefits, Limitations and Prior Authorization

3.2.1 Military Hospital Inpatient Services

Inpatient hospital services include medically necessary items and services ordinarily furnished by a Medicaid hospital or by an approved out-of-state hospital under the direction of a physician for the care and treatment of inpatient clients. Reimbursement to hospitals for inpatient services is limited to the Medicaid "spell of illness." The spell of illness is defined as "30 days of inpatient hospital care, which may accrue intermittently or consecutively."

After 30 days of inpatient care have been provided, reimbursement for additional inpatient care is not considered until the client has been out of an acute care facility for 60 consecutive days. Exceptions are made in the following instances:

- THSteps-eligible clients do not have a 30-day spell of illness limitation, if medically necessary conditions exist (covered under THSteps-CCP).
- Some Medicaid Managed Care clients do not have a 30-day spell of illness limitation.

Refer to: Section 8: Managed Care (Vol. 1, General Information)

Hospitals may submit information only claims to TMHP when one of the following situations exists:

- The inpatient 30-day spell of illness benefit is exhausted.
- Payment that was made by a third party resource/other insurance exceeds the Medicaid allowed amount.

For clients who are 21 years of age and older who are not enrolled in Medicaid Managed Care, there is an inpatient expenditure cap of $200,000 per benefit year (November 1 through October 31). Claims are reviewed retrospectively, and payments exceeding $200,000 will be recouped.

It is appropriate to submit information only claims using TOB 110.

The following hospital services must be medically necessary and are subject to the utilization review requirements of Texas Medicaid. Medicaid reimbursement for services cannot exceed the limitations of Texas Medicaid.

Inpatient hospital services include the following items and services:

- Bed and board in semiprivate accommodations or in an intensive care or coronary care unit, including meals, special diets, and general nursing services; or an allowance for bed and board in private accommodations, including meals, special diets, and general nursing services up to the hospital's charge for its most prevalent semiprivate accommodations. Bed and board in private accommodations are provided in full if required for medical reasons, as certified by the physician. Additionally, the hospital must document the medical necessity for a private room, such as the existence of a critical or contagious illness or a condition that could result in disturbance to other patients. This type of information is included in Block 80 or attached to the claim.
• Whole blood and packed red cells that are reasonable and necessary for treatment of illness or injury, provided they are not available without cost.

• All medically necessary services or supplies ordered by a physician.

Medicaid benefits are not available for take-home or self-administered drugs or personal comfort items except when received by prescription through the VDP.

Only inpatient claims that have an emergency diagnosis on the claim are considered for reimbursement.

3.2.2 Military Hospital Outpatient/Physician Services

Although Medicare reimburses for emergency outpatient and inpatient services, Medicaid does not reimburse for either outpatient or physician services. Military hospitals are not reimbursed for outpatient day surgery.

3.2.3 Prior Authorization

Prior authorization is not required for services rendered in military hospitals.

3.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including military hospital services. Military hospital services are subject to retrospective review and recoupment if documentation does not support the service submitted for reimbursement.

3.4 Claims Filing and Reimbursement

3.4.1 Military Hospital Claims Information

If TOB 110 is used to submit a claim, all charges must be noncovered and the claim will finalize with EOB 217, “Payment reduced through hospital action.”

It is appropriate to submit information only claims using TOB 110.

Military hospitals may submit total charges in one line with appropriate accommodation revenue codes. Emergency hospital services must be submitted to TMHP in an approved electronic format or on the UB-04 CMS-1450 paper claim form. Providers may purchase claim forms from the vendor of their choice. TMHP does not supply the forms.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

When completing a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claims supplements.

Refer to: Subsection 6.6, “UB-04 CMS-1450 Paper Claim Filing Instructions,” in Section 6, “Claims Filing” (Vol. 1, General Information) for paper claims completion instructions. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Form HS.12, “Military Hospital (Emergency Inpatient)” in this handbook.

3.4.2 Military Hospital Reimbursement

Reimbursement is limited to claims submitted for emergency inpatient care only.

Allowed inpatient hospital stays are reimbursed according to a prospective payment methodology based on DRGs. The reimbursement method itself does not affect inpatient benefits and limitations. Texas Medicaid requires that one claim be submitted for each inpatient stay with appropriate diagnosis and
procedure code sequencing. Providers must submit only one claim per inpatient stay to Medicaid, regardless of the diagnosis, to ensure accurate payment. The DRG reimbursement includes all facility services provided to the client while registered as an inpatient.

Reimbursement to hospitals for inpatient services is limited to $200,000 per client, per benefit year (November 1 through October 31). This limitation does not apply to services related to certain organ transplants, services to clients who are 20 years of age and younger and covered by the CCP, or to services for certain clients enrolled in Medicaid Managed Care.

Military hospitals should keep a Medicaid client as an inpatient for only the length of time necessary to stabilize the client. The Medicaid client, once stabilized, should be transferred to the nearest Medicaid acute care hospital facility for further treatment.

When more than one hospital provides care for the same client, the hospital that furnishes the most significant amount of care receives consideration for a full DRG payment.

The other hospital is paid a per diem rate based on the lesser of the mean length of stay for the DRG or eligible days in the facility.

Client transfers within the same facility or readmissions to the same facility within 24 hours of a previous acute hospital or facility discharge are considered one continuous stay. These readmissions are considered a continuous stay regardless of the original or readmission diagnosis. Texas Medicaid does not recognize specialty units within the same hospital as separate entities; therefore, these transfers must be included in one submission under the provider identifier. Admissions that were submitted inappropriately are identified and denied during the utilization review process and may result in an intensified review.

After all hospital claims have been submitted, TMHP performs a post-payment review to determine if the hospital furnishing the most significant amount of care received the full DRG. If the review reveals that the hospital furnishing the most significant amount of care did not receive the full DRG, an adjustment is initiated.

The inpatient DRG reimbursement includes payment for all radiology and laboratory services, including those sent to referral laboratories.

Refer to: Subsection 2.2, “Reimbursement Methodology,” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for more information about reimbursement.

6. FORMS
HS.1  Hospital Report (Newborn Child or Children) (Form 7484)

MAIL FORM TO:

[ ] Texas Health and Human Services Commission
Data Integrity 952-X
PO BOX 149030
Austin TX 78714-9030

PURPOSE: This form is to be used by HOSPITALS ONLY to report the birth of a child of a mother currently eligible under the Texas Medicaid Program of the Texas Health and Human Services Commission (HHSC). All data items below must be completed to avoid delay in future Medicaid claims payments. If the child’s FIRST name is unknown at the time this form is completed, the last name will suffice and must be shown.

ACTION: To avoid delay in your receiving notice of the Medicaid Recipient number of the newborn child, please complete this document and submit it to HHSC within 5 days after the birth of the child. The 5 days is a guideline and is not mandatory. Notice of the assigned client number will be promptly mailed to you for use in submitting the child’s Medicaid claim.

To avoid delay in processing the child’s Medicaid claims, please retain all Medicaid claims of the newborn child until you receive a client number for the child. All newborn claims should then be submitted to TMHP using the newly assigned client number.

Has the mother relinquished her rights to the newborn child? ........................... ❑ Yes ❑ No

If “Yes,” give date of relinquishment ..........................................................

Mother’s Name (Last, First, Mi)  Admission Date (mm/dd/yy)  Mother’s Medicaid Recipient No.

Effective Date 11012009/Revised Date 11012009
Provider Instructions for Nonemergency Ambulance Prior Authorization Request Form

All nonemergency ambulance transportation must be medically necessary. Texas Medicaid and Medicare have similar requirements for this service to qualify for reimbursement. This form is intended to accommodate both programs’ requirements. The criteria for determining medical necessity include: the client is bed-confined and other methods of transportation are contraindicated, or the client’s condition is such that transportation by ambulance is medically required. For additional information and changes to this policy and process refer to the respective program information: Texas Medicaid’s Provider Procedures Manual, bulletins and Banner Messages; and to Medicare’s manuals, newsletters and other publications.

1. Request Date—Enter the date the form is submitted.
2. Requesting Provider Information—Enter the name of the entity requesting authorization. (i.e., hospital, nursing facility, dialysis facility, physician).
3. Requesting Provider Identifiers—Enter the following information for the requesting provider (facility or physician):
   - Enter the Texas Provider Identifier (TPI) number.
   - Enter the National Provider Identifier (NPI) number. An NPI is a ten-digit number issued by the National Plan and Provider Enumeration System (NPPES).
   - Enter the primary national taxonomy code. This is a ten-digit code associated with your provider type and specialty. Taxonomy codes can be obtained from the Washington Publishing Company website at www.wpc-edi.com.
4. Ambulance Provider Identifier—Enter the TPI or NPI number of the requested ambulance provider. If the ambulance provider changes from the provider you originally requested, notify TMHP of the new provider by phone (1-800-925-9126, Option 3) or fax (1-512-514-4205).
5. Client’s Current Condition—This section must be filled out to indicate the client’s current condition and not to list all historical diagnoses. Do not submit a list of the client’s diagnoses unless the diagnoses are relevant to transport (i.e., if client has a diagnosis of hip fracture, the date the fracture was sustained must be included in documentation). It must be clear to TMHP when reviewing the request form, exactly why the client requires transport by ambulance and cannot be safely transported by any other means.
6. Isolation Precautions—Vancomycin-Resistant Enterococci (VRE) and Methicillin-Resistant Staphylococcus Aureus (MRSA) are just two examples of isolation precautions. Please indicate in the notes exactly what type of precaution is indicated.
7. Details for Checked Boxes—For each checked answer, a detailed explanation is required (i.e., if contractures is checked, please give the location and degree of contracture[s]). If a client has a decreased tolerance for sitting time, please indicate why the client has a decreased tolerance as well as the maximum length of time the client is able to sit upright. Additional documentation can be submitted with this request form if needed.
8. Request Type—Check the box for the request type. A One Time, non-repeating request is for a one day period. A Short Term request is for a period of 2-60 days when repeated transports are expected to occur; both Medicaid and Medicare permit short-term requests. A Long Term request is for a period of 61-180 days when repeated transports are expected to occur; Medicare does not permit a Long Term request. Medicaid requires a physician signature for Short Term and Long Term requests. Enter the begin and end dates of the authorization period for short and long-term requests.
9. Transport Time—This field must be filled out for all hospital discharge requests. The anticipated time of transport must be entered in order to ensure the request was initiated prior to the actual time of transport.
10. Name of Person Signing the Request—All request forms require a signature, date, and title of the person signing the form. A One Time request must be signed and dated by a physician, physician assistant (PA), nurse practitioner (NP), clinical nurse specialist (CNS), registered nurse (RN), or discharge planner with knowledge of the client’s condition. A request of a Short Term or Long Term authorization period must be signed and dated by the physician. The signature must be dated not earlier than the 60th day before the date on which the request for authorization is made.
11. Signing Provider Identifier—This field is for the TPI or NPI number of the requesting facility or provider signing the form. The signature must be dated no earlier than 60 days prior to the transport.
# Radiology Prior Authorization Request Form

This form is used to obtain prior authorization for elective outpatient services or update an existing outpatient authorization. All fields marked with an asterisk (*) are required. The information in Section 2 is only required for updated or retroactive authorizations. Forms that are submitted without all of the required information will be returned for correction.

Sterilization Consent Form Instructions

Per Title 42 Code of Federal Regulations (CFR) 50, Subpart B, all sterilizations require a valid consent form regardless of the funding source. Ensure all required fields are completed for timely processing.

Fax or mail the Sterilization Consent Form five business days before submitting the associated claim(s) to expedite the processing of the Sterilization Consent Form and associated claim(s).

Fax fully completed Sterilization Consent Forms to Texas Medicaid & Healthcare Partnership (TMHP) at 1-512-514-4229. Claims and appeals are not accepted by fax. Only send family planning sterilization correspondence to this fax number.

Note: Hysterectomy Acknowledgment forms are not sterilization consents and should be faxed to 1-512-514-4218.

Clients must be at least 21 years of age when the consent form is signed. If the client was not 21 years of age when the consent form was signed, the consent will be denied. Changing signature dates is considered fraudulent and will be reported to the Office of the Inspector General (OIG).

There must be at least 30 days between the date the client signs the consent form and the date of surgery, with the following exceptions:

Exceptions:
1. Premature delivery - There must be at least 72 hours between the date of consent and the date of surgery. The informed consent must have been given at least 30 days before the expected date of delivery.
2. Emergency Abdominal Surgery - There must be at least 72 hours between the date of consent and the date of surgery. Operative reports detailing the need for emergency surgery are required.

Listed below are field descriptions for the Sterilization Consent Form. Completion of all sections is required to validate the consent form, with only two exceptions:

Exceptions: Race and Ethnicity Designation is requested but not required. The Interpreter’s Statement is not required as long as the consent form is written in the client’s language, or the person obtaining the consent speaks the client’s language. If this section is partially completed, the consent will be denied for incomplete information.

This Sterilization Consent Form may be copied for provider use. Providers are encouraged to frequently recopy the original form to ensure legible copies and to expedite consent validation.

Required Fields
All of the fields must be legible in order for the consent form to be valid. Any illegible field will result in a denial of the submitted consent form. Resubmission of legible information must be indicated on the consent form itself. Resubmission with information indicated on a cover page or letter will not be accepted.

Consent to Sterilization
- Name of Doctor or Clinic.
- Name of the Sterilization Operation.
- Client’s Date of Birth (month, day, year).
- Client’s Name (first and last names are required).
- Name of Doctor or Clinic.
- Name of the Sterilization Operation.
- Client’s Signature.

Date of Client Signature - Client must be at least 21 years of age on this date. This date cannot be altered or added at a later date.

Effective Date_07302007/Revised Date_03102010
Interpreter’s Statement (If applicable)
- Name of Language Used by Interpreter.
- Interpreter’s Signature.
- Date of Interpreter’s Signature (month, day, year).

Statement of Person Obtaining Consent
- Client's Name (first and last names are required).
- Name of the Sterilization Operation.
- Signature of Person Obtaining Consent - The statement of person obtaining consent must be completed by the person who explains the surgery and its implications and alternate methods of birth control. The signature of person obtaining consent must be completed at the time the consent is obtained. The signature must be an original signature, not a rubber stamp.
- Date of the Person Obtaining Consent’s Signature (month, day, year) - Must be the same date as the client's signature date.
- Facility Name - Clinic/office where the client received the sterilization information.
- Facility Address - Clinic/office where the client received the sterilization information.

Physician’s Statement
- Client’s Name (first and last names are required).
- Date of Sterilization Procedure (month, day, year) - Must be at least 30 days and no more than 180 days from the date of the client’s consent except in cases of premature delivery or emergency abdominal surgery.
- Name of the Sterilization Operation.
- Expected Date of Delivery (EDD) - Required when there are less than 30 days between the date of the client consent and date of surgery. Client’s signature date must be at least 30 days prior to EDD.
- Circumstances of Emergency Surgery - Operative report(s) detailing the need for emergency abdominal surgery are required.
- Physician’s Signature - Stamped or computer-generated signatures are not acceptable.
- Date of Physician’s Signature (month, day, year) - This date must be on or after the date of surgery.

Paperwork Reduction Act Statement
This is a required statement and must be included on every Sterilization Consent Form submitted.

Additional Required Fields
- Medicaid or Family Planning Number - Clients submitted as Titles V, X, and XX may not have a Family Planning number. Please simply indicate the appropriate Title below.
- Date Client Signed the Consent (month, day, year).
- The following provider identification numbers will be required to expedite the processing of the consent form:
  - TPI
  - NPI
  - Taxonomy
  - Benefit Code
- Provider/Clinic Phone Number.
- Provider/Clinic Fax Number (If available).
- Family Planning Title for Client - Indicate by circling V, X, XIX (Medicaid), or XX.
Sterilization Consent Form

(Fax Consent Form to 1-512-514-4229)

Client Medicaid or Family Planning Number:          Date Client Signed:                  /                  /             (month/day/year)

Notice: Your decision at any time not to be sterilized will not result in the withholding of any benefits provided by programs or projects receiving federal funds.

Consent to Sterilization

I have asked for and received information about sterilization from _______________________________ (doctor or clinic). When I first asked for the information, I was told that the decision to be sterilized is completely up to me. I was told that I could decide not to be sterilized. If I decide not to be sterilized, my decision will not affect my right to future care or treatment. I will not lose any help or benefits from programs receiving Federal funds, such as Temporary Assistance for Needy Families (TANF) or Medicaid that I am now receiving or for which I may become eligible.

I understand that the sterilization must be considered permanent and not reversible. I have decided that I do not want to become pregnant, bear children or father children.

I was told about the temporary methods of birth control that are available and could be provided to me which will allow me to bear or father a child in the future. I have rejected these alternatives and chosen to be sterilized.

I understand that I will be sterilized by an operation known as ________________________________ (specify type of operation). The discomforts, risks and benefits associated with the operation have been explained to me. All my questions have been answered to my satisfaction.

I understand that the operation will not be done until at least 30 days after I sign this form. I understand that I can change my mind at any time and that my decision at any time not to be sterilized will not result in the withholding of any benefits or medical services provided by federally funded programs.

I am at least 21 years of age and was born on _____ (month), ____ (day), ____ (year). I, ______________________________________, hereby consent of my own free will to be sterilized by _______________________________ (doctor or clinic) by a method called ________________________________ (specify type of operation).

My consent expires 180 days from the date of my signature below.

I also consent to the release of this form and other medical records about the operation to: Representatives of the Department of Health and Human Services or Employees of programs or projects funded by that Department but only for determining if Federal laws were observed. I have received a copy of this form.

Client’s Signature:                      Date of Signature:                  /                  /             (month/day/year)

Notice: You are requested to supply the following information, but it is not required.

Ethnicity

☐ Not Hispanic or Latino       ☐ Native Hawaiian or Other Pacific Islander
☐ Hispanic or Latino          ☐ American Indian or Alaska Native
☐ Asian                       ☐ White

Interpreter’s Statement

If an interpreter is provided to assist the individual to be sterilized:

I have translated the information and advice and presented orally to the individual to be sterilized by the person obtaining this consent. I have also read him/her the consent form in ______________________ language and explained its contents to him/her. To the best of my knowledge and belief, he/she has understood this explanation.

Interpreter’s Signature:               Date of Signature:                  /                  /             (month/day/year)

Statement of Person Obtaining Consent

Before ________________________________ (client’s full name), signed the consent form, I explained to him/her the nature of the sterilization operation ________________________________ (specify type of operation), the fact that it is intended to be a final and irreversible procedure and the discomforts, risks and benefits associated with it.

I counseled the individual to be sterilized that alternative methods of birth control are available which are temporary. I explained that sterilization is different because it is permanent. I informed the individual to be sterilized that his/her consent can be withdrawn at any time and that he/she will not lose any health services or any benefits provided by Federal funds.

To the best of my knowledge and belief the individual to be sterilized is at least 21 years old and appears mentally competent. He/She knowingly and voluntarily requested to be sterilized and appears to understand the nature and consequence of the procedure.

Signature of Person Obtaining Consent:                     Date of Signature:                  /                  /             (month/day/year)

Facility Name:                        Facility Address:

Physician’s Statement

Shortly before I performed a sterilization operation upon ______________________________________ (name of individual to be sterilized), on _____ /_____ /_____ (date of sterilization), I explained to him/her the nature of the sterilization operation ________________________________ (specify type of operation), the fact that it is intended to be a final and irreversible procedure and the discomforts, risks and benefits associated with it.

I informed the individual to be sterilized that alternative methods of birth control are available which are temporary. I explained that sterilization is different because it is permanent. I informed the individual to be sterilized that his/her consent can be withdrawn at any time and that he/she will not lose any health services or any benefits provided by Federal funds.

To the best of my knowledge and belief the individual to be sterilized is at least 21 years old and appears mentally competent. He/She knowingly and voluntarily requested to be sterilized and appears to understand the nature and consequence of the procedure.

Instructions for use of alternative final paragraphs: Use the first paragraph below except in the case of premature delivery or emergency abdominal surgery where the sterilization is performed less than 30 days after the date of the individual’s signature on the consent form. In those cases, the second paragraph below must be used. Cross out the paragraph which is not used.

(1) At least 30 days have passed between the date of the individual’s signature on this consent form and the date the sterilization was performed.

(2) This sterilization was performed less than 30 days but more than 72 hours after the date of the individual’s signature on this consent form because of the following circumstances (check applicable box and fill in information requested):

☐ Premature delivery - Individual’s expected date of delivery: __________ /_________ /_________ (month, day, year)
☐ Emergency abdominal surgery (describe circumstances): ____________________________________________________________________________________

Physician’s Signature:                  Date of Signature:                  /                  /             (month/day/year)

Paperwork Reduction Act Statement

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0937-0166. The time required to complete this information collection is estimated to average 1 hour 15 minutes per response, including the time to review instructions, search existing data resources, gather the data needed, and complete and review the information collection. If you have comments concerning the accuracy of the time estimate(s) or suggestions for improving this form, please write to: U.S. Department of Health & Human Services, OS/OCIO/PRA, 200 Independence Ave., S.W., Suite 537-H, Washington D.C. 20201, Attention: PRA Reports Clearance Officer.

HS.9 Sterilization Consent Form (Spanish)

Sterilization Consent Form (Spanish)
(Fax Consent Form to 1-512-514-4229)

Nota: La decisión de no esterilizarse que usted puede tomar en cualquier momento, no causará el retiro o la retenión de ningún beneficio que le sea proporcionado por programas o proyectos que reciben fondos federales.

Yo he solicitado y he recibido información de _______ (especifique el tipo de operación) sobre la esterilización. Cuando inicialmente solicite esta información, me dijeron que la decisión de ser esterilizada/o es completamente mía. Me dijeron que yo podía decidir no ser esterilizada/o. Si decidí no esterilizarme, mi decisión no afectará mi derecho a recibir tratamiento o cuidados médicos en el futuro. No perderé ninguna asistencia o beneficios de programas patrocinados con fondos federales, tales como Asistencia Temporal para Familias Necesitadas o Medicaid, que recibiré actualmente o a los cuales podría calificar.

Entiendo que la esterilización se considera una operación permanente e irreversible. Yo he decidido que no quiero quedar embarazada, no quiero tener hijos o no quiero procrear hijos. Me informaron sobre otros métodos de anticoncepción disponibles que son temporales y que permitirán que pueda tener o procrear hijos en el futuro. He rechazado estas opciones y he decidido ser esterilizada/o.

Entiendo que será esterilizado/a por medio de una operación conocida como _______ (especifique el tipo de operación). Me han explicado las molestias, los riesgos y los beneficios asociados con la operación. Han respondido satisfactoriamente a todas mis preguntas.

Entiendo que la operación no se llevará a cabo hasta que hayan pasado 30 días, como mínimo, a partir de la fecha en la que firme esta Forma. Entiendo que puedo cambiar de opinión en cualquier momento y que mi decisión en cualquier momento de no ser esterilizada/o no resultará en la retenida de beneficios o servicios médicos proporcionados a través de programas que reciben fondos federales.

Tengo por lo menos 21 años y nací el _______/_____/______, (mes, día, año). Yo, _______ (médico o clínica) por el método llamado _______ (especificar el tipo de operación).

Mi consentimiento vence 180 días a partir de la fecha que aparece abajo con mi firma. También doy mi consentimiento para que se presente esta Forma y otros expedientes médicos sobre la operación a: Representantes del Departamento de Salud y Servicios Sociales, O Empleados de programas o proyectos financiados por ese Departamento, pero sólo para que puedan determinar si se han cumplido las leyes federales. He recibido una copia de esta Forma.

Firma: Fecha: / / (mes, día, año)

Nota: Se ruega proporcionar la siguiente información, aunque no es obligatorio hacerlo:

Origen étnico
☐ No hispano o latino ☐ Raza (marque según aplique)
☐ Hispano o latino ☐ Natural de Hawai i u otras islas del Pacífico ☐ Negro o afroamericano
☐ Indígena americana o indígena de Alaska ☐ Blanco ☐ Asiático

Definición de Raza y Origen Étnico

Declaración Del Ínterprete

Si se han proporcionado los servicios de un intérprete para asistir a la persona que será esterilizada, He traducido la información y los consejos que verbalmente se han presentado a la persona que será esterilizada por el individuo que ha obtenido este consentimiento. También le he leído a ella/él la Forma de Consentimiento en idioma y le he explicado el contenido de esta forma. A mi mejor saber y entender, ella/él ha entendido esta explicación.

Firma: Fecha: / / (mes, día, año)

Declaración De La Persona Que Obtiene Consentimiento

Antes de que _______ (nombre completo del cliente) firmara la Forma de Consentimiento para la Esterilización, le he explicado a ella/él los detalles de esta operación para la esterilización. Le he explicado el hecho que el resultado de este procedimiento es final e irreversible, y las molestias, los riesgos y los beneficios asociados con este procedimiento. He aconsejado a la persona que será esterilizada que hay disponibles otros métodos de anticoncepción que son temporales. Le he explicado que la esterilización es diferente porque es permanente. Le he explicado a la persona que será esterilizada que puede retirar su consentimiento en cualquier momento y que ella/él no perderá ningún servicio de salud o beneficio proporcionado con el patrocinio de fondos federales. A mi mejor saber y entender, la persona que será esterilizada por el método llamado _______ (specifies the type of operation).

Firma de la persona que obtiene el consentimiento:
Nombre del lugar:

Declaración Del Médico

Un poco antes de realizar la operación para la esterilización a _______ (nombre de persona por ser esterilizada/o), en / / (fecha de esterilización), le explicué a ella/él los detalles de esta operación para la esterilización _______ (especifique el tipo de operación), del hecho de que es un procedimiento con un resultado final e irreversible, y las molestias, los riesgos y los beneficios asociados con esta operación.

Le aconsejé a la persona que sería esterilizada que disponía de otros métodos de anticoncepción que son temporales. Le expliqué que la esterilización es diferente porque es permanente. Le informé a la persona que sería esterilizada que podía retirar su consentimiento en cualquier momento y que ella/él no perdería ningún servicio de salud o beneficio proporcionado con el patrocinio de fondos federales. A mi mejor saber y entender, la persona que será esterilizada tiene a lo menos 21 años de edad y parece ser mentalmente competente. Ella/él ha solicitado con conocimiento de causa y por libre voluntad ser esterilizada/o y parece entender la naturaleza del procedimiento y sus consecuencias.

Firma del médico:

Declaración Sobre Ley De Reducción De Trámites

De acuerdo con la Ley de Reducción de Trámites de 1995, ninguna persona está obligada a responder a una solicitud de información a menos que muestre un número de control válido de OMB. El número de control válido de OMB para esta solicitud es 0937-0166. Se ha estimado que el tiempo promedio necesario para completar esta recolección de información es 1 hora y 15 minutos por respuesta, incluido el tiempo para revisar las instrucciones, buscar fuentes de información existente, reunir los datos necesarios y completar y revisar la recolección de información. Si tiene algún comentario sobre la exactitud del cálculo(s) del tiempo o sugerencias para mejorar esta forma, por favor escriba a: U.S. Department of Health & Human Services, OS/OCIO/PRA, 200 Independence Ave., S.W., Suite 537-H, Washington D.C. 20201, Attention: PRA Reports Clearance Officer.

Note: A comprehensive Index, including Volume 1 and all handbooks from Volume 2, is included at the end of Volume 1 (General Information).
1. GENERAL INFORMATION

The information in this handbook is intended for Texas chiropractors, nurse practitioners (NP), clinical nurse specialists (CNS), certified nurse midwives (CNM), certified registered nurse anesthetists (CRNA), podiatrists, geneticists, maternity service clinics, physicians, and physician assistants. The handbook provides information about Texas Medicaid’s benefits, policies, and procedures.

**Important:** All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1617(a)(6)(A). Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers may also be subject to Texas Medicaid sanctions for failure, at all times, to deliver healthcare items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.

**Refer to:**
- Section 1: Provider Enrollment and Responsibilities (Vol. 1, General Information)
- Subsection 8.1, “Medicaid Managed Care,” in Section 8, “Managed Care” (Vol. 1, General Information)
- Section 5, “THSteps Medical” in the Children’s Services Handbook (Vol. 2, Provider Handbooks)

For information on Advanced Practice Registered Nurses (APRNs), refer to the following subsections in this handbook:

**Section 3, “Certified Nurse Midwife (CNM)”**
- Subsection 3.1, “Provider Enrollment,”

**Section 4, “Certified Registered Nurse Anesthetist (CRNA)”**
- Subsection 5.1, “Enrollment,”

**Section 5, “Genetic Services”**
- Subsection 5.2, “Services, Benefits, Limitations and Prior Authorization,”

**Section 7, “Nurse Practitioner (NP) and Clinical Nurse Specialist (CNS)”**
- Subsection 7.1, “Enrollment,”

**Section 8, “Physician”**
2. CHIROPRACTIC MANIPULATIVE TREATMENT (CMT)

2.1 Enrollment
To enroll in Texas Medicaid, a doctor of chiropractic medicine (DC) must be licensed by the Texas Board of Chiropractic Examiners and enrolled as a Medicare provider.

Providers cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

2.2 Services, Benefits, Limitations and Prior Authorization
CMT performed by a chiropractor licensed by the Texas State Board of Chiropractic Examiners is a benefit of Texas Medicaid.

CMT is limited to an acute condition or an acute exacerbation of a chronic condition for a maximum of 12 visits in a consecutive 12-month period, and a maximum of one visit per day.

If the condition persists more than 180 days from the start of therapy, the condition is considered chronic, and treatment is no longer considered acute.

CMT is not a benefit of Texas Medicaid for maintenance therapy when:

- Further clinical improvement cannot reasonably be expected from continuous ongoing care.
- The chiropractic treatment becomes supportive rather than corrective in nature.

CMT may be reimbursed when billed using procedure codes 98940, 98941, or 98942.

Procedure codes 98940, 98941, and 98942 must be submitted with the AT modifier. The AT modifier is used to identify treatment provided for an acute condition or an exacerbation of a chronic condition that persists for 180 days or less from the start date of treatment. Providers may file an appeal for a claim denied beyond the 180 days of treatment with documentation supporting that further clinical improvement can be reasonably expected, maximal improvement has not been reached, and further improvement has not ceased.

Procedure code 98940 will be denied as part of another service when billed for the same date of service as 98941 or 98942 by any provider.

Procedure code 98941 will be denied as part of another service when billed for the same date of service as 98942 by any provider.

Texas Medicaid does not reimburse chiropractors for X-ray services, office visits, injections, supplies, appliances, spinalator treatments, laboratory services, physical therapy, or other adjunctive services furnished by themselves or by others under their orders or directions. Additionally, braces or supports, even though ordered by a physician (doctor of medicine [MD] or doctor of osteopathy [DO]) and supplied by a chiropractor are not reimbursable items.

CMT is reimbursed only for a diagnosis of subluxation of the spine. The level of subluxation must be indicated by the appropriate diagnosis codes listed below:

<table>
<thead>
<tr>
<th>Diagnosis</th>
</tr>
</thead>
<tbody>
<tr>
<td>7390</td>
</tr>
<tr>
<td>7391</td>
</tr>
<tr>
<td>7392</td>
</tr>
<tr>

</tr>
<tr>
<td>7394</td>
</tr>
<tr>
<td>7395</td>
</tr>
<tr>
<td>7398</td>
</tr>
</tbody>
</table>

2.2.1 Prior Authorization
Prior authorization is not required for CMT services.
2.3 Documentation Requirements
Manipulations must be provided in accordance with an ongoing, written treatment plan that supports medical necessity of an acute condition or an acute exacerbation of a chronic condition.

Documentation that supports medical necessity for the treatment plan includes all of the following:

- Diagnosis.
- Region(s) treated.
- Degree of severity.
- Impairment characteristics.
- Physical examination findings, X-ray, or other pertinent findings.
- Specific statements of short- and long-term goals.
- A reasonable estimate of when the goals will be reached (estimated duration of treatment).
- Frequency of treatment (number of times per week).
- Equipment and/or the techniques utilized.

The treatment plan must be updated as the client’s condition changes. Treatment plans must be maintained in the medical records and are subject to retrospective review.

2.4 Claims Filing and Reimbursement

2.4.1 Claims Information
Chiropractic services must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply them.

When completing a CMS-1500 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions,” in Section 6, “Claims Filing” (Vol. 1, General Information) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

2.4.2 Reimbursement
The Medicaid rates for chiropractic manipulative treatment (CMT) are reimbursed in accordance with 1 TAC §355.8081 and 355.8085. See the online fee lookup (OFL) or the applicable fee schedule on the TMHP website at www.tmhp.com.

Refer to: Subsection 2.2, “Reimbursement Methodology,” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for more information about reimbursement.
3. CERTIFIED NURSE MIDWIFE (CNM)

3.1 Provider Enrollment

To enroll in Texas Medicaid, a CNM must be licensed as a registered nurse and as an advanced practice registered nurse (APRN) by the Texas Board of Nursing (BON), and be authorized to practice as a nurse-midwife. A registered nurse under the multistate licensure compact may be licensed in another state but certified as an APRN for the state of Texas by the Texas BON. Texas Medicaid accepts a signed letter of certification from the Texas BON as documentation of appropriate licensure and certification for enrollment.

Refer to: The Texas Department of State Health Services (DSHS) website at www.dshs.state.tx.us/famplan for information about family planning and the locations of family planning clinics that receive Title V, X, or XX funding from DSHS.

Providers cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

All providers of laboratory services must comply with the rules and regulations of the Clinical Laboratory Improvement Amendments (CLIA). Providers not complying with CLIA are not reimbursed for laboratory services.

All APRNs (including CNMs, CRNAs, CNSs, and NPs) are enrolled within the categories of practice as determined by the Texas BON. CNSs and NPs must enroll as an APRN; CNMs and CRNAs may enroll using their specific titles.

A CNM must identify the licensed physician or group of physicians with whom there is an arrangement for referral and consultation if medical complications arise. The collaborating physician does not have to be a participating provider in Texas Medicaid. According to TAC, §354.1252 (3), if the collaborating physician or group is not a participating provider in Texas Medicaid, the CNM must inform clients of their potential financial responsibility. If the arrangement is changed or canceled, the CNM must notify Texas Medicaid & Healthcare Partnership (TMHP) Provider Enrollment in writing within two weeks after the change or cancellation.

CNMs are encouraged to participate in or make referrals to family planning agencies.

Refer to: “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, General Information) for more information about enrollment in Texas Medicaid.

Subsection 5.2, “Enrollment,” in the Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information about enrollment in the THSteps Program.

3.1.1 Enrollment in Texas Health Steps (THSteps)

CNMs may enroll as providers of THSteps medical checkups for newborns and adolescent females.

3.2 Services, Benefits, Limitations, and Prior Authorization

CNM providers may be reimbursed for obstetrical, neonatal, and primary care services.

3.2.1 Deliveries

CNM providers may be reimbursed for procedure code 59409, 59410, or 59614 for delivery services.

3.2.2 Newborn Services

Routine newborn care, attendance at delivery, newborn resuscitation, neonatal critical care, and intensive (noncritical) care services may be reimbursed to CNM providers.
Refer to: Subsection 5.3.1.8, “Newborn Examination,” in the *Children’s Services Handbook* (Volume 2, Provider Handbooks) for a list of required components for an initial THSteps examination.

Subsection 8.2.43, “Newborn Services,” in this handbook for additional guidelines and limitations.

### 3.2.3 Prenatal and Postpartum Services

CNM and physician providers are limited to a combined total of 20 outpatient prenatal care visits and 2 postpartum care visits per pregnancy. Normal pregnancies are anticipated to require around 11 visits per pregnancy and high-risk pregnancies are anticipated to require around 20 visits per pregnancy. If more than 20 visits are medically necessary, the provider can appeal with documentation supporting pregnancy complications. The high-risk client’s medical record documentation should reflect the need for increased visits and is subject to retrospective review.

When billing for prenatal services, use modifier TH with the appropriate evaluation and management procedure code to the highest level of specificity.

Postpartum care provided after discharge must be billed using procedure code 59430.

### 3.2.4 Laboratory and Radiology Services

Laboratory (including pregnancy tests) and radiology services that are rendered during pregnancy must be billed separately from prenatal care visits.

### 3.2.5 Prior Authorization

Prior authorization is not required for any of these services except delivery in the home. For prior authorization of a home delivery, the CNM must submit a written request for prior authorization during the client’s third trimester of pregnancy. The CNM must include a statement signed by a licensed physician who has examined the client during the third trimester and determined at that time that she is not at high risk and is suitable for a home delivery. Documentation must also include a plan for access to emergency transport for mother and neonate, if needed. Requests for home delivery prior authorizations must be submitted to the TMHP Medical Director at the following address:

Texas Medicaid & Healthcare Partnership  
Special Medical Prior Authorization  
12357-B Riata Trace Parkway, Suite 150  
Austin, TX 78727  
Fax: 1-512-514-4213

Claims submitted for home deliveries performed by a CNM without prior authorization will be denied.

### 3.2.6 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including gynecological and reproductive health, obstetrics, and family planning services.

Gynecological and reproductive health, obstetrics, and family planning services are subject to retrospective review and recoupment if documentation does not support the service billed.

### 3.2.7 Claims Filing and Reimbursement

CNMs must bill maternity services in one of two ways: itemizing each service individually on one claim form and filing at the time of delivery (the filing deadline is applied to the date of delivery) or itemizing each service individually and submitting claims as the services are rendered (the filing deadline is applied to each individual date of service).

CNM services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.
When completing a CMS-1500 claim form all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

According to 1 TAC §355.8161, the Medicaid rate for CNMs is 92 percent of the rate paid to a physician (doctor of medicine [MD] or doctor of osteopathy [DO]) for the same service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections. The 92 percent fee is not reflected within the fee schedule and is applied before the payment is processed. Providers can refer to the Online Fee Lookup (OFL) or the applicable fee schedule on the TMHP website at www.tmhp.com.

Refer to: Subsection 4.1, “General Medicaid Eligibility,” in Section 4, Client Eligibility (Vol. 1, General Information) for information about crossover payments.

Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

4. CERTIFIED REGISTERED NURSE ANESTHETIST (CRNA)

4.1 Enrollment

To enroll in Texas Medicaid, a CRNA must be licensed as a registered nurse (RN) and as an APRN by the Texas BON and must be currently certified by the Council on Certification of Nurse Anesthetists or the Council on Recertification of Nurse Anesthetists. An RN under the multistate licensure compact may be licensed in another state but certified as an APRN for the state of Texas by the Texas BON. Texas Medicaid accepts a signed letter of certification from the Texas BON as acceptable documentation of appropriate licensure and certification for enrollment.

Medicare enrollment is a prerequisite for enrollment as a Medicaid provider. A current copy of the provider’s Council on Certification of Nurse Anesthetists or Recertification of Nurse Anesthetists Certificate must be submitted with the Medicaid provider enrollment application.

Providers cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

4.2 Services, Benefits, Limitations and Prior Authorization

Medically necessary services performed by a CRNA are benefits if the services are within the scope of the CRNA’s practice as defined by state law; are prescribed, supervised by, and provided under the direction of a supervising physician (MD or DO), dentist, or podiatrist licensed in the state in which they practice and to the extent allowed by state law; or are provided under one of the following conditions:

- No physician anesthesiologist is on the medical staff of the facility where the services are provided (e.g., rural settings).
- No physician anesthesiologist is available to provide the services, as determined by the policies of the facility in which the services are provided.
- The physician performing the procedure requiring the services specifically requests the services of a CRNA.
• The eligible client requiring the services specifically requests the services of a CRNA.
• The CRNA is scheduled or assigned to provide the services according to policies of the facility in which the services are provided.
• The services are provided by the CRNA in connection with a medical emergency.

Texas Medicaid does not reimburse the CRNA for equipment, drugs, or supplies.

Refer to: Subsection 2.3.3, “Outpatient Benefits and Limitations,” in Hospital Services Handbook (Vol. 2, Provider Handbooks) for information about drugs, equipment and supplies.

4.2.1 Prior Authorization

Services performed by a CRNA are subject to the same prior authorization guidelines as services performed by other provider types.

4.3 Documentation Requirements

All services require documentation to support the medical necessity of the services rendered, including CRNA services. CRNA services are subject to retrospective review and recoupment if documentation does not support the service billed.

4.4 Claims Filing and Reimbursement

4.4.1 Claims Information

All CRNA services must be billed with a CRNA individual provider identifier or a CRNA group provider identifier. No payment for CRNA services will be made under a hospital or physician provider identifier.

CRNA services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions,” in Section 6, “Claims Filing” (Vol. 1, General Information) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Subsection 8.2.6.9.3, “CRNA Services,” in this handbook for more information on billing for CRNA services.

4.4.1.1 Interpreting the R&S Report

The Billed Qty field on the Remittance and Status (R&S) Report reflects only the number of time units TMHP processes. The Relative Value Units (RVUs) assigned for the procedure code are not shown in the Billed Qty field.

4.4.2 Reimbursement

A CRNA is reimbursed the lesser of either the CRNA’s billed charges or 92 percent of the reimbursement for the same service paid to a physician (MD or DO) anesthesiologist in accordance with 1 TAC §355.8221.
Refer to: Subsection 8.2.6.8, “Reimbursement Methodology,” in this handbook for more information about flat fees and time based fees.

5. GENETICISTS

5.1 Enrollment

5.1.1 Geneticists

Geneticists may enroll in Texas Medicaid as both a physician or physician group and as a geneticist. Enrollment as a geneticist allows enhanced reimbursement for specific procedure codes when a claim is submitted using the geneticist provider identifier.

A provider of genetic services that wishes to enroll in Texas Medicaid as a geneticist must complete the required Medicaid provider enrollment application forms and enter into a written agreement with HHSC. Texas Medicaid provider enrollment forms are available from TMHP, and may be downloaded on the TMHP website at www.tmhp.com. Completed applications are submitted to:

Texas Medicaid & Healthcare Partnership
Provider Enrollment
PO Box 200795
Austin, TX 78720

Prior to enrollment, applicant qualifications for the provision of genetic services are verified and approved by DSHS. Verification and approval are administered through the Health Screening & Case Management Unit, 1-512-458-7111, Ext. 2193. Basic contract requirements are as follows:

• The provider’s medical director must be a clinical geneticist (MD or DO) who is licensed by the Texas Medical Board (TMB) and who is board-eligible or certified by the American Board of Medical Geneticists (ABMG).

• The provider must use a team of professionals to provide genetic evaluative, diagnostic, and counseling services. The team rendering the services must consist of professional staff including the clinical geneticist and at least one of the following: nurse, social worker, medical geneticist, or genetic counselor.

• Upon DSHS approval, TMHP issues a provider identifier and a performing provider identifier for the provision of genetic services.

• Providers cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

5.2 Services, Benefits, Limitations and Prior Authorization

Genetic services may be used to diagnose a condition, optimize disease treatment, predict future disease risk, and prevent adverse drug response. Genetic services may be provided by a physician, physician assistant, nurse practitioner, or clinical nurse specialist and typically include one or more of the following:

• Comprehensive physical exams

• Diagnosis, management, and treatment for clients with genetically-related health problems

• Evaluation of family histories for the client and the client’s family members

• Genetic risk assessment

• Genetic laboratory tests

• Interpretation and evaluation of laboratory test results
Education and counseling of clients, their families, and other medical professionals on the causes of genetic disorders

Consultation with other medical professionals to provide treatment

Pharmacogenetics encompasses the use of information encoded in clients’ DNA to help predict their responses to medicines and to enhance the effectiveness and safety of medicines for individual clients. Testing for drug efficacy is not a benefit of Texas Medicaid.

5.2.1 Family History

It is important for primary care providers to recognize potential genetic risk factors in a client so that they can make appropriate referrals to a genetic specialist.

Obtaining an accurate family history is an important part of clinical evaluations, even when genetic abnormalities are not suspected. Knowing the family history may help health-care providers identify single-gene disorders or chromosomal abnormalities that occur in multiple family members or through multiple generations. Some genetic disorders that can be traced through an accurate family history include diabetes, hypertension, certain forms of cancer, and cystic fibrosis. Early identification of the client’s risk for one of these diseases can lead to early intervention and preventive measures that can delay onset or improve health conditions.

Using a genetics-specific questionnaire helps to obtain the information needed to identify possible genetic patterns or disorders. The most commonly used questionnaires are provided by the American Medical Association and include the Prenatal Screening Questionnaire, the Pediatric Clinical Genetics Questionnaire, and the Adult History Form.

5.2.2 Genetic Tests

Diagnostic tests to check for genetic abnormalities must be performed only if the test results will affect treatment decisions or provide prognostic information. Tests for conditions that are treated symptomatically are not appropriate since the treatment would not change. Providers who are uncertain whether a test is appropriate are encouraged to contact a geneticist or other specialist to discuss the client’s needs.

Any genetic testing and screening procedure must be accompanied by appropriate non-directive counseling, both before and after the procedure. Information must be provided to the client and family (if appropriate) about the possible risks and purpose and nature of the tests being performed.

The interpretation of certain tests, such as nuchal translucency, requires additional education and experience. Texas Medicaid supports national certification standards when available.

5.2.3 Laboratory Practices

For many heritable diseases and conditions, test performance and interpretation of test results require information about client race/ethnicity, family history, and other pertinent clinical and laboratory information. To facilitate test requests and ensure prompt initiation of appropriate testing procedures and accurate interpretation of test results, the requesting provider must be aware of the specific client information needed by the laboratory before tests are ordered.

To help providers make appropriate test selections and requests, handle and submit specimens, and provide clinical care, laboratories that perform molecular genetic testing for heritable diseases and conditions must educate providers that request services about the molecular genetic tests the laboratory performs. For each molecular genetic test, the laboratory must provide the following information:

- Indications for testing
- Relevant clinical and laboratory information
- Client race and ethnicity
- Family history
• Pedigree

Testing performed on a client to provide genetic information for a family member, and testing performed on a non-Medicaid client to provide genetic information for a Medicaid client are not benefits of Texas Medicaid.

5.2.4 Genetic Counselors

Genetic counselor services may be billed by a physician when the genetic counselor is under physician supervision and is an employee of the physician. Services provided by independent genetic counselors are not a benefit of Texas Medicaid.

5.2.5 Genetic Evaluation and Counseling by a Geneticist

A provider enrolled in Texas Medicaid as a geneticist may bill the following evaluation and management codes and receive an enhanced reimbursement. All other procedure codes must be billed under the geneticist’s individual, group, or laboratory provider identifier.

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Limitations</th>
</tr>
</thead>
<tbody>
<tr>
<td>96040</td>

<td>One every three years, any provider</td>
</tr>
</tbody>
</table>

* Exception: Additional services are allowed when documentation of medical necessity to repeat a procedure accompanies a claim.

One office consultation, performed by a geneticist, (procedure code 99244 or 99245) may be considered for reimbursement if procedure code 99244, 99245, 99254, or 99255 has not been submitted by and reimbursed to that geneticist in the previous three years.

Inpatient consultations, performed by a geneticist, (procedure codes 99254 and 99255) may be considered for reimbursement once every three years even if an office consultation has been reimbursed in the previous three years.

5.2.6 Prior Authorization

Prior authorization is not required for services billed by a geneticist.

5.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including genetic services. Genetic services are subject to retrospective review and recoupment if documentation does not support the service billed.
5.4  Claims Filing and Reimbursement

5.4.1  Claims Information
Genetic services must be submitted to TMHP in an approved electronic format or on a CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

TMHP representatives are available for provider questions about genetic services, such as reimbursement rates and procedures. For more information, call the TMHP Contact Center at 1-800-925-9126.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions,” in Section 6, “Claims Filing” (Vol. 1, General Information) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

5.4.2  Reimbursement
Genetic services providers are reimbursed according to the established allowable maximum fee schedule. Providers can refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com.

Refer to: Subsection 2.2, “Reimbursement Methodology,” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for more information about reimbursement.

6.  MATERNITY SERVICE CLINICS (MSC)

6.1  Provider Enrollment
To enroll in Texas Medicaid, MSCs must submit a complete application and meet the following requirements:

- Must be a facility that is not an administrative, organizational, or financial part of a hospital.
- Must be organized and operated to provide maternity clinic services to outpatients.
- Must comply with all applicable federal, state, and local laws and regulations.
- Must employ or have a contractual agreement or formal arrangement with a licensed MD or DO who assumes professional responsibility for the services provided to the clinic’s patients.
- Must adhere to the Bureau of Maternal and Child Health Maternity Guidelines, dated June 20, 1988, and subsequent revisions issued by the Texas Department of Health, unless otherwise specified by the department or its designee.
- Must ensure that services provided to each patient are commensurate with the patient’s risk assessment and are documented in the patient’s medical record.

The supervising physician’s license information must be provided. Providers cannot be enrolled in Texas Medicaid if their licenses are due to expire within 30 days.
Medicare certification is not a prerequisite for MSC enrollment.

6.1.1 Physician Responsibility
To meet the requirement to assume professional responsibility for the services provided to the clinic’s clients, the supervising physician must do the following:

- See the client at least once
- Prescribe the type of care to be provided or approve the client’s plan of care (POC)
- Periodically review the need for continued care (if the services are not limited by the prescription)

The physician must base the POC on a risk assessment completed by the physician or by licensed, professional clinic staff. The assessment must be based on findings obtained through a health history, laboratory or screening services, and a physical examination.

6.1.2 Case Management Services to High-Risk Individuals
An MSC that wants to bill and receive reimbursement for case management services to high-risk individuals including infants, pregnant adolescents, and women must meet the eligibility criteria for case management services. To be considered for reimbursement for case management for these clients, the MSC must enroll as a group in Case Management for Children and Pregnant Women (CPW), and each eligible case manager must enroll as a performing provider.

Refer to: Section 3, “Certified Nurse Midwife (CNM)” in the Behavioral Health, Rehabilitation, and Targeted Case Management Services Handbook (Volume 2, Provider Handbooks), for case management services provider eligibility criteria.

6.2 Services, Benefits, Limitations, and Prior Authorization
Services billed by an MSC are those provided by a physician or by licensed, professional clinic staff and are determined to be reasonable and medically necessary for the care of a pregnant adolescent or woman during the prenatal period and subsequent 60-day postpartum period. MSC benefits do not include deliveries.

MSCs are limited to 20 prenatal care visits and two postpartum care visits per pregnancy. Normal pregnancies are anticipated to require around 11 visits per pregnancy and high-risk pregnancies are anticipated to require around 20 visits per pregnancy. If more than 20 visits are medically necessary, the provider can appeal with documentation supporting pregnancy complications. The high-risk client’s medical record documentation must reflect the need for increased visits and is subject to retrospective review.

Procedure codes in the following table are for prenatal and postpartum care visits:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>59430*</td>
</tr>
<tr>
<td>99212-TH</td>
</tr>
</tbody>
</table>

* Procedure code 59430 is not submitted with modifier TH

Note: The prenatal visits must be billed with modifier TH

Providers must bill the most appropriate new or established prenatal visit code or postpartum visit code. New patient codes may be used when the client has not received any professional services from the provider, or another provider of the same specialty who belongs to the same group practice, within the past three years (36 months).
An MSC may be reimbursed for prenatal and postpartum care visits only. Hemoglobin, hematocrit, and urinalysis procedures are included in the charge for prenatal care and not separately reimbursed. Services other than prenatal and postpartum care visits will be denied. MSCs that are enrolled in CPW case management as a group may be reimbursed for these services under the group provider identifier assigned to their facility.

Medical services must be furnished on an outpatient basis by the physician or by licensed, professional clinic staff under the direction of the physician and must be within the staff’s scope of practice or licensure as defined by state law. Although the physician does not necessarily have to be present at the clinic when services are provided, the physician must assume professional responsibility for the medical services provided at the clinic and ensure through approval of the POC that the services are medically appropriate. The physician must spend as much time in the clinic as is necessary to ensure that clients are receiving medical services in a safe and efficient manner in accordance with accepted standards of medical practice.

MSCs must follow the procedures outlined throughout this manual. All service, frequency, and documentation requirements are applicable.

Providers submitting charges for high-risk prenatal care must document the high-risk diagnosis on the claim form and document the condition in the client’s medical record.

Refer to: Subsection 8.2.44.10.1, “HIV Testing,” in this handbook for information about required HIV testing for pregnant women.

6.2.1 Initial Prenatal Care Visit Components

The following initial prenatal care visit components should be completed as early as possible in the client’s pregnancy.

6.2.1.1 History

History includes OB-GYN, present pregnancy, medical and surgical, substance use, environmental, nutritional, psychosocial (including violence), and family support system.

6.2.1.2 Physical Examination

Physical examination includes height, weight, blood pressure; head, neck, lymph, breasts, heart, lungs, back, abdomen, pelvis, rectum, extremities, and skin; and uterine size, fetal heart rate, and location.

6.2.1.3 Laboratory Tests

The initial hematocrit or hemoglobin and each subsequent hematocrit or hemoglobin is included in the visit fee and is not separately reimbursable to MSCs.

The laboratory services listed may not be billed using the MSC provider identifier. These services may be ordered by MSC personnel and provided by a reference laboratory.

MSCs must supply the client’s Medicaid number and the MSC provider identifier to the reference laboratory when laboratory services are requested.

The laboratory services requested by an MSC may include, but are not limited to, the following:

- Hemoglobin, hematocrit, or complete blood count (CBC)
- Urinalysis
- Blood type and Rh
- Antibody screen
- Rubella antibody titer
- Serology for syphilis
The following tests may be performed at the initial prenatal care visit, as indicated:

- Pregnancy test
- Gonorrhea test
- Urine culture
- Sickle cell test
- Tuberculosis (TB) test
- Human Immunodeficiency Virus (HIV) antibody screen
- Chlamydia test

Screening for Hepatitis B virus infection must be performed at the initial prenatal care visit as stated in the Health and Safety Code §81.090.

Multiple marker screens for neural tube defects must be offered if the client initiates care between 16 and 20 weeks.

6.2.1.4 Assessment

Assessment includes pregnancy, general health, medical, and psychosocial.

6.2.1.5 Plan

Plan includes pregnancy, preventive health, medical, and referral as indicated.

6.2.1.6 Education and Counseling

Education and counseling includes pregnancy, delivery, nutrition, breast-feeding, family planning, and preventive health. The education and counseling should also include the need for a medical home and information about THSteps medical and dental checkups for the child.

The complete physical examination may be completed at the second visit if the MSC’s routine involves a two-stage initial evaluation.

6.2.2 Subsequent Prenatal Care Visits

The following is a recommended guide for the frequency of subsequent prenatal visits for a regular pregnancy:

- One visit every 4 weeks for the first 28 weeks of pregnancy.
- One visit every 2 to 3 weeks from 28 to 36 weeks of pregnancy.
- One visit per week from 36 weeks to delivery.

More frequent visits may be medically necessary. Physicians, CNMs, and MSCs are limited to 20 prenatal care visits per pregnancy and 2 postpartum care visits per pregnancy after discharge from the hospital, without documentation of a complication of pregnancy.

Each subsequent visit must include the following:

- Interim History
- Problems
- Maternal status
• Fetal status

6.2.2.1 Physical Examination

The physical examination must include the following:
• Weight and blood pressure
• Fundal height, fetal position and size, and fetal heart rate
• Extremities

6.2.2.2 Laboratory Tests

Required laboratory tests include the following:
• Urinalysis for protein and glucose every visit

  Note: The urinalysis for protein and glucose, hemoglobin, and hematocrit is included in the visit fee and is not separately reimbursable to MSCs.

• Hematocrit or hemoglobin repeated once a trimester and at 32 to 36 weeks of pregnancy
• Multiple marker screen for fetal abnormalities offered at 16 to 20 weeks of pregnancy
• Repeated antibody screen for Rh negative women at 28 weeks (followed by Rho immune globulin administration if indicated)
• Gestational diabetes screen at 24 to 28 weeks of pregnancy, one hour post 50 gram glucose load
• Blood sample for HBsAg screening at the first examination and visit followed by a second blood sample for HBsAg screening on admission for delivery
• Other laboratory tests as indicated by the medical condition of the client

6.2.3 Postpartum Care Visit

Postpartum care provided by MSCs must be billed using procedure code 59430. A maximum of 2 postpartum visits are allowed within the 60-day postpartum period.

6.2.4 Prior Authorization

Prior authorization is not required for services rendered in MSCs.

6.3 Documentation Requirements

Each client must have a complete and accepted standard medical record with documentation for the initial visit with procedures, as well as each subsequent visit with procedures. Such records must be made available when requested by HHSC or TMHP for utilization and quality assurance reviews as required by federal regulations. The documentation record or a true copy or narrative abstract must be sent to the hospital of delivery by the client’s 35th week of pregnancy. The record must be made available to the client if the client transfers care to another institution. Records completed by licensed professional clinic staff under the direction of a physician must be signed by the supervising physician.

6.4 Claims Filing and Reimbursement

MSC services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a CMS-1500 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.
Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions,” in Section 6, “Claims Filing” (Vol. 1, General Information). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

MSCs are reimbursed in accordance with 1 TAC §355.8081. Providers can refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com.

7. NURSE PRACTITIONER (NP) AND CLINICAL NURSE SPECIALIST (CNS)

For other APRNs, see Section 4, “Certified Registered Nurse Anesthetist (CRNA)” in this handbook for information regarding CRNAs, and Section 3, “Certified Nurse Midwife (CNM)” in this handbook for information about certified nurse midwives (CNMs).

7.1 Enrollment

To enroll in Texas Medicaid, an NP or CNS must be licensed as a registered nurse and as an APRN by the Texas BON. A registered nurse under the multistate licensure compact may be licensed in another state but certified as an APRN for the state of Texas by the Texas BON. Texas Medicaid accepts a signed letter of certification from the Texas BON as documentation of appropriate licensure and certification for enrollment.

Providers cannot be enrolled if their license is due to expire within 30 days.

All providers of laboratory services must comply with the rules and regulations of the Clinical Laboratory Improvement Amendments (CLIA). Providers not complying with CLIA are not reimbursed for laboratory services.

All APRNs (including CNMs, CRNAs, CNSs, and NPs) are enrolled within the categories of practice as determined by the Texas BON. CNSs and NPs must enroll as an APRN; CNMs and CRNAs may enroll using their specific titles.

Refer to: Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA),” in Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks).

Section 3, “Certified Nurse Midwife (CNM)” in this handbook for more information on CNM enrollment.

Section 4, “Certified Registered Nurse Anesthetist (CRNA)” in this handbook for more information on CRNA enrollment.

7.1.1 Enrollment in Texas Health Steps (THSteps)

APRNs who are recognized by the Texas BON and who are nationally certified in pediatrics, family practice, adult health (adolescents only), women’s health (adolescent females only), or is a certified nurse midwife (newborns and adolescent females only) can enroll as THSteps providers for adolescents. Specific information is found in the Children’s Services Handbook.

Refer to: Subsection 5.2, “Enrollment,” in Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information on enrollment procedures.
7.2 Services, Benefits, Limitations and Prior Authorization

Services performed by NPs and CNSs are benefits if the services meet the following criteria:

- Are within the scope of practice for NPs and CNSs, as defined by Texas state law.
- Are consistent with rules and regulations promulgated by the Texas BON or other appropriate state licensing authority.
- Are covered by Texas Medicaid when provided by a licensed physician (MD or DO).
- Are reasonable and medically necessary as determined by HHSC or its designee.

NPs and CNSs who are employed or remunerated by a physician, hospital, facility, or other provider must not bill Texas Medicaid for their services if the billing results in duplicate payment for the same services.

Benefit limitation information for services can be found in the Section 8, “Physician” in this handbook, the Children’s Services Handbook, and the Gynecological and Reproductive Health, Obstetrics, and Family Planning Services Handbook.

Payment for supplies is not a benefit of Texas Medicaid. Costs of supplies are included in the reimbursement for office visits.

Refer to:
- Section 2, “Medicaid Title XIX family planning services” in Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks).
- Section 8, “Physician” in this handbook.
- Subsection 5.1.6, “THSteps Medical Checkup Facilities,” in Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information on THSteps services.

7.2.1 Prior Authorization

Services performed by an NP or CNS are subject to the same prior authorization guidelines as services performed by other provider types.

7.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including NP and CNS services. NP and CNS services are subject to retrospective review and recoupment if documentation does not support the service billed.

7.4 Claims Filing and Reimbursement

7.4.1 Claims Information

APRN services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to:
- Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.
- Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.
Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions,” in Section 6, “Claims Filing” (Vol. 1, General Information) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

### 7.4.2 Reimbursement

According to 1 TAC §355.8281, the Medicaid rate for NPs and CNSs is 92 percent of the rate paid to a physician (MD or DO) for the same professional service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections. When NPs or CNSs bill Medicaid directly for services they performed, they must use their individual provider identifier. If the services are performed by the NP or CNS but billed by a physician or physician group, the billing provider is the physician or physician group. Providers can refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com.

**Refer to:** Subsection 1.1, “Provider Enrollment,” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).

**Refer to:** Subsection 2.2, “Reimbursement Methodology,” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for more information about reimbursement.

### 8. PHYSICIAN

#### 8.1 Enrollment

##### 8.1.1 Physicians and Doctors

To enroll in Texas Medicaid to provide medical services, physicians (MD or DO), doctors of dental surgery [DDS], and doctors of podiatric medicine (DPM) must be authorized by the licensing authority of their profession to practice in the state where the services are performed at the time they are provided. Providers cannot be enrolled in Texas Medicaid if their licenses are due to expire within 30 days. A current Texas license must be submitted.

**Important:** The Centers for Medicare & Medicaid Services (CMS) guidelines mandate that physicians who provide durable medical equipment (DME) products such as spacers or nebulizers are required to enroll as Texas Medicaid DME providers.

All physicians except gynecologists, pediatricians, pediatric subspecialists, pediatric psychiatrists, and providers performing only Texas Health Steps (THSteps) medical or dental checkups must be enrolled in Medicare before enrolling in Medicaid. TMHP may waive the Medicare enrollment prerequisite for pediatricians or physicians whose type of practice and service may never be billed to Medicare.

#### 8.2 Services/Benefits, Limitations, and Prior Authorization

The Administrative Simplification provisions of the Health Insurance Portability and Accountability Act (HIPAA) of 1996 mandates the use of national coding and transaction standards. HIPAA requires that the American Medical Association’s (AMA) Current Procedural Terminology (CPT) system be used to report professional services, including physician services. Correct use of CPT coding requires using the most specific code that matches the services provided, based on the code’s description. Providers must pay special attention to the standard CPT descriptions for the evaluation and management (E/M) services. The medical record must document the specific elements necessary to satisfy the criteria for the level of services as described in CPT. Reimbursement may be recouped when the medical record documents a different level of service from what is submitted on the claim. The level of service provided and documented must be medically necessary, based on the clinical situation and needs of the client.
To receive reimbursement, providers must document the following information in the client’s medical record:

- The service
- The date rendered
- Pertinent information about the client’s condition supporting the need for the service
- The care given

Physician services include those reasonable and medically necessary services ordered and performed by physicians or under physician supervision that are within the scope of practice of their profession as defined by state law.

8.2.1 Teaching Physician and Resident Physician

The roles of the teaching physician and resident physician occur in the context of an accredited graduate medical education (GME) training program.

The teaching physician is the Medicaid-enrolled physician who is professionally responsible for the particular services that were provided and are being submitted for reimbursement; the physician must be affiliated and in good standing with an accredited GME program and must possess all appropriate licensure.

Physician services must be performed personally by the teaching physician or by the person to whom the physician has delegated the responsibility. The level of supervision required may be direct or personal.

In all cases, the client’s medical record must clearly document that the teaching physician provided identifiable supervision of the resident. As defined below, the supervision must be direct or personal depending on the setting and the clinical circumstances:

- **Direct supervision** means that the teaching physician must be in the building of the office or facility when and where the service is provided.
- **Personal supervision** means that the teaching physician must be physically present in the room when and where the service is being provided.

The teaching physician must provide personal supervision during all medically complex situations, dangerous procedures, or major surgery. A service or procedure is complex or dangerous if deviation from the expected technique at the time the procedure or service is performed presents a medically reasonable and immediate risk to the patient’s life or health. This criterion applies regardless of the place of service.

The teaching physician must provide medically appropriate, identifiable direct supervision for all other services that do not require personal supervision.

The following prerequisites apply when the teaching physician submits claims for services performed, in whole or in part, by the resident physician in the inpatient hospital setting, the outpatient hospital setting, and surgical services and procedures.

8.2.1.1 Teaching Physician Prerequisites

Services provided in an outpatient setting.

For services provided in an outpatient setting, the teaching physician must demonstrate that personal supervision was provided. The following tasks must be performed and their completion must be documented in the patient’s medical record before the claims are submitted for consideration of reimbursement:

- Review the patient’s history and physical examination.
- Confirm or revise the patient’s diagnosis.
• Determine the course of treatment to be followed.

Exception: Exception for E/M services furnished in certain primary care centers. Teaching physicians that meet the primary care exception under Medicare are allowed to bill for low-level and mid-level E/M services for residents. Facilities that meet the primary care exception under Medicare may bill Texas Medicaid, Family Planning, or the Children with Special Health Care Needs (CSHCN) Services Program for new patient services (procedure codes 99201, 99202, and 99203) and established patient services (procedure codes 99211, 99212, and 99213).

Note: All services provided in an outpatient setting that do not qualify for the exception above require that the teaching physician examine the patient.

Services provided in an inpatient setting.
For services provided in an inpatient setting, the teaching physician must demonstrate that medically appropriate supervision was provided. The following tasks must be performed and their completion must be documented in the patient’s medical record before the claims are submitted for consideration of reimbursement. The documentation must be made in the same manner as required by federal regulations under Medicare:

• Review the patient’s history, review the resident’s physical examination, and examine the patient within a reasonable period of time after the patient’s admission and before the patient’s discharge.
• Confirm or revise the patient’s diagnosis.
• Determine the course of treatment to be followed.
• Document the teaching physician’s presence and participation in the major surgical or other complex and dangerous procedure or situation.

Surgical services and procedures.
The teaching surgeon is responsible for the patient’s preoperative, operative, and postoperative care. The teaching physician must demonstrate that medically appropriate supervision was provided. The following tasks must be performed and their completion must be documented in the patient’s medical record before the claims are submitted for consideration of reimbursement. The documentation must be made in the same manner as required by federal regulations under Medicare:

• Review the patient’s history, review the resident’s physical examination, and examine the patient within a reasonable period of time after the patient’s admission and before the patient’s discharge.
• Confirm or revise the patient’s diagnosis.
• Determine the course of treatment to be followed.
• Document the teaching physician’s presence and participation in the major surgical or other complex and dangerous procedure or situation.

Important: Reimbursement may be reduced, denied, or recouped if the prerequisites are not documented in the medical record. The documentation must be made in the same manner as required by federal regulations under Medicare.

8.2.2 Substitute Physician
Physicians may bill for the service of a substitute physician or locum tenens who sees clients in the billing physician’s practice under either an informal arrangement of less than 14 days or a formal renewable arrangement of up to 90 days.

The substitute physician is not required to enroll in Texas Medicaid. The billing provider’s name, address, and national provider identifier must appear in Block 33 of the claim form. The name and office or mailing address of the substitute physician must be documented on the claim in Block 19, not Block 33.
When a physician bills for a substitute physician, modifier Q5 or Q6 must follow the procedure code in Block 24D for services provided by the substitute physician. The Q5 modifier is used to indicate an informal reciprocal arrangement (period not to exceed 14 continuous days) and the Q6 modifier is used to indicate a formal renewable locum tenens or temporary arrangement (up to 90 days).

When physicians in a group practice bill substitute physician services, the performing provider identifier of the physician for whom the substitute provided services must be in Block 24J.

Physicians must familiarize themselves with these requirements and document accordingly. Those services not supported by the required documentation as detailed above will be subject to recoupment.

**8.2.3 Aerosol Treatment**

Procedure codes 94640, 94644, and 94645 for aerosol therapy are limited to the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>1363</td>
</tr>
<tr>
<td>486</td>
</tr>
<tr>
<td>4918</td>
</tr>
<tr>
<td>49320</td>
</tr>
<tr>
<td>4950</td>
</tr>
<tr>
<td>496</td>
</tr>
<tr>
<td>99739</td>
</tr>
</tbody>
</table>

Procedure codes J7605, J7608, J7622, J7626, J7631, J7633, J7639, J7644, and J7682 are limited to the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>0115</td>
</tr>
<tr>
<td>48812</td>
</tr>
<tr>
<td>49300</td>
</tr>
<tr>
<td>49382</td>
</tr>
<tr>
<td>4954</td>
</tr>
<tr>
<td>503</td>
</tr>
<tr>
<td>5071</td>
</tr>
</tbody>
</table>

Diagnoses not listed above may be considered with supporting documentation of medical necessity. Medications used in aerosol therapy, when billed by the provider, are reimbursed separately and must be billed using the appropriate Healthcare Common Procedure Coding System (HCPCS) procedure code. A separate charge for saline used in aerosol therapy is denied as part of the aerosol therapy.

**Refer to:** Subsection 8.2.54, “Pentamidine Aerosol,” in this handbook.

Subsection 8.2.34.2, “Vaccine and Toxoid Procedure Codes,” in this handbook for a list of diagnosis codes that are valid for the Bacillus Calmette-Guérin (BCG) vaccine.

**8.2.4 Allergy Services**

Texas Medicaid uses the following guidelines for reimbursement of allergy services.
8.2.4.1 **Allergy Immunotherapy**

Allergen immunotherapy consists of the parenteral administration of allergenic extracts as antigens at periodic intervals, usually on an increasing dosage scale to a dosage which is maintained as maintenance therapy.

Preparation of the allergy vial or extracts is a benefit of Texas Medicaid and should be submitted using the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes for Administration or Preparation of Allergy Vial or Extract</th>
</tr>
</thead>
<tbody>
<tr>
<td>95115</td>
</tr>
</tbody>
</table>

The preparation of the allergy vial or extract and the administration of an injection may be reimbursed for the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>37214</td>
</tr>
<tr>
<td>4770</td>
</tr>
<tr>
<td>49321</td>
</tr>
</tbody>
</table>

8.2.4.1.1 **Prior Authorization for Allergy Immunotherapy**

Authorization is not required for immunotherapy services within the limitations outlined below. Requests for services beyond the established limits may be prior authorized with documentation of medical necessity. Documentation must be submitted to the Special Medical Prior Authorization Department and include the following information:

- Copy of the allergen testing results
- Severity and periodicity of symptoms
- Physical limitations created by the symptoms
- Anticipated treatment program
- Concurrent drug treatment
- Success or failure of previous therapy

8.2.4.1.2 **Limitations of Allergy Immunotherapy**

The quantity billed for the allergy extract preparation procedure must represent the total number of doses to be administered from the vial. If the number of doses is not stated on the claim, a quantity of one is allowed.

Procedure code 95165 is limited to a total of 160 doses per one-year period, which begins the date the immunotherapy is initiated. Additional doses may be considered for reimbursement through prior authorization with documentation of medical necessity.

When an injection is given from a vial, providers should use an administration-only procedure code (95115 or 95117).

An office visit, clinic visit, or observation room visit is not considered for reimbursement in addition to the fee for the preparation or the administration of the allergy vial or extract unless the additional visit results in a non-allergy-related diagnosis or a re-evaluation of the client’s condition.
The following E/M procedure codes submitted with allergy testing or allergy immunotherapy are appropriate only if a significant, separately identifiable service is provided:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99201</td>
</tr>
</tbody>
</table>

Modifier 25 may be used to identify the significant, separately identifiable E/M service performed by the same physician on the same day as the allergy-related procedure or other service. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client’s medical record and made available to Texas Medicaid upon request.

The following procedure codes are denied when billed on the same day by the same provider as procedure codes 96360, 96365, 96372, 96374, 96375, and 96376:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>95115</td>
</tr>
</tbody>
</table>

Procedure code 95115 is denied when billed on the same day by any provider as procedure code 95117.

Procedure code 95145 is denied when billed on the same day by any provider as procedure codes 95146, 95147, 95148, and 95149.

Procedure code 95146 is denied when billed on the same day by any provider as procedure codes 95147, 95148, and 95149.

Procedure code 95147 is denied when billed on the same day by any provider as procedure codes 95148 and 95149.

Procedure code 95148 is denied when billed on the same day by any provider as procedure code 95149.

Allergen immunotherapy that is considered experimental, investigational, or unproven is not a benefit of Texas Medicaid.

Single dose vials (procedure code 95144) are not a benefit of Texas Medicaid.

8.2.4.2 Allergy Testing

Texas Medicaid benefits include allergy testing for clients with clinically significant allergic symptoms. Allergy testing is focused on determining the allergens that cause a particular reaction and the degree of the reaction. Allergy testing also provides justification for recommendations of particular medicines, of immunotherapy, or of specific avoidance measures in the environment.

An initial evaluation of a new patient is considered for reimbursement in addition to allergy testing on the same day.

Established patient visits are not considered for reimbursement in addition to allergy testing on the same day. The allergy testing is considered for reimbursement and the visit is denied as part of another procedure on the same day.

The following allergy tests are benefits of Texas Medicaid:

- **Percutaneous and intracutaneous skin test.** The skin test for IgE-mediated disease with allergenic extracts is used in the assessment of allergic clients. The test involves the introduction of small quantities of test allergens below the epidermis. Procedure codes 95004, 95010, 95015, 95024, 95027, and/or 95028 should be used to submit skin tests for consideration of reimbursement.

- **Patch or application tests.** Patch testing (procedure code 95044) is used for diagnosing contact allergic dermatitis.
• *Photo or photo patch skin test*. Procedure codes 95052 and 95056 may be used for photo or photo patch skin tests.

• *Ophthalmic mucous membrane or direct nasal mucous membrane tests*. Nasal or ophthalmic mucous membrane tests (procedure codes 95060 and 95065) are used for the diagnosis of either food or inhalant allergies and involve the direct administration of the allergen to the mucosa.

• *Inhalation bronchial challenge testing (not including necessary pulmonary function tests)*. Bronchial challenge testing with methacholine, histamine, or allergens (procedure codes 95070 and 95071) is used for defining asthma or airway hyperactivity when skin testing results are not consistent with the client’s medical history. Results of these tests are evaluated by objective measures of pulmonary function.

Procedure code 95199 may be used for an unlisted allergy or clinical immunologic service or procedure if there is not a specific procedure code that describes the service performed. Prior authorization is required for unlisted procedure codes. Every effort must be used to bill with the appropriate CPT code that describes the procedure being performed. If a code does not exist to describe the service performed, prior authorization may be requested using unlisted procedure code 95199 and must be submitted with documentation to assist in determining coverage. The documentation submitted must include all of the following:

• The client’s diagnosis

• Medical records indicating prior treatment for this diagnosis and the medical necessity of the requested procedure

• A clear, concise description of the procedure to be performed

• Reason for recommending this particular procedure

• A CPT or HCPCS procedure code that is comparable to the procedure being requested

• Documentation that this procedure is not investigational or experimental

• Place of service (POS) the procedure is to be performed

• The physician’s intended fee for this procedure

Prior authorization requests for PCCM clients must be submitted by the physician to the PCCM Outpatient Prior Authorization Department. All other requests for prior authorization must be submitted by the physician to the Special Medical Prior Authorization (SMPA) department.

The type and number of allergy tests performed must be indicated on the claim. When the number of tests is not specified, a quantity of one is allowed.

The following procedure codes are denied when billed on the same day by the same provider as procedure code 95027:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>95024 99201 99202 99203 99204 99205 99211 99212 99213 99214</td>
</tr>
<tr>

</table>
8.2.4.2.1 RAST/MAST Tests
Radioallergosorbent tests (RAST) and multiple antigen simultaneous tests (MAST) are benefits of Texas Medicaid. RAST testing is a radioimmunoassay of the blood serum used to detect specific allergens. MAST is a RAST type test using an enzyme rather than a radioactive marker. RAST/MAST testing is usually performed by an independent lab; however, there are physicians who have the capability of performing these tests in their offices. Physicians who submit RAST/MAST tests performed in the office setting must use modifier SU to be considered for reimbursement. Without the use of the SU modifier, RAST/MAST testing submitted with POS 1 (office) is denied with the message, “Lab performed outside of office must be billed by the performing facility.”

RAST/MAST tests must be submitted using procedure codes 86003 and 86005.

Procedure code 86003 should be submitted with a quantity of 1 and is limited to 12 per year, same provider.

Procedure code 86005 should be submitted with a quantity of 1 and is limited to four per year, same provider.

8.2.4.2.2 Collagen Skin Test
Collagen skin tests are a benefit of Texas Medicaid using procedure code Q3031. Collagen skin tests are administered to detect a hypersensitivity to bovine collagen. This skin test is given four weeks prior to any type of surgical procedure that utilizes collagen.

Collagen injections/implants are frequently used for cosmetic surgery, but are not a benefit of Texas Medicaid.

8.2.4.2.3 Prior Authorization for Collagen Skin Tests
Prior authorization is required for collagen skin test procedure code Q3031.

Surgeries performed on abnormal structures of the body are generally performed to improve function. Prior authorization may be requested for the treatment of abnormal structures of the body caused by:

- Congenital defects
- Developmental abnormalities
- Trauma, infection
- Tumors
- Disease

Prior authorization requests for Primary Care Case management (PCCM) clients must be submitted by the physician to the PCCM Outpatient Prior Authorization Department. All other requests for prior authorization must be submitted by the physician to the Special Medical Prior Authorization (SMPA) department with documentation supporting the medical necessity for the collagen skin test.

Documentation that supports medical necessity for the requested device, service, or supply must be submitted to the SMPA Department with the prior authorization request.

8.2.5 Ambulance Transport Services - Nonemergency
Nonemergency ambulance services require prior authorization in circumstances not involving an emergency. Facilities and other providers must request and obtain prior authorization before contacting the ambulance provider for nonemergency ambulance services.

Refer to: Form MD.6, “Nonemergency Ambulance Prior Authorization Request Form (2 Pages)” in this handbook.

8.2.6 Anesthesia

Anesthesia services are a benefit of Texas Medicaid with specific benefits and limitations to reimbursement.

Medicaid may reimburse anesthesiologists and certified registered nurse anesthetists (CRNAs) for administering anesthesia as defined within their individual scope of practice.

8.2.6.1 Medical Direction by an Anesthesiologist

Medical direction by an anesthesiologist of an anesthesia practitioner is a benefit of Texas Medicaid if the following criteria are met:

- No more than four anesthesia procedures are being performed concurrently.
- The anesthesiologist is physically present in the operating suite.

**Exception:** Anesthesiologists may be considered for reimbursement when they medically direct more than four anesthesia services or simultaneously supervise a combination of more than four CRNAs or other qualified professionals under emergency circumstances only.

Medical direction provided by an anesthesiologist is a benefit of Texas Medicaid if the following criteria are met:

- The anesthesiologist performs a preanesthetic examination and evaluation.
- The anesthesiologist prescribes the anesthesia plan.
- The anesthesiologist personally participates in the critical portions of the anesthesia plan, including induction and emergence.
- The anesthesiologist ensures that a qualified professional can perform the procedures in the anesthesia plan that the anesthesiologist does not perform personally.
- The anesthesiologist monitors the course of anesthesia administration at intervals.
- The anesthesiologist provides direct supervision when medically directing an anesthesia procedure. Direct supervision means the anesthesiologist must be immediately available to furnish assistance and direction.
- The anesthesiologist provides postanesthesia care.

The anesthesiologist does not perform any other services (except as noted below) during the same time period. The anesthesiologist who directs the administration of no more than four anesthesia procedures may provide the following without affecting the eligibility of the medical direction services:

- Address an emergency of short duration in the immediate area
- Administer an epidural or caudal anesthetic to ease labor pain
- Provide periodic, rather than continuous, monitoring of an obstetrical patient
- Receive clients entering the operating suite for the next surgery
- Check or discharge clients in the recovery room
- Handle scheduling matters

As noted above, an anesthesiologist may concurrently medically direct up to four anesthesia procedures. Concurrency is defined as the maximum number of procedures that the anesthesiologist is medically directing within the context of a single procedure and whether those other procedures overlap each other. Concurrency is not dependent on each of the cases involving a Medicaid client. For example, if three procedures are medically directed but only two involve Medicaid clients, the Medicaid claims must be billed as concurrent medical direction of three procedures.
For medical direction, the anesthesiologist must document in the client’s medical record that he or she did the following:

- Performed the pre-anesthetic exam and evaluation.
- Provided indicated post-anesthesia care.
- Was present during the critical and key portions of the anesthesia procedure, including, if applicable, induction and emergence.
- Was present during the anesthesia procedure to monitor the client’s status.

The following information must be available to state agencies upon request and is subject to retrospective review:

- The name of each CRNA or other qualified professional that was concurrently medically directed or supervised and a description of the procedure that was performed must be documented and maintained.
- Signatures of the anesthesiologist, CRNAs, or other qualified professionals involved in administering anesthesia services must be documented in the client’s medical record.

**8.2.6.2 Anesthesia for Sterilization**

Section 5, “Federally Qualified Health Center (FQHC)” in Outpatient Services Handbook (Vol. 2, Provider Handbooks) for more information about FQHCs and billing the annual family planning examination for Title XIX clients.

**8.2.6.3 Anesthesia for Labor and Delivery**

Providers must bill the most appropriate procedure code for the service provided. Other time-based procedure codes cannot be submitted if either 01960 or 01967 is the most appropriate procedure code.

The following procedure codes must be used for obstetrical anesthesia:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>01960</td>
</tr>
</tbody>
</table>

Procedure codes 01960 and 01967 are limited to once every 210 days when billed by any provider and are reimbursed a flat fee. The time reported must be in minutes and must represent the total minutes between the start and stop times for these procedures, regardless of the time actually spent with the client. Providers are not required to report actual face-to-face minutes with the client for these procedure codes. Providers should refer to the definition of time in the CPT manual in the “Anesthesia Guidelines—Time Reporting” section.

Procedure code 01968 or 01969 may be considered for reimbursement when submitted with procedure code 01967. For a Cesarean delivery following a planned vaginal delivery, the anesthesia administered during labor must be billed with procedure code 01967 and must indicate the time in minutes that represents the time between the start and stop times for the procedure. The additional anesthesia services administered during the operative session for a Cesarean delivery must be submitted using procedure
code 01968 or 01969 and must indicate the time spent administering the epidural and the actual face-to-face time spent with the client. The insertion and injection of the epidural are not considered separately for reimbursement.

All time must be documented in block 24D of the claim form or the appropriate field of the chosen electronic format.

For continuous epidural analgesia procedure codes (other than procedure codes 01960 and 01967), Texas Medicaid reimburses providers for the time when the physician is physically present and monitors the continuous epidural. Reimbursable time refers to the period between the catheter insertion and when the delivery commences.

Procedure code 99140 is not considered for reimbursement when submitted with diagnosis code 650, 66970, or 66971 if one of these diagnoses is documented on the claim as the referenced diagnosis. The referenced diagnosis must indicate the complicating condition.

Procedure codes 62311 and 62319 are denied as part of another procedure if billed on the same date of service by the same provider as procedure codes 01960, 01961, 01963, 01967, 01968, or 01969.

Texas Medicaid reimburses the epidural anesthesia services and the delivery at full allowance when they are provided by the delivering obstetrician.

8.2.6.4 Anesthesia Provided by the Surgeon (Other Than Labor and Delivery)

Local, regional, or general anesthesia provided by the operating surgeon is not reimbursed separately from the surgery. A surgeon billing for a surgery will not be reimbursed for the anesthesia when billing for the surgery, even when using the CPT modifier 47. The anesthesia service is included in the global surgical fee.

8.2.6.5 Complicated Anesthesia

The following procedure codes are payable in addition to an anesthesia procedure or service: 99100, 99116, 99135, and 99140. Documentation supporting the medical necessity for use of the procedure codes may be subject to retrospective review.

Procedure code 99140 is not reimbursed for diagnosis codes 650, Normal delivery, or 66970, Cesarean delivery without mention of indication, when one of these diagnoses is documented as the referenced diagnosis on the claim. The referenced diagnosis must indicate the complicating condition. An emergency is defined as existing when delay in treatment of the client would lead to a significant increase in the threat to life or body part.

8.2.6.6 Multiple Procedures

When billing for anesthesia and other services on the same claim, the anesthesia charge must appear in the first detail line for correct reimbursement. Any other services billed on the same day must be billed as subsequent line items.

When billing for multiple anesthesia services performed on the same day or during the same operative session, use the procedure code with the higher RVU. For accurate reimbursement, apply the total minutes and dollars for all anesthesia services rendered on the higher RVU code. Multiple services reimbursement guidelines apply.

8.2.6.7 Monitored Anesthesia Care

Monitored anesthesia care may include any of the following:

- Intraoperative monitoring by an anesthesiologist or qualified professional under the medical direction of an anesthesiologist
- Monitoring of the client’s vital physiological signs in anticipation of the need for general anesthesia
- Monitoring of the client’s development of an adverse physiological reaction to a surgical procedure
Anesthesiologists or CRNAs may use modifier QS to report monitored anesthesia care.

The QS modifier is an informational modifier.

**8.2.6.8 Reimbursement Methodology**

There are two types of reimbursement for anesthesia procedure codes.

- **Flat fee**
- **Time-based fees**, which require documentation of the exact amount of face-to-face time with the client

The anesthesiologist’s reimbursement for medical direction of CRNAs and non-CRNA qualified professionals is 100 percent of the maximum allowable fee.

If multiple CRNAs or anesthesiologists are providing anesthesia services for a client, only one CRNA and one anesthesiologist may be reimbursed.

Both the flat-fee and time-based-fee procedure codes must be submitted with modifiers and are subject to medical direction/supervision reimbursement adjustments.

**Flat Fees**

Both OB related anesthesia procedure codes 01960 and 01967 are considered for reimbursement with a flat-fee rate.

- Flat fees are subject to medically-directed modifier combination adjustments based on the modifier submitted with the anesthesia procedure code.
- The time-based add-on procedure code 01968 must be billed in addition to the flat fee when anesthesia for Cesarean delivery following neuraxial labor analgesia/anesthesia has occurred.

For flat-fee anesthesiology codes, anesthesia time begins when the anesthesia practitioner begins to prepare the client for the induction of anesthesia in the operating room or the equivalent area and ends when the anesthesia practitioner is no longer in personal attendance, that is, when the client may be safely placed under postoperative supervision.

**Time-Based Fees**

For time-based anesthesiology procedure codes, anesthesia time is the time during which an anesthesia practitioner is present with the client. Anesthesia time begins when the anesthesia practitioner begins to prepare the client for the induction of anesthesia in the operating room or the equivalent area and ends when the anesthesia practitioner is no longer in personal attendance (e.g., when the client may be safely placed under postoperative supervision).

For time-based anesthesiology codes, anesthesia practitioners must document interruptions in anesthesia time in the client’s medical record.

The documented time must be the same in the records or claims of the anesthesiologist and other anesthesia practitioners who were medically directed by the anesthesiologist.

One time unit is equal to 15 minutes of anesthesia. Providers must submit the total anesthesia time in minutes on the claim. The claims administrator will convert total minutes to time units.
Reimbursement of time-based anesthesia services is derived by adding the RVUs (e.g., base units) for the procedures performed (when multiple procedures are performed use the procedure with the highest RVUs) to the total face-to-face anesthesia time in minutes divided by 15 minutes, multiplied by the appropriate conversion factor, and then by the appropriate modifier combination adjustment:

\[ \text{RVUs} + \left( \frac{\text{Minutes}}{15} \right) \times \text{Conversion Factor} \times \text{Modifier Combination Adjustment} = \text{Anesthesia Reimbursement} \]

<table>
<thead>
<tr>
<th>Provider Type Description - Physician Pricing Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>Time: 120 minutes [= \frac{120}{15} = 8 \text{ (quantity billed)} ]</td>
</tr>
<tr>
<td>Procedure code: 00851 [= (6 \text{ RVUs}) \times 6.00 + 8 = 14.00 ]</td>
</tr>
<tr>
<td>Conversion factor: $19.58 [= 14.00 \times 19.58 = $274.12 \text{ (physician reimbursement)} ]</td>
</tr>
</tbody>
</table>

**Conversion Factor**

A conversion factor is the multiplier that transforms relative values into payment amounts. There is a standard conversion factor for anesthesia services.

### 8.2.6.9 Anesthesia Modifiers

Each anesthesia procedure code must be submitted with the appropriate anesthesia modifier combination whether billing as the sole provider or for the medical direction of CRNAs or other qualified professionals.

When an anesthesia service is billed without the appropriate reimbursement modifiers or is billed with modifier combinations other than those listed below in the Modifier Combinations section, the claim will be denied.

A procedure billed with a modifier indicating that the anesthesia was personally performed by an anesthesiologist (modifier AA) will be denied if another claim has been paid indicating the service was personally performed by, and reimbursed to, a CRNA (modifier QZ) for the same client, date of service, and procedure code. The opposite is also true—a CRNA-administered procedure will be denied if a previous claim was paid to an anesthesiologist for the same client, date of service, and procedure code. Denied claims may be appealed with supporting documentation of any unusual circumstances.

#### 8.2.6.9.1 State-Defined Modifiers

Modifiers U1 (indicating one Medicaid claim) and U2 (indicating two Medicaid claims, one by the supervising anesthesiologist and one by the CRNA) are state-defined modifiers that must be billed by an anesthesiologist or CRNA.

Modifier U1, indicating that only one Medicaid claim will be submitted, cannot be billed by two providers for the same procedure, client, and date of service. Modifier U2, indicating that two Medicaid claims will be submitted, can only be billed by two providers for the same procedure, client, and date of service if one of the providers was medically directed by the other. Denied claims may be appealed with supporting documentation of any unusual circumstances.

Anesthesia providers must submit the U1 or U2 modifier with an appropriate pricing modifier when billing for anesthesia procedure codes.

#### 8.2.6.9.2 Modifier Combinations

Modifiers AA and U1 must be submitted when an anesthesiologist has personally performed the anesthesia service.
Anesthesiologists may be reimbursed for medical direction of anesthesia practitioners by using one of the following modifier combinations:

<table>
<thead>
<tr>
<th>Modifier Combination Submitted by Anesthesiologist</th>
<th>When is it used?</th>
<th>Who will submit claims?</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Anesthesiologist Directing Non-CRNA Qualified Professionals</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>QY and U1</td>
<td>When directing one procedure provided by a non-CRNA qualified professional.</td>
<td>Only the anesthesiologist</td>
</tr>
<tr>
<td>QK and U1</td>
<td>When directing two, three, or four concurrent procedures provided by non-CRNA qualified professionals.</td>
<td>Only the anesthesiologist</td>
</tr>
<tr>
<td>AD and U1 (Emergency circumstances only)</td>
<td>When directing five or more concurrent procedures provided by non-CRNA qualified professionals. Used in emergency circumstances only and limited to 6 units (90 minutes) per case for each occurrence requiring five or more concurrent procedures.</td>
<td>Only the anesthesiologist</td>
</tr>
<tr>
<td><strong>Anesthesiologist Directing CRNAs</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>QY and U2</td>
<td>When directing one procedure provided by a CRNA.</td>
<td>Both the anesthesiologist and CRNA</td>
</tr>
<tr>
<td>QK and U2</td>
<td>When directing two, three, or four concurrent procedures involving CRNA(s).</td>
<td>Both the anesthesiologist and CRNA</td>
</tr>
<tr>
<td>AD and U2 (Emergency circumstances only)</td>
<td>When directing five or more concurrent procedures involving CRNA(s). Used in emergency circumstances only and limited to 6 units (90 minutes) per case for each occurrence requiring five or more concurrent procedures.</td>
<td>Both the anesthesiologist and CRNA</td>
</tr>
</tbody>
</table>

**8.2.6.9.3 CRNA Services**

Modifiers QZ and U1 must be submitted when a CRNA has personally performed the anesthesia services, is not medically directed by the anesthesiologist, and is directed by the surgeon.

Modifiers QX and U2 must be submitted by a CRNA who provided services under the medical direction of an anesthesiologist.

**8.2.6.10 Prior Authorization for Anesthesia**

**Anesthesia for Medical Services**

Anesthesia services provided in combination with most medical surgical procedures do not require prior authorization. However, some medical surgical procedures may require prior authorization. Anesthesia may be reimbursed if prior authorization for the surgical procedure was not obtained, but services provided by the facility, surgeon, and assistant surgeon will be denied.
8.2.6.11 Claims Filing

Texas Medicaid reimburses anesthesiologists based on the Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982. Anesthesiologists must identify the following information on their claims:

- Procedure performed (CPT anesthesia code in Block 24 of the CMS-1500 paper claim form).
- Person (physician or CRNA) administering anesthesia (modifiers must be used to designate this provider type).
- Time in minutes.
- Any other appropriate modifier (refer to subsection 6.3.5, “Modifiers” in Section 6, “Claims Filing” (Vol. 1, General Information) for a list of the most common modifiers).

8.2.6.12 Anesthesia (General) for THSteps Dental

Refer to: Section 4, “Texas Health Steps (THSteps) Dental” in the Children’s Services Handbook (Vol. 2, Provider Handbooks) for additional information.

8.2.7 Abdominal Aortic Aneurysm Screening

Procedure code G0389 is a benefit for male clients who are 65 through 75 years of age with diagnosis codes V700 or V1582.

Procedure code G0389 is limited to once per lifetime any provider.

8.2.8 Bariatric Surgery

Bariatric surgery is considered medically necessary when used as a means to treat covered medical conditions that are caused or significantly worsened by the client’s obesity in cases where those comorbid conditions cannot be adequately treated by standard measures unless significant weight reduction takes place. The pathophysiology of the covered comorbid conditions must be sufficiently severe that the expected benefits of weight loss subsequent to this surgery significantly outweigh the risks associated with bariatric surgery.

The following procedure codes may be reimbursed for medically necessary bariatric surgery services with prior authorization: 43644, 43645, 43659, 43770, 43771, 43772, 43773, 43774, 43842, 43843, 43845, 43846, 43847, 43848, 43886, 43887, and 43888.

Bariatric surgery is not a benefit when the primary purpose of the surgery is any of the following:

- For weight loss for its own sake
- For cosmetic purposes
- For reasons of psychological dissatisfaction with personal body image
- For the client’s or provider’s convenience or preference

8.2.8.1 Prior Authorization for Bariatric Surgery

All clients must meet the criteria outlined below.

The same contraindications exist for bariatric surgery as for any other elective abdominal surgery. Documentation provided for prior authorization must attest that none of the following additional contraindications exist:

- Endocrine cause for obesity, inflammatory bowel disease, chronic pancreatitis, cirrhosis, portal hypertension, or abnormalities of the gastrointestinal tract
- Chronic, long-term steroid treatment
- Pregnant, or plans to become pregnant within 18 months
- Noncompliance with medical treatment
• Significant psychological disorders that would be exacerbated or interfere with the long-term management of the client after the operation

• Active malignancy

**Note:** Clients with known serious mental illness must be assessed prior to surgery to ascertain that their illness is not a contraindication to surgery. Clients must be referred for appropriate professional evaluation any time the presence of serious mental illness is suspected.

Bariatric surgery may be prior authorized when the client meets all of the following criteria:

• The client is a female at least 13 years of age and menstruating, or a male at least 15 years of age, who has reached a Tanner stage IV plus 95 percent of adult height based on bone age.

• Clients who are birth through 20 years of age must have a body mass index (BMI) of greater than or equal to 40 kg/m2.

• Clients who are 21 years of age and older must have a BMI of greater than or equal to 35 kg/m2.

• The client, regardless of age, has at least one major or two lesser comorbid conditions as follows:
  
  • Major comorbid conditions include:
    • Obesity-associated hypoventilation
    • Obstructive sleep apnea
    • Congestive heart failure
    • Uncontrolled malignant hypertension resistant to pharmacotherapy
    • Pseudotumor cerebri
  
  • Lesser comorbid conditions include:
    • Adult onset (Type II) diabetes (with or without complications)
    • Cardiovascular or peripheral vascular disease
    • Increased blood lipid levels resistant to pharmacotherapy
    • Recurrent or chronic skin ulcerations with infection
    • Pulmonary hypertension
    • Accelerated weight-bearing joint disease
    • Gastroesophageal reflux disease with aspiration

Documentation submitted for prior authorization must include all of the following:

• Summary of treatment provided for the client’s co-morbid conditions.

• Description of how the client’s response to standard treatment measures is unsatisfactory.

• Description of why the bariatric surgery is medically necessary in the context of current treatment and the medically reasonable alternatives that are available.

• The name of the facility in Texas in which the procedure will be performed. (The facility must be recognized as a Bariatric Surgery Center of Excellence® [BSCOE] by CMS as certified by the American Society for Metabolic and Bariatric Surgery, or must be accredited as a Level 1 bariatric surgery center as designated by the American College of Surgeons, or must be a children’s hospital with an Adolescent Bariatric Surgery Program.)

• Documentation that the client has demonstrated compliance with medical treatment. (The client must also have demonstrated at least 6 months of compliance with a physician-directed, nonsurgical weight-loss program within 12 months of the request date.)
• Documentation of the following:
  • The client is psychologically mature and able to cope with the postsurgical changes.
  • The client and the parent/guardian (as applicable) understand and will support the changes in eating habits that must accompany the surgery and the extensive postoperative follow-up.
  • Adequate preoperative nutritional and psychological services.
  • How the client will receive postoperative surgical, nutritional, and psychological services.

Repeat bariatric surgery may be considered medically necessary in either of the following circumstances:
  • To correct complications from bariatric surgery such as band malfunction, obstruction, or stricture.
  • To convert to a Roux-en-Y gastroenterostomy or to correct pouch failure in an otherwise compliant client when the initial bariatric surgery met medical necessity criteria.

Note: Conversion to a Roux-en-Y gastroenterostomy may be considered medically necessary for clients who have not had adequate success (defined as a loss of more than 50 percent of excess body weight) two years following the primary bariatric surgery procedure, and the client has been compliant with a prescribed nutrition and exercise program following the procedure.

Providers may fax or mail prior authorization requests for bariatric surgery services for clients who are 20 years of age and younger to the TMHP Comprehensive Care Program (CCP) Department. Prior authorization requests for clients who are 21 years of age and older may be faxed or mailed to the TMHP Special Medical Prior Authorization Department.

Clients may be eligible under Texas Medicaid or CCP for separate reimbursement for nutritional and psychological assessment and counseling associated with bariatric surgery.

Behavioral health services provided as part of the preoperative or postoperative phase of bariatric surgery are subject to behavioral health guidelines, and are not considered part of the bariatric surgery.

Procedure code 43644 will be denied when billed by the same provider with the same date of service as procedure code 43645 or 43846.

Procedure code 43848 will be denied when billed by the same provider with the same date of service as procedure codes 43770, 43771, 43772, 43773, 43774, 43842, 43843, 43846, or 43847.

Procedure code 43772 will be denied when billed by the same provider with the same date of service as procedure code 43773 or 43774.

Procedure code 43888 will be denied when billed by the same provider with the same date of service as procedure code 43774.

Procedure code 43645 will be denied when billed by the same provider with the same date of service as procedure code 43847.

Procedure code 43846 will be denied when billed by the same provider with the same date of service as procedure code 43847.

Procedure code 43887 will be denied when billed by the same provider with the same date of service as procedure code 43888.
The following procedure codes will be denied if billed on the same date of service by the same provider as procedure code 43845:

<table>
<thead>
<tr>

8.2.9 Bacillus Calmette-Guérin (BCG) Intravesical for Treatment of Bladder Cancer

Live BCG for intravesical (procedure code 90586) or transvesical (procedure code J9031) are benefits of Texas Medicaid for the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
<th>1880</th>
<th>1881</th>
<th>1882</th>
<th>1883</th>
<th>1884</th>

Procedure code 90585 is a benefit of Texas Medicaid for diagnosis code V032. Authorization is not required for the BCG vaccine.

Bladder instillation of anticarcinogenic agent (procedure code 51720) may be reimbursed separately when billed with BCG instillation (procedure code 90586 or J9031).

8.2.10 Behavioral Health Services

8.2.11 Biopsy

A biopsy refers to the surgical excision of tissue for pathological examination.

If a surgeon bills separate charges for a surgical procedure and a biopsy on the same organ or structure on the same day, the charges are reviewed and reimbursed only for the service with the higher of the allowed amounts.

