WELCOME: TEXAS MEDICAID PROVIDER PROCEDURES MANUAL

This manual is a comprehensive guide for Texas Medicaid providers. It contains information about Texas Medicaid fee-for-service benefits, policies, and procedures including medical, dental, and children’s services benefits.

Refer to: Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks) for information about the Medicaid Managed Care, which is administered by Texas Health and Human Services Commission (HHSC)-contracted managed care organizations (MCOs), dental managed care organizations, and behavioral health organizations (BHOs) across the state.

The Texas Medicaid Provider Procedures Manual is updated monthly on the TMHP website at www.tmhp.com to include revisions to policies and procedures that went into effect in the prior month. The manual is available in portable document format (PDF) as a complete book and as individual sections and handbooks. A hypertext markup language (HTML) version is also available.

The current version of the manual always appears prominently on the Texas Medicaid Provider Procedures Manual web page. All previously published annual editions of the Texas Medicaid Provider Procedures Manual have been archived. Users can access the archives through links on the Texas Medicaid Provider Procedures Manual web page.

Providers can determine what has changed each month by following the Release Notes link on the Texas Medicaid Provider Procedures Manual web page. The release notes include the sections and handbooks that have changed for the current month and the nature of the changes. Most changes have been previously announced in news articles on the TMHP website, and, where appropriate, the release notes link to prior website articles.

Publishing the manual monthly has eliminated the need for the Texas Medicaid Bulletin, which was discontinued following the publication of the September/October 2012 Texas Medicaid Bulletin, No. 243. Special bulletins, such as the annual Healthcare Common Procedure Coding System (HCPCS) bulletin, which is published in January of each year, will continue to be published on an as-needed basis.

The Texas Medicaid Provider Procedures Manual is divided into two volumes as follows:

Volume 1: General Information
Volume 1 applies to all health-care providers who are enrolled in Texas Medicaid and provide services to Texas Medicaid fee-for-service clients. The sections in Volume 1 include general information for enrolling in the program, receiving appropriate reimbursement, and claim submissions and appeals for services rendered.

Volume 2: Provider Handbooks
Volume 2 includes 13 handbooks. Each handbook covers Medicaid policies, procedures, and claims filing requirements for specific products or services. Volume 2 includes the following handbooks:

• Ambulance Services Handbook
• Behavioral Health, Rehabilitation, and Case Management Services Handbook
• Children’s Services Handbook
• Clinics and Other Outpatient Facility Services Handbook
• Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook
• Gynecological and Reproductive Health and Family Planning Services Handbook
• Inpatient and Outpatient Hospital Services Handbook
• Medicaid Managed Care Handbook
• Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook

INTRODUCTION

Medicaid Program Administration

The Texas Medical Assistance (Medicaid) Program was implemented on September 1, 1967, under the provisions of Title XIX of the federal Social Security Act and Chapter 32 of the Texas Human Resources Code.

The State of Texas and the federal government share the cost of funding Texas Medicaid. The Health and Human Services Commission (HHSC), the single state Medicaid agency, is responsible for the Title XIX Program. The administration of the program is accomplished through contracts and agreements with the following:

- Medical providers
- Texas Medicaid & Healthcare Partnership (TMHP), the fee-for-service claims administrator
- MAXIMUS, the enrollment broker
- Various managed care organizations (MCOs) and dental managed care organization (dental plans), that administer Medicaid Managed Care benefits.
- The Institute for Child Health Policy (ICHP), the quality monitor
- State agencies

Texas Medicaid providers are reimbursed for services through contracts with health-insuring contractors, fiscal agents, or direct vendor payments.

By signing an HHSC Medicaid Provider Agreement (through the enrollment process) and submitting Medicaid claims, each enrolled provider agrees to abide by the policies and procedures of Medicaid, published regulations, and the information and instructions in manuals, bulletins, and other instructional material furnished to the provider.
Refer to: Appendix A: State and Federal Offices Communication Guide (Vol. 1, General Information) for addresses and telephone numbers of HHSC and Department of State Health Services (DSHS) regional offices.

**TMHP Website**

The TMHP website at www.tmhp.com is a valuable resource that provides:

- Provider education information and registration for upcoming education/training sessions (i.e., live workshops, webinars, computer-based training, and audio content).
- Publications, such as bulletins, banner messages, and provider manuals.
- A TMHP News section with announcements of program changes and other important information.
- Real-time and static fee schedules.
- Forums, polls, and questionnaires.
- Online provider enrollment.
- Complete instructions for setting up a Provider Administrator account and the use of online claims status inquiries (CSI), eligibility verification, and Electronic Remittance and Status (ER&S) Reports.

Additional advanced features are available for those providers who create an account. All enrolled providers are eligible for this free account. Once an account is activated, providers will have access to:

- Texas Medicaid enrollment information.
- CSIs.
- Eligibility verification.
- ER&S Report download option.
- Claims submission.
- Claims appeals.
- Online provider lookup.
- Online fee lookup (OFL) to obtain real-time fee information for an individual or a range of procedure codes. Benefits and limitations for certain services and history up to 2-years is also available.
- Payment amounts search, view, and print capabilities.
- Notification of an invalid address on file for any Texas Provider Identifier (TPI) associated with a provider’s National Provider Identifier (NPI).
- Notification of pending payments because of inaccurate or incomplete provider information.
- Manage hospital admission and discharge information on clients residing in an institution for mental diseases (IMD)

**Important:** Natural disasters, such as floods or hurricanes, can impact the delivery of health care to Texas Medicaid clients. When disaster strikes, providers should monitor the TMHP website for special instructions.

New services are always being added to the website. Please visit www.tmhp.com for the latest information on TMHP online services.

**Other TMHP Information**

**TMHP Contact Center**

The TMHP Contact Center is available from 7 a.m. to 7 p.m., Central Time, Monday through Friday. 

The TMHP Contact Center assists with questions such as:

- Provider enrollment procedures
- Claims filing procedures
- Policy information

The TMHP Contact Center is available to assist providers and clients. Please review the telephone and fax communication guides in this section for a list of contact phone and fax numbers.

Provider calls, including those that were previously made to the Provider Relations territory representatives, are now handled first by the Contact Center. The Contact Center is well equipped to handle most inquiries about benefits and claims.
If the Contact Center representative determines that an inquiry can best be handled by the TMHP Provider Relations department, the inquiry will be forwarded to Provider Relations. For example, providers who want to talk to their Provider Relations representative about a visit, in-service, or training, can call the Contact Center, and the Contact Center will forward the request to Provider Relations.

Resolution of more complex issues that are referred to Provider Relations for further analysis can take up to 30 days from the date of the referral. For these issues, Provider Relations will contact the provider by phone or e-mail when the issue has been resolved.

For questions or information about Medicaid eligibility, clients are referred to their caseworker or the local HHSC office.

**Automated Inquiry System (AIS)**

AIS provides the following information and services through the use of a touch-tone telephone: claim status, patient eligibility, benefit limitations, Medically Needy case status, Family Planning, current weekly payment amount, and claim appeals.

Eligibility and claim status information is available on AIS 23 hours a day, 7 days a week, with scheduled down time between 3 a.m. and 4 a.m., Central Time. All other AIS information is available from 7 a.m. until 7 p.m., Central Time, Monday through Friday. AIS offers 15 transactions per call.

For full instructions on the use and benefits of AIS, refer to the “Automated Inquiry System (AIS) User’s Guide” available on www.tmhp.com or call the TMHP Contact Center at 1-800-925-9126 for faxed instructions.

**TMHP Provider Relations**

The TMHP Provider Relations Department comprises a staff of Austin- and field-based provider relations representatives whose goal is to serve the health-care community by furnishing a variety of services and activities designed to inform and educate health-care providers about Texas Medicaid activities and claim submission procedures.

Provider Relations activities include the following:

- **Provider education through planned events.** Provider Relations representatives conduct a planned program of educational workshops, in-services, webinars, computer-based training (CBT), and other training sessions designed to keep all actively-enrolled providers informed of the latest policies, claim processing procedures, and federal and state regulations affecting Texas Medicaid. Details of all available provider training can be found in the Provider Education section of the TMHP website at www.tmhp.com.

- **Problem identification and resolution.** A staff of research coordinators is available to assist providers with clarification of Medicaid policies and assist with in-depth problem claim submission issues after initial inquiries are made with the TMHP Contact Center. Coordinators work closely with field-based regional representatives to coordinate the educational needs of the community.

- **Relationship with professional health-care organizations.** To ensure that Texas associations that represent health-care professions have up-to-date information about the requirements for participation in Texas Medicaid, the Provider Relations Department maintains a work relationship with these organizations. Also, the Provider Relations Department participates in several events sponsored by Texas health-care associations, such as conventions and conferences.

Call the TMHP Contact Center at 1-800-925-9126 for assistance.

**TMHP Electronic Data Interchange (EDI) Help Desk**

The TMHP EDI Help Desk assists Medicaid providers with EDI transactions. The TMHP EDI Help Desk is available at 1-888-863-3638 from 7 a.m. to 7 p.m., Central Time, Monday through Friday.
TMHP EDI Help Desk activities and responsibilities include, but are not limited to, the following:

- Enrolling providers for electronic billing
- Qualifying vendors for TMHP EDI production through testing
- Diagnosing claim transmission problems through research
- Consulting with provider billing personnel, billing services, and software vendors regarding TMHP EDI

TMHP EDI Help Desk staff assists with questions about TMHP EDI, TexMedConnect, and electronic transmissions at 1-888-863-3638.

Providers who employ hardware or software vendors should contact those vendors for the resolution of technical problems.
SECTION 1: PROVIDER ENROLLMENT AND RESPONSIBILITIES

1.1 Provider Enrollment

1.1.1 National Provider Identifier (NPI) and Taxonomy Codes
1.1.2 Online Enrollment
1.1.3 Affordable Care Act of 2010 (ACA) Enrollment Requirements
   1.1.3.1 Provider Screening Requirement
   1.1.3.2 Provider Re-enrollment (Revalidation)
   1.1.3.3 Application Fee
   1.1.3.4 Enrollment for Ordering- and Referring-Only Providers
   1.1.3.5 * Ordering- or Referring-Only Providers Search on the Online Provider Lookup (OPL)
1.1.4 Surety Bond Enrollment Requirement
1.1.5 Provider Enrollment Application Determinations
1.1.6 Enrollment in Medicaid Managed Care Programs
1.1.7 Required Enrollment Forms
   1.1.7.1 HHSC Medicaid Provider Agreement
   1.1.7.2 Provider Information Form (PIF-1)
   1.1.7.3 Principal Information Form (PIF-2)
   1.1.7.4 Disclosure of Ownership and Control Interest Statement
   1.1.7.5 Internal Revenue Service (IRS) W-9 Form
   1.1.7.6 Medicaid Audit Information Form
   1.1.7.7 Corporate Board of Directors Resolution
   1.1.7.8 Certificate of Account Status (Board Corporation Act, Article 2.45)
   1.1.7.9 Certificate of Formation or Certificate of Filing/Certificate of Incorporation
   1.1.7.10 Certificate of Filing
   1.1.7.11 Copy of License, Temporary License, or Certification
   1.1.7.12 Licensure Renewal
   1.1.7.13 Medicare Participation
   1.1.7.14 Group Information Changes

1.2 Payment Information

1.2.1 Using EFT
1.2.2 Advantages of EFT
1.2.3 EFT Enrollment Procedures
1.2.4 Stale-Dated Checks

1.3 Provider Deactivation/Disenrollment

1.3.1 Excluded Entities and Providers

1.4 Provider Reenrollment

1.4.1 Medicare Number
1.4.2 Provider Status (Individual, Group, Performing Provider, or Facility)
1.4.3 Physical Address
1.4.4 Change in Principal Information

1.5 Change of Ownership Requirements

1.6 Provider Responsibilities

1.6.1 Compliance with Texas Family Code
   1.6.1.1 Child Support
1.1 Provider Enrollment

1.1.1 National Provider Identifier (NPI) and Taxonomy Codes

The National Provider Identifier (NPI) final rule, Federal Register 45, Code of Federal Regulations (CFR) Part 162, established the NPI as the standard unique identifier for health-care providers and requires covered health-care providers, clearinghouses, and health plans to use this identifier in Health Insurance Portability and Accountability Act (HIPAA)-covered transactions. An NPI is a 10-digit number assigned randomly by the National Plan and Provider Enumeration System (NPPES). An NPI must be obtained before a provider can enroll as a Texas Medicaid provider.

The Health Care Provider Taxonomy Code Set is an external, non-medical collection of alphanumeric codes designed to classify health-care providers by provider type and specialty. Providers may have more than one taxonomy code. (Taxonomy codes can be obtained from the Washington Publishing Company website at www.wpc-edi.com).

During the enrollment process, providers must select a primary and, if applicable, secondary taxonomy code associated with their provider type. Providers will be supplied a list of taxonomy codes to choose from that correspond to the services rendered by the type of provider they wish to enroll as. Only the code will be displayed. Due to copyright laws, TMHP is unable to publish the taxonomy description. Therefore, providers must verify the taxonomy code associated with their provider type and specialty before beginning the online attestation process.

Initial Texas Medicaid fee-for-service enrollment and reenrollment can be completed online through the TMHP website at www.tmhp.com. The online Texas Medicaid provider enrollment application can be completed to enroll in Texas Medicaid as a traditional Medicaid provider, a Texas Health Steps (THSteps) medical checkup provider, a THSteps dental provider, and a Children with Special Health Care Needs (CSHCN) Services Program provider. Upon completion of the application, qualified providers are automatically enrolled as THSteps medical checkup providers and CSHCN Services Program providers unless they choose to opt out of one or both as prompted in the application.

If the provider chooses to opt out of THSteps or the CSHCN Services Program upon submission of the online Texas Medicaid provider enrollment application, the following applications can be submitted at a later time to enroll as a THSteps medical or CSHCN Services Program provider:

- THSteps Provider Enrollment Application
- CSHCN Services Program Provider Enrollment Application

Paper versions of the enrollment applications are also available for download from the TMHP website in the Forms section.

1.1.2 Online Enrollment

Online enrollment has the following advantages:

- Applications are validated immediately to ensure that all fields have been completed.
- Most of the application can be completed online so that only a few forms need to be printed, completed, and mailed to TMHP.
- Applicants can view both incomplete and complete applications that have been submitted online.
- Some form fields are automatically completed, reducing the amount of information that has to be entered.
- Providers can complete the Provider Information Change (PIC) form online.
- Providers will receive e-mail notifications when messages or deficiency notices about their applications are posted online. The messages can be viewed on the secured access portion of the website. Providers may opt out of e-mail communication and receive messages or deficiency letters by mail.
• Providers can create templates, which make it easier to submit multiple enrollment applications.

• Providers who enroll as a group can assign portions of the application to performing providers to complete. Performing providers can complete their portion of a group application by logging into Provider Enrollment on the Portal (PEP) with their unique user name and password.

• Providers can navigate to completed sections of the application without having to click through all pages of the application.

• Information that is on file for owners and subcontractors of the applying provider are auto-populated in the application.

Before submitting an application to TMHP for processing, providers are required to review a portable document format (PDF) copy of the application and verify it is complete. Providers are able to edit submitted applications to correct identified deficiencies.

To be eligible for Texas Medicaid reimbursement, a provider of medical services (including an out-of-state provider) must:

• Meet all applicable eligibility criteria.

• Be approved by the Texas Health and Human Services Commission (HHSC) for enrollment.

• Obtain an NPI from NPPES.

• File with TMHP the required Texas Medicaid enrollment application ensuring that the application is correct, complete, and includes all required attachments and additional information.

Refer to: Subsection 2.6, “Out-of-State Medicaid Providers” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (Vol. 1, General Information) for criteria specific to out-of-state providers.

• Provide any additional information requested by TMHP, HHSC, or the HHSC Office of Inspector General in connection with the processing of the application.

• Be approved by HHSC for enrollment and enter into a written provider agreement with HHSC.

Enrolling online promotes accurate submissions, decreases processing time, and enables immediate feedback on the status of the application.

As an alternative to applying for enrollment online, a provider may file a paper enrollment application with TMHP. Providers may download the Texas Medicaid Provider Enrollment Application at www.tmhp.com or request a paper application form by contacting TMHP directly at 1-800-925-9126. A paper enrollment application may also be requested from and must be submitted to the following address:

Texas Medicaid & Healthcare Partnership
Provider Enrollment
PO Box 200795
Austin, TX 78720-0795

Note: During the Texas Medicaid enrollment process, with HHSC approval, the Claims Administrator may waive the mandatory prerequisite for Medicare enrollment for certain providers whose type of practice will never serve Medicare-eligible individuals (e.g., pediatrics, obstetrician/gynecologist [OB/GYN]).

Providers must maintain a valid, current license or certification to be entitled to Texas Medicaid reimbursement. Providers cannot enroll in Texas Medicaid if their license or certification is due to expire within 30 days of application. A current license or certification must be submitted, if applicable.

Refer to: Subsection 1.1.7.11, “Copy of License, Temporary License, or Certification” in this section.
A provider identifier is issued when a determination has been made that a provider qualifies for participation.

**Refer to:** Subsection 2.6, “Out-of-State Medicaid Providers” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (Vol. 1, General Information) for additional criteria that must be met for out-of-state providers to enroll in Texas Medicaid.

There are five types of enrollment for providers in Texas Medicaid, as follows:

- **Individual.** This type of enrollment applies to an individual health-care professional who is licensed or certified in Texas, and who is seeking enrollment under the name, and social security or federal tax identification number of the individual. An individual may also enroll as an employee, using the federal tax identification number of the employer. Certain provider types must enroll as individuals, including the following: dieticians, licensed vocational nurses, occupational therapists, registered nurses, and speech therapists.

- **Ordering or Referring.** Individual providers who are not currently enrolled in Texas Medicaid and whose only relationship with Texas Medicaid is to order or refer supplies or services for Texas Medicaid-eligible clients must enroll in Texas Medicaid as participating providers in accordance with provisions of the Affordable Care Act of 2010 (ACA).

- **Group.** This type of enrollment applies to health-care items or services provided under the auspices of a legal entity, such as a partnership, corporation, limited liability company, or professional association, and the individuals providing health-care items or services are required to be certified or licensed in Texas. The enrollment is under the name and federal tax identification number of the legal entity. For any group enrollment application other than as a THSteps medical checkup provider group, there must also be at least one enrolling performing provider. THSteps providers are only enrolled at the group level.

- **Performing provider.** This type of enrollment applies to an individual health care professional who is licensed or certified in Texas, and who is seeking enrollment under a group. The enrollment is under the federal tax identification number of the group, and payment is made to the group. If a health-care professional is required to enroll as an individual, as explained above, but the person is an employee and payment is to be made to the employer, the health-care professional does not enroll as a performing provider. Instead, the health-care professional enrolls as an individual provider under the federal tax identification number of their employer.

- **Facility.** This type of enrollment applies to situations in which licensure or certification applies to the entity. Although individuals working for or with the entity may be licensed or certified in their individual capacity, the enrollment is based on the licensure or certification of the entity. For this reason, facility enrollment does not require enrollment of performing providers. However, certain provider types must enroll as facilities, including the following:
  - Ambulance and air ambulance
  - Ambulatory surgical center (ASC) and hospital-based ambulatory surgical center (HASC)
  - Birthing center
  - Catheterization lab
  - Chemical dependency treatment facility (licensed by the Texas Commission on Alcohol and Drug Abuse)
  - Consumer Directed Services Agency
  - County Indigent Health Care Program
  - Community mental health center
  - Comprehensive health center
• Comprehensive outpatient rehabilitation facility/outpatient rehabilitation facility
• Department of Assistive and Rehabilitative Services Division for Blind Services
• Durable medical equipment (DME)
• Durable medical equipment home health
• Early Childhood Intervention
• Federally Qualified Health Center (FQHC)
• Freestanding psychiatric facility
• Freestanding rehabilitation facility
• Home Health/Home and community support services agency
• Hospital/critical access hospital/out-of-state hospital
• Military hospital
• Hyperalimentation
• Independent diagnostic testing facility/physiological lab
• Indian Health Services
• Independent laboratory
• Maternity services clinic

• Mental health rehabilitation case management
• Mental retardation diagnostic services case management
• Milk bank donor
• Personal care services
• Pharmacy
• Portable X-ray
• Radiation treatment center
• Radiological laboratory
• Renal dialysis facility
• Rural health center (RHC)
• School health and related services (SHARS)/non-school SHARS
• Service responsibility option
• Skilled nursing facility
• Vision medical supplier
• Women, Infant and Children

Providers must submit a separate Texas Medicaid Provider Enrollment Application for each enrollment type requested. For example, a health-care professional who is already enrolled with Texas Medicaid as an individual with his or her own practice, and who wishes to bill for services provided in connection with a group, must submit a separate enrollment application and be approved as a performing provider.
with the group. Similarly, a health-care professional who is enrolled as a performing provider with one
group, but who wishes to bill for services provided in connection with another group, must submit a
separate enrollment application and be approved as a performing provider with the other group.

During the PEP process, the taxonomy code for group providers is populated with either the multi-
specialty (193200000X) or single-specialty (193400000X) group taxonomy code dependent on which
specialty was chosen.

The multi- or single-specialty taxonomy codes for group providers are accurate and have been approved
by HHSC. The most appropriate taxonomy codes should be selected for any performing providers that
will be enrolled according to their specific performing provider type and specialty.

**Note:** A separate provider identifier is issued for each enrollment type that is approved. The
provider is authorized to use the provider identifier only to bill for services provided as
indicated in the approved enrollment application. It is a program violation for a provider to
use a provider identifier for any purpose other than billing for the types of services, and under
the type of enrollment, for which that provider identifier was issued. Improper use of a
provider identifier constitutes program abuse and/or fraud.

**Refer to:** Subsection 1.9, “Medicaid Waste, Abuse, and Fraud Policy” in this section for additional
information.

### 1.1.3 Affordable Care Act of 2010 (ACA) Enrollment Requirements

Providers are required to fulfill certain requirements for enrollment in order to comply with the provi-
sions of ACA. Providers that are enrolled in Texas Medicaid and have fulfilled the ACA requirements
through their Texas Medicaid enrollment are considered ACA-compliant for all programs in which they
are enrolled.

**Refer to:** TMHP website at www.tmhp.com for additional information about ACA requirements.

In accordance with Section 6401 of ACA, the following requirements apply:

- Upon initial enrollment and upon re-enrollment, all participating providers are screened based on
  their categorical risk level. (complies with 42 CFR §§455.410 and 455.450)
- All providers are required to re-enroll at least every three to five years based on provider type.
- Institutional providers who are enrolling or re-enrolling are required to pay an application fee if one
  has not already been paid to Medicare or another state’s Medicaid program or Children’s Health
  Insurance Program (CHIP).
- Ordering and referring-only providers are required to enroll in Texas Medicaid as participating
  providers.

#### 1.1.3.1 Provider Screening Requirement

In compliance with ACA, all providers must be screened, which includes:

- Providers who submit a provider enrollment application for new enrollment, a new practice
  location, or other type of enrollment or re-enrollment.
- Providers who are currently enrolled in Texas Medicaid and are required to revalidate their
  enrollment by re-enrolling in Texas Medicaid.

#### 1.1.3.2 Provider Re-enrollment (Revalidation)

In compliance with the 42 CFR §455.414, all providers are required to re-enroll at least every three to
five years:

- Durable medical equipment (DME) providers are required to revalidate enrollment information at
  least once every three years.
- All other provider types must revalidate their enrollment information at least once every five years.
During re-enrollment, the provider screening will be repeated.

1.1.3.3 Application Fee

Under ACA, institutional providers are subject to an application fee for applications, including initial applications, applications for new practice locations, and re-enrollment applications. Upon completion of the PEP online application, providers will be notified whether they are required to pay an application fee. The amount of the application fee is subject to change every calendar year.

Providers that complete the paper Texas Medicaid Provider Enrollment Application can refer to the TMHP website for the list of provider types that are required to pay the application fee.

Note: Providers that are required to pay the application fee but have already paid the fee to Medicare or another state’s Medicaid program or CHIP have fulfilled the fee requirement and do not have to submit the fee to Texas Medicaid. Proof of payment must be submitted with the application.

1.1.3.4 Enrollment for Ordering- and Referring-Only Providers

Individual providers who are not currently enrolled in Texas Medicaid and whose only relationship with Texas Medicaid is to order supplies or refer for services for Texas Medicaid-eligible clients must enroll in Texas Medicaid as participating providers in accordance with provisions of 42 CFR §455.410(b), which requires all ordering or referring physicians or other professionals who order or refer supplies and services under the Medicaid State plan, or under a waiver of the plan, to enroll in Medicaid as participating providers.

Although ordering and referring-only providers do not submit claims to TMHP for rendered services, the ordering or referring provider’s NPI is required on claims that are submitted by the providers that render the supplies or services.

Ordering- and referring-only providers can use one of the following condensed application processes to enroll:

- Electronically, using PEP. Choose the check box for “Ordering/Referring Provider.”
- On paper, using the streamlined Texas Medicaid Provider Enrollment Application Order and Referring Providers Only paper application, which is available from the TMHP website at www.tmhp.com.

Providers who enroll in Texas Medicaid as ordering- and referring-only providers receive one Texas Provider Identifier (TPI) that can be used for orders and referrals for both Texas Medicaid clients and CSHCN Services Program clients.

Refer to: Subsection 6.4.2.4, “Ordering or Referring Provider NPI” in Section 6, “Claims Filing” (Vol. 1, General Information) for information about filing claims that require an ordering and referring-only provider NPI.

1.1.3.5 * Ordering- or Referring-Only Providers Search on the Online Provider Lookup (OPL)

Providers can verify that an ordering- or referring-only provider is enrolled in Medicaid by using either the basic or advanced provider search function of the OPL.

1.1.4 Surety Bond Enrollment Requirement

All newly enrolling and re-enrolling durable medical equipment (DME) providers must, as a condition of enrollment and continued participation into Texas Medicaid, obtain a surety bond that complies with Title 1, Texas Administrative Code (TAC) §352.15.

Important: Surety bonds obtained for the purpose of accreditation in the Medicare program, which lists the Centers for Medicare & Medicaid Services (CMS) as obligee, do not fulfill the surety bond requirement for Texas Medicaid.
The surety bond submitted to Texas Medicaid must meet the following requirements:

- A bond in an amount of no less than $50,000 must be provided for each enrolled location.

  **Note:** Only one surety bond is required if the provider has multiple Medicaid DME provider numbers related to the same location. For example, if the provider has a TPI with a suffix for home health, a second suffix for Comprehensive Care Program (CCP), and a third suffix for Specialized Custom Wheeled Mobility all for the same practice location, only one surety bond is required.

- The bond must be submitted on the State of Texas Medicaid Provider Surety Bond Form. No other form will be accepted. The use of this form designates HHSC as the sole obligee of the bond. Instructions are included with the form.

- The bond must be issued for a term of 12 months. Bonds for longer or shorter terms are not acceptable.

- The bond must be in effect on the date that the provider enrollment application is submitted to TMHP for consideration. The effective date stated on the bond must be:
  - No later than the date that the provider enrollment application is submitted.
  - No earlier than 12 months before the date that the provider enrollment application is submitted.

- The bond must be a continuous bond. A continuous bond remains in full force and effect from term to term unless the bond is canceled.

**Important:** An annual bond that specifies effective and expiration dates for the bond, is not acceptable.

At the time of enrollment or re-enrollment, providers must submit the surety bond form with original signatures and a copy of the Power of Attorney document from the surety company that issued the bond.

**Note:** Surety companies may refer to Texas Department of Insurance (TDI) file #9212547536 or TDI link #124506 when filing the bond.

DME providers must maintain a current surety bond to continue participation in Texas Medicaid. To avoid losing Medicaid enrollment status, providers must submit proof of continuation to TMHP Provider Enrollment before the expiration date of the bond currently on file. The completed proof of continuation document must include the original signatures of the authorized corporate representative of the DME provider (principal), and the attorney-in-fact of the surety company. Providers may submit a copy of the proof of continuation (scan, fax, photocopy) pending the submission of the original document.

**Refer to:** State of Texas Medicaid Provider Surety Bond Form

### 1.1.5 Provider Enrollment Application Determinations

An application for provider enrollment may be approved for a 3- to 5-year enrollment depending on provider type, approved with conditions, or denied. The provider applicant is issued a notice of the enrollment determination.

**Refer to:** Subsection 1.1.3, “Affordable Care Act of 2010 (ACA) Enrollment Requirements” in this handbook for additional information about the ACA 3- to 5-year re-enrollment requirement.

When an application for enrollment is approved with conditions, the applicant has no right of appeal or administrative review of the enrollment determination. The types of conditional enrollment include, among other things:

- An application may be approved for time-limited enrollment, meaning the provider is granted a contract to participate in Medicaid for a specific period of time. In this case, the provider is sent a notice that includes the deactivation date of the contract. It is the provider’s responsibility, if the
provider chooses to seek continued Medicaid participation, to file a complete and correct reenrollment application before the deactivation date of the provider’s current contract. It is recommended that the provider submit a reenrollment application at least 60 days before the current contract deactivation date, to ensure that the reenrollment application is complete and correct before the deactivation date. This may avoid a lapse between the provider’s current contract and the new contract, if a new contract is granted.

- An application may be approved subject to restricted reimbursement, meaning the provider is eligible to have only certain types of claims paid. This includes, among other things, reimbursement of only Medicare crossover claims (i.e., claims with respect to “dual eligible” recipients who are covered by both Medicare and Medicaid).

An application may be denied, in which case a denial notice that explains the basis for denial is sent. The notice also explains the right to make a written request for an administrative review of the denial decision, and the procedures for filing such a request. Any administrative review request must be received within 20 days of the date on the letter and filed in accordance with the instructions provided in the denial notice. HHSC will conduct the administrative review and render a final enrollment determination. The HHSC determination following administrative review is not subject to further appeal or reconsideration.

1.1.6 Enrollment in Medicaid Managed Care Programs
To be reimbursed for services rendered to Medicaid Managed Care clients, providers must be enrolled in Texas Medicaid and then must enroll with the client’s health plan to be eligible for reimbursement for services rendered.

Refer to: Subsection 2.2, “Provider Enrollment and Responsibilities” in Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks).

1.1.7 Required Enrollment Forms
To enroll in Texas Medicaid, providers must complete and submit the appropriate Texas Medicaid enrollment application including all required forms as indicated in the application.

Note: All paper documents must be signed by the person who is applying for enrollment. If the applicant is an entity, a principal of the entity must sign the application.

Whether they are completing the online application or a paper application, providers can refer to the checklist in the Texas Medicaid Provider Enrollment Application for information about required forms and other documentation. This checklist explains, by provider type, the documents and information that must be provided with the application. Applications must be complete in order to process and issue a provider identifier. Each application/applicant is considered separate and should not be combined.

Note: If enrolled in Medicare, the provider must submit a copy of the Medicare enrollment letter to enroll in Texas Medicaid. Otherwise the enrollment application will be considered incomplete.

When prompted to enter a tax identification number (tax ID) on either a paper or electronic copy of an enrollment application, the applicant should list the provider or entity’s nine digit federal tax identification number.

Providers can call the TMHP Contact Center at 1-800-925-9126, Option 2, for help with completing the application. Providers should retain a copy of the original application for future reference.

All pages of the application must be present even if the forms are left blank because they are not pertinent to the provider’s situation. Providers will be notified of incomplete applications and will have 30 business days to provide the requested missing information. If the information is not provided within 30 business days, TMHP will terminate the enrollment process. If the provider wants to enroll at a later
date, the provider should contact TMHP to determine if a new enrollment application must be submitted. Providers are required to review their enrollment application for correctness and completeness before submitting it to TMHP.

By signing the Medicaid enrollment agreement, a provider is certifying that all information submitted in connection with the application for enrollment is complete and correct. Any false, misleading, or incomplete information submitted in connection with an enrollment application constitutes a Medicaid program violation, and may result in administrative, civil, or criminal liability.

Refer to: Subsection 1.9, “Medicaid Waste, Abuse, and Fraud Policy” in this section.

1.1.7.1 HHSC Medicaid Provider Agreement
The HHSC Medicaid Provider Agreement must be submitted by all providers who enroll in Texas Medicaid and must be signed by the provider who is applying for enrollment. If the applicant is an entity, a principal of the entity who has the authority to bind the entity to the requirements of the HHSC Provider Agreement must sign the agreement. “Principal” is defined in the following section.

Refer to: Subsection 1.1.7.7, “Corporate Board of Directors Resolution” in this section for information about corporations.

If the provider is city or government owned, the agreement must be signed by a person who is authorized under the city or government charter. This form is an agreement between HHSC and the provider performing services under the State Plan wherein the provider agrees to certain provisions as a condition of participation.

Note: The person who signs the HHSC Medicaid Provider Agreement is certifying that all of the information in the application packet, including every completed Provider Information Form (PIF-1) and Principal Information Form (PIF-2), is complete and correct. This includes a certification that every person who is required to complete a PIF-2 has done so, and all required PIF-2s are included with the application.

1.1.7.2 Provider Information Form (PIF-1)
The PIF-1 must be completed by, or on behalf of, the provider that is applying for enrollment. If the provider is an entity, the PIF-1 must be completed on behalf of the entity.

1.1.7.3 Principal Information Form (PIF-2)
A PIF-2 must be completed by each principal, subcontractor, and creditor of the provider that is applying for enrollment. Principals of the provider include all of the following:

- An owner with a direct or indirect ownership or control interest of 5 percent or more
- Corporate officers and directors
- Limited or nonlimited partners
- Shareholders of a professional corporation, professional association, limited liability company, or other legally designated entity
- Any employee of the provider who exercises operational or managerial control over the entity, or who directly or indirectly conducts the day-to-day operations of the entity

Note: This includes the on-site manager for each physical location of the provider in Texas.

1.1.7.4 Disclosure of Ownership and Control Interest Statement
The Disclosure of Ownership and Control Interest Statement must be submitted as part of the enrollment application for all types of enrollment, except in the case of a performing provider who is applying to join an already enrolled group. This form provides TMHP Provider Enrollment with the appropriate information to enroll the provider as a sole proprietor, corporation, partnership, or nonprofit organization. This information determines if other enrollment forms are required.
This form also contains questions that must be answered under federal law. Failure to provide complete and accurate information as instructed on this form will constitute an incomplete application, which may result in denial of enrollment. Incomplete or inaccurate information on this form constitutes a violation of the rules of Medicaid and may also result in administrative, civil, or criminal liability.

Refer to: Subsection 1.9, “Medicaid Waste, Abuse, and Fraud Policy” in this section.

Note: Providers are required to submit any change in ownership, corporate officers, or directors to TMHP Provider Enrollment within 10 calendar days of the change.

Refer to: Subsection 1.6.2, “Maintenance of Provider Information” in this section.

1.1.7.5 Internal Revenue Service (IRS) W-9 Form
The IRS W-9 Form must be completed and submitted for all types of enrollment, except in the case of performing providers seeking to join an already enrolled group.

1.1.7.6 Medicaid Audit Information Form
The Medicaid Audit Information Form is required by facilities such as hospitals, home health agencies, FQHCs, RHCs, and dialysis facilities.

1.1.7.7 Corporate Board of Directors Resolution
All providers who indicate that they are a corporation on the Disclosure of Ownership and Control Interest Statement are required to submit the Corporate Board of Directors Resolution. This form indicates the individual (by name) who is authorized by the corporation to sign the agreement forms. The secretary of the corporation must sign the Corporate Board of Directors Resolution and have it notarized. If a business is city or government-owned, this form is not required.

1.1.7.8 Certificate of Account Status (Board Corporation Act, Article 2.45)
The Certificate of Account Status (i.e., Letter of Good Standing) must be submitted by all for-profit corporations. A for-profit corporation that is delinquent in Franchise Tax cannot be awarded a contract or granted a license or permit by the state or agency of the state. Providers must obtain the Certificate of Account Status from the Comptroller’s Office, which verifies that the corporation is not delinquent in Franchise Tax. Only an original or photocopy of a Certificate of Account Status will be accepted (i.e., a printout from the Comptroller website will not be accepted). Corporations that are nonprofit with a “501(C)(3)” IRS exemption are not required to submit this form. These corporations must indicate this exemption by signing the appropriate line on the Disclosure of Ownership & Control Interest Statement and marking exempt on the W-9 form. Out-of-state providers who do not conduct business in Texas are also exempt from submitting this form.

1.1.7.9 Certificate of Formation or Certificate of Filing/Certificate of Incorporation
All providers that are legal entities must submit the Certificate of Formation or Certificate of Filing form. Obtain the form from the Office of the Secretary of State. The name on this form must exactly match the legal name shown on the W-9 form. Out-of-state providers are exempt from submitting this form.

1.1.7.10 Certificate of Filing
The Certificate of Filing and any required certifications to provide certain services in Texas must be submitted when a corporation is registered in a state other than Texas. Obtain this form from the Office of the Secretary of State of Texas. It takes the place of the Certificate of Incorporation. The form identifies the legal name of the corporation and is proof that the corporation is registered to do business in Texas.
1.1.7.11 Copy of License, Temporary License, or Certification

Providers cannot enroll in Texas Medicaid if their license is due to expire within 30 days. During the enrollment process, TMHP verifies licensure using available resources. If TMHP cannot verify a license at the time of enrollment, it is the providers’ responsibility to provide a copy of the active license to TMHP. Psychologists and facilities must submit a copy of their license since these licenses cannot be verified online.

TMHP will notify the provider by letter if a copy has not been submitted and the license cannot be verified.

Once a provider is enrolled in Texas Medicaid the license or certification must be kept current. A reminder letter for renewal will be sent to the provider 60 days before the provider’s license expires.

TMHP directly obtains licensure information from the following licensing boards:

- Texas Medical Board (TMB) (for physicians only)
- Texas Board of Nursing (BON)
- Texas State Board of Dental Examiners (TSBDE)

If a license cannot be verified due to a delay in obtaining the board licensing information, providers must request a letter from the licensing board for their individual provider information and submit it to TMHP by the deadline indicated in the reminder letter. The letter must contain the provider’s specific identification information, license number, and licensure period.

All other licenses and certifications that are not issued by TMB, BON, or TSBDE must be submitted to TMHP upon renewal.

Important: Providers are also required to submit to TMHP, within 10 days of occurrence, notice that the provider’s license or certification has been partially or completely suspended, revoked, or retired. Not abiding by this license and certification update requirement may impact a provider’s qualification to continued participation in Texas Medicaid.

1.1.7.12 Licensure Renewal

Not abiding by the license and certification update requirement may impact a provider’s qualification for continued participation in Texas Medicaid. If a provider’s license has expired, a deactivation letter will be sent to the provider, and all claims filed on and after the expiration date will be denied.

To have claims payments resumed, updated information must be sent to the applicable licensing board to renew the license. Payment will be considered for dates of service on or after the date of license renewal. Claims denied due to an inactive license may be appealed, and payment will be considered for dates of service on or after the date of return to active license status. Payment deadline rules for the fiscal agent arrangement must be met.

1.1.7.13 Medicare Participation

Under federal law, Medicaid is the payor of last resort, so Medicare-covered services must first be billed to and paid by Medicare. Therefore, in order to be eligible to enroll in Texas Medicaid, a provider must be a Medicare participating provider. Certain types of providers, however, are not required to meet the Medicare participation requirement, including:

- Pediatric providers
- Family planning providers
- Case Management for Children and Pregnant Women program providers
• CCP providers
• Early Childhood Intervention (ECI) providers
• Licensed professional counselors (LPCs)
• Licensed marriage and family therapists (LMFTs)
• Obstetric and gynecology (OB/GYN) providers
• THSteps medical and dental services providers

Some provider types may apply for a waiver of the Medicare certification requirement of the application process if they do not serve Medicare-eligible individuals. The following provider types are eligible to apply for this waiver:

• Audiologist
• Dentist (D.D.S. or D.M.D.)
• Nurse practitioner/clinical nurse specialist (NP/CNS)
• Optometrist (OD)
• Orthotists
• Physician (DO)
• Physician (MD)
• Physician assistant (PA)
• Prosthetist

Each provider seeking enrollment must include a valid and current Medicare number in the Texas Medicaid Provider Enrollment Application, and must include with the application a copy of the provider’s notice of Medicare participation.

Each group and each performing provider of a Medicare group must have a current Medicare number. The group enrollment application must include the current and valid Medicare number for the group and for each performing provider in the group, as well as a copy of the notice of Medicare enrollment for the group and for each performing provider in the group.

Each group enrolling as a Medicaid-only does not need to submit a current Medicare number for the group. Performing providers added to this Medicaid-only group also do not require a current Medicare number.

1.1.7.14 Group Information Changes

If additions or changes occur in a group’s enrollment information (for example, a performing provider leaves or enters the group, changes an address, or a provider is no longer licensed) after the enrollment process is completed, the provider group must notify Texas Medicaid in writing within 10 calendar days of occurrence of the changes. Failure to provide this information may lead to administrative action by HHSC. Filing claims and receiving payment without having followed this requirement constitutes a program violation and may also result in administrative, civil, or criminal liability.

Refer to: Subsection 1.9, “Medicaid Waste, Abuse, and Fraud Policy” in this section for additional information.

1.2 Payment Information

Texas Medicaid reimbursements are available to all enrolled providers by check or electronic funds transfer (EFT). Providers are strongly encouraged to utilize EFT, which allows for more rapid reimbursement.
1.2.1 Using EFT
As a result of the 76th legislature, House Bill (H.B.) 2085 recommends that all Texas Medicaid providers receive payment by EFT. EFT is a method for directly depositing funds into a designated bank account. EFT does not require special software, and providers can enroll immediately.

1.2.2 Advantages of EFT
Advantages of EFT include:

- Electronically-deposited funds are available more quickly than with paper checks.
- Providers do not have to worry about lost or stolen checks.
- TMHP includes provider and Remittance and Status (R&S) Report numbers with each transaction submitted. If the bank’s processing software captures and displays the information, both numbers would appear on the banking statement.

1.2.3 EFT Enrollment Procedures
The Electronic Funds Transfer (EFT) Authorization Agreement can be found as Form 1.5 in this section and on the TMHP website at www.tmhp.com. Completed EFT forms can be faxed to 1-512-514-4214, or mailed to:

Texas Medicaid & Healthcare Partnership
Attn: Provider Enrollment
PO Box 200795
Austin, TX 78720-0795

To enroll for EFT, providers must submit a completed Electronic Funds Transfer (EFT) Authorization Agreement to TMHP. A voided check or letter on bank letterhead, containing the bank routing and account information, must be attached to the enrollment form. One completed form must be filled out for each billing provider identifier, including an original signature of the provider.

After the Electronic Funds Transfer (EFT) Authorization Agreement has been processed, TMHP issues a prenotification transaction during the next cycle directly to the provider’s bank account. This transaction serves as a checkpoint to verify EFT is working correctly.

If the bank returns the prenotification without errors, the provider will begin receiving EFT transactions with the third cycle following the enrollment form processing. Providers will continue to receive paper checks until they begin to receive EFT transactions.

If the provider changes bank accounts, the provider must submit a new Electronic Funds Transfer (EFT) Authorization Agreement to TMHP Provider Enrollment. The prenotification process is repeated and, once completed, the EFT transaction is deposited to the new bank account.

Refer to: Form 1.5, “Electronic Funds Transfer (EFT) Authorization (2 Pages)” in this section.

1.2.4 Stale-Dated Checks
Stale-dated checks (i.e., checks that are older than 180 days) that have not been cashed are voided and/or applied to any outstanding accounts receivable. If the balance on a stale-dated check after it has been applied to accounts receivable is over $5,000, written notification is sent to the provider 30 days before the void occurs.

1.3 Provider Deactivation/Disenrollment
Payment denial codes are applied to a TPI that has had no claim activity for a period of 24 months or more. The TPI will be considered inactive and will not be able to be used to submit claims.
A courtesy letter will be sent to all providers whose TPIs have been identified as not having any claims activity over the previous 18 months. Providers will have six months to submit claims and prevent the TPI from being deactivated. If the provider is enrolled in both Medicaid and the CSHCN Services Program, the provider identifiers for both programs will be examined to determine whether claims activity has occurred.

After 24 months without claim activity, providers will be sent a deactivation letter, and a payment denial code will be applied to their provider identifier. If a provider’s Medicaid TPI is deactivated, any enrollments associated with the inactive TPI with the CSHCN Services Program will also be deactivated. Claims that are submitted for a deactivated TPI after the payment denial code has been applied will be denied.

To have the payment denial code removed from a provider identifier, providers must submit a completed application for the state health-care program in which they wish to enroll, and the application must be approved. The information on this application must match exactly the information currently on the provider’s file for the payment denial code to be removed.

1.3.1 Excluded Entities and Providers

The United States Health and Human Services Office of Inspector General (HHS-OIG) and the HHSC Office of Inspector General (HHSC-OIG) exclude certain individuals and entities from participation in all federal or state health-care programs. The exclusions restrict individuals from receiving any reimbursement for items or services furnished, ordered, or prescribed.

All current providers and providers who are applying to participate in state health-care programs must screen their employees and contractors every month to determine whether they are excluded individuals or entities. These screenings are a condition of the provider’s enrollment or re-enrollment into state health-care programs.

Providers can determine whether an individual or entity is excluded by searching the List of Excluded Individuals/Entities (LEIE) website at www.oig.hhs.gov/fraud/exclusions.asp. A downloadable version of the database is available but it does not include Social Security Numbers (SSNs) or Employer Identification numbers (EINs). The Texas HHSC-OIG website is found at https://oig.hhsc.state.tx.us/Exclusions/Search.aspx. If a name matches a name on the exclusion list, it can be verified online with a Social Security Number (SSN) or Employer Identification number (EIN).

Providers must search the LEIE website monthly to capture any exclusions or reinstatements that have occurred since the last search. Providers must immediately report to HHS-OIG any exclusion information they discover when searching the LEIE database.

CFR section 1003.102(a)(2), states that civil monetary penalties may be imposed against Medicaid providers and managed care entities (MCEs) that employ or enter into contracts with excluded individuals or entities to provide items or services to Medicaid clients. In addition, no Medicaid payments can be made for any items or services directed or prescribed by an excluded physician or other authorized person when the individual or entity furnishing the services either knew or should have known of the exclusion. This prohibition applies even when the Medicaid payment itself is made to another provider, practitioner, or supplier that is not excluded.

1.4 Provider Reenrollment

Providers must submit a new application and a new provider identifier must be issued when there are changes in the Medicare number, ownership, status, or principal information.

Refer to: Subsection 1.4.3, “Physical Address” in this section for information about handling address changes.
The new application may be submitted electronically using PEP or by submitting a completed paper Texas Medicaid Provider Enrollment Application. A new application is required when one of the following changes:

1.4.1 Medicare Number
If Medicare has issued a new Medicare number, the provider must complete and submit a Texas Medicaid Provider Enrollment Application in order to enroll the new location or with a new group.

1.4.2 Provider Status (Individual, Group, Performing Provider, or Facility)
Providers leaving group practices must send a signed letter or a Provider Information Change Form to TMHP that states the date of deactivation. The letter should include the provider identifier, effective date of deactivation, and the group’s provider identifier. The letter should be signed by an authorized representative of the group or the individual provider leaving the group. If the provider is joining a new group practice or enrolling as an individual, the provider must complete and submit a new Texas Medicaid Provider Enrollment Application to request enrollment in the new group or as an individual provider.

1.4.3 Physical Address
If a provider has changed an address and the address is within the same Medicare locality, the provider must update the address information within 10 days. Updates may be made using the online provider lookup update screen located in the administrator section of TMHP’s website at www.tmhp.com. Alternatively, the provider may update the address information by completing and submitting a Provider Information Change Form. A W9 is required if the provider is changing the mailing address using a PIC form. If the address is not within the Medicare locality and Medicare has issued a new Medicare number, the provider must complete and submit a Texas Medicaid Provider Enrollment Application in order to enroll the new location. Dental providers must complete a TMHP Dental Provider Enrollment Application for each practice location.

1.4.4 Change in Principal Information
As defined in subsection 1.1.7.3, “Principal Information Form (PIF-2)” in this section, change in principal information includes a change in corporate officers or directors, professional association membership, and managing employees. The change must be reported to TMHP within 10 calendar days of when it occurs.

Refer to: Subsection 1.6.2.2, “Online Provider Lookup (OPL)” in this section.

Providers must contact the Electronic Data Interchange (EDI) help desk directly and request an Electronic Remittance & Status (ER&S) Report each time a new provider identifier is issued to the provider. This form must be completed and returned to EDI with unique identifying information related to the new provider identifier to ensure there is no suspension in the provider’s ability to access their ER&S statement on the secure provider portal through www.tmhp.com.

Providers must also contact any third party EDI vendors with whom they are contracted to add any new provider identifiers to their ER&S Report. To obtain a portable data file (.pdf) copy of the ER&S Report on the TMHP Home Page, the provider must create an administrator account for each provider identifier belonging to them.

Providers that have been issued a new provider identifier through the TMHP enrollment or re-enrollment process must ensure that any prior authorizations affected have been updated to reflect the new provider identifier.

1.5 Change of Ownership Requirements
The new owner must do the following:

• Obtain recertification as a Title XVIII (Medicare) facility under the new ownership
• Provide TMHP with a copy of the Contract of Sale (specifically, a signed agreement that includes
the identification of previous and current owners in language that specifies who is liable for
overpayments that were identified subsequent to the change of ownership, that includes dates of
service before the change of ownership)

• Provide a separate change of ownership and Texas Medicaid provider enrollment application for all
of the provider identifiers affected by the change of ownership

• Submit any new enrollment application relating to a change in ownership to TMHP Provider
Enrollment within 10 calendar days of the change

When the change of ownership has been processed, the original TPI used by the provider to bill claims
will be deactivated, and the provider will lose the ability to download R&S Reports from the TMHP
portal as well as the ability to verify client eligibility online. Claims status inquiries through the TMHP
portal will also be unavailable. After a TPI has been deactivated, the provider can call the contact center
to check on client eligibility and the status of claims. Paper R&S Reports can be printed by the TMHP
Contact Center, and delivered to providers, up to 30 days from the date the TPI is deactivated.

Important: Providers must adhere to claim filing deadlines throughout the enrollment process. Claims
should be submitted without a provider identifier until notified by TMHP of final enrollment
determination. Note that claims for services that are rendered to Texas Medicaid clients are
subject to a filing deadline from the date of service of 95 days for in-state providers and 365 days
for out-of-state providers. For clients with retroactive eligibility, the 95-day deadline is based on
the date of service or the date the client eligibility information is added to the TMHP eligibility file,
whichever is later. For clients with dual Medicare and Medicaid eligibility, when a service is a
benefit of both Medicare and Medicaid, the claim must be filed with Medicare first. In this
case the 95-day deadline is based on the date of Medicare disposition.

Refer to: Subsection 6.1.4, “Claims Filing Deadlines” in Section 6, “Claims Filing” (Vol. 1, General
Information).

1.6 Provider Responsibilities

1.6.1 Compliance with Texas Family Code

1.6.1.1 Child Support

The Texas Family Code 231.006 places certain restrictions on child support obligors. Texas Family Code
231.006(d) requires a person who applies for, bids on, or contracts for state funds to submit a statement
that the person is not delinquent in paying child support. This law applies to an individual whose
business is a sole proprietorship, partnership, or corporation in which the individual has an ownership
interest of at least 25 percent of the business entity. This law does not apply to contracts/agreements with
governmental entities or nonprofit corporations.

The required statement has been incorporated into the Texas Medicaid Provider Agreement.

The law also requires that payments be stopped when notified that the contractor/provider is more than
30 days delinquent in paying child support. Medicaid payments are placed on hold when it is discovered
that a currently enrolled provider is delinquent in paying child support. A provider application may be
denied or terminated if the provider is delinquent in paying child support.

1.6.1.2 Reporting Child Abuse or Neglect

The Texas Family Code Sec. 261.101 states: (a) A person having cause to believe that a child’s physical
or mental health or welfare has been adversely affected by abuse or neglect by any person shall immedi-
ately make a report as provided by this subchapter; (b) If a professional has cause to believe that a child
has been abused or neglected, or may be abused or neglected, or that a child is a victim of an offense
under section 21.11, Penal Code, and the professional has cause to believe that the child has been abused
as defined by section 261.001 or 261.401, the professional shall make a report no later than the 48th hour after the hour the professional first suspects that the child has been, or may be abused or neglected, or is a victim of an offense under section 21.11, Penal Code. A professional may not delegate to or rely on another person to make the report. In this subsection, *professional* means an individual who is licensed or certified by the state or who is an employee of a facility licensed, certified, or operated by the state and who, in the normal course of official duties or duties for which a license or certification is required, has direct contact with children. The term includes teachers, nurses, doctors, day-care employees, employees of a clinic or health-care facility that provides reproductive services, juvenile probation officers, and juvenile detention or correctional officers.

According to Rider 19 of the General Appropriations Act, 78th Legislative Regular Session, 1999, House Bill (H.B.) 1, all Medicaid providers shall comply with the provisions of state law as set forth in Chapter 261 of the Texas Family Code relating to investigations of reports of child abuse and neglect and the provisions of HHSC policy. Reimbursement shall only be made to providers who have demonstrated a good faith effort to comply with child abuse reporting guidelines and requirements in Chapter 261 and HHSC policy. Provider staff shall respond to disclosures or suspicions of abuse or neglect of minors, by reporting to the appropriate agencies as required by law.

All providers shall adopt this policy as their own, report suspected sexual abuse of a child as described in this policy and as required by law, and develop internal policies and procedures that describe how to determine, document, and report instances of sexual or nonsexual abuse.

This information is also available on the HHSC and TMHP websites at www.hhsc.state.tx.us and www.tmhp.com.

### 1.6.1.3 Procedures for Reporting Abuse or Neglect

Professionals as defined in the law are required to report no later than the 48th hour after the hour the professional first has cause to believe the child has been or may be abused or is the victim of the offense of indecency with a child.

Nonprofessionals shall immediately make a report after the nonprofessional has cause to believe that the child’s physical or mental health or welfare has been adversely affected by abuse.

A report shall be made regardless of whether the provider staff suspect that a report may have previously been made.

Reports of abuse or indecency with a child must be made to one of the following:

- Department of Family and Protective Services (DFPS) if the alleged or suspected abuse involves a person responsible for the care, custody, or welfare of the child (the DFPS Texas Abuse/Neglect Hotline, at 1-800-252-5400, operated 24 hours a day, 7 days a week)
- Any local or state law enforcement agency
- The state agency that operates, licenses, certifies, or registers the facility in which the alleged abuse or neglect occurred
- The agency designated by the court to be responsible for the protection of children

The law requires the report to include the following information if known:

- The name and address of the minor
- The name and address of the minor’s parent or the person responsible for the care, custody, or welfare of the child if not the parent
- Any other pertinent information concerning the alleged or suspected abuse

Reports can be made anonymously.
A provider may not reveal whether the child has been tested or diagnosed with human immunodeficiency virus (HIV) or acquired immunodeficiency syndrome (AIDS).

If the minor’s identity is unknown (e.g., the minor is at the provider’s office anonymously to receive testing for HIV or a sexually transmitted disease [STD]), no report is required.

**1.6.1.4 Procedures for Reporting Suspected Sexual Abuse**

All providers shall ensure that their employees, volunteers, or other staff report a victim of abuse who is a minor 14 years of age or younger who has engaged in sexual activity with any individual to whom the minor is not married. Sexual activity would be indicated if the minor is pregnant or has a confirmed STD acquired in a manner other than through perinatal transmission.

Sexual activity may include, but is not limited to, the actions described in Penal Code §21.11(a) relating to indecency with a child; §21.01(2) defining sexual contact; §43.01(1) or (3)-(5) defining various sexual activities; §22.011(a)(2) relating to sexual assault of a child; or §22.021(a)(2) relating to aggravated sexual assault of a child.

Providers may voluntarily use the HHSC checklist for monitoring all clients younger than 14 who are unmarried and sexually active. The checklist, if used, as well as any report of child abuse, shall be retained as part of the client’s record by each provider and made available during any monitoring conducted by HHSC.

*Refer to:* Form 1.3, “Child Abuse Reporting Guidelines (2 Pages)” in this section.

**1.6.1.5 Training**

All providers must develop training for all staff on the policies and procedures in regard to reporting child abuse. New staff must receive this training as part of their initial training/orientation. Training must be documented. As part of the training, staff must be informed that the staff person who conducts the screening and has cause to suspect abuse has occurred is legally responsible for reporting. A joint report may be made with the supervisor.

**1.6.2 Maintenance of Provider Information**

Within 10 calendar days of occurrence, providers must report changes in address (physical location or accounting), telephone number, name, federal tax ID, and any other information that pertains to the structure of the provider’s organization (for example, performing providers). Changes in address, office telephone or fax number, and e-mail address should be updated online using the Online Provider Lookup (OPL) update page. Alternately, providers may update their address information using the Provider Information Change (PIC) Form referenced below on the TMHP website.

*Refer to:* Subsection 1.6.2.2, “Online Provider Lookup (OPL)” in this section.

Form 1.8, “Provider Information Change Form” in this section.

Providers are notified when they have an invalid address on file with TMHP. Account administrators who log onto their accounts through the TMHP website at www.tmhp.com are notified when they have an invalid address on file for any of the TPIs associated with their NPI.

The Check Status Amount Search screen on the provider’s secure homepage of the TMHP website will alert providers when payments are pending because of inaccurate or incomplete provider information. R&S Reports that are viewed on the TMHP website also notify the provider of pending payments.

Pending payments are released in the financial cycle of the following week after the address information has been updated. Payments that are pending for more than 180 days will be voided.

Other changes (in name, ownership status, federal tax ID, etc.) must be reported in writing to TMHP Provider Enrollment. Failure to notify TMHP of changes affects accurate processing and timely claims payment. In addition, failure to timely report such changes is a violation of the rules of Medicaid, and may result in administrative, civil, or criminal liability.
Refer to: Subsection 1.9, “Medicaid Waste, Abuse, and Fraud Policy” in this section.

Providers will be prompted to verify their address(es) and make necessary changes at least once a year.