8.2.12 Blepharoaplasty Procedures

Procedure codes 67901, 67902, 67903, 67904, 67906, 67908, and 67909 are payable for clients who are 20 years of age and younger without prior authorization when performed for one of the following diagnosis codes: 74361, 74362, or 7439.

Procedure codes 67901, 67902, 67903, 67904, 67906, and 67908 do not require prior authorization for clients who are 21 years of age and older when billed for the following diagnosis codes: 37431, 37432, 37433, and 37434.
Blepharoplasty and eyelid repair for clients who are 21 years of age and older require mandatory prior authorization. The following information from the physician is required at the time of the request for blepharoplasty or eyelid repair for procedure codes 15820, 15821, 67901, 67902, 67903, 67904, 67906, 67908, 67909, 67911, 67961, 67966, 67971, 67973, 67974, and 67975:

- A brief history and physical evaluation
- Photographs of the eyelid problem
- Visual field measurements
- ICD-9-CM diagnosis(es)

The following blepharoplasty procedures do not require prior authorization: 67916, 67917, 67923, and 67924.

All supporting documentation must be included with the request for authorization. Send requests and documentation to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax: 1-512-514-4213

8.2.13 BRCA Testing

Gene mutation analyses (procedure codes S3820, S3822, and S3823) are benefits of Texas Medicaid for clients who are 18 years of age and older.

Breast cancer type 1, early onset (BRCA1) and breast cancer type 2, susceptibility protein (BRCA2) are tumor repressor genes responsible for keeping breast cells from growing too rapidly or in an uncontrolled way. Mutations within the gene interrupt this regulatory function and increase the risk of breast cancer.

Note: Guidelines for BRCA mutation testing are based on guidelines established by the U.S. Preventative Services Task Force.

Interpretation of gene mutation analysis results is not separately reimbursable. Interpretation is part of the physician E/M service.

The following procedure codes which describe the three basic steps for testing for a BRCA mutation are not considered for reimbursement when submitted with a breast cancer diagnosis code (1740, 1741, 1742, 1743, 1744, 1745, 1746, 1748, 1749, 1750, 1759, 1982, 19881, and 2330):

- B-hexasominidase (procedure code 83080)
- Isolation and separation of DNA (procedure codes 83890, 83891, 83892, 83893, 83894, 83896, and 83897)
- Molecular diagnostics (procedure codes 83898, 83900, 83901, 83902, 83907, 83908, 83909, and 83912)
- Mutation scanning or identification (procedure codes 83903, 83904, 83905, and 83906)

Claims filed using these procedure codes with a diagnosis of breast cancer may be reviewed on appeal. BRCA1 and BRCA2 analyses (procedure codes S3820, S3822, and S3823) are limited to once per lifetime. Additional services may be considered on appeal.
8.2.13.1 Prior Authorization for Gene Mutation Analysis

Prior authorization is required for gene mutation analysis (procedure codes S3820, S3822, and S3823). The prior authorization request must include documentation that meets one or more of the criteria below:

- A woman who is 18 years of age or older, has no personal history of breast cancer or epithelial ovarian cancer, and has one of the following:
  - Two first-degree or second-degree relatives with epithelial ovarian or breast cancer who were 50 years of age and younger when they were diagnosed with breast cancer, or were any age when they were diagnosed with epithelial ovarian cancer
  - A combination of three or more first- or second-degree relatives with breast or epithelial ovarian cancer, regardless of age at diagnosis
  - One or more first- or second-degree relatives with epithelial ovarian cancer and one or more first- or second-degree relatives with breast cancer at any age
  - A male relative with a history of breast cancer
  - One or more first- or second-degree relatives with:
    - Epithelial ovarian cancer and one or more first- or second-degree relatives with breast cancer at any age
    - Multiple primary or bilateral breast cancers in a single individual and another first- or second-degree relative diagnosed with breast cancer at 50 years of age or younger
    - Multiple primary or bilateral breast cancers in a single individual and another first- or second-degree relative with epithelial ovarian cancer
    - Both breast and ovarian cancer at any age
    - Breast cancer or epithelial ovarian cancer at any age and are at increased risk for specific mutations due to ethnic background (for example, Ashkenazi Jewish descent)
    - One or more relatives with a BRCA1 or BRCA2 mutation
  - A woman of any age who has a personal history of breast cancer (including a diagnosis of carcinoma in situ [DCIS]), and any of the following:
    - Breast cancer that was diagnosed at 50 years of age or younger, with or without family history
    - Breast cancer is diagnosed at any age, with one of the following:
      - A personal history of epithelial ovarian cancer
      - At least two relatives with breast cancer and/or epithelial ovarian cancer at any age
      - Two primary breast cancers in a single individual with at least one relative who was diagnosed with breast cancer at 50 years of age or younger
      - Two primary breast cancers in a single individual with at least one relative with epithelial ovarian cancer
      - Male relative with breast cancer
      - At least one relative who has a BRCA1 or BRCA2 mutation
      - Ashkenazi Jewish descent, or other ethnic descent associated with deleterious mutations (for example, populations of Icelandic, Swedish, Hungarian or other), with or without family history
  - A woman of any age who has a personal history of epithelial ovarian cancer (includes fallopian tube cancer and primary peritoneal carcinoma)
  - A man of any age who has a personal history of breast cancer and one of the following:
    - At least one male relative with breast cancer
- At least one female relative with breast cancer or epithelial ovarian cancer
- At least one relative who has a BRCA1 or BRCA2 mutation
- Ashkenazi Jewish descent (no additional family history is required)

**Note:** The term “relative” means close blood relatives including first-degree male or female relatives (e.g., parents, siblings, children), second-degree relatives (e.g., aunts, uncles, grandparents, nieces, nephews), and third-degree relatives (e.g., first cousin, great grandparent), all of whom are on the same side of the family as the client.

A written authorization request, signed and dated by the referring provider, must be submitted. All signatures must be current, unaltered, original and handwritten. Computerized or stamped signatures are not accepted. The original signature copy must be kept in the provider’s medical record for the client.

To complete the prior authorization process, the provider must mail or fax the request to the TMHP Special Medical Prior Authorization Unit and include documentation of medical necessity.

The medical record must include documentation of formal pretest counseling, including an assessment of the client’s ability to understand the risks and limitations of the test and the client’s informed choice to proceed with testing for the BRCA1 and BRCA2 mutations. The medical record is subject to retrospective review.

The medical record documentation that is submitted by the provider must establish the client’s diagnosis or family history. Requisition forms from the laboratory are not sufficient for the establishment of a client’s personal and family history.

To facilitate a determination of medical necessity and avoid unnecessary denials, the provider must provide correct and complete information, including accurate medical necessity of the services requested.

**8.2.13.2 Retroactive Authorization**

A request for retroactive authorization must be submitted no later than seven calendar days beginning the day after the lab draw is performed.

**8.2.13.3 Mammography (Screening and Diagnostic Studies of the Breast)**

The following breast imaging studies are benefits of Texas Medicaid:

- Screening mammogram
- Diagnostic mammogram
- Diagnostic breast mammogram

A screening mammogram may be billed using procedure code 77057 or G0202. Procedure code 77057 will be denied when billed if it is submitted for the same date of service as procedure code G0202 by any provider.

**Note:** The American Cancer Society recommends annual screening mammography for women beginning at 40 years of age.

A diagnostic mammogram may be billed using procedure code 77055, 77056, G0204, or G0206.

Procedure code 77055 will be denied if it is submitted for the same date of service as procedure code 77056, G0204, or G0206 by any provider.

Procedure code 77056 will be denied if it is submitted for the same date of service as procedure code G0204 by any provider.

Procedure code G0206 will be denied if it is submitted for the same date of service as procedure code 77056 or G0204 by any provider.
Screening mammograms may be reimbursed for the same date of service as a diagnostic mammogram if the diagnostic mammography procedure codes are submitted with a GG modifier.

A mammogram may be indicated for a male client based on medical necessity due to existing signs and symptoms. In such rare circumstances, procedure codes 77055, 77056, G0204, and G0206 may be considered for reimbursement.

Other breast diagnostic radiology procedures may be medically necessary based on existing signs and symptoms. When indicated, such procedures may be considered for reimbursement using procedure code 76098, 77031, 77032, 77053, or 77054. Procedure code 77053 will be denied if it is submitted for the same date of service as procedure code 77054 by any provider. Procedure code 76098 may be reimbursed for both male and female clients.

Computer-aided detection (CAD) procedure codes 77051 and 77052 may be reimbursed in addition to screening and diagnostic mammography.

Procedure code 77051 is an add-on code and must be submitted with the primary procedure code to be considered for reimbursement. Procedure code 77051 must be submitted for reimbursement with procedure code 77055, 77056, G0204, or G0206. Procedure code 77052 must be submitted for reimbursement with procedure code 77057 or G0202.

Breast ultrasound may be considered for reimbursement using procedure code 76645.

Authorization is not required for these services.

The prescribing physician must maintain documentation of medical necessity in the client’s medical record. The radiologist or interpreting physician at the testing facility may determine and document that, because of the abnormal result of the diagnostic test performed, additional studies are medically necessary. The radiologist or interpreting physician ordering the additional studies must provide documentation to the prescribing physician.

8.2.13.4 Prognostic Breast and Gynecological Cancer Studies

Prognostic breast and gynecological cancer studies are benefits of Texas Medicaid when ordered by a physician for the purpose of determining the best course of treatment for a patient with breast/gynecological cancers.

Prognostic breast and gynecological cancer studies are divided into two categories: Receptor assays and Her-2/neu.

- Receptor Assays (procedure codes 84233 and 84234) - The estrogen receptor assay (ERA) and the progesterone receptor assay (PRA) are tests in which a tissue sample is exposed to radioactively tagged estrogen or progesterone. The presence of these receptors can have prognostic significance in breast and endometrial cancer.

- Her-2/neu (procedure codes 83890, 88237, 88239, 88271, 88274, 88291, 88342, 88360, 88361, and 88365) - Human epidermal growth factor receptor 2 (Her-2/neu) is responsible for the production of a protein that signals cell growth. The overexpression of Her-2/neu in breast cancer is associated with decreased overall survival and response to some therapies. Each procedure used in the analysis should be coded separately.

Reimbursement for receptor assays (procedure codes 84233, 84234, 88360, and 88361) are limited to claims with a diagnosis of breast or uterine cancer as listed in the following table.

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>1740 1741 1742 1743 1744 1745 1746 1748 1749 1750</td>
</tr>
<tr>
<td>1759 1820 1821 1828 1982 19881 2330</td>
</tr>
</tbody>
</table>

Receptor testing for other diagnoses will be denied.
Interpretation of receptor assays, and Her-2/neu results is not considered separately for reimbursement. Interpretation is part of the physician’s E/M service.

Gene mutation analyses (procedure codes S3820, S3822, and S3823) are not considered for reimbursement when submitted with the same date of service as the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>83080</td>
</tr>
<tr>
<td>83901</td>
</tr>
</tbody>
</table>

Claims filed using the gene mutation analysis procedure codes may be considered upon appeal.

### 8.2.13.5 Colorectal Cancer Screening

Fecal occult blood tests, barium enemas, screening colonoscopies, and sigmoidoscopies are benefits of Texas Medicaid. Screening refers to the testing of asymptomatic persons in order to assess their risk for the development of colorectal cancer. Screening has been shown to decrease mortality due to this cancer by detecting cancers at earlier stages and allowing the removal of adenomas, thus preventing the subsequent development of cancer.

The American Cancer Society (ACS) and U.S. Preventive Services Task Force (USPSTF) both recommend screening people at average risk for colorectal cancer beginning at 50 years of age by any of the following methods:

- A fecal occult blood test (FOBT)* or fecal immunochemical test (FIT) every year
- Flexible sigmoidoscopy every five years
- A FOBT* or FIT every year plus flexible sigmoidoscopy every five years, or (of these three options, the combination of FOBT or FIT every year plus flexible sigmoidoscopy every five years is preferable)
- Double-contrast barium enema every five years
- Colonoscopy every ten years

*For FOBT, the take-home multiple sample method should be used.

The ACS and USPSTF recommends screening for people at high-risk for colorectal cancer once every two years.

Indications/characteristics of a high-risk individual:

- A close relative (sibling, parent or child) has had colorectal cancer or an adenomatous polyp.
- There is a family history of familial adenomatous polyposis.
- There is a family history of hereditary nonpolyposis colorectal cancer.
- There is a personal history of adenomatous polyps.
- There is a personal history of colorectal cancer.
- There is a personal history of colonic polyps.
- There is a personal history of inflammatory bowel disease, including Crohn’s disease and ulcerative colitis.

Colorectal screening services are considered for reimbursement when submitted using procedure codes G0104, G0105, G0106, G0120, G0121, G0122, and G0328 by associated risk category based on the ACS and USPSTF frequency recommendations. Reimbursement for these procedure codes is considered when medical necessity is documented in the client’s record.
Fecal Occult Blood Tests
Procedure code G0328 may be reimbursed once per year for clients who are 50 years of age and older.

Barium Enemas
Procedure code G0122 is considered for reimbursement once every five years for clients who are 50 years of age and older.

Sigmoidoscopies
Procedure codes G0104 and G0106 are considered for reimbursement once every five years when submitted with diagnosis codes V1272, V7650, V7651, V7652, or V700, as recommended by the ACS and USPSTF. Diagnosis code V700 may be used for screening if no other diagnosis is appropriate for the service rendered, but not more frequently than recommended by the USPSTF.

A screening barium enema may be substituted for a screening flexible sigmoidoscopy if the effectiveness has been established by the physician for substitution. Procedure code G0106 may be used as an alternative to procedure code G0104 respectively.

If during the course of screening flexible sigmoidoscopy, a lesion or growth is detected that results in a biopsy or removal of the growth, the appropriate diagnostic procedure classified as a flexible sigmoidoscopy with biopsy or removal must be reported rather than procedure code G0104 or G0106.

Colonoscopies: Average Risk
Procedure code G0121 is considered for reimbursement once every ten years when submitted with diagnosis codes V1272 and V7651, as recommended by the ACS and USPSTF for clients who do not meet the criteria for high-risk.

If during the screening colonoscopy a lesion or growth is detected that results in a biopsy or removal of the growth, the procedure code for a colonoscopy with biopsy or removal of lesion should be reported rather than procedure code G0121.

Colonoscopies: High-Risk
Procedure codes G0105 and G0120 are considered for reimbursement once every two years for clients who meet the definition of high-risk. Procedure codes G0105 and G0120 must be submitted with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>5550 5551 5552 5559 5560 5561 5562 5563 5568 5569</td>
</tr>
<tr>
<td>55841 55842 5589 V1005 V1006 V1272 V160 V1851</td>
</tr>
</tbody>
</table>

A screening barium enema may be substituted for a screening colonoscopy if the effectiveness has been established by the physician for substitution. Procedure code G0120 may be used as an alternative to procedure code G0105 respectively.

If during the screening colonoscopy a lesion or growth is detected that results in a biopsy or removal of the growth, the procedure code for a colonoscopy with biopsy or removal of lesion should be reported rather than procedure code G0105 or G0120.

8.2.13.6 Prior Authorization for Colorectal Cancer Screening
Prior authorization is not required for colorectal screening.

8.2.13.7 Genetic Testing for Colorectal Cancer
Genetic testing for colorectal cancer may be considered for reimbursement to independent laboratories with prior authorization.
Genetic testing may be provided to clients who have a known predisposition (i.e., having a first- or second-degree relative) for colorectal cancer. Results of the testing may indicate whether the client has an increased risk of developing colorectal cancer. A first-degree relative is defined as a sibling, parent, or offspring. A second-degree relative is defined as an uncle, aunt, grandparent, nephew, niece, or half-sibling.

Genetic test results, when informative, may influence clinical management decisions. Documentation in the medical record must reflect that the client or family members have been given information on the nature, inheritance, and implications of genetic disorders to help them make informed medical and personal decisions before the genetic testing.

Genetic testing for colorectal cancer may be considered for reimbursement with the following procedure codes: S3828, S3829, S3830, S3831, S3833, and S3834.

Interpretation of gene mutation analysis results is not reimbursed separately. Interpretation is part of the physician E/M service.

Procedure codes 83891, 83898, 83904, 83894, and 83912 are denied when submitted with any of the following procedure codes on the same date of service by any provider: S3828, S3829, S3830, S3831, S3833, and S3834.

Procedure codes S3828, S3829, S3830, S3831, S3833, and S3834 are limited to once per lifetime for any procedure code by any provider. Testing is limited to once per lifetime for any procedure code by any provider, regardless of whether additional services are authorized. The documentation requirements for specific procedure codes are available in the following sections titled, “Testing for Familial Adenomatous Polyposis” and “Hereditary Non-Polyposis Colorectal Cancer (HNPCC).”

8.2.13.7.1 Testing for Familial Adenomatous Polyposis

Testing for familial adenomatous polyposis (procedure codes S3833 and S3834) may be offered to clients who have well-defined hereditary cancer syndromes and for whom a positive or negative result will change medical care. Genetic testing should only be offered to clients who are 8 years of age and older. Testing for familial adenomatous polyposis may be considered for reimbursement with documentation of at least one of the following:

- The client has more than 20 polyps.
- The client has a first-degree relative with familial adenomatous polyposis and a documented mutation.

8.2.13.7.2 Hereditary Nonpolyposis Colorectal Cancer (HNPCC)

Testing for HNPCC (procedure codes S3828, S3829, S3830, and S3831) is used to determine whether an client has an increased risk of colorectal cancer or other HNPCC-associated cancers. Results of the test may influence clinical management decisions. Genetic testing should be offered only to clients who are 21 years of age and older. Testing for HNPCC may be considered for reimbursement with documentation of at least one of the following:

- The client has three or more family members, one of whom is a first-degree relative, with colorectal cancer; two successive generations are affected; one or more of the colorectal cancers was diagnosed before the family member was 50 years of age; and familial adenomatous polyposis has been ruled out for the client.
- The client has had two previous HNPCCs.
- The client has colorectal cancer and a first-degree relative who has one of the following:
  - Colorectal cancer or HNPCC extracolonic cancer at 50 years of age and younger
  - Colorectal adenoma at 40 years of age and younger
- The client has had colorectal cancer or endometrial cancer at 50 years of age and younger.
8.2.13.7.3 Prior Authorization for Genetic Testing for Colorectal Cancer

Prior authorization is required for genetic testing for colorectal cancer. A written authorization request that is signed and dated by the referring provider must be submitted. All signatures must be current, unaltered, original, and handwritten. Computerized or stamped signatures are not accepted. The original signature copy must be kept in the physician’s medical record for the client. Complete documentation must be submitted with prior authorization requests.

To complete the prior authorization process, the provider must mail or fax the request to the TMHP Special Medical Prior Authorization Unit and include documentation of medical necessity. The form may be faxed to 1-512-514-4213 or mailed to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization Department
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727

To facilitate a determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including the accurate medical necessity of the services requested.

8.2.14 Capsulotomy

A capsulotomy is a benefit when not performed with a joint surgery.

8.2.15 Cardiac Rehabilitation

Cardiac rehabilitation is a medically supervised program designed to help clients who have heart disease recover quickly and improve their overall physical and mental functioning.

Cardiac rehabilitation procedure codes 93797, 93798, and S9472 are benefits of the Texas Medicaid Program.

The appropriate procedure code must be billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>40201</td>
</tr>
<tr>
<td>41030</td>
</tr>
<tr>
<td>41061</td>
</tr>
<tr>
<td>41092</td>
</tr>
<tr>
<td>42822</td>
</tr>
<tr>
<td>4289</td>
</tr>
</tbody>
</table>

Coverage of cardiac rehabilitation programs is considered reasonable and necessary only for clients for whom there is documentation of any of the following conditions within the 12 months immediately preceding the beginning of the program:

- Acute myocardial infarction
- Coronary artery bypass surgery (CABG)
• Percutaneous transluminal coronary angioplasty or coronary stenting
• Heart valve repair or replacement
• Major pulmonary surgery
• Sustained ventricular tachycardia or fibrillation
• Class III or class IV congestive heart failure
• Chronic stable angina

Note: A cardiac rehabilitation program in which the cardiac monitoring is done using telephonically transmitted electrocardiograms (ECGs) to a remote site is not a benefit of Texas Medicaid.

Cardiac rehabilitation must be provided in a facility that has the necessary cardiopulmonary, emergency, diagnostic, and therapeutic life-saving equipment (e.g., oxygen, cardiopulmonary resuscitation equipment, or defibrillator) available for immediate use.

A cardiac rehabilitation program is divided into three phases:

Phase I: Inpatient is a benefit as part of the hospital stay - following a cardiac event.

Phase II: Outpatient begins after the client has been discharged from the hospital. A physician’s prescription is required after the acute convalescent period and after it has been determined that the client’s clinical status and capacity will allow for safe participation in an individualized progressive exercise program. Phase II requires close monitoring and direct supervision by a physician (who is on the hospital premises) and includes:

• Medical evaluation performed by the physician responsible for prescribing the client’s rehabilitation program and includes a clinical examination, a medical history, and an initial plan/goal.
• Program to modify risk factors (nutritional counseling, stress reduction, smoking cessation, weight loss, etc.)
• Prescribed exercise concurrent with and without electrocardiogram (ECG) monitoring.
• Education and counseling
• Services performed in an approved facility by trained professionals.

Phase III: Maintenance is performed in absence of supervision and monitoring on an on-going basis, designed by a medical professional.

Note: Texas Medicaid does not reimburse providers for the maintenance phase.

Cardiac rehabilitation is limited to 2 or 3 sessions per week for 12 to 18 weeks per rolling year, not to exceed 36 sessions.

Cardiac rehabilitation may be considered medically necessary beyond 36 sessions if the client has another documented cardiac event or if the prescribing physician documents that a continuation of cardiac rehabilitation is medically necessary. To confirm that a continuation of cardiac rehabilitation is at the request of or is coordinated with the attending physician, the medical record must include evidence of communication between the cardiac rehabilitation staff and either the medical director or the referring physician. If the physician responsible for such follow-up is the medical director, then the physician’s notes must be evident in each client’s chart.

Additional cardiac rehabilitation sessions must be prior authorized and must not exceed a total of 72 sessions for 36 weeks.

If no clinically-significant arrhythmia is documented during the first three weeks of the program, the physician may give the order for the client to complete the remaining portion of the cardiac rehabilitation without telemetry monitoring.
Although cardiac rehabilitation may be considered a form of physical therapy, it is a specialized program that is conducted by personnel who are not physicians but are trained in both basic and advanced cardiac life support techniques and exercise therapy for coronary disease and who provide the services under the direct supervision of a physician.

8.2.15.1 Prior Authorization for Cardiac Rehabilitation

Prior authorization is not required for the initial 36 sessions of cardiac rehabilitation.

Cardiac rehabilitation may be considered medically necessary beyond 36 sessions in the following circumstances:

- The medical record must support the client has had another cardiac event; or
- The prescribing physician documents that a continuation of cardiac rehabilitation is medically necessary. Documentation must include the following:
  - Progress made from the beginning of cardiac rehabilitation period to the current service request date, including progress towards previous goals.
  - Information that supports the client’s capability of continued measurable progress.
  - A proposed treatment plan for the requested extension dates with specific goals related to the client’s individual needs.

Requests for prior authorization for additional sessions that exceed a total of 72 sessions in 36 weeks will not be granted. Prior authorization must be obtained through the TMHP Special Medical Prior Authorization (SMPA) Department.

8.2.15.2 Reimbursement

The evaluation provided by the cardiac rehabilitation team at the beginning of each cardiac rehabilitation session is not considered a separate service and will be included in the reimbursement for the cardiac rehabilitation session. Evaluation and management (E/M) services unrelated to cardiac rehabilitation may be billed with modifier 25 appended to the E/M code when a separately identifiable E/M service was provided on the same day by the provider that rendered cardiac rehabilitation. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client’s medical record and made available to Texas Medicaid upon request.

Physical and occupational therapy will not be reimbursed when furnished in addition to cardiac rehabilitation exercise program services unless there is also a diagnosis of a non-cardiac condition that requires such therapy, e.g., a client who is recuperating from an acute phase of heart disease and may have had a stroke that requires physical and/or occupational therapy.

Client education services, such as formal lectures and counseling on diet, nutrition, and sexual activity, that help a client adjust living habits because of the cardiac condition; will not be separately reimbursed when the services are provided as part of the cardiac rehabilitation program.

Procedure code 93797 will be denied when billed for the same date of service as procedure code 93798 by any provider.

The following cardiography and pulmonary procedure codes will be denied when billed with cardiac rehabilitation procedure code 93798 for the same date of service by any provider:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>93000</td>
</tr>
</tbody>
</table>
8.2.16 Casting, Splinting, and Strapping

Casting, splinting, and strapping supplies are considered part of the procedure and are not reimbursed separately. The following procedure codes for casting, splinting, and strapping are a benefit of Texas Medicaid:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>29000</td>
</tr>
<tr>
<td>29055</td>
</tr>
<tr>
<td>29131</td>
</tr>
<tr>
<td>29358</td>
</tr>
<tr>
<td>29520</td>
</tr>
</tbody>
</table>

When a claim for casting, splinting, or strapping is submitted with the same date of service as a surgery, the surgery may be reimbursed and the procedure codes listed in the table above will be denied as part of another procedure.

The replacement of a cast, splint, or strapping is not included in the original surgical fee and may be reimbursed separately. Reimbursement for cast removal, windowing, wedging, or repair will be denied if submitted for reimbursement within six weeks of the initial cast application, splinting, or strapping by the same provider. The following procedure codes for cast removal, windowing, wedging, or repair may be reimbursed to a provider other than the provider who applied the initial cast, splint, or strap:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>29700</td>
</tr>
</tbody>
</table>

Authorization is not required for casting, splinting, or strapping services.

The following table includes the procedure codes that will be denied when submitted for reimbursement with other casting, splinting, and strapping procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes That Will Be Denied</th>

8.2.17 Cardiopulmonary Resuscitation (CPR)

CPR (procedure code 92950) is a benefit of Texas Medicaid and may be reimbursed when medical necessity is documented in the client’s medical record. Only the primary provider performing CPR may be reimbursed for procedure code 92950. CPR billed as an ambulance service by an ambulance provider will be denied.

CPR may be billed with the same date of service as critical care when reported as a separately identifiable procedure. The time spent performing CPR must not be included in the time reported as critical care.

The following procedure codes performed during the CPR period will be denied when billed with the same date of service by the same provider:

- 12001, 12032, 12042, 12044, 13121, 13132, 29130, or 29260
- 29305
- 29365 or 29425
- 29405
- 29345, 29365, 29405, or 29425
- 29440, 29580, 29700, or 29705
- 29580
- 29730
- 29540
- 29730 or 29740
- 29515
- 11055, 11056, or 29550
- 11900, 12004, or 29550
- 12004, 15852, 29550, or 29700
- G0127, 11719, or 11900
- 15852

8.2.18 Chemotherapy

Chemotherapy infusion procedure codes listed in the following table are comprehensive codes that include all supplies, catheters, and solutions necessary to safely administer the necessary chemotherapeutic agents either by or under the supervision of the physician, but do not include the provision of the chemotherapeutic agents:
The appropriate E/M procedure code must be billed by a physician for a face-to-face visit with the patient to review chemotherapy options.

**8.2.18.1 Chemotherapy Procedure Codes**

Procedure code 51720 should be used for intravesical instillation of anti carcinogenic agents into the bladder including retention time.

The chemotherapy administration procedure codes 96440, 96446, and 96450 include payment for the surgical procedure; separate reimbursement for the surgical codes will not be allowed. These procedure codes may be paid in addition to E/M procedure codes billed on the same day, regardless of the place of service billed.

Chemotherapeutic drugs and other injections given in the course of chemotherapy may be billed separately and reimbursed using the appropriate procedure codes.

For the first 15 minutes, up to the first hour of chemotherapy infusion, procedure code 96409 or 96413 must be used for a single or initial chemotherapeutic medication. Procedure code 96411 must be used for each additional chemotherapeutic medication given and must be billed with procedure code 96409 or 96413.

Procedure code 96415 must be used for each additional hour beyond the initial hour and must be used in conjunction with procedure code 96413.

Procedure code 96417 must be used for one additional hour per subsequent infusion and must be used in conjunction with procedure code 96413. Procedure code 96415 may be used for each additional hour.

Procedure code 96425 must be used when initiating an infusion that will take more than eight hours and requires using an implanted pump or a portable pump.

Procedure code 96422 must be used for the first hour of intra-arterial push administration. Procedure code 96423 must be used for each additional hour in conjunction with procedure code 96422.

Chemotherapy administration by push technique (procedure codes 96409 and 96420) and by infusion technique (procedure codes 96413 and 96422) are reimbursed when billed for the same date of service.

Only one intravenous push administration (procedure code 96409) and only one intra-arterial push administration (procedure code 96420) will be allowed per day, regardless of whether separate drugs are given.

Evaluation and management (E/M) services unrelated to other services and procedures being performed may be billed with modifier 25 appended to the E/M code. Documentation that supports the provision of that significant, separately identifiable E/M service must be maintained in the client’s medical record and made available to Texas Medicaid upon request. Modifier 25 use is subject to retrospective review.

Prolonged infusion of chemotherapeutic agents is reimbursed using procedure codes 95991, 96413, 96415, 96416, 96417, 96422, 96423, and 96425.

Inpatient and outpatient hospitals must use revenue code 636 for the reimbursement of the technical component. The appropriate chemotherapy procedure code must be listed on the claim.

**8.2.19 Circumcisions**

Texas Medicaid may provide reimbursement for circumcisions billed with procedure code 54150 or procedure code 54161. Circumcisions performed on clients who are 1 year of age and older must be documented with medical necessity.

Refer to: Subsection 8.2.43.1, “Circumcisions for Newborns,” in this handbook for additional benefit information.
8.2.20 Closure of Wounds

The repair of wounds is defined as simple, intermediate, or complex. Simple repair involves the dermis and subcutaneous tissue and requires a one-layer closure. Intermediate repair requires some layered closure of deeper layers of subcutaneous tissue and superficial fascia. Complex repair involves more layered closure, debridement, extensive undermining, stints, or retention sutures.

Wound closures may use sutures, staples, or tissue adhesives. Wounds closed with adhesive strips must not be reported using wound closure procedure codes. When adhesive strips are the only wound closure material used, providers must report the most appropriate E/M visit procedure code on their claim.

Simple exploration of nerves, blood vessels, or tendons exposed in an open wound is considered inclusive to the wound closure and will not be reimbursed separately.

The lengths of multiple closures of wounds must be added together and billed as one procedure code if they meet at least one of the following criteria:

- The closures have the same CPT classification (see “Repair [Closure]” in the CPT manual).
- The closures are in anatomic sites that are grouped together in the same procedure code descriptor.

Providers must submit the procedure code that represents the total length of the repairs. Lengths of repairs from different CPT classifications or groupings of anatomic sites must be billed as separate procedure codes.

Wound closures must be billed using the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Repair Simple</strong></td>
</tr>
<tr>
<td>12001 12002 12004 12005 12006 12007 12011 12013 12014 12015 12016 12017 12018 12020 12021</td>
</tr>
<tr>
<td><strong>Repair Intermediate</strong></td>
</tr>
<tr>
<td>12031 12032 12034 12035 12036 12037 12041 12042 12044 12045 12046 12047 12051 12052 12053 12054 12055 12056 12057</td>
</tr>
<tr>
<td><strong>Repair Complex</strong></td>
</tr>
<tr>
<td>13100 13101 13102 13120 13121 13122 13131 13132 13133 13150 13151 13152 13153 13160</td>
</tr>
</tbody>
</table>

Multiple wounds on the same day will be paid the full-allowed amount for the major (largest total length of the repair at the same anatomic site) wound and one-half the allowed amount for each additional laceration (total length of the repair at the same anatomic site).

No separate payment will be made for incision closures billed in addition to a surgical procedure when the closure is part of that surgical procedure.

No separate payment will be made for supplies in the office.

When the debridement is carried out separately without immediate primary closure, when gross contamination requires prolonged cleansing, or when large amounts of devitalized or contaminated tissue are removed, debridement may be reimbursed separately. Debridement rendered during the same surgical session as wound closure is considered inclusive to the closure and is not reimbursed separately.

Refer to: Subsection 8.2.70.12, “Supplies, Trays, and Drugs,” in this handbook for the hospital-based emergency department.
8.2.21 Cochlear Implants

Cochlear implants, when medically indicated, are benefits of Texas Medicaid with prior authorization. A cochlear implant device (procedure code 69930) is an electronic instrument, part of which is implanted surgically to stimulate auditory nerve fibers, and part of which is worn externally to capture and amplify sound. These devices are available in single and multichannel models. Cochlear implants are used to provide awareness and identification of sound and to facilitate communication for persons who are profoundly hearing impaired.

Refer to: Subsection 3.2.1, “Cochlear Implants,” in Vision and Hearing Services Handbook (Vol. 2, Provider Handbooks) for additional information on benefit and authorization requirements for cochlear implants.

8.2.22 Continuous Glucose Monitoring (CGM)

CGM (procedure codes 95250 and 95251) is a benefit of Texas Medicaid with prior authorization. Procedure codes 95250 and 95251 are limited to once per 12 calendar months by any provider. Procedure codes 82945, 82947, 82948, 82950, 82951, 82952, and 82953 will be denied as part of another service if submitted for reimbursement by the same provider on the same date of service as procedure codes 95250 and 95251.

The rental or purchase of a continuous glucose monitoring system (CGMS) is considered part of the CGM and is not reimbursed separately.

8.2.22.1 Prior Authorization for Continuous Glucose Monitoring

CGM requires prior authorization and must be prescribed by a physician performing the glucose monitoring. CGM may be prior authorized for clients with Type I diabetes or diabetes during pregnancy, including gestational diabetes. The client must be compliant with his or her current medical regimen, use insulin injections three or more times per day or be on an insulin pump, and have documented self-blood glucose monitoring at least four times per day. At least one or more of the following conditions must also be present:

- Frequent unexplained hypoglycemic episodes
- Unexplained large fluctuations in daily, preprandial blood glucose
- Episodes of ketoacidosis or hospitalization for uncontrolled glucose

Additional CGM services may be considered with documentation of medical necessity that indicates the client meets the criteria above and has a change in condition that would warrant a second procedure within 12 calendar months.

To avoid unnecessary denials, the physician must provide correct and complete information, including documentation of medical necessity for the requested services. The physician must maintain documentation of medical necessity in the client’s medical record. The requesting provider may be asked for additional information to clarify or complete a request for the use of CGM.

8.2.23 Developmental and Neurological Assessment and Testing

The following types of developmental and neurological assessment and testing are benefits of Texas Medicaid when medically necessary:

- Assessment of aphasia (procedure code 96105)
- Developmental screening when performed outside of a Texas Health Steps (THSteps) medical checkup (procedure code 96110)
- Developmental testing (procedure code 96111)
- Neurobehavioral testing (procedure code 96116)

The physician must maintain documentation of medical necessity in the client’s medical record. Retrospective review may be performed to ensure that the documentation supports the medical necessity of the service. The following information is required at least every six months to establish medical necessity:

- The physician’s prescription that includes a description of the specific service being prescribed
- The treatment plan that includes a copy of the current evaluation and documented age of the child at the time of the evaluation

Re-evaluations are a benefit of Texas Medicaid only to address a clinical need, to provide the documentation needed to measure a client’s status over time, and to direct the plan of care.

Procedure codes 96105, 96110, 96111, and 96116 are used to report medically necessary developmental and neurological assessment and testing. Reimbursement of developmental and neurological assessment and testing is limited by National Correct Coding Initiative (NCCI) guidelines.

Administration of the Mini-Mental State Exam (MMSE) is considered part of an E/M service and will not be reimbursed separately.

Prior authorization is not required for aphasia assessment, developmental screening, developmental testing, and neurobehavioral status exam.

8.2.23.1 Assessment of Aphasia

Aphasia assessment (procedure code 96105) is a benefit of Texas Medicaid when medically necessary and is limited to diagnosis codes 7843, 78451, and 78459. Procedure code 96105 is limited to two services per rolling year, any provider.

8.2.23.2 Developmental Screening

Developmental screening using a recommended standardized screening tool (procedure code 96110) is a benefit of Texas Medicaid for clients who are birth through 20 years of age. Separate reimbursement for developmental screening completed without the use of one of the recommended standardized screening tools is not a benefit.

Developmental screening is limited to once per rolling year, any provider, outside of a THSteps medical checkup when medically necessary. This screening should only be completed for a diagnosis of suspected developmental delay or to evaluate a change in the client’s developmental status outside of a THSteps medical checkup.

Developmental screening should be used to identify clients who are birth through 6 years of age and who may need a more comprehensive evaluation. Results of developmental screening may guide or identify the need for further testing. Clients who have abnormal screening results must be referred to an appropriate provider for further testing. Clients who are birth through 35 months of age with suspected developmental delay must be referred to Texas Early Childhood Intervention (ECI) within 48 hours.

Refer to: Subsection 2.1, “Early Childhood Intervention (ECI) (CCP),” in Children’s Services Handbook (Vol. 2, Provider Handbooks) for additional information on the Texas ECI program.

Subsection 5.3.2.1, “Developmental Screening,” in Children’s Services Handbook (Vol. 2, Provider Handbooks) for additional information on developmental screening for THSteps checkups.

Standardized screening (procedure code 96110) is not a benefit when completed to meet day care, Head Start, or school program requirements unless completed during an acute care visit in a clinic setting.

Procedure code 96110 will be denied as part of another service when submitted for reimbursement on the same day as procedure code 96111 by any provider.
8.2.23.3 Developmental Testing

Developmental testing (procedure code 96111) is a benefit of Texas Medicaid for clients who are birth through 20 years of age.

Developmental testing must consist of an extended evaluation and include the use of a standardized assessment tool. Developmental testing is medically necessary when there is suspected developmental delay supported by clinical evidence. Developmental testing is only medically indicated when clinical evidence suggests the following:

- Suspected developmental delay or atypical development cannot be clearly diagnosed through clinical interview or standardized screening tools alone.
- Retesting of a client to evaluate a change in developmental status that results in a change of treatment plan.

Procedure code 96111 is limited to two services per rolling year, any provider.

The procedure codes listed in the following table will be denied as part of another service when billed on the same day by the same provider as procedure code 96111:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>90801</td>
</tr>
<tr>
<td>90812</td>
</tr>
<tr>
<td>90823</td>

</tr>
<tr>
<td>99316</td>
</tr>
<tr>
<td>99337</td>
</tr>
<tr>
<td>99477</td>
</tr>
</tbody>
</table>

Developmental testing performed when a development delay or a change in the client’s developmental status is not suspected, is not a benefit of Texas Medicaid. Standardized testing (procedure code 96111) is not a benefit when completed to meet day care, Head Start, or school program requirements unless completed during an acute care visit in a clinic setting.

Providers cannot bill the client for developmental testing that is considered developmental screening.

8.2.23.4 Neurobehavioral Testing

A neurobehavioral examination (procedure code 96116) is a benefit of Texas Medicaid only when a medical or psychiatric diagnosis exists that establishes the need for a detailed evaluation of neurological impairment. Neurobehavioral testing is not medically necessary if a clinical interview alone would provide all the necessary diagnostic information.

Neurobehavioral testing is limited to the diagnosis codes listed in the following table:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>0460</td>

</tbody>
</table>
Testing performed for other diagnoses constitute screening and are not covered by Texas Medicaid. Documentation maintained in the client’s medical record must support medical necessity for each test performed.

Procedure code 96116 is limited to four hours per day and eight hours per calendar year, any provider.
Procedure code 96116 will be denied as part of another service when billed for the same date of service as procedure code 90801 or 90802.

Procedure codes 96105, 96110, and 96111 will be denied as part of another service when billed for the same date of service by the same provider as procedure code 96116.

Providers must bill the preponderance of each half hour of neurobehavioral testing and indicate that number of units on the claim form.

**8.2.23.5 12-Hour Limitation for Procedure Codes 96110, 96111, and 96116**

APRNs, PAs, and psychologists are limited to a maximum, combined total of 12 hours per day for developmental screening and testing, neurobehavioral testing, and inpatient and outpatient behavioral health services.

Because physicians (M.D. and D.O.) can delegate and may submit claims for services in excess of 12 hours per day, they are not subject to the 12-hour system limitation.

Developmental screening, developmental testing, and neurobehavioral testing are included in the 12-hour per day, per provider, system limitation. The following table lists the procedure codes that are included in the 12-hour per day system limitation, along with the time increments the system will apply based on the billed procedure code. The time increments applied will be used to calculate the 12-hour per day system limitation.

<table>
<thead>
<tr>

<td>60 Minutes</td>
</tr>
</tbody>
</table>

All providers, including physicians and all providers to whom they delegate services, are subject to retrospective review. HHSC and TMHP routinely perform retrospective reviews of all providers. All providers are subject to retrospective review for the total hours of services performed and billed in excess of 12 hours per day. Retrospective review may include:

- All E/M procedure codes, including those listed in the Evaluation and Management Section of the CPT Manual, billed with a diagnosis listed in the diagnosis table above under Neurobehavioral Testing
- All developmental and neurological assessment and testing procedure codes included in the 12-hour system limitation

Note: Developmental and neurological assessment and testing procedure codes and behavioral health procedure codes are included in the review. If a provider provides developmental and neurological assessment and testing at more than one location, any of these services may be retrospectively reviewed.

**8.2.24 Diagnostic Tests**

**8.2.24.1 Ambulatory Blood Pressure Monitoring**

Ambulatory blood pressure monitoring is a covered benefit for clients when hypertension is suspected but not defined by history or physical. Ambulatory blood pressure monitoring has been shown to be effective when used in the differential diagnosis of hypertension not elucidated by conventional studies.
Benefits are limited to the following medical necessities:

- Blood pressure measurements taken in the clinic or office are greater than 140/90 mm Hg on at least three separate visits, with two separate measurements made at each visit.
- At least two separately documented blood pressure measurements taken outside of the clinic or office that are less than 140/90 mm Hg.
- There is no evidence of end-organ damage.

Ambulatory blood pressure monitoring is for diagnostic purposes only.

Use procedure codes 93784, 93786, 93788, and/or 93790 to bill in 24-hour increments for ambulatory blood pressure monitoring. Ambulatory blood pressure monitoring is a benefit when submitted with diagnosis code 7962.

**8.2.24.2 Ambulatory Electroencephalogram (Ambulatory EEG)**

Ambulatory EEG monitoring or 24-hour ambulatory monitoring is a covered benefit for clients in whom a seizure diathesis is suspected but not defined by history, physical, or resting EEG.

Benefits are limited to 3 units (each unit 24 hours) for each physician for the same client per 6 months when medically necessary.

Use the following procedure codes to bill ambulatory EEG: 95950, 95951, 95953, and 95956.

Procedure codes 95950, 95951, 95953, and 95956 are related. When multiple procedure codes are billed on the same day, the most inclusive code is paid and all other codes are denied.

Procedure codes 95950, 95951, 95953, and 95956 are payable when billed with the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>2930 2948 33111 33119 3315 33182 3332 34500 34501 34510</td>
</tr>
<tr>
<td>34511 3452 3453 34540 34541 34550 34551 34560 34561 34570</td>
</tr>
<tr>
<td>34571 34580 34581 34590 34591 64940 64941 64942 64943 64944</td>
</tr>
<tr>
<td>7790 7797 78032 78033 78039 78097 85011 85012</td>
</tr>
</tbody>
</table>

Other diagnosis codes may be considered on appeal with supporting medical documentation to the TMHP Medical Director.

**8.2.24.3 Bone Marrow Aspiration, Biopsy**

Physicians may bill procedure code 85097 if interpretation is for smear interpretation, or procedure code 88305 if interpretation is for preparation and interpretation of cell block. If both procedure codes 85097 and 88305 are billed, procedure code 88305 is paid and procedure code 85097 is denied.

Physicians may bill procedure code 85097 or 88305 for preparation and interpretation of the specimen.

**8.2.24.4 Cytopathology Studies—Other Than Gynecological**

Procurement and handling of the specimen for cytopathology of sites other than vaginal, cervical, or uterine is considered part of the client’s E/M and will not be reimbursed separately.

Procedure codes 88160, 88161, and 88162 are reimbursed according to the POS where the cytopathology smear is interpreted.

Procedure codes 88160 and 88161 are denied as part of 88162.

Procedure code 88160 is denied as part of procedure code 88161.
8.2.24.5 *Echoencephalography*

Echoencephalography (procedure code 76506) is medically indicated for the following conditions or diagnosis codes:

**8.2.24.6 Electrocardiogram (EKG)**

An EKG is a recording of the heart’s electrical activity. The EKG provides important information about the spread of excitation to the different chambers of the heart and helps diagnose cases of abnormal cardiac rhythm and myocardial damage.

EKG procedure codes 93000, 93005, 93010, 93040, 93041, and 93042 are payable for the following diagnosis codes:

EKG interpretations are payable. The EKG procedure codes for which interpretation components are paid are 93010 and 93042.
8.2.24.7 Electrodiagnostic (EDX) Testing

Electromyography (EMG) and nerve conduction studies (NCS), collectively known as EDX testing, must be medically indicated and may be reimbursed with the diagnosis codes listed below. Testing must be performed using EDX equipment that provides assessment of all parameters of the recorded signals. Studies performed with devices designed only for screening purposes rather than diagnoses are not a benefit of Texas Medicaid.

The needle EMG examination must be performed by a physician specially trained in EDX medicine, as these tests are simultaneously performed and interpreted.

NCS must be performed by one of the following:

- A physician
- A trained individual under the direct supervision of a physician (Direct supervision means that the physician is in the building while testing is underway and is immediately available to provide the trained individual with assistance and direction. The supervising physician is responsible for selecting the appropriate NCS to be performed.)

In addition to the diagnoses listed in the preceding table the following procedure codes may also be reimbursed with the following diagnosis codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>9559, 9560, 9561, 9562, 9563, 9564, 9565, 9568, 9569, 9570</td>
<td>9571, 9578, 9579</td>
</tr>
</tbody>
</table>

8.2.24.7.1 Electromyography (EMG)

Surface or macro-EMG testing is considered experimental and is not a benefit of Texas Medicaid.

The following EMG procedure codes may be reimbursed for one service per day, each procedure, by the same provider:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>95860, 95861, 95863, 95864, 95866, 95867, 95868, 95869, 95870, 95872, 95875, 95900, 95903, 95904, 95905, 95934, 95936</td>
<td>95878, 95879</td>
</tr>
</tbody>
</table>

Limitations

In the following table, the procedure codes in Column A will be denied as part of another service when billed for the same date of service by the same provider as the corresponding procedure codes in Column B.

<table>
<thead>
<tr>
<th>Column A (Denied When Billed With...)</th>
<th>Column B</th>
</tr>
</thead>
<tbody>
<tr>
<td>95860</td>
<td>95861, 95863, or 95864</td>
</tr>
<tr>
<td>95861</td>
<td>95863 or 95864</td>
</tr>
<tr>
<td>95863</td>
<td>95864</td>
</tr>
<tr>
<td>95864</td>
<td>95860, 95861, or 95863</td>
</tr>
<tr>
<td>95867</td>
<td>95868</td>
</tr>
<tr>
<td>36000 or 36410</td>
<td>95875</td>
</tr>
</tbody>
</table>

8.2.24.7.2 Nerve Conduction Studies (NCS)

NCS are reimbursed by Texas Medicaid with documentation of medical necessity using the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>95900, 95903, 95904, 95905, 95930, 95933, 95934, 95936, 95937</td>
<td>95900, 95903, 95904, 95905, 95930, 95933, 95934, 95936, 95937</td>
</tr>
</tbody>
</table>
Limitations

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Limitation</th>
</tr>
</thead>
<tbody>
<tr>
<td>95900, 95903, 95904</td>
<td>Reimbursed at the full fee (100 percent) for the first nerve study and half fee (50 percent) for each additional study, regardless of the number of studies. Reimbursed only once when multiple sites on the same nerve are stimulated or recorded.</td>
</tr>
<tr>
<td>95900 and 95903</td>
<td>Up to 5 studies per day, per procedure, same provider without prior authorization.</td>

<tr>
<td>95904</td>
<td>Up to 6 studies per day, per procedure, same provider without prior authorization.</td>
</tr>
<tr>
<td>95900, 95920</td>
<td>Denied if billed with procedure code 95903 by the same provider for the same date of service.</td>
</tr>
<tr>
<td>95930</td>
<td>1 study per day, same provider.</td>
</tr>
<tr>
<td>95933</td>
<td>Up to 2 studies per day, same provider.</td>
</tr>
<tr>
<td>95934, 95936</td>
<td>Reimbursed at the full fee (100 percent) for the first nerve study and half fee (50 percent) for each additional study, regardless of the number of studies. Up to 2 studies per day, per procedure, same provider without prior authorization.</td>
</tr>
<tr>
<td>95937</td>
<td>Up to 3 studies per day, per procedure, same provider without prior authorization.</td>
</tr>
</tbody>
</table>

When the same studies are performed on unique sites by the same provider for the same date of service, studies for the first site must be billed without a modifier and studies for each additional site must be billed with modifier 59, indicating a distinct procedural service.

8.2.24.7.3 Documentation Requirements for EDX Testing

The reason for the referral, the specific site(s) tested, and a clear diagnostic impression must be documented in the client’s medical record for each NCS or EMG study performed.

The client’s medical records must clearly document the medical necessity for the NCS and EMG testing. The medical record documentation must reflect the actual results of specific tests (such as latency and amplitude).

Medical necessity for re-evaluation of a client (beyond the initial consultation and testing) must be clearly documented in the client’s medical record. Supporting documentation includes, but is not limited to, the following:

- The client has new symptoms unrelated to those previously evaluated, suggestive of a new diagnosis. Examples may include suspected:
  - Peripheral nerve entrapment syndromes.
  - Other neuropathies (traumatic, metabolic, or demyelinating).
  - Neuromuscular junction disorders (myasthenia gravis, botulism).
  - Myopathies (dermatomyositis, congenital myopathies).
  - Unexplained symptoms suggestive of peripheral nerve, muscle or neuromuscular junction pathology, manifested by muscle weakness, muscle atrophy, loss of dexterity, spasticity, sensory deficits, swallowing dysfunction, diplopia, or dysarthria.
- The client’s diagnosis could not be confirmed on previous studies, although suspected.
• Evidence exists that the client’s condition is changing rapidly, supported by the following:
  • Diagnosis
  • Current clinical signs and symptoms
  • Prior clinical condition
  • Expected clinical disease course

• There is clinical benefit of additional electrodiagnostic studies.

The client’s medical records are subject to retrospective review. NCS hard copies of the wave form recordings obtained during the testing will aid documentation requirements in cases where a review becomes necessary.

8.2.24.7.4 Prior and Retrospective Authorization for EDX Testing

EMG services procedure codes 95860, 95861, 95863, 95864, 95867, 95868, 95869, and 95870 do not require prior authorization and are allowed at the maximum per procedure code description.

Authorization is required when the number of nerve conduction studies performed during an evaluation exceeds the maximum number of studies outlined in the limitations table in subsection 8.2.24.7.2, “Nerve Conduction Studies (NCS)” in this handbook.

Since the need for additional NCS or alternate procedures may be determined following initiation of the evaluation, a request for retroactive authorization may be submitted no later than seven calendar days beginning the day after testing is completed.

Medical record documentation must establish medical necessity for the additional studies, including:
  • Other diagnosis in the differential that require consideration. The provider should note:
    • The additional diagnoses considered.
    • The clinical signs, symptoms, or electrodiagnostic findings that necessitated the inclusion.
  • Multiple diagnoses are established by nerve conduction studies; the recommendations in the table above for a single diagnostic category do not apply. The provider should document all diagnoses established as a result of EDX testing.
  • Testing of an asymptomatic contralateral limb to establish normative values for an individual client (particularly the elderly, diabetic, and clients with a history of ethyl alcohol [ETOH] usage).
  • Comorbid clinical conditions are identified. The clinical condition must be one that may cause sensory or motor symptoms, for example:
    • Underlying metabolic disease (such as thyroid condition or diabetes mellitus).
    • Nutritional deficiency (alcoholism).
    • Malignant disease.
    • Inflammatory disorder (including but not limited to lupus, sarcoidosis or Sjögren’s syndrome).

Texas Medicaid recognizes that EDX testing is tailored to the clinical findings of an individual client. It is, however, the expectation that testing be guided by accepted practice parameters and physician guidelines. The number of studies performed should be the minimum needed to establish an accurate diagnosis. Texas Medicaid, consistent with the American Association of Neuromuscular & Electromyographic Medicine (AANEM) recommendations, believes the recommendations of the AANEM to be a reasonable maximum number of studies for the documented clinical conditions as noted in the CPT manual on page 499. The AANEM recommendations will be used in determination of medical necessity of additional tests requested with prior authorization.
Reimbursement
Any EDX testing procedures may be reimbursed up to four different dates of service per calendar year, same provider. Any E/M service will be denied as part of another service when billed for the same date of service as EMG or NCS service by the same provider.

Maximum Number of Studies for EDX Testing
The AANEM recommendations include a reasonable maximum number of studies performed per diagnostic category and can be found in the CPT manual.

8.2.24.8 Esophageal pH Probe Monitoring
Esophageal pH monitoring uses an indwelling pH microelectrode positioned just above the esophageal sphincter. The pH electrode and skin reference electrode are connected to a battery-powered pH meter and transmitter worn as a shoulder harness. The esophageal pH is monitored continuously and a strip chart is used to record the pH determinations. The patient is usually monitored for a 24-hour period. Esophageal pH monitoring is a medically appropriate adjunct procedure to help establish the presence or absence of gastroesophageal reflux.

The following diagnosis codes are payable for esophageal pH probe monitoring or gastroesophageal reflux study to evaluate esophageal reflux:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>5070 53010 53011 53012 53020 53021 53019 53081 53085 53086</td>
</tr>
<tr>
<td>53087 7700 77087 77088 77933 7833 78603 78605 78606 78607</td>
</tr>
<tr>
<td>78609</td>
</tr>
</tbody>
</table>

Esophageal pH probe monitoring should be coded with procedure codes 91034, 91035, and 78262.

8.2.24.9 Helicobacter Pylori (H. Pylori)
Testing for H. pylori may be performed using the following tests:
- Serology testing (procedure codes 83009 and 86677 are allowed once per year when submitted by any provider)
- Stool testing (procedure code 87338)
- Breath testing (procedure codes 78267, 78268, 83013, and 83014)

Serology testing for H. pylori is a noninvasive diagnostic procedure that is preferred for initial diagnosis but is not indicated after a diagnosis has been made. Serology testing is not indicated or covered for monitoring a response to therapy.

Stool testing for H. pylori is a noninvasive diagnostic procedure that is appropriate for both diagnosis and determining a response to therapy.

Breath testing for H. pylori is a noninvasive diagnostic procedure that uses an analysis of breath samples to determine the presence of H. pylori.

The interpretation/professional component is not considered separately for reimbursement.

H. pylori is accepted as an etiologic factor in duodenal ulcers, peptic ulcer disease, gastric carcinoma, and primary B cell gastric lymphoma. H. pylori testing may be indicated for symptomatic clients who have a documented history of chronic/recurrent duodenal ulcer, gastric ulcer, or chronic gastritis. The history must delineate the failed conservative treatment for the condition.

H. pylori serology or stool testing is not indicated or covered for any of the following:
- New onset uncomplicated dyspepsia.
• New onset dyspepsia responsive to conservative treatment (e.g., withdrawal of nonsteroidal anti-inflammatory drugs [NSAID] and/or use of antisecretory agents). If the treatment does not prove successful in eliminating the symptoms, further testing may be indicated to determine the presence of H. pylori.

• Screening for H. pylori in asymptomatic clients.

• Dyspeptic clients requiring endoscopy and biopsy.

H. pylori testing is not indicated under the following circumstances:

• There has been a negative endoscopy in the previous six weeks.

• An endoscopy is planned.

• H. pylori is of new onset and still being treated.

If a follow-up breath or stool test is used to document eradication of H. pylori, the medical record documentation must verify the history of the following previous complication(s):

• The client remains symptomatic after a treatment regimen for H. pylori.

• The client is asymptomatic after H. pylori eradication therapy but has a history of hemorrhage, perforation, or outlet obstruction from peptic ulcer disease.

• The client has a history of ulcer on chronic NSAID or anticoagulant therapy.

Only C-13 breath tests (procedure codes 83013 and 83014) or C-14 breath tests (procedure codes 78267 and 78268) may be reimbursed separately when billed with the same date of service. The following procedure codes may not be reimbursed when submitted with the same date of service: 83009, 86677, 87338, either of the C-13 breath test procedure codes, or either of the C-14 breath test procedure codes.

Reimbursement for the H. pylori serology, breath, and stool test is restricted to the following diagnosis codes:

</tbody>
</table>

Procedure codes 78267, 78268, 83013, 83014, and 87338 are also payable with diagnosis code 04186. Procedure code 87339 is not a benefit of Texas Medicaid.

8.2.24.10 Myocardial Perfusion Imaging

Refer to: Subsection 3.2.1, “Cardiac Nuclear Imaging,” in Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks).
8.2.24.11 Pediatric Pneumogram

A pediatric pneumogram (procedure code 94772) is a 12-hour to 24-hour recording of breathing effort, heart rate, oxygen level, and airflow to the lungs during sleep. The study is useful in identifying abnormal breathing patterns, with or without bradycardia, especially in premature infants.

The following diagnosis codes are payable for a pediatric pneumogram in infants from birth through 11 months of age:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>5300</td>
</tr>
<tr>
<td>769</td>
</tr>
<tr>
<td>78606</td>
</tr>
</tbody>
</table>

A pediatric pneumogram is limited to two services without prior authorization when submitted with one of the diagnosis codes listed above. Additional studies may be considered under CCP with documentation of medical necessity, and will require prior authorization.

Refer to: Section 5, “THSteps Medical” in Children’s Services Handbook (Vol. 2, Provider Handbooks).

EMGs, polysomnography, EEGs, and ECGs are denied when billed on the same day as a pediatric pneumogram.

Pediatric pneumograms are reimbursed on the same day as an apnea monitor (rented monthly) if documentation supports the medical necessity.

Pneumogram supplies are considered part of the technical component and are denied if billed separately.

8.2.25 Diagnostic Doppler Sonography

Diagnostic Doppler sonography is a benefit of Texas Medicaid when treatment decisions depend on the results. Authorization is not required for diagnostic Doppler services.

A vascular diagnostic study may be personally performed by a physician or by a technologist. The accuracy of noninvasive vascular diagnostic studies depends on the knowledge, skill, and experience of the technologist and physician performing and interpreting the study. Consequently, the physician who performs and/or interprets the study must be able to document training through recent residency training or post-graduate continuing medical education and experience and must maintain that documentation for post-payment review.

If noninvasive vascular diagnostic studies are performed by a technologist, the technologist must have demonstrated competency in ultrasound by receiving one of the following credentials in vascular ultrasound technology:

- Registered Vascular Specialist (RVS) provided by Cardiovascular Credentialing International (CCI)
- Registered Vascular Technologist (RVT) provided by the American Registry of Diagnostic Medical Sonographers (ARDMS)
- Vascular Sonographer (VS) provided by the American Registry of Radiologic Technologists (ARRT), Sonography

Alternatively, such studies must be performed in a facility or vascular laboratory accredited by one of the following nationally recognized accreditation organizations. If a vascular laboratory or facility is accredited, the technologists performing noninvasive cerebrovascular arterial studies in that laboratory are considered to have demonstrated competency in cerebrovascular ultrasound:

- American College of Radiology (ACR) Vascular Ultrasound Accreditation Program
• Intersocietal Commission for the Accreditation of Vascular Laboratories (ICAVL)

**Cerebrovascular Doppler Studies**

Cerebrovascular Doppler sonography includes both extracranial and transcranial (intracranial) studies. Cerebrovascular Doppler sonography should not be used when treatment decisions will not be affected by the findings.

Cerebrovascular Doppler studies for the diagnosis of migraine are considered experimental and are not a benefit of Texas Medicaid.

Extracranial arterial Doppler (procedure codes 93875, 93880, and 93882) are limited to the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>

</tr>
</tbody>
</table>

* Use diagnosis code 34889 to identify assessment of suspected brain death
** Use diagnosis code 4449 to report paradoxical cerebral embolism
*** Use diagnosis code 7802 when symptomatology indicates a strong clinical suspicion of vertebrobasilar insufficiency
**** Use diagnosis code 7859 to report carotid bruit
In addition to the diagnosis codes listed in the table above, procedure codes 93886 and 93888 are benefits for clients who are 2 through 16 years of age with sickle cell disease to evaluate the risk of stroke when submitted with the following diagnosis codes: 28260, 28261, 28262, 28263, 28264, 28268, or 28269.

Procedure codes 93890, 93892, and 93893 will not be reimbursed on the same day to any provider as procedure code 93888.

**Peripheral Arterial Doppler Studies**

Peripheral arterial Doppler (procedure codes 93922, 93923, 93924, 93925, 93926, 93930, and 93931) are limited to the following diagnosis codes (unless otherwise indicated):

<table>

* Use diagnosis code 4449 only for paradoxical embolism
** Use diagnosis code V7283 only for preoperative venous studies

Limitations for Diagnostic Doppler Sonography

Documentation of medical necessity for the diagnostic Doppler study must be maintained by the ordering provider in the client’s medical record.

Procedure codes described as complete bilateral studies are inclusive codes, and right and left studies billed on the same day will be reimbursed at a quantity of one.

Diagnostic Doppler procedure codes are limited to one study per day, same provider.

When medically necessary, multiple Doppler procedures (e.g., studies of extracranial arteries and intracranial arteries) billed on the same day by the same provider will be reimbursed at full fee for the first study and one-half fee for each additional study, regardless of the number of services billed.

The use of transcranial Doppler studies performed for the assessment of stroke risk in clients who are 2 through 16 years of age who have sickle cell anemia should be limited to once every 6 months.

The use of a simple hand-held or other Doppler device that does not produce hard copy output or that does not permit analysis of bidirectional vascular flow is considered part of the physical examination of the vascular system and is not separately reported.

The following procedure codes in column A will be denied if billed with the same date of service by the same provider as the corresponding procedure codes in column B:

8.2.26 Endoscopies

The following endoscopies are benefits of Texas Medicaid:

- Bronchoscopy
- Cystourethroscopy
- Endoscopic retrograde cholangiopancreatography (ERCP).
- Lower gastrointestinal endoscopy (GED) (for example, colonoscopy)
- Upper GED (for example, esophagogastroduodenoscopy [EGD])
- Sinus endoscopy

Multiple diagnostic or operative endoscopies in the same or different body areas are often billed on the same day. If done by the same provider, they may be paid the full amount allowed for the major procedure and one-half the allowed amount for each additional procedure, following multiple surgical guidelines.

If the physician bills separate charges for multiple endoscopies that are considered part of a more inclusive procedure, the individual charges are reviewed, and only the most inclusive code is reimbursed.

**Example:** Separate charges for an esophagoscopy, a gastroscopy, and a duodenoscopy are reviewed and paid as an EGD. A surgical endoscopy always includes the diagnostic endoscopy.

8.2.27 Extracorporeal Membrane Oxygenation (ECMO)

ECMO may be effective on a short-term basis for clients with life-threatening respiratory and/or cardiac insufficiency.

Procedure codes 36822, 33960, and 33961 may be used when billing ECMO for clients who have the following clinical indications (this is not an all-inclusive list):

- Persistent pulmonary hypertension
- Meconium aspiration syndrome
- Respiratory distress syndrome
- Adult respiratory distress syndrome
- Congenital diaphragmatic hernia
- Sepsis
- Pneumonia
- Preoperative and postoperative congenital heart disease or heart transplantation
- Reversible causes of cardiac failure
- Cardiomyopathy
- Myocarditis
- Aspiration pneumonia
- Pulmonary contusion
- Pulmonary embolism

Terminal disease with expectation of short survival, advanced multiple organ failure syndrome, irreversible central nervous system injury and severe immunosuppression are contra-indications to ECMO. Claims for ECMO services may be recouped if the services are provided in the presence of these conditions.
The initial 24 hours of ECMO should be submitted using procedure code 33960. Procedure code 33961 should be used for each additional 24 hours. Procedure code 33960 is denied as part of procedure code 33961 if submitted with the same date of service. Procedure codes 33960 and 33961 are limited to one per day when billed by any provider.

If insertion of cannula (procedure code 36822) for prolonged extracorporeal circulation for cardiopulmonary insufficiency is submitted by the same provider with the same date of service as procedure code 33960 or 33961, the insertion of the cannula is denied, and the ECMO (procedure codes 33960 and 33961) is considered for reimbursement.

8.2.28 Family Planning

Physicians, PAs, NPs, CNSs, and CNMs are encouraged to provide family planning services to Texas Medicaid clients, especially pregnant and postpartum clients. No separate enrollment is required. Providers are reimbursed for family planning services through Texas Medicaid (Title XIX) or through the Family Planning Program (Titles V. X. and XX).

Refer to: Section 2, “Medicaid Title XIX family planning services” in Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks).

Section 3, “Women’s Health Program (Title XIX Family Planning)” in Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks).

8.2.29 Gynecological Health Services

Gynecological examinations, surgical procedures, and treatments are benefits of Texas Medicaid.

Refer to: Section 5, “Gynecological Health Services” in the Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks) for information about contraception, sterilizations, and family planning annual examinations.

8.2.30 Hospital Visits

Refer to: Subsection 8.2.57, “Physician Evaluation and Management (E/M) Services,” in this handbook.

8.2.31 Hyperbaric Oxygen Therapy (HBOT)

Procedure code 99183 is limited to one session per day, any provider.

Note: Although oxygen may be administered by mask, cannula, or tube in addition to the hyperbaric treatment, the use of oxygen by mask, or other device, or applied topically is not considered hyperbaric treatment in itself.

Texas Medicaid recognizes the following indications for HBOT:

- Air or gas embolism
- Carbon monoxide/smoke inhalation
- Compromised skin grafts and flaps
- Crush injuries/acute traumatic ischemias
- Decompression sickness
- Enhanced healing in selected problem wounds
- Exceptional blood loss (anemia)
- Gas gangrene (clostridial myonecrosis)
- Necrotizing soft tissue infections
- Radiation tissue damage (osteoradionecrosis)
- Refractory osteomyelitis
- Thermal burns

Texas Medicaid does not consider HBOT medically necessary for the treatment of cerebral palsy or traumatic brain injury. HBOT is not reimbursed for these diagnoses.

Documentation required by the physician includes, but is not limited to:

- Ordering the HBOT treatments.
- Documentation of medical necessity.
- An established plan of care specifying the goals of HBOT.
- The estimated number of treatments including revisions made as appropriate and justification for extending treatments.
- Level of supervision provided.

The physician must be in constant attendance of hyperbaric oxygen therapy during compression and decompression of the chamber.

When requesting reimbursement for HBOT, providers must use one of the following diagnosis codes:

<table>

</tbody>
</table>
8.2.32 Ilizarov Device and Procedure

Providers must use procedure codes 20692, 20693, 20694, and 20999 when submitting claims for the Ilizarov procedure. A global fee payment methodology is applied to the Ilizarov device procedure codes. Procedure codes 20692, 20693, 20694, and 20999 include the preconstruction, surgical application, adjustments to the device for up to 6 months, and the removal of the device.

Providers who bill for other external fixator devices, such as the Monticelli device, should continue to use procedure codes 20690 or 20692, where applicable, when billing for the surgical applications.

8.2.33 Immunization Guidelines and Administration

Texas Medicaid reimburses immunizations (vaccines and toxoids) that the Advisory Committee on Immunization Practices (ACIP) recommends as either routine or medically necessary.

Providers must follow the most current ACIP recommendations. Providers must also provide the appropriate vaccine information statements (VISs) produced by the Centers for Disease Control and Prevention (CDC). VISs explain the benefits and risks of the vaccines and toxoids administered.

**Note:** Administered vaccines and toxoids must be reported to DSHS. After obtaining parental consent, DSHS submits all reported vaccines and toxoids to a centralized repository of immunization histories for children who are 17 years of age and younger. This repository is known in Texas as ImmTrac.
8.2.33.1 Administration Fee

An administration fee may be reimbursed for all covered vaccines and toxoids that are administered. The following procedure codes may be reimbursed when billed for vaccine and toxoid administration:

<table>
<thead>
<tr>
<th>Procedure Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>90465</td>
</tr>
</tbody>
</table>

* Procedure codes 90473 and 90474 may only be reimbursed for vaccine/toxoid administration for clients who are birth through 20 years of age.

The administration fee may be reimbursed when the procedure code for the vaccine or toxoid administered (regardless of the source of the vaccine or toxoid) and the administration fee procedure code are billed on the same claim with the same date of service. Only one administration fee may be reimbursed to any provider for each vaccine or toxoid administered per day.

Vaccine and toxoid administration fees for clients who are 20 years of age and younger may be reimbursed based on the number of state defined components administered per injection and may require a modifier to indicate the number of state defined components administered as follows:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>One State-Defined Component</td>
</tr>
<tr>
<td>90632</td>
</tr>
<tr>
<td>90656</td>
</tr>
<tr>
<td>90681</td>
</tr>
<tr>
<td>90716</td>
</tr>
<tr>
<td>90746</td>
</tr>
</tbody>
</table>

One State-defined component: The provider must bill an administration fee without a modifier when one of these vaccines or toxoids are billed.

<table>
<thead>
<tr>
<th>Two State-Defined Components</th>
</tr>
</thead>
<tbody>
<tr>
<td>90636</td>
</tr>
</tbody>
</table>

Two State-defined components: The provider must bill an administration fee with state-defined modifier U2 when one of these vaccines or toxoids are billed.

<table>
<thead>
<tr>
<th>Three State-Defined Components</th>
</tr>
</thead>
<tbody>
<tr>
<td>90698</td>
</tr>
</tbody>
</table>

Three State-defined components: The provider must bill an administration fee with state-defined modifier U3 when one of these vaccines or toxoids are billed.

8.2.33.2 Documentation

Providers must document the following information in the client’s medical record, which is subject to retrospective review to determine appropriate utilization and reimbursement of this service:

- The vaccine or toxoid given
- The date of the vaccine or toxoid administration (day, month, year)
- The name of the vaccine or toxoid manufacturer and the vaccine or toxoid lot number
- The signature and title of the person administering the vaccine or toxoid
- The organization and address of the clinic location
- The publication date of the VIS issued to the client, parent, or guardian
8.2.33.3 Vaccine Adverse Event Reporting System (VAERS)

The National Childhood Vaccine Injury Act (NCVIA) requires health-care providers to report:

- Any reaction listed by the vaccine manufacturer as a contraindication to subsequent doses of the vaccine.
- Any reaction listed in the Reportable Events Table that occurs within the specified time period after vaccination.

Clinically significant adverse events should be reported even if it is unclear whether a vaccine caused the event.

Documentation of the injection site is recommended but not required.

A copy of the Reportable Events Table can be obtained by calling VAERS at 1-800-822-7967 or by downloading it from http://vaers.hhs.gov/esub/index.

8.2.34 Immunizations for Clients Birth through 20 Years of Age

Administration of vaccines and toxoids to clients who are birth through 20 years of age may be a benefit of THSteps when provided as part of a THSteps periodic visit. A THSteps provider who bills vaccines and toxoids with diagnosis or age restrictions is subject to those restrictions. Providers must bill the claim with the diagnosis code that indicates the condition that necessitates the vaccine or toxoid. For clients who are birth through 20 years of age, diagnosis code V202 may be used.

Administration of vaccines and toxoids to clients who are birth through 20 years of age may be a benefit of CCP when the vaccine or toxoid is provided as part of an acute medical visit outside of a THSteps periodic visit.

Modifier U1 must be used in the following situations:

- The client is birth through 18 years of age and the vaccine or toxoid is provided as part of a THSteps medical checkup and the state has issued a statement that the vaccine was currently unavailable through TVFC.
- The client is birth through 18 years of age and the vaccine or toxoid is provided as part of an acute medical visit outside of a THSteps periodic visit and was unavailable for distribution through TVFC.
- The vaccine or toxoid is normally distributed by TVFC but is currently officially declared unavailable, and the provider uses privately purchased vaccine or toxoid.
- The TVFC, based on their federal resolution (distribution/guidelines), does not distribute an HHSC-approved vaccine or toxoid following the ACIP recommendation, and the provider purchases vaccine to administer to all ACIP-recommended ages and cohorts. (The vaccine or toxoid administrated outside the TVFC age or cohort may be reimbursed with modifier U1.)

Note: 'Not available' is defined as: a new vaccine approved by the ACIP has not been negotiated or added to a TVFC contract; funding for new vaccine has not been established by TVFC; national supply and distribution issues.

Modifier U1 must not be used in the following situations:

- Provider’s failure to enroll in TVFC or to maintain sufficient TVFC vaccine or toxoid inventory.
- For clients who are 19 through 20 years of age.

At every encounter all providers must assess the immunization status of clients who are birth through 17 years of age or of clients who are birth through 20 years of age when part of a THSteps medical checkup. Providers must administer any medically indicated immunizations unless the immunization is medically contraindicated or because of the parent’s reason of conscience,
including a religious belief. The reason the indicated vaccine or toxoid was not administered must be documented in the client’s medical record. Providers may refer to the CFR and the TAC for additional information.

8.2.34.1 Vaccine Coverage Through the TVFC Program

The TVFC Program provides vaccines and toxoids for Texas Medicaid clients who are birth through 18 years of age according to the Recommended Childhood Immunization Schedule approved by the following:

- ACIP
- American Academy of Pediatrics (AAP)
- American Academy of Family Physicians (AAFP)

Providers may refer to the TVFC web site at www.dshs.state.tx.us/immunize/tvfc/default.shtm for more information and for a list of vaccines available through the program.

Note: TVFC program resolutions do not always match the ACIP’s general usage recommendations, but rather represent the rules that providers must follow when administering each specific vaccine under the TVFC.

When a single antigen vaccine or toxoid or a comparable antigen vaccine or toxoid is available through TVFC, but the provider chooses to use a different ACIP-recommended product, the administration fee will be reimbursed but the vaccine or toxoid will not be reimbursed.

Although Texas Medicaid does not mandate that providers enroll in TVFC, Texas Medicaid will not reimburse providers when the vaccine is available through TVFC. Only the administration fee will be reimbursed through Texas Medicaid when the vaccine or toxoid procedure code is identified on the claim. Clients may not be billed for vaccines and toxoids that are available through TVFC.

8.2.34.2 Vaccine and Toxoid Procedure Codes

The following vaccine and toxoid procedure codes may be reimbursed for Texas Medicaid clients who are birth through 20 years of age:

<table>
<thead>
<tr>
<th>Procedure Code / Required Modifier**</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bacillus Calmette-Guérin (BCG)</td>
</tr>
<tr>
<td>Refer to: Subsection 8.2.9, “Bacillus Calmette-Guérin (BCG) Intravesical for Treatment of Bladder Cancer,” in this handbook.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Procedure Code / Required Modifier**</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hepatitis A and B</td>
</tr>
<tr>
<td>90632</td>
</tr>
<tr>
<td>90633*</td>
</tr>
<tr>
<td>90636*</td>
</tr>
<tr>
<td>90723*</td>
</tr>
<tr>
<td>90734</td>
</tr>
<tr>
<td>90744*</td>
</tr>
<tr>
<td>90746</td>
</tr>
<tr>
<td>90748*</td>
</tr>
</tbody>
</table>

* Indicates a vaccine or toxoid distributed through TVFC. Vaccines and toxoids available through TVFC for clients who are birth through 18 years of age will not be reimbursed through Texas Medicaid. These vaccines and toxoids will be processed as informational.

** Vaccine or toxoid administration fees for clients who are birth through 20 years of age may be reimbursed based on the number of state-defined components administered per injection. The provider must bill the appropriate modifier that corresponds to the number of state-defined components: no modifier = 1 state-defined component; modifier U2 = 2 state-defined components; modifier U3 = 3 state-defined components.
Procedure codes 90740, 90744, and 90747: For clients who are birth through 18 years of age, the state-mandated administration of the hepatitis B vaccine to newborns before discharge from the hospital has been established as the accepted standard of care and will not be considered as a reason to up-code to a different diagnosis-related group (DRG). The administration of the hepatitis B vaccine to newborns is included in the DRG payment and will not be reimbursed separately.

Texas Medicaid-eligible clients residing in a private (nonstate) institution for persons with intellectual disabilities (ICF-MR), are classified as at a continuing high risk for hepatitis B with an ongoing exposure potential. When provided by and billed by the attending physician, Texas Medicaid may reimburse the hepatitis B vaccine for all in clients of an ICF-MR (private) facility.

When the hepatitis B vaccine is provided to clients with end-stage renal disease who are directly exposed to the virus, the administration fee and the vaccine may be reimbursed in addition to the dialysis services.

Administration of the hepatitis A and B vaccine (procedure code 90636) is indicated for clients who are 18 years of age and older and at risk for both hepatitis A and hepatitis B infections. Providers are expected to follow the ACIP recommendations for administration.

**Hepatitis B Immune Globulin**

<table>

</tr>
</tbody>
</table>

Providers must document in the client’s medical record the indication for the immunoglobulin. These records are subject to retrospective review to determine appropriate utilization of and reimbursement for this service.

Intramuscular hepatitis B immune globulin (HBIg) may be reimbursed when medically necessary to provide coverage for acute exposure to the hepatitis B virus. HBIg is not provided through TVFC.

Procedure codes 90371, J1571, and J1573 must be billed with diagnosis code V0179.

Only one HBIg procedure code will be paid if billed with the same date of service by the same provider as any other HBIg procedure code.

Procedure codes 96372 and 96374 may be reimbursed for HBIg administration.

</tbody>
</table>

Influenza vaccine is a benefit of Texas Medicaid for high-risk clients who are not covered by THSteps or TVFC or when the vaccine is not declared available through the TVFC. Providers are expected to follow ACIP recommendations relating to prevention and control of influenza.

Texas Medicaid considers the influenza season in the United States to be October through the end of May.

* Indicates a vaccine or toxoid distributed through TVFC. Vaccines and toxoids available through TVFC for clients who are birth through 18 years of age will not be reimbursed through Texas Medicaid. These vaccines and toxoids will be processed as informational.

** Vaccine or toxoid administration fees for clients who are birth through 20 years of age may be reimbursed based on the number of state-defined components administered per injection. The provider must bill the appropriate modifier that corresponds to the number of state-defined components: no modifier = 1 state-defined component; modifier U2 = 2 state-defined components; modifier U3 = 3 state-defined components.

* Indicates a vaccine or toxoid distributed through TVFC. Vaccines and toxoids available through TVFC for clients who are birth through 18 years of age will not be reimbursed through Texas Medicaid. These vaccines and toxoids will be processed as informational.
** Vaccine or toxoid administration fees for clients who are birth through 20 years of age may be reimbursed based on the number of state-defined components administered per injection. The provider must bill the appropriate modifier that corresponds to the number of state-defined components: no modifier = 1 state-defined component; modifier U2 = 2 state-defined components; modifier U3 = 3 state-defined components.
8.2.35 Immunizations for Clients Who Are 21 Years of Age and Older

Vaccines and toxoids may be reimbursed through Texas Medicaid at a fee determined by HHSC when the vaccine is medically necessary.

The following immunizations are identified and recommended by the ACIP as medically-necessary for clients who are 21 years of age and older (this list is not all-inclusive):

### Immunization Procedure Codes

**BCG**

| Refer to: Subsection 8.2.9, “Bacillus Calmette-Guérin (BCG) Intravesical for Treatment of Bladder Cancer,” in this handbook. |

**Hepatitis A**

| 90632 |

Administration of the hepatitis A vaccine is indicated for at-risk adults according to ACIP recommendations. Providers are expected to follow the ACIP recommendations for administration.

**Hepatitis B**

| 90740 | 90746 | 90747 |

Administration of the hepatitis B vaccine is indicated for at-risk adults according to ACIP recommendations. Providers are expected to follow the ACIP recommendations for administration.

Intellectually disabled Texas Medicaid-eligible individuals who reside in a private (nonstate) ICF-MR are classified as at a continuing high risk for hepatitis B with an ongoing exposure potential. When provided by and billed by the attending physician, Texas Medicaid may reimburse the hepatitis B vaccine for all inpatients of an ICF-MR (private) facility.

When the hepatitis B vaccine is provided to clients who have end-stage renal disease who are directly exposed to the virus, the administration fee and the vaccine may be reimbursed in addition to the dialysis services.

**Hepatitis B Immune Globulin**

| 90371 | 96372 | 96374 | J1571 | J1573 |

Providers must document in the client’s medical record the indication for the immunoglobulin. These records are subject to retrospective review to determine appropriate utilization of and reimbursement for this service.

Intramuscular HBlg may be reimbursed when medically necessary to provide coverage for acute exposure to the hepatitis B virus. HBlg is not provided through TVFC.

Procedure codes 90371, J1571, and J1573 must be billed with diagnosis code V0179.

Only one HBlg procedure code will be paid if billed with the same date of service by the same provider as any other HBlg procedure code.

Procedure codes 96372 and 96374 may be reimbursed for HBlg administration.

Texas Medicaid considers the influenza season in the United States to be October through the end of May. The optimal time to receive influenza vaccine is as early in the season as it is available. However, clients should continue to receive influenza vaccine through March. The vaccine may be administered one time per influenza season.

### Measles, Mumps, Rubella Vaccine (MMR)

The specific diagnosis necessitating the vaccine or toxoid is required when billing the administration fee procedure code in combination with the appropriate vaccine procedure code.

### 8.2.36 Postexposure Prophylaxis for Rabies

Postexposure prophylaxis for rabies procedure codes 90375, 90376, and 90675 is a benefit of Texas Medicaid. Rabies vaccine for pre-exposure procedure code 90676 is not a benefit of Texas Medicaid.

Postexposure rabies vaccine is limited to clients with diagnosis code V015.

Animal bites to people must be reported as soon as possible to the Local Rabies Control Authority (LRCA).

Postexposure prophylaxis for rabies is not necessary following exposure to an animal that tests negative for the rabies virus.

An exposed person who has never received a complete pre- or postexposure rabies vaccine series will first receive a dose of rabies immune globulin (HRIG). This is a blood product that contains antibodies against rabies and gives immediate, short-term protection. The injection should be given in or near the wound area.

HRIG that is not administered when vaccination begins can be administered up to seven days after the administration of the first dose of vaccine. Beyond the seventh day, HRIG is not recommended since an antibody response to the vaccine is presumed to have occurred, and HRIG may inhibit the immune response to the vaccine.

The recommended dose of HRIG is 20 IU/kg body weight. This formula is applicable to all age groups, including children.

The postexposure treatment will also include five doses of rabies vaccine (1.0 ml. intramuscular). The first dose should be given as soon as possible after the exposure (day 0). Additional doses should be given on days 3, 7, 14, and 28 after the first shot. For an exposed person who has previously been vaccinated with a complete pre- or postexposure vaccine series, two doses of rabies vaccine should be given on days 0 and 3.

Health care providers, who determine their client requires the preventative rabies vaccination series after valid rabies exposure, may obtain the biologicals directly from the manufacturer or through one of the DSHS depots around the state.

Injection administration is a benefit for administration of rabies vaccine for post exposure.

### 8.2.36.1 Prior Authorization for Postexposure Rabies Vaccine

Prior authorization is not required for postexposure rabies vaccine. The physician must maintain documentation of the exposure in the client’s medical record.
8.2.36.2 Limitations for Postexposure Rabies Vaccine

Reimbursement for postexposure rabies vaccine is limited to one per client per day, by any provider.

Reimbursement for postexposure rabies vaccine is limited to five occurrences per 90 rolling days. Claims billed for any vaccine given beyond 90 rolling days will be denied.

Procedure code 90376 will be denied if it is billed for the same date of service by the same provider as procedure code 90375.

8.2.36.2.1 Obtaining Rabies Vaccine and HRIG from DSHS for PEP Use

Providers may obtain the vaccine and HRIG directly from the manufacturer. If a provider is not able to obtain the vaccine and/or HRIG directly, providers may contact DSHS local or state public health professionals.

For each potential rabies exposure, providers must consult with their local health department or the DSHS regional ZC program office that serves their area. Requests for consultations made to DSHS after-hours or on holidays should be directed to the DSHS On-Call Physician at 1-888-963-7111.

Local public health professionals or regional ZC staff will help providers determine whether or not the exposure situation warrants PEP. If the exposure situation is determined to be valid, providers will be given detailed information about how to obtain rabies vaccine and HRIG for the patient.

Providers can refer to the following DSHS web pages for the contact information of local public health professionals:

- Full Service Local Health Departments and Districts of Texas at www.dshs.state.tx.us/regions/lhds.shtm
- Zoonosis Control Branch at www.dshs.state.tx.us/idcu/health/zoonosis/contact/
- DSHS rabies website at www.dshs.state.tx.us/idcu/disease/Rabies/
- Regional DSHS ZC offices
- CDC rabies website at www.cdc.gov/rabies/

8.2.37 Medications - Injectable

Providers are responsible for administering drugs based on the FDA-approved guidelines. In the absence of FDA indications, a drug needs to meet the following criteria:

- The drug is recognized by the American Hospital Formulary Service Drug Information, the U.S. Pharmacopoeia Dispensing Information, Volume I, or two articles from major peer-reviewed journals that have validated and uncontested data supporting the proposed use for the specific medical condition as safe and effective.
- It is medically necessary to treat the specific medical condition, including life-threatening conditions or chronic and seriously debilitating conditions.
- The off-label use of the drug is not investigational or experimental.

Retrospective review may be performed to ensure documentation supports the medical necessity of the service.
Injections given in the physician’s office, the client’s home, or the nursing home may be reimbursed using the correct procedure code for the specific drug and dosage given. The following injections are benefits of Texas Medicaid and are subject to the indicated limitations:

<table>

| Infliximab (Remicade)                  | J1745             | Diagnosis limitations: 5550, 5551, 5552, 5559, 5560, 5561, 5562, 5563, 5565, 5566, 5568, 5569, 5651, 56981, 6960, 6961, 7140, 7141, 7142, 71430, or 7200  
Documentation supporting the client’s inadequate response to methotrexate-only therapy must be maintained in the client’s file. The documentation is subject to retrospective review. |
| Iron Sucrose (Venofer)                 | J1756             | Diagnosis limitations: 28521 and 5856                                                                                                           |
| Melaphalan                             | J9245             | Diagnosis limitations: 1740, 1741, 1742, 1743, 1744, 1745, 1746, 1748, 1749, 1750, 1759, 1830, 1860, 1869, 20300, or 20301                                 |
| Natalizmab                             | J2323             | Diagnosis limitations: 340, 5550, 5551, 5552, or 5559                                                                                       |
| Porfimer (Photofrin)                   | J9600             | Diagnosis limitations: 1500, 1501, 1502, 01503, 1504, 1505, 1508, 1509, or 1978                                                               |

(Diagnosis limitations) The procedure code must be billed with one of the diagnosis codes listed.
Important: The 11-digit National Drug Code (NDC) must be submitted on the claim with the appropriate procedure code. The NDC submitted to Texas Medicaid must be the NDC on the package or container from which the medication was administered.

Refer to: Subsection 6.3.4, “National Drug Code (NDC),” in Section 6, “Claims Filing” (Vol. 1, General Information) for more information about filing claims with the NDC.

Note: Physicians billing for injections, either intramuscular (IM) or subcutaneous (SQ) or intravenous administration (IV) in the inpatient hospital setting, skilled nursing facility or outpatient hospital will be denied, as these costs are included in the reimbursement methodology of the inpatient facility, skilled nursing facility, or the outpatient facility.

Refer to: Subsection 2.2.1.2, “Drugs and Biologicals,” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for the reimbursement methodology for injections.

8.2.37.1 Abatacept (Orencia)

Abatacept is a benefit of Texas Medicaid for clients who have moderately to severely active rheumatoid arthritis. These clients may also have an inadequate response to analgesics, NSAIDs, Cox-2 inhibitors, and/or one or more disease-modifying antirheumatic drugs (DMARDs), such as methotrexate or tumor necrosis factor (TNF) antagonists.
8.2.37.1.1 Prior Authorization for Abatacept (Orencia)

Providers must obtain prior authorization for procedure code J0129 to request reimbursement for abatacept. The prior authorization requests must include medical necessity documentation that contains the following information:

- A diagnosis of rheumatoid arthritis (diagnosis code 7140, 7141, 7142, 71430, 7144, or 7149)
- Failure of sufficient response to standard treatment, such as analgesics, NSAIDs, and Cox-2 inhibitors
- Inadequate response to one or more DMARDs, such as methotrexate or TNF antagonists
- The number of anticipated injections and the dosage and number of vials per injection

Prior authorization may be granted for up to 14 injections per client, per year. Prior authorization is a condition for reimbursement; it is not a guarantee of payment. Providers may fax or mail the prior authorization request to the TMHP Special Medical Prior Authorization Department at:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization Department
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax: 1-512-514-4213

8.2.37.2 Alatrofloxacin Mesylate (Trovan)

Texas Medicaid follows the recommendation of the FDA about the use of intravenous alatrofloxacin mesylate, (Trovan). Alatrofloxacin mesylate should be reserved for use only in the treatment of clients who meet all the following treatment criteria:

- Have at least one of the following infections judged by the treating physician to be serious and life- or limb-threatening:
  - Nosocomial pneumonia
  - Community-acquired pneumonia
  - Complicated intra-abdominal infections (including postsurgical infections)
  - Gynecologic and pelvic infections
  - Complicated skin and skin-structure infections (including diabetic foot infections)
- Receive initial therapy in an inpatient health-care facility
- The treating physician believes that, given the new safety information, the benefit of the product to the client outweighs the risk.

8.2.37.3 Alglucosidase Alfa (Myozyme)

Alglucosidase alfa is a benefit of Texas Medicaid for clients of any age who are diagnosed with glycogenosis, or Pompe disease (diagnosis code 2710).

8.2.37.3.1 Prior Authorization for Alglucosidase Alfa (Myozyme)

Providers must obtain prior authorization for procedure code J0220 to request reimbursement for alglucosidase alfa. The prior authorization request must include medical necessity documentation that contains laboratory evidence of acid alpha-glucosidase (GAA) deficiency (i.e., below the laboratory-defined cutoff value as determined by the laboratory performing the GAA enzyme activity assay). Tissues used for the determination of GAA deficiency include blood, muscle, or skin fibroblasts.
Prior authorization is a condition for reimbursement; it is not a guarantee of payment. Providers may fax or mail prior authorization requests, including all required documentation, to the TMHP Special Medical Prior Authorization Department at:

Texas Medicaid & Healthcare Partnership  
Special Medical Prior Authorization Department  
12357-B Riata Trace Parkway, Suite 150  
Austin, TX 78727  
Fax: 1-512-514-4213

**8.2.37.4 17-Alpa Hydroxyprogesterone Caproate**

Alpha hydroxyprogesterone caproate (17P) is a benefit of Texas Medicaid for a pregnant client who has a history of preterm delivery before 37 weeks of gestation and who has not experienced preterm labor in the current pregnancy.

Providers should note that progesterone therapy as a technique to prevent preterm labor is considered investigational and not medically necessary for pregnant women who do not meet the above criteria or for those with other risk factors for preterm delivery, including, but not limited to, multiple gestations, short cervical length, or positive tests for cervicovaginal fetal fibronectin.

17P for intramuscular injection is not commercially available, but it can be compounded by a pharmacy provider.

Claims for 17P must be submitted using procedure code J3490 and diagnosis code V2341. A claim must include documentation that the patient was pregnant during weeks 16 through 36, has a history of preterm delivery before 37 weeks of gestation, and has not experienced preterm labor during the current pregnancy. A maximum of 250 mg of 17P will be reimbursed per week. This drug is manually priced.

**8.2.37.5 Amifostine**

Amifostine is a benefit of Texas Medicaid for the reduction of the cumulative renal toxicity associated with administration of cisplatin in clients who have advanced ovarian cancer or non-small cell lung cancer with documentation of a creatinine clearance of 50 or less and where no other chemotherapeutic agent can be used.

Amifostine may also be used to reduce the incidence of moderate-to-severe xerostomia in clients undergoing postoperative radiation treatment for head and neck cancers where the radiation port includes a substantial portion of the parotid glands.

Amifostine may be reimbursed for the following indications:

- Bone marrow toxicity
- Cisplatin- and cyclophosphamide-induced (prophylaxis)
- Advanced solid tumors
- Head and neck carcinoma
- Malignant lymphoma
- Non-small cell lung cancer
- Myelodysplastic syndromes
- Nephrotoxicity
- Advanced ovarian carcinoma
- Melanoma
- Advanced solid tumors of non-germ cell origin
- Neurotoxicity
- Reduction in the incidence of mucositis in clients receiving radiation therapy, or radiation combined with chemotherapy
- Reduction in the incidence of xerostomia associated with postoperative radiation treatment of head and neck cancer, where the radiation port includes a substantial portion of the parotid glands

Providers must use procedure code J0207 with one of the following diagnosis codes:

<table>

### 8.2.37.6 Antibiotics and Steroids

Injectable antibiotic or steroid medications may be considered for reimbursement even if the same oral medications are appropriate and available. Injected antibiotics or steroid medications, when used in place of oral medications, require the use of the modifier KX.
Physicians billing for injectable antibiotic and steroid medications *must* indicate the appropriate modifiers with the appropriate injection code and quantity:

<table>
<thead>
<tr>
<th>Modifier</th>
<th>Use</th>
</tr>
</thead>
<tbody>
<tr>
<td>AT</td>
<td>For acute conditions*</td>
</tr>
<tr>
<td>KX</td>
<td>To indicate any of the following:</td>
</tr>
<tr>
<td></td>
<td>• Oral route contraindicated or an acceptable oral equivalent is not available.</td>
</tr>
<tr>
<td></td>
<td>• Injectable medication is the accepted treatment of choice. Oral medication regimen has proven ineffective or is not applicable.</td>
</tr>
<tr>
<td></td>
<td>• The patient has a temperature over 102 degrees and a high level of antibiotic is needed immediately.</td>
</tr>
<tr>
<td></td>
<td>• Injection is medically necessary into joints, bursae, tendon sheaths, or trigger points to treat an acute condition or the acute flare-up of a chronic condition.</td>
</tr>
</tbody>
</table>

* If a steroid medication is injected into joints, bursae, tendon sheaths, or trigger points, modifier AT must be used to indicate an acute condition. When performed for a chronic condition, these procedures are denied.

### 8.2.37.7 Antihemophilic Factor

Reimbursement is available when the antihemophilic product is administered by or under physician supervision.

Reimbursement for the following antihemophilic factor procedure codes is limited to the diagnosis codes of coagulation defects, noted in the second table below:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>J1680 J7185</td>
<td>2860 2861</td>
</tr>
<tr>
<td>J7186 J7187</td>
<td>2862 2863</td>
</tr>
<tr>
<td>J7189 J7190</td>
<td>2864 2865</td>
</tr>
<tr>
<td>J7191 J7192</td>
<td>2866 2867</td>
</tr>
<tr>
<td>J7193 J7194</td>
<td>2869 V8302</td>
</tr>
</tbody>
</table>

Procedure codes J7193 and J7195 must be billed with diagnosis code 2861 to be considered for reimbursement.

Procedure code J7189 must be billed with diagnosis code 2860, 2861, 2863, or 2869 to be considered for reimbursement. Reimbursement is available when the antihemophilic product is administered by or under physician supervision. Procedure code J7196 must be billed with diagnosis code 28981.

### 8.2.37.8 Botulinum Toxin Type A

Procedure codes J0585 and J0586 are a benefit when billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>3336 33381</td>
<td>33382 33383 33384 33389 33389</td>
</tr>
<tr>
<td>3341 340</td>
<td>3410 3411</td>
</tr>
<tr>
<td>3418 3419</td>
<td>34211 34212 3430 3431 3432</td>
</tr>
<tr>
<td>3433 3434</td>
<td>3435 34460 34461</td>
</tr>
<tr>
<td>3449 3518</td>
<td>37800 37801 37802 37803 37804</td>
</tr>
<tr>
<td>37805 37806 37807</td>
<td>37808 37810 37811 37812 37813</td>
</tr>
<tr>
<td>37814 37815 37816</td>
<td>37817 37818</td>
</tr>
<tr>
<td>37820 37821 37822</td>
<td>37823 37824 37830 37831 37832 37833 37834</td>
</tr>
</tbody>
</table>
If a quantity greater than 300 units of botulinum toxin type A is billed on the same day, supporting medical documentation must be maintained in the client’s records for the dosage used and is subject to retrospective review.

EMGs and/or visits that are billed in conjunction with the administration of botulinum toxin type A are subject to current reimbursement guidelines. Any supplies billed by the physician for the administration of botulinum toxin type A are not paid separately.

Procedure code C9278 is a benefit when billed with diagnosis codes 33381, 33383, 34210, 34211, or 34212.

If a quantity greater than 120 units of procedure code C9278 is billed for the same date of service, supporting medical documentation must be maintained in the client’s medical record and is subject to retrospective review.

Procedure code C9278 will be denied when it is billed with procedure code J0585 or J0586.

Procedure code J0587 will be denied when it is billed with procedure code C9278.

### 8.2.37.9 Chelating Agents

Chelating agent procedure codes J0470, J0600, J0895, and J3520 are benefits of Texas Medicaid.

#### 8.2.37.9.1 Dimercaprol

Procedure code J0470 is a benefit when billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>9840</td>
</tr>
</tbody>
</table>

#### 8.2.37.9.2 Edetate calcium disodium

Procedure code J0600 is a benefit when billed with one of the following diagnosis codes: 9840, 9841, 9848, 9849, or 9858.

#### 8.2.37.9.3 Deferoxamine mesylate (Desferal)

Procedure code J0895 must be billed with one of the following diagnosis codes to be considered for reimbursement of deferoxamine mesylate:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>0470</td>
</tr>
<tr>
<td>28264</td>
</tr>
<tr>
<td>586</td>
</tr>
</tbody>
</table>

#### 8.2.37.9.4 Edetate disodium

Procedure code J3520 is a benefit when billed with diagnosis code 27542 or 9721.

Procedure codes J0470, J0600, J0895, and J3520 are denied if they are billed with diagnosis codes other than the codes listed above.
8.2.37.10 Clofarabine

Clofarabine is used for the treatment of relapsed or refractory acute lymphoblastic leukemia. Clofarabine is administered by IV infusion once daily for five days and is repeated every two to six weeks, as needed.

8.2.37.10.1 Prior Authorization for Clofarabine

Prior authorization is required for treatment with clofarabine (procedure code J9027) and may be granted for a maximum of six weeks.

Clofarabine may be prior authorized for the treatment of relapsed or refractory acute lymphoblastic leukemia (diagnosis code 20400). The following criteria apply to requests for prior authorization:

- The number of anticipated injections needed as well as the dosage per injection must be submitted with the request for prior authorization.
- Prior authorization must be obtained before services are rendered whenever possible. If authorization cannot be obtained prior to the rendering of the service, the authorization request must be submitted within three business days from the date the treatment is initiated.

Prior authorization requests may be considered with documentation of both of the following:

- A diagnosis of refractory or relapsed acute lymphoblastic leukemia (diagnosis code 20400)
- A history of at least two prior failed chemotherapy regimens

The prior authorization number must be included on the claim along with the number of units, based on the dosage given.

Failure to place the prior authorization number on the claim or to obtain prior authorization within the allotted timeframe will result in denied claims.

8.2.37.11 Colony Stimulating Factors (Filgrastim, Pegfilgrastim, and Sargramostim)

Colony stimulating factors (CSFs) are growth factors (glycoproteins) that support survival, clonal expansion and differentiation of blood forming cells and are a benefit of Texas Medicaid. CSFs reduce the likelihood of neutropenic complications due to chemotherapy and bone marrow transplant. Filgrastim (procedure codes J1440 and J1441) and pegfilgrastim (procedure code J2505) are granulocyte colony stimulating factors (G-CSFs). Sargramostim (procedure code J2820) is a granulocyte-macrophage colony stimulating factor (GM-CSF). GM-CSF and G-CSF stimulate neutrophil production after autologous bone marrow transplant and significantly reduce the duration and impact of neutropenia. To submit claims for reimbursement of colony stimulating factors, providers must submit the most appropriate procedure code with the number of units administered.