After the PIC form has been completed, it can be faxed to 1-512-514-4214, Attn: Provider Enrollment, or mailed to the address below for processing.

Texas Medicaid & Healthcare Partnership
Provider Enrollment
PO Box 200795
Austin, TX 78720-0795

Providers should keep a copy of the completed form for their records.

1.6.2.1 NPI Verification

TMHP verifies NPIs with NPPES to ensure that the NPI is active. If the NPI is shown by NPPES to be inactive, TMHP will notify the provider by letter.

The provider will be allowed a 60-day grace period to contact NPPES and resolve their NPI status. If the inactive NPI has not been reinstated within the 60-day grace period, TMHP will disenroll all TPIs associated with the inactive NPI.

1.6.2.2 Online Provider Lookup (OPL)

The OPL is available on the public access portion of the TMHP website at www.tmhp.com. Provider information can be viewed by providers, clients, and anyone who accesses the TMHP website.

Providers with certain provider types must verify and update key demographic information every six months in the Provider Information Management System (PIMS) to ensure their information is correct in the OPL. Affected provider types include, but are not limited to, physicians, nurses, dentists, and durable medical equipment providers.

If more than six months have elapsed since the required demographic information in the OPL was verified, access to the secure provider portal is blocked until the verification takes place. Upon logging into their accounts, users with administrative rights see a list of NPIs that require verification and update. After addressing each NPI listed on the page, administrative providers are able to proceed to their accounts.

If access to the secure portal has been blocked because of needed verification, nonadministrative users are not able to perform work functions on NPIs listed on the Review Required page. Nonadministrative users are advised to notify users with administrative rights so that they can verify demographic information and remove the block.

The My Account page has a link to the Provider Demographic Update web page. Current information will be displayed with a button to allow editable fields to be changed. Demographic information may be updated only by authorized administrators. This authorization is controlled through the Permissions Management link, also located on the My Account page. Fields that can be updated online include the following:

- Primary physical address:
  - Street address lines 1 and 2
  - City, state, ZIP code
  - County
- Telephone numbers
- E-mail address
- Office hours
• Accepting new clients, current clients only, or not accepting new clients
• Additional sites where services are provided
• Languages spoken
• Additional services offered
• Medicaid waiver programs
• Client age or gender limitations
• Counties served

The following enhancements have also been made to the OPL to increase overall functionality:
• Clients are able to search for providers in up to 5 counties in a single search.
• Doing business as (DBA) names appear for providers or provider groups.
• The STAR Health program has been added as a searchable health plan.
• The default ZIP code radius for provider search has been increased to 10 miles from 5 miles.
• Providers who make address updates may receive a confirmation e-mail from TMHP after the
  address has been verified and if their e-mail address has been provided.
• Users will be able to search for providers within a ZIP code that crosses multiple counties.

Each provider specialty and subspecialty listed in the OPL now has a corresponding definition. Users can view the definitions by clicking “more information” on either the basic or advanced search page or by hovering over the specialty on the results page. The definitions have been added to help clients locate the correct type of provider.

Providers are able to self-declare as many as three subspecialties to identify the services they offer. Providers may declare only subspecialties that are within the scope of their practice. Users are able to search for a provider on the OPL using these subspecialties.

Clients using the OPL will use drop-down boxes to select search criteria. An initial list will display all providers that meet the specified search criteria. Clicking on any name in that list will display the provider’s specific information, including a map of the office location.

Links to health maintenance organization (HMO) websites are also provided, enabling clients to search each HMO’s network of participating providers. The OPL supports both English and Spanish language users, and search results can be printed.

1.6.2.3 Updating NPI and Taxonomy Codes

Providers are required to provide their NPI in the enrollment application. During the enrollment process, providers must also select a primary and, if applicable, secondary taxonomy codes associated with their provider type. Due to copyright restrictions, TMHP is unable to publish the taxonomy descriptions. Providers must verify the taxonomy codes associated with their provider type and specialty before beginning the enrollment process.

Refer to: Subsection 1.1.1, “National Provider Identifier (NPI) and Taxonomy Codes” in this section.

Providers must maintain and update their NPI and/or taxonomy code information with Texas Medicaid. Provider attestation can be completed under the “I would like to...” web page, which is accessed from most provider web pages on the TMHP website at www.tmhp.com. The available taxonomy code selections are auto populated according to the provider type and specialty associated with the TPI entered. The taxonomy code options may not match the taxonomy code listed in the confirmation letter received from NPPES. Providers must contact the TMHP Contact Center at 1-800-925-9126, Option 2, to validate their provider type and specialty associated with their TPIs.
Refer to: Subsection 1.6.2.4, “Updating Provider Specialty” in this section if a taxonomy code that you want to use is not available for the enrolled provider type or specialty.

Important: The taxonomy code that is included in electronic transactions must match a taxonomy code that is included in the attestation record. Secondary taxonomy codes included during the attestation process are used as additional matching criteria for claims and authorization processing.

1.6.2.4 Updating Provider Specialty
Providers that have made a change in their specialty must submit their updated specialty information to Texas Medicaid. The forms that must be submitted to Texas Medicaid depend on the provider’s enrollment, as follows:

- Medicare-enrolled providers whose Medicare number has not changed must submit a copy of the Medicare letter listing the updated specialty along with a Provider Information Change (PIC) Form to Texas Medicaid. Providers may submit the form by fax to TMHP (Attention Provider Enrollment) at (512) 514-4214 or by mail to:

  Texas Medicaid & Healthcare Partnership
  Provider Enrollment
  PO Box 200795
  Austin, TX 78720-0795

- Providers that are not enrolled in Medicare or whose Medicare number has changed must submit a new application

Refer to: Form 1.8, “Provider Information Change Form” in this section.

Subsection 1.4, “Provider Reenrollment” in this section for more information about provider reenrollment in Texas Medicaid.

1.6.3 Retention of Records and Access to Records and Premises
The provider must maintain and retain all necessary documentation, records, R&S Reports, and claims to fully document the services and supplies provided and delivered to a client with Texas Medicaid coverage, the medical necessity of those services and supplies, costs included in cost reports or other documents used to determine a payment rate or fee, and records or documents necessary to determine whether payment for those items or services was due and was properly made for full disclosure to HHSC and its designee. A copy of the claim or R&S Reports without additional documentation will not meet this requirement.

The documentation includes the following, without limitation:

- Clinical medical patient records
- Other records pertaining to the patient
- Any other records of services, items, equipment, or supplies provided to the patient and payments made for those services
- Diagnostic tests
- Documents related to diagnosis
- Charting
- Billing records
- Invoices
- Treatments
- Services
• Laboratory results
• X-rays
• Documentation of delivery of items, equipment, and supplies

Accessible information must include information that is necessary for the agencies specified in this section to perform statutory functions.

The required information may also include, without limitation, business and accounting records with backup support documentation, statistical documentation, computer records and data, and patient sign-in sheets and schedules. Additionally, it includes all requirements and elements described in 1 TAC §§371.1643(f), 371.1617(a)(2), and 371.1601 (definition of “failure to grant immediate access”).

The provider is required to submit original documents, records, and accompanying business records affidavits to representatives of the organizations listed in this section. These records should also be provided to any agents and contractors related to the organizations. At the discretion of the requestor, the provider may be permitted to instead provide copies notarized with the required business records affidavit. Requested records must be provided promptly and at no cost to the state or federal agency. If the provider was originally requested to provide original documents and subsequent requests for copies of these records are made by the provider, any and all costs associated with copying or reproducing any portion of the original records will be at the expense of the provider. This applies to any request for copies made by the provider at any point in the investigative process until such time as the agency deems the investigation to be finalized. A method of payment for the copying charge, approved by the agency, would be used to pay for the copying of the records. If copies of records are requested from the provider initially, the provider must submit copies of such records at no cost to the requestor’s organization.

The provider must provide immediate access to the provider’s premises and records for purposes of reviewing, examining, and securing custody of records, documents, electronic data, equipment, or other requested items, as determined necessary by the requestor to perform statutory functions. Nothing in this section will in any way limit access otherwise authorized under state or federal law. If, in the opinion of the Inspector General or other requestor, the documents may be provided at the time of the request or in less than 24 hours or the Inspector General or other requestor suspects the requested documents or other requested items may be altered or destroyed, the response to the request must be completed by the provider at the time of the request or in less than 24 hours as allowed by the requestor. If, in the opinion of the Inspector General or other requestor, the requested documents and other items requested cannot be completely provided on the day of the request, the Inspector General or requestor may set the deadline for production at 24 hours from the time of the original request.

Failure to supply the requested documents and other items, within the time frame specified, may result in payment hold to the provider’s Medicaid payments, recoupment of payments for all claims related to the missing records, contract cancellation, and/or exclusion from Texas Medicaid.

As directed by the requestor, the provider or person will relinquish custody of the requested documents and other items and the requestor will take custody of the records, removing them from the premises. If the requestor should allow longer than “at the time of the request” to produce the records, the provider will be required to produce all records completed, at the time of the completion or at the end of each day of production, as directed by the requestor who will take custody of the requested items.

If the provider places the required information in another legal entity’s records, such as a hospital, the provider is responsible for obtaining a copy of these requested records for use by the requesting state and federal agencies.

These documents and claims must be retained for a minimum period of five years from the date of service or until all audit questions, appeal hearings, investigations, or court cases are resolved. Freestanding RHCs must retain their records for a minimum of six years, and hospital-based RHCs must retain their records for a minimum of ten years. These records must be made available immediately at the time of the request to employees, agents, or contractors of HHSC Office of Inspector General (OIG),
the Texas Attorney General’s Medicaid Fraud Control Unit (MFCU) or Antitrust and Civil Medicaid Fraud Section, TMHP, DFPS, the Department of Aging and Disability Services (DADS), Department of State Health Services (DSHS), Department of Assistive and Rehabilitative Services (DARS), U.S. Department of Health and Human Services (HHS) representative, any state or federal agency authorized to conduct compliance, regulatory, or program integrity functions on the provider, person, or the services rendered by the provider or person, or any agent, contractor, or consultant of any agency or division delineated above. In addition, the provider must meet all requirements of 1 TAC, Part 15, §371.1643(f).

The records must be available as requested by each of these entities, during any investigation or study of the appropriateness of the Medicaid claims submitted by the provider.

1.6.3.1 Payment Error Rate Measurement (PERM) Process

CMS assesses Texas Medicaid using the PERM process to measure improper payments in Texas Medicaid. Providers will be required to provide medical record documentation to support the medical reviews that the federal review contractor will conduct for Texas Medicaid fee-for-service and Primary Care Case Management Medicaid and State Children’s Health Insurance Program (SCHIP) claims.

Under the PERM process, if a claim is selected in a sample for a service that a provider rendered to a Medicaid client, the provider will be contacted to submit a copy of the medical records that support the medical review of the claim. All providers should check the TMHP system to ensure their current telephone number and addresses are correct in the system. If the information is incorrect or incomplete, providers must request a change immediately to ensure the PERM medical record request can be delivered. Client authorization for release of this information is not required.

Once a provider receives the request for medical records, the provider must submit the information electronically or in hard copy within 60-calendar days. It is important that providers cooperate by submitting all requested documentation in a timely manner because no response or insufficient documentation will count against the state as an error. This can ultimately negatively impact the amount of federal funding received by Texas for Medicaid.

1.6.4 Release of Confidential Information

Information regarding the diagnosis, evaluation, or treatment of a client with Texas Medicaid coverage by a person licensed or certified to diagnose, evaluate, or treat any medical, mental/emotional disorder, or drug abuse, is confidential information that the provider may disclose only to authorized persons. Family planning information is sensitive, and confidentiality must be ensured for all clients, especially minors.

Only the client may give written permission for release of any pertinent information before client information can be released, and confidentiality must be maintained in all other respects. If a client’s medical records are requested by a licensed Texas health-care provider or a physician licensed by any state, territory, or insular possession of the United States or any State or province of Canada, for purposes of emergency or acute medical care, a provider must furnish such records at no cost to the requesting provider. This includes records received from another physician or health-care provider involved in the care or treatment of the patient. If the records are requested for purposes other than for emergency or acute medical care, the provider may charge the requesting provider a reasonable fee and retain the requested information until payment is received.

The client’s signature is not required on the claim form for payment of a claim, but HHSC recommends the provider obtain written authorization from the client before releasing confidential medical information. A release may be obtained by having the client sign the indicated block on the claim form after the client has read the statement of release of information that is printed on the back of the form. The client’s authorization for release of such information is not required when the release is requested by and made to DADS, HHSC, DSHS, TMHP, DFPS, DARS, HHSC OIG, the Texas Attorney General’s MFCU or Antitrust and Civil Fraud Division, or HHS.
1.6.5 Compliance with Federal Legislation
HHSC complies with HHS regulations that protect against discrimination. All contractors must agree to comply with the following:

- Title VI of the Civil Rights Act of 1964 (Public Law 88-352), section 504 of the Rehabilitation Act of 1973 (Public Law 93-112), The Americans with Disabilities Act of 1990 (Public Law 101-336), Title 40, Chapter 73, of the TAC, all amendments to each, and all requirements imposed by the regulations issued pursuant to these acts. The laws provide in part that no persons in the U.S. shall, on the grounds of race, color, national origin, age, sex, disability, political beliefs, or religion, be excluded from participation in or denied any aid, care, service, or other benefits provided by federal and/or state funding, or otherwise be subjected to any discrimination

- Health and Safety Code 85.113 as described in “Model Workplace Guidelines for Businesses, State Agencies, and State Contractors” on page G-2 (relating to workplace and confidentiality guidelines on AIDS and HIV)

Exception: In the case of minors receiving family planning services, only the client may consent to release of medical documentation and information. Providers must comply with the laws and regulations concerning discrimination. Payments for services and supplies are not authorized unless the services and supplies are provided without discrimination on the basis of race, color, sex, national origin, age, or disability. Send written complaints of noncompliance to the following address:

Executive Commissioner
1100 West 49th Street
Austin, TX 78756-3172

Reminder: Each provider must furnish covered Medicaid services to eligible clients in the same manner, to the same extent, and of the same quality as services provided to other patients. Services made available to other patients must be made available to Texas Medicaid clients if the services are benefits of Texas Medicaid.

1.6.6 Tamper-Resistant Prescription Pads
Providers are required by federal law (Public Law 110-28) to use a tamper-resistant prescription pad when writing a prescription for any drug for Medicaid clients.

Providers must take necessary steps to ensure that tamper-resistant pads are used for all written prescriptions provided to Medicaid clients. Providers may also use compliant, non-written alternatives for transmitting prescriptions such as by telephone, fax, or electronic submittal. Pharmacies are required to ensure that all written Medicaid prescriptions submitted for payment to the Vendor Drug Program are written on a compliant tamper-resistant pad.

If a prescription is not submitted on a tamper-resistant prescription form, a pharmacy may fill the prescription and obtain a compliant prescription by fax, electronic prescription, or re-written on tamper-resistant paper within 72 hours after the date the prescription was filled.

Providers may purchase tamper-resistant prescription pads from the vendor of their choice.

Special copy-resistant paper is not a requirement for prescriptions printed from electronic medical records (EMRs) or ePrescribing generated prescriptions. These prescriptions may be printed on plain paper and will be fully compliant with all three categories of the tamper-resistant regulations, provided they contain at least one feature from each of the three following categories:

- Prevents unauthorized copying of completed or blank prescription forms.
- Prevents erasure or modification of information written on the prescription form.
- Prevents the use of counterfeit prescription forms.
1.6.7 Utilization Control — General Provisions

Title XIX of the Social Security Act, sections 1902 and 1903, mandates utilization control of all Texas Medicaid services under regulations found at Title 42 CFR, Part 456. Utilization review activities required by Texas Medicaid are completed through a series of monitoring systems developed to ensure the quality of services provided, and that all services are both medically necessary and billed appropriately. Both clients and providers are subject to utilization review monitoring. Utilization control procedures safeguard against the delivery of unnecessary services, monitor quality, and ensure payments are appropriate and according to Texas Medicaid policies, rules, and regulations. All providers identified as a result of utilization control activities are presented to HHSC OIG to determine any and all subsequent actions.

The primary goal of utilization control activity is to identify providers with practice patterns inconsistent with the federal requirements and Texas Medicaid scope of benefits, policies, and procedures. The use of utilization control monitoring systems allows for identification of providers whose patterns of practice and use of services fall outside of the norm for their peer groups. Providers identified as exceptional are subject to an in-depth review of all Texas Medicaid billings. These review findings are presented to the HHSC OIG to determine any necessary action. Medical records may be requested from the provider to substantiate the medical necessity and appropriateness of services billed to Texas Medicaid. Inappropriate service utilization may result in recoupment of overpayments and/or sanctions, or other administrative actions deemed appropriate by the HHSC OIG. There are instances when a training specialist may be directed to communicate with the provider to offer assistance with the technical or administrative aspects of Texas Medicaid.

At the direction of the HHSC OIG, a provider’s claims may be manually reviewed before payment. Parameters are developed for prepayment review based on the specific areas of concern identified in each case. As part of the prepayment review process, providers are required to submit paper claims, rather than electronic claims, along with supporting medical record documentation (e.g., clinical notes, progress notes, diagnostic testing results, other reports, superbills, X-rays, and any related medical record documentation) attached to each claim for all services billed. This documentation is used to ascertain that the services billed were medically necessary, billed appropriately, and according to Texas Medicaid requirements and policies. Services inconsistent with Texas Medicaid requirements and policies are adjudicated accordingly. Claims submitted initially without the supporting medical record documentation will be denied. Additional medical record documentation submitted by the provider for claims denied as a result of the prepayment review process is not considered at a later time. A provider is removed from prepayment review only when determined appropriate by the HHSC OIG. Once removed from prepayment review, a follow-up assessment of the provider’s subsequent practice patterns is performed to monitor and ensure continued appropriate use of resources. Noncompliant providers are subject to administrative sanctions up to and including exclusion and contract cancellation, as deemed appropriate by the HHSC OIG as defined in the rules in 1 TAC §371.1643. Providers placed on prepayment review must submit all paper claims and supporting medical record documentation to the following address:

Texas Medicaid & Healthcare Partnership  
Attention: Prepayment Review MC-A11 SURS  
PO Box 203638  
Austin, Texas 78720-3638

1.6.8 Provider Certification/Assignment

Texas Medicaid service providers are required to certify compliance with or agree to various provisions of state and federal laws and regulations. After submitting a signed claim to TMHP, the provider certifies the following:

- Services were personally rendered by the billing provider or under supervision of the billing provider, if allowed for that provider type, or under the substitute physician arrangement.
- The information on the claim form is true, accurate, and complete.
• All services, supplies, or items billed were medically necessary for the client’s diagnosis or treatment. Exception is allowed for special preventive and screening programs (for example, family planning and THSteps).

• Medical records document all services billed and the medical necessity of those services.

• All billed charges are usual and customary for the services provided. The charges must not be higher than the fees charged to private-pay patients.

• The provider will not bill Texas Medicaid for services that are provided or offered to non-Medicaid patients, without charge, discounted or reduced in any fashion including, but not limited to, sliding scales or advertised specials. Any reduced, discounted, free, or special fee advertised to the public must also be offered to Texas Medicaid clients.

• Services were provided without regard to race, color, sex, national origin, age, or handicap.

• The provider of medical care and services files a claim with Texas Medicaid agreeing to accept the Medicaid reimbursement as payment in full for those services covered under Texas Medicaid. The client with Medicaid coverage, or others on their behalf, must not be billed for the amount above that which is paid on allowed services or for services denied or reduced as a result of errors made in claims filing, claims preparation, missed filing deadlines, or failure to follow the appropriate appeal process. However, the client may be billed for noncovered services for which Texas Medicaid does not make any payment. Before providing services, providers should always inform clients of their liability for services that are not a benefit of Texas Medicaid, including use of the Client Acknowledgment Statement.

• The provider understands that endorsing or depositing a Texas Medicaid check is accepting money from federal and state funds and that any falsification or concealment of material fact related to payment may be grounds for prosecution under federal and state laws.

Providers must not bill for, and agree not to bill for, any service provided for which the client bears no liability to pay (i.e. free services). The only exceptions to this ban on billing for services that are free to the user are:

• Services offered by or through the Title V agency when the service is a benefit of Texas Medicaid and rendered to an eligible client

• Services included in the Texas Medicaid client’s individualized education plan (IEP) or individualized family service plan (IFSP) if the services are covered under the Title XIX state plan, even though they are free to the users of the services

1.6.8.1 Delegation of Signature Authority

A provider delegating signatory authority to a member of the office staff or to a billing service remains responsible for the accuracy of all information on a claim submitted for payment. A provider’s employees or a billing service and its employees are equally responsible for any false billings in which they participated or directed.

If the claim is prepared by a billing service or printed by data processing equipment, it is permissible to print “Signature on File” in place of the provider’s signature. When claims are prepared by a billing service, the billing service must obtain and keep a letter on file that is signed by the provider authorizing claim submission.
1.6.9 Billing Clients

A provider cannot require a down payment before providing Medicaid-allowable services to eligible clients, bill, nor take recourse against eligible clients for denied or reduced claims for services that are within the amount, duration, and scope of benefits of Texas Medicaid if the action is the result of any of the following provider-attributable errors:

- Failure to submit a claim, including claims not received by TMHP
- Failure to submit a claim to TMHP for initial processing within the 95-day filing deadline (or the initial 365-day deadline, if applicable)
- Submission of an unsigned or otherwise incomplete claim such as omission of the Hysterectomy Acknowledgment Statement or Sterilization Consent Form with claims for these procedures
- Filing an incorrect claim
- Failure to resubmit a corrected claim or rejected electronic media claim within the 120-day resubmittal period
- Failure to appeal a claim within the 120-day appeal period. Errors made in claims preparation, claims submission, or appeal process
- Failure to submit a claim to TMHP within 95 days of a denial by Titles V or XX for family planning services
- Failure to submit a claim within 95 days from the disposition date from Medicare or a primary third party insurance resource
- Failure to obtain prior authorization for services that require prior authorization under Texas Medicaid

Providers must certify that no charges beyond reimbursement paid under Texas Medicaid for covered services have been, or will be, billed to an eligible client. Federal regulations prohibit providers from charging clients a fee for completing or filing Medicaid claim forms. Providers are not allowed to charge TMHP for filing claims. The cost of claims filing is part of the usual and customary rate for doing business.

Medicaid payment to physicians for covered services includes the incidental services such as completion of required forms submitted by a nursing facility to the physician for signature. It is not acceptable for the physician to charge Texas Medicaid clients, their family, or the nursing facility for telephone calls, telephone consultations, or signing forms. Medicaid payment is considered payment in full. The visit reimbursement includes any incidental services.

In accordance with current federal policy, Texas Medicaid and Texas Medicaid clients cannot be charged for the client’s failure to keep an appointment. Only billings for services provided are considered for payment. Clients may not be billed for the completion of a claim form, even if it is a provider’s office policy.

Letters of inquiry about client billing are sometimes sent to providers in lieu of telephone calls from TMHP representatives. In either case, it is mandatory that the questions be answered with the requested pertinent information. Upon receipt, TMHP forwards these letters to HHSC. HHSC uses the information to resolve client billing/liability issues. It is mandatory that these letters be signed, dated, and returned within ten business days.

Refer to: Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks) for more information about spell-of-illness.

Subsection 4.8, “Medically Needy Program (MNP)” in Section 4, “Client Eligibility” (Vol. 1, General Information).

Form 1.6, “Private Pay Agreement” in this section.
1.6.9.1 Client Acknowledgment Statement

Texas Medicaid only reimburses services that are medically necessary or benefits of special preventive and screening programs such as family planning and THSteps. Hospital admissions denied by the Texas Medical Review Program (TMRP) also apply under this policy. The provider may bill the client only if:

- A specific service or item is provided at the client’s request.
- The provider has obtained and kept a written Client Acknowledgment Statement signed by the client that states:
  - “I understand that, in the opinion of (provider’s name), the services or items that I have requested to be provided to me on (dates of service) may not be covered under the Texas Medical Assistance Program as being reasonable and medically necessary for my care. I understand that the HHSC or its health insuring agent determines the medical necessity of the services or items that I request and receive. I also understand that I am responsible for payment of the services or items I request and receive if these services or items are determined not to be reasonable and medically necessary for my care.”
  - “Comprendo que, según la opinión del (nombre del proveedor), es posible que Medicaid no cubra los servicios o las provisiones que solicité (fecha del servicio) por no considerarlos razonables ni médicamente necesarios para mi salud. Comprendo que el Departamento de Salud de Texas o su agente de seguros de salud determina la necesidad médica de los servicios o de las provisiones que el cliente solicite o reciba. También comprendo que tengo la responsabilidad de pagar los servicios o provisiones que solicito y que reciba si después se determina que esos servicios y provisiones no son razonables ni médicamente necesarios para mi salud.”

A provider is allowed to bill the following to a client without obtaining a signed Client Acknowledgment Statement:

- Any service that is not a benefit of Texas Medicaid (for example, cellular therapy).
- All services incurred on noncovered days because of eligibility or spell of illness limitation. Total client liability is determined by reviewing the itemized statement and identifying specific charges incurred on the noncovered days. Spell of illness limitations do not apply to medically necessary stays for Medicaid clients who are 20 years of age and younger.
- The reduction in payment that is due to the MNP is limited to children who are 18 years of age and younger and pregnant women. The client’s potential liability would be equal to the amount of total charges applied to the spend down. Charges to clients for services provided on ineligible days must not exceed the charges applied to spend down.
- All services provided as a private pay patient. If the provider accepts the client as a private pay patient, the provider must advise clients that they are accepted as private pay patients at the time the service is provided and responsible for paying for all services received. In this situation, HHSC strongly encourages the provider to ensure that the client signs written notification so there is no question how the client was accepted. Without written, signed documentation that the Texas Medicaid client has been properly notified of the private pay status, the provider cannot seek payment from an eligible Texas Medicaid client.
- The client is accepted as a private pay patient pending Texas Medicaid eligibility determination and does not become eligible for Medicaid retroactively. The provider is allowed to bill the client as a private pay patient if retroactive eligibility is not granted. If the client becomes eligible retroactively, the client notifies the provider of the change in status. Ultimately, the provider is responsible for filing timely Texas Medicaid claims. If the client becomes eligible, the provider must refund any money paid by the client and file Medicaid claims for all services rendered.
A provider attempting to bill or recover money from a client in violation of the above conditions may be subject to exclusion from Texas Medicaid.

**Important:** Ancillary services must be coordinated and pertinent eligibility information must be shared. The primary care provider is responsible for sharing eligibility information with others (e.g., emergency room staff, laboratory staff, and pediatricians).

### 1.6.10 General Medical Record Documentation Requirements

The Administrative Simplification Act of the Health Insurance Portability and Accountability Act (HIPAA) of 1996 mandates the use of national coding and transaction standards. HIPAA requires that the American Medical Association's (AMA) Current Procedural Terminology (CPT) system be used to report professional services, including physician services. Correct use of CPT coding requires using the most specific procedure code that matches the services provided based on the procedure code's description. Providers must pay special attention to the standard CPT descriptions for the evaluation and management services. The medical record must document the specific elements necessary to satisfy the criteria for the level of service as described in CPT. Reimbursement may be recouped when the medical record does not document that the level of service provided accurately matches the level of service claimed. Furthermore, the level of service provided and documented must be medically necessary based on the clinical situation and needs of the patient.

HHSC and TMHP routinely perform retrospective reviews of all providers. HHSC ultimately is responsible for Texas Medicaid utilization review activities. This review includes comparing services billed to the client’s clinical record. The following requirements are general requirements for all providers. Any mandatory requirement not present in the client’s medical record subjects the associated services to recoupment.

**Note:** This list is not all-inclusive. Additional and more specific requirements may apply to special services areas.

**Note:** Medical documentation that is maintained by a provider in a client’s record can be maintained in a language other than English; however, when TMHP, HHSC, or any other state/federal agency requests a written record or conducts a documentation review, this medical documentation must be provided in English in a timely manner.

- (Mandatory) All entries are legible to individuals other than the author, dated (month, day, and year), and signed by the performing provider.
- (Mandatory) Medicaid-enrolled providers must submit claims with their own TPI except when under the agreement of a substitute physician or *locum tenens*.
- (Mandatory) Each page of the medical record documents the patient’s name and Texas Medicaid number.
- (Mandatory) A copy of the actual authorization from HHSC or its designee (e.g., TMHP) is maintained in the medical record for any item or service that requires prior authorization.
- (Mandatory) Allergies and adverse reactions (including immunization reactions) are prominently noted in the record.
- (Mandatory) The selection of evaluation and management codes (levels of service) is supported by the client’s clinical record documentation. The AMA CPT descriptors of key/contributory components with level of service descriptions are used to evaluate the selection of levels of service.
- (Mandatory) The history and physical documents the presenting complaint with appropriate subjective and objective information.
- (Mandatory) The services provided are clearly documented in the medical record with all pertinent information regarding the patient’s condition to substantiate the need and medical necessity for the services.
• (Mandatory) Medically necessary diagnostic lab and X-ray results are included in the medical record and abnormal findings have an explicit notation of follow-up plans.
• (Mandatory) Necessary follow-up visits specify time of return by at least the week or month.
• (Mandatory) Unresolved problems are noted in the record.
• (Desirable) Immunizations are noted in the record as complete or up-to-date.
• (Desirable) Personal data includes address, employer, home/work telephone numbers, sex, marital status, and emergency contacts.

Note: An unenrolled provider that renders services and attempts to use the TPI of a provider who is enrolled in Medicaid will not be reimbursed for the services. During retrospective review, any services that were rendered by a provider that was not enrolled in Texas Medicaid and were billed using the provider identifier of a Medicaid-enrolled provider are subject to recoupment.

1.6.11 Informing Pregnant Clients About CHIP Benefits
Section 24, S.B. 1188, 79th Legislature, Regular Session, 2005, requires that Medicaid providers rendering services to a pregnant Medicaid client must inform the client of the health benefits for which the client or the client’s child may be eligible under the Children’s Health Insurance Program (CHIP).

CHIP is available to children whose families have low to moderate income, who earn too much money to qualify for Texas Medicaid, and who do not have private insurance. Some clients may have to pay an enrollment fee.

To qualify for CHIP, a child must be:
• A Texas resident
• 18 years of age or younger
• A citizen or legal permanent resident of the United States
• Must meet all income and resource guidelines

CHIP benefits include:
• Physician, hospital, X-ray, and lab services
• Well-baby and well-child visits
• Immunizations
• Prescription drugs
• Dental services
• DME
• Prosthetic devices (with a $20,000 limit per 12-month period)
• Case coordination and enhanced services for children with special health-care needs and children with disabilities
• Physical, speech, and occupational therapy
• Home health services
• Transplants
• Mental health services
• Vision services
• Chiropractic services
Individuals may apply for CHIP by downloading and completing the application found on the CHIP page of the HHSC website at www.hhsc.state.tx.us/chip or by calling the toll-free CHIP number at 1-800-647-6558.

1.7 Electronic Health Records Incentive Program

The Texas Medicaid Electronic Health Record (EHR) Incentive Program provides incentive payments to health-care providers and hospitals when they adopt and meaningfully use (MU) certified electronic health record technology.

The program is designed to encourage Texas medical professionals and hospitals to make the transition to electronic health records and help build what eventually will be a statewide health information network where patient records can be shared among offices electronically.

Individual professionals and hospitals can qualify for incentive payments by adopting certified electronic health record technology that meets federal standards, then using that technology in ways that improve quality, safety, and effectiveness of patient care.

There will be three stages of meaningful use over the six-year life of the program. Providers must meet the criteria for each stage to continue receiving incentive payments.

To learn more about the program and how to participate, providers can visit www.texasehrincentives.com for a user-friendly e-learning tool, and www.tmhp.com/Pages/HealthIT/HIT_Home.aspx for the latest program news and resource documents.

For additional assistance on this and other aspects of the Texas Medicaid EHR Incentive Program, providers can email HealthIT@tmhp.com or call the TMHP Contact Center at 1-800-925-9126 (option 4).

1.8 Enrollment Criteria for Out-of-State Providers

Texas Medicaid covers medical assistance services provided to eligible Texas Medicaid clients while in a state other than Texas, as long as the client does not leave Texas to receive out-of-state medical care that can be received in Texas. Services provided outside the state are covered to the same extent medical assistance is furnished and covered in Texas when the service meets one or more of the following requirements of 1 TAC §352.17:

**Note:** Border state providers (providers rendering services within 50 miles driving distance of the Texas border) are considered in-state providers.

- The services are medically necessary emergency services to a recipient who is located outside of the state.

  **Note:** An out-of-state provider seeking enrollment under this criterion must include with the enrollment application a copy of the claim that contains the diagnosis that indicates emergency care or medical record documentation. The documentation must demonstrate that emergency care was provided to a Texas Medicaid client. Providers enrolled under this criterion will be enrolled for a limited period of time.

- The services are medically necessary to a recipient who is located outside of the state, and in the expert opinion of the recipient’s attending physician or other provider, the recipient’s health would be or would have been endangered if the recipient were required to travel to Texas.

  **Note:** An out-of-state provider seeking enrollment under this criterion must include with the enrollment application an explanation of the circumstances and demonstrate why the Texas Medicaid client’s health would have been endangered if the client had been required to travel to Texas. Providers enrolled under this criterion will be enrolled for a limited period of time.
The services are medically necessary and more readily available to a recipient in the state where the recipient is located.

**Note:** HHSC determines whether this criterion applies on a case-by-case basis. An out-of-state provider that seeks enrollment under this criterion must include with the enrollment application documentation for why this criterion applies, and must provide any additional information requested by HHSC or its designee. Providers that are enrolled under this criterion may be enrolled for a limited period of time.

The services are medically necessary services and it is the customary or general practice of recipients in a particular locality within Texas to obtain services from the out-of-state provider, as demonstrated by the provider being located in the United States and within 50 miles driving distance from the Texas state border.

**Note:** HHSC determines whether this criterion applies on a case-by-case basis. An out-of-state provider that is located more than 50 miles from Texas and seeks enrollment under this criterion must include with the enrollment application documentation for why this criterion applies, and must provide any additional information requested by HHSC or its designee. Such providers, if approved for enrollment, may be enrolled for a limited period of time.

The services are medically necessary to a recipient who is eligible on the basis of participation in an adoption assistance or foster care program that is administered by the Texas Department of Family and Protective Services under Title IV-E of the Social Security Act.

**Note:** HHSC determines whether this criterion applies on a case-by-case basis. An out-of-state provider that seeks enrollment under this criterion must include with the enrollment application documentation that explains why this criterion applies, and must provide any additional information requested by HHSC or its designee. An out-of-state provider does not meet this criterion merely on the basis of having established business relationships with one or more providers that participate in the Texas Medicaid program, because the criterion in that paragraph applies only to the customary or general practice of recipients in regard to a recipient’s choice of provider. Such providers, if approved for enrollment, may be enrolled for a limited period of time.

Other out-of-state medical care may be considered when prior authorized by HHSC or its designee.

**Note:** Providers that seek enrollment under this criterion are encouraged to contact TMHP to request approval before filing an enrollment application. TMHP will coordinate the request with HHSC. HHSC determines whether this criterion applies on a case-by-case basis. The provider must provide any additional information requested by HHSC or its designee. Such providers, if approved for enrollment, may be enrolled for a limited period of time.

Texas Medicaid does not cover transplant services rendered out-of-state that are also available in Texas. The provider must submit a copy of the transplant evaluation performed by a Texas facility to support the need for an out-of-state pre-transplant evaluation, when requesting an out-of-state prior authorization for a pre-transplant evaluation.

Providers that are located out-of-state and seek reimbursement under one or more of the above criteria must submit an enrollment application and be approved for enrollment.

An out-of-state provider that meets none of the above criteria but is eligible to receive reimbursement for Medicare crossover claims involving Texas Medicaid dual eligible clients, may seek enrollment in order to receive such reimbursement. Such providers, if approved for enrollment, will be restricted to receiving reimbursement only for Medicare crossover claims.

**Refer to:** Subsection 2.7, “Medicare Crossover Claim Reimbursement” in this section.
Payments to out-of-state providers enrolled in Texas Medicaid are made according to the usual, customary, and reasonable charges or the stipulated fee for services as appropriate for the provided care. Reimbursement may not exceed the lesser of:

- The Medicaid reasonable charge or fee determined for the same services in Texas; or
- If agreed to by HHSC, 100 percent of the Medicare reasonable charge determination for the same service in the state where the service was provided.

Inpatient hospital stays are reimbursed according to the Texas prospective payment methodology (diagnosis-related group [DRG]). Payments made on a reasonable cost basis are mutually determined by the state agency and the contractor.

TMHP must receive claims from out-of-state providers within 365 days from the date of service.

1.9 Medicaid Waste, Abuse, and Fraud Policy

The OIG has the responsibility to identify and investigate cases of suspected waste, abuse, and fraud in Medicaid and other health and human services programs. This responsibility, granted through state and federal law, gives the OIG the authority to pursue administrative sanctions and to refer cases to prosecutors, licensure and certification boards, and other agencies. Additionally, Texas Medicaid is required to disenroll or exclude any provider who has been disenrolled or excluded from Medicare or any other state health-care program.

Anyone participating in Texas Medicaid must understand the requirements for participation. Available methods both to learn and stay up to date on program requirements include the following:

- Provider education. Attendance at educational workshops and training sessions. Regular training opportunities are offered by TMHP.
- Texas Medicaid publications. These include the Texas Medicaid Provider Procedures Manual, the Texas Medicaid Bulletin, and banner messages, which are included in R&S Reports.
- All adopted agency rules. These include those related to fraud, waste, and abuse contained in 1 TAC Chapter 371.
- State and federal law. Statutes and other law pertinent to Texas Medicaid and fraud, waste, and abuse within Texas Medicaid.

In addition, providers are responsible for the delivery of health-care items and services to Medicaid clients in accordance with all applicable licensure and certification requirements and accepted medical community standards and standards. Such standards include those related to medical record and claims filing practices, documentation requirements, and records maintenance. The TAC requires providers to follow these standards. For more information, consult 1 TAC §371.1617(a)(6)(A).

Texas Medicaid providers must follow the coding and billing requirements of the Texas Medicaid Provider Procedures Manual. However, if coding and billing requirements for a particular service are not addressed in the TMPPM, and if coding and billing requirements are not otherwise specified in program policy (such as in provider bulletins or banners), then providers must follow the most current coding guidelines. These include:

- CPT as set forth in the American Medical Association’s most recently published “CPT books”, “CPT Assistant” monthly newsletters, and other publications resulting from the collaborative efforts of American Medical Association with the medical societies.
- Healthcare Common Procedure Coding System (HCPCS) as developed and maintained by the federal government.
National Correct Coding Initiative (NCCI), as set forth by the Centers for Medicare & Medicaid Services (CMS), and as explained in the NCCI Policy and Medicare Claims Processing Manuals. NCCI consists of procedure code combinations that a provider must not bill together. One of the codes in the pair is considered a part of the primary procedure and not reimbursable to the same provider on the same date of service.

**Exception:** NCCI outlines use of modifiers some of which are not currently recognized by Texas Medicaid. See the list of modifiers utilized by Texas Medicaid in subsection 6.3.5, “Modifiers” in Section 6, “Claims Filing” (Vol. 1, General Information).

- Current Dental Terminology (CDT) as published by the American Dental Association.
- International Classification of Diseases, 9th Revision, Clinical Modification (ICD-9-CM).

Failure to comply with the guidelines provided in these publications may result in a provider being found to have engaged in one or more program violations listed in 1 TAC § 371.1617.

All providers are held responsible for any claims preparation or other activities that may be performed under the provider’s authority. For example, providers are held responsible for any omissions and the accuracy of submitted information, even if those actions are performed by office staff, contractors, or billing services. This, however, does not absolve these other individuals for their participation in any documents provided to the state or designee with false, inaccurate, or misleading information; or pertinent omissions.

HHSC-OIG may impose one or any combination of administrative actions or administrative sanctions on Texas Medicaid providers or other persons when fraud, waste, or abuse is determined. Those who may be sanctioned include:

- Those furnishing services or items directly or indirectly.
- Those billing for services.
- Those violating any of the provisions delineated in this section.
- Affiliates of a provider or person violating any of the provisions delineated in this section.

Administrative sanctions include, without limitation:

- Exclusion from program participation for a specified period of time, permanently, or indefinitely. Anyone excluded from Texas Medicaid is also automatically excluded from all programs under Titles V and XX of the Social Security Act.
- Suspension of Medicaid payments (payment hold) to a provider.
- Recoupment of Medicaid overpayments, including any overpayments determined through statistical sampling and extrapolation.
- Restricted Medicaid reimbursement (specific services will not be reimbursed to an individual provider during the time the provider is on restricted reimbursement; however, reimbursement for other services may continue).
- Cancellation of the Medicaid provider agreement (however, a deactivation in accordance with the agreement itself is not considered a sanction).
- Exclusion or suspension under the authority of the CFR.

Administrative actions include:

- Amending a provider agreement so that it will deactivate on a specific date.
- Granting an agreement or transferring a provider to an agreement with special terms or conditions, including a probationary agreement.
• Required attendance at provider education sessions.
• Prior authorization of selected services.
• Pre-payment review.
• Post-payment review.
• Required attendance at informal or formal provider corrective action meetings.
• Submission of additional documentation or justification that is not normally required to accompany submitted claims. (Failure to submit legible documentation or justification requested will result in denial of the claim.)
• Oral, written, or personal educational contact with the provider.
• Posting of a surety bond or providing a letter of credit.
• Having a subpoena served to compel an appearance for testimony or the production of relevant evidence, as determined by the HHSC/OIG.

Anyone facing an administrative sanction has a right to formal due process. This formal due process may include a hearing before an administrative law judge. Conversely, anyone facing an administrative action is not entitled to formal due process. People who induce, solicit, receive, offer, or pay any remuneration (including, but not limited to, bribes, kickbacks, or rebates) directly or indirectly in relation to referrals, purchases, leases, or arrangements of services covered by Medicare or Texas Medicaid may be in violation of state statutes and guilty of a federal felony offense. State law also allows for the suspension of providers convicted of a criminal offense related to Medicare or Texas Medicaid. The commission of a felony in Medicaid or Medicare programs may include fines or imprisonment ranging from five years to life in prison. Examples of inducements include a service, cash in any amount, entertainment, or any item of value.

As stated in 1 TAC § 371.1617, following is a nonexclusive list of grounds or criteria for the Inspector General’s administrative enforcement and/or referral for criminal, civil, or licensure or certification investigation and judicial action regarding program violations by any provider or person. Violations result from a provider or person who knew or should have known the following were violations. The headings of each group listed below are provided solely for organization and convenience and are not elements of any program violation.

1) Claims and Billing.
   a) Submitting or causing to be submitted a false statement or misrepresentation, or omitting pertinent facts when claiming payment under the Texas Medicaid or other HHS program or when supplying information used to determine the right to payment under the Texas Medicaid or other HHS program;
   b) Submitting or causing to be submitted a false statement, information or misrepresentation, or omitting pertinent facts to obtain greater compensation than the provider is legally entitled to;
   c) Submitting or causing to be submitted a false statement, information or misrepresentation, or omitting pertinent facts to meet prior authorization requirements;
   d) Submitting or causing to be submitted under Title XVIII (Medicare) or a state health-care program claims or requests for payment containing unjustified charges or costs for items or services that substantially exceed the person’s usual and customary charges or costs for those items or services to the public or the private pay patients unless otherwise authorized by law;
   e) Submitting or causing to be submitted claims with a pattern of inappropriate coding or billing that results in excessive costs to the Texas Medicaid or other HHS program;
   f) Billing or causing claims to be filed for services or merchandise that were not provided to the recipient;
   g) Submitting or causing to be submitted a false statement or misrepresentation that, if used, has the potential of increasing any individual or state provider payment rate or fee;
h) Submitting or causing to be submitted to the Texas Medicaid or other HHS program a cost report containing costs not associated with Texas Medicaid or other HHS program or not permitted by Texas Medicaid or other HHS program policies;

i) Presenting or causing to be presented to an operating agency or its agent a claim that contains a statement or representation that the person knows or should have known to be false;

j) Billing or causing claims to be submitted to the Texas Medicaid or other HHS program for services or items furnished personally by, at the medical direction of, or on the prescription or order of a person who is excluded from Texas Medicaid, other HHS program, or Medicare or has been excluded from and not reinstated within Texas Medicaid, other HHS program, or Medicare;

k) Billing or causing claims to be submitted to the Texas Medicaid or other HHS program for services or items that are not reimbursable by the Texas Medicaid or other HHS program;

l) Billing or causing claims to be submitted to the Texas Medicaid or other HHS program for a service or item which requires a prior order or prescription by a licensed health-care practitioner when such order or prescription has not been obtained;

m) Billing or causing claims to be submitted to the Texas Medicaid or other HHS program for an item or service substituted without authorization for the item or service ordered, prescribed or otherwise designated by the Texas Medicaid or other HHS program;

n) Billing or causing claims to be submitted to the Texas Medicaid or other HHS program by a provider or person who is owned or controlled, directly or indirectly, by an excluded person; and

o) Billing or causing claims to be submitted to the Texas Medicaid or other HHS program by a provider or person for charges in which the provider discounted the same services for any other type of patient.

2) Records and Documentation.

a) Failing to maintain for the period of time required by the rules relevant to the provider in question records and other documentation that the provider is required by federal or state law or regulation or by contract to maintain in order to participate in the Texas Medicaid or other HHS program or to provide records or documents upon written request for any records or documents determined necessary by the Inspector General to complete their statutory functions related to a fraud and abuse investigation. Such records and documentation include, without limitation, those necessary:

i) To verify specific deliveries, medical necessity, medical appropriateness, and adequate written documentation of items or services furnished under Title XIX or Title XX;

ii) To determine in accordance with established rates appropriate payment for those items or services delivered;

iii) To confirm the eligibility of the provider to participate in the Texas Medicaid or other HHS program; e.g., medical records (including, without limitation, X-rays, laboratory and test results, and other documents related to diagnosis), billing and claims records, cost reports, managed care encounter data, financial data necessary to demonstrate solvency of risk-bearing providers, and documentation (including, without limitation, ownership disclosure statements, articles of incorporation, by-laws, and corporate minutes) necessary to demonstrate ownership of corporate entities; and

iv) To verify the purchase and actual cost of products;

b) Failing to disclose fully and accurately or completely information required by the Social Security Act and by 42 CFR Part 455, Subpart B; 42 CFR Part 420, Subpart C; 42 CFR §1001.1101; and 42 CFR Part 431;

c) Failing to provide immediate access, upon request by a requesting agency, to the premises or to any records, documents, and other items or equipment the provider is required by federal or state law or regulation or by contract to maintain in order to participate in the Texas Medicaid or other HHS program (see subparagraphs (a) and (b) of this paragraph), or failing to provide records, documents, and other items or equipment upon written request that are determined
necessary by the Inspector General to complete their statutory functions related to a fraud and abuse investigation, including without limitation all requirements specified in 1 TAC §371.1643(f) of this subchapter. "Immediate access" is deemed to be within 24 hours of receiving a written request, unless the requesting agency has reason to suspect fraud or abuse or to believe that requested records, documents, or other items or equipment are about to be altered or destroyed, thereby necessitating access at the actual time the request is presented or, in the opinion of the Inspector General, the request may be completed at the time of the request and/or in less than 24 hours;

d) Developing false source documents or failing to sign source documents or to retain supporting documentation or to comply with the provisions or requirements of the operating agency or its agents pertaining to electronic claims submittal; and
e) Failing as a provider, whether individual, group, facility, managed care or other entity, to include within any subcontracts for services or items to be delivered within Texas Medicaid all information that is required by 42 CFR §434.10(b).

3) Program-Related Convictions.
   a) Pleading guilty or nolo contendere, agreeing to an order of probation without adjudication of guilt under deferred adjudication, or being a defendant in a court judgment or finding of guilt for a violation relating to performance of a provider agreement or program violation of Medicare, Texas Medicaid, other HHS program, or any other state’s Medicaid program;
   b) Pleading guilty or being convicted of a violation of state or federal statutes relating to dangerous drugs, controlled substances, or any other drug-related offense;
   c) Pleading guilty of, being convicted of, or engaging in conduct involving moral turpitude;
   d) Pleading guilty or being convicted of a violation of state or federal statutes relating to fraud, theft, embezzlement, breach of fiduciary responsibility, or other financial misconduct relating to the delivery of a health-care item or service or relating to any act or omission in a program operated or financed by any federal, state, or local government agency;
   e) Being convicted in connection with the interference with or obstruction of any investigation into any criminal offense that would support mandatory exclusion under 1 TAC §371.1655 of this subchapter or any offense listed within paragraph (3) of this subsection regarding program-related convictions; and
   f) Being convicted of any offense that would support mandatory exclusion under 1 TAC §371.1655 of this subchapter.

4) Provider Eligibility.
   a) Failing to meet standards required for licensure, when such licensure is required by state or federal law, administrative rule, provider agreement, or provider manual for participation in the Texas Medicaid or other HHS program;
   b) Being excluded, suspended or otherwise sanctioned within any federal program involving the provision of health care;
   c) Being excluded, suspended or otherwise sanctioned under any state health-care program for reasons bearing on the person's professional competence, professional performance or financial integrity;
   d) Failing to fully and/or correctly complete a Provider Enrollment Agreement, Provider Re-enrollment Agreement or other enrollment form prescribed by the relevant operating agency or its agent for enrollment; and
   e) Loss or forfeiture of corporate charter.

5) Program Compliance.
   a) Failing to comply with the terms of the Texas Medicaid or other HHS program contract or provider agreement, assignment agreement, the provider certification on the Texas Medicaid or other HHS program claim form, or rules or regulations published by the Commission or a Medicaid or other HHS operating agency;
b) Violating any provision of the Human Resources Code, Chapter 32 or 36, or any rule or
regulation issued under the Code;

c) Submitting a false statement or misrepresentation or omitting pertinent facts on any application
or any documents requested as a prerequisite for the Texas Medicaid or other HHS program
participation;

d) Refusing to execute or comply with a provider agreement or amendments when requested;

e) Failing to correct deficiencies in provider operations after receiving written notice of them from
an operating agency, the commission or their authorized agents;

f) Failing to abide by applicable federal and state law regarding handicapped individuals or civil
rights;

g) Failing to comply with the Texas Medicaid or other HHS program policies, published Texas
Medicaid or other HHS program bulletins, policy notification letters, provider policy or
procedure manuals, contracts, statutes, rules, regulations, or interpretation previously sent to
the provider by an operating agency or the commission regarding any of the authorities listed
above, including statutes or standards governing occupations;

h) Failing to fully and accurately make any disclosure required by the Social Security Act, §1124 or
§1126;

i) Failing to disclose information about the ownership of a subcontractor with whom the person
has had business transactions in an amount exceeding $25,000 during the previous 12 months
or about any significant business transactions (as defined by HHS) with any wholly-owned
supplier or subcontractor during the previous five years;

j) Failing, as a hospital, to comply substantially with a corrective action required under the Social
Security Act, §1886(f)(2)(B);

k) Failing to repay or make arrangements that are satisfactory to the commission to repay
identified overpayments or other erroneous payments or assessments identified by the
commission or any Texas Medicaid or other HHS program operating agency;

l) Committing an act described in the Social Security Act, §1128A (mandatory exclusion) or
§1128B (permissive exclusion);

m) Defaulting on repayments of scholarship obligations or items relating to health profession
education made or secured, in whole or in part, by HHS or the state when they have taken all
reasonable steps available to them to secure repayment;

n) Soliciting or causing to be solicited, through offers of transportation or otherwise, Texas
Medicaid or other HHS program recipients for the purpose of delivering to those recipients
health-care items or services;

o) Marketing, supplying or selling confidential information (e.g., recipient names and other
recipient information) for a use that is not expressly authorized by the Texas Medicaid or other
HHS program; and

p) Failing to abide by applicable statutes and standards governing providers.

6) Delivery of Health-Care Services.

a) Failing to provide health-care services or items to Texas Medicaid or other HHS program recip-
ients in accordance with accepted medical community standards or standards required by
statute, regulation, or contract, including statutes and standards that govern occupations;

b) Furnishing or ordering health-care services or items for a recipient-patient under Title XVIII or
a state health-care program that substantially exceed the recipient's needs, are not medically
necessary, are not provided economically or are of a quality that fails to meet professionally
recognized standards of health care; and

c) Engaging in any negligent practice that results in death, injury, or substantial probability of
death or injury to the provider's patients.
7) Improper Collection and Misuse of Funds.
   a) Charging recipients for services when payment for the services was recouped by the Texas Medicaid or another HHS program for any reason;
   b) Misapplying, misusing, embezzling, failing to promptly release upon a valid request, or failing to keep detailed receipts of expenditures relating to any funds or other property in trust for a Texas Medicaid or other HHS program recipient;
   c) Failing to notify and reimburse the relevant operating agency or the commission or their agents for services paid by the Texas Medicaid or other HHS programs if the provider also receives reimbursement from a liable third party;
   d) Rebating or accepting a fee or a part of a fee or charge for a Texas Medicaid or other HHS program patient referral;
   e) Requesting from a recipient in payment for services or items delivered within the Texas Medicaid or other HHS program any amount that exceeds the amount the Texas Medicaid or other HHS program paid for such services or items, with the exception of any cost-sharing authorized by the program; and
   f) Requesting from a third party liable for payment of the services or items provided to a recipient under the Texas Medicaid or other HHS program, any payment other than as authorized at 42 CFR §447.20.

8) Licensure Actions.
   a) Having a voluntary or involuntary action taken by a licensing or certification agency or board that requires the provider or employee to comply with professional practice requirements of the board after the board receives evidence of noncompliance with licensing or certification requirements; and
   b) Having its license to provide health care revoked, suspended, or probated by any state licensing or certification authority, or losing a license or certification, because of action based on assessment of the person's professional competence, professional performance, or financial integrity, non-compliance with Health and Safety Code, statutes governing occupations, or surrendering a license or certification while a formal disciplinary proceeding is pending before licensing or certification authorities when the proceeding concerns the person's professional competence, professional performance, or financial integrity.

9) MCOs and Persons Providing Services or Items Through Managed Care.
   Note: This paragraph includes those program violations that are unique to managed care; paragraphs (1) through (8) and (11) of this section also apply to managed care.
   a) Failing, as an MCO, or an association, group or individual health-care provider furnishing services through an MCO, to provide to recipient enrollee a health-care benefit, service or item that the organization is required to provide under its contract with an operating agency;
   b) Failing, as an MCO or an association, group or individual health-care provider furnishing services through an MCO, to provide to an individual a health-care benefit, service or item that the organization is required to provide by state or federal law, regulation or program rule;
   c) Engaging, as an MCO, in actions that indicate a pattern of wrongful denial or payment for a health-care benefit, service or item that the organization is required to provide under its contract with an operating agency;
   d) Engaging, as an MCO, in actions that indicate a pattern of wrongful delay of at least 45 days or a longer period specified in the contract with an operating agency, not to exceed 60 days, in making payment for a health-care benefit, service or item that the organization is required to provide under its contract with an operating agency;
   e) Engaging, as an MCO or an association, group or individual health-care provider furnishing services through managed care, in a fraudulent activity in connection with the enrollment in the organization's managed care plan of an individual eligible for medical assistance or in connection with marketing the organization's services to an individual eligible for medical assistance;

f) Discriminating against enrollees or prospective enrollees on any basis, including, without limitation, age, gender, ethnic origin or health status;
g) Failing, as an MCO, to comply with any term within a contract with a Texas Medicaid or other HHS program operating agency to provide healthcare services to Texas Medicaid or HHS program recipients; and
h) Failing, as an MCO, reasonably to provide to the relevant operating agency, upon its written request, encounter data and/or other data contractually required to document the services and items delivered by or through the MCO to Texas Medicaid or other HHS program recipients.

   a) Reporting noncovered or nonchargeable services as covered items; e.g., incorrectly apportioning or allocating costs on cost reports; including costs of noncovered services, supplies or equipment in allowable costs; arrangements between providers and employees, related parties, independent contractors, suppliers, and others that appear to be designed primarily to overstate the costs to the program through various devices (such as commissions or fee splitting) to siphon-off or conceal illegal profits;
b) Reporting costs not incurred or which were attributable to nonprogram activities, other enterprises or personal expenses;
c) Including unallowable cost items on a cost report;
d) Manipulating or falsifying statistics that result in overstatement of costs or avoidance of recoupment, such as incorrectly reporting square footage, hours worked, revenues received, or units of service delivered;
e) Claiming bad debts without first genuinely attempting to collect payment;
f) Depreciating assets that have been fully depreciated or sold or using an incorrect basis for depreciation; and
  
g) Reporting costs above the cost to the related party.

11) Kickbacks and Referrals.
   a) Violating any of the provisions specified in 1 TAC §371.1721(b) of this subchapter relating to kickbacks, bribes, rebates, referrals, inducements, or solicitation;
b) As a physician, referring a Texas Medicaid or other HHS program patient to an entity with which the physician has a financial relationship for the furnishing of designated health services, payment for which would be denied under Title XVIII (Medicare) pursuant to §1877 and §1903(s) of the Social Security Act (Stark I and II). Neither federal financial participation nor this state's expenditures for medical assistance under the state Medicaid plan may be used to pay for services or items delivered within the program and within a relationship that violates Stark I or II. The Commission hereby references and incorporates within these rules the federal regulations promulgated pursuant to Stark I and II, and expressly recognizes all exceptions to the prohibitions on referrals established within those rules;
   c) Failing to disclose documentation of financial relationships necessary to establish compliance with Stark I and II, as set forth in subparagraph (b) of this paragraph; and
   d) Offering to pay or agreeing to accept, directly or indirectly, overtly or covertly any remuneration in cash or in kind to or from another for securing or soliciting a patient or patronage for or from a person licensed, certified, or registered or enrolled as a provider or otherwise by a state health-care regulatory or health and human service agency.

Involvement in any of these practices may result in provider exclusion or suspension from Texas Medicaid. Providers are notified in writing of any actions taken as well as procedures for appeal and reinstatement. The written notification will specify the date on which Medicaid program participation may resume. The reinstated person may then apply for a contract or provider agreement.
Providers and individuals who have been excluded from Texas Medicaid may be reinstated only by HHSC-OIG. If HHSC-OIG approves an individual’s request for reinstatement, a written notice will be sent to that individual. The provider must first be reinstated into Medicaid and receive written notification specifying the date on which Medicaid program participation may resume. Once the provider has been reinstated into Medicaid, the provider may then apply for a contract or provider agreement.

Full investigation of criminal Medicaid fraud is the Texas Attorney General MFCU’s responsibility and may result in a felony or misdemeanor criminal conviction.

1.9.1 Reporting Waste, Abuse, and Fraud
Anyone with knowledge about suspected Medicaid waste, abuse, or fraud of provider services must report the information to the HHSC-OIG. To report waste, abuse, or fraud, visit www.hhsc.state.tx.us and select Reporting Waste, Abuse, and Fraud. Waste, abuse, and fraud may also be reported by calling the OIG hotline at 1-800-436-6184. All reports of waste, abuse, or fraud received through either channel remain confidential.

HHSC-OIG encourages providers to voluntarily investigate and report fraud, waste, abuse, or inappropriate payments of Medicaid funds in their own office. Providers are required to report these activities to HHSC-OIG when identified. HHSC-OIG will work collaboratively with self-reporting providers. For more information on provider self-reporting, visit http://oig.hhsc.state.tx.us/ProviderSelfReporting/Self_Reporting.aspx.

1.9.2 Suspected Cases of Provider Waste, Abuse, and Fraud
HHSC-OIG is responsible for minimizing waste, abuse, and fraud by Medicaid providers. HHSC-OIG has established and continues to refine criteria for identifying cases of possible waste, abuse, or fraud and recouping provider overpayments. When HHSC-OIG identifies fraud, waste, and abuse, a case may be referred to the Texas Attorney General’s MFCU or Antitrust and Civil Medicaid Fraud Section, or result in administrative enforcement.

1.9.3 Employee Education on False Claims Recovery
United States Code (U.S.C.), Title 42, §1396a(a)(68) requires any entity that receives or makes annual Medicaid payments of at least $5,000,000 to establish written policies that provide detailed information about each employee’s role in preventing and detecting waste, fraud, and abuse in federal health-care programs. These written policies, which must apply to all employees of the entity (including management) as well as the employees of any contractor or agent of the entity, must address:

- Administrative remedies for false claims and statements as provided in 31 U.S.C. § 3802.
- Texas law relating to civil and criminal penalties for false claims (including Chapter 36 of the Human Resources Code; section 35A.02 of the Penal Code; Title 1, Chapter 371, Subchapter G of the TAC; and other applicable law).
- Whistleblower protections under the above laws (including section 36.115 of the Human Resources Code).

In addition, these written policies must include detailed provisions regarding the entity’s policies and procedures for detecting and preventing fraud, waste, and abuse. The entity must also include a specific discussion of the following in all employee handbooks:

- The above laws
- The entity’s policies and procedures for detecting and preventing fraud, waste, and abuse
- The rights of employees to be protected as whistleblowers
TMHP sends a yearly letter to each provider that receives over $5,000,000 in Medicaid payments. This letter requires providers to verify that they have educated their staff on the False Claims Act. Failure to return this letter, signed by the provider, may result in an administrative hold on the provider’s Texas Medicaid payments.

1.9.4 Managed Care Organization (MCO) Special Investigative Unit (SIU)

All MCOs that contract with HHSC to administer managed care benefits to Texas Medicaid clients are required to establish and maintain a special investigative unit (SIU) that works in cooperation with HHSC-OIG and the Attorney General’s Office.

Refer to: 1 TAC §533.012, §531.113, §531.1131, §353.501-353.505, and 370.501-370.505 for additional information.

The MCO and SIU will do the following:

- The MCO must maintain the SIU within the MCO or contract with another entity for any investigation.
- The established SIU will identify and investigate cases of suspected waste, abuse, and fraud in Texas Medicaid in accordance with Title 1, Chapter 353, Subchapter F of the TAC.
- The MCO and SIU (as applicable) must submit the following:
  - An annual plan that has been adopted by the MCO and approved by HHSC-OIG describing how it will prevent and reduce fraud and abuse in accordance with 1 TAC, §§353.501 and 353.502.
  - A monthly open case list to OIG Medicaid Program Integrity and the Office of Attorney General Medicaid Fraud Control Unit (OAG-MFCU).

The MCO will refer a case to both HHSC-OIG and OAG-MFCU in the following situations:

- When waste, abuse or fraud is discovered in the Medicaid or CHIP programs. (The MCO SIU must immediately notify the HHSC-OIG and OAG-MFCU and begin payment recovery efforts, unless HHSC-OIG or OAG-MFCU notifies the MCO to stop the recovery effort, as provided in Tx. Govt. Code §531.1131.)
- When possible waste, abuse, or fraud is discovered in the Medicaid or CHIP programs. (The MCO SIU must refer the alleged fraud or abuse to HHSC-OIG within 30 working days of completing a review. The SIU report and referral must completely and accurately detail its findings in accordance with 1 TAC §353.502.)
- When there is reason to believe that a delay in the referral may result in:
  - Harm or death to patients
  - Loss, destruction, or alteration of valuable evidence
  - Significant monetary loss that may not be recoverable
  - Hindrance of an investigation or criminal prosecution of the offense

1.10 Texas Medicaid Limitations and Exclusions

Medicaid pays for services on behalf of clients to the provider of service according to Texas Medicaid’s limitations and procedures. TMHP does not make Medicaid payments directly to clients.

The following services, supplies, procedures, and expenses are not benefits of Texas Medicaid. This list is not all inclusive.

- Autopsies
- Care and treatment related to any condition for which benefits are provided or available under Workers’ Compensation laws
• Cellular therapy
• Chemolase injection (chymodiactin, chymopapain)
• Dentures or endosteal implants for adults
• Ergonovine provocation test
• Excise tax
• Fabric wrapping of abdominal aneurysms
• Hair analysis
• Heart–lung monitoring during surgery
• Histamine therapy–intravenous
• Hyperthermia
• Hysteroscopy for infertility
• Immunizations or vaccines unless they are otherwise covered by Texas Medicaid (These limitations do not apply to services provided through the THSteps Program.)
• Immunotherapy for malignant diseases
• Infertility
• Inpatient hospital services to a client in an institution for tuberculosis, mental disease, or a nursing section of public institutions for persons with intellectual disabilities
• Inpatient hospital tests that are not specifically ordered by a physician/doctor who is responsible for the diagnosis or treatment of the client’s condition
• Intragastric balloon for obesity
• Joint sclerotherapy
• Keratoprosthesis/refractive keratoplasty
• Laetrile
• Mammoplasty for gynecomastia
• More than $200,000 per client per benefit year (November 1 through October 31) for any medical and remedial care services provided to a hospital inpatient by the hospital (If the $200,000 amount is exceeded because of an admission for an approved organ transplant, the allowed amount for that claim is excluded from the computation. This limitation does not apply to clients eligible for CCP or clients with an organ transplant.)
• More than 30 days of inpatient hospital stay per spell of illness (Each spell of illness must be separated by 60 consecutive days during which the client has not been an inpatient in a hospital.)

**Important:** CCP provides medically necessary, federally allowable treatment for Medicaid/THSteps clients who are 20 years of age and younger. Some medical services that usually would not be covered under Medicaid may be available to CCP-eligible clients. An additional 30-day spell of illness begins with the date of specified covered organ transplant. No spell-of-illness limitation exists for Medicaid THSteps clients who are 20 years of age and younger.

• Obsolete diagnostic tests
• Oral medications, except when claims are submitted by a hospital for services that are provided given in the emergency room or the inpatient setting (Hospital take-home drugs or medications given to the client are not a benefit.)

**Important:** Outpatient prescription medications are covered through the Medicaid Vendor Drug Program. See Appendix B: Vendor Drug Program for more information.

• Orthoptics (except CCP)
• Outpatient and nonemergency inpatient services provided by military hospitals
• Outpatient behavioral health services performed by a licensed chemical dependency counselor (LCDC), psychiatric nurse, mental health worker, non-LCSW social worker, or psychological associate (excluding a Masters-level licensed psychological associate [LPA]) regardless of physician or licensed psychologist supervision
• Oxygen (except CCP and home health)
• Parenting skills
• Payment for eyeglass materials or supplies regardless of cost if they do not meet Texas Medicaid specifications
• Payment to physicians for supplies (All supplies, including anesthetizing agents such as Xylocaine, inhalants, surgical trays, or dressings, are included in the surgical payment.)
• Podiatry, optometric, and hearing aid services in long term care facilities, unless ordered by the attending physician
• Private room facilities except when:
  • A critical or contagious illness exists that results in disturbance to other patients and is documented as such.
  • It is documented that no other rooms are available for an emergency admission
  • The hospital only has private rooms.
• Procedures and services considered experimental or investigational
• Prosthetic and orthotic devices (except CCP)
• Prosthetic eye or facial quarter
• Psychiatric services:
  • Outpatient behavioral health services for which no prior authorization has been given

**Refer to:** Section 4, “Licensed Clinical Social Worker (LCSW), Licensed Marriage and Family Therapist (LMFT), and Licensed Professional Counselor (LPC)” in Behavioral Health, Rehabilitation, and Case Management Services Handbook (Vol. 2, Provider Handbooks).

• Quest test (infertility)
• Recreational therapy
• Review of old X-ray films
• Routine cardiovascular and pulmonary function monitoring during the course of a surgical procedure under anesthesia
- Separate fees for completing or filing a Medicaid claim form (The cost of claims filing is to be incorporated in the provider’s usual and customary charges to all clients.)
- Services and supplies to any resident or inmate in a public institution
- Services or supplies for which benefits are available under any other contract, policy, or insurance, or which would have been available in the absence of Texas Medicaid
- Services or supplies for which claims were not received within the filing deadline
- Services or supplies that are not reasonable and necessary for diagnosis or treatment
- Services or supplies that are not specifically provided by Texas Medicaid
- Services or supplies provided in connection with cosmetic surgery except:
  - As required for the prompt repair of accidental injury
  - For improvement of the functioning of a malformed body member
  - When prior authorized for specific purposes by TMHP (including removal of keloid scars)
- Services or supplies provided outside of the U.S., except for deductible or coinsurance portions of Medicare benefits as provided for in this manual
- Services or supplies provided to a client after a finding has been made under utilization review procedures that these services or supplies are not medically necessary
- Services or supplies provided to a Texas Medicaid client before the effective date of his or her designation as a client, or after the effective date of his or her denial of eligibility
- Services that are payable by any health, accident, other insurance coverage, or any private or other governmental benefit system, or any legally liable third party
- Services that are provided by an interpreter (except sign language interpreting services requested by a physician)
- Services that are provided by ineligible, suspended, or excluded providers
- Services that are provided by the client’s immediate relative or household member
- Services that are provided by Veterans Administration facilities or U.S. Public Health Service Hospitals
- Sex change operations
- Silicone injections
- Social and educational counseling except for certain health and disability related and counseling services
- Sterilization reversal
- Sterilizations (including vasectomies) unless the client has given informed consent 30 days before surgery, is mentally competent, and is 21 years of age or older at the time of consent (This policy complies with 42 CFR §441.250, Subpart F.)
- Take-home and self-administered drugs except as provided under the Vendor Drug or family planning pharmacy services or for clients being treated for a substance use disorder
- Tattooing (commercial or decorative only)
- Telephone calls with clients or pharmacies (except as allowed for case management)
- Thermogram
- Treatment of flatfoot conditions for solely cosmetic purposes, the prescription of supportive devices (including special shoes), and the treatment of subluxations of the foot

Refer to the applicable handbooks in Volume 2 of this manual for additional information.

1.11 Forms
1.1 Authorization to Release Confidential Information (2 Pages)

AUTHORIZATION TO RELEASE CONFIDENTIAL INFORMATION

PATIENT’S NAME ____________________________________________

I authorize ___________________________________________________, and/or
(Name of HMO) (Name of BHO)

the following person/agency/group:

Provider/Agency/Group   Address   City   State   ZIP

To disclose information and records regarding my treatment, medical and/or behavioral health condition to the following professional person/agency, physician and/or facility:

Provider/Agency/Group   Address   City   State   ZIP

Information to be released or exchanged include (check all that apply):

_____ History and physical
_____ Discharge and Summary
_____ Behavioral Health Treatment Records
_____ Laboratory Reports
_____ Physical Health Treatment Records
_____ Medication Records
_____ Information on HIV or communicable disease treatment
_____ Other (specify) ____________________________________________

The authorized purpose(s) for this release are:

_____ Diagnosis and Treatment
_____ Coordination of Care
_____ Insurance Payment Purposes
_____ Other (specify) ____________________________________________
I understand that my health and behavioral health records are protected from disclosure under Federal and/or state law. I may revoke this authorization. This authorization is valid until I revoke it or 60 days after I have completed treatment, whichever is sooner. Once I revoke this authorization, no information can be released except as authorized or allowed by law. File copy is considered equivalent to the original.

This authorization was explained to me as I signed it of my own free will on:

The ___________ day of ________________, 20____.

____________________________________________________________
Signature of Client                                           Signature of Witness

____________________________________________________________
Signature of Parent, Guardian, or Authorized Representative, if required

NOTICE OF CLIENT’S REFUSAL TO RELEASE INFORMATION:

I have reviewed the above release of information form and refuse to authorize release of health and behavioral health information to mental health and/or alcohol and/or drug abuse treatment providers and/or physical health providers.

Executed this _______________ day of ________________________, 20____.

____________________________________________________________
Signature of Client                                           Signature of Witness

____________________________________________________________
Signature of Parent, Guardian, or Authorized Representative, if required

The person signing this authorization is entitled to a copy.

TO PERSON RECEIVING THE CONFIDENTIAL INFORMATION: PROHIBITION OF REDISCLOSURE

Federal and state law protects the confidentiality of the information disclosed to you related to the individual’s alcohol and drug abuse treatment. Federal regulations (42 CFR Part 2) prohibit you from making any further disclosure of this information unless further disclosure is expressly permitted by the written consent of the person to whom it pertains, or as otherwise permitted by such regulations. Disclosure is limited to the purpose and persons included on the authorization form. The Federal rules restrict any use of the information to criminally investigate or prosecute any alcohol or drug abuse patient. State laws may also protect the confidentiality of the client’s records.

TO THE INDIVIDUAL FILLING THIS OUT:

You have the right to ask us about this form. You also have the right to review the information you give us on the form. (There are a few exceptions). If the information is wrong, you can ask us to correct it. The Health and Human Services Commission has a method of asking for corrections. You can find it in Title 1 of the Texas Administrative Code, section 351.17 through 351.23. To talk to someone about this form or ask for corrections, please contact NorthSTAR. You can write to NorthSTAR at 1199 S. Beltline Rd., Coppell, Texas 75019. You can also call the NorthSTAR Helpline at 1-972-906-2500.

Firma del padre, tutor o representante autorizado, si es necesario

La persona que firma esta autorización tiene derecho a una copia.

PARA LA PERSONA QUE RECIBE LA INFORMACIÓN CONFIDencial: PROHIBICIÓN SOBRE LA DIVULGACIÓN
Las leyes federales y estatales protegen la confidencialidad de la información que usted recibió sobre el tratamiento del abuso de alcohol y drogas de la persona. Las normas federales (42 CFR Parte 2) le prohíben a usted dar esta información a otra persona a menos que se haya permitido expresamente en un consentimiento escrito de la persona de quien se trata, o de otra manera permitida por dichas normas. La divulgación se limita al propósito y a la persona anotados en el formulario de autorización. Las reglas federales limitan el uso de la información a investigar o enjuiciar penalmente a algún paciente que tiene problemas de abuso de alcohol o drogas. Es posible que las leyes estatales también protejan la confidencialidad de los expedientes del paciente.

PARA LA PERSONA QUE LLENA ESTE FORMULARIO:
Tiene el derecho de hacernos preguntas sobre este formulario. También tiene el derecho de revisar la información que nos da en el formulario. (Hay algunas excepciones). Si la información está incorrecta, puede pedir que la corrijamos. La Comisión de Salud y Servicios Humanos tiene un método para pedir correcciones. Puede encontrarlo en el Título 1 del Código Administrativo de Texas, Secciones 351.17 a 351.23. Para hablar con alguien acerca de esta forma, o para pedir correcciones, haga el favor de comunicarse con NorthSTAR. Puede comunicarse con NorthSTAR escribiendo a 1199 S. Beltline Rd., Coppell, Texas 75019 ó llamando a la Línea de Ayuda de NorthSTAR al 1-972-906-2500.
HHSC Child Abuse Screening, Documenting, and Reporting Policy for Medicaid Providers

Each contractor/provider shall comply with the provisions of state law as set forth in Chapter 261 of the Texas Family Code relating to investigations of report of child abuse and neglect and the provisions of this HHSC policy. HHSC shall distribute funds only to a contractor/provider who has demonstrated a good faith effort to comply with child abuse reporting guidelines and requirements in Chapter 261 and this HHSC policy. Contractor/provider staff shall respond to disclosures or suspicions of abuse/neglect of minors [by reporting] to appropriate agencies as required by law.

PROCEDURES

I Each contractor/provider shall adopt this policy as its own.

II Each contractor/provider shall report suspected sexual abuse of a child as described in this policy and as required by law.

III. Each contractor/provider shall develop an internal policy and procedures that describe how it will determine, document, and report instances of abuse, sexual or nonsexual, in accordance with the Texas Family Code, Chapter 261.

REPORTING GENERALLY

I Professionals as defined in the law are required to report not later than the 48th hour after the professional first has cause to believe the child has been or may be abused or is the victim of the offense of indecency with a child.

II Nonprofessionals shall immediately make a report after the nonprofessional has cause to believe that the child’s physical or mental health or welfare has been adversely affected by abuse.

III A report shall be made regardless of whether the contractor/provider staff suspect that a report may have previously been made.

IV Reports of abuse or indecency with a child shall be made to:

A Texas Department of Family and Protective Services (DFPS) if the alleged or suspected abuse involves a person responsible for the care, custody, or welfare of the child (DFPS Texas Abuse Hotline at 1-800-252-5400, operated 24 hours a day, seven days a week);

B Any local or state law enforcement agency;

C The state agency that operates, licenses, certifies, or registers the facility in which the alleged abuse or neglect occurred; or

D The agency designated by the court to be responsible for the protection of children.

V The law requires that the following be reported:

A Name and address of the minor, if known;

B Name and address of the minor’s parent or the person responsible for the care, custody, or welfare of the child if not the parent, if known; and

C Any other pertinent information concerning the alleged or suspected abuse, if known.

VI Reports can be made anonymously.

VII A contractor/provider may not reveal whether or not the child has been tested or diagnosed with HIV or AIDS.

VIII If the identity of the minor is unknown (e.g., the minor is at the provider’s office to anonymously receive testing for HIV or an STD), no report is required.
REPORTING SUSPECTED SEXUAL ABUSE

I Each contractor/provider shall ensure that its employees, volunteers, or other staff report a victim of abuse who is an unmarried minor under 14 years of age and is pregnant or has a confirmed sexually transmitted disease acquired in a manner other than through perinatal transmission.

II The Texas Family Code, Chapter 261, requires other reporting of other instances of sexual abuse. Other types of reportable abuse may include, but are not limited to, the actions described in:
   A Penal Code, §21.11(a) relating to indecency with a child;
   B Penal Code, §21.01(2) defining “sexual contact”;
   C Penal Code, §43.01(1) or (3)(5) defining various sexual activities; or
   D Penal Code, §22.011(a)(2) relating to sexual assault of a child;
   E Penal Code, §22.021(a)(2) relating to aggravated sexual assault of a child.

III Each contractor/provider may utilize the attached Checklist for HHSC Monitoring for all clients under 14 years of age. The checklist, if used, shall be retained by each contractor/provider and made available during any monitoring conducted by HHSC.

TRAINING

I Each contractor/provider shall develop training for all staff on the policies and procedures in regard to reporting child abuse. New staff shall receive this training as part of their initial training/orientation. Training shall be documented.

II As part of the training, staff shall be informed that the staff person who conducts the screening and has cause to suspect abuse has occurred is legally responsible for reporting. A joint report may be made with the supervisor.
Child Abuse Reporting Guidelines, Checklist for HHSC Monitoring

Date: ______________________________________

Client’s name: ___________________________________________________________

Client’s age (use this checklist only if the client is under 14): _________________________________________

Staff person conducting screening: ______________________________________________

Each contractor/provider shall ensure that its employees, volunteers, or other staff report a victim of child abuse who is a minor under 14 years of age who has engaged in sexual activity with any individual to whom the minor is not married. Sexual activity would be indicated if the minor is pregnant or has confirmed diagnosis of a sexually transmitted disease acquired in a manner other than through perinatal transmission.

Using the criteria above, did you determine that a report of child abuse is required? ______ Yes ______ No

If "yes," please report and complete the information below.

Report was made: _____ Yes _____ No

Staff person who submitted the report (optional): ________________________________

Date reported: __________________________________________________________________

Name of agency to which report was made: _______________________________________

DFPS call ID# or law enforcement assigned # (optional): ____________________________

Name of person who received report (optional): _________________________________

Phone number of contact (when applicable): _________________________________

Use of the checklist for HHSC monitoring of reporting of abuse of children younger than 14 years of age who are pregnant or have STDs does not relieve contractors or subcontractors of the requirements in Chapter 261, Texas Family Code, to report any other instance of suspected child abuse.
Electronic Funds Transfer (EFT) Notification

Electronic Funds Transfer (EFT) is a payment method used to deposit funds directly into a provider’s bank account. These funds can be credited to either checking or savings accounts, if the provider’s bank accepts Automated Clearinghouse (ACH) transactions. EFT also avoids the risks associated with mailing and handling paper checks by ensuring funds are directly deposited into a specified account.

The following items are specific to EFT:

- Pre-notification to your bank occurs on the weekly cycle following the completion of enrollment in EFT.
- Future deposits are received electronically after pre-notification.
- The Remittance and Status (R&S) Report furnishes the details of individual credits made to the provider’s account during the weekly cycle.
- Specific deposits and associated R&S Reports are cross-referenced by both the provider identifiers (i.e., NPI, TPI, API) and R&S number.
- EFT funds are released by TMHP to depository financial institutions each Thursday.
- The availability of R&S Reports is unaffected by EFT, and they continue to arrive in the same manner and time frame as currently received.

TMHP must provide the following notification according to ACH guidelines:

Most receiving depository financial institutions receive credit entries on the day before the effective date, and these funds are routinely made available to their depositors as of the opening of business on the effective date. Contact your financial institution regarding posting time if funds are not available on the release date.

However, due to geographic factors, some receiving depository financial institutions do not receive their credit entries until the morning of the effective day, and the internal records of these financial institutions will not be updated. As a result, tellers, bookkeepers, or automated teller machines (ATMs) may not be aware of the deposit, and the customer’s withdrawal request may be refused. When this occurs, the customer or company should discuss the situation with the ACH coordinator of their institution, who in turn should work out the best way to serve their customer’s needs.

In all cases, credits received should be posted to the customer’s account on the effective date and thus be made available to cover checks or debits that are presented for payment on the effective date.

To enroll in the EFT program, complete the attached Electronic Funds Transfer Notification. You must return a voided check or signed letter from your bank on bank letterhead with the notification to the TMHP address indicated on the form.

Call the TMHP Contact Center at 1–800–925–9126 if you need assistance.
**Electronic Funds Transfer (EFT) Notification**

**NOTE:** Complete all sections below and *attach a voided check or a signed letter from your bank on bank letterhead.*

1.7 Provider Information Change (PIC) Form Instructions

Instructions for Completing the Provider Information Change Form

Signatures
- The provider’s signature is required on the Provider Information Change Form for any and all changes requested for individual provider numbers.
- A signature by the authorized representative of a group or facility is acceptable for requested changes to group or facility provider numbers.

Address
- Performing providers (physicians performing services within a group) may not change accounting information.
- For Texas Medicaid fee-for-service and the CSHCN Services Program, changes to the accounting or mailing address require a copy of the W-9 form.
- For Texas Medicaid fee-for-service, a change in ZIP Code requires copy of the Medicare letter for Ambulatory Surgical Centers.

Federal Tax Identification Number (TIN)
- Federal TIN changes for individual practitioner provider numbers can only be made by the individual to whom the number is assigned.
- Performing providers cannot change the Federal TIN.

Provider Demographic Information

An online provider lookup (OPL) is available, which allows users such as clients and providers to view information about Texas State Health-Care Programs providers. To maintain the accuracy of your demographic information, please visit the OPL at www.tmhp.com. Please review the existing information and add or modify any specific practice limitations accordingly. This will allow clients more detailed information about your practice.

General
- TMHP must have either the nine-digit Texas Provider Identifier (TPI), or the National Provider Identifier (NPI)/Atypical Provider Identifier (API), primary taxonomy code, physical address, and benefit code (if applicable) in order to process the change. Forms will be returned if this information is not indicated on the Provider Information Change Form.
- The W-9 form is required for all name and TIN changes.
- Mail or fax the completed form to:
  Texas Medicaid & Healthcare Partnership (TMHP)
  Provider Enrollment
  PO Box 200795
  Austin, TX 78720-0795
  Fax: 512-514-4214

2.8 Federal Medical Assistance Percentage (FMAP) ............................. 2-11
2.1 Payment Information

Texas Medicaid reimbursements are available to all enrolled providers by check or electronic funds transfer (EFT).

Refer to: Subsection 1.2, “Payment Information” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).

2.2 Fee-for-Service Reimbursement Methodology

Texas Medicaid reimburses providers using several different reimbursement methodologies, including fee schedules, reasonable cost with interim rates, hospital reimbursement methodology, provider-specific encounter rates, reasonable charge payment methodology, and manual pricing. Each Texas Medicaid service describes the appropriate reimbursement for each service area.

Note: If a client is covered by a Medicaid managed care organizations (MCO) or dental plan, providers must contact the client’s MCO or dental plan for reimbursement information. The MCOs and dental plans are not required to follow the Texas Medicaid fee schedules, so there may be some differences in reimbursement based on decisions made by the individual health and dental plans.

2.2.1 * Online Fee Lookup (OFL) and Static Fee Schedules

Texas Medicaid reimburses certain providers based on rates published in the OFL and static fee schedules. These rates are uniform statewide and by provider type. According to this type of reimbursement methodology, the provider is paid the lower of the billed charges or the Medicaid rate published in the applicable static fee schedule or OFL.

Providers can obtain fee information using the OFL functionality on the TMHP website at www.tmhp.com.

The online OFL can be used to:

- Retrieve real-time fee information.
- Search for procedure code reimbursement rates individually, in a list, or in a range.
- Search and review contracted rates for a specific provider (provider must login).
- Retrieve up to 24 months of history for a procedure code by searching for specific dates of service within that 2-year period.
- Search for benefit limitations for dental and durable medical equipment (DME) procedure codes.

Providers can obtain the static fee schedules as Microsoft Excel® spreadsheets or portable document format (PDF) files from the TMHP website at www.tmhp.com.

Type of service (TOS) codes payable for each procedure code are available on the OFL and the static fee schedules.

The following provider types are reimbursed based on rates published with the rates calculated in accordance with the referenced reimbursement methodology as published in the Texas Administrative Code (TAC), Part 1 Administration, Part 15 Texas Health and Human Services Commission (HHSC), and Chapter 355 Reimbursement Rates.

- Ambulance. The Medicaid rates for ambulance services are calculated in accordance with 1 TAC §355.8600.
- Ambulatory Surgical Center (ASC). The Medicaid rates for ASCs are calculated in accordance with 1 TAC §355.8121.
- Blind Children’s Vocational Discovery and Development Program. The Medicaid rate for this service is calculated in accordance with 1 TAC §355.8381.
• **Case Management for Children and Pregnant Women.** The Medicaid rates for this service are calculated in accordance with 1 TAC §355.8401.

• **Targeted Case Management for Early Childhood Intervention (ECI).** The Medicaid rate for this service is reimbursed in accordance with 1 TAC §§355.8421.

• **Specialized Skills Training for ECI.** The Medicaid rate for this service is reimbursed in accordance with 1 TAC §355.8422.

• **Certified Nurse-Midwife (CNM).** The Medicaid rates for CNMs are calculated in accordance with 1 TAC §355.8161.

• **Certified Registered Nurse Anesthetist (CRNA).** According to 1 TAC §355.8221, the Medicaid rate for CRNAs is 92 percent of the rate reimbursed to a physician anesthesiologist for the same service.

• **Certified Respiratory Care Practitioner (CRCP) Services.** The Medicaid rate per daily visit for 99503 is calculated in accordance with 1 TAC §355.8089.

• **Chemical Dependency Treatment Facility (CDTF).** The Medicaid rates for CDTF services are calculated in accordance with 1 TAC §355.8241.

• **Chiropractic Services.** The Medicaid rates for chiropractic services are calculated in accordance with 1 TAC §355.8081 and 1 TAC §355.8085.

• **Dental.** The Medicaid rates for dentists are calculated as access-based fees in accordance with 1 TAC §355.8081, 1 TAC §355.8085, 1 TAC §355.8441(11), and 1 TAC §355.455(b).

• **Durable Medical Equipment (DME).** Home health agencies are reimbursed for DME and expendable supplies in accordance with 1 TAC §355.8021 (b). Comprehensive Care Program (CCP) is reimbursed for DME and expendable supplies in accordance with 1 TAC §355.8441 (2)(3).

• **Family Planning Services.** The Medicaid rates for family planning services are calculated in accordance with 1 TAC §355.8581.

• **Genetic Services.** The procedure codes and Medicaid rates for genetic services are listed in the OFL or the Physician - Genetics fee schedule on the TMHP website at www.tmhp.com.

• **Hearing Aid and Audiometric Evaluations.** Newborn hearing screenings are provided at the birthing facility before hospital discharge and, as such, are reimbursed in accordance with the reimbursement methodology for the specific type of birthing facility. Outpatient hearing screening and diagnostic testing services for children are provided by physicians and are reimbursed in accordance with the reimbursement methodology for physician services at 1 TAC §355.8085, 1 TAC §355.8141, and 1 TAC §355.8441.

• **Texas Medicaid (Title XIX) Home Health Services.** The reimbursement methodology for professional services delivered by home health agencies are statewide visit rates calculated in accordance with 1 TAC §355.8021(a).

• **Independent Laboratory.** The Medicaid rates for independent laboratories are calculated in accordance with 1 TAC §355.8081 and §355.8610, and the Deficit Reduction Act (DEFRA) of 1984. By federal law, Medicaid payments for a clinical laboratory service cannot exceed the Medicare payment for that service. Early Periodic Screening, Diagnosis, and Treatment (EPSDT)/Texas Health Steps medical and newborn screening laboratory services provided by the Department of State Health Services (DSHS) Laboratory are reimbursed based on the Medicare payment for that service.

• **Indian Health Services.** The reimbursement methodology for services provided in Indian Health Services Facilities operating under the authority of Public Law 93-638 is located at 1 TAC §355.8620.

• **In-Home Total Parenteral Nutrition (TPN) Supplier.** The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8087.
• **Licensed Clinical Social Worker (LCSW).** According to 1 TAC §355.8091, the Medicaid rate for LCSWs is 70 percent of the rate paid to a psychiatrist or psychologist for a similar service per 1 TAC §355.8085.

• **Licensed Marriage and Family Therapist (LMFT).** According to 1 TAC §355.8091, the Medicaid rate for LMFTs is 70 percent of the rate paid to a psychiatrist or psychologist for a similar service per 1 TAC §355.8085.

• **Licensed Midwife (LM).** According to 1 TAC §355.8161, covered professional services provided by an LM and billed under the LM’s own provider number are reimbursed the lesser of the LM’s billed charges or 70 percent of the reimbursement for the same professional service paid to a physician (M.D. or D.O.).

• **Licensed Professional Counselor (LPC).** According to 1 TAC §355.8091, the Medicaid rate for LPCs is 70 percent of the rate paid to a psychiatrist or psychologist for a similar service per 1 TAC §355.8085.

• **Maternity Service Clinic (MSC).** The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8081.

• **Nurse Practitioner (NP) and Clinical Nurse Specialist (CNS).** According to Title 1 TAC §355.8281, the Medicaid rate for NPs and CNSs is 92 percent of the rate paid to a physician (doctor of medicine [MD] or doctor of osteopathy [DO]) for the same service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections.

• **Physical Therapists/Independent Practitioners.** The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8081 and §355.8085.

• **Physician.** The Medicaid rates for physicians and other practitioners are calculated in accordance with 1 TAC §355.8085.

• **Physician Assistant (PA).** According to 1 TAC §355.8093, the Medicaid rate for PAs is 92 percent of the rate paid to a physician (MD or DO) for the same service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections.

• **Psychologist.** The Medicaid rates for psychologists are calculated in accordance with 1 TAC §355.8081 and §355.8085.

• **Radiological and Physiological Laboratory and Portable X-Ray Supplier.** The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8081 and §355.8085.

• **Renal Dialysis Facility.** The Medicaid rates for these providers are composite rates based on calculations specified by the Centers for Medicare & Medicaid Services (CMS).

• **School Health and Related Services (SHARS).** The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8443.

• **THSteps reimburses by provider type in accordance with 1 TAC §355.8441.** Approved providers enrolled in Texas Medicaid are reimbursed for THSteps services in the same manner as they are reimbursed for other Medicaid services. THSteps CCP reimburses for DME and expendable supplies in accordance with 1 TAC §355.8441(2)(3).

• **Tuberculosis (TB) Clinics.** The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8081.

• **Vision Care (Optometrists, Opticians).** The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8001, §355.8081, and §355.8085.
### 2.2.1.1 Non-emergent and Non-urgent Evaluation and Management (E/M) Emergency Department Visits

Section 104 of the Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982 requires that Medicare and Medicaid limit reimbursement for those physician services furnished in outpatient hospital settings (e.g., clinics and emergency situations) that are ordinarily furnished in physician offices. The limit is 60 percent of the Medicaid rate for the non-emergency service furnished in physician offices.

Reimbursement for non-emergent and non-urgent services that are rendered by the facility during the emergency room visit will be reduced by 40 percent. Reimbursement will not be reduced for those services that were rendered to address conditions that meet any of the following criteria:

- Problems of high-severity
- Problems that require urgent evaluation by a physician
- Problems that pose immediate and significant threats to physical or mental function
- Critically ill or critically injured

Services that are rendered in the emergency department that do not meet the above criteria will be reduced by 40 percent.

Diagnostic services, such as laboratory and radiology, will not be reduced by 40 percent.

These procedures are designated with note code “1” in the current fee schedule or OFL on the TMHP website at www.tmhp.com.

The following services are excluded from the 60-percent limitation:

- Services furnished in rural health clinics (RHCs)
- Surgical services that are covered ASC/hospital-based ambulatory surgical center (HASC) services
- Anesthesiology and radiology services
- Emergency services provided in a hospital emergency room after the sudden onset of a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain), such that the absence of immediate medical attention could reasonably be expected to result in one of the following:
  - Serious jeopardy to the client’s health
  - Serious impairment to bodily functions
  - Serious dysfunction of any bodily organ or part

### 2.2.1.2 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission

According to the three-day and one-day payment window reimbursement guidelines, most professional and outpatient diagnostic and nondiagnostic services that are rendered within the designated timeframe of an inpatient hospital stay and are related to the inpatient hospital admission will not be reimbursed separately from the inpatient hospital stay if the services are rendered by the hospital or an entity that is wholly owned or operated by the hospital.
Refer to: Subsection 3.6.3.8, “Payment Window Reimbursement Guidelines” of the Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks) for additional information about the payment window reimbursement guidelines.

2.2.1.3 *Drugs and Biologicals*

Physician-administered drugs and biologicals are reimbursed under Texas Medicaid as access-based fees under the physician fee schedule in accordance with 1 TAC §355.8085. Physicians and other practitioners are reimbursed for physician-administered drugs and biologicals at the lesser of their usual and customary or billed charges and the Medicaid fee established by the HHSC. The Medicaid fee is an estimate of the provider’s acquisition cost for the specific drug and biological. An invoice must be submitted when it is in the provider’s possession. Submission of an invoice will document that the provider is billing the lesser of the usual and customary charge or the access-based fee.

The following guidelines should be used with respect to fee decisions for physician-administered drugs and biologicals:

- Fees for **vaccines** and infusion drugs furnished through an item of implanted DME are based on the lesser of the billed amount or 89.5 percent of the average wholesale price (AWP).
- Fees for drugs and biologicals, other than vaccines and infusion drugs that are furnished through an item of implanted DME, that are covered by Medicare are based on the lesser of the billed amount or 106 percent of average sales price (ASP).
- Fees for those drugs and biologicals not listed in the first two bullets above that are covered by Medicare are based on the lesser of the billed amount or one of the following:
  - 89.5 percent of AWP if the drug and biological is considered a new drug and biological (i.e., approved for marketing by the Food and Drug Administration within 12 months of implementation as a benefit of Texas Medicaid)
  - 85.0 percent of AWP if the drug and biological does not meet the definition of a new drug (above)

HHSC reserves the option to use other data sources to determine Medicaid fees for drugs and biologicals when AWP or ASP calculations are determined to be unreasonable or insufficient.

Prescriptions are covered under the Texas Medicaid Vendor Drug Program (VDP). The reimbursement methodology for pharmacy services is located at 1 TAC §§355.8541–355.8551.

2.2.2 Cost Reimbursement

Medicaid providers who are cost reimbursed are subject to cost reporting, cost reconciliation, and cost settlement processes, including time study requirements.

The following providers are cost reimbursed in accordance with the noted TAC rules:

- 1 TAC §355.743—Mental health (MH) case management
- 1 TAC §355.746—Mental retardation (MR) service coordination
- 1 TAC §355.781—MH rehabilitative services
- 1 TAC §355.8443—School Health and Related Services (SHARS)
- 1 TAC §355.8061—Payment for Hospital Services
- 1 TAC §355.8055—Reimbursement Methodology for Rural and Certain Other Hospitals
- 1 TAC §355.8054—Children’s Hospital Reimbursement Methodology
- 1 TAC §355.8056—State-Owned Teaching Hospital Reimbursement Methodology
2.2.3 Reasonable Cost and Interim Rates
Outpatient hospital services are reimbursed in accordance with 1 TAC §355.8061. The reimbursement methodology is based on reasonable costs, and providers are reimbursed at an interim rate based on the provider’s most recent Medicaid cost report settlement. To determine the provider’s payable amount, the interim rate is applied to the claim details allowed amount.

2.2.4 Hospitals
Inpatient hospital services are reimbursed as follows:

- 1 TAC §355.8052—Inpatient Hospital Reimbursement
- 1 TAC §355.8054—Children’s Hospital Reimbursement Methodology
- 1 TAC §355.8055—Reimbursement Methodology for Rural and Certain Other Hospitals
- 1 TAC §355.8056—State-Owned Teaching Hospital Reimbursement Methodology
- 1 TAC §355.8058—Inpatient Direct Graduate Medical Education (GME) Reimbursement
- 1 TAC §355.8060—Reimbursement Methodology for Freestanding Psychiatric Facilities
- 1 TAC §355.8061—Payment for Hospital Services
- 1 TAC §355.8064—Reimbursement Adjustment for Hospitals Providing Inpatient Services to SSI and SSI-Related Clients
- 1 TAC §355.8065—Disproportionate Share Hospital (DSH) Reimbursement Methodology
- 1 TAC §355.8066—Supplemental Payments to Certain Urban Hospitals
- 1 TAC §355.8069—Supplemental Payments to Certain Rural Public Hospitals
- 1 TAC §355.8070—Supplemental Payments to Private Hospitals
- 1 TAC §355.8071—Supplemental Payments to Children’s Hospitals
- 1 TAC §355.8072—Supplemental Payments to State-Owned Hospitals

2.2.5 Provider-Specific Visit Rates
Medicaid provider-specific prospective payment system (PPS) visit rates for RHCs are calculated in accordance with 1 TAC §355.8101, and those for federally qualified health centers (FQHCs) are calculated in accordance with 1 TAC §355.8261.

Refer to:  Section 4, “Federally Qualified Health Center (FQHC)” and Section 7, “Rural Health Clinic” in the Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks).

2.2.6 Manual Pricing
When services or products do not have an established reimbursement amount, the detail or claim is manually reviewed to determine an appropriate reimbursement. The manual pricing methodology for DME and expendable supplies is included with the reimbursement methodology for these products.

2.3 Reimbursement Reductions
Texas Medicaid implemented mandated rate reductions for certain services. The Online Fee Lookup (OFL) and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.
2.4 Using Payouts to Satisfy Accounts Receivables Across Programs and Alternate Provider Identifiers

The TMHP accounts receivable process identifies funds that a provider owes to TMHP and subtracts these funds from payments to the provider. TMHP satisfies outstanding accounts receivables using all available funds from the providers’ Medicaid payouts, as well as managed care payouts, until the accounts receivables have been recovered. Outstanding balances are recovered as follows:

- For outstanding fee-for-service accounts receivables, TMHP first recovers funds from any available fee-for-service payments. If there is still an accounts receivable balance for that week’s financial cycle, TMHP recovers funds from any available managed care payments.
- For outstanding managed care accounts receivables, TMHP first recovers funds from any available managed care payments. If there is still an accounts receivable balance for that week’s financial cycle, TMHP will recover funds from any available fee-for-service payments.

1099 Reports

Providers receive one 1099 report for each provider identifier. The 1099 report has combined information for both fee-for-service and managed care programs.

Paper Remittance and Status (R&S) Report

The summary page of the R&S report has combined information from the fee-for-service and managed care programs.

The Financial Transactions Sub-Owner Recoupment page has accounts receivable for both programs. A column on the page identifies the program (Medicaid [fee-for-service] or Managed Care) from which the funds were recouped.

The Financial Transactions Accounts Receivable page has the accounts receivable for both programs. A column identifies the program (Medicaid [fee-for-service] or Managed Care) from which the funds were recouped.

The Original Date in the Accounts Receivable section of the R&S Report reflects the date on which the accounts receivable first appeared on the R&S Report.

ER&S Report

The Pending and Non-Pending ER&S Reports have combined information for both programs.

2.4.1 HHSC Recoupment of Accounts Receivables from Alternate Provider Identifiers

HHSC recoups the outstanding accounts receivable balances of all existing Medicaid and managed care Texas Provider Identifiers (TPIs) from alternate TPIs that use the same Tax ID or National Provider Identifier (NPI).

If a Medicaid or managed care provider has a TPI that is no longer active or has been terminated and that TPI has an outstanding accounts receivable balance, the balance is recouped from future payments made to any and all TPIs that have the same Tax ID or NPI. Recoupments are reflected on future R&S Reports.

Note: This process affects only managed care claims that are submitted to TMHP.

Refer to: Subsection 2.2.5, “Accounts Receivable” and subsection 2.6.4, “Providers With Unsatisfied Medicaid Accounts Receivables” in the Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks) for additional information about managed care claims and outstanding accounts receivables.
2.4.2 Medicaid Funds May Be Used to Satisfy Children with Special Health Care Needs (CSHCN) Services Program Accounts Receivables

A service that is rendered to a CSHCN Services Program client who receives retroactive Medicaid eligibility may be reimbursed by the CSHCN Services Program or by Medicaid, but not by both.

The CSHCN Services Program is the payer of last resort. The CSHCN Services Program does not supplement a client’s Medicaid benefits. However, services that are not a benefit of Medicaid may be covered by the CSHCN Services Program. If dual Medicaid and CSHCN Services Program eligibility is determined, claims that have already been paid by the CSHCN Services Program will be reprocessed under the appropriate program.

An accounts receivable is created for each CSHCN Services Program claim that is reprocessed and subsequently reimbursed under Medicaid so that the amount the CSHCN Services Program originally reimbursed can be returned to the CSHCN Services Program.

If the CSHCN Services Program payout during the week’s financial cycle in which the claim was reprocessed is not sufficient to satisfy the accounts receivable, the provider’s Medicaid claim payouts are used to satisfy the CSHCN Services Program accounts receivable.

**Note:** The deduction from Medicaid claim payouts does not exceed the amount Medicaid reimbursed the provider when the CSHCN Services Program claim was reprocessed.

2.5 Additional Payments to High-Volume Providers

High volume provider payments are made to outpatient hospitals per 1 TAC §355.8061 and ASCs/HASCs per 1 TAC §355.8121.

Outpatient hospital services are those services provided by outpatient hospitals and ASCs/HASCs. The definition of a high-volume outpatient hospital provider is one that was paid a minimum of $200,000 during the qualifying period. This criterion captured about 95 percent of total outpatient hospital spending. Similar criteria were developed for ASCs/HASCs, such that providers accounting for 95 percent of total payments were designated as high-volume providers. Payments to high-volume outpatient hospitals were increased by 5.2 percent. The new payment amount was implemented by increasing the discount factor for designated high-volume providers of outpatient hospital services from 72.27 percent to 76.03 percent. ASCs/HASCs that qualify as high-volume providers also receive a 5.2 percent increase in payment rates.

2.6 Out-of-State Medicaid Providers

Texas Medicaid covers medical assistance services provided to eligible Texas Medicaid clients while in a state other than Texas, as long as the client does not leave Texas to receive out-of-state medical care that can be received in Texas. Services provided outside the state are covered to the same extent medical assistance is furnished and covered in Texas when the service meets one or more requirements of 1 TAC §355.8083. TMHP must receive claims from out-of-state providers within 365 days from the date of service.

**Note:** Border state providers (providers rendering services within 50 miles of the Texas border) are considered in-state providers for Texas Medicaid.

**Refer to:** Subsection 1.8, “Enrollment Criteria for Out-of-State Providers” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).
2.7 Medicare Crossover Claim Reimbursement

2.7.1 Part A
Providers must accept Medicare assignment to receive Medicaid payment for any portion of the coinsurance and deductible amounts for services rendered to Qualified Medicare Beneficiary (QMB) and Medicaid Qualified Medicare Beneficiary (MQMB) clients. If a provider has accepted a Medicare assignment, the provider may receive, on behalf of the QMB or MQMB client, payment for deductible or coinsurance according to current payment guidelines.

Any payments made by Medicare and Medicaid must be considered payment in full. Providers that accept Medicare or Medicaid assignment cannot legally require the client to pay the Medicare coinsurance or deductible amounts or any remaining amount after Medicaid payment has been made.

The payment of the Medicare Part A coinsurance and deductibles for Medicaid clients who are Medicare beneficiaries is based on the following:

- If the Medicare payment amount equals or exceeds the Medicaid payment rate, Medicaid does not pay the Medicare Part A coinsurance/deductible on a Medicare crossover claim.
- If the Medicare payment amount is less than the Medicaid payment rate, Medicaid pays the Medicare Part A coinsurance/deductible, but the amount of the payment is limited to the lesser of the coinsurance/deductible or the amount remaining after the Medicare payment amount is subtracted from the Medicaid payment rate.

2.7.2 Part B
Texas Medicaid reimburses coinsurance liability for MQMB clients on valid, assigned Medicare claims that are within the amount, duration, and scope of the Medicaid program and, if Medicare did not exist, would be covered by Medicaid.

For Medicare crossover claims, Texas Medicaid reimburses the lesser of the following:

- The coinsurance and deductible payment
- The amount remaining after the Medicare payment amount is subtracted from the allowed Medicaid fee or encounter rate for the service (If this amount is less than the deductible, then the full deductible is reimbursed instead.)

If the Medicare payment is equal to or exceeds the Medicaid allowed amount or encounter payment for the service, Texas Medicaid does not make a payment for coinsurance.

Important: Medicaid payment of a client’s coinsurance/deductible liabilities satisfies the Medicaid obligation to provide coverage for services that Medicaid would have paid in the absence of Medicare coverage. The client has no liability for any balance or Medicare coinsurance and deductible related to Medicaid-covered services.

2.7.3 Part C: Medicare Advantage Plans (MAPs)

2.7.3.1 Contracted MAPs
HHSC makes a per-client-per-month payment to MAPs that contract with HHSC. The payment to the MAP includes all costs associated with the Medicare coinsurance and deductible for a client who is dually eligible for Medicare and Medicaid. TMHP does not reimburse the coinsurance or deductible amounts for these claims. These costs must be billed to the MAP and must not be billed to TMHP or the Medicaid client.

Refer to: A list of MAPs that are contracted with HHSC is available on the TMHP website at www.tmhp.com/Pages/EDI/EDI_MAP.aspx. The list is updated as additional plans receive approved contracts.
2.7.3.2 Noncontracted MAPs
Texas Medicaid reimburses professional and outpatient facility crossover claims the lesser of the following:

- The coinsurance and deductible amounts
- The amount remaining after the Medicare payment amount is subtracted from the allowed Medicaid fee or encounter rate for the service

**Exception:** Texas Medicaid will reimburse coinsurance liability for MQMB clients on valid, assigned Medicare claims that are within the amount, duration, and scope of the Medicaid program, and would be covered by Medicaid when the services are provided, if Medicare did not exist.

If the Medicare payment is equal to or exceeds the allowed Medicaid fee or encounter rate for the service, Texas Medicaid will not make a payment for coinsurance and deductible.

**Important:** Medicaid payment of a client’s coinsurance/deductible liabilities satisfies the Medicaid obligation to provide coverage for services that Medicaid would have paid in the absence of Medicare coverage. The client has no liability for any balance or Medicare coinsurance and deductible related to Medicaid-covered services.

2.7.4 Exceptions

2.7.4.1 Full Amount of Part B and Part C Coinsurance and Deductible Reimbursed
Texas Medicaid reimburses the full amount of the Medicare Part B and Part C (noncontracted MAPs only) coinsurance and deductible for the following services:

- Emergency ambulance transports
- Ambulance hospital-to-hospital transports
- Services rendered by psychiatrists, psychologists, and licensed clinical social workers
- Procedure codes R0070 and R0075 for services rendered by physicians

2.7.4.2 Nephrology (Hemodialysis, Renal Dialysis) and Renal Dialysis Facility Providers
Texas Medicaid pays the Medicare coinsurance less 5 percent and full Medicare deductible for Medicare crossover claims that are submitted by nephrology (hemodialysis, renal dialysis) and renal dialysis facility providers.

2.8 Federal Medical Assistance Percentage (FMAP)
The Federal Medical Assistance Percentages (FMAPs) are used in determining the amount of Federal matching funds for State expenditures for assistance payments for certain social services and State medical and medical insurance expenditures. The Social Security Act requires the Secretary of Health and Human Services to calculate and publish the FMAPs each year.

The “Federal Medical Assistance Percentages” are for Medicaid. Section 1905(b) of the Act specifies the formula for calculating Federal Medical Assistance Percentages.

“Enhanced Federal Medical Assistance Percentages” are for the State Children’s Health Insurance Program (SCHIP) under Title XXI of the Social Security Act. Section 2105(b) of the Act specifies the formula for calculating Enhanced Federal Medical Assistance Percentages. The FMAPs are subject to change.

3.1 TMHP EDI Overview

The Texas Health and Human Services Commission (HHSC) and the Texas Medicaid & Healthcare Partnership (TMHP) encourage providers to submit claims using electronic methods. Providers can participate in the most efficient and effective method of submitting requests to TMHP by submitting through the TMHP EDI Gateway. TMHP uses the Health Insurance Portability and Accountability Act (HIPAA)-compliant American National Standards Institute (ANSI) ASC X12 5010 file format through secure socket layer (SSL) and virtual private networking (VPN) connections for maximum security. Providers can access TMHP’s electronic services through the TMHP website at www.tmhp.com, TexMedConnect, vendor software, and third party billing agents. Providers may also submit claims using paper forms.

3.1.1 Advantages of Electronic Services

- It’s fast. No more waiting by the mailbox or telephone inquiries; know what’s happening to claims in less than 24 hours and receive reimbursement for approved claims within a week. TexMedConnect users can submit individual requests interactively and receive a response immediately.

- It’s free. All electronic services offered by TMHP are free, including TexMedConnect and its technical support and training.

- It’s easy. TMHP offers computer-based training (CBT) for TexMedConnect, Medicaid billing, and many other topics, including those for the Children with Special Health Care Needs (CSHCN) Services Program, and Long Term Care, as well as a large library of reference materials and manuals on www.tmhp.com.

- It’s safe. TMHP EDI services use VPN and SSL connections, just like the United States government, banks, and other financial institutions, for maximum security.

- It’s accurate. TexMedConnect and most vendor software programs have features that let providers know when they’ve made a mistake, which means fewer rejected and denied claims. Rejected claims are returned with messages that explain what’s wrong, so the claim can be corrected and resubmitted right away. Denied claims appear on the provider’s Remittance and Status (R&S) Report along with paid and pending claims.

- It’s there when it’s needed. Electronic services are available day and night; from home, the office, or anywhere in the world.

- It makes record keeping and research easy. Not only can TexMedConnect be used to send and receive claims, it can check client eligibility, retrieve Electronic Remittance and Status (ER&S) Reports, perform claim status inquiries, and archive claims. TexMedConnect can generate and print reports on everything it sends, receives, and archives.

3.1.2 Electronic Services Available

- Eligibility verification
- Claims submission
- Claim status inquiry (CSI)
- ER&S Reports
- Appeals (also known as correction and resubmission)

3.1.3 Paper Remittance and Status (R&S) Reports No Longer Available

TMHP no longer produces or distributes paper R&S Reports. This initiative saves the state of Texas the cost of printing and mailing Paper R&S Reports.
All R&S Reports are now available online through the secure portion of the TMHP website at www.tmhp.com. Providers who receive an ER&S Report with third party software are not affected by this change.

Online R&S Reports are available as a portable document format (PDF) file every Monday morning—four days earlier than paper R&S Reports were available. Providers must have a provider administrator account on the TMHP website to receive R&S Reports. Providers who do not have a provider administrator account should create one to avoid delays or interruptions to business processes.

Providers can follow the instructions in the TMHP Portal Security Training Guide to setup a provider administrator account.

### 3.2 Electronic Billing

Providers who want to transition from paper billing to electronic billing must decide how they will submit their claims to TMHP. Providers can use TexMedConnect on the TMHP website at www.tmhp.com, vendor software that submits files directly to TMHP, or they may use a third party billing agent (e.g., billing companies and clearinghouses) who submit files on the provider’s behalf.

#### 3.2.1 TexMedConnect

TexMedConnect is a free, web-based, claims submission application provided by TMHP. Technical support and training for TexMedConnect are also available free from TMHP. Providers can submit claims, eligibility requests, claim status inquiries, appeals, and download ER&S Reports (in either PDF or ANSI 835 formats) using TexMedConnect. TexMedConnect can interactively submit individual claims that are processed in seconds. To use TexMedConnect, providers must have:

- An internet service provider (ISP)
- Microsoft® Internet Explorer® 7.0 and 8.0

A broadband connection is recommended but not required. Providers that use TexMedConnect can find the online TexMedConnect manuals for Acute Care and Long Term Care on the TexMedConnect Info web page in the EDI section of the TMHP website at www.tmhp.com/Pages/EDI/EDI_TexMedConnect.aspx.

#### 3.2.2 Vendor Software

Providers that do not use TexMedConnect must use vendor software to create, submit, and retrieve data files. Providers can use software from any vendor listed on the EDI Vendor Testing List, which is located in the EDI section of the TMHP website at www.tmhp.com. There are hundreds of software vendors that have a wide assortment of services and that have been approved to submit electronic files to TMHP. Providers that plan to access TMHP’s electronic services with vendor software should contact the vendor for details on software requirements. TMHP does not make vendor recommendations or provide any assistance for vendor software. Not all vendor software offers the same features or levels of support. Providers are encouraged to research their software thoroughly to make certain that it meets their needs and that it has completed testing and has been certified with TMHP.

#### 3.2.3 Third Party Billing Agents

Billing agents are companies or individuals who submit electronic files to TMHP on behalf of the provider. Generally, this means that the provider uses a product that sends billing or other information to the billing agent who processes it and transmits it to TMHP and other institutions. A complete list of billing agents who have completed the testing process and been certified by TMHP can be found on the EDI Vendor Testing List, which is located in the EDI section of the TMHP website at www.tmhp.com. TMHP does not make billing agent recommendations or provide any assistance for billing agents’ software or services. TMHP has no information on the software or other requirements of billing agents. Providers should contact the billing agent to obtain information about their products and processes.
3.3 Gaining Access

Providers must setup their software or billing agent services to access the TMHP EDI Gateway. Providers who use billing agents or software vendors should contact those organizations for information about installation, settings, maintenance, and their processes and procedures for exchanging electronic data.

Providers that download the ANSI 835 file through TexMedConnect and providers that use vendor software must request a submitter ID. A submitter ID is necessary for vendor software to access TMHP’s electronic services. It serves as an electronic mailbox for the provider and TMHP to exchange data files. To order a submitter ID, providers must call the EDI Help Desk at 1-888-863-3638, Option 3. Providers that use a billing agent do not need a submitter ID.

Providers may receive an ER&S Report by completing the Electronic Remittance and Status (ER&S) Agreement and submitting it to the EDI Help Desk after setting up access to the TMHP EDI Gateway.

Refer to: Form 3.1, "Electronic Remittance and Status (ER&S) Agreement (2 pages)" in this section.

3.4 Training

Providers should contact the TMHP Contact Center at 1-800-925-9126 for billing and training questions. Information about training opportunities is available in the Provider Education section of the TMHP website at www.tmhp.com. Providers may also use the many reference materials and workbooks available on the website. The TMHP EDI Help Desk provides technical assistance and does not provide training.

3.5 Electronic Transmission Reports

Providers are required to retain all claim and electronic file transmission records. Providers must verify that all claims submitted to TMHP are received and accepted. Providers must also track claims submissions against their claims payments to detect and correct all claim errors.

Refer to: Subsection 1.6.3, “Retention of Records and Access to Records and Premises” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information), for more information about provider responsibility and electronic submissions.