One of the following diagnosis codes must be billed with the appropriate procedure code:

<table>

</table>
Procedure code J2505 is not reimbursed when submitted with the same date of service as procedure code J1440 or J1441.

8.2.37.12 Hematopoietic Injections

Hematopoietic agents erythropoietin alfa or epoetin alfa (EPO) and darbepoetin alfa are benefits of Texas Medicaid and reimbursed using procedure codes J0881, J0882, J0885, and J0886 and an appropriate diagnosis code.

Providers must maintain medical records in their offices that document regular monitoring of hemoglobin or hematocrit levels and explain the rationale for the dosing of epoetin alfa and darbepoetin alfa. These records are subject to retrospective review to determine appropriate utilization and reimbursement for this service.

When billing procedure codes J0882 or J0886, providers must submit the client’s most recent dated hemoglobin or hematocrit levels in the comments section of the claim form.

EPO and darbepoetin alfa injections are limited to specific diagnosis codes as indicated in this section.
8.2.37.12.1 Epoetin Alfa (EPO)

EPO (procedure codes J0885 and J0886) is a glycoprotein that stimulates the formation of red blood cells and the production of the precursor red blood cells of the bone marrow. EPO is indicated for:

- Anemia associated with chronic renal failure (CRF), including clients on dialysis (end-stage renal disease or ESRD) and clients not on dialysis.
- Anemia related to therapy with zidovudine (AZT) in HIV-infected clients.
- Anemia due to the effects of concomitantly administered chemotherapy in clients who have non-myeloid malignancies.
- Anemia of prematurity.
- Clients scheduled to undergo elective noncardiac, nonvascular surgery to decrease need for allogenic blood transfusion.

Procedure code J0885 must be billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>042 20300 20301 20302 23872 23873 23874 23875 23876 23879</td>
</tr>
<tr>
<td>28489 28521 28522 2853 2858 2859 5851 5852 5853 5854</td>
</tr>
<tr>
<td>5855 5856 5859 586 7766</td>
</tr>
</tbody>
</table>

Procedure code J0886 must be billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>28521 5851 5852 5853 5854 5855 5856 5859 586</td>
</tr>
</tbody>
</table>

EPO may be considered for reimbursement when the dose is titrated consistent with prevailing, evidence-based clinical guidelines, as published by the National Kidney Foundation Kidney Disease Outcomes Quality Initiative, including appropriate monitoring of the rise and fall of the hemoglobin or hematocrit levels.

EPO is limited to three injections per calendar week (Sunday through Saturday).

8.2.37.12.2 Darbepoetin Alfa

Darbepoetin alfa (procedure codes J0881 and J0882) is an erythropoiesis-stimulating protein closely related to erythropoietin. Darbepoetin stimulates erythropoiesis by the same mechanism as EPO. Darbepoetin alfa has approximately a three-fold longer half-life than EPO, resulting in a sustained erythropoietic effect and less frequent dosing. Darbepoetin alfa is indicated for:

- Treatment of anemia associated with chronic renal failure (CRF), including clients on dialysis and clients not on dialysis.
- Treatment of anemia in clients who have non-myeloid malignancies where anemia is due to the effect of chemotherapy.

Procedure code J0881 must be billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>20300 20301 20302 23872 28489 28521 28522 2853 2858 2859</td>
</tr>
<tr>
<td>5851 5852 5853 5854 5855 5856 5859 586 V5811 V5812</td>
</tr>
</tbody>
</table>
Procedure code J0882 must be billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>28521</td>
</tr>
</tbody>
</table>

Darbepoetin is limited to 100 units per day (100 mcg). Darbepoetin should be administered as follows:

- Once a week if the client was receiving EPO two to three times weekly
- Once every two weeks if the client was receiving EPO once a week

### 8.2.37.13 Fluocinolone Acetonide (Retisert)

Procedure code J7311 is a benefit of Texas Medicaid for clients of all ages.

Procedure code J7311 is only considered for reimbursement with a posterior uveitis diagnosis (36320) of more than six months in duration and only when the condition has been unresponsive to oral or systemic medication treatment. Prior authorization is required.

To request prior authorization, providers must submit requests to the Special Medical Prior Authorization Department by fax at 1-512-514-4213.

### 8.2.37.14 Gamma Globulin/Immune Globulin

The following gamma globulin procedure codes are benefits when billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>90284</td>
</tr>
<tr>
<td>J1572</td>
</tr>
</tbody>
</table>

<table>

</tr>
<tr>
<td>27789</td>
</tr>
<tr>
<td>27911</td>
</tr>
<tr>
<td>28730</td>
</tr>
<tr>
<td>33709</td>
</tr>
<tr>
<td>4461</td>
</tr>
<tr>
<td>79579</td>
</tr>
<tr>
<td>V4281</td>
</tr>
<tr>
<td>V8719</td>
</tr>
</tbody>
</table>

**Note:** Diagnosis code V0182 may only be reimbursed when billed with procedure codes 90284, J1459, J1559, J1561, J1568, J1569, or J1572.

The procedure codes in Column A of the following table will be denied if they are submitted with the procedure codes in Column B:

<table>
<thead>
<tr>
<th>Column A (Denied)</th>
<th>Column B (When Submitted With)</th>
</tr>
</thead>
<tbody>
<tr>
<td>90284</td>
<td>J1459, J1460, J1559, J1560, J1561, J1562, J1566, J1568, J1569, J1572, J1599, J7504, J7511</td>
</tr>
</tbody>
</table>
8.2.37.15 **Medroxyprogesterone Acetate (Depo Provera)**

Medroxyprogesterone acetate injectable suspension (Depo-Provera) has been approved by the FDA as a method of contraception. Intramuscular injections of medroxyprogesterone acetate given at 90-day intervals has been proven to be a long-term method of preventing pregnancy. Medroxyprogesterone acetate injectable suspension is reimbursed by Texas Medicaid to providers of family planning services. Medroxyprogesterone acetate must be billed using procedure code J1055 and one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
<th>Column A (Denied)</th>
<th>Column B (When Submitted With)</th>

</table>
8.2.37.18 Joint Injections and Trigger Point Injections

Procedure codes 20600, 20605, 20610, and 20612 must be used to submit claims for injections into joints. Procedure codes 20526, 20550, 20551, 20552, and 20553 must be used to submit claims for trigger point injections.

These procedures are valid only in the treatment of acute problems. Procedures billed for reimbursement with chronic diagnosis codes are denied. The provider must use the AT modifier to indicate an acute condition. The cost of the injection does not include the drugs used. The drug can be reimbursed separately.

Multiple joint injections may be reimbursed when billed with the same date of service if the claim indicates the specific site of each injection. The first injection or aspiration is reimbursed at the full profile allowance and any subsequent injections are reimbursed at half allowance.

8.2.37.19 Leuprolide Acetate (Lupron Depot)

Procedure codes J9217, J1950, J9218, or J9219 may be reimbursed for leuprolide acetate injections with the following limitations:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Limitation(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>J1950</td>
<td>Reimbursed once per month</td>
</tr>
<tr>
<td>J9219</td>
<td>Reimbursed once per year</td>
</tr>
</tbody>
</table>

Procedure code J9217 may be reimbursed in monthly, three-month, four-month, and six-month doses as follows:

<table>
<thead>
<tr>
<th>Frequency</th>
<th>Dosage</th>
<th>Limitation(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Monthly</td>
<td>7.5 mg</td>
<td>Billed with a quantity of 1</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Reimbursed once per month</td>
</tr>
<tr>
<td>3-month</td>
<td>22.5 mg</td>
<td>Billed with a quantity of 3</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Reimbursed once every three months</td>
</tr>
<tr>
<td>4-month</td>
<td>30 mg</td>
<td>Billed with a quantity of 4</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Reimbursed once every 4 months</td>
</tr>
<tr>
<td>6-month</td>
<td>45 mg</td>
<td>Billed with a quantity of 6</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Reimbursed once every 6 months</td>
</tr>
</tbody>
</table>

This procedure code must be submitted with a valid and appropriate diagnosis code. The total dosage allowed within a 6-month period is 45 mg.

8.2.37.20 Omalizumab

Omalizumab is an injectable drug that is FDA approved for the treatment of clients who are 12 years of age and older with severe asthma.

8.2.37.20.1 Prior Authorization for Omalizumab

Omalizumab is a benefit to Medicaid-eligible clients when medically necessary and must be prior authorized. THSteps-eligible clients who are 11 years of age and younger will be considered on an exception basis through CCP.
When requesting prior authorization, the exact dosage must be included with the request using procedure code J2357. Doses and dosing frequency are determined by body weight and by serum IgE level (IU/mL) measured before the start of the treatment. Each prior authorization of omalizumab is based on provider documentation with the following medical necessity criteria:

- Diagnosis of asthma.
- Proof that the client is 12 years of age or older.
- Positive skin test or RAST to a perennial (not seasonal) aeroallergen within the past 36 months.
- Total IgE level greater than 30 IU/ml but less than 700 IU/ml within the past 12 months.

  **Note:** The total IgE level is required only for the initial prior authorization request and is not required for subsequent prior authorization requests.

- Documentation of client compliance with inhaled steroid regimen.
- Client is not currently smoking.
- Clinical evidence of inadequate asthma control. This evidence may include one or more of the following:
  - Dependence upon daily systemic steroids or maximal inhaled steroid regimen with frequent systemic steroid pulses.
  - Frequent hospitalizations or acute care visits for severe asthma exacerbations in the face of adequate maximal standard therapy. The client must have been on daily therapy for persistent asthma for at least one year with frequent use of beta agonist.
  - Persistence of significantly decreased pulmonary function testing (spirometry), demonstrating refractory lower airways’ obstruction and hyper-reactivity over time, despite the rigorous medical regimen delineated above.
  - Pulmonary function tests must have been performed within a three-month period and be documented for all clients when requesting prior authorization for omalizumab. Exceptions may be considered with documentation of medical reasons as to why the test cannot be performed.

Prior authorization approvals for omalizumab are for intervals of six months at a time. Clients must be fully compliant with their omalizumab regimen in order to qualify for any additional authorizations. The provider must submit a statement documenting full compliance with the requests for each renewal. After twelve continuous months of omalizumab authorizations, the requesting provider must submit documentation of satisfactory clinical response to omalizumab in order to qualify for any additional authorizations. Prior authorizations will be considered on an individual basis for lapses in treatment with provider documentation.

Requests for clients who are 20 years of age and younger who do not meet the criteria above will be reviewed for medical necessity, on a case-by-case basis, by the TMHP medical director.

**8.2.37.21 Paclitaxel**

Procedure code J9265 may be reimbursed when billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>1588</td>
</tr>
<tr>
<td>1742</td>
</tr>
<tr>
<td>1761</td>
</tr>
<tr>
<td>1834</td>
</tr>
<tr>
<td>1886</td>
</tr>
</tbody>
</table>
8.2.37.22 Implantable Infusion Pumps

Implantable infusion pumps (procedure codes E0782 and E0783) may be medically necessary in the following circumstances:

- Intrathecal administration of antispasmodic drugs to treat chronic intractable spasticity
- Administration of opioid drugs for treatment of severe chronic intractable pain
- Administration of intrahepatic chemotherapy in colorectal cancer with liver metastases
- Administration of intra-arterial chemotherapy in head and neck cancers

If procedure codes E0782 and E0783 are billed with the same date of service, only one may be reimbursed.

8.2.37.22.1 Prior Authorization for Implantable Infusion Pumps

Providers must request prior authorization for procedure code E0782 or E0783. Prior authorization requests with the supporting documentation for medical necessity must be mailed or faxed to the Special Medical Prior Authorization (SMPA) department at:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway
Austin, TX 78727
Fax: 1-512-514-4213

Written documentation supporting medical necessity includes the following:

- Initial evaluation including: age of onset of signs and symptoms, and other visits which are directly related to this request.
- Documentation of failed noninvasive methods of spasticity or pain control, either because these methods fail to adequately control the spasticity or pain or produced intolerable side effects.
- Type of surgical implantation with description of the device.
- Prior to pump implantation, the patient must have responded favorably to a trial of the medication.
- Expectation of benefit from procedure related to follow-up assessment to evaluate treatment goals.

The physician must provide correct and complete information, including documentation for medical necessity of the equipment and/or supplies requested. The physician must maintain documentation of medical necessity in the client’s medical record.

Prior authorization is not required for the insertion or revision of the implantable infusion pump.

8.2.37.22.2 Implantation of Catheters, Reservoirs, and Pumps

The following procedure codes may be used to bill the implantation of catheters and infusion pumps or devices for long term medication administration:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>62350</td>
</tr>
</tbody>
</table>

Procedure code 62350 or 62351 may be reimbursed when billed for the same date of service as procedure code 62360, 62361, or 62362.

Procedure codes 62355 and 62365 do not require prior authorization. These procedure codes are considered for reimbursement according to multiple surgery guidelines when billed with the same date of service as another surgical procedure performed by the same physician.
Procedure codes 62355 and 62365 are denied as included in the total anesthesia time when billed with the same date of service as an anesthesia procedure by the same physician.

Procedure codes 95990, 96521, and 96522 are considered for reimbursement when used for refilling an implantable pump.

**8.2.37.23 Trastuzumab**

Procedure code J9355 is a benefit of Texas Medicaid. Reimbursement for this drug is considered when it is used as a single agent for the treatment of clients who have metastatic breast cancer whose tumors overexpress the Her-2 protein and who have received one or more chemotherapy regimens for their metastatic disease.

Trastuzumab is also payable when:

- Used in combination with paclitaxel for the treatment of clients who have metastatic breast cancer whose tumors overexpress the Her-2 protein and who have not received chemotherapy for their metastatic disease.
- Used as part of a treatment regimen containing doxorubicin, cyclophosphamide, and paclitaxel for the adjuvant treatment of clients who have Her-2-overexpressing, node-positive breast cancer.

Trastuzumab is a benefit for clients whose tumors have Her-2 protein overexpression.

When billing for procedure code J9355, one of the following appropriate diagnosis codes must appear on the claim:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>1740 1741 1742 1743 1744 1745 1746 1748 1749 1750</td>
</tr>
<tr>
<td>1759</td>
</tr>
</tbody>
</table>

When billing for the test used to determine whether a client overexpresses the Her-2 protein, use procedure code 83950. This test is payable in the office, outpatient hospital, and independent laboratory. Diagnosis of overexpression of the Her-2 protein must be made before Texas Medicaid will consider reimbursement for trastuzumab. This test is payable only once in a client’s lifetime for the same provider. An additional test by the same provider requires more information to support the medical necessity.

**8.2.37.23.1 Prior Authorization for Trastuzumab**

Procedure code J9355 is payable in the office and outpatient hospital. If a provider requests that a CCP client receive this drug in the home, prior authorization must be obtained through the TMHP CCP Department.

**8.2.37.24 Injection Administration**

Injection of drugs can be intramuscular (IM), subcutaneous (SQ), or intravenous (IV) administration. SQ or IM injection administration for a therapeutic, prophylactic, or diagnostic drug is reimbursed separately from the medication. SQ or IM injection administration for therapeutic, prophylactic, or diagnostic drugs should be billed using procedure code 96372.

Injection administration is not payable to outpatient hospitals. Procedure code 96372 is limited to one per day, unless the claim clearly indicates the medications could not be mixed. Procedure code 96372 is paid in addition to an E/M or a consultation visit to ensure that each injection receives one administration fee regardless of the dosage.

Procedure code C9399 is a benefit of Texas Medicaid.
8.2.37.25 Billing for Injectable Medications

Providers must use oral medication in preference to injectable medication in the office and outpatient hospital. If an oral medication cannot be used, the claim must be billed as follows:

<table>
<thead>
<tr>
<th>Claim Form</th>
<th>Reason for Injection</th>
</tr>
</thead>
<tbody>
<tr>
<td>Modifier KX</td>
<td>• No acceptable oral equivalent is available.</td>
</tr>
<tr>
<td></td>
<td>• Injectable medication is the standard treatment of choice.</td>
</tr>
<tr>
<td></td>
<td>• The oral route is contraindicated.</td>
</tr>
<tr>
<td></td>
<td>• The client has a temperature over 102 degrees Fahrenheit (documented on the claim and in the medical record) and a high blood level of antibiotic is needed quickly.</td>
</tr>
</tbody>
</table>

Documentation must be maintained in the client’s medical record that supports the use of modifier KX.

Refer to: Subsection 8.2.33, “Immunization Guidelines and Administration,” in this handbook.

Subsection 5.3.2.6, “Administrations and Immunizations,” in Children’s Services Handbook (Vol. 2, Provider Handbooks) for information on immunizations for infants and children.

8.2.37.26 Unit Calculations for Billing Drugs

Providers must calculate the number of units to be billed on the claim based on the number of units indicated in the procedure code description and the amount of the drug actually administered. Providers should refer to the procedure code description for the unit amount to calculate the number of units to be billed.

The formula to use to calculate the appropriate quantity of units to bill is:

\[
\text{Amount administered divided by the units indicated in the procedure code description.}
\]

For example:

<table>
<thead>
<tr>
<th>Units Indicated in the Description</th>
<th>Amount Administered by the Provider</th>
<th>Calculation</th>
<th>Quantity to Bill on the Claim</th>
</tr>
</thead>
<tbody>
<tr>
<td>50 mg</td>
<td>100 mg</td>
<td>100 / 50 = 2</td>
<td>2 units</td>
</tr>
<tr>
<td>per unit</td>
<td>20 units</td>
<td>20 / 1 = 20</td>
<td>20 units</td>
</tr>
<tr>
<td>per 100 units</td>
<td>2,500 units</td>
<td>2500 / 100 = 25</td>
<td>25 units</td>
</tr>
<tr>
<td>per 50 mg</td>
<td>250 mg</td>
<td>250 / 50 = 5</td>
<td>5 units</td>
</tr>
</tbody>
</table>

Refer to: Subsection 8.2.65, “Respiratory Syncytial Virus (RSV) Prophylaxis,” in this handbook.

Claims submitted with incorrect unit calculations may cause delayed or incorrect payment.

The specific NDC of the drug actually dispensed should be entered on the claim form. Additional information about entering NDC codes is available on the NDC page of the TMHP website at www.tmhp.com.

8.2.38 Medications - Oral

Oral medications that are given in the hospital or physician’s office are a benefit to Texas Medicaid clients through Texas Medicaid. Take-home and self-administered drugs are not benefits of Texas Medicaid and should not be billed to TMHP except when they are provided to eligible Texas Medicaid clients through the Vendor Drug Program (VDP) with a prescription.
Refer to: Appendix B: Vendor Drug Program (Vol. 1, General Information).

8.2.39 Laboratory Services
Texas Medicaid benefits are provided for professional and technical services ordered by a physician and provided under the supervision of a physician in a setting other than a hospital (inpatient or outpatient). All laboratory services must be documented in the client’s medical record as medically necessary and referenced to an appropriate diagnosis. Texas Medicaid does not reimburse baseline or screening laboratory studies.

Providers may bill only for laboratory tests that are actually provided in their office. Any test sent to an outside laboratory must not be billed on the provider’s claim. Laboratories bill Texas Medicaid directly for the tests they perform.

Unless otherwise noted, interpretation of laboratory tests is considered part of the provider’s professional services (hospital, office, or emergency room visits) and must not be billed separately. Modifier Q4 is required for laboratory, radiology, and ultrasound interpretations by any provider other than the attending physician.

Laboratory tests that are generally considered part of a laboratory panel (e.g., chemistries, CBCs, urinalyses [UAs]) and that are performed on the same day must be billed as a panel regardless of the method used to perform the tests (automated or manual).

Physician interpretations that are requested of a consulting pathologist and require professional reading and reporting of results may be billed to Texas Medicaid separately as a professional charge.

All providers of laboratory services must comply with the rules and regulations of CLIA. Providers not complying with CLIA cannot be reimbursed for laboratory services.

Refer to: Subsection 2.2.5.2, “Laboratory Panels,” in Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks) for claims processing instructions.
Subsection 3.4.2, “Reimbursement,” in Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks) for claims processing instructions.

8.2.39.1 THSteps Laboratory Services
Refer to: Subsection 5.3.2.7.1, “Laboratory Services,” in Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information.

8.2.39.2 Laboratory Handling Charge
The laboratory handling charge covers the expense of obtaining and packaging the specimen and sending it to a reference laboratory.

A laboratory handling charge (procedure code 99000) may be billed if the specimen is obtained by venipuncture or catheterization and sent to an outside lab. The reference laboratory name and address or provider identifier must be listed in Block 32 of the CMS-1500 claim form, and Block 20 must be completed.

The provider is required to forward the client’s name, address, Medicaid ID number, and diagnosis, if appropriate, with the specimen to the reference laboratory so the laboratory may bill Texas Medicaid for its services.
A provider may bill only one laboratory handling charge per client visit unless the specimen is divided and sent to different laboratories or different specimens are collected and sent to different labs. The claim must indicate the name and/or address of each laboratory to which a specimen is sent for more than one laboratory handling fee to be paid. This laboratory handling benefit does not apply to THSteps medical checkup providers who must submit specimens to the DSHS Laboratory.

**8.2.39.3 Blood Counts**

Texas Medicaid considers a baseline CBC appropriate for the evaluation and management of existing and suspected disease processes. CBCs should be individualized and based on client history, clinical indications, or proposed therapy and will not be reimbursed for screening purposes.

**Refer to:** Subsection 2.2.6, “Complete Blood Count (CBC),” in Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks) for more information about blood counts.

**8.2.39.4 Clinical Lab Panel Implementation**

**Refer to:** Subsection 2.2.5.2, “Laboratory Panels,” in Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks) for more information about laboratory panels.

**8.2.39.5 Clinical Pathology Consultations**

Procedure codes 80500 and 80502 should be used for clinical pathology consultations. Providers may be reimbursed for clinical pathology consultations when the claim indicates the following information:

- The request is initiated by the client’s attending physician and includes the name and address or provider identifier of the physician requesting the consultation.
- The request relates to a test result that lies outside the normal or expected range in view of the condition of the client.
- The client’s diagnosis.
- The clinical test(s) requiring the consultation.
- A written narrative report describing the findings of the consultation, which will also be included in the client’s medical record.

If the claim does not include all of this information, the clinical pathology consultation will be denied. Clinical pathology consultations cannot be paid for surgical and anatomical pathology services or any other pathology services payable in an inpatient hospital and an outpatient hospital (e.g., bone marrows, gross and microscopic exam, etc.).

A pathology consultation must always involve medical interpretive judgment that ordinarily requires a physician. Routine conversations held between a pathologist and attending physicians about test orders or results are not consultations.

Generally, only one clinical pathology consultation should be allowed per day by the same provider. Additional consultations per day, with supporting documentation of medical necessity, will be considered for payment on an individual basis.

Payment will be considered on an individual appeal basis if a pathologist can document the medical necessity of performing these procedures.

**8.2.39.6 Cytogenetics Testing**

Cytogenetics testing is a group of laboratory tests involving the study of chromosomes.
Clinical evidence supports the significance of cytogenetics evaluation in the diagnosis, prognosis, and treatment of acute leukemias and lymphomas, especially in children. The detection of the well-defined recurring genetic abnormalities often enables a correct diagnosis with important prognostic information that affects the treatment protocol.

Reimbursement for cytogenetics testing is limited to the following diagnosis codes:

### 8.2.39.7 Maternal Serum Alpha-Fetoprotein (MSAFP)

MSAFP may be reimbursed once per pregnancy per provider for all pregnant women eligible for Medicaid. For additional services, payment is allowed with documentation attached to the claim. Procedure code 82015 should be used for MSAFP.

### 8.2.40 Lung Volume Reduction Surgery (LVRS)

LVRS is a benefit for clients who are not high risk but have a presence of severe, upper-lobe emphysema or who are not high risk but have a presence of severe, non-upper-lobe emphysema with low exercise capacity.

LVRS must be performed in a facility that meets at least one of the following requirements:

- Certified under the Disease Specific Care Certification Program for LVRS by the Joint Commission of Health Care Organization
- Identified by the National Heart, Lung, and Blood Institute
- Approved by Medicare as a lung transplant facility

The surgery must be both preceded and followed by a program of diagnostic and therapeutic services that are consistent with those provided in the National Emphysema Treatment Trial (NETT) and designed to maximize the client’s potential to successfully undergo and recover from surgery. The program must meet all of the following requirements:

- Include a 6- to 10-week series of preoperative sessions
- Include a series of postoperative sessions within 8 to 9 weeks after the LVRS
- Be consistent with the care plan that was developed by the treating physician following the performance of a comprehensive evaluation of the client’s medical, psychosocial, and nutritional needs
- Be consistent with the preoperative and postoperative services provided in NETT

---

### Interpretation and Report Procedure Code

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>5-88291</td>
<td>As medically necessary</td>
</tr>
</tbody>
</table>
• Be arranged, monitored, and performed under the coordination of the facility where the surgery takes place

LVRS (procedure code 32491) is limited to one per rolling year per client for any provider.

The following procedure codes will be denied as part of another service if they are billed for the same date of service as procedure code 32491 by any provider:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>31622</td>
</tr>
<tr>
<td>32140</td>
</tr>
<tr>
<td>32420</td>
</tr>
<tr>
<td>32820</td>
</tr>
<tr>
<td>62319</td>
</tr>
</tbody>
</table>

Procedure code 32491 will be denied as part of another service when billed for the same date of service as procedure codes 32851, 32852, 32853, 32854, 32906, and 33935.

8.2.40.1 Prior Authorization for Lung Volume Reduction Surgery

LVRS must be prior authorized and is limited to clients who have severe emphysema, disabling dyspnea, and evidence of severe air trapping. The following documentation must be submitted with the request for prior authorization:

• The client’s history and physical examination is consistent with emphysema BMI less than 31.1 kg/m² (men) or less than 32.3 kg/m² (women) stable with less than 20 mg prednisone (or equivalent) per day.

• A radiographic high resolution computer tomography (HRCT) scan has been conducted that shows evidence of bilateral emphysema.

• The forced expiratory volume in one second (FEV1) (maximum of pre- and postbronchodilator values) is less than or equal to 45 percent of the predicted value. If the client is 70 years of age and older, FEV1 is 15 percent of the predicted value or more.

• The total lung capacity (TLC) greater than 100 percent predicted postbronchodilator residual volume (RV) greater than 150 percent predicted postbronchodilator found on prerehabilitation pulmonary function study.

• The postbronchodilator TLC is greater than or equal to 100 percent of the predicted value, and the RV is greater than or equal to 150 percent of the predicted value.

• A cardiologist’s approval for surgery if one or more of the following is present:
  • Unstable angina.
  • The left-ventricular ejection fraction (LVEF) cannot be estimated from the echocardiogram.
  • LVEF is less than 45 percent.
  • A dobutamine-radionuclide cardiac scan indicates coronary artery disease or ventricular dysfunction.
  • Arrhythmia is present (greater than 5 premature ventricular contractions per minute, cardiac rhythm other than sinus, premature ventricular contractions on electrocardiogram [EKG] at rest).
  • The resting partial pressure of oxygen (PaO2) is greater than 45 mmHg.
• The resting partial pressure of carbon dioxide (PaCO2) is less than or equal to 60 mmHg on room air.
• Approval for the surgery by a pulmonary physician, thoracic surgeon, and anesthesiologist is included postrehabilitation.
• A computed tomography (CT) scan shows evidence of bilateral emphysema.
• The plasma cotinine is less than or equal to 13.7 ng/ml (if the client is not using nicotine products) or the carboxyhemoglobin is less than or equal to 2.5 percent (if the client is using nicotine products).
• The program is consistent with the care plan developed by the treating physician, and arranged, monitored, and performed under the coordination of the facility where the surgery takes place and must include:
  • A 6- to 10-week series of at least 16, and no more than 20, preoperative sessions, each lasting a minimum of 2 hours. After the preoperative rehabilitation, the client must be able to complete a 6-minute walk of more than 140 meters and successfully complete a 3-minute unloaded pedaling in an exercise tolerance test.
  • At least 6, and no more than 10, postoperative sessions, each lasting a minimum of 2 hours, within 8 to 9 weeks of the LVRS.

In addition, the client must meet all of the following conditions:
• Have a signed consent for screening and preoperative and postdischarge pulmonary surgery services associated with LVRS
• Have not smoked for 4 or more months
• Have a cardiac ejection fraction of less than 45 percent and no history of congestive heart failure or myocardial infarction within six months of consideration for surgery

Prior authorization is not required for the associated preoperative pulmonary surgery services for preparation for LVRS (procedure codes G0302, G0303, and G0304) or the associated postdischarge pulmonary surgery services after LVRS (procedure code G0305).

8.2.40.1.1 Noncovered Conditions
LVRS is not a benefit in any of the following clinical circumstances:
• A client with characteristics that carry a high risk for perioperative morbidity and/or mortality
• A disease that is unsuitable for LVRS
• A medical condition or other circumstance that makes it likely that the client will be unable to complete the preoperative and postoperative pulmonary diagnostic and therapeutic program required for surgery
• The client presents with FEV less than 20 percent of predicted value, and either a homogeneous distribution of emphysema on the CT scan or a carbon monoxide diffusing capacity of less than 20 percent of predicted value (a high-risk group identified in October 2001 by the NETT)
• The client satisfies the criteria outlined above and has severe, non-upper-lobe emphysema with a high-exercise capacity. High-exercise capacity is defined as a maximal workload at the completion of the preoperative diagnostic and therapeutic program that is above 25 watts for women or 40 watts for men (under the measurement conditions for cycle ergometry)

In addition, LVRS is contraindicated for clients who meet the following criteria:
• A previous LVRS (laser or excision)
• A pleural or interstitial disease which precludes surgery
• A giant bulla (greater than 1/3 the volume of the lung in which the bulla is located)
• A clinically significant bronchiectasis
• A pulmonary nodule requiring surgery
• A previous lobectomy
• Uncontrolled hypertension (systolic greater than 200 mm Hg or diastolic greater than 110 mm Hg)
• Oxygen requirement greater than 6 liters per minute during resting to keep oxygen saturation greater than or equal to 90 percent
• A history of recurrent infections with clinically significant production of sputum
• Unplanned weight loss greater than 10 percent within 3 months before the consideration of surgery
• Pulmonary hypertension, defined as the mean pulmonary artery pressure of 35 mmHg or greater on the right heart catheterization or peak systolic pulmonary artery pressure of 45 mmHg or greater. Right heart catheterization is required to rule out pulmonary hypertension if the peak systolic pulmonary artery pressure is greater than 45 mmHg on an echocardiogram
• Resting bradycardia (less than 50 beats per minute) or frequent multifocal premature ventricular contractions (PVCs) of complex ventricular arrhythmia or sustained supraventricular tachycardia (SVT)
• Evidence of a systemic disease or neoplasia that is expected to compromise survival

All other indications for LVRS remain noncovered.

8.2.4.1 Mastectomy and Breast Reconstruction
Mastectomy and breast reconstruction services are benefits of Texas Medicaid for male or female clients. These procedures are to be individualized, specific, and not in excess of the client’s needs.

Mastectomy and breast reconstruction procedures may be reimbursed when the procedures are consistent with confirmed diagnosis of illness or injury under treatment or with appropriate personal history.

8.2.4.1.1 Mastectomies
The following procedure codes for partial mastectomy, simple, subcutaneous, radical, and modified radical mastectomy are benefits of Texas Medicaid:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>19301</td>
</tr>
</tbody>
</table>

Procedure codes 19301 and 19302 may be reimbursed for services rendered to male or female clients of any age when the services are billed with an appropriate diagnosis code.

For clients with a diagnosis of cancer, procedure codes 19301 and 19302 may be reimbursed for more than 2 services rendered per lifetime.

Procedure codes 19303, 19304, 19305, 19306, and 19307 may be reimbursed for services rendered to male or female clients who are 18 years of age and older when the services are billed with an appropriate diagnosis code. Prior authorization is required for services rendered to clients who are 17 years of age and younger.

Procedure codes 19303, 19304, 19305, 19306, and 19307 are limited to 2 services per lifetime.
Mastectomy and breast reconstruction procedures may be reimbursed without prior authorization for services rendered to clients who are 18 years of age and older when the procedures meet the criteria outlined below and are billed with the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>1740 1741 1742 1743 1744 1745 1746 1748 1749 1750</td>
</tr>
<tr>
<td>1759 19881 2330 V103* V163* V4571* V8401*</td>
</tr>
</tbody>
</table>

*Diagnosis codes V103, V163, V4571, and V8401 may be billed only with breast reconstruction procedures and simple, subcutaneous, radical, and modified radical mastectomy procedures.

The physician must maintain documentation of medical necessity in the client’s medical record. Services are subject to retrospective review.

### 8.2.41.2 Prophylactic Mastectomies

Prophylactic mastectomy is the removal of the breast to prevent the development of cancer. This procedure is a benefit of Texas Medicaid for clients who are 18 years of age and older and who are at moderate-to-high risk for the development of breast cancer. Prior authorization is required for services rendered to clients who are 17 years of age and younger.

Moderate-risk to high-risk clients are those who meet one or more of the following criteria:

- Presence of a breast cancer 1 (BRCA1) or a breast cancer 2 (BRCA2) genetic mutation
- Presence of lesions associated with an increased risk of cancer, such as atypical hyperplasia or lobular carcinoma in situ (LCIS)
- Diagnosis of breast cancer in one breast

Refer to: Subsection 8.2.13, “BRCA Testing,” in this handbook for additional information.

Documentation that supports medical necessity for the procedure must be maintained in the client’s medical record and must include the following:

- Documentation that the client is moderate-to-high risk.
- Documentation that, as a candidate for prophylactic mastectomy, the client has undergone counseling regarding cancer risks. Counseling must include assessment of all of the following:
  - The client’s ability to understand the risks and long-term implications of the surgical procedure.
  - The client’s informed choice to proceed with the surgical procedure.

All documentation is subject to retrospective review.

### 8.2.41.3 Breast Reconstruction

Breast reconstruction following a medically necessary mastectomy is a benefit of Texas Medicaid when all of the following criteria are met:

- The client is eligible for Texas Medicaid at the time of the breast reconstruction.
- The client has a documented history of a mastectomy performed while eligible for Texas Medicaid and has one of the diagnoses listed above.

Note: Prior authorization is required for breast reconstruction service rendered to clients who do not have an established history of mastectomy procedure(s) reimbursed by Texas Medicaid for the client.

- The client meets age and sex criteria for the requested procedure as outlined above.
- The physician has documented a plan in the client’s chart that addresses the recommended breast reconstruction.
Breast reconstruction includes the following:

- Creation of a new mound.
- Reconstruction of the nipple or areola, which is accomplished with small flaps for the nipple and either tattooing or a skin graft for the areola. Nipple-areola pigmentation, commonly known as medical tattooing, is the final stage of breast reconstruction surgery.

Breast reconstruction may also include the following, in order to establish symmetry with the contralateral breast:

- Reduction mammoplasty
- Mastopexy
- Augmentation

Breast implants, tissue flaps, or both are surgically placed in the area where natural tissue has been removed.

Breast reconstruction is performed in order to correct or repair abnormal structures of the breast caused by any of the following:

- Tumor or disease (e.g. following a primary mastectomy procedure in order to establish symmetry with a contralateral breast or following bilateral mastectomy)
- Congenital defect
- Developmental abnormality
- Infection
- Trauma to the chest wall

Breast reconstruction may be based on the type of treatment a client receives or on the extent of surgery performed. The reconstructive surgery may be performed in a single stage or several stages and may occur during or after the initial surgical procedure.

The following breast reconstruction procedure codes may be reimbursed for services rendered to clients who are 18 years of age and older:

<table>
<thead>
<tr>
<th>Procedure Codes</th>

</tr>
</tbody>
</table>

* Procedure codes 19316, 19324, 19325, 19340, 19342, 19357, and 19396 may be reimbursed for services rendered to female clients only. Prior authorization is required for services rendered to male clients.

Prior authorization is required for services rendered to clients who are 17 years of age and younger. The following procedure codes may be reimbursed when performed as part of breast reconstruction:

<table>
<thead>
<tr>

</table>
The following procedure codes may be reimbursed if a mastectomy (procedure code 19303, 19304, 19305, 19306, or 19307) has been reimbursed for the client by Texas Medicaid:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>19340</td>
</tr>
<tr>
<td>S2068</td>
</tr>
</tbody>
</table>

The following procedure codes may be reimbursed if a mastectomy (procedure code 19303, 19304, 19305, 19306, or 19307) has been reimbursed by Texas Medicaid within the client’s lifetime:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>19316</td>
</tr>
</tbody>
</table>

### 8.2.41.4 Tattooing to Correct Color Defects of the Skin

Tattooing to correct color defects of the skin (procedure codes 11920, 11921, and 11922) is limited to clients who have a documented history of a breast reconstruction performed within the past 12 months. The breast reconstruction must have been performed while the client was eligible for Texas Medicaid. Prior authorization is required for tattooing services for clients who do not have an established history.

Procedure codes 11920, 11921, and 11922 are limited to two services per lifetime.

Procedure code 11922 must be billed with procedure code 11920 or 11921.

### 8.2.41.5 Treatment for Complications of Breast Reconstruction

The treatment of complications related to breast reconstruction may be reimbursed using procedure codes 19370, 19371, and 19380 when all of the following criteria are met:

- The client is eligible for the Texas Medicaid breast reconstruction benefit when the complications occur.
- The client is 18 years of age or older at the time the services are rendered.
- A breast reconstruction (procedure code 19316, 19324, 19325, 19340, 19342, 19350, 19355, 19357, 19361, 19364, 19366, 19367, 19368, 19369, or S2068) has been reimbursed for the client by Texas Medicaid.

Procedure codes 19370 and 19371 may be reimbursed for services rendered to female clients only.

Prior authorization is required for service rendered to clients who do not have an established history of related services reimbursed for the client by Texas Medicaid or for clients who do not meet age and gender criteria.

### 8.2.41.6 External Breast Prostheses

External breast prostheses are benefits when provided by a licensed prosthetist or orthotist to clients who have a history of a medically necessary mastectomy procedure. The following procedure codes may be reimbursed for external breast prostheses services rendered to female clients of any age:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>L8000</td>
</tr>
<tr>
<td>L8039</td>
</tr>
</tbody>
</table>

* Modifier LT or RT required.

Procedure codes L8001, L8010, L8020, L8030, L8031, and L8032 must be submitted with modifier LT or RT indicating the location for the breast prosthesis.
The external breast prosthesis procedure codes are limited as follows:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Limitation</th>
</tr>
</thead>
<tbody>
<tr>
<td>L8000</td>
<td>4 per rolling year</td>
</tr>
<tr>
<td>L8001</td>
<td>4 per rolling year Note: If more than 4 unilateral mastectomy bras are required per rolling year, prior authorization may be requested for the additional item(s). If a second mastectomy is performed within the same year, the bilateral procedure code must be used for the necessary mastectomy bra.</td>
</tr>
<tr>
<td>L8002</td>
<td>4 per rolling year</td>
</tr>
<tr>
<td>L8010</td>
<td>8 total per rolling year (regardless of modifier)</td>
</tr>
<tr>
<td>L8015</td>
<td>2 per lifetime</td>
</tr>
<tr>
<td>L8020</td>
<td>1 total per 6 rolling months (regardless of modifier)</td>
</tr>
<tr>
<td>L8030</td>
<td>1 total per 2 rolling years (regardless of modifier)</td>
</tr>
<tr>
<td>L8031</td>
<td>1 total per 2 rolling years (regardless of modifier)</td>
</tr>
<tr>
<td>L8032</td>
<td>8 total per rolling year</td>
</tr>
<tr>
<td>L8035</td>
<td>Prior authorization required</td>
</tr>
<tr>
<td>L8039</td>
<td>Prior authorization required</td>
</tr>
</tbody>
</table>

The following procedure codes may be reimbursed if a mastectomy (procedure code 19303, 19304, 19305, 19306, or 19307) has been reimbursed for the client by Texas Medicaid:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>L8000</td>
</tr>
</tbody>
</table>

Prior authorization is required for the initial prosthesis for clients who do not have an established history of mastectomy procedure(s) reimbursed for the client by Texas Medicaid.

Prior authorization is required for the replacement of external breast prosthesis as follows:

- If the external breast prosthesis is lost or irreparably damaged, prosthesis of the same type may be prior authorized at any time.
- If the external breast prosthesis is needed due to a change in the client’s medical condition, prosthesis of a different type may be prior authorized at any time.

**8.2.41.7 Prior Authorization Requirements for Mastectomy and Breast Reconstruction**

Prior authorization is not required when all of the following criteria are met:

- The procedure is a mastectomy.
- The procedure is a breast reconstruction and the client has an established history of mastectomy procedure(s) reimbursed for the client by Texas Medicaid.
- The client is 18 years of age or older.
- The diagnosis code is listed above.
- The client meets gender criterion.
- The request is within the limitations outlined in this section for external breast prosthesis procedure code L8000, L8001, L8002, L8010, L8015, L8020, or L8030.

Prior authorization is required when any of the following criteria is met:
• The client is 17 years of age or younger.

**Exception:** Partial mastectomy procedure codes 19301 and 19302 may be reimbursed for clients of any age and do not require prior authorization.

• The diagnosis code is not listed above.

  **Note:** If it becomes medically necessary to submit a noncovered diagnosis code that differs from the noncovered diagnosis code approved in the prior authorization, the authorization may be updated before claim submission.

• The client does not meet the gender criterion for the requested procedure.

• The client does not have an established history of related services while Medicaid-eligible as follows:
  - For breast reconstruction procedures, the client does not have an established history of mastectomy procedure(s) reimbursed for the client by Texas Medicaid.
  - For complications related to breast reconstruction, the client does not have an established history of breast reconstruction procedure(s) reimbursed for the client by Texas Medicaid.
  - For external breast prostheses, the client does not have an established history of mastectomy procedure(s) reimbursed for the client by Texas Medicaid.

• The request is for external breast prosthesis procedure code L8035 or L8039. The request must include documentation of medical necessity for the requested device.

• The request is for new or replacement external breast prostheses outside of the limitations outlined above.

Prior authorization requests for fee-for-service Medicaid clients must be submitted by the physician to the Special Medical Prior Authorization (SMPA) department. Documentation that supports medical necessity for the requested procedure must be included with the request. When required, the requests must include the physician’s original signature and the date signed. Stamped or computerized signatures and dates are not accepted. Without this information, requests will be considered incomplete.

Prior authorization requests for Primary Care Case Management (PCCM) clients must be submitted by the physician to the PCCM Prior Authorization department by telephone. Documentation that supports medical necessity for the requested procedure must be included with the request.

### 8.2.41.8 Limitations for Mastectomy and Breast Reconstruction

In the following table, the procedure codes in Column B will be denied when billed with the same date of service by the same provider as the corresponding procedure codes in Column A:

<table>
<thead>
<tr>
<th>Column A</th>
<th>Column B (Denied)</th>
</tr>
</thead>
<tbody>
<tr>
<td>19316, 19324, 19325</td>
<td>19342, 19367, 19369</td>

<td>19304</td>
</tr>
<tr>
<td>19303, 19305, 19306, 19307</td>
<td>19342</td>
</tr>
</tbody>
</table>
The following services are not benefits of Texas Medicaid:

- Mastectomy for a diagnosis of fibrocystic disease in the absence of documented risk factors.
- Cosmetic services performed primarily to improve appearance, except as outlined in this section.
• Commercial or “decorative” tattooing.
• Replacement of external breast prostheses beyond the limitations outlined in this policy, when the replacement is due to ordinary wear and tear.

8.2.42 Neurostimulators

Neurostimulator procedures and the rental or purchase of devices and associated supplies, such as leads and form fitting conductive garments are a benefit of Texas Medicaid when medically necessary.

Neurostimulator devices are considered DME, so providers must complete both the Home Health (Title XIX) DME/Medical Supplies Physician Order Form (Title XIX Form) to prescribe the DME and the DME Certification and Receipt Form to show receipt of the DME by the client. Both forms must be maintained in the client’s medical record.

Refer to: Subsection 2.2.2, “Durable Medical Equipment (DME) and Supplies,” in the Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks) for more information about DME.

Rental of equipment includes all necessary accessories, supplies, adjustments, repairs, and replacement parts.

Items and/or services addressed in the sections below are either reimbursed at a maximum fee determined by HHSC or are manually priced. If an item is manually priced, the manufacturer’s suggested retail pricing (MSRP) must be submitted for consideration of rental or purchase with the appropriate procedure codes. Manually priced items are reimbursed at the MSRP minus a discount (18 percent) as determined by HHSC.

8.2.42.1 Prior Authorization for Neurostimulators

All devices and related procedures for the initial application or surgical implantation of the stimulator device require prior authorization.

Requests for prior authorization must be submitted to the Special Medical Prior Authorization (SMPA) department with documentation supporting the medical necessity of the requested device. Providers may use the Special Medical Prior Authorization (SMPA) Request Form when they submit requests to the SMPA department.

To avoid unnecessary denials, the physician must provide correct and complete information including documentation for medical necessity of the equipment and/or supplies requested. The physician must maintain documentation of medical necessity in the client’s medical record. The requesting provider may be asked for additional information to clarify or complete a request for the equipment and/or supplies. Prior authorization requests for all neurostimulators and related procedures must include the provider identifiers for both the surgeon and the facility.

A neurostimulator device that has been purchased is anticipated to last a maximum of five years and may be considered for replacement when five years have passed and/or the equipment is no longer repairable. At that time, replacement of the device will be considered. Replacement devices require prior authorization. Replacement of equipment may also be considered when loss or irreparable damage has occurred. A copy of the police or fire report when appropriate, and the measures to be taken to prevent reoccurrence must be submitted.

8.2.42.2 Neuromuscular Electrical Stimulation (NMES)

NMES application and the rental or purchase of devices and conductive garments are a benefit of Texas Medicaid when medically necessary and prior authorized. Prior authorization requests for NMES must include documentation of a spinal cord injury or disuse atrophy that is refractory to conventional therapy.
NMES may be reimbursed using the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>64580 E0731 E0745 E0762 E0764 A4556 A4557 A4595</td>
</tr>
</tbody>
</table>

8.2.42.2.1 NMES Rental

The rental of a NMES device may be considered before purchase and is limited to a one-month trial period with consideration for one additional month’s trial with documentation of medical necessity. Supplies are considered to be part of the rental and will not be separately reimbursed. Garments may be considered for reimbursement during the rental period when medically necessary.

8.2.42.2.2 NMES Purchase

The purchase of a NMES device is limited to once per five years, and may be reimbursed when there is documentation of successful test stimulation (during rental or other therapeutic period) that showed improvement as measured by the following:

- A demonstrated increase in range of motion.
- The client’s improved ability to complete activities of daily living or perform activities outside the home.

Garments may be considered for reimbursement during the purchase period when medically necessary.

8.2.42.2.3 NMES for Muscle Atrophy

NMES may be reimbursed when used to treat muscle disuse atrophy when brain, spinal cord, and peripheral nerve supply to the muscle is intact, as well as other nonneurological reasons. Examples of NMES treatment for nonneurological reasons include, but are not limited to, casting or splinting of a limb, contracture due to scarring of soft tissue as in burn lesions, and hip replacement surgery until orthotic training begins.

8.2.42.2.4 NMES for Walking in Clients with Spinal Cord Injury (SCI)

The type of NMES that is used to enhance the ability to walk of SCI clients is commonly referred to as functional electrical stimulation (FES). These devices are surface units that use electrical impulses to activate paralyzed or weak muscles in precise sequence.

The use of NMES/FES is limited to SCI clients for walking, who have completed a training program which consists of at least 32 physical therapy sessions with the device over a period of three months.

The trial period of physical therapy will enable the physician treating the client for his or her spinal cord injury to properly evaluate the client’s ability to use NMES/FES devices frequently and for the long term. Physical therapy necessary to perform this training must be directly performed by the physical therapist as part of a one-on-one training program. The goal of physical therapy must be to train SCI clients on the use of NMES/FES devices to achieve walking, not to reverse or retard muscle atrophy.

NMES/FES used for walking is a benefit for SCI clients who have all of the following characteristics:

- Clients with intact lower motor unit (L1 and below) (both muscle and peripheral nerve).
- Clients with muscle and joint stability for weight bearing at upper and lower extremities that can demonstrate balance and control to maintain an upright support posture independently.
- Clients who demonstrate brisk muscle contraction to NMES and have sensory perception electrical stimulation sufficient for muscle contraction.
- Clients who possess high motivation, commitment and cognitive ability to use such devices for walking.
- Clients who can transfer independently and can demonstrate independent standing tolerance for at least 3 minutes.
- Clients who can demonstrate hand and finger function to manipulate controls.
- Clients with at least 6-month post recovery spinal cord injury and restorative surgery.
- Clients with hip and knee degenerative disease and no history of long bone fracture secondary to osteoporosis.
- Clients who have demonstrated a willingness to use the device long-term.

NMES/FES used for walking is not a benefit in SCI clients with any of the following:
- Cardiac pacemakers
- Severe scoliosis or severe osteoporosis
- Skin disease or cancer at area of stimulation
- Irreversible contracture
- Autonomic dyslexia

### 8.2.42.3 Transcutaneous Electrical Nerve Stimulation (TENS)

TENS involves the attachment of a transcutaneous nerve stimulator to the surface of the skin over the peripheral nerve to be stimulated.

TENS may be reimbursed for the treatment of acute postoperative pain or chronic pain that is refractory to conventional therapy.

TENS may be reimbursed using the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>64550</td>
</tr>
</tbody>
</table>

### 8.2.42.3.1 TENS Rental

Rental of a TENS device will be considered for prior authorization when there is documentation of a condition that indicates acute postoperative pain or chronic pain that is refractory to conventional therapy.

The rental of a TENS device is limited to one-month trial period with consideration for one additional month’s trial with documentation of medical necessity. Supplies, such as lead wires and electrodes, are considered to be part of the rental and will not be separately reimbursed. Garments may be considered during the rental period when medically necessary.

When the TENS device is rented for a trial period rather than supplied by the provider, the combined payment made for professional services and the rental of the stimulator must not exceed the amount which would be payable for the total service, including the stimulator, if furnished by the provider alone.

### 8.2.42.3.2 TENS Purchase

The purchase of a TENS device is limited to once every five years and may be reimbursed with prior authorization when there is documentation of the following

- A condition that indicates chronic pain that is refractory to conventional therapy.
- A successful test stimulation (during rental or other therapeutic period) that showed improvement as measured by demonstrated increase in range of motion.
- The client’s improved ability to complete activities of daily living or perform activities outside the home.
8.2.42.4 NMES and TENS Garments

The rental of the NMES/TENS garment is not covered during the trial rental period unless the client has a documented skin problem prior to the start of the trial period, and HHSC or its designee determines that use of such an item is medically necessary for the client based on the documentation submitted.

The purchase of conductive garments for NMES/TENS devices may be considered when:

- The garment has been prescribed by a physician for use in delivering covered NMES/TENS treatment.
- A NMES/TENS device has been purchased for the client’s use.
- The conductive garment is necessary for one of the medical indications outlined below:
  - The client cannot manage without the conductive garment because there is such a large area or so many sites to be stimulated and the stimulation would have to be delivered so frequently that it is not feasible to use conventional electrodes, adhesive tapes, and lead wires.
  - The client cannot manage the treatment for chronic intractable pain without the conductive garment because the areas or sites to be stimulated are inaccessible with the use of conventional electrodes, adhesive tapes, and lead wires.
  - The client has a documented medical condition such as skin problems that preclude the application of conventional electrodes, adhesive tapes, and lead wires.

Lead wires and electrodes for NMES or TENS are a benefit of Texas Medicaid only if the devices are owned by the client. Additional documentation such as the purchase date, serial number, and purchasing entity may be required.

8.2.42.5 NMES and TENS Supplies

Supplies for purchased devices are limited as follows:

- If additional electrodes are required, procedure code A4556 may be considered for reimbursement at a maximum of 15 per month.
- If additional lead wires are required, procedure code A4557 may be considered for reimbursement at a maximum of 2 per month.
- Procedure code A4595 is limited to 1 per month.

Supplies are included in the rental and will not be reimbursed separately.

Supply procedure codes A4556, A4557, or A4595 may be reimbursed with documentation of a client-owned device and without prior authorization. Additional documentation such as the purchase date, serial number, and purchasing entity of the device may be required.

8.2.42.6 Dorsal Column Neurostimulator (DCN)

DCN involves the surgical implantation of neurostimulator electrodes within the dura mater (endodural) or the percutaneous insertion of electrodes in the epidural space. The neurostimulation system stimulates pain-inhibiting nerve fibers, masking the sensation of pain with a tingling sensation (paresthesia).

DCN implantation may be reimbursed using procedure codes 61783, 63650, 63655, or 63685.

Conditions that may indicate chronic intractable pain include, but are not limited to, the following:

- Amputation “ghost” pain
- Cancer with bone metastasis
- Causalgia of upper/lower limb
• Herniated disc
• Radiculitis
• Spinal stenosis
• Spinal surgery
• Tic douloureux (trigeminal neuralgia)

8.2.42.6.1 Prior Authorization for Dorsal Column Neurostimulators
DCN electrode implantation and the purchase of devices is a benefit of Texas Medicaid when medically necessary and prior authorized.

The surgical implantation of DCN device may be considered for prior authorization for clients who have chronic intractable pain with documentation that indicates the following:

• Other treatment modalities, including pharmacological, surgical, physical, and/or psychological therapies, have been tried and shown to be unsatisfactory, unsuitable, or contraindicated for the client.
• The client has undergone careful screening, evaluation, and diagnosis by a multidisciplinary team prior to implantation.
• There has been demonstration of pain relief with a temporarily implanted electrode preceding the permanent implantation.
• All the facilities, equipment, and professional and support personnel required for the proper diagnosis, treatment, training, and follow-up of the client are available.

8.2.42.7 Intracranial Neurostimulators
The surgical implantation, revision, and removal of intracranial deep brain stimulators (DBS) are a benefit for the relief of chronic intractable pain when more conservative methods, such as TENS, PENS, or pharmacological management have failed or were contraindicated.

Intracranial neurostimulation may be reimbursed using the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>61781</td>
</tr>
<tr>
<td>61885</td>
</tr>
</tbody>
</table>

8.2.42.7.1 Prior Authorization for Intracranial Neurostimulators
Intracranial neurostimulation involves the stereotactic implantation of electrodes in the brain and is a benefit of Texas Medicaid when medically necessary and prior authorized.

The surgical implantation and purchase of an intracranial neurostimulation device may be considered for prior authorization for chronic intractable pain or treatment of intractable tremors.

Requests for prior authorization must include documentation of the following:

• Other treatment modalities, including pharmacological, surgical, physical, and/or psychological therapies, have been tried and shown to be unsatisfactory, unsuitable, or contraindicated for the client.
• The client has undergone careful screening, evaluation, and diagnosis by a multidisciplinary team prior to implantation.
• There has been demonstration of pain relief with a temporarily implanted electrode preceding the permanent implantation.
• All the facilities, equipment, and professional and support personnel required for the proper diagnosis, treatment, training, and follow-up of the client are available.

Prior authorization will not be given for the treatment of motor function disorders such as multiple sclerosis; however, the implantation, revision, and removal of deep brain stimulators may be reimbursed for the treatment of intractable tremors due to the following:

• Idiopathic Parkinson’s disease
• Essential tremor

8.2.42.8 Percutaneous Electrical Nerve Stimulation (PENS)

PENS is a benefit of Texas Medicaid when medically necessary and prior authorized. Devices and supplies are considered a part of the service and are not separately reimbursable.

PENS is a diagnostic procedure for the treatment of chronic pain involving the stimulation of peripheral nerves by a needle electrode inserted through the skin.

8.2.42.8.1 Prior Authorization for PENS

PENS services may be reimbursed with prior authorization for clients who meet the following criteria:

• The client has a diagnosis that indicates chronic pain, which is refractory to conventional therapy.
• Treatment with TENS has failed or is contraindicated for the client.

PENS may be reimbursed using the following procedure codes: 64553, 64555, or 64590. The revision or removal of a peripheral neurostimulator used in PENS therapy may be reimbursed without prior authorization using procedure code 64595.

8.2.42.9 Sacral Nerve Stimulators (SNS)

SNS are a benefit of Texas Medicaid when medically necessary and prior authorized. SNS implantation may be reimbursed using procedure code 64561, 64581, or 64590.

SNS are pulse generators that transmit electrical impulses to the sacral nerves through a surgically implanted wire for treatment of urinary retention, urinary frequency, and urinary/fecal incontinence.

8.2.42.9.1 Prior Authorization for SNS

The surgical implantation of SNS and purchase of a device may be considered for prior authorization with the following diagnosis codes: 59655, 78820, 78831, 78841, or 78760.

Additionally, the medical record of the client must have documentation of the following:

• The urinary retention, urinary frequency, and urinary/fecal incontinence are refractory to conventional therapy (documented behavioral, pharmacological, and/or surgical corrective therapy).
• The client is an appropriate surgical candidate such that implantation with anesthesia can occur.

8.2.42.10 Vagal Nerve Stimulators (VNS)

VNS are a benefit of Texas Medicaid when medically necessary and prior authorized, for the treatment of intractable partial onset seizures.

VNS are devices that deliver electrical pulses to the cervical portion of the vagus nerve by an implanted generator.

8.2.42.10.1 Prior Authorization for VNS

The surgical implantation and purchase of VNS devices may be considered for prior authorization with the following diagnosis codes: 34541 or 34551.

The surgical implantation of VNS may be reimbursed using procedure code 61885, 61886, 64553, or 64568.
VNS are not a benefit of Texas Medicaid in the following cases:

- For the treatment of clients with an absent left vagus nerve
- For the treatment of clients with depression
- For the treatment of clients with progressive fatal or medical diseases with a poor prognosis

Disabilities due to mental retardation or cerebral palsy may confound the assessment of benefits resulting from VNS. When a diagnosis of mental retardation or cerebral palsy exists, the treating physician must document in the medical record how VNS will measurably benefit the client in spite of mental retardation or cerebral palsy.

8.2.42.11 Prior Authorization of Neurostimulator Devices Procedure Codes

The following device procedure codes may be reimbursed with prior authorization:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>E0740</td>
</tr>
</tbody>
</table>

To identify the service as a VNS device, procedure code L8686 must be submitted with modifier TG. Only one similar device code may be reimbursed per date of service for any client.

8.2.42.12 Supplies for Neurostimulators

Supply procedure codes A4290, C1883, C1897, and L8680 may be reimbursed if there is documentation of a client-owned device. Additional documentation such as the purchase date, serial number and purchasing entity may be required. Only one similar supply code may be reimbursed per day by any provider.

8.2.42.13 Electronic Analysis for Neurostimulators

The following procedure codes may be reimbursed without prior authorization for the electronic analysis of the implanted neurostimulator:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>95970</td>
</tr>
</tbody>
</table>

8.2.42.14 Revision or Removal of Neurostimulator Devices

The revision or removal of implantable neurostimulators may be reimbursed without prior authorization for clients who have a history of neurostimulator implantation or device purchase using the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>63661</td>
</tr>
</tbody>
</table>

8.2.42.15 Noncovered Neurostimulator Services

The following services are not a benefit of Texas Medicaid:

- VNS and associated equipment and supplies are not a benefit when provided for the treatment of depression.
- Gastric neurostimulation (GNS) and associated equipment and supplies.
- Neurostimulator services for indications or diagnoses other than those outlined above.
8.2.43 Newborn Services

The newborn period is defined as the time from birth through 28 days of life. This section addresses routine newborn care, attendance at delivery, newborn resuscitation, neonatal critical care, and intensive (noncritical) low birth weight services.

Retrospective review may be performed to ensure documentation supports the medical necessity of the service and any modifier used when billing a claim.

Modifier 25 may be used to identify a significant separately identifiable E/M provided on the same day by the same physician as a procedure or other service. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client’s medical record and made available to Texas Medicaid upon request.

Physician standby (procedure code 99360) is not a benefit.

Note: Some of the services addressed in this section may also be used for care beyond 28 days of life.

Refer to: Subsection 8.2.57, “Physician Evaluation and Management (E/M) Services,” in this handbook.
Subsection 2.5.5, “Cardiorespiratory (Apnea) Monitor,” in Children’s Services Handbook (Vol. 2, Provider Handbooks) for authorization of apnea monitors through CCP.

8.2.43.1 Circumcisions for Newborns

Texas Medicaid may provide reimbursement for circumcisions billed with procedure code 54150 or procedure code 54160.

8.2.43.2 Claims Filing Instructions and Eligibility Requirements

Claims submitted for services provided to a newborn child that is eligible for Texas Medicaid should be filed using the newborn child’s Texas Medicaid client number. Filing a claim for a newborn client under the mother’s client number may cause a delay in claim payment. For information on the newborn’s eligibility status, call TMHP at 1-800-925-9126. Claims with charges for newborn care must be submitted separately from claims with charges for the mother eligible for Medicaid.

Exception: Services for a newborn’s unsuccessful resuscitation may be billed under the mother’s Texas Medicaid number using procedure code 99499.

Note: Newborns are enrolled in the same STAR Program health plan that the mother is enrolled in, if the mother is eligible for Medicaid and enrolled in the plan on the date of birth. Check with individual health plans on the billing of newborn claims.

Also, the Texas Medicaid claim filing deadline is based on claim receipt within 95 days of the date of service or 95 days of the date the client’s eligibility information is added to TMHP’s eligibility file (in the case of retroactive eligibility). Retroactive eligibility occurs when an individual has been approved for Texas Medicaid coverage but has not yet been assigned a Texas Medicaid client number at the time of services. The add date is the date the client’s eligibility was added to the eligibility file. Client eligibility information is available through the Automated Inquiry System (AIS).

A newborn child is eligible for Texas Medicaid for up to one year if all the following conditions are met:

- The mother is receiving Medicaid at the time of the child’s birth.
- The child continues to live with the mother.
- The mother continues to be eligible for Medicaid or would be eligible for Medicaid, if she were pregnant. It is not acceptable for a provider to require a deposit for newborn care from a client. The child’s eligibility ceases, if the mother relinquishes her parental rights or it is determined that the child is not a member of her household.
To provide information about each child born to a mother eligible for Medicaid, FQHCs, hospitals, birthing centers, and FQHCs with birthing centers should complete Form MD.3, "Hospital Report (Newborn Child or Children) (Form 7484)" and submit it to DADS Data Control within five days of the child’s birth. If the newborn’s name is known, the full name must be on the form. The use of Baby Boy or Baby Girl delays the assignment of a number. Filing this form expedites the assignment of a Medicaid number for the newborn child. Do not complete this form for stillbirths.

The facility should complete this form within five days of the child’s birth and send it to DADS at the address referenced on the form. This five-day time frame is not mandatory; however, prompt submission expedites the process of determining the child’s eligibility. Facilities should duplicate the form as needed; duplicates are not supplied by HHSC, DADS, or TMHP.

On receipt of a completed Form 7484, DADS Data Control verifies the newborn’s eligibility and within ten workdays, sends notices to the mother, caseworker, hospital, birthing center, and attending physician, if identified. The notice includes the child’s Medicaid client number and the effective date of coverage. After the child has been added to the HHSC eligibility file, HHSC issues a Medicaid Identification Form (Form H3087).

The attending physician’s notification letter is sent to the address on file by license number at the Texas Medical Board. It is imperative that this address be kept current to ensure timely notification of attending physicians. Physicians should submit address changes to the following address:

Texas Medical Board  
PO Box 2018  
Austin, TX 78768-2018

Refer to: “Automated Inquiry System (AIS)” in “Preliminary Information” (Vol. 1, General Information).

Retrospective review may be performed to ensure documentation supports the medical necessity of the service and any modifier used when billing a claim.

8.2.43.3 Potential SSI/Medicaid Eligibility for Premature Infants

The Supplemental Security Income (SSI) program includes financial and Medicaid benefits for people who are disabled. When determining eligibility for SSI, the Social Security Administration (SSA) must establish that the person meets financial and disability criteria. When determining financial eligibility for a newborn child, SSA does not consider the income and resources of the child’s parents until the month following the month the child leaves the hospital and begins living with the parents. Determinations of disability are made by the state’s Disability Determination Services and may take several months.

Federal regulations state that infants with birth weights less than 1,200 grams are considered to meet the SSI disability criteria.

The SSA issued a new policy to local SSA offices to make presumptive SSI disability decisions and payments for these children, making it possible for a child to receive SSI and Medicaid benefits while waiting for a final disability determination to be made by Disability Determination Services.

The child’s parent or legal guardian must file an SSI application with the SSA. It is in the child’s best interest that the application with the SSA be filed as soon as possible after birth. The SSA accepts a birth certificate with the child’s birth weight or a hospital medical summary as evidence for the presumptive disability decision.

Providers should not change their current newborn referral procedures to HHSC for children born to mothers eligible for Medicaid as described in this section. However, providers are encouraged to refer parents and guardians of low birth weight newborns to the local SSA office for an SSI application.
### 8.2.43.4 Hospital Visits and Routine Care

The following procedure codes may be reimbursed for neonatal care and intensive care services:

<table>
<thead>
<tr>
<th>Service</th>
<th>Procedure Code(s)</th>
<th>Benefit(s) and Limitation(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Initial hospital E/M admission</td>
<td>99221, 99222, 99223</td>
<td>If the client is readmitted within the first 28 days of life, the provider must bill an initial hospital evaluation and management (E/M) admission. Reimbursed one per day, any provider.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Hospital discharge</td>
<td>99238, 99239</td>
<td>Reimbursed for the client’s discharge from the hospital.</td>
</tr>
<tr>
<td>Subsequent hospital and hospital consultation services</td>
<td>99251, 99252, 99253, 99254, 99255</td>
<td>Services for a client who is not critically ill and unstable but who happens to be in a critical care unit must be reported using subsequent hospital codes (99478, 99479, and 99480) or hospital consultation codes (99251, 99252, 99253, 99254, and 99255).</td>
</tr>
<tr>
<td>Initial newborn care</td>
<td>99460*</td>
<td>May be reimbursed once per lifetime, any provider. May be reimbursed when billed with a well newborn diagnosis code.</td>
</tr>
<tr>
<td>Normal newborn care</td>
<td>99461*</td>
<td>May be reimbursed once per lifetime, any provider. Subsequent visits must be billed using an appropriate visit code based on the place of service. May be reimbursed when billed with a well newborn diagnosis code.</td>
</tr>
<tr>
<td>Subsequent hospital care</td>
<td>99462</td>
<td>Reimbursable once per day in the hospital. Procedure code 99462 is not reimbursable in the birthing center. May be reimbursed when billed with a well newborn diagnosis code.</td>
</tr>
<tr>
<td>Newborn admission and discharge, same date</td>
<td>99463**</td>
<td>May be reimbursed once per lifetime when submitted by any provider. Reimbursed for newborns who are admitted and discharged on the same day from the hospital or birthing room setting (either hospital or birthing center). May be reimbursed when billed with a well newborn diagnosis code.</td>
</tr>
<tr>
<td>Attendance at delivery</td>
<td>99464</td>
<td>May be reimbursed once, and only on the day of delivery, when billed by a physician other than the delivering physician.</td>
</tr>
<tr>
<td>Newborn resuscitation</td>
<td>99465</td>
<td>Reimbursed for the resuscitation of the newborn.</td>
</tr>
</tbody>
</table>

* Newborn examinations billed with procedure codes 99460, 99461, and 99463 may be counted as a THSteps periodic medical checkup when all necessary components are completed and documented in the medical record. If a brief newborn examination is performed that does not fulfill periodic checkup criteria, procedure code 99460, 99461, or 99463 may be reimbursed with modifier 52.

** If the client is readmitted within the first 28 days of life, the provider must bill an initial hospital evaluation and management (E/M) admission (procedure code 99221, 99222, or 99223).
Refer to: Section 5, “THSteps Medical” in Children’s Services Handbook (Vol. 2 Provider Handbooks).

Subsection 5.3.1.8, “Newborn Examination,” in Children’s Services Handbook (Vol. 2 Provider Handbooks) for a list of the required components for an initial THSteps exam.

Retrospective review may be performed to ensure documentation supports the medical necessity of the service and any modifier used when billing a claim.

Procedure codes 99460, 99461, 99462, and 99463 may be reimbursed when billed with one of the following well newborn diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>V290 V291 V292 V293 V298 V299 V3000 V3001 V301 V302</td>
</tr>
<tr>
<td>V3100 V3101 V311 V312 V3200 V3201 V321 V322 V3300 V3301</td>
</tr>
<tr>
<td>V331 V332 V3400 V3401 V341 V342 V3500 V3501 V351 V352</td>

</tr>
<tr>
<td>V391</td>
</tr>
</tbody>
</table>
In the following table, procedure codes in Column A will be denied when billed with the same date of service by the same provider as a procedure code in Column B:

<table>
<thead>
<tr>
<th>Column A (Denied)</th>
<th>Column B</th>
</tr>
</thead>
<tbody>
<tr>
<td>99238, 99239</td>
<td>99460, 99461, 99463</td>
</tr>
<tr>
<td>99462</td>
<td>99238, 99239, 99460, 99461</td>
</tr>
<tr>
<td>99469</td>
<td>99468, 99477</td>
</tr>
<tr>
<td>99478, 99479, 99480</td>
<td>99471, 99472</td>
</tr>
</tbody>
</table>

The following procedure codes will be denied when billed on the same day, by the same provider as procedure codes 99460, 99461, and 99462:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>G0102 43752 93040 93041 93042 94002 94003 95831 95832 95833</td>
</tr>
<tr>
<td>95834 95851 95852 96523 97802 97803</td>
</tr>
</tbody>
</table>

The following procedure codes will be denied when billed on the same day, by the same provider as procedure code 99463:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>G0102 43752 94002 94003 95831 95832 95833 95834 95851 95852</td>
</tr>
<tr>
<td>96523 97802 97803 99460 99461 99462</td>
</tr>
</tbody>
</table>

The following procedure codes will be denied when billed with the same date of service by the same provider as procedure code 99464:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>G0102 43752 94002 94003 95831 95832 95833 95834 95851 95852</td>
</tr>
<tr>
<td>96523 97802 97803</td>
</tr>
</tbody>
</table>

Modifier 25 may be used to identify a significant separately-identifiable E/M service performed by the same physician on the same day as the procedure or other service. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client’s medical record and made available to Texas Medicaid upon request.

The following procedure codes will be denied when billed with the same date of service by the same provider as procedure code 99465:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>G0102 43752 94002 94003 95831 95832 95833 95834 95851 95852</td>
</tr>
<tr>
<td>96523 97802 97803</td>
</tr>
</tbody>
</table>

The following procedure codes will be denied when billed with procedure codes 99468, 99469, 99477, 99478, 99479, and 99480:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>G0102 M0064 31500 36000 36140 36400 36405 36406 36410 36420 36430 36440 36510 36555 36568 36591 36600 36620 36660 43752</td>
</tr>
</tbody>
</table>

*Procedure codes are not bundled with procedure codes 99478, 99479, and 99480.
** Procedure codes are not bundled with procedure code 99480.
8.2.43.5 Newborn Hearing Screening

The newborn hearing screening procedure is a screening procedure, not diagnostic, and will not be reimbursed separately from the usual inpatient newborn delivery payment. Special investigations and examination codes are not appropriate for use with hearing screening of infants. For more information on newborn hearing screening, providers may contact:

Texas Early Hearing Detection and Intervention
PO Box 149347, MC-1918
Austin, TX. 78714-9347
1-512-458-7111, Ext. 2600
www.dshs.state.tx.us/audio

Refer to: Section 2, “Nonimplantable Hearing Aid Devices and Related Services” in Vision and Hearing Services Handbook (Vol. 2, Provider Handbooks)

Subsection 5.3.2.4.2, “Hearing Screening,” in Children’s Services Handbook (Vol. 2, Provider Handbooks) for additional information about hearing screenings.

8.2.44 Obstetrics and Prenatal Care

Medicaid reimburses prenatal care, deliveries, and postpartum care as individual services. Providers may choose one of the following options for billing maternity services:

- Providers may itemize each service individually on one claim form and file at the time of delivery. The filing deadline is applied to the date of delivery.

- Providers may itemize each service individually and submit claims as the services are rendered. The filing deadline is applied to each individual date of service.

Providers who only provide prenatal care and choose to submit prenatal visit charges on one claim form have the filing deadline applied to the estimated date of confinement (EDC) that must be stated in Block 24D of the CMS-1500 claim form.

Laboratory (including pregnancy tests) and radiology services provided during pregnancy must be billed separately and claims must be received by TMHP within 95 days of the date of service.
When billing for prenatal services, use modifier TH with the appropriate evaluation and management procedure code to the highest level of specificity. Failure to use modifier TH may result in recoupment of payment rendered.

Providers must bill the most appropriate new or established patient prenatal or postnatal visit procedure code. New patient codes may be used when the client has not received any professional services from the same physician or a physician of the same specialty who belongs to the same group, within the past three years.

Physicians (obstetricians, family practice physicians, and maternal-fetal medicine specialists), CNMs, and maternity service clinics (MSCs) are limited to 20 prenatal care visits per pregnancy and two postpartum care visits after discharge from the hospital. Routine pregnancies are anticipated to require around 11 visits per pregnancy, and high-risk pregnancies are anticipated to require around 20 visits per pregnancy.

More frequent visits may be necessary for high-risk pregnancies. High-risk obstetrical visits are not limited to 20 visits per pregnancy. The provider can appeal with documentation supporting a complication of pregnancy. Documentation reflecting the need for increased visits must be maintained in the physician’s files and is subject to retrospective review.

Prenatal and postpartum care visits billed in an inpatient hospital (POS 3) are denied as part of another procedure when billed within the three days before delivery or the six weeks after delivery. The inpatient intrapartum and postpartum care are included in the fee for the delivery or Cesarean section and should not be billed separately.

Postpartum care provided after discharge must be billed using procedure code 59430. A maximum of two postpartum visits are allowed.

Any other E/M office visit will not be reimbursed when billed with the same date of service, by the same provider, as any antenatal or postpartum office visit. Modifier 25 may be used to identify a significant, separately identifiable E/M service performed by the same physician on the same date of service as the procedure or other service. Documentation that supports the provision of a significant, separately-identifiable E/M service must be maintained in the client’s medical record and made available to Texas Medicaid upon request.

Delivering physicians who perform regional anesthesia or nerve block do not receive additional reimbursement because these charges are included in the reimbursement for the delivery except as outlined under subsection 8.2.6.3, “Anesthesia for Labor and Delivery” in this handbook. Medicaid may reimburse only one delivery or Cesarean section procedure code per client in a seven-month period; reimbursement includes multiple births.

Procedure code 99140 is not considered for reimbursement when submitted with diagnosis code 650 for a normal delivery or with diagnosis code 66970 or 66971 for a Cesarean delivery when one of these diagnosis codes is documented on the claim as the referenced diagnosis. The referenced diagnosis must indicate the complicating condition. An emergency is defined as a situation when delay in treatment of the client poses a significant health threat to a client’s life, bodily organ, or body part.

Hospital admissions resulting from conditions or comorbidities complicating labor should be billed using the appropriate E/M procedure codes. These codes are not subject to the three-day pre-care period but are not payable on the date of delivery or the following six-week post-care period.

Refer to: Subsection 8.2.6, “Anesthesia,” in this handbook for complete information about anesthesia for obstetrical procedures.

8.2.44.1 Amniocentesis, Cordocentesis, and Ultrasonic Guidance

Procedure code 59001 is restricted to diagnosis codes 65700, 65701, and 65703.

Procedure codes 57410, 59000, 76941, 76942, 76945, and 76946 will be denied if billed with the same date of service by the same provider as procedure code 59001.
Cordocentesis and ultrasonic guidance procedure code 76941 are benefits of Texas Medicaid when billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>64190</td>
</tr>
<tr>
<td>67800</td>
</tr>
</tbody>
</table>

The Medical Director reviews cordocentesis requests on a case-by-case basis for diagnosis codes other than those listed above.

Procedure code 57410 or 76942 will be denied if billed with the same date of service by the same provider as procedure code 59012.

Cordocentesis or umbilical blood sampling is included in the global fee for procedure code 36460.

**8.2.44.2 External Cephalic Version**

External cephalic version is the external manipulation of a fetus to alter its position in the uterus to make it more favorable for delivery.

Procedure code 59412 is payable in the inpatient hospital (POS 3) or outpatient hospital (POS 5) setting when billed as an independent procedure performed by a physician at least one day before delivery. Procedure code 59412 billed on the same day as a delivery by the same provider is denied.

Emergency room and subsequent hospital care visit procedure codes billed the same day as external cephalic version by the same provider are denied.

**8.2.44.3 Fetal Fibronectin**

Procedure code 82731 is a benefit of Texas Medicaid and may be considered for reimbursement when the fetal gestational age is 23 weeks through 34 weeks on the date the service was provided.

Fetal fibronectin is limited to threatened preterm labor using diagnosis code 64400 or 64403.

**8.2.44.4 Fetal Intrauterine Transfusion (FIUT)**

FIUT (procedure code 36460) is limited to the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>64190</td>
</tr>
<tr>
<td>67800</td>
</tr>
</tbody>
</table>

FIUT is reimbursed as a global fee and, therefore, includes all other services provided by the same physician, including umbilical blood sampling or cordocentesis.

In addition to the physician performing the FIUT, another physician may assist with echography control. Procedure code 76941 may be reimbursed separately when billed by a different physician.

**8.2.44.5 Doppler Studies**

Umbilical artery Doppler (procedure code 76820) is limited to the following indications, as supported by the American College of Obstetricians and Gynecologists (ACOG):

- Suspected intrauterine growth restriction (IUGR)
- Post-term gestation
- Diabetes mellitus
- Systemic lupus erythematosus or antiphospholipid antibody syndrome
Middle cerebral artery Doppler (procedure code 76821) is indicated, but not limited to, fetuses who are alloimmunized.

**8.2.44.6 Fetal Echocardiography**

Fetal echocardiography (procedure codes 76825, 76826, 76827, and 76828) may be reimbursed for the following risk factors and syndromes:

**Fetal Risk Factors**
- Extracardiac anomalies (including chromosomal and anatomic)
- Fetal cardiac dysrhythmia (including irregular rhythm, tachycardia, and bradycardia)
- Nonimmune hydrops fetalis
- Suspected cardiac anomaly on ultrasound
- Abnormal fetal situs

**Maternal Risk Factors**
- Congenital heart disease
- Cardiac teratogen exposure (including lithium, alcohol, phenytoin, trimethadione, and isoretinoin)
- Maternal metabolic disorders (including diabetes mellitus and phenylketonuria)

**Familial Risk Factors**
- Congenital heart disease (including previous sibling and paternal)

**Syndromes**
- Marfan’s
- Noonan’s
- Tuberous sclerosis

**8.2.44.7 Obstetric Ultrasound**

Ultrasound of the pregnant uterus is a benefit of Texas Medicaid when medically indicated. Ultrasound may be indicated for suspected genetic defects, high risk pregnancy, and fetal growth retardation.

The following procedure codes for ultrasound of the pregnant uterus are limited to a total of three per pregnancy:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>76801</td>
</tr>
<tr>
<td>76817</td>
</tr>
</tbody>
</table>

The limit of three obstetric ultrasounds per pregnancy does not apply to obstetric ultrasound procedures that are rendered in the emergency room, outpatient observation, or inpatient hospital setting. Obstetric ultrasounds provided in the emergency department must be submitted with modifier U6 when submitted on the professional claim form in order to be considered for payment. Obstetric ultrasounds provided in the emergency department or during a hospital observation stay must be submitted with the appropriate corresponding emergency services or hospital observation revenue code in order to be considered for payment.

The initial three claims paid for obstetric ultrasounds do not require prior authorization. Any obstetric ultrasound claims submitted with or without prior authorization for the initial three will count toward the three-per-pregnancy limit. If it is medically necessary to perform more than three obstetrical ultra-
sounds on a client during one pregnancy, the provider must request prior authorization with documentation of medical necessity using the Form MD.8, “Obstetric Ultrasound Prior Authorization Request Form” in this handbook.

Texas Medicaid follows the ACOG indications for sonography. First trimester ultrasounds may be medically necessary for, but are not limited to, the following reasons:

- To confirm the presence of an intrauterine pregnancy
- To evaluate a suspected ectopic pregnancy
- To evaluate vaginal bleeding
- To evaluate pelvic pain
- To estimate gestational age
- To diagnose or evaluate multiple gestation
- To confirm cardiac activity
- As an adjunct to chorionic villus sampling or localization and removal of an intrauterine device
- To assess certain fetal anomalies, such as anencephaly, in clients at high risk
- To evaluate maternal pelvic or adnexal masses or uterine abnormalities
- To screen for fetal aneuploidy
- To evaluate a suspected hydatidiform mole

Second and third trimester ultrasounds may be medically necessary for the following reasons:

- To estimate fetal age
- To evaluate fetal growth
- To evaluate vaginal bleeding
- To evaluate cervical insufficiency
- To evaluate abdominal and pelvic pain
- To determine fetal presentation
- As an adjunct to amniocentesis or other procedure
- To evaluate suspected multiple gestation
- To evaluate a significant discrepancy between uterine size and clinical dates
- To evaluate a pelvic mass
- To evaluate a suspected hydatidiform mole
- As an adjunct to cervical cerclage placement
- To evaluate a suspected ectopic pregnancy
- To evaluate suspected fetal death
- To evaluate suspected uterine abnormality
- To evaluate fetal well-being
- To evaluate suspected amniotic fluid abnormalities
- To evaluate suspected placental abruption
- As an adjunct to external cephalic version
• To evaluate premature rupture of membranes or premature labor
• To evaluate abnormal biochemical markers
• As a follow-up evaluation of a fetal anomaly
• As a follow-up evaluation of placental location for suspected placenta previa
• To evaluate clients who have a history of previous congenital anomaly
• To evaluate fetal condition in late registrants for prenatal care
• To assess findings that may increase the risk of aneuploidy
• To screen for fetal anomalies

The Obstetric Ultrasound Prior Authorization Request Form must be completed, signed, dated, and maintained in the client’s medical record by the provider ordering the test, regardless of the method of request for authorization. A physician, nurse practitioner (NP), clinical nurse specialist (CNS), certified nurse midwife (CNM), or physician assistant (PA) may sign the Obstetric Ultrasound Prior Authorization Request Form. Residents may order obstetric ultrasounds; however, the attending physician must sign the authorization form and include the group or supervising provider identifier on the form.

The provider’s signature must be current, unaltered, original, and handwritten. A computerized or stamped signature or date will not be accepted.

The form must include information related to medical necessity of the test including all of the following:
• Procedure code requested (CPT code) and quantity requested
• The trimesters during which the requested ultrasounds will be performed
• The date range during which the procedures will be performed
• Client’s estimated date of confinement (EDC) at the time the request is submitted
• Diagnosis

Additional documentation to support medical necessity may include any of the following:
• Treatment history
• Treatment plan
• Medications
• Previous imaging results

When requesting retroactive authorization, providers must submit the request no later than 14 calendar days beginning the day after the study is completed.

Providers can submit requests for prior authorization or retroactive authorization by phone, by fax, online, or by mailing to:

Texas Medicaid & Healthcare Partnership
Inpatient/Outpatient Prior Authorization
12357-B Riata Trace Parkway Ste. 150
Austin, TX 78727

Reimbursement for obstetric ultrasounds may be considered on appeal when submitted with documentation that indicates any one of the following:
• Ultrasound was performed for a different pregnancy.
• The provider was unable to obtain the previous ultrasound records from a different provider.
The provider was new to treating the client and was not aware the client had already had three obstetric ultrasounds.

Only one appeal will be considered per client for the same provider. Providers must obtain prior authorization for any additional obstetric ultrasounds performed after the appealed service.

The following procedure codes must be billed together:

- Procedure code 76802 must be billed in conjunction with primary procedure code 76801.
- Procedure code 76810 must be billed in conjunction with primary procedure code 76805.
- Procedure code 76812 must be billed in conjunction with primary procedure code 76811.
- Procedure code 76814 must be billed in conjunction with primary procedure code 76813.

*Note:* Add-on procedure codes (76802, 76810, 76812, and 76814) do not count toward the three-per-pregnancy limitation.

The following table includes procedure codes that will be denied as part of another procedure when billed on the same date of service by the same provider:

<table>
<thead>
<tr>
<th>Procedure Code Is Denied</th>
<th>When Billed with Procedure Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>76810, 76812, 76815, and 76816</td>

</tbody>
</table>

### 8.2.44.8 Prenatal Surveillance

Prenatal surveillance includes fetal contraction stress test (procedure code 59020), fetal nonstress test (procedure code 59025), and fetal biophysical profile with or without nonstress testing (procedure code 76818 or 76819). According to guidelines established by ACOG, some of the conditions under which testing may be appropriate include, but are not limited to, the following maternal and pregnancy related conditions:

**Maternal Conditions**

- Antiphospholipid syndrome
- Hyperthyroidism (poorly controlled)
- Hemoglobinopathies (hemoglobin SS, SC, or S-thalassemia)
- Cyanotic heart disease
- Systemic lupus erythematosus
- Chronic renal disease
- Type I diabetes mellitus
- Hypertensive disorders
Pregnancy Related Conditions

- Pregnancy-induced hypertension
- Decreased fetal movement
- Oligohydramnios
- Polyhydramnios
- Intrauterine growth restriction
- Post-term pregnancy
- Isoimmunization (moderate to severe)
- Previous fetal demise (unexplained or recurrent risk)
- Multiple gestations (with significant growth discrepancy)

Procedure code 59025 is payable in the office setting only and procedure code 59020 is payable in the inpatient and outpatient hospital settings only.

Procedure codes 59020 and 59025, when billed with revenue code 729 for outpatient facilities, may be reimbursed on the same day by a different provider without appeal. However, procedure codes 59020 and 59025, billed with revenue code 729 more than once per day by the same provider, will be denied. The provider may appeal with documentation supporting the performance of the test more than once on the same day by the same provider.

Procedure code 57410 will be denied if billed with the same date of service by the same provider as procedure code 59020 or 59025.

Fetal biophysical profile (procedure codes 76818 and 76819) may be reimbursed separately when billed with one of the following procedure codes on the same day:

<table>
<thead>
<tr>
<th>Procedure Codes</th>

</table>

To prevent repeat unintended or unwanted pregnancies, physicians are urged to include family planning services or referrals in the maternity care of the client. Genetic diagnosis and counseling is also available through Texas Medicaid for clients suspected of having a genetic disorder for informed reproductive decision making.

Refer to: Section 2, “Medicaid Title XIX family planning services” in Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks).

8.2.44.9 Documentation Requirements for Diagnostic Studies

Texas Medicaid requires providers to follow the documentation requirements as set forth in the Diagnostic Ultrasound section of the Current Procedural Terminology (CPT) manual for the diagnostic studies of the fetus, including when ultrasound is used to guide a procedure.

Documentation requirements set forth in the CPT manual include, but are not limited to, the following:

- Permanently recorded images with measurements, when measurements are clinically indicated.
- Final written report included in the client’s medical record (includes written interpretation).
- Report must include description of elements that comprised a “complete” or “limited” exam, and the reasons an element could not be visualized.
- Permanently recorded images are also required for ultrasound guidance procedures of the site to be localized. In addition, description of the localization process, either separately or within the report of the procedure, when the guidance is used.
Permanently recorded images must be made available on request by HHSC.

Medical record documentation must include assessment findings that substantiate the medical necessity for each diagnostic test.

### 8.2.44.10 Required Screening of Pregnant Women for Syphilis, HIV, and Hepatitis B

Providers are required to perform serologic testing during pregnancy for syphilis, HIV and hepatitis B (Health and Safety Code §81.090).

#### 8.2.44.10.1 HIV Testing

An HIV test must be performed at the first prenatal care visit and during the third trimester of pregnancy.

If there is no record of a third-trimester test when a woman arrives at labor and delivery, a test must be immediately performed. The laboratory must provide the results of the test to the provider within six hours of the submission of the sample. If there is no record of a third-trimester test and no test was performed during labor and delivery, the infant must be tested within two hours of birth, and those test results must be provided to the provider within six hours of the submission of the sample.

If a pregnant woman refuses HIV testing, the attending health care provider must make a note in the client’s record of the following:

- The HIV test was offered.
- The patient declined testing.
- A referral to an anonymous testing site was made.
- The patient was provided with appropriate literature.

#### 8.2.44.10.2 Hepatitis B and Syphilis Screening

Providers and hospitals are required to screen all pregnant women for hepatitis B surface antigen and syphilis at their first prenatal visit and at delivery. Pregnant women who have perinatal hepatitis B and test positive for hepatitis B surface antigen must be reported to DSHS (25 TAC §97.3). The Perinatal Hepatitis B Prevention Program manual, reporting forms, and information brochures are available at www.texasperinatalhepb.org. Providers may also contact the Perinatal Hepatitis B Prevention Program Coordinator at 1-512-458-7447.

### 8.2.45 Occupational Therapy (OT) Services

Occupational therapy (OT) is a payable benefit to physicians.

**Refer to:** Section 4, “Therapists, Independent Practitioners, and Physicians” in Nursing and Therapy Services Handbook (Vol. 2, Provider Handbooks) for information about occupational therapy services provided by a physician.

### 8.2.46 Ophthalmology

When an ophthalmologist sees a client for a minor condition that does not require a complete eye exam, such as conjunctivitis, providers are to use the appropriate office E/M code.

Providers are to use the eye exam procedure codes with a diagnosis of ophthalmological disease or injury.

#### 8.2.46.1 Corneal Transplants

Corneal transplants are benefits of Texas Medicaid. Corneal transplants are subject to global surgery fee guidelines. Procedure codes 65710, 65730, 65750, 65755, 65756, and 65757 are used for this surgery.
Bioengineered cornea transplants remain investigational at this time and are not considered for reimbursement under Texas Medicaid.

Procurement of the cornea is not reimbursed separately.

8.2.46.2 Eye Surgery by Laser

Eye surgery by laser is a benefit of Texas Medicaid when medically necessary and meets the conditions and limitations stated in this section.

Authorization is not required for eye surgery by laser.

All procedure codes in this section are subject to multiple surgery guidelines. For bilateral procedures, the following modifiers must be added to the claim to indicate that the procedures were performed on the right and left eyes:

- Modifier RT to indicate the right eye
- Modifier LT to indicate the left eye

All procedures may be reimbursed only to physicians and are limited to reimbursement once every 90 days for the same eye with the exception of infants from birth through 23 months of age. Procedures performed on infants from birth through 23 months of age are not subject to any frequency restrictions.

8.2.46.2.1 Other Eye Surgery Procedures

Anterior Segment of the Eye–The Cornea

Laser surgery to the cornea by Laser-Assisted in Situ Keratomileusis (LASIK) or photorefractive keratectomy (PRK) for the purpose of correcting nearsightedness (myopia), farsightedness (hyperopia), or astigmatism is not a benefit of Texas Medicaid.

Reimbursement for laser surgery to the cornea, procedure codes 65450, 65855, and 65860 is limited to once every 90 days for the same eye.

Anterior Segment of the Eye–The Iris, Ciliary Body

Laser surgery to the anterior segment of the eye—the iris, ciliary body may be reimbursed only when billed with one of the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>66600 66605 66710 66711 66761 66762 66770</td>
</tr>
</tbody>
</table>

Reimbursement for procedure codes 66600, 66605, 66710, 66711, 66761, 66762, and 66770 is limited to once every 90 days for the same eye.

Claims for iridectomy (66600, 66605, 66625, 66630, or 66635) or iridotomy (66500 or 66505) are not reimbursed when billed for the same date of service as a trabeculectomy (66170 or 66172). These claims are considered for review when filed on appeal with documentation of medical necessity. The iridectomy is considered part of a trabeculectomy. An iridectomy billed with any other eye surgery on the same day suspends for review.

An iridectomy is also considered part of certain types of cataract extractions. An iridectomy (66600 or 66605) is not reimbursed when billed for the same date of service as the cataract surgeries listed in the following table. The iridectomy is considered part of the cataract surgery. These claims are considered for review when filed on appeal with documentation of medical necessity.

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>65920 66840 66850 66852 66920 66930 66940 66983 66984 66985</td>
</tr>
<tr>
<td>66986</td>
</tr>
</tbody>
</table>
Posterior Segment of the Eye–Retina or Choroid
Laser surgery to the retina or choroid may be reimbursed only when billed with one of the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>67105 67107 67108 67110 67112 67113 67114 67145 67210 67220 67221</td>
</tr>
<tr>
<td>67225 67228 67229 G0186</td>
</tr>
</tbody>
</table>

Procedure code 67229 is restricted to clients who are birth through 1 year of age.

When billed for the same date of service, same eye, any provider, procedure code 67031 will be denied as part of any of the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>67036 67108 67110 67120 67121 67141 67142 67208 67210 67218</td>
</tr>
<tr>
<td>67227 67228</td>
</tr>
</tbody>
</table>

When billed for the same date of service, same eye, any provider, only one of the following procedure codes may be reimbursed: 67220, 67221, 67225, or G0186.

When billed for the same date of service, same eye, by any provider, procedure codes 67025, 67028, 67031, 67036, 67039, 67040, and 67105 will be denied as part of 67108.

Posterior Segment of the Eye, Vitreous–Vitrectomy
Laser surgery to the vitreous may be reimbursed only when billed with one of the following procedure codes: 67031, 67039, 67040, and 67043.

Reimbursement for procedure codes 67031, 67039, 67040, and 67043 is limited to once every 90 days for the same eye.

When billed for the same date of service, same eye, any provider procedure codes 67500 and 69990 are denied as part of 66821.

Procedure code 66821 is denied as part of 66830, 67031, and 67228.

Procedure codes 66820, 66984, 66985, and 67036 will pay according to multiple surgery guidelines when billed with procedure code 66821.

When billed for the same date of service, same eye, different provider procedure codes 66821, 67005, 67010, and 69990 will be denied as part of 67031.

When billed for the same date of service, same eye, any provider procedure code 67031 will be denied as part of any of the following procedure codes: 67036, 67108, 67110, 67120, 67121, 67208, 67218, 67227, and 67228.

8.2.46.3 Eye Surgery by Incision
The following restrictions apply to vitrectomy and cataract surgeries:

- Procedure codes 66500, 66505, 66605, 66625, 66630, and 66635 are denied as part of another procedure when billed with the following cataract surgeries: 65920, 66840, 66850, 66852, 66920, 66930, 66940, 66983, 66984, 66985, and 66986. Claims may be appealed with additional documentation to demonstrate the medical necessity.

- Procedure code 66020 is denied as part of another procedure when billed with any related eye surgery procedure code.

- Procedure code 67036 may be reimbursed when billed alone.
- Procedure code 67036 is denied as part of another procedure when billed with procedure codes 67039, 67040, 67041, 67042, 67043, and/or 67108.

- Procedure codes 67039 and 67040 are combined and reimbursed as procedure code 67108 when billed by the same provider for the same date of service.

- For clients who are 8 years of age and younger, the following cataract extraction and vitrectomy procedure codes, performed on the same eye, will be considered for payment per multiple surgery guidelines:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>66840 66850 66852 66920 66930 66940 66983 66984 67005 67010 67015 67025 67027 67028 67030 67031 67036 67039 67040 67041 67042 67043</td>
</tr>
</tbody>
</table>

- For clients who are 9 years of age and older, the following procedure codes will be paid when performed on the same eye as a cataract extraction:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>67005 67010 67015 67025 67027 67028 67030 67031 67036 67039 67040 67041 67042 67043</td>
</tr>
</tbody>
</table>

- For clients who are 9 years of age and older, the following procedure codes will be denied as part of the codes listed above, when performed on the same eye:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>66840 66850 66852 66920 66930 66940 66983 66984</td>
</tr>
</tbody>
</table>

Reimbursement for procedure codes 67041, 67042, and 67043 is limited to once every 90 days for the same eye.

### 8.2.46.4 Intraocular Lens (IOL)

An IOL (V2630, V2631, and V2632) may be reimbursed only to physicians in the office setting (POS 1). Providers must submit a copy of the manufacturer’s invoice for the IOL to TMHP with their claim. Reimbursement for the lens is limited to the actual acquisition cost for the lens (taking into account any discount) plus a handling fee not to exceed 5 percent of the acquisition cost.

Medicaid does not reimburse physicians who supply IOLs to ASCs/HASCs. Reimbursement for the surgical procedure necessary to implant an IOL remains unchanged.

### 8.2.46.5 Intravitreal Drug Delivery System

Procedure codes 67027 and 67121 pertain to the procurement, implantation, and removal of an intravitreal drug delivery system (e.g., a ganciclovir implant). They are set to deny when billed concurrently.

### 8.2.46.6 Other Eye Surgery Limitations

The following procedure codes require modifier LT or RT to identify the eye for which the surgery is being performed:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>65205 67311 67312 67314 67316 67318 67320 67331 67332 67334 67345 67414 67800 67801 67805 67808 V2790</td>
</tr>
</tbody>
</table>
In the following table, the procedure codes in Column A may be reimbursed only when at least one corresponding procedure code from Column B has been paid to the same provider for the same date of service:

<table>
<thead>
<tr>
<th>Column A Procedure Codes</th>
<th>Column B Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>66990</td>
<td>65820, 65875, 65920, 66985, 66986, 67036, 67039, 67040, 67041, 67042, 67043, or 67112</td>
</tr>
<tr>
<td>67320, 67331, 67332, 67334</td>

</tr>
<tr>
<td>67335, 67340</td>
<td>67311, 67312, 67314, 67316, or 67318</td>
</tr>
<tr>
<td>V2790</td>
<td>65780</td>
</tr>
</tbody>
</table>

### 8.2.47 Organ/Tissue Transplants

Organ/tissue transplants that include bone marrow, peripheral stem cell, heart, intestinal, lung, liver, kidney, pancreas/simultaneous kidney-pancreas, or combined heart/lung are a benefit of Texas Medicaid. Organ/tissue transplants require prior authorization and may be reimbursed only when performed in a facility that is a designated children’s hospital, or certified for the procedure by the United Network for Organ Sharing (UNOS) or the National Marrow Donor Program (NMDP).

Refer to: Subsection 2.3.2.6, “Organ and Tissue Transplant Services,” in Hospital Services Handbook (Vol. 2, Provider Handbooks) for more information about the transplant facility approval criteria.

Subsection 2.3.2.6.2, “Program Limitations,” in Hospital Services Handbook (Vol. 2, Provider Handbooks) for more information about organ/tissue transplant program limitations.

### 8.2.47.1 Heart Transplants

#### 8.2.47.1.1 Prior Authorization for Heart Transplants

A heart transplant for individual Medicaid clients is subject to prior authorization and must be performed in an institution approved as a heart transplant facility by Texas Medicaid.

A heart transplant to a client for primary heart dysfunction must be documented as the client being unresponsive to more conventional and/or standard therapies to be considered for coverage.

Prior authorization is required for a heart/lung transplant and must follow criteria for both heart and lung transplants. Requests for a heart/lung transplant are considered individually.

#### 8.2.47.1.2 Guidelines for Coverage of a Heart Transplant

Heart transplant candidates are limited to those clients who, based on sound patient selection criteria, would most likely benefit from the heart transplant procedure on a long-term basis. To be reimbursed by Texas Medicaid, the facility must document the following considerations:

- One of the following:
  - New York Heart Association (NYHA) Class Stage III or IV cardiac disease
  - Congenital heart disease
  - Valvular heart disease
  - Viral cardiomyopathies
  - Familial and restrictive cardiomyopathies
- A heart transplant will result in a return to improved functional independence.
- An absence of comorbidities such as:
• Severe pulmonary hypertension.
• End-stage renal, hepatic or other organ dysfunction unrelated to primary disorder.
• Active, uncontrolled HIV infection or AIDS-defining illness.
• Multiple organ compromise secondary to infection, malignancy, or condition with no known cure.

Documented compliance with other medical treatments, regimen, and plan of care. Documented compliance includes no active alcohol or chemical dependency that interferes with compliance to a medical regimen.

Documented psychiatric instability is a contraindication for transplant if severe enough to jeopardize incentive for adherence to medical regimen.