If an electronic file transmission record is missing, providers can request that the transmission report file be reset by contacting the TMHP EDI Help Desk at 1-888-863-3638, Option 3. The TMHP EDI Help Desk will then reset the files for the production submitter ID provided. Requests for transmission reports produced in the previous 30 days will be provided at no cost to providers. Requests for transmission reports produced more than 30 days before the request will result in a charge of $500 plus 8.25 percent sales tax of $41.25 for a total charge of $541.25. Providers that hold a tax-exempt certificate will not be assessed the sales tax. This cost is per transmission report.

3.6 Provider Check Amounts Available Online

Acute care providers can search, view, and print on the TMHP website at www.tmhp.com all payment amounts issued during the previous year.

The features of the online check amount include:

- The ability to search information up to one year before the date of the search.
- All results are displayed on a single screen.
- All results can be printed on a single report.
- The 52 weeks of reimbursement payment information includes the:
  - Payment date
• Payee name
• Payment amount
• Program for which payment was issued
• Hold amount
• Payment status

Providers must have or must create an administrative account to view their payment amounts online. Providers can then grant “View Payment Amounts” security permission to the office staff of their choice. Providers can access their check amounts by logging into their accounts from the TMHP website and then pressing View Payment Amounts.

Provider check amounts are also available through the automated inquiry system (AIS) telephone line and ER&S Reports.

3.7 Third Party Vendor Implementation

TMHP requires all software vendors and billing agents to complete EDI testing before access to the production server is allowed. Vendors that wish to begin testing may either call the EDI Help Desk at 1-888-863-3638, Option 3, or visit the Edifecs testing site at edittesting.tmhp.com and use the TMHP Support link. An Edifecs account will be created for the vendor to begin testing EDI formats once they have enrolled for testing. After the successful completion of Edifecs testing and the submission of a Trading Partner Agreement, vendors must then complete end-to-end testing on the TMHP test server. Software vendors and billing agents must be partnered with at least one Texas provider before a test submitter ID can be issued. When end-to-end testing has been completed, the software vendor or billing agent will be added to the EDI Submitter List. Providers and billing agents may then order production submitter IDs for use with the vendor’s software. Companion guides and vendor specifications are available on the EDI page of the TMHP website at www.tmhp.com.

3.7.1 Automated Maintenance Process for All Electronic Submitters

All submitter folders have a maximum limit of 7500 files, and no files can be more than 30 days old. Files that exceed these limits will be purged by TMHP on a daily basis. Providers should review, retrieve, and backup their electronic response files within 30 days. Files not retrieved within the 30-day time period or files that exceed a maximum file count of 7500 will be purged by TMHP. All electronic submitters are responsible for the maintenance of their submitter folders. Files that are submitted using EDI version 5010 are limited to a maximum of 5,000 transactions per file. Files that have more than 5,000 transactions will be rejected.

Requests for transmission reports produced after the 30-day period, or resulting from a purge of over 7500 files will require fees, as outlined in subsection 3.5, “Electronic Transmission Reports” of this section.

3.7.2 Supported File Types

TMHP EDI supports the following electronic HIPAA-compliant ANSI ASC X12 5010 transaction types:

<table>
<thead>
<tr>
<th>Electronic Transaction Types</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>270</td>

3.8 Forms

Note: Forms are available on the TMHP website at www.tmhp.com.
### Electronic Remittance and Status (ER&S) Agreement

**Before your ER&S Agreement** can be processed, you MUST choose ONE of the following:

* These changes affect ONLY the ELECTRONIC version of the Remittance & Status Report. To make changes to the PAPER version of the R&S report, contact TMHP Provider Enrollment.

- [ ] Set up INITIALLY (first time). Use Production User ID:* (9 digits)
- [ ] CHANGE Production User ID FROM: (9 digits)
  TO: (9 digits)
- [ ] REMOVE Production ID Remove: (9 digits)

** The TMHP Production User ID (Submitter ID) is the electronic mailbox ID used for downloading your Electronic Remittance & Status (ER&S) reports. For assistance with identifying and using your Production User ID and password, contact your software vendor or clearinghouse.

---

### This information MUST be completed before your request can be processed.

<table>
<thead>
<tr>
<th>Provider Name (must match TPI/NPI number)</th>
<th>Billing TPI Number</th>
<th>Provider Tax ID Number</th>
</tr>

### Claim Status Inquiry Authorization

**This form is for ACUTE CARE providers only.**

If you are a Long Term Care provider, contact TMHP’s EDI Help Desk at 888-863-3638 to request the correct form.

The following information MUST be completed before you can be granted Claim Status Inquiry (CSI) access.

<table>
<thead>
<tr>
<th>1. Enter your Production User ID:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>2. Enter your Production User ID Password:</td>
<td>The TMHP Production User ID (Submitter ID) is the electronic mailbox ID used for downloading your Claim Status Inquiry reports. For assistance with identifying and using your Production User ID and password, contact your software vendor or clearinghouse.</td>
</tr>
</tbody>
</table>

|------------------|-----------------------------------|--------------------------------------|

<table>
<thead>
<tr>
<th>4. Enter organization information:</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>List the billing Texas Provider Identifier (TPI)/Atypical Provider Identifier (API) and National Provider Identifier (NPI) number(s) you choose to access using the Production User ID given above. <strong>Submit additional copies of this form if you need to add more TPI and NPI/API numbers.</strong></td>
<td></td>
</tr>
<tr>
<td>Provider Name</td>
<td>Must be the name associated with the TPI Base number listed at right.</td>
</tr>
<tr>
<td>7–Digit BILLING TPI Base Number</td>
<td>The first 7 digits of the 9 digit TPI number.*</td>
</tr>
<tr>
<td>10-digit BILLING NPI/API*</td>
<td></td>
</tr>
</tbody>
</table>

*Note: Performing TPI and NPI/API numbers do not have Claim Status Inquiry access. Enter only BILLING TPI and NPI/API numbers.

4.1 General Medicaid Eligibility

A person may be eligible for medical assistance through Medicaid if the following conditions are met:

- The applicant must be eligible for medical assistance at the time the service is provided. It is not mandatory that the process of determining eligibility be completed at the time service is provided; the client can receive retroactive eligibility. Services or supplies cannot be paid under Texas Medicaid if they are provided to a client before the effective date of eligibility for Medicaid or after the effective date of denial of eligibility. Having an application in process for Medicaid eligibility does not guarantee the applicant will be eligible.

- The service must be a benefit and determined medically necessary (except for preventive family planning, annual physical exams, and Texas Health Steps [THSteps] medical or dental checkup services) by Texas Medicaid and must be performed by an approved provider of the service.

- Applicants for medical assistance potentially are eligible for Medicaid coverage up to three calendar months before their application for assistance, if they have unpaid or reimbursable Medicaid-covered medical bills and have met all other eligibility criteria during the time the service was provided. The provision also includes deceased individuals when a bona fide agent requests application for services. An application for retroactive eligibility must be filed with the Health and Human Services Commission (HHSC); it is not granted automatically. The applicant must request the prior coverage from an HHSC representative and complete the section of the application about medical bills.

Clients who are not eligible for Medicaid but meet certain income guidelines may receive family planning services through other family planning funding sources. Clients not eligible for Medicaid are referred to a family planning provider. Clients seeking other services may be eligible for state health-care programs, some of which are described in this section.

Refer to: Department of State Health Services (DSHS) website at www.dshs.state.tx.us/famplan/ for information about family planning and the locations of family planning clinics that receive DSHS Family Planning Program funding.

4.1.1 Your Texas Benefits Medicaid Card

Upon enrolling in Texas Medicaid, clients receive a Your Texas Benefits Medicaid Card that can be used to verify the client eligibility for various state-funded programs.

The card provides information about the following:

- Program eligibility dates
- Retroactive eligibility (if applicable)
- Eligible services (as applicable)
- Medicaid managed care eligibility

Refer to: Subsection 4.2, “Eligibility Verification” in this section for additional ways to verify client eligibility.

Client TPR and other insurance information can also be verified using the benefit card.

4.1.2 Retroactive Eligibility

Medicaid coverage may be assigned retroactively for a client. For claims for an individual who has been approved for Medicaid coverage but has not been assigned a Medicaid client number, the 95-day filing deadline does not begin until the date the notification of eligibility is received from HHSC and added to the TMHP eligibility file.
The date on which the client’s eligibility is added to the TMHP eligibility file is the add date. To ensure the 95-day filing deadline is met, providers must verify eligibility and add date information by calling the Automated Inquiry System (AIS) or using the TMHP Electronic Data Interchange (EDI) electronic eligibility verification.

If a person is not eligible for medical services under Texas Medicaid on the date of service, reimbursement for all care and services provided must be resolved between the provider and the client receiving the services. Providers are not required to accept Medicaid for services provided during the client’s retroactive eligibility period and may continue to bill the client for those services. This guideline does not apply to nursing facilities certified by the Department of Aging and Disability Services (DADS).

If it is the provider’s practice not to accept Medicaid for services provided during the client’s retroactive eligibility period, the provider must apply the policy consistently for all clients who receive retroactive eligibility. Providers must inform the client about their policy before rendering services. If providers accept Medicaid assignment for the services provided during the client’s retroactive eligibility period and want to submit a claim for Medicaid-covered services, providers must refund payments received from the client before billing Medicaid for the services.

The provider should also check the eligibility dates electronically through TexMedConnect or the Your Texas Benefits Medicaid card website at www.YourTexasBenefitsCard.com to see whether the client has retroactive eligibility for previous bills. Retroactive eligibility and the retroactive eligibility period may be verified by visiting www.YourTexasBenefitsCard.com. Texas Medicaid considers all services between the Eligibility Date and the Good Through date for reimbursement. Providers can determine whether a client has retroactive eligibility for previous bills by verifying eligibility on www.tmhp.com, transmitting an electronic eligibility request, or calling AIS or the TMHP Contact Center.

Examples of Medicaid identification forms are found at the end of this section. Actual Medicaid forms can be identified by a watermark.

Refer to: Subsection 4.1, “Your Texas Benefits Medicaid Card - Your New Medicaid ID (English)” in this section.

4.1.3 Expedited Eligibility (Applies to Medicaid-eligible Pregnant Women Throughout the State)

HHSC processes Medicaid applications for pregnant women within 15 business days of receipt. Once eligibility has been certified, a Your Texas Benefits Medicaid card will be issued to verify eligibility and to facilitate provider reimbursement.

4.1.4 Medicaid Buy-In Program for Employed Individuals with Disabilities

The Medicaid Buy-In (MBI) Program allows employed individuals with disabilities to receive Medicaid services by paying a monthly premium. Some MBI participants, based on income requirements, may be determined to have a $0 premium amount and therefore are not required to make a premium payment. Individuals with earnings of less than 250 percent of the federal poverty income limits (FPIL) may be eligible to participate in the program. Applications for the program are accepted through HHSC’s regular Medicaid application process.

Participants will receive the Your Texas Benefits Medicaid card, which indicates the Medicaid services for which they are eligible. MBI participants in urban service areas will be served through Texas Medicaid fee-for-service.

4.1.5 Newborn Eligibility

A newborn child may be eligible for Medicaid for up to 1 year if:

- The child’s mother received Medicaid at the time of the child’s birth.
- The child’s mother is eligible for Medicaid or would be eligible if pregnant.
- The child resides in Texas.
If the newborn is eligible for Medicaid coverage, providers must not require a deposit for newborn care from the guardian. The hospital or birthing center must report the birth to HHSC Eligibility Services at the time of the child’s birth.

If the hospital or birthing center notifies HHSC Eligibility Services that a newborn child was born to a Medicaid-eligible mother, then the hospital caseworker, mother, and attending physician (if identified) should receive a Medicaid Eligibility Verification (Form H1027) from HHSC a few weeks after the child’s birth. Form H1027 includes the child’s Medicaid identification number and effective date of coverage. After the child has been added to the HHSC eligibility file, a Your Texas Benefits Medicaid card is issued. Newborn clients will receive the Your Texas Benefits Medicaid card approximately two weeks after birth.

Providers can verify eligibility through the Medicaid eligibility verification website at www.YourTexasBenefitsCard.com. After the newborn becomes a Medicaid client, the card website shows that client as eligible, even if the card has not been produced yet.

Note: Claims submitted for services provided to a newborn eligible for Medicaid must be filed using the newborn client’s Medicaid number. Claims filed with the mother’s Medicaid number cause a delay in reimbursement.

The Medicaid number on the Medicaid Eligibility Verification (Form H1027) may be used to identify newborns eligible for Medicaid.

Refer to: Form 4.1, “Your Texas Benefits Medicaid Card - Your New Medicaid ID (English)” in this section.

4.1.6 Potential Supplemental Security Income (SSI)/Medicaid Eligibility for Premature Infants

The Supplemental Security Income (SSI) program includes financial and Medicaid benefits for people who are disabled. When determining eligibility for SSI, the Social Security Administration (SSA) must establish that the person meets financial and disability criteria. When determining financial eligibility for a newborn child, SSA does not consider the income and resources of the child’s parents until the month following the month the child leaves the hospital and begins living with the parents. Determinations of disability are made by the state’s Disability Determination Services and may take several months. Federal regulations state that infants with birth weights less than 1,200 grams are considered to meet the SSI disability criteria.

The SSA issued a policy to local SSA offices to make presumptive SSI disability decisions and payments for these children, making it possible for a child to receive SSI and Medicaid benefits while waiting for a final disability determination to be made by Disability Determination Services. The child’s parent or legal guardian must file an SSI application with the SSA. It is in the child’s best interest that the application with the SSA be filed as soon as possible after birth. The SSA accepts a birth certificate with the child’s birth weight or a hospital medical summary as evidence for the presumptive disability decision.

Providers should not change their current newborn referral procedures to HHSC for children who are born to mothers who are eligible for Medicaid as described in this section. However, providers are encouraged to refer parents and guardians of low birth weight newborns to the local SSA office for an SSI application.

4.1.7 Foster Care

Most children in the state of Texas foster care program are automatically eligible for Medicaid.

Extended health-care coverage is also available for some former foster care youth clients enrolled in an institution of higher education through the Former Foster Children in Higher Education (FFCHE) program.
To ensure that these children have access to the necessary health-care services for which they are eligible, providers can accept the Medicaid Eligibility Verification (Form H1027) as evidence of Medicaid eligibility. Although this form may not list the client’s Medicaid identification number, it is an official state document that establishes Medicaid eligibility.

Providers should honor the Medicaid Eligibility Verification (Form H1027) as proof of Medicaid eligibility and must bill Texas Medicaid as soon as a Medicaid ID number is assigned. Medicaid ID numbers will be assigned approximately one month from the issue date of the Medicaid Eligibility Verification (Form H1027). The form includes a Department of Family and Protective Services (DFPS) client number that provides an additional means of identification and tracking for children in foster care.

Note: The DFPS client number is accepted by Medicaid Vendor Drug Program (VDP)-enrolled pharmacies to obtain outpatient prescribed drug benefits. VDP pharmacies must submit subsequent pharmacy claims with the Medicaid ID number after it has been assigned.

Reminder: Adoption agencies/foster parents are not considered third party resources (TPRs). Medicaid is primary in these circumstances.

4.1.8 Medicaid Managed Care Eligibility

All clients who are determined to be eligible for Texas Medicaid are first enrolled as fee-for-service clients. Specific client groups within the Texas Medicaid population are eligible for managed care based on criteria such as age, location, and need. A client who is determined to be eligible for Medicaid managed care is enrolled in the appropriate managed care organization (MCO) or dental plan with a separate eligibility date. In most cases, Medicaid managed care enrollment is not retroactive.

Refer to: Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks) for more information about managed care eligibility and enrollment.

4.2 Eligibility Verification

To verify a client’s Texas Medicaid eligibility, use the following options:

- Verify electronically through TMHP EDI. Providers may inquire about a client’s eligibility by electronically submitting one of the following for each client:
  - Medicaid or Children with Special Health Care Needs (CSHCN) Services Program identification number.
  - One of the following combinations: Social Security number and last name; Social Security number and date of birth; or last name, first name, and date of birth. Providers can narrow the search by entering the client’s county code or sex.

- Submit electronic verifications in batches limited to 5,000 inquiries per transmission.

- Verify the client’s Medicaid eligibility using the Medicaid Eligibility Verification (Form H1027) or by accessing the Your Texas Benefits Medicaid card website at www.YourTexasBenefitsCard.com.

- Contact the TMHP Contact Center or AIS at 1-800-925-9126 or (512) 335-5986.

- Submit a hard-copy list of clients to TMHP. This service is only used for clients with eligibility that is difficult to verify. A charge of $15 per hour plus $0.20 per page, payable to TMHP, applies to this eligibility verification. The list includes names, gender, and dates of birth if the Social Security and Medicaid ID numbers are unavailable. TMHP can check the client’s eligibility manually, verify eligibility, and provide the Medicaid ID numbers. Mail the lists to the following address:

  Texas Medicaid & Healthcare Partnership Contact Center
  12357-A Riata Trace Parkway
  Suite 100
  Austin, TX 78727
4.2.1 * Advantages of Electronic Eligibility Transactions

Eligibility transactions through TexMedConnect or EDI have the following advantages:

- Submissions are available 24-hours a day 7 days a week.
- Submission of EDI batches of 5000 per transmission.
- Submission of client group lists through TexMedConnect. Providers can create lists of clients to verify eligibility. Each client group can contain up to 250 clients, providers can create up to 100 groups for each National Provider Identifier (NPI).

Electronic eligibility responses contain:

- Restrictions applicable to the client’s eligibility such as lock-in, emergency, or women’s health.
- Medicare eligibility and effective dates, including Part A, B, and C.
- Complete other insurance information, including name and address, and effective dates. EDI transactions also indicate the patient relationship to policy holder.

4.2.2 Contract with Outside Parties

The *State Medicaid Manual*, Chapter 2, “State Organization,” (Section 2080.18) allows states to contract with outside agents to confirm for providers the eligibility of a Medicaid client. Medicaid providers may contract with these agents for eligibility verification with a cost to the provider. The provider remains responsible for adhering to the claims filing instructions in this manual. The provider, not the agent, is responsible for meeting the 95-day filing deadline and other claims submission criteria.

4.3 * Medicaid Identification and Verification

Providers are responsible for requesting and verifying current eligibility information from clients by using the methods listed above or by asking clients to produce their Your Texas Benefits Medicaid card or Medicaid Identification form (H1027).

Providers may verify client eligibility electronically through TexMedConnect or through the Medicaid eligibility verification website at www.YourTexasBenefitsCard.com from which website providers can print a copy of a client’s proof of eligibility.

Providers must accept either of these forms as valid proof of eligibility. Providers should retain a copy for their records to ensure the client is eligible for Medicaid when the services are provided. Clients should share eligibility information with their providers.

Providers should request additional identification if they are unsure whether the person presenting the form is the person identified on the form.

Providers should check the Eligibility Date to see whether the client has possible retroactive eligibility for previous bills.

Only those clients listed on the Medicaid Eligibility form or the Your Texas Benefits Medicaid card are eligible for Medicaid. If a person insists he or she is eligible for Medicaid but cannot produce a current Your Texas Benefits Medicaid card or Medicaid Eligibility Verification (Form H1027), has lost it, or has forgotten to bring it to the appointment, providers can verify eligibility through the methods listed in subsection 4.2, “Eligibility Verification” in this section. Providers must document this verification in their records and treat these clients as if they had presented a Your Texas Benefits Medicaid card or Medicaid Eligibility Verification (Form H1027).

When a client’s Your Texas Benefits Medicaid care has been lost or stolen, HHSC issues a temporary Medicaid verification Form H1027. The following is a sample of forms:

- *Form H1027-A*. Medicaid eligibility verification is used to indicate eligibility for clients who receive regular Medicaid coverage.

- **Form H1027-B.** Medicaid Qualified Medicare Beneficiary (MQMB) is issued to clients eligible for MQMB coverage.
- **Form H1027-C.** Qualified Medicare Beneficiary (QMB) is issued to clients who are eligible for QMB coverage only.
- **Form H1027-F.** Temporary Medicaid identification for clients receiving Former Foster Care in Higher Education (FFCHE) health care.

Refer to: Subsection 4.13.1, “QMB/MQMB Identification” in this section.

The Medicaid Eligibility Verification (Form H1027) is acceptable as evidence of eligibility during the eligibility period specified unless the form contains limitations that affect the eligibility for the intended service. Providers must accept any of the documents listed above as valid proof of eligibility. If the client is not eligible for medical assistance or certain benefits, the client is treated as a private-pay patient.

Refer to: Subsection 4.2, “Eligibility Verification” in this section.

Providers must review limitations identified on the Medicaid electronic eligibility file, AIS, the Your Texas Benefits Medicaid card website at www.YourTexasBenefitsCard.com, or the Medicaid Eligibility Verification (Form H1027). Clients may be required to use a designated primary provider or pharmacy. QMB clients will be limited to Medicaid coverage of the Medicare Part A premiums, if any, Medicare Part B premiums, and Medicare coinsurance or deductible according to current payment guidelines.

If the client is identified as eligible and no other limitations of eligibility affect the intended service, proceed with the service. Eligibility during a previous month does not guarantee eligibility for the current month. The Medicaid Eligibility Verification (Form H1027) and the Your Texas Benefits Medicaid card are the only documents that are honored as verification of Medicaid eligibility.

Refer to: Subsection 4.14, “Third Party Liability (TPL)” in this section.

In accordance with current federal policy, Texas Medicaid and Texas Medicaid clients cannot be charged for the client’s failure to keep an appointment. Only claims for services provided are considered for payment. Clients may not be billed for the completion of a claim form, even if it is a provider’s office policy.

### 4.4 * Restricted Medicaid Coverage*

The following sections are about limitations that may appear on the Your Texas Benefits Medicaid card, indicating that the client’s eligibility is restricted to specific services. Unless “LIMITED” appears on the form, the client is not locked into a single provider.

#### 4.4.1 Emergency Only

The word “EMERGENCY” on the form indicates the client is restricted to coverage for an emergency medical condition. “Emergency medical condition” is defined in subsection 4.4.2.2, “* Exceptions to Lock-in Status” in this section.

Certification for emergency Medicaid occurs after the services have been provided. The coverage is retroactive and limited to the specific dates that the client was treated for the emergency medical condition.

Clients limited to emergency medical care are not eligible for family planning, THSteps, or Comprehensive Care Program (CCP) benefits. Only services directly related to the emergency or life-threatening situations are covered.

Undocumented aliens and aliens with a nonqualifying entry status are identified for emergency Medicaid eligibility by the classification of type programs (TPs) 30, 31, 32, 33, 34, 35, and 36. Under Texas Medicaid, undocumented aliens are only eligible for emergency medical services, including emergency labor and delivery.
Any service provided after the emergency medical condition is stabilized is not a benefit.

If a client is not eligible for Medicaid and is seeking family planning services, providers may refer the client to one of the clinics listed on the DSHS website at www.dshs.state.tx.us/famplan.

4.4.2 * Client Lock-in Program

Texas Medicaid fee-for-service clients can be required to use a designated primary care provider and/or a primary care pharmacy.

The client is assigned to a designated provider for access to medical benefits and services when one of the following conditions exists:

- The client received duplicative, excessive, contraindicated, or conflicting health-care services, including drugs.
- A review indicates abuse, misuse, or fraudulent actions related to Medicaid benefits and services.

After analysis through the neural network component of the Medicaid Fraud and Abuse Detection System (MFADS), qualified medical personnel validate the initial identification and determine candidates for lock-in status. The validation process includes consideration of medical necessity. For the lock-in status designation, medical necessity is defined as the need for medical services to the amount and frequency established by accepted standards of medical practice for the preservation of health, life, and the prevention of more impairments.

Except for specialist consultations, services rendered to a client by more than one provider for the same or similar condition during the same time frame may not be considered medically necessary.

4.4.2.1 * Lock-in Medicaid Identification

Clients with lock-in status receive the Your Texas Benefits Medicaid card with “LIMITED” printed on the card. The designated provider and pharmacy names are printed on the card under the word “LIMITED.” Only one client is identified on a LIMITED Your Texas Benefits Medicaid card.

The Lock-in Program may also alert providers by means of a message on the Your Texas Benefits Medicaid card website at www.YourTexasBenefitsCard.com, when the card was reportedly used by an unauthorized person or persons, or for an unauthorized purpose. In these cases, the provider is asked to verify the client’s identity by requesting personal identification that carries a photograph, such as a driver’s license.

When a Texas Medicaid fee-for-service client in the Lock-in Program attempts to obtain nonemergency services from someone other than their designated primary care provider, the provider must do one of the following:

- Verify the lock-in status online on the TMHP website or by calling AIS or the TMHP Contact Center at 1-800-925-9126.
- Attempt to contact the client’s designated primary care provider for a referral. If the provider is unable to obtain a referral, the provider must inform clients that they are financially responsible for the services.

4.4.2.2 * Exceptions to Lock-in Status

Lock-in clients may go to any provider for the following services or items:

- Ambulance services
- Anesthesia
- Annual well-woman checkup
- Assistant surgery
- Case management services
- Chiropractic services
- Counseling services provided by a chemical dependency treatment facility
- Eye exams for refractive errors
- Eyeglasses
- Family planning services (regardless of place of service [POS])
- Genetic services
- Hearing aids
- Home health services
- Laboratory services (including interpretations)
- Licensed clinical social worker (LCSW) services
- Licensed professional counselor (LPC) services
- Mental health rehabilitation services
- Mental retardation diagnostic assessment (MRDA) performed by an MRDA provider
- Nursing facility services
- Primary home care
- Psychiatric services
- Radiology services (including interpretations)
- School Health and Related Services (SHARS)
- Comprehensive Care Program (CCP)
- THSteps medical and dental services

For referrals or questions, contact:

HHSC
Office of Inspector General
Lock-in Program - MC 1323
PO Box 85200
Austin, TX 78708
1-800-436-6184

If an emergency medical condition occurs, the lock-in restriction does not apply. The term emergency medical condition is defined as a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain), such that the absence of immediate medical attention could reasonably be expected to result in:

- Placing the client’s health (or, with respect to a pregnant woman, the health of the woman or her unborn child) in serious jeopardy.
- Serious impairment to bodily functions.
- Serious dysfunction of any bodily organ or part.

**Important:** A provider who sends in an appeal because a claim was denied with explanation of benefits (EOB) 00066 must include the performing provider identifier, not just a name or group provider identifier. Appeals without a performing provider identifier are denied. The NPI of the designated provider must be entered in the appropriate paper or equivalent electronic field for nonemergency inpatient and outpatient claims to be considered for reimbursement.
Note: Only when the designated provider or designated provider representative has given permission for the client to receive nonemergency inpatient and/or outpatient services, including those provided in an emergency room, can the facility use the designated provider’s NPI for billing.

4.4.2.3 * Selection of Designated Provider and Pharmacy

Texas Medicaid fee-for-service clients identified for lock-in status can participate in the selection of one primary care provider, primary care pharmacy, or both from a list of participating Medicaid providers. Eligible providers cannot be under administrative action, sanction, or investigation. In general, the designated primary care provider’s specialty is general practice, family practice, or internal medicine. Other specialty providers may be selected on a case-by-case basis. Primary care providers can include, but are not limited to: a physician, physician assistant, physician group, advanced practice nurse, outpatient clinic, rural health clinic (RHC), or federally qualified health center (FQHC).

If the client does not select a primary care provider or primary care pharmacy, HHSC selects one for the client.

When a candidate for the designated provider is determined, HHSC contacts the provider by letter. The designated provider receives a confirmation letter from HHSC that verifies the name of the client confirming the name of the client, primary care provider or primary care pharmacy, and the effective date of the lock-in arrangement.

4.4.2.4 * Pharmacy services

The primary care pharmacy helps the Lock-in Program ensure that prescriptions that are filled for clients with lock-in status are written either by the primary care provider or other health-care providers to whom the primary care provider has referred the client. HHSC has identified by therapeutic class those medications that require additional monitoring. When a medication that requires additional monitoring is prescribed by an emergency room provider, the primary care pharmacy may be reimbursed for dispensing up to 72 hours or three business days of the prescribed dosage, which allows for holidays and weekends. The primary care pharmacy may dispense the remainder of the medication after receiving approval by the primary care provider or the other providers that HHSC deems to be appropriate.

Some circumstances allow a client to be approved to receive medications from a pharmacy other than the primary care pharmacy. A pharmacy override occurs when the Lock-in Program approves an individual client’s request to obtain medication at an alternate pharmacy other than the lock-in pharmacy. The Lock-in Program is notified when the client or pharmacist calls the HHSC-OIG Hotline telephone number at 1-800-436-6184 to request a pharmacy override.

The Lock-in Program staff refers the client to the notification letter titled “What You Need to Know About the Lock-in Program,” which was sent at initial lock-in. This letter explains the pharmacy override process. The client is instructed to have the alternate pharmacy call the Lock-in Program to request the override.

The following are allowable circumstances for pharmacy override approval:

- The recipient moved out of the geographical area (more than 15 miles from the lock-in pharmacy).
- The lock-in pharmacy does not have the prescribed medication, and the medication will remain unavailable for more than two to three days.
- The lock-in pharmacy is closed for the day, and the recipient needs the medication urgently.
- The lock-in pharmacy does not carry the medication and is either unable to order it or unwilling to stock it.
- The lock-in pharmacy no longer wants to be the designated pharmacy for a particular lock-in client.
- The client has valid complaints against the lock-in pharmacy or its staff.
For questions about pharmacy services for clients that are locked into a primary care pharmacy, contact the Lock-in Program by calling the HHSC OIG Hotline at 1-800-436-6184.

### 4.4.2.5 * Duration of Lock-in Status*

The Lock-in Program duration of lock-in status is the following:

- **Initial lock-in status period** – minimum of 36 months.
- **Second lock-in status period** – additional 60 months.
- **Third lock-in status period** – will be for the duration of eligibility and all subsequent periods of eligibility.
- **Clients arrested, indicted, convicted of, or admits to a crime related to Medicaid fraud** will be assigned lock-in status for 60 months or the duration of eligibility and subsequent periods of eligibility up to or equal to 60 months.

HHSC uses the same time frames for clients with a lock-in status as noted by the word “LIMITED” on the Your Texas Benefits Medicaid card website at www.YourTexasBenefitsCard.com.

Clients are removed from lock-in status at the end of the specified limitation period if their use of medical services no longer meets the criteria for lock-in status. A medical review also may be initiated at the client’s or provider’s request. Clients or providers can reach the Lock-in Program by calling the HHSC OIG Hotline at 1-800-436-6184 to request this review.

Providers may request to no longer serve as a client’s designated provider at any time during the lock-in period by contacting the Lock-in Program by calling the HHSC OIG Hotline at 1-800-436-6184. Providers are asked to serve or refer the client until another arrangement is made. New arrangements are made as quickly as possible.

### 4.4.2.6 * Referral to Other Providers*

Texas Medicaid fee-for-service clients with a lock-in status may be referred by their designated provider to other providers. For the referred provider to be paid, the provider identifier of the referring designated provider must be in the referring provider field of the claim form. Claims submitted electronically (see subsection 6.2, “TMHP Electronic Claims Submission” in Section 6, “Claims Filing” [Volume 1, General Information]) must have the NPI of the referring designated provider in the Referring Provider Field. Providers must consult with their vendor for the location of this field in the electronic claims format.

### 4.4.2.7 * Hospital Services*

An inpatient hospital claim for a lock-in Medicaid fee-for-service client is considered for reimbursement if the client meets Medicaid eligibility and admission criteria. Hospital admitting personnel are asked to check the name of the designated provider for the client that is noted on the Your Texas Benefits Card website at www.YourTexasBenefitsCard.com and inform the admitting physician of the designated provider’s name if the two are different.

Provider claims for nonemergency inpatient services for lock-in Texas Medicaid fee-for-service clients are considered for payment only when the designated provider identifier appears on the claim form as the billing, performing, or referring physician.

Providers can get information about claim reimbursement for lock-in clients by calling the TMHP Contact Center at 1-800-925-9126.

### 4.4.2.8 * Lock-in Status Claims Payment*

Payment for services to a lock-in Medicaid client is made to the designated provider only, unless the services result from a designated provider referral or emergency. An automated review process determines if the claim includes the lock-in primary care provider’s provider identifier as the billing, performing, or referring provider. If the lock-in primary care provider’s provider identifier is not
indicated on the claim, the claim is not paid. Exceptions to this rule include emergency care and services that are included in subsection 4.4.2.2, “Exceptions to Lock-in Status” in this section. Appeals for denied claims are submitted to TMHP and must include the designated Medicaid provider identifier for reimbursement consideration.

Claims for provider services for Texas Medicaid fee-for-service clients must include the provider identifier for the designated primary care provider as the billing or performing provider or a referral number in the prior authorization number (PAN) field.

4.4.3 Hospice Program
DADS manages the Hospice Program through provider enrollment contracts with hospice agencies. These agencies must be licensed by the state and Medicare-certified as hospice agencies. Coverage of services follows the amount, duration, and scope of services specified in the Medicare Hospice Program. Hospice pays for services related to the treatment of the client’s terminal illness and for certain physician services (not the treatments).

Medicaid Hospice provides palliative care to all Medicaid-eligible clients (no age restriction) who sign statements electing hospice services and are certified by physicians to have six months or less to live if their terminal illnesses run their normal courses. Hospice care includes medical and support services designed to keep clients comfortable and without pain during the last weeks and months before death.

When clients elect hospice services, they waive their rights to all other Medicaid services related to their terminal illness. They do not waive their rights to Medicaid services unrelated to their terminal illness. Medicare and Medicaid clients must elect both the Medicare and Medicaid Hospice programs. Texas Medicaid clients who are 20 years of age and younger and elect hospice care are not required to waive their rights to concurrent hospice care and treatment. Concurrent hospice care and treatment services include:

- Services related or unrelated to the client’s terminal illness
- Hospice care (palliative care and medical and support services related to the terminal illness.

Direct policy questions about the hospice program to DADS at (512) 438-3519. Direct all other general questions related to the hospice program, such as billing, claims, rate key issues, and authorizations to DADS at (512) 438-2200.

DADS pays the provider for a variety of services under a per diem rate for any particular hospice day in one of the following categories:

- Routine home care
- Continuous home care
- Respite care
- Inpatient care

4.4.3.1 Hospice Medicaid Identification
Individuals who elect hospice care are issued a Your Texas Benefits Medicaid card. Hospice status may be verified by visiting the Your Texas Benefits Medicaid card website at www.YourTexasBenefitsCard.com. Clients may cancel their election at any time.

4.4.3.2 Physician Oversight Services
Physician oversight is defined as “physician supervision of clients under the care of home health agencies or hospices that require complex or multidisciplinary care modalities.” These modalities involve regular physician client status review of related laboratory and other studies, communication with other health professionals involved in patient care, integration of new information into medical treatment plans, and adjustment of medical therapy. Medicaid hospice does not reimburse for physician oversight services.
4.4.3.3 Medicaid Services Unrelated to the Terminal Illness

When services are unrelated to the Medicaid Hospice client’s terminal illness, Medicaid (TMHP) pays its providers directly. Providers of services that are unrelated to the terminal illness are required to follow Medicaid prior authorization and claims filing deadlines.

Refer to: Section 5: Fee-for-Service Prior Authorizations (Vol. 1, General Information) for more information about prior authorizations for Medicaid hospice clients.

Section 6: Claims Filing (Vol. 1, General Information) for more information about filing claims for Medicaid Hospice Clients.

4.4.4 Presumptive Eligibility (PE)

PE provides temporary Medicaid coverage to pregnant women whose family income does not exceed the state’s Medicaid limit. The intent of PE is to provide the earliest possible access to prenatal care to improve maternal and child health. Clients with PE receive immediate, short-term Medicaid eligibility while their formal Medicaid application is processed.

4.4.4.1 PE Medicaid Identification

PE indicates clients with presumptive eligibility. PE clients may be identified by visiting the Your Texas Benefits Medicaid card web site at www.YourTexasBenefitsCard.com. Medicaid coverage for PE continues through the last day of the month indicated on the Your Texas Benefits Medicaid card web site. The Your Texas Benefits Medicaid card website will indicate that Medicaid-covered services during the PE period do not include labor, delivery, inpatient services, and THSteps medical and dental services. The PE ID indicates eligibility for limited Medicaid services during the PE period (e.g., eye exams, eyeglasses, hearing aids, and family planning services).

A woman who is certified for regular Medicaid receives the regular Your Texas Benefits Medicaid card. Other family members who are determined to be eligible for Medicaid receive a separate Your Texas Benefits Medicaid card from the one issued to the pregnant woman.

Claims filing procedures for clients with PE are the same as those for all clients with Medicaid.

4.4.4.2 Services

Medicaid-covered services during the PE period are limited to medically necessary medical services provided during pregnancy and certain preventive services such as family planning.

Labor, delivery, inpatient services, and THSteps medical or dental services are not covered during the PE period. If the woman is determined eligible for regular Medicaid for the same period of time, regular Medicaid coverage overlays the PE period providing the full range of services. Client eligibility for PE coverage must be determined by a PE provider. Once eligibility is determined, services may be obtained from any enrolled Medicaid provider.

4.4.4.3 Qualified Provider Enrollment

To be eligible as a qualified provider for PE determinations the following federal requirements must be met. The provider must:

- Be an eligible Medicaid provider.
- Provide outpatient hospital services, RHC services, or clinic services furnished by or under the direction of a physician without regard to whether the clinic is administered by a physician (includes family planning clinics).
- Be determined by HHSC to be capable of making PE determinations.
- Receive funds from or participate in one of the following:
  - The migrant health centers
- Community health centers
- The Stewart McKinney Act (homeless)
- Maternal and Child Health Services Block Grant Program
- The Indian Self-Determination and Education Assistance Act
- Special Supplemental Food Program for Women, Infants, and Children (WIC)
- The Commodity Supplemental Food Program of the Agriculture and Consumer Protection Act of 1973
- A state perinatal program (including family planning programs)
- The Indian Health Service must be a health program or facility operated by a tribe or tribal organization under the Indian Self-Determination and Education Assistance Act. Indian Health Service providers can refer to Section 1: Provider Enrollment and Responsibilities (Vol. 1, General Information) for more information about the enrollment procedures for Texas Medicaid.

Family planning agency providers may be eligible to enroll as PE providers. To enroll as a qualified provider for PE, the provider must request a Presumptive Eligibility Qualified Provider Enrollment Packet from the following address:

HHSC
Attn: Texas Works
Presumptive Eligibility Program
PO Box 149030
Mail Code W-323
Austin, TX 78714-9030

Before final approval as a qualified PE provider, an operating plan must be developed with the regional HHSC client self-support regional director’s office. The rules for PE identify minimal agreements that must be included in this plan.

**4.4.4.4 Process**

A qualified provider designated by HHSC requests that the pregnant woman complete a Medicaid application form. The qualified provider determines eligibility for PE coverage based on verification of pregnancy and a determination that the family’s income is at or below the current Medicaid limit for pregnant women.

The same application used to determine the woman’s PE is forwarded to the local HHSC office for determination of regular Medicaid coverage for the pregnant woman and any other household members. The pregnant woman must follow through with the regular Medicaid application process and be eligible under those requirements to continue receiving Medicaid.

The period of PE begins on the date the qualified provider makes the determination and ends when HHSC makes the final Medicaid determination.

**4.5 CHIP Perinatal Program**

The Children’s Health Insurance Program (CHIP) Perinatal Program provides CHIP perinatal benefits for 12 months to the unborn children of non-Medicaid-eligible women. This program allows pregnant women who are ineligible for Medicaid because of income (186 to 200 percent of the FPIL) or immigration status (with an income at or below 200 percent of FPIL) to receive prenatal care and provides CHIP benefits to the child upon delivery for the duration of the coverage period. Continuous Medicaid coverage for 12 months is provided from birth to CHIP Perinatal newborns whose mothers
are at or below 185 percent of FPL and received Emergency Medicaid for the labor and delivery. The 12 months of continuous Medicaid coverage for the newborn is available only if the mother received Medicaid for labor and delivery.

4.5.1 Program Benefits

CHIP Perinatal benefits are provided by select CHIP health plans throughout the state. Benefits for the unborn child include:

- Up to 20 prenatal visits:
  - First 28 weeks of pregnancy—one visit every four weeks.
  - From 28 to 36 weeks of pregnancy—one visit every two to three weeks.
  - From 36 weeks to delivery—one visit per week.
  - Additional prenatal visits are allowed if they are medically necessary.
- Pharmacy services, limited laboratory testing, assessments, planning services, education, and counseling.
- Prescription drug coverage based on the current CHIP formulary.
- Hospital facility charges and professional services charges related to the delivery. Preterm labor that does not result in a birth and false labor are not covered benefits.

Program benefits after the child is born include:

- Two postpartum visits for the mother.
- Medicaid benefits for the newborn.

4.5.2 Claims

4.5.3 Client Eligibility Verification

The State Medicaid Manual, Chapter 2, “State Organization,” (Section 2080.18) allows states to contract with outside agents to confirm for providers the eligibility of a Medicaid client. Medicaid providers may contract with these agents for eligibility verification with a cost to the provider. The provider remains responsible for adhering to the claims filing instructions in this manual. The provider, not the agent, is responsible for meeting the 95-day filing deadline and other claims submission criteria.

A number is issued for the baby based on the submission of the Emergency Medical Services Certification Form H3038 for the mother’s labor with delivery.

Establishing Medicaid for the newborn requires the submission of the Emergency Medical Services Certification Form H3038 for the mother’s labor with delivery. If Form H3038 is not submitted, Medicaid cannot be established for the newborn from the date of birth for 12 continuous months of Medicaid coverage. Once enrolled, clients are identified as type program (TP) 36 for the mother and TP 45 for the newborn.

Establishing Medicaid (and issuance of a Medicaid number) can take up to 45 days after Form H3038 is submitted. Medicaid eligibility for the mother and infant can be verified via the online lookup on the TMHP website at www.tmhp.com or by calling AIS at 1-800-925-9126.

For clients enrolled in the CHIP Program, the CHIP health plan assigns a client ID to be used for billing. Providers should contact the CHIP health plan for billing information.

Newborns at or below 185 percent of FPL are eligible to receive Medicaid benefits beginning at the date of birth and will not be assigned a client ID from the CHIP health plan.
HHSC requires the expectant mother’s provider to fill out the Emergency Medical Services Certification (Form H3038).

The expectant mother will receive this form from HHSC before her due date, along with a letter reminding her to send information about the birth of her child after delivery. The letter will instruct the expectant mother to take the form to her provider, have the provider fill out the form, then mail the form back to HHSC in a preaddressed, postage-paid envelope. In many cases this activity will occur after delivery when the mother is being discharged from the hospital.

Once HHSC receives the completed Emergency Medical Services Certification (Form H3038), Emergency Medicaid coverage will be added for the mother for the period of time identified by the health care provider. The Emergency Medical Services Certification (Form H3038) is the same form currently required to complete Emergency Medicaid certification.

The CHIP perinatal mother whose income is at or below 185 percent of the FPIL will not be required to fill out a new application or provide new supporting documentation to apply for Emergency Medicaid. HHSC will determine the woman’s eligibility for Emergency Medicaid by using income and other information the mother-to-be provided when she was determined to be eligible for CHIP perinatal coverage, as well as information included on the Emergency Medical Services Certification (Form H3038).

If a woman fails to return the completed Emergency Medical Services Certification (Form H3038) within a month after her due date, HHSC will send her another Emergency Medical Services Certification Form H3038 with a postage-paid envelope. If the woman fails to submit Emergency Medical Services Certification (Form H3038), and the hospital cannot locate a Type Program 36 for her in the TMHP online provider lookup tool, then the hospital can bill her for facility fees incurred during her stay.

### 4.5.3.1 Confirming Receipt of Form H3038

Providers who would like to confirm receipt of form H3038 can contact MAXIMUS at 1-877-KIDS-NOW (1-877-543-7669), prompt #6 (for reporting changes) after 48 hours from fax submission. If the submission is by regular mail, providers should allow five business days before contacting MAXIMUS. When calling this number, providers should be prepared to provide the following information:

- National Provider Identifier (NPI)
- Provider name
- Name of person calling
- CHIP perinatal case number (Without the case number, MAXIMUS cannot provide confirmation of receipt. Confirmation of receipt cannot be provided based on client name or address.)

Each form H3038 should be faxed one at a time, rather than in a batch. It is important that the form be filled out completely and accurately. If the form is not filled out accurately, it will delay processing and MAXIMUS may not be able to confirm receipt after 48 hours from fax submission.

### 4.5.3.2 Eligibility Verification for Clients Without a Medicaid ID

Providers should first attempt to verify if a Medicaid number has been issued by calling TMHP at 1-800-925-9126 and using the prompt for AIS or speaking to a representative. Providers can also use TexMedConnect to check client eligibility. If a provider is unable to locate a Medicaid number for the mother or infant 45 days after form H3038 was faxed, the provider can contact the HHSC Central Processing Center (CPC) in one of the following ways:

- By email at CPC@hhsc.state.tx.us, with a copy to Gordon.Cappon@hhsc.state.tx.us
- By telephone at 1-866-291-1258
CPC needs the following information to respond to requests or inquiries. Providers should submit the information only once. All submissions must be sent in a secure manner. If there are multiple inquiries that are over 45 days, providers can submit them together.

Required information includes the following:

- CHIP perinatal case number
- Mother's name as it appears on her CHIP Perinatal card
- Dates of service
- Date Form H3038 was faxed to MAXIMUS
- Baby's first and last name
- Baby's date of birth
- Name and telephone number of the person completing the request

CPC will research inquiries and respond to the provider within 10 business days. This time frame is an approximation and may only apply if all information, including complete contact information, is provided and fewer than 25 names were submitted.

4.5.3.3 Mother's eligibility

For mothers who currently receive CHIP perinatal and have an income at or below 185 percent of the FPIL, and who receive Emergency Medicaid coverage, providers can check eligibility by performing an eligibility verification on the TMHP website at www.tmhp.com or by calling the TMHP AIS at 1-800-925-9126.

4.5.3.4 Newborn's eligibility

For CHIP Perinatal newborns with a family income at or below 185 percent of the FPIL, providers can obtain eligibility information and the newborn’s PCN by performing an eligibility verification on the TMHP website or by calling the TMHP Contact Center at 1-800-925-9126.

TMHP cannot provide CHIP Perinatal Program eligibility information for the newborn or mother, regardless of the client’s income level. For CHIP Perinatal Program eligibility information, contact the CHIP health plan.

A report of birth remains an important step to ensure timely Medicaid eligibility for the newborn. A birth must be reported to the state via the typical birth registry process (e.g., use of Texas Electronic Registration system [TER]). In TER, the screen containing the Medicaid/CHIP number should continue to be populated with the mother’s alpha-numeric CHIP Perinatal Program number (e.g., J12345678). In addition, a mother can report the birth by calling 1-877-KIDS-NOW (1-877-543-7669).

4.5.4 Submission of Birth Information to Texas Vital Statistics Unit

Hospital providers must submit birth registry information to the DSHS Vital Statistics Unit in a timely manner. Once received by the Vital Statistics Unit, birth information is transmitted to the state’s eligibility systems, so a PCN (Medicaid number) can be issued for newborns at or below 185 percent FPIL. Hospitals should use the CHIP Perinatal health plan ID to enter the mother’s CHIP perinatal coverage ID number in the Medicaid/CHIP number field on the Texas Electronic Registration (TER) screen. This number will appear as an alpha-numeric combination, starting with a letter followed by eight digits. For example: G12345678.

For more information, go to the HHSC website at www.hhsc.state.tx.us/chip/perinatal/VitalStatisticsInstructions_062807.pdf, or call Texas Vital Statistics at 1-800-452-9115.
4.6 Medicaid Healthy Moms and Babies Services

Medicaid Healthy Moms and Babies is a program that provides obstetrical (OB) risk assessment and educational services to expectant mothers and case management services to mothers who have high-risk pregnancies. The program provides educational materials, health assessments, and a help line for questions and concerns.

This program serves only eligible Texas Medicaid fee-for-service clients who agree to participate in the program. Clients who are enrolled in a managed care organization are not eligible.

Refer to: Alerehealth website at http://tmhp.alerehealth.com for more information about the Medicaid Healthy Moms and Babies Program.

4.7 Neonatal Care Management Program (NCMP)

NCMP provides help for low-birth-weight, medically complex, and high-risk infants in the neonatal intensive care unit (NICU). The program provides educational materials, care management nurses, and a 24-hour help line.

This program serves only eligible Texas Medicaid fee-for-service clients who agree to participate in the program. Clients who are enrolled in a managed care organization are not eligible.

Refer to: Alerehealth website at http://tmhp.alerehealth.com for more information about the Neonatal Care Management Program.

4.8 Medically Needy Program (MNP)

The MNP with spend down is limited to children 18 years of age and younger and pregnant women.

The MNP provides Medicaid benefits to children (18 years of age and younger) and pregnant women whose income exceeds the eligibility limits under Temporary Assistance for Needy Families (TANF) or one of the Medical Assistance Only (MAO) programs for children but is not enough to meet their medical expenses. Coverage is available for services within the amount, duration, and scope of Texas Medicaid. Individuals are considered adults beginning the month following their 19th birthday.

Medicaid benefits, including family planning and THSteps preventive services through the MNP, are available to:

- Pregnant women.
- Children 18 years of age and younger.

MNP provides access to Medicaid benefits. Applications are made through HHSC. HHSC determines eligibility for the appropriate Medicaid program.

If spend down is applicable, HHSC issues a Medical Bills Transmittal (Form H1120) to the MNP applicant that indicates the spend down amount, months of potential coverage (limited to the month of application and any of the three months before the application month that the applicant has unpaid medical bills), and HHSC contact information.

The applicant is responsible for paying the spend down portion of the medical bills. The TMHP Medically Needy Clearinghouse (MNC) determines which bills may be applied to the applicant’s spend down according to state and federal guidelines. No Medicaid coverage may be granted until the spend down is met.

Newborns of mothers who must meet a spend down before becoming eligible for Medicaid are not automatically eligible for the full year of newborn coverage. The newborn and mother are eligible for the birth month and the two following months. Hospitals and other providers that complete newborn reporting forms should continue to follow the procedures in subsection 3.2.4, “Newborn Care” in Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks) for these newborns.
4.8.1 Spend Down Processing

Applicants are instructed to submit their medical bills or completed claim forms for application toward their spend down to TMHP MNC along with the Medical Bills Transmittal/Insurance Information Form H1120. Charges from the bills or completed claim forms are applied in date of service order to the spend down amount, which is met when the accumulated charges equal the spend down amount.

Providers can assist medically needy clients with their applications by giving them current, itemized statements or completed claim forms to submit to MNC. MNC holds manually completed claim forms used to meet spend down for ten calendar days preceding the completion of the spend down case, then forwards them to claims processing. The prohibition against billing clients does not apply until Medicaid coverage is provided.

Current itemized statements or completed claim forms must include the following:

- Statement date
- Provider name
- Client name
- Date of service
- All services provided and charges
- Current amount due
- Any insurance or client payments with date of payment (the date and amount of any insurance or payments)

**Important:** Amounts used for spend down are deducted from the total billed amount by the provider. Using older bills may provide earlier eligibility for the client.

Bills for past accounts must be current, itemized statements (dated within the last 60 days) that are from the provider and that verify the outstanding status of the account and the current balance due. Accounts that have had payments made by an insurance carrier, including Medicare, must be accompanied by the carrier’s EOB or Remittance Advice and show the specific services covered and amounts paid.

Unpaid bills incurred before the month of potential eligibility (the month with spend down) may be used to meet spend down. Itemized statements must be dated within 60 days of the date they are received at TMHP MNC.

The unpaid balance on currently due accounts may be applied toward the spend down regardless of the date of service. All bills or completed claim forms must be itemized showing the provider’s name, client’s name, dates of service, statement date, services provided, charge for each service, total charges, amounts and dates of payments, and total due.

Clients have 30 days to submit their bills or completed claim forms. Thirty-day extensions are available to the client as necessary to gather all needed information. The provider can assist by furnishing the additional information to the applicant.

All communication about submission of billing information is carried out between MNC and the applicant; however, providers can assist clients by:

- Providing clients with current itemized statements or completed claim forms.
- Encouraging clients to submit all of their medical bills or completed claim forms incurred from all providers at the same time.
- Submitting manual claim forms directly to MNC or to applicants for the MNP, that can be used to meet spend down.
Bills or claim forms submitted to MNC are for application toward the spend down only. Submitting a bill or claim forms for spend down is not a claim for reimbursement. No claims reimbursement is made from such submittals unless the claim form is complete. The provider must file a Medicaid claim after eligibility has been established to have reimbursement considered by Texas Medicaid. If the provider assisted the client with submission of a claim form, the MNC retains all claim forms for ten calendar days preceding the completion of the spend down case. The MNC then forwards all claim forms directly to claims processing to have reimbursement considered by Texas Medicaid.

MNC informs the applicant and HHSC when the spend down is met. HHSC certifies the applicant for Medicaid and sends the Medicaid Identification form to the applicant when Medicaid eligibility is established. The TMHP MNC mails notification letters to providers when clients have met spend down and TMHP has not yet received any claim for the client’s bills. The notification letter states that an invoice was submitted for the spend down and that the provider should submit claims for any bills that fall within the indicated spend down month. Clients are encouraged to inform medical providers of their Medicaid eligibility and make arrangements to pay the charges used to meet the spend down amount. When notified of Medicaid eligibility, the provider asks if the client has retroactive eligibility for previous periods. All bills submitted to MNC are returned to the client, except for claim forms. An automated letter specific to the client’s spend down case is attached, indicating which:

- Bills and charges were used to meet the spend down.
- Bills and charges the client is responsible for paying in part or totally.
- Bills the provider may submit to Medicaid for reimbursement consideration.
- Claims have been received and forwarded to TMHP claims processing.

Providers may inquire about status, months of potential eligibility, Medicaid or case number, and general case information by calling the TMHP Contact Center at 1-800-925-9126.

Medically needy applicants who have a case pending or have not met their spend down are considered private-pay clients and may receive bills and billing information from providers. No claims are filed to Medicaid. A claim that is inadvertently filed is denied because of client ineligibility.

4.8.2 Closing an MNP Case
Medically needy cases are closed by MNC for the following reasons:

- Bills were not received within the designated time frame (usually 30 days from the date on which the case is established by the HHSC worker).
- The client failed to provide requested additional case/billing information within 30 days of the MNC request date.
- Insufficient charges were submitted to meet spend down, and the client did not respond to a request for additional charges to be submitted within 30 days of the notification letter.

Charges submitted after the spend down has been met will not reopen the case automatically. The client must call the Client Hotline at 1-800-335-8957.

Note: For information regarding the Medically Needy Program for CSHCN Services Program clients refer to the CSHCN Services Program Provider Manual.

4.9 Medicaid Buy-in for Children (MBIC) Program
The MBIC program is mandated by S.B. 187, 81st Legislature, Regular Session, 2009, to provide acute care Medicaid coverage for children who are 18 years of age and younger and have disabilities. This program creates a state option for children who are ineligible for Supplemental Security Income (SSI) for reasons other than disability.
Children with disabilities must meet the following requirements to be eligible for MBIC:

- Be 18 years of age or younger.
- Have a family income that is no more than 300 percent of FPL before allowable deductions.
- Meet citizenship, immigration, and residency requirements.
- Be unmarried.
- Not reside in a public institution.

**Exception:** Clients who are enrolled in the MBIC program before they enter a nursing facility or intermediate care facility for persons with mental retardation or related conditions (ICF-MR) will continue to receive MBIC benefits until eligibility for the appropriate institutional Medicaid program is determined.

MBIC clients will be enrolled as Medicaid fee-for-service. MBIC clients are identified by Type Program (TP) 88 on the Your Texas Benefits Medicaid card. MBIC clients have access to the same benefits as Medicaid clients who have disabilities. Claims and prior authorization requests for MBIC clients may be submitted according to current guidelines for Medicaid fee-for-service as indicated in this manual.

MBIC benefits are available to enrolled clients through the end of the month that contains their nineteenth birthday. Clients whose birthday falls on the last day of February of a leap year (e.g., February 29, 2004) will be eligible for benefits through the end of March following their nineteenth year.

### 4.10 Texas Medicaid Wellness Program

High-cost/high-risk fee-for-service (FFS) and managed care clients may be eligible to receive targeted care management services through the Texas Medicaid Wellness Program. The Wellness Program replaces the Disease Management program that was mandated by Human Resources Code 32.057 & 059. The Wellness Program administrator is McKesson Health Solutions.

The goal of the Wellness Program is to promote improved health outcomes by supporting and sustaining the client-provider relationship. The Wellness Program will contact Medicaid high-cost/high-risk clients to provide comprehensive care management services regardless of disease condition. The Wellness Program also has a diabetes self-management training (DSMT) component and will offer 10 hours of DSMT plus 3 hours nutritional counseling to all clients who have diabetes. Additionally, clients who have a body mass index (BMI) above 25 will receive vouchers for a weight loss program.

The Wellness Program offers the following:

- Provider portal
- Practice support facilitators
- Collaborative learning
- Support for practice transformation initiatives

Providers must submit claims and prior authorization requests for Wellness Program clients following the guidelines for Medicaid FFS services as defined in this manual or modified by website articles.

Providers may refer potential clients to the Wellness Program at 1-877-530-7756.
4.11 **Texas Women’s Health Program (TWHP)**

The goal of the TWHP is to expand access to family planning services that reduce unintended pregnancies in the eligible population. TWHP participants receive a limited family planning benefit that supports the goal of the program. TWHP participants do not have access to full Medicaid coverage. Not all Medicaid family planning benefits are payable under TWHP.

4.12 **Medicaid for Breast and Cervical Cancer (MBCC)**

Through MBCC, the state of Texas provides full Medicaid benefits to eligible women who were screened through the Centers for Disease Control and Prevention’s (CDC) National Breast and Cervical Cancer Early Detection Program (NBCCEDP) and were found to need treatment for breast or cervical cancer, including precancerous conditions. The goal of the program is to improve timely access to breast and cervical cancer treatment for uninsured women identified by NBCCEDP.

DSHS receives the CDC funds and awards these funds to providers across the state to perform breast and cervical cancer screenings and diagnostic services under the Breast and Cervical Cancer Services (BCCS) program.

4.12.1 **Initial MBCC Program Enrollment**

A woman may be eligible for initial enrollment in the MBCC Program if she has active disease as indicated by a biopsy-confirmed precancerous or cancerous breast or cervical diagnosis as specified in “Medicaid for Breast and Cervical Cancer Guidelines for Determination of Qualifying Diagnosis,” which is available on the DSHS website at www.dshs.state.tx.us/chscontracts/pdf/MBCCQualifyingDx072009.pdf.

Women who only require monitoring for hormonal treatment or triple negative receptor breast cancer (TNRBC) do not qualify for initial MBCC enrollment.

4.12.2 **MBCC Program Eligibility**

To be eligible for MBCC, a woman must be diagnosed and in need of treatment for one of the following biopsy-confirmed breast or cervical cancer diagnoses:

- Grade 3 cervical intraepithelial neoplasia (CIN III)
- Severe cervical dysplasia
- Cervical carcinoma in situ
- Primary cervical cancer
- Ductal carcinoma in situ
- Primary breast cancer

In addition, a woman may be eligible for MBCC with a diagnosis of metastatic or recurrent breast or cervical cancer and a need for treatment.

After a woman has received an eligible breast or cervical cancer diagnosis from a provider, a BCCS provider must review her diagnosis to help determine her eligibility for MBCC. Once a BCCS provider has reviewed the diagnosis, her application is sent to HHSC to determine eligibility for the program. The client cannot apply for MBCC at an HHSC benefits office.

In addition to having received an eligible diagnosis, a woman must meet the following criteria to qualify for benefits:

- A household income at or below 200 percent of the FPL
• 64 years of age or younger
• U.S. citizen or eligible immigrant
• Uninsured or otherwise not eligible for Medicaid

A woman who is eligible to receive Texas Medicaid under MBCC receives full Medicaid benefits beginning the day after she received a qualifying diagnosis and for the duration of her cancer treatment. Services are not limited to the treatment of breast and cervical cancer.

### 4.12.3 Continued MBCC Program Eligibility

After a woman is enrolled in the MBCC program, eligibility may continue if she meets one of the following criteria:

- She is being treated for active disease as defined above,
- She has completed active treatment while in MBCC and is currently receiving hormonal treatment,
- She has completed active treatment while in MBCC and is currently receiving active disease surveillance for TNRBC.

A woman may continue to receive Medicaid benefits as long as she meets the eligibility criteria and provides proof that she is receiving active treatment for breast or cervical cancer. Women who are no longer in MBCC may reapply if they are diagnosed with a new breast or cervical cancer or a metastatic or recurrent breast or cervical cancer.

**Note:** Active disease surveillance (for the purposes of determining eligibility for MBCC) is periodically monitoring disease progression in order to quickly treat cancerous and precancerous conditions that arise from the presence of a previously diagnosed TNRBC.

If the client’s cancer is in remission and the physician determines that the client requires only routine health screening for a breast or cervical condition (e.g. annual breast examinations, mammograms, and Pap tests as recommended by the American Cancer Society and the U.S. Preventative Services Task Force), the client is not considered to be receiving treatment; and MBCC coverage will not be renewed. A client who is subsequently diagnosed with a new, metastatic, or recurrent breast or cervical cancer may reapply for MBCC benefits.

### 4.13 Medicare and Medicaid Dual Eligibility

Medicaid clients who are also eligible for Medicare Part A (inpatient coverage), Part B (medical coverage), or Part C (noncontracted Medicare Advantage Plans [MAPs]), may be covered by Texas Medicaid as follows:

- QMB clients are eligible for coinsurance and deductible payments according to the current payment guidelines.
- MQMB clients are eligible for coinsurance and deductible payments according to the current payment guidelines, and receive Medicaid benefits for services that are not a benefit of Medicare or exceed Medicare benefit limitations.

**Medicare Part A and Part C (Noncontracted MAPs Only)**

For QMB and MQMB clients who are eligible for Medicare Part A, including clients enrolled in MAPs, claims may be reimbursed to providers for the client’s Medicare coinsurance and deductible up to the Medicaid allowed amount for the service less the amount paid by Medicare.

For Medicare Part C, the coinsurance and deductible payment guidelines apply for noncontracted MAPs only.

**Medicare Part B**
For QMB and MQMB clients who are eligible for Medicare Part B, Texas Medicaid reimburses the lesser of the following to providers:

- The coinsurance and deductible payment.
- The amount remaining after the Medicare payment amount is subtracted from the allowed Medicaid fee or encounter rate for the service (If this amount is less than the deductible, then the full deductible is reimbursed instead.)

If the Medicare payment is equal to, or exceeds the Medicaid allowed amount or encounter payment for the service, Texas Medicaid does not make a payment for coinsurance.

*Note:* If the Medicare payment is equal to or exceeds the Medicaid allowed amount or encounter payment for the service, no additional payment is made for coinsurance and deductible.

QMB clients are not eligible for Medicaid coverage for benefits that are not covered by Medicare, and QMB clients are not eligible for THSTEPS or CCP Medicaid benefits.

QMB and MQMB coverage guidelines do not impact clients who are living in nursing facilities and who receive a vendor rate for client care through DADS.

Claims for Medicare copayments can also be submitted to TMHP.

**Refer to:** Subsection 2.7.4, “Exceptions” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for information about exceptions for Medicare Part B and Part C (noncontracted MAPs).

Section 6: Claims Filing (*Vol. 1, General Information*) for more information about filing claims for MQMBs and QMBs.

**4.13.1 QMB/MQMB Identification**
The term “QMB” or “MQMB” on the Your Texas Benefits Medicaid card website indicates the client is a Qualified Medicare Beneficiary or a Medicaid Qualified Medicare Beneficiary. The Medicare Catastrophic Coverage Act of 1988 requires Medicare premiums, deductibles, and coinsurance payments to be paid for individuals determined to be QMBs or MQMBs who are enrolled in Medicare Part A and meet certain eligibility criteria (see 1 TAC §§358.201 and 358.202).

**Refer to:** Form 4.1, “Your Texas Benefits Medicaid Card - Your New Medicaid ID (English)” in this section for examples of the Your Texas Benefits Medicaid Card.

**4.13.2 Medicare Part B Crossovers**
The following qualify as Medicare Part B crossover claims: QMB, MQMB, and client TPs 13 or 14, with base plan 10, and category R.

If the provider has not accepted Medicare assignment, the provider may receive payment of the Medicare deductible or coinsurance according to current guidelines on behalf of the QMB, MQMB, client TPs 13 or 14, base plan 10, and category R client. If the provider has collected money from the client and also received reimbursement from TMHP, the provider is required to refund the client’s money.

The Social Security Act requires that Medicaid payment for physician services under Medicare Part B be made on an assignment-related basis.

If Medicaid does not reimburse all or a part of the deductible or coinsurance, the provider is not allowed to bill the client.
Refer to: Subsection 2.7, “Medicare Crossover Claim Reimbursement” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (Vol. 1, General Information).

### 4.13.3 Clients Without QMB or MQMB Status

Medicare is primary to Medicaid, and providers must bill Medicare first for their claims. Medicaid’s responsibility for coinsurance and deductibles is determined in accordance with the Medicaid benefits and limitations including the 30-day spell of illness. TMHP denies claims if the client’s coverage reflects Medicare Part A coverage and Medicare has not been billed first.

Providers must check the client’s Medicare card for Part A coverage before billing Texas Medicaid.

Refer to: Subsection 2.7, “Medicare Crossover Claim Reimbursement” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (Vol. 1, General Information).

### 4.13.4 Medicare Part C

Providers can receive information about a client’s Medicare Part C eligibility through TexMedConnect or EDI. In response to an eligibility inquiry, providers receive the client’s Medicare Part C eligibility effective date, end date, and add date.

HHSC contracts with some Medicare Advantage Plans (MAPs) and offers a per-client-per-month payment. The payment to the MAP includes all costs associated with the Medicaid cost sharing for dual-eligible clients. MAPs that contract with HHSC will reimburse providers directly for the cost sharing obligations that are attributable to dual-eligible clients enrolled in the MAP. These payments are included in the capitated rate paid to the HMO and must not be billed to TMHP or a Medicaid client.

TMHP now processes certain claims for clients enrolled in a Medicare Advantage Plan (Part C).

A list of MAPs that have contracted with HHSC is available in the “EDI” section of the TMHP website at www.tmhp.com. The list will be updated as additional plans initiate contracts.

### 4.14 Third Party Liability (TPL)

Federal and state laws require the use of Medicaid funds for the payment of most medical services only after all reasonable measures have been made to use a client’s third party resources (TPR) or other insurance.

To the extent allowed by federal law, a health-care service provider must seek reimbursement from available third party insurance that the provider knows about or should know about before billing Texas Medicaid. All claims for clients with other insurance coverage must reference the information (see subsection 6.12, “Other Insurance Claims Filing” in Section 6, “Claims Filing” [Vol. 1, General Information]), regardless of whether a copy of the EOB from the insurance company is submitted with the claim.

Refer to: Subsection 7.2, “Refunds to TMHP” in Section 7, “Appeals” (Vol. 1, General Information) for information regarding refunds to TMHP resulting from other insurance payments and conditions surrounding provider billing of third party insurers.

Eligible clients enrolled in private HMOs must not be charged the co-payment amount because the provider has accepted Medicaid assignment.

A provider who furnishes services and participates in Texas Medicaid may not refuse to furnish services to an eligible client because of a third party’s potential liability for payment of the services.

A TPR is a source of payment for medical services other than Medicaid, the client, and non-TPR sources. TPR includes payments from any of the following sources:

- Other health insurance including assignable indemnity contracts
• Health maintenance organization (HMO)
• Public health programs available to clients with Medicaid such as Medicare and Tricare
• Profit and nonprofit health plans
• Self-insured plans
• No-fault automobile insurance such as personal injury protection (PIP) and automobile medical insurance
• Liability insurance
• Life insurance policies, trust funds, cancer policies, or other supplemental policies
• Workers’ Compensation
• Other liable third parties

Reminder: Adoption agencies/foster parents are no longer considered a TPR. Medicaid is primary in these circumstances.

Refer to: Subsection 4.14.4, “THSteps TPR Requirements” in this section for THSteps TPR exceptions.

Family planning (including Title XIX and the DSHS Family Planning Program) services providers cannot bill a client’s TPRs before filing the claim with TMHP. Federal regulations protect the client’s confidential choice of birth control and family planning services. Confidentiality is jeopardized when seeking information from TPRs.

SHARS providers are not required to file claims with private insurance before billing Medicaid.

Early Childhood Intervention (ECI) providers are not required to file claims with private insurance before billing Medicaid for Targeted Case Management services.

Case Management for Children and Pregnant Women providers are not required to file claims with other health insurance before filing with Medicaid.

Non-TPR sources are secondary to Texas Medicaid and may only pay benefits after Texas Medicaid. The following are the most common non-TPR sources. If providers have questions about others not listed, they may contact a provider relations representative.

• DARS, Blind Services
• Texas Kidney Health Care Program
• Crime Victims’ Compensation Program
• Muscular Dystrophy Association
• CSHCN Services Program
• Texas Band of Kickapoo Equity Health Program
• Maternal and Child Health (DSHS Family Planning Program)
• State Legalization Impact Assistance Grant (SLIAG)
• Adoption Agencies
• Home and Community-based Waivers Programs through DADS

Note: Claims for clients who are seeking disability determination must be submitted to DARS for consideration of reimbursement. Refer to the DARS website at www.dars.state.tx.us for additional information about disability determinations and claims filing.

Denied claims or services that are not a benefit of Medicaid may be submitted to non-TPR sources.
If a claim is submitted inadvertently to a non-TPR source listed above before submission to TMHP, the claim may be submitted to TMHP using the filing deadlines identified under subsection 6.1.4, “Claims Filing Deadlines” in Section 6, “Claims Filing” (Vol. 1, General Information).

If a non-TPR source erroneously makes a payment for a dual-eligible client for services also covered by Medicaid, the payment is refunded to the non-TPR source.

Any indemnity insurance policy that pays cash to the insured for wages lost or for days of hospitalization rather than for specific medical services is considered a TPR if the policy is assignable to someone else. HHSC has assignment to any Medicaid applicant’s or client’s right of recovery from a third party health insurer, to the extent of the cost of medical care services paid by Medicaid. Texas Medicaid requires a provider take all reasonable measures to use a client’s TPR before billing Medicaid.

Medicaid-eligible clients may not be held responsible for billed charges that are in excess of the TPR payment for services covered by Texas Medicaid. If the TPR pays less than the Medicaid-allowable amount for covered services, the provider should submit a claim to TMHP for any additional allowable amount.

### 4.14.1 Your Texas Benefits Medicaid Card

Client TPR and other insurance information may be verified using the Your Texas Benefits Medicaid card website at www.yourtexasbenefitscard.com.

To ensure receipt of TPR disposition of payment or denial, providers must obtain an assignment of insurance benefits from the client at the time of service. Providers are asked not to provide claim copies or statements to the client.

Providers that are aware that a client has other health insurance that is not indicated on the Your Texas Benefit Medicaid card website must notify TMHP of the details concerning the type of policy and scope of benefits.

Providers can notify TMHP by calling TPR at 1-800-846-7307, Option 2, sending a fax to (512) 514-4225, or submitting Form 4.4, “Other Insurance Form” to the following address:

Texas Medicaid & Healthcare Partnership  
Third Party Resources Unit  
PO Box 202948  
Austin, TX 78720-2948

### 4.14.2 Workers’ Compensation

Payment of covered services under Workers’ Compensation is considered reimbursement in full. The client must not be billed. Services not covered by Workers’ Compensation must be billed to TMHP.

### 4.14.3 Adoption Cases

- TMHP/Medicaid, not the adoption agency, should be billed for all medical services that are a benefit of Texas Medicaid.
- If a claim is inadvertently sent to the adoption agency before it is sent to TMHP, TMHP must receive the claim within 95 days of the date of disposition from the adoption agency denial, payment, request for refund or recoupment, to be considered for payment.
- If the adoption agency inadvertently makes a payment for services covered by Medicaid, the provider should refund the payment to the agency.

A copy of the non-TPR disposition must be submitted with the claim and received at TMHP within 95 days from the date of the disposition (denial, payment, request for refund, or recoupment of payment by the non-TPR source).
4.14.4 THSteps TPR Requirements

THSteps medical and dental providers are not required to bill other insurance before billing Medicaid. If the provider is aware of other insurance, however, the provider must choose whether or not to bill the other insurance. The provider has the following options:

- If the provider chooses to bill the other insurance, the provider must submit the claim to the client’s other insurance before submitting the claim to Medicaid.
- If the provider chooses to bill Medicaid and not the client’s other insurance, the provider is indicating acceptance of the Medicaid payment as payment in full. Medicaid then has the right to recovery from the other insurance. The provider does not have the right to recovery and cannot seek reimbursement from the other insurance after Medicaid has made payment.

Refer to: Subsection 4.5.2, “Third Party Resources (TPR)” in the Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information.

4.14.5 Accident-Related Claims

TMHP monitors all accident claims to determine whether another resource may be liable for the medical expenses of clients with Medicaid coverage. Providers are requested to ask clients whether medical services are necessary because of accident-related injuries. If the claim is the result of an accident, providers enter the appropriate code and date in Block 10 of the CMS-1500 paper claim form, and Blocks 31-34 on the UB-04 CMS-1450 paper claim form.

If payment is immediately available from a known third party such as Workers’ Compensation or PIP automobile insurance, that responsible party must be billed before Medicaid, and the insurance disposition information must be filed with the Medicaid claim. If the third party payment is substantially delayed because of contested liability or unresolved legal action, a claim may be submitted to TMHP for consideration of payment.

TMHP processes the liability-related claim and pursues reimbursement directly from the potentially liable party on a postpayment basis. Include the following information on these claims:

- Name and address of the liable third party
- Policy and claim number
- Description of the accident including location, date, time, and alleged cause
- Reason for delayed payment by the liable third party

4.14.5.1 Accident Resources, Refunds

Acting on behalf of HHSC, TMHP has specific rights of recovery from any settlement, court judgment, or other resources awarded to a client with Medicaid coverage (Texas Human Resources Code, Chapter 32.033). In most cases, TMHP works directly with the attorneys, courts, and insurance companies to seek reimbursement for Medicaid payments. If a provider receives a portion of a settlement for services also paid by Medicaid, the provider must make a refund to TMHP. Any provider filing a lien for the entire billed amount must contact the TPL/Tort Department at TMHP for Medicaid postpayment activities to be coordinated. A provider may not file a lien for the difference between the billed charges and the Medicaid payment. A lien may be filed for services not covered by Medicaid. A lien is the liability of the client with Medicaid coverage.

Providers should contact the TPL/Tort Department at TMHP after furnishing an itemized statement and/or claim copies for any accident-related services billed to Medicaid if they received a request from an attorney, a casualty insurance company, or a client.

The provider furnishes TMHP with the following information:

- Client’s name
- Medicaid ID number
• Dates of service involved
• Name and address of the attorney or casualty insurance company (including the policy and claim number)

This information enables TMHP to pursue reimbursement from any settlement. Providers must use the Form 4.7, “Tort Response Form” to report accident information to TMHP. When the form is completed, providers must remit it to the TMHP TPL/Tort Department (the address and fax number are on the form).

Providers may contact the TMHP TPL/Tort Department by calling 1-800-846-7307, Option 3, sending a fax to (512) 514-4225, or mailing to the following address:

Texas Medicaid & Healthcare Partnership
TPL/Tort Department
PO Box 202948
Austin, TX 78720-2948

4.14.6 Third Party Liability - Tort

HHSC contracts with TMHP to administer third party liability cases. To ensure that Texas Medicaid is the payer of last resort, TMHP performs postpayment investigations of potential casualty and liability cases. TMHP also identifies and recovers Medicaid expenditures in casualty cases involving Medicaid clients.

The Human Resources Code, chapter 32, section 32.033 establishes automatic assignment of a Medicaid client’s right of recovery from personal insurance as a condition of Medicaid eligibility.

Investigations are a result of referrals from many sources, including attorneys, insurance companies, health-care providers, Medicaid clients, and state agencies. Referrals should be submitted to the following address:

TMHP TPL/Tort Department
PO Box 202948
Austin, TX, 78720-2948
Fax: (512) 514-4225

Referrals must be submitted on Form 4.5, “Authorization for Use and Release of Health Information” in this section.

TMHP releases Medicaid claims information when an HHSC Authorization for Use and Release of Health Information Form is submitted. The form must be signed by the Medicaid client. Referrals are processed within ten business days.

Refer to: Form 4.5, “Authorization for Use and Release of Health Information” at the end of this section.

An attorney or other person who represents a Medicaid client in a third party claim or action for damages for personal injuries must send written notice of representation. The written notice must be submitted within 45 days of the date on which the attorney or representative undertakes representation of the Medicaid client, or from the date on which a potential third party is identified. The following information must be included:

• The Medicaid client’s name, address, and identifying information.
• The name and address of any third party or third party health insurer against whom a third party claim is or may be asserted for injuries to the Medicaid client.
• The name and address of any health-care provider that has asserted a claim for payment for medical services provided to the Medicaid client for which a third party may be liable for payment, whether or not the claim was submitted to or paid by TMHP.
If any of the information described above is unknown at the time the initial notice is filed, it should be indicated on the notice and revised if and when the information becomes known.

An authorization to release information about the Medicaid client directly to the attorney or representative may be included as a part of the notice and must be signed by the Medicaid client. The HHSC Authorization for Use and Release of Health Information Form must be used.

HHSC must approve all trusts before any proceeds from a third party are placed into a trust.

Providers may direct third party liability questions to the TMHP TPL/Tort Contact Center at 1-800-846-7307, Option 3.

4.14.6.1 Providers Filing Liens for Third Party Reimbursement

Any provider filing a lien for the entire billed amount must contact the TMHP TPL/Tort Department for Medicaid postpayment activities to be coordinated.

A provider may file a lien for the entire billed amount only after meeting the criteria in 1 TAC §354.2322, summarized below. Providers who identify a third party, within 12 months of the date of service, and wish to submit a bill or other written demand for payment or collection of debt to a third party after a claim for payment has been submitted and paid by Medicaid must refund any amounts paid before submitting a bill or other written demand for payment or collection of debt to the third party for payment, and they must comply with the provisions set forth in 1 TAC §354.2322, which states: Providers may retain a payment from a third party in excess of the amount Medicaid would otherwise have paid only if the following requirements are met:

- The provider submits an informational claim to TMHP within the claims filing deadline. (See Informational Claims below.)
- The provider gives notice to the client or the attorney or representative of the client that the provider may not or will not submit a claim for payment to Medicaid and the provider may or will pursue a third party, if one is identified, for payment of the claim. The notice must contain a prominent disclosure that the provider is prohibited from billing the client or a representative of the client for any Medicaid-covered services, regardless of whether there is an eventual recovery or lack of recovery from the third party or Medicaid.
- The provider establishes the right to payment separate of any amounts claimed and established by the client.
- The provider obtains a settlement or award in its own name separate from a settlement obtained by or on behalf of the client or award obtained by or on behalf of the client, or there is an agreement between the client or attorney or representative of the client and the provider, that specifies the amount that will be paid to the provider after a settlement or award is obtained by the client.

4.14.6.2 Informational Claims

If providers determine that a third party may be liable for a Medicaid client’s accident-related claim, they can submit an informational claim to the TMHP Tort Department to indicate that a third party is being pursued for payment. This allows providers to secure the 95-day claims filing deadline in the event that the payment is not received from the third party.

TMHP processes informational claims for all claims administered by TMHP, including fee-for-service claims and carve-out services. TMHP does not process informational claims for managed care claims that are administered by the client’s MCO or dental plan.

4.14.6.3 Submission of Informational Claims

Providers must submit informational claims to TMHP:

- On a CMS-1450 UB-04 or CMS-1500 paper claim form. Informational claims cannot be submitted to TMHP electronically or by fax.
• On an Informational Claims Submission Form. Providers should complete only one form per client, regardless of how many separate informational claims are being submitted with the form.

• By certified mail.

• Within the 95-day claims filing deadline. Informational claims will not be accepted after the 95-day claims filing deadline.

Refer to: Form 4.3, “Informational Claims Submission Form” in this section.

Providers must complete either the Insurance Information field (liable third party) or the Attorney Information field on the Informational Claims Submission Form.

Providers must send the informational claims and the Informational Claims Submission Form by certified mail to TMHP at:

TMHP TPL/Tort Department
PO Box 202948
Austin, TX 78720-2948

TMHP will send providers a letter to confirm that the informational claim was received. The letter will provide the date on which TMHP must receive a request from the provider to convert the informational claim to a claim for payment. If TMHP receives an informational claim that cannot be processed, TMHP will notify the provider of the reason.

Providers can inquire about the status of an informational claim by calling the TMHP TPL/Tort Department at 1-800-846-7307, Option 3. If a provider has not received confirmation that TMHP has received the informational claim within 30 days, the provider should contact the TMHP TPL/Tort Department at 1-800-846-7307, Option 3 to validate the status of the request.

4.14.6.4 Informational Claim Converting to Claims for Payment

If providers have submitted an informational claim to TMHP but have not received payment from the liable third party, they must make one of the following determinations and notify TMHP within 18 months of the date of service:

• Providers can continue to pursue a claim for payment against the third party and forego the right to convert an informational claim to a claim for payment by Texas Medicaid.

• Providers can submit a request to convert the informational claim to a claim for payment consideration from Texas Medicaid.

Providers that decide to convert an informational claim to a claim for payment consideration must submit a request to TMHP. The request must be submitted:

• On provider letterhead.

• With the client’s name and Medicaid ID, the date of service, and total billed amount that was originally submitted on the UB-04 CMS-1450 or CMS-1500 paper claim form

• By fax or by mail to:

TMHP/Tort Department
PO Box 202948
Austin, TX 78720-2948
Fax: (512) 514-4225

TMHP will not accept any conversion request that is submitted more than 18 months after the date of service, regardless of whether an informational claim was submitted timely to TMHP. All payment deadlines are enforced regardless of whether the provider decides to pursue a third party claim. The conversion of informational claims to actual claims is not a guarantee of payment by TMHP.
4.15 Health Insurance Premium Payment (HIPP) Program

The HIPP Program reimburses for the cost of medical insurance premiums. A Medicaid client is eligible for the HIPP Program when Medicaid finds it more cost effective to reimburse a Medicaid client’s group health insurance premiums than to reimburse his or her medical bills directly through Medicaid.

By ensuring access to employer sponsored health insurance, individuals who are eligible for the HIPP Program may receive services that are not normally covered through Medicaid. Also, members of the family who are not eligible for Medicaid may be eligible for the HIPP Program.

Providers can benefit from this program by helping the uninsured population, saving money for the state of Texas, and receiving a higher payment from the group health insurance carrier. Providers can increase HIPP Program enrollment by displaying brochures to educate their Medicaid clients about the program.

For more information, call the TMHP-HIPP Program at 1-800-440-0493 or visit www.gethipptexas.org.

4.16 Long-Term Care Providers

A nursing facility, home health services provider, or any other similar long-term care services provider that is Medicare-certified must:

- Seek reimbursement from Medicare before billing Texas Medicaid for services provided to an individual who is eligible to receive similar services under the Medicare program.
- Appeal Medicare claim denials for payment, as directed by the department.

A nursing facility, home health services provider, or any other similar long-term care services provider that is Medicare-certified is not required to seek reimbursement from Medicare before billing Texas Medicaid for a person who is Medicare-eligible and has been determined to not be homebound.

4.17 State Supported Living Centers

Inpatient hospital care for individuals who are eligible for Supplemental Security Income (SSI) Medicaid and reside in a State Supported Living Center (SSLC) must be billed to TMHP. Medicaid providers who render off-campus acute care services to Medicaid-eligible SSLC residents are also required to submit claims directly to Medicaid. This is applicable only to residents of the SSLCs operated by DADS.

Claims and prior authorization requests for acute care services that are rendered to these clients must be submitted directly to Medicaid.

Providers may contact DADS for assistance or information about billing procedures for state school services.

4.18 Forms
4.1 Your Texas Benefits Medicaid Card - Your New Medicaid ID (English)

Your Texas Benefits Medicaid card – Your new Medicaid ID

- The Your Texas Benefits Medicaid card takes the place of the paper Medicaid ID (Form 3087) you’ve been getting in the mail each month. July will be the last month you will get the paper form.
- Each person who gets Medicaid gets a card. For example, if you have 3 people in your home who get Medicaid, there should be 3 cards – one for each person.
- Take this card when you go to a Medicaid doctor, dentist, or drug store.
- Carry and protect the card just like your driver’s license or a credit card.
- If you lose the card, call 1-855-827-3748. The number is free to call.
- The sample below tells you more about what’s on the front and back of your card:
4.2 Su tarjeta de beneficios de Medicaid

Tu nueva identificación de Medicaid

- En vez de la tarjeta de identificación de Medicaid (Forma 3087) que recibe por correo cada mes, ahora recibirá la tarjeta de beneficios de Medicaid Your Texas Benefits. La última vez que recibirá su identificación de Medicaid en papel será en el mes de julio.

- Cada persona que recibe beneficios de Medicaid recibirá una tarjeta. Por ejemplo, si hay 3 personas en su hogar que reciben beneficios de Medicaid, debe haber 3 tarjetas, una para cada persona.

- Lleve esta tarjeta con usted cuando vaya a un doctor, dentista o farmacia de Medicaid.

- Lleve la tarjeta con usted en todo momento y protéjala como haría con su licencia de conducir y sus tarjetas de crédito.

- Si pierde su tarjeta llame al 1-855-827-3748. Las llamadas son gratis a este número de teléfono.

- Los ejemplos de abajo le dan más información sobre la información que verá en la parte del frente y de atrás de su tarjeta:

4.5 Authorization for Use and Release of Health Information

OFFICE OF INSPECTOR GENERAL

AUTHORIZATION FOR USE AND RELEASE OF HEALTH INFORMATION

SECTION I

Name_________________________________________  D.O.B.__________________________________
Medicaid ID# (if known) _________________________  SSN#___________________________________

By signing this authorization form, you are giving the Texas Health and Human Services Commission (HHSC) permission to release all or part of your Medicaid claims history, which includes health information.

SECTION II – To be completed by Client

I authorize HHSC to release the information indicated in Part A below to the person or agency named in Part A below, for the purpose(s) stated in Part B below. My information will remain available to the person or agency indicated until the expiration date stated in Part B.

Check one of the following:

☐ Release all of my Medicaid claims history
☐ Release only the parts of my Medicaid claims history that relate to:
  ☐ the following health care provider: _________________________________________________
  ☐ other (please describe in detail the health information you authorize HHSC to release):
  __________________________________________________________________________
  __________________________________________________________________________

Release my information to the following Person/Agency: _____________________________________________

Part B - Purpose(s) of Release: ___________________________________________________________________

This authorization expires on: ______________________________________

Part C - Signature: ______________________________________________________ Date: __________________
(Client or Personal Representative’s Signature)

If you are signing for the client, please describe your authority to act for the client on the following line:
________________________________________________________________________________________________

Note: If the person requesting the release of my Medicaid claims history cannot sign his/her name, a witness to his/her mark (X) must sign below:
Witness __________________________ Date: __________________

SECTION III – Notices to Client

O Once you authorize HHSC to release your information, HHSC is not responsible for any redisclosure of the information by the recipient.
O You can withdraw permission you have given HHSC to use or disclose health information that identifies you, unless HHSC has already taken action based on your permission. You must withdraw your permission in writing.
O With a few exceptions, you have the right to request and be informed about the information that the Health and Human Services Commission (HHSC) releases. You are entitled to receive and review the information upon request. You also have the right to ask HHSC to correct information that is determined to be incorrect (Government Code, Sections 552.021, 552.023, 559.004). If you would like HHSC to correct information about you that is incorrect, please contact the HHSC Privacy Office at 4900 N. Lamar Blvd., 4th Floor, Austin, Texas 78751.

Nombre _______________________________________________  Fecha Nacimiento _____________________
Identificación de Medicaid (si lo conoce) _____________________  SSN _________________________________
Al firmar esta autorización, usted está dando permiso a la Comisión de Salud y Servicios Humanos de Texas (HHSC por sus siglas en inglés) para que divulgue total o parcialmente su historial de reclamaciones de Medicaid, que incluye su información de salud.

SECCIÓN II –Deberá ser llenada por el Cliente
Autorizo a HHSC a divulgar la información indicada en la Parte A, a continuación, a la persona o la entidad nombrada en la Parte A, a continuación, con el fin o fines enunciados en la Parte B, a continuación. Mi información permanecerá disponible para la persona o la entidad indicada hasta la fecha de vencimiento que consta en la Parte B.

Parte A – Divulgación de información: Entiendo que mi historial de reclamaciones de Medicaid contiene información protegida sobre la salud.

Marque una de las siguientes opciones:

• Divulgar todo mi historial de reclamaciones de Medicaid

• Divulgar solamente las partes de mi historial de reclamaciones de Medicaid que tienen relación con:
  ○ el siguiente proveedor de atención de salud: __________________________________
  ○ otros (por favor describa en detalle la información de salud que usted autoriza a HHSC a divulgar): __________________________________________________________________________

Divulgar mi información a la siguiente persona / entidad: ______________________________________________

Parte B – finalidad de la divulgación:

La presente autorización vence el: ______________________________________

Parte C – Firma: __________________ Fecha: __________________
(Firma del Cliente o del Representante Personal)
Si usted firma por el cliente, por favor, describa en la siguiente línea su autoridad para actuar en nombre del cliente:
_____________________________________________________________________________________________________

Nota: Si la persona que solicita la divulgación de mi historial de reclamaciones a Medicaid no puede firmar, debe poner una marca (X) ante un testigo quien debe firmar a continuación:

Testigo __________________ Fecha: __________________

SECCIÓN III – Notificaciones al Cliente
○ Una vez que usted autoriza a HHSC a divulgar su información, HHSC no se responsabiliza de ninguna divulgación deinformación por parte del destinatario.
○ Usted puede retirar el permiso que dio a HHSC para usar o divulgar información de salud que lo identifique, a menos que HHSC ya haya actuado de acuerdo con su permiso. Cuando desee retirar el permiso, debe hacerlo por escrito.
○ Con unas pocas excepciones, usted tiene derecho a solicitar y a ser informado sobre la información que divulgue la Comisión de Salud y Servicios Humanos (HHSC). Usted tiene derecho a recibir y examinar la información cuando lo solicite. Además tiene derecho a pedir a HHSC que corrija la información que se determine que es incorrecta (Código gubernamental, Secciones 552.021, 552.023, 559.004). Si desea que HHSC corrija información sobre usted que es incorrecta, por favor, póngase en contacto con HHSC Privacy Office situada en 4900 N. Lamar Blvd. 4º Piso, Austin, Texas, 78751.

5.10 Submitting Claims for Services That Require Prior Authorization ...................... 5-16

5.11 Guidelines for Procedures Awaiting Rate Hearing ............................................. 5-17
5.1 General Information About Prior Authorization

Some fee-for-service Medicaid services require prior authorization as a condition for reimbursement. Information about whether a service requires prior authorization, as well as prior authorization criteria, guidelines, and timelines for the service, is contained in the handbook within Volume 2 that contains the service.

Prior authorization is not a guarantee of payment. Even if a procedure has been prior authorized, reimbursement can be affected for a variety of reasons, e.g., the client is ineligible on the date of service (DOS) or the claim is incomplete. Providers must verify client eligibility status before providing services.

In most instances prior authorization must be approved before the service is provided. Prior Authorization for urgent and emergency services that are provided after business hours, on a weekend, or on a holiday may be requested on the next business day. TMHP considers providers’ business hours as Monday through Friday, from 8 a.m. to 5 p.m., Central Time. Prior authorization requests that do not meet these deadlines may be denied.

To avoid unnecessary denials, the request for prior authorization must contain correct and complete information, including documentation of medical necessity. The documentation of medical necessity must be maintained in the client’s medical record. The requesting provider may be asked for additional information to clarify or complete a request for prior authorization.

Refer to: Subsection 6.1.4, “Claims Filing Deadlines” in Section 6, “Claims Filing” (Vol. 1, General Information) for the TMHP-approved holidays.

Note: Authorization requests for services administered by a client’s managed care organization (MCO) or dental plan must be submitted to the client’s MCO or dental plan according to the guidelines that are specific to the plan under which the client is covered.

Refer to: Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks) for additional information about managed care prior authorizations.

5.1.1 Prior Authorization Requests for Clients with Retroactive Eligibility

Retroactive eligibility occurs when the effective date of a client’s Medicaid coverage is before the date the client’s Medicaid eligibility is added to TMHP’s eligibility file, which is called the “add date.”

For clients with retroactive eligibility, prior authorization requests must be submitted after the client’s add date and before a claim is submitted to TMHP.

When an authorization request is submitted for a client who has received retroactive Texas Medicaid eligibility, providers should notify TMHP to avoid potential delays. Providers can notify TMHP of the retroactive client eligibility in one of the following ways:

- Add a comment in the additional comments field for authorization requests that are submitted online on the TMHP website at www.tmhp.com or on the MedSolutions website at www.medsolutionsonline.com (for radiological imaging authorizations only).
- Add a comment on the cover sheet or the authorization request form for authorizations that are faxed to TMHP or MedSolutions (for radiological imaging authorizations only).

If the authorization request is made by phone, the caller can indicate to the representative at TMHP or MedSolutions (for radiological imaging authorizations only) that the client has retroactive Texas Medicaid eligibility.

For services provided to fee-for-service Medicaid clients during the client’s retroactive eligibility period, i.e., the period from the effective date to the add date, prior authorization must be obtained within 95 days from the client’s add date and before a claim for those services is submitted to TMHP. For services provided on or after the client’s add date, the provider must obtain prior authorization within 3 business days of the date of service.
The provider is responsible for verifying eligibility. The provider is strongly encouraged to access the Automated Inquiry System (AIS) or TexMedConnect to verify eligibility frequently while providing services to the client. Client eligibility can also be verified through the Your Texas Benefits Medicaid card website at www.yourtexasbenefitscard.com. If services are discontinued before the client’s add date, the provider must still obtain prior authorization within 95 days of the add date to be able to submit claims.

**Refer to:** Section 4: Client Eligibility (Vol. 1, General Information).

### 5.1.2 Prior Authorization Requests for Newly Enrolled Providers

TMHP cannot issue a prior authorization before Medicaid enrollment is complete. Upon notice of Medicaid enrollment, by way of issuance of a provider identifier, the provider must contact the appropriate TMHP Authorization Department to request prior approval before providing services that require prior authorization. Regular prior authorization procedures are followed after the TMHP Prior Authorization Department has been contacted.

Retroactive authorizations are not issued unless the regular authorization procedures for the requested services allow for authorizations to be obtained after services are provided. Providers should refer to specific handbook sections for details about authorization requirements, claims filing, and timeframe guidelines for authorization request submissions. Retroactive authorizations may be granted according to the timeframe guidelines for the specific service requested, and do not exceed those timeframes.

**Note:** All claims must adhere to the claims filing deadlines as outlined in this manual. Retroactive authorizations cannot exceed the claims filing deadline, and are not issued if the date of services is more than 95 days from the date the new provider identifier is issued as identified by the add date.

**Refer to:** Section 1: Provider Enrollment and Responsibilities (Vol. 1, General Information).

### 5.1.3 Prior Authorization for Services Rendered Out-of-State

Texas Medicaid covers medical assistance services that are provided to eligible Texas Medicaid clients while they are in a state other than Texas; however, clients are not covered if they leave Texas to receive out-of-state medical care that can be received in Texas. Services that are provided outside of the state are covered by Texas Medicaid to the same extent that medical assistance is furnished and covered in Texas when the service meets one or more requirements of Texas Administrative Code (TAC) Title 1 §352.17.

**Note:** Border state providers (providers that render services within 50 miles of the Texas border) are considered in-state providers for Texas Medicaid.

Services that are rendered outside of the state must be prior authorized by Texas Medicaid, and TMHP must receive claims from out-of-state providers within 365 days of the date of service. Out-of-state providers that seek reimbursement for services that are rendered outside of the state must submit a Texas Medicaid Provider Enrollment application and be approved for enrollment in Texas Medicaid.

Transplant services that are provided out-of-state but available in Texas will not be reimbursed by Texas Medicaid. When requesting an out-of-state prior authorization for a pre-transplant evaluation, the provider must submit a copy of the transplant evaluation performed by a Texas facility to support the need for an out-of-state pre-transplant evaluation.

Medical assistance and transplant services that are provided to eligible Texas Medicaid clients must meet the criteria included in subsection 1.8, “Enrollment Criteria for Out-of-State Providers” (Vol. 1, General Information). If services are rendered to eligible Texas Medicaid clients that do not meet the criteria, the services are not a benefit of Texas Medicaid and will not be considered for reimbursement.

**Refer to:** Subsection 1.8, “Enrollment Criteria for Out-of-State Providers” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).

5.1.4 Prior Authorization Requests for Clients with Private Insurance
If a client’s primary coverage is private insurance and Medicaid is secondary but prior authorization is required for Medicaid reimbursement, providers must follow the guidelines and requirements listed in the handbook for that service.

5.1.5 Prior Authorization Requests for Clients with Medicare/Medicaid
If a client’s primary coverage is Medicare, providers must always confirm with Medicare whether a service is a Medicare benefit for the client.

If a service that requires prior authorization from Medicaid is a Medicare benefit and Medicare approves the service, prior authorization from TMHP is not required for reimbursement of the coinsurance or deductible. If Medicare denies the service, then prior authorization is required. TMHP must receive a prior authorization request within 30 days of the date of Medicare’s final disposition. The Medicare Remittance Advice and Notification (MRAN) that contains Medicare’s final disposition must accompany the prior authorization request.

If a service requires prior authorization through Medicaid and the service is not a benefit of Medicare, providers may request prior authorization from TMHP before receiving the denial from Medicare.

Note: Refer to the appropriate handbooks in this manual for additional prior authorization guidelines for clients with dual eligibility.

5.1.6 Prior Authorizations for Personal Care Services (PCS)
Before sending a prior authorization request for personal care services to TMHP, the Texas Department of State Health Services (DSHS) will fax the communication tool to the provider. The provider must verify that the information listed on the tool is accurate. If any information on the communication tool is inaccurate, the provider must call the DSHS case manager listed on the tool within three business days of receipt to explain the inaccuracy. The DSHS case manager will correct the communication tool and will fax the updated tool to the provider. The provider must review the updated communication tool and call the DSHS case manager if any inaccuracies remain.

If the provider does not contact the DSHS case manager within three business days of receipt of the communication tool, the case manager will send a prior authorization request to TMHP to have the authorization issued with the information provided on the communication tool.

Important: If a provider fails to notify the DSHS case manager of inaccurate information within three business days of receipt of the communication tool, HHSC will not consider making changes to authorizations for past dates of service.

It is the PCS provider’s responsibility to know the prior authorization period for each client who has an open authorization and to ensure that, before the authorization expires, a DSHS case manager has conducted a reassessment and extended the authorization through TMHP. If a provider has not received an updated provider notification letter from TMHP within 30 days of the authorization’s expiration date, the provider should do one of the following:

- Call the TMHP PCS Prior Authorization Inquiry Line at 1-888-648-1517 and ask whether an authorization is in process.
- Call the TMHP PCS Client Line at 1-888-276-0702, Option 2, and ask for a referral to have DSHS conduct a reassessment.
- Call the DSHS regional office, and notify the DSHS case manager that a new authorization has not been received.

Clients can experience a gap in service if an authorization is not updated before it expires. Providers will not be reimbursed for services provided after an authorization has expired and before a new authorization has been issued.
Providers must retain current client information on file.

### 5.1.6.1 Verifying the Texas Provider Identifier (TPI) on PCS Authorizations

When an authorization notification letter is received by a PCS provider, the provider should verify that the correct TPI was used on the prior authorization for the PCS client. Providers must verify that the TPI on the prior authorization is correct for the location at which the client is receiving services.

Providers who provide services through the Agency option or the Consumer Directed Services (CDS) option must ensure that the TPI on the prior authorization is accurate for the option the client is using. If a provider discovers that the TPI used on the prior authorization is incorrect, the provider should contact the DSHS case manager and ask for the correct TPI to be submitted to TMHP.

### 5.1.7 Prior Authorization for Outpatient Self-Administered Prescription Drugs

### 5.1.8 Prior Authorization for Nonemergency Ambulance Transport

According to 1 TAC §354.1111, nonemergency transport is defined as ambulance transport provided for a Medicaid client to or from a scheduled medical appointment, to or from a licensed facility for treatment, or to the client’s home after discharge from a hospital when the client has a medical condition such that the use of an ambulance is the only appropriate means of transportation (i.e., alternate means of transportation are medically contraindicated).

Refer to: Ambulance Services Handbook (Vol. 2, Provider Handbooks) for more information about ambulance services.

According to Human Resource Code (HRC) §32.024 (t), a Medicaid-enrolled physician, nursing facility, health-care provider, or other responsible party is required to obtain authorization before an ambulance is used to transport a client in circumstances not involving an emergency.

HRC states that a provider of nonemergency ambulance transport is entitled to payment from the nursing facility, health-care provider, or other responsible party that requested the service if payment under the Medical Assistance Program is denied because of lack of prior authorization and the ambulance provider submits a copy of the claim for which payment was denied.

Refer to: Medical Transportation Program Handbook (Vol. 2, Provider Handbooks) for more information about the Medical Transportation Program.

TMHP responds to nonemergency transport prior authorization requests within 2 business days of receipt of requests for 60 days or less. Providers should submit all requests for a prior authorization number (PAN) in sufficient time to allow TMHP to issue the PAN before the date of the intended transport.

If the client’s medical condition is not appropriate for transport by ambulance, nonemergency ambulance services are not a benefit. Prior authorization is a condition for reimbursement but is not a guarantee of payment. The client and provider must meet all of the Medicaid requirements, such as client eligibility and claim filing deadlines.

Medicaid providers who participate in one of the Medicaid Managed Care health maintenance organization (HMO) plans must follow the HMO’s prior authorization requirements.

The TMHP Ambulance Unit reviews the prior authorization request to determine whether the client’s medical condition is appropriate for transport by ambulance. Incomplete information may cause the request to be suspended for additional medical information or be denied.

The following information helps TMHP determine the appropriateness of the transport:

- An explanation of the client’s physical condition that establishes the medical necessity for transport. The explanation must clearly state the client’s condition requiring transport by ambulance.
• The necessary equipment, treatment, or personnel to be used during the transport.
• The origination and destination points of the client’s transport.

Prior authorization is required when an extra attendant is needed for any nonemergency transport. When a client’s condition changes, such as a need for oxygen or additional monitoring during transport, the prior authorization request must be updated.

5.1.8.1 Prior Authorization Types, Definitions

One-Time, Nonrepeating
One-time, nonrepeating requests are reserved for those clients who require a one-time transport. The request must be signed and dated by a physician, physician assistant (PA), nurse practitioner (NP), clinical nurse specialist (CNS), registered nurse (RN), or discharge planner with knowledge of the client’s condition. Stamped or computerized signatures and dates are not accepted. Without a signature and date, the form is considered incomplete.

Recurring
Recurring requests, up to 60 days, are reserved for those clients whose transportation needs are not anticipated to last longer than 60 days. The request must be signed and dated by a physician, PA, NP, or CNS. Stamped or computerized signatures and dates are not accepted. Without a signature and date, the form is considered incomplete. The request must include the approximate number of visits needed for the repetitive transport (e.g., dialysis, radiation therapy).

5.1.8.2 Nonemergency Prior Authorization Process

To obtain prior authorization, providers must submit a completed Nonemergency Ambulance Prior Authorization Request Texas Medicaid and CSHCN Services Program form by fax to the TMHP Ambulance Unit at 512-514-4205. Prior authorization can also be requested through the TMHP website at www.tmhp.com.

The Nonemergency Ambulance Prior Authorization Form must not be modified. If the form is altered in any way, the request may be denied. The form must be filled out by the facility or the physician’s staff that is most familiar with the client’s condition. The ambulance provider must not assist in completing any portion of this form.

Medicaid providers may request prior authorization using one of the following methods:

• The client’s physician, nursing facility, intermediate care facility for persons with intellectual disabilities (ICF-MR), health-care provider, or other responsible party completes the online prior authorization request on the TMHP website at www.tmhp.com.

• Hospitals may call TMHP at 1-800-540-0694 to request prior authorization Monday through Friday, 7 a.m. to 7 p.m., Central Time. A request may be submitted up to 60 days before the date on which the nonemergency transport will occur.

A request for a one-day transport may be submitted on the next business day following the transport in some circumstances; however, every attempt should be made to obtain prior authorization before the transport takes place. Authorization requests for one day transports submitted beyond the next business day will be denied.
A request for a recurring transport must be submitted before the client is transported by ambulance. After a prior authorization request has been approved, if the client’s condition deteriorates or the need for equipment changes so that additional procedure codes must be submitted for the transport, the requesting provider must submit a new Nonemergency Ambulance Prior Authorization Request form.

Clients who require a hospital-to-hospital or hospital-to-outpatient medical facility transport are issued a PAN for that transport only.

Refer to: Subsection 4.2.1, “Prior Authorization Requirements” in the Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks) for more information on nonemergency prior authorization for hospitals.

TMHP reviews all of the documentation it receives. An online prior authorization request submitted through the TMHP website is responded to with an online approval or denial. Alternately, a letter of approval or denial is faxed to the requesting provider. The client is notified by mail if the authorization request is denied or downgraded. Reasons for denial include documentation that does not meet the criteria of a medical condition that is appropriate for transport by ambulance, or the client is not Medicaid-eligible for the dates of services requested. Clients may appeal prior authorization request denials by contacting TMHP Client Notification at 1-800-414-3406. Providers may not appeal prior authorization request denials.

The requesting provider must contact the transporting ambulance provider with the PAN and the dates of service that were approved.

Refer to: Subsection 5.5.1, “Prior Authorization Requests Through the TMHP Website” in this section for additional information, including mandatory documentation requirements and retention.

Providers are not required to fax medical documentation to TMHP; however, in certain circumstances, TMHP may request that the hospital fax the supporting documentation. Incomplete online or faxed request forms are not considered a valid authorization request and are denied.

A nonemergency transport will be denied when a claim is submitted with a Nonemergency Ambulance Prior Authorization Request Texas Medicaid and CSHCN Services Program form that is completed and signed after the service is rendered. In addition, a Nonemergency Ambulance Prior Authorization Request Texas Medicaid and CSHCN Services Program form that is completed and signed after the service is rendered will not be accepted on appeal of the denial.

The hospital must maintain documentation of medical necessity, including a copy of the authorization from TMHP in the client’s medical record for any item or service that requires prior authorization. The services provided must be clearly documented in the medical record with all pertinent information regarding the client’s condition to substantiate the need and medical necessity for the services.

5.1.8.3 Nonemergency Ambulance Exception Request

Clients whose physician has documented a debilitating condition and who require recurring trips that will extend longer than 60 days may qualify for an exception to the 60-day prior authorization request.

To request an exception, providers must submit all of the following documentation:

- A completed Nonemergency Ambulance Exception form that is signed and dated by a physician. Stamped or computerized signatures and dates are not accepted. Without a physician’s signature and date, the form is considered incomplete.
• Medical records that support the client’s debilitating condition, which may include, but is not limited to:
  • Discharge information.
  • Diagnostic images (e.g., MRI, CT, X-rays)
  • Care plan.

  Note: Documentation submitted with statements similar to “client has a debilitating condition” are insufficient.

5.1.8.4 Documentation of Medical Necessity and Run Sheets

5.1.8.4.1 Documentation of Medical Necessity
Retrospective review may be performed to ensure documentation supports the medical necessity of the transport.

Documentation to support medical necessity must include one of the following:

• The client is bed-confined before, during and after the trip and alternate means of transport is medically contraindicated and would endanger the client’s health (i.e., injury, surgery, or the use of respiratory equipment). The functional, physical, and mental limitations that have rendered the client bed-confined must be documented.

  Note: Bed-confined is defined as a client who is unable to stand, ambulate, and sit in a chair or wheelchair.

• The client’s medical or mental health condition is such that alternate means of transport is medically contraindicated and would endanger the client’s health (e.g., injury, surgery, or the use of respiratory equipment).

• The client is a direct threat to himself or herself or others, which requires the use of restraints (chemical or physical) or trained medical personnel during transport for client and staff safety (e.g., suicidal).

When physical restraints are needed, documentation must include, but is not limited to, the following:

• Type of restraint
• Time frame of the use of the restraint
• Client’s condition

  Note: The standard straps used in an ambulance transport are not considered a restraint.

5.1.8.4.2 Run Sheets
The run sheet is used as a medical record for ambulance services and may serve as a legal document to verify the care that was provided, if necessary. The ambulance provider does not have to submit the run sheet with the claim.

The ambulance provider must have documentation to support the claim. Without documentation that would establish the medical necessity of a nonemergency ambulance transport, the transport may not be covered by Texas Medicaid.

The ambulance provider may decline the transport if the client’s medical or mental health condition does not meet the medical necessity requirements.

It is the responsibility of the ambulance provider to maintain (and furnish to Texas Medicaid upon request) concise and accurate documentation. The run sheet must include the client’s physical assessment that explains why the client requires ambulance transportation and cannot be safely transported by an alternate means of transport.
Coverage will not be allowed if the trip record does not contain a sufficient description of the client’s condition at the time of the transfer for Texas Medicaid to reasonably determine that other means of transportation are contraindicated. Coverage will not be allowed if the description of the client’s condition is limited to statements or opinions such as the following:

- “Patient is nonambulatory.”
- “Patient moved by drawsheet.”
- “Patient could only be moved by stretcher.”
- “Patient is bed-confined.”
- “Patient is unable to sit, stand or walk.”

The run sheet should “paint a picture” of the client’s condition and must be consistent with documentation found in other supporting medical record documentation (including the nonemergency prior authorization request.)

5.1.8.5 Nonemergency Prior Authorization and Retroactive Eligibility

Retroactive eligibility occurs when the effective date of a client’s Medicaid coverage is before the eligibility “add date,” which is the date the client’s Medicaid eligibility is added to TMHP’s eligibility file.

For clients with retroactive eligibility, prior authorization requests must be submitted after the client’s add date and before a claim is submitted to TMHP.

For services that are provided to fee-for-service Medicaid clients during a client’s retroactive eligibility period (i.e., the period from the effective date to the add date), providers must obtain prior authorization within 95 days of the client’s add date and before submitting a claim for those services to TMHP.

For services provided on or after the client’s add date, the provider must obtain prior authorization within three business days of the date of service.

The provider is responsible for verifying eligibility. The provider is strongly encouraged to verify client eligibility through the Automated Inquiry System (AIS) or TMHP electronic data interchange (EDI) frequently while providing services to the client. If services are discontinued before the client’s add date, the provider must still obtain prior authorization within 95 days of the add date to be able to submit claims.

If a client’s Medicaid eligibility is pending, a PAN must be requested before a nonemergency transport. Initially this request will be denied for Medicaid eligibility. When Medicaid eligibility is established, the requestor has 95 days from the date on which the eligibility was added to TMHP’s files to contact the TMHP Ambulance Unit and request that authorization be considered.

To inquire about Medicaid eligibility, providers can contact AIS at 1-800-925-9126.

5.1.9 Nonemergency Transport Authorization for Medicare and Medicaid Clients

Providers should simultaneously request prior authorization for the nonemergency transport from TMHP for an Medicaid Qualified Medicare Beneficiary (MQMB) client in the event the service requested is denied by Medicare as a non-covered service.

Note: Qualified Medicare Beneficiary (QMB) clients are not eligible for Medicaid benefits. Providers can contact Medicare for the Medicare prior authorization guidelines.

5.2 Authorization Requirements for Unlisted Procedure Codes

Providers have the option to obtain prior authorization before rendering the service if all of the required information is available. When requesting a fee-for-service prior authorization for an unlisted procedure code, providers must submit the following information with the prior authorization request:

- Client’s diagnosis.
• Medical records that show the prior treatment for this diagnosis and the medical necessity of the requested procedure.
• A clear, concise description of the procedure to be performed.
• Reason for recommending this particular procedure
• A procedure code that is comparable to the procedure being requested.
• Documentation that this procedure is not investigational or experimental.
• Place of service in which the procedure is to be performed.
• The physician’s intended fee for this procedure including the manufacturer’s suggested retail price (MSRP) or other payment documentation.

If any of this information is unavailable at the time the prior authorization is requested, the request will be returned as incomplete; however, this is not a denial of reimbursement. If the required information becomes available before the service is performed, the prior authorization request can be resubmitted, or the required medical necessity and payment documentation can be submitted with the claim after the service is provided to be considered for reimbursement.

The prior authorization number must appear on the claim when it is submitted to TMHP. Claims submitted without the appropriate prior authorization will be denied.

5.3 Benefit Code
A benefit code is an additional data element that identifies a state program.

Providers that participate in the following programs must use the associated benefit code when they submit prior authorizations:

<table>
<thead>
<tr>
<th>Program</th>
<th>Benefit Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>Comprehensive Care Program (CCP)</td>
<td>CCP</td>
</tr>
<tr>
<td>Texas Health Steps (THSteps) Medical</td>
<td>EP1</td>
</tr>
<tr>
<td>THSteps Dental</td>
<td>DE1</td>
</tr>
<tr>
<td>Family Planning Agencies*</td>
<td>FP3</td>
</tr>
<tr>
<td>Hearing Aid Dispensers</td>
<td>HA1</td>
</tr>
<tr>
<td>Maternity</td>
<td>MA1</td>
</tr>
<tr>
<td>County Indigent Health Care Program</td>
<td>CA1</td>
</tr>
<tr>
<td>Early Childhood Intervention (ECI) providers</td>
<td>EC1</td>
</tr>
<tr>
<td>Tuberculosis (TB) Clinics</td>
<td>TB1</td>
</tr>
<tr>
<td>Texas Medicaid Home Health Durable Medical Equipment (DME)</td>
<td>DM2</td>
</tr>
<tr>
<td>Case Management Mental Retardation (MR) providers</td>
<td>MH2</td>
</tr>
</tbody>
</table>

*Agencies only—Benefit codes should not be used for individual family planning providers.

5.4 Submitting Prior Authorization Forms
Providers must complete all essential fields on prior authorization forms submitted to TMHP to initiate the prior authorization process.
If any essential field on a prior authorization request is incomplete or completed with inaccurate information, TMHP returns the original request to the provider with the following message:

*TMHP Prior Authorization could not process this request because the request form submitted has missing or incorrect information in one or more essential fields. Please resubmit the request with all essential fields completed with accurate information for processing by TMHP.*

TMHP uses the date that the complete and accurate request form is received to determine the start date for services. Previous submission dates of incomplete forms returned are not considered when determining the start date of service.

TMHP does not place prior authorization requests in a pending status when the required request form is submitted with missing or incorrect information in any essential field.

Essential fields contain information needed to process a prior authorization request and include the following:

- Client name
- Client Medicaid number (patient control number [PCN])
- Client date of birth
- Provider name
- TPI
- National Provider Identifier (NPI)
- Quantity of service units requested based on the CPT or HCPCS code requested

5.5 Prior Authorization Submission Methods

Prior authorization requests can be submitted by fax, mail, telephone, and online through the TMHP website at www.tmhp.com. The methods to use to request the prior authorization depends on the service being requested.

5.5.1 Prior Authorization Requests Through the TMHP Website

Online prior authorization requests for some services in the following areas can be submitted through the TMHP website at www.tmhp.com:

- Home Health
- Comprehensive Care Inpatient Psychiatric (CCIP)
- CCP
- Ambulance
- Substance Use Disorder (SUD) (Abuse and Dependence) services

The benefits of submitting prior authorization requests through the TMHP website include:

- Online editing to ensure that the required information is being submitted correctly.
- The prior authorization number is issued within seconds of submission and confirms that the prior authorization request was accepted. Before providing services, providers must confirm that the prior authorization was approved.
- Notification of approvals and denials are available more quickly.
• Extension requests and status checks can be performed online for prior authorization requests that were submitted online.