8.2.47.2 Intestinal Transplants

8.2.47.2.1 Prior Authorization for Intestinal Transplants
Intestinal transplants and related services must meet criteria for authorization, and all transplants must be performed in transplant facilities approved by the CMS.

8.2.47.2.2 Guidelines for Coverage of an Intestinal Transplant
All intestinal transplant services must be prior authorized.

Small bowel transplantation from a cadaveric or living donor is considered medically necessary in clients with irreversible intestinal failure who have experienced total parenteral nutrition (TPN) failure. The client has experienced TPN failure if any one of the following criteria is met:

• Impending or overt liver failure due to TPN-induced liver injury. Clinical indictors include the following:
  • Increased serum bilirubin levels
  • Increased liver enzyme levels
  • Splenomegaly
  • Thrombocytopenia
  • Gastroesophageal varices
  • Coagulopathy
  • Stomal bleeding
  • Hepatic fibrosis
  • Cirrhosis

• Thrombosis of major central venous channels (subclavian, jugular, or femoral veins). Thrombosis of two or more of these vessels is considered a life-threatening complication and TPN failure.

• Frequent central line-related sepsis. Two or more episodes of central-line-induced systemic sepsis per year that require hospitalization are considered TPN failure. A single episode of central-line-related fungemia, septic shock, or acute respiratory distress syndrome is considered TPN failure.

• Frequent episodes of severe dehydration despite TPN and intravenous fluid supplement. Under medical conditions, such as secretory diarrhea and nonconstructable gastrointestinal tract, the loss of combined gastrointestinal and pancreatic secretions exceed the maximum intravenous infusion rates that can be tolerated by the cardiopulmonary system.

Diagnoses that indicate intestinal failure include, but are not limited to, the following:
• Small bowel syndrome resulting from inadequate intestinal propulsion due to neuromuscular impairment
• Small bowel syndrome resulting from postsurgical conditions due to resections
• Intestinal cysts
• Mesenteric cysts
• Small bowel or other tumors involving small bowel
• Crohn’s disease
• Mesenteric thrombosis
• Volvulus
• Short-gut syndrome in which there is liver function impairment (usually secondary to TPN)

The prior authorization request must include the following documentation:

• A recent and complete history and physical
• A copy of the multidisciplinary client care team’s evaluation summary
• A statement of the client’s status, including why the transplant is being recommended at this time

(Each client’s condition is evaluated on an individual basis.)

Requests for intestinal transplants should include all procedures, such as backbench work, that will be provided and billed in addition to the intestinal transplant.

8.2.47.2.3 Other Limitations for Intestinal Transplants

Backbench procedure codes 44715, 44720, and 44721 are payable under the client. Procedure code 66990 will be denied when it is billed on the same day by the same provider as procedure code 44715 or 44720.

Procedure code 43752, 44120, or 44125 will be denied when it is billed on the same day by the same provider as procedure code 44135 or 44136.

Procedure code 96360, 96365, 96372, 96374, or 96375 will be denied when it is billed on the same day by the same provider as procedure code 44136.

8.2.47.3 Kidney Transplants

8.2.47.3.1 Prior Authorization for Kidney Transplants

A kidney transplant for individual Medicaid clients is subject to prior authorization and must be performed in an institution approved as a kidney transplant facility by Texas Medicaid.

A kidney transplant to a client must be documented as unresponsive to more conventional and/or standard therapies to be considered for coverage.

8.2.47.3.2 Guidelines for Coverage of a Kidney Transplant

Kidney transplants must be prior authorized. The following documentation is required:

• A recent and complete history and physical.
• A copy of the Transplant Committee’s evaluation summary.
• A statement of the client’s status including why a transplant is being recommended at this time.

Each client’s condition is evaluated on an individual basis. Approved indications for a kidney transplant may include the following:

• Hemodialysis or continuous ambulatory peritoneal dialysis (CAPD).
• Chronic renal failure with anticipated deterioration to end-stage renal disease.
• End-stage renal disease, evidenced by a creatinine clearance below 20 ml/min or development of symptoms of uremia.

• End-stage renal disease that requires dialysis or is expected to require dialysis within the next 12-month period.

Requests for kidney transplants should include all procedures, such as backbench work, that will be provided and billed in addition to the kidney transplant.

8.2.47.3.3 Other Limitations for Kidney Transplants
Backbench procedure codes 50323, 50325, 50327, 50328, and 50329 are payable under the client.

The following procedure codes will be denied when billed on the same day by the same provider as procedure code 50340, 50365, or 50370:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>50220</td>
</tr>
<tr>
<td>50225</td>
</tr>
<tr>
<td>50230</td>
</tr>
<tr>
<td>50234</td>
</tr>
<tr>
<td>50236</td>
</tr>
<tr>
<td>50240</td>
</tr>
<tr>
<td>50541</td>

<tr>
<td>50542</td>
</tr>
<tr>
<td>50543</td>
</tr>
<tr>
<td>50544</td>
</tr>
<tr>
<td>50545</td>
</tr>
<tr>
<td>50546</td>
</tr>
<tr>
<td>50548</td>
</tr>
</tbody>
</table>

The following procedure codes will be denied when billed on the same day by the same provider as procedure code 50360:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>50220</td>
</tr>
<tr>
<td>50225</td>
</tr>
<tr>

</tr>
<tr>
<td>50234</td>
</tr>
<tr>
<td>50236</td>
</tr>
<tr>
<td>50240</td>
</tr>
<tr>
<td>50400</td>
</tr>
<tr>
<td>50780</td>
</tr>
</tbody>
</table>

Procedure code 50650 will be denied when billed on the same day by the same provider as procedure code 50340 or 50365.

Procedure code 50780 will be denied when billed on the same day by the same provider as procedure code 50365 or 50380.

Procedure code 50370 will be denied when billed on the same day by the same provider as procedure code 50340.

Procedure codes 60540 and 60545 will be denied when billed on the same day by the same provider as procedure code 50323.

8.2.47.3.4 Cytogam
Procedure code J0850 is reimbursable by Texas Medicaid. Cytogam is indicated for the attenuation of primary cytomegalovirus disease in seronegative kidney transplant recipients who receive a kidney from a seropositive donor. Payment of cytogam is limited to diagnosis code V420, status post kidney transplant. Cytogam is payable only in the office or outpatient setting.

Refer to: Subsection 2.3.2.6, “Organ and Tissue Transplant Services,” in Hospital Services Handbook (Vol. 2, Provider Handbooks) for more information about the transplant facility approval criteria.

8.2.47.4 Liver Transplants
8.2.47.4.1 Prior Authorization for Liver Transplants
A liver transplant for individual Medicaid clients is subject to prior authorization and must be performed in an institution approved as a liver transplant facility by Texas Medicaid.

For a client to be considered for coverage of a liver transplant, the medical records for the client must include documentation showing the client is unresponsive to more conventional and/or standard therapies.
8.2.47.4.2 Guidelines for Coverage

Authorization of liver transplantation requires documentation of life threatening complications of acute liver failure or chronic end-stage liver disease.

Liver transplant candidates must be limited to those clients who, based on sound patient selection criteria, would most likely benefit from the liver transplant procedure on a long-term basis. To be reimbursed by Texas Medicaid, the facility must document the following considerations:

- A critical medical need with a likelihood of a successful clinical outcome
- Liver disease in one of the following categories:
  - Primary cholestatic liver disease
  - Other cirrhosis:
    - Alcoholic
    - Hepatitis C, non-A, non-B, and Hepatitis B
  - Fulminant hepatic failure
  - Metabolic diseases
  - Malignant neoplasms
  - Benign neoplasms
  - Biliary atresia
- An absence of comorbidities such as:
  - End-stage cardiac, pulmonary, or renal disease unrelated to primary disorder.
  - Multiple organ compromise secondary to infection, malignancy, or condition with no known cure.
- Documented compliance with other medical treatments, regimen, and plan of care. (Documented compliance includes no active alcohol or chemical dependency that interferes with compliance to a medical regimen.)

Documented psychiatric instability is a contraindication for transplant if severe enough to jeopardize incentive for adherence to medical regimen.

Payment for liver transplant professional services is made under procedure code 47135 or 47136. These procedures include six months of professional postoperative care. Separate charges for procedure code 47780 are denied as part of the liver transplant. Parenteral immunosuppressant therapy is approved for a period of 12 months following the date of discharge from the hospital, conditional upon the client’s Medicaid eligibility.

Services unrelated to the liver transplant surgery are paid separately.

Two assistant surgeons are allowed for liver transplant surgery using the appropriate assistant surgery modifier with procedure codes 47135 or 47136.

8.2.47.5 Lung Transplants

8.2.47.5.1 Prior Authorization for Lung Transplants

A lung transplant for individual Medicaid clients is subject to prior authorization and must be performed in an institution approved as a lung transplant facility by Texas Medicaid.

A lung transplant to a client must be documented as unresponsive to more conventional and/or standard therapies to be considered for coverage.
Prior authorization is required for a heart/lung transplant and must follow criteria for both heart and lung transplants. Requests for a heart/lung transplant are considered on an individual basis.

**8.2.47.5.2 Guidelines for Coverage of a Lung Transplant**

Lung transplant candidates must be limited to those clients who, based on sound patient selection criteria, would most likely benefit from the lung (single or double) transplant procedure on a long-term basis. To be reimbursed by Texas Medicaid, the facility must document the following considerations:

- A critical medical need with a likelihood of a successful clinical outcome
- Symptoms at rest directly related to chronic pulmonary disease and resultant severe functional limitation
- Lung transplantation may be authorized with documentation of end-stage pulmonary diseases in these categories:
  - Obstructive lung disease
  - Restrictive lung disease
  - Cystic Fibrosis
  - Pulmonary hypertension
- An absence of comorbidities such as:
  - End-stage renal, hepatic, or other organ dysfunction unrelated to primary disorder.
  - Multiple organ compromise secondary to infection, malignancy, or condition with no known cure.
  - Documented compliance with other medical treatments, regimen, and plan of care. (Documented compliance includes no active alcohol or chemical dependency that interferes with compliance to a medical regimen.)

Documented psychiatric instability is a contraindication for transplant if severe enough to jeopardize incentive for adherence to medical regimen.

**8.2.47.6 Pancreas Transplant and Simultaneous Kidney-Pancreas Transplant**

**8.2.47.6.1 Prior Authorization for Pancreas Transplant/Simultaneous Kidney-Pancreas Transplant**

A pancreas/simultaneous kidney-pancreas transplant for individual Medicaid clients is subject to prior authorization and must be performed in an institution approved as a pancreas/simultaneous kidney-pancreas transplant facility by Texas Medicaid.

*Note:* Islet cell transplant is considered experimental and investigational and is not a benefit of Texas Medicaid.

A pancreas/simultaneous kidney-pancreas transplant must be documented as the client being unresponsive to more conventional and/or standard therapies to be considered for coverage.

Prior authorization is required for a pancreas/simultaneous kidney-pancreas transplant and must follow criteria for both pancreas and simultaneous kidney-pancreas transplant.

**8.2.47.6.2 Guidelines for Coverage of a Pancreas/Simultaneous Kidney-Pancreas Transplant**

Pancreas/simultaneous kidney-pancreas transplant candidates must be limited to those clients who, based on sound patient selection criteria, would most likely benefit from the transplant procedure on a long-term basis. Documentation at the time of authorization is required in order to be considered for reimbursement by Texas Medicaid.
8.2.47.6.3 Pancreas Transplant Alone
For a transplant of the pancreas alone, documentation must be submitted that shows all of the following:

- A satisfactory kidney function (creatinine clearance greater than 40 mL/min)
- Type 1 diabetes with secondary diabetic complications that are progressive despite the best medical management and meet at least one of the following below:
  - Secondary complications, which must include at least two of the following:
    - Diabetic neuropathy
    - Retinopathy
    - Gastroparesis
    - Autonomic neuropathy
  - Extremely labile (brittle) insulin-dependent diabetes mellitus
  - Recurrent, acute and severe metabolic and potentially life-threatening complications requiring medical attention, which include:
    - Hypoglycemia
    - Hyperglycemia
    - Ketacidosis
    - Failure of exogenous insulin-based management to achieve sufficient glycemic control (HbA1c of greater than 8.0) despite aggressive conventional therapy
    - Insensibility to hypoglycemia

8.2.47.6.4 Simultaneous Kidney-Pancreas Transplant
For a simultaneous kidney-pancreas transplant, documentation must be submitted that shows that the client has type 1 diabetes mellitus with secondary diabetic complications that are progressive despite the best medical management. Additionally, the documentation must show at least one of the following:

- Secondary complications, which must include at least two of the following:
  - Diabetic neuropathy
  - Retinopathy
  - Gastroparesis
  - Autonomic neuropathy
  - Extremely labile (brittle) insulin-dependent diabetes mellitus
- Recurrent, acute and severe metabolic and potentially life-threatening complications requiring medical attention, which include:
  - Hypoglycemia
  - Hyperglycemia
  - Ketacidosis
  - Failure of exogenous insulin-based management to achieve sufficient glycemic control (HbA1c of greater than 8.0) despite aggressive conventional therapy
  - Insensibility to hypoglycemia
- End-stage renal disease that requires dialysis or is expected to require dialysis within the next 12 months
The following contraindications for the transplant applies to both pancreas and simultaneous kidney-pancreas transplant and are as follows:

- Inadequate cardiac status, pulmonary or liver function.
- Ongoing or recurrent active infections that are not effectively treated.
- Uncontrolled HIV/AIDS infection.
- Malignancy (except nonmelanoma skin cancers).
- Documented psychiatric instability if severe enough to jeopardize incentive for adherence to medical regimen.

Documentation of compliance with medical treatments regimen and plan of care includes no active alcohol or chemical dependency that interferes with compliance to a medical regimen.

8.2.47.7 Nonsolid Organ Transplants

Nonsolid organ transplants covered by Texas Medicaid include allogeneic and autologous stem cell transplantation, allogeneic and autologous bone marrow transplantation, and autologous islet cell transplantation.

8.2.47.7.1 Allogeneic and Autologous Bone Marrow and Stem Cell Transplantation

Stem cell transplantation is a process in which stem cells are obtained from either a client’s or donor’s bone marrow, peripheral blood, or umbilical cord blood for intravenous infusion. The transplant can be used to effect hematopoietic reconstitution following severely myelotoxic doses of chemotherapy and/or radiotherapy used to treat various malignancies, and also can be used to restore function in clients having an inherited or acquired deficiency or defect.

Benefits are not available for any experimental or investigational services, supplies, or procedures.

Coverage of bone marrow and stem cell transplantation is limited to the following procedure codes: 38206, 38230, 38240, 38241, 38242, and S2142.

Allogeneic stem cell transplantation may be authorized for the following diagnosis codes:

**8.2.47.7.2 Autologous Islet Cell Transplantation**

Autologous islet cell transplantation associated with the complete or partial removal of the pancreas (procedure code 48160) is a benefit of Texas Medicaid only for clients with a diagnosis of chronic pancreatitis (diagnosis code 5771).

Allogeneic islet cell transplantation is not a benefit.
8.2.47.7.3 Prior Authorization for Nonsolid Organ Transplants

All nonsolid organ transplants require mandatory prior authorization and must be performed in a Texas facility that is a designated children’s hospital or a facility in compliance with the criteria set forth by the Organ Procurement and Transportation Network (OPTN), the United Network for Organ Sharing (UNOS), or the National Marrow Donor Program (NMDP). Prior authorization is effective for the date span specified on the prior authorization approval letter. If the transplant has not been performed by the end of the authorization period, the physician must apply for an extension.

Documentation supplied with the prior authorization request must include the following:

- A complete history and physical.
- A statement of the client’s current medical condition and the expected long-term prognosis for the client from the proposed procedure.

Each subsequent transplant must be prior authorized separately.

Peripheral or umbilical cord blood stem cell transplantation may be authorized in lieu of bone marrow transplantation (BMT), but will not be approved when performed simultaneously.

If a stem cell transplant has been prior authorized for a client who is 21 years of age or older, a maximum of 30 days of inpatient hospital services during a Title XIX spell of illness may be covered beginning with the actual first day of the transplant. This coverage is in addition to covered inpatient hospital days provided before the actual first day of the transplant. This 30-day period is considered a separate inpatient hospital admission for reimbursement purposes, but is included under one hospital stay.

Bone marrow harvesting (38230) or peripheral stem cell harvesting (38206) for autologous bone marrow or stem cell transplants are a benefit of Texas Medicaid and require prior authorization.

Autologous harvesting of stem cells (single or multiple sessions) may be reimbursed to the facility when prior authorized by HHSC or its designee and performed in the outpatient setting (POS 5). Harvesting of stem cells performed in the inpatient setting (POS 3) is included in the DRG and will not be reimbursed separately.

Physician services for the storage of stem cells are not a benefit of Texas Medicaid.

Donor expenses are included in the global fee for the transplant recipient and are not reimbursed separately. Therefore, allogeneic bone marrow or stem cell harvesting procedures are not a benefit of Texas Medicaid.

Stem cell transplants for other diagnoses may be considered on a case by case basis. Documentation for prior authorization must be submitted to determine whether the transplant is medically necessary and appropriate.

8.2.47.8 Organ Procurement

The appropriate DRG reimbursement coverage to the approved institution for a prior authorized transplant procedure includes procurement of the organ and services associated with the organ procurement as specified by HHSC or its designee. Documentation of organ procurement must be maintained in the hospital medical records.

Physician services for the procurement of peripheral stem cells are not reimbursable.

8.2.47.9 Prior Authorization for All Transplants

It is the requesting physician and facility’s responsibility to receive prior authorization through TMHP Special Medical Prior Authorization.

HHSC or its designee must prior authorize all transplant services provided by facilities and professionals. Documentation supplied with the prior authorization request must address the criteria listed for each type of transplant above, and must be medically necessary, reasonable, and federally allowable.
If prior authorization is not obtained for a solid organ transplant, services directly related to the transplant within the three-day preoperative and six-week postoperative period are also denied regardless of who provides the services (e.g., laboratory services, status post visits, radiology services). Claims for transplant clients are placed on active review when the transplant was not prior authorized so that the services related to the transplant can be monitored.

Coverage is limited to one transplant per organ system (or organ systems for combined transplants) per lifetime except for one subsequent transplant because of organ rejection. A subsequent transplant is not included in the prior authorization for the initial transplant; therefore, it must be prior authorized separately.

A transplant request signed by a physician associated with one of Texas Medicaid-approved transplant facilities is considered for prior authorization after the client has been evaluated and meets the guidelines of the institution’s transplant protocol. Additional documentation may be required, which is addressed in the previous specific organ/tissue information.

Texas Medicaid does not pay for transplants or post-transplant services in a nonqualifying facility, nor are physician charges reimbursed for transplants in a nonqualifying facility.

Benefits are not available for any experimental or investigational services, supplies, or procedures. Expenses incurred by a living donor for transplants will not be reimbursed.

All supporting documentation must be included with the request for authorization. Providers are to send requests and documentation to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax: 1-512-514-4213

8.2.48 Orthognathic Surgery

Orthognathic surgery is a benefit of Texas Medicaid only when it is necessary for medical reasons, or when it is necessary as part of an approved plan of care in the Texas Medicaid Dental Program. Orthognathic surgery is administered and may be reimbursed as part of the medical/surgical benefit of Texas Medicaid and not as part of the Texas Medicaid Dental Program.

Treatment of malocclusion is a benefit of the Texas Medicaid Dental Program. Orthognathic surgery is a benefit when it is necessary as part of the approved dental benefit.

Maxillary and/or mandibular facial skeletal deformities are associated with clearly abnormal masticatory malocclusion.

Orthognathic surgery may be considered medically necessary for the following client conditions:

- Producing signs or symptoms of masticatory dysfunction
- Facial skeletal discrepancies associated with documented sleep apnea, airway defects, and soft tissue discrepancies
- Facial skeletal discrepancies associated with documented speech impairments
- Structural abnormalities of the jaws secondary to infection, trauma, neoplasia, or congenital anomalies

Orthognathic surgery may be considered for reimbursement when required for the client to access a dental service. Orthognathic surgery that is done primarily to improve appearance and not for reasons of medical necessity is considered cosmetic and is not a benefit of Texas Medicaid.
8.2.48.1 Prior Authorization for Orthognathic Surgery

The following orthognathic medical surgical services may be considered for reimbursement to oral and maxillofacial surgeons with prior authorization. A narrative explaining medical necessity must be provided with the authorization request.

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>21031 21032 21050 21060 21073 21100 21110 21120 21121 21122</td>
</tr>
<tr>
<td>21123 21125 21127 21137 21138 21139 21145 21146 21147 21150</td>
</tr>
<tr>
<td>21151 21154 21155 21159 21160 21172 21175 21179 21180 21181</td>

</tr>
<tr>
<td>21268 21270 21275 21280 21282 21295 21296 21299 8262</td>
</tr>
</tbody>
</table>

The following procedure codes may be considered for reimbursement to oral and maxillofacial surgeons without prior authorization: 21010, 29800, 29804, 40840, 40842, 40843, 40844, and 40845.

8.2.49 Osteogenic Stimulation

Professional services for osteogenic stimulation (procedure codes 20974, 20975, and 20979) are a benefit for the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>73381 73382 73396 73397 73398 9052 9053 9054 9055 99640</td>
</tr>
<tr>
<td>V454</td>
</tr>
</tbody>
</table>

Procedure codes 20974, 20975, and 20979 are limited to one per six months. During the six-month limitation period, a subsequent fracture that meets the criteria for an osteogenic stimulator may be reimbursed after the submission of an appeal with documentation of medical necessity that demonstrates the criteria have been met.

Prior authorization is required for an osteogenic bone stimulator device (procedure codes E0747, E0748, E0749, and E0760).

Refer to: Subsection 2.2.16, “Osteogenic Stimulation,” in Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks) for prior authorization criteria.

8.2.50 Osteopathic Manipulative Treatment (OMT)

OMT, when performed by a physician (MD or DO), is a benefit of Texas Medicaid for the acute phase of the acute musculoskeletal injury or the acute phase of an acute exacerbation of a chronic musculoskeletal injury with a neurological component.

OMT is covered when it is performed with the expectation of restoring the patient’s level of function, which has been lost or reduced by injury or illness. Manipulations should be provided in accordance with an ongoing, written treatment plan that supports medical necessity. A model of documentation that supports medical necessity for the treatment plan includes the following:

- Specific modalities/procedures to be used in treatment
- Diagnosis
- Region treated
- Degree of severity
• Impairment characteristics
• Physical examination findings (X-ray or other pertinent findings)
• Specific statements of long- and short-term goals
• Reasonable estimate of when the goals will be reached (estimated duration of treatment)
• Frequency of treatment (number of times per week)
• Equipment and techniques used

The treatment plan must be updated as the client’s condition changes. Treatment plans must be maintained in the medical records and are subject to retrospective review.

Reimbursement is contingent on correct documentation of the condition. The acute modifier AT must be submitted with the claim for payment to be made. Paper claims submitted without modifier AT will be denied; electronic claims will be rejected. The AT modifier is described as representing treatment provided for an acute condition or an exacerbation of a chronic condition that persists less than 180 days from the start date of therapy. If the condition persists for more than 180 days from the start of therapy, the condition is considered chronic, and treatment is no longer considered acute. Providers may file an appeal for claims denied as being beyond the 180 days of therapy with supporting documentation that the client’s condition has not become chronic and the client has not reached the point of plateauing. Plateauing is defined as the point at which maximal improvement has been documented and further improvement ceases.

The following procedure codes are payable when billing for OMT to the head, cervical, thoracic, lumbar, sacral, pelvic, lower extremities, upper extremities, rib cage, abdominal, and visceral regions: 98925, 98926, 98927, 98928, and 98929.

OMT will be denied when billed on the same date of service by the same provider as any of the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>00640</td>
</tr>
<tr>
<td>64405</td>
</tr>
<tr>
<td>64421</td>
</tr>
<tr>
<td>64470</td>
</tr>
<tr>
<td>64510</td>
</tr>
<tr>
<td>99202</td>
</tr>
<tr>
<td>99218</td>
</tr>
<tr>
<td>99235</td>
</tr>
<tr>
<td>99252</td>
</tr>
<tr>
<td>99304</td>
</tr>
<tr>
<td>99324</td>
</tr>
<tr>
<td>99342</td>
</tr>
<tr>
<td>99460</td>
</tr>
<tr>
<td>99478</td>
</tr>
</tbody>
</table>

When multiples of procedure codes 98925, 98926, 98927, 98928, and 98929 are billed on the same day by the same provider, the most inclusive code is paid and the others are denied.
An E/M or initial or subsequent care visit or consultation may be paid in addition to OMT billed on the same day if the client’s condition requires a visit for a significant and separately identifiable service above and beyond the usual pre- and post-care associated with the OMT procedure, even if the visit and OMT are related to the same symptom or condition. Modifier 25 must be submitted with the E/M procedure code to identify a separate and distinct service rendered on the same day as OMT.

Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client’s medical record and made available to Texas Medicaid upon request.

Procedure code 97140 will be denied as part of another service if billed on the same date of service as procedure codes 98925, 98926, 98927, 98928, or 98929.

**8.2.51 Pain Management**

Pain management is a benefit of Texas Medicaid.

Procedure codes 62350, 62351, 62355, 62360, 62361, 62362, and 62365 billed on the same day as another surgical procedure performed by the same physician are paid according to multiple surgery guidelines.

Procedure codes 62350, 62351, 62355, 62360, 62361, 62362, and 62365 billed on the same day as an anesthesia procedure performed by the same physician are denied as included in the total anesthesia time.

Reimbursement to the physician for the surgical procedure is based on the assigned RVUs or maximum fee. Outpatient facilities are reimbursed at their reimbursement rate. Inpatient facilities are reimbursed under the assigned diagnosis-related group (DRG). No separate payment for the intrathecal pump is made.

Use the following procedure codes when billing for the implantation/revision/replacement of the pump/catheter:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>62350</td>
</tr>
</tbody>
</table>

Procedure codes 62367 and 62368 do not require prior authorization and are payable as a medical service only.

**Refer to:** Subsection 8.2.37.22, “Implantable Infusion Pumps,” in this handbook for more information about implanted pumps.

Acute pain is defined as pain caused by occurrences such as trauma, a surgical procedure, or a medical disorder manifested by increased heart rate, increased blood pressure, increased respiratory rate, shallow respirations, agitation or restlessness, facial grimace, or splinting.

Chronic pain is defined as persistent, often lasting more than six months; symptoms are manifested similarly to that of acute pain.

Postoperative refers to the time frame immediately following a surgical procedure in which a catheter is maintained in the epidural or subarachnoid space for the duration of the infusion of pain medication.

**8.2.51.1 Epidural and Subarachnoid Infusion (Not Including Labor and Delivery)**

Epidural and subarachnoid infusion for pain management is payable for acute, chronic, and postoperative pain management.

Procedure code 01996 is limited to once per day and is denied when billed on the same day as a surgical/anesthesia procedure. Procedure code 01996 billed longer than 30 days requires medical necessity documentation. Cancer diagnoses are excluded from the 30-day limitation.

Procedure code 01996 is payable to CRNAs and physicians.
8.2.52 Panniculectomy and Abdominoplasty

Procedure codes 15830 and 15847 are benefits of Texas Medicaid when prior authorized.

To avoid unnecessary denials, the physician must provide correct and complete information, including documentation establishing medical necessity of the service requested. This documentation must remain in the client’s medical record and is subject to retrospective review.

8.2.52.1 Panniculectomy

A panniculectomy (procedure code 15830) for clients who are birth through 20 years of age may be reimbursed with prior authorization for one of the following conditions when the panniculus hangs to or below the level of the pubis:

- A panniculus has recurrent non-healing ulcers.
- Client is insulin dependent with recurring infection and causing the prolapse of a ventral hernia.
- Panniculus directly causes significant clinical functional impairment.

Panniculectomy is not a benefit when one of the following is the primary purpose:

- To remove excess skin and fat from the middle and lower abdomen in order to contour and alter the appearance of the abdominal area to improve appearance.
- Dissatisfaction with personal body image.
- To minimize the risk of ventral hernia formation of recurrence.
- For the sole purpose of treating neck or back pain.

Panniculectomy may be prior authorized when the client meets one of the following:

- Panniculectomy is planned and there is no history of significant weight loss or gastric bypass surgery.
- Panniculectomy is planned without history of gastric bypass surgery but with significant weight loss and the panniculus hangs to or below the level of the pubis.
- Panniculectomy is planned with history of gastric bypass surgery or abdominoplasty and the client is 12 months post-surgery.

If a panniculectomy is planned and there is no history of significant weight loss or gastric bypass surgery, or a panniculectomy is planned without history of gastric bypass surgery but with significant weight loss and the panniculus hangs to or below the level of the pubis, one of the following must be met:

- Documentation of recurrent episodes of infection or recurrent non-healing ulcers over three months that are non-responsive to treatment or appropriate medical therapy, such as oral or topical prescription.
- The client is insulin-dependent and has a serious infection control problem and the panniculus is causing the prolapse of a ventral hernia.
- Documentation by the treating physician that the panniculus directly causes significant clinical functional impairment. Clinical functional impairment may be indicated by associated musculoskeletal dysfunction or interference with activities of daily living and there is reasonable evidence to support that this surgical intervention will correct the condition.

If a panniculectomy is planned with a history of gastric bypass surgery or abdominoplasty and the client is 12 months post-surgery, the following must be met:

- Documentation that the panniculus hangs to or below the level of the pubis and the client has maintained a significant (100 pounds or more), stable weight loss for at least six months. Documentation must include the weight loss history, prior and current height, prior and current weight, and the history and physical including all previous surgeries.
• Documentation of recurrent episodes of infection or recurrent non-healing ulcers over three
months that are non-responsive to treatment or appropriate medical therapy, such as oral or topical
prescription. The 12-month post-gastric bypass requirement may be waived.

• The client is insulin-dependent and has a serious infection control problem and the panniculus is
causing the prolapse of a ventral hernia. The 12-month post-gastric bypass requirement may be
waived.

• Documentation by the treating physician that the panniculus directly causes significant clinical
functional impairment. The 12-month post-gastric bypass requirement may be waived. Clinical
functional impairment may be indicated by associated musculoskeletal dysfunction or interference
with activities of daily living and there is reasonable evidence to support that this surgical inter-
vention will correct the condition.

All medical record documentation pertinent to the client’s evaluation and treatment must support
medical necessity of the panniculectomy. Documentation may include the following:

• Office records
• Consultation reports
• Operative reports
• Other hospital records (examples: pathology report, history and physical)

Documentation to support the panniculectomy must be submitted with the request for prior authori-
zection. In addition to medical record documentation, the provider may also submit a letter of support
or an explanation to substantiate medical necessity.

This service is typically expected to be limited to once per lifetime; however, repeat panniculectomies
may be considered for prior authorization upon submission of supporting documentation as outlined
above.

A panniculectomy provided as a secondary surgery may be considered for prior authorization when the
panniculus interferes with a medically necessary intra-abdominal surgery (e.g., abdominal hernia repair
or hysterectomy) or to facilitate an improved anatomical field in order to provide radiation treatment to
the abdomen. Documentation of medical necessity must include:

• The comorbidity for the diagnosis of the primary surgery or for the nature of the condition under-
going radiation treatment.
• Documentation supporting the need for the panniculectomy as the panniculus hangs below the level
of the pubis and will significantly interfere with a planned surgical procedure, or the abdominal
structures identified as requiring radiation therapy will not be adequately treated due to the size of
the panniculus.

A panniculectomy provided as a secondary surgery may be considered when the primary surgery was
performed for an urgent condition defined as a symptom or condition that is not an emergency, but
requires further diagnostic workup or treatment within 24 hours to avoid a subsequent emergent
situation.

The need for the panniculectomy as a secondary surgery in conjunction with a primary urgent surgery
must be supported by retrospective review of submission of all of the following documentation:

• History and physical and the operative report.
• The panniculus hangs below the level of the pubis and would have significantly interfered with the
urgent primary surgical procedure.
8.2.52.2 Abdominoplasty

An abdominoplasty (procedure code 15847) is a benefit for clients who are birth through 20 years of age and may be reimbursed with prior authorization for one of the following conditions:

- Prune belly.
- Diastasis recti in the presence of a true midline hernia (ventral or umbilical).

Abdominoplasty is not a benefit when one of the following is the primary purpose:

- To remove excess skin and fat and tighten abdominal wall from the middle and lower abdomen in order to contour and alter the appearance of the abdominal area to improve appearance.
- Dissatisfaction with personal body image.
- To repair diastases recti (unless prior authorization criteria has been met).

Abdominoplasty may be prior authorized when the client meets all of the following criteria:

- Documented diagnosis of prune belly (i.e., Eagle Barret syndrome) or repair of diastasis recti in the presence of a true midline hernia (ventral or umbilical).
- Documentation for reconstructive surgery that must include appropriate historical medical record documentation and may include any of the following:
  - Consultation reports.
  - Operative reports or other applicable hospital records (examples: pathology report, history and physical).
  - Office records.
  - Letters with pertinent information from provider. (When medical records are requested, a letter of support or explanation may be helpful, but alone will not be considered sufficient documentation to make a medical necessity determination.)
  - For repair of diastasis recti with a true midline hernia, documentation must also include all of the following:
    - The size of the hernia.
    - Whether it is reducible, painful, or other symptoms.
    - Whether there is a defect rather than just thinning of the abdominal fascia.

Consideration of other abdominal diagnoses may be considered for prior authorization with the submission of additional supporting documentation that may include the following:

- Consultation reports.
- Operative reports or other applicable hospital records (examples: pathology report, history and physical).
- Office records.
- Letters with pertinent information from provider (When medical records are requested, a letter of support or explanation may be helpful, but alone will not be considered sufficient documentation to make a medical necessity determination.)

8.2.53 Penile and Testicular Prostheses

The following services are a benefit of Texas Medicaid for male clients, when prior authorized:

- Removal of a penile prosthesis without replacement (procedure codes 54406 and 54415).
• Insertion of testicular prosthesis for the replacement of congenitally absent testes or testes lost due to disease, injury, or surgery (procedure code 54660).

Removal of a penile prosthesis may be considered for prior authorization with documentation submitted indicating the prosthetic has resulted in infection, erosion, or pain.

Procedure code 54660 is a benefit for clients who are birth through 20 years of age. Insertion of a testicular prosthesis may be prior authorized with the following criteria:

• The client has lost a testicle as a result of cancer or trauma or has congenital absence of a testicle.
• The loss of the testicle has resulted in detrimental psycho-social sequelae, as evidenced by a psychiatric evaluation.

Requests for prior authorization must be submitted by the physician to the Special Medical Prior Authorization (SMPA) department using the Special Medical Prior Authorization (SMPA) Request Form. The request must be submitted with documentation that supports medical necessity.

8.2.54 Pentamidine Aerosol

Payment for aerosol pentamidine medication (procedure code J2545) and treatments (procedure code 94642) is limited to the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>042</td>
</tr>
<tr>
<td>07951</td>
</tr>
<tr>
<td>07952</td>
</tr>
<tr>
<td>07953</td>
</tr>
<tr>
<td>1363</td>
</tr>
<tr>
<td>48284</td>
</tr>
<tr>
<td>5186</td>
</tr>
</tbody>
</table>

Aerosol pentamidine treatments are limited to one treatment every 28 days.

8.2.55 Percutaneous Transluminal Coronary Interventions

Percutaneous transluminal coronary interventions are a therapeutic option for clients who have arteriosclerotic heart disease.

When any of the following procedure codes are performed on the same date of service and on the same vessel as intracoronary vessel stenting, any provider, only the stenting procedure code will be considered for reimbursement: 92973, 92982, 92984, 92995, and 92996.

Angioplasty, atherectomy, or thrombectomy performed on different coronary vessels may be reimbursed separately. When different coronary vessels are not indicated, only the stenting procedure will be paid.

8.2.56 Physical Therapy (PT) Services

Physical therapy (PT) is a payable benefit to physicians.

Refer to: Section 4, “Therapists, Independent Practitioners, and Physicians” in Nursing and Therapy Services Handbook (Vol. 2, Provider Handbooks) for information about physical therapy services provided by a physician.

8.2.57 Physician Evaluation and Management (E/M) Services

E/M is a benefit of Texas Medicaid. E/M is divided into categories and subcategories. Medical documentation for E/M must consist of the appropriate components as designated in the 1995 and 1997 Physician Evaluation and Management guidelines published by CMS and in the CPT manual.

The following E/M services are benefits of Texas Medicaid:

• Domiciliary, rest home, or custodial care services
• Emergency department services
• Group clinical visits
• Home services
• Hospital services including inpatient, observation, critical care, discharge, and concurrent care services (includes consultation and prolonged services)

• Nursing facility services

• Office or other outpatient services for new and established patients (includes consultation and prolonged services)

• Preventive care visits

• Services outside of business hours

Claims submitted to TMHP by physicians for services provided during an inpatient hospital stay must be received by TMHP within 95 days of each date of service, not 95 days of the discharge date.

Inpatient claims must indicate the facility’s provider identifier in Block 32 or in the appropriate field of electronic software.

8.2.57.1 Office or Other Outpatient Hospital Services

8.2.57.1.1 New and Established Patient Services

A new patient is one who has not received any professional services from a physician or from another physician of the same specialty who belongs to the same group practice, within the past three years. Providers must use procedure codes 99201, 99202, 99203, 99204, and 99205 when billing for new patient services provided in the office or an outpatient or other ambulatory facility. New patient visits are limited to one every three years, per client, per provider.

An established patient is one who has received professional services from a physician or from another physician of the same specialty within the same group practice, within the last three years. Providers must use procedure codes 99211, 99212, 99213, 99214, and 99215 when billing for established patient services provided in the office or an outpatient or other ambulatory facility.

When an office visit is billed with the same date of service as a THSteps medical checkup or exception to periodicity visit, the office visit must be billed as an established patient visit. If a new patient visit is billed with the same date of service as a THSteps medical checkup or exception to periodicity visit, then the new patient visit will be denied.

Modifier 25 may be used to identify a significant, separately identifiable E/M service performed by the same physician on the same day as another procedure or service. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client’s medical record and made available to Texas Medicaid upon request. The documentation must clearly indicate what the significant problem/abnormality was, including the important, distinct correlation with signs and symptoms to demonstrate a distinctly different problem that required additional work and must support that the requirements for the level of service billed were met or exceeded.

The date and time of both services performed must be outlined in the medical record and the time of the second service must be different than the time of the first service, although a different diagnosis is not required.

An established patient visit that is billed with the same date of service as a new patient visit by the same provider will be denied as part of another procedure except when the established patient visit is billed with a new THSteps medical checkup.

Office visits (procedure codes 99201, 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, and 99215) provided on the same date of service as a planned procedure (minor or extensive) are included in the cost of the procedure and are not separately reimbursed.

Office visit procedure code 99211, 99212, 99213, 99214, or 99215 must be billed by the same provider with the same date of service as a group clinical visit.

Refer to: Subsection 8.2.57.4, “Group Clinical Visits,” in this handbook for additional information.
Procedures that are included in the E/M service (e.g., binocular microscopy, noninvasive ear or pulse oximetry for oxygen saturation, etc.) are denied as part of another procedure when billed by the same provider with the same date of service as one of the following office or outpatient consultation visit procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99201</td>
</tr>
<tr>
<td>99241</td>
</tr>
</tbody>
</table>

Emergency department-based physicians or emergency department-based groups may not bill charges for inconvenience or after hours services (procedure code 99050, 99056, or 99060).

8.2.57.1.2 Preventive Care Visits

Preventive care services are comprehensive visits that may include counseling, anticipatory guidance, and risk-factor-reduction interventions. Documentation must indicate the anticipatory guidance rendered.

Preventive health visits for clients who are birth through 20 years of age are available through THSteps medical checkups.

**Refer to:** Section 5, “THSteps Medical” in Children’s Services Handbook (Vol. 2, Provider Handbooks).

Subsection 5.3.2.4.2, “Hearing Screening,” in Children’s Services Handbook (Vol. 2, Provider Handbooks) for additional information about hearing screenings.

Adult preventive services (procedure codes 99385, 99386, 99387, 99395, 99396, and 99397) are a benefit of Texas Medicaid for clients who are 21 years of age and older. Procedure codes 99385 and 99395 are restricted to clients who are 21 through 39 years of age. Adult preventive services are limited to one service per rolling year, any provider, and must be billed with diagnosis code V700.

Adult preventive services must be provided in accordance with the U.S. Preventive Services Task Force (USPSTF) recommendations with grades A or B. USPSTF recommendations, with specific age and frequency guidelines, are located on the Agency for Healthcare Research and Quality website at www.ahrq.gov/clinic/uspstfix.htm.

Laboratory, immunization, and diagnostic procedures recommended by USPSTF are covered benefits and may be billed separately, as clinically indicated, using the most appropriate diagnosis code that represents the client’s condition.

The following USPSTF recommendations are not reimbursed separately but must be provided, when applicable, as part of the routine preventive exam:

- Counseling to prevent tobacco use and tobacco-caused disease
- Behavioral counseling in primary care to promote a healthy diet
- Behavioral interventions to promote breast feeding
- Screening for obesity in adults (with intensive counseling and interventions)
- Screening and behavioral counseling interventions in primary care to reduce alcohol misuse
- Screening for depression

The following USPSTF recommendations are not a benefit of Texas Medicaid:

- Chemoprevention of breast cancer
- Varicella immunization
The following screenings are covered benefits in addition to USPSTF recommendations:

- Tuberculosis screening
- Prostate cancer screening; prostate specific antigen (PSA) for men who are 50 through 64 years of age

Services that exceed USPSTF recommendations are not considered part of a screening and require medical documentation to justify medical necessity of the services performed.

For clients who are 21 years of age and older, breast exams and Pap smears are available through programs related to women’s health, including Texas Medicaid family planning services and Women’s Health Program.

**Refer to:** Section 2, “Medicaid Title XIX family planning services” in *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks).*

Section 3, “Women’s Health Program (Title XIX Family Planning)” in *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks).*

**8.2.57.1.3 Consultation Services**

A consultation is an E/M service provided at the request of another provider for the evaluation of a specific condition or illness. The consultation must meet the following requirement:

- There must be a request from the referring provider for the evaluation of a particular condition or illness.
- There must be correspondence from the consulting provider back to the referring provider indicating the consulting provider’s medical findings.

During a consultation, the consulting provider may initiate diagnostic and therapeutic services if necessary.

The visit is not considered a consultation if any of the following applies:

- If diagnostic or therapeutic treatment is initiated during a consultation and the patient returns for follow-up care, the follow-up visit is considered an established patient visit, and must be billed as an established patient visit.
- If the purpose of the referral is to transfer care.

The medical records maintained by both the referring and consulting providers must identify the other provider and the reason for consultation.

Providers must use procedure code 99241, 99242, 99243, 99244, or 99245 when billing new or established patient consultations in the office, or in an outpatient or other ambulatory facility.

Office or outpatient consultations are limited to one consultation every six months by the same provider for the same diagnosis. Subsequent office or outpatient consultation visits during this six-month period will be denied.

**8.2.57.1.4 Services Outside of Business Hours**

Texas Medicaid limits reimbursement for after-hours charges (procedure codes 99050, 99056, and 99060) to office-based providers rendering services after routine office hours.

An office-based provider may bill an after-hours charge in addition to a visit when providing medically necessary services for the care of a client with an emergent condition after the provider’s posted, routine office hours. Office-based physicians may be reimbursed an inconvenience charge when either of the following exists and the reason is documented in the client’s medical record:

- The physician leaves the office or home to see a client in the emergency room.
• The physician leaves the home and returns to the office to see a client after the physician’s routine office hours.
• The physician is interrupted from routine office hours to attend to another client’s emergency outside of the office.

8.2.57.1.5 Observation Services

Hospital observation (procedure codes 99217, 99218, 99219, and 99220) are professional services provided for a period of more than 6 hours but fewer than 24 hours regardless of the hour of the initial contact, even if the client remains under physician care past midnight. Subsequent observation care, per day (procedure codes 99224, 99225, and 99226) is also a benefit of Texas Medicaid.

Inpatient hospital observation services must be submitted using the procedure code 99234, 99235, or 99236.

Observation care discharge day management procedure code 99217 must be billed to report services provided to a client upon discharge from observation status if the discharge is on a date other than the initial date of admission. The following procedure codes are denied if submitted with the same date of service as procedure codes 99217, 99234, 99235, and 99236:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99211</td>
</tr>
</tbody>
</table>

If an E/M service is billed by the same provider with the same date of service as a physician observation visit, the E/M service is denied if provided in any place of service other than inpatient hospital.

If a physician observation visit (procedure code 99217, 99218, 99219, 99220, 99234, 99235, or 99236) is billed by the same provider with the same date of service as prolonged services (procedure code 99354, 99355, 99356, or 99357), the prolonged services will be denied as part of another procedure on the same day.

If dialysis treatment and a physician observation visit are billed by the same provider (and same specialty other than an internist or nephrologist) with the same date of service, the dialysis treatment may be reimbursed and the physician observation visit will be denied.

8.2.57.2 Domiciliary, Rest Home, or Custodial Care Services

The following procedure codes are used to report E/M in a facility that provides room, board, and other personal assistance services:

<table>
<thead>
<tr>
<th>New Patient Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99324</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Established Patient Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99334</td>
</tr>
</tbody>
</table>

Established patient visits billed on the same date of service as a new patient visit, by the same provider, will be denied as part of another procedure. Established patient visits are limited to one per day regardless of diagnosis.

8.2.57.3 Physician Services Provided in the Emergency Department

Providers must use procedure codes 99281, 99282, 99283, 99284, and 99285 when billing emergency department services.
If an emergency department visit is billed by the same provider with the same date of service as any of the following office, outpatient consultation, or nursing facility service procedure codes, the emergency department visit may be reimbursed and the office, consultation, or nursing facility visit is denied:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>99201</td>
<td>99202</td>
</tr>
<tr>
<td>99203</td>
<td>99204</td>
</tr>
<tr>
<td>99205</td>
<td>99211</td>
</tr>
<tr>
<td>99212</td>
<td>99213</td>
</tr>
<tr>
<td>99214</td>
<td>99215</td>
</tr>
<tr>
<td>99241</td>
<td>99242</td>
</tr>
<tr>
<td>99243</td>
<td>99244</td>
</tr>
<tr>
<td>99245</td>
<td>99304</td>
</tr>
<tr>
<td>99305</td>
<td>99306</td>
</tr>
<tr>
<td>99307</td>
<td>99308</td>
</tr>
<tr>
<td>99309</td>
<td>99310</td>
</tr>
</tbody>
</table>

Emergency department visits are denied when billed with the same date of service as an observation service (procedure codes 99217, 99218, 99219, and 99220) by the same provider.

Multiple emergency department visits provided by the same provider for the same client on the same day must have the times for each visit documented on the claim form. Also, more than one visit billed with the same date of service can be indicated by adding the modifier 76 to the claim form. Medical documentation is required to support this service.

Reimbursement for physicians in the emergency department is based on Section 104 of TEFRA. TEFRA requires that Medicaid limit reimbursement for those physicians’ services furnished in hospital outpatient settings that also are ordinarily furnished in physician offices. The list of emergent condition diagnosis codes is used to determine the appropriate reimbursement for these services. The reimbursement for each service is determined by multiplying the base allowable fee by 60 percent.

Refer to: Section 2, “Hospital (Medical/Surgical Acute Care Facility)” in Hospital Services Handbook (Vol. 2, Provider Handbooks) for information on emergency department services by facilities (room and ancillary).

### 8.2.57.4 Group Clinical Visits

Texas Medicaid may reimburse physicians for group clinical visits (procedure code 99078) providing clinical services and educational counseling to a group of clients with the same chronic condition of diabetes or the same chronic condition of asthma.

E/M procedure code 99211, 99212, 99213, 99214, or 99215 may be reimbursed when performed by the same provider and billed with the same date of service as the group clinical visit.

Group clinical visits may be reimbursed for established patients only. The client’s plan of care must be determined and documented in the medical record by the physician before attending group clinical visits.

Participation of established patients in a group clinical visit is optional. Informed consent must be obtained from the client and maintained in the medical record before rendering group clinical visit services.

Clients who participate in group clinical visits and who have diseases covered under the Texas Medicaid Enhanced Care Program (congestive heart failure, chronic obstructive pulmonary disease, diabetes, coronary artery disease, and asthma) must receive a referral to the disease management program. Clinical providers are encouraged to coordinate care with the Texas Medicaid Enhanced Care Program for clients who are eligible for the disease management program and choose to participate in the program.

The physician leading the group clinical visit is responsible for the effectiveness and content of the information provided during the group clinical visit.

Nationally-approved curriculum on asthma and diabetes, such as that available through the American Association of Diabetic Educators and Asthma Education and Prevention Programs approved by the CDC must be incorporated into the educational portion of group clinical visits.
Group clinical visits must last at least 1 hour with a minimum of 2 clients and a maximum of 20 and must include:

- An informational and instructional presentation. In order to promote self-management of the chronic disease, the group visit must include a presentation instructing and informing the client about clinical issues including how to prevent exacerbation or complications, proper use of medications and other therapeutic techniques, and living with chronic illness.

- A question and answer period. Allow time for the clients to ask questions.

- An encounter with the physician. A short (approximately 5 to 15 minutes per client), one-on-one, private, face-to-face encounter with the physician is required. This visit consists of a physical examination; the gathering, monitoring, and reviewing of laboratory and diagnostic tests; and medical decision-making, including an individual treatment plan. Documentation in the client’s medical record must support the level of E/M as approved by CMS guidelines.

The documentation of the individual treatment plan retained in the client’s medical record must include data collected (physical exam and lab findings), educational services provided, patient participation, referrals to the HHSC disease management program, and the beginning and ending time of the visit.

Group visits are limited to a maximum of four per year.

8.2.57.4.1 Group Clinical Visits for Diabetes

Group clinical visits are benefits of Texas Medicaid for the management of the chronic condition of diabetes when submitted with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>25000 25001 25002 25003 25010 25011 25012 25013 25020 25021</td>
</tr>
<tr>
<td>25022 25023 25030 25031 25032 25033 25040 25041 25042 25043</td>
</tr>
<tr>
<td>25050 25051 25052 25053 25060 25061 25062 25063 25070 25071</td>
</tr>
<tr>
<td>25072 25073 25081 25082 25083 25090 25091 25092 25093</td>
</tr>
</tbody>
</table>

Diabetic education must explain the following:

- What diabetes is
- Nutrition
- Exercise and physical activity
- Prevention of acute complications
- Prevention of chronic complications
- Monitoring
- Medication

8.2.57.4.2 Group Clinical Visits for Asthma

Group clinical visits are benefits of Texas Medicaid for the management of the chronic condition of asthma when submitted with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>49300 49301 49302 49310 49311 49312 49320 49321 49322 49381</td>
</tr>
<tr>
<td>49382 49390 49391 49392</td>
</tr>
</tbody>
</table>

Asthma education must consist of the following:
• What is asthma?
• What are symptoms of asthma?
• What happens during an episode of asthma?
• What exacerbates asthma?
• How is asthma controlled?
• What physical activities can people with asthma do?

8.2.57.5 Home Services

Home services are provided in a private residence. New patient visits will be limited to once every three years. Providers must utilize procedure codes 99341, 99342, 99343, 99344, and 99345 when billing for new patient services provided in the home setting. New patient visits are limited to one every three years.

Providers must use procedure codes 99347, 99348, 99349, and 99350 when billing established patient services provided in the home setting.

A subsequent home visit (procedure codes 99347, 99348, 99349, and 99350) billed with the same date of service as a new patient home visit (procedure codes 99344 and 99345) by the same provider will be denied as part of another procedure, regardless of the diagnosis.

Subsequent home E/M codes are limited to one per day, regardless of diagnosis.

8.2.57.6 Inpatient Hospital Services

Hospital visits are limited to one per day for the same provider.

Only one initial hospital care visit may be reimbursed to the same provider within a 30-day period for the same diagnosis. Additional initial hospital visits with the same diagnosis within a 30-day period will be denied.

A hospital care visit submitted by the same provider for the same client within three days of a new patient office, home, nursing facility, or skilled nursing facility (SNF) visit, for the same or for a similar diagnosis must be submitted as a subsequent care visit.

Refer to: Subsection 8.2.70.6, “Global Fees,” in this handbook for more information about global services.

8.2.57.6.1 Hospital Admissions, Initial Visits, and Subsequent Visits

Inpatient hospital visits must be submitted using procedure codes 99221, 99222, 99223, 99231, 99232, and 99233.

If a hospital admission or initial visit (procedure code 99221, 99222, 99223) and physician observation visits (procedure codes 99217, 99218, 99219, 99220, 99234, 99235, and 99236) are billed by the same provider with the same date of service, the hospital admission may be reimbursed and the physician observation visit will be denied.

If an initial hospital visit following admission is billed by the same provider with the same date of service as any of the following emergency department visits, inpatient consultations, office visits, or outpatient consultations, the initial hospital visit may be reimbursed and the other visits will be denied:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99221</td>
</tr>
<tr>
<td>99221</td>
</tr>
<tr>
<td>99221</td>
</tr>
<tr>
<td>99221</td>
</tr>
</tbody>
</table>
If a subsequent hospital visit (procedure code 99231, 99232, or 99233) following admission is billed by the same provider with the same date of service as any of the following emergency department visits, office visits, or outpatient consultations, the subsequent hospital visit may be reimbursed and the other visits will be denied:

<table>
<thead>
<tr>
<th>Procedure Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>99281 99282 99283 99284 99285 99201 99202 99203 99204 99205</td>
</tr>
<tr>
<td>99211 99212 99213 99214 99215 99241 99242 99243 99244 99245</td>
</tr>
</tbody>
</table>

Only one initial hospital care visit may be reimbursed to the same provider within a 30-day period for the same diagnosis. Additional initial hospital visits with the same diagnosis within a 30-day period will be denied.

A subsequent hospital visit (procedure code 99231, 99232, or 99233) may be reimbursed to the same provider when performed on the same day as critical care services (procedure codes 99291 and 99292).

E/M services provided in a hospital setting following a major procedure and provided by the same provider or in direct follow-up for postsurgical care are included in the surgeon’s global surgical fee and are denied as included in another procedure.

Refer to: Subsection 8.2.43, “Newborn Services,” in this handbook for information about newborn services.

8.2.57.6.2 Concurrent Care

Concurrent care exists when services are provided to a patient by more than one physician on the same day during a period of hospitalization in the inpatient hospital setting. Concurrent care is appropriate when the level of care and the documented clinical circumstances require the skills of different specialties to successfully manage the patient in accordance with accepted standards of good medical practice. Concurrent care may be reimbursed to providers of different specialties when the services are for unrelated diagnoses involving different organ systems.

Concurrent care will be denied when billed for providers of the same specialty for the same or related diagnoses (i.e., diagnosis codes containing the same first three digits). Denied concurrent care may be appealed when accompanied by documentation of medical necessity.

Each appeal submitted for concurrent care must contain the following information:

- Documentation of the medical necessity for the physician’s services (care and treatment)
- Diagnosis and indication of the severity of the client’s condition (acute or critical)
- Role of the physician in the care of the client, including the name of the admitting physician
- Specialty and subspecialty of each physician and any limitations of practice

Claims appealed without clear documentation of medical necessity as described above will be denied.

Important: If the attending physician requests only a consultation, the request must be clearly stated in the orders.

All concurrent care is subject to retrospective review. Documentation of medical necessity for concurrent care must be retained by the physician as required by federal law and must include, but is not limited to, documentation of:

- The orders for concurrent care or valid reasons for the request by the attending physician.
- The name of the requesting physician by the physician rendering concurrent care.
8.2.57.6.3 Consultations

Consultations provided to hospital inpatients, residents of nursing facilities, or patients in a partial hospital setting must be billed using procedure codes 99251, 99252, 99253, 99254, and 99255.

One initial inpatient consultation (procedure code 99251, 99252, 99253, 99254, or 99255) is allowed for each hospitalization within a 30-day period. Subsequent consultations billed as initial consultations during this time period will be denied.

Refer to: Subsection 8.2.57.1.3, “Consultation Services,” in this handbook for additional criteria information.

8.2.57.6.4 Critical Care

Critical care includes the care of critically ill clients that require the constant attention of the physician. The physician must either be at bedside or immediately available to the client. The physician’s full attention must be devoted to the client so that the physician cannot render E/M to any other client during the same period of time. Critical care is usually given in a critical care area, such as the coronary care unit, intensive care unit, respiratory care unit, neonatal intensive care unit, or the emergency department care facility. The following procedure codes are used to bill critical care services:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Limitations</th>
</tr>
</thead>
<tbody>
<tr>
<td>99291</td>
<td>A per day charge for the first 30 to 74 minutes of critical care (time spent by the physician does not have to be continuous on that day).</td>
</tr>
<tr>
<td>99292</td>
<td>A per day charge for each additional 30 minutes beyond the first 74 minutes of critical care for up to 6 units or 3 hours per day.*</td>
</tr>
<tr>
<td>99471</td>
<td>A per day charge for initial inpatient pediatric critical care of the critically ill client who is 29 days through 24 months of age.</td>
</tr>
<tr>
<td>99472</td>
<td>A per day charge for subsequent inpatient pediatric critical care of the critically ill client who is 29 days through 24 months of age.</td>
</tr>
<tr>
<td>99475</td>
<td>A per day charge for initial inpatient pediatric critical care of the critically ill client who is 2 years through 5 years of age.</td>
</tr>
<tr>
<td>99476</td>
<td>A per day charge for subsequent inpatient pediatric critical care of the critically ill client who is 2 years through 5 years of age.</td>
</tr>
</tbody>
</table>

* If the number of units is not stated on the claim, a quantity of one is allowed.

The following services are included in procedure codes 99291, 99292, 99471, 99472, 99475, and 99476 and will not be reimbursed separately when billed by the same provider during the critical care period:

<table>

</tr>
</tbody>
</table>

*This list is not all-inclusive.
Services for a client who is not critically ill and unstable but who was treated in a critical care unit must be reported using subsequent hospital visit codes or hospital consultation codes.

If the same provider who performed a major surgery must also perform critical care on the same day for the same client, the provider must bill the critical care with documentation that the critical care was unrelated to the specific anatomic injury or general surgical procedure.

Critical care (procedure codes 99291, 99292, 99471, 99472, 99475, and 99476) may be reimbursed only to the provider rendering the critical care service at the time of crisis. Critical care involves high-complexity decision-making to access, manipulate, and support vital system functions. While providers from various specialties may be consulted to render an opinion and assist in the management of a particular portion of the care, only the provider managing the care of the critically ill patient during a life threatening crisis may bill the critical care procedure codes.

Critical care procedure codes 99291 and 99292 are used to report the total duration of time spent by a physician providing critical care services to a critically ill or critically injured client, even if the time spent by the physician on that date is not continuous.

Actual time spent with the individual client must be recorded in the client’s record and reflect the time billed on the claim. The time that can be reported as critical care is the time spent engaged in work directly related to the individual client’s care whether that time was spent at the immediate bedside or elsewhere on the floor or unit.

Time spent under the following circumstances may not be reported as critical care:

- Activities that occur outside of the unit or off the floor
- Activities that do not directly contribute to the treatment of the client
- While performing separately reportable procedures or services

Critical care of less than 30 minutes total duration per day must be reported with the appropriate E/M procedure code.

If critical care that meets the initial 30-minute time requirement is provided to the same client by different physicians, the initial provider’s claim may be reimbursed. The second provider’s claim will be denied but may be appealed. The time spent by each physician cannot overlap; two physicians cannot

---

*This list is not all-inclusive.
**Procedure codes are not bundled with procedure code 99475 or 99476.
bill critical care for care delivered at the same time. Supporting medical record documentation that includes the time in which the critical care was rendered must be provided by the second physician. In addition, a statement must be submitted indicating the physician was the only provider managing the care of the critically ill patient during the life threatening crisis.

If the provider’s time exceeds the 74-minute threshold for procedure code 99291, procedure code 99292 may be billed for each additional 30 minutes. Procedure code 99292 must be billed by the same performing provider or by a member of the same performing provider’s group practice and is limited to 6 units per day for any provider.

Inpatient critical care services provided to infants 29 days through 24 months of age are reported with pediatric critical care procedure codes 99471 and 99472. The pediatric critical care procedure codes are reported as long as the infant or young child qualifies for critical care services during the hospital stay through 24 months of age.

Pediatric critical care (procedure codes 99471, 99472, 99475, and 99476) is a per-day charge. Only one physician can bill pediatric critical care per day. Procedure code 99472 will be denied when billed on the same day by the same provider as procedure code 99471. If an inpatient or outpatient E/M service is billed by the same provider with the same date of service as pediatric critical care, the E/M service is denied.

Critical care provided to a neonatal, pediatric, or adult client in an outpatient setting (e.g., emergency room) which does not result in admission must be billed using procedure codes 99291 and 99292. Critical care provided to a neonatal or pediatric client in both the outpatient and inpatient settings on the same day must be billed using the appropriate neonatal or pediatric critical care procedure code.

If a hospital discharge (procedure code 99238 or 99239) is billed with the same date of service by the same provider as pediatric critical care (procedure code 99471, 99472, 99475, or 99476), the pediatric critical care procedure codes may be reimbursed, and the hospital discharge procedure codes are denied.

If critical care (procedure code 99291 or 99292) is provided to a patient at a distinctly separate time from another outpatient E/M service by the same provider, both services may be reimbursed with supporting medical record documentation.

Prolonged physician services (procedure codes 99354, 99355, 99356, and 99357) will be denied when billed by the same provider with the same date of service as critical care (procedure code 99291, 99292, 99471, 99472, 99475, or 99476).

Claims may be subject to retrospective review to ensure documentation supports the medical necessity of the service when billing the claim.

Critical care procedure codes 99291 and 99292 will be denied when submitted with the same date of service by the same provider as neonatal intensive care procedure code 99468, 99469, 99478, 99479, or 99480.

8.2.57.6.5 Hospital Discharge

Hospital discharge must be submitted using procedure code 99238 or 99239.

Discharge management billed by the same provider with the same date of service as the admission will be denied.

Discharge management billed by the same provider with the same date of service as an emergency room visit will be denied but may be reimbursed upon appeal if provided at a separate time.

Procedure code 99238 will be denied as part of 99239 when billed by any provider with the same date of service.

Subsequent hospital visits billed by the same provider with the same date of service as discharge management will be denied.
Initial and subsequent hospital visit procedure codes 99221, 99222, 99223, 99231, 99232, and 99233 billed with the same date of service as hospital discharge day management procedure codes 99238 and 99239 will be denied as part of another procedure billed on the same day.

8.2.57.6.6 Nursing Facility Services

Providers must use the following when billing initial nursing facility assessments, subsequent nursing facility care, and annual nursing facility assessments in a nursing facility:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99304* 99305* 99306* 99307 99308 99309 99310 99315 99316 99318</td>
</tr>
</tbody>
</table>

* Initial nursing facility assessments include all services related to an admission to the nursing facility.

Comprehensive initial nursing facility assessments performed by the same provider for the same diagnosis are limited to one every six months. The second initial nursing facility assessment within the six-month period will be denied.

Prolonged services in the nursing facility involving direct (face-to-face) patient contact that is beyond the usual service may be reimbursed on the same day as a nursing facility visit (procedure code 99304, 99305, 99306, 99307, 99308, 99309, or 99310).

Procedure code 99356 must be used to report the first hour of prolonged service and is limited to one per day.

Procedure code 99357 must be used to report each additional 30 minutes and is limited to a quantity of three units or one and one-half hours per day.

Prolonged physician services will not be reimbursed in addition to an emergency room visit billed on the same day.

The following initial nursing facility assessments, subsequent nursing facility care, or nursing facility discharge day management procedure codes billed by the same provider with the same date of service as initial hospital care (procedure code 99221 or 99223) are denied as part of another procedure billed on the same day:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99304 99305 99306 99307 99308 99309 99310 99315 99316</td>
</tr>
</tbody>
</table>

All E/M services, regardless of setting, are considered part of the initial nursing facility care when performed by the same provider on the same day as the admission.

Subsequent nursing facility care E/M procedure codes 99307, 99308, 99309, and 99310 are limited to one per day regardless of diagnosis.

8.2.57.6.7 Observation

When a patient is admitted to the hospital as an inpatient and is discharged in less than 24 hours, the hospital may request that the physician change the admission order from inpatient status to outpatient observation status. This is an acceptable billing practice under Texas Medicaid when the physician makes the changes to the admitting order from inpatient status to outpatient observation status before the hospital submits the claim for reimbursement.

Refer to: Subsection 8.2.57.1.5, “Observation Services,” in this handbook for more information about hospital observation.
8.2.57.7 Prolonged Physician Services

Prolonged services involve face-to-face patient contact and may be provided in the office, outpatient hospital, or inpatient hospital settings. The face-to-face patient contact must exceed the time threshold of the following E/M procedure codes submitted for the date of service and be beyond the usual service.

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99201</td>
</tr>
<tr>
<td>99221</td>
</tr>
<tr>
<td>99245</td>
</tr>
<tr>
<td>99345</td>
</tr>
</tbody>
</table>

The following procedure codes must be used for prolonged physician services:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>Limitation</th>
</tr>
</thead>
<tbody>
<tr>
<td>99354 and 99356</td>
<td>Used in conjunction with the E/M procedure code to report the first hour of prolonged service and are limited to one per day.</td>
</tr>
<tr>
<td>99355 and 99357</td>
<td>Used to report each additional 30 minutes and are limited to a quantity of 3 units or 1.5 hours per day.</td>
</tr>
</tbody>
</table>

Note: Prolonged services that are less than 30 minutes in duration cannot not be reported separately.

Prolonged services in the inpatient setting involving face-to-face client contact that is beyond the usual service may be reimbursed when provided on the same day as an initial hospital visit (procedure codes 99221, 99222, 99223, 99251, 99252, 99253, 99254, and 99255) or a subsequent hospital visit (99231, 99232, 99233).

Prolonged physician services are denied when billed with critical care or emergency room visits billed with the same date of service.

Prolonged physician services and physician standby services without a face-to-face contact (procedure codes 99358, 99359, and 99360) are not a benefit of Texas Medicaid.

8.2.57.8 Referrals

A referral is defined as the transfer of the total or specific care of a patient from one physician to another; a referral does not constitute a consultation. These services must be billed using the appropriate E/M visit code.

When a Texas Medicaid provider refers a Texas Medicaid client to another provider for additional treatment or services, the referring provider must forward notification of the client’s eligibility and his provider identifier. The client must be made aware that the provider he/she is referred to does or does not participate in Texas Medicaid. Some clients not eligible for Medicaid are eligible for family planning through Titles V and XX. These clients should be referred to contracted agency providers for family planning services.

8.2.57.8.1 Referral Requirements for Children with Disabilities

All health-care professionals are required by state and federal legislation to refer children who are younger than 3 years of age with developmental delays to early childhood intervention services provided under the authority of the Department of Assistive and Rehabilitative Services (DARS).

8.2.58 Physician Services in a Long Term Care (LTC) Nursing Facility
The Department of Aging and Disability Services (DADS) requires initial certification and recertification of Medicaid clients in nursing facilities by physicians in accordance with guidelines set forth in federal regulations. Physician visits for certification and recertification are considered medically necessary, and are reimbursable by Medicaid whether performed in the physician’s office or the nursing facility.

Additional information is available on the DADS website at www.dads.state.tx.us.

8.2.59 Podiatry and Related Services
Podiatry and related services are a benefit of Texas Medicaid.

8.2.59.1 Clubfoot Casting
Procedure code 29450 is limited to clients who are birth through 3 years of age and is payable to a physician in the management of clubfoot when no surgery has been performed. The physician may bill the appropriate E/M code with a casting code and be reimbursed for both. Procedure code 29750 is limited to clients who are birth through 2 years of age and is payable to a physician in addition to the initial casting or strapping procedure.

Use modifiers LT (left) and RT (right) with all procedures, as appropriate.

Casting and wedging are benefits if the client has one of the following conditions:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>73671</td>
</tr>
</tbody>
</table>

8.2.59.2 Flat Foot Treatment
Reimbursement for treatment of deformities of the foot and lower extremity that includes flat foot as a component of the deformity may be considered when the client presents with significant pain in the foot, leg, or knee, resulting in a loss of or decrease in function, along with a secondary condition such as valgus deformity or plantar fasciitis.

Treatment of flat foot (flexible pes planus) that is solely cosmetic in nature is not a benefit of Texas Medicaid.

8.2.59.3 Routine Foot Care
Routine foot care must be medically necessary and billed with the following procedure codes. No specific diagnosis restrictions exist. The following procedures are limited to one service every six months per client, regardless of provider specialty: 11055, 11056, 11057, 11719, and G0127.

8.2.60 Prostate Surgery
A transurethral resection of the prostate (TURP) is the most common procedure performed to treat benign prostatic hyperplasia (BPH). A TURP may be billed with procedure code 52601, 52630, or 52640.

If a provider submits separate charges for any of the TURP procedure codes listed above, and any of the following procedure codes on the same date of service, the charges for the services listed below will be denied as part of the TURP procedure.

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>52000</td>
</tr>
<tr>
<td>53020</td>
</tr>
</tbody>
</table>
8.2.61 Radiation Therapy

Radiation treatment management may be reimbursed by Texas Medicaid as defined in the *Current Procedure Terminology* (CPT) manual under the “Radiation Treatment Management” section.

The following radiation therapy services are limited to once per day unless documentation submitted with an appeal supports the need for the service to be provided more frequently:

- Therapeutic radiation treatment planning
- Therapeutic radiology simulation-aided field setting
- Teletherapy
- Brachytherapy isodose calculation
- Treatment devices
- Proton beam delivery/treatment
- Intracavitary radiation source application
- Interstitial radiation source application
- Remote afterloading high intensity brachytherapy
- Radiation treatment delivery
- Localization
- Radioisotope therapy

Laboratory and diagnostic radiological services provided in the office setting may be reimbursed to physicians as a total component. Radiation treatment centers may also be reimbursed for the total component for these services in the outpatient hospital setting. Injectable medications given during the course of therapy in any setting may be reimbursed separately.

Routine follow-up care by the same physician on the day of any therapeutic radiology service will be denied. Medical services within program limitations may be reimbursed on appeal when documentation supports the medical necessity of the visit due to services unrelated to the radiation treatment or radiation treatment complication.

The professional component and the technical component will be denied when billed with the total component. The total component includes the professional and the technical components.

The professional component may be reimbursed for services rendered in the inpatient hospital setting, radiation treatment center setting, or outpatient hospital setting. Physicians billing client services rendered in the office setting or in a facility recognized by Medicaid as a radiation treatment center may be reimbursed for total components.

The following procedure codes will be denied when billed with the same date of service as radiation therapy by the same provider:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>

8.2.61.1 Brachytherapy

8.2.61.1.1 Prior Authorization for Brachytherapy
Prior authorization is not required for brachytherapy.

8.2.61.1.2 Other Limitations on Brachytherapy
The following brachytherapy services include admission to the hospital and daily care. Initial and subsequent hospital care will be denied as part of another service when billed with the same date of service as brachytherapy services.

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>

</tbody>
</table>

Any E/M service will be denied as part of another service when billed with the same date of service by the same provider as procedure codes 77750, 77785, 77786, 77787, and 77789.

Normal follow-up care by the same physician will be denied as part of another service when billed with the same dates of service as any therapeutic radiology service. Any other E/M office visit will be denied as part of another service when billed with the same date of service by the same provider as the radiation treatment or radiation treatment complication.

Providers may use modifier 25 to indicate that the additional visit was for a separate, distinct service unrelated to the radiation treatment or radiation treatment complication. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client’s medical record and made available upon request.

Procedure code 55860 will be denied when billed with the same date of service, same provider as procedure code 55862.

Procedure codes 55860 and 55862 will be denied when billed with the same date of service, same provider as procedure code 55865.

Procedure codes 77750, 77761, 77762, and 77763 will be denied when billed with the same date of service, same provider as procedure code 77785 or 77786.

Procedure codes 77785 will be denied when billed with the same date of service, same provider as procedure code 77786.

Procedure codes 77761, 77762, 77763, 77785, and 77786 will be denied when billed with the same date of service by the same provider as procedure code 77787.
### 8.2.61.2 Procedure Code Limitations

The following table summarizes the procedure code limitations for radiation therapy. The right column are denied as part of another service when submitted with the same date of service by the same provider as any of the procedure codes in the left column.

8.2.61.3 Stereotactic Radiosurgery

8.2.61.3.1 Prior Authorization for Stereotactic Radiosurgery

The following procedure codes are a benefit of Texas Medicaid with prior authorization and documentation of medical necessity:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>Procedures May Be Reimbursed</th>
<th>Procedure Codes Will Be Denied</th>
</tr>
</thead>
<tbody>
<tr>
<td>77421, 77431, 99183, 99355, 99357</td>
<td>77432</td>
<td>77435</td>
</tr>
<tr>
<td>77421, 77427, 77431, 77432, 99183, 99355, 99357</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Prior authorization requirements for stereotactic radiosurgery may include, but are not limited to, diagnoses indicating one of the following medical conditions:

- Benign and malignant tumors of the central nervous system
- Vascular malformations
- Soft tissue tumors in chest, abdomen, and pelvis
- Trigeminal neuralgia refractory to medical management

Other diagnoses may be considered after reviewing the documentation of medical necessity. Stereotactic radiosurgery is considered investigational and not a benefit of Texas Medicaid for all other indications including, but not limited to, epilepsy and chronic pain.

Prior authorization requirements for proton beam (procedure codes 77520, 77522, 77523, 77525 and S8030) and helium ion radiosurgery (procedure codes 77422 and 77423) may include, but are not limited to, diagnoses indicating one of the following medical conditions:

- Melanoma of the uveal tract (iris, choroid, ciliary body)
- Postoperative treatment for chordomas or low-grade chondrosarcomas of the skull or cervical spine
- Prostate cancer
- Pituitary neoplasms
- Other central nervous system tumors located near vital structures

Prior authorization for neutron beam radiosurgery may be considered for malignant neoplasms of the salivary gland.

Prior authorization requirements for procedure code 77399 include, but are not limited to, diagnosis, documentation of medical necessity, a specific description of the procedure to be performed, and an indication that the procedure would not be covered by a more specific procedure code.

Stereotactic radiosurgery will not be prior authorized for clients with metastatic disease and a projected life span of less than six months or for clients with widespread cerebral or extracranial metastasis that is not responsive to systemic therapy.
8.2.61.3.2 Other Limitations on Stereotactic Radiosurgery

The following table summarizes the procedure code limitations for stereotactic radiosurgery. Procedure codes in Column A will be denied when billed with the same date of service by the same provider as procedure codes in Column B.

<table>
<thead>
<tr>
<th>Column A (Denied)</th>
<th>Column B</th>
</tr>
</thead>
<tbody>
<tr>

<tr>
<td>61800</td>
<td>61796, 61798</td>
</tr>
<tr>
<td>63621</td>
<td>63620</td>
</tr>
</tbody>
</table>

Procedure codes 61796 and 63620 must not be billed more than once per course of treatment.

Procedure codes 61797 and 61799 must not be billed more than once per lesion, and may only be billed up to four times for the entire course of treatment, regardless of the number of lesions treated.

Procedure code 63621 may only be billed up to two times for the entire course of treatment, regardless of the number of lesions treated.

8.2.62 Radiology Services

In compliance with HHS regulations, physicians (MDs and DOs), group practices, and clinics may not bill for radiology services provided outside their offices. These services must be billed directly by the facility/provider that performs the service.

This restriction does not affect radiology services performed by physicians or under their personal supervision in their offices. The radiology equipment must be owned by physicians and be located in their office to allow for billing of TOS 4 (complete procedure) or TOS T with modifier TC to Texas
Medicaid. If physicians are members of a clinic that owns and operates radiology facilities, they may bill for these services. However, if physicians practice independently and share space in a medical complex where radiology facilities are located, they may not bill for these services even if they own or share ownership of the facility, unless they personally supervise and are responsible for the operation of the facilities on a daily basis.

Providers billing for three or more of the same radiology procedures on the same day must indicate the time the procedure was performed to indicate that it is not a duplicate service. The use of modifiers 76 and 77 does not remove the requirement of indicating the times services were rendered. The original claim will be denied but can be appealed with the documentation of procedure times.

When billing for services in an inpatient or outpatient hospital setting, the radiologist may only bill the professional interpretation of procedures (modifier 26). This also applies when providing services to a client who is in an inpatient status even if the client is brought to the radiologist’s office for the service. The hospital is responsible for all facility services (the technical component) even if the service is supplied by another facility/provider.

A separate charge for an X-ray interpretation billed by the attending or consulting physician is not allowed concurrently with that of the radiologist. Interpretations are considered part of the attending or consulting physician’s overall work-up and treatment of the patient.

Providers other than radiologists are sometimes under agreement with facilities to provide interpretations in specific instances. Those specialties may be paid if a radiologist does not bill for the professional component of X-ray procedures.

If duplicate billings are found between radiologists and the other specialties, the radiologist may be paid, and the other provider is denied.

Abdominal flat plates (AFP) or kidneys, ureters, bladder (KUB) codes 74000, 74010, and 74020 are frequently done as preliminary X-rays before other, more complicated X-ray procedures. If a physician bills separately for an AFP or KUB and more complicated procedures, the charges are combined and the more complex procedure may be paid. If, however, the claim specifically states the AFP or KUB was done first and the results required additional X-rays, each procedure may be paid separately.

Oral preparations for X-rays are included in the charge for the X-ray procedure when billed by a physician. Separate charges for the oral preparation are denied as part of another procedure on the same day.

Separate charges for injectable radiopharmaceuticals used in the performance of specialized X-ray procedures may be paid. If a procedure code is not indicated, an unlisted code must have a drug name, route of administration, and dosage written on the claim.

8.2.62.1 Diagnosis Requirements

Physicians enrolled and practicing as radiologists are not routinely required to send a diagnosis with their request for payment except when providing the following services:

- Arteriograms
- Venography
- Chest X-rays
- Cardiac blood pool imaging
- Echography

Radiologists are required to identify the referring provider by full name and address or provider identifier in Block 17 of the CMS-1500 claim form. Radiology procedures submitted by all other physician specialties must reference a diagnosis with every procedure billed. As with all procedures billed to Texas Medicaid, baseline screening and/or comparison studies are not a benefit.
8.2.62.2 Cardiac Blood Pool Imaging

Cardiac blood pool imaging may be reimbursed with procedure codes 78472, 78473, 78481, 78483, 78494, and 78496. Prior authorization is required for outpatient diagnostic services.

Procedure code 78496 will be denied when billed on the same day as procedure codes 78481 and 78494.

Procedure codes 78472, 78481, 78483, 78494, and 78496 will be denied when billed on the same day as procedure code 78473.

Procedure codes 78472, 78481, 78494, and 78496 will be denied when billed on the same day as procedure code 78483.

Procedure code 78481 will be denied when billed on the same day as procedure code 78472.

Procedure codes 78472 and 78481 will be denied when billed on the same day as procedure code 78494.

Refer to: Subsection 8.2.24.10, “Myocardial Perfusion Imaging,” in this handbook for more information about myocardial perfusion imaging.

Section 3, “Radiological and physiological laboratory services” in Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks) for additional information and authorization requirements.

8.2.62.3 Chest X-Rays

All providers including radiologists billing for chest X-rays must supply a diagnosis code.

Screening, baseline, or rule-out studies do not qualify for reimbursement; however, the following diagnosis codes are payable:

<table>

*Claims for clients who are 12 years of age and older may be appealed with documentation of medical necessity.*
8.2.62.4 Magnetic Resonance Angiography (MRA)

MRA is an effective diagnostic tool used to detect, diagnose, and aid the treatment of heart disorders, stroke, and blood vessel diseases.

Refer to: Section 3, "Radiological and physiological laboratory services" in the Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks) for additional information and authorization requirements.
8.2.62.5 Magnetic Resonance Imaging (MRI)

MRIs may be an effective diagnostic tool for detecting defects, diseases, and trauma.

Refer to: Section 3, "Radiological and physiological laboratory services" in the Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks) for additional information and authorization requirements.

8.2.62.6 Technetium TC 99M

Procedure codes A9500 (Sestamibi) and A9502 (Tetrofosmin) are limited to three per day when billed by the same provider.

8.2.63 Reduction Mammaplasties

8.2.63.1 Prior Authorization for Reduction Mammaplasty

Procedure code 19318 is the removal of breast tissue and is a benefit of Texas Medicaid when prior authorized.

For prior authorization of reduction mammaplasty, a completed “Medicaid Certificate of Medical Necessity for Reduction Mammaplasty” form signed and dated by the physician, must be submitted and include at least one of the following criteria:

- Evidence of severe neck and/or back pain with incapacitation from the pain.
- Evidence of ulnar pain or paresthesia from thoracic nerve root compression.
- Submammary dermatological conditions such as intertrigo and acne that are refractory to conventional medication.
- Shoulder grooving with ulceration due to breast size.

In addition to the above criteria, documentation must indicate:

- The minimum weight of tissue expected to be removed from each breast which consideration to height and weight is as follows:

<table>
<thead>
<tr>
<th>Height and Weight Chart</th>
<th>Minimum Weight</th>
<th>Minimum Tissue Removal</th>
</tr>
</thead>
<tbody>
<tr>
<td>Under 5’</td>
<td>&lt;140 lb</td>
<td>300 grams per breast</td>
</tr>
<tr>
<td>5’-5’.4”</td>
<td>up to 180 lb</td>
<td>350 grams per breast</td>
</tr>
<tr>
<td>5’.4”-5’.7”</td>
<td>up to 220 lb</td>
<td>400 grams per breast</td>
</tr>
<tr>
<td>5’.7”- and up</td>
<td>211 lb and up</td>
<td>500 grams per breast</td>
</tr>
</tbody>
</table>

- The client, if 40 years of age or older, has had a mammogram within the past year that was negative for cancer.

The following services are not a benefit of Texas Medicaid:

- Reduction mammaplasty for cosmetic purposes (such as the equalization of breast size)
- Reduction mammaplasty for gynecomastia (enlargement of breast tissue in the male)
- Augmentation mammaplasty to increase breast size

The physician is required to maintain the following documentation in the client’s clinical records:

- A complete history and physical
- Pulmonary function studies results
- Past treatments, therapies, and outcomes for pain control and weight reduction
The physician is required to maintain preoperative photographs (frontal and lateral views) in the client’s clinical records and must be made available to Texas Medicaid upon request.

For reimbursement purposes on a bilateral procedure, the full allowed amount will be paid to the surgeon and assistant surgeon for the first breast reduction and one half the allowed amount will be paid for the second reduction. Facilities are paid for one surgical procedure.

When submitting for prior authorization, requests must be sent to TMHP Special Medical Prior Authorization. Sending requests directly to the TMHP Medical Director delays the processing of the request. Providers are to mail prior authorization requests for reduction mammoplasty for traditional Medicaid and PCCM clients to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax 1-512-514-4213

8.2.64 Renal Disease

8.2.64.1 Dialysis Patients

Physician reimbursement for supervision of patients on dialysis is based on a monthly capitation payment (MCP) calculated by Medicare. The MCP is a comprehensive payment that covers all physician services associated with the continuing medical management of a maintenance dialysis patient for treatments received in the facility. An original onset date of dialysis treatment must be included on claims for all renal dialysis procedures in all POSs except inpatient hospital. The original onset date must be the same date entered on the 2728 form sent to the Social Security office.

8.2.64.1.1 Physician Supervision of Dialysis Patients

Physician supervision of outpatient ESRD services includes services provided in the course of office visits where any of the following occur:

- The routine monitoring of dialysis.
- The treatment or follow-up of complications of dialysis, including:
  - The evaluation of related diagnostic tests and procedures.
  - Services involved in prescribing therapy for illnesses unrelated to renal disease, if the treatment occurs without increasing the number of physician-client contacts.

Use the following procedure codes when billing for physician supervision of outpatient ESRD dialysis services:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>90951</td>
</tr>
<tr>
<td>90961</td>
</tr>
</tbody>
</table>

The procedure codes must be billed as described below:

- In the circumstances where the client is not on home dialysis and has had a complete assessment visit during the calendar month and ESRD-related services are provided for a full month, procedure codes 90951, 90952, 90953, 90954, 90955, 90956, 90957, 90958, 90959, 90960, 90961, or 90962 must be used, determined by the number of face-to-face visits the physician has had with the client during the month, and the client’s age.
- When a full calendar month of ESRD-related services are reported for clients on home dialysis, procedure codes 90963, 90964, 90965, or 90966 must be used, determined by the client’s age.
Report procedure codes 90967, 90968, 90969, and 90970 when ESRD related services are provided for less than a full month, per day, under the following conditions:

- The client is seen for a partial month and is not on home dialysis and received one or more face-to-face visits but did not receive a complete assessment.
- The client is on home dialysis and received less than a full month of services.
- The client is a transient client.
- The client was hospitalized during a month of services before a complete assessment could be performed.
- Dialysis was stopped due to recovery or death of client.
- The client received a kidney transplant.

Procedure codes 90967, 90968, 90969, and 90970 are limited to one per day by any provider. When billing procedure code 90967, 90968, 90969, or 90970, the date of service must indicate each day that supervision was provided.

Procedure codes 90967, 90968, 90969, and 90970 will be denied when billed within the same calendar month by any provider as procedure code 90951, 90952, 90953, 90954, 90955, 90956, 90957, 90958, 90959, 90960, 90961, 90962, 90963, 90964, 90965, or 90966.

Procedure codes 90951, 90952, 90953, 90954, 90955, 90956, 90957, 90958, 90959, 90960, 90961, 90962, 90963, 90964, 90965, or 90966 are limited to once per calendar month by any provider, and only one service may be reimbursed per calendar month by any provider.

The following services may be provided in conjunction with physician supervision of ESRD dialysis but are considered non-routine and may be billed separately:

- Declotting of shunts when performed by the physician.
- Physician services to inpatient clients. If a client is hospitalized during a calendar month of ESRD related services before a complete assessment is performed, or the client receives one or more face-to-face assessments, but the timing of inpatient admission prevents the client from receiving a complete assessment, the physician must bill procedure code 90967, 90968, 90969, or 90970 for each date of outpatient supervision and bill the appropriate hospital evaluation and management code for individual services provided on the hospitalized days. If a client has a complete assessment during a month in which the client is hospitalized, procedure code 90951, 90952, 90953, 90954, 90955, 90956, 90957, 90958, 90959, 90960, 90961, or 90962 must be reported for the month of supervision, determined by the number of face-to-face physician visits with the client during the month, and the client’s age. The appropriate inpatient evaluation and management codes must be reported for procedures provided during the hospitalization.
- Dialysis at an outpatient facility other than the usual dialysis setting for a patient of a physician who bills the MCP. The physician must bill procedure code 90967, 90968, 90969, or 90970 for each date supervision is provided. The physician may not bill for days that the client dialyzed elsewhere.
- Physician services beyond those that are related to the treatment of the patient’s renal condition that cause the number of physician-patient contacts to increase. Physicians may bill on a fee-for-service basis if they supply documentation on the claim that the illness is not related to the renal condition and that additional visits are required.

Use procedure codes 90935, 90937, 90945, and 90947 for inpatient dialysis services for ESRD or non-ESRD clients when the physician is present during dialysis treatment. The physician must be physically present and involved during the course of the dialysis. These codes are not payable for a cursory visit by the physician; hospital visit codes must be used for a cursory visit.
The hospital procedure codes 90935, 90937, 90945, and 90947 are for complete care of the patient; hospital visits cannot be billed on the same day as these codes. However, if the physician only sees the patient when they are not dialyzing, the physician must bill the appropriate hospital visit code. The inpatient dialysis code must not be submitted for payment.

Only one of procedure code 90935, 90937, 90945, or 90947 may be reimbursed per day, any provider. Procedure codes 90935, 90937, 90945, and 90947 may also be used for outpatient dialysis services for non-ESRD clients.

Inpatient services provided to hospitalized clients for whom the physician has agreed to bill monthly, may be reimbursed in one of the following three ways:

- The physician may elect to continue monthly billing, in which case she or he may not bill for individual services provided to the hospitalized clients.
- The physician may reduce the monthly bill by 1/30th for each day of hospitalization and charge fees for individual services provided on the hospitalized days.
- The physician may bill for inpatient dialysis services using the inpatient dialysis procedure codes. The physician must be present and involved with the clients during the course of the dialysis.

Clients may receive dialysis at an outpatient facility other than his or her usual dialysis setting, even if their physician bills for monthly dialysis coordination. The physician must reduce the monthly billed amount by 1/30th for each day the client is dialyzed elsewhere.

Physician services beyond those related to the treatment of the client’s renal condition may be reimbursed on a fee-for-service basis. The physician should provide documentation stating the illness is not related to the renal condition and added visits are required.

Payment is made for physician training services in addition to the monthly capitation payment for physician supervision rendered to maintenance facility clients.

8.2.64.2 Laboratory Services for Dialysis Patients

Texas Medicaid may reimburse for laboratory services performed for dialysis patients.

Charges for routine laboratory services performed according to established frequencies are included in the facility’s composite rate billed to Texas Medicaid regardless of where the tests were performed. Routine laboratory testing processed by an outside laboratory are billed to the facility and billed by a renal dialysis facility, unless they are inclusive tests.

Nonroutine laboratory services for people dialyzing in a facility and all laboratory work for people on CAPD may be billed separately from the dialysis charge.

Refer to: Subsection 7.2.9, “Laboratory and Radiology Services,” in the Outpatient Services Handbook (Vol. 2, Provider Handbooks) for more information on laboratory services.

8.2.64.3 Self-Dialysis Patients

Physician reimbursement for supervision of patients on self-dialysis is made after completion of the patient’s training. If the training is not completed, payment is proportionate to the amount of time spent in training. Payment for training may be made in addition to payment under the MCP for physician supervision of an in-facility maintenance dialysis patient. Use procedure codes 90989 and 90993 for dialysis training regardless of the type of training performed. These procedure codes must be billed as specified:

- When complete dialysis training is provided, bill procedure code 90989. Providers are to use modifier AT when using this procedure code. The date of service indicates the date training was completed, and the quantity is 1.
• When dialysis training is not completed, bill procedure code 90993. The date of service must list each day that a session of training was provided and the quantity must indicate the number of training sessions provided.

The amount of reimbursement of subsequent training is determined by prorating the physician’s payment for initial training sessions. The amount of payment for each additional training session does not exceed $20.

8.2.64.3.1 Physician Supervision

All physician services required to create the capacity for self-dialysis must include:

• Direction of and participation in training of dialysis patients.

• Review of family and home status and environment, and counseling and training of family members.

• Review of training progress.

8.2.64.3.2 Initial Training

The following services are included in the physician charge for supervision of a client on self-dialysis:

• Physician services rendered during a dialysis session including those backup dialyses that occur in outpatient facility settings.

• Office visits for the routine evaluation of patient progress, including the interpretation of diagnostic tests and procedures.

• Physician services rendered by the attending physician in the course of an office visit, the primary purpose of which is routine monitoring or the follow-up of complications of dialysis, including services involved in prescribing therapy for illnesses unrelated to renal disease, which may be appropriately treated without increasing the number of contacts beyond those occurring at regular monitoring sessions or visits for treatment of renal complications.

• General support services (for example, arranging for supplies).

8.2.64.3.3 Subsequent Training

No additional payment is made after the initial self-dialysis training course unless subsequent training is required for one of the following reasons:

• A change from the client’s treatment machine to one the client had not been trained to use in the initial training course

• A change in setting

• A change in dialysis partner

The physician must document the reason for additional training sessions on the CMS-1500 paper claim form.

Dialysis equipment and supplies used by the client who dialyzes in the home are not benefits of Texas Medicaid, including the lease or purchase of dialysis machines and disposable supply kits.

8.2.65 Respiratory Syncytial Virus (RSV) Prophylaxis

Texas Medicaid considers the AAP criteria as the most useful single reference describing the evidence basis for RSV prophylaxis medical necessity. RSV immune globulin, intramuscular palivizumab (Synagis) is a benefit of CCP when medically necessary.
Based upon RSV surveillance data and the expert opinion of Texas-based specialists, the beginning of RSV season in Texas starts on different dates based on the region. The RSV season is expected to start no earlier than October 1 for all regions, except regions 1, 9, and 10. For regions 1, 9, and 10, the RSV season is expected to start no earlier than November 1 of each calendar year.

During the RSV season, hospitalized infants determined to be at risk of severe RSV disease in September should receive their first dose of RSV prophylaxis 48–72 hours before being discharged. Clients will continue with five more doses. Discharge planning should arrange outpatient follow-up for continued administration of RSV prophylaxis if medically indicated.

Beginning at 6 months of age, all high-risk infants, including those who qualify for RSV prophylaxis and their contacts should be immunized against influenza, unless influenza immunization is medically contraindicated in the case of a specific individual.

### 8.2.65.1 Benefits and Limitations

RSV prophylaxis is not reimbursed for dates of service outside the RSV season.

**Exception:** RSV prophylaxis may be reimbursed for two weeks preceding the start of the RSV season for hospitalized infants determined to be at risk of severe RSV disease in September.

RSV prophylaxis injections given during an inpatient hospital stay are considered included in the hospital DRG and are not separately reimbursed.

RSV prophylaxis is not reimbursed for Medicaid clients who are 24 months of age and older at the start of the RSV season in Texas.

CCP may consider reimbursement for the intramuscular version of the RSV prophylaxis when billed with procedure code 90378. RSV prophylaxis is provided in single use vials and must be billed per milligram (mg). If different size vials (e.g., 50 mg vial and 100 mg vial) are required for the appropriate dosage on the same date of service, providers must bill each vial separately on the same claim and include the appropriate NDC for each detail.

Providers are required to maintain accurate records of the total number of units given and the total number of units purchased, administered, and wasted for each client. If billing waste, the total number of units billed must include the number of units wasted. Texas Medicaid reimburses providers for waste only if a partial vial is actually wasted and not if the partial vial is used for another patient.

**Example:** If 180 mg is administered to a client and 20 mg is wasted, 200 services/units must be billed, not 4 services/units.

Providers may not bill Texas Medicaid if the RSV prophylaxis was obtained through the VDP; however, providers may be reimbursed for administering the drug.

RSV prophylaxis medications are covered in the office or outpatient setting.

### 8.2.65.2 Prior Authorization Requirements

All RSV prophylaxis injections require prior authorization through CCP. All requests for RSV prophylaxis must be submitted to CCP on a completed Texas Medicaid Palivizumab (*Synagis*) Prior Authorization Request Form. The form must be signed and dated by the ordering physician. The physician’s original, handwritten signature and date are required on the form and must be maintained in the client’s medical record.

Providers may submit prior authorization requests beginning September 1 for an administration date starting on or after October 1, and beginning October 1 for an administration date starting on or after November 1. Subsequent doses of RSV prophylaxis should be given approximately every 30 days. Clients continue with 4 more doses, with the last dose given by February 28 for those starting in October. Clients starting in November should continue approximately every 30 days until a stop date of March 31.
RSV prophylaxis may be prior authorized for Medicaid clients who are birth through 23 months of age who have hemodynamically significant cyanotic congenital heart disease. For Medicaid clients who are birth through 23 months of age who have acyanotic congenital heart disease, documentation submitted must demonstrate at least one of the following:

- The presence of moderate to severe pulmonary hypertension
- Active treatment for and diagnosis of hemodynamically significant heart disease, including both of the following documentation requirements:
  - Active treatment for hemodynamically significant acyanotic heart disease within the six months preceding the start of the RSV season (i.e., treatment dates between April 1 and September 30) consisting of digitalis, diuretics, or supplemental oxygen
  - A diagnosis code consistent with hemodynamically significant congenital heart disease (i.e., congenital anatomical cardiac defects or cardiomyopathies of any etiology)

The following table lists the most common cardiac diagnosis codes:

<table>
<thead>
<tr>

<td>74722</td>
</tr>
</tbody>
</table>

RSV prophylaxis may be prior authorized for Medicaid clients who are birth through 23 months of age who have underlying lung disease when the documentation submitted demonstrates the following:

- Active treatment for lung disease within the six months preceding the start of the RSV season (i.e., treatment dates between April 1 and September 30) consisting of one of the following:
  - Corticosteroids (systemic or inhaled), bronchodilators, diuretics, or supplemental oxygen therapy
  - Mechanical ventilation
- One of the following diagnoses of significant lung disease:
  - Chronic respiratory failure
  - Chronic respiratory disease arising in the perinatal period
  - Cystic fibrosis
  - Congenital bronchiectasis
  - Diaphragmatic defects
  - Congenital cystic lung disease
  - Congenital agenesis, hypoplasia and dysplasia of lung
  - Other respiratory diagnoses with supportive documentation of medical necessity
The following table identifies common chronic lung disease (CLD) diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>27700</td>
</tr>
<tr>
<td>7566</td>
</tr>
</tbody>
</table>

Palivizumab may be prior authorized for clients who are birth through 11 months of age when documentation includes one of the following:

- A diagnosis code that indicates the infant was born at 28 weeks, 6 days estimated gestational age or earlier (diagnosis code 76521, 76522, 76523, or 76524)
- A diagnosis code that indicates the infant was born at less than 35 weeks gestational age (diagnosis code 76521, 76522, 76523, 76524, 76525, 76526, or 76527) and documentation of one of the following:
  - Neuromuscular disease (including diagnosis code 51883)
  - Significant congenital anomalies of the airway expected to compromise respiratory reserve (diagnosis codes 7480, 7482, or 7503)

Palivizumab may be prior authorized for clients who are birth through 5 months of age when documentation includes one of the following:

- A diagnosis code that indicates the infant was born at 29 weeks through 31 weeks, 6 days estimated gestational age (diagnosis code 76525 or 76526)
- A diagnosis code that indicates the infant was born at 32 weeks through 34 weeks, 6 days gestational age (diagnosis code 76526, 76527, or 76528) and documentation of two of the following in the client’s medical record:
  - Direct exposure to tobacco smoke or documented environmental air pollutants
  - Regular childcare attendance
  - Siblings who attend childcare or school outside of the home
- A diagnosis code that indicates the infant was born at any gestational age with documentation of cystic fibrosis (diagnosis code 27700, 27701, 27702, 27703, or 27709)

Palivizumab may be prior authorized for Medicaid clients who are birth through 1 year of age who have had a stem cell or solid organ transplant and have one of the following diagnosis codes related to transplants:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>V420</td>
</tr>
</tbody>
</table>

Providers may request prior authorization for RSV prophylaxis through CCP for clients with medical conditions not otherwise noted. All such requests must provide documentation to support the determination of medical necessity for this service.

**8.2.65.3 Obtaining Palivizumab**

Providers have two options for obtaining palivizumab for Medicaid clients in Texas Medicaid fee-for-service and PCCM: Providers may purchase and bill for palivizumab; or they may obtain the drug through the VDP.

**Note:** For Medicaid Managed Care clients, providers must contact the client’s HMO.
Option 1—Texas Medicaid fee-for-service reimbursement for palivizumab:

1) The treating provider identifies a Medicaid-enrolled client with indications for RSV prophylaxis with palivizumab.

2) The provider purchases palivizumab for administration to the client in the office.

3) The provider adheres to Texas Medicaid benefits policy for RSV prophylaxis. Prior authorization is required.

4) The injection provider bills for the drug, an injection administration fee, and any medically necessary office-based E/M service provided at the time of injection.

5) The provider is reimbursed through the Texas Medicaid claims payment system.

Option 2—Obtaining palivizumab through the VDP

1) The treating provider identifies a Medicaid-enrolled client with indications for RSV prophylaxis with palivizumab.

2) The provider obtains palivizumab through the VDP.

3) The provider adheres to Texas Medicaid benefits policy for RSV prophylaxis, except that prior authorization is required for all clients as noted below.

The provider or provider’s agent sends a prescription for palivizumab with supporting clinical information on the Texas Medicaid Vendor Drug Program Palivizumab (Synagis) Prescription Form to a Texas Medicaid-enrolled pharmacy that is a member of the Synagis Distribution Network. The administering provider does not purchase the drug. Not all pharmacies participate in VDP for the palivizumab distribution program.

Refer to: HHSC’s Vendor Drug Program website at www.txvendordrug.com/dur/Synagis.shtml to find participating pharmacies.

1) The pharmacy contacts VDP’s Prior Authorization Call Center. Prior authorization is required for all clients.

2) If the information submitted does not demonstrate medical necessity, the request is denied. Both the pharmacy and provider are notified of the denial.

3) If the information submitted demonstrates medical necessity, the request is approved and both pharmacy and provider are notified.

4) The selected pharmacy fills the prescription and overnight ships an individual dose of the medication, in the name of the Medicaid client, directly to the provider. An initiation packet is mailed to the client's family, informing them of RSV and palivizumab’s benefits and side effects.

5) The treating provider administers the palivizumab injection to the Medicaid client in the office setting.

6) The injection provider bills for an injection administration fee and any medically necessary office-based E/M service provided at time of injection. The provider does not bill Texas Medicaid for the drug.

7) The pharmacy contacts the provider each month after initial injection to obtain updated client information to ensure the proper amount for the next dose.

The following client demographic information is required:

- The client’s date of birth
- The client’s age in months, as of October 1
- The client’s estimated gestational age (in weeks) at birth
- The client’s body weight (in pounds or kilograms)
- The monthly dose required
8.2.66 Sign Language Interpreting Services

Sign language interpreting services are benefits of Texas Medicaid. Providers must use procedure code T1013 with modifier U1 for the first hour of service, and T1013 with modifier UA for each additional 15 minutes of service. Procedure code T1013 billed with modifier U1 is limited to once per day, same provider, and procedure code T1013 billed with modifier UA is limited to a quantity of 28 per day, same provider.

Sign language interpreting services are available to Medicaid clients who are deaf or hard of hearing or to a parent or guardian of a Medicaid client if the parent or guardian is deaf or hard of hearing.

Physicians in private or group practices with fewer than 15 employees may be reimbursed for this service. The physician will be responsible for arranging and paying for the sign language interpreting services to facilitate the medical services being provided. The physician will then seek reimbursement from Texas Medicaid for providing this service.

Sign language interpreting services must be provided by an interpreter who possesses one of the following certification levels (i.e., levels A through H) issued by either the DARS, Office for Deaf and Hard of Hearing Services, Board for Evaluation of Interpreters (BEI) or the National Registry of Interpreters for the Deaf (RID).

Certification Levels:

- BEI Level I/II and BEI OC: B (Oral Certificate: Basic)
- BEI Basic and RID NIC (National Interpreter Certificate) Certified
- BEI Level II/III, RID CI (Certificate of Interpretation), RID CT (Certificate of Transliteration), RID IC (Interpretation Certificate), and RID TC (Transliteration Certificate)
- BEI Level III/IIIi, BEI OC: C (Oral Certificate: Comprehensive), BEI OC: V (Oral Certificate: Visible), RID CSC (Comprehensive Skills Certificate), RID IC/TC, RID CI/CT, RID RSC (Reverse Skills Certificate), and RID CDI (Certified Deaf Interpreter)
- BEI Advanced and RID NIC Advanced
- BEI IV/IVi, RID MCSC (Master Comprehensive Skills Certificate), and RID SC: L (Specialist Certificate: Legal)
- BEI V/Vi
- BEI Master; and RID NIC Master

Interpreting services include the provision of voice-to-sign, sign-to-voice, gestural-to-sign, sign-to-gestural, voice-to-visual, visual-to-voice, sign-to-visual, or visual-to-sign services for communication access provided by a certified interpreter.

The physician requesting interpreting services must maintain documentation verifying the provision of interpreting services. Documentation of the service must be included in the client’s medical record and must include the name of the sign language interpreter and the interpreter’s certification level. Documentation must be made available if requested by HHSC or its designee.

8.2.67 Skin Therapy

Skin therapy is a benefit of Texas Medicaid and may be reimbursed with the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>15782 15783 15792 15793 17000 17003 17004 17106 17107 17108</td>
</tr>
<tr>
<td>17110 17111 17250 17260 17261 17262 17263 17264 17266 17270</td>
</tr>
<tr>
<td>17271 17272 17273 17274 17276 17280 17281 17282 17283 17284</td>
</tr>
<tr>
<td>17286 17311 17312 17313 17314 17315 17340 17999 11900 11901</td>
</tr>
</tbody>
</table>
Claims for incision and drainage of acne when the diagnosis states there is infection or pustules may be paid.

Procedure codes 96900, 96910, 96912, 96913, 96920, 96921, and 96922 are covered benefits for the following diagnosis codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>96900</th>
<th>96910</th>
<th>96912</th>
<th>96913</th>
<th>96920</th>
<th>96921</th>
<th>96922</th>
<th>96999</th>
</tr>
</thead>
</table>

Procedure codes 96910 and 96912 will be denied when billed with procedure code 96913.

If billed with an office visit, an emergency room visit, or consult, procedure code 96900, 96910, or 96912 will be denied as part of the visit or consult.

If procedure code 96913 is billed with an office visit, emergency room visit or consult, the visit will be denied as part of the treatment.

Intralesional injection(s) may be considered for reimbursement in addition to an office visit.

Procedure codes 11900 and 11901 are covered benefits for intralesional injections for the following diagnosis codes:

<table>
<thead>

</table>
Procedure codes 15782, 15783, 15792, 15793, and 17999 require prior authorization. Requests for prior authorization must be submitted by the physician to the Special Medical Prior Authorization (SMPA) department with documentation supporting the medical necessity of the anticipated procedure. This documentation must remain in the client’s medical record and is subject to retrospective review. To avoid unnecessary denials, the physician must provide correct and complete information.

Dermabrasion procedures (procedure codes 15782 and 15783) and chemical peel procedures (procedure codes 15792 and 15793) may be prior authorized with documentation that the client meets all of the following criteria:

- A diagnosis of actinic keratosis with more than three lesions.
- Failed conservative treatment or documentation that conservative treatment is contraindicated.

Prior authorization requests for procedure code 17999 must include the following documentation:

- A clear, concise description of the procedure to be performed.
- Reason for recommending the particular procedure.
- Documentation that a specific procedure code is not available for the procedure requested.
- The client’s diagnosis.
- Medical records indicating prior treatment for the diagnosis and the medical necessity of the requested procedure.
- Place of service the procedure is to be performed.
• Documentation that the procedure is not investigational or experimental.
• The physician’s intended fee for the procedure including a comparable procedure code.

8.2.68 Sleep Studies

Sleep study procedure code 95806 is not a benefit of Texas Medicaid.

8.2.68.1 Actigraphy

Actigraphy (procedure code 95803) may be reimbursed in the office or outpatient hospital setting with a limit of one per day, and two per rolling year by any provider. Claims denied for more than two times per year may be appealed with documentation of medical necessity.

Procedure code 95803 will be denied when billed for the same date of service by the same provider as procedure code 95807, 95808, 95810, or 95811. Actigraphy can be performed as a stand-alone procedure or as an adjunct to polysomnography or multiple sleep latency test (MSLT).

Actigraphy (procedure code 95803) must be billed with one of the following diagnosis codes:

<table>
<thead>
<tr>

</tr>
<tr>
<td>78052</td>
</tr>
<tr>
<td>78054</td>
</tr>
<tr>
<td>78055</td>
</tr>
</tbody>
</table>

If the primary care physician performs the actigraphy, the technical component must be billed (procedure code 95803 with modifier TC).

Documentation of actigraphy must include a hard-copy printout or electronic file. Interpretation and treatment recommendations must be completed by a sleep specialist. The physician’s professional interpretation and report must include inspection of the entire recording and integration of the information gathered from other professionals’ analysis and observations. Documentation of the interpretation must be maintained by the interpreting physician.

Under the following conditions, actigraphy may be a useful adjunct to a detailed history, examination, and subjective sleep diary for the diagnosis and treatment of insomnia, circadian-rhythm disorders, and excessive sleepiness:

• When demonstration of multiday rest-activity patterns is necessary to diagnose, document severity, and guide the proper treatment.
• When more objective information regarding the day-to-day timing or the amount or patterns of a client’s sleep is necessary for optimal clinical decision-making.
• When the severity of a sleep disturbance reported by the client or caretaker seems inconsistent with clinical impressions or laboratory findings.
• To clarify the effects of, and under some instances, compliance with pharmacologic, behavioral, phototherapeutic, or chronotherapeutic treatment.
• In symptomatic clients for whom an accurate history cannot be obtained and at least one of the following is true:
  • A polysomnographic study has already been conducted.
  • A polysomnographic study is considered unlikely to be of much diagnostic benefit.
  • A polysomnographic study is not yet clearly indicated (because of the absence of accurate historical data).
  • A polysomnographic study is not immediately available.
Actigraphy may be useful in the assessment of specific aspects of the following disorders:

- Insomnia. Assessment of sleep variability, measurement of treatment effects, and detection of sleep phase alterations in insomnia secondary to circadian rhythm disturbance.
- Restless legs syndrome or periodic limb movement disorder. Assessment of treatment effects.

### 8.2.68.2 Pneumocardiograms

Pneumocardiograms (procedure code 95807) are limited to clients who are birth through 12 months of age.

Pneumocardiograms are limited to one per day, and two per rolling year by any provider. Claims denied for more than two times per year may be appealed with documentation of medical necessity.

Procedure code 95807 must be billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>32721</td>
</tr>
<tr>
<td>77981</td>
</tr>
</tbody>
</table>

Documentation of the complete readings associated with the pneumocardiogram and the physician’s interpretation must be maintained in the client’s medical record in a hard-copy printout or electronic file at the facility where the procedure is performed.

The physician’s interpretation and report must include inspection and integration of the information gathered from all physiological systems and other professionals’ analysis and observations.

### 8.2.68.3 Polysomnography

Polysomnography (procedure codes 95808, 95810, and 95811) is a benefit of Texas Medicaid.

Polysomnography is distinguished from sleep studies by the inclusion of sleep staging that includes a 1- to 4-lead electroencephalogram (EEG), electro-oculogram (EOG), and a limb or submental electromyogram (EMG).

Additional parameters of sleep that are evaluated in polysomnography include, but are not limited to, the following:

- ECG
- Airflow (by thermistor or intra-nasal pressure monitoring)
- Respiratory effort
- Adequacy of oxygenation by oximetry or transcutaneous monitoring
- Extremity movement or motor activity
- EEG monitoring for sleep staging
- Nocturnal penile tumescence
- Esophageal pH or intraluminal pressure monitoring
- Continuous blood pressure monitoring
- Snoring
- Body positions
- Adequacy of ventilation by end-tidal or transcutaneous CO2 monitoring

For a sleep study to be reported as a polysomnography, sleep must be recorded and staged. Use the following procedure codes to bill for polysomnography studies: 95808, 95810, and 95811.
Procedure codes 95810 and 95811 will be denied when billed for the same date of service by the same provider as procedure code 95808. Procedure code 95811 will be denied when billed for the same date of service by the same provider as procedure code 95810.

Polysomnography (procedure codes 95808, 95810, and 95811) is limited to one per day and two per rolling year by any provider and is allowed for the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>27801 27803 29182 29285 30740 30741 30742 30743 30744 30745</td>
</tr>
<tr>
<td>30746 30747 30748 32700 32701 32702 32710 32711 32712 32713</td>
</tr>
<tr>
<td>32715 32719 32720 32721 32722 32723 32724 32725 32726 32727</td>
</tr>
<tr>
<td>32729 32730 32731 32732 32733 32734 32735 32736 32737 32739</td>
</tr>
<tr>
<td>32740 32741 32742 32743 32744 32749 32751 32752 32753 32759</td>
</tr>
<tr>
<td>3278 33394 3350 33511 33519 33520 34120 3439 34400 34700</td>
</tr>
<tr>
<td>34701 34710 34711 3481 3590 3591 47410 51883 60784 7428</td>
</tr>
<tr>
<td>7483 7560 7564 78050 78051 78052 78053 78054 78055 78056</td>
</tr>
<tr>
<td>78057 78058 78059 78603 79902</td>
</tr>
</tbody>
</table>

Claims denied for more than two times per year may be appealed with documentation of medical necessity.

Documentation of the polysomnography testing must be maintained in the client’s medical record at the sleep facility and include approximately 1,000 pages or the electronically-stored equivalent of data during a single nighttime recording. Each record must be for sleep-wake states and stages, cardiac arrhythmias, respiratory events, motor activity, oxygen desaturations, and behavioral observations.

Documentation must also include the technologist’s analysis and report, the patient’s subjective report, and the influence of intervention applied during the night.

Interpretation and treatment recommendations must be completed by a sleep specialist. The physician’s professional interpretation and report must include inspection of the entire recording, examination of the technologist’s analysis and observations, and integration of the information gathered from all physiological systems. Documentation of the interpretation must be maintained in the sleep facility and by the interpreting physician.

8.2.68.4 *Multiple Sleep Latency Test (MSLT)*

Multiple sleep latency test (procedure code 95805) is limited to one per day and two per rolling year by any provider, and is restricted to the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>27803 32700 32701 32702 32709 32743 32751 33394 34700 34701</td>
</tr>
<tr>
<td>34701 34711 78053</td>
</tr>
</tbody>
</table>

Claims denied for more than two times per year may be appealed with documentation of medical necessity.

Documentation of MSLT must be maintained in the client’s medical record at the sleep facility and include a hard copy or electronic copy of four to five 20-minute recordings of sleep-wake states and stages spaced at two-hour intervals throughout the day, taking approximately seven to nine hours to complete. In addition, documentation must include the physiological recordings typically made during daytime testing. These typically include:

- EEG
- Electro-oculogram (EOG)
- EMG
- EKG
- Audio and video recordings made during the monitored portion of the day

Documentation must also include the technologist’s analysis and report, the client’s subjective report, and the influence of intervention applied during the night.

Interpretation and treatment recommendations must be completed by a sleep specialist. The physician’s interpretation and report must include inspection of the entire recording, examination of the technologist’s analysis and observations, and integration of the information gathered from all physiological systems. Documentation of the interpretation must be maintained in the sleep facility and by the interpreting physician.

MSLT procedure code 95805 must be performed in conjunction with polysomnography procedure code 95808, 95810, or 95811. Polysomnography must be performed on the date before MSLT. MSLT that is not performed in conjunction with polysomnography will be denied, but may be considered on appeal with documentation that explains why the polysomnography did not occur.

8.2.68.5 Sleep Facility Restrictions for Polysomnography and Multiple Sleep Latency Testing

Sleep facilities that perform services for Texas Medicaid clients must follow current American Academy of Sleep Medicine (AASM) practice parameters and clinical guidelines.

Physicians who provide supervision in sleep facilities must be board-certified or board-eligible, as outlined in the AASM guidelines.

Sleep facility technicians, technologists, and trainees must demonstrate that they have the skills, competencies, education, and experience that are set forth by their certifying agencies and AASM as necessary for advancement in the profession.

Polysomnographic technologists, technicians, and trainees must meet the following supervision requirements:

- A polysomnographic trainee provides basic polysomnographic testing and associated interventions under the direct supervision of a polysomnographic technician, polysomnographic technologist, or a physician.

  **Note:** Direct supervision means that the supervising licensed/certified professional must be present in the office suite or building and immediately available to furnish assistance and direction throughout the performance of the service. It does not mean that the supervising professional must be present in the room while the service is provided.

- A polysomnographic technologist provides comprehensive evaluation and treatment of sleep disorders under the general supervision of the clinical director (MD or DO).

- A polysomnographic technician provides comprehensive polysomnographic testing and analysis and associated interventions under the general supervision of a polysomnographic technologist or clinical director (MD or DO).

- The supervising physician must be readily available to the performing technologist throughout the duration of the study, but is not required to be in the building.

The sleep facility must have one or more supervising physicians who are responsible for the direct and ongoing oversight of the quality of the testing performed, the proper operation and calibration of equipment used to perform tests, and the qualifications of the nonphysician staff who use the equipment.

Services provided without the required level of supervision are not considered reasonable and necessary.
Claims denied for more than two times per year may be appealed with documentation of medical necessity.

Documentation of MSLT must be maintained in the client’s medical record at the sleep facility and include a hard copy or electronic copy of four to five, 20-minute recordings of sleep-wake states and stages spaced at two-hour intervals throughout the day, taking approximately seven to nine hours to complete. In addition, documentation must include the physiological recordings typically made during daytime testing. These typically include:

- EEG
- Electro-oculogram (EOG)
- EMG
- EKG
- Audio and video recordings made during the monitored portion of the day

Documentation must also include the technologist’s analysis and report, the client’s subjective report, and the influence of intervention applied during the night.

Interpretation and treatment recommendations must be completed by a sleep specialist. The physician’s interpretation and report must include inspection of the entire recording, examination of the technologist’s analysis and observations, and integration of the information gathered from all physiological systems. Documentation of the interpretation must be maintained in the sleep facility and by the interpreting physician.

MSLT procedure code 95805 must be performed in conjunction with polysomnography procedure code 95808, 95810, or 95811. Polysomnography must be performed on the date before MSLT. MSLT that is not performed in conjunction with polysomnography will be denied, but may be considered on appeal with documentation that explains why the polysomnography did not occur.

8.2.69 Speech Therapy (ST) Services

Speech therapy (ST) is a payable benefit to physicians.

Refer to: Section 4, “Therapists, Independent Practitioners, and Physicians” in the Nursing and Therapy Services Handbook (Vol. 2, Provider Handbooks) for information about speech therapy services provided by a physician.

8.2.70 Surgery Billing Guidelines

8.2.70.1 Primary Surgeon

A primary surgeon may be reimbursed for services provided in the inpatient hospital, outpatient hospital setting, and ASC/HASC Center.

A surgeon billing for a surgery and an assistant surgery fee on the same day may be reimbursed if two separate procedures are performed.

Refer to: Subsection 8.2.70.7, “Multiple Surgeries,” in this handbook.

8.2.70.2 Anesthesia Administered by Surgeon

If the physician bills for a surgical procedure and anesthesia for the same procedure, the surgery is paid and the anesthesia is denied as part of the surgical procedure. The exception to this policy is an epidural during labor and delivery.

Refer to: Subsection 8.2.6, “Anesthesia,” in this handbook.
**8.2.70.3 Assistant Surgeon**

Assistant surgeons may be reimbursed 16 percent of the TMRM fee for the surgical procedures performed.

Medicaid follows the TEFRA regulations for assistant surgeons in teaching hospitals. TEFRA states that an assistant surgeon will not be paid in a hospital classified by Medicare as a teaching facility with an approved graduate training program in the performing physician’s specialty. Medicaid may consider reimbursement for an assistant surgeon at a teaching hospital classified by Medicare as a teaching facility with approved graduate training program if one of the following situations is present and documented on the claim:

- No qualified resident was available. (Modifier 82 may be used to document this exception.)
- There were exceptional medical circumstances such as an emergency or life-threatening situation requiring immediate attention (modifiers 80 and KX).
- The primary surgeon has a policy of never, without exception, involving a resident in the preoperative, operative, or postoperative care of a patient (modifiers 80 and KX).
- The surgical procedure was complex and required a team of physicians (modifiers 80 and KX).

Use of these modifiers is not required but expedites claims processing. Therefore, it is recommended that these modifiers be used in conjunction with the procedure code rather than a narrative statement when these specific circumstances exist.

All claims for assistant surgeon services must include in Block 32 of the CMS-1500 paper claim form the name and address or provider identifier of the hospital in which the surgery was performed. If the physician seeks an exception to this TEFRA regulation based on unavailability of a qualified resident, the following certification statement must appear on or attached to the claim form:

"I understand that section 1842(b)(6)(D) of the Social Security Act generally prohibits reasonable charge payment for the services of assistants at surgery in teaching hospitals when qualified residents are available to furnish such services. I certify that the services for which payment is claimed were medically necessary, and that no qualified residents were available to perform the services. I further understand that these services are subject to postpayment review by TMHP."

Surgical procedures that do not ordinarily require the services of an assistant, as identified by Medicare, are denied when billed as an assistant surgery. One assistant surgeon is reimbursed for surgical procedures when appropriate.

Use modifier AS when the physician assistant is not enrolled as an individual provider and provides assistance at surgery. The claim must include the PA’s name and license number. Only procedures currently allowed for assistant surgeons are payable.

PAs actively enrolled as a Medicaid provider with an assigned provider identifier may bill assistant surgery services on a separate claim form using the PA’s individual provider identifier and modifiers U7 and 80.

**8.2.70.4 Bilateral Procedures**

When a bilateral procedure is performed and an appropriate bilateral code is not available, a unilateral code must be used. The unilateral code must be billed twice with a quantity of 1 for each code. For all procedures, use modifiers LT (left) and RT (right) as appropriate. For example, bilateral application of short leg cast is billed as follows:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Modifier</th>
</tr>
</thead>
<tbody>
<tr>
<td>29405</td>
<td>LT</td>
</tr>
<tr>
<td>29405</td>
<td>RT</td>
</tr>
</tbody>
</table>
8.2.70.5 Cosurgery

Cosurgery (two surgeons) may be reimbursed when the skills of two surgeons (usually with different skills) are required in the management of a specific surgical procedure. Cosurgery is for a surgery where the two surgeons’ separate contributions to the successful outcome of the procedure are considered to be of equal importance.

Note: No additional reimbursement will be made for an assistant surgeon.

Cosurgeons may be reimbursed for surgical procedure codes that are billed with modifier 62 if the CMS fee schedule indicates that the procedure allows for cosurgeons. Claims will not suspend for manual review of the documentation of medical necessity. Reimbursement will be calculated at 62.5 percent of the amount allowed for the intraoperative portion of the surgical procedure’s fee.

No cosurgery payment is made for claims submitted without modifier 62. In instances where the surgeons do not use modifier 62, the first claim received at TMHP for the service is considered that of the primary surgeon, and the subsequent claim is denied as a previously paid service.

8.2.70.6 Global Fees

Texas Medicaid uses global surgical periods to determine reimbursement for services that are related to surgical procedures. The following services are included in the global surgical period:

- Preoperative care, including history and physical
- Hospital admission work-up
- Anesthesia (when administered and monitored by the primary surgeon)
- Surgical procedure (intraoperative)
- Postoperative follow-up and related services
- Complications following the surgical procedure that do not require return trips to the operating room

Texas Medicaid adheres to a global fee concept for minor and major surgeries and invasive diagnostic procedures. Global surgical periods are defined as follows:

- 0-day Global Period-Reimbursement includes the surgical procedure and all associated services that are provided on the same day.
- 10-day Global Period-Reimbursement includes the surgical procedure, any associated services that are provided on the same day of the surgery, and any associated services that are provided for up to 10 days following the date of the surgical procedure.
- 90-day Global Period-Reimbursement includes the surgical procedure, preoperative services that are provided on the day before the surgical procedure, any associated services that are provided for up to 90 days following the date of the surgical procedure.

Procedure codes that are designated as “Carrier Discretion” will have their global periods determined by HHSC.

The global surgical fee period applies to both emergency and nonemergency surgical procedures. Physicians who are in the same group practice and specialty must bill, and are reimbursed, as if they were a single provider.
Modifiers
For services that are rendered in the preoperative, intraoperative, or postoperative period to be correctly reimbursed, providers must use the appropriate modifiers from the following table. Failure to use the appropriate modifier may result in recoupment.

<table>
<thead>
<tr>
<th>Modifiers Related to Surgical Fees</th>
</tr>
</thead>
<tbody>
<tr>
<td>24</td>
</tr>
<tr>
<td>57</td>
</tr>
<tr>
<td>78</td>
</tr>
</tbody>
</table>

For services that are billed with modifier 54, 55, or 56, medical record documentation must be maintained by both the surgeon and the physician who provides preoperative or postoperative care. Reimbursement for claims associated with modifier 54, 55, or 56 is limited to the same total amount as would have been paid if only one physician provided all of the care, regardless of the number of physicians who actually provide the care.

If a physician provided all of the preoperative, intraoperative, and postoperative care, claims may be considered for reimbursement when they are submitted without a modifier.

Documentation Requirements
For services that are billed with any of the listed modifiers to be considered for reimbursement, providers must maintain documentation in the client’s medical record that supports the medical necessity of the services. Acceptable documentation includes, but is not limited to, progress notes, operative reports, laboratory reports, and hospital records.

On a case-by-case basis, providers may be required to submit additional documentation that supports the medical necessity of services before the claim will be reimbursed.

Note: Retrospective review may be performed to ensure that the submitted documentation supports the medical necessity of the surgical procedure and any modifier used to bill the claim.

Preoperative Services
Preoperative physician E/M services (such as office or hospital visits) that are directly related to the planned surgical procedure and provided during the preoperative limitation period will be denied if they are billed by the surgeon or anesthesiologist who was involved in the surgical procedure.

Reimbursement will be considered when the E/M services are performed for distinct reasons that are unrelated to the procedure. E/M services that meet the definition of a significant, separately identifiable service may be billed with modifier 25 if they are provided on the same day by the same provider as the surgical procedure.

Modifier 25 is not used to report an E/M service that results in a decision to perform a surgical procedure. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client’s medical record and made available to Texas Medicaid upon request. If the decision to perform a minor procedure is made during an E/M visit immediately before the surgical procedure, the E/M visit is considered a routine preoperative service and is not separately billable.

Physicians who provide only preoperative services for surgical procedures with a 10- or 90-day global period may submit claims using the surgical procedure code with the identifying modifier 56. Reimbursement will be limited to a percentage of the fee for the surgical procedure.

E/M services that are provided during the preoperative period (one day before or the same day) of a major surgical procedure (90-day global period) and result in the initial decision to perform the surgical procedure may be considered for reimbursement when billed with modifier 57. The client’s medical record must clearly indicate when the initial decision to perform the procedure was made.
**Intraoperative Services**

Physicians who perform a surgical procedure with a 10- or 90-day global period but do not render postoperative services must bill the surgical procedure code with modifier 54. Modifier 54 indicates that the surgeon provided the surgical care only. Documentation in the medical record must support the transfer of care and must indicate that an agreement has been made with another physician to provide the postoperative management.

**Postoperative services**

Postoperative services that are directly related to the surgical procedure are included in the global surgical fee and are not reimbursed separately. Postoperative services include, but are not limited to, all of the following:

- Postoperative follow-up visits (any place of service)
- Postoperative pain management
- Miscellaneous services, including:
  - Dressing changes
  - Local incision care
  - Platelet gel
  - Removal of operative packs
  - Removal of cutaneous sutures, staples, lines, wires, drains, casts, or splints
  - Replacement of vascular access lines
  - Insertion, irrigation, and removal of urinary catheters, routine peripheral intravenous lines, nasogastric tubes, and rectal tubes
  - Changes or removal of tracheostomy tubes

  **Note:** Removal of postoperative dressings or anesthetic devices is not eligible for separate reimbursement as the removal is considered part of the allowance for the primary surgical procedure.

If the surgeon provides the surgery and only the postoperative care for a procedure that has a 10- or 90-day global period, the surgeon must include the following details on the claim form:

- The surgical procedure, date of the surgery, and modifier 54, which indicates that he or she was the surgeon.
- The surgical procedure, date of service, and modifier 55 to denote the postoperative care.

  **Note:** Providers must not submit a claim for the postoperative care until after the client has been seen during a face-to-face follow-up visit.

When a transfer of care occurs for postoperative care for procedures that have a 10- or 90-day global period, the following conditions apply:

- When transfer of care occurs immediately after surgery, the surgeon or other provider assuming in-hospital postoperative care must bill subsequent care procedure code 99231, 99232, or 99233.
- When the transfer of care occurs after hospital discharge, the surgeon or other provider who provides postdischarge care must bill the appropriate surgical code with modifier 55. Reimbursement will be limited to a percentage of the allowable fee for the surgical procedure.
- Documentation in the medical record must include all of the following:
  - A copy of the written transfer agreement.
  - The dates the care was assumed and relinquished.
The claim must indicate in the comments field of the claim form the dates on which care was assumed and relinquished, and the units field must reflect the total number of postoperative care days provided. Claims that are submitted on the CMS-1500 paper claim form must include the date of surgery in Block 14 and the dates on which care was assumed and relinquished in Block 19.

Staged or related surgical procedures or services that are performed during the postoperative period may be reimbursed when they are billed with modifier 58. A postoperative period will be assigned to the subsequent procedure. Documentation must indicate that the subsequent procedure or service was not the result of a complication and any of the following:

- It was planned at the time of the initial surgical procedure.
- It is more extensive than the initial surgical procedure.
- It is for therapy following an invasive diagnostic surgical procedure.

Note: Modifier 58 does not apply to procedure codes that are already defined as staged or sessioned services in the Current Procedural Terminology (CPT) Manual (e.g., 65855 or 66821).

Hospital visits by the surgeon during the same hospitalization as the surgery are considered to be related to the surgery and, as a result, not separately billable; however, separate payment for such visits can be allowed if any of the following conditions apply:

- Immunotherapy management is provided by the transplant surgeon. Immunosuppressant therapy following transplant surgery is covered separately from other postoperative services, so postoperative immunosuppressant therapy is not part of the global fee allowance for the transplant surgery. This coverage applies regardless of the setting.
- Critical care is provided by the surgeon for a burn or trauma patient.
- The hospital visit is for a diagnosis that is unrelated to the original surgery.

E/M services that are provided by the same provider for reasons that are unrelated to the operative surgical procedure may be considered for reimbursement if they are billed with modifier 24. The submitted documentation must substantiate the reasons for providing E/M services.

- Modifier 24 may be billed with modifier 25 if a significant, separately identifiable E/M service that was performed on the day of a procedure falls within the postoperative period of another unrelated procedure.
- Modifier 24 may be billed with modifier 57 if an E/M service that was performed within the postoperative period of another unrelated procedure results in the decision to perform major surgery.

Return Trips to the Operating Room

Return trips to the operating room for a repeat surgical procedure on the same part of the body may be considered for reimbursement when billed with modifiers 76 and 77. Billing with modifier 76 or 77 initiates the beginning of a new global period. Medical record documentation must support the need for a repeat procedure.

All surgical procedure codes with a predefined limitation (e.g., once per lifetime, one every 5 years) must not be submitted with modifier 76 or 77.

For modifiers 76 and 77, the repeated procedure must be the same as the initial surgical procedure. The repeat procedure must be billed with the appropriate modifier. The reason for the repeat surgical procedure should be entered in the narrative field on the claim form.
Return trips to the operating room for surgical procedures that are related to the initial surgery (i.e., complications) may be considered for reimbursement when they are billed with modifier 78 by the same provider.

- When a surgical procedure has a 0-day global period, the full value of the surgical procedure will be reimbursed; when the procedure has a 10- or 90-day global period only the intraoperative portion will be reimbursed.
- When an unlisted procedure is billed because no code exists to describe the treatment for the complications, reimbursement is a maximum of 50 percent of the value of the intraoperative services that were originally performed.

Reimbursement for the postoperative period of the first surgical procedure includes follow-up services from both surgical procedures, and no additional postoperative reimbursement is allotted. The global period will be based on the first surgical procedure.

Billing with modifier 78 does not begin a new global period.

Surgical procedures that are performed by the same provider during the postoperative period may be considered for reimbursement when they are billed with modifier 79 for any of the following:

- When the same procedure is performed with a different diagnosis.
- When the same procedure is performed on the left and right side of the body in different operative sessions and that procedure is billed with the RT or LT modifier.
- When a different procedure is performed with the same diagnosis.
- When a different procedure is performed with a different diagnosis.

Billing with modifier 79 initiates a new global surgical period.

8.2.70.7 Multiple Surgeries

Medicaid payment for multiple surgeries is based on the following guidelines:

- When two surgical procedures are performed on the same day, the primary procedure (such as the higher paying procedure) is paid at the full TMRM allowance. Secondary procedures performed on the same day are paid at half of the TMRM allowance when medically justified.
- Surgical procedures performed at different operative sessions on the same day are paid at the full TMRM allowance for each primary procedure at each session.
- Vaginal deliveries followed by tubal ligations are considered different operative sessions and are paid at full allowance for each primary procedure at a different session (i.e., both vaginal delivery and tubal ligation are paid at full allowance).
- Procedure code 58611 performed in conjunction with a Cesarean section is reimbursed at full allowance in cases where the allowance already represents half of the primary procedure.
- When a surgical procedure and a biopsy on the same organ or structure is done on the same day, the charges will be reviewed and reimbursement will be made only for the service with the higher of the allowed amounts.

8.2.70.8 Office Procedures

CMS has identified certain surgical procedures that are more appropriately performed in the office setting rather than as outpatient hospital, ASC/HASC procedures. The following list of surgical procedure codes should be billed in POS 1 (physician’s office). The medical necessity and/or special
circumstances that dictate that these surgical procedures be performed in a POS other than the office must be documented on the claim. These surgical procedures are evaluated on a retrospective basis that may cause recoupment and/or adjustment of the original claim payment. This list is not all inclusive.

**8.2.70.9 Orthopedic Hardware**

Reimbursement for the orthopedic hardware (e.g., buried wire, pin, screw, metal band, nail, rod, or plate) is part of the surgeon’s global fee or the facility’s payment group. The hardware is not reimbursed separately to either the surgeon or the facility.

The removal of orthopedic hardware is not payable to the same provider who inserted it, if removed within the global operative care period of the original insertion.

Services for removal of orthopedic hardware may be reimbursed separately after the global post operative care period.

**8.2.70.10 Second Opinions**

Texas Medicaid benefits include payment to physicians when eligible clients request second opinions about specific problems. The claim must be coded with the appropriate office or hospital visit codes, and the notation “Client Initiated Second Opinion” should be identified in Block 24D of the CMS-1500 paper claim form.

Refer to: Subsection 8.2.57.1.3, “Consultation Services,” in this handbook.

**8.2.70.11 Services Incidental to Surgery and/or Anesthesia**

Surgical and anesthesia services are benefits of Texas Medicaid when they are medically necessary.
Certain services that are performed in conjunction with surgical or anesthesia procedures are considered incidental to the surgery or anesthesia and are denied as included in the surgical/anesthesia fee. The following table (not an all-inclusive list) includes services that are incidental to surgery or anesthesia:

<table>

</tbody>
</table>

When performed for diagnostic purposes due to a separate incident that is not related to the original surgery after the postoperative recovery period, procedure codes 93312, 93313, 93314, 93315, 93316, and 93317 (transesophageal echocardiography) may be considered for reimbursement on appeal with documentation of a formal report.

Critical care procedure codes 99291 and 99292 performed due to a separate incident not related to the original surgery after the postoperative recovery period may be considered for reimbursement on appeal with appropriate documentation.

Procedure codes 33967, 33970, 36013, and 36014 (not an all-inclusive list) are services that are incidental to the anesthesia fee.

Placement (insertion) of a central venous catheter is denied as part of another procedure when procedure 33970 is billed on the same day. Separate payment for the insertion of monitoring lines is not available. Reimbursement for the insertion of monitoring lines is included in the anesthesia fee when the time units are calculated.

Procedure code 99143 will be denied if billed on the same date of service by the same provider as procedure code 99144.

Should the need arise for the insertion of a monitoring line due to a separate incident not related to the original surgery after the postoperative recovery period, reimbursement may be considered on appeal with appropriate documentation. Reimbursement for monitoring lines submitted as the sole procedure performed is allowed.

The following procedure codes will be denied when billed on the same date of service by the same provider as procedure codes 99143 or 99144:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>36000</td>
</tr>
<tr>
<td>93042</td>
</tr>
<tr>
<td>99201</td>
</tr>
<tr>
<td>99217</td>
</tr>
<tr>
<td>99234</td>
</tr>
<tr>
<td>99251</td>
</tr>
<tr>
<td>99291</td>
</tr>
<tr>
<td>99316</td>
</tr>
<tr>
<td>99337</td>
</tr>
<tr>
<td>99354</td>
</tr>
</tbody>
</table>
The following table includes procedure codes that are not incidental to surgery or anesthesia procedures and may be considered for reimbursement separately in addition to the surgery or anesthesia service in the inpatient or outpatient setting:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99477</td>
</tr>
</tbody>
</table>

Should the need arise for the insertion of a monitoring line due to a separate incident not related to the original surgery after the postoperative recovery period, reimbursement may be considered on appeal with appropriate documentation. Reimbursement for monitoring lines submitted as the sole procedure performed is allowed.

8.2.70.12 **Supplies, Trays, and Drugs**

Payment to physicians for supplies is not allowed under Texas Medicaid. All supplies, including anesthetizing agents, inhalants, surgical trays, or dressings are included in the surgical payment on the day of surgery when the surgery is performed in the office or home setting.

Reimbursement for office visits includes overhead for supplies. If any of these items are submitted separately, they are denied as included in the surgical fee. If the supplies are submitted with a place of service (POS) other than the office, these supplies are denied as services that must be billed by the hospital, or as services that are included in nursing facility charges.

Silver nitrate applicators, used to treat granulated tissue around gastrostomy tubes and tracheostomies, are considered part of the office/hospital visit. Silver nitrate applicators are not a benefit for home use.

8.2.71 **Telemedicine Services**

Telemedicine is defined as the practice of health-care delivery by a provider who is located at a site other than the site where the client is located. Telemedicine requires the use of advanced telecommunications technology and is used for the purposes of evaluation, diagnosis, consultation, or treatment.

Only those services that involve direct face-to-face interactive video communication between the client and the distant-site provider constitute a telemedicine interactive video consultation. Telephone conversations, chart reviews, electronic mail messages, and facsimile transmissions alone do not constitute a telemedicine interactive video consultation and will not be reimbursed as telemedicine services.

Use of telemedicine services within ICF-MR State Schools is subject to the policy established by DSHS and the Texas Department of Aging and Disability Services (DADS) established policies.

The provider requesting the telemedicine service must maintain medical record documentation indicating the medical necessity for the service. The referring provider is responsible for contacting the distant-site provider and arranging for the telemedicine service. In the absence of a referring provider, the distant-site provider is responsible for arranging the telemedicine service.

More than one medically necessary telemedicine service may be reimbursed for the same date of service and place of service, if the services are billed by physicians of different specialties. Documentation for a service provided via telemedicine must be the same as for a comparable in-person service.

Providers may not disclose any medical information revealed by the client or discovered by the physician in connection with the treatment of the client via telemedicine without proper authorization from the patient.
8.2.71.1 Distant Site

A distant site is the location of the provider rendering the service. The distant-site provider must be a physician enrolled as a Texas Medicaid provider.

The distant-site provider must maintain medical record documentation that:

- Indicates the reason for the telemedicine service.
- Includes the name of the referring provider, if any, and the name of the client’s primary care physician, if any.
- Includes a copy of the distant-site provider’s findings, diagnosis, plan of care, and treatment recommendations.

The following procedure codes, when billed with the GT modifier, are a benefit for distant-site providers:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>90801 90802 90862 99201 99202 99203 99204 99205 99211 99212</td>
</tr>
<tr>
<td>99213 99214 99215 99241 99242 99243 99244 99245 99251 99252</td>
</tr>
<tr>
<td>99253 99254 99255 G0425 G0426 G0427</td>
</tr>
</tbody>
</table>

8.2.71.2 Patient Site

A patient site is where the client is physically located while the service is rendered. Patient-site providers must be located in a rural or underserved area.

- A rural area is defined as a county that is not included in a metropolitan statistical area as defined by the U.S. Office of Management and Budget (OMB) according to the most recent United States Census Bureau population estimates.
- An underserved area is an area that meets the U.S. Department of Health and Human Services (DHHS) Index Primary Care Underservice criteria.

Patient-site services may only be provided by one of the following Texas Medicaid enrolled providers: physicians, physician assistants, nurse practitioner, clinical nurse specialist, and outpatient hospitals.

Patient-site providers must use procedure code Q3014 for the facility fee.

A telepresenter who meets one of the qualifications listed below must be at the patient site when the service is provided via telemedicine:

- An individual who is licensed or certified in Texas to perform health-care services and who presents or is delegated tasks and activities only within the scope of the individual’s licensure or certification
- A qualified mental health professional (QMHP) as defined in 25 TAC §412.303(48)

All patient sites must maintain documentation for each service, including the following:

- Date of the service
- Name of the client
- Name of the distant-site provider

The patient site that bills for the service must maintain records that document the following:

- Name of the referring or requesting provider
- Name of the telepresenter

A patient site that does not bill for the patient-site service must still capture this information if it is available.
8.2.72 Therapeutic Apheresis

The following conditions must be met for therapeutic apheresis:

- To perform the medical services, including all nonphysician services, and to respond to medical emergencies at all times during client care, direct supervision by a physician is required.
- Each client must be under the care of a physician.

Procedure codes 36511, 36512, 36513, 36514, 36515, and 36516 are limited to the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

Procedure codes 36515 and 36516 may be considered for reimbursement when billed for the low density lipoprotein (LDL) apheresis (such as Liposorber LA 15) or the protein A immunoadsorption (such as Prosorba) columns.

The protein A immunoadsorption column is indicated for use in either of the following cases:

- Clients who have a platelet count of less than 100,000 mm3.
- Adult clients who have signs and symptoms of moderate to severe rheumatoid arthritis with long-standing disease who have failed, or are intolerant to, DMARDs.

The LDL apheresis column is indicated for use in clients who have severe familial hypercholesterolemia whose cholesterol levels remain elevated despite a strict diet and ineffective or untolerated maximum drug therapy. Coverage is considered for the following high-risk population, for whom diet has been ineffective and maximum drug therapy has either been ineffective or not tolerated:

- Functional hypercholesterolemia homozygotes with LDL-C > 500 mg/dL.
- Functional hypercholesterolemia heterozygotes with LDL-C > 300 mg/dL.
• Functional hypercholesterolemia heterozygotes with LDL-C > 200 mg/dL and documented coronary heart disease.

Baseline LDL-C levels are to be obtained after the client has had, at a minimum, a six-month trial on an American Heart Association (AHA) Step II diet or equivalent and maximum tolerated combination drug therapy designed to reduce LDL-C. Baseline lipid levels are to be obtained during a two- to four-week period and should be within 10 percent of each other, indicating a stable condition.

Therapeutic apheresis using the LDL apheresis column may be reimbursed for diagnosis code 2720. Apheresis services represents one 30-minute time interval of personal physician involvement in the apheresis. Apheresis is limited to three 30-minute time intervals per procedure. The actual time must be reflected on the claim, or a unit of 1, 2, or 3 must be indicated. If the time (or unit) is not indicated, payment is based on one 30-minute time interval.

Apheresis is denied for all other diagnosis codes. Other diagnosis codes can be reviewed by the TMHP Medical Director or designee on appeal with documentation of medical necessity.

The following table summarizes the procedure code limitations for therapeutic apheresis. Procedure codes in Column A will be denied when billed with the same date of service by the same provider as procedure codes in Column B.

<table>
<thead>
<tr>
<th>Column A (Denied)</th>
<th>Column B</th>
</tr>
</thead>
<tbody>
<tr>
<td>36512</td>
<td>36511</td>
</tr>
<tr>
<td>36513</td>
<td>36511, 36512, 36514</td>
</tr>
<tr>
<td>36514, 36515</td>
<td>36511, 36512, 36513</td>
</tr>
<tr>
<td>36516</td>
<td>36511, 36512, 36513, 36514, 36515</td>
</tr>
</tbody>
</table>

Laboratory work before and during the apheresis procedure is covered when apheresis is performed in the outpatient setting (POS 5). Laboratory work billed in conjunction with apheresis performed in the inpatient setting (POS 3) is included in the DRG reimbursement and is not paid separately.

**8.2.73 Therapeutic Phlebotomy**

Therapeutic phlebotomy is a treatment whereby a prescribed amount of blood is withdrawn for medical reasons. Conditions that cause an elevation of the red blood cell volume or disorders that cause the body to accumulate too much iron may be treated by therapeutic phlebotomy.

Therapeutic phlebotomy is a benefit of Texas Medicaid and may be billed using procedure code 99195. This procedure code should be used only for the therapeutic form of phlebotomy and not for diagnostic reasons.

Reimbursement of therapeutic phlebotomy is limited to the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>2384</td>
</tr>
</tbody>
</table>

Therapeutic phlebotomy will autodeny for all other diagnosis codes.

**8.2.74 Therapeutic Radiopharmaceuticals**

Therapeutic radiopharmaceuticals, when used for therapeutic treatment, are a benefit of Texas Medicaid.
The following procedure codes may be submitted for therapeutic radiopharmaceuticals:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>79403</td>
</tr>
</tbody>
</table>

### 8.2.74.1 Prior Authorization for Therapeutic Radiopharmaceuticals

Prior authorization is not required for therapeutic radiopharmaceuticals except for tositumomab or ibritumomab tiuxetan.

Tositumomab or ibritumomab tiuxetan may be prior authorized when all of the following criteria are met:

- Client has a diagnosis of either a low-grade follicular or transformed B-cell non-Hodgkin’s lymphoma.
- Client has failed, relapsed, or become refractory to conventional chemotherapy and the following is documented:
  - Marrow involvement is less than 26 percent.
  - Platelet count is 100,000 cell/mm³ or greater.
  - Neutrophil count is 1,500 cell/mm³ or greater.
- Client has failed a trial of rituximab.

Prior authorization must be submitted through Special Medical Prior Authorization department.

Only one tositumomab or ibritumomab tiuxetan (procedure codes A9542, A9543, and A9545) may be prior authorized and reimbursed once per lifetime, any provider with diagnosis code 20280.

### 8.2.74.2 Other Limitations on Therapeutic Radiopharmaceuticals

Strontium-89 chloride (procedure code A9600) may be reimbursed when submitted with diagnosis code 1985.

Strontium-89 chloride is limited to a total of 10 mCi intravenously injected every 90 days, any provider, and may be reimbursed one per day same provider.

Sodium phosphate P-32, therapeutic (procedure code A9563) may be reimbursed when submitted with the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>1985</td>
</tr>
<tr>
<td>20812</td>
</tr>
</tbody>
</table>

Chromic phosphate P-32 suspension (procedure code A9564) may be reimbursed when submitted with diagnosis codes 1972 and 1976.

Modifier 76 must be used when billing for services more than once per day, same provider.

### 8.2.75 Urethral Dilation

If urethral dilation (procedure code 53600, 53601, 53605, 53620, 53621, 53660, or 53665) is billed on the same date of service by the same provider as procedure code 52000, the charges will be combined and processed as procedure code 52281.

Urethral dilation will be denied when billed on the same date of service by the same provider as any other cystoscopy.
8.2.76 Ventilation Assist and Management for the Inpatient

Use the following procedure codes and guidelines for reimbursement of ventilation assist and management: 94002 and 94003. Procedure codes 94002 and 94003 may be reimbursed only when the client is in observation or inpatient status. Respiratory care billed in any other POS will be denied.

Use the ventilation assist and management subsequent code (procedure code 94003) when respiratory support must be established for a patient in the postoperative period in the hospital (POS 3). Subsequent days of ventilation assistance are payable when documentation indicates a respiratory problem.

When the use of a ventilator is required as part of a major surgery, initial ventilation assist and management will be denied. It should be billed as ventilation assist and management subsequent procedure code 94003.

Procedure codes 94002 and 94003 apply only to hospital care for critically ill patients. They do not apply to routine recovery room ventilation services. Separate support service charges billed on the same day as ventilatory support are denied (for example, arterial or venous punctures; interpretations of arterial blood gases; pulmonary function tests and management of the hemodynamic functions of the patient; intensive care visits; subsequent hospital visits; or any other hospital visit).

Use ventilation assist and management and initiation of pressure or volume preset ventilators for assisted or controlled breathing–first day (procedure code 94002) when respiratory support must be established for a patient. It is a one-time charge per hospitalization that may be paid when the claim documents that a respiratory problem exists (for example, respiratory distress, asphyxia). After the first day, use subsequent days (procedure code 94003).

Ventilation assist and management procedure codes 94002 and 94003 are not payable when billed by the same provider on the same date of service as the procedure codes listed below:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99221</td>
</tr>
<tr>
<td>99251</td>
</tr>
<tr>
<td>99471</td>
</tr>
</tbody>
</table>

Procedure code 94003 will be denied when billed for the same date of service as 94002.

8.2.77 Wearable Cardiac Defibrillator (WCD)

A WCD (procedure codes 93292, 93745, and K0606) are a benefit of Texas Medicaid.

The rental of a WCD (procedure code K0606) is limited to once per month and must be submitted with modifier RR.

Modifier 25 may be used to identify a significant separately identifiable evaluation and management service performed (for example, different diagnosis) on the same day as the initial set up of a WCD by the same provider for the same client. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client’s medical record and made available to Texas Medicaid upon request.

Procedure code 93292 will be denied as part of procedure code 93745 when submitted on the same date of service by any provider.

Procedure codes 93000, 93005, 93010, 93040, 93041, and 93042 will be denied as part of procedure code 93745 when submitted on the same date of service by any provider.

8.2.77.1 Prior Authorization for WCD

Prior authorization is required for the rental of WCD (procedure code K0606).
The WCD may be prior authorized for clients at high-risk of sudden cardiac arrest who meets one of the following criteria:

- Has completed electrophysiologic studies to determine the type of arrhythmia present and confirm that a wearable cardiac defibrillator is the best course of treatment.
- Is contraindicated for an implantable cardiac defibrillator (ICD) at the current time, such as with a systemic infection.
- Is waiting for ICD implantation.
- Is waiting for ICD implantation and is undergoing treatment for a systemic infection.
- Has had an ICD explantation due to pocket infection.
- Is waiting for heart transplantation.
- Has self-limiting arrhythmias from iatrogenic (drug loading with potentially pro-arrhythmic medications) or other causes.
- Has a familial or inherited condition with a high risk of life-threatening ventricular tachyarrhythmias, such as long QT syndrome or hypertrophic cardiomyopathy.
- Has had either documented prior myocardial infarction or dilated cardiomyopathy and a measured left ventricular ejection fraction (LVEF) less than or equal to 35 percent.
- Has received a documented diagnosis of any one of the following conditions:
  - Clinically inducible hemodynamically significant ventricular tachycardia (HSVT) or ventricular fibrillation (VF), where drug treatment has been ineffective, or the side effects of the medication used to treat the arrhythmia are intolerable.
  - Inducible VT or VF despite endocardial ablation or surgical excision when drug therapy has failed.
  - VF or syncopal ventricular tachycardia.
  - Specific ST-T wave changes, borderline CPK-MB isoenzymes, and dangerous ventricular arrhythmias are exhibited in a postmyocardial infarction patient.
  - VT caused by ischemic heart disease not associated with an acute myocardial infarction, and where drug therapy or surgical therapy has failed.
  - Recurrent syncope of undetermined etiology in a patient with HSVT or VF induced by EPS in whom no effective or tolerated drug is available or appropriate. Symptoms must be linked to HSVT or VF.
  - Recurrent syncope of undetermined etiology with positive EPS studies where ventricular arrhythmia is documented as the cause.
  - Palliative treatment for VT or VF in clients awaiting heart transplant.

The WCD is contraindicated in clients with an active ICD and should not be used in clients who meet the following criteria:

- Have a vision or hearing problem that may interfere with the perception of alarms or messages from the WCD.
- Is taking medications that would interfere with responding to the alarms or message from the WCD by depressing buttons.
- Is unwilling or unable to wear the device continuously, except when bathing or showering.
- Is pregnant or breastfeeding.
• Is of childbearing age and is not attempting to prevent pregnancy.

The WCD is considered investigational and not medically necessary for all other indications, including but not limited to, the following:

• Clients with drug-refractory class IV congestive heart failure who is not candidates for heart transplantation.

• Clients who have a history of psychiatric disorders that interfere with the necessary care and follow-up.

• Clients in whom a reversible triggering factor for VT/VF can be definitely identified, such as ventricular tachyarrhythmias in evolving acute myocardial infarction or electrolyte abnormalities.

• Clients with terminal illnesses.

A completed Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form (Title XIX Form) prescribing the DME and/or medical supplies must be signed and dated by the prescribing physician familiar with the client prior to requesting authorization.

• All signatures must be current, unaltered, original, and handwritten. Computerized or stamped signatures will not be accepted.

• The completed Title XIX Form must be maintained by the requesting provider and the prescribing physician. The original signature copy must be kept in the physician’s medical record for the client.

• The completed Title XIX Form must include the procedure codes and quantities requested for the services.

To complete the prior authorization process the provider must submit the completed Title XIX Form by fax to the Home Health Unit at 1-512-514-4209 or in writing to the following address:

Texas Medicaid & Healthcare Partnership
Home Health Services
PO Box 202977
Austin, TX 78720-2977

When a WCD is not covered under Texas Medicaid (Title XIX) Home Health Services, it may be considered for reimbursement through the CCP for clients who are 20 years of age and younger. All of the following criteria must be met for CCP reimbursement for a WCD:

• The client is eligible for CCP benefits.

• The documentation submitted with the request supports the determination of medical necessity based on the criteria listed in the policy.

• Federal financial participation is available.

• The client’s cardiac status would be compromised without the requested equipment.

• The requested equipment is safe in the home setting.

Rental of an automatic external defibrillator, with integrated electrocardiogram analysis, garment type (procedure code K0606) may be prior authorized (initially for up to three months) with documentation supporting the medical necessity and appropriateness of the device.

The provider may be reimbursed only for the length of time the device is used even though the authorization for the rental may be for a longer period of time.

The rental of the device includes the monitor, electrode belt (four sensors or electrodes and three treatment pads), garment, two rechargeable batteries, a battery charger and modem.

The purchase of a replacement battery (procedure code K0607), the purchase of a garment (procedure code K0608), and electrodes (procedure code K0609) will be considered part of the rental.
Prior authorization extensions for WCDs beyond the initial three-month rental may be considered by the medical director when documentation supports continued medical necessity for the device. Providers must submit new documentation to support continued medical necessity for an extension of the rental to be considered.

To avoid unnecessary denials, the physician must provide correct and complete information, including documentation for medical necessity of the device. The physician must maintain documentation of medical necessity in the client’s medical record. The requesting provider may be asked for additional information to clarify or complete a request for the WCD.

Retrospective review may be performed to ensure documentation supports the medical necessity of the service when billing the claim.

### 8.3 Doctor of Dentistry Practicing as a Limited Physician

This section outlines the guidelines for the Doctor of Dentistry practicing as a limited physician. The THSteps dental program is not addressed in these guidelines.

Services by a dentist (DDS or DMD) are covered by Texas Medicaid in accordance with the Omnibus Budget Reconciliation Act (OBRA) of 1987 (public law 100-203), if the services are furnished within the dentist’s scope of practice as defined by Texas state law and would be covered under Texas Medicaid when provided by a licensed physician (MD or DO).

Dentist (DDS or DMD) who want to participate as a dentist-physician in Texas Medicaid must be separately enrolled as a Doctor of Dentistry practicing as a limited physician even if they are enrolled in the THSteps Dental Program.

Dual licensure (MD, DO, and DDS) is not required for a dentist to enroll as a limited physician. Medicare enrollment is required for a dentist to enroll as a limited physician.

#### 8.3.1 Medicaid Managed Care Enrollment

Services provided by a Doctor of Dentistry Practicing as a Limited Physician must be billed to the member’s health plan if the client is in the STAR or STAR+PLUS Programs. Providers must enroll with each STAR and STAR+PLUS health plan to be reimbursed for services provided to STAR and STAR+PLUS Program members.

**Note:** To be reimbursed for services provided to STAR and STAR+PLUS Program members, providers must enroll with each STAR and STAR+PLUS health plan in which their patients are enrolled.

#### 8.3.2 Prior Authorization for General Dental Services Due to Life-Threatening Medical Condition

Reimbursement for general dental services by any provider, irrespective of the medical or dental qualifications of the provider, is not a Medicaid benefit for Medicaid clients who are 21 years of age and older (who do not reside in an ICF-MR facility).

The TMHP Medical Director or designee may allow an exception for a dental condition causally related to a life-threatening medical condition. *Mandatory prior authorization is required* and the dental diagnoses *must* be secondary to a life-threatening medical condition.

Examples of dental procedures that may be authorized for a *general dentist* who is enrolled as a *limited physician* are:

- Extractions.
- Alveolectomies (in limited situations).
- Incision and drainage.
- Curettement.
Examples of dental procedures that may be authorized for an oral and maxillofacial surgeon who is enrolled as a limited physician are:

- Extractions.
- Alveolectomies (in limited situations).
- Incision and drainage.
- Curettement maxillofacial surgeries to correct defects caused by accident or trauma.
- Surgical corrections of craniofacial dysostosis.

**Note:** Therapeutic procedures such as restorations, dentures, and bridges are not a benefit of the program and will not be authorized.

### 8.3.2.1 Guidelines for Requesting Mandatory Prior Authorization

The limited physician dentist must request the mandatory prior authorization, and the request must include:

- A treatment plan that clearly outlines the dental condition as related to the life-threatening medical condition.
- Narrative describing the current medical problem, client status, and medical need for requested services.
- The client name and Medicaid number.
- The limited physician dentist’s provider identifier.
- The name and address of the facility.
- CPT procedure codes.
- The history and physical.
- The limited physician dentist’s signature.

**Note:** The “limited physician” dentist who will perform the procedure(s) must submit the request for prior authorization.

All supporting documentation must be included with the request for authorization. Providers are to send requests and documentation to the following address:

Texas Medicaid & Healthcare Partnership  
Special Medical Prior Authorization  
12357-B Riata Trace Parkway, Suite 150  
Austin, TX 78727  
Fax: 1-512-514-4213

### 8.3.3 Benefits and Limitations

Dental procedure codes and their corresponding CPT procedures may not be billed on the same date of service by any provider.

Cosmetic procedures are not a benefit of Texas Medicaid. Certain procedure codes, including, but not limited to, the procedure codes in the following table, may be considered cosmetic and are not a benefit except when the procedure is performed as a result of trauma or injury for the purpose of:

- Reconstructing tissues/body structures.
• Repairing damaged tissues.

### 8.3.3.2 Evaluation and Management Procedure Codes

Patient evaluation and management services, and consultation procedure codes must be used with the appropriate diagnosis codes listed in Subsection 8.3.3.1, “Diagnosis Codes,” in this handbook.

### 8.3.3.3 Additional Payable Procedure Codes

The following procedure codes are a benefit when prior authorized and:

- Accompanied by the appropriate diagnosis code.
- The dentist is qualified and licensed to perform the procedures.

8.3.3.6 Dental Anesthesia by a Doctor of Dentistry Practicing as a Limited Physician

A Doctor of Dentistry Practicing as a Limited Physician who is licensed by the Texas State Board of Dental Examiners (TSBDE) practicing in Texas, who has obtained an Anesthesia Permit from the TSBDE in accordance with Title 22 TAC §§108.30 through 108.35, may be reimbursed for anesthesia services on clients having dental/oral and maxillofacial surgical procedures in the dental office or hospital in accordance with all applicable rules for physician administration and supervision of anesthesia services.
Dentists providing sedation/anesthesia services must have the appropriate permit from TSBDE for the
level of sedation/anesthesia provided.

The following anesthesia services are payable to dentists as physician services when accompanied by a
payable diagnosis:

<table>

**8.4 Documentation Requirements**

All services require documentation to support the medical necessity of the service rendered, including
physician services. Physician services are subject to retrospective review and recoupment if documen-
tation does not support the service billed.

**8.5 Claims Filing and Reimbursement**

**8.5.1 Claims Information**

Claims for physician and doctor services must be submitted to TMHP in an approved electronic format
or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the
vendor of their choice. TMHP does not supply them.

When completing a CMS-1500 paper claim form, all required information must be included on the
claim, as information is not keyed from attachments. Superbills and itemized statements are not
accepted as claim supplements.

Refer to:
Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for
information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims
filing.

(Vol. 1, General Information) for instructions on completing paper claims. Blocks that are
not referenced are not required for processing by TMHP and may be left blank.

**8.5.2 National Drug Codes (NDC)**

Refer to: Subsection 6.3.4, “National Drug Code (NDC),” in Section 6, “Claims Filing” (Vol. 1,
General Information)

**8.5.3 Reimbursement**

Texas Medicaid rates for physicians and certain other practitioners are calculated in accordance with
TAC §355.8085. Providers can refer to the online fee lookup (OFL) or the applicable fee schedule on the

Refer to: Subsection 2.2.1.1, “Physician Services in Outpatient Hospital Setting,” in Section 2, “Texas
Medicaid Reimbursement” (Vol. 1, General Information).

Section 104 of requires that Medicare/Medicaid limit reimbursement for those physician services
furnished in outpatient hospital settings (e.g., clinics and emergency situations) that are ordinarily
furnished in physician offices.
Reimbursement for these services will be 60 percent of the Texas Medicaid rate for the service furnished in the physician’s office. The following table identifies the services applicable to the 60-percent limitation when furnished in outpatient hospital settings:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99201 99202</td>
</tr>
<tr>
<td>99203 99204</td>
</tr>
<tr>
<td>99205 99211</td>
</tr>
<tr>
<td>99212 99213</td>
</tr>
<tr>
<td>99214 99215</td>
</tr>
<tr>
<td>99281 99282</td>
</tr>
<tr>
<td>99283 99284</td>
</tr>
<tr>
<td>99285</td>
</tr>
</tbody>
</table>

These procedures are designated with note code “1” in the current physician fee schedule, which is available at www.tmhp.com. The following list shows the services excluded from the 60-percent limitation:

- Services furnished in rural health clinics (RHCs).
- Surgical services that are covered ambulatory surgical center (ASC)/hospital-based ambulatory surgical center (HASC) services.
- Anesthesiology and radiology services.
- Emergency services provided in a hospital emergency room after the sudden onset of a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain), such that the absence of immediate medical attention could reasonably be expected to result in one of the following:
  - Serious jeopardy to the client’s health.
  - Serious impairment to bodily functions.
  - Serious dysfunction of any bodily organ or part.

Because of TEFRA, Texas Medicaid reimbursement for a payable nonemergency office service performed in the outpatient department of a hospital is limited to 60 percent of Texas Medicaid rate for that service. If the condition qualifies as an emergency, the 60 percent professional service reimbursement limit does not apply.

**Note:** State of Texas Access Reform (STAR), STAR+PLUS, and NorthSTAR programs may follow a different reimbursement methodology. Providers should check each plan’s reimbursement policies.

**Refer to:** Subsection 2.2, “Reimbursement Methodology,” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for more information about reimbursement.

Subsection 8.2.6, “Anesthesia,” in this handbook for information on anesthesia services that are reimbursed according to relative value units (RVUs).

**9. PHYSICIAN ASSISTANT**

**9.1 Enrollment**

To enroll in Texas Medicaid, a PA must be licensed and recognized as a PA by the Texas Medical Board. Texas Medicaid accepts a signed letter of certification from the Texas Medical Board as acceptable documentation of appropriate licensure and certification for enrollment.

Providers cannot be enrolled if their license is due to expire within 30 days.

Enrollment as an individual provider is optional. PAs currently treating clients and billing under the supervising physician’s provider identifier may continue this billing arrangement.
All PA services must be delivered according to protocols developed jointly within the scope of practice and state law governing PAs.

All providers of laboratory services must comply with the rules and regulations of CLIA. Providers not complying with CLIA are not reimbursed for laboratory services.

PAs may enroll as providers of THSteps medical checkups. PAs should have expertise or additional education in the areas of comprehensive pediatric assessment.

Refer to: Subsection 1.1, “Provider Enrollment,” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).

Subsection 5.2, “Enrollment,” in the Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information about enrolling as a THSteps provider.

Section 8: Managed Care (Vol. 1, General Information).

9.2 Services, Benefits, Limitations, and Prior Authorization

Services performed by PAs are covered if the services meet the following criteria:

- Are within the scope of practice for PAs, as defined by Texas state law
- Are consistent with rules and regulations promulgated by the Texas Medical Board or other appropriate state licensing authority
- Are covered by Texas Medicaid when provided by a licensed physician (MD or DO)
- Are reasonable and medically necessary as determined by HHSC or its designee

Services provided to Medicaid clients must be documented in the client’s medical record to include the following:

- Services provided
- Date of service
- Pertinent information about the client’s condition supporting the need for service
- The individual practitioner of the service

PAs who are employed or remunerated by a physician, hospital, facility, or other provider must not bill Texas Medicaid for their services if the billing results in duplicate payment for the same services.

Laboratory (including pregnancy tests) and radiology services provided during pregnancy must be billed separately from antepartum care visits and claims must be received within 95 days from the date of service.

Note: Payment to providers for supplies is not a benefit of Texas Medicaid. Costs of supplies are included in the reimbursement for office visits.

Refer to: Section 2, “Medicaid Title XIX family planning services” in the Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks).

Section 8, “Physician” in this handbook.

Section 5, “THSteps Medical” in the Children’s Services Handbook (Vol. 2, Provider Handbooks).
9.2.1 Prior Authorization
Services performed by a PA are subject to the same prior authorization guidelines as services performed by other provider types.

9.3 Documentation Requirements
All services require documentation to support the medical necessity of the service rendered, including PA services. PA services are subject to retrospective review and recoupment if documentation does not support the service billed.

9.4 Claims Filing and Reimbursement

9.4.1 Claims Information
Claims for PA services must include modifier U7 on the claim details to indicate that the client was treated by a PA.

PA services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form, all required information must be included on the claim, as information is not keyd from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions,” in Section 6, “Claims Filing” (Vol. 1, General Information) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

9.4.2 Reimbursement
According to 1 TAC §355.8093, the Medicaid rate for PAs is 92 percent of the rate paid to a physician (MD or DO) for the same professional service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections.

PAs who bill Medicaid directly for services they perform must use their individual provider identifier. If the services were performed by the PA but billed by a physician or physician group, the billing provider is the physician or physician group. Services performed by a PA and billed under a physician’s or rural health clinic’s (RHC’s) provider identifier are reimbursed according to the TMRM for physician services.

Providers can refer to the online fee lookup (OFL) or the applicable fee schedule on the TMHP website at www.tmhp.com. To request a hard copy, call the TMHP Contact Center at 1-800-925-9126.

Refer to: Subsection 1.1, “Provider Enrollment,” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).

Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on how to obtain electronic fee schedules from the TMHP website.

11. CONTACT TMHP

The TMHP Contact Center at 1-800-925-9126 is available Monday through Friday from 7 a.m. to 7 p.m., Central Time.
12. FORMS
MD.1  Abortion Certification Statements Form

The signature of the physician must be original script (not stamped or typed). A copy of the signed certification statement must be submitted with each claim for reimbursement. Faxes are not acceptable at this time.

"I, (physician’s name), certify that on the basis of my professional judgment, an abortion procedure is necessary because (client’s full name, Medicaid number, and complete address) suffers from a physical disorder, injury, or illness, including a life-endangering physical condition caused by or arising from the pregnancy itself, that would place her in danger of death unless an abortion is performed."

Signature _______________________________________________

"I, (physician’s name), certify that on the basis of my professional judgment, an abortion procedure for (client’s full name, Medicaid number, and complete address) is necessary to terminate a pregnancy that was the result of rape. I have counseled the client concerning the availability of health and social support services and the importance of reporting the rape to the appropriate law enforcement authorities."

Signature _______________________________________________

"I, (physician’s name), certify that on the basis of my professional judgment, an abortion procedure for (client’s full name, Medicaid number, and complete address) is necessary to terminate a pregnancy that was the result of incest. I have counseled the client concerning the availability of health and social support services and the importance of reporting the incest to the appropriate law enforcement authorities."

### Hospital Report (Newborn Child or Children) (Form 7484)

**MAIL FORM TO:**

- Texas Health and Human Services Commission  
  Data Integrity 952-X  
  PO BOX 149030  
  Austin TX 78714-9030

**PURPOSE:** This form is to be used by HOSPITALS ONLY to report the birth of a child of a mother currently eligible under the Texas Medicaid Program of the Texas Health and Human Services Commission (HHSC). All data items below must be completed to avoid delay in future Medicaid claims payments. If the child’s FIRST name is unknown at the time this form is completed, the last name will suffice and must be shown.

**ACTION:** To avoid delay in your receiving notice of the Medicaid Recipient number of the newborn child, please complete this document and submit it to HHSC within 5 days after the birth of the child. The 5 days is a guideline and is not mandatory. Notice of the assigned client number will be promptly mailed to you for use in submitting the child’s Medicaid claim.

To avoid delay in processing the child’s Medicaid claims, please retain all Medicaid claims of the newborn child until you receive a client number for the child. All newborn claims should then be submitted to TMHP using the newly assigned client number.

MD.6 Nonemergency Ambulance Prior Authorization Request Form

**Nonemergency Ambulance Prior Authorization Request**

**Texas Medicaid Program**

1.) **Is an ambulance the only appropriate means of transport?** □ Yes □ No
2.) **If no, this client does not qualify for nonemergency ambulance transport.**
3.) **If yes, please complete the remainder of the form.**

In order for this service to be covered, the service must be medically necessary and reasonable. Medical necessity is established when the client's medical condition is such that the use of an ambulance is the only appropriate means of transport, and other alternate means of transport are medically contraindicated. Alternate means of transport include services provided through Medicaid's Medical Transportation Program or services included in the rate for Long Term Care - Nursing Facilities.

This form is to be completed by the provider requesting nonemergency ambulance transportation. [Reference: Chapter 32.024(t) Texas Human Resources Code]

Provider Instructions for Nonemergency Ambulance Prior Authorization Request Form

All nonemergency ambulance transportation must be medically necessary. Texas Medicaid and Medicare have similar requirements for this service to qualify for reimbursement. This form is intended to accommodate both programs’ requirements. The criteria for determining medical necessity include: the client is bed-confined and other methods of transportation are contraindicated, or the client’s condition is such that transportation by ambulance is medically required. For additional information and changes to this policy and process refer to the respective program information: Texas Medicaid’s Provider Procedures Manual, bulletins and Banner Messages; and to Medicare’s manuals, newsletters and other publications.

1. Request Date—Enter the date the form is submitted.
2. Requesting Provider Information—Enter the name of the entity requesting authorization. (i.e., hospital, nursing facility, dialysis facility, physician).
3. Requesting Provider Identifiers—Enter the following information for the requesting provider (facility or physician):
   - Enter the Texas Provider Identifier (TPI) number.
   - Enter the National Provider Identifier (NPI) number. An NPI is a ten-digit number issued by the National Plan and Provider Enumeration System (NPPES).
   - Enter the primary national taxonomy code. This is a ten-digit code associated with your provider type and specialty. Taxonomy codes can be obtained from the Washington Publishing Company website at www.wpc-edi.com.
4. Ambulance Provider Identifier—Enter the TPI or NPI number of the requested ambulance provider. If the ambulance provider changes from the provider you originally requested, notify TMHP of the new provider by phone (1-800-925-9126, Option 3) or fax (1-512-514-4205).
5. Client’s Current Condition—This section must be filled out to indicate the client’s current condition and not to list all historical diagnoses. Do not submit a list of the client’s diagnoses unless the diagnoses are relevant to transport (i.e., if client has a diagnosis of hip fracture, the date the fracture was sustained must be included in documentation). It must be clear to TMHP when reviewing the request form, exactly why the client requires transport by ambulance and cannot be safely transported by any other means.
6. Isolation Precautions—Vancomycin-Resistant Enterococci (VRE) and Methicillin-Resistant Staphylococcus Aureus (MRSA) are just two examples of isolation precautions. Please indicate in the notes exactly what type of precaution is indicated.
7. Details for Checked Boxes—For each checked answer, a detailed explanation is required (i.e., if contractures is checked, please give the location and degree of contracture[s]). If a client has a decreased tolerance for sitting time, please indicate why the client has a decreased tolerance as well as the maximum length of time the client is able to sit upright. Additional documentation can be submitted with this request form if needed.
8. Request Type—Check the box for the request type. A One Time, non-repeating request is for a one day period. A Short Term request is for a period of 2-60 days when repeated transports are expected to occur; both Medicaid and Medicare permit short-term requests. A Long Term request is for a period of 61-180 days when repeated transports are expected to occur; Medicare does not permit a Long Term request. Medicaid requires a physician signature for Short Term and Long Term requests. Enter the begin and end dates of the authorization period for short and long-term requests.
9. Transport Time—This field must be filled out for all hospital discharge requests. The anticipated time of transport must be entered in order to ensure the request was initiated prior to the actual time of transport.
10. Name of Person Signing the Request—All request forms require a signature, date, and title of the person signing the form. A One Time request must be signed and dated by a physician, physician assistant (PA), nurse practitioner (NP), clinical nurse specialist (CNS), registered nurse (RN), or discharge planner with knowledge of the client’s condition. A request of a Short Term or Long Term authorization period must be signed and dated by the physician. The signature must be dated not earlier than the 60th day before the date on which the request for authorization is made.
11. Signing Provider Identifier—This field is for the TPI or NPI number of the requesting facility or provider signing the form. The signature must be dated no earlier than 60 days prior to the transport.
Obstetric Ultrasound Prior Authorization Request Instructions

Medicaid fee-for-service and Primary Care Case Management (PCCM) clients are limited to three obstetric ultrasounds per pregnancy. Obstetrical ultrasounds procedures performed in the emergency room, outpatient observation, or inpatient hospital setting are excluded from this limitation.

If it is medically necessary to perform more than three obstetrical ultrasounds on a client during a pregnancy, the provider must complete this form to request prior authorization. A request for retroactive authorization must be submitted no later than 14 calendar days beginning the day after the study is completed.

Use the guidelines below in filling out the Obstetric Ultrasound Prior Authorization Request form.

### Primary Care Case Management (PCCM) Inpatient/Outpatient Authorization Form

**New inpatient and outpatient requests can be submitted by:**
- Accessing the TMHP website at www.tmhp.com, click on link “Submit a Prior Authorization”
- Calling 1-888-302-6167 (option 1 inpatient, option 2 outpatient)
- Faxing this form to 1-512-302-5039

**Update requests can be submitted by:**
- Calling 1-888-302-6167 (option 1 inpatient, option 2 outpatient)
- Faxing this form to 1-512-302-5039

**Request Type (check appropriate box)**

**New Request**
- ☐ Inpatient Notification of urgent/emergent admit – includes admit following observation
- ☐ Inpatient Non-routine OB/NB
- ☐ Prior authorization of scheduled admission/procedures
- ☐ Outpatient services

**Update Request**
- ☐ PAN: _________________________________
- ☐ DRG ☐ Procedure codes ☐ Outpatient request ☐ Other, specify change ________________

Sterilization Consent Form Instructions

Per Title 42 Code of Federal Regulations (CFR) 50, Subpart B, all sterilizations require a valid consent form regardless of the funding source. Ensure all required fields are completed for timely processing.

Fax or mail the Sterilization Consent Form five business days before submitting the associated claim(s) to expedite the processing of the Sterilization Consent Form and associated claim(s).

Fax fully completed Sterilization Consent Forms to Texas Medicaid & Healthcare Partnership (TMHP) at 1-512-514-4229. Claims and appeals are not accepted by fax. Only send family planning sterilization correspondence to this fax number.

Note: Hysterectomy Acknowledgment forms are not sterilization consents and should be faxed to 1-512-514-4218.

Clients must be at least 21 years of age when the consent form is signed. If the client was not 21 years of age when the consent form was signed, the consent will be denied. Changing signature dates is considered fraudulent and will be reported to the Office of the Inspector General (OIG).

There must be at least 30 days between the date the client signs the consent form and the date of surgery, with the following exceptions:

Exceptions: (1) Premature delivery - There must be at least 72 hours between the date of consent and the date of surgery. The informed consent must have been given at least 30 days before the expected date of delivery. (2) Emergency Abdominal Surgery - There must be at least 72 hours between the date of consent and the date of surgery. Operative reports detailing the need for emergency surgery are required.

Listed below are field descriptions for the Sterilization Consent Form. Completion of all sections is required to validate the consent form, with only two exceptions:

Exceptions: Race and Ethnicity Designation is requested but not required. The Interpreter’s Statement is not required as long as the consent form is written in the client’s language, or the person obtaining the consent speaks the client’s language. If this section is partially completed, the consent will be denied for incomplete information.

This Sterilization Consent Form may be copied for provider use. Providers are encouraged to frequently recopy the original form to ensure legible copies and to expedite consent validation.

Required Fields

All of the fields must be legible in order for the consent form to be valid. Any illegible field will result in a denial of the submitted consent form. Resubmission of legible information must be indicated on the consent form itself. Resubmission with information indicated on a cover page or letter will not be accepted.

Consent to Sterilization

• Name of Doctor or Clinic.
• Name of the Sterilization Operation.
• Client’s Date of Birth (month, day, year).
• Client's Name (first and last names are required).
• Name of Doctor or Clinic.
• Name of the Sterilization Operation.
• Client’s Signature.
• Date of Client Signature - Client must be at least 21 years of age on this date. This date cannot be altered or added at a later date.

Effective Date_07302007/Revised Date_03102010
Interpreter’s Statement (If applicable)

• Name of Language Used by Interpreter.
• Interpreter’s Signature.
• Date of Interpreter’s Signature (month, day, year).

Statement of Person Obtaining Consent

• Client’s Name (first and last names are required).
• Name of the Sterilization Operation.
• Signature of Person Obtaining Consent - The statement of person obtaining consent must be completed by the person who explains the surgery and its implications and alternate methods of birth control. The signature of person obtaining consent must be completed at the time the consent is obtained. The signature must be an original signature, not a rubber stamp.
• Date of the Person Obtaining Consent’s Signature (month, day, year) - Must be the same date as the client's signature date.
• Facility Name - Clinic/office where the client received the sterilization information.
• Facility Address - Clinic/office where the client received the sterilization information.

Physician’s Statement

• Client’s Name (first and last names are required).
• Date of Sterilization Procedure (month, day, year) - Must be at least 30 days and no more than 180 days from the date of the client’s consent except in cases of premature delivery or emergency abdominal surgery.
• Name of the Sterilization Operation.
• Expected Date of Delivery (EDD) - Required when there are less than 30 days between the date of the client consent and date of surgery. Client’s signature date must be at least 30 days prior to EDD.
• Circumstances of Emergency Surgery - Operative report(s) detailing the need for emergency abdominal surgery are required.
• Physician’s Signature - Stamped or computer-generated signatures are not acceptable.
• Date of Physician’s Signature (month, day, year) - This date must be on or after the date of surgery.

Paperwork Reduction Act Statement

This is a required statement and must be included on every Sterilization Consent Form submitted.

Additional Required Fields

• Medicaid or Family Planning Number - Clients submitted as Titles V, X, and XX may not have a Family Planning number. Please simply indicate the appropriate Title below.
• Date Client Signed the Consent (month, day, year).
• The following provider identification numbers will be required to expedite the processing of the consent form:
  o TPI
  o NPI
  o Taxonomy
  o Benefit Code
• Provider/Clinic Phone Number.
• Provider/Clinic Fax Number (If available).
• Family Planning Title for Client - Indicate by circling V, X, XIX (Medicaid), or XX.

**Notice:** Your decision at any time not to be sterilized will not result in the withdrawal or withholding of any benefits provided by programs or projects receiving federal funds.

**Consent to Sterilization**

I have asked for and received information about sterilization from ____________________________ (doctor or clinic). When I first asked for the information, I was told that the decision to be sterilized is completely up to me. I was told that I could decide not to be sterilized. If I decide not to be sterilized, my decision will not affect my right to future care or treatment. I will not lose any help or benefits from programs receiving Federal funds, such as Temporary Assistance for Needy Families (TANF) or Medicaid that I am now getting or for which I may become eligible.

I understand that the sterilization must be considered permanent and irreversible. I have decided that I do not want to become pregnant, bear children or father children.

I was told that temporary methods of birth control that are available and could be provided to me which will allow me to bear or father a child in the future. I have rejected these alternatives and chosen to be sterilized.

I understand that I will be sterilized by an operation known as ________________________ (specify type of operation). The discomforts, risks and benefits associated with the operation have been explained to me. All my questions have been answered to my satisfaction.

I understand that the operation will not be done until at least 30 days after I sign this form. I understand that I can change my mind at any time and that my decision at any time not to be sterilized will not result in the withholding of any benefits or medical services provided by federally funded programs.

I am at least 21 years of age and was born on ____ (month), ____, ____ (year). I, ______________________________________, hereby consent of my own free will to be sterilized by ____________________________ (doctor or clinic) by a method called ____________________________ (specify type of operation).

My consent expires 180 days from the date of my signature below.

I also consent to the release of this form and other medical records about the operation to: Representatives of the Department of Health and Human Services or Employees of programs or projects funded by that Department but only for determining if Federal laws were observed. I have received a copy of this form.

**Notice:** You are requested to supply the following information, but it is not required.

**Ethnicity**

- [ ] Not Hispanic or Latino
- [ ] Native Hawaiian or Other Pacific Islander
- [ ] Black or African American
- [ ] Hispanic or Latino
- [ ] American Indian or Alaska Native
- [ ] Asian
- [ ] White

**Interpreter’s Statement**

If an interpreter is provided to assist the individual to be sterilized:

I have translated the information and advice and presented orally to the individual to be sterilized by the person obtaining this consent. I have also read him/her the consent form in ______________________ language and explained its contents to him/her. To the best of my knowledge and belief, he/she has understood this explanation.

**Physician’s Statement**

Before ____________________________ (client’s full name), signed the consent form, I explained to him/her the nature of the sterilization operation ____________________________ (specify type of operation), the fact that it is intended to be a final and irreversible procedure and the discomforts, risks and benefits associated with it. I informed the individual to be sterilized that alternative methods of birth control are available which are temporary. I explained that sterilization is different because it is permanent. I informed the individual to be sterilized that his/her consent can be withdrawn at any time and that he/she will not lose any health services or any benefits provided by Federal funds.

To the best of my knowledge and belief the individual to be sterilized is at least 21 years old and appears mentally competent. He/She knowingly and voluntarily requested to be sterilized and appears to understand the nature and consequences of the procedure.

**Physician’s Signature:**

Date of Signature: / / (month/day/year)

**Physician’s Consent**

Physician’s consent expires 180 days from the date of my signature below.

**Statement of Person Obtaining Consent**

Before ____________________________ (name of individual to be sterilized), on ____ / ____ / ____ (date of sterilization), I, ____________________________ (full name of person obtaining consent), explained to him/her the nature of the sterilization operation ____________________________ (specify type of operation), the fact that it is intended to be a final and irreversible procedure and the discomforts, risks and benefits associated with it.

I informed the individual to be sterilized that alternative methods of birth control are available which are temporary. I explained that sterilization is different because it is permanent. I informed the individual to be sterilized that his/her consent can be withdrawn at any time and that he/she will not lose any health services or any benefits provided by Federal funds.

To the best of my knowledge and belief the individual to be sterilized is at least 21 years old and appears mentally competent. He/She knowingly and voluntarily requested to be sterilized and appears to understand the nature and consequences of the procedure.

**Notas:**

La elección de no esterilizarse que usted puede tomar en cualquier momento, no causará el retiro o la retención de ningún beneficio que le sea proporcionado por programas o proyectos que reciban fondos federales.

Yo he solicitado y he recibido información de ____________ (especificar el tipo de operación) sobre la esterilización. Cuando inicialmente solicité esta información, me dijeron que la decisión de ser esterilizada/o es completamente mía. Me dijeron que yo podía decidir no ser esterilizada/o. Si decido no esterilizarme, mi decisión no afectará mi derecho a recibir tratamiento o cuidados médicos en el futuro. No perderé ninguna asistencia o beneficios de programas patrocinados con fondos federales, tales como Asistencia Temporal para Familias Necesitadas o Medicaid, que recibo actualmente o para los cuales podría calificar.

Entiende que la esterilización se considera una operación permanente e irreversible. Yo he decidido que no quiero quedar embarazada, no quiero tener hijos o no quiero procrear hijos. Me informaron sobre otros métodos de anticoncepción disponibles que son temporales y que permitirán que pueda tener o procrear hijos en el futuro. He rechazado estas opciones y he decidido ser esterilizado/a.

Entiendo que seré esterilizada/o por medio de una operación conocida como ____________ (especificar el tipo de operación). Me han explicado las molestias, los riesgos y los beneficios asociados con la operación. Han respondido satisfactoriamente a todas mis preguntas.

Entiendo que la operación se llevará a cabo hasta que hayan pasado 30 días, como mínimo, a partir de la fecha en la que firme esta Forma. Entiendo que puedo cambiar de opinión en cualquier momento y que mi decisión en cualquier momento de no ser esterilizada/o no resultará en la retención de beneficios o servicios médicos proporcionados a través de programas que reciben fondos federales.

Antes de que ____________ (nombre completo del cliente) firmara la Forma de Consentimiento para la Esterilización, le he explicado a ella/él el procedimiento de esterilización, el hecho de que el resultado de este procedimiento es final e irreversible, y las molestias, los riesgos y los beneficios asociados con este procedimiento. He aconsejado a la persona que será esterilizada que hay disponibles otros métodos de anticoncepción que son temporales. He explicado que la esterilización es diferente porque es permanente. He explicado a la persona que será esterilizada que puede retirar su consentimiento en cualquier momento y que ella/él no perderá ningún servicio de salud o beneficio proporcionado con el patrocinio de fondos federales. A mi mejor saber y entender, la persona que será esterilizada tendrá por lo menos 21 años de edad y parece ser mentalmente competente. Ella/él ha solicitado con conocimiento de causa y por libre voluntad ser esterilizado/a y parece entender la naturaleza del procedimiento y sus consecuencias.

Declaración Del Intérprete

Si se han proporcionado los servicios de un intérprete para asistir a la persona que será esterilizada: He traducido la información y los consejos que verbalmente se le han presentado a la persona que será esterilizado/a por el intérprete que ha realizado este consentimiento. También he leído a ella/él la Forma de Consentimiento en idioma nativo y le he explicado el contenido de esta forma. A mi mejor saber y entender, ella/él ha entendido esta explicación.

Declaración De La Persona Que Obtiene Consentimiento

Antes de que ____________ (nombre completo del cliente) firmara la Forma de Consentimiento para la Esterilización, le he explicado a ella/él los detalles de esta operación para la esterilización, el hecho de que es un procedimiento con un resultado final e irreversible, y las molestias, los riesgos y los beneficios asociados con esta operación. Le aconsejé a la persona que sería esterilizada que disponía de disponibles otros métodos de anticoncepción que son temporales. Le expliqué que la esterilización es diferente porque es permanente. Le informé a la persona que sería esterilizada que podía retirar su consentimiento en cualquier momento y que ella/él no perdería ningún servicio de salud o beneficio proporcionado con el patrocinio de fondos federales. A mi mejor saber y entender, la persona que será esterilizada tiene a lo menos 21 años de edad y parece ser mentalmente competente. Ella/él ha solicitado con conocimiento de causa y por libre voluntad ser esterilizada/o y parece entender el procedimiento y las consecuencias de esta operación. (Instrucciones para uso alternativo de párrafos finales: Utilice el párrafo 1 que se presenta a continuación, excepto para casos de parto prematuro y cirugía abdominal de emergencia cuando se ha realizado la esterilización a menos de 30 días después de la fecha en la que la persona firmó la Forma de Consentimiento para la Esterilización. Para esos casos, utilice el párrafo 2 que se presenta más adelante. Tache con una X el párrafo que no se aplique). (1) Han transcurrido por lo menos 30 días entre la fecha en la que la persona firmó esta Forma de Consentimiento y la fecha en la que se realizó la esterilización. (2) La operación para la esterilización se realizó a menos de 30 días, pero a más de 72 horas, después de la fecha en la que la persona firmó la Forma de Consentimiento debido a las siguientes circunstancias (marque la casilla apropiada y escriba la información requerida):

- ☐ Parto prematuro - Fecha prevista de parto ____________ (mes, día, año)
- ☐ Cirugía abdominal de urgencia (Describa las circunstancias):

Declaración Sobre Ley De Reducción De Trámites

De acuerdo con la Ley de Reducción de Trámites de 1995, ninguna persona está obligada a responder a una solicitud de información a menos que muestre un número de control válido de OMB. El número de control válido de OMB para esta solicitud es 0937-0166. Se ha estimado que el tiempo promedio necesario para completar esta recolección de información es 1 hora y 15 minutos por respuesta, incluido el tiempo para revisar las instrucciones, buscar fuentes de información existente, reunir los datos necesarios y completar y revisar la recolección de información. Si tiene algún comentario sobre la exactitud del cálculo (s) del tiempo o sugerencias para mejorar esta forma, por favor escriba a: U.S. Department of Health & Human Services, OS/OCIO/PRA, 200 Independence Ave., S.W., Suite 537-H, Washington D.C. 20201, Attention: PRA Reports Clearance Officer.

Clients who are younger than 24 months chronological age at the start of the RSV season can qualify based on the criteria to the right. Diagnoses, conditions, and risk factors must be clearly documented in the client’s medical record.

(Refer to the Texas Medicaid Provider Procedures Manual for more details about congenital heart and chronic lung disease diagnoses.)

Choose one of the following:
- □ Active diagnosis of hemodynamically significant heart disease (ICD-9-CM code:__________)
- □ Active diagnosis of chronic lung disease of infancy (CLDI)* (ICD-9-CM code:__________) and required any of the following therapies within the past 6 months:
  - □ Supplemental oxygen
  - □ Digitalis
  - □ Steroids (systemic or inhaled)
  - □ Diuretics
  - □ Mechanical ventilation
  - □ Routine/frequent use of bronchodilators

* CLDI was formerly called “bronchopulmonary dysplasia.” It can develop in pre-term neonates who are treated with oxygen and positive pressure ventilation. Many cases are seen in infants who previously had respiratory distress syndrome (RDS). CLDI is not asthma, croup, a recurrent upper respiratory infection, chronic bronchitis, chronic bronchiolitis, or a history of a previous RSV infection.

Clients who are younger than 12 months chronological age at the start of the RSV season can qualify based on criteria to the right.

Choose one of the following:
- □ ≤ 28 6/7 weeks gestational age at birth (ICD-9-CM code:__________)
- □ < 35 weeks gestational age and neuromuscular disease, including chronic respiratory failure (ICD-9-CM code:__________)
- □ < 35 weeks gestational age and significant congenital anomalies of the airway expected to compromise respiratory ventilation (ICD-9-CM code:__________)

Clients who are younger than 6 months of age at the start of RSV season can qualify based on criteria to the right. Diagnoses, conditions, and risk factors must be clearly documented in client’s medical record.

Choose one of the following:
- □ 29 through 31 6/7 weeks gestational age at birth (ICD-9-CM code:__________)
- □ 32 through 34 6/7 weeks gestational age (ICD-9-CM code:__________) and two of the following risk factors are documented in the client’s medical record:
  - □ Direct exposure to tobacco smoke or other documented environmental air pollutants
  - □ Attends child care
  - □ Siblings who attend school or child care
- □ Cystic Fibrosis (ICD-9-CM code:__________)

Current clinical information and diagnoses that pertain to medical necessity (if necessary, add additional pages):

### Criteria for Dental Therapy Under General Anesthesia

Total points needed to justify treatment under general anesthesia = 22.

#### Age of client at time of examination

<table>
<thead>
<tr>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Less than four years of age</td>
</tr>
<tr>
<td>Four and five years of age</td>
</tr>
<tr>
<td>Six and seven years of age</td>
</tr>
<tr>
<td>Eight years of age and older</td>
</tr>
</tbody>
</table>

#### Treatment Requirements (Carious and/or Abscessed Teeth)

<table>
<thead>
<tr>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>1-2 teeth or one sextant</td>
</tr>
<tr>
<td>3-4 teeth or 2-3 sextants</td>
</tr>
<tr>
<td>5-8 teeth or 4 sextants</td>
</tr>
<tr>
<td>9 or more teeth or 5-6 sextants</td>
</tr>
</tbody>
</table>

#### Behavior of Client**

<table>
<thead>
<tr>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Definitely negative–unable to complete exam, client unable to cooperate due to lack of physical or emotional maturity, and/or disability</td>
</tr>
<tr>
<td>Somewhat negative–defiant; reluctant to accept treatment; disobeys instruction; reaches to grab or deflect operator’s hand, refusal to take radiographs</td>
</tr>
<tr>
<td>Other behaviors such as moderate levels of fear, nervousness, and cautious acceptance of treatment should be considered as normal responses and are not indications for treatment under general anesthesia</td>
</tr>
</tbody>
</table>

** Requires that narrative fully describing circumstances be present in the client’s chart

#### Additional Factors**

<table>
<thead>
<tr>
<th>Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>Presence of oral/perioral pathology (other than caries), anomaly, or trauma requiring surgical intervention**</td>
</tr>
<tr>
<td>Failed conscious sedation**</td>
</tr>
<tr>
<td>Medically compromising of handicapping condition**</td>
</tr>
</tbody>
</table>

** Requires that narrative fully describing circumstances be present in the client’s chart

---

I understand and agree with the dentist’s assessment of my child’s behavior.

PARENT/GUARDIAN SIGNATURE: __________________________ DATE: __________________________

To proceed with the dental care and general anesthesia, this form, the appropriate narrative, and all supporting documentation, as detailed in Attachment 1, must be included in the client’s chart. The client’s chart must be available for review by representatives of TMHP and/or HHSC.

PERFORMING DENTIST’S SIGNATURE: __________________________

DATE: __________________________ License No. __________________________

Effective Date: 01/01/2009/Revised Date: 12/17/2008
Medicaid Dental Policy Regarding Criteria for Dental Therapy Under General Anesthesia—Attachment 1

Purpose: To justify I.V. Sedation or General Anesthesia for Dental Therapy, the following documentation is required in the Child’s Dental Record.

Elements: Note those required* and those as appropriate**:

1) The medical evaluation justifying the need for anesthesia
2) Description of relevant behavior and reference scale
3) Other relevant narrative justifying the need for general anesthesia.
4) Client’s demographics, including date of birth.
5) Relevant dental and medical history.
6) Dental radiographs, intraoral/periapical photography and/or diagram of dental pathology.
7) Proposed Dental Plan of Care.
8) Consent signed by parent/guardian giving permission for the proposed dental treatment and acknowledging that the reason for the use of IV sedation or general anesthesia for dental care has been explained.
10) The parent/guardian dated signature on the Criteria for Dental Therapy Under General Anesthesia form attesting that they understand and agree with the dentist’s assessment of their child’s behavior.
11) Dentist’s attestation statement and signature, which may be put on the bottom of the Criteria for Dental Therapy Under General Anesthesia form or included in the record as a stand alone form.

“I attest that the client’s condition and the proposed treatment plan warrant the use of general anesthesia. Appropriate documentation of medical necessity is contained in the client’s record and is available in my office.”

A comprehensive Index, including Volume 1 and all handbooks from Volume 2, is included at the end of Volume 1 (General Information).
1. GENERAL INFORMATION

The information in this handbook is intended for Nursing and Therapy Services. Nursing services include home health skilled nursing visits and home health aide services. Therapy services include occupational therapy (OT), physical therapy (PT), speech therapy (ST), and certified respiratory care practitioners (CRCP) services. The Handbook provides information about Texas Medicaid’s benefits, policies, and procedures applicable to these therapies.

This section does not apply to Comprehensive Outpatient Rehabilitation Facilities (CORFs) or Outpatient Rehabilitation Facilities (ORFs).

Refer to: Subsection 2.4, “Comprehensive Outpatient Rehabilitation Facilities (CORFs)/Outpatient Rehabilitation Facilities (ORFs)” in Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information.

Important: All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1617(a)(6)(A). Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.

Refer to: Section 1: Provider Enrollment and Responsibilities (Vol. 1, General Information) for more information about enrollment procedures.

Section 8: Managed Care (Vol. 1, General Information).

Subsection 2.10, “Therapy Services (CCP)” in the Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information about providing OT, PT, and ST services.

2. CERTIFIED RESPIRATORY CARE PRACTITIONER (CRCP) SERVICES

2.1 Enrollment

To enroll in Texas Medicaid, a CRCP must be certified by the Department of State Health Services (DSHS) to practice under the Texas Occupations Code, Chapter 604. For CRCPs, Medicare certification is not a prerequisite for Medicaid enrollment. A provider cannot be enrolled if his license is due to expire within 30 days; a current license must be submitted. CRCPs must enroll as individual providers and comply with all applicable federal, state, and local laws and regulations.

2.2 Services, Benefits, Limitations, and Prior Authorization

Respiratory therapy services provided by a Texas Medicaid provider enrolled as a CRCP may be reimbursed when services are reasonable, medically necessary, and prescribed by the client’s physician. These services are for all age groups and do not require the client to be homebound.
CRCP services (procedure code 99503) are a benefit of Texas Medicaid with prior authorization to clients who meet the following criteria:

- Are ventilator-dependent for life support at least six hours per day
- Are ventilator-dependent for at least 30 consecutive days as an inpatient in one or more hospitals, skilled nursing facilities (SNF), or intermediate care facilities (ICF)
- Require respiratory care as an inpatient in a hospital, SNF, or ICF and would be eligible to have payment made for such inpatient care
- Have adequate social support services available for care at home
- Prefer care at home

2.2.1 Prior Authorization

TMHP must prior authorize all in-home respiratory therapy services. CRCPs must request and receive prior authorization from the TMHP Special Medical Prior Authorization (SMPA) department for all in-home respiratory therapy services. Providers may use the SMPA Request Form when they submit requests to the SMPA department. Prior authorization may be given for up to 12 months subject to renewal every year upon a supplemental report from the physician documenting the medical necessity for continued in-home respiratory therapy services.

Refer to: Form NT.6, “Special Medical Prior Authorization (SMPA) Request Form” in this handbook.

2.3 Documentation Requirements

Prior authorization requests must include the physician’s dated order, all pertinent medical records, and other information to justify the medical necessity or dependency of ventilator support or requested therapy services.

All supporting documentation must be included with the request for prior authorization. Providers should send requests and documentation to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-A Riata Trace Parkway, Suite 150
Austin, TX 78727
Fax: 1-512-514-4213

2.4 Claims Filing and Reimbursement

2.4.1 Claims Information

CRCP services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.
Electronic billers must submit the prior authorization number (PAN) on the electronic claim form. Providers should consult the software vendor for the location of this field in the software.

### 2.4.2 Procedure Code

Procedure code 99503 is allowable for CRCP services.

The recommended frequency for procedure code 99503 is as follows: one visit daily for the initial seven days of home ventilation therapy; one visit every fourth day through the initial 30 days of home ventilation therapy; and one visit every four weeks thereafter.

Procedure code 99503 includes, but is not limited to, the following:

- Respiratory therapy services and treatments prescribed by the client’s physician
- Education of the client and appropriate family members and support people about the in-home respiratory care (must include the use and maintenance of required supplies, equipment, and techniques appropriate to the situation)

### 2.4.3 Reimbursement

Respiratory therapy services provided by a participating CRCP are reimbursed the lesser of the provider’s billed charges or the rate calculated in accordance with 1 TAC §355.8089. Providers can refer to the Online Fee Lookup (OFL) or the applicable fee schedule on the TMHP website at www.tmhp.com.

Refer to: Subsection 2.2, “Reimbursement Methodology” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for more information about reimbursement.

Procedure code 99503 may be reimbursed in the client’s home, once per day, up to 24 visits per year. Disposable respiratory supplies and respiratory equipment rental or purchase are a benefit through Texas Medicaid Title XIX Home Health Services and are not reimbursed to the certified respiratory therapist.

### 3. HOME HEALTH SERVICES FOR NURSING AND THERAPY

#### 3.1 Enrollment

To enroll in the Home Health Services Program, Home Health Services and Home and Community Support Services Agency (HCSSA) providers must complete the Texas Medicaid Provider Enrollment Application. Medicare certification is required for providers that are licensed as a Licensed and Certified Home Health Agency. Providers that are licensed as a Licensed Home Health Agency are not required to enroll in Medicare as a prerequisite to enrollment with Texas Medicaid.

Licensed and Certified Home Health agencies that are enrolled as Medicaid providers can provide personal care services (PCS) using their existing provider identifier. PCS for clients who are 20 years of age and younger will be provided by the Texas Health and Human Services Commission (HHSC) under the PCS benefit.

Refer to: Subsection 2.8, “Personal Care Services (PCS) (CCP)” in the *Children’s Services Handbook* (Vol. 2, Provider Handbooks).

To provide CCP services, HCSSA providers must follow the enrollment procedures in subsection 5.2, “Enrollment” in *Children’s Services Handbook* (Vol. 2, Provider Handbooks).
Providers may download the Texas Medicaid Provider Enrollment Application at www.tmhp.com or request a paper application form by contacting TMHP directly at 1-800-925-9126.