Providers can access online prior authorization requests from the “I would like to...” links located on the right-hand side of homepage of the TMHP website at www.tmhp.com. Select Submit a prior authorization request to submit a new request or Search for/extend an existing prior authorization to check the status of or extend a prior authorization request that was previously submitted through the TMHP website.

Instructions for submitting prior authorization requests on the TMHP website are located in the Help section at the bottom of the Prior Authorization page.

Prior authorizations that are submitted online will be processed using the same guidelines as prior authorizations submitted by other methods.

Before providers can submit online prior authorization requests, providers must register on the TMHP website and assign an administrator for each Texas Provider Identifier (TPI) and National Provider Identifier (NPI), if one is not already assigned. Users who are configured with administrator rights automatically have permission to submit prior authorization requests.

The TPI administrator can assign submission privileges for nonadministrator accounts. Billing services and clearinghouses must obtain access to protected health-care information through the appropriate administrator of each TPI/NPI provider number for which they are contracted to provide services.

5.5.1.1 Document Requirements and Retention

If information provided in the online request is insufficient to support medical necessity, TMHP Prior Authorization staff may ask the provider to submit additional paper documentation to support the medical necessity for the service being requested.

Submission of prior authorization requests on the secure pages of the TMHP website does not replace adherence to and completion of the paper forms/documentation requirements outlined in this manual and other publications.

Documentation requirements include, but are not limited to, the following:

• Documentation that supports the medical necessity for the service requested.
• Completion and retention in the client’s medical record of all required prior authorization forms
• Adherence to signature and date requirements for prior authorization forms and other required forms that are kept in the client record, including the following:
  • All prior authorization forms completed and signed before the online prior authorization request is made
  • Original handwritten signatures (Computerized or stamped signatures are not accepted by Texas Medicaid.)
• A printed copy of the Online Request Form, which must be retained in the client’s medical record

Any required documentation that is missing from the client’s medical record subjects the associated payments for services to be recouped.

5.5.1.1.1 Acknowledgement Statement

Before submitting each prior authorization request, providers (and submitters on behalf of providers) must affirm that they have read, understood, and agree to the certification and terms and conditions of the prior authorization request.

Providers and submitters are separately held accountable for their declarations after they have acknowledged their agreement and consent by checking the “We Agree” checkbox after reviewing the certification statement and terms and conditions.
5.5.1.1.2 Certification Statement:
“The Provider and Authorization Request Submitter certify that the information supplied on the prior authorization form and any attachments or accompanying information constitute true, correct, and complete information. The Provider and Authorization Request Submitter understand that payment of claims related to this prior authorization will be from federal and state funds, and that falsifying entries, concealment of a material fact, or pertinent omissions may constitute fraud and may be prosecuted under applicable federal and/or state law. Fraud is a felony, which can result in fines or imprisonment.

“By checking ‘We Agree’ you agree and consent to the Certification above and to the TMHP ‘Terms and Conditions.’”

5.5.1.1.3 Terms and Conditions:
“I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the state’s Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or U.S. Dept. of Health and Human Services may request. I further agree to accept, as payment in full, the amount paid by Medicaid for those claims submitted for payment under that program, with the exception of authorized deductible, coinsurance, copayment or similar cost-sharing charge. I certify that the services listed above are/were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction.

“Notice: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim, based on information provided on the Prior Authorization form, will be from federal and state funds, and that any false claims, statements or documents, or concealment of a material fact, may be prosecuted under applicable federal or state law.”

Omission of information or failure to provide true and accurate information or notice of changes to the information previously provided may result in termination of the provider’s Medicaid enrollment and/or personal exclusion from Texas Medicaid.

5.5.2 Prior Authorization Requests to TMHP by Fax, Telephone, or Mail
When submitting prior authorization requests through fax or mail, providers must submit the requests on the approved form. If necessary, providers may submit attachments with the form. Providers must follow the guidelines and requirements listed in the handbook for the service. Providers can refer to the provider handbooks for the guidelines and requirements listed for a specific service.

Prior authorization requests must be signed and dated by a physician or dentist who is familiar with the client’s medical condition before the request is submitted to TMHP. When allowed, prior authorizations must be signed and dated by an advanced practice registered nurse (APRN) or PA who is familiar with the client’s medical condition before the request is submitted to TMHP. Prior authorization requests for services that may be signed by a licensed health-care provider other than a physician, dentist, or when allowed by an APRN and PA, do not require handwritten signatures and dates. Electronic signatures from an RN or therapist are acceptable when submitting therapy requests for CCP.

All signatures and dates must be current, unaltered, and handwritten. Computerized or stamped signatures and dates are not permitted. Prior authorization requests that are submitted without a handwritten signature and date will be denied. TMHP will not authorize any dates of services on the request earlier than the date of the provider’s signature. The prior authorization request that contains the original signature must be kept in the client’s medical record for future access and possible retrospective review. These documentation requirements also apply to telephone authorizations. To avoid delays, providers are encouraged to have all clinical documentation at the time of the initial telephone authorization request.
5.5.2.1 TMHP Prior Authorization Requests by Fax

5.5.3 Radiology Prior Authorizations Through MedSolutions

MedSolutions, Inc., performs radiology prior authorization services on behalf of TMHP.
Refer to: Subsection 3.2.6, “Authorization Requirements for CT, CTA, MRI, fMRI, MRA, PET, and Cardiac Nuclear Imaging Services” in the Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks) to determine which radiology services require a prior authorization through MedSolutions.

5.5.3.1 Online Prior Authorizations Through MedSolutions

Radiology prior authorization requests may be submitted through the MedSolutions website at www.medsolutionsonline.com. The TMHP website at www.tmhp.com also has links to the MedSolutions website.

5.5.3.2 Prior Authorizations to MedSolutions by Fax, Telephone, or Mail

When submitting radiology prior authorization requests to MedSolutions by fax or mail, providers must use the approved Form RL.1, “Radiology Prior Authorization Request Form” in the Radiology and Laboratory Services Handbook (Vol 2., Provider Handbooks).

Telephone: 1-800-572-2116
Fax: 1-800-572-2119
Mail: Texas Medicaid & Healthcare Partnership
730 Cool Springs Blvd., Suite 800
Franklin, TN 37067

5.5.3.3 Retroactive Authorization Requests

Retroactive authorization requests for outpatient diagnostic computed tomography (CT), magnetic resonance (MR), positron emission tomography (PET) and cardiac nuclear imaging services for Texas Medicaid fee-for-service clients must be submitted online to MedSolutions. The retroactive authorizations requests must be submitted to MedSolutions no later than 14 calendar days after the day on which the study was completed, regardless of the method of submission. If the retroactive authorization request is submitted after the allotted time, the authorization request will not be processed. Providers can refer to the TMHP website for MedSolutions’ contact information and methods of submission.

5.6 Verifying Prior Authorization Status

Prior authorizations are processed based on the date the request is received. Requests with all required information can take up to three business days after the date of receipt for TMHP to complete the authorization process.

Providers can check the status of prior authorizations requested online through the TMHP website at www.tmhp.com.

Providers may also check status of prior authorizations that are issued by TMHP by using the following numbers.

<table>
<thead>
<tr>
<th>Contact</th>
<th>Telephone Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Personal Care Services (PCS) Prior Authorization Inquiry Line</td>
<td>1-888-648-1517</td>
</tr>
<tr>
<td>CCP and Home Health Status Line</td>
<td>1-800-846-7470</td>
</tr>
<tr>
<td>All other authorization requests</td>
<td>1-800-925-9126</td>
</tr>
</tbody>
</table>

To check the status of radiology prior authorization requests that are submitted to MedSolutions, providers should contact MedSolutions directly at www.medsolutionsonline.com or 1-800-572-2116.

5.7 Prior Authorization Notifications

TMHP sends a notification to the provider when the prior authorization is approved, denied, or modified. If TMHP receives prior authorization requests with incomplete or insufficient information, TMHP will ask the requesting provider to furnish the additional documentation needed before TMHP
can make a decision on the request. If the requesting provider does not respond to the request for additional information, the prior authorization request will be denied. It is the requesting provider’s responsibility to contact the appropriate provider, when necessary, to obtain the additional documentation.

5.8 Prior Authorization Denials Appeals Process

Prior authorizations that are denied by TMHP can be resubmitted to the TMHP Prior Authorization Department with new or additional information for reconsideration.

If the request is denied a second time, or if the provider has no new or additional information, the provider may file an Administrative Appeal to HHSC. Providers must include a copy of the denial letter.

It is strongly recommended that providers maintain a list that details the prior authorizations, including:

- Client’s name
- Client’s Medicaid number
- Date of service
- Provider Identifier
- Items submitted

This information will be required if a provider needs to file an administrative review.

5.9 Closing a Prior Authorization

When a client decides to change providers or elects to discontinue prior-authorized services before the authorization ends, that prior authorization is updated to reflect the early closure date and the reason for closure.

If a client with an active prior authorization changes providers, TMHP must receive a change of provider letter with the request for a new prior authorization in accordance with submission guidelines for the service. The client must sign and date the letter, which must include the name of the previous provider, the current provider, and the effective date for the change.

The client is responsible for notifying the previous provider that the client is discontinuing services and the effective date of the change. TMHP also notifies the previous provider by mail when a prior authorization has been closed early. The letter includes the beginning date of service, the revised ending date of the authorization, and the reason for the early closure.

5.10 Submitting Claims for Services That Require Prior Authorization

 Claims submitted for services that require prior authorization must indicate the authorization number, provider identifier, procedure codes, dates of service, required modifiers, number of units, and the amount for manually priced procedure codes as detailed on the authorization letter. If the prior authorization letter shows itemized details and the provider rendered all services listed, the details on the claim must match the details on the prior authorization letter.

**Important:** Claims processing and payment may be delayed if the detailed information on the authorization letter and the claim details do not match exactly.

Claims for prior authorized services must contain only one prior authorization number per claim. Prior authorization numbers must be indicated on the applicable electronic fields or in the following blocks for paper claim forms:

<table>
<thead>
<tr>
<th>Paper Claim Form</th>
<th>Block for Prior Authorization Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMS-1500 (professional) claim form</td>
<td>Block 23</td>
</tr>
</tbody>
</table>
5.11 Guidelines for Procedures Awaiting Rate Hearing

For procedure codes that require prior authorization but are awaiting a rate hearing, providers must follow the established prior authorization process as defined in the applicable provider handbook. Providers must obtain a timely prior authorization for services provided. Providers must not wait until the rate hearing process for the procedure codes is completed to request prior authorization. In this situation, retroactive prior authorization requests are not granted; the requests are denied as late submissions. Providers are also responsible for meeting the initial 95-day filing deadline and for ensuring that the prior authorization number is on the claim the first time it is submitted to TMHP for consideration of reimbursement.

Claims for procedure codes awaiting a rate hearing are denied. TMHP automatically reprocesses affected claims; providers are not required to appeal the claims unless they are denied for additional reasons after the claims reprocessing is complete. If the required prior authorization number is not on the claim at the time of reprocessing, the claim is denied for lack of prior authorization.

6.1 Claims Information

Providers that render services to Texas Medicaid fee-for-service and managed care clients must file the assigned claims. Texas Medicaid does not make payments to clients. Federal regulations prohibit providers from charging clients a fee for completing or filing Medicaid claim forms. Providers are not allowed to charge TMHP for filing claims. The cost of claims filing is part of the usual and customary rate for doing business. Providers cannot bill Texas Medicaid or Medicaid clients for missed appointments or failure to keep an appointment. Only claims for services rendered are considered for payment.

Medicaid providers are also required to complete and sign authorized medical transportation forms (e.g., Form 3103, Individual Driver Registrant (IDR) Service Record, or Form 3111, Verification of Travel to Healthcare Services by Mass Transit) or provide an equivalent (e.g., provider statement on official letterhead) to attest that services were provided to a client on a specific date. The client presents these forms to the provider.

Providers are not allowed to bill clients or Texas Medicaid for completing these forms.

6.1.1 TMHP Processing Procedures

TMHP processes claims for services rendered to Texas Medicaid fee-for-service clients and carve-out services rendered to Medicaid managed care clients.

Note: Claims for services rendered to a Medicaid managed care client must be submitted to the managed care organization (MCO) or dental plan that administers the client’s managed care benefits. Only claims for those services that are carved-out of managed care can be submitted to TMHP.

Refer to: Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks) for more information about carve-out services.

Medicaid claims are subject to the following procedures:

- TMHP verifies all required information is present.
- Claims filed under the same provider identifier and program and ready for disposition at the end of each week are paid to the provider with an explanation of each payment or denial. The explanation is called the Remittance and Status (R&S) Report, which may be received as a downloadable portable document format (PDF) version or on paper. A Health Insurance Portability and Accountability Act (HIPAA)-compliant 835 transaction file is also available for those providers who wish to import claim dispositions into a financial system.

An R&S Report is generated for providers that have weekly claim or financial activity with or without payment. The report identifies pending, paid, denied, and adjusted claims. If no claim activity or outstanding account receivables exist during the time period, an R&S Report is not generated for the week.

- For services that are billed on a claim and have any benefit limitations for providers, the date of service determines which provider’s claims are paid, denied, or recouped. Claims that have been submitted and paid may be recouped if a new claim with an earlier date of service is submitted, depending on the benefit limitations for the services rendered.

Services that have been authorized for an extension of the benefit limitation will not be recouped. Providers can submit an appeal with medical documentation if the claim has been denied.
6.1.1.1 Fiscal Agent

TMHP acts as the state’s Medicaid fiscal agent. A fiscal agent arrangement is one of two methods allowed under federal law and is used by all other states that contract with outside entities for Medicaid claims payment. Under the fiscal agent arrangement, TMHP is responsible for paying claims, and the state is responsible for covering the cost of claims.

Note: The fiscal agent arrangement does not affect Long Term Care (LTC) and Department of State Health Services (DSHS) Family Planning providers.

Provider Designations

The fiscal agent arrangement requires that providers be designated as either public or nonpublic. By definition, public providers are those that are owned or operated by a city, state, county, or other government agency or instrumentality, according to the Code of Federal Regulations. In addition, any provider or agency that performs intergovernmental transfers to the state would be considered a public provider. This includes those agencies that can certify and provide state matching funds, (i.e., other state agencies). New providers self-designate (public or private) on the provider enrollment application.

The fiscal agent:

- Rejects all claims not payable under Texas Medicaid rules and regulations.
- Suspend payments to providers according to procedures approved by HHSC.
- Notifies providers of reduction in claim amount or rejection of claim and the reason for doing so.
- Collects payments made in error, affects a current record credit to the department, and provides the department with required data relating to such error corrections.
- Prepares checks or drafts to providers, except for cases in which the department agrees that a basis exists for further review, suspension, or other irregularity within a period not to exceed 30 days of receipt and determination of proper evidence establishing the validity of claims, invoices, and statements.
- Makes provisions for payments to providers who have furnished eligible client benefits.
- Withholds payment of claim when the eligible client has another source of payment.
- Employs and assigns a physician, or physicians, and other professionals as necessary, to establish suitable standards for the audit of claims for services delivered and payment to eligible providers.
- Requires eligible providers to submit information on claim forms.

6.1.1.2 Payment Error Rate Measurement (PERM)

The Improper Payments Information Act (IPIA) of 2002 directs federal agency heads, in accordance with the Office of Management and Budget (OMB) guidance, to annually review agency programs that are susceptible to significant erroneous payments and to report the improper payment estimates to the U.S. Congress.

Every three years the Centers for Medicare & Medicaid Services (CMS) will assess the Texas Medicaid Program using the PERM process to measure improper payments in the Texas Medicaid Program and the Children’s Health Insurance Program (CHIP).

CMS uses PERM to measure the accuracy of Medicaid and CHIP payments made by states for services rendered to clients. Under the PERM program, CMS will use three national contractors to measure improper payments in Medicaid and CHIP:

- The statistical contractor will provide support to the program by identifying the claims to be reviewed and by calculating each state’s error rate.
- The data documentation contractor will collect medical policies from the State and medical records from providers.
• The review contractor will perform medical and data processing reviews of the selected claims in order to identify any improper payments.

Providers are required to provide medical record documentation to support the medical reviews that the federal review contractor will conduct for Texas Medicaid fee-for-service and CHIP claims.

**Note:** The federal review contractor will also conduct reviews for Primary Care Case Management (PCCM) claims that were submitted to TMHP with dates of service on or before February 29, 2012.

Past studies have shown that the largest cause of error in medical reviews is lack of documentation or insufficient documentation. It is important that information be sent in a timely and complete manner, since a provider’s failure to timely submit complete records in support of the claims filed can result in a higher payment error rate for Texas, which in turn can negatively impact the amount of federal funding received by Texas for Medicaid and CHIP.

Providers must submit the requested medical records to the data documentation contractor and HHSC within 60 calendar days of the receipt of the written notice of request. If providers have not responded within 15 days, the data documentation contractor and possibly state officials will initiate reminder calls and letters to providers. The data documentation contractor and possibly state officials will also initiate reminder calls and letters to providers after 35 days. If providers have not responded in 60 days, the data documentation contractor will submit a letter to the provider and the state PERM director indicating a “no documentation error”. After the provider’s submittal of requested information, the data documentation contractor may request additional information to determine proper payment. In this instance, the provider is given 15 days to provide additional documentation.

If medical records are not received within 60 calendar days, the data documentation contractor will identify the claim as a PERM error and classify all dollars associated with the claim as an overpayment. Providers will be required to reimburse the overpayment in accordance with state and federal requirements.

A provider’s failure to maintain complete and correct documentation in support of claims filed or failure to provide such documentation upon request can result in the provider being sanctioned under Title 1, Texas Administrative Code (TAC) Part 15, Chapter 371. Sanction actions may include, but are not limited to, a finding of overpayment for the claims that are not sufficiently supported by the required documentation. Sanctions may include, but are not limited to, a finding of overpayment for the claims that are not sufficiently supported by the required documentation.

### 6.1.2 Claims Filing Instructions

This manual references paper claims when explaining filing instructions. HHSC and TMHP encourage providers to submit claims electronically. TMHP offers specifications for electronic claim formats. These specifications are available from the TMHP website and include a cross-reference of the paper claim filing requirements to the electronic format.

Providers can participate in the most efficient and effective method of submitting claims to TMHP by submitting claims through the TMHP Electronic Data Interchange (EDI) claims processing system using TexMedConnect or a third party vendor. The proceeding claim filing instructions in this manual apply to paper and electronic submitters. Although the examples of claims filing instructions refer to their inclusion on the paper claim form, claim data requirements apply to all claim submissions, regardless of the media. Claims must contain the provider’s complete name, address, and provider identifier to avoid unnecessary delays in processing and payment.

**Refer to:** Section 3: TMHP Electronic Data Interchange (EDI) *(Vol. 1, General Information)* for information on accessing the TMHP website.
6.1.2.1 Wrong Surgery Notification

Providers are required to notify TMHP when a wrong surgery or other invasive procedure is performed on a Texas Medicaid client. Notification is mandated by SB 203, Section 3, Regular Session, 81st Texas Legislature, which covers preventable adverse events (PAE) and reimbursement for services associated with PAE.

Professional, inpatient, and outpatient hospital claims that are submitted for the wrong surgery or invasive procedure will be denied. Any corresponding procedures that are rendered to the same client, on the same dates of service (for professional and outpatient hospital claims), or the same date of surgery (for inpatient hospital claims) will be denied. Claims that have already been reimbursed will be recouped.

The law requires providers that are submitting claims for services rendered to Texas Medicaid clients to indicate whether any of the following situations apply to the claim:

- The incorrect operation or invasive procedure was performed on the correct client.
- The operation or invasive procedure was performed on the incorrect client.
- The incorrect operation or invasive procedure was performed on the incorrect body part.

Providers must notify Texas Medicaid of a wrong surgery or invasive procedure by submitting one of the following E diagnosis codes or modifiers with the procedure code for the rendered service:

<table>
<thead>
<tr>
<th>Code</th>
<th>Description</th>
<th>Type of Claim</th>
</tr>
</thead>
<tbody>
<tr>
<td>E8765</td>
<td>Performance of wrong operation (procedure) on correct patient</td>
<td>Inpatient hospital</td>
</tr>
<tr>
<td>E8766</td>
<td>Performance of operation (procedure) on patient not scheduled for surgery</td>
<td></td>
</tr>
<tr>
<td>E8767</td>
<td>Performance of correct operation (procedure) on wrong side or body part</td>
<td></td>
</tr>
</tbody>
</table>

Modifiers

<table>
<thead>
<tr>
<th>Modifier</th>
<th>Description</th>
<th>Type of Claim</th>
</tr>
</thead>
<tbody>
<tr>
<td>PA</td>
<td>Surgical or other invasive procedure on wrong body part</td>
<td>Professional or outpatient hospital</td>
</tr>
<tr>
<td>PB</td>
<td>Surgical or other invasive procedure on wrong patient</td>
<td></td>
</tr>
<tr>
<td>PC</td>
<td>Wrong surgery or other invasive procedure on patient</td>
<td></td>
</tr>
</tbody>
</table>

Professional or outpatient hospital claims must include a valid three- to five-digit diagnosis code, the procedure code that identifies the service rendered, and the PA, PB, or PC modifier that describes the type of “wrong surgery” performed.

Inpatient hospital claims must be submitted with type of bill (TOB) 110 as an inpatient hospital-nonpayment claim when a “wrong surgery” is reported. If other services or procedures that are unrelated to the “wrong surgery” are provided during the same stay as the “wrong surgery,” the inpatient hospital must submit a claim for the “wrong surgery” and a separate claim or claims for the unrelated services rendered during the same stay as the “wrong surgery.”

The “wrong surgery” claim must include TOB 110, the appropriate E diagnosis code, the surgical procedure code for the surgical service rendered, and the date of surgery. The “wrong surgery” claim will be denied.

The unrelated services rendered during the same stay as the “wrong surgery” must include TOB 111, 112, 113, 114, or 115 on a claim separate from the “wrong surgery” claim. The unrelated services that are benefits of Texas Medicaid may be reimbursed by Texas Medicaid.
A claim that is denied for wrong surgery will have one of the following EOB codes:

<table>
<thead>
<tr>
<th>EOB Code</th>
<th>Message</th>
</tr>
</thead>
<tbody>
<tr>
<td>01167</td>
<td>Claim detail denied due to wrong surgery performed on client</td>
</tr>
<tr>
<td>01168</td>
<td>Claim denied due to wrong surgery performed on client</td>
</tr>
<tr>
<td>01185</td>
<td>Claim denied due to wrong surgery claim found in history for the same PCN and DOS</td>
</tr>
<tr>
<td>01186</td>
<td>Claim detail denied due to wrong surgery claim found in history for the same PCN and DOS</td>
</tr>
</tbody>
</table>

PCN = Patient Control Number (also known as the client’s Medicaid number) DOS = Date of service

6.1.2.2 **Maximum Number of Units allowed per Claim Detail**

The total number of units per claim detail can not exceed 9,999. Providers who submit a claim with more than 9,999 units must bill 9,999 units on the first detail of the claim and any additional units on separate details.

6.1.2.3 **Tips on Expediting Paper Claims**

Use the following guidelines to enhance the accuracy and timeliness of paper claims processing.

**General requirements**

- Use original claim forms. Do not use copies of claim forms.
- Detach claims at perforated lines before mailing.
- Use 10 x 13 inch envelopes to mail claims. Do not fold claim forms, appeals, or correspondence.
- Do not use labels, stickers, or stamps on the claim form.
- Do not send duplicate copies of information.
- Use 8 ½ x 11 inch paper. Do not use paper smaller or larger than 8 ½ x 11 inches.
- Do not mail claims with correspondence for other departments.

**Data Fields**

- Print claim data within defined boxes on the claim form.
- Use black ink, but not a black marker. Do not use red ink or highlighters.
- Use all capital letters.
- Print using 10-pitch (12-point) Courier font. Do not use fonts smaller or larger than 12 points. Do not use proportional fonts, such as Arial or Times Roman.
- Use a laser printer for best results. Do not use a dot matrix printer, if possible.
- Do not use dashes or slashes in date fields.

**Attachments**

- Use paper clips on claims or appeals if they include attachments. Do not use glue, tape, or staples.
- Place the claim form on top when sending new claims, followed by any medical records or other attachments.
- Number the pages when sending when sending attachments or multiple claims for the same client (e.g., 1 of 2, 2 of 2).
- Do not total the billed amount on each claim form when submitting multi-page claims for the same client.
• Use the CMS-approved Medicare Remittance Advice Notice (MRAN) printed from Medicare Remit Easy Print (MREP) (professional services) or PC-Print (institutional services) when sending a Remittance Advice from Medicare or the paper MRAN received from Medicare or a Medicare intermediary. You may also download a TMHP-approved MRAN template from the TMHP website at www.tmhp.com.

• Submit claim forms with MRANs and R&S Reports.

6.1.3 TMHP Paper Claims Submission

All paper claims must be submitted with a Texas Provider Identifier (TPI) and National Provider Identifier (NPI) for the billing and performing providers. All other provider fields on the claim forms require an NPI only. If an NPI and TPI are not included in the billing and performing provider fields, or if an NPI is not included on all other provider identifier fields, the claim will be denied.

6.1.4 Claims Filing Deadlines

For claims payment to be considered, providers must adhere to the time limits described in this section. Claims received after the following claims filing deadlines are not payable because Texas Medicaid does not provide coverage for late claims.

**Exception:** Unless otherwise stated below, claims must be received by TMHP within 95 days from each date of service (DOS). Appeals must be received by TMHP within 120 days of the disposition date on the R&S Report on which the claim appears. A 95-day or 120-day appeal filing deadline that falls on a weekend or a holiday is extended to the next business day following the weekend or holiday.

Only the following holidays extend the deadlines in 2012 and 2013:

<table>
<thead>
<tr>
<th>Date</th>
<th>Holiday</th>
</tr>
</thead>
<tbody>
<tr>
<td>January 2, 2012*</td>
<td>New Year’s Day (federal holiday)</td>
</tr>
<tr>
<td>January 16, 2012</td>
<td>Martin Luther King, Jr. Day</td>
</tr>
<tr>
<td>February 20, 2012</td>
<td>Presidents Day</td>
</tr>
<tr>
<td>May 28, 2012</td>
<td>Memorial Day</td>
</tr>
<tr>
<td>July 4, 2012</td>
<td>Independence Day</td>

* Federal holiday, but not a state holiday. The claims filing deadline will be extended for providers because the Post Office will not be operating on this day.
The following are time limits for submitting claims:

- Inpatient claims filed by the hospital must be received by TMHP within 95 days of the discharge date or last DOS on the claim.
  - Hospitals reimbursed according to diagnosis-related group (DRG) payment methodology may submit an interim claim because the client has been in the facility 30 consecutive days or longer. A total stay claim is needed after discharge to ensure accurate calculation for potential outlier payments for clients who are 20 years of age and younger.
  - Children’s hospitals reimbursed according to Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982 methodology may submit interim claims before discharge and must submit an interim claim if the client remains in the hospital past the hospital’s fiscal year end.

- When medical services are rendered to a Medicaid client in Texas, TMHP must receive claims within 95 days of the DOS on the claim.

- Claims submitted by newly enrolled providers must be received within 95 days of the date the new provider identifier is issued, and within 365 days of the DOS.

- TMHP must receive claims from out-of-state providers within 365 days from the DOS. The DOS is the date the service is provided or performed.

- TMHP must receive claims on behalf of an individual who has applied for Medicaid coverage but has not been assigned a Medicaid number on the DOS within 95 days from the date the eligibility was added to the TMHP eligibility file (add date) and within 365 days of the date of service or from the discharge date for inpatient claims.
  - Providers should verify eligibility and add date by contacting TMHP (Automated Inquiry System [AIS], TMHP EDI’s electronic eligibility verification, or TMHP Contact Center) when the number is received. Not all applicants become eligible clients. Providers that submit claims electronically within the 365-day federal filing deadline for services rendered to individuals who do not currently have a Texas Medicaid identification number will receive an electronic rejection. Providers can use the TMHP rejection report as proof of meeting the 365-day federal filing deadline and submit an administrative appeal.

**Important:** Providers should request and keep hard copies of any Medicaid Eligibility Verification (Form H1027) submitted by clients or proof of client eligibility from the Your Texas Benefits Medicaid card website at www.yourtexasbenefitscard.com. A copy is required during the appeal process if the client’s eligibility becomes an issue.

- If a client becomes retroactively eligible or loses Medicaid eligibility and is later determined to be eligible, the 95-day filing deadline begins on the date that the eligibility start date was added to TMHP files (the add date). However, the 365-day federal filing deadline must still be met.

- When a service is a benefit of Medicare and Medicaid, and the client is covered by both programs, the claim must be filed with Medicare first. TMHP must receive Medicaid claims within 95 days of the date of Medicare disposition.

Providers must submit a paper MRAN received from Medicare or a Medicare intermediary, the computer-generated MRANs from the CMS-approved software application MREP for professional services or PC-Print for institutional services, or the TMHP Standardized MRAN Form with a completed claim form to TMHP.
• When a client is eligible for Medicare Part B only, the inpatient hospital claim for services covered as Medicaid only is sent directly to TMHP and is subject to the 95-day filing deadline (from date of discharge).

  **Note:** It is strongly recommended that providers who submit paper claims keep a copy of the documentation they send. It is also recommended that paper claims be sent by certified mail with a return receipt requested. This documentation, along with a detailed listing of the claims enclosed, provides proof that the claims were received by TMHP, which is particularly important if it is necessary to prove that the 95-day claims filing deadline has been met. TMHP will accept certification receipts as proof of the 95-day or 120-filing deadline. For this, the provider must provide the following: certification receipt, log to include information in the packet, Medicaid number, billed amount, DOS, and a signed claim copy. The provider needs to keep such proof of multiple claims submissions if the provider identifier is pending.

• If the provider is attempting to obtain prior authorization for services performed or will be performed, TMHP must receive the claim according to the usual 95-day filing deadline.

• The provider bills TMHP directly within 95 days from the DOS. However, if a non-third party resource (TPR) is billed first, TMHP must receive the claim within 95 days of the claim disposition by the other entity.

  **Note:** The provider submits a copy of the disposition with the claim. A non-TPR is secondary to Texas Medicaid and may only pay benefits after Texas Medicaid.

Refer to: Subsection 4.14, “Third Party Liability (TPL)” in Section 4, “Client Eligibility” (Vol. 1, General Information) for examples of non-TPRs.

• When a service is billed to another insurance resource, the filing deadline is 95 days from the date of disposition by the other resource.

• When a service is billed to a third party and no response has been received, Medicaid providers must allow 110 days to elapse before submitting a claim to TMHP. However, the 365-day federal filing deadline requirement must still be met.

• A Compass21 (C21) process allows a DSHS Family Planning claim to be paid by Title XIX (Medicaid) if the client is eligible for Title XIX when those services are provided and billed under the DSHS Family Planning Program. In this instance, the Medicaid 95-day filing deadline is in effect and must be met or the claim will be denied.

• For claims re-submitted to TMHP with additional detail charges (i.e., quantity billed), the additional details are subject to the 95-day filing deadline.

  **Note:** In accordance with federal regulations, all claims must be initially filed with TMHP within 365 days of the DOS, regardless of provider enrollment status or retroactive eligibility.

Refer to: Subsection 6.1.2, “Claims Filing Instructions” in this section.

Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for information on the provider enrollment process.

Subsection 6.1.4.3, “Exceptions to the 95-Day Filing Deadline” in this section.

“Automated Inquiry System (AIS)” in “Preliminary Information” (Vol. 1, General Information) to learn how to retrieve client eligibility information by telephone.

Subsection 6.11.6, “Provider Inquiries—Status of Claims” in this section.

### 6.1.4.1 Claims for Clients with Retroactive Eligibility

Claims for clients who receive retroactive eligibility must be submitted within 95 days of the date that the client’s eligibility was added to the TMHP eligibility file (add date) and within 365 days of the DOS.

Title 42 of the Code of Federal Regulations (42 CFR), at 447.45 (d) (1), states “The Medicaid agency must require providers to submit all claims no later than 12 months from the date of service.” The 12-month filing deadline applies to all claims. Claims not submitted within 365 days (12 months) from the date of service cannot be considered for payment.

Retroactive eligibility does not constitute an exception to the federal filing deadline. Even if the patient’s Medicaid eligibility determination is delayed, the provider must still submit the claim within 365 days of the date of service. A claim that is not submitted within 365 days of the date of service will not be considered for payment.

To submit a claim for services provided to a patient who is not yet eligible for Medicaid, Texas Medicaid allows providers to submit claims using a pseudo recipient identification number such as 999999999 or 000000000. Although TMHP will deny the claim, providers should retain the denial or electronic rejection report for proof of timely filing, especially if the eligibility determination occurs more than 365 days after the date of service. Claims denied for recipient ineligibility may be resubmitted when the patient becomes eligible for the retroactive date(s) of service. Texas Medicaid may then consider the claim for payment because the initial claim was submitted within the 365-day federal filing deadline and the denial was not the result of an error by the provider.

If the 365-day federal filing deadline requirement has passed, providers must submit the following to TMHP within 95 days from the add date:

- A completed claim form.
- One of the following dated within 365 days from the date of service:
  - A page from a Remittance and Status (R&S) Report documenting a denial of the claim.
  - An electronic rejection report of the claim that includes the Medicaid recipient’s name and date of service.

Providers that have submitted their claims electronically can provide proof of timely filing by submitting a copy of an electronic claims report that includes the following information:

- Client name or Medicaid identification number (patient control number [PCN])
- DOS
- Total charges
- Batch identification number (Batch ID) (in correct format)

**Note:** Only reports that were accepted or rejected by TMHP will be honored. The claim filed (client name or PCN, DOS and total charges) should match the information on the batch report.

### 6.1.4.2 Claims for Newly Enrolled Providers

Claims submitted by newly enrolled providers must be received within 95 days of the date that the new provider identifier is issued, and within 365 days of the date of service. Providers with a pending application should submit any claims that are nearing the 365-day deadline from the date of service. Claims will be rejected by TMHP until a provider identifier is issued. Providers can use the TMHP rejection report as proof of meeting the 365-day deadline and submit an appeal.
Refer to: Subsection 1.1.7.11, “Copy of License, Temporary License, or Certification” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).

All claims for services rendered to Texas Medicaid clients who do not have Medicare benefits are subject to a filing deadline from the date of service of:

- 95 days for in-state providers.
- 365 days for out-of-state providers.

TMHP cannot issue a prior authorization before Medicaid enrollment is complete. Upon notice of Medicaid enrollment, by way of issuance of a provider identifier, the provider must contact the appropriate TMHP Authorization Department before providing services that require a prior authorization number to Medicaid clients. Regular prior authorization procedures are followed after the TMHP Prior Authorization Department has been contacted.

Retroactive authorizations will not be issued unless the regular authorization procedures for the requested services allow for authorizations to be obtained after services are provided. For these services, providers have 95 days from the add date of the client’s retroactive eligibility in TMHP’s system to obtain authorization for services that have already been performed. Providers should refer to the specific manual section for details on authorization requirements, claims filing, and timeframe guidelines for authorization request submissions.

Providers who have not been assigned a provider identifier and have general claim submission questions may refer to this section for assistance with claim submission. If additional general information is needed, providers may call the TMHP Contact Center at 1-800-925-9126 to obtain information. Due to HIPAA privacy guidelines, specific client and claim information cannot be provided.

Providers who have already been assigned a provider identifier and have questions about submitting claims may call the same number and select the option to speak with a TMHP Contact Center representative.

6.1.4.3 Exceptions to the 95-Day Filing Deadline

TMHP is not responsible for appeals about exceptions to the 95-day filing deadline. These appeals must be submitted to the HHSC Claims Administrator Contract Management. TAC allows HHSC to consider exceptions to the 95-day filing deadline under special circumstances.

6.1.4.4 Appeal Time Limits

All appeals of denied claims and requests for adjustments on paid claims must be received by TMHP within 120 days from the date of disposition, the date of the R&S Report on which that claim appears. If the 120-day appeal deadline falls on a weekend or holiday, the deadline will be extended to the next business day.

Refer to: Subsection 6.1.2, “Claims Filing Instructions” in this section.

Hospitals appealing final technical denials, admission denials, DRG changes, continued-stay denials, or cost/day outlier denials refer to Section 7: Appeals (Vol. 1, General Information) for complete appeal information.

6.1.4.5 Claims with Incomplete Information and Zero Paid Claims

Claims listed on the R&S Report with $0 allowed and $0 paid may be resubmitted as electronic appeals. Previously, these claims were only accepted as paper claims and were not accepted as electronic appeals. Appeals may be submitted through a third party biller or through TexMedConnect.

Zero-paid claims that are still within the 95-day filing deadline should be submitted as new day claims, which are processed faster than appeals. Electronic appeal for these claims must be submitted within the
120-day appeal deadline. Electronic claims can be resubmitted past the 95-day deadline as new day claims if the following fields have not changed:

- Provider identifiers
- Client Medicaid number
- Dates of service
- Total billed amount

Claims that are past the 95-day filing deadline and require changes to the fields listed above must be appealed on paper, with a copy of the R&S report. All other appeal guidelines remain unchanged.

**Important:** Initial zero-paid claims and appeal submissions must meet the 95-day deadline and 120-day appeal deadline outlined in subsection 6.1.4, “Claims Filing Deadlines” in this section.

### 6.1.4.6 Claims Filing Reminders

After filing a claim to TMHP, providers should review the weekly R&S Report. If within 30 days the claim does not appear in the **Claims In Process** section, or if it does not appear as a paid, denied, or incomplete claim, the provider should resubmit it to TMHP within 95 days of the DOS.

The provider should allow TMHP 45 days to receive a Medicare-paid claim automatically transmitted for payment of deductible or coinsurance.

Electronic billers should notify TMHP about missing claims when:

- An accepted claim does not appear on the R&S Report within ten workdays of the file submittal.
- A claim or file does not appear on a TMHP Electronic Claims Submission Report within ten days of the file submission.

Certain claims, including those that were submitted for newborn services or that might be covered under Medicare, are suspended for review so that other state agencies can verify information. This review may take longer than 60 days.

These suspended claims will appear on the provider’s R&S Report under “The following claims are being processed” with a message indicating that the client’s eligibility is being investigated. Providers must wait until the claim is finalized and appears under “Paid or Denied” or “Adjustment to Claims” on the R&S Report before appealing the claim. If the claim does not appear on the R&S Report, providers must resubmit the claim to TMHP to ensure compliance with filing and appeal deadlines.

### 6.1.5 HHSC Payment Deadline

Payment deadline rules, as defined by HHSC, affect all providers with the exception of LTC and the DSHS Family Planning Program. The HHSC payment deadline rules for the fiscal agent arrangement ensure that state and federal financial requirements are met.

TMHP is required to finalize and pay claims within 24 months of:

- Each date of service on a claim.
- Discharge date for inpatient claims.

Texas Medicaid and Children with Special Health Care Needs (CSHCN) Service Program payments, excluding crossovers, cannot be made after 24 months. Claims and appeals that are submitted after the designated payment deadlines are denied.

**Note:** Providers may appeal HHSC Office of Inspector General (OIG) initiated claims adjustments (recoupments) after the 24-month deadline but must do so within 120 days from the date of the recoupment. Refer to subsection 7.1.5, “Paper Appeals” in Section 7, “Appeals” (Vol. 1, General Information) for instructions. All appeals of OIG recoupments must be submitted by paper, no electronic or telephone appeals will be accepted.
If the 95th or 120th day falls on a weekend or holiday, the filing or appeal deadline is extended to the next business day.
### 6.1.5.2 Filing Deadline Calendar for 2013

**Note:** If the 95th or 120th day falls on a weekend or holiday, the filing or appeal deadline is extended to the next business day.

6.2 TMHP Electronic Claims Submission

TMHP uses the HIPAA-compliant American National Standards Institute (ANSI) ASC X12 5010 file format through secure socket layer (SSL) and virtual private networking (VPN) connections for maximum security.

Claims may be submitted electronically to TMHP through TexMedConnect on the TMHP website at www.tmhp.com or through billing agents who interface directly with the TMHP EDI Gateway.

Providers must retain all claim and file transmission records. They may be required to submit them for pending research on missing claims or appeals.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information).

6.2.1 Benefit and Taxonomy Codes

Providers that submit electronic claims are required to submit new data fields. The Benefit Code field (when applicable), Address field, and Taxonomy Code field must be completed before submitting electronic claims.

Taxonomy codes do not affect pricing or the level of pricing, but rather are used to crosswalk the NPI to a TPI. It is critical that the taxonomy code selected as the primary or secondary taxonomy code during a provider’s enrollment with TMHP is included on all electronic transactions.

Group billing providers are not required to submit a taxonomy code on all electronic claims.

Billing providers that are not associated with a group are required to submit a taxonomy code on all electronic claims. TMHP will reject claims for non-group billing providers (individuals and facilities) that are submitted without a taxonomy code.

Medicare does not require a taxonomy code for Part B claims. Therefore, some claims submitted to TMHP from Medicare for payment of deductible or coinsurance may not include the taxonomy code needed for accurate processing by TMHP.

6.2.2 Electronic Claim Acceptance

Providers should verify that their electronic claims were accepted by Texas Medicaid for payment consideration by referring to their Claim Response report, which is in the 27S batch response file (e.g., file name E085LDS1.27S). Providers should also check their Accepted and Rejected reports in the rej and acc batch response files (e.g., E085LDS1.REJ and E085LDS1.ACC) for additional information. Only claims that have been accepted on the Claim Response report (27S file) will be considered for payment and made available for claim status inquiry. Claims that are rejected must be corrected and resubmitted for payment consideration.

Refer to: Subsection 3.2, “Electronic Billing” in Section 3, “TMHP Electronic Data Interchange (EDI)” (Vol. 1, General Information), visit www.tmhp.com, or call the EDI Help Desk at 1-888-863-3638 for more information about electronic claims submissions.

6.2.3 Electronic Rejections

The most common reasons for electronic professional claim rejections are:

- **Client information does not match.** Client information does not match the PCN on the TMHP eligibility file. The name, date of birth, sex, and nine-digit Medicaid identification number must be an exact match with the client’s identification number on TMHP’s eligibility record. If using TexMedConnect, send an interactive eligibility request to obtain an exact match with TMHP’s record. If not using TexMedConnect, verify through the TMHP website or call AIS at 1-800-925-9126 to verify client information. A lack of complete client eligibility information causes a rejection and possibly delayed payment. To prevent delays when submitting claims electronically:
  - Always include the first and last name of the client on the claim in the appropriate fields.
Always enter the client’s complete, valid nine-digit Medicaid number. Valid Medicaid numbers begin with 1, 2, 3, 4, or 5. CSHCN Services Program client numbers begin with a 9.

When submitting claims for newborns, use the guidelines in the following section.

**Referring/Ordering Physician field blank or invalid.** The referring physician’s NPI must be present when billing for consultations, laboratory, or radiology. Consult the software vendor for this field’s location on the electronic claims entry form.

**Performing Physician ID field blank or invalid.** When the billing provider identifier is a group practice, the performing provider identifier for the physician who performed the service must be entered. Consult the software vendor for this field’s location on the electronic claim form.

**Facility Provider field blank or invalid.** When place of service (POS) is anywhere other than home or office, the facility’s provider identifier must be present. If the provider identifier is not known, enter the name and address of the facility. Consult the software vendor for this field’s location on the electronic claims entry form.

**Invalid Type of Service or Invalid Type of Service/Procedure code combination.** In certain cases some procedure codes will require a modifier to denote the procedure’s type of service (TOS).

*Note:* The C21 claims processing system can accept only 40 characters (including spaces) in the Comments section of electronic submissions for ambulance and dental claims. If providers include more than 40 characters in that field, C21 will accept only the first 40 characters; the other characters will not be imported into C21. Providers must ensure that all of the information that is required for the claim to process appropriately is included in the first 40 characters.

**Refer to:** Subsection 6.2.5, “Modifier Requirements for TOS Assignment” in this section for TMHP EDI modifier information.

### 6.2.3.1 Newborn Claim Hints

The following are to be used for newborns:

- If the mother’s name is “Jane Jones,” use “Boy Jane Jones” for a male child and “Girl Jane Jones” for a female child.
- Enter “Boy Jane” or “Girl Jane” in first name field and “Jones” in last name field. Always use “boy” or “girl” first and then the mother’s full name. An exact match must be submitted for the claim to process.
- Do not use “NBM” for newborn male or “NBF” for newborn female.

The following are the most common reasons for electronic hospital UB-04 CMS-1450 claim rejections:

- **Admit hour outside allowable range** (such as 24 hours).
- **Billed amount blank.**
- **Health coverage ID blank or invalid.** This number must be the valid nine-digit Medicaid client number. Incorrect data includes: a number less than nine digits; PENDING; 999999999; and Unknown.
- **Referring physician information on outpatient claim is blank** when laboratory/radiology services are ordered or a surgical procedure is performed. The referring physician’s NPI is required in Fields 78–79. Consult the software vendor for the location of this field on the electronic claims entry form.
6.2.4 TMHP EDI Batch Numbers, Julian Dates

All electronic transactions are assigned an eight-character Batch ID immediately upon receipt by the TMHP EDI Gateway. The batch ID format allows electronic submitters to determine the exact day and year that a batch was received. The batch ID format is JJJYSSSS, where each character is defined as follows:

- **JJJ – Julian date.** The three J characters represent the Julian date that the file was received by the TMHP EDI Gateway. The first character (J) is displayed as a letter, where E = 0, F = 1, G = 2, and H = 3. The last two characters (JJ) are displayed as numbers. All three characters (JJJ) together represent the Julian date. For example, a Julian date of 143 would be F43.

- **Y – Year.** The Y character represents the last digit of the calendar year when the TMHP EDI Gateway receives the file. For example, a “2” in this position indicates the year 2012.

- **SSSS =** The unique 4-character sequence number assigned by EDI to the claim filed.

6.2.5 Modifier Requirements for TOS Assignment

Modifiers for TOS assignment are *not* required for Texas Health Steps (THSteps) Dental claims (claim type 021), Inpatient Hospital claims (claim type 040), or Medicare Crossover claims (claim types 030, 031, 050). Additionally, procedures submitted by specific provider types such as genetics, eyeglass, and THSteps medical checkup are assigned the appropriate TOS based on the provider type or specific procedure code, and will not require modifiers.

Most procedure codes do not require a modifier for TOS assignment, but modifiers are required for some services submitted on professional claims (claim type 020) and outpatient hospital claims (claim type 023). Services that require a modifier for TOS assignment are listed in the sections below.

6.2.5.1 Assistant Surgery

For assistant surgical procedures, use one of the following modifiers: 80, 81, 82, and AS. Using these modifiers results in TOS 8 being assigned to the procedure.

6.2.5.2 Anesthesia

For anesthesia procedures, use one of the following modifiers: AA, AD, QK, QS, QX, QY, and QZ. Using these modifiers results in TOS 7 being assigned to the procedure.

6.2.5.3 Interpretations

For interpretations or professional components of laboratory, radiology, or radiation therapy procedures, use modifier 26. Using modifier 26 results in TOS I being assigned to the procedure.

6.2.5.4 Technical Components

For technical components of laboratory, radiology, or radiation therapy procedures, use modifier TC. Using this modifier results in TOS T being assigned to the procedure.

**Exception:** *Outpatient hospitals do not include the TC modifier when they provide technical components of lab and radiology services. These services automatically have TOS 4 or 5 assigned and are subject to the facility’s interim reimbursement rate or the clinical lab rate.*

Additionally, the following procedure codes do not require a modifier for TOS assignment and are processed automatically as a technical component with a TOS T:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>77401 77402 77403 77404 77406 77407 77408 77409 77411 77412</td>
</tr>
<tr>
<td>77413 77414 77416 77417 93005 93017 93041 93225 93226 93721</td>
</tr>
</tbody>
</table>
6.2.6 Preferred Provider Organization (PPO)

PPO discounts are not considered a part of other insurance payments. Electronic submitters must supply the PPO discount amount when submitting other insurance information; however, this information is not included in the total other insurance payment during claims processing. Paper submitters are not required to add the PPO discount to the other insurance payment.

6.3 Coding

Electronic billers must code all claims. TMHP encourages all providers to code their paper claims. Claims are processed fast and accurately if providers furnish appropriate information. By coding claims, providers ensure precise and concise representation of the services provided and are assured reimbursement based on the correct code. If providers code claims, a narrative description is not required and does not need to be included unless the code is a not an otherwise classified code.

**Important:** Claims for anesthesia must have the Current Procedural Terminology (CPT) anesthesia procedure code narrative descriptions or CPT surgical codes; if these codes are not included, the claim will be denied.

The carrier for the Texas Medicare Program has coding manuals available for physicians and suppliers with codes not available in CPT. To order a CPT Coding Manual, write to the following address:

American Medical Association  
Book and Pamphlet Fulfillment  
PO Box 2964  
Milwaukee, WI 53201

6.3.1 Diagnosis Coding

Texas Medicaid requires providers to provide *International Classification of Diseases, Ninth Revision, Clinical Modification* (ICD-9-CM) diagnosis codes on their claims. The only diagnosis coding structure accepted by Texas Medicaid is the ICD-9-CM. Diagnosis codes must be to the highest level of specificity available. In most cases a written description of the diagnosis is not required.

All diagnosis codes that are submitted on a claim must be appropriate for the age of the client as identified in the ICD-9-CM description of the diagnosis code. Claims that are denied because one or more of the diagnosis codes submitted on the claim are not appropriate for the age of the client may be appealed with the correct diagnosis code or documentation of medical necessity to justify the use of the diagnosis code.

ICD-9-CM codes for external causes of injury and poisoning (E codes) and morphology of neoplasms (M codes) are not valid as a primary or a referenced diagnosis.

All V-codes are acceptable as diagnoses except the following nonspecific codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>V0381 V0382 V0389 V039 V040 V041 V042 V043 V044 V045</td>
</tr>
<tr>
<td>V046 V047 V048 V0481 V0482 V0489 V050 V051 V052 V053</td>
</tr>
<tr>
<td>V054 V058 V059 V060 V061 V062 V063 V064 V065 V066</td>
</tr>
<tr>
<td>V068 V069 V070 V071 V078 V079 V1200 V1201 V1202 V1203</td>
</tr>
<tr>
<td>V1209 V121 V122 V1260 V1261 V1269 V1270 V1271 V1272 V1279</td>
</tr>
<tr>
<td>V1300 V1321 V1329 V133 V134 V1361 V1369 V137 V138 V139</td>
</tr>
<tr>
<td>V140 V141 V142 V143 V144 V145 V146 V147 V148 V149</td>
</tr>
<tr>
<td>V1501 V1502 V1503 V1504 V1505 V1506 V1507 V1508 V1509 V1541</td>
</tr>
<tr>
<td>V1542 V156 V157 V1581 V1582 V1584 V1585 V1586 V1587 V1588</td>
</tr>
</tbody>
</table>
These nonspecific codes can be used for a general description but may not be referenced to a specific procedure code. Generally, V-codes are supplementary and are used only when the client’s condition cannot be classified to categories 001 through 999. The use of observation diagnosis code V717 results in claim denial with explanation of benefits (EOB) 00543, “Documentation insufficient to verify medical necessity. Resubmit the claim with signed claim copy, R&S Report copy, and complete documentation of medical necessity.”

Independent laboratories, pathologists, and radiologists are not required to provide diagnosis codes unless otherwise stated in other sections of this manual.

### 6.3.1.1 Place of Service (POS) Coding

The POS identifies where services are performed. Indicate the POS by using the appropriate code for each service identified on the claim.

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>V1589</td>
</tr>
<tr>

</tbody>
</table>
Important: Attention ambulance providers: POS 41 and 42 are accepted by Texas Medicaid for ambulance claims processing. The two-digit origin and destination codes are still required for claims processing.

Use the following codes for POS identification where services are performed:

<table>
<thead>
<tr>
<th>POS</th>
<th>2-Digit Numeric Codes (Electronic Billers)</th>
<th>1-Digit Numeric Codes (Paper Billers)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Office</td>
<td>11, 15, 50, 60, 65, 71, 72</td>
<td>1</td>
</tr>
<tr>
<td>Home</td>
<td>12</td>
<td>2</td>
</tr>
<tr>
<td>Inpatient hospital</td>
<td>21, 51, 52, 55, 56, 61</td>
<td>3</td>
</tr>
<tr>
<td>Outpatient hospital</td>
<td>22, 23, 24, 62</td>
<td>5</td>
</tr>
<tr>
<td>Birthing center</td>
<td>25</td>
<td>7</td>
</tr>
<tr>
<td>Other location</td>
<td>03, 04, 05, 06, 07, 08, 26, 34, 41, 42, 53, 99</td>
<td>9</td>
</tr>
<tr>
<td>Skilled nursing facility, intermediate care facility, intermediate care facility for mentally retarded</td>
<td>31, 32, 54</td>
<td>4</td>
</tr>
<tr>
<td>Extended care facility (rest home, domiciliary or custodial care, nursing facility boarding home)</td>
<td>33</td>
<td>8</td>
</tr>
<tr>
<td>Independent lab</td>
<td>81</td>
<td>6</td>
</tr>
<tr>
<td>Destination of ambulance</td>
<td>Indicate destination using above codes</td>
<td>Indicate destination using above codes</td>
</tr>
</tbody>
</table>

Note: Family planning and THSteps medical services performed in a rural health clinic (RHC) are billed using national POS code 72.

6.3.2 Type of Service (TOS)

The TOS identifies the specific field or specialty of services provided.

To determine the TOS payable for each procedure code, providers may refer to the online fee lookup (OFL) or the static fee schedules, both are available on the TMHP website at www.tmhp.com.

Refer to: Subsection 6.2.5, “Modifier Requirements for TOS Assignment” in this section for TMHP EDI modifier information.

6.3.2.1 TOS Table

Important: TOS codes are not used for claim submissions, but they do appear on R&S Reports.

<table>
<thead>
<tr>
<th>TOS</th>

<td>Laboratory (total component)</td>
</tr>
<tr>
<td>6</td>
<td>Radiation Therapy (total component)</td>
</tr>
<tr>
<td>7</td>
<td>Anesthesia</td>
</tr>
</tbody>
</table>
6.3.3 Procedure Coding

The procedure coding system used by Texas Medicaid is called the Healthcare Common Procedure Coding System (HCPCS). HCPCS provides health-care providers and third party payers a common coding structure that is designed around a five-character numeric or alphanumeric base for all codes.

HCPCS consists of two levels of codes including the Current Procedural Terminology (CPT®) Professional Edition (Level I) and the HCPCS codes approved and released by CMS (Level II).

At the beginning of each year, TMHP applies the annual HCPCS additions, changes, and deletions that include the program and coding changes related to the annual HCPCS, Current Dental Terminology (CDT), and CPT updates. These updates ensure an up-to-date coding structure by using the latest edition of the CPT and nationally established HCPCS codes released by CMS. Scheduled updates are announced in Medicaid bi-monthly bulletins.

Most added procedure codes that are not directly replacing a discontinued procedure code must go through the rate hearing process, as required by Chapter 32 of the Human Resources Code, §32.0282, and Title 1 of the Texas Administrative Code, §355.201, which require public hearings to receive comments on Texas Medicaid payment rates. The two levels of codes are as follows:

6.3.3.1 Level I

CPT® Professional Edition:

- All numeric—consist of five digits
- Represent 80 percent of HCPCS
- Maintenance—responsibility of the AMA, which updates annually
- Updates by the AMA are coordinated with CMS before their distribution of modifications to third party payers
- Anesthesia codes from CPT

<table>
<thead>

</tr>
</tbody>
</table>
6.3.3.2 Level II

HCPCS codes:

- Approved and released by CMS
- Codes for both physician and non-physician services not contained in CPT (for example, ambulance, DME, prosthetics, and some medical codes)
- Updating: Responsibility of the CMS Maintenance Task Force
- All alphanumeric consisting of a single alpha character (A through V) followed by four numeric digits
- The single alpha character represents the following:

<table>
<thead>
<tr>
<th>Alpha</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Supplies, ambulance, administrative, miscellaneous</td>

<td>State Medicaid agency</td>
</tr>
<tr>
<td>V</td>
<td>Vision and hearing services</td>
</tr>
</tbody>
</table>

6.3.3.3 Rate Hearings

All of the new procedure codes are adopted in accordance with CMS effective dates. Added procedure codes that are not directly replacing a discontinued procedure code must go through the rate hearing process. Health and Human Services Commission (HHSC) conducts public rate hearings to provide an opportunity for the provider community to comment on the Medicaid proposed payment rate.

Services provided before the rates are adopted through the rate hearing process are denied as pending a rate hearing (EOB 02008) until the applicable reimbursement rate is adopted. The client cannot be billed for these services. Providers are responsible for meeting the initial 95-day filing deadline. Once the reimbursement rates are established in the rate hearing and applied, TMHP automatically reprocesses affected claims. Providers are not required to appeal the claims unless they are denied for additional reasons after the claims reprocessing is complete.

Providers must submit the procedure codes that are most appropriate for the services provided, even if the procedure codes have not yet completed the rate hearing process and are denied by Texas Medicaid as pending a rate hearing.

Authorization guidelines for procedure codes awaiting a rate hearing are available in subsection 5.11, “Guidelines for Procedures Awaiting Rate Hearing” in Section 5, “Prior Authorization” (Vol. 1, General Information).
6.3.4 National Drug Code (NDC)

The NDC is an 11-digit number on the package or container from which the medication is administered. All Texas Medicaid fee-for-service and Family Planning providers must submit an NDC for professional or outpatient claims submitted with physician-administered prescription drug procedure. Codes in the A code series do not require an NDC.

N4 must be entered before the NDC on claims.

The unit of measurement codes can also be submitted, however, are not required. The codes to be used for all claim forms are:

- F2 – International unit
- GR – Gram
- ML – Milliliter
- UN – Unit

Unit quantities can also be submitted, however, are not required.