Providers may also obtain the application by writing to the following address:

Texas Medicaid & Healthcare Partnership  
Provider Enrollment  
PO Box 200795  
Austin, TX 78720-0795  
1-800-925-9126  
Fax: 1-512-514-4214

Providers may request prior authorization for home-health services by contacting:

Texas Medicaid & Healthcare Partnership  
Home Health Services  
PO Box 202977  
Austin, TX 78720-2977  
1-800-925-8957  
Fax: 1-512-514-4209

3.1.1 Change of Address and Telephone Number
A current physical and mailing address and telephone number must be on file for the agency/company to receive reimbursement checks, Medicaid provider procedures manuals, and all other TMHP correspondence. Promptly send all address and telephone number changes to:

Texas Medicaid & Healthcare Partnership  
Provider Enrollment  
PO Box 200795  
Austin, TX 78720-0795  
1-800-925-9126  
Fax: 1-512-514-4214

3.1.2 Pending Agency Certification
Home health agencies submitting claims before the enrollment process is complete or without prior authorization for services issued by TMHP Home Health Services Prior Authorization Department will not be reimbursed. The effective date of enrollment is when all Texas Medicaid provider enrollment forms are received and approved by TMHP.

Upon the receipt of notice of Texas Medicaid enrollment, the agency must contact the TMHP Home Health Services Prior Authorization Department before serving a Texas Medicaid client for services that require a prior authorization number. Prior authorization cannot be issued before Texas Medicaid enrollment is complete. Regular prior authorization procedures are followed at that time.

Home health agencies that provide laboratory services must comply with the rules and regulations of the Clinical Laboratory Improvement Amendments (CLIA). Providers who do not comply with CLIA will not be reimbursed for laboratory services.

Refer to: Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks).

3.2 Services, Benefits, Limitations, and Prior Authorization

3.2.1 Home Health Services
The benefit period for home health professional services is up to 60 days with a current plan of care (POC). This extended prior authorization period begins on the date that clients receive their first prior authorized home health service. Texas Medicaid allows additional visits that have been determined to be medically necessary and have been prior authorized by TMHP Home Health Services Prior Authori-
zation Department. These records and claims must be retained for a minimum of five years from the date of service (DOS) or until audit questions, appeals, hearings, investigations, or court cases are resolved. Use of these services is subject to retrospective review.

### 3.2.1.1 Client Eligibility

To verify client Medicaid eligibility and retroactive eligibility, the home health agency or durable medical equipment (DME)/medical supplier must contact the Automated Inquiry System (AIS) at 1-800-925-9126 or the TMHP Electronic Data Interchange (EDI) Help Desk at 1-888-863-3638. Home health clients do not need to be homebound to qualify for services.

The Medicaid client must be eligible on the DOS and must meet all of the following requirements to qualify for Home Health Services:

- Have a medical need for home health professional services, DME, or supplies that is documented in the client’s POC and considered a benefit under Home Health Services
- Receive services that meet the client’s existing medical needs and can be safely provided in the client’s home
- Receive prior authorization from TMHP for most home health professional services, DME, or supplies

Certain DME/supplies may be obtained without prior authorization although providers must retain a Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form reviewed, signed, and dated by the treating physician for these clients.

Refer to: “Automated Inquiry System (AIS)” in “Preliminary Information” (Vol. 1, General Information).

Note: Texas Health Steps (THSteps)-eligible clients who qualify for medically necessary services beyond the limits of this Home Health Services benefit may receive those services through CCP.

Refer to: Subsection 2.5, “Durable Medical Equipment (DME) Supplier (CCP)” in Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information on DME benefits for clients who are 20 years of age and younger.

### 3.2.1.2 Prior Authorization Requests for Clients with Retroactive Eligibility

Retroactive eligibility occurs when the effective date of a client’s Medicaid coverage is before the date the client’s Medicaid eligibility is added to TMHP’s eligibility file, which is called the “add date.”

For clients with retroactive eligibility, prior authorization requests must be submitted after the client’s add date and before a claim is submitted to TMHP.

For services provided to fee-for-service Medicaid and Primary Care Case Management (PCCM) clients during the client’s retroactive eligibility period, i.e., the period from the effective date to the add date, prior authorization must be obtained within 95 days from the client’s add date and before a claim for those services is submitted to TMHP. For services provided on or after the client’s add date, the provider must obtain prior authorization within 3 business days of the date of service.

The provider is responsible for verifying eligibility. The provider is strongly encouraged to access AIS or TexMedConnect to verify eligibility frequently while providing services to the client. If services are discontinued before the client’s add date, the provider must still obtain prior authorization within 95 days of the add date to be able to submit claims.

Refer to: Section 4: Client Eligibility (Vol. 1, General Information).
### 3.2.1.3 Client Evaluation

When a home health agency receives a referral to provide Home Health Services for a client who is eligible for Texas Medicaid, the agency-employed registered nurse (RN) must evaluate the client in the home before calling TMHP for prior authorization. A home evaluation by the agency-employed RN is required for skilled nursing (SN), home health aide (HHA), OT and PT services, DME, or supplies requested on a Home Health Services POC. It is expected that appropriate referrals will be made between home health agencies and DME suppliers for care. It is recommended that DME suppliers keep open communication with the client’s physician to ensure the client’s medical record is current.

This evaluation must include assessment of the following:

- Medical necessity for Home Health Services, supplies, or DME
- Safety
- Appropriateness of care in the home setting
- Capable caregiver available if clients are unable to perform their own care or monitor their own medical condition

Following the RN’s assessment/evaluation of the client in the home setting for Home Health Services needs, the agency-employed RN who completed the home evaluation must contact TMHP for prior authorization within three business days of the start of care (SOC).

### 3.2.2 Benefits

Home Health Services include SN, HHA, OT and PT services, DME, and expendable medical supplies that are provided to eligible Medicaid clients at their place of residence.

**Note:** THSteps-eligible clients who qualify for medically necessary services beyond the limits of this Home Health Services benefit may receive those services through CCP.

**Refer to:** Subsection 2.10, “Therapy Services (CCP)” and subsection 2.9, “Private Duty Nursing (CCP)” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for more information on nursing and therapy benefits for clients who are 20 years of age and younger.

An SN or HHA visit may be provided for up to a maximum of 2.5 hours per visit. A combined total of three SN or HHA visits may be reimbursed per day. When services are provided to more than one client in the same setting, only the units directly provided to each client at distinct, separate time periods will be reimbursed. Provider documentation must support that the services were delivered at distinct, separate time periods. Total Home Health Services billed for all clients cannot exceed the individual provider’s total number of hours spent at the place of service (POS).

As needed (PRN), one SN visit may be reimbursed every 30 days outside of the prior authorized visits when SN visits have been authorized for the particular client. For reimbursement purposes, home health SN and HHA services are always billed as POS 2 (home) regardless of the setting in which the services are actually provided. SN and HHA services provided in the day care or school setting will not be reimbursed unless delivered before or after school hours.

All unique procedure codes must be billed according to the description of the procedure code. The quantity billed must be identified and each procedure code must be listed as separate line items on the claim. SN and HHA services must be billed in 15-minute increments. OT and PT services must be billed one visit per day, per therapy.

Procedural modifiers are required when billing SN, HHA, OT, and PT visits.

<tr>
<td>U3</td>
<td>SN or HHA third visit per day</td>
</tr>
</tbody>
</table>
Prior authorization must be obtained for all professional services, some supplies, and most DME from TMHP within three business days of SOC. Although providers may supply some DME and medical supplies to a client without prior authorization, they must still retain a copy of the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form that has Section B completed, signed, and dated by the client’s attending physician.

### 3.2.3 Home Health Skilled Nursing (SN) Services

Home health SN services are a benefit of Home Health Services when a client requires nursing, OT, or PT services for an acute condition or an acute exacerbation of a chronic condition that can be met on an intermittent or part-time basis and typically has an end-point. SN visits may be provided on consecutive days. SN visits are intended to provide SN care to promote independence and support the client living at home. Home Health Services must be provided by a licensed and certified home health agency enrolled in Texas Medicaid.

**Note:** Nursing visits for the primary purpose of assessing a client’s care needs to develop a POC are considered administrative and not billable. These visit costs are reflected on the cost report.

An acute condition is a condition or exacerbation that is anticipated to improve and reach resolution within 60 days. An intermittent basis is an SN visit that is provided for less than eight hours per visit and less frequently than daily. Intermittent visits may be delivered in interval visits up to 2.5 hours per visit, not to exceed a combined total of three visits per day. A part-time basis is an SN visit that is provided less than eight hours per day for any number of days per week. Part-time visits may be continuous up to 7.5 hours per day (not to exceed a combined total of three 2.5 hour visits).

SN visits are considered medically necessary for clients who require the following:

- Skillful observations and judgment to improve health status, skilled assessment, or skilled treatments and procedures
- Individualized, intermittent, acute skilled care
- Skilled interventions to improve health status, and if skilled intervention is delayed, it is expected to result in the deterioration of a chronic condition or one of the following:
  - Loss of function
  - Imminent risk to health status due to medical fragility, or risk of death

When documentation does not support medical necessity for home health SN visits, providers may be directed to possible alternative services based on the client’s age and needs.

#### 3.2.3.1 SN Visits

SN visits (procedure code G0154) are limited to SN procedures performed by an RN or licensed vocational nurse (LVN) licensed to perform these services under the Texas Nursing Practice Act and include direct SN care, and parent or guardian, caregiver training, and education as well as SN observation, assessment, and evaluation by an RN, provided a physician specifically requests that a nurse visit the client for this purpose, and the physician’s order reflects the medical necessity for the visit.

For all clients, SN visits may be provided in the following locations:

- Home of the client, parent, guardian, or caregiver
- Foster homes
- Independent living arrangements
3.2.3.1.1 SN Care

SN care consists of those services that must, under state law, be performed by an RN or LVN, and meet the criteria for SN services specified in the Title 42 Code of Federal Regulations (CFR) §§ 409.32, 409.33, and 409.44. In determining whether a service requires the skill of a licensed nurse, consideration must be given to the inherent complexity of the service, the condition of the client, and the accepted standards of medical and nursing practice.

The fact that the SN service can be, or is taught to the client or to the client’s family or friends does not negate the skilled aspect of the service when the service is performed by a nurse. If the service could be performed by the average nonmedical person, the absence of a competent person to perform it does not cause it to be an SN service. If the nature of a service is such that it can safely and effectively be performed by the average nonmedical person without direct supervision of a licensed nurse, the service cannot be regarded as an SN service.

Some services are classified as SN services on the basis of complexity alone (e.g., intravenous and intramuscular injections or insertion of catheters), and if reasonable and necessary to the treatment of the client’s illness or injury, would be covered on that basis. However, in some cases, the client’s condition may cause a service that would ordinarily be considered unskilled to be considered an SN service. This may occur when the client’s condition is such that the service can be safely and effectively provided only by a nurse.

A service which, by its nature, requires the skills of a nurse to be provided safely and effectively continues to be a skilled service even if it is taught to the client, the client’s family, or other caregivers. Where the client needs the SN care and there is no one trained, able and willing to provide it, the services of a nurse would be reasonable and necessary to the treatment of the illness or injury.

SN services must be reasonable and necessary to the diagnosis and treatment of the client’s illness or injury within the context of the client’s unique medical condition. To be considered reasonable and necessary for the diagnosis or treatment of the client’s illness or injury, the services must be consistent with the nature and severity of the illness or injury, the client’s particular medical needs, and within accepted standards of medical and nursing practice. A client’s overall medical condition is a valid factor in deciding whether skilled services are needed. A client’s diagnosis should never be the sole factor in deciding whether the service the client needs is either skilled or not skilled.

The determination of whether the services are reasonable and necessary should be made in consideration of the physician’s determination that the services ordered are reasonable and necessary. The services must, therefore, be viewed from the perspective of the condition of the client when the services were ordered, and what was, at that time, reasonably expected to be appropriate treatment for the illness or injury throughout the certification period.

SN care must be provided on a part-time or intermittent basis.

3.2.3.1.2 Professional Nursing

Professional nursing provided by an RN, as defined in the Texas Nursing Practice Act, means the performance of an act that requires substantial specialized judgment and skill, the proper performance of which is based on knowledge and application of the principles of biological, physical, and social science as acquired by a completed course in an approved school of professional nursing. The term does not include acts of medical diagnosis or the prescription of therapeutic or corrective measures.

Professional nursing involves:

- The observation, assessment, intervention, evaluation, rehabilitation, care and counsel, or health teachings of a person who is ill, injured, infirm, or experiencing a change in normal health processes.
- The maintenance of health or prevention of illness.
- The administration of a medication or treatment as ordered by a physician, podiatrist, or dentist.
• The supervision of delegated nursing tasks or teaching of nursing.
• The administration, supervision, and evaluation of nursing practices, policies, and procedures.
• The performance of an act delegated by a physician.
• Development of the nursing care plan.

Professional nursing also involves assisting in the evaluation of an individual’s response to a nursing intervention and the identification of an individual’s needs and engaging in other acts that require education and training, as prescribed by board rules and policies, commensurate with the nurse’s experience, continuing education, and demonstrated competency.

3.2.3.1.3 Vocational Nursing

Vocational nursing, as defined in the Texas Nursing Practice Act, means a directed scope of nursing practice, including the performance of an act that requires specialized judgment and skill, the proper performance of which is based on knowledge and application of the principles of biological, physical, and social science as acquired by a completed course in an approved school of vocational nursing. The term does not include acts of medical diagnosis or the prescription of therapeutic or corrective measures.

Vocational nursing involves:
• Collecting data and performing focused nursing assessments of the health status of an individual
• Participating in the planning of the nursing care needs of an individual
• Participating in the development and modification of the nursing care plan
• Participating in health teaching and counseling to promote, attain, and maintain the optimum health level of an individual

Vocational nursing also involves assisting in the evaluation of an individual’s response to a nursing intervention and the identification of an individual’s needs and engaging in other acts that require education and training, as prescribed by board rules and policies, commensurate with the nurse’s experience, continuing education, and demonstrated competency.

3.2.4 Home Health Aide (HHA) Services

HHA visits (procedure code G0156) are a benefit of Home Health Services when a client requires nursing, OT, or PT services for an acute condition or an acute exacerbation of a chronic condition that can be met on an intermittent or part-time basis. HHA visits are intended to provide PCS under the supervision of an RN, occupational therapist, or physical therapist employed by the home health agency to promote independence and support the client living at home.

An acute condition is considered a condition or exacerbation that is anticipated to improve and reach resolution within 60 days. An intermittent basis is considered an SN visit provided for less than eight hours per visit and less frequently than daily. Intermittent visits may be delivered in interval visits up to 2.5 hours per visit, not to exceed a combined total of three visits per day. A part-time basis is considered an SN visit provided less than eight hours per day for any number of days per week. Part-time visits may be continuous up to 7.5 hours per day (not to exceed a combined total of three 2.5 hour visits).

HHA visits are considered medically necessary for clients who require general supervision of nursing care provided by an HHA over whom the RN, occupational therapist, or physical therapist is administratively or professionally responsible in addition to the following:
• Skillful observations and judgment to improve health status, skilled assessment, or skilled treatments or procedures
• Individualized, intermittent, acute skilled care
• Skilled interventions to improve health status, and if skilled intervention is delayed, it is expected to result in the deterioration of a chronic condition or one of the following:
• Loss of function
• Imminent risk to health status due to medical fragility, or risk of death

When documentation does not support medical necessity for HHA visits, providers may be directed to possible alternative services based on the client’s age and needs.

### 3.2.4.1 HHA Visits

HHA visits are intended to provide hands-on personal care, performance of simple procedures as an extension of therapy or nursing services, assistance in ambulation or exercises, and assistance in administering medications that are ordinarily self-administered.

Any HHA services offered by a home health agency must be provided by a qualified HHA under the supervision of a qualified licensed individual (RN, occupational therapist, or physical therapist) employed by the home health agency.

For all clients, HHA visits may be provided in the following locations:

- Home of the client, parent, guardian, or caregiver
- Foster homes
- Independent living arrangements

The duties of an HHA during a visit include, but are not limited to the following:

- Ambulation
- Assistance with medication that is ordinarily self-administered
- Assisting with nutrition and fluid intake
- Completing appropriate documentation
- Exercise
- Household services essential to the client’s health care at home
- Obtaining and recording the client’s vital signs (temperature, pulse, respirations, and blood pressure)
- Observation, reporting, and documentation of the client’s status, and the care or service furnished
- Personal care (hygiene and grooming), including, but not limited to the following:
  - Sponge, tub, or shower bath
  - Shampoo, sink, tub, or bed bath
  - Nail and skin care
  - Oral hygiene
- Positioning
- Range of motion
- Reporting changes in the client’s condition and needs
- Safe transfer
- Toileting and elimination care

### 3.2.4.2 Supervision of HHA

Supervision, as defined by the Texas Nursing Practice Act, is the process of directing, guiding, and influencing the outcome of an individual’s performance of an activity. An RN, occupational therapist, or
A physical therapist must provide the HHA written instructions for all the tasks delegated to the HHA. An occupational therapist or physical therapist may prepare the written instructions if the client is receiving only HHA visits, which do not include delegated SN tasks, in addition to the therapy services.

The requirements for HHA supervision are as follows:

- When only HHA visits are provided, an RN must make a supervisory visit to the client’s residence at least once every 60 days. The supervisory visit must occur when the HHA is providing care to the client.
- When SN, OT, or PT visits are provided in addition to an HHA visit, an RN must make a supervisory visit to the client’s residence at least every two weeks. The supervisory visit must occur when the HHA is providing care to the client.
- When only OT or PT visits are provided in addition to HHA visits, the appropriate therapist may make the supervisory visit in place of an RN. The supervisory visit must occur when the HHA is providing care to the client.
- Documentation of HHA supervision must be maintained in the client’s medical record.

### 3.2.5 Supplies Submitted with a Plan of Care (POC)

The cost of incidental supplies used during an SN or HHA visit may be added to the charge of the visit ($10 maximum for supplies and included in G0154 visit code). Medical supplies left at the home for the client to use must be billed with the provider identifier enrolled as a DME supplier after prior authorization has been granted by the TMHP Home Health Services Prior Authorization Department.

When the Home Health Services POC is used to submit a prior authorization of supplies/DME that will be used in conjunction with the professional services provided by the agency, such as SN, HHA, OT, or PT, the home health agency’s DME provider identifier must be submitted on the POC, and all of the requested supplies must be listed in the supplies section of the POC. The POC does not require a physician’s signature before prior authorization of professional services and supplies/DME is requested but does require the assessing RNs dated signature. The POC must be signed and dated by a physician familiar with the client prior to submitting a claim for services and no later than 30 days from the SOC date.

If the home health agency uses the Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form, the agency must complete Section A. The physician must complete Section B, and sign prior to submission to TMHP for prior authorization of the requested supplies/DME.

The following information is required to consider these supplies for prior authorization:

- Item description
- Procedure code
- Quantity of each supply requested
- Manufacturer’s suggested retail price (MSRP) for items that do not have a maximum fee assigned

### 3.2.6 Medication Administration Limitations

Nursing visits for the purpose of administering medications are not a benefit if one of the following conditions exists:

- The medication is not considered medically necessary to the treatment of the individual’s illness or is not Food and Drug Administration (FDA)-approved.
• The administration of medication exceeds the therapeutic frequency or duration by accepted standards of medical practice.

• A medical reason does not prohibit the administration of the medication by mouth.

• The client, a primary caregiver, a family member, or neighbor have been taught or can be taught to administer subcutaneous (SQ/SC), intramuscular (IM), and intravenous (IV) injections and has demonstrated competency.

• The medication is a chemotherapeutic agent or blood product SQ/SC, IM, and IV injections.

3.2.7 Occupational Therapy (OT) Services

As stated in 1 TAC §354.1039, to be payable as a Home Health Services benefit, OT services must be:

• Provided by an occupational therapist or an OT assistant who is currently registered and licensed by the Executive Council of Physical Therapy and Occupational Therapy Examiners

• For the evaluation and function-oriented treatment of individuals whose ability to function in life roles is impaired by recent or current physical illness, injury, or condition

• For specific goal-directed activities to achieve a functional level of mobility and communication to prevent further dysfunction within a reasonable length of time based on the therapist’s evaluation, physician’s assessment, and POC

  **Note:** THSteps-eligible clients who qualify for medically necessary services beyond the limits of this Home Health Services benefit will receive those services through CCP.

  **Refer to:** Subsection 2.10, “Therapy Services (CCP)” in the Children’s Services Handbook (Vol. 2, Provider Handbooks) for OT benefits for clients who are 20 years of age and younger and Section 4, “Therapists, Independent Practitioners, and Physicians” in this handbook for OT benefits provided by a physician.

3.2.8 Physical Therapy (PT) Services

As stated in 1 TAC §354.1039, in order to be payable as a Home Health Services benefit, PT services must be:

Provided by a physical therapist or PT assistant who is currently licensed by the Executive Council of Physical Therapy and Occupational Therapy Examiners.

• For the treatment of an acute musculoskeletal or neuromuscular condition or an acute exacerbation of a chronic musculoskeletal or neuromuscular condition.

• Expected to improve the client’s condition in a reasonable and generally predictable period of time, based on the physician’s assessment of the client’s restorative potential after any necessary consultation with the therapist.

• Provided only until the client has reached the maximum level of improvement. Repetitive services designed to maintain function when the maximum level of improvement has been reached are not a benefit. Additionally, services related to activities for the general good and welfare of clients, such as general exercises to promote overall fitness and flexibility, and activities to provide diversion or general motivation are not reimbursed.

  **Note:** THSteps-eligible clients who qualify for medically necessary services beyond the limits of this Home Health Services benefit may receive those services through CCP.

  **Refer to:** Subsection 2.10, “Therapy Services (CCP)” in the Children’s Services Handbook (Vol. 2, Provider Handbooks) for PT benefits for clients who are 20 years of age and younger.

  Section 4, “Therapists, Independent Practitioners, and Physicians” in this handbook for PT benefits provided by a physician.
3.2.9 Prior Authorization

Providers may request prior authorization for Home Health Services (SN, HHA, OT, and PT) for an eligible client by calling the TMHP Home Health Services Prior Authorization Department at 1-800-925-8957, by faxing a request to 1-512-514-4209, or by submitting a request through the TMHP website at www.tmhp.com.

The following prior authorization requests can be submitted on the TMHP website at www.tmhp.com:

- Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form
- Home Health Services POC

Refer to: Subsection 5.4.1, “Prior Authorization Requests Through the TMHP Website” in Section 5, “Prior Authorization” (Vol. 1, General Information) for more information, including mandatory documentation requirements.

If a client’s primary coverage is private insurance and Medicaid is secondary, prior authorization is required for Medicaid reimbursement. If the primary coverage is Medicare, Medicare approves the service, and Medicaid is secondary, prior authorization is not required. TMHP will pay only the coinsurance and/or deductible. If Medicare denied the service, then Medicaid prior authorization is required. Contact TMHP within 30 days of the date of Medicare’s final disposition. The medicare remittance advice notice (MRAN) containing Medicare’s final disposition must accompany the prior authorization request. If the service is a Medicaid-only service, prior authorization is required within three business days of the SOC date.

The provider is responsible for determining if eligibility is effective by using AIS or an electronic eligibility inquiry through the TMHP EDI gateway.

The provider must contact the TMHP Home Health Services Prior Authorization Department within three business days of the SOC for professional services or the DOS for DME/medical supplies to obtain prior authorization following the RN’s assessment/evaluation of the client in the home setting. When contacting TMHP by telephone for prior authorization, the nurse who made the initial assessment visit in the client’s home must make this call to answer questions about the client’s condition as it relates to the medical necessity.

If inadequate or incomplete information is provided or medical necessity is lacking, the provider will be requested to furnish additional documentation as required to make a decision on the request. Because it often must be obtained from the client’s physician, providers have two weeks to submit the requested documentation. If the additional documentation is received within the two-week period, prior authorization can be considered for the original date of contact. If the additional documentation is received more than two weeks from the request for the documentation, prior authorization is not considered before the date the additional documentation is received. It is the DME/supplier/home health agency’s responsibility to contact the physician to obtain the requested additional documentation.

The Home Health Services Prior Authorization Checklist is a useful resource for home health agency providers completing the prior authorization process. This optional form offers the nurse a detailed account of the client’s needs when completed.

Refer to: Subsection 2.2.2, “Durable Medical Equipment (DME) and Supplies” in the Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks) for DME/medical supplies prior authorization.

Subsection 3.4.2, “Medicaid Relationship to Medicare” of this handbook.

Client eligibility for Medicaid is for one month at a time. Providers should verify eligibility every month. Prior authorization does not guarantee payment.
3.2.9.1 Home Health SN and HHA Services Prior Authorization Requirements

SN and HHA services require prior authorization. Requests must be submitted in writing, by fax or mail. Providers must obtain prior authorization within three business days of the SOC date for an initial prior authorization. For extension of the prior authorization providers must obtain prior authorization within seven business days of the new SOC date. During the prior authorization process, providers are required to deliver the requested services from the SOC date, which is the date agreed to by the physician, the RN, the home health agency, and the client, parent, guardian, or caregiver. The SOC date must be documented on the POC.

Prior authorization of SN or HHA visits requires that a client’s primary care physician complete the following steps:

- Provide specific, written, dated orders for SN or home health agency visits or recertification that identifies that the prescribed visits are medically necessary as defined in subsection 3.2.3, “Home Health Skilled Nursing (SN) Services” and subsection 3.2.4, “Home Health Aide (HHA) Services” of this handbook.
- Maintain documentation in the client’s medical record that supports the medical necessity of the prescribed visits.
- Maintain documentation in the client’s medical record that demonstrates that the client’s medical condition is sufficiently stable to permit safe delivery of the prescribed visits as described in the client’s Home Health Services POC.
- Establish a medical POC that is maintained in the client’s medical record.
- Provide continuing care and medical supervision.
- Review and approve the client’s Home Health Services POC once every 60 days or more frequently if the physician determines it to be necessary, including but not limited to a change in the client’s condition.

Requests must be based on the medical needs of the client. Documentation must support the quantity and frequency of intermittent or part-time SN and HHA visits that will safely meet the client’s needs. The amount and duration of SN and HHA visits requested will be evaluated by the claims administrator. The home health agency must ensure the requested services are supported by the client assessment, POC, and the physician’s orders.

The length of the prior authorization is determined on an individual basis and is based on the goals and timelines identified by the physician, home health agency, RN, and client, parent, guardian, or caregiver. SN and HHA visits will be prior authorized for no more than 60 days at a time.

As a client’s problems are resolved and goals are met, a client’s condition is expected to become more stable, and the client’s needs for SN and HHA services may decrease.

SN visits to obtain routine laboratory specimens may be considered when the only alternative to obtain the specimen is to transport the client by ambulance. SN visits to address hyperbilirubinemia will not be considered for prior authorization if the client has an open prior authorization for home phototherapy. For clients receiving private duty nursing (PDN) services, instruction in the use of the phototherapy equipment must be part of the existing PDN authorized hours. SN visits will not be allowed on the same day as PDN services. Home phototherapy is reimbursed as a daily global fee and includes coverage of SN visits for parent or caregiver teaching, client monitoring, and obtaining customary and routine laboratory specimens.

SN visits to address total parenteral nutrition (TPN) must:

- Be provided by an RN appropriately trained in the administration of TPN
- Include education of the client or caregiver regarding the in-home administration of TPN before administration initially begins
• Include the use and maintenance of required supplies and equipment
• Occur at least once every month to monitor the client’s status and to provide ongoing education to the client and caregiver regarding the administration of TPN

For clients receiving PDN who also require TPN administration education, intermittent SN visits may be considered for separate prior authorization when:
• The PDN provider is not an RN appropriately trained in the administration of TPN, and the PDN provider is not able to perform the function
• There is documentation to support the medical need for an additional skilled nurse to perform TPN administration

The SN services may be prior authorized only for the client/caregiver training in TPN administration. SN visits will not be approved for the sole purpose of instructing the client on the use of the subcutaneous injection port device. Any necessary instruction must be performed as part of the office visit with the prescribing physician.

The nurse providing the intermittent SN visit for TPN services will only be reimbursed for time spent delivering client and family instruction and for direct client TPN services. The services delivered must be documented in the client’s record.

PDN and SN should not be routinely performed on the same date during the same time period. PDN and SN will not be considered for reimbursement when the services are performed on the same date during the same time period without prior authorization approval.

If the SN visit for TPN education occurs during a time period when the PDN provider is caring for the client, both the PDN provider and the nurse educator must document in the client’s medical record the skilled services individually provided, including, but not limited to, the following:
• The start and stop time of each nursing provider’s specialized tasks
• The client condition that requires the performance of skilled PDN tasks during the SN visit for TPN education
• The skilled services that each provided during that time period

Both the intermittent SN visit and the PDN services provided during the same time period may be recouped if the documentation does not support the medical necessity of each service provided.

Up to a maximum combined total of three SN and HHA visits may be prior authorized per day. One visit may last up to a maximum of 2.5 hours. SN and HHA visits may be provided on consecutive days.

When documentation does not support medical necessity for home health SN and HHA visits, providers may be directed to possible alternative services based on the client’s age and needs.

A prior authorization for SN and HHA visits is no longer valid when:
• The client is no longer eligible for Medicaid.
• The client no longer meets the medical necessity criteria for SN or HHA services.
• The place of service cannot provide for the health and safety of the client.
• The client, parent, guardian, or caregiver refuses to comply with the attending physician’s plan of treatment and compliance is necessary to ensure the health and safety of the client.
• The client changes providers and the change of notification is submitted to the claims administrator in writing with a prior authorization request from the new provider.
An SN or HHA may be prior authorized to provide services to more than one client over the span of the day as long as each client’s care is based on an individualized POC and each client’s needs and POC do not overlap with another client’s needs and POC. Settings in which an SN or HHA provider may provide services in a provider-client ratio greater than 1:1 include, but are not limited to, homes with more than one client receiving Home Health Services, foster homes, and independent living arrangements.

Refer to: Subsection 2.9, “Private Duty Nursing (CCP)” in the Children’s Services Handbook (Vol. 2, Provider Handbooks) for information regarding Private Duty Nursing.

3.2.9.2 Canceling a Prior Authorization

The client has the right to choose their home health agency provider and to change providers. If the client changes providers, TMHP must receive a change of provider letter with a new POC or Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form. The client must sign and date the letter, which must include the name of the previous provider, the current provider, and the effective date for the change.

The client is responsible for notifying the original provider of the change and the effective date. Prior authorization for the new provider can only be issued up to three business days before the date TMHP receives the change of provider letter and the new Home Health Services (Title XIX) Durable Medical Equipment (DME)/Medical Supplies Physician Order Form.

3.2.9.3 Home Health SN and HHA Services That Will Not Be Prior Authorized

SN visits requested primarily to provide the following will not be prior authorized:

- Respite care
- Child care
- Activities of daily living for the client
- Housekeeping services
- Routine post-operative disease, treatment, or medication teaching after a physician visit
- Routine disease, treatment, or medication teaching after a physician visit
- Individualized, comprehensive case management beyond the service coordination required by the Texas Nursing Practice Act

HHA visits requested primarily to provide the following will not be prior authorized:

- Housekeeping services
- Services provided to a client residing in a hospital, SN facility, or intermediate care facility

Certain facilities are required by licensure to meet all the medical needs of the client. SN or HHA visits will not be prior authorized for clients receiving care in any of the following facilities:

- Hospitals
- SN facilities
- Intermediate care facilities for persons with intellectual disabilities (ICF-MR)
- Special care facilities, including but not limited to, sub-acute units and facilities for the treatment of acquired immunodeficiency syndrome (AIDS)

3.2.9.4 OT and PT Prior Authorization Requirements

Prior authorization requests for occupational or physical therapy services, provided through a home health agency for an acute condition or an exacerbation of a chronic condition, must be obtained by contacting the TMHP Home Health Department.
The date and time that therapy began and ended must be documented and maintained in the client’s medical record.

The submitted POC must include all information as shown on the Texas Medicaid Home Health POC form. The Home Health POC form is recommended but not required. The Medicare POC (485/486) will not be accepted.

A nursing POC that addresses the OT or PT services must be completed, signed, and dated by the RN who performed the client’s admission home assessment prior to the RN requesting authorization and must include:

- Diagnoses (including ICD-9-CM diagnosis codes)
- Treatment goals
- Duration of need
- Frequency
- Requested dates of service

To complete the prior authorization process by paper, the provider must submit the prior authorization requirements through fax or mail and must retain a copy of the POC signed and dated by the RN who completed the home assessment in the client’s medical record at the provider’s place of business.

To complete the prior authorization process electronically or telephonically, the provider must submit the prior authorization requirements through any approved electronic or telephonic methods and must retain a copy of the POC signed and dated by the RN who completed the home assessment in the client’s medical record at the provider’s place of business.

In addition to the nursing POC, home health agencies must provide the following information at the time each request for OT or PT is made:

- The requested OT or PT procedure codes with the appropriate GO or GP modifier
- OT or PT evaluation or re-evaluation results
- An initial or subsequent therapy treatment plan to include occupational or physical goals and dates of service requested

As stated in the TAC, prior authorization may be given for a service period not to exceed 60 days on any given authorization. Specific authorizations may be limited to a time period less than the established maximum. When the need for Home Health Services exceeds 60 days, or when there is a change in the service plan, prior authorization must be obtained.

Requests are not accepted from, nor are authorizations granted directly to the occupational therapist or physical therapist, or to the OT or PT assistant.

If a client discontinues therapy with a provider, and a new provider begins therapy during an existing authorization period, submission of a new POC and documentation of the last therapy visit with the previous provider is required, along with a letter from the client, parent, or guardian stating the date therapy ended with the previous provider.

Group therapy procedures involve constant attendance of the physician, occupational therapist, or physical therapist, but by definition do not require one-on-one client contact by the physician, occupational therapist, or physical therapist. Procedure code 97150 may be submitted for each member of the group.

### 3.2.10 Limitations and Exclusions

Payment cannot be made for any service, supply, or equipment for which federal financial participation (FFP) is not available.
Refer to: Subsection 2.2, “CCP Overview” in the Children’s Services Handbook (Vol. 2, Provider Handbooks) to find which of these items are a benefit for CCP clients who are 20 years of age and younger and who are eligible to receive THSteps services.

Home Health Services does not cover the following:

- Administration of non-FDA-approved medications and treatments or the supplies and equipment used for administration
- Aids for daily living, such as toothpaste, spoons, forks, knives, and reachers
- Allergy injections
- Any services, equipment, or supplies furnished to a client who is a resident of a public institution or a client in a hospital, SN facility, or intermediate care facility
- Any services or supplies furnished to a client before the effective date of Medicaid eligibility as certified by HHSC or after the date of termination of Medicaid eligibility
- Any services or supplies furnished without prior approval by TMHP, except as listed
- Application of a modality to one or more areas; hot or cold packs
- Blood products (the administration or the supplies and equipment used to administer blood products)
- Developmental therapy
- Inpatient rehabilitation
- Nursing visits to administer long-term SQ/SC, IM, oral, or topical medications, such as insulin, vitamin B12, or deferoxamine, or to set up medications such as prefill insulin syringes or medication boxes, on a long-term basis
- PDN services
- Respite care (caregiver relief)
- Services that are not medically necessary, including, but not limited to:
  - Massage therapy that is the sole therapy or is not part of a therapeutic plan of care to address an acute condition
  - Hippotherapy
  - Treatment solely for the instruction of other agency or professional personnel in the client’s physical or occupational therapy program
  - Training in non-essential tasks (e.g., homemaking, gardening, recreational activities, cooking, driving, assistance with finances, scheduling)
  - Maintenance therapy, including passive range of motion and exercises, which are not directed towards restoration of a specific loss of function
  - Emotional support, adjustment to extended hospitalization or disability, and behavioral readjustment
  - Therapy prescribed primarily as an adjunct to psychotherapy
- ST provided in the home
- Visits made primarily for performing housekeeping services are not considered a benefit of the Home Health Services Program. These requests should be referred to in-home and family support service at HHSC
Refer to: Subsection 1.7, “Texas Medicaid Limitations and Exclusions” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).

3.3 Documentation Requirements

3.3.1 Written POC

A Home Health Services POC is required for SN, HHA, OT, and PT services. The POC is not required as an attachment with the claim, but a signed and dated POC must be retained in the client’s medical record with the provider and requesting physician. The client’s attending physician must recommend, sign, and date a POC. The POC must be completed but does not need to be signed by the physician before contacting TMHP for prior authorization when orders for home care have been received from the physician. The POC shall be initiated by the RN in a clear and legible format.

The POC must contain the following information:

- Activities permitted
- All pertinent diagnoses
- Available caregiver
- Client’s Medicaid number
- Date the client was last seen by the physician. The client must be seen by a physician within 30 days of the initial SOC and at least once every six months thereafter unless the client’s condition changes. The physician visit may be waived when a diagnosis has already been established by the physician and the recipient is under the continuing care and medical supervision of the physician. Any waiver must be based on the physician’s written statement that an additional evaluation visit is not medically necessary. The original must be maintained by the requesting physician and a copy must be maintained in the providing provider’s files
- Equipment or supplies required
- Instructions for timely discharge or referral
- List of all community or state agency services the client receives in the home (e.g., Primary Home Care (PHC), PCS, community-based alternative [CBA], Medically Dependent Children’s Program [MDCP])
- Medications including the dose, route, and frequency
- Mental status
- Nutritional requirements
- Physician’s license number
- Prior and current functional limitations
- Prognosis
- Provider Medicaid number
- Rehabilitation potential
- Safety measures to protect against injury
- SOC date for Home Health Services
- Treatments, including amount, duration, and frequency
- Types of services including amount, duration, and frequency
- Wound care orders and measurements
Physician orders for OT or PT services must include the ICD-9-CM diagnosis codes for an acute or exacerbated event, when OT and PT is being requested and the following documentation is included with the request:

- Specific procedures and modalities to be used
- Amount, frequency, and duration of therapy needed
- Physical and occupational therapy and goals
- Name of therapist who participated in developing the POC

The physician and home health agency nursing, OT, and PT personnel must review the POC as often as the severity of the client’s condition requires or at least once every 60 days. This signed and dated documentation must be maintained in the client’s medical record and must include the ordering physician and requesting provider information. This applies to all written and verbal orders, and POCs.

Verbal physician orders may only be given to people authorized to receive them under state and federal law. They must be written, signed, and dated by the RN or qualified therapist responsible for furnishing or supervising the ordered service, and placed in the client’s medical record. The physician must sign the written copy of the verbal order within two weeks or per agency policy if less than two weeks. A copy of the written verbal order must be maintained in the client’s medical record before and after being signed by the physician.

The type and frequency of visits, supplies, or DME must appear on the POC before the physician signs the POC and may not be added after the physician has signed the orders. If any change in the POC occurs during a prior authorization period (e.g., additional visits, supplies, or DME), the home health agency must call TMHP Home Health Services Prior Authorization Department for prior authorization and maintain a completed, revised POC that has been signed and dated by the physician.

Coverage periods do not necessarily coincide with calendar weeks or months but instead cover a number of services to be scheduled between a start and end date that is assigned during the prior authorization. The agency must contact TMHP within three business days after the SOC date for prior authorization.

Refer to: Form NT.2, “Home Health Services Plan of Care (POC)” in this handbook.

Subsection 3.2.8, “Physical Therapy (PT) Services” in this handbook.

3.3.1.1 **Physician Supervision-POC**

For the Home Health Services POC to be valid, the treating physician must sign and date it, and indicate when the services will begin. The home health agency must update and maintain the POC at least every 60 days or as necessitated by a change in the client’s condition.

Medicare Form 485 is not accepted as a POC. The Home Health Services POC is the only acceptable form for prior authorization through Texas Medicaid.

3.3.2 **Home Health SN and HHA Services**

A provider requesting prior authorization for SN or HHA services must submit the following documentation:

- A completed client assessment
- A completed Texas Medicaid Home Health Services POC that must:
  - Be signed and dated by the assessing RN
  - Signed and dated by the physician or submitted with the signed and dated physician’s orders
All signatures and dates must be current, unaltered, original, and handwritten; computerized or stamped signatures or dates will not be accepted. All documentation, including all written and verbal orders, and all physician-signed POCs, must be maintained by the ordering physician. The home health agency must keep the original, signed copy of the POC in the client’s medical record.

### 3.3.3 Home Health SN and HHA Services Assessments and Reassessments

When a provider has received a referral and has physician orders for SN or HHA services, the provider must have an RN perform an initial client assessment in the client’s home. A client can be referred to a home health agency for SN or HHA services by the client, the client’s physician, or the client’s family.

The client assessment or reassessment should include, but is not limited to, the following:

- Whether the setting can support the health and safety needs of the client and is adequate to accommodate the use, maintenance, and cleaning of all medical devices, equipment, and supplies required by the client
- Comprehension level of client, parent, guardian, or caregiver
- Receptivity to training and ability level of the client, parent, guardian, or caregiver
- A nursing assessment of medical necessity for the requested visits which includes:
  - Complexity and intensity of the client’s care
  - Stability and predictability of the client’s condition
  - Frequency of the client’s need for SN care
  - Identified medical needs and goals
  - Description of wounds, if present
  - Cardiac status

The initial assessment and any reassessments performed by an RN are required when changes in the client’s condition occur during the course of the prior authorization period. If there is no change in the client’s condition, the reassessment must document medical necessity to support continued and ongoing SN or HHA visits beyond the initial 60-day prior authorization period.

### 3.4 Other/Special Provisions

#### 3.4.1 Home Health SN and HHA Services Provider Responsibilities

Providers must be licensed home health agencies enrolled in Texas Medicaid and must comply with all applicable federal, state, and local laws and regulations and Texas Medicaid policies and procedures. All providers must maintain written policies and procedures for obtaining consent for medical treatment for clients in the absence of the primary caregiver that meet the standards of the Texas Family Code, Chapter 32, and obtaining physician signatures for all telephone orders within 14 calendar days of receipt of the order.

Providers must only accept clients on the basis of a reasonable expectation that the client’s needs can be adequately met in the POS. The essential elements of safe and effective home health SN or HHA services include a trained parent, guardian, or caregiver, a primary physician, competent providers, and an environment that supports the client’s health and safety needs.

The POS must be able to support the health and safety needs of the client and must be adequate to accommodate the use, maintenance, and cleaning of all medical devices, equipment, and supplies required by the client. Necessary primary and back-up utility, communication, and fire safety systems must be available.

*Note:* A parent or guardian, primary caregiver, or alternate caregiver may not provide SN or HHA services even if he or she is an enrolled provider or employed by an enrolled provider.
3.4.2 Medicaid Relationship to Medicare

3.4.2.1 Possible Medicare Clients

It is the provider’s responsibility to determine the type of coverage (Medicare, Medicaid, or private insurance) that the client is entitled to receive.

Home health providers should follow these guidelines:

- Clients who are 64 years of age and younger without Medicare Part A or B:
  - If the agency erroneously submits an SOC notice to Medicare and does not contact TMHP for prior authorization, TMHP does not assume responsibility for any services provided before contacting TMHP. The SOC date is no more than three business days before the date the agency contacts TMHP. Visits made before this date are not considered a benefit of the Home Health Services Program.

- Clients who are 65 years of age and older without Medicare Part A or Part B and clients with Medicare Part A or B regardless of age:
  - In filing home health claims, home health providers may be required to obtain Medicare denials before TMHP can approve coverage. When TMHP receives a Medicare denial, the SOC is determined by the date the agency requested coverage from Medicare. If necessary, the 95-day claims filing deadline is waived for these claims, provided TMHP receives notice of the Medicare denial within 30 days of the date on the MRAN containing Medicare’s final disposition.
  - If the agency receives the MRAN and continues to visit the client without contacting TMHP by telephone, mail, or fax within 30 days of the date on the MRAN, TMHP will provide coverage only for services provided from the initial date of contact with TMHP. The SOC date is determined accordingly. TMHP must have the MRAN before considering the request for prior authorization.

3.4.2.2 Benefits for Medicare/Medicaid Clients

For eligible Medicare/Medicaid clients, Medicare is the primary coinsurance and providers must contact Medicare first for prior authorization and reimbursement. Medicaid pays the Medicare deductible on Part B claims for qualified home health clients. Home health service prior authorizations may be given for HHA services, certain medical supplies, equipment, or appliances suitable for use in the home in one of the following instances:

- When an eligible Medicaid client (enrolled in Medicare) who does not qualify for Home Health Services under Medicare because SN care, OT, or PT are not a part of the client’s care.
- When the medical supplies, equipment, or appliances are not a benefit of Medicare Part B and are a benefit of Home Health Services.

Federal and state laws require the use of Medicaid funds for the payment of most medical services only after all reasonable measures have been made to use a client’s third party resources or other insurance.

Note: If the client has Medicare Part B coverage, contact Medicare for prior authorization requirements and reimbursement. If the service is a Part B benefit, do not contact TMHP for prior authorization. Texas Medicaid will only pay the coinsurance and deductible on the electronic crossover claim.

TMHP will not prior authorize or reimburse the difference between the Medicare payment and the retail price for Medicare Part B eligible clients.

Refer to: Subsection 4.11, “Third Party Liability (TPL)” in Section 4, “Client Eligibility” (Vol. 1, General Information).
### 3.4.2.3 Medicare and Medicaid Prior Authorization

Contact TMHP for prior authorization of Medicaid services (based on medical necessity and benefits of Home Health Services) within 30 days of the date on the MRAN.

**Note:** For Medicaid qualified Medicare beneficiary (MQMB) clients, do not submit prior authorization requests to TMHP if the Medicare denial reason states “not medically necessary.” Medicaid will only consider prior authorization requests if the Medicare denial states “not a benefit” of Medicare.

Qualified Medicare Beneficiaries (QMB) are not eligible for Medicaid benefits. Texas Medicaid is only responsible for premiums, coinsurance, or deductibles on these clients. Providers should not submit prior authorization requests to the TMHP Home Health Services Prior Authorization Department for these clients.

To ensure that Medicare benefits are used first in accordance with Texas Medicaid regulations, the following procedures apply when requesting Medicaid prior authorization and payment of Home Health Services for clients.

Contact TMHP for prior authorization of Medicaid services (based on medical necessity and benefits of Home Health Services) within 30 days of the date on the MRAN. Fax a copy of the original MRAN and the Medicare appeal review letter to the TMHP Home Health Services Prior Authorization Department for prior authorization.

An MRAN is not required when a client is eligible for Medicare/Medicaid and needs HHA visits only. However, a skilled supervisory nursing visit must be made on the same day as the initial HHA visit and at least every 60 days (on the same day an HHA visit is made) thereafter as long as no skilled need exists. An SN supervisory visit is reimbursable, but an SN visit made for the primary purpose of assessing a client’s nursing care is not. The SOC date will be the date of the first requested Medicare Home Health Services visit as listed on the original MRAN.

**Note:** Claims for STAR+PLUS MQMB clients (those with Medicare and Medicaid) should always be submitted to TMHP as noted on these pages. The STAR+PLUS health plan is not responsible for these services if Medicare denies the service as not a benefit.

When the client is 65 years of age or older or appears otherwise eligible for Medicare (e.g., a person who is blind or disabled), but has no Part A or Part B Medicare, the TMHP Home Health Services Prior Authorization Department uses regular prior authorization procedures. In this situation, the claim is held for a midyear status determined by HHSC. The maximum length of time a claim may be held in a “pending status” for Medicare determination is 120 days. After the waiting period, the claim is paid or denied. If denied, the EOB code on the R&S report indicates that Medicare is to be billed.

**Refer to:** Subsection 3.2.3, “Home Health Skilled Nursing (SN) Services” in this handbook.

### 3.5 Claims Filing and Reimbursement

#### 3.5.1 Claims Information

Providers must use only type of bill (TOB) 331 in Form Locator (FL) 4 of the UB-04 CMS-1450. Other TOBs are invalid and will result in a claim denial. Home Health Services must be submitted to TMHP in an approved electronic format or on a CMS-1500 or a UB-04 CMS-1450 paper claim form. Submit home health DME and medical supplies to TMHP in an approved electronic format, or on a CMS-1500 or on a UB-04 CMS-1450 paper claim form. Providers may purchase CMS-1500 or UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply them.

When completing a CMS-1500 or a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as TMHP does not key information from attachments.

**Refer to:** Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.
Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Section 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (Vol. 1, General Information) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Outpatient claims must have the appropriate revenue code and, if appropriate, the corresponding Healthcare Common Procedure Coding System (HCPCS) code or narrative description. The prior authorization number must appear on the CMS-1500 paper claim form in Block 23 and in Block 63 of the UB-04 CMS-1450 paper claim form. The certification dates or the revised request date on the POC must coincide with the DOS on the claim. Prior authorization does not waive the 95-day filing deadline requirement.

Home health service claims should not be submitted for payment until Medicaid certification is received and a prior authorization number is assigned.

### 3.5.2 Reimbursement

The reimbursement methodology for professional services delivered by home health agencies are statewide visit rates calculated in accordance with 1 TAC §355.8021(a).

Home health agencies are reimbursed for DME and expendable supplies in accordance with 1 TAC §355.8021. Providers can refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com. Providers may also request a hard copy of the fee schedule by contacting the TMHP Contact Center at 1-800-925-9126. DME and expendable supplies other than nutritional products that have no established fee are subject to manual pricing at the documented MSRP less 18 percent or the provider’s documented invoice cost.

For reimbursement, providers should note the following:

- The client’s attending physician must request professional and HHA services through a home health agency, and sign and date the POC.

- Claims are approved or denied according to eligibility, prior authorization status, and medical appropriateness.

- Claims must represent a numerical quantity of one-month for supplies according to the billing requirements.

- SN, HHA, OT, and PT services must be provided through a Medicaid-enrolled home health agency. These services must be billed using the home health agency’s provider identifier. File these services on a UB-04 CMS-1450 claim form.

- OT and PT are always billed as POS 2 (home) and may be prior authorized to be provided in the following locations: home of the client, home of the caregiver/guardian, client’s day care facility, or the client’s school. Services provided to a client on school premises are only permitted when delivered before or after school hours. The only CCP therapy that can be delivered in the client’s school during regular school hours are those delivered by school districts as School Health and Related Services (SHARS) in POS 9.

- DME/supplies must be provided by either a Medicaid enrolled home health agency’s Medicaid/DME supply provider or an independently-enrolled Medicaid/DME supply provider. Both must enroll and bill using the provider identifier enrolled as a DME supplier. File these services on a CMS-1500 claim form.
Note:  Medical social services and speech-language pathology services are available to clients who are 20 years of age and younger and are not a benefit of Home Health Services. These services may be considered a benefit for clients who qualify for CCP.

Texas Medicaid does not reimburse separately for associated DME charges, including but not limited to, battery disposal fees or state taxes. Reimbursement for any associated charges is included in the reimbursement for a specific piece of equipment.

3.5.3 Prohibition of Medicaid Payment to Home Health Agencies Based on Ownership

Medicaid denies Home Health Services claims when TMHP records indicate that the physician ordering treatment has a significant ownership interest in, or a significant financial or contractual relationship with, the nongovernmental home health agency billing for the services. Federal regulation Title 42 CFR §424.22 (d) states that “a physician who has a significant financial or contractual relationship with, or a significant ownership in a nongovernmental home health agency may not certify or recertify the need for Home Health Services care services and may not establish or review a plan of treatment.”

A physician is considered to have a significant ownership interest in a home health agency if either of the following conditions apply:

- The physician has a direct or indirect ownership of five percent or more in the capital, stock, or profits of the home health agency.
- The physician has an ownership of five percent or more of any mortgage, deed of trust, or other obligation that is secured by the agency, if that interest equals five percent or more of the agency’s assets.

A physician is considered to have a significant financial or contractual relationship with a home health agency if any of the following conditions apply:

- The physician receives any compensation as an officer or director of the home health agency.
- The physician has indirect business transactions, such as contracts, agreements, purchase orders, or leases to obtain services, supplies, equipment, space, and salaried employment with the home health agency.
- The physician has direct or indirect business transactions with the home health agency that, in any fiscal year, amount to more than $25,000 or five percent of the agency’s total operating expenses, whichever is less.

When providing CCP services and general Home Health Services, the provider must file these on two separate UB-04 CMS-1450 paper claim forms with the appropriate prior authorization number, and should send them to the appropriate address. Claims denied because of an ownership conflict will continue to be denied unless the home health agency submits documentation indicating that the ordering physician no longer has a significant ownership interest in, or a significant financial or contractual relationship with the home health agency providing services. Documentation should be sent to TMHP Provider Enrollment at the address indicated in the TMHP Telephone and Address Guide (Vol. 1, General Information).

3.5.4 Claims Filing for OT Services

Providers must use the codes listed under subsection 3.5.8, “OT Procedure Codes” of this handbook to submit claims for Title XIX OT services that are provided through a home health agency. Indicate modifier AT (indicating the service procedure is an acute treatment) on each OT procedure code. OT services must be billed on a UB-04 CMS-1450 claim form.
3.5.5 Claims Filing for PT Services
Providers must use the procedure codes listed in subsection 3.5.9, “PT Procedure Codes” of this handbook to submit claims for Title XIX PT services provided through a home health agency. Indicate modifier AT (indicating the service procedure is an acute treatment) on each PT procedure code. PT services must be billed on a UB-04 CMS-1450 claim form.

Refer to: Subsection 2.10, “Therapy Services (CCP)” in the Children’s Services Handbook (Vol. 2, Provider Handbooks) for CCP OT and PT services.

Refer to: Subsection 6.3.5, “Modifiers” in Section 6, “Claims Filing” (Vol. 1, General Information).

3.5.6 OT Limitations
The AT modifier indicates an acute service and must be billed with the appropriate OT procedure codes identifying the therapy service provided. OT services billed without the AT modifier will be denied.

In addition to the AT modifier, the GO modifier must also be billed with all OT procedure codes except evaluation and re-evaluation procedure codes 97003 and 97004.

Providers must use procedure code 97003 when billing for OT evaluations. OT evaluations are payable once every 180 days for any provider. Providers must use procedure code 97004 when billing for OT re-evaluations. OT re-evaluations are payable one time per month for any provider.

An evaluation or re-evaluation performed on the same day as therapy from a different therapy type must be performed at distinctly separate times to be considered for reimbursement.

A client may receive therapy in more than one distinct therapy type in one day when:

- Therapy is rendered at different times
- Reimbursement in any one distinct therapy type does not exceed one evaluation or one re-evaluation

If a therapy evaluation or re-evaluation procedure code and like therapy procedure codes are billed for the same date of service by any provider, the like therapy evaluation or re-evaluation will be denied. OT evaluations (procedure code 97003) or re-evaluations (procedure code 97004) will be denied as part of the following OT procedure codes billed with modifier GO.

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97012 97014 97016 97018 97022 97024 97026 97028 97032 97033</td>
</tr>
<tr>
<td>97035 97039 97110 97112 97116 97124 97139 97140 97150 97530</td>
</tr>
<tr>
<td>97535 97537 97542 97799</td>
</tr>
</tbody>
</table>

3.5.7 PT Limitations
The AT modifier indicates an acute service and must be billed with the appropriate PT procedure codes identifying the therapy service provided. PT services billed without the AT modifier will be denied.

In addition to the AT modifier, the GP modifier must also be billed with all PT procedure codes except evaluation and re-evaluation procedure codes 97001 and 97002.

Providers must use procedure code 97001 when billing for PT evaluations. PT evaluations are payable once every 180 days for any provider. Providers must use procedure code 97002 when billing for PT re-evaluations. PT re-evaluations are payable one time per month for any provider.

An evaluation or re-evaluation performed on the same day as therapy from a different therapy type must be performed at distinctly separate times to be considered for reimbursement.

A client may receive therapy in more than one distinct therapy type in one day when:

- Therapy is rendered at different times.
• Reimbursement in any one distinct therapy type does not exceed one evaluation or one re-evaluation.

If a therapy evaluation or re-evaluation procedure code and like therapy procedure codes are billed for the same date of service by any provider, the like therapy evaluation or re-evaluation will be denied. PT evaluations (procedure code 97001) or re-evaluations (procedure code 97002) will be denied as part of the following PT procedure codes billed with modifier GP.

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97012</td>
</tr>
<tr>
<td>97035</td>
</tr>
<tr>
<td>97535</td>
</tr>
</tbody>
</table>

### 3.5.8 OT Procedure Codes
OT services may be reimbursed using the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97003</td>
</tr>
<tr>
<td>97032</td>
</tr>
<tr>
<td>97150</td>
</tr>
</tbody>
</table>

OT services are billed one visit per day, per therapy, and are reimbursed at the statewide visit rate available on the TMHP web site at www.tmhp.com.

The documentation retained in the client’s file must include the billable start time, billable stop time, total billable minutes, and activity that was performed.

### 3.5.9 PT Procedure Codes
PT services may be reimbursed using the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97001</td>
</tr>
<tr>
<td>97032</td>
</tr>
<tr>
<td>97150</td>
</tr>
</tbody>
</table>

PT services are billed one visit per day, per therapy, and are reimbursed at the statewide visit rate available on the TMHP web site at www.tmhp.com.

The documentation retained in the client’s file must include the billable start time, billable stop time, total billable minutes, and activity that was performed.

### 4. THERAPISTS, INDEPENDENT PRACTITIONERS, AND PHYSICIANS

#### 4.1 Enrollment
To enroll in Texas Medicaid, licensed therapists and physicians must be enrolled in Medicare. The Medicare enrollment requirement is waived for therapists that only provide services to THSteps-eligible clients who are 20 years of age and younger and who do not receive Medicare benefits. These therapists must enroll as individuals.
Refer to: Subsection 8.1.1, “Physicians and Doctors” in the Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for information about physician enrollment requirements.

If providers are currently enrolled with Texas Medicaid or plan to provide regular acute care services to clients with Medicaid coverage, enrollment in CCP is not necessary. All non-CCP therapy services must be billed with the current provider identifier.

Providers cannot be enrolled if their license is due to expire within 30 days of applying. A current license must be submitted.

4.2 Services, Benefits, Limitations, and Prior Authorization

OT, PT, and ST are benefits of Texas Medicaid for an acute condition or an exacerbation of a chronic condition when all of the following criteria are met:

- Treatments are expected to significantly improve the client’s condition in a reasonable and generally predictable period of time, based on the physician’s assessment of the client’s restorative potential.
- Treatments are directed towards restoration of or compensation for lost function.
- Services do not duplicate those provided concurrently by any other therapy.
- Services are provided within the provider’s scope of practice, as defined by state law.

Therapy may be performed by auxiliary personnel under the direct supervision of the physician or the independently practicing therapist.

OT, PT, and ST that is not a benefit of traditional Medicaid may be covered:

- In the physician’s office, or Medicaid-enrolled private therapist’s office for a chronic condition.
- Through the school health and related services (SHARS) program.
- In an outpatient rehabilitation or free-standing rehabilitation facility.
- In a licensed hospital.

In addition, OT, PT, and ST services that are not benefits of traditional Medicaid may be benefits under CCP.

Refer to: Subsection 2.10, “Therapy Services (CCP)” in the Children’s Services Handbook (Vol. 2, Provider Handbooks) for therapy benefits for clients who are 20 years of age and younger.

4.2.1 OT Services

Payment for OT is limited to the treatment of disease for individuals whose ability to function in life roles is impaired. OT can be provided by a physician or occupational therapist and may include physical agents such as massage, electricity, traction, or exercises as forms of therapy. Examples of what may be considered acute are as follows:

- A new injury
- Therapy before or after surgery
- Acute exacerbations of conditions

OT is considered acute for 180 calendar days from the first date (onset) of therapy for a specific condition. Providers may file an appeal for claims denied as being beyond the 180 days of therapy with supporting documentation that the client’s condition has not become chronic and the client has not reached the point of plateauing.

A client may receive therapy in more than one distinct therapy type on the same date of service when the therapy is rendered at different times.
An evaluation or re-evaluation that is performed on the same date of service as a therapy from a different therapy type must be performed at distinctly separate times to be considered for reimbursement.

Claims for OT services must include modifier GO to be considered for reimbursement. Modifier AT must also be submitted with all claims for therapy procedure codes for acute conditions or the claims will be denied. Modifiers are not required for evaluations or re-evaluations.

Reimbursement for OT procedure codes is based on the actual amount of billable time associated with the service. Services for which the unit of service is 15 minutes (1 unit = 15 minutes) must be rounded up or down to the nearest quarter hour. To calculate billing units, count the total number of billable minutes for the calendar day for the client, and divide by 15 to convert to billable units of service. If the total billable minutes are not divisible by 15, the minutes are converted to one unit of service if they are greater than seven and converted to 0 units of service if they are seven or fewer minutes.

For example, 68 total billable minutes divided by 15 equals 4 units plus 8 minutes. Since the 8 minutes are more than 7 minutes, those 8 minutes are converted to one unit. Therefore, 68 total billable minutes = 5 units of service.

Time intervals for 1 through 8 units are identified in the following table:

<table>
<thead>
<tr>
<th>Units</th>
<th>Number of Minutes</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 units</td>
<td>0 minutes through 7 minutes</td>
</tr>
<tr>
<td>1 unit</td>
<td>8 minutes through 22 minutes</td>
</tr>
<tr>
<td>2 units</td>
<td>23 minutes through 37 minutes</td>
</tr>
<tr>
<td>3 units</td>
<td>38 minutes through 52 minutes</td>
</tr>
<tr>
<td>4 units</td>
<td>53 minutes through 67 minutes</td>
</tr>
<tr>
<td>5 units</td>
<td>68 minutes through 82 minutes</td>
</tr>
<tr>
<td>6 units</td>
<td>83 minutes through 97 minutes</td>
</tr>
<tr>
<td>7 units</td>
<td>98 minutes through 112 minutes</td>
</tr>
<tr>
<td>8 units</td>
<td>113 minutes through 127 minutes</td>
</tr>
</tbody>
</table>

The following procedure codes may be reimbursed in 15-minute increments for a combined maximum of eight units (two hours) per day, per therapy type:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97032 97033 97034 97035 97036 97039 97110 97112 97113 97116</td>
</tr>
<tr>
<td>97124 97139 97140 97530 97750 97799</td>
</tr>
</tbody>
</table>

Occupational group therapy procedures involve constant attendance of the physician or therapist, but by definition do not require one-on-one client contact by the physician or therapist. When billing for occupational group therapy, procedure code 97150 must be used for each member of the group.

Procedure code 97150 will be denied when billed on the same date of service by the same provider as procedure code 97750.

Procedure codes 97012, 97014, 97016, 97018, 97022, 97024, 97026, 97028, and 97150 are limited to one per day, per therapy type.

Procedure codes 97535, 97537, and 97542 are only payable for clients who are 20 years of age and younger in an outpatient rehabilitation setting or through CCP.

Evaluation procedure code 97003 is payable once per 180 days, any provider. Re-evaluation procedure code 97004 is payable once per 30 days, any provider.
OT evaluations or re-evaluations (procedure code 97003 or 97004) will be denied when any of the procedure codes in the following table are billed with modifier GO by any provider on the same date of service:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97012</td>
</tr>
<tr>
<td>97034</td>
</tr>
<tr>
<td>97140</td>
</tr>
</tbody>
</table>

The documentation retained in the client’s file must include the billable start time, billable stop time, total billable minutes, and activity that was performed.

**4.2.2 PT Services**

Payment for PT is limited to acute disorders of the musculoskeletal and neuromuscular systems. PT can be provided by a physician or physical therapist and may include physical agents such as massage, electricity, traction, or exercises in the treatment of disease. Examples of what may be considered acute are as follows:

- A new injury
- Therapy before or after surgery
- Acute exacerbations of conditions
- Interventions that result in a change in a client’s condition, such as a newly implanted pump to administer an antispasmodic
- Botulinum toxin type A injections

PT is considered acute for 180 calendar days from the first date (onset) of therapy for a specific condition. Providers may file an appeal for claims denied as being beyond the 180 days of therapy with supporting documentation that the client’s condition has not become chronic and the client has not reached the point of plateauing.

A client may receive therapy in more than one distinct therapy type on the same date of service when the therapy is rendered at different times.

An evaluation or re-evaluation performed on the same date of service as a therapy from a different therapy type must be performed at distinctly separate times to be considered for reimbursement.

Claims for PT services must include modifier GP to be considered for reimbursement. Modifier AT must also be submitted with all claims for therapy procedure codes for acute conditions or the claims will be denied. Modifiers are not required for evaluations or re-evaluations.

Reimbursement for PT procedure codes is based on the actual amount of billable time associated with the service. Services for which the unit of service is 15 minutes (1 unit = 15 minutes) must be rounded up or down to the nearest quarter hour. To calculate billing units, count the total number of billable minutes for the calendar day for the client, and divide by 15 to convert to billable units of service. If the total billable minutes are not divisible by 15, the minutes are converted to one unit of service if they are greater than seven and converted to 0 units of service if they are seven or fewer minutes.

**Refer to:** Subsection 4.2.1, “OT Services” in this handbook for an example of the 15-minute conversion table.
The following procedure codes may be reimbursed in 15-minute increments for a combined maximum of eight units (two hours) per day, per therapy type:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97032</td>
</tr>
<tr>
<td>97124</td>
</tr>
</tbody>
</table>

Physical group therapy procedures involve constant attendance of the physician or therapist, but by definition do not require one-on-one client contact by the physician or therapist. When billing for physical group therapy, procedure code 97150 must be used for each member of the group.

Procedure code 97150 will be denied when billed on the same date of service by the same provider as procedure code 97750.

Procedure codes 97012, 97014, 97016, 97018, 97022, 97024, 97026, 97028, and 97150 are limited to one per day, per therapy type.

Procedure codes 97535, 97537, and 97542 are only payable for clients who are 20 years of age and younger in an outpatient rehabilitation setting or through CCP.

Evaluation procedure code 97001 is payable once per 180 days, any provider. Re-evaluation procedure code 97002 is payable once per 30 days, any provider.

PT evaluations or re-evaluations (procedure code 97001 or 97002) will be denied when any of the procedure codes in the following table are billed with modifier GP by any provider on the same date of service:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97012</td>
</tr>
<tr>
<td>97034</td>
</tr>
<tr>
<td>97140</td>
</tr>
</tbody>
</table>

The documentation retained in the client’s file must include the billable start time, billable stop time, total billable minutes, and activity that was performed.

### 4.2.3 ST and Aural Rehabilitation Services

ST is limited to treatment of conditions of the head or neck which affect speech production. ST may be provided by a physician or speech-language pathologist (SLP). Examples of what may be considered acute are as follows:

- Cerebral vascular accident (CVA)
- Neoplasms of the head or neck
- Open or closed head trauma

ST is considered acute for 180 calendar days from the first date (onset) of therapy for a specific condition. Providers may file an appeal for claims denied as being beyond the 180 days of therapy with supporting documentation that the client’s condition has not become chronic and the client has not reached the point of plateauing.

A client may receive therapy in more than one distinct therapy type on the same date of service when the therapy is rendered at different times.

ST evaluations are performed before the initiation of speech therapy. The speech therapy may be performed by an SLP if the SLP is on staff at the hospital or under the personal supervision of a physician.
Aural rehabilitation is ST used to treat hearing-impaired clients to improve their speech and communication, including but not limited to speech-reading and auditory training with use of hearing devices. An example of what may be “acute” includes but is not limited to placement of a new hearing device. For clients who are 21 years of age and older, aural rehabilitation is limited to a maximum of 12 visits within a six-month period when provided for a client with a new implantable hearing device.

Claims for ST services must include modifier GN to be considered for reimbursement. Modifier AT must also be submitted with all claims for therapy procedure codes for acute conditions or the claims will be denied. Modifiers are not required for evaluations or re-evaluations.

Reimbursement for ST procedure codes is based on the actual amount of billable time associated with the service. Services for which the unit of service is 15 minutes (1 unit = 15 minutes) must be rounded up or down to the nearest quarter hour. To calculate billing units, count the total number of billable minutes for the calendar day for the client, and divide by 15 to convert to billable units of service. If the total billable minutes are not divisible by 15, the minutes are converted to one unit of service if they are greater than seven and converted to 0 units of service if they are seven or fewer minutes.

Refer to: Subsection 4.2.1, “OT Services” in this handbook for an example of the 15-minute conversion table.

Procedure codes 92526 and 92610 may be reimbursed for the treatment and evaluation of swallowing dysfunctions and oral functions for feeding.

Procedure codes 92507, 92508, and 92526 may be reimbursed in 15-minute increments, and are limited to four units (one hour) per day. Procedure codes 92630 and 92633 are limited to a total of two services per day, for different procedures, billed by the same provider.

Speech group therapy procedures involve constant attendance of the physician or therapist, but by definition do not require one-on-one client contact by the physician or therapist.

Evaluation procedure code 92506 is payable once per 180 days, any provider. Re-evaluation procedure code S9152 is payable once per 30 days, any provider. Evaluations and re-evaluations exceeding these limitations may be considered on appeal with supporting medical documentation that a comprehensive evaluation and assessment was provided by a different provider.

ST evaluations or re-evaluations (procedure code 92506 or S9152) will be denied when billed on the same date of service, any provider as procedure codes 92507 and 92508 with modifier GN.

The documentation retained in the client’s file must include the billable start time, billable stop time, total billable minutes, and activity that was performed.

4.2.4 Therapy in a Nursing Facility

Separate payment cannot be made to therapists, independent practitioners, or physicians who provide skilled services to a resident of a nursing facility. These services must be made available to nursing facility residents as needed and must be provided directly by the staff of the facility or furnished by the facility through arrangements with outside qualified resources as part of the daily care. Nursing facilities should refrain from admitting clients who need goal-directed therapy if the facility is unable to provide these services.

4.2.5 Prior Authorization

Authorization is not required for acute therapy.

4.2.6 Noncovered Services

The following services are not a benefit of Texas Medicaid:

- Therapy that exceeds 180 days for clients who are 21 years of age and older
- Application of a modality to one or more areas; hot or cold packs
• Services that are not considered medically necessary. Examples include, but are not limited to the following:
  • Massage therapy that is the sole therapy or is not part of a therapeutic POC to address an acute condition
  • Hippotherapy
  • Treatment solely for the instruction of other agency or professional personnel in the client’s OT, PT, and ST program
  • Separate reimbursement for VitalStim therapy for dysphagia
  • Training in nonessential tasks (e.g., homemaking, gardening, recreational activities, cooking, driving, assistance with finances, and scheduling)
  • Maintenance therapy, including passive range of motion and exercises that are not directed towards restoration of a specific loss of function
  • Emotional support, adjustment to extended hospitalization, or disability behavioral readjustment
  • Therapy prescribed primary as an adjunct to psychotherapy

Note: Therapy that exceeds 180 days may be considered for prior authorization for clients who are birth through 20 years of age through CCP.

4.2.7 Rehabilitative Services
Rehabilitative Services is a program administered by TMHP to nursing facility clients who need rehabilitation. These services must be prior authorized through TMHP before the therapy is provided and paid by TMHP. Covered services include OT, PT, and ST to clients who are eligible for Texas Medicaid, with an acute onset of an illness or injury, with the expectation that function will be improved measurably. For all rehabilitative services inquiries, call Rehabilitative Services at 1-800-792-1109.

4.3 Documentation Requirements
Therapy must be provided by the current written orders of a physician and based on medical necessity. A prescription is considered current when it is signed and dated on or no later than 60 days before the start of therapy.

The physician must maintain documentation of medical necessity including the treatment plan and therapy evaluation or re-evaluation in the client’s medical record. The date, time, and length of services provided must be documented and maintained in the client’s medical record. The physician’s original dated signature copy must be kept in the physician medical record for the client.

If a client discontinue therapy with a provider and a new provider begins therapy, submission of a new plan of care and documentation of the last therapy visit with the previous provider is required, along with a letter from the client, parent, or guardian stating the date therapy ended with the previous provider.

4.4 Claims Filing and Reimbursement

4.4.1 Claims Information
The Medicaid rates for therapists, independent practitioners, and physicians are calculated in accordance with 1 TAC §355.8081 and §355.8085. Providers can refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com.

Therapy services must be submitted to TMHP in an approved electronic format or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms. Claims may be filed electronically in a CMS-1500 format as long as the nine-digit prior authorization number is reflected in the equivalent electronic field.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Subsection 6.4, "Claims Filing Instructions" in Section 6, "Claims Filing" (Vol. 1, General Information) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in Section 6, “Claims Filing” (Vol. 1, General Information). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

5. CLAIMS RESOURCES

6. CONTACT TMHP

The TMHP Contact Center at 1-800-925-9126 is available Monday–Friday from 7 a.m. to 7 p.m., Central Time.

7. FORMS
# Home Health Plan of Care (POC) Instructions

## Client Information
- **Client’s name**: Last name, first name, middle initial
- **Date of birth**: Date of birth given by month, day and year
- **Date last seen by doctor**: Client must be seen by a physician within 30 days of the initial start of care and at least once every 6 months thereafter unless a diagnosis has been established by the physician and the client is currently undergoing physician care and treatment.
- **Medicaid number**: Nine-digit number from client’s current Medicaid identification card.

## Home Health Agency Information
- **Name**: Name of Home Health agency
- **License number**: Medical license number issued by the state of Texas
- **Address**: Agency address given by street, city, state and ZIP code
- **Telephone**: Area code and telephone number of agency
- **TPI**: Texas Provider Identifier number (10-digit) of agency
- **NPI**: National Provider Identifier number (10-digit) of agency
- **Taxonomy**: Ten-character Taxonomy code showing service type, classification, and specialization of the medical service provided by the agency
- **DME TPI**: Texas Provider Identifier number (10-digit) of agency DME

## Physician Information
- **Name**: Name of physician
- **License number**: Physician’s medical license number issued by the state of Texas
- **Telephone**: Area code and telephone number of physician
- **TPI**: Texas Provider Identifier number (10-digit) of physician
- **NPI**: National Provider Identifier number (10-digit) of physician

## Plan of Care Information
- **Status**: Indicate with a check mark if POC is for a new client, extension (services need to be extended for an additional 60 day period) or a revised request
- **Original SOC date**: First date of service in this 365 day benefit period
- **Revised request effective date**: Date revised services, supplies or DME became effective
- **Services client receives from other agencies**: List other community or state agency services client receives in the home. Examples: primary home care (PHC), community based alternative (CBA), etc.
- **Diagnoses**: Diagnosis related to ordered home health services. For reimbursement, diagnoses must match those listed on the claim and be appropriate for the services ordered (Include ICD-9 code if OT/PT is ordered)
- **Functional Limitations/Permitted Activities**: Include on revised request only if pertinent
- **Prescribed medications**: List medications, dosages, routes, and frequency of dosages (Include on revised request if applicable)
- **Diet Ordered**: Examples: Regular, 1200 cal. ADA, pureed, NG tube feedings, etc. (Include on revised request if applicable)
- **Mental Status**: Examples: alert and oriented, confused, slow to learn, etc. (include on revised request if applicable)
- **Prognosis**: Examples: good, fair, poor, etc. (include on revised request if applicable)
- **Rehabilitation potential**: Potential for progress, examples: good, fair, poor, etc. (include on revised request if applicable)
- **Safety precautions**: Examples: oxygen safety, seizure precautions, etc. (include on revised request if applicable)
- **Medical necessity, clinical condition, treatment plan**: Describe medical reason for all services ordered, nursing observations pertinent to the plan of care, and the proposed plan of treatment. For PT, list specific modalities and treatments to be used.
- **SNV, HHA, OT, PT visits requested**: State the number of visits requested for each type of service authorized
- **Supplies**: List all supplies authorized
- **DME**: List each piece of DME authorized, check whether DME is owned, if DME is to be repaired, purchased, or rented, and for what length of time the equipment will be needed
- **RN signature**: The signature and date this form was filled out and completed by the RN
- **From and To dates**: Dates (up to 60 days) of authorization period for ordered home health services
- **Conflict of Interest Statement**: Relevant to the physician signing this form; physician should check box if exception applies.
- **Physician signature, Date signed, Printed physician name**: The physician’s signature and the date the form was signed by the physician ordering home health services, and the physician’s printed name

---

Home Health Prior Authorization Checklist

Contact Medicaid Home Health Services at 1-800-925-8957

To facilitate the authorization process, the home health agency nurse must have completed the following tasks before contacting TMHP for prior authorization of home health services:

- Completion of this optional form
- Evaluation of the client in the home (preferably by the same nurse requesting services)

PLEASE DO NOT SUBMIT THIS FORM TO TMHP.

Date: ____________________ Agency Nurse Name: ____________________
Client Medicaid Number: _______________ Client Name: ____________________
Client Medicare Number: _______________ Date Last Seen by Physician: ____________________
Start of Care Date: ____________________ Date of Last Hospitalization: ____________________
Date of Home Evaluation: ________________
Diagnoses: ____________________________________________________________________________

(If OT/PT is requested, please provide ICD-9-CM diagnosis codes)

Skilled Nursing functions to be provided: _____________________________________________________

Effective Date_01012009/Revised Date_02222011
### General Instructions

This form must be completed and signed as outlined in the instructions below before DME/medical supplies providers contact TMHP Home Health Services for prior authorization.

Either the DME supplier/Medicaid provider or the prescribing physician may initiate the form. This completed form must be retained in the records of both the DME supplier/medical provider and the prescribing physician, and is subject to retrospective review. This form becomes a prescription when the physician has signed section B.

**Note:** This form cannot be accepted beyond 90 days from the date of the prescribing physician’s signature.

The supplier or prescribing physician can complete Section A. Include the most appropriate procedure code description using the Healthcare Common Procedure Coding System (HCPCS). In addition, include the appropriate quantity and the manufacturer’s suggested retail price (MSRP) if the item requires manual pricing. A price is not required for those items with a maximum fee listed in the Texas Medicaid Fee Schedule. The appropriate box must be completed to indicate whether this section was completed by the physician or the supplier. If the item requested is beyond the quantity limit or a custom item, additional documentation must be provided to support determination of medical necessity.

All fields must be filled out completely. The prescribing physician’s TPI (if a Texas Medicaid provider), NPI, and license number must be indicated.

### Section A: Requested Durable Medical Equipment and Supplies

The supplier or prescribing physician can complete Section A. Include the most appropriate procedure code description using the Healthcare Common Procedure Coding System (HCPCS). In addition, include the appropriate quantity and the manufacturer’s suggested retail price (MSRP) if the item requires manual pricing. A price is not required for those items with a maximum fee listed in the Texas Medicaid Fee Schedule. The appropriate box must be completed to indicate whether this section was completed by the physician or the supplier. If the item requested is beyond the quantity limit or a custom item, additional documentation must be provided to support determination of medical necessity.

Physicians must indicate their professional license number. If the prescribing physician is out of state, the physician must provide the license number and state of professional licensure. Texas Medicaid TPI and UPIN numbers are not acceptable as licensure. The Addendum to the Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form must be used when prescribing more than 5 items. The Addendum to the Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form must accompany the Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form.

**Note:** Addendums received without this form will not be accepted.

**Reminder:** Home health services are not a benefit for clients residing in a nursing facility, hospital, or intermediate care facility.

**Note for DME:** The DME company must also complete the DME Certification and Receipt Form. All equipment is to be assembled, installed, and used pursuant to the manufacturer’s instructions and warning.

---

Effective Date_10/21/2008/Revised Date_12/02/2010
Section B: Diagnosis and Medical Information

Section B is a prescription for DME/supplies and must be filled out by the prescribing physician.

The prescribing physician must indicate the corresponding item number requested from Section A, appropriate ICD-9 code with a brief description, and complete justification for determination of medical necessity for the requested item(s). If applicable, include height/weight, wound stage/dimensions and functional/mobility.

**The physician is not required to repeat the procedure code or description of the requested DME or supplies in this section.**

**Note:** The date last seen must be within the past 12 months.

The prescribing physician must indicate the duration of need for the prescribed supplies/DME. The estimated duration of need must specify the amount of time the supplies/DME will be needed, such as six weeks, three months, lifetime, etc. The prescribing physician’s TPI (if a Texas Medicaid provider), NPI, and license number must be indicated.

**Note:** Signatures from nurse practitioners, physician assistants, and chiropractors will not be accepted. Signature stamps and date stamps are not acceptable.

### Diagnosis and Medical Need Information

<table>

<td></td>
</tr>
</tbody>
</table>

2. Each item requested in Section A must have a correlating diagnosis and medical necessity justification.  
Enter all Item numbers from the table in Section A that pertain to each diagnosis.

If applicable, include height/weight, wound stage/dimensions and functional/mobility status in table below.

<table>
<thead>
<tr>
<th>Height</th>
<th>Weight</th>
<th>Wound stage/dimensions</th>
<th>Functionality/mobility status</th>
</tr>
</thead>
</table>

Note: The "Date last seen" and "Duration of need" items below must be filled in.

Date last seen by physician:  
Duration of need for DME: ____________ month(s)  
Duration of need for supplies: ____________ month(s)

By signing this form, I hereby attest that the information completed in Section "A" is consistent with the determination of the client's current medical necessity and prescription. By prescribing the identified DME and/or medical supplies, I certify the prescribed items are appropriate and can safely be used in the client's home when used as prescribed.

Signature and attestation of prescribing physician:  
Date:  

Signature stamps and date stamps are not acceptable.

Prescribing physician's license number:  
Prescribing physician's TPI:  
☐ Check if all of the information in Section A was complete at the time of the prescribing provider signature.

Effective Date: 10/21/2008  Revised Date: 10/21/2008
Special Medical Prior Authorization (SMPA) Request Form

Use only for requests submitted to the TMHP-SMPA department. Mail completed form to the TMHP Special Medical Prior Authorization at 12357-B Riata Trace Parkway Ste. 150, Austin, TX 78727 or fax to 1-512-514-4213.

**Index** .................................................................................. OP-67

*Note:* A comprehensive Index, including Volume 1 and all handbooks from Volume 2, is included at the end of Volume 1 (General Information).
1. GENERAL INFORMATION

This information is intended for ambulatory surgical centers (ASCs), hospital ambulatory surgical centers, (HASCs), Federally Qualified Health Centers (FQHCs) renal dialysis facilities, Rural Health Clinics (RHCs) and tuberculosis (TB) clinics. This handbook provides information about Texas Medicaid’s benefits, policies and procedures applicable to these providers.

**Important:** All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1617(a)(6)(A). Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.

1.1 National Drug Codes (NDC)

2. AMBULATORY SURGICAL CENTER AND HOSPITAL AMBULATORY SURGICAL CENTER

2.1 Enrollment

To enroll in Texas Medicaid, an ASC must do the following:

- Meet and comply with applicable state and federal laws, rules, regulations, and provisions of the state plan under Title XIX of the Social Security Act
- Be enrolled in Medicare
- Meet and comply with state licensure requirements for ASCs

Providers cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

All hospitals enrolling in Texas Medicaid (except psychiatric and rehabilitation hospitals) are issued an ASC provider number at the time of enrollment.

An out-of-state provider may enroll in Texas Medicaid if it is the customary or general practice for clients in a particular locality to use medical resources in another state. An out-of-state provider located within 50 miles of the Texas border is automatically considered to meet this criterion.
Refer to: Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for more information about enrollment procedures.

Section 8: Managed Care (Vol. 1, General Information).

2.2 Services/Benefits, Limitations, and Prior Authorization

ASCs, both freestanding and hospital-based, provide same day elective surgery for clients who do not require a hospital admission and who are not expected to require extensive postoperative care.

2.2.1 American Society of Anesthesiologists (ASA) Physical Status and New York Heart Association Heart Disease Classifications

A client with either an ASA Classification of Physical Status of I (P1) or II (P2), or New York Heart Association Functional Classification of Heart Disease I, II, or III is considered suitable for ASC or HASC care. Clients with an ASA Classification of Physical Status of III (P3), IV (P4), or V (P5) or New York Heart Association Functional Classification of Heart Disease IV should be considered for inpatient status.

The description of ASA classes is as follows:

- **Class I.** A normal, healthy patient, without organic, physiologic, or psychiatric disturbance.
- **Class II.** A patient with mild systemic disease, controlled medical conditions without significant systemic effects.
- **Class III.** A patient exhibiting severe systemic disturbance that may or may not be associated with the surgical complaint and that seriously interferes with the patient’s activities.
- **Class IV.** A patient exhibiting extreme systemic disturbance that may or may not be associated with the surgical complaint that interferes with the patient’s regular activities, and that has already become life-threatening.
- **Class V.** The rare person who is moribund (in a dying state) before operation, whose preoperative condition is such that he or she is expected to die within 24 hours even though not subjected to the additional strain of the operation.

Heart Disease classifications are described below:

- **Class I.** No limitation of physical activity. Ordinary physical activity does not cause undue fatigue, palpitation, dyspnea, or anginal pain.
- **Class II.** Slight limitation of physical activity. Comfortable at rest, but ordinary physical activity results in fatigue, palpitation, dyspnea, or anginal pain.
- **Class III.** Marked limitation of physical activity. Comfortable at rest, but less than ordinary activity causes fatigue, palpitation, dyspnea, or anginal pain.
- **Class IV.** Unable to carry on any physical activity without discomfort. Symptoms of cardiac insufficiency, or of the anginal syndrome, may be present even at rest. If any physical activity is undertaken, discomfort occurs.

If a client is admitted for day surgery, whether scheduled or emergency, and has either an ASA Classification of Physical status of III, IV, or V, or Classification of Heart Disease IV, the procedure may be considered an inpatient procedure and should be submitted on an inpatient claim. The reason for the surgery (principal diagnosis), any additional substantiated conditions, and the procedure must be included on the inpatient claim form.
2.2.2 Drugs and Supplies

Outpatient prescribed medications are a benefit to eligible clients when obtained through a pharmacy contracted with the Medicaid Vendor Drug Program. Prescribed take-home supplies are a benefit to eligible clients when obtained through Medicaid durable medical equipment (DME).

Refer to: Appendix B: Vendor Drug Program (Vol. 1, General Information) for information about outpatient prescription drugs and the Medicaid Vendor Drug Program.

Subsection 2.2.3, “Medical Supplies” in Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks).

2.2.3 Incomplete Surgical Procedures

When an ASC or HASC bills Texas Medicaid for an incomplete surgical procedure, one of the following must be included on the claim:

- Modifier 73 for a discontinued outpatient procedure prior to anesthesia administration
- Modifier 74 for a discontinued outpatient procedure after anesthesia administration
- At least one of the following diagnosis codes: V641, V642, or V643

Claims that are submitted with diagnosis code V641, V642, or V643 or with modifier 73 or 74 are suspended for review of the medical documentation that was submitted with the claim. Providers must submit the operative report, the anesthesia report, and state why the operation was not completed.

Reimbursement to ASC and HASC facilities for canceled or incomplete surgeries because of patient complications is made according to the following criteria, based on the extent to which the anesthesia or surgery proceeded:

- Reimburse at 0 percent of ASC group payment schedule for a procedure that is terminated for nonmedical or medical reasons before the facility has expended substantial resources
- Reimburse at 33 percent of ASC group payment schedule up to the administration of anesthesia
- Reimburse at 67 percent of ASC group payment schedule after the administration of anesthesia but before incision
- Reimburse at 100 percent of ASC group payment schedule after incision

Surgeries canceled because of incomplete preoperative procedures are not reimbursed.

2.2.4 Complications Following Day Surgery

If a condition of the scheduled day surgery requires additional care beyond the recovery period, the client may be placed in outpatient observation (stay less than 48 hours). The observation period must be submitted as an outpatient claim.

If the client requires inpatient admission following the observation stay, the admission date for the inpatient claim is the date that the client was placed in observation. All charges for services provided from the time of observation placement (excluding the surgical procedure) should be included on the inpatient claim. The principal diagnosis to be used on the inpatient claim is the complication of the surgery that necessitated the extended stay. The day surgery procedure must be submitted as an outpatient procedure.

If a complication occurs for which the client requires inpatient admission immediately following the day surgery (no observation period), the day surgery must be submitted as an outpatient procedure. The inpatient admission is to be submitted as an inpatient claim. The principal diagnosis to be used on the inpatient claim is the complication of the surgery that necessitated the extended stay. The day surgery procedure should not be included on the inpatient claim. The inpatient admission must be medically necessary and is subject to retrospective review.
2.2.5 Planned Admission for Day Surgery
Inpatients may occasionally require a surgery that has been designated as an outpatient procedure. The physician must document the need for this surgery as an inpatient procedure before the procedure is performed. These claims are subject to retrospective review.

2.2.6 Cochlear Implants
A cochlear implant is a benefit of Texas Medicaid when medically indicated. ASC and HASC providers may be reimbursed for the implantation procedure using procedure code 69930, and for the cochlear implant devices using procedure code L8614.

2.2.7 Colorectal Cancer Screening
Procedure codes G0104 and G0105 are benefits of Texas Medicaid in the ASC or HASC setting. Procedure code G0104 is limited to diagnosis codes V1090, V1272, V7650, V7651, V7652, or V700. Procedure code G0105 is limited to the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>5550</td>
</tr>
<tr>
<td>5563</td>
</tr>
<tr>
<td>V1006</td>
</tr>
</tbody>
</table>

Authorization is not required for colorectal cancer screening.

Refer to: Subsection 8.2.13.5, “Colorectal Cancer Screening” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks).

2.2.8 Dental Therapy Under General Anesthesia
Facilities must use procedure code 41899 with modifier EP to submit claims for dental therapy under general anesthesia. Prior authorization is not required for ASCs and HASCs unless the client is enrolled in a Medicaid managed care organization.

Refer to: Subsection 4.2.22, “Dental Therapy Under General Anesthesia” in Children’s Services Handbook (Vol. 2, Provider Handbooks)
Subsection 4.1.6, “Medicaid Managed Care Enrollment” in Children’s Services Handbook (Vol. 2, Provider Handbooks)

2.2.9 Electrodagnostic (EDX) Testing
Electromyography (EMG) and nerve conduction studies (NCS), collectively known as EDX testing may be reimbursed to ASCs and HASCs. Testing must be medically indicated and performed using EDX equipment that provides assessment of all parameters of the recorded signals. Studies performed with devices designed only for screening purposes rather than diagnoses are not a benefit of Texas Medicaid.

EMG and NCS studies are diagnosis restricted and may require prior authorization.

2.2.10 Fluocinolone Acetonide

The fluocinolone acetonide (Retisert) intravitreal implant (procedure code J7311) will be considered for reimbursement for outpatient hospitals. Procedure code 67027 for implantation may be reimbursed to HASCs. This benefit is limited to clients who are 12 years of age and older and requires prior authorization.

Fluocinolone acetonide is payable only if there is a posterior uveitis diagnosis (diagnosis code 36320) of more than 6 months in duration and the condition has been unresponsive to oral or systemic medication treatment. To request prior authorization, providers must submit requests to the Special Medical Prior Authorization Department at:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway
Austin, TX 78727
Fax: 1-512-514-4213

Requests for prior authorization can be submitted online through the TMHP website at www.tmhp.com.

Refer to: Form OP.3, “Special Medical Prior Authorization (SMPA) Request Form” in this handbook.

2.2.11 Implantable Infusion Pumps

Procedure codes E0782 and E0783 are a benefit of Texas Medicaid if a medical necessity exists. Implantable infusion pumps may be medically necessary in the following circumstances:

- Intrathecal administration of anti-spasmodic drugs to treat chronic intractable spasticity
- Administration of opioid drugs for treatment of severe chronic intractable pain
- Administration of intrahepatic chemotherapy in colorectal cancer with liver metastases
- Administration of intra-arterial chemotherapy in head and neck cancers

Procedure codes E0782 and E0783 may be reimbursed separately from the global fee. Prior authorization requests for implantable infusion pumps must be submitted to the Special Medical Prior Authorization Department.

2.2.12 Stereotactic Radiosurgery

Procedure codes 61795 and S8030 are payable to ASC and HASC facilities. Prior authorization is required.

2.2.13 Brachytherapy

The following procedure codes are payable to ASC and HASC facilities:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>19296</td>
</tr>
</tbody>
</table>

Prior authorization is not required for brachytherapy services.

Refer to: Subsection 8.2.61, “Radiation Therapy” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks).
2.2.14 Neurostimulators

Neurostimulators are a benefit of Texas Medicaid when medically necessary. All procedures require prior authorization.

The following procedure codes are payable to ASCs and HASCs:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>61850 61860 61863 61864 61867 61868 61870</td>

</tbody>
</table>

Neurostimulator devices may be reimbursed separately from the global fee.

2.2.15 Prior Authorization

Some procedures require the performing provider to obtain prior authorization. When prior authorization is required, providers can mail or fax the request to:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway
Austin, TX 78727
Fax: 1-512-514-4213

Requests for prior authorization can be submitted online through the TMHP website at www.tmhp.com.

2.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including ASC and HASC services. ASC and HASC services are subject to retrospective review and recoupment if documentation does not support the service submitted for reimbursement.

2.4 Claims Filing and Reimbursement

2.4.1 Claims Information

Freestanding ASC claims must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form. Hospital-based ASCs must submit claims to TMHP in an approved electronic claims format or on a UB-04 CMS-1450 paper claim form.

Claims must contain the billing provider’s complete name, address, and a provider identifier. When completing a UB-04 CMS-1450 or a CMS-1500 paper claim form, providers must include all required information on the claim; TMHP does not key any information from claim attachments. Providers must purchase UB-04 CMS-1450 and CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply them.

Scheduled procedures performed in a HASC must be submitted for reimbursement using the HASC provider identifier with TOB 131. Emergency or unscheduled procedures performed in a hospital when the client is an outpatient must be submitted for reimbursement using the hospital provider identifier with TOB 31.
To submit claims for services performed by certified registered nurse anesthetists (CRNAs), an ASC must enroll as a CRNA group provider and indicate the CRNA performing provider identifier on claims for those services.

**Refer to:** Section 3, “Certified Nurse Midwife (CNM),” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (Vol. 2, Provider Handbooks) for specific billing instructions for CRNA services.

Section 6: Claims Filing (*Vol. 1, General Information*).

Section 13, “Claim Form Examples,” in this handbook.

### 2.4.2 Reimbursement

Reimbursement of ASC and HASC procedures is based on the Centers for Medicare & Medicaid Services (CMS)-approved Ambulatory Surgical Code Groupings (1 through 9 per CMS and Group 10 per HHSC) payment schedule. When multiple surgical procedures are performed on the same day, only the procedure with the highest surgical code grouping is reimbursed. A complete list of approved ASC and HASC procedure codes with the assigned payment group can be found on the TMHP website at www.tmhp.com. Click on Fee Schedules. This list can also be obtained by calling the TMHP Contact Center at 1-800-925-9126.

Claims for physician and CRNA services performed in an ASC or HASC must be submitted under the physician or CRNA provider identifier and are reimbursed separately.

Effective for dates of service on or after September 1, 2010, Texas Medicaid implemented a 1-percent reduction in the final payment amounts for inpatient, professional, and outpatient services. Inpatient hospitals that are reimbursed according to the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA), i.e., children’s and state teaching hospitals, are excluded from the 1-percent reimbursement reduction.

#### 2.4.2.1 ASC and HASC Global Services

The ASC or HASC payment represents a global payment and includes room charges and supplies. Covered services provided are submitted as one inclusive charge. All facility services provided in conjunction with the surgery (e.g., laboratory, radiology, anesthesia supplies, medical supplies) are considered part of the global payment and cannot be itemized or submitted separately.

Routine X-ray and laboratory services directly related to the surgical procedure being performed are not reimbursed separately. All nonroutine laboratory and X-ray services provided with emergency conditions may be submitted separately with documentation that the complicating condition arose after the initiation of the surgery.

Medical and prosthetic devices such as intraocular lenses may be supplied by the ASC or HASC and implanted, inserted, or otherwise applied during a covered surgical procedure and is considered part of the global surgical fee.

**Exception:** Certain pieces of equipment, (e.g., cochlear implants, implantable infusion pumps, and neurostimulator devices) may be reimbursed separately from the ASC or HASC global rate.

**Refer to:** Subsection 2.2, “Reimbursement Methodology” in Section 2, “Texas Medicaid Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

Subsection 2.3.3.9, “Day Surgery” in *Hospital Services Handbook* (Vol. 2, Provider Handbooks) for information about hospital-based ambulatory surgical centers.
3. BIRTHING CENTER

3.1 Provider Enrollment

A birthing center is a place, facility, or institution where a woman is scheduled to give birth following a normal, uncomplicated (low-risk) pregnancy. This term does not include a hospital, an ambulatory surgical center, or the residence of the woman giving birth.

A birthing center must be licensed as a birthing center by the Department of State Health Services (DSHS) and meet the minimum standards as required by the Texas Health and Safety Code, Chapter 244.010. To enroll in Texas Medicaid, a birthing center must be licensed to provide a level of service commensurate with the professional services of a doctor of medicine (MD), doctor of osteopathy (DO), or certified nurse-midwife (CNM) who acts as birth attendant. Texas Medicaid may reimburse birthing center providers only for those services that the attending physician or CNM determines to be reasonable and necessary for the care of the mother or newborn child.

Providers cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

Birthing centers are encouraged to refer clients for Texas Health Steps (THSteps) services.

Refer to: Section 1: Provider Enrollment and Responsibilities (Vol. 1, General Information) for more information about enrollment procedures.

Refer to: Section 2, “Medicaid Title XIX family planning services,” in the Gynecological and Reproductive Health, Obstetrics, and Family Planning Services Handbook (Vol. 2, Provider Handbooks) for information on setting up referral procedures for family planning services.

Refer to: DSHS website (www.dshs.state.tx.us/famplan/) for information about family planning and the locations of family planning clinics receiving Title V, X, or XX funding from DSHS.

Refer to: Subsection 8.2.44.10.1, “HIV Testing” in the Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for information about required HIV testing for pregnant women.

3.1.1 Medicaid Managed Care Enrollment

Birthing centers may be eligible to enroll in Medicaid managed care as primary care providers (PCPs). Contact the individual Medicaid managed care health plans for enrollment information.

3.2 Services/Benefits, Limitations, and Prior Authorization

Birthing centers may only be reimbursed by Texas Medicaid for their facility labor and delivery services using the following procedure codes:

<table>
<thead>
<tr>
<th>Service</th>
<th>Procedure Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>Delivery</td>
<td>59409</td>
</tr>
<tr>
<td>Hospital evaluation and management</td>
<td>99221</td>
</tr>
<tr>
<td>Labor only</td>
<td>S4005</td>
</tr>
</tbody>
</table>

3.2.1 Newborn Hearing Screening

The Texas Health and Safety Code, Chapter 47, requires birthing centers to offer all newborns a hearing screening as a part of the obstetrical care at delivery.
Refer to: Subsection 5.3.1.8, “Newborn Examination” in the Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information about the newborn hearing screening.

Subsection 2.2.2.3, “Abnormal Hearing Screening Results” in the Vision and Hearing Services Handbook (Vol. 2, Provider Handbooks) for more information about abnormal hearing screens.

### 3.2.2 Newborn Eligibility Process

If the mother of the newborn is eligible for Medicaid, the newborn may be assigned his or her own Medicaid number. The birthing center must complete form GN.4, “Birthing Center Report (Newborn Child or Children) (Form 7484)” to provide information about each child born to a mother who is eligible for Medicaid.

Refer to: Form OP.1, “Newborn Child or Children (Form 7484)” in this handbook.

If the newborn’s name is known, the name must be on the form. The use of “Baby Boy” or “Baby Girl” delays the assignment of a number.

The form must be completed by the birthing center no later than five days after the child’s birth. Birthing centers that submit the birth certificate information using the DSHS, Vital Statistics Unit (VSU) Texas Electronic Registrar for Birth software and the HHSC Form 7484 receive a rapid and efficient assignment of a newborn Medicaid identification number. This process expedites reimbursement to hospitals and other providers that are involved in the care of the newborn.

Additional information about obtaining a newborn Medicaid identification number can be found on the agency website at www.hhsc.state.tx.us/medicaid/mc/proj/newid/newid.html. Providers may also call 1-888-963-7111, Ext. 7368 or 1-512-458-7368 for additional information or comments about this process.