Depending on the claim type, the NDC information must be submitted as indicated below for paper claims, or the equivalent electronic field:

**UB-04 CMS 1450**

The Drugs Requiring NDC for Texas Medicaid Reimbursement list is available on the TMHP website at www.tmhp.com. The list contains those physician-administered, multiple-source drugs that the U.S. Secretary of Health and Human Services has determined to have the highest dollar volume of physician-administered drugs that are dispensed through Medicaid.

6.3.5 Modifiers

Modifiers describe and qualify the services provided by Texas Medicaid. A modifier is placed after the five-digit procedure code. Up to two modifiers may apply per service. Examples of frequently used modifiers are listed in the following table. Refer to the service-specific sections for additional modifier requirements.

<table>
<thead>
<tr>
<th>Modifier</th>
<th>Special Instructions/Notes (if applicable)</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Ambulance</strong></td>
<td></td>
</tr>
<tr>
<td>ET</td>
<td>Use for all emergency transport services.</td>
</tr>
<tr>

<tr>
<td>79+</td>
<td>Unrelated procedure or service by the same physician during the postoperative period.</td>
</tr>
</tbody>
</table>

**Assistant Surgeons**

80 and KX+ Use modifier 80 and KX together to indicate an assistant surgeon in a teaching facility:
- In a case involving exceptional medical circumstances such as emergency or life-threatening situations requiring immediate attention.
- When the primary surgeon has a policy of never, without exception, involving a resident in the preoperative, operative, or postoperative care of one of his or her patients.
- In a case involving a complex surgical procedure that qualifies for more than one physician.

AS Use when the physician assistant is not enrolled as an individual provider and provides assistance at surgery.

**Sterilizations**

PM Use to indicate post-menopausal.

PS Use to indicate previously sterilized.

**Excision of Lesions/Masses**

KX+ Use modifier KX if the excision/destruction is due to one of the following signs or symptoms: inflamed, infected, bleeding, irritated, growing, limiting motion or function. Use of this modifier is subject to retrospective review.

**Injections**

AT Use to indicate acute conditions.

JA Administered intravenously.

JB Administered subcutaneously.

KX+ Use modifier KX to indicate the injection was due to:
- Oral route contraindicated or an acceptable oral equivalent is not available.
- Injectable medication is the accepted treatment of choice. Oral medication regimens have proven ineffective or are not available.
- Patient has a temperature over 102 degrees (documented on the claim) and a high level of antibiotic is needed quickly.
- Injection is medically necessary into joints, bursae, tendon sheaths, or trigger points to treat an acute condition or the acute flare up of a chronic condition.

**Visits**

76+ Use to indicate the repeated non-clinical procedure.

FP+ Use to indicate that the service was part of an annual family planning examination.

TH+ Use with external causes of injury and poisoning (E Codes) procedures and morphology of neoplasms (M Codes) procedures to specify antepartum or postpartum care.

+ Modifier is required for accurate claims processing.
* Description is defined by the state.
### Modifier | Special Instructions/Notes (if applicable)
--- | ---
25 | Use to describe circumstances in which an office visit was provided at the same time as other separately identifiable services.

#### Anesthesia

One of the following modifier combinations must be used by anesthesiologists directing non-CRNA qualified professionals.

- **AA and U1**
  - Use to indicate that the anesthesia services were performed personally by the anesthesiologist.

- **AD and U1 (Emergency circumstances only)**
  - Use when directing five or more concurrent procedures provided by non-CRNA qualified professionals. Used in emergency circumstances only and limited to 6 units (90 minutes) per case for each occurrence requiring five or more concurrent procedures.

- **QK and U1**
  - Use when directing two, three, or four concurrent procedures provided by non-CRNA qualified professionals.

- **QY and U1**
  - Use when directing one procedure provided by a non-CRNA qualified professional.

One of the following modifier combinations must be used by anesthesiologists directing CRNAs.

- **AD and U2 (Emergency circumstances only)**
  - Use when directing five or more concurrent procedures involving CRNA (s). Used in emergency circumstances only and limited to 6 units (90 minutes) per case for each occurrence requiring five or more concurrent procedures.

- **QK and U2**
  - Use when directing two, three, or four concurrent procedures involving CRNAs.

- **QY and U2**
  - Use when directing one procedure by a CRNA.

One of the following modifier combinations must be used by CRNAs.

- **QX and U2**
  - Use to indicate the anesthesia was medically directed by the anesthesiologist.

- **QZ and U1**
  - Use to indicate the anesthesia was directed by the surgeon.

#### FQHC and RHC

Services provided by a health-care professional require one of the following modifiers:

- **AH**
  - Use to indicate that the services were performed by a clinical psychologist.

- **AJ**
  - Use to indicate that the services were performed by a clinical social worker.

- **AM**
  - Use to indicate that the services were performed by a physician or team member service (includes clinical psychiatrist).

- **SA**
  - Use to indicate that the services were performed by an advanced practice registered nurse (APRN) or CNM rendering services in collaboration with a physician.

- **TD**
  - For home services performed by a RN and provided in areas with a shortage of home health agencies.

- **TE**
  - For home services performed by an LVN and provided in areas with a shortage of home health agencies.

- **TS**
  - Use to indicate a case management follow-up service

- **U1**
  - Licensed professional counselor

- **U2**
  - Licensed marriage and family therapist

- **U7**
  - Physician assistant services for other than assistant at surgery

The following modifiers may be used in addition to the modifier identifying the health-care professional that rendered the service:

- **EP**
  - Use to indicate THSteps services (FQHC only).

* Modifier is required for accurate claims processing.
* Description is defined by the state.
<table>
<thead>
<tr>
<th>Modifier</th>
<th>Special Instructions/Notes (if applicable)</th>
</tr>
</thead>
<tbody>

</tr>
</tbody>
</table>

+ Modifier is required for accurate claims processing.
* Description is defined by the state.
The following modifiers may appear on R&S Reports (they are not entered by the provider):

- **PT.** The DRG payment was calculated on a per diem basis for an inpatient stay because of patient transfer.
- **PS.** The DRG payment was calculated on a per diem basis because the patient exhausted the 30-day inpatient benefit limitation during the stay.
- **PE.** The DRG payment was calculated on a per diem basis because the patient was ineligible for Medicaid during part of the stay. Also used to adjudicate claims with adjustments to outlier payments.

### 6.3.6 Benefit Code

A benefit code is an additional data element used to identify state programs.
Providers that participate in the following programs must use the associated benefit code when submitting claims and authorizations:

<table>
<thead>
<tr>
<th>Program</th>
<th>Benefit Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>Comprehensive Care Program (CCP)</td>
<td>CCP</td>
</tr>
<tr>
<td>THSteps Medical</td>

</tr>
<tr>
<td>Case management mental retardation (MR) providers</td>
<td>MH2</td>
</tr>
</tbody>
</table>

*Agencies only—Benefit codes should not be used for individual family planning providers.

### 6.4 Claims Filing Instructions

This section contains instructions for completion of Medicaid-required claim forms. When filing a claim, providers should review the instructions carefully and complete all requested information. A correctly completed claim form is processed faster.

This section provides a sample claim form and its corresponding instruction table for each acceptable Texas Medicaid claim form.

All providers, except those on prepayment review, should submit paper claims to TMHP to the following address:

Texas Medicaid & Healthcare Partnership  
Claims  
PO Box 200555  
Austin, TX 78720-0555

Providers on prepayment review must submit all paper claims and supporting medical record documentation to the following address:

Texas Medicaid & Healthcare Partnership  
Attention: Prepayment Review MC–A11 SURS  
P.O. Box 203638  
Austin, TX 78720-3638

### 6.4.1 National Correct Coding Initiative (NCCI) Guidelines

The Patient Protection and Affordable Care Act (PPACA) mandates that all claims that are submitted to TMHP be filed in accordance with the NCCI guidelines. These guidelines can be found in the NCCI Policy and Medicare Claims Processing Manuals on the CMS website at [www.cms.gov/NationalCorrectCodInitEd/](http://www.cms.gov/NationalCorrectCodInitEd/).

The NCCI guidelines consist of HCPCS or CPT procedure code pairs that must not be reported together and medically unlikely edits (MUEs) that determine whether procedure codes are submitted in quantities that are unlikely to be correct.
The NCCI and MUE spreadsheets are published and updated by CMS and are available on the CMS Medicaid NCCI Coding web page under “NCCI and MUE Edits” as follows:

- **NCCI edit spreadsheets.** The website contains the Medicaid NCCI edit spreadsheet for hospital services and the Medicaid NCCI edit spreadsheet for practitioner services. The spreadsheets list the procedure code pairs that will not be reimbursed separately if they are billed by the same provider with the same date of service. Column 1 procedure codes may be reimbursed and Column 2 procedure codes will be denied. The spreadsheets also contain a column that indicates whether or not a modifier is allowed for services that may be reimbursed separately.

- **MUE edit spreadsheets.** The website contains the Medicaid MUE edit spreadsheets for hospital services, practitioner services, and supplier services. The spreadsheets list procedure codes and the number of units that may be reimbursed for each procedure code. Units that are submitted beyond these limitations will be denied.

HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* and the *Texas Medicaid Bulletin* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals or bulletins. Providers should refer to the CMS NCCI web page at www.cms.gov/NationalCorrectCodInitEd/ for correct coding guidelines and specific applicable code combinations.

When Texas Medicaid medical policy is more restrictive than NCCI MUE guidance, Texas Medicaid medical policy prevails.

### 6.4.1.1 NCCI Processing Categories

The following coding rule categories are applied to claims that are submitted with dates of service on or after October 1, 2010:

<table>
<thead>
<tr>
<th>Coding Rule Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Maximum units</td>
<td>CMS has assigned to all procedure codes a maximum number of units that may be submitted for a client per day, regardless of the provider. The maximum number of units for each procedure code is based on the following criteria:</td>
</tr>
<tr>
<td></td>
<td>• Procedure code description</td>
</tr>
<tr>
<td></td>
<td>• Anatomical site</td>
</tr>
<tr>
<td></td>
<td>• CMS sources</td>
</tr>
<tr>
<td></td>
<td>• Clinical guidelines</td>
</tr>
</tbody>
</table>

**Important:** If the maximum number of units has been exceeded on a particular line item, the line item will be denied. The line item will not be cut back to the allowable quantity. The line item may be appealed with the appropriate quantity for consideration.
6.4.1.2 CPT and HCPCS Claims Auditing Guidelines

The following coding rule categories apply to claims submissions:

<table>
<thead>
<tr>
<th>Coding Rule Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>NCCI</td>
<td>NCCI is a collection of bundling edits created and sponsored by CMS that are separated into two major categories: Column I and Column II procedure code edits (previously referred to as “Comprehensive” and “Component”) and Mutually Exclusive procedure code edits. NCCI edits are applied to services that are performed by the same provider on the same date of service only and do not apply to services that are performed within the global surgical period. Each NCCI code pair edit is associated with a policy as defined in the National Correct Coding Initiative Policy Manual. Effective dates apply to code pairs in NCCI and represent the date when CMS added the code pair combination to the NCCI edits. Code combinations are processed based on this effective date. Termination dates also apply to code pairs in NCCI. This date represents the date when CMS removed the code pair combination from the NCCI edits. Code combinations are refreshed quarterly.</td>
</tr>
<tr>
<td>Add-on codes</td>
<td>Certain services are commonly carried out in addition to the rendering of the primary procedure and are associated with the primary procedures. These additional or supplemental procedures are referred to as “add-on” procedures. Add-on codes are identified in the CPT Manual with a plus mark (“+”) symbol and are also listed in Appendix D of the CPT Manual. Add-on codes are always performed in addition to a primary procedure, and should never be reported as a stand-alone service. When an add-on code is submitted and the primary procedure has not been identified on either the same or different claim, then the add-on code will be denied as an inappropriately-coded procedure. If the primary procedure is denied for any reason, then the add-on code will be denied also.</td>
</tr>
<tr>
<td>Deleted HCPCS codes</td>
<td>Procedure codes undergo revision by the AMA and CMS on a regular basis. Revisions typically include adding new procedure codes, deleting procedure codes, and redefining the description of existing procedure codes. These revisions are normally made on an annual basis by the governing entities with occasional quarterly updates. Claims that are received with deleted procedure codes will be validated against the date of service. If the procedure code is valid for the date of service, the claim will continue processing. If the procedure code is invalid for the date of service, the invalid procedure code will be denied.</td>
</tr>
</tbody>
</table>
### Coding Rule Category

<table>
<thead>
<tr>
<th>Coding Rule Category</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Diagnosis validity</td>
<td>ICD-9-CM diagnosis codes undergo revision by the Centers for Disease Control and Prevention (CDC) and CMS on a regular basis. Revisions typically include adding new diagnosis codes, deleting diagnosis codes, and redefining the description of existing diagnosis codes. These revisions are normally made on an annual basis. Claims that are received with invalid diagnosis codes will be validated against the date of service. If the diagnosis code is valid for the date of service, the claim will continue processing. If the diagnosis code is invalid for the date of service, the procedure that is referenced to the invalid diagnosis code will be denied.</td>
</tr>
<tr>
<td>Diagnosis-age</td>
<td>Certain diagnosis codes are age-specific. If a diagnosis code that is billed does not match the age of the client on that date of service, all services associated with that diagnosis code will be denied.</td>
</tr>
<tr>
<td>Diagnosis-gender</td>
<td>Certain diagnosis codes are gender-specific. If the diagnosis code that is billed does not match the gender of the client, all services associated with that diagnosis code will be denied. For example, diagnosis code 60000 (benign hypertrophy of prostate) is restricted to male clients.</td>
</tr>
<tr>
<td>Duplicate claim</td>
<td>A duplicate claim is defined as a claim or procedure code detail that exactly matches a claim or procedure code detail that has been reimbursed to the same provider for the same client. Duplicate claims or details include the same date of service, procedure code, modifier, and number of units. Duplicate claims or procedure code details will be denied. <strong>Note:</strong> Modifiers may be used to identify separate services.</td>
</tr>
</tbody>
</table>
| Evaluation and Management (E/M) services | The AMA defines new and established patients as follows:  
- A new patient is “one who has not received any professional services from the physician or another physician of the same specialty who belongs to the same group practice within the past three years.”  
- An established patient is “one who has received a professional service from the physician or another physician of the same specialty who belongs to the same group practice within the past three years.”  
Only one E/M procedure code may be reimbursed for a single date of service by the same provider group and specialty, regardless of place of service. Providers may refer to subsection 9.2.61, “Physician Evaluation and Management (E/M) Services” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (Vol.2, Provider Handbooks) for additional information about physician E/M services. |
| Procedure code definition | The CPT manual assigns each procedure code a specific description or definition to describe the service that is rendered. In order to support correct coding, the procedure code definition rules will deny procedure codes based on the appropriateness of the code selection as directed by the definition and nature of the procedure code. |
| Procedure code guideline | The CPT manual includes specific reporting guidelines that are located throughout the manual and at the beginning of each section. In order to ensure correct coding, these guidelines provide reporting guidance and must be followed when submitting specific procedure codes. |
6.4.2 Claim Form Requirements

6.4.2.1 Provider Signature on Claims

Each CMS-1500, 2006 American Dental Association (ADA), and Family Planning 2017 paper claim form submitted must have the handwritten signature (or signature stamp) of the provider or an authorized representative in the appropriate block of the claim form. Signatory supervision of the authorized representative is required. Providers delegating signature authority to a member of the office staff or to a billing service remain responsible for the accuracy of all information on a claim submitted for payment. Initials are only acceptable for first and middle names. The last name must be spelled out. An acceptable example is J.A. Smith for John Adam Smith. An unacceptable example is J.A.S. for John Adam Smith. Typewritten names must be accompanied by a handwritten signature; in other words, a typewritten name with signed initials is not acceptable. The signature must be contained within the appropriate block of the claim form. Claims prepared by computer billing services or office-based computers may have “Signature on File” printed in the signature block, but it must be in the same font that is used in the rest of the form. For claims prepared by a billing service, the billing service must retain a letter on file from the provider authorizing the service.

Printing the provider’s name instead of “Signature on File” is unacceptable. Because space is limited in the signature block, providers should not type their names in the block. Claims not meeting these specifications appear in the “Paid or Denied Claims” sections of the R&S Reports.

Refer to: Form 6.1, “Sample Letter XUB Computer Billing Service Inc” in this section.

6.4.2.2 Group Providers

Providers billing as a group must give the performing provider identifier on their claims as well as the group provider identifier. This requirement excludes THSteps medical providers.
6.4.2.3 **Supervising Physician Provider Number Required on Some Claims**

The supervising physician provider number is required on claims for services that are ordered or referred by one provider at the direction of or under the supervision of another provider, and the referral or order is based on the supervised provider’s evaluation of the client.

If a referral or order for services to a Texas Medicaid client is based on a client evaluation that was performed by the supervised provider, the billing provider’s claim must include the names and NPIs of both the ordering provider and the supervising provider. The billing provider must obtain all of the required information from the ordering or referring provider before submitting the claim to TMHP.

Providers who submit TexMedConnect electronic claims for professional, ambulance, or vision services can provide the claim information in the designated field for the supervising provider of the referring or ordering provider.

Providers can refer to TexMedConnect instructions on the TMHP website at www.tmhp.com for details about the “Referring/Other Supervising Provider” field for professional, ambulance, and vision electronic claims.

**Note:** Pharmacy claims are currently excluded from this requirement.

6.4.2.4 **Ordering or Referring Provider NPI**

All Texas Medicaid claims for services that require a physician order or referral must include the ordering or referring provider’s NPI:

- If the ordering or referring provider is enrolled in Texas Medicaid as a billing or performing provider, the billing or performing provider NPI must be used on the claim as the ordering or referring provider.
- If the ordering or referring provider is not currently enrolled in Texas Medicaid as a billing or performing provider, the provider must enroll to receive an ordering or referring-only TPI. After the ordering or referring provider is enrolled, the ordering or referring provider’s NPI must be used on the claim as the ordering or referring provider.

**Important:** The billing provider is responsible for confirming that the ordering or referring provider is enrolled as an ordering or referring-only provider.

Claims that are submitted without the ordering or referring provider’s NPI and claims submitted with an NPI for a provider who is not enrolled in Texas Medicaid may be subject to retrospective review and denial for a missing or invalid NPI.

**Note:** Providers who enroll in Texas Medicaid as ordering- and referring-only providers receive a TPI that can be used for orders and referrals for Texas Medicaid clients and CSHCN Services Program clients.

6.4.2.5 **Prior Authorization Numbers on Claims**

Claims filed to TMHP must contain only one prior authorization number per claim. Prior authorization numbers must be indicated on the appropriate electronic field, or on the paper claim forms as indicated below:

- CMS-1500—Block 23
- UB-04 CMS-1450—Block 63
- ADA—Block 2
- Family Planning—Block 30
6.4.2.6 Newborn Clients Without Medicaid Numbers

If a Medicaid eligible newborn has not been assigned a Medicaid number on the DOS, the provider must wait until a Medicaid client number is assigned to file the claim. The provider writes the number instead of "Pending." The 95-day filing period begins on the "add date," which is the date the eligibility is received and added to the TMHP eligibility file. Providers verify eligibility and add date through TexMedConnect or by calling AIS or the TMHP Contact Center at 1-800-925-9126 after the number is received.

Providers must check Medicaid eligibility regularly to file claims within the required 95-day filing deadline.

Refer to: Section 4: Client Eligibility (Vol. 1, General Information).

6.4.2.7 Multipage Claim Forms

6.4.2.7.1 Professional Claims

The approved electronic claims format is designed to list 50 line items. The total number of details allowed for a professional claim by the TMHP claims processing system (C21) is 28. If the services provided exceed 28 line items on an approved electronic claims format or 28 line items on paper claims, the provider must submit another claim for the additional line items.

The CMS-1500 paper claim form is designed to list six line items in Block 24. If more than six line items are billed on a paper claim, a provider may attach additional forms (pages) totaling no more than 28 line items. The first page of a multipage claim must contain all the required billing information. On subsequent pages of the multipage claim, the provider should identify the client’s name, diagnosis, information required for services in Block 24, and the page number of the attachment (for example, page 2 of 3) in the top right-hand corner of the form and indicate “continued” in Block 28. The combined total charges for all pages should be listed on the last page in Block 28.

6.4.2.7.2 Institutional Claims

The total number of details allowed for an institutional claim by the TMHP claims processing system (C21) is 28. C21 merges like revenue codes together to reduce the lines to 28 or less. If the C21 merge function is unable to reduce the lines to 28 or less, the claim will be denied, and the provider will need to reduce the number of details and resubmit the claim.

An EDI approved electronic format of the UB-04 CMS-1450 is designed to list 61 lines. C21 merges like revenue codes together to reduce the lines to 28 or less.

Providers submitting electronic claims using TexMedConnect may not submit more than 28 lines. If the services exceed the 28 lines, the provider may submit another claim for the additional lines or merge codes.

The paper UB-04 CMS-1450 is designed to list 23 lines in Block 43. If services exceed the 23-line limitation, the provider may attach additional pages. The first page of a multipage claim must contain all required billing information. On subsequent pages, the provider identifies the client’s name, diagnosis, all information required in Block 43, and the page number of the attachment (e.g., page 2 of 3) in the top right-hand corner of the form and indicate “continued” on Line 23 of Block 47. The combined total charges for all pages should be listed on the last page on Line 23 of Block 47.

Note: Each surgical procedure code listed in Block 74 of the claim form is counted as one detail and is included in the 28-detail limitation.

When splitting a claim, all pages must contain the required information. Usually, there are logical breaks to a claim. For example, the provider may submit the surgery charges in one claim and the subsequent recovery days in the next claim.

TEFRA hospitals are required to submit all charges.
6.4.2.7.3 Inpatient Hospital Claims

Medicaid present-on-admission (POA) reporting is required for all inpatient hospital claims that are paid under prospective payment basis methodology. No hospitals are exempt from this POA requirement.

Medicare crossover hospital claims must also comply with the Medicaid requirement to include the POA values. Claims submitted without the POA indicators are denied.

POA values are:

<table>
<thead>
<tr>
<th>POA Value</th>
<th>Description</th>
<th>Payment</th>
</tr>
</thead>
<tbody>
<tr>
<td>Y</td>
<td>Diagnosis was present at the time of admission.</td>
<td>Payment will be made by Medicaid when a hospital acquired condition (HAC) is present.</td>
</tr>
<tr>
<td>N</td>
<td>Diagnosis was not present at the time of admission.</td>
<td>No payment will be made by Medicaid when an HAC is present.</td>
</tr>
<tr>
<td>U</td>
<td>Documentation was insufficient.</td>
<td>No payment will be made by Medicaid when an HAC is present.</td>
</tr>
<tr>
<td>W</td>
<td>Clinically undetermined.</td>
<td>Payment will be made by Medicaid when an HAC is present.</td>
</tr>
</tbody>
</table>

Depending on the POA indicator value, the DRG may be recalculated, which could result in a lower payment to the hospital facility provider. If the number of days on an authorization is higher than the number of days allowed as a result of a POA DRG recalculation, the lesser of the number of days is reimbursed.

Refer to: Federal Register, Vol. 76, No. 108 (for CMS).

6.4.2.8 Attachments to Claims

To expedite claims processing, providers must supply all information on the claim form itself and limit attachments to those required by TMHP or necessary to supply information to properly adjudicate the claim. The following claim form attachments are required when appropriate:

- All claims for services associated with an elective sterilization must have a valid Sterilization Consent Form attached or on file at TMHP.

- Nonemergency ambulance transfers must have documentation of medical necessity including out-of-locality transfers.

- Providers filing for Medicaid payment of Medicare coinsurance and deductible according to current payment guidelines to TMHP must attach the paper MRAN received from Medicare or a Medicare intermediary, the computer generated MRANs from the CMS-approved software applications MREP for professional services or PC-Print for institutional services, or the TMHP Standardized MRAN form. Providers that submit paper crossover claims must submit only one of the approved MRAN formats. Paper crossover claims submitted with multiple MRAN forms (e.g., TMHP Standardized MRAN Forms and any other MRAN) with conflicting information will not be processed and will be returned to the provider. This requirement does not apply to claims transferred automatically to TMHP from the Medicare intermediary.

- Medically necessary abortions performed (on the basis of a physician’s professional judgement, the life of the mother is endangered if the fetus were carried to term), or abortions provided for pregnancy related to rape or incest must have a signed and dated physician certification statement. Elective abortions are not benefits of Texas Medicaid.

- Hysterectomies must have a Hysterectomy Acknowledgment Statement attached or on file at TMHP.

### 6.4.2.9 Clients with a Designated or Primary Care Provider

Claims for clients with a primary care provider or designated provider (i.e., Texas Medicaid fee-for-service clients enrolled as Limited Program clients) must indicate the primary care provider or designated provider identifiers in the billing or performing provider fields.

When clients receive services from a different provider, such as a specialist, the primary care provider or designated provider’s information must be included in the referring provider fields on the claim.

### 6.5 CMS-1500 Paper Claim Filing Instructions

The following providers bill for services using the ANSI ASC X12 837P 5010 electronic specifications or the CMS-1500 paper claim form:

<table>
<thead>
<tr>
<th>Providers</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ambulance</td>
</tr>
<tr>
<td>ASC (freestanding)</td>
</tr>
<tr>
<td>Case Management for Blind and Visually Impaired Children (BVIC), Case Management for Early Childhood Intervention (ECI), and Case Management for Children and Pregnant Women</td>
</tr>
<tr>
<td>Certified nurse-midwife (CNM)</td>
</tr>
<tr>
<td>Certified registered nurse anesthetist (CRNA)</td>
</tr>
<tr>
<td>Certified respiratory care practitioner (CRCP)</td>
</tr>
<tr>
<td>Chemical dependency treatment facilities</td>
</tr>
<tr>
<td>Chiropractor</td>
</tr>
<tr>
<td>Clinical nurse specialist (CNS)</td>
</tr>
<tr>

</tr>
<tr>
<td>Licensed dietitian (CCP only)</td>
</tr>
<tr>
<td>Licensed clinical social worker (LCSW)</td>
</tr>
<tr>
<td>Licensed professional counselor (LPC)</td>
</tr>
<tr>
<td>Maternity service clinic (MSC)</td>
</tr>
<tr>
<td>Mental health (MH) rehabilitative services</td>
</tr>
<tr>
<td>Nurse practitioner (NP)</td>
</tr>
<tr>
<td>Occupational therapist (CCP only)</td>
</tr>
<tr>
<td>Optician/optometrist/opthamologist</td>
</tr>
<tr>
<td>Orthotic and prosthetic supplier (CCP only)</td>
</tr>
<tr>
<td>Pharmacy</td>
</tr>
</tbody>
</table>
Providers obtain copies of the CMS-1500 paper claim form from a vendor of their choice; TMHP does not supply them.

### 6.5.1 CMS-1500 Electronic Billing

Electronic billers must submit CMS-1500 paper claim forms with TexMedConnect or approved vendor software that uses the ANSI ASC X12 837P 5010 format. Specifications are available to providers developing in-house systems, software developers, and vendors on the TMHP website at www.tmhp.com/Pages/EDI/EDI_Technical_Info.aspx. Because each software developer is different, location of fields may vary. Contact the software developer or vendor for this information. Direct questions and development requirements to the TMHP EDI Help Desk at 1-888-863-3638.

### 6.5.2 CMS-1500 Claim Form (Paper) Billing

Claims must contain the billing provider’s complete name, address, and a provider identifier. Claims without a provider name, address, and provider identifier cannot be processed. Each claim form must have the appropriate signatory evidence in the signature certification block.

**Important:** When completing a CMS-1500 paper claim form, all required information must be included on the claim in the appropriate block. Information is not keyed from attachments. Superbills or itemized statements are not accepted as claim supplements.

6.5.4 CMS-1500 Provider Definitions

The following definitions apply to the provider terms used on the CMS-1500 paper claim form:

Referring Provider
The referring provider is the individual who directed the patient for care to the provider that rendered the services being submitted on the claim form.

Examples include, but are not limited to the following:

- A primary care provider referring to a specialist
- An orthodontist referring to an oral and maxillofacial surgeon
- A physician referring to a physical therapist
- A provider referring to a home health agency

Ordering Provider
The ordering provider is the individual who requested the services or items listed in Block D of the CMS-1500 paper claim form.

Examples include, but are not limited to, a provider ordering diagnostic tests, medical equipment, or supplies.

Rendering Provider
The rendering provider is the individual who provided the care to the client. In the case where a substitute provider was used, that individual is considered the rendering provider.

An individual such as a lab technician or radiology technician who performs services in a support role is not considered a rendering provider.

Supervising Provider
The supervising provider is the individual who provided oversight of the rendering provider and the services listed on the CMS-1500 paper claim form.

An example would be the supervision of a resident physician.

Purchased Service Provider
A purchased service provider is an individual or entity that performs a service on a contractual or reassignment basis.

Examples of services include the following:

- Processing a laboratory specimen
- Grinding eyeglass lenses to the specifications of the referring provider
- Performing diagnostic testing services (excluding clinical laboratory testing) subject to Medicare's antimarkup rule

In the case where a substitute provider is used, that individual is not considered a purchased service provider.
6.5.5 CMS-1500 Instruction Table

The instructions describe what information must be entered in each of the block numbers of the CMS-1500 paper claim form. Block numbers not referenced in the table may be left blank. They are not required for claim processing by TMHP.

<table>
<thead>
<tr>
<th>Block No.</th>
<th>Description</th>
<th>Guidelines</th>
</tr>
</thead>
<tbody>
<tr>
<td>1a</td>
<td>Insured’s ID No. (for program checked above, include all letters)</td>
<td>Enter the client’s nine-digit patient number from the Medicaid identification form. For other property &amp; casualty claims: Enter the Federal Tax ID or SSN of the insured person or entity.</td>
</tr>
<tr>
<td>2</td>
<td>Patient’s name</td>
<td>Enter the client’s last name, first name, and middle initial as printed on the Medicaid identification form. If the insured uses a last name suffix (e.g., Jr, Sr) enter it after the last name and before the first name.</td>
</tr>
<tr>
<td>3</td>
<td>Patient’s date of birth</td>
<td>Enter numerically the month, day, and year (MM/DD/YYYY) the client was born. Indicate the client’s gender by checking the appropriate box. Only one box can be marked.</td>
</tr>
<tr>
<td>4</td>
<td>Patient’s sex</td>
<td></td>
</tr>
<tr>
<td>5</td>
<td>Patient’s address</td>
<td>Enter the client’s complete address as described (street, city, state, and ZIP code).</td>
</tr>
<tr>
<td>9</td>
<td>Other insured’s name</td>
<td>For special situations, use this space to provide additional information such as:</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• If the client is deceased, enter “DOD” in block 9 and the time of death in 9a if the services were rendered on the date of death. Enter the date of death in block 9b.</td>
</tr>
<tr>
<td>10a</td>
<td>Is patient’s condition related to:</td>
<td>Check the appropriate box. If other insurance is available, enter appropriate information in blocks 11, 11a, and 11b.</td>
</tr>
<tr>
<td>10b</td>
<td>a. Employment (current or previous)?</td>
<td></td>
</tr>
<tr>
<td>10c</td>
<td>b. Auto accident?</td>
<td></td>
</tr>
<tr>
<td>10c</td>
<td>c. Other accident?</td>
<td></td>
</tr>
<tr>
<td>11</td>
<td>Other health insurance coverage</td>
<td>• If another insurance resource has made payment or denied a claim, enter the name of the insurance company. The other insurance EOB or denial letter must be attached to the claim form.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• If the client is enrolled in Medicare attach a copy of the MRAN to the claim form.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• For Workers Compensation and other property and casualty claims: (Required if known) Enter Workers’ Compensation or property and casualty claim number assigned by the payer.</td>
</tr>
<tr>
<td>11a</td>
<td></td>
<td></td>
</tr>
<tr>
<td>11b</td>
<td></td>
<td></td>
</tr>
<tr>
<td>11c</td>
<td>Insurance plan or program name</td>
<td>Enter the benefit code, if applicable, for the billing or performing provider.</td>
</tr>
<tr>
<td>12</td>
<td>Patient’s or authorized person’s signature</td>
<td>Enter “Signature on File,” “SOF,” or legal signature. When legal signature is entered, enter the date signed in eight digit format (MMDDYYYY). TMHP will process the claim without the signature of the patient.</td>
</tr>
</tbody>
</table>
### Block No. | Description | Guidelines
---|---|---
14 | Date of current illness | Enter the first date (MM/DD/YYYY) of the present illness or injury. For pregnancy enter the date of the last menstrual period. If the client has chronic renal disease, enter the date of onset of dialysis treatments. Indicate the date of treatments for PT and OT.
17 | Name of referring physician or other source | Enter the complete name (block 17) and the NPI (block 17b) of the attending, referring, ordering, designated, or performing (freestanding ASCs only) provider. Refer to specific sections for requirements. in the following situations:

**The attending physician for:**
- Clinical pathology consultations to hospital inpatients or outpatients
- Services provided to a client in a nursing facility (skilled nursing facility [SNF], intermediate care facility [ICF], or extended care facility [ECF])

**The referring physician for:**
- Services provided to managed care clients (must be the client’s primary care provider).

**Note:** *If there is not a referral from the primary care provider, a prior authorization number (PAN) must be on the claim.*
- Consultation services
- CCP services
- Radiology services.
- Radiation therapy services.

**The ordering physician for:**
- Laboratory and radiology services
- Speech-language therapy
- Physical therapy
- Occupational therapy
- In-home TPN services

The designated provider for nonemergency services provided to limited clients on referral.

The performing provider (surgeon) for freestanding ASCs.

</thead>
<tbody>
<tr>
<td>19</td>
<td>Reserved for local use</td>
<td><strong>Transfers of multiple clients</strong>&lt;br&gt; If the claim is part of a multiple transfer, indicate the other client's complete name and Medicaid number. <strong>Ambulance Hospital-to-Hospital Transfers</strong>&lt;br&gt; Indicate the services required from the second facility and unavailable at the first facility.</td>
</tr>
<tr>
<td>20</td>
<td>Outside lab</td>
<td>Check the appropriate box. The information may be requested for retrospective review. If “yes,” enter the provider identifier of the facility that performed the service in block 32.</td>
</tr>
<tr>
<td>21</td>
<td>Diagnosis or nature of illness or injury</td>
<td>Enter up to four ICD-9-CM diagnosis codes to the highest level of specificity available.</td>
</tr>
<tr>
<td>23</td>
<td>Prior authorization number</td>
<td>Enter the PAN issued by TMHP. For Workers Compensation and other property and casualty claims, this is required when prior authorization, referral, concurrent review, or voluntary certification was received.</td>
</tr>
<tr>
<td>24</td>
<td>(Various)</td>
<td>General notes for blocks 24a through 24j:&lt;br&gt; • Unless otherwise specified, all required information should be entered in the unshaded portion.&lt;br&gt; • If more than six line items are billed for the entire claim, a provider must attach additional claim forms with no more than 28-line items for the entire claim.&lt;br&gt; • For multi-page claim forms, indicate the page number of the attachment (for example, page 2 of 3) in the top right-hand corner of the claim form.</td>
</tr>
<tr>
<td>24a</td>
<td>Date(s) of service</td>
<td>Enter the date of service for each procedure provided in a MM/DD/YYYY format. If more than one date of service is for a single procedure, each date must be given on a separate line. <strong>NDC</strong>&lt;br&gt; In the shaded area, enter the NDC qualifier of N4 and the 11-digit NDC number (number on packaged or container from which the medication was administered). Do not enter hyphens or spaces within this number. <strong>Example:</strong> N400409231231&lt;br&gt; <strong>Refer to:</strong> Subsection 6.3.4, “National Drug Code (NDC)” in this section.</td>
</tr>
<tr>
<td>24b</td>
<td>Place of service</td>
<td>Select the appropriate POS code for each service from the table under subsection 6.3.1.1, “Place of Service (POS) Coding” in this section.</td>
</tr>
<tr>
<td>24c</td>
<td>EMG (THSteps medical checkup condition indicator)</td>
<td>Enter the appropriate condition indicator for THSteps medical checkups. <strong>Refer to:</strong> Subsection 5.3.4, “* THSteps Medical Checkups” in <em>Children’s Services Handbook (Vol. 2, Provider Handbooks).</em></td>
</tr>
<tr>
<td>Block No.</td>
<td>Description</td>
<td>Guidelines</td>
</tr>
<tr>
<td>----------</td>
<td>-------------</td>
<td>------------</td>
</tr>
<tr>
<td>24d</td>
<td>Fully describe procedures, medical services, or supplies furnished for each date given</td>
<td>Enter the appropriate procedure codes and modifier for all services billed. If a procedure code is not available, enter a concise description. NDC Optional: In the shaded area, enter a 1- through 12-digit NDC quantity of unit. A decimal point must be used for fractions of a unit. Refer to: Subsection 6.3.4, “National Drug Code (NDC)” in this section.</td>
</tr>
<tr>
<td>24e</td>
<td>Diagnosis pointer</td>
<td>Enter the line item reference (1, 2, 3, or 4) of each diagnosis code identified in block 21 for each procedure. Indicate the primary diagnosis only. Do not enter more than one diagnosis code reference per procedure. This can result in denial of the service.</td>
</tr>
<tr>
<td>24f</td>
<td>Charges</td>
<td>Indicate the usual and customary charges for each service listed. Charges must not be higher than fees charged to private-pay clients.</td>
</tr>
<tr>
<td>24g</td>
<td>Days or units</td>
<td>If multiple services are performed on the same day, enter the number of services performed (such as the quantity billed). Note: The maximum number of units per detail is 9,999. NDC Optional: In the shaded area, enter the NDC unit of measurement code. Refer to: Subsection 6.3.4, “National Drug Code (NDC)” in this section.</td>
</tr>
<tr>
<td>24j</td>
<td>Rendering provider ID # (performing)</td>
<td>Enter the provider identifier of the individual rendering services unless otherwise indicated in the provider specific section of this manual. Enter the TPI in the shaded area of the field. Entered the NPI in the unshaded area of the field.</td>
</tr>
<tr>
<td>26</td>
<td>Patient’s account number</td>
<td>Optional: Enter the client identification number if it is different than the subscriber/insured’s identification number. Used by provider’s office to identify internal client account number.</td>
</tr>
<tr>
<td>27</td>
<td>Accept assignment</td>
<td>Required All providers of Texas Medicaid must accept assignment to receive payment by checking Yes.</td>
</tr>
<tr>
<td>28</td>
<td>Total charge</td>
<td>Enter the total charges. For multi-page claims enter “continue” on initial and subsequent claim forms. Indicate the total of all charges on the last claim. Note: Indicate the page number of the attachment (for example, page 2 of 3) in the top right-hand corner of the form.</td>
</tr>
<tr>
<td>Block No.</td>
<td>Description</td>
<td>Guidelines</td>
</tr>
<tr>
<td>----------</td>
<td>--------------------------------------</td>
<td>---------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>29</td>
<td>Amount paid</td>
<td>Enter any amount paid by an insurance company or other sources known at the time of submission of the claim. Identify the source of each payment and date in block 11. If the client makes a payment, the reason for the payment must be indicated in block 11.</td>
</tr>
<tr>
<td>30</td>
<td>Balance due</td>
<td>If appropriate, subtract block 29 from block 28 and enter the balance.</td>
</tr>
<tr>
<td>31</td>
<td>Signature of physician or supplier</td>
<td>The physician, supplier, or an authorized representative must sign and date the claim. Billing services may print “Signature on File” in place of the provider’s signature if the billing service obtains and retains on file a letter signed by the provider authorizing this practice. <strong>Refer to:</strong> Subsection 6.4.2.1, “Provider Signature on Claims” in this section.</td>
</tr>
<tr>
<td>32</td>
<td>Service facility location information</td>
<td>If services were provided in a place other than the client’s home or the provider’s facility, enter name, address, and ZIP code of the facility where the service was provided.</td>
</tr>
<tr>

<td>NPI</td>
<td>Enter the NPI of the service facility location.</td>
</tr>
<tr>
<td>33</td>
<td>Billing provider info &amp; PH #</td>
<td>Enter the billing provider’s name, street, city, state, ZIP+4 code, and telephone number.</td>
</tr>
<tr>
<td>33A</td>
<td>NPI</td>
<td>Enter the NPI of the billing provider.</td>
</tr>
<tr>
<td>33B</td>
<td>Other ID #</td>
<td>Enter the TPI number of the billing provider.</td>
</tr>
</tbody>
</table>

### 6.6 UB-04 CMS-1450 Paper Claim Filing Instructions

The following provider types may bill electronically or use the UB-04 CMS-1450 paper claim form when requesting payment:

<table>
<thead>
<tr>
<th>Provider Types</th>
</tr>
</thead>
<tbody>
<tr>
<td>ASCs (hospital-based)</td>
</tr>
<tr>
<td>Comprehensive outpatient rehabilitation facilities (CORFs) (CCP only)</td>
</tr>
<tr>
<td>FQHCs</td>
</tr>
<tr>
<td><strong>Note:</strong> Must use CMS-1500 when billing THSteps.</td>
</tr>
<tr>
<td>Home health agencies</td>
</tr>
<tr>
<td>Hospitals</td>
</tr>
<tr>
<td>• Inpatient (acute care, rehabilitation, military, and psychiatric hospitals)</td>
</tr>
<tr>
<td>• Outpatient</td>
</tr>
<tr>
<td>Renal dialysis center</td>
</tr>
<tr>
<td>RHCs (freestanding and hospital-based)</td>
</tr>
<tr>
<td><strong>Note:</strong> Must use CMS-1500 when billing THSteps.</td>
</tr>
</tbody>
</table>
If a service is rendered in the facility setting but the facility’s medical record does not clearly support the information submitted on the facility claim, the facility may request additional information from the physician before submitting the claim to ensure the facility medical record supports the filed claim.

**Note:** In the case of an audit, facility providers will not be allowed to submit an addendum to the original medical records for finalized claims.

### 6.6.1 UB-04 CMS-1450 Electronic Billing

Electronic billers must submit UB-04 CMS-1450 claims with TexMedConnect or approved vendor software that uses the ANSI ASC X12 837I 5010 format. Specifications are available to providers developing in-house systems and software developers and vendors. Because each software package is different, field locations may vary. Contact the software developer or vendor for this information. Direct questions and development requirements to the TMHP EDI Help Desk at 1-888-863-3638.

**Refer to:** Subsection 3.2, “Electronic Billing” in Section 3, “TMHP Electronic Data Interchange (EDI)” (Vol. 1, General Information) for more information about electronic billing.

### 6.6.2 UB-04 CMS-1450 Claim Form (Paper) Billing

Providers obtain the UB-04 CMS-1450 paper claim forms from a vendor of their choice.

**Note:** To avoid claim denial, only the provider’s NPI should be placed in form locators 76-79 of the UB-04 CMS-1450 paper claim form or in the referring provider field on the electronic claim unless the client is a limited client.

Completed UB-04 CMS-1450 claims must contain the billing provider’s full name, address, and provider identifier. Claims without a provider name, address, and provider identifier cannot be processed.

**Refer to:** Subsection 6.6.4, “UB-04 CMS-1450 Instruction Table” in this section.

1. Normal delivery  
2. Premature delivery  
3. Sick baby  
4. Extramural birth  
5. Information not available |
| 16       | Discharge hour               | For inpatient claims, enter the hour of discharge or death. Use military time (00 to 23) to express the hour of discharge. If this is an interim bill (patient status of “30”), leave the block blank. |
| 17       | Patient Status               | For inpatient claims, enter the appropriate two-digit code to indicate the patient’s status as of the statement “through” date.  
Refer to: Subsection 6.6.6, “Patient Discharge Status Codes” in this section. |
| 18-28    | Condition codes             | Enter the two-digit condition code “05” to indicate that a legal claim was filed for recovery of funds potentially due to a patient.                                                                    |
| 29       | ACDT state                   | Optional: Accident state.                                                                                                                                                                                |
| 31-34    | Occurrence codes and dates   | Enter the appropriate occurrence code(s) and date(s). Blocks 54, 61, 62, and 80 must also be completed as required.  
Refer to: Subsection 6.6.5, “Occurrence Codes” in this section. |
<p>| 35-36    | Occurrence span codes and dates | For inpatient claims, enter code “71” if this hospital admission is a readmission within seven days of a previous stay. Enter the dates of the previous stay.                                      |</p>

<th>Block No.</th>
<th>Description</th>
<th>Guidelines</th>
</tr>
</thead>
<tbody>
<tr>
<td>39-41</td>
<td>Value codes</td>
<td>Accident hour—For inpatient claims, if the patient was admitted as the result of an accident, enter value code 45 with the time of the accident using military time (00 to 23). Use code 99 if the time is unknown. For inpatient claims, enter value code 80 and the total days represented on this claim that are to be covered. Usually, this is the difference between the admission and discharge dates. In all circumstances, the number in this block is equal to the number of covered accommodation days listed in Block 46. For inpatient claims, enter value code 81 and the total days represented on this claim that are not covered. The sum of Blocks 39–41 must equal the total days billed as reflected in Block 6.</td>
</tr>
<tr>
<td>42-43</td>
<td>Revenue codes and description</td>
<td>For inpatient hospital services, enter the description and revenue code for the total charges and each accommodation and ancillary provided. List accommodations in the order of occurrence. List ancillaries in ascending order. The space to the right of the dotted line is used for the accommodation rate. NDC Enter N4 and the 11-digit NDC number (number on packaged or container from which the medication was administered). Optional: The unit of measurement code and the unit quantity with a floating decimal for fractional units (limited to 3 digits) can also be submitted but they are not required. Do not enter hyphens or spaces within this number. Example: N400409231231GR0.025 Refer to: Subsection 6.3.4, “National Drug Code (NDC)” in this section.</td>
</tr>
<tr>
<td>44</td>
<td>HCPCS/rates</td>
<td>Inpatient: Enter the accommodation rate per day. Match the appropriate diagnoses listed in Blocks 67A through 67Q corresponding to each procedure. If a procedure corresponds to more than one diagnosis, enter the primary diagnosis. Each service and supply must be itemized on the claim form. Home Health Services Outpatient claims must have the appropriate revenue code and, if appropriate, the corresponding HCPCS code or narrative description. Outpatient: Outpatient claims must have the appropriate Healthcare Common Procedure Coding System (HCPCS) code.</td>
</tr>
</tbody>
</table>
Each service, except for medical/surgical and intravenous (IV) supplies and medication, must be itemized on the claim form or an attached statement.

**Note:** The UB-04 CMS-1450 paper claim form is limited to 28 items per outpatient claim. This limitation includes surgical procedures from Blocks 74 and 74a-e.

If necessary, combine IV supplies and central supplies on the charge detail and consider them to be single items with the appropriate quantities and total charges by dates of service. Multiple dates of service may not be combined on outpatient claims.

</tr>
</tbody>
</table>
6.6.7 Filing Tips for Outpatient Claims

The following are outpatient claim filing tips:

- Use HCPCS codes in Block 44 when available and give a narrative description in Block 43 for all services and supplies provided.

  **Important:** Services and supplies that exceed the 28 items per claim limitation must be submitted on an additional UB-04 CMS-1450 paper claim form and will be assigned a different claim number by TMHP. Claims may have 61 detail lines for services and supplies plus one detail line for the total amount billed.

- Combine central supplies and bill as one item. IV supplies may be combined and billed as one item. Include appropriate quantities and total charges for each combined procedure code used. Using combination procedure codes conserves space on the claim form.

- The 28-item limitation per claim: a UB-04 CMS-1450 paper claim form submitted with 28 or fewer items is given an internal control number (ICN) by TMHP. Multipage claim forms are processed as one claim for that client if all pages contain 28 or fewer items.

- Itemized Statements: Itemized statements are not used for assignment of procedure codes. HCPCS codes or narrative descriptions of procedures must be reflected on the face of the UB-04 CMS-1450 paper claim form. Attachments will only be used for clarification purposes.

- PT/OT/ST procedures are based on time (15-minute increments).

6.7 2006 American Dental Association (ADA) Dental Claim Filing Instructions

Providers billing for dental services and intermediate care facility for persons with mental retardation (ICF-MR) dental services may bill electronically or use the 2006 ADA claim form.

**Note:** TMHP is responsible for reimbursing all THSteps dental services provided by dentists.

6.7.1 2006 ADA Dental Claim Electronic Billing

Electronic billers must submit THSteps dental claims using TexMedConnect or an approved vendor software that uses the ANSI ASC X12 837D 5010 format. Specifications are available to providers developing in-house systems and software developers and vendors. Because each software package is different, block locations may vary. Contact the software developer or vendor for this information. Direct questions and development requirements to the TMHP EDI Help Desk at 1-888-863-3638.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for more information about electronic filing.
6.7.2 ADA Dental Claim Form (Paper) Billing
All participating THSteps dental providers are required to submit a 2006 ADA Dental claim form for paper claim submissions to Texas Medicaid. These forms may be obtained by contacting the ADA at 1-800-947-4746.

Claims must contain the billing provider’s complete name, address and a provider identifier. Claims without a provider name, address, and provider identifier cannot be processed.

6.7.3 2006 ADA Dental Claim Form
Samples of the ADA Dental Claim form can be found on the ADA website at www.ada.org/3017.aspx?currentTab=2.

6.7.4 2006 ADA Dental Claim Form Instruction Table
The following table is an itemized description of the questions appearing on the form. Thoroughly complete the 2006 ADA Dental claim form according to the instructions in the table to facilitate prompt and accurate reimbursement and reduce follow-up inquiries.

<tr>
<td>Physician assistant (PA)</td>
</tr>
</tbody>
</table>

6.8.1 Family Planning Electronic Billing

Electronic billers must submit family planning claims with TexMedConnect or approved vendor software that uses the ANSI ASC X12 837P 5010 format. Specifications are available to providers developing in-house systems, software developers, and vendors on the TMHP website at www.tmhp.com/Pages/EDI/EDI_Technical_Info.aspx. Because each software developer is different, location of fields may vary. Contact the software developer or vendor for this information. Direct questions and development requirements to the TMHP EDI Help Desk at 1-888-863-3638.

6.9 Family Planning Claim Form (Paper Billing)

Claims must contain the billing providers complete name, address, and a provider identifier. Claims without a provider name, address, and provider identifier cannot be processed.
# Family Planning 2017 Claim Form

1. **Family Planning Program:** XIX
   - **DSHS Family Planning Program**
   - **DFPP Only**
   - **Partial Pay**
   - **No Pay**

2. **Billing Provider TPI**

3. **Billing Provider NPI**

4. **Eligibility Date** (MM/DD/CCYY)

5. **Family Planning No.**
   - (Medicaid PCN if XIX)

6. **Patient’s Name** (Last Name, First Name, Middle Initial)

7. **Address** (Street, City, State)

8. **County of Residence**

9. **Date of Birth** (MM/DD/CCYY)

10. **Sex**
   - F
   - M

11. **Patient Status**
   - New Patient
   - Established Patient

12. **Patient’s Social Security Number**

13. **Race (Code #)**
   - White (1)
   - Black (2)
   - American Indian/Alaska Native (4)
   - Asian (5)
   - Unk/Not Represented (6)
   - Native Hawaiian/Pacific Islander (7)
   - More than one race (8)

14. **Ethnicity**
   - Hispanic (5)
   - Non-Hispanic (0)

15. **Marital Status**
   - Married (1)
   - Never Married (2)
   - Formerly Married (3)
   - Formerly Married (3)

16. **Number of Times Pregnant**

17. **Number of Live Births**

18. **Number of Living Children**

19. **Primary Birth Control Method Before Initial Visit**
   - a=Oral Contraceptive
   - f=Hormonal Implant
   - k=Intrauterine device (IUD)
   - p=Other method
   - b=1-Month hormonal injection
   - g=Male condom
   - l=Vaginal ring
   - q=Method unknown
   - c=3-Month hormonal injection
   - h=Female condom
   - m=Fertility awareness method (FAM)
   - r=No method (if used for #20, must be marked complete #21)
   - d=Cervical cap/diaphragm
   - i=Hormonal/Contraceptive patch
   - n=Sterilization
   - o=Contraceptive sponge
   - e=Abstinence
   - j=Spermicide (used alone)
   - s=Method unknown

20. **Primary Birth Control Method at End of This Visit**
   - a=Refused
   - b=Pregnant
   - c=Inconclusive Preg Test
   - d=Seeking Preg
   - e=Infertile
   - f=Rely on Partner
   - g=Medical

21. **If No Method Used at End of This Visit, Give Reason**
   - (Required only if #20 = r)

22. **Is There Other Insurance Available?**
   - Y
   - N

23. **Other Insurance Name and Address**

24. **Insured’s Policy/Group No.**

25. **Other Insurance Pd. Amt.**

26. **Name of Referring Provider**

27. **Referring Other ID**

28. **Level of Practitioner**
   - Physician (P)
   - Nurse (N)
   - Mid Level (M)
   - Other (O)

29. **Diagnosis Code** (Relate Items 1, 2, 3, or 4 to Item 32D by Line # in 32E)

30. **Authorization Number**

31. **Date of Occurrence** (MM/DD/CCYY)

32. **Dates of Service**
   - From (MM/DD/CCYY)
   - To (MM/DD/CCYY)

33. **Federal Tax ID Number/EIN**

34. **Patient’s Account No.** (optional)

35. **Patient Co-Pay Assessed**

36. **Total Charges**

37. **Signature of Physician or Supplier Date:**
   - Signed:

38. **Name and Address of Facility Where Services Were Rendered (If Other Than Home or Office)**

39. **Physician’s, Supplier’s Billing Name, Address, Zip Code & Phone No.**

<tr>
<td>2b</td>
<td>Billing provider NPI</td>
<td>Enter the billing provider’s NPI.</td>
<td>All</td>
</tr>
<tr>
<td>3</td>
<td>Provider name</td>
<td>Enter the provider’s name as enrolled with TMHP.</td>
<td>All</td>
</tr>
<tr>
<td>4</td>
<td>Eligibility date (V or XX)</td>
<td>Enter the date (MM/DD/CCYY) this client was originally designated eligible for DSHS Family Planning Program services. If client has DSHS Family Planning Program eligibility from a previous visit, enter that eligibility date. For a DSHS Family Planning Program client, this information comes from the 2025 claim form.</td>
<td>DSHS Family Planning Program</td>
</tr>
<tr>
<td>5</td>
<td>Family planning no. (Medicaid PCN if XIX)</td>
<td>If previous DSHS Family Planning Program claims or encounters have been submitted to TMHP, enter the client’s nine-digit family planning number, which begins with &quot;F.&quot; If the client has Title XIX Medicaid, enter the client’s nine-digit client number from the Medicaid Identification form. If this is a new family planning client, without Medicaid, leave this block blank and TMHP will assign a family planning number for the client.</td>
<td>XIX</td>
</tr>
<tr>
<td>6</td>
<td>Patient’s name (last name, first name, middle initial)</td>
<td>Enter the client’s last name, first name, and middle initial as printed on the Medicaid Identification Form, if Title XIX, or as printed in the provider’s records, if DSHS Family Planning Program.</td>
<td>All</td>
</tr>
<tr>
<td>7</td>
<td>Address (street, city, state)</td>
<td>Enter the client’s complete home address as described by the client (street, city, and state). This reflects the location where the client lives.</td>
<td>All</td>
</tr>
<tr>
<td>7a</td>
<td>ZIP Code</td>
<td>Enter the client’s ZIP Code.</td>
<td>All</td>
</tr>
<tr>
<td>8</td>
<td>County of residence</td>
<td>Enter the county code that corresponds to the client’s address. Please use the HHSC county codes.</td>
<td>All</td>
</tr>
<tr>
<td>9</td>
<td>Date of birth</td>
<td>Enter numerically the month, day, and year (MM/DD/CCYY) the client was born.</td>
<td>All</td>
</tr>
<tr>
<td>10</td>
<td>Sex</td>
<td>Indicate the client’s gender by checking the appropriate box.</td>
<td>All</td>
</tr>
<tr>
<td>11</td>
<td>Patient status</td>
<td>Indicate if this is the client’s first visit to this family planning provider (new patient) or if this client has been to this family planning provider previously (established patient). If the provider’s records have been purged and the client appears to be new to the provider, check “New Patient.”</td>
<td>All</td>
</tr>
<tr>
<td>12</td>
<td>Patient’s Social Security number</td>
<td>Enter the client’s nine-digit Social Security number (SSN). If the client does not have a SSN, or refuses to provide the number, enter 000-00-0001.</td>
<td>All</td>
</tr>

### 6.10 Vision Claim Form

All vision services must be billed on a CMS-1500 paper claim form or the appropriate electronic formats. Vision claims submitted on other forms are denied with EOB 01145, “Claim form not allowed for this program.”

For eyewear claims beyond program benefits, (e.g., replacing lost or destroyed eye wear), providers must have the patient sign the ”Patient Certification Form” and retain in their records. Do not submit form to TMHP.

**Refer to:** Form VH.3, “Vision Care Eyeglass Patient (Medicaid Client) Certification Form” in *Vision and Hearing Services Handbook (Vol. 2, Provider Handbooks).*
The following table shows the blocks required for vision claims on a CMS-1500 paper claim form.

| No longer used | Referral from screening program (THSteps) |
6.11 Remittance and Status (R&S) Report

The R&S Report provides information on pending, paid, denied, and adjusted claims. TMHP provides weekly R&S Reports to give providers detailed information about the status of claims submitted to TMHP. The R&S Report also identifies accounts receivables established as a result of inappropriate payment. These receivables are recouped from claim submissions. All claims for the same provider identifier and program processed for payment are paid at the end of the week, either by a single check or with Electronic Funds Transfer (EFT). If no claim activity or outstanding account receivables exist during the cycle week, the provider does not receive an R&S Report. Providers are responsible for reconciling their records to the R&S to determine payments and denials received.

**Note:** Providers receive a single R&S Report that details Texas Medicaid activities and provides individual program summaries. Combined provider payments are made based on the provider’s settings for Texas Medicaid fee-for-service.

Providers must retain copies of all R&S Reports for a minimum of five years. Providers must not use R&S Report originals for appeal purposes, but must submit copies of the R&S Reports with appeal documentation.