Upon receipt of a completed 7484 form, DSHS verifies the mother’s eligibility and, within 10 days of the receipt, sends notification letters to the hospital or birthing center, attending physician (if identified), mother, and caseworker. The notice includes the child’s Medicaid identification number and the effective date of coverage. After the child has been added to the eligibility file, DSHS issues a Medicaid Identification Form (Form H3087) to the client.

**Note:** Primary Care Case Management (PCCM) clients have up to 105 days to select a PCP for their newborns. If a client does not make a selection within the specified time period, a PCP will be assigned.

The attending physician’s notification letter is sent to the address on file (by license number) at the Texas Medical Board. This address must be kept current to ensure timely notification. Physicians must submit address changes to the following address:

Texas Medical Board  
Customer Information, MC-240  
PO Box 2018 Austin, TX 78767-2018

**Note:** When submitting a claim for a Medicaid Managed Care client, providers must follow the client’s health plan guidelines for newborn billing.

### 3.2.3 Prior Authorization

Prior authorization is not required for services rendered in birthing centers.

### 3.2.4 Services Rendered in the Birthing Center Setting

Maternity clinic, physician, CNM, nurse practitioner (NP), clinical nurse specialist (CNS), and physician assistant (PA) providers who render prenatal or family planning services in the birthing center setting must submit separate claims.
3.3 Documentation Requirements
All services require documentation to support the medical necessity of the service rendered.

Birthing center services are subject to retrospective review and recoupment if documentation does not support the service billed.

3.4 Claims Filing and Reimbursement
3.4.1 Claims Information
Claims for birthing center services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 paper claim form, providers must include all required information on the claim, as TMHP does not key any information from attachments. Superbills or itemized statements are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (Vol. 1, General Information) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

3.4.2 Reimbursement
Birthing centers are reimbursed in accordance with 1 TAC §355.8181. See the applicable fee schedule on the TMHP website at www.tmhp.com.

4. COMPREHENSIVE HEALTH CENTER (CHC)
CHCs or physician-operated clinics are funded by federal grants. To apply for participation in Texas Medicaid, they must be certified and participate as health centers under Medicare (Title XVIII).

CHC claims are paid according to each center’s encounter rates as established by CMS. Medicaid payments to CHCs are limited to Medicare deductibles and coinsurance. CHC providers that supply laboratory services in an office setting must comply with the rules and regulations for the Clinical Laboratory Improvement Amendments (CLIA). Providers that do not comply with CLIA are not reimbursed for laboratory services.

Refer to: Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in Radiology, Laboratory and Physiological Lab Services Handbook (Vol. 2, Provider Handbooks).

Section 1: Provider Enrollment and Responsibilities (Vol. 1, General Information).

Section 5, “Federally Qualified Health Center (FQHC),” in the Handbook.

Section 8, “Rural Health Clinic,” in this Handbook.
5. FEDERALLY QUALIFIED HEALTH CENTER (FQHC)

5.1 Enrollment

To enroll in Texas Medicaid, an FQHC must be receiving a grant under Section 329, 330, or 340 of the Public Health Service Act or designated by the U.S. Department of Health and Human Services (HHS) to have met the requirements to receive this grant. FQHCs and their satellites are required to enroll in Medicare to be eligible for Medicaid enrollment. The CMS has granted a waiver for the Medicare prerequisite at the time of initial enrollment of FQHC parents and satellites. FQHC look-alikes are not required to enroll in Medicare but may elect to do so to receive reimbursement for crossovers.

Refer to: Subsection 5.4.2.1, “Medicare-Medicaid Crossover Claims Pricing” in this handbook.

A copy of the Public Health Service’s Notice of Grant Award reflecting the project period and the current budget period must be submitted with the enrollment application. A current notice of grant award must be submitted to TMHP Provider Enrollment annually.

FQHCs are required to notify TMHP of all satellite centers that are affiliated with the parent FQHC and their actual physical addresses. All FQHC satellite centers billing Texas Medicaid for FQHC services must also be approved by the United States Department of Health and Human Services Health Resources and Services Administration (HRSA). For accounting purposes, centers may elect to enroll the HRSA-approved satellites using a Federally Qualified Satellite (FQS) provider identifier that ties back to the parent FQHC provider identifier and tax ID number (TIN). This procedure allows for the parent FQHC to have one provider agreement and one cost report that combines all costs from all approved satellites and the parent FQHC. If an approved satellite chooses to submit claims to Texas Medicaid directly, the center must have a provider identifier separate from the parent FQHC and will be required to file a separate cost report.

All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in 1 TAC §371.1617(a)(6)(A). Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.

FQHC providers do not need to apply for a separate physician or agency number to provide family planning services.

Refer to: Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for more information about enrollment procedures.

5.1.1 Initial Cost Reporting

New FQHCs must file a projected cost report within 90 days of their designation as an FQHC to establish an initial payment rate. The cost report will contain the FQHC’s reasonable costs anticipated to be incurred during the FQHC’s initial fiscal year. The FQHC must file a cost report within 5 months of the end of the FQHC’s initial fiscal year. The cost settlement must be completed within 11 months of the receipt of a cost report. The cost per visit rate established by the cost settlement process will be the base rate. Any subsequent increases will be calculated as provided herein.
FQHC providers are required to submit a copy of their Medicare-audited cost report for the provider’s fiscal year within 30 days of receipt from Medicare to:

Texas Medicaid & Healthcare Partnership
Medicaid Audit
PO Box 200345
Austin, TX 78720-0345

A new FQHC location established by an existing FQHC participating in Texas Medicaid will receive the same effective rate as the FQHC establishing the new location. An FQHC establishing a new location may request an adjustment to its effective rate as provided herein if its costs have increased as a result of establishing a new location.

Refer to: Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for more information about enrollment procedures.

Section 8: Managed Care (Vol. 1, General Information) for more information.

5.2 Services/Benefits, Limitations, and Prior Authorization

The services listed in the tables below may be reimbursed to FQHCs using the National Provider Identifier (NPI). Any additional services must be submitted for reimbursement using the provider’s Medicaid provider identifier.

<table>

</tbody>
</table>
Refer to: Subsection 6.3.5, “Modifiers” in Section 6, “Claims Filing” (Vol. 1, General Information) for a definition of modifiers.

Section 5, “Licensed Clinical Social Worker (LCSW), Licensed Marriage and Family Therapist (LMFT), and Licensed Professional Counselor (LPC),” in Behavioral Health, Rehabilitation, and Case Management Services Handbook (Vol. 2, Provider Handbooks).

Subsection 8.2.57.1.2, “Preventive Care Visits” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks).
Medicaid coverage is limited to FQHC services that are covered by Texas Medicaid and are reasonable and medically necessary. When furnished to a client of the FQHC, medically necessary services include the following:

- Certified nurse midwife (CNM) services
- Clinical psychologist services
- Clinical social worker services; other mental health services
- Dental services
- Nurse practitioner (NP) services
- Other ambulatory services included in Medicaid such as family planning, THSteps, and maternity service clinic (MSC)
- Physician assistant (PA) services
- Physician services
- Services and supplies necessary for services that would be covered otherwise, if furnished by a physician or a physician service
- Vision care services
- Visiting nurse services to a homebound individual, in the case of those FQHCs located in areas with a shortage of home health agencies

Types of FQHC visits are defined in 1 TAC §355.8261. A visit is a face-to-face encounter between an FQHC client and a physician, PA, NP, CNM, visiting nurse, qualified clinical psychologist, clinical social worker, other health-care professional for mental health services, dentist, dental hygienist, or optometrist. Encounters that take place on the same day at a single location with more than one health-care professional or multiple encounters with the same health-care professional constitute a single visit, except where one of the following conditions exists:

- After the first encounter, the client suffers illness or injury requiring additional diagnosis or treatment.
- The FQHC client has a medical visit and an other health visit such as a qualified clinical psychologist, clinical social worker, other health professional for mental health services, a dentist, a dental hygienist, an optometrist, or a THSteps medical screen.

All services provided that are incidental to the encounter, including developmental screening, must be included in the total charge for the encounter. They are not billable as a separate encounter.

Registered nurses may not be the sole provider of a medical checkup in an FQHC. If immunizations are given outside of a THSteps medical checkup, procedure codes given in the THSteps section of this manual should be used. These procedure codes are informational only, and are not payable.

To be reimbursed for Case Management for Children and Pregnant Women (CPW) an FQHC must be approved as a case management services provider by the DSHS Case Management Branch.

If a problem requiring evaluation and management (E/M) beyond the recommended services for a periodic medical checkup is discovered, a separate E/M procedure code for an established patient, submitted under the provider’s physician provider identifier, may be reimbursed for the same date of
service as the THSteps medical checkup visit. For the acute care claim, an appropriate level Current Procedural Terminology (CPT) code for E/M of established patients must be selected with the diagnosis supporting this additional billing. The medical record must contain documentation that supports the medical necessity and the level of service of the E/M procedure code submitted for reimbursement.

An annual family planning examination is allowed once per state fiscal year (September 1 through August 31), per client, per provider. An FQHC may be reimbursed for up to three family planning encounters per client, per year, regardless of the reason for the encounter. The three encounters may include any combination of general family planning encounters, an annual family planning examination, or intrauterine devices. Family planning services must be submitted with the most appropriate E/M procedure code and one of the following family planning diagnosis codes:

<table>
<thead>
<tr>
<th>Family Planning Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>V2501</td>
</tr>
<tr>
<td>V2543</td>
</tr>
</tbody>
</table>

*Not covered by the Women’s Health Plan

Procedure code 58300 must be submitted on the same claim as J7300 and J7302. Procedure code 58300 will process as informational only. Only the annual family planning examination requires modifier FP. All other family planning visits do not require the FP modifier. Claims filed incorrectly may be denied. FQHC providers may receive Title XX reimbursement for WHP wrap-around services that are rendered during a visit where the primary purpose of the visit is not related to contraception and is not reimbursed by the WHP.

FQHC providers may be receive Title XX reimbursement for the following services that are rendered to WHP clients when the primary diagnosis is not related to contraception:

- **Follow-up Pap tests.** To receive Title XX reimbursement, DSHS contractors must file a separate Title XX claim with diagnosis code 6229. DSHS contractors may be reimbursed for the Pap test, an appropriate counseling code, and the appropriate visit code.

- **Follow-up visits for sexually transmitted disease/infection (STD/STI) testing.** To receive Title XX reimbursement for a visit that is strictly for the purposes of STD/STI testing for a WHP client, DSHS contractors must file a separate Title XX claim with a diagnosis code of V016. DSHS contractors may be reimbursed for STD/STI tests and STD/STI-related services.

- **Pregnancy-test-only visits.** To receive Title XX reimbursement for a visit that is for a pregnancy test only, DSHS contractors must file a separate Title XX claim with diagnosis code V7240.

Claims that are submitted by FQHC providers for wrap-around services but are considered part of a WHP encounter will be subject to retrospective review as these claims are not eligible for Title XX reimbursement. Any wrap-around services that are determined to have been paid in error may be recouped.

Refer to: Section 3, “Women’s Health Program (Title XIX Family Planning),” and Section 4, “Department of State Health Services (DSHS) Titles V, X, and XX Family Planning Services,” in *Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks).*

Claims for gynecological services provided to PCCM clients must be submitted with modifier GY to ensure that the claim is not denied for lack of a PCP referral.
Laboratory and radiology services or the services of a licensed vocational nurse (LVN), registered nurse (RN), nutritionist, or dietitian are not considered an encounter, because they are incidental to an encounter with one of the previously-mentioned payable health-care professionals. Providers should continue to include the cost associated with these services on their cost report (they are allowable but do not constitute an encounter).

Per federal regulations, the provider cannot submit claims to Medicaid or bill the client for vaccines obtained from the Texas Vaccine for Children (TVFC) Program.

Refer to: Section 5, “THSteps Medical,” in Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information.

5.2.1 Services to Migrant Farm Workers
Out-of-state or border-state FQHC providers that render services to migrant farm workers, their children and family members who are PCCM clients do not need a PCP referral. Claims must be submitted with modifier UC from out-of-state or border-state providers that render services to migrant farm workers and their children and family members who are PCCM clients.

5.2.2 After-Hours Care
After-hours care for FQHCs is defined as care provided on weekends, on federal holidays, or before 8 a.m. and after 5 p.m., Monday through Friday. After-hours care provided by FQHCs does not require a referral from the client’s PCP. If the encounter is for after-hours services to a PCCM client, modifier TU must be indicated on the claim in addition to other appropriate modifiers.

5.2.3 Prior Authorization
Prior authorization or authorization may be required for FQHC services. Refer to the individual sections referenced on page 14.

5.2.4 Managed Care Referral Requirements
Texas Medicaid clients, including limited and managed care clients, are allowed to choose any enrolled family planning provider.

5.3 Documentation Requirements
All services require documentation to support the medical necessity of the service rendered. All services provided are subject to retrospective review and recoupment if documentation does not support the service that was submitted for reimbursement.

5.4 Claims Filing and Reimbursement
5.4.1 Claims Information
All services provided that are incidental to the encounter must be included in the total charge for the encounter and are not billable as a separate encounter. For example, if an office visit was provided at a charge of $30 and a lab test for $15, the center would submit a claim to TMHP for procedure code T1015 for $45 and would be reimbursed at the center’s encounter rate. All services (except for family planning, THSteps medical, THSteps dental, copayments, vision, mental health services, and case management for high-risk pregnant women and infants) provided during an encounter must be submitted for reimbursement using procedure code T1015.

All providers of laboratory services must comply with the rules and regulations of the Clinical Laboratory Improvement Amendments (CLIA). Providers who do not comply with CLIA are not reimbursed for laboratory services.

Refer to: Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks).
To obtain the encounter rate when submitting claims for family planning services that are provided under Title XIX or WHP, FQHCs must use or the most appropriate E/M procedure code, or procedure code J7300, J7302, or J7307 with a family planning or WHP diagnosis code. Providers must use procedure code J7300, J7302, or J7307 if the visit is for the insertion of an intrauterine device (IUD). These procedure codes must be submitted in conjunction with the most appropriate informational procedure codes for services that were rendered. Providers must use modifier FP only to submit claims for the annual family planning examination.

If a physician of an FQHC provides a service in the hospital (e.g., a delivery), the FQHC can choose to use the physician’s provider identifier to submit claims for that service, if the contract with the physician indicates this occurrence. If the FQHC bills the service using the physician’s provider identifier rather than the FQHC’s provider identifier, the costs that are associated with the service must be excluded from the cost report and will not be considered during the cost settlement/encounter rate setting process.

FQHC services for clients who have only Medicaid must be submitted to TMHP in approved electronic format or on a UB-04 CMS-1450, CMS-1500, or Family Planning 2017 paper claim form. Providers may purchase UB-04 CMS-1450 or CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a UB-04 CMS-1450 or CMS-1500 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

The ADA Dental Claim Form can be downloaded at http://www.ada.org/2622.aspx

The Family Planning 2017 Claim Form can be found in the Forms section of this manual.

Refer to: Form OP.6, “Family Planning Claim Form” in this manual.

Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Section 13, “Claim Form Examples,” in this handbook.

Claims must be filed as follows:

<table>

When filing for a client who has Medicare and Medicaid coverage, providers must file on the same claim form that was filed with Medicare.
FQHCs must submit the referring provider’s National Provider Identifier (NPI) on claims for outpatient hospital or professional services that are provided to a PCCM client for whom they are not the PCP. This information must be included in block 78 or 79 of the UB-04 CMS-1450 paper claim form. The block must include the referring provider’s complete name and NPI.

PCCM clients can refer themselves for some services and therefore do not require a referral from a PCP. The following are self-referred services for PCCM clients and the claim requirements that FQHC providers must use when submitting claims for these services. FQHC providers may use their facility provider identifier when submitting claims for these services.

Services provided by a health-care professional require one of the following modifiers with procedure code T1015, to designate the health-care professional providing the services: AH, AJ, AM, SA, TD, TE, or U7.

- If more than one health-care professional is seen during the encounter, the modifier must indicate the primary contact. The primary contact is defined as the health-care professional who spends the greatest amount of time with the client during that encounter.
- If the encounter is for antepartum care or postpartum care, the modifier TH must be indicated on the claim in addition to any other appropriate modifier.
- If the antepartum or postpartum care is provided by a CNM, the modifier SA must be indicated on the claim in addition to any other appropriate modifiers.

Use modifier TD or TE for home health services provided in areas with a shortage of home health agencies.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Section 13, “Claim Form Examples,” in this handbook.

Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks)

5.4.2 Reimbursement

FQHCs are reimbursed provider-specific prospective payment system encounter rates in accordance with 1 TAC §355.8261. Effective for dates of service on or after September 1, 2010, a 1 percent reduction in the final payment amounts for Title V, X, and XX family planning services is in effect for FQHCs.
5.4.2.1 Medicare-Medicaid Crossover Claims Pricing

For FQHC Medicare-Medicaid crossover claims, Texas Medicaid pays the difference between the Medicaid encounter rate and any Medicare payment up to a maximum of the Medicaid encounter rate. If the Medicare payment is larger, no payment is made by Medicaid.

6. MATERNITY SERVICE CLINIC (MSC)

MSCs are limited provider clinics that are unrelated to a hospital and that only provide maternity services. An MSC will be reimbursed for antepartum and/or postpartum care visits only. Hemoglobin, hematocrit and urinalysis procedures are included in the charge for antepartum care and not separately reimbursed. Services other than antepartum and postpartum care visits will be denied.

Refer to: Section 6, “Maternity Service Clinics (MSC),” in Medical and Nursing Specialists, Physicians and Physician Assistants Handbook (Vol. 2, Provider Handbooks)

7. RENAL DIALYSIS FACILITY

7.1 Enrollment

To enroll in Texas Medicaid, a renal dialysis facility must be Medicare-certified in the state where it is located. Facilities must also adhere to the appropriate rules, licensing, and regulations of the state where they operate.

Refer to: Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for more information.

7.2 Services/Benefits, Limitations, and Prior Authorization

Renal dialysis is a benefit of Texas Medicaid for the following acute renal failure or end-stage renal disease (ESRD) diagnosis codes: 5845, 5846, 5847, 5848, 5849, 5855, and 5856.

Subsection 2.3.2.6, “Organ and Tissue Transplant Services” in Hospital Services Handbook (Vol. 2, Provider Handbooks) for information on organ transplant and facility services.

Dialysis treatments are a benefit for clients in an inpatient or outpatient hospital or a renal dialysis facility according to the guidelines for outpatient maintenance dialysis approved through the CMS. Dialysis treatments may also be a benefit in the client’s home. Outpatient dialysis includes:

- Staff-assisted dialysis performed by the staff of the center or facility.
- Self-dialysis performed by a client with little or no professional assistance (the client must have completed an appropriate course of training).
- Home dialysis performed by an appropriately trained client (and the client’s caregiver) at home.
- Dialysis furnished in a facility on an outpatient basis at an approved renal dialysis facility.

7.2.1 Physician Supervision

Physician reimbursement for supervision of ESRD clients on dialysis is based on a monthly capitation payment (MCP) that are calculated by Medicare. The MCP is a comprehensive payment that covers all of the physician services that are associated with the continuing medical management of a maintenance dialysis client for treatments received in the facility. An original onset date of dialysis treatment must be included on claims for all renal dialysis procedures in all places of service except inpatient hospital.
Physician supervision of outpatient ESRD dialysis includes services that are rendered by the attending physician in the course of office visits during which any of the following occur:

- The routine monitoring of dialysis
- The treatment or follow-up of complications of dialysis, including:
  - The evaluation of related diagnostic tests and procedures
  - Services that are involved in the prescription of therapy for illnesses that are unrelated to renal disease, if the treatment occurs without increasing the number of physician-client contacts

The following physician services are a benefit for physician supervision of outpatient ESRD dialysis services:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>90951 90952 90953 90954 90955 90956 90957 90958 90959 90960</td>
</tr>
<tr>
<td>90961 90962 90963 90964 90965 90966 90967 90968 90969 90970</td>
</tr>
</tbody>
</table>

Procedure codes 90935, 90937, 90945, and 90947 are a benefit for:

- ESRD or non-ERSD services in the inpatient setting when the physician is present during dialysis treatment. The physician must be physically present and involved during the course of dialysis. These codes are not payable for a cursory visit by the physician. Hospital visit procedure codes must be used for a cursory visit.
- Non-ERSD services when provided by a physician, nurse practitioner, clinical nurse specialist, or physician assistant in an office or outpatient setting.

Only one of the following procedure codes 90935, 90937, 90945 or 90947 may be reimbursed per day by any provider.

If the physician sees the client only when the client is not dialyzing, the physician must submit the appropriate hospital visit procedure code. The inpatient dialysis procedure code must not be submitted for payment.

Providers must use one of the following procedure codes to submit claims for services when the client:

- Is not on home dialysis.
- Has had a complete assessment visit during the calendar month.
- Has received a full month of ESRD related services.

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>90951 90952 90953 90954 90955 90956 90957 90958 90959 90960</td>
</tr>
<tr>
<td>90961 90962</td>
</tr>
</tbody>
</table>

When a full calendar month of ESRD-related services are submitted for clients on home dialysis, providers must use procedure code 90963, 90964, 90965, or 90966.

Providers must submit claims with procedure code 90967, 90968, 90969, or 90970 if ESRD-related services are provided for less than a full month, per day, under the following conditions:

- Partial month during which a client who is not on home dialysis received one or more face-to-face visits but did not receive a complete assessment.
- A client who is on home dialysis received less than a full month of services.
- Transient client.
• Client was hospitalized during a month of services before a complete assessment could be performed.
• Dialysis was stopped due to recovery or death of a client.
• Client received a kidney transplant.

Procedure codes 90967, 90968, 90969, and 90970 are limited to one per day by any provider. When submitting claims for these procedure codes, providers must indicate the dates of service on which supervision was provided.

Procedure codes 90967, 90968, 90969, and 90970 will be denied if they are submitted with dates of service in the same calendar month by any provider as the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>90951 90952 90953 90954 90955 90956 90957 90958 90959 90960</td>
</tr>
<tr>
<td>90961 90962 90963 90964 90965 90966</td>
</tr>
</tbody>
</table>

Only one of the procedure codes in the table above will be reimbursed per calendar month by any provider.

The following services may be provided in conjunction with physician supervision of outpatient ESRD dialysis but are considered nonroutine and may be submitted for reimbursement separately.
• Declotting of shunts when performed by the physician.
• Physician services to inpatients.

If one of the following occurs,
• A client is hospitalized during a calendar month of ESRD-related services before a complete assessment is performed.
• The client receives one or more face-to-face assessments, but the timing of inpatient admission prevents the client from receiving a complete assessment.

Then the physician must submit both of the following:
• Procedure code 90967, 90968, 90969, or 90970 for each date of outpatient supervision.
• The appropriate hospital evaluation and management code for individual services provided on the days during which the client was hospitalized.

If a client has a complete assessment in the month during which the client is hospitalized, one of the following procedure codes must be submitted for the month of supervision.

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>90951 90952 90953 90954 90955 90956 90957 90958 90959 90960</td>
</tr>
<tr>
<td>90961 90962</td>
</tr>
</tbody>
</table>

The appropriate inpatient evaluation and management codes must be reported for procedures provided during the hospitalization.
• Dialysis at an outpatient facility other than the usual dialysis setting for a client of a physician who bills the MCP. The physician must submit procedure code 90967, 90968, 90969, or 90970 for each date on which supervision is provided. The physician may not submit claims for days that the client dialyzed elsewhere.
• Physician services beyond those that are related to the treatment of the client’s renal condition that cause the number of physician-client contacts to increase. Physicians may submit claims on a fee-for-service basis if they supply documentation on the claim that the illness is not related to the renal condition and that additional visits are required.

Inpatient services that are provided to a hospitalized client for whom the physician has agreed to submit monthly claims, may be reimbursed in one of the following ways:

• The physician may elect to continue monthly billing, in which case the physician may not bill for individual services that were provided to the hospitalized client.

• The physician may reduce the monthly amount submitted by 1/30th for each day of hospitalization and may charge fees for individual services that were provided on the hospitalized days.

• The physician may submit a claim for inpatient dialysis services using the inpatient dialysis procedure codes. The physician must be present and involved with the client during the course of the dialysis.

Clients may receive dialysis at an outpatient facility other than the client’s usual dialysis setting, even if their physician bills for monthly dialysis coordination. The physician must reduce the monthly amount submitted for reimbursement by 1/30th for each day the client is dialyzed elsewhere.

Physician services beyond those related to the treatment of the client’s renal condition may be reimbursed on a fee-for-service basis. The physician must provide medical documentation with the claim that identifies how the illness is not related to the renal condition and added visits are required.

Payment is made for physician training services in addition to the MCP for physician supervision rendered to maintenance facility clients.

7.2.2 Renal Dialysis Facilities–Method I Composite Rate

The composite rate includes all necessary equipment, supplies, and services for the client receiving dialysis whether in the home or in a facility. The facility’s charge must not include the charge for the physician’s routine supervision. Examples of services included in the composite rate include, but are not limited to:

• Cardiac monitoring—procedure code 93040 or 93041.

• Catheter changes—procedure code 36000 or 49421.

• Crash cart usage for cardiac arrest.

• Declotting of shunt (procedure code 36593) and any supplies used to declot shunts performed by facility staff in the dialysis unit.

• Dialysate—procedure code A4720, A4722, A4723, A4724, A4725, A4726, or A4765.

• Oxygen—procedure code E0424, E0431, E0434, E0439, E0441, E0442, E0443, or E0444.

• Routine laboratory services for dialysis.

Note: When one of these laboratory services is required more frequently, renal dialysis facility providers must submit the appropriate procedure code with modifier 91 for separate reimbursement.

• Staff time to administer blood, separately billable drugs, and blood collection for laboratory—procedure code 36430 or 36591.

• Suture removal or dressing changes.
• Certain drugs such as those to elevate or decrease blood pressure, antiarrhythmics, blood thinners or expanders, antihistamines or antibiotics to treat infections or peritonitis related to peritoneal dialysis are included in the composite rate. Examples include, but are not limited to:
  • Hydralazine—procedure code J0360.
  • Diphenhydramine—procedure code J1200.
  • Heparin—procedure code J1642 or J1644.
  • Dopamine—procedure code J1265.
  • Glucose.
  • Propranolol—procedure code J1800.
  • Insulin.
  • Digoxin—procedure code J1160.
  • Norepinephrine bitartrate.
  • Mannitol—procedure code J2150.
  • Procaine.
  • Protamine—procedure code J2720.
  • Saline—procedure code A4216 or A4217.
  • Hydrocortisone sodium succinate—procedure code J1720.
  • Verapamil.

Medically necessary drugs that are not included in the composite rate may be separately reimbursed when provided by and administered in the dialysis facility by facility staff. Staff time and supplies used to administer the drugs are included in the composite rate. Examples include, but are not limited to, the following:
  • Antibiotics, except when prescribed for clients to treat infections or peritonitis related to peritoneal dialysis
  • Hematinics
  • Anabolics
  • Muscle relaxants
  • Analgesics
  • Sedatives
  • Tranquilizers
  • Thrombolytics used to declot central venous catheters
  • Intravenous levocarnitine (procedure code J1955), for ESRD clients who have been on dialysis for a minimum of 3 months with one of the following indications (All other indications for levocarnitine are not covered.):
    • Carnitine deficiency, defined as a plasma free carnitine level less than 40 micromoles per liter
    • Signs and symptoms of erythropoietin -resistant anemia that has not responded to standard erythropoietin with iron replacement, and for which other causes have been investigated and adequately treated
• Hypotension on hemodialysis that interferes with delivery of the intended dialysis despite application of usual measures deemed appropriate (e.g., fluid management) (such episodes of hypotension must have occurred during at least two dialysis treatments in a 30-day period)

Note: Continued use of levocarnitine is not covered if improvement has not been demonstrated within 6 months of the initiation of treatment.

The ordering physician must maintain documentation in the client’s medical record to support medical necessity.

7.2.3 Method II Dealing Direct-Support Services
With Method II, the client selects and works with a single supplier to obtain supplies and equipment to dialyze at home. The selected supplier cannot be a dialysis facility, although the supplier must maintain a written agreement with a support dialysis facility to provide backup and support services. Method II support services are reimbursed under revenue codes 845 and 855.

Support services are reimbursed monthly under Method II are limited to clients who are 20 years of age and younger, and include, but are not limited to:

• Periodic monitoring of a client’s adaptation to home dialysis and performance of dialysis, including provisions for visits to the home or the facility.
• Visits by trained personnel for the client with a qualified social worker and a qualified dietitian, made in accordance with a plan prepared and periodically reviewed by a professional team which includes the physician.
• Individual unscheduled visits to a facility made on an as-needed basis; (e.g., assistance with difficult access situations).
• ESRD-related laboratory tests covered under the composite rate.
• Providing, installing, repairing, testing, and maintaining home dialysis equipment, including appropriate water testing and treatment.
• Ordering of supplies on an ongoing basis.
• A record keeping system that assures continuity of care.
• Support services specifically applicable to chronic ambulatory peritoneal dialysis (CAPD) also include, but are not limited to:
  • Changing the connecting tube and administration set.
  • Monitoring the client’s performance of CAPD, assuring that it is done correctly, and reviewing proper techniques with the client or informing the client of modifications to apparatus or technique.
  • Documenting whether the client has or has had peritonitis that requires physician intervention or hospitalization (unless there is evidence of peritonitis, a culture for peritonitis is not necessary).
  • Inspecting the catheter site.

Routine laboratory services are included in the support services and are not reimbursed separately.

Equipment and supplies are:

• Reimbursed under Method II to only one provider per month who must agree to submit claims once per month for only one month’s quantity per claim.
• Limited to clients who are 20 years of age and younger.
• Reimbursed separately up to the total monthly allowable as determined by HHSC.
The following equipment, supply, and services procedure codes are benefits of Texas Medicaid under Method II:

Installation and repair of home hemodialysis machines are not a benefit of Texas Medicaid. Home modifications for use of medical equipment are not a benefit of Texas Medicaid.

A Medicaid client may receive CAPD and continuous cycle peritoneal dialysis (CCPD) support services furnished by the facility on a monthly basis. Charges for support services in excess of this frequency must include documentation of medical necessity.

Clients may have a one month reserve of supplies available for use. Renal dialysis services beyond these limitations may be considered for clients who are 20 years of age and younger through the Comprehensive Care Program (CCP) with prior authorization.

#### 7.2.4 Facility Revenue Codes

The following services are a benefit for renal dialysis centers billing under reimbursement methodology I composite rate or II dealing direct.

<table>

</table>

The facility charge must not include the charge for the physician’s routine supervision.
7.2.5  Training for Hemodialysis, Intermittent Peritoneal Dialysis (IPD), Continuous Cycle Peritoneal Dialysis (CCPD), and Chronic Ambulatory Peritoneal Dialysis (CAPD)

Most self-dialysis training for hemodialysis, IPD, CCPD, and CAPD is provided in an outpatient setting. Dialysis training provided in an inpatient setting will be reimbursed at the same rate as the facility's outpatient training rate.

Reimbursement for hemodialysis, IPD, CCPD, and CAPD training services and supplies provided by the dialysis facility include personnel services, parenteral items routinely used in dialysis, training manuals and materials, and routine dialysis laboratory tests.

No frequency limitation is applied to routine laboratory tests during the training period because these tests commonly are given during each day of training. Nonroutine laboratory tests performed during the training period may be reimbursed when documentation of medical necessity is submitted with the claim.

It may be necessary to supplement the patient's dialysis during CAPD training with intermittent peritoneal dialysis or hemodialysis because the client has not mastered the CAPD technique.

Training is limited to once per day. The composite rate will be denied as part of dialysis training when submitted for the same date of service.

7.2.6  Maintenance Hemodialysis

The facility composite rate applies when a chronic renal dialysis client receives hemodialysis in an approved renal dialysis facility. Reimbursement is based on the facility's per-treatment composite rate, as calculated by Medicare. Services included in the facility's charge are routine laboratory tests, personnel services, equipment, supplies, and other services associated with the treatment.

For hospitals to be reimbursed for maintenance hemodialysis, they must be enrolled as an approved dialysis facility with the appropriate provider identifier. When a client is admitted for hospitalization for no reason other than to receive maintenance renal dialysis, the dialysis services are considered outpatient services and are covered if the hospital has been designated as a CMS certified renal dialysis center.

7.2.7  Maintenance IPD

Maintenance IPD is usually performed in sessions of 10 to 12 hours duration, three times per week. It may also be performed in fewer sessions that are longer in duration. If more than three sessions occur in one week, the provider must supply documentation of medical necessity with the claim.

7.2.8  Maintenance CAPD and CCPD

Support services for maintenance furnished to clients receiving CAPD or CCPD in the home may be reimbursed to dialysis facilities. Home dialysis support services must be furnished by the facility in either the home or the facility. CAPD and CCPD support services are limited to once per day.

7.2.9  Laboratory and Radiology Services

All providers of laboratory services must comply with the rules and regulations of the Clinical Laboratory Improvement Amendments (CLIA) of 1988. Providers who do not comply with CLIA will not be reimbursed for laboratory services.

Refer to: Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks).

7.2.9.1  In-Facility Dialysis—Routine Laboratory

Laboratory testing may be obtained and processed in the renal dialysis facility or by an outside laboratory. Charges for routine laboratory tests performed according to the established frequencies in the following tables are included in the facility's composite rate submitted to Texas Medicaid regardless
of where tests were processed. If the routine laboratory testing is processed by an outside laboratory, the outside laboratory will bill the renal dialysis facility. The renal dialysis facility will then submit a claim to Texas Medicaid unless the test results are inclusive tests.

If additional in-facility laboratory testing is medically necessary beyond the routine frequencies identified below, providers must bill with modifier 91 to indicate the billed laboratory procedure is medically necessary. The billing provider must also submit documentation supporting the medical necessity with the claim and maintain the documentation in the client’s medical record.

Modifier 91 is used to indicate that a test was performed more than once on the same day for the same client only when it is necessary to obtain multiple results in the course of the treatment. This modifier may not be used to indicate any of the following:

- When tests are re-run to confirm initial results
- Testing problems with specimens or equipment
- When a normal one-time, reportable result is all that is required
- When there are standard Healthcare Common Procedure Coding System (HCPCS) codes available that describe the series of results (e.g., glucose tolerance tests, evocative/suppression testing, etc.).

Modifier 91 may only be used for laboratory tests paid under the clinical diagnostic laboratory fee schedule.

</tr>
</tbody>
</table>

The routine tests listed in the tables above are frequently performed as an automated battery of tests such as the sequential multi-channel analysis with computer (SMAC)-12 (chemistry panels). These tests are considered routine and are included in the charge for dialysis, unless there is an additional diagnosis to document medical necessity for performing the tests in excess of the recommended frequencies.

**Refer to:** Subsection 2.2.5.2, “Laboratory Panels” in *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* for more information about laboratory paneling procedures.

**7.2.9.2 In-Facility Dialysis—Nonroutine Laboratory**

The following procedure codes are considered necessary, nonroutine tests. They must be submitted separately from the dialysis charge when performed in the renal dialysis facility or by an outside laboratory that bills the facility for laboratory services. All nonroutine laboratory and radiology tests beyond the recommended frequencies below must be medically necessary.

If additional in-facility laboratory testing is medically necessary beyond the nonroutine frequencies identified below, providers must submit the claim with modifier 91 to indicate the billed laboratory
procedure is medically necessary. The billing provider must also submit documentation supporting the medical necessity with the claim and maintain the documentation in the client’s medical record.

Once a Month

A handling fee (procedure code 99001) for nonroutine laboratory services may be submitted to Texas Medicaid only if the specimen is obtained by venipuncture or catheterization and sent to an outside lab. The claim form must document that the handling fee is for nonroutine laboratory services.

7.2.9.3 CAPD Laboratory

The following laboratory tests are routine for home maintenance CAPD clients when performed according to the indicated frequency. These laboratory tests may be reimbursed separately when the client is dialyzing in the home and is not undergoing IPD or hemodialysis in the facility. The provider must indicate the client’s diagnosis and the type of dialysis on the claim form. Tests in excess of this frequency or tests not listed in the tables require documentation of medical necessity for payment to be made.

7.2.9.4 Hematopoietic Injections
Medicaid reimbursement is allowed for hematopoietic injections (procedure codes J0882 and J0886) that are administered to clients who have anemia that is associated with chronic renal failure.

Providers must submit the client’s most recent dated hemoglobin or hematocrit levels in the comments section of the claim form. Frequency and quantity limitations apply.

Refer to: Subsection 8.2.37.12, “Hematopoietic Injections” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for more information about benefit and limitation criteria.

7.2.9.5 Blood Transfusions
Whole blood transfusions may be reimbursed separately to dialysis facilities when medically indicated for a Medicaid eligible client.

7.2.10 Prior Authorization
Prior authorization is not required for renal dialysis services. Prior authorization must be obtained for transplant-related services provided to clients who are not eligible for Medicare and are eligible only for Medicaid.

7.3 Documentation Requirements
All services require documentation to support the medical necessity of the service rendered, including renal dialysis services. Renal dialysis services are subject to retrospective review and recoupment if documentation does not support the service submitted for reimbursement.

7.4 Claims Filing and Reimbursement

7.4.1 Claims Information
Renal dialysis facility services must be submitted to TMHP in an approved electronic claims format or on a UB-04 CMS-1450 paper claim form. Providers may purchase UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply them.

When completing a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Subsection 6.6, “UB-04 CMS-1450 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (Vol. 1, General Information) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Reminder: The original onset date must be included on the claim form to prevent claim denial. The original onset date must be the same date entered on Form CMS-2728 sent to the Social Security office.

All physician, renal dialysis center, and medical supplier supporting documentation is subject to retrospective review.
7.4.2 Reimbursement
Renal dialysis facilities are reimbursed according to composite rates, which are based on the CMS-specified calculations and the Texas Medicaid Reimbursement Methodology (TMRM). Texas Medicaid may reimburse for dialysis services through either Method I or Method II as defined by CMS.

The hemodialysis, intermittent peritoneal dialysis (IPD), continuous ambulatory peritoneal dialysis (CAPD) and continuous cycling peritoneal dialysis (CCPD) laboratory and radiology services and the physician supervision of dialysis clients limitations pertain to both Method I and Method II reimbursement.

Effective for dates of service on or after September 1, 2010, Texas Medicaid implemented a 1-percent reduction in the final payment amounts for inpatient, professional, and outpatient services. TEFRA-reimbursed inpatient hospitals (children’s and state teaching hospitals) are excluded from the 1-percent reimbursement reduction.

7.5 Medicare and Medicaid
Medicaid coverage of a renal dialysis client who may be eligible for Medicare coverage begins with the original onset date of the dialysis treatments and may continue for a period of three months. During this period, Medicare eligibility is reviewed through the Health and Human Services Commission (HHSC). If HHSC determines that the client is Medicare-eligible, Medicaid coverage begins with the original onset date and continues until Medicare coverage begins.

If HHSC determines that the client is not eligible for Medicare, Medicaid coverage of eligible clients begins with the original onset date and continues as long as the dialysis treatments are medically necessary and the client is eligible for Medicaid. The date of onset is the date of the first dialysis treatment and does not change even if the client sees another provider.

Medicare eligibility usually begins after a three-month waiting period has been served. Medicare eligibility begins before the waiting period has expired if the individual receives a transplant or participates in a self-dialysis training program during the waiting period.

Medicaid may pay Medicare deductibles and coinsurance for clients who are eligible under Medicare and Medicaid.

8. RURAL HEALTH CLINIC
8.1 Enrollment
To enroll in Texas Medicaid and qualify for participation as a Title XIX RHC, RHCs must be enrolled in Medicare. A nine-digit provider identifier is issued to the RHC after a certification letter from Medicare is received, stating that the clinic qualifies for Medicaid participation. An RHC can also apply for enrollment as a family planning agency.

All providers of laboratory services must comply with the rules and regulations of the Clinical Laboratory Improvement Amendments (CLIA). Providers who do not comply with CLIA are not reimbursed for laboratory services.

8.1.1 Initial Cost Reporting
New RHCs must file a projected cost report within 90 days of their designation as an RHC to establish an initial payment rate. The cost report will contain the RHC’s reasonable costs anticipated to be incurred during the RHC’s initial fiscal year. The RHC must file a cost report within five months of the end of the RHC’s initial fiscal year. The cost settlement must be completed within 11 months of the receipt of a cost report. The cost per visit rate established by the cost settlement process shall be the base rate. Any subsequent increases shall be calculated as provided herein. A new RHC location established
by an existing RHC participating in Texas Medicaid will receive the same effective rate as the RHC establishing the new location. An RHC establishing a new location may request an adjustment to its effective rate as provided herein if its costs have increased as a result of establishing a new location.

**Refer to:** Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for more information.

### 8.2 Services/Benefits, Limitations, and Prior Authorization

The services listed in the table below may be reimbursed to RHC providers.

<table>
<thead>
<tr>
<th>General Medical Services</th>
</tr>
</thead>
<tbody>
<tr>
<td>T1015</td>
</tr>
<tr>
<td>General medical services must be submitted using one of the appropriate modifiers AJ, AH, AM, SA, TE, TH, or U7. Adult preventative care must be submitted with diagnosis code V700.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>THSteps Medical Services</th>
</tr>
</thead>
<tbody>
<tr>
<td>99381 99382 99383 99384 99385 99391 99392 99393 99394 99395</td>
</tr>
<tr>
<td>THSteps medical services must be submitted using place of service 72, benefit code EP1, and one of the following modifiers AM, SA, or U7.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Family Planning Services</th>
</tr>
</thead>
<tbody>
<tr>
<td>99201 99202 99203* 99204* 99205 99211 99212 99213* 99214* 99215</td>
</tr>
<tr>
<td>J7300* J7302* J7307*</td>
</tr>
<tr>
<td>Family planning services must be submitted with modifier AJ, AM, SA, or U7 and place of service 72. Annual family planning services must be submitted with modifier FP.</td>
</tr>
<tr>
<td>*Title V and XX may only submit these procedure codes for family planning services.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Copayments</th>
</tr>
</thead>
<tbody>
<tr>
<td>CP001</td>
</tr>
</tbody>
</table>

Family planning services must be submitted with the most appropriate E/M procedure code and one of the following family planning diagnosis codes:

<table>
<thead>
<tr>
<th>Family Planning Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>V2502  V2504  V2509  V251  V252  V2511  V2512  V2513  V2540  V2541</td>
</tr>
<tr>
<td>V2542  V2543  V2549  V255  V258  V259  V265  V2652*</td>
</tr>
<tr>
<td>* Not covered by Women’s Health Plan.</td>
</tr>
</tbody>
</table>

Claims for procedure code J7307 must be submitted with the provider identifier of a physician or nurse practitioner instead of the RHC provider identifier.

If a problem requiring E/M beyond the recommended services for a medical checkup is discovered, a separate E/M procedure code for an established patient, submitted under the provider’s RHC professional provider identifier, may be reimbursed for the same date of service as a THSteps periodic medical checkup visit. For the acute care claim, an appropriate level Current Procedural Terminology (CPT) code for E/M of established patients must be selected with the diagnosis supporting this additional submission. The medical record must contain documentation that supports the medical necessity and the level of service of the E/M procedure code submitted for reimbursement.
Refer to: Subsection 6.3.5, “Modifiers” in Section 6, “Claims Filing” (Vol. 1, General Information) for a definition of modifiers.

Section 2, “Medicaid Title XIX family planning services,” in Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks).

Subsection 8.2.57.1.2, “Preventive Care Visits” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks).

8.2.1 Freestanding and Hospital-Based RHC Services

The following services are benefits of Texas Medicaid when provided in an RHC:

- Physician services
- Services and supplies furnished as incidental to physician services
- Services provided by an NP, a CNM, a clinical social worker, or a PA’s services
- Services and supplies furnished as incidental to the NP’s or PA’s services
- Visiting nurse services on a part-time or intermittent basis to homebound clients in areas determined to have a shortage of home health agencies (A homebound client is someone who is permanently or temporarily confined to his place of residence, not including a hospital or skilled nursing facility, because of a medical condition.)

When an RHC bills for visiting nurse services, the written plan of treatment to be used for the visiting nurse must be developed by the RHC supervising physician. It must be approved and ordered by the client’s treating physician if different from the supervising physician. The plan of treatment must be reviewed and approved by the supervising physician of the clinic at least every 60 days.

Gynecological services provided to PCCM clients must be billed with modifier GY.

A visit is a face-to-face encounter between an RHC client and a physician, PA, NP, CNM, visiting nurse, or clinical NP. Encounters with more than one health professional and multiple encounters with the same health professional that take place on the same day and at a single location constitute a single visit, except where one or the other of the following conditions exists:

- After the first encounter, the client suffers illness or injury requiring additional diagnosis or treatment.
- The RHC client has a medical visit and an other health visit.

An other health visit includes, but is not limited to, a face-to-face encounter between an RHC client and a clinical social worker.

For freestanding RHCS, all laboratory services provided in the RHC’s laboratory are included in the encounter. This includes the basic laboratory tests as well as any other laboratory tests provided in the RHC laboratory. Consequently, there is no separate billing for laboratory services. However, if the RHC laboratory becomes a certified Medicare laboratory with its own supplier number, and enrolls in Medicaid as an independent laboratory, all laboratory tests (except the basic laboratory tests) performed for RHC and non-RHC clients can be billed to Medicaid. The claim must be filed under their independent laboratory Medicaid provider identifier and using the appropriate Healthcare Common Procedure Coding System (HCPCS) codes.
8.2.1.1 Freestanding Rural Health Clinic Services

The services listed below cannot be reimbursed to freestanding RHCs using only the RHC provider identifier. Use of the RHC provider identifier for billing these services causes claims to be denied. Services in any of these categories must be billed using the RHC physician provider identifier and the appropriate benefit code:

- THSteps medical checkups, which includes immunizations
- Family planning services (including implantable contraceptive capsules provision, insertion, or removal)

These services must be billed with an AM, SA, or U7 modifier.

Physician supplies are not a benefit of Texas Medicaid. Costs of supplies are included in the reimbursement for office visits. Outpatient hospital services (including emergency room services) and inpatient hospital services provided outside the RHC setting are to be billed using the individual or group physician provider identifier.

**Exception:** If later in the same day the client suffers an additional illness or injury requiring diagnosis or treatment, the clinic may submit a claim for a second visit.

Freestanding RHCs submit an all-inclusive encounter for services provided. All services provided that are incidental to the encounter, including developmental screening, must be included in the total charge for the encounter. A claim for these services may not be submitted as a separate encounter.

If immunizations are given outside of a THSteps medical checkup, procedure codes given in the THSteps section of this manual should be identified on the claim. These procedure codes are informational only, and are not payable.

All services provided during a freestanding RHC encounter must be submitted using procedure code T1015. The total submitted amount should be the combined charges for all services provided during that encounter.

One of the following modifiers must be reported with procedure code T1015 to designate the health-care professional providing the services: AH, AJ, AM, SA, TD, TE, or U7. If the encounter is for antepartum or postpartum care, use modifier TH in addition to the modifier required to designate the health-care professional providing the service.

**Reminder:** The primary initial contact is defined as “the health-care professional who spends the greatest amount of time with the client during that encounter.”

If more than one health-care professional is seen during the encounter, the modifier (if appropriate) must indicate the primary contact. For example, if an NP or a PA performs an antepartum exam, modifiers SA or U7, and TH, must be entered. A maximum of two modifiers may be reported with each encounter.

8.2.1.2 Hospital-Based Rural Health Clinic Services

Hospital-based RHCs must use the encounter code T1015. A hospital-based RHC is paid based on an all-inclusive encounter rate. One of the following modifiers must be submitted for general medical services: AH, AJ, AM, SA, TD, TE, or U7.

The services listed below must be submitted using the RHC provider identifier and the appropriate benefit code:

- THSteps medical checkups
- Family planning services (including implantable contraceptive capsules provision, insertion, or removal)
- Immunizations provided in hospital-based RHCs
These services must be submitted with an AM, SA, or U7 modifier if performed in an RHC setting. Claims are paid under the Prospective Payment System (PPS) reimbursement methodology. When submitting a claim on the CMS-1500 paper claim form, providers must use the appropriate national POS (72) for an RHC setting.

Outpatient hospital services (including emergency room services) and inpatient hospital services provided outside the RHC setting are to be submitted using the individual or group physician provider identifier. Hospital-based RHCs must submit claims for pneumococcal and influenza vaccines as non-RHC services, under their hospital provider identifier.

8.2.1.3 After-Hours Care

After-hours care for RHCs is defined as care provided on weekends, federal holidays, or before 8 a.m. and after 5 p.m. Monday through Friday. After-hours care provided by RHCs do not require a referral from the client’s PCP. RHCs that provide after-hours services to PCCM clients must submit claims with modifier TU.

8.2.2 Prior Authorization

Prior authorization or authorization is not required for RHC services.

8.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including RHC services. RHC services are subject to retrospective review and recoupment if documentation does not support the service billed.

8.3.1 Record Retention

Freestanding RHCs must retain their records for a minimum of six years. Hospital-based RHCs must retain their records for a minimum of ten years.

8.4 Claims Filing and Reimbursement

8.4.1 Claims Information

General services and copayments are billed using the RHC’s National Provider Identifier (NPI). For all other services, providers must submit claims using their NPI and the appropriate benefit code.

RHCs must submit the referring provider’s National Provider Identifier (NPI) on claims for outpatient hospital or professional services that are provided to a PCCM client for whom they are not the PCP. This information must be included in block 78 or 79 of the UB-04 CMS-1450 paper claim form. The block must include the referring provider’s complete name and NPI.

PCCM clients can refer themselves for some services and therefore do not require a referral from a PCP. RHC providers may submit claims for the following self-referred services using their facility provider ID number:

<table>
<thead>
<tr>
<th>RHC Self-Referred Service</th>
<th>Claim Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Obstetric services</td>
<td>TH modifier</td>
</tr>
<tr>
<td>Gynecological services</td>
<td>GY modifier</td>
</tr>
<tr>
<td>Behavioral health services</td>
<td>Psychological diagnosis code</td>
</tr>
</tbody>
</table>
Providers performing services at an RHC location may submit claims for the following self-referred services using their individual provider ID:

<table>
<thead>
<tr>
<th>RHC Self-Referred Service</th>
<th>Claim Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Emergency services</td>
<td>Emergency diagnosis</td>
</tr>
<tr>
<td>Family planning</td>
<td>Family planning procedure and diagnosis codes</td>
</tr>
<tr>
<td>THSteps services</td>
<td>THSteps procedure codes with national POS 72 and EP1 benefit code</td>
</tr>
<tr>
<td>Immunizations</td>
<td>Immunization codes and immunization administration codes</td>
</tr>
</tbody>
</table>

Place of service 72 must be used on all claims when billing for services other than general medical. Benefit code EP1 must be used on claims for THSteps medical services.

Freestanding and hospital-based RHC services must be submitted to TMHP in an approved electronic format or on a UB-04 CMS-1450 paper claim form. Providers may purchase UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

### 8.4.2 Managed Care Referral Requirements

Family planning exams do not require a PCP referral. Services rendered to PCCM clients who are migrant farm workers do not require a PCP referral. A PCP referral is required for all other services for all other PCCM clients.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Subsection 6.6, “UB-04 CMS-1450 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (Vol. 1, General Information). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

### 8.4.3 Reimbursement

Freestanding and hospital-based RHCs are reimbursed provider-specific per visit rates calculated in accordance with 1 TAC §355.8101.

Effective for dates of service on or after September 1, 2010, a 1-percent reduction in the final payment amounts for Title V, X, and XX family planning services is in effect for FQHCs.

### 8.4.3.1 Cost Report Submission

All RHCs are required to submit a copy of their Medicare audited cost report for the fiscal year ending on or after January 1 within 30 days of receipt from Medicare. Submit to the following address:

Texas Medicaid & Healthcare Partnership
Medicaid Audit
PO Box 200345
Austin, TX 78720-0345
9. TUBERCULOSIS SERVICES

TB clinics must be enrolled in Texas Medicaid and provide services in accordance with 1 TAC, §354.1371.

9.1 Enrollment

To enroll in Texas Medicaid, a TB clinic must be either:

- A public entity operating under an HHSC tax identification number (TB regional clinic)
- A public entity operating under a non-HHSC tax identification number (city/county/local clinic)
- A non-hospital-based entity for private providers

Providers of TB-related clinic services must complete a provider application from the TB Services Branch within DSHS. Per Texas DSHS policy, TB clinics must develop and operate under a set of written policies and procedures that specify the criteria for licensed and non-licensed staff to provide services. The policies and procedures must include the following:

- The personnel file requirements for staff who provide directly observed therapy (DOT).
- The training and supervision that are required for outreach workers to be considered qualified to perform the assigned services.
- The written delegation protocol for services that are not performed by a physician, APRN, or PA.
- The documentation that is required for all client encounters.

Upon written notice of approval by TB Services Branch, Medicaid enrollment applications from TMHP Provider Enrollment are sent to HHSC-approved providers of TB-related clinic services.

TMHP is responsible for issuing a group or individual a nine-digit provider identifier. Providers that list additional (satellite) clinics in the TB Services Branch provider application will receive nine-digit performing provider identifiers for each off-site clinic. TB off-site clinics operating under the jurisdiction of the applying provider must use the assigned group provider identifier and their nine-digit performing provider identifier.

Enrollment as a Medicaid provider is not complete until the TMHP enrollment packet has been finalized and a nine-digit provider identifier number is issued to the provider.

The effective date for participation is the date an approved provider application with the TB Services Branch is established.

To receive a TB Services Branch provider application form or provider supplement, send a request to the following address:

Texas Department of State Health Services
TB/HIV/STD Unit
Tuberculosis Services Branch
Mail Code 1939
1100 West 49th Street
PO Box 149347
Austin, TX 78714-9347

Refer to: Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for more information about enrollment procedures related to the TMHP Medicaid enrollment applications.
9.1.1 Managed Care Program Enrollment

TB clinics do not need to enroll with the Medicaid managed care health plans. All services provided by TB clinics are submitted to TMHP for all Medicaid clients, including Medicaid managed care clients.

Refer to: Subsection 8.1, “Medicaid Managed Care” in Section 8, “Managed Care” (Vol. 1, General Information).

9.2 Services/Benefits, Limitations and Prior Authorization

The level of service provided varies depending on whether the services are delivered by a nonphysician or physician and if medications are prescribed.

9.2.1 TB-Related Clinic Services

The following services may be performed by a physician, APRN, or PA in the TB clinic:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99201</td>
</tr>
</tbody>
</table>

A physician’s presence is not required to perform procedure code 99211; however, the physician must provide direct supervision by being present in the clinic and immediately available to furnish assistance and direction at the time service is provided.

Before TB treatment can be initiated, an initial screening (procedure code T1023) by an RN, LPN, or LVN, or a new patient physician E/M visit (procedure code 99201, 99202, 99203, 99204, or 99205) must be performed. If the treatment is initiated by a nursing screening, a new patient physician E/M visit must be completed within 90 days, or subsequent reimbursement for DOT (procedure code H0033) will be denied.

Following the initial new patient physician E/M visit, an established patient physician E/M visit (procedure code 99212, 99213, 99214, or 99215) must be billed every 90 days throughout the course of treatment, or subsequent reimbursement for DOT (procedure code H0033) will be denied.

Clients with latent TB infection, including those in a high-risk group (children who are 4 years of age and younger, those who are immunocompromised, and clients who are HIV-positive), and those with active TB disease, must be seen by a physician every 90 days throughout the course of treatment.

A physician must evaluate each client with active or latent TB disease prior to discharge from TB treatment.

Procedure codes H0033, T1002, T1003 and T1023 may be provided under established clinic protocols. The initial TB screening (procedure code T1023), performed by an RN, LPN, or LVN includes, but is not limited to the following:

- Brief mental and physical assessment
- Exposure history
- Referral for lab or x-ray per protocol
- Referral for social or other medical services
- Other assessment

Procedure code T1023 may be reimbursed prior to the client being seen by a physician, and no more than once per 12 months. Subsequent nursing services (procedure code T1023, T1002, or T1003) may be reimbursed once per day, per client, when physician services are not performed.
Reimbursement for DOT services (procedure code H0033) provided in the clinic or other places of service, excluding inpatient hospitals, skilled nursing facilities, intermediate care facilities, outpatient hospitals, independent laboratories, birthing centers, and extended care facilities will be limited to one per day, and a maximum of five per week, per client, throughout the course of treatment.

Procedure codes T1002 and T1003 are limited to a maximum of eight 15-minute units per day, per client.

- Minutes of nursing services cannot be accumulated over multiple days. Minutes of nursing services can only be billed per calendar day.
- If the total number of minutes of nursing services per procedure code is less than eight minutes for a calendar day, then no unit of service can be billed for that day. The minutes cannot be added to minutes of nursing services from any previous or subsequent days for billing purposes.
- If more than one unit of service is billed, every unit except the last must be for the complete 15 minutes, with the last unit being no less than eight minutes of nursing service.
- Time spent in contact investigations is not reimbursable.

Reimbursement for new client examinations (procedure code 99201, 99202, 99203, 99204 and 99205) are limited to new clients who have not received services in the same clinic for a period of three years. One physician E/M service may be reimbursed per day, per client.

In the following table, the procedure codes in Column A will be denied when billed for the same date of service as the corresponding procedure codes in Column B:

<table>
<thead>
<tr>
<th>Column A (Denied)</th>
<th>Column B</th>
</tr>
</thead>
<tbody>
<tr>
<td>T1023, T1002, T1003</td>
<td>99201, 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215</td>
</tr>
<tr>
<td>T1002, T1003</td>
<td>T1023</td>
</tr>
<tr>
<td>T1003</td>
<td>T1002</td>
</tr>
<tr>
<td>H0033</td>
<td>99201, 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, 99215, T1002, T1003, T1023</td>
</tr>
</tbody>
</table>

### 9.2.2 Ancillary Services

The following ancillary TB services are a benefit of Texas Medicaid:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>71010 71020 71021 71022 71030 71035 81025 86580 86701* 86703* 89220 96365 96366 96367 96368 96374 96375 99001 J0278 J1840 J1956 J2020** J2280** J3000**</td>
</tr>
</tbody>
</table>

*Must be billed with QW modifier
**Must be billed with KX modifier when oral formulation is not appropriate for the client

All drugs for which Medicaid is billed must have been purchased by the TB clinic. In the event that the clinic received the drug at no cost through DSHS or another source, it cannot be billed to Texas Medicaid. All medication claims are subject to retrospective review.
Handling or conveyance of a specimen from the patient in the clinic to a laboratory (procedure code 99001) will be reimbursed only when submitted with one of the following professional or nursing services is performed on the same date of service.

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99201</td>
</tr>
<tr>
<td>T1002</td>
</tr>
</tbody>
</table>

### 9.2.3 Prior Authorization
Prior authorization is not required for TB-related services.

### 9.3 Documentation Requirements
All services require documentation to support the medical necessity of the service rendered, including TB services. TB services are subject to retrospective review and recoupment if documentation does not support the service billed.

### 9.4 Provider Responsibilities
If approved to submit claims as a TB clinic under Texas Medicaid, the provider must adhere to the following requirements:

- Be a facility that is not an administrative, organizational, or financial part of a hospital, but is organized and operated to provide medical care to outpatients.
- Comply with all applicable federal, state, and local laws and regulations.
- Employ or have a contract or formal arrangement with a licensed physician (doctor of medicine [M.D.] or doctor of osteopathy [D.O.]) who is responsible for providing medical direction and supervision over all services provided to the clinic’s clients. To meet this requirement, a physician must see the client at least once every 90 days to prescribe the type of care provided and, if the services are not limited by the prescription, periodically review the need for continued care.
- Adhere to the guidelines issued by HHSC, under the authority of the Texas Health and Safety Code, and ensure that services are consistent with the recommendations of the American Thoracic Society and the Centers for Disease Control and Prevention (CDC). For more information, visit the website at www.cdc.gov/tb/default.htm.
- Maintain complete and accurate medical records of each recipient’s care and treatment and accurately document all services provided and the medical necessity for the services.
- Ensure that services provided to each client are commensurate with the client’s medical needs based on the client’s assessment/evaluation, diagnostic studies, plan of care, and physician direction. These services must be documented in the client’s medical records.
- Be enrolled and approved for participation in Texas Medicaid.
- Sign a written provider agreement with HHSC or its designee. By signing the agreement, the provider of TB-related clinic services agrees to comply with the terms of the agreement and all requirements of Texas Medicaid including regulations, rules, handbooks, standards, and guidelines published by HHSC or its designee.
- Submit claims for services covered by Texas Medicaid in the manner and format prescribed by HHSC or its designee.
- Be organized and operated to provide TB-related services, which include, but are not limited to, the covered services as indicated in subsection 9.2, “Services/Benefits, Limitations and Prior Authorization” in this handbook.
• Not provide services within a skilled nursing facility (SNF), intermediate care facility (ICF), or intermediate care facility for persons with mental retardation (ICF-MR).

Refer to: Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for more information.

9.5 Claims Filing and Reimbursement

9.5.1 Claims Information

Procedure codes T1002 and T1003 must be billed as follows:

• Minutes of nursing services can only be billed per calendar day. Minutes of nursing services cannot accumulate over multiple days.

• If the total number of minutes of nursing services per procedure code is less than eight minutes for a calendar day, then no unit of service can be billed for that day.

• If more than one unit of services is billed, each unit except the last must be for the complete 15 minutes. The last unit must be no less than eight minutes of nursing services.

• Time spent in contact investigations is not reimbursable.

Certain injectable TB medications (procedure codes J2020, J2280, and J3000) which also have an oral formulation must be billed with the KX modifier to indicate that the oral formulation is not appropriate for the client.

TB-related clinic services must use benefit code TB1 on all claims and authorization requests. All TB-related clinic services must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form from the vendor of their choice. TMHP does not supply them. When completing a CMS-1500 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information).

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (Vol. 1, General Information) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

9.5.2 Reimbursement

The Medicaid reimbursement rates for TB clinics are calculated in accordance with 1 TAC §355.8081. X-ray services are reimbursed in accordance with 355.8081 and are listed in the current physician fee schedule on the TMHP website at www.tmhp.com.

Effective for dates of service on or after September 1, 2010, Texas Medicaid implemented a 1-percent reduction in the final payment amounts for inpatient, professional, and outpatient services. TEFRA-reimbursed inpatient hospitals (children’s and state teaching hospitals) are excluded from the 1-percent reimbursement reduction.

11. CONTACT TMHP

The TMHP Contact Center at 1-800-925-9126 is available Monday through Friday from 7 a.m. to 7 p.m., Central Time.

12. FORMS
OP.1  **Newborn Child or Children (Form 7484)**

MAIL FORM TO:

Texas Health and Human Services Commission  
Data Integrity 952-X  
PO BOX 149030  
Austin, TX 78714-9030

---

**PURPOSE:** This form is to be used by BIRTHING CENTERS ONLY to report the birth of a child of a mother currently eligible under the Medicaid program of the Texas Health and Human Services Commission (HHSC). All data items below must be completed to avoid delay in future medicaid claims payments. If the child’s FIRST name is unknown at the time this form is completed, the last name will suffice and must be shown.

**ACTION:** To avoid delay in your receiving notice of the Medicaid client number of the newborn child, please complete this document and submit it to HHSC within 5 days after the birth of the child. The 5 days is a guideline and is not mandatory. Notice of the assigned client number will be promptly mailed to you for use in submitting the child’s Medicaid claim.

To avoid delay in processing the child’s Medicaid claims, please retain all Medicaid claims of the newborn child until you receive a client number for the child. All newborn claims should then be submitted to TMHP using the newly assigned client number.

**Note:** A comprehensive Index, including Volume 1 and all handbooks from Volume 2, is included at the end of Volume 1 (General Information).
1. GENERAL INFORMATION

This information is intended for Texas Medicaid independent (freestanding) laboratories, radiological laboratories, and physiological laboratories. The handbook provides information about Texas Medicaid’s benefits, policies, and procedures applicable to these providers.

**Important:** All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1617(a)(6)(A). Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.

**Refer to:** Section 1: Provider Enrollment and Responsibilities (Vol. 1, General Information).

Subsection 8.1, “Medicaid Managed Care” in Section 8, “Managed Care” (Vol. 1, General Information).

2. INDEPENDENT LABORATORY

2.1 Enrollment

Providers must meet the following requirements and submit a complete application in order to enroll as independent (freestanding) laboratory providers:

- The provider must be actively enrolled in Medicare as an independent laboratory.
- The independent laboratory must be independent from a physician’s office or hospital.
- The independent laboratory must meet staff, equipment, and testing capability standards for certification by HHSC.

2.1.1 Clinical Laboratory Improvement Amendments (CLIA)

CLIA regulations set standards that are designed to improve quality in all laboratory testing and include specifications for quality control (QC), quality assurance (QA), patient test management, personnel, and proficiency testing.

The regulations concern all laboratory testing that is used for the assessment of human health or the diagnosis, prevention, or treatment of disease. Under CLIA 88, all clinical laboratory providers (including those located in physicians’ offices), regardless of location, size, or type of laboratory, must meet certain standards based on the complexity of the test(s) they perform.

Providers must hold the appropriate CLIA certificates to perform certain tests as indicated in this handbook.
Refer to: The Centers for Medicare & Medicaid Services (CMS) website at www.cms.gov for the CLIA rules and regulations. The regulations are found at Title 42 Code of Federal Regulations, Part 493.

2.1.2 CLIA Requirements
To be eligible for reimbursement by Medicare and Medicaid, all providers that perform laboratory tests must do the following:

- Pay the applicable fee to CMS.
- Contact the Health and Human Services Commission (HHSC) at 1-512-834-6650 to receive a CLIA registration or certification number. Submit CLIA applications to the following address:
  
  Health Facility Licensing and Certification Division  
  HHSC  
  1100 West 49th Street  
  Austin, TX 78756

- Notify TMHP of the assigned CLIA number at the following address:
  
  Texas Medicaid & Healthcare Partnership  
  Provider Enrollment  
  PO Box 200795  
  Austin, TX 78720-0795

TMHP monitors claims that are submitted by clinical laboratory providers to verify that the clinical laboratory has a CLIA number on file. If the provider does not have a CLIA number on file with TMHP, the laboratory services claims may be denied.

2.2 Services, Benefits, Limitations and Prior Authorization
Texas Medicaid only covers professional and technical services that an independent laboratory is certified by CLIA to perform.

Provider documentation must be maintained in the client’s medical record and must delineate the medical need for administering the laboratory test.

The physician is responsible for providing to the performing laboratory the clinical diagnosis code that is associated with the individual test so that the performing laboratory may bill Texas Medicaid directly for the analysis of the specimen.

2.2.1 CLIA Certificates
Providers that hold full, accredited certifications (i.e., CLIA 1, 3, or 9) may be reimbursed for any laboratory procedure.

Providers that hold waiver CLIA certificates (i.e., CLIA 2) may be reimbursed for the following tests:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>Procedure Codes that Require Modifier QW</th>
</tr>
</thead>
<tbody>
<tr>
<td>81002 81025 82270 83026 85013 85651 87807 87808</td>
<td>80047 80048 80051 80053 80061 80101 80178 81003 81007 82010</td>
</tr>
<tr>
<td>82044 82055 82120 82271 82272 82274 82465 82523 82570 82679</td>
<td>82947 82950 82951 82985 83001 83002 83036 83037 83518</td>
</tr>
<tr>
<td>83605 83718 83721 83880 83986 84443 84450 84460 84478 84520</td>
<td>84703 85014 85018 85576 85610 86294 86308 86318 86618 86701</td>
</tr>
<tr>
<td>86703 87077 87210 87449 87804 87807 87808 87880 87899</td>
<td>86703 87077 87210 87449 87804 87807 87808 87880 87899</td>
</tr>
</tbody>
</table>
Claims submitted with any of the procedure codes specified in the above table may be reimbursed if they are submitted with modifier QW. Modifier QW is required by CLIA for specific codes based on their complexity. Claims will be denied if modifier QW is not included.

Providers that hold Physician-Performed Mictoscopy Procedure (PPMP) CLIA certifications (i.e., CLIA 4) may be reimbursed for the waiver certificate procedure codes in the above table and for the following tests:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>81000 81001 81015 81020 81025 82270 83026 85013 85651 87807</td>
</tr>
<tr>
<td>89190 Q0111 Q0112 Q0113 Q0115</td>
</tr>
</tbody>
</table>

Medicaid bills must accurately reflect those services authorized by the CLIA program and no other procedures.

Providers who have no CLIA certification on file with TMHP may be reimbursed for the following tests:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>80500 80502 81050 82075 83013 83014 83015 86077 86078 86079 86485</td>

</tr>
<tr>
<td>89140 89141</td>
</tr>
</tbody>
</table>

### 2.2.2 Laboratory Handling Fees and Reference Laboratories

#### 2.2.2.1 Independent Laboratory Providers

An independent laboratory provider may be reimbursed for tests performed in the laboratory and for laboratory handling fees for tests that are forwarded to another laboratory (i.e., reference laboratory).

An independent laboratory that forwards a specimen to another laboratory without performing any tests on that specimen may not bill for any laboratory tests.

An independent laboratory may only bill Texas Medicaid for tests referred to another independent or hospital laboratory if it performs at least one test that it is certified by CLIA to perform, and forwards a portion of the same specimen to the other laboratory to have one or more tests performed. The referring laboratory may then bill for tests it has performed on the specimen. When billing, the following information must be on the claim:

- Block 20: “Yes” box must be checked.
- Block 32: The name, address, and ZIP code of the reference laboratory (i.e., the laboratory to which the specimen was referred).
- Block 24-J: The provider number of the reference laboratory must be included next to each procedure to be performed by the reference laboratory.

An independent laboratory that forwards a specimen to another laboratory (independent or hospital) may bill a handling fee (procedure code 99001) for collecting and forwarding the specimen to the other laboratory if the specimen is collected by routine venipuncture or catheterization.

#### 2.2.2.2 Physician Providers

A physician may bill only one laboratory handling charge (procedure code 99000) per client visit when the specimen is collected by drawing a blood sample through venipuncture or collecting a urine specimen by catheterization, unless the specimen is divided and sent to different laboratories or there are different specimens collected and sent to different laboratories.
The claim must indicate the name and address of each laboratory to where a specimen is sent for more than one laboratory handling charge to be paid.

**Refer to:** Subsection 8.2.39, “Laboratory Services” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information about laboratory services reimbursed to physician providers.

### 2.2.2.3 Outpatient Hospital Providers

An outpatient hospital may be reimbursed for a laboratory handling charge (procedure code 99001) for each independent laboratory to where it sends specimens when the laboratory handling charge is not being billed through other methods.

### 2.2.2.4 Family Planning Laboratory Tests

Family planning agencies must use procedure code 99000 with a family planning diagnosis code to bill their laboratory handling charges for laboratory specimens sent out; modifier FP must be omitted. Providers may refer to the appropriate section in the provider manual for instructions for billing family planning services. As with procedure code 99000, only one handling fee may be charged for each laboratory to where the agency sends specimens, regardless of the number of specimens taken.

When family planning test specimens, such as Pap smears, are collected, providers must direct the laboratory to indicate that the claim for the test is to be billed as a family planning service.

**Refer to:** Subsection 3.3, “Services, Benefits, Limitations, and Prior Authorization” in the *Gynecological and Reproductive Health and Family Planning Services Handbook* for the complete list of family planning diagnosis codes.

### 2.2.3 Clinical Laboratory Procedures

The reimbursement for clinical laboratory procedures can be found on the appropriate Texas Medicaid fee schedules on the TMHP website at www.tmhp.com. The following clinical laboratory procedure codes may be reimbursed by Texas Medicaid:

<table>

2.2.3.1 Repeat Procedures

Modifier 91 should be used for repeat clinical diagnostic tests as follows:

- Modifier 91 must not be used when billing the initial procedure. It must be used to indicate the repeated procedure.
- If more than two services are billed on the same day by the same provider, regardless of the use of modifier 91, the claim or detail is denied.
- If a repeated procedure performed by the same provider on the same day is billed without modifier 91, it is denied as a duplicate procedure.
- If a claim is denied for a quantity more than two or as a duplicate procedure, the times of these procedures and services must be documented on appeal.
- Modifier 91 is not required and must not be used when billing multiple quantities of a supply.

Providers may appeal claims that have been denied for documentation of time. Most procedure codes that initially required modifier 91 will continue to be audited for modifier 91.

When appealing claims with modifier 91 for repeat procedures, providers must separate the details. One detail should be appealed without the modifier and one detail with the modifier, including documentation of times for each repeated procedure.

2.2.4 Nonclinical Laboratory Procedures

The reimbursement for nonclinical laboratory procedure codes can be found on the appropriate Texas Medicaid fee schedules on the TMHP website. The following nonclinical laboratory procedure codes may be reimbursed by Texas Medicaid:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>

</tr>
</tbody>
</table>
2.2.4.1 Repeated Procedures

Modifier 76 should be used for repeat nonclinical laboratory procedures and is limited as follows:

- Modifier 76 must not be used when billing the initial procedure. It must be used to indicate the repeated procedure.
- If more than two services are billed on the same day by the same provider, regardless of the use of modifier 76, the claim or detail is denied.
- If a repeated procedure performed by the same provider on the same day is billed without modifier 76, it is denied as a duplicate procedure.
- If a claim is denied for a quantity more than two or as a duplicate procedure, the times of these procedures/services must be documented on appeal.
- Modifier 76 is not required and must not be used when billing multiple quantities of a supply.

When appealing claims with modifier 76 for repeat procedures, providers must separate the details. One detail should be appealed without the modifier and one detail with the modifier, including documentation of times for each repeated procedure.

2.2.5 Automated Laboratory Tests and Laboratory Paneling

The reimbursement for the complete panel procedure code represents the total payment for all automated laboratory tests that are covered under that panel combined with any other automated tests that are billed for the client for the same date of service. The Texas Medicaid allowable fee for the individual components of the complete laboratory panel will not exceed the automated test panel (ATP) fee for the total number of automated tests that are billed for the client for the same date of service.

When all of the components of the panel are performed, the complete panel procedure code must be billed. When only two or more components of the panel are performed, the individual procedure codes for each laboratory test performed may be billed.

2.2.5.1 Automated Laboratory Tests

The following automated laboratory procedure codes may be reimbursed by Texas Medicaid:
2.2.5.2 Laboratory Panels

The following laboratory panel procedure codes may be reimbursed by Texas Medicaid:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>80047</td>
</tr>
</tbody>
</table>

The laboratory panels include the following automated test procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>80047</td>
</tr>
<tr>
<td>82330*</td>
</tr>
<tr>
<td>82374</td>
</tr>
<tr>
<td>82435</td>
</tr>
<tr>
<td>82565</td>
</tr>
<tr>
<td>82947</td>
</tr>
<tr>
<td>84132</td>
</tr>
<tr>
<td>84295</td>
</tr>
<tr>
<td>84520</td>
</tr>
<tr>
<td>84155</td>
</tr>
<tr>
<td>84443*</td>
</tr>
<tr>
<td>84450</td>
</tr>
<tr>
<td>84460</td>
</tr>
<tr>
<td>84520</td>
</tr>
<tr>
<td>85025*</td>
</tr>
</tbody>
</table>

**Exception:** Procedure codes 82330, 83718, 84100, 84443, and 85025 are clinical laboratory procedure codes and may be reimbursed as clinical laboratory procedures according to the appropriate Texas Medicaid fee schedule rate.

2.2.5.3 Fee Calculations for Automated Tests and Laboratory Panels

Automated test and laboratory panel procedure codes may be reimbursed according to the appropriate ATP level payment based on the total number of automated tests that are performed on the same day for the same client.

**Refer to:** The “Clinical Laboratory, Automated Test Panels - Insert” Texas Medicaid fee schedule on the TMHP website at www.tmhp.com for the ATP level payment for automated test and lab panel procedure codes.
**ATP Level Pricing**

The amount that is allowed for each automated test and lab panel procedure code that is billed with the same date of service for the same client will be a percentage of the total ATP level payment. To calculate the automated test pricing, the following information is necessary:

- The number of automated tests that are billed for the client for the same date of service (including individual automated tests and all automated tests that are represented by the laboratory panels.) Procedure codes that are duplicated between panels are not counted more than once.
- The ATP pricing fee that corresponds to the number of automated tests that are billed for the client for the same date of service.
- The total billed amount for all automated test and laboratory panel procedure codes that are billed for the client for the same date of service.

The automated test pricing may be calculated as follows:

**Step 1**
A percentage for each automated test or lab panel detail is derived from dividing the billed amount (B/A) for each procedure by the total billed amount (TB/A) for all automated test and laboratory panel procedure codes with the same date of service for the same client.

**Example:**

<table>
<thead>
<tr>
<th>Automated Test</th>
<th>B/A</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Detail 1 Automated Test</td>
<td>$50.00</td>
<td>29%</td>
</tr>
<tr>
<td>Detail 2 Automated Test</td>
<td>$25.00</td>
<td>14%</td>
</tr>
<tr>
<td>Detail 3 Lab Panel</td>
<td>$100.00</td>
<td>57%</td>
</tr>
<tr>
<td>Detail 4 Clinical Lab Test</td>
<td>$20.00</td>
<td>0%</td>
</tr>
</tbody>
</table>

\[ \text{TB/A} = \$175.00 \]

**Note:** The TB/A is for automated test and laboratory panel procedure codes (details 1, 2, and 3 only). Detail 4 is not included in the calculations for the automated tests because it is a clinical lab procedure code and may be reimbursed as indicated on the fee schedule.

**Calculations**

<table>
<thead>
<tr>
<th>Automated Test</th>
<th>( \frac{\text{B/A}}{\text{TB/A}} )</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Detail 1</td>
<td>( \frac{50.00}{175.00} )</td>
<td>29%</td>
</tr>
<tr>
<td>Detail 2</td>
<td>( \frac{25.00}{175.00} )</td>
<td>14%</td>
</tr>
<tr>
<td>Detail 3</td>
<td>( \frac{100.00}{175.00} )</td>
<td>57%</td>
</tr>
</tbody>
</table>
Step 2
The detail allowed amount for each automated test (AT) procedure code will be the calculated percentage of the ATP level payment.

Example:

<table>
<thead>
<tr>
<th>Automated Test</th>
<th># of Automated Tests</th>
<th>Allowed Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Detail 1 Automated Test</td>
<td>1</td>
<td>$3.10</td>
</tr>
<tr>
<td>Detail 2 Automated Test</td>
<td>1</td>
<td>$1.55</td>
</tr>
<tr>
<td>Detail 3 Lab Panel</td>
<td>4</td>
<td>$6.19</td>
</tr>
<tr>
<td>Detail 4 Clinical Lab Test</td>
<td>0</td>
<td>Fee Schedule</td>
</tr>
</tbody>
</table>

ATP = 6 = $10.84

Note: The total number of automated tests includes the individual automated test procedure codes and the number of automated tests that are represented by each panel procedure code that is billed. Automated tests that are duplicated between panels are not counted more than once.

Calculations:

<table>
<thead>
<tr>
<th>Automated Test</th>
<th># of Automated Tests</th>
<th>Allowed Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Detail 1</td>
<td>29% of 10.84</td>
<td>(.285714285714...)X(10.84) = $3.10</td>
</tr>
<tr>
<td>Detail 2</td>
<td>14% of 10.84</td>
<td>(.142857142857...)X(10.84) = $1.55</td>
</tr>
<tr>
<td>Detail 3</td>
<td>57% of 10.84</td>
<td>(.571428571428...)X(10.84) = $6.19</td>
</tr>
</tbody>
</table>

$ 10.84

Note: If a clinical laboratory procedure code is included in a panel, the fee schedule rate for the clinical laboratory procedure is added to the ATP rate, and the resulting sum is divided among the automated test and laboratory panel procedure codes that are billed for the date of service.

The total allowed amount for all laboratory services that are billed for the client for the same date of service will represent the ATP level pricing combined with any clinical laboratory test fee schedule pricing.

2.2.6 Complete Blood Count (CBC)
A CBC and its components may be reimbursed by Texas Medicaid without prior authorization. The medical necessity for all laboratory services must be documented in the client’s medical record, and the services must be referenced to an appropriate diagnosis code.

Texas Medicaid considers a baseline CBC appropriate for the evaluation and management of existing and suspected disease processes. CBC tests should be individualized and based on client history, clinical indications, or proposed therapy, and will not be reimbursed for screening purposes.

When related CBC procedure codes are billed for the same date of service by the same provider, the first procedure code will be reimbursed and all other procedure codes will be denied.

The following CBC procedure codes may be reimbursed:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>85025</td>
<td>85027</td>
<td>85032</td>
</tr>
</tbody>
</table>
The following hemogram component procedure codes may be reimbursed:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>85013</td>
</tr>
</tbody>
</table>

The following differential analysis procedure codes may be reimbursed:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>85004</td>
</tr>
</tbody>
</table>

The following platelet procedure code may be reimbursed:

<table>
<thead>
<tr>
<th>Procedure Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>85049</td>
</tr>
</tbody>
</table>

The following reticulocyte procedure codes may be reimbursed:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>85044</td>
</tr>
</tbody>
</table>

Reticulocyte procedure codes may be reimbursed in addition to the CBC, hemogram, differential analysis, and platelet procedure codes indicated above.

The procedure codes in Column A of the following table will be denied if they are billed with the same date of service by the same provider as the procedure codes in Column B:

<table>
<thead>
<tr>
<th>Column A (Denied)</th>
<th>Column B</th>
</tr>
</thead>
<tbody>
<tr>
<td>85004, 85007, 85008, 85009, 85013, 85014, 85018, 85027, 85032, 85041, 85048, 85049</td>
<td>85025</td>
</tr>
<tr>
<td>85004</td>
<td>85007, 85009, 85025, 85027</td>
</tr>
<tr>
<td>85008</td>
<td>85004, 85025, 85027, 85032, 85048, 85049</td>
</tr>
<tr>
<td>85013, 85014, 85018, 85041, 85048, 85049</td>
<td>85025, 85027</td>
</tr>
<tr>
<td>85032</td>
<td>85025, 85027, 85041, 85048, 85049</td>
</tr>
<tr>
<td>85044</td>
<td>85045, 85046</td>
</tr>
<tr>
<td>85045</td>
<td>85046</td>
</tr>
</tbody>
</table>

### 2.2.7 Genetic Testing for Colorectal Cancer

Genetic testing is provided to clients who have a first- or second-degree relative who has or has had colorectal cancer in order to determine if the client may have increased risk for developing colorectal cancer.

**Note:** A first-degree relative is defined as: sibling, parent, or offspring. A second-degree relative is defined as: uncle, aunt, grandparent, nephew, niece, or half-sibling.

Genetic testing for colorectal cancer may be reimbursed by Texas Medicaid using the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>S3828</td>
</tr>
</tbody>
</table>
Interpretation of gene mutation analysis results are part of the evaluation and management service and will not be reimbursed separately.

Genetic test results, when informative, may influence clinical management decisions. The documentation that is maintained in the client's medical record must reflect that the client or family member has been given information on the nature, inheritance, and implications of genetic disorders to help them make informed medical and personal decisions prior to the genetic testing.

### 2.2.7.1 Authorization Requirements

Prior authorization is required for gene mutation analysis procedure codes S3828, S3829, S3830, S3831, S3833, and S3834.

Procedure codes S3828, S3829, S3830, S3831, S3833, or S3834 may be reimbursed once per lifetime when billed by any provider. Additional services will not be prior authorized.

Prior authorization requests may be considered for Familial Adenomatous Polyposis (FAP) testing procedure codes S3833 and S3834 for individuals with well defined hereditary cancer syndromes and for which either a positive or negative result will change medical care. The request must include the following criteria for testing:

- The client has greater than 20 polyps or has a first-degree relative with FAP and a documented mutation.
- The client is 8 years of age or older.

**Note:** Genetic testing for FAP should not be offered to clients who are 7 years of age and younger.

Prior authorization requests may be considered for Hereditary Nonpolyposis Colorectal Cancer (HPNCC) testing procedure codes S3828, S3829, S3830, and S3831 for clients who are 21 years of age and older. Testing for HPNCC is used to determine whether an individual has an increased risk for colorectal cancer or other HNPCC-associated cancers. Results of the test may influence clinical management decisions. The request must include one or more of the following criteria for testing:

- The client has three or more family members (at least one must be a first-degree relative) with colorectal cancer, and FAP has been ruled out. Two successive generations were affected, and one or more of the relatives was diagnosed with colorectal cancer at 50 years of age or younger.
- The client has had two HNPCC cancers.
- The client has colorectal cancer and a first-degree relative who also has colorectal cancer or HNPCC extracolonic cancer at 50 years of age or younger or colorectal adenoma at 40 years of age or younger.
- The client has had colorectal cancer or endometrial cancer at 50 years of age or younger.
- The client has had right-sided colorectal cancer with a undifferentiated pattern on histology at 50 years of age or younger.
- The client has had signet-cell type colorectal cancer at 50 years of age or younger.
- The client has had colorectal adenoma at 40 years of age or younger.
- The client is an asymptomatic individual with a first- or second-degree relative with a documented HPNCC mutation.

**Note:** HPNCC genetic testing should not be offered to clients who are 20 years of age and younger.

*If genetic testing is ordered for clients who are 20 years of age and younger, the rationale for the medical necessity must be included in the documentation.*
A written authorization request, signed and dated by the referring provider, must be submitted. All signatures must be current, unaltered, original, and handwritten. Computerized or stamped signatures will not be accepted. The original signature copy must be kept in the physician’s medical record for the client.

To complete the prior authorization process, the provider must mail or fax the request to the TMHP Special Medical Prior Authorization Unit and include documentation of medical necessity.

To facilitate a determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including accurate medical necessity of the services requested.

Guidelines for MLH1 and MLH2 mutation testing are based on guidelines established by the American College of Medical Genetics and the American Gastroenterological Association.

A request for retroactive authorization must be submitted no later than seven calendar days beginning the day after the lab draw is performed.

### 2.2.8 Human Immunodeficiency Virus (HIV) Drug Resistance Testing

Types of testing for HIV drug resistance include:

- Genotypic test that identifies the presence of mutations that are known to cause reduced drug susceptibility.
- Phenotypic test that measures drug susceptibility of the virus by determining the concentration of drug that inhibits viral replication in vitro.

Standard treatment regimens for HIV therapy require a combination of three or more drugs. Standard therapy continues if a reduction in viral load is achieved. Incomplete virus suppression favors the development of a drug resistance and jeopardizes the success of future therapy. Testing for drug resistance as a prerequisite to further therapy is indicated under such circumstances.

In order to ensure accurate testing results, the client should be on appropriate antiretroviral therapy at the time of testing or within four weeks of discontinuing the drug regimen.

Testing for antiretroviral drug resistance is recommended before the initiation of therapy in treatment-naïve children.

Testing for antiretroviral drug resistance is indicated in certain clinical situations. These indications include any of the following:

- Individuals who have achieved a suboptimal response after the initiation of antiretroviral therapy.
- For individuals who have an initial (new onset) acute HIV infection, to determine if a drug-resistant viral strain was transmitted and to plan a drug regimen accordingly.
- In individuals who have virological failure during antiretroviral therapy, laboratory results showing HIV RNA levels greater than 500 and less than 1,000 copies/ml.
- HIV-infected pregnant women before initiation of therapy.
- HIV-infected pregnant women entering pregnancy with HIV RNA levels at or below 400 copies/ml while the women are on therapy.

Documentation must be maintained in the client’s medical record to support medical necessity for the drug-resistance testing. Specific documentation requirements are dependent on the rationale for the testing. Documentation must include, but is not limited to, the date the drug regimen was initiated, the dosage and frequency of the prescribed medication, and laboratory tests that support all of the following:

- Suboptimal response to the specific drug therapy
- Acute HIV infection, with identification of the specific viral strain
- HIV RNA levels greater than 500 and less than 1,000 copies/ml
- Positive pregnancy results in an HIV positive female client
- HIV RNA levels of 400 copies/ml or less during pregnancy

Drug resistance testing is not recommended when one of the following criteria is met:
- When the drug regimen has been discontinued for more than four weeks
- When the viral load is less than 500 copies/ml

The following procedure codes for antiretroviral therapy drug resistance may be reimbursed by Texas Medicaid:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>87900</td>
</tr>
</tbody>
</table>

Procedure code 87904 may be reimbursed only when it is billed with the same date of service by the same provider as procedure code 87903.

Procedure codes 87900, 87901, 87903, and 87906 may each be reimbursed once per day and up to twice per rolling year when they are billed by the same provider.

If additional drug-resistant testing is performed within the same rolling year, the provider must submit documentation that supports the medical necessity of the additional testing.

Authorization is not required for either genotypic or phenotypic testing.

**2.2.9 Iron Studies**

Iron studies are used in the evaluation of disorders of iron metabolism and are primarily indicated for the workup of iron deficiency and iron overload.

The following procedure codes may be reimbursed by Texas Medicaid without prior authorization for medically necessary iron studies:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>82728</td>
</tr>
</tbody>
</table>

Iron studies may be reimbursed when the appropriate procedure code is billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>23871 23872 23873 23874 23875 23876 23877 23879 24900 24901 24910 24911 24920 24921 24930 24931 24940 24941 24950 24951 24960 24961 24970 24971 24980 24981 24990 24991 25000 25001 25002 25003 25010 25011 25012 25013 25020 25021 25022 25023 25030 25031 25032 25033 25040 25041 25042 25043 25050 25051 25052 25053 25060 25061 25062 25063 25070 25071 25072 25073 25080 25081 25082 25083 25090 25091 25092 25093 25094 25095 2578 2579 27501 27502 27503 27509 2800 2801 2808 2809 2810 2811 2812 2813 2814 2818 2819 2821 28241 28242 28249</td>
</tr>
</tbody>
</table>
Procedure code 83550 will be denied if it is billed with the same date of service by the same provider as procedure code 84466. All other iron studies may be reimbursed if they are billed with the same date of service by the same provider.

Modifier 91 may be used if a repeat procedure on the same day by the same provider is medically necessary.

### 2.2.10 Urinalysis

The following procedure codes may be reimbursed for urinalysis laboratory tests without prior authorization:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>81000</td>
</tr>
<tr>
<td>84583</td>
</tr>
</tbody>
</table>

When related urinalysis procedure codes are billed for the same date of service by the same provider, the first procedure code will be reimbursed and all other procedure codes will be denied. Claims will be denied with an explanation directing the provider to appeal with a copy of their Remittance and Status (R&S) Report and the appropriate comprehensive procedure code if they are not satisfied with their reimbursement.

**Example:** If a provider bills procedure codes 81002 and 81015 for the same date of service, the first procedure code billed may be reimbursed and the second procedure code billed will be denied. The provider will be directed to appeal the claim with the more inclusive procedure code (in this example, procedure code 81000).

Procedure code 84578 may be reimbursed for the same date of service as procedure code 81000, 81001, 81002, 81003, 81005, or 81020.
The procedure codes in Column A of the following table will be denied if they are billed with the same date of service by the same provider as the procedure codes in Column B:

<table>
<thead>
<tr>
<th>Column A (Denied)</th>
<th>Column B</th>
</tr>
</thead>
<tbody>
<tr>
<td>81002, 81015</td>
<td>81000</td>
</tr>
<tr>
<td>81002, 81003, 81007, 81015</td>
<td>81001</td>
</tr>
<tr>
<td>81000</td>
<td>81003, 81005, 81020</td>
</tr>
<tr>
<td>82044</td>
<td>81015</td>
</tr>
<tr>
<td>84578</td>
<td>84580, 84583</td>
</tr>
<tr>
<td>81000, 81015</td>
<td>81007</td>
</tr>
</tbody>
</table>

2.2.11 Additional Laboratory Services

2.2.11.1 BRCA Testing

Refer to: Subsection 8.2.13, “BRCA Testing” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for more information.

2.2.11.2 Colorectal Cancer Screening

Refer to: Subsection 2.3.3.4, “Colorectal Cancer Screening” in Hospital Services Handbook (Vol. 2, Provider Handbooks) for more information.

Subsection 8.2.13.5, “Colorectal Cancer Screening” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for more information.

2.2.11.3 Cytopathology Studies

Refer to: Subsection 8.2.24.4, “Cytopathology Studies—Other Than Gynecological” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for more information.

Subsection 5.11, “Pap Smear (Cytopathology Studies)” in Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks) for more information.

2.2.11.4 Helicobacter pylori Testing

Refer to: Subsection 8.2.24.9, “Helicobacter Pylori (H. Pylori)” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for more information.

2.2.11.5 Laboratory Services for Clients on Dialysis

Refer to: Subsection 7.2.9, “Laboratory and Radiology Services” in Outpatient Services Handbook (Vol. 2, Provider Handbooks) for more information.

2.2.11.6 Prognostic Breast and Gynecological Cancer Studies

Refer to: Subsection 7.2.9, “Laboratory and Radiology Services” in Outpatient Services Handbook (Vol. 2, Provider Handbooks) for more information.

2.2.11.7 Services Incidental to Surgery and/or Anesthesia

Refer to: Subsection 8.2.70.11, “Services Incidental to Surgery and/or Anesthesia” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for more information.
2.2.11.8 THSteps Outpatient Laboratory Services

Refer to: Subsection 5.3.2.7, “Laboratory Procedures” in Children’s Services Handbook (Vol.2, Provider Handbooks) for more information.

2.2.11.9 Authorization Requirements

Prior authorization is not required for most laboratory services. Providers may refer to the specific sections for those services that require authorizations.

2.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including independent laboratory services. Independent laboratory services are subject to retrospective review and recoupment if documentation does not support the service billed.

Independent laboratory documentation must include the physician’s signed and dated order for the laboratory test(s). The specific tests ordered by the physician must be listed on the order. The test results must also be included in the documentation.

2.4 Claims Filing and Reimbursement

2.4.1 Claims Information

When family planning test specimens, such as Pap smears, are collected, providers must direct the laboratory to indicate that the claim for the test is to be billed as a family planning service using diagnosis code V2509.

A National Provider Identifier (NPI) is required for all claims. In addition, for paper claims, the Texas Provider Identifier (TPI) is required for the billing and performing provider only. NPI-only is required for all other fields.

Providers must submit independent laboratory services to TMHP in an approved electronic format or on a CMS-1500 paper claim form. Providers must purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (Vol. 1, General Information). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

2.4.1.1 Electronic Filing for Laboratory Providers

Referring provider information is always required on laboratory claims. Failure to submit this data will result in a claim rejection on the TMHP Electronic Data Interchange (EDI).

When the place of service is 6, and the billing provider identifier belongs to a laboratory, there is no need to submit the same provider identifier in the facility ID field. This notation causes the claim to suspend processing unnecessarily, and may cause a delay in the disposition of the claim. For questions about the electronic fields, contact the commercial software vendor or the TMHP EDI Help Desk at 1-888-863-3638.
2.4.2 Reimbursement

The Medicaid rates for independent laboratories are calculated in accordance with 1 TAC §355.8081 and §355.8610, and the Deficit Reduction Act (DEFRA) of 1984. By federal law, Medicaid payments for clinical laboratory services cannot exceed the Medicare payment for that service.

As the result of the Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982, independent laboratories are not directly reimbursed by Texas Medicaid when providing tests to clients who are registered as hospital inpatients. Hospital reimbursements (i.e., inpatient DRG reimbursement) include payment for all pathology and laboratory services, including those sent to referral laboratories. Hospital-based and referral laboratory providers must obtain reimbursement for the technical portion from the hospital. The technical portion includes the handling of specimens and the automated or technician-generated reading and reporting of results. These services are not billable to Medicaid-covered clients.

Texas Medicaid pays up to the amount allowed for the total component for the same procedure, same client, same date of service, any provider.

- Providers who perform the technical service and interpretation must bill for the total component.
- Providers who perform only the technical service must bill for the technical component.
- Providers who perform only the interpretation must bill for the interpretation component.

Claims filed in excess of the amount allowed for the total component for the same procedure, same dates of service, same client, any provider, are denied. Claims are paid based on the order in which they are received.

For example, if a claim is received for the total component and TMHP has already made payment for the technical or interpretation component for the same procedure, same dates of service, same client, any provider, the claim for the total component will be denied as previously paid to another provider. The same is true if a total component has already been paid and claims are received for the individual components.

3. RADIOLOGICAL AND PHYSIOLOGICAL LABORATORY SERVICES

3.1 Enrollment

To enroll in Texas Medicaid, physiological laboratory, portable X-ray supplier, independent diagnostic testing facility (IDTF), and radiological laboratory providers must be actively enrolled in Medicare.

3.1.1 Enrollment Criteria for Mammography Providers

All mammography providers, including those providing stereotactic biopsies, must be certified by the Bureau of Radiation Control (BRC).

Additionally, the Department of State Health Services (DSHS) issues mammography certification to providers who render mammography services. Providers can submit this certification to the TMHP Provider Enrollment Department in lieu of certification issued by the Food and Drug Administration (FDA), because a mammography certification issued by DSHS is recognized by the FDA. TMHP will also accept mammography certification issued by the FDA. The certificate will contain the BRC certification number, dates of issue and expiration, type of service, and Texas Medicaid and Children with Special Health Care Needs (CShCN) Services Program provider identifiers.
Providers must check the expiration date of their mammography certification and submit an updated mammography certification prior to the expiration date. The certifications may be mailed or faxed to:

Texas Medicaid & Healthcare Partnership  
Provider Enrollment  
PO Box 200795  
Austin, TX 78720-0795  
Fax: 1-512-514-4214

### 3.2 Services, Benefits, Limitations, and Prior Authorization

The following high-technology (high-tech) radiology services may be reimbursed by Texas Medicaid with prior authorization:

- Cardiac nuclear imagining
- Computed tomography (CT)
- Computed tomography angiography (CTA)
- Magnetic resonance imaging (MRI)
- Magnetic resonance angiography (MRA)
- Positron emission tomography (PET) scan imaging

*Note:* Providers and facilities are required to use the lowest possible radiation dose that is consistent with acceptable image quality for cardiac nuclear imaging, CT, and PET examinations of all clients. It is recommended that providers and facilities use national standards such as those established by the American College of Radiology in their ACR Practice Guidelines and Technical Standards manual.

Radiology interpretations in any place of service and ultrasound interpretations in the inpatient hospital setting will be denied if they are billed by the attending physician. Services that are billed by the attending physician are included in the facility fee and are not reimbursed separately.

*Note:* The 3-dimensional (3-D) obstetric ultrasound is not a benefit of Texas Medicaid.

#### 3.2.1 Cardiac Nuclear Imaging

Single photon emission cardiac tomography (SPECT), or cardiac nuclear imaging, is a benefit of Texas Medicaid and may be reimbursed using the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>78414</td>
<td>78428</td>
</tr>
<tr>
<td>78481</td>
<td>78483</td>
</tr>
</tbody>
</table>

The cardiac nuclear imaging study may be reimbursed separately from the diagnostic radiopharmaceutical.

*Refer to:* The online fee lookup (OFL) or the applicable fee schedules on the TMHP website at www.tmhp.com to review the diagnostic radiopharmaceuticals that are reimbursed by Texas Medicaid.

The procedure codes in Column A of the following table will be denied if they are billed with the corresponding procedure codes in Column B:

<table>
<thead>
<tr>
<th>Column A (Denied)</th>
<th></th>
<th>Column B</th>
</tr>
</thead>
<tbody>
<tr>
<td>78468</td>
<td>78446</td>
<td></td>
</tr>
<tr>
<td>78481</td>
<td>78472</td>
<td></td>
</tr>
</tbody>
</table>
3.2.1 Authorization Requirements

Authorization is required for cardiac nuclear imagining.

Refer to: Subsection 3.2.5, “Authorization Requirements for CT, CTA, MRI, fMRI, MRA, PET, and Cardiac Nuclear Imaging Services” in this handbook.

3.2.2 Computed Tomography and Magnetic Resonance Imaging

CT, CTA, MRI, and MRA services are benefits of Texas Medicaid.

The following revenue codes may be reimbursed with prior authorization for CT, CTA, MRI, and MRA radiology services:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Procedure Codes</td>
</tr>
</tbody>
</table>

The following procedure codes may be reimbursed with prior authorization for CT, CTA, MRI, and MRA radiology services:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Procedure Codes</td>
</tr>
</tbody>
</table>

The addition of post 3-D reconstruction (procedure codes 76376 and 76377) CT, CTA, MRI, and MRA studies must be prior authorized. No additional payment will be made in absence of prior authorization.

3.2.2.1 Functional MRI (fMRI)

Texas Medicaid considers fMRI medically necessary when it is being used as part of a preoperative evaluation for a planned craniotomy and is required for localization of eloquent areas of the brain, such as those responsible for speech, language, motor function, and senses, which might potentially be put at risk during the proposed surgery.

Neurofunctional testing procedure code 96020 must be reported in conjunction with brain fMRI procedure code 70555. Procedure code 96020 is informational and will not be reimbursed separately.
The procedure codes in Column A of the following table will be denied if they are billed with the same date of service by the same provider as the corresponding procedure codes in Column B:

<table>
<thead>
<tr>
<th>Column A (Denied)</th>
<th>Column B</th>
</tr>
</thead>
<tbody>
<tr>
<td>01922, 70555</td>
<td>70554</td>
</tr>
<tr>
<td>01922</td>
<td>70555</td>
</tr>
</tbody>
</table>

### 3.2.2.2 Intraoperative MRI (iMRI)

Indications for intracranial neurosurgical procedures using intraoperative MRI (iMRI) include, but are not limited to, the following:

- Oncologic neurosurgical procedures
- Epilepsy
- Chiari surgery
- Deep brain stimulators

Only one iMRI procedure code may be billed per operative session. Procedure codes 70557, 70558, and 70559 must not be billed in conjunction with procedure code 61751, 77021, or 77022.

Intraoperative MRI procedure codes 70557, 70558, and 70559 that are billed with modifier 26 may be reimbursed to physician providers for interpretation.

Procedure codes 75559, 75560, 75563, and 75564 must be billed in conjunction with stress testing procedure codes 93015, 93016, 93017, and 93018.

The procedure codes in Column A of the following table will be denied if they are billed with the same date of service by the same provider as the corresponding procedure codes in Column B:

<table>
<thead>
<tr>
<th>Column A (Denied)</th>
<th>Column B</th>
</tr>
</thead>
<tbody>
<tr>
<td>01922, 77021</td>
<td>70557</td>
</tr>
<tr>
<td>01922, 36000, 36005, 36406, 36410, 70557, 76000, 76942, 77002, 77021, 90760, 90765, 90772, 90774, 90775</td>
<td>70558, 70559</td>
</tr>
<tr>
<td>70558</td>
<td>70559</td>
</tr>
</tbody>
</table>

### 3.2.2.3 Authorization Requirements and Flexibility

Authorization is required for CT, CTA, MRI, fMRI, and MRA procedures.

**Note:** Intraoperative MRI (iMRI) does not require prior authorization.

**Refer to:** Subsection 3.2.5, “Authorization Requirements for CT, CTA, MRI, fMRI, MRA, PET, and Cardiac Nuclear Imaging Services” in this handbook.

If the ordering physician or radiologist determines that a CT, CTA, MRI, fMRI, or MRA procedure that is different from the authorized procedure is required or that additional procedures are required, the following will apply:

- The procedure performed is less complex than the procedure authorized but of the same modality (e.g., an MRI with contrast is prior authorized and the actual procedure performed is an MRI without contrast). Full reimbursement is allowed for the billed procedure.

- The authorized procedure is performed and an additional higher-level procedure of the same modality is deemed necessary within the same authorization period. A separate authorization is required. The additional procedure must be prior authorized separately and submitted on a separate claim.
• The procedure billed is more complex than the procedure authorized but of the same modality. No authorization update will result in reimbursement according to the rate of the lesser authorized code. For full reimbursement, the authorization requires an update.

The following table includes the recognized relationships for authorization flexibility:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>Level 1 (High)</th>
<th>Level 2 (Moderate)</th>
<th>Level 3 (Low)</th>
</tr>
</thead>
<tbody>
<tr>
<td>70470</td>
<td>70460</td>
<td>70450</td>
<td></td>
</tr>
<tr>

<td>75557</td>
<td>75563</td>
<td></td>
</tr>
<tr>
<td>75561</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### 3.2.3 Positron Emission Tomography (PET) Scan Imaging

PET scan imaging services are benefits of Texas Medicaid and may be reimbursed using the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>Level 1 (High)</th>
<th>Level 2 (Moderate)</th>
<th>Level 3 (Low)</th>
</tr>
</thead>
<tbody>
<tr>
<td>78608</td>
<td>78811</td>
<td>78812</td>
<td>78813</td>
</tr>
</tbody>
</table>

Procedure codes 78459, 78491, and 78492 are not reimbursed by Texas Medicaid.
The PET scan procedure may be reimbursed separately from the diagnostic radiopharmaceutical.

Refer to: The online fee lookup (OFL) or the applicable fee schedules on the TMHP website at www.tmhp.com to review the diagnostic radiopharmaceuticals that are reimbursed by Texas Medicaid.

The procedure codes in Column A of the following table will be denied if they are billed with the same date of service by the same provider as the corresponding procedure codes in Column B:

<table>
<thead>
<tr>
<th>Column A (Denied)</th>
<th>Column B</th>
</tr>
</thead>
<tbody>
<tr>
<td>78811</td>
<td>78812</td>
</tr>
<tr>
<td>78811, 78812</td>
<td>78813</td>
</tr>
<tr>
<td>78811, 78812, 78813</td>
<td>78814</td>
</tr>
<tr>
<td>78811, 78812, 78813, 78814</td>
<td>78815</td>
</tr>
<tr>
<td>78811, 78812, 78813, 78814, 78815</td>
<td>78816</td>
</tr>
</tbody>
</table>

3.2.3.1 Authorization Requirements

Prior authorization is required for scheduled outpatient PET imaging services.

Refer to: Subsection 3.2.5, “Authorization Requirements for CT, CTA, MRI, fMRI, MRA, PET, and Cardiac Nuclear Imaging Services” in this handbook.

3.2.4 Physician-Performed Radiology Services

3.2.5 Authorization Requirements for CT, CTA, MRI, fMRI, MRA, PET, and Cardiac Nuclear Imaging Services

Prior authorization is not required for emergency department services, outpatient observation services, or inpatient hospital radiology services.

Prior authorization is required for outpatient nonemergent services (i.e., those that are planned or scheduled). Prior authorization must be obtained before the service is rendered.

The following table summarizes the authorization requirements for CT, CTA, MRI, fMRI, MRA, PET, and cardiac nuclear imaging services:

<table>
<thead>
<tr>
<th>Condition</th>
<th>Authorization Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Emergency department visit</td>
<td>Authorization is not required for emergency department radiology services that are rendered during an emergency department visit.</td>
</tr>
<tr>
<td></td>
<td>• For professional claims, the appropriate radiology procedure code must be billed with modifier U6.</td>
</tr>
<tr>
<td></td>
<td>• The facility may be reimbursed using the appropriate, corresponding emergency services revenue code.</td>
</tr>
<tr>
<td>Outpatient observation</td>
<td>Authorization is not required for radiology services rendered during outpatient observation.</td>
</tr>
<tr>
<td></td>
<td>• For professional claims, the appropriate radiology procedure code must be billed with modifier U6.</td>
</tr>
<tr>
<td></td>
<td>• The facility may be reimbursed using the appropriate, corresponding outpatient observation revenue code.</td>
</tr>
</tbody>
</table>
Nonemergent condition: planned or scheduled radiology service

Texas Medicaid defines a nonemergent condition as a symptom or condition that is neither acute nor severe and can be diagnosed and treated immediately, or that allows adequate time to schedule an office visit for a history, physical, or diagnostic studies prior to diagnosis and treatment.

Prior authorization is required for outpatient nonemergent (i.e., those studies that are planned or scheduled) CT, CTA, MRI, fMRI, MRA, PET scan, and cardiac nuclear imaging services.

**Important:** The authorization number must be on the claim when it is submitted to TMHP for reimbursement. Only one authorization is allowed per claim. For the most accurate and efficient claims processing, TMHP recommends that the procedure code that is submitted on the claim match the procedure code that is authorized. Providers are encouraged to contact TMHP and update the prior authorization if the ordering physician or radiologist changes the actual procedure that is performed. Providers have 14 calendar days after the procedure is performed to update the prior authorization.

Additional or alternate studies identified and ordered by the radiologist at the time of a prior-authorized study meet the definition of urgent condition and require retroactive authorization.

**Refer to:** Subsection 3.2.5.1, "Retroactive Authorization" in this handbook for more information.

Outpatient urgent condition

Retroactive authorization is required for unplanned radiology procedures performed during other planned or scheduled outpatient visits or procedures.

Texas Medicaid defines an urgent condition as a symptom or condition that is not an emergency, but requires further diagnostic work-up or treatment within 24 hours to avoid a subsequent emergent situation.

**Refer to:** Subsection 3.2.5.1, “Retroactive Authorization” in this handbook for more information.

**Note:** Additional or alternate studies identified and ordered by the radiologist at the time of a prior-authorized study meet the definition of urgent condition and require retroactive authorization.
Prior authorization of nonemergent services is considered on an individual basis, adhering to standard clinical evidence-based guidelines. Documentation must support medical necessity for the service and must be maintained in the client’s medical record, both by the ordering physician (i.e., the physician who orders the study) and the performing facility.

Nationally-accepted guidelines and radiology protocols based on medical literature are used in the authorization processes for urgent, emergent, and nonemergent services. These include, but are not limited to:

- American College of Radiology (specifically, their Appropriateness Criteria)
- American Academy of Neurology
- American Academy of Orthopedic Surgeons
- American College of Cardiology
- American Heart Association
- National Comprehensive Cancer Care Network

Refer to: Subsection 3.2.2.3, “Authorization Requirements and Flexibility” in this handbook for information about authorization flexibility for CT, CTA, MRI, fMRI, and MRA procedures.

### 3.2.5.1 Retroactive Authorization

A request for retroactive authorization for an emergent or urgent CT, MR, PET, or cardiac nuclear imaging service must be submitted no later than 14 calendar days after the day on which the study was completed.

<table>
<thead>
<tr>
<th>Condition</th>
<th>Authorization Requirements</th>
</tr>
</thead>
</table>
| Outpatient emergent condition    | Retroactive authorization is required for unplanned radiology procedures performed during other planned or scheduled outpatient visits or procedures. Texas Medicaid defines an emergent condition as a medical condition (including emergency labor and delivery) manifesting itself by acute symptoms of sufficient severity (including severe pain, psychiatric disturbances, or symptoms of substance abuse) such that a prudent layperson with an average knowledge of health and medicine could reasonably expect the absence of immediate medical attention to result in at least one of the following:  
  - Placing the recipient’s health (or, with respect to a pregnant woman, the health of the woman or her unborn child) in serious jeopardy
  - Serious impairment to bodily functions
  - Serious dysfunction to any bodily organ or part

The physician must determine that a medical emergency, which imminently threatens life or limb exists and that the medical emergency requires advanced diagnostic imaging.

Refer to: Subsection 3.2.5.1, “Retroactive Authorization” in this handbook for more information.

Inpatient hospital | Authorization is not required for inpatient hospital radiology services.
Retroactive authorization of urgent or emergent services is considered on an individual basis, adhering to standard clinical evidence-based guidelines. Documentation must support medical necessity for the study and must be maintained in the client’s medical record, both by the ordering physician (i.e., the physician ordering the study) and the performing facility.

Retroactive authorization for outpatient urgent services is considered when all of the following criteria are met:

- The physician who renders the imaging service determines, during the provision of prior-authorized services, that additional or alternate procedures are medically indicated.
- The urgent condition requires additional or alternate advanced diagnostic imaging.

Retroactive authorization for outpatient emergent services is considered when all of the following criteria are met:

- The physician determines that a medical emergency that imminently threatens life or limb exists.
- The medical emergency requires advanced diagnostic imaging.

Retroactive authorization is not required when a prior-authorized CT or MR procedure is changed by the ordering physician or radiologist to a lesser procedure of the same modality (e.g., MRI with contrast is authorized and the actual procedure performed is MRI without contrast).

3.2.5.2 Request Form and Documentation

Regardless of method of submission, the ordering physician must complete and retain the Radiology Prior Authorization Request Form with an original signature in the client’s medical record.

Providers must submit the form with the request information related to the medical necessity for the service, including all of the following:

- Diagnosis
- Treatment history
- Treatment plan
- Medications that the client is currently taking
- Previous imaging results

Providers may also be asked to provide additional documentation as necessary during the authorization process.

The physician’s signature must be current, unaltered, original, and handwritten. A computerized or stamped signature and date is not acceptable.

Section 1 of the Radiology Prior Authorization Request Form must be completed, signed, and dated by the ordering physician before requesting prior authorization, regardless of the method of request for authorization.

Section 2 of the Radiology Prior Authorization Request Form must be completed, signed, and dated by the physician who performs the service prior to requesting retroactive authorization for urgent or emergent studies.

Residents, physician assistants (PAs), and nurse practitioners (NPs) may order radiological procedures; however, the ordering or referring clinician must sign the authorization form and provide the group or supervising provider’s provider identifier.
The Radiology Decision Support Tool is provided by MedSolutions as a resource for providers. MedSolutions uses the evidence-based guidelines to authorize advanced imaging services for TMHP, and these guidelines help providers determine the most appropriate treatment option for the client related to advanced imaging services. The documents include the recognized clinical guidelines for CT, CTA, MR, MRA, PET, and cardiac nuclear imaging studies.

Refer to: Section 2, “Hospital (Medical/Surgical Acute Care Facility)” in Hospital Services Handbook (Vol. 2, Provider Handbooks).

Section 8, “Physician” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for more information on MRI and contrast material.

3.2.5.3 Methods of Submission
Authorization requests for CT, CTA, MRI, fMRI, MRA, PET, and cardiac nuclear imaging studies for Texas Medicaid fee-for-service clients and Primary Care Case Management (PCCM) clients must be submitted to MedSolutions. MedSolutions is the TMHP subcontractor for high-tech radiology services. Authorization may be submitted to MedSolutions as follows:

- Online at www.tmhp.com, on the Radiology Prior Auth Services page, or at www.medsolutionsonline.com
- By telephone to 1-800-572-2116
- By fax to 1-800-572-2119
- By mail to:
  
  Texas Medicaid & Healthcare Partnership
  730 Cool Springs Blvd, Suite 800
  Franklin, TN 37067

All prior authorization requests for outpatient urgent or emergent radiology services should be made by telephone in order to ensure a timely response. Requests for retroactive authorization may be submitted online using the MedSolutions prior authorization portal, or by telephone, fax, or mail.

Requests for authorization that are submitted by fax or mail must be submitted using the Radiology Prior Authorization Request Form.

3.2.6 Additional Radiology and Physiological Laboratory Services

3.2.6.1 Ambulatory Electroencephalogram

Refer to: Section 8.2.24.2, “Ambulatory Electroencephalogram (Ambulatory EEG)” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for more information.

3.2.6.2 Brachytherapy

Refer to: Subsection 8.2.61.1, “Brachytherapy” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for more information.

3.2.6.3 Diagnostic Doppler Sonography

Refer to: Subsection 8.2.44.5, “Doppler Studies” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for more information.
3.2.6.4 Electrocardiograms

Refer to: Subsection 8.2.24.6, “Electrocardiogram (EKG)” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for more information.

3.2.6.5 Electromyography (EMG and Nerve Conduction Studies (NCS))

3.2.6.6 Esophageal pH Probe Monitoring

3.2.6.7 Mammography Services

The following procedure codes will be denied if the provider does not have a BRC mammography certification on file:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>77057</td>
</tr>
</tbody>
</table>

Refer to: Subsection 8.2.13.4, “Prognostic Breast and Gynecological Cancer Studies” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for more information about mammography services.

3.2.6.8 Nonsurgical Vision Services

Refer to: Subsection 4.3.5.4, “Ophthalmic Ultrasound” in Vision and Hearing Services Handbook (Vol. 2, Provider Handbooks) for more information.

3.2.6.9 Obstetric Services

Refer to: Subsection 8.2.44.7, “Obstetric Ultrasound” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for more information.

3.2.6.10 Radiation Therapy Services

Refer to: Subsection 8.2.61, “Radiation Therapy” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for information about radiation therapy, including brachytherapy and stereotactic radiosurgery.

3.2.6.11 Screening and Diagnostic Studies of the Breast

Refer to: Subsection 8.2.13.3, “Mammography (Screening and Diagnostic Studies of the Breast)” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for more information.

3.2.6.12 Services Incidental to Surgery and/or Anesthesia

Refer to: Subsection 8.2.70.11, “Services Incidental to Surgery and/or Anesthesia” Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for more information.
3.2.6.13 Sleep Studies

Refer to: Subsection 8.2.68, “Sleep Studies” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for more information.

3.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including radiological and physiological laboratory services. Radiological and physiological laboratory services are subject to retrospective review and recoupment if documentation does not support the service billed.

3.4 Claims Filing and Reimbursement

3.4.1 Claims Information

Claims for radiological and physiological laboratory services and portable X-ray supplier services must include the referring or ordering provider. Radiological and physiological laboratory services and portable X-ray supplier services must be submitted to TMHP in an approved electronic format or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.
Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.
Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (Vol. 1, General Information). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

3.4.1.1 Diagnosis Requirements

A diagnosis is not required with a provider’s request for payment except when providing the following services:

- Ambulatory Electroencephalogram (A/EEG)
- Arteriogram
- Cardiac blood pool imaging
- Chest X-ray
- Computed tomography imaging (CT)
- Echography
- Electrocardiogram (ECG)
- Magnetic resonance angiography (MRA)
- Magnetic resonance imaging (MRI)
- Mammographies, noninvasive diagnostic studies
- Polysomnographies
- Venographies
Claims for all services provided to clients who are eligible for “Emergency Care Only” must have a diagnosis to be considered for reimbursement. As with all procedures billed to Texas Medicaid, most baseline screening or comparison studies are not a benefit.

**Refer to:** Section 8, “Physician” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (Vol. 2, Provider Handbooks) for more information on these services.

### 3.4.1.2 Modifier Requirements for Type of Service Assignment

For the radiology, physiological lab, and X-ray procedures in this chapter, providers must bill modifier 26 for the interpretation component or modifier TC for the technical component. No modifier is necessary for the total component.

**Refer to:** Subsection 6.2.6, “Modifier Requirements for TOS Assignment” in Section 6, “Claims Filing” (*Vol. 1, General Information*).

Subsection 6.3.2, “Type of Service (TOS)” in Section 6, “Claims Filing” (*Vol. 1, General Information*).

### 3.4.2 Reimbursement

Radiological and physiological laboratory and portable X-ray supplier providers are reimbursed in accordance with 1 TAC §355.8081 and §355.8085. Providers can refer to the Online Fee Lookup (OFL) or the applicable fee schedule on the TMHP website at www.tmhp.com.

**Refer to:** Subsection 2.2, “Reimbursement Methodology” in Section 2, “Texas Medicaid Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

Texas Medicaid pays only up to the amount allowed for the total component for the same procedure submitted for reimbursement by the same provider for the same client with the same date of service. Providers who perform the technical service and the interpretation must bill the total component. Providers who perform only the technical service must bill the technical component, and those who perform only the interpretation must bill the interpretation component. The total component and the technical or interpretation component for the same procedure are not reimbursed separately when billed by any provider with the same date of service; the first claim may be reimbursed and the additional claim(s) will be denied. Claims are considered for reimbursement based on the order in which they are received.

For example, if a claim is received for the total component and TMHP has already made payment for the technical or interpretation component for the same procedure with the same date of service for the same client, regardless of provider, the claim for the total component is denied. The same is true if a total component has already been paid and claims are received for the individual components.

Radiology and physiological laboratory and portable X-ray services are not payable when the client is in an inpatient setting. The reimbursement for these services are included in the diagnosis-related group (DRG) payment.

VISION AND HEARING SERVICES HANDBOOK

1. GENERAL INFORMATION

The information in this handbook is intended for optometrists (doctors of optometry), ophthalmologists, and opticians who render services related to the eye and vision and for hearing aid professionals (physicians, audiologists, and fitters and dispensers) who provide hearing evaluations or fitting and dispensing services. The handbook provides information about Texas Medicaid’s benefits, policies, and procedures applicable to these providers.

Important: All providers are required to read and comply with Subsection 4.1, “Enrollment”. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1617(a)(6)(A). Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver healthcare items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.

Refer to: Section 1: Provider Enrollment and Responsibilities (Vol. 1, General Information)
Subsection 8.1, “Medicaid Managed Care” in Section 8, “Managed Care” (Vol. 1, General Information)

2. NONIMPLANTABLE HEARING AID DEVICES AND RELATED SERVICES

2.1 Enrollment

To enroll in Texas Medicaid, hearing aid professionals (physicians, audiologists, and hearing aid fitters and dispensers) who provide hearing evaluations or fitting and dispensing services must be licensed by the licensing board of their profession to practice in the state where the service is performed. Hearing aid providers are eligible to enroll as individuals and facilities. Audiologists are eligible to enroll as individuals and groups. Audiologists may enroll as both audiologists and as hearing aid fitters and dispensers by completing an enrollment application for each type of provider (i.e., select “Audiologist” on one application and “Hearing Aid” on the other application).

Providers cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

2.1.1 School Districts, State Agencies, and Inpatient Facilities

To be reimbursed for audiology and audiometry evaluation and diagnostic services for suspected and confirmed hearing loss (other than audiology evaluation and therapy services reimbursed to School Health and Related Services (SHARS) providers), audiologists employed by or contracted with school districts, state agencies, and inpatient hospitals must enroll as individual practitioners or group practitioners by choosing “Audiologist” on the enrollment application.
To be reimbursed for hearing aid devices and accessories and fitting and dispensing visits and revisits, audiologists and hearing aid fitters and dispensers employed by or contracted with school districts, state agencies, and inpatient hospitals must enroll as individual practitioners or facilities by choosing “Hearing Aid” on the enrollment application.

Appropriately-licensed providers who want to provide both audiology services and hearing aid fitting and dispensing services must complete applications for audiologist and for hearing aid fitter and dispenser for each program for which they want to enroll.

**Note:** A SHARS Texas Provider Identifier (TPI) cannot be used to bill for these services.

### 2.2 Services/Benefits, Limitations and Prior Authorization

The Texas Medicaid hearing services benefit includes those services that are medically necessary for clients of any age who have suspected or identified hearing loss that can be improved or ameliorated using a hearing aid device. Such services may be reimbursed to audiologists or hearing aid fitters and dispensers.

**Note:** Hearing-related services that are medically necessary because of a medical condition that cannot be improved or ameliorated using a nonimplantable hearing aid device are not considered part of the Texas Medicaid hearing services benefit. Providers may refer to the other Texas Medicaid Provider Procedures Manual Handbooks for benefit and limitation information about other hearing-related services.

Texas Medicaid clients of any age are eligible to receive medically necessary hearing aid devices and services through the hearing services benefit outlined in the following sections. The Texas Medicaid hearing services benefit includes a broad range of hearing services for clients of all ages and reimburses providers who are appropriately enrolled with Texas Medicaid in accordance with their licensure and scope of practice. Prior authorization is not necessary for benefits within program limitations.

The following hearing services are benefits for Texas Medicaid clients, and are included in the reimbursement for the routine service or visit as indicated:

- Audiologists and physicians may be reimbursed for audiology and audiometry evaluation and diagnostic services for suspected and confirmed hearing loss.
- Hearing aid fitters and dispensers may be reimbursed for hearing aid devices and accessories and fitting and dispensing visits and revisits.
- Physicians may be reimbursed for physician otolaryngology (ENT) services.

The following additional hearing services are benefits for Texas Medicaid clients, and are included in the reimbursement for the routine service or visit as indicated:

- As part of the hospital reimbursement, a hospital may be reimbursed for a routine newborn hearing screening that is performed before the infant is discharged from the hospital. The routine newborn hearing screening is included in the hospital reimbursement and is not reimbursed separately to audiologists, hearing aid fitters and dispensers, or physicians under the Texas Medicaid hearing services benefit.
- The routine Texas Health Steps (THStep)s medical checkup hearing screening is included in the reimbursement for the THSteps periodic medical checkups. A hearing screen performed during a THSteps medical checkup is not reimbursed separately to audiologists, hearing aid fitters and dispensers, or physicians under the Texas Medicaid hearing services benefit.

Texas Medicaid clients whose jobs are contingent on their possessing a hearing aid or who appear to have vocational potential and who need a hearing aid may be referred to the Texas Department of Assistive and Rehabilitative Services (DARS) for hearing aids.
2.2.1 Limitations and Required Forms
All services provided to Texas Medicaid clients must be medically necessary. Unless otherwise specified, services may be reimbursed without prior authorization within the set limitations. In addition to services that always require prior authorization, providers may request prior authorization for medically necessary services that exceed benefit limitations.

Required forms, which are indicated in the specific sections below, are not required to be submitted with the claim, but the forms must be completed and maintained in the client’s medical record and made available upon request by the Texas Health and Human Services Commission (HHSC) or the Texas Medicaid & Healthcare Partnership (TMHP) for retrospective review.

2.2.2 Hearing Screenings
2.2.2.1 Routine Hearing Screenings
Routine hearing screenings that are required as part of the newborn hospital stay and as part of a THSteps periodic checkup are included in the Texas Medicaid hearing services benefit. These routine screenings are not reimbursed to audiologists, hearing aid fitters and dispensers, or physicians.

Newborn Hearing Screen
The newborn hearing screening is included in the reimbursement to the hospital for the newborn hospital stay and is not reimbursed separately.

THSteps Medical Checkup Hearing Screen
Hearing screening is a required component of the THSteps medical checkup, and a standardized audiometric hearing screening is required at specific ages according to the periodicity schedule.

Refer to: Subsection 5.3.1.8, “Newborn Examination” in the Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information about the newborn hearing screening.

Subsection 5.3.2.4.2, “Hearing Screening” in the Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information on THSteps checkup hearing screening.

2.2.2.2 Additional Hearing Screenings
Hearing screening provided by an audiologist, physician, nurse practitioner (NP), clinical nurse specialist (CNS), and physician assistant (PA) at the request of a client or parent or guardian or at the provider’s discretion is a benefit for Texas Medicaid clients of all ages when rendered by a provider who is enrolled with Texas Medicaid and licensed to perform these services.

A hearing screening requested outside of a routine newborn or THSteps medical checkup may be reimbursed as medically necessary without prior authorization using procedure code 92551. Procedure code 92551 may be reimbursed to audiologist, physician, NP, CNS, or PA providers in the office or outpatient hospital setting.

Further diagnostic testing may also be reimbursed using the appropriate procedure code as indicated in subsection 2.2.3, “Audiology and Audimetry Evaluation and Diagnostic Services” in this handbook

2.2.2.3 Abnormal Hearing Screening Results
If the screening returns abnormal results, the client must be referred to a Texas Medicaid provider who is a licensed audiologist or physician who provides audiology services. Clients who are birth through 20 years of age must be referred to a Texas Medicaid provider who is an audiologist or physician who is experienced with the pediatric population and who offers auditory services.

The referring physician who performs the screening must complete the Physician’s Examination Report, which is maintained in the client’s medical record. A new Physician’s Examination Report must be completed whenever there is a change in the client’s hearing or a new hearing aid is needed. Retrospective review may be performed to ensure documentation supports the medical necessity of the service.
In addition to being referred to an appropriate provider for further testing, clients who are 35 months of age and younger with suspected hearing loss must be referred to Early Childhood Intervention (ECI) within 2 working days of the abnormal hearing screening.

Refer to: Subsection 2.1, “Early Childhood Intervention (ECI) (CCP)” in the Children’s Services Handbook (Vol. 2, Providers Handbooks) for more information about ECI.

2.2.3 Audiology and Audiometry Evaluation and Diagnostic Services

Physicians must recommend hearing evaluations based on examination of the client. Only physicians or licensed audiologists will be reimbursed for hearing evaluations. Hearing aid fitters and dispensers are not reimbursed for hearing evaluations.

Important: The date of service for audiology and audiometry evaluations and diagnostic services is the date the service is rendered to the client. The date of service that is billed on the claim must match the date of service that is documented in the client’s medical record.

The following procedure codes may be reimbursed to audiologist providers:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>92550 92551 92552 92553 92555 92556 92557 92562 92563 92564</td>
</tr>
<tr>
<td>92567 92568 92570 92571 92575 92576 92577 92579 92582</td>
</tr>
<tr>
<td>92584 92585 92586 92587 92588 92591 92592 92593 92620 92621</td>
</tr>
<tr>
<td>92625</td>
</tr>
</tbody>
</table>

The following procedure codes may be reimbursed to physician providers:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>92502 92504 92540 92565 95920</td>
</tr>
</tbody>
</table>

2.2.3.1 Forms and Documentation

The Hearing Evaluation, Fitting, and Dispensing Report (Form 3503) must be completed by the physician or audiologist who conducts the diagnostic testing. The provider who signs the report must maintain it in the client’s file. The report includes audiometric assessment results of the hearing evaluation and must provide objective documentation that amplification improves communication ability. Retrospective review may be performed to ensure documentation supports the medical necessity of the service.

For physician diagnostic hearing services (procedure codes 92502, 92504, 92540, and 95920), providers must maintain documentation of medical necessity in the client's medical record. Retrospective review may be performed to ensure that the documentation supports medical necessity for the service.

2.2.3.2 Prior Authorization

Hearing screening and testing services do not require prior authorization. Documentation of medical necessity must be maintained by the provider in the client’s medical record. Retrospective review may be performed to ensure that the documentation supports medical necessity for the service.

2.2.3.3 Limitations

Audiometry survey procedures codes and evoked potential and otoacoustic emissions screening procedure codes may be reimbursed once per day.
Procedure code 92568 may be reimbursed when billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>2251 3510 3511 3518 3519 38600 38601 38602 38603 38604</td>
</tr>
<tr>
<td>38610 38611 38612 38619 3862 38630 38631 38632 38633 38634</td>
</tr>
<tr>
<td>38635 38640 38641 38642 38643 38648 38650 38651 38652 38653</td>
</tr>
<tr>
<td>38654 38655 38656 38658 3868 3869 3870 3871 3872 3878</td>
</tr>
<tr>
<td>3879 3882 38830 38831 38832 38840 38841 38842 38843 38844</td>
</tr>
<tr>
<td>38845 3885 38905 38906 38913 38915 38916 38917 38920 38921</td>
</tr>
<tr>
<td>38922 7443 7804</td>
</tr>
</tbody>
</table>

Procedure codes 92551, 92552, 92553, 92555, and 92556 are not reimbursed if submitted on the same day as procedure code 92557 by any provider. If three or more of these procedure codes are billed for the same date of service, the procedure codes are denied with instructions to bill with the more appropriate, comprehensive audiometry procedure code (92557).

In the following table, the procedure codes in Column A will be denied if they are submitted for the same date of services as any of the corresponding procedure codes in Column B:

<table>
<thead>
<tr>
<th>Column A (Denied)</th>

</tr>
<tr>
<td>38922</td>
<td>7443, 7804</td>
</tr>
</tbody>
</table>

Tympanometry (procedure code 92567) must be limited to selected individual cases where its use demonstrably adds to the provider's ability to establish a diagnosis and provide appropriate treatment. Tympanometry is limited to 4 services per year by the same provider and is based on medical necessity, which must be documented in the client's medical record.

Hearing screening services with the use of auditory brainstem response (ABR) and otoacoustic emissions (OAE) audiometry are a benefit of Texas Medicaid for newborns as part of the newborn hearing screening. ABR and OAE are benefits for clients of all ages when performed to identify and diagnose hearing loss.

Evoked response testing (procedure codes 92585, 92586, 92587, and 92588) is considered a bilateral procedure. If separate charges are billed for left- and right-sided tests of the same type, the tests are combined and reimbursed as a quantity of one. An electroencephalogram (EEG) may be reimbursed for the same date of service as evoked response testing by any provider.

Procedure code 92591 may be reimbursed as often as is medically necessary.

Texas Medicaid may reimburse physicians for ear and throat examination procedure codes 92502, 92504, and 92540. Audiologists will not be reimbursed for these services.

Procedure code 95920 may be reimbursed in addition to each evoked potential test. Procedure code 95920 is limited to a maximum of 2 hours per day, per client, per provider, without documentation of medical necessity.

### 2.2.3.4 SHARS Audiology Services

Audiology evaluation and therapy services procedure codes 92506, 92507, and 92508 may be reimbursed to school districts and state agencies that are enrolled with Texas Medicaid as SHARS providers.
Refer to: Section 3, “School Health and Related Services (SHARS)” in the *Children’s Services Handbook* (Vol. 2, Provider Handbooks) for more information about SHARS services.

Other hearing evaluation, diagnostic, and hearing aid services may be reimbursed to appropriately-enrolled audiologists, hearing aid fitters and dispensers, and physicians as outlined in this section.

### 2.2.3.5 Noncovered Services

Texas Medicaid does not reimburse for hearing screening completed for day care, Head Start, or school. Separate procedure codes must not be billed for these services.

### 2.2.4 Hearing Aid Devices and Accessories (Nonimplantable)

Texas Medicaid may reimburse hearing aid fitters and dispensers for the following devices and accessories:

<table>
<thead>
<tr>

</tbody>
</table>
The following monaural procedure codes may be reimbursed for medically necessary hearing aid devices and replacements when they are billed with the appropriate modifier LT or RT to indicate for which ear the hearing aid device was purchased and fitted:

<table>
<thead>
<tr>
<th>Service</th>
<th>Limitation</th>
</tr>
</thead>
</table>
| Batteries (Replacement only) | **Limitation:** Replacement batteries may be reimbursed as often as is medically necessary when a hearing aid device has been previously reimbursed by Texas Medicaid.  
**Note:** If a hearing aid has not been reimbursed by Texas Medicaid in the last 5 years, the replacement batteries may be reimbursed on appeal with a statement that documents medical necessity. |

**Procedure code:** V5266

The following binaural procedure codes may be reimbursed for medically necessary hearing aid devices and replacements:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>V5030</td>
</tr>
<tr>
<td>V5256</td>
</tr>
</tbody>
</table>

Providers can refer to the Online Fee Lookup (OFL) or the applicable fee schedule on the TMHP website at www.tmhp.com for reimbursement rates.

**Note:** Procedure codes V5251, V5267, and V5298 are manually priced and identified in the fee schedule with “Note Code 5.”

**Refer to:** Section 2.4.2, “Reimbursement” in this handbook for more information about manual pricing.

### 2.2.4.1 Forms and Documentation

Monaural hearing aids may be reimbursed for clients who have no medical contraindication for using a hearing aid and who have documentation of medical necessity. The following documentation of medical necessity must be maintained in the client’s medical record:

- Hearing loss in the better ear of 35 dBHL or greater for the pure tone average of 500, 1000, and 2000 Hz
- A spondee threshold in the better ear of 35 dBHL or greater when pure tone thresholds cannot be established
- Hearing loss in each ear is less than 35 dBHL at the frequencies below 2000 Hz and thresholds in each ear are greater than 40 dBHL at 2000 Hz and higher
- Documentation of communication need and a statement that the patient is alert and oriented and able to use the device appropriately by themselves or with assistance

Clients meet the criteria for binaural aids if they meet the conditions for a monaural hearing aid and have at least a 35-dBHL hearing loss in both ears

Providers must also include the model number, serial number, and warranty dates of the purchased hearing aid device in the client’s medical record.
Refer to: Subsection 6.3.1.1, “Place of Service (POS) Coding” in Section 6, “Claims Filing” (Vol. 1, General Information) for more information about coding place of service for other locations.

2.2.4.2 Prior Authorization

Prior authorization is not required for medically necessary hearing aid devices and supplies that are provided within the limitations outlined in the table above.

Prior authorization is required for the following:

- Replacement hearing aid devices that are required within the same 5-year period.
  A replacement hearing aid device may be considered for prior authorization when loss or irreparable damage has occurred. A copy of the police or fire report, when appropriate, and measures to be taken to prevent reoccurrence must be submitted with the prior authorization request. Replacements will not be authorized when the equipment has been abused or neglected by the client, the client’s family, or the caregiver.

- Hearing aid accessories for clients who are birth through 20 years of age.
  Requests for prior authorization for children’s hearing aid accessories including, but not limited to, chin straps, clips, boots, and headbands will be considered when the requests are submitted with documentation that shows that the client is birth through 20 years of age and that the requested supply is medically necessary for the proper use or functioning of the hearing aid device.

- Hearing aid devices that are not currently a benefit of Texas Medicaid but that are medically necessary for clients who are birth through 20 years of age.
  The prior authorization request must include:
  - The medical necessity for the requested hearing aid device.
  - The name of the manufacturer.
  - The Manufacturer’s Suggested Retail Price (MSRP) or Average Wholesale Price (AWP) or the provider’s documented invoice cost.
  - The model number, serial number, and the dates that the warranty is in effect for the requested hearing aid.
  - Additional medically necessary repairs or modifications beyond 1 per year.
    For additional repairs or modifications, requests for prior authorization must include documentation that supports the need for the requested repair.

For services that require prior authorization, prior authorization must be obtained before the services are rendered. The prior authorization number must be included on the claim form when the claim is submitted to TMHP.

Prior authorization requests must be submitted to the TMHP Special Medical Prior Authorization (SMPA) Department with documentation that supports medical necessity for the requested device, service, or supply. Authorization may be submitted on the TMHP website at www.tmhp.com or by fax to 1-512-514-4213.

Important: For clients who are birth through 20 years of age, if the authorization request is denied because it does not meet benefit criteria, the TMHP SMPA Department will refer the request to the TMHP Coordinated Care Program (CCP) Department for consideration under CCP. The provider is not required to complete additional forms or request referral to the TMHP CCP Department.

Providers may use the form of their choice to submit the required information to the TMHP SMPA Department. No specific request form is required.
Refer to: Subsection , “Section 6: Claims Filing” (Vol 1, General Information) for more information about the authorizations and claims filing processes.

2.2.4.3 Limitations

The following services and supplies must be provided to Texas Medicaid clients if a nonimplantable hearing aid device is medically necessary:

- An individual client assessment to identify the appropriate type of device
- The fitting of the device
- The re-assessment to determine whether the device allows for adequate hearing
- Expendable supplies that are necessary to keep the device functioning properly, such as batteries and accessories

A hearing aid dispensed through Texas Medicaid must meet the following criteria:

- Be a new and current model
- Meet the performance specifications indicated by the manufacturer
- Include, at minimum, a standard 12-month warranty that begins on the dispensing date of the hearing aid.

Providers must dispense each hearing aid reimbursed through Texas Medicaid with all necessary hearing aid accessories and supplies, including a 1-month supply of batteries. The reimbursement for monaural and binaural procedure codes includes the required hearing aid package as follows, and no separate reimbursement will be made for these items:

- Acquisition cost of the hearing aid (the actual cost or net cost of the hearing aid after any discounts have been deducted)
- Manufacturer’s postage and handling charges
- All necessary hearing aid accessories or supplies
- Instructions for care and use
- A 1-month supply of batteries

Note: TMHP does not supply the hearing aid devices, supplies, and accessories. Providers must purchase equipment directly from manufacturers and vendors of their choice and submit claims to TMHP for reimbursement using the appropriate procedure codes.

Procedure code V5298 may be reimbursed with prior authorization for hearing aid devices that are not currently a benefit of Texas Medicaid but that are medically necessary for clients who are birth through 20 years of age.

Procedure code V5251 may be reimbursed with prior authorization for clients who are birth through 20 years of age.

Nonimplantable hearing aid devices provided to clients who are birth through 20 years of age will not be reimbursed when the services are performed in the skilled nursing facility (SNF), intermediate care facility (ICF), or extended care facility (ECF) setting.
2.2.5 Hearing Aid Services

Texas Medicaid may reimburse hearing aid fitters and dispensers for the following services:

<table>
<thead>
<tr>
<th>Service</th>
<th>Limitation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hearing test for sensitivity</td>
<td><strong>Limitation</strong>: As often as is medically necessary</td>

</tr>
<tr>
<td></td>
<td>and 92593 (first and second revisits for binaural fittings)</td>
</tr>
</tbody>
</table>

2.2.5.1 Forms and Documentation

The forms and documentation required for the fitting and dispensing visits are as follows:

- Hearing Evaluation, Fitting, and Dispensing Report (Form 3503)
- Client acknowledgement statement (created by the provider)
- 30-day trial period certification statement (created by the provider)
- Additional necessary documentation

*Hearing Evaluation, Fitting, and Dispensing Report (Form 3503)*—The Hearing Evaluation, Fitting, and Dispensing Report (Form 3503) must be completed by the fitter/dispenser that conducts the fitting and dispensing visit. The provider who signs the report must maintain it in the client’s file. The report includes audiometric assessment results of the hearing evaluation and must provide objective documentation that amplification improves communication ability. Retrospective review may be performed to ensure documentation supports the medical necessity of the device, service, or supply.

*Client Acknowledgement Statement (created by the provider)*—At the time the hearing aid device and supplies are dispensed, the client must sign a client acknowledgement statement to verify the client was evaluated and offered an appropriate hearing aid that meets the client’s hearing need. The acknowledgement statement must include language that indicates the client is responsible for paying any hearing aid rental fees if charged. The provider must obtain the signed acknowledgment statement before dispensing the hearing aid device and supplies and must keep the signed acknowledgment statement in the client’s file. Retrospective review may be performed to ensure documentation supports the medical necessity of the device, service, or supply.
30-Day Trial Period Certification Statement (created by the provider)—Providers must inform clients in writing of the trial period lasting 30 consecutive days. The statement, which must be created by the provider and signed by the client, must contain the start and end dates of the trial period, all charges and fees associated with the trial period, an acknowledgment that the client accepts responsibility for any assessed rental fees, and the name, address, and telephone number of the State Board of Examiners for Speech-Language Pathology and Audiology. The client must receive a copy of this agreement.

After at least 30 days and the successful completion of the trial period, the provider must update the statement to indicate that the trial was successful and the client accepted the dispensed hearing aid device. The updated statement must be maintained in the client’s file. Retrospective review may be performed to ensure documentation supports the medical necessity of the device, service, or supply.

2.2.5.2 Prior Authorization

Prior authorization is not required for fitting and dispensing visits and revisits.

2.2.5.3 Limitations

The following hearing aid visits may be reimbursed by Texas Medicaid:

- The fitting and dispensing visits that encompass a 30-day trial period and include a post-fitting check 5 weeks after the trial period has been successfully completed
- A first revisit as needed after the post-fitting check
- A second revisit as needed after the first revisit

The fitting visit includes the fitting, dispensing, and post-fitting check of the hearing aid.

Providers must allow each Texas Medicaid client a 30-consecutive-day trial period that begins with the dispensing date. This trial period gives the client time to determine whether the hearing aid device meets the client’s needs. If the client is not satisfied with the purchased hearing aid, the client may return it to the provider, who must accept it. If the device is returned within 30 days of the date it was dispensed, the provider may charge the client a rental fee not to exceed $2 per day. This fee is not a benefit of Texas Medicaid and will not be reimbursed. The client is responsible for paying the hearing aid rental fees if the provider chooses to charge a fee for the rental of returned hearing aid devices.

During the trial period, providers may dispense additional hearing aids as medically necessary until either the client is satisfied with the results of the hearing aid or the provider determines that the client cannot benefit from the dispensing of another hearing aid. The dispensing date of each additional hearing aid starts a new trial period.

The licensed audiologist or fitter/dispenser must perform a post-fitting check of the hearing aid within 5 weeks of the initial fitting.

The first and second revisits are available if additional visits are required after the post-fitting check, 2 additional revisits may be reimbursed as medically necessary.

- **First revisit.** The first revisit must include a hearing aid check.
- **Second revisit.** The second revisit is available as needed after the post-fitting check and first revisit. The second revisit must include either a real ear measurement or aided sound field testing according to the guidelines specified for the hearing evaluation. If the aided sound field test scores suggest a decrease in hearing acuity, the provider must include puretone and speech audiometry readings from the first evaluation.

Home visit hearing evaluations and fittings are permitted only with the physician’s written recommendation.

For clients who are birth through 20 years of age, hearing services provided to clients who are birth through 20 years of age will not be reimbursed when the services are performed in the SNF, ICF, or ECF setting.
For clients who are 21 years of age and older, services for residents in a SNF, ICF, or ECF must be ordered by the attending physician. The order must be on the client’s chart, must state the condition that necessitates the hearing aid services, and must be signed by the attending physician.

2.3 Documentation Requirements
All services, including hearing services, require documentation to support the medical necessity of the service rendered. Hearing services are subject to retrospective review and recoupment if documentation does not support the service billed.

Required forms for nonimplantable hearing devices and services, which are indicated in the specific sections above, are not submitted with the claim to TMHP, but the forms must be completed and maintained in the client’s medical record and made available upon request by HHSC or TMHP for retrospective review.

2.4 Claims Filing and Reimbursement

2.4.1 Claims Filing
Hearing services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Subsection 2.2, “Reimbursement Methodology” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for more information about reimbursement.

Subsection 1.4.9, "Billing Clients" in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for more information.

Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (Vol. 1, General Information). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

To be reimbursed for both audiology services and hearing aid fitting and dispensing services, audiologists must enroll with Texas Medicaid as audiologists and also as hearing aid fitters and dispensers. Audiology services must be billed using the audiologist provider number and benefit code (for electronic claims only) as indicated on the provider enrollment letter that indicates “Audiologist”, and hearing aid and fitting and dispensing services must be billed with the hearing aid provider number and benefit code (for electronic claims only) as indicated on the provider enrollment letter that indicates “Hearing Aid.”

Providers must file all claims electronically or on the appropriate Centers for Medicare & Medicaid Services (CMS) paper claim form after providing the services. Claims must include the following information:

- The most appropriate 3- to 5-digit International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM) diagnosis code that represents the purpose for the service.
- The most appropriate Current Procedural Terminology (CPT) or Healthcare Common Procedure Coding System (HCPCS) procedure code(s) that represent the service(s) provided.
• The appropriate information as indicated on the provider enrollment letter (Electronic claims must also include the most appropriate attested taxonomy code.)

2.4.1.1 Hearing Services Claims for Clients With Texas Medicaid Managed Care Plans (Other Than PCCM)

For clients who are birth through 20 years of age and enrolled in a Medicaid managed care plan (other than Primary Care Case Management Program (PCCM)) through a managed care organization (MCO), TMHP processes authorization requests (if necessary) and claims for the following hearing services rendered to clients with suspected or confirmed hearing loss regardless of the client’s Texas Medicaid managed care plan:

• Hearing aid devices
• Fitting and dispensing visits
• The following diagnostic hearing services rendered by an audiologist provider:

<td>92567</td>
</tr>
<tr>
<td>92592</td>
</tr>
</tbody>
</table>

These diagnostic hearing services rendered by a provider other than an audiologist, and all other hearing services for clients who are birth through 20 years of age and enrolled with a Texas Medicaid MCO other than PCCM must be submitted to the client’s managed care plan.

For clients who are 21 years of age and older and enrolled with a Medicaid managed care plan other than PCCM, authorization requests (if necessary) and claims for hearing services must be submitted to the appropriate Medicaid managed care plan.

Exception: For Supplemental Security Income (SSI) clients of any age who are enrolled in the STAR program, prior authorization requests (if necessary) must be submitted to the client’s STAR plan, and the claims must be submitted to TMHP.

2.4.1.2 Third Party Liability

Standard third party liability (TPL) rules apply to all hearing services claims.

Refer to: Subsection 4.11, “Third Party Liability (TPL)” “Client Eligibility” (Vol. 1, General Information) for more information.

2.4.2 Reimbursement

Hearing aids and audiological services are reimbursed in accordance with 1 TAC §355.8141.

Hearing aids and related services are reimbursed at the lesser of the billed charges or the published Texas Medicaid fee. Unless otherwise indicated, providers may not make additional charges to the client for covered services; such charges constitute a breach of the Texas Medicaid contract.

Requested items that are not represented by a specific procedure code must be prior authorized and are priced manually during the authorization process. Manually priced items for clients who are birth through 20 years of age require prior authorization that must be obtained through the TMHP SMPA Department. The reimbursement will be determined based on either the MSRP less 18 percent or based on the provider’s documented invoice cost if there is no MSRP available.

Manually priced items are indicated with “Note Code 5” in the Texas Medicaid fee schedule.

Providers may refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com.
3. IMPLANTABLE HEARING DEVICES AND RELATED SERVICES

3.1 Enrollment
To enroll in Texas Medicaid, hearing services professionals who provide implantable hearing devices and services must be appropriately enrolled according to their licensure and scope of practice.

Providers cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

3.2 Services/Benefits, Limitations and Prior Authorization
Implantable hearing devices, including the cochlear implant device, the auditory brainstem implant (ABI), and the bone anchored hearing aid (BAHA), are benefits of Texas Medicaid for clients of all ages.

3.2.1 Cochlear Implants
The following procedure codes may be reimbursed for the cochlear implant device, separate components, and services:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>69930</td>
</tr>
<tr>
<td>L8622</td>
</tr>
</tbody>
</table>

The following procedure codes may be reimbursed for diagnostic analysis of the cochlear implant:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>92601</td>
</tr>
</tbody>
</table>

3.2.1.1 Prior Authorization
Prior authorization is required for the following:
- Cochlear implant surgery, device, and replacement parts
- Sound processor repair or replacement
- Battery recharger unit
- Replacement batteries beyond the limitations outlined in the sections below

Requests for prior authorization must be submitted to the SMPA Department with documentation supporting the medical necessity for the requested device, service, or supply.

Documentation submitted for review must indicate who will be providing the cochlear implant device (i.e., the facility or the Durable Medical Equipment (DME) or medical supplier). The supplier’s provider number must be included on the prior authorization request.

Prior authorization for a unilateral or bilateral cochlear implant may be granted for clients who are 12 months of age and older with documentation of all of the following criteria:
- Cognitive ability to use auditory cues and written documentation of agreement by the client or the client’s parent or guardian that the client will participate in a program of post-implantation aural rehabilitation. This documentation must be maintained in the client’s medical record.
- Postlingual deafness or prelingual deafness.
- Freedom from middle-ear infection, an accessible cochlear lumen that is structurally suited to implantation, and freedom from lesions in the auditory nerve and acoustic areas of the central nervous system.
• No contraindications to surgery.
• Inability to derive benefit from appropriately fitted hearing aid devices.
• Documentation of poor speech discrimination and a recommendation for cochlear implant candidacy and one of the following diagnoses for severe-to-profound bilateral sensorineural hearing loss:

The initial lithium ion battery recharger unit, additional medically necessary units, and additional replacement batteries beyond the limitations indicated in the following sections may be reimbursed with prior authorization. Documentation must be submitted with the prior authorization request to support medical necessity for the request.

Refer to: Subsection 3.2.4, “Sound Processor Replacement and Repair” in this handbook for more information about sound processor repair or replacement.

### 3.2.1.2 Limitations

#### Surgery

Procedure code 69930 with the appropriate modifier LT or RT may be reimbursed for unilateral cochlear implantation. Procedure code 69930 with modifier 50 may be reimbursed for bilateral cochlear implantation performed simultaneously.

#### Device and Components

Procedure codes L8627, L8628, and L8629 for the cochlear implant device and components may be reimbursed for clients who are 12 months of age and older as follows:

- The device must be approved by the Food and Drug Administration (FDA) and be age-appropriate for the client.
- One per day may be reimbursed with prior authorization.

The cochlear implant device and the surgery to implant the device may be reimbursed separately.

#### Replacement Batteries and Related Items

Replacement batteries and related items for the cochlear implant device include non-rechargeable batteries, rechargeable batteries, and recharger units as follows:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Prior Authorization</th>
<th>Limitation</th>
</tr>
</thead>
<tbody>
<tr>
<td>L8621 (Zink air non-rechargeable)</td>
<td>Not required</td>
<td>Maximum of 50 per month</td>
</tr>
<tr>
<td>L8622 (Alkaline non-rechargeable)</td>
<td>Not required</td>
<td>Maximum of 31 per month</td>
</tr>
<tr>
<td>L8623 (Lithium ion rechargeable)</td>
<td>Not required</td>
<td>2 batteries per calendar year</td>
</tr>
<tr>
<td>L8624 (Lithium ion rechargeable)</td>
<td>Not required</td>
<td>2 batteries per calendar year</td>
</tr>
<tr>
<td>L7368 (Battery recharger unit for lithium ion rechargeable batteries)</td>
<td>Required</td>
<td>1 replacement unit every 5 rolling years</td>
</tr>
</tbody>
</table>
Replacement batteries for clients with bilateral cochlear implants and two sound processors may be reimbursed when billed with the applicable battery procedure code and the appropriate LT or RT modifier.

Replacement batteries for the cochlear device are limited to clients with a previously billed cochlear implant procedure, device, or supply. Replacement batteries for clients who did not receive the cochlear implant through Texas Medicaid will be considered for reimbursement on appeal with a physician’s statement documenting medical necessity.

Additional batteries and lithium ion battery recharger units beyond these limitations may be reimbursed with prior authorization.

**Speech Therapy**

Speech therapy is a benefit of Texas Medicaid and can be billed separately from the surgical fee for the cochlear implant as follows:

- For clients who are 12 months through 20 years of age, speech therapy is provided through the CCP.
- For clients who are 21 years of age and older, speech therapy is payable through Texas Medicaid when billed by the hospital or the physician.
- The service is considered to be included in the inpatient DRG payment when provided in an inpatient facility or inpatient rehabilitation setting.

Refer to: Subsection 3.3.9, “Speech Therapy (ST)” in Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information about speech therapy benefits.

Frequency modulated (FM) systems are not benefits of Texas Medicaid.

### 3.2.2 Auditory Brainstem Implant (ABI)

The following procedure codes may be reimbursed for the ABI, related components, and services:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>S2235</td>
</tr>
</tbody>
</table>

#### 3.2.2.1 Prior Authorization

The following implantable hearing devices and services require prior authorization:

- ABI surgery, device, and replacement parts
- Sound processor repair or replacement
- Replacement batteries beyond the limitations outlined in the sections below

Requests for prior authorization must be submitted to the SMPA Department with documentation supporting the medical necessity for the requested device, service, or supply.

Prior authorization is required for the ABI surgery, device, and replacement parts.

Prior authorization requests and claims for ABI must be submitted with diagnosis code 23772 and 23773.

Refer to: Subsection 2.2.1, “Limitations and Required Forms” in this handbook for additional information about replacement batteries.

Subsection 3.2.4, “Sound Processor Replacement and Repair” in this handbook for more information about sound processor repair or replacement.

#### 3.2.2.2 Limitations

ABI is a benefit for clients who are 12 years of age and older.
Diagnostic analysis of the ABI (procedure code 92640) is limited to 2 hours per day when billed by any provider.

**3.2.3 Bone-Anchored Hearing Aid (BAHA)**

The following procedure codes must be submitted for the BAHA and related components:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>L8690</td>
</tr>
</tbody>
</table>

**3.2.3.1 Prior Authorization**

The following implantable hearing devices and services require prior authorization:

- BAHA implant surgery and device
- Sound processor repair or replacement

Requests for prior authorization must be submitted to the SMPA Department with documentation supporting the medical necessity for the requested device, service, or supply.

Prior authorization requests may be granted for clients who are 5 years of age and older with all of the following:

- Documentation of previous attempts at hearing aid devices and why these devices are inadequate or have failed
- Documentation of scores on hearing tests for bone conduction thresholds and on maximum speech discrimination
- Documentation of audiological testing showing good inner ear function
- Documentation of a multidisciplinary assessment including physical, cognitive, communicative, and behavioral limitations describing the client’s auditory disability and expected benefit with use of the BAHA implant
- Documentation of an appropriate diagnosis. Covered diagnoses may include, but are not limited to:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>38901</td>
</tr>
</tbody>
</table>

*Refer to:* Subsection 3.2.4, “Sound Processor Replacement and Repair” in this handbook for more information about sound processor repair or replacement.

**3.2.3.2 Limitations**

The BAHA procedure, device, and replacement parts are benefits for clients who are 5 years of age and older with prior authorization.

Replacement batteries for the BAHA (procedure code V5266) do not require prior authorization. The replacement batteries are limited to clients with a previously billed hearing device. Replacement batteries for clients who did not receive the hearing device through Texas Medicaid will be considered for reimbursement on appeal with a physician’s statement documenting the medical necessity.

Procedure codes L8691, L8692, and L8693 will be denied as part of another service when billed by any provider with the same date of service as procedure code L8690.

Procedure code L8692 for the BAHA device and components may be reimbursed once per day with prior authorization.

Bilateral BAHA procedures are not benefits of Texas Medicaid.
3.2.4 Sound Processor Replacement and Repair

3.2.4.1 Prior Authorization

Replacement and repair of a sound processor require prior authorization. Documentation by the physician must explain the need for the replacement of the sound processor. The processor must be used for a minimum of 12 months before replacement of the unit will be considered.

The prior authorization request must include evidence of the purchase, such as the manufacturer’s warranty.

Repair of a sound processor will be considered for prior authorization with documentation of medical necessity for the requested repair. Repair of a sound processor will be manually priced at the time the prior authorization is reviewed and granted. If the actual cost of the repair differs from the prior authorized fee, the provider must contact the SMPA Department to update the authorization before filing a claim for the repair services.

3.2.4.2 Limitations

Procedure code L8499 with modifier RB may be reimbursed for sound processor repair.

Repair or replacement of a sound processor is not a benefit during the manufacturer’s warranty period.

3.3 Documentation Requirements

All implantable hearing aid services require documentation to support the medical necessity of the service rendered. Hearing services are subject to retrospective review and recoupment if documentation does not support the service billed.

3.4 Claims Filing and Reimbursement

3.4.1 Claims Filing

Hearing services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Subsection 2.2, “Reimbursement Methodology” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for more information about reimbursement.

Subsection 1.4.9, “Billing Clients” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for more information.

Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (Vol. 1, General Information). Blocks that are not referenced are not required for processing by TMHP and may be left blank.
3.4.1.1 Claims for Clients With Texas Medicaid Managed Care Plans (Other Than PCCM)
For clients of any age, the claim for implantable hearing services must be submitted to TMHP for fee-for-service clients or to the appropriate Medicaid managed care plan, either to TMHP for PCCM clients or to the appropriate MCO for clients with a Medicaid managed care plan other than PCCM.

3.4.1.2 Third Party Liability
Standard third party liability (TPL) rules apply to all hearing services claims.

Refer to: Subsection 4.11, "Third Party Liability (TPL)" in Section 4, "Client Eligibility" (Vol. 1, General Information), for more information.

3.4.2 Reimbursement
Implantable hearing aids and related services are reimbursed in accordance with 1 TAC §355.8141.

Implantable hearing aids and related services are reimbursed at the lesser of the billed charges or the published Texas Medicaid fee. Unless otherwise indicated, providers may not make additional charges to the client for covered services; such charges constitute a breach of the Texas Medicaid contract.

Requested items that are not represented by a specific procedure code must be prior authorized and are priced manually during the authorization process. Manually priced items for clients who are birth through 20 years of age require prior authorization that must be obtained through the TMHP SMPA Department. The reimbursement will be determined based on either the MSRP less 18 percent or based on the provider’s documented invoice cost. Manually priced items are indicated with “MP” in the reimbursement rate table at the end of this article.

Providers may refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com.

4. VISION CARE PROFESSIONALS

4.1 Enrollment
To enroll in Texas Medicaid, optometrists (doctors of optometry [ODs]) and ophthalmologists must be licensed by the licensing board of their profession to practice in the state where the service is performed, at the time the service is performed, and be enrolled as Medicare providers.

An optometrist or ophthalmologist cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

4.2 Provider Responsibilities
 Suppliers of eyewear must comply with all Medicaid provider responsibilities and adhere to the following guidelines:

- Do not delay the ordering of eyewear or the dispensing of eyeglasses to the client while payment is pending from TMHP.
- Deliver the eyewear in a reasonable amount of time (usually two or three weeks from the date the order is placed by the client).
- Obtain the required eligibility information from the client’s Medicaid Identification Form (Form H3087).
- Refer to the Eyeglasses column of the Medicaid Identification Form (Form H3087) to determine whether eyeglasses have been reimbursed by Texas Medicaid within the last 24 months. Providers are advised to ask clients if they have recently received vision care services that may not appear on the Medicaid Identification Form (Form H3087) because of the delay in updating form information.
• Update the Eyeglasses column of the Medicaid Identification Form (Form H3087) to indicate that
eyewear was dispensed. Initial, date, and mark the form to indicate that the service was performed.
Temporary cataract contact lenses or glasses are payable during the four-month convalescent period
even if the Medicaid Identification Form (Form H3087) does not have a check mark under the
Eyeglasses column. However, the Medicaid Identification Form (Form H3087) must not have a
check mark under the Eyeglasses column if nonprosthetic eyeglasses are to be obtained for use in
conjunction with cataract contact lenses.
• Have the client, parent, or guardian sign and date the Vision Care Eyeglass Patient (Medicaid
Client) Certification Form and retain it in the provider’s records if the client selects eyewear that is
not covered or if the client’s eyewear is lost or destroyed.
• Have the client, parent, or guardian sign and date the Vision Care Eyeglass Patient (Medicaid
Client) Certification Form and retain it in their records.
• Do not charge a Medicaid client more than a patient not enrolled in Texas Medicaid for noncovered
services (e.g., tints, oversized lenses, or frames).
• Keep invoices on file for a minimum of five years.
• Submit claims using the date eyeglasses were ordered as the date of service (DOS) (the start of the
95-day filing period), not the date the eyewear was dispensed.

4.3 Services/Benefits, Limitations, and Prior Authorization
Examination and treatment of eye conditions, including prescribing and dispensing of medically
necessary eyeglasses or contact lenses, are benefits of Texas Medicaid and may be reimbursed to optom-
etrist, ophthalmologist, and optician providers as is within the scope of practice for each.

The following services are included in other services and will not be considered for separate
reimbursement:
• Vision screening conducted to meet State screening requirements, such as the Department of State
Health Services (DSHS) School Vision and Hearing Screening Program.
• Expenses for medical supplies, equipment, and other items that are not specifically made-to-order
for the client are considered to have been incurred on the date the item is delivered.

Ophthalmologist and Optometrist
Examination and treatment services rendered by an ophthalmologist or optometrist are not limited to
the procedure codes included in this handbook. Providers may refer to the Texas Medicaid fee schedules
on the TMHP web site at www.tmhp.com for a complete list of procedure codes that may be reimbursed
by Texas Medicaid.

Optician
Services rendered by an optician are limited to fitting and dispensing of medically necessary eyeglasses
and contact lenses.

  Note: In accordance with the Omnibus Reconciliation Act of 1986, Section 9336, a Doctor of
Optometry is considered a physician, with respect to the provision of any item or service the
optometrist is authorized to perform by state law or regulation.

4.3.1 Services Performed in Long-Term Care Facilities
Ophthalmological, optometric, and eyeglass or contact lens services provided in a skilled or intermediate
care facility may be reimbursed when the client’s attending physician has ordered the service and the
signed order is included in the client’s medical record at the nursing facility.

The ordering physician’s name and provider identifier must be documented on the claim when ophthal-
omological, optometric, or eyeglasses or contact lenses services are performed in a skilled or intermediate
care facility.
4.3.2 Services Performed in Federally Qualified Healthcare Centers (FQHC)
Vision services rendered by FQHC providers may be reimbursed based on an all-inclusive rate per visit.

Refer to: Subsection 3.2, “Services/Benefits, Limitations and Prior Authorization” in Outpatient Services Handbook (Vol. 2, Provider Handbooks) for information about vision services that may be reimbursed to FQHC providers.

4.3.3 THSteps Medical Checkup Vision Screening
A vision screening must be completed during each THSteps medical checkup with standardized screenings performed at specific ages, as listed in the THSteps Periodicity Schedule. Providers may perform a vision screening during an acute care visit with the appropriate screening tools or refer at-risk infants and children to an optometrist or ophthalmologist who is experienced with the pediatric population and who can perform further testing, diagnosis, and treatment.

Refer to: Subsection 5.3.2.4.1, “Vision Screening” in Children’s Services Handbook (Vol. 2, Provider Handbooks) for information about THSteps medical checkup vision screenings.

4.3.3.1 Vision Screening Outside of a THSteps Preventive Care Medical Checkup
Vision screening for clients who are birth through 20 years of age may be completed at any office visit upon the following:

- Request from a parent
- Referral from a school vision screening program
- Referral from a school nurse

Clients with abnormal screening results must be referred to an appropriate provider. Clients who are birth through 20 years of age and who are at high risk for eye problems should be referred to an ophthalmologist who is experienced with the pediatric population.

4.3.4 Noncovered Services
The following services and supplies are not a benefit of Texas Medicaid:

- Artificial eyes for clients who are 21 years of age and older.
- Eyeglasses for residents of institutions where the reimbursement formula and vendor reimbursement include this service
- Eyeglasses or contact lenses prescribed or dispensed to clients at a hospital or nursing facility without documented orders of the attending physician in the client’s medical records
- Low vision aids
- Optional eyeglass features requested by the client that do not increase visual acuity (e.g., lens tint, industrial hardening, and decorative accessories or lettering)
- Plano sunglasses
- Prisms that are ground into the lenses
- Replacement of lost or destroyed nonprosthetic eyeglasses or contact lens(es) for clients who are 21 years of age and older
- Repair of eyeglasses for clients who are 21 years of age and older
- Tonography with water provocation (procedure code 92130), extended color vision examination (procedure code 92283), dark adaptation examination (procedure code 92284), and vision screening (procedure code 99172 or 99173)
• Vision services for clients who are 21 years of age and older that exceed the limitation of one eye examination by refraction, for each client, every 24 months (This limitation does not apply to medially necessary eye examinations for clients who are 21 years of age and older with a diagnosis of diabetes.)

• Contact lens prescription services, except for the treatment of aphakia (congenital or acquired) or injury to the eye

• Spectacle (eyeglass) fitting services

Clients may be billed for noncovered frames and other items beyond Medicaid benefits. Providers must have the client sign and date the Vision Care Eyeglass Patient (Medicaid Client) Certification Form and retain it in the provider’s records. The client payment amount is not considered other insurance and must not be entered as a credit amount in the electronic field.

**Example:** Texas Medicaid may reimburse providers a total of $30.36 for eyeglass frames that are within the provider’s selection for Medicaid reimbursement plus the allowed cost per lens. If the client chooses a pair of frames (such as $200 frames) that are outside of the provider’s selections for Medicaid reimbursement and if the client chooses other items or services that are not a benefit of Texas Medicaid (such as tinted lenses for an extra $10 charge), the client is responsible for and may be billed for the balance of the cost of the frames ($169.64) and the other items that are not a benefit of Medicaid ($10 for tinted lenses).

The provider may withhold the noncovered eyewear, contacts, or eyeglasses until the client pays for those items. If the client fails to pay for the noncovered items or has not returned for finished eyewear within a reasonable length of time (two to three months), the provider may return any reusable items to stock. Any payment made by TMHP for frames or lenses must be refunded to Texas Medicaid. If a client requests eyewear that is beyond program benefits (for example, scratch-resistant coating), Medicaid allows reimbursement up to the maximum fee. The provider may charge the client the difference between the Medicaid payment and the customary charge for the eyewear requested, when the client has been shown the complete selection of Medicaid-covered eyewear and when the following conditions are met:

• The client rejects the Medicaid-covered eyewear and wants eyewear that complies with Texas Medicaid specifications, but is not included in the selection of Medicaid-covered eyewear.

• The client indicates a willingness to pay the difference between the Medicaid payment and the actual charge. The provider must have the client sign the Vision Care Eyeglass Patient (Medicaid Client) Certification Form and retain it in the provider’s records.

**Note:** A client who requires low vision aids or who experiences vision-related difficulty with daily living activities or with employment may be referred to the DARS Division for Blind Services for evaluation and any appropriate resources.

4.3.5 Vision Testing

Vision testing and examination and treatment of eye conditions are benefits of Texas Medicaid and may be reimbursed to ophthalmologist or optometrist providers.

Eye examinations and vision testing may be reimbursed using the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>92002</td>
</tr>
</tbody>
</table>

**Refer to:** Subsection 8.2.57.1.1, “New and Established Patient Services” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for information about new patient and established patient E/M services.
Vision testing procedure codes are subject to the Centers for Medicare & Medicaid Services (CMS) National Correct Coding Initiative (NCCI) relationships. Claims that are submitted by physicians with the same specialty who are in the same group practice are processed as if they were the same provider. The following relationships are exceptions to the published NCCI relationships:

The procedure codes in Column A of the table below will be denied if they are billed with the same date of service by the same provider as the procedure codes in Column B:

<table>
<thead>
<tr>
<th>Column A (Denied)</th>
<th>Column B</th>
</tr>
</thead>
<tbody>
<tr>
<td>S0620, S0621</td>
<td>92002, 92004, 92012, 92014</td>
</tr>
</tbody>
</table>

Refer to: The CMS NCCI web page at www.cms.hhs.gov/NationalCorrectCodInitEd/ for the published correct coding guidelines and specific applicable code combinations.

4.3.5.1 Routine Vision Testing

Procedure codes S0620 and S0621 may be reimbursed for routine vision testing with refraction when they are billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>24941 24950 24951 24960 24961 24970 24971 24980 24981 24990</td>
</tr>
<tr>
<td>24991 25000 25001 25002 25003 25010 25011 25012 25013 25020</td>
</tr>
<tr>
<td>25021 25022 25023 25030 25031 25032 25033 25040 25041 25042</td>
</tr>
<tr>
<td>25043 25050 25051 25052 25053 25060 25061 25062 25063 25070</td>
</tr>
<tr>
<td>25071 25072 25073 25080 25081 25082 25083 25090 25091 25092</td>
</tr>
<tr>
<td>25093 36201 36202 36203 36204 36205 36206 36207 36208 36222</td>
</tr>
<tr>
<td>36223 36224 36225 36226 36227 3670 3671 36720 36721 36722</td>
</tr>
<tr>
<td>36731 36732 3674 36751 36752 36753 36781 36789 3679 37182</td>
</tr>
<tr>
<td>V720</td>
</tr>
</tbody>
</table>

Clients who are birth through 20 years of age are eligible for one routine vision test with refraction testing every state fiscal year (September 1 through August 31). More than one vision test per state fiscal year may be reimbursed only when:

- The parent, teacher, or school nurse requests medically necessary refraction testing.
- There is a significant change in vision, and documentation supports a diopter (d) change of 0.5d or greater in the sphere, cylinder, or prism measurement(s).

Clients who are 21 years of age and older are eligible for one routine vision test with refraction testing every two state fiscal years (September 1 through August 31). More than one vision test per two state fiscal years may be reimbursed only when:

- There is a significant change in vision, and documentation supports a diopter change of 0.5d or more in the sphere, cylinder, or prism measurement(s).

4.3.5.2 Medically Necessary Eye Examinations

An eye examination with or without refraction (procedure code 92002, 92004, 92012, 92014, or 92015) may be reimbursed as often as is medically necessary for the treatment of or to prescribe eyeglasses or contact lenses for aphakia, eye disease, or eye injury.

Documentation in the client’s medical record must support the medical necessity of the service performed.
Procedure codes 92002, 92004, 92012, 92014, and 92015 may be reimbursed as often as is medically necessary to ophthalmologist or optometrist providers for medically necessary eye examinations without refraction.

Claims billed by optometrists must include one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>

VH-31
CPT ONLY - COPYRIGHT 2010 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.


Procedure code 92015 may be reimbursed to ophthalmologist or optometrist providers for refraction in addition to the eye examination procedure code 92002, 92004, 92012, or 92014.

If one of the following is true, an evaluation and management (E/M) procedure code may be reimbursed for an eye examination:

- The examination does not meet the elements of an intermediate or comprehensive level of service as defined by procedure codes 92002, 92004, 92012, and 92014.
- A highly complex or risk-prone eye examination is performed.
- The client is seen for a medical reason that does not require any eye examination.

**Note:** Optometrists may be reimbursed for E/M procedure codes when the most appropriate procedure code is billed with one of the diagnosis codes in the above table.

**Refer to:** Subsection 8.2.57.1, “Office or Other Outpatient Hospital Services” in *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about evaluation and management services and procedure codes.

### 4.3.5.3 Ophthalmological Examination and Evaluation with General Anesthesia

An ophthalmological examination and evaluation under general anesthesia may be medically necessary when a client has significant injury or cannot otherwise tolerate the procedure while conscious.

Procedure codes 92018 and 92019 may be reimbursed separately for the general anesthesia.

Procedure codes 92018 and 92019 may be reimbursed once per eye, per day when they are billed by any provider.

### 4.3.5.4 Ophthalmic Ultrasound

Ophthalmic ultrasound is an ultrasonic diagnostic test that uses high frequency sound waves that are used to provide additional information about the interior of the eye and surrounding areas. The following procedure codes may be reimbursed for ophthalmic ultrasound services:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>76510</td>
</tr>
</tbody>
</table>

One of the following diagnosis codes must be submitted with the most appropriate ophthalmic ultrasound procedure code:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>1900</td>
</tr>
<tr>
<td>24951</td>
</tr>
<tr>
<td>25051</td>
</tr>
<tr>
<td>36060</td>
</tr>
<tr>
<td>36103</td>
</tr>
<tr>
<td>36119</td>
</tr>
<tr>
<td>36202</td>
</tr>
<tr>
<td>36214</td>
</tr>
<tr>
<td>36225</td>
</tr>
<tr>
<td>36236</td>
</tr>
<tr>
<td>36254</td>
</tr>
<tr>
<td>36266</td>
</tr>
</tbody>
</table>
Ophthalmic ultrasounds may be reimbursed when they are billed with the same date of service by the same provider as an eye examination visit or consultation.

Ophthalmic ultrasounds may be reimbursed once per eye, per day when they are billed by any provider.

Ophthalmic ultrasound procedure codes are subject to CMS NCCI relationships. The following relationships are exceptions to the published NCCI relationships:

The procedure codes listed in Column A of the table below will be denied when they are billed with the same date of service by the same provider as the corresponding procedure codes in Column B.

<table>
<thead>
<tr>
<th>Column A (Denied)</th>
<th>Column B</th>
</tr>
</thead>
<tbody>
<tr>
<td>76529</td>
<td>76512, 76513</td>
</tr>
<tr>
<td>76519</td>
<td>76511</td>
</tr>
<tr>
<td>76516</td>
<td>76511, 76519</td>
</tr>
<tr>
<td>76512</td>
<td>76510</td>
</tr>
<tr>
<td>76511</td>
<td>76506, 76510, 76512</td>
</tr>
</tbody>
</table>

Refer to: The CMS NCCI web page at www.cms.hhs.gov/NationalCorrectCodInitEd/ for the published correct coding guidelines and specific applicable code combinations.

Prior Authorization Requirements

Procedure code 76999 requires prior authorization. The provider must submit the following documentation with the request:

- A clear, concise description of the ophthalmic ultrasound being performed.
- A diagnosis from the above table.
- A procedure code that is comparable to the ophthalmic ultrasound being requested or the provider’s intended fee for performing the ophthalmic ultrasound.

Note: Services and procedures that are investigational or experimental are not a benefit of Texas Medicaid.
4.3.5.5 Corneal Topography

Procedure code 92025 may be reimbursed for corneal topography when it is billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>37000</td>
</tr>
<tr>
<td>37102</td>
</tr>
<tr>
<td>37146</td>
</tr>
<tr>
<td>37234</td>
</tr>
<tr>
<td>8710</td>
</tr>
</tbody>
</table>

Corneal topography may be reimbursed when it is billed with the same date of services by the same provider as an eye examination visit or consultation.

Procedure code 92025 may be reimbursed once per eye, per day when it is billed by any provider.

Modifier LT or RT must be included on the claim to identify the eye on which the service was performed.

4.3.5.6 Sensorimotor Examination

A sensorimotor examination with interpretation and report consists of multiple ocular deviation measurements and includes, but is not limited to, visual motor integration, reversal frequency (letters and numbers), motor speed and precision, visual memory, and visualization to test eye movement and control, focusing ability, eye teaming ability, depth perception, and visual perception skills.

Procedure code 92060 may be reimbursed for a sensorimotor examination when it is billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>36800</td>
</tr>
<tr>
<td>37806</td>
</tr>
<tr>
<td>37817</td>
</tr>
<tr>
<td>37833</td>
</tr>
<tr>
<td>37851</td>
</tr>
<tr>
<td>37871</td>
</tr>
<tr>
<td>37956</td>
</tr>
</tbody>
</table>

Procedure code 92060 may be reimbursed once per day and twice per calendar year when it is billed by any provider, and it may be reimbursed in addition to an eye examination visit.

4.3.5.7 Orthoptic and Pleoptic Training

Orthoptics, a component of vision training or vision therapy, are exercises designed to improve the function of the eye muscles with an emphasis on binocular vision and eye movements. Pleoptics are exercises designed to improve impaired vision when there is no evidence of organic eye diseases.

Procedure code 92065 may be reimbursed for orthoptic or pleoptic training when it is billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>36800</td>
</tr>
<tr>
<td>37806</td>
</tr>
</tbody>
</table>
Procedure code 92065 may be reimbursed once per day and twice per calendar year when it is billed by any provider, and it may be reimbursed in addition to an eye examination visit.

### 4.3.5.8 Ophthalmoscopy, Angioscopy or Angiography

Routine ophthalmoscopy is part of general and special ophthalmologic services whenever indicated and may be reimbursed using the following procedure codes:

**Procedure Codes**

<p>| | | | | | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>92225</td>
<td>92226</td>
<td>92230</td>
<td>92235</td>
<td>92240</td>
<td>92250</td>
<td>92260</td>
<td></td>
</tr>
</tbody>
</table>

Ophthalmoscopy and fluorescein angioscopy or angiography (procedure codes 92225, 92226, 92230, and 92235) are considered unilateral procedures and may be reimbursed for a quantity of two if both the left and right eyes are evaluated. If two services are billed for the same date of service, one may be reimbursed at the full rate, and the other may be reimbursed at half rate.

Procedure codes 92225 and 92226 may be reimbursed once per eye, per day when they are billed by any provider.

Procedure codes 92225 and 92226 must be billed with modifier LT or RT to identify the eye on which the service was performed.

Ophthalmoscopy, angioscopy, and angiography procedure codes are subject to CMS NCCI relationships. The following relationships are exceptions to the published NCCI relationships:

The procedure codes in Column A of the following table will be denied if they are billed with the same date of service by the same provider as the corresponding procedure codes in Column B:

<table>
<thead>
<tr>
<th>Column A (Denied)</th>
<th>Column B</th>
</tr>
</thead>
<tbody>
<tr>
<td>92230</td>
<td>92235</td>
</tr>
<tr>
<td>92240</td>
<td>92230, 92250</td>
</tr>
<tr>
<td>92132, 92133, 92134</td>
<td>92250</td>
</tr>
</tbody>
</table>

### 4.3.5.9 Other Professional Services

The following procedure codes may be reimbursed by Texas Medicaid when the services are medically necessary:

**Procedure Codes**

<p>| | | | | | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>92020</td>
<td>92081</td>
<td>92082</td>
<td>92083</td>
<td>92100</td>
<td>92120</td>
<td>92132</td>
<td>92133</td>
</tr>
<tr>
<td>92140</td>
<td>92227</td>
<td>92228</td>
<td>92265</td>
<td>92270</td>
<td>92275</td>
<td>92285</td>
<td>92286</td>
</tr>
</tbody>
</table>
Procedure codes 92227 and 92228 may each be reimbursed once per day. Visual field examination procedure codes 92081, 92082, 92083 may be reimbursed twice per calendar year when billed by any provider.

Procedure codes 92132, 92133, and 92134 may be reimbursed once per eye, per day, when it is billed by any provider.

Scanning computerized ophthalmic diagnostic imaging (procedure codes 92132, 92133, and 92134) and external ocular photography (procedure code 92285) must be billed with modifier LT or RT, which must be included on the claim to identify the eye on which the service was performed.

Serial automounter (procedure code 92100), tonography (procedure codes 92120), ophthalmic biometry (procedure code 92136), and provocative tests for glaucoma (procedure code 92140) may be reimbursed once per day when they are billed by any provider.

Tonography (procedure code 92120) may be reimbursed when it is billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>

For other professional services, fitting services are included in the reimbursement for prosthetic eyeglasses or contact lenses.

4.3.6 Vision Services for Nonprosthetic Eyewear

**Definition:** nonprosthetic eyewear is medically necessary to correct defects in vision. Providers may refer to TAC §354.1015 for more information.

**Limitations:** Nonprosthetic eyeglasses or contact lenses may be reimbursed for clients of any age when there is no other option available to correct or ameliorate a visual defect. Prescribing and dispensing medically necessary eyeglasses or contact lenses are benefits of Texas Medicaid as follows:

- Nonprosthetic eyeglasses or contact lenses may be reimbursed once every 24 months. Additional services within the 24-month period may be considered when documentation in the client’s medical record supports medical necessity that includes a dioptr change of 0.5d or more in the sphere, cylinder, or prism measurement(s). A new 24 month benefit period for eyewear begins with the placement of the new nonprosthetic eyewear.

- Replacement of nonprosthetic eyeglasses or contact lenses because of loss or destruction is a benefit of Texas Medicaid for clients who are birth through 20 years of age. If the eyeglasses or contact lenses are lost or destroyed, the provider must have the client sign the Vision Care Eyeglass Patient (Medicaid Client) Certification Form and the signed form must be maintained in the client’s medical record.

- For clients who have had insertion of an intraocular lens (IOL), one pair of eyeglasses or contact lenses may be reimbursed. Additional eyeglasses or contact lenses may be considered when documentation in the client’s medical record supports medical necessity that includes a dioptr change of 0.5d or more in the sphere, cylinder, or prism measurement(s).

  **Note:** Because the IOL is considered the prosthetic device, the eyeglasses or contact lenses, and any replacements, are considered nonprosthetic.

  **Refer to:** Subsection 4.3.5.1, “Routine Vision Testing” in this handbook for information about vision testing for the purposes of prescribing eyewear.

The prescription for eyeglasses must be given to the client upon request. A provider may not withhold a prescription for eyeglasses from a client even if Medicaid reimbursement for the eye examination has not been received.

To be considered by Texas Medicaid, the eyeglasses or contact lenses must be:

- Medically necessary.

- Prescribed by a doctor of medicine, optometry, or osteopathy.

- Prescribed to significantly improve vision or correct a medical condition.

• In compliance with eyeglass program specifications for frames and lenses as stated in the Texas Administrative Code (TAC) Rule 354.1017, Specifications for Eyewear and Rule 363.503, Specifications for Eyewear.

4.3.6.1 Eyeglass Lenses and Frames

The following eyeglass lens procedure codes may be billed with frame procedure codes V2020 and V2025 for reimbursement of a pair of eyeglasses:

### Procedure Codes

<table>
<thead>
<tr>
<th>Single Vision Lenses</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>V2100</td>
<td>V2101</td>
</tr>
<tr>
<td>V2110</td>

</tr>
</tbody>
</table>

For the purpose of Texas Medicaid, high-powered lenses are lenses with a sphere greater than 7.00d or a cylinder greater than 4.00d.

Providers must bill a quantity of two when billing for bilateral lenses with the same prescription.

The following procedure codes may be reimbursed for add-on services:

### Add-On Procedure Codes

<table>
<thead>
<tr>
<th>V2410</th>
<th>V2430</th>
<th>V2700</th>
<th>V2710</th>
<th>V2715</th>
<th>V2718</th>
<th>V2730</th>
<th>V2755</th>
<th>V2770</th>
<th>V2780</th>
</tr>
</thead>
<tbody>
<tr>
<td>V2784</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Add-on procedure codes will not be reimbursed unless they are billed with the appropriate lens procedure code by the same provider for the same date of service.

The fitting of eyeglasses (procedure codes 92340, 92341, 92342, and 92370) is considered part of the dispensing procedure and is not separately reimbursed.

### Polycarbonate Lens

Procedure code V2784 for polycarbonate lens is considered an add-on procedure code. Polycarbonate lenses may be reimbursed for clients with one of the following medical or physical conditions that are a high risk for eye injuries due to eyewear breakage (this list is not all-inclusive):

- Cerebral palsy
- Multiple sclerosis
- Muscular dystrophy
- Epilepsy
- Autism
- Down syndrome
- Brain trauma
- Balance disorders
- Parkinson disease
- Seizure disorder
- Motor ataxia
- Marvin syndrome
- Ocular prostheses
- Amblyopia
- Lens power in at least one meridian of -5.25/+4.00 diopters or more and the eyeglasses are not functional in regular standard glass or plastic lens materials due to weight, thickness or aberration
- Monocular vision with functional vision in one eye
- Retinal detachment or risk for retinal detachment (e.g., lattice degeneration, history of retinal detachment in the family, posterior vitreous detachment)

Procedure code V2784 may be reimbursed when it is billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>29900</td>
</tr>
<tr>
<td>33183</td>
</tr>
<tr>
<td>3439</td>
</tr>
<tr>
<td>34551</td>
</tr>
<tr>
<td>35921</td>
</tr>
<tr>
<td>35979</td>
</tr>
<tr>
<td>36107</td>
</tr>
<tr>
<td>36800</td>
</tr>
<tr>
<td>38600</td>
</tr>
<tr>
<td>38631</td>
</tr>
<tr>
<td>38650</td>
</tr>
<tr>
<td>7670</td>
</tr>
<tr>
<td>85412</td>
</tr>
</tbody>
</table>

For the following instances, providers must submit documentation of medical necessity with the claim:

- For all diagnoses other than those in the diagnosis table above. If documentation is not submitted with the claim, the polycarbonate lenses will be denied.
- For lens power in at least one meridian of -5.25/+4.00 diopters or more and the eyeglasses are not functional in regular standard glass or plastic lens material due to weight, thickness, or aberration.

**Undeliverable Eyeglasses**

The provider may be reimbursed for the lenses based on the services furnished and the materials used up to the time the provider learned that the eyeglasses were undeliverable due to any of the following:

- The client cancels an order for eyeglasses prior to their completion and delivery.
- The prescription changes prior to completion and delivery of the eyeglasses.
- The client dies.

Reimbursement will not be made for the frames.
4.3.6.2 Contact Lenses

The following procedure codes may be reimbursed for contact lenses:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>V2500</td>
</tr>
<tr>
<td>V2523</td>
</tr>
</tbody>
</table>

The following procedure codes may be reimbursed for the fitting or modification of a contact lens:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>92070</td>
</tr>
</tbody>
</table>

Corneal Bandage

A soft corneal plano bandage lens may be medically necessary for eye protection to prevent blindness due to a disease process. Procedure code 92070 may be reimbursed for the soft corneal plano bandage. Corneal bandage may be reimbursed once per eye, per day when it is billed by any provider. Modifier LT or RT must be included on the claim to identify the eye on which the service was performed.

Prior Authorization Requirements

Nonprosthetic contact lenses must be prior authorized. The following documentation must be submitted with a request for nonprosthetic contact lenses and must be signed and dated by the prescribing physician or optometrist:

- Diagnosis causing the refractive error (such as keratoconus)
- Include the current and new prescriptions supporting a change of 0.5d or more in the sphere, cylinder, or prism measurement(s)
- Indicate which eye(s) to be treated
- Specify the procedure code(s) requested
- Include a brief statement addressing the medical necessity for vision correction by contact lens(es) and specify why eyeglasses are inappropriate or contraindicated for this client

For the soft corneal plano bandage lens (procedure code 92070), nonprosthetic contact lenses for nonemergency placement require prior authorization that must be obtained before the lens(es) are dispensed. Documentation submitted with the request must include the information listed above.

Nonprosthetic contact lenses for emergency placement do not require prior authorization. The emergency condition necessitating a corneal bandage must be documented on the claim.

4.3.6.3 Dispensing Requirements

Providers must be able to dispense standard size frames at no cost to the eligible client. The following criteria must be met for the dispensed frames:

- Providers must offer each client who is 20 years of age or younger a choice of six styles in three colors for each type of frame: metal, zylonite, or combination of metal and zylonite.
- Providers must offer each client who is 21 years of age or older a choice of three styles in three colors for each type of frame: metal, zylonite, or combination of metal and zylonite.

When a client chooses eyeglass or contact lens options that are beyond program limitations, the client must acknowledge their choice and his or her liability for the cost difference by signing the Vision Care Eyeglass Patient (Medicaid Client) Certification Form.
Dispensing of contact lenses include the fabrication, ordering, adjustment, dispensing, sale, and delivery to the client of the contact lens(es) prescribed by and dispensed in accordance with a prescription from a licensed physician or optometrist.

Dispensing of eyeglasses includes the design, verification, fitting, adjustment, sale, and delivery to the client of (1) fabricated and finished spectacle lenses, (2) frames, or (3) other ophthalmic devices, prescribed by and dispensed in accordance with a prescription from a licensed physician or optometrist.

4.3.6.4 Repair

The eyeglass supplier is required to perform minor repairs on request (without charge). Minor repairs are those that cost $2.00 or less. The minor repairs are included in the reimbursement for the eyeglasses and are not reimbursed separately.

For clients who are birth through 20 years of age, repairs that cost more than $2.00 may be reimbursed using procedure code V2799. The following criteria apply:

- The cost of repair supplies cannot exceed the cost of replacement eyeglasses.
- All repair supplies must be new and at least equivalent to the original item.
- The provider must maintain in the client’s medical record an itemized list of repairs and the replacement cost to determine whether criteria are met for repair.

For clients who are 21 years of age and older, repair of nonprosthetic eyeglasses or contact lenses is not a benefit when the actual cost of materials exceeds $2.

The provider must make the client’s medical record available for review upon request.

4.3.6.5 Replacement

For clients who are birth through 20 years of age, replacement nonprosthetic eyeglasses or contact lenses may be reimbursed as often as is medically necessary if the replacement is due to loss or destruction.

The appropriate contact lens, eyeglass lens, or eyeglass frame procedure codes must be billed with modifier RB to indicate replacement.

If the client is diagnosed with aphakia, procedure code 92326 may be reimbursed for the replacement of a contact lens. Procedure code 92326 may be reimbursed when it is billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>37931</td>
</tr>
</tbody>
</table>

4.3.6.6 Medicare Coverage for Nonprosthetic Eyewear

Eye examinations for the purpose of prescribing, fitting, or changing eyeglasses or contact lenses because of refractive errors are not a benefit of Medicare. These services must be filed directly to Texas Medicaid when performed for a Medicare/Medicaid client. Medicare coverage is limited to eye examinations for treatment of eye disease or injury and for a diagnosis of aphakia. When performing an eye examination with refraction for a Medicare/Medicaid client diagnosed with aphakia or disease or injury to the eye, the following procedures must be followed:

- Procedure code 92015 must be used to bill Texas Medicaid for the refractive portion of the examination and is payable with a diagnosis of aphakia or ocular disease only.
• The medical portion of the eye examination (procedure code 92002, 92004, 92012, or 92014) is covered by Medicare and must be billed to Medicare first. Medicare forwards this portion of the examination automatically to TMHP for payment of coinsurance or deductible.

**Important:** Providers performing eye exams for refractive errors on STAR+PLUS clients (Medicaid Qualified Medicare Beneficiary [MQMB]) must bill TMHP, not the STAR+PLUS health plan. Do not send the refraction (procedure code 92015) to Medicare first. Texas Medicaid will not waive the 95-day filing deadline if the claim is billed to Medicare in error, nor will Medicare transfer the refraction to Texas Medicaid for payment.

Medicare allows payment of one pair of conventional eyewear (contact lens or glasses) for clients who have had cataract surgery with insertion of an IOL. Medicare considers the IOL the prosthetic device. Texas Medicaid providers must bill Medicare for the conventional (nonprosthetic) eyewear provided following an IOL insertion and bill Texas Medicaid for any replacements of the conventional (nonprosthetic) eyewear using the procedure codes in subsection 4.3.6, "Vision Services for Nonprosthetic Eyewear" in this handbook.

### 4.3.7 Vision Services for Prosthetic Eyewear

**Definition:** Prosthetic eyeglasses or contact lenses are lenses that replace the eye’s organic lens when it is absent due to congenital or acquired aphakia. Aphakia may be the result of a congenital abnormality or defect or an acquired condition as a result of trauma or cataract removal.

**Limitations:** Prosthetic eyeglasses or contact lenses may be provided based on medical necessity. Eye examinations and prosthetic eyewear may be reimbursed as follows:

- Eye examinations for aphakia (including congenital aphakia) and disease or injury to the eye may be reimbursed as often as is medically necessary.
- One pair of permanent prosthetic eyeglasses or contact lenses is a benefit during a client’s lifetime.
- Replacement of prosthetic eyeglasses or contact lenses may be reimbursed for clients of any age due to loss or destruction of the eyewear or due to a significant change in visual acuity with a diopter change of 0.5d or more in the sphere, cylinder or prism measurement(s). The provider must maintain in the client’s medical record documentation that supports the medical necessity for the replacement eyeglasses or contact lenses.

Prosthetic eyeglasses or contact lenses may be reimbursed when billed with modifier VP and one of the following aphakia diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>37931</td>
</tr>
</tbody>
</table>

**Refer to:** Subsection 4.3.6, “Vision Services for Nonprosthetic Eyewear” in this handbook for the eyeglass lens, frame, and contact lens procedure codes and dispensing requirements that apply to prosthetic and nonprosthetic eyewear.

Prior authorization is not required for prosthetic eyeglasses or contact lenses.

The date of cataract surgery is not required on the claim for permanent prosthetic eyeglasses.

### 4.3.7.1 Temporary Eyeglasses or Contact Lenses

Temporary prosthetic eyeglasses or contact lenses after cataract surgery may be reimbursed when it is billed with the appropriate lens and frame procedure codes and diagnosis code V431.
Temporary prosthetic eyeglasses may be reimbursed for up to 4 months after surgery until the client is ready for permanent prosthetic lenses. The date of surgery is used to determine the convalescence period for temporary prosthetic eyeglasses. Temporary lenses will be denied if they are dispensed more than 4 months after the date of surgery.

Temporary prosthetic lenses may be reimbursed as often as is medically necessary during the postsurgical convalescence period.

### 4.3.7.2 Contact Lens Fitting and Modification for Prosthetic Use

The following procedure codes may be reimbursed for prosthetic contact lenses fitting:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>92070</td>
</tr>
</tbody>
</table>

### 4.3.7.3 Repair

The eyeglass supplier is required to perform minor repairs on request (without charge). Minor repairs are those that cost $2.00 or less. The minor repairs are included in the reimbursement for the eyeglasses and are not reimbursed separately.

For clients who are birth through 20 years of age, repairs that cost more than $2.00 may be reimbursed using procedure code V2799. The following criteria apply:

- The cost of repair supplies cannot exceed the cost of replacement eyeglasses.
- All repair supplies must be new and at least equivalent to the original item.
- The provider must maintain in the client's medical record an itemized list of repairs and the replacement cost to determine whether criteria are met for repair.

For clients who are 21 years of age and older, repair of prosthetic eyeglasses or contact lenses is not a benefit when the actual cost of materials exceeds $2.00.

The provider must make the client's medical record available for review upon request.

### 4.3.7.4 Replacement

Replacement prosthetic eyeglasses or contact lenses may be reimbursed as often as is medically necessary if the replacement is due to loss, destruction, or a significant change in visual acuity.

The appropriate eyeglass and frame or contact lens procedure codes must be billed with modifier RB to indicate replacement.

Refer to: Subsection 4.3.6, “Vision Services for Nonprosthetic Eyewear” in this handbook for the eyeglass lens, frame, and contact lens procedure codes and dispensing requirements that apply to prosthetic and nonprosthetic eyewear.

Procedure code 92326 for the replacement of a contact lens may be reimbursed when it is billed with a diagnosis of aphakia:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>37931</td>
</tr>
</tbody>
</table>

### 4.3.7.5 Intraocular Lens (IOL) and Additional Eyewear

Intraocular lenses are benefits of Texas Medicaid. If conventional eyewear is medically necessary in addition to the IOL, the IOL is considered the prosthetic device, and the eyewear and any replacements are considered nonprosthetic.
Refer to: Subsection 8.2.46.4, “Intraocular Lens (IOL)” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for more information about IOL benefits.

Subsection 4.3.6, “Vision Services for Nonprosthetic Eyewear” in this handbook for more information about nonprosthetic eyewear.

4.3.7.6 Artificial Eyes
For clients who are birth through 20 years of age, artificial eyes may be considered under CCP.

4.3.7.7 Ultraviolet (U-V) Protection
Procedure code V2755 may be reimbursed for U-V protection when it is billed with an aphakia diagnosis code (diagnosis code 37931, 37932, 37933, 37934, 74335, or V431).

UV lens procedure code V2755 will be denied when billed with the same date of service by the same provider as polycarbonate lens procedure code V2784.

UV and polycarbonate lens procedure codes are subject to CMS NCCI relationships.

Refer to: The CMS NCCI web page at www.cms.hhs.gov/NationalCorrectCodInitEd/ for the published correct coding guidelines and specific applicable code combinations.

4.3.8 Surgical Vision Services
Refer to: Subsection 8.2.37.13, “Fluocinolone Acetonide (Retisert)” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for more information about fluocinolone acetonide benefits.

Subsection 8.2.46, “Ophthalmology” in Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for more information about surgical vision services.

4.4 Documentation Requirements
All services require documentation to support the medical necessity of the service rendered, including vision services. Vision services are subject to retrospective review and recoupment if documentation does not support the service billed.

The client must sign and date the Vision Care Eyeglass Patient (Medicaid Client) Certification Form, and the provider must retain it in the provider’s records.

The current and previous prescriptions must be documented in the client’s medical record.

The provider must make the client’s medical record available for review upon request by the following:

- HHSC
- Office of the Attorney General
- TMHP

4.5 Claims Filing and Reimbursement
4.5.1 Claims Filing
Vision care service claims must be submitted to TMHP in an approved electronic format or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a CMS-1500 claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.
When submitting the client’s old and new prescriptions to show a diopter change of .5 or more, enter the new prescription in Block 24D, line 5, and the old prescription in Block 24D, line 6 of the CMS-1500 claim form.

Claims for eye examination services require a diagnosis. If eyeglasses are not prescribed, diagnosis code V720 may be used. Diagnosis code V720 must not be used on claims for eyewear. If the diagnosis is not known by the supplier of the eyewear, diagnosis code 3689 is acceptable. Claims for eye examinations that lack a diagnosis are listed as an incomplete claim on the Remittance and Status (R&S) report and must be resubmitted for payment consideration. Electronic claims that lack a diagnosis will be rejected. A letter with the reason for rejection and instructions for resubmission will be mailed the following business day.

When the eye exam limitation is exceeded for clients who are 20 years of age and younger, identify one of the following situations in Block 19 of the CMS-1500 paper claim form:

- A school nurse, teacher, or parent requests the eye examination.
- The eye examination is medically necessary.

4.5.1.1 Services Rendered to Managed Care Clients

A primary care provider referral for nonsurgical vision services is not required for Managed Care clients. To avoid unnecessary denials, the physician must provide correct and complete information, including documentation of medical necessity for the vision service requested. The physician must maintain documentation of medical necessity in the client’s medical record. The requesting provider may be asked for additional information to clarify or complete a request for the vision service.

4.5.2 Reimbursement

Professional services by an optometrist for contact lenses and prosthetic eyewear are reimbursed in accordance with 1 TAC, §§355.8001, 355.8081, and 355.8085.

FQHCs are paid an all-inclusive rate per visit for payable services in accordance with 1 TAC, §355.8261. Suppliers of nonprosthetic lenses and frames are reimbursed the lesser of their billed amount or of the established maximum allowable fee in accordance with 1 TAC, §355.8001. See the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com.

Refer to: Subsection 2.2, “Reimbursement Methodology” in Section 2, “Texas Medicaid Reimbursement” (Vol. 1, General Information) for more information about reimbursement.

Form VH.6, “Vision Services” in this handbook for a claim form example.

The nonsurgical vision procedure codes included in this handbook may be subject to the CMS National Correct Coding Initiative (NCCI) relationships.

Refer to: The CMS website at www.cms.gov for more information about CCI relationships.

Procedure codes that are unilateral must be billed with modifier LT or RT to identify the eye on which the service was performed.
5. CLAIMS RESOURCES

Refer to the following sections and forms when filing claims:

<table>