**Refer to:** Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

6.11.1 R&S Report Delivery Options

TMHP offers two options for the delivery of the R&S Report. Although providers can choose either of the following methods, a newly-enrolled provider is initially set up to receive an PDF version of the R&S Report.

The PDF version of the R&S Report can be downloaded by registered users of the TMHP website at www.tmhp.com. The report is available each Monday morning, immediately following the weekly claims cycle. Payments associated with the R&S Report are not released until all provider payments are released on the Friday following the weekly claims cycle.

In addition to the PDF R&S Report, an optional R&S Report delivery method is also available. Using HIPAA-compliant EDI standards, the Electronic Remittance & Status (ER&S) Report can be downloaded through the TMHP EDI Gateway using TexMedConnect or third party software. The ER&S Report is also available each Monday after the completion of the claims processing cycle.

**Refer to:** Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for more information about EDI formats and enrollment for the ER&S Report.

6.11.2 Banner Pages

Banner pages serve two purposes:

- They identify the provider’s name and address.
- They are used to inform providers of new policies and procedures.

The title pages include the following information:

- TMHP address for submitting paper appeals
- Provider’s name, address, and telephone number
- Unique R&S Report number specific to each report
- Provider identifier (TPI, NPI, and atypical provider identifier [API])
- Report sequence number (indicates the week number of the year)
- Date of the week being reported on the R&S Report
- Tax Identification Number
6.11.3 R&S Report Field Explanation

- **Patient name.** Lists the client’s last name and first name, as indicated on the eligibility file.
- **Claim number.** The 24-digit Medicaid ICN for a specific claim. The format for the TMHP claim number is expanded to PPP/CCC/MMM/CCYY/JJJ/BBBBB/SSS.

- **Medicaid #.** The client’s Medicaid number.
- **Patient Account #.** If a patient account number is used on the provider’s claim, it appears here.
- **Medical Record #.** If a medical record number is used on the provider’s claim, it appears here.
- **Medicare #.** If the claim is a result of an automatic crossover from Medicare, the last ten digits of the Medicare claim number appears directly under the TMHP claim number.
- **Diagnosis.** Primary diagnosis listed on the provider’s claim.
- **Service Dates.** Format MMDDYYYY (month, day, year) in “From” and “To” dates of service.
- **TOS/Proc.** Indicates by code the specific service provided to the client. The one-digit TOS appears first followed by a HCPCS procedure code. A three-digit code represents a hospital accommodation or ancillary revenue code. For claims paid under prospective payment methodology, it is the code of the DRG.
- **Billed Quantity.** Indicates the quantity billed per claim detail.
- **Billed Charge.** Indicates the charge billed per claim detail.
- **Allowed Quantity.** Indicates the quantity TMHP has allowed per claim detail.
- **Allowed Charge.** Indicates the charges TMHP has allowed per claim detail. For inpatient hospital claims, the allowed amount for the DRG appears.
- **POS Column.** The R&S Report includes the POS to the left of the Paid Amount. A one-digit numeric code identifying the POS is indicated in this column. Refer to subsection 6.3.1.1, “Place of Service (POS) Coding” in this section for the appropriate cross-reference among the two-digit numeric POS codes (Medicare), alpha POS codes, and one-digit numeric code on the R&S Report. Providers using electronic claims submission should continue using the same POS codes.
- **Paid Amt.** The final amount allowed for payment per claim detail. The total paid amount for the claim appears on the claim total line.
- **EOB Codes and Explanation of Pending Status (EOPS) Codes.** These codes explain the payment or denial of the provider’s claim. The EOB codes are printed next to or directly below the claim. The EOPS codes appear only in “The Following Claims Are Being Processed” section of the R&S Report. The codes explain the status of pending claims and are not an actual denial or final disposition. An explanation of all EOB and EOPS codes appearing on the R&S Report are printed in the Appendix at the end of the R&S Report. Up to five EOB codes are displayed.

- **Total TEFRA Billed and Allowed Charges.** Indicates claim details that have been denied or reduced.

- **Benefit.** Indicates the three digit benefit code associated with the claim.

- **Modifier.** Modifiers have been developed to describe and qualify services provided. For THSteps dental services two modifiers are printed. The first modifier is the TID and the second is the SID.

**Refer to:** Subsection 6.2.5, “Modifier Requirements for TOS Assignment” in this section for a list of the most commonly used modifiers.

### 6.11.4 R&S Report Section Explanation

#### 6.11.4.1 Claims – Paid or Denied

The heading **Claims – Paid or Denied Claims** is centered on the top of each page in this section. Claims in this section finalized the week before the preparation of the R&S Report. The claims are sorted by claim status, claim type, and by order of client names. The reported status of each claim will not change unless further action is initiated by the provider, HHSC, or TMHP.

The following information is provided on a separate line for all inpatient hospital claims processed according to prospective payment methodology:

- **Age.** Client’s age according to TMHP records

- **Sex.** Client’s sex according to TMHP records:
  - M = Male, F = Female, U = Unknown

- **Pat-Stat.** Indicates the client’s status at the time of discharge or the last DOS on the claim (refer to instructions for UB-04 CMS-1450 paper claim form, Block 17)

- **Proc.** ICD-9-CM code indicates the primary surgical procedure used in determining the DRG

**Important:** Only paper claims appear in this section of the R&S Report. Claims filed electronically without required information are rejected. Users are required to retrieve the response file to determine reasons for rejections.

TMHP cannot process incomplete claims. Incomplete claims may be submitted as original claims only if the resubmission is received by TMHP within the original filing deadline.

**Refer to:** Subsection 6.1, “Claims Information” in this section for a description of different claim types.

#### 6.11.4.2 Adjustments to Claims

**Adjustments – Paid or Denied** is centered at the top of each page in this section. Adjustments are sorted by claim type and then patient name and Medicaid number. Media types 011, 021, 031, 041, 051, 061, 071, and 081 appear in this section. An adjustment prints in the same format as a paid or denied claim.

The adjusted claim is listed first on the R&S Report. EOB 00123, “This is an adjustment to previous claim XXXXXXXXXXXXXXXXXX which appears on R&S Report dated XX/XX/XX” follows this claim. Immediately below is the claim as originally processed. An accounts receivable is created for the original claim total as noted by EOB 00601, “A receivable has been established in the amount of the original payment: $XXX,XXX,XXX.XX. Future payments will be reduced or withheld until such amount is paid in full.” prints below the claim indicating the amount to be recouped. This amount appears under
the heading, “Financial Transactions Accounts Receivable.” EOB 06065, “Account Receivable is due to
the adjusted claim listed. For details, refer to your R&S Report for the date listed within the original date field.”

Claims adjusted as a result of a rate change will be listed on the R&S Report with EOB 01154 “This
adjustment is a result of a rate change.”

Refer to: Subsection 6.2.5, “Modifier Requirements for TOS Assignment” in this section for a list of
the most commonly used modifiers.

6.11.4.3 Financial Transactions

All claim refunds, reissues, voids/stops, recoupments, backup withholdings, levies, and payouts appear
in this section of the R&S Report. The Financial Transactions section does not use the R&S Report form
headings. Additional subheadings are printed to identify the financial transactions. The following
descriptions are types of financial items:

6.11.4.3.1 Accounts Receivable

This label identifies money subtracted from the provider’s current payment owed to TMHP. Specific
claim data are not given on the R&S Report unless the accounts receivable control number is provided
which should be referenced when corresponding with TMHP. Accounts receivable appear on the R&S
Report in the following format:

- **Control Number.** A number to reference when corresponding with TMHP.
- **Recoupment Rate.** The percentage of the provider’s payment that is withheld each week unless the
  provider elects to have a specific amount withheld each week.
- **Maximum Periodic Recoupment Amount.** The amount to be withheld each week. This area is blank
  if the provider elects to have a percentage withheld each week.
- **Original Date.** The date the financial transaction was processed originally.
- **Original Amount.** The total amount owed TMHP.
- **Prior Date.** The date the last transaction on the accounts receivable occurred.
- **Prior Balance.** The amount owed from a previous R&S Report.
- **Applied Amount.** The amount subtracted from the current R&S Report.
- **Balance.** Indicates the total outstanding accounts receivable (AR) balance that remains due to
  TMHP.
- **FYE.** The fiscal year end (FYE) for cost reports.
- **EOB.** The EOB code that corresponds to the reason code for the accounts receivable.
- **Patient Name.** The name of the patient on the claim, if the accounts receivable are claim-specific.
- **Claim Number.** The ICN of the original claim, if the accounts receivable are claim-specific.
- **Backup Withholding Penalty Information.** A penalty assessed by the Internal Revenue Service (IRS)
  for noncompliance due to a B-Notice. Although the current payment amount is lowered by the
  amount of the backup withholding, the provider’s 1099 earnings are not lowered.
- **Control Number.** TMHP control number to reference when corresponding with TMHP.
- **Original Date.** The date the backup withholding was set up originally.
- **Withheld Amount.** Amount withheld (31 percent) of the provider’s checkwrite.
6.11.4.3.2 IRS Levies

The payments withheld from a provider’s checkwrite as a result of a notice from the IRS of a levy against the provider appear in the “IRS Levy Information” section of the R&S Report. Payments are withheld until the levy is satisfied or released. Although the current payment amount is lowered by the amount of the levy payment, the provider’s 1099 earnings are not lowered. IRS levies are reported in the following format:

- **Control Number.** TMHP control number to reference when corresponding with TMHP.
- **Maximum Recoupment Rate.** The percentage of the provider’s payment that is withheld each week, unless the provider elects to have a specific amount withheld each week.
- **Maximum Recoupment Amount.** The amount to be withheld periodically.
- **Original Date.** The date the levy was set up originally.
- **Original Amount.** The total amount owed to the IRS.
- **Prior Balance.** The amount owed from a previous R&S Report.
- **Prior Date.** The date the last transaction on the levy occurred.
- **Current Amount.** The amount subtracted from the current R&S Report and paid to the IRS.
- **Remaining Balance.** The amount still owed on the levy. (This amount becomes the “previous balance” on the next R&S Report.)

6.11.4.3.3 Refunds

Refunds are identified by EOB 00124, “Thank you for your refund; your 1099 liability has been credited.” This statement is verification that dollars refunded to TMHP for incorrect payments have been received and posted. The provider’s check number and the date of the check are printed on the R&S Report. Claim refunds appear on the R&S Report in the following format:

- **Claim Specific:**
  - **ICN.** The claim number of the claim to which the refund was applied this cycle.
  - **Patient Name.** The first name, middle initial, and last name of the patient on the applicable claim.
  - **Medicaid Number.** The patient’s Medicaid or CSHCN Services Program number.
  - **Date of Service.** The format MMDDCCYY (month, day, and year) in “From” DOS.
  - **Total Billed.** The total amount billed for the claim being refunded.
  - **Amount Applied This Cycle.** The refund amount applied to the claim.
  - **EOB.** Corresponds to the reason code assigned.

- **Nonclaim Specific:**
  - **Control Number.** A control number to reference when corresponding with TMHP.
  - **FYE.** The fiscal year for which this refund is applicable.
  - **EOB.** Corresponds to the reason code assigned.
6.11.4.3.4 Payouts

Payouts are dollars TMHP owes to the provider. TMHP processes two types of payouts: system payouts that increase the weekly check amount and manual payouts that result in a separate check being sent to the provider. Specific claim data are not given on the R&S Report for payouts. A control number is given, which should be referenced when corresponding with TMHP. System and manual payouts appear on the R&S Report in the following format:

- **Payout Control Number.** A control number to reference when corresponding with TMHP.
- **Payout Amount.** The amount of the payout.
- **FYE.** The fiscal year for which the payout is applicable.
- **EOB.** Corresponds to the reason code assigned.
- **Patient Name.** Name of the patient (if available).
- **PCN.** Medicaid number of the patient (if available).
- **DOS.** Date of service (if available).

6.11.4.3.5 Reissues

The provider’s 1099 earnings are not affected by reissues. A message states, “Your payment has been increased by the amount indicated below:

- **Check Number.** The number of the original check.
- **Check Amount.** The amount of the original check.
- **R&S Number.** The number of the original R&S Report.
- **R&S Date.** The date of the original R&S Report.

6.11.4.3.6 Voids and Stops

The provider’s 1099 earnings are credited by the amount of the voided/stopped payment.

- **Check Number.** The number of the voided/stopped payment.
- **Check Amount.** The amount of the voided/stopped payment.
- **R&S Number.** The number of the voided/stopped payment.
- **R&S Date.** The date of the voided/stopped payment.

6.11.4.4 Claims Payment Summary

This section summarizes all payments, adjustments, and financial transactions listed on the R&S Report. The section has two categories: one for amounts “Affecting Payment This Cycle” and one for “Amount Affecting 1099 Earnings.”

If the provider is receiving a check on this particular R&S Report, the following information is given: “Payment summary for check XXXXXXXXXX in the amount of XXX,XXX,XXX.XX.” If the payment is EFT: “Payment summary for direct deposit by EFT XXXXXXXXXX in the amount of XXX,XXX,XXX.XX.” The check number also is printed on the check that accompanies the R&S Report.

**Headings for the Payment Summary for “Affecting Payment This Cycle” and “Amount Affecting 1099 Earnings”**

- **Claims Paid.** Indicates the number of claims processed for the week and the year-to-date total.
- **System Payouts.** The total amount of system payouts made to the provider by TMHP.
- **Manual Payouts (Remitted by separate check or EFT).** The total amount of manual payouts made to the provider by TMHP.
• **Amount Paid to IRS for Levies.** The amount remitted to IRS and withheld from the provider’s payment due to an IRS levy.

• **Amount Paid to IRS for Backup Withholding.** The amount paid to the IRS for backup withholding.

• **Accounts Receivable Recoupments.** The total amount withheld from the provider’s payment due to accounts receivable.

• **Amounts Stopped/Voided.** The total amount of the payment that was voided or stopped with no reissuance of payment.

• **System Reissues.** The amount of the reissued payment.

• **Claim Related Refunds.** The total amount of claim-related refunds applied during the weekly cycle.

• **Nonclaim Related Refunds.** The total amount of nonclaim-related refunds applied during the weekly cycle.

• **Approved to Pay/Deny Amount.** The total amount of claim payments that were approved to pay/deny within the week. (This column will not be used at this time.)

• **Pending Claims.** The total amount billed for claims in process as of the cutoff date for the report.

### 6.11.4.5 The Following Claims are Being Processed

In the “Following Claims are Being Processed” section, the R&S Report may list up to five EOPS codes per claim. The claims listed in this section are in process and cannot be appealed for any reason until they appear in either the “Claims Paid or Denied,” or “Adjustments Paid and Denied” sections of the R&S Report. TMHP is listing the pending status of these claims for informational purposes only. The pending messages should not be interpreted as a final claim disposition. Weekly, all claims and appeals on claims TMHP has “in process” from the provider are listed on the R&S Report. The Following Claims are Being Processed claim prints in the same format as a paid or denied claim.

### 6.11.4.6 Explanation of Benefit Codes Messages

This section lists the descriptions of all EOBs that appeared on the R&S Report. EOBs appear in numerical order.

EDI ANSI X12 5010 835 files display the appropriate Claims Adjustment Reason Code (CARC), Claims Adjustment Group Code (CAGC), and Remittance Advice Remarks Code (RARC) explanation codes that are associated with EOB denials.

The 835 file includes the CARC, CAGC, and RARC explanation codes that are associated with the highest priority detail EOB to provide a clearer explanation for the denial.

### 6.11.4.7 Explanation of Pending Status Codes Appendix

This section lists the description of all EOPS codes that appeared on the R&S Report. EOPS appear in numerical order.

EOB and EOPS codes may appear on the same pending claim because some details may have already finalized while others may have questions and are pending.

The explanation of pending status (EOPS) codes listed are not final claim denials or payment dispositions. The EOPS codes identify the reasons why a claim is in process. Because these claims are currently in process, new information cannot be accepted to modify the claim until the claim finalizes and appears as finalized on your R&S report. Please refer to the last section of this report for the messages that correspond to the EOPS codes used on this report.

If your claim has not appeared on an R&S report as paid, denied or pending within 30 days of submission to TMHP, please contact telephone inquiry at 1-800-925-9126 and/or see claims filing instructions in your provider manual.

**BACKUP WITHHOLDING PENALTY INFORMATION:**

Our records indicate that you have been assessed a penalty by the Internal Revenue Service for non-compliance with backup withholding requirements. Therefore, your payment has been lowered and the penalty amount has been remitted to the Internal Revenue Service. 28% of your payment amount will be withheld weekly until TMHP receives a W9 or Letter 147C as requested in a B-Notice previously sent to your facility or office.

EXPLANATION OF BENEFITS CODES MESSAGES

THE FOLLOWING ARE THE DESCRIPTIONS OF THE EOB CODES THAT APPEAR ON THIS REMITTANCE AND STATUS REPORT

00100 A charge was not noted for this service.
00149 Procedure payment based on program/benefit plan, date of service and a maximum payment amount set by CMS or HHSC.
00429 This surgery/service/situation described is not on the authorization letter and is not payable.
00475 Paid according to the Texas Medicaid Reimbursement Methodology-TMRM (Relative Value Unit Times Statewide Conversion Factor)
00572 It is mandatory that authorization be obtained. Due to the lack of approval, the service is non-payable.
00757 Procedure payment based on program/benefit plan, date of service and is calculated at the detail billed amount.
01004 This payment was reduced 2.5% in accordance with the 78th Texas Legislature, Article II of House Bill 1, and Section 2.03 of House Bill 2292.
01147 Please refer to other EOB messages assigned to this claim for payment/denial information.

THE FOLLOWING ARE THE DESCRIPTIONS OF THE EOB CODES THAT APPEAR ON THIS REMITTANCE AND STATUS REPORT

00103 Our files indicate an authorization information mismatch.
6.11.6 Provider Inquiries—Status of Claims

TMHP provides several effective mechanisms for researching the status of a claim. Weekly, TMHP provides the R&S Report reflecting all claims with a paid, denied, or pending status. Providers verify claim status using the provider’s log of pending claims.

Electronic billers allow ten business days for a claim to appear on their R&S Reports. If the claim does not appear on an R&S Report as paid, pending, or denied, a transmission failure, file rejection, or claims rejection may exist. Providers check records for transmission reports correspondence from the TMHP EDI Help Desk.

The provider allows at least 30 days for a Medicaid paper claim to appear on an R&S Report after the claim has been submitted to TMHP. If a claim has not been received by TMHP and must be submitted a second time, the second claim must also meet the 95-day filing deadline.

The provider allows TMHP 45 days to receive a Medicare-paid claim automatically transmitted for payment of coinsurance or deductible according to current payment guidelines. Claims that fail to cross over from Medicare may be filed to TMHP by submitting a paper MRAN received from Medicare or a Medicare intermediary, the computer generated MRANs from the CMS-approved software applications MREP for professional services or PC-Print for institutional services or the TMHP Standardized MRAN form with the completed claim form.

If the claim does not appear on an R&S Report as paid, pending, or denied, providers can use any of the following procedures to inquire about the status of the claim:

- The provider can use the claim status inquiry function of TexMedConnect on the TMHP website at www.tmhp.com.
- The provider can call AIS at 1-800-925-9126 to determine if the claim is pending, paid, denied, or if TMHP has no record of the claim.
- If any of the three options above indicates that TMHP has no record of the claim, the provider can call the TMHP Contact Center at 1-800-925-9126 and speak to a TMHP contact center representative.
- If the TMHP Contact Center has no record of a claim that was submitted within the original filing deadline, the provider can submit a copy of the original claim to TMHP for processing. Electronic billers may refile the claim electronically. For claims submitted by a hospital for inpatient services, the filing deadline is 95 days from the discharge date or the last DOS on the claim. For all other types of providers, the filing deadline is 95 days from each DOS on the claim.
- If the 95-day filing deadline has passed and the claim is still within 120 days of the date of the rejection report or the R&S Report, the provider can submit a signed copy of the claim and all of the documentation that supports the original claim submission, including any electronic rejection reports, to:

  Texas Medicaid & Healthcare Partnership  
  Inquiry Control Unit  
  12357-A Riata Trace Parkway, Suite 100  
  Austin, TX 78727

Providers must retain copies of all R&S Reports for a minimum of five years. Providers must not send original R&S Reports back with appeals. Providers must submit one copy of the R&S Report to TMHP per appeal.

Refer to: “Automated Inquiry System (AIS)” in “Preliminary Information” (Vol. 1, General Information).
6.12 Other Insurance Claims Filing
The following information must be provided in the “Other Insurance” field on the paper claim and in
the appropriate field of electronic claims. On the CMS-1500 paper claim form, Fields 9 or 11, and 29
must contain the appropriate information:
• Name of the other insurance resource
• Address of the other insurance resource
• Policy number and group number
• Policyholder
• Effective date if available
• Date of disposition by other insurance resource (used to calculate filing deadline)
• Payment or specific denial information

Important: Important: By accepting assignment on a claim for which the client has Medicaid coverage,
providers agree to accept payment made by insurance carriers and Texas Medicaid when
appropriate as payment in full. The client cannot be held liable for any balance or copays
related to Medicaid-covered services.

6.12.1 Unbundled Services That Are Prior Authorized and Manually Priced
Procedure Codes
Providers that submit prior authorization requests and claims to TMHP must:
• Unbundle any bundled procedure codes that have been submitted to the client’s other insurance
  company.
• Itemize the rates.

If prior authorization has been obtained for services that use manually priced procedure codes,
providers must submit claims for the services using the MSRP that was submitted with the authorization
request and the following information that is listed on the authorization letter:
• The authorization number
• The provider identifier
• The procedure codes
• The dates of service
• The types of service
• The required modifiers

If the authorization letter shows itemized details, the claim must include all rendered services as they are
itemized on the authorization letter and the MSRP rate for each of those services. The procedure codes
and MSRP rates that are detailed on the claim must match the procedure codes that are detailed in the
authorization letter and the MSRP rates that were submitted with the authorization request. Claims
processing and payment may be delayed if there is not an exact match between the detailed information
on the authorization letter, the approved authorization, and the information that was submitted on the
claim.

Important: For appropriate processing and payment, the Pay Price that is indicated on the authorization
letter should not be submitted on the claim.

Prior authorization is a condition of reimbursement; it is not a guarantee of payment.
6.12.2 Other Insurance Credits

Providing other insurance payment information, even when no additional payment is expected from TMHP, provides benefit to all parties involved in Texas Medicaid. When a TPR issues a payment or partial payment to a provider, the other insurance credit must be indicated on the claim form submitted to TMHP.

This procedure benefits both providers and TMHP even if the TPR payment exceeds the Medicaid allowed amount. Although additional payment may not be issued by TMHP, informing TMHP of the other insurance credit allows TMHP to track the appropriate use of TPRs. Informing TMHP of a TPR credit provides hospitals with a more accurate standard dollar amount (SDA) rate setting and assists the program in tracking recoveries and reducing Medicaid medical expenditures by informing TMHP of liable third parties.

Providers must report TPR payments correctly in the appropriate electronic field or the paper claim form block.

</tbody>
</table>

6.12.2.1 Deductibles

TMHP will consider deductibles for reimbursement when the original third party payor applied the payment amount directly to the clients deductible. The explanation of benefit reflecting the application of the payment by the other insurance (third party payor) and a completed signed claim copy must be submitted to TMHP for consideration.

6.12.2.2 Health Maintenance Organization (HMO) Copayments

TMHP processes and pays HMO copayments for private and Medicare HMOs as well as private and Medicare PPO copayments for clients who are eligible for reimbursement under Medicaid guidelines.

TMHP pays the copayment in addition to the service the HMO or PPO has denied, if the client is eligible for Texas Medicaid and the procedure is reimbursed under Medicaid guidelines. Providers are not allowed to hold the client liable for the copayment.

An office or emergency room (ER) visit (the ER physician is paid only when the ER is not staffed by the hospital) is reimbursed a maximum copayment of $10 per visit. The hospital ER visit is reimbursed at a maximum of $50 to the facility. TMHP pays up to four copayments per day, per client. ER visits are limited to one per day, per client, and are considered one of the four copayments allowed per day.

**Important:** By accepting assignment on a claim for which the client has Medicaid coverage, providers agree to accept payment made by insurance carriers and the Texas Medicaid Program when appropriate as payment in full. The client cannot be held liable for any balance related to Medicaid-covered services.

The following Medicaid codes have been created for copayments, which are considered an atypical service:

<table>

</tr>
</thead>
<tbody>
<tr>
<td>CP001</td>
<td>Private HMO copayment—professional</td>
</tr>
<tr>
<td>CP002</td>
<td>Private PPO copayment—professional</td>
</tr>
</tbody>
</table>
6.12.2.3 Verbal Denial

Providers may call the other insurance resource and receive a verbal denial. The other insurance record can either be updated when the provider files the claim or calls the TPL/Tort Customer Service line at 1-800-846-7307. When calling the TPL/Tort Customer Service line and when filing claims to TMHP, the provider must have the following information before any updates are made.

Verbal denial requirements:
- Date of the telephone call to the other insurance resource
- Insurance company’s name and telephone number
- Name of the individual contacted at the insurance company
- Policyholder and group information for the client
- Specific reason for the denial, including the client’s type of coverage to enhance the accuracy of future claims processing (for example, a policy that covers inpatient services or physician services only)

Providers that update a client’s insurance records through the TMHP TPL/Tort Customer Service line must follow the current appeal process once the other insurance information has been updated on the client’s file.

6.12.2.4 110-Day Rule

When a service is billed to a third party and no response has been received, Medicaid providers must allow 110 days to elapse before submitting a claim to TMHP. If a TPR has not responded or delays payment or denial of a provider’s claim for more than 110 days after the date the claim was billed, Medicaid considers the claim for reimbursement. However, the 365-day federal filing deadline requirement must still be met. The following information is required:
- Name and address of the TPR
- Date the TPR was billed
- Statement signed and dated by the provider that no disposition has been received from the TPR within 110 days of the date the claim was billed

When TMHP denies a claim because of the client’s other coverage, information that identifies the other insurance appears on the provider’s R&S Report. The claim is not to be refiled with TMHP until disposition from the TPR has been received or until 110 days have lapsed since the billing of the claim with no disposition from the TPR. A statement from the client or family member which indicates that they no longer have this resource is not sufficient documentation to reprocess the claim.

<table>
<thead>
<tr>
<th>POS 1 – Office</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CP003</td>
<td>Medicare HMO copayment-professional</td>
</tr>
<tr>
<td>CP004</td>

</tr>
<tr>
<td>CP007</td>
<td>Medicare HMO copayment-outpatient</td>
</tr>
<tr>
<td>CP008</td>
<td>Medicare PPO copayment-outpatient</td>
</tr>
</tbody>
</table>
When a provider is advised by a TPR that benefits have been paid to the client, the information must be included on the claim with the date and amount of payment made to the client if available. If a denial was sent to the client, refer to the verbal denial guidelines above for required information. This enables TMHP to consider the claim for reimbursement.

### 6.12.2.5 Filing Deadlines

In accordance with federal regulations, all claims must initially be filed with TMHP within 365 days of the DOS. Claims that involve filing to a TPR have the following deadlines:

- Claims with a valid disposition (payment or denial) must be received by TMHP within 95 days of the date of disposition by the TPR and within 365 days of the DOS. Appealed claims that were originally denied with EOB 00260, which indicates that the provider files with a TPR, must be received within 95 days of the date of disposition by the TPR or within 120 days of the date on which TMHP denied the claim.

- The provider must appeal the claim to TMHP with complete other insurance information, which includes all EOBs and disposition dates. The disposition date is the date on which the other insurance company processed the payment or denial.

- If a provider submits other insurance EOBs without disposition dates, the appeal will be denied. If the other insurance disposition date appears only on the first page of an EOB that has multiple pages and the claim that is being submitted to TMHP is on a subsequent page or pages, the provider must submit the first page that shows the disposition date and all of the pages that show the claim that is being submitted to TMHP.

- If more than 110 days have passed from the date a claim was filed to the TPR without a response, the claim is submitted to TMHP for consideration of payment.

### 6.12.3 Claims Forwarded to Other Insurance Carriers

Federal and state laws require the use of Medicaid funds for the payment of most medical services only after all reasonable measures have been made to use a client’s TPR or other insurance. Providers are required to submit clients’ known other insurance to TMHP.

TMHP forwards electronic institutional claims for clients suspected of having other insurance to a contractor. The contractor researches the claims to determine the client’s possible other insurance information. If it is determined that the client has valid other insurance for the claim’s date of service and the insurance carrier is listed below, the contractor will forward the claim to the selected insurance carrier. TMHP has begun forwarding claims to the major insurance carriers for Texas.

Provider will receive a denial EOB from TMHP on the R&S Report that will indicate that the claim was forwarded to the client’s other insurance carrier.

If the other insurance carrier denies the claim, the provider should first exhaust all avenues to appeal the claim with the other insurance carrier. If the final disposition is a denial, the provider may appeal the claim to TMHP using the carrier’s EOB showing the denial. Providers must review their R&S Reports to ensure that any follow-up action is taken within the appeal deadlines.

TMHP will not forward the following claim types to the contractor:

- Electronic institutional claims that are rejected by TMHP
- Electronic institutional Texas Medicaid fee-for-service adjustments
- Suspended or finalized claims
- Claims that are part of mass adjustments originating from TMHP
• All other electronic claim types (professional and dental)

  **Note:** Other claim types (professional and dental) will be eligible for forwarding at a later date.

• All Medicare crossover claims

• All NPI contingent claims

• All paper claims

• School Health and Related Services (SHARS) claims

• Early Childhood Intervention (ECI) claims

• CSHCN Services Program claims

• County Indigent Health Care Program (CIHCP) claims

• PCS claims

• Case Management for Children and Pregnant Women claims

• Claims that are rejected by the Contractor for HIPAA validation failures

• THSteps medical and dental claims

**Refer to:** Subsection 4.14, “Third Party Liability (TPL)” in Section 4, “Client Eligibility” (*Vol. 1, General Information*) for information about filing claims for clients with other insurance.

Section 6.12.2.5, “Filing Deadlines” in this section for information about filing deadlines for clients with other insurance.

### 6.13 Filing Medicare Primary Claims

When a service is a benefit of both Medicare and Medicaid, the claim must be filed to Medicare first. Providers should not file a claim with Medicaid until Medicare has dispositioned the claim unless the service is a Medicaid-only service.

Medicaid claims for Qualified Medicare Beneficiary (QMB) and Medicaid Qualified Medicare Beneficiary (MQMB) clients can be filed to Medicaid for consideration of coinsurance and deductible payment as follows:

• Medicare primary claims filed to Medicare Administrative Contractors (MACs) may be transferred electronically to TMHP through a Coordination of Benefits Contractor (COBC).

• Providers can submit crossover claims directly to TMHP using a paper claim form only for the specific circumstances indicated in the section below.

  **Note:** These guidelines do not apply to services that are rendered to clients who are living in a nursing facility.

**Refer to:** Subsection 2.7, “Medicare Crossover Claim Reimbursement” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for information about reimbursement for QMBs and MQMBs.

Subsection 4.13, “Medicare and Medicaid Dual Eligibility” in Section 4 “Client Eligibility” (*Vol. 1, General Information*) for information about MQMBs and QMBs eligibility.

### 6.13.1 Electronic Crossover Claims

Medicare primary claims filed to MACs may be transferred electronically to TMHP through a COBC for claims that are processed as assigned. Providers should contact their MAC for more information.
This electronic crossover process allows providers to receive disposition from both carriers while only filing the claim once. Providers must allow 60 days from the date of Medicare’s disposition for a claim to appear on the Medicaid R&S Report.

If all services on the claim are denied by Medicare, the claim is not automatically transferred to TMHP by the MAC through the COBC. Providers must submit the denied crossover claims to TMHP on paper.

**Important:** TMHP accepts only electronic crossover claims that are automatically transferred to TMHP by the MAC through the COBC. TMHP accepts only paper crossover claims from providers and other entities. TMHP does not accept electronic crossover new day claims or appeals from providers and other entities. TMHP accepts only paper appeals.

### 6.13.1.1 Medicare Copayments

Claims for Medicare copayments can also be submitted to TMHP.

**Refer to:** Subsection 2.7.4.2, “Nephrology (Hemodialysis, Renal Dialysis) and Renal Dialysis Facility Providers” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (Vol. 1, General Information) for information about claims for nephrology (hemodialysis, renal dialysis) and renal dialysis facility providers for Medicare crossover Claims.

### 6.13.2 Requirement for Group Billing Providers – Professional Claims

The performing provider NPI must be included on the professional electronic claim if the billing provider is a group. Claims are processed using the performing provider NPI that is submitted on the Medicare claim.

**Important:** The performing provider who is identified on the claim must be a member of the billing provider’s group. If the performing provider is not a member of the billing provider group, the detail line item will be denied.

A claim is denied if the performing provider NPI is missing, invalid, or is not a member of the billing provider’s group. Denied claims may be appealed on paper with the appropriate performing provider information.

### 6.13.2 Paper Crossovers Claims

TMHP accepts only paper crossover claims or appeals from providers and other entities.

The following paper crossover claims may be submitted to TMHP:

- For QMB and MQMB clients, if a crossover claim is not transferred to TMHP electronically through the COBC, the provider can submit a paper claim to TMHP for coinsurance and deductible reimbursement consideration.

- For MQMB clients, if a claim is denied by Medicare because the services are not a benefit of Medicare or because Medicare benefits have been exhausted, the provider can submit a paper claim to TMHP for coinsurance and deductible reimbursement consideration, and reimbursement consideration for the Medicaid-only services that were denied by Medicare. The Medicare EOB that
contains the relevant claim denial must be submitted to TMHP with the completed claim from within 95 days from the Medicare disposition date and 365 days from the date of service. The denied services are processed as Medicaid-only services.

**Important:** Claims that are denied by Medicare for administrative reasons must be appealed to Medicare before they are submitted to Texas Medicaid.

The paper submission must include all of the following:

- The Medicare Remittance Advice (RA) or Remittance Notice (RN), which is issued by Medicare
- The appropriate, completed paper CMS-1500 or UB-04 CMS-1450 paper claim form
- The appropriate TMHP Standardized Medicare and MAP Remittance Advice Notice Form (i.e., MRAN/MAP template). (The MRAN/MAP template is optional when certain conditions are met.)

Providers that receive paper MRANs from Medicare or a Medicare intermediary or MRANs using the CMS-approved software MREP, for professional services, or PC-Print, for institutional services, may submit these MRANs to TMHP. Providers that submit these MRANs are not required to submit the TMHP Standardized MRAN Form.

Providers that cannot retrieve the MRAN from MREP or PC-Print, or who don’t receive a paper MRAN from Medicare or a Medicare intermediary, must submit the TMHP Standardized MRAN Form.

Providers that submit paper crossover claims must submit only one of the approved MRAN formats—MREP, PC-Print, paper MRAN from Medicare or a Medicare intermediary, or TMHP Standardized MRAN form along with a completed claim form. Paper crossover claims that contain multiple MRAN forms with conflicting information are returned to the provider or denied.

### 6.13.2.1 TMHP Standardized Medicare and MAP Remittance Advice Notice Form

Providers that receive any of the following Medicare RAs or RNs from Medicare or a Medicare intermediary are not required to submit the MRAN/MAP template to TMHP:

- Paper RAs or RNs
- Electronic RAs or RNs using the CMS-approved software
- MREP (professional services)
- PC-Print (institutional services)

Providers that cannot retrieve the Medicare RA/RN from MREP or PC-Print, or who don’t receive a paper Medicare RA/RN from Medicare or a Medicare intermediary, must submit the TMHP MRAN/MAP template.

The following guidelines apply for the submission of the MRAN/MAP templates:

- The Medicare ICN must be included on the form. Claims are denied if the Medicare ICN is omitted.
- For the TMHP Crossover Professional Claim Type 30 form, the performing provider NPI and TPI must be submitted on each detail line item. A detail line item is denied if the performing provider NPI or TPI is omitted, if the performing provider NPI is not associated with the TPI according to the performing provider’s enrollment information, or if the performing provider is not a member of the group billing provider.
- For the TMHP Crossover Outpatient Facility Claim Type 31 form, the detail line items are required. Claims are denied if the details are omitted.
- The MRAN/MAP template must be submitted with a completed claim form, must be legible, and must identify only one client per page. Providers must not submit handwritten MRAN/MAP templates.
Claims that do not meet these standards are not processed and are returned to the provider.

By submitting the MRAN/MAP templates to TMHP, the provider attests that the information included in the form matches the Medicare RA or RN that was received from Medicare or the MAP. If the information on the crossover claim type form does not exactly match the information on the RA or RN, the claim may be denied.

Refer to: Subsection 6.20, “Forms” in this section, for the MRAN/MAP templates and instructions.

6.13.2.2 Crossover Paper Claims Filing Deadlines

The paper crossover claim with all required, EOBs, templates, and forms must be received by TMHP within 95 days of the Medicare date of disposition and 365 days from the date of service in order to be considered for processing.

6.13.3 Filing Medicare-Adjusted Claims

TMHP accepts crossover appeals only on paper.

Providers may submit Medicare-adjusted claims by submitting the adjusted Medicare RA/RNs (paper or electronic) and the appropriate TMHP MRAN/MAP template. The information on the Medicare RA/RN must exactly match the information submitted on the TMHP MRAN template.

Refer to: Subsection 3.6.1, “Medicaid Relationship to Medicare” in Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks) for additional information on hospital Medicare claims filing requirements.

Important: TMHP does not accept electronic crossover appeals.

### 12 Totals Information

|------------|----------|--------|----------|---------|----------------|

### 13 Medicare Prev Paid

Important: By submitting these forms to TMHP, the provider attests that the information included in the form exactly matches the Medicare RA or RN that was received from Medicare or the MAP. If the information on this crossover claim type form does not exactly match the information on the RA or RN, the claim may be denied.
6.13.5 Crossover Claim Type 30 Instructions

Crossover Professional Claim Type 30
TMHP Standardized Medicare and Medicare Advantage Plan (MAP)
Remittance Advice Notice Form Instructions

Providers that bill professional services on the CMS-1500 paper claim form may submit the Crossover Professional Claim Type 30 template with a copy of a completed claim form. The Remittance Advice (RA) or Remittance Notice (RN) from Medicare, the CMS-approved software Medicare Remit Easy Print (MREP), or the MAP is required when submitting the Crossover Professional Claim Type 30 template. All fields (excluding Medicaid information fields) on the form must be completed using the RA or RN that was received from Medicare or the MAP.

Important: All details from the Medicare or MAP RA or RN must be included in the template even if a deductible or coinsurance is not due.

The TMHP Standardized MRAN Submission Form must be typed or computer-generated. Handwritten forms will not be accepted and will be returned to the provider.

The following are the requirements for the Crossover Professional Claim Type 30 template:

Important: By submitting these forms to TMHP, the provider attests that the information included in the form exactly matches the Medicare RA or RN that was received from Medicare or the MAP. If the information on this crossover claim type form does not exactly match the information on the RA or RN, the claim may be denied.
### 6.13.7 Crossover Claim Type 31 Instructions

**Crossover Outpatient Facility Claim Type 31**

**TMHP Standardized Medicare and Medicare Advantage Plan (MAP) Remittance Advice Notice Form Instructions**

Providers that bill outpatient crossover claims on the UB-04 CMS-1450 paper claim form may submit the Crossover Outpatient Facility Claim Type 31 template with a copy of a completed claim form. The Remittance Advice (RA) or Remittance Notice (RN) from Medicare, the CMS-approved software PC-Print, or the MAP is required when submitting the Crossover Outpatient Facility Claim Type 31 template. All fields (excluding Medicaid information fields) on the form must be completed using the RA or RN that was received from Medicare or the MAP.

**Important:** All details from the Medicare or MAP RA or RN must be included in the template even if a deductible or coinsurance is not due.

The TMHP Standardized MRAN Submission Form must be typed or computer-generated. Handwritten forms will not be accepted and will be returned to the provider.

The following are the requirements for the Crossover Outpatient Facility Claim Claim Type 31 template:

Effective 01012012 / Revised 02062012
6.14 Medically Needy Claims Filing

TMHP must receive claims for unpaid bills not applied toward spend down within 95 days from the date eligibility was added to the TMHP client eligibility file (add date). These bills must be on the appropriate claim form (for example, CMS-1500 or UB-04 CMS-1450). Providers are allowed to submit completed CMS claim forms directly to the Medically Needy Clearinghouse (MNC) or to applicants for the Medically Needy Program (MNP) to be used to meet spend down. The completed CMS claim forms used to meet spend down are held for ten calendar days by the MNC, then forwarded to TMHP claims processing. Claims for services provided after the spend down is met must be received within 95 days from the date eligibility is added. Inpatient hospital facility claims must be received within 95 days from the date of discharge or last DOS on the claim. This applies when eligibility is not retroactive.

The client’s payment responsibilities are as follows:

- If the entire bill was used to meet spend down, the client is responsible for payment of the entire bill.
- If a portion of one of the bills was used to meet the spend down, the client is responsible for paying the portion applied toward the spend down, unless it exceeds the Medicaid allowable amount.
- The claim must show the total billed amount for the services provided. Charges for ineligible days or spend down amounts should not be deducted or noncovered on the claim.
- A client’s payment toward spend down is not reflected on the claim submitted to TMHP.
- A client is not required to pay the spend down amount before a claim is filed to Medicaid.
- Payments made by the client for services not used in the spend down but were incurred during an eligible period must be reimbursed to the client before the provider files a claim to TMHP.
- Services that require prior authorization and are provided before the client becomes eligible for Medicaid by meeting spend down are not reimbursable by Texas Medicaid.
- If a bill or a completed CMS claim form was not used to meet spend down and the dates of service are within the client’s eligible period, submit the total bill to TMHP.

When eligibility has been established, a TP 55 with spend down client can receive the same care and services available to all other Medicaid clients. If eligibility is established through TP 30 with spend down, the client’s Medicaid eligibility is restricted to coverage for an emergency medical condition only. Emergency medical condition is defined under Subsection 4.4.2.2, “* Exceptions to Lock-in Status” in Section 4, “Client Eligibility” (Vol. 1, General Information).

6.15 Claims Filing for Consumer-Directed Services (CDS)

Clients who participate in the CDS option for both PCS and a waiver program, through DADS are required to choose one Consumer-Directed Services Agency (CDSA) to provide services through both programs. CDSAs are permitted to file only the financial management services (FMS) fee, also known as the monthly administrative fee, through one program. The CDSA should file the FMS claim through the program with the highest reimbursement rate. Currently, the waiver programs have a higher reimbursement rate for the FMS fee than the Texas Medicaid PCS benefit, so a CDSA should file claims for the monthly FMS fee through the waiver programs.

The U8 modifier, which is used when submitting claims for the monthly PCS administrative fee, must be prior authorized. The DSHS case managers have two options when sending a prior authorization request for PCS to TMHP:

- If a client is only using the CDS option for Texas Medicaid PCS, a case manager will submit a prior authorization request to TMHP that approves the U8 modifier and either the U7 or UB modifier. In this case, the provider authorization notification letter will include the U8 modifier and the U7 or UB modifier.
If a client is using the CDS option for both Texas Medicaid PCS and a waiver program, a case manager will submit a prior authorization request to TMHP that approves either the U7 or UB modifier. The U8 modifier will not be prior authorized in this situation.

When a provider authorization notification letter is received by a CDSA, the provider should verify that the correct modifiers have been prior authorized for each PCS client. Providers who think that the approved modifiers are incorrect should contact the DSHS case manager and ask for the correct modifiers to be submitted to TMHP for prior authorization.

6.16 Claims for Medicaid Hospice Clients Not Related to the Terminal Illness

When the services are unrelated to the terminal illness, providers must submit a claim for Medicaid services to TMHP. The claim must include a statement and documentation from the hospice that the services billed are not related to the client’s terminal illness.

If TMHP denies the claim, the following information must be submitted with the provider’s appeal:

- A copy of the R&S Report, with the client or claim number in question circled
- Clinical records, which may be obtained from the hospice provider
- Supporting documentation giving reasons the services billed are not related to the terminal illness

Refer to: Subsection 4.4.3, “Hospice Program” in Section 4, “Client Eligibility” (Vol. 1, General Information) for more information related to Medicaid hospice client benefits and eligibility.

6.16.1 Medical Services When Client is Discharged From Hospice

Submit claims to TMHP for Medicaid services with a statement that the services billed were provided after the client was discharged from the Hospice Program. The provider must obtain a copy of Form 3071, Medicaid Hospice Cancellation, from the Hospice Program to support the discharge.

If TMHP denies the claim, the provider may appeal the decision with the following information:

- A copy of the R&S Report, with the client or claim number in question circled
- Supporting documentation stating that the client was not in hospice at the time

6.16.2 Claims Address for Medicaid Hospice Clients Not Related to the Terminal Illness

Mail paper claims to the following address:

Texas Medicaid & Healthcare Partnership
PO Box 200105
Austin, TX 78720-0105

Appeal claims by writing to the following address:

Texas Medicaid & Healthcare Partnership
PO Box 200645
Austin, TX 78720-0645

6.16.3 Lab and X-Ray

Submit claims for services unrelated to the terminal illness to TMHP. Submit claims for services related to the terminal illness to the hospice provider.
6.17 Claims for Texas Medicaid and CSHCN Services Program Eligible Clients

The CSHCN Services Program is the payer of last resort when clients have other insurance, including Texas Medicaid and private carriers. The CSHCN Services Program does not supplement a client’s Texas Medicaid benefits; however, services that are not a benefit of Texas Medicaid, such as hospice and medical foods, may be covered by the CSHCN Services Program.

6.17.1 New Claim Submissions

New claims that are submitted for clients who are eligible for both Texas Medicaid and CSHCN Services Program benefits during the same eligibility period will be processed through the appropriate program and may result in a separate claim for each program. The Medicaid claim number and disposition will be listed under the “Claims – Paid or Denied” section of the Medicaid/Managed Care R&S Report. If the claim includes services that are not benefits of Texas Medicaid but are benefits of the CSHCN Services Program, a claim will be created with a unique claim number that will be listed under the “Claims – Paid or Denied” section of the CSHCN Services Program R&S Report.

Note: If all of the services that are submitted on the claim are Texas Medicaid benefits, a CSHCN Services Program claim will not be created. Only a Texas Medicaid claim will be created, and the claim number will appear on the provider’s Medicaid/Managed Care R&S Report.

6.17.2 CSHCN Services Program Claims Reprocessing for Retroactive Texas Medicaid Eligibility

Claims that have already been paid by the CSHCN Services Program for clients who received retroactive Texas Medicaid eligibility for dates of service covered on the paid claims will be reprocessed to pay under the appropriate program. The reprocessed CSHCN Services Program claim number will appear under the ”Adjustments – Paid or Denied” section of the CSHCN Services Program R&S Report. An accounts receivable will be created for services covered by Texas Medicaid that will be reflected on the “Financial Transactions” page under the ”Accounts Receivable” section of the CSHCN Services Program R&S Report. The claim will be reprocessed to Texas Medicaid and given a new claim number. The new Texas Medicaid claim number and disposition will appear under the “Claims – Paid or Denied” section of the Medicaid/Managed Care R&S Report.

TMHP will contact providers when it reprocesses claims for services that require a Texas Medicaid prior authorization. Providers will be informed that a Texas Medicaid prior authorization must be submitted within a specified time frame for the claim to be considered for processing through Texas Medicaid.

6.18 Claims for State Supported Living Center Residents (SSLC)

Medicaid providers who render off-campus acute care services to Medicaid-eligible State Supported Living Center (SSLC) residents must submit claims directly to Medicaid. This is applicable only to residents of the SSLCs operated by the Department of Aging and Disability Services (DADS).

Claims and prior authorization requests for acute care services rendered to these individuals must be submitted to Medicaid. These requests must be submitted according to guidelines for acute care services as indicated in this manual.

Refer to: Section 5: Fee-for-Service Prior Authorizations (Vol. 1, General Information) for more information on prior authorizations.

6.19 Children’s Health Insurance Program (CHIP) Perinatal Claims

Claims for services provided to CHIP Perinatal Program clients are submitted to and considered for reimbursement as follows:

For women with income at or below 185 percent FPL:

- Hospital facility charges are paid through Emergency Medicaid and processed by TMHP.
• Professional service charges are paid through the CHIP Perinatal Program and processed through CHIP.

**Note:** Delivery-related professional services claims denied by the CHIP Perinatal health plan will be considered for reimbursement through Emergency Medicaid and will require the CHIP Perinatal health plan denial notice. These claims should be submitted through the existing Medicaid appeals process within 95 days from the date of the CHIP Perinatal Health plan denial notice. The provider must provide a copy of the complete explanation of benefits that includes the complete description of the reason for denial.

For newborns with a family income at or below 185 percent FPL:

• Hospital facility charges are paid through Medicaid and processed by TMHP

• Professional service charges are paid through Medicaid and processed by TMHP.

Inpatient services (limited to labor with delivery) for unborn children and women with income between 186 and 200 percent of FPL will be covered under CHIP Perinatal, and these claims will be paid by the CHIP Perinatal health plan.

**6.19.1 CHIP Perinatal Newborn Transfer Hospital Claims**

TMHP processes CHIP Perinatal newborn transfer hospital claims even if the claim from the initial hospital stay has not been received.

The hospital transfer must have occurred within 24 hours of the discharge date from the initial delivery hospital stay. This change applies only to CHIP Perinatal newborns with a family income at or below 185 percent of the FPL.

Transfer claims must be filed with TMHP on an electronic institutional claim or the UB-04 CMS-1450 paper claim form using admission type 1, 2, 3, or 5 in block 14, source of admission code 4 or 6 in block 15, and the actual date and time the client was admitted in block 12 of the UB-04 CMS-1450 paper claim form.

**6.20 Forms**
6.1 Sample Letter XUB Computer Billing Service Inc

XUB Computer Billing Service, Inc.
4040 Main Street
Anytown, USA 11111

Dear Sir:

This letter authorizes the XUB Computer Billing Service, Inc. to use my signature and to attest on my behalf to the requirements authorized in the following paragraphs, when submitting Medicaid claims on my behalf.

This is also to certify that information appearing on billings submitted by me for the Texas Medical Assistance Program is and will be true, accurate, and complete. I understand that payment of any Texas Medical Assistance Program claim will be from federal and state funds and that any falsification or concealment of a material fact may be prosecuted under federal and state laws. These certifications are made in accordance with requirements found at 42 Code Federal Regulations 455.18 and 455.19.

I also certify that the items billed to the Texas Medical Assistance Program are and will be for services that have been and will be personally provided by me or under my personal direction, and in cases of physician services, the services, supplies, or other items billed have been and will be medically necessary for the diagnosis or treatment of the condition of the patients, and are provided without regard to race, color, sex, national origin, age, or handicap.

Additionally, I agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the Texas Medical Assistance Program. I also agree to furnish them at no cost and provide access to information regarding any payments claimed for providing such services as the State Agency, Attorney General’s Office, and Department of Health and Human Services (HHS) Office may request for five years from date of service (6 years for freestanding rural health clinic; 10 years for hospital-based rural health clinic), or until any dispute is settled, whichever occurs first.

I agree to accept the amounts paid by the Medicaid Program as full payment for the services rendered for which a Medicaid benefit is provided under the Texas Medical Assistance Program.

This letter, to be retained in your files, bears my true and original signature:

7.1 Appeal Methods

An appeal is a request for reconsideration of a previously dispositioned claim.

Providers may use three methods to appeal Medicaid fee-for-service and carve-out service claims to Texas Medicaid & Healthcare Partnership (TMHP): electronic, Automated Inquiry System (AIS), or paper.

TMHP must receive all appeals of denied claims and requests for adjustments on paid claims within 120 days from the date of disposition of the Remittance and Status (R&S) Report on which that claim appears. If the 120-day appeal deadline falls on a weekend or holiday, the deadline is extended to the next business day.

Standard administrative requests and medical appeals must be sent first to TMHP or the claims processing entity as a first-level appeal. After the provider has exhausted all aspects of the appeals process for the entire claim, the provider may submit a second-level appeal to HHSC.

1) A first-level appeal is a provider’s initial standard administrative or medical appeal of a claim that has been denied or adjusted by TMHP. This appeal is submitted by the provider directly to TMHP for adjudication and must contain all required information to be considered.

2) A second-level appeal is a provider’s final medical or standard administrative appeal to HHSC of a claim that meets all of the following requirements:

- It has been denied or adjusted by TMHP.
- It has been appealed as a first-level appeal to TMHP.
- It has been denied again for the same reason(s) by TMHP.

This appeal is submitted by the provider to HHSC, which may subsequently require TMHP to gather information related to the original claim and the first-level appeal. HHSC is the sole adjudicator of this final appeal.

All providers must submit second-level administrative appeals and exceptions to the 95-day filing deadline appeals to the following address:

Texas Health and Human Services Commission
HHSC Claims Administrator Contract Management
Mail Code 91X
PO BOX 204077
Austin, Texas 78720-4077

TMHP is not responsible for managing appeals resulting from utilization review (UR) decisions by the HHSC Office of Inspector General (OIG) UR Unit. These must be submitted to HHSC Medical and UR Appeals.

*Note:* Appeals for managed care claims must be submitted to the managed care organization (MCO) or dental plan that administers the client’s managed care benefits. The only managed care appeals administered by TMHP are those for carve-out services.

7.1.1 Electronic Appeal Submission

Electronic appeal submission is a method of submitting appeals using a personal computer. The electronic appeals feature can be accessed by a business organization (e.g., billing agents) interfacing directly with the TMHP Electronic Data Interchange (EDI) Gateway or through TexMedConnect, the free web-based application available from TMHP.
The Health Insurance Portability and Accountability Act (HIPAA) standard American National Standards Institute (ANSI) ASC X12 837 format is accepted by TMHP EDI.

For other information, contact the TMHP EDI Help Desk at 1-888-863-3638.

### 7.1.1.1 Advantages of Electronic Appeal Submission

Using electronic appeal submission provides the following advantages to the users:

- Increased accuracy of appeals filed to potentially improve cash flow.
- Maintained audit trails through print and download capabilities.
- Appeal submission windows can be automatically filled in with electronic R&S (ER&S) Report information, thereby reducing data entry time.

### 7.1.1.2 Disallowed Electronic Appeals

The following claims may not be appealed electronically:

- Claims that require supporting documentation (e.g., operative report, medical records, home health, hearing aid, and dental X-rays).
- Diagnosis-related group (DRG) assignment.
- Medicare crossovers.
- Claims listed as pending or in process with explanation of pending status (EOPS) messages.
- Claims denied as past filing deadline except when retroactive eligibility deadlines apply.
- Claims denied as past the payment deadline.
- Claims with additional quantity billed changes in the claims details.
- Claims that are the result of a mass adjustment.

**Exception:** Inpatient hospital claims denied for lack of a Hysterectomy Acknowledgment Statement or a Sterilization Consent Form may be appealed electronically if the requested form has been faxed according to the instructions in Form GN.5, “Hysterectomy Acknowledgement Form” in the Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks).

### 7.1.2 Resubmission of TMHP Electronic Data Interchange (EDI) Rejections

TMHP EDI transactions that fail HIPAA edits are rejected, and the submitter receives a TMHP EDI Rejected Transaction Report. The Rejected Transaction Report lists activity by submitter, provider, and payer. Each rejection report includes member identifier, patient last name and first initial, patient control number (PCN), document control number (DCN), type of bill or place of service, charge, transaction from and to dates, receipt date, rejection code, and rejection description.

Providers who receive TMHP EDI Rejected Transaction Reports may resubmit an electronic claim within 95 days of the date of service. A paper appeal may also be submitted with a copy of the transaction rejection report within 120 days of the transaction rejection report to meet the filing deadline. A copy of the Rejected Transaction Report must accompany each corrected claim that is submitted on paper.

### 7.1.3 Automated Inquiry System (AIS) Appeals

The following appeals may be submitted using AIS:

- **Client eligibility.** The client’s correct Medicaid number, name, and date of birth are required.
- **Provider information (excluding Medicare crossovers).** The correct provider identifier is required for the billing provider, performing provider, referring provider, and limited provider. The name and address of the provider are required for the facility and outside laboratory.
• **Claim corrections.** Providers may correct the following:
  • Patient control number (PCN)
  • Date of birth
  • Date of onset
  • X-ray date
  • Place of service (POS)
  • Quantity billed
  • Prior authorization number (PAN)
  • Beginning date of service (DOS)
  • Ending date of service

The following appeals may **not** be appealed through AIS:

  • Claims listed on the R&S Report as Incomplete Claims
  • Claims listed on the R&S Report with $0 allowed and $0 paid
  • Claims requiring supporting documentation (for example, operative report, medical records, home health, hearing aid, and dental X-rays)
  • DRG assignment
  • Procedure code, modifier, or diagnosis code
  • Medicare crossovers
  • Claims listed as *pending* or *in process* with EOPS messages
  • Claims denied as *past filing deadline* except when retroactive eligibility deadlines apply
  • Claims denied as *past the payment deadline*
  • Inpatient hospital claims that require supporting documentation
  • Third party liability (TPL)/other insurance

Providers may appeal these denials either electronically or on paper.

**Refer to:** Subsection 7.1.1.2, “Disallowed Electronic Appeals” in this section to determine whether these appeals can be billed electronically. If these appeals cannot be billed electronically, a paper claim must be submitted.

**Exception:** Inpatient hospital claims denied for lack of a Hysterectomy Acknowledgment Statement or a Sterilization Consent Form may be appealed if the requested form has been faxed according to the instructions under subsection 5.10, “Hysterectomy Services” in the Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks).

**7.1.4 Automated Inquiry System Automated Appeals Guide**

To access the AIS automated appeals guide, providers can call 1-800-925-9126. Providers may submit up to three fields per claim and 15 appeals per call. If during any step invalid information is entered three times, the call transfers to the TMHP Contact Center for assistance.
7.1.5 Paper Appeals

Claim appeal requests that cannot be appealed electronically or by using AIS may be appealed on paper. Completed claim forms are not required to be submitted with paper appeals. Providers who submit paper appeals must clearly document on the attached R&S Report the information that is being appealed and identify the claim being appealed.

If a provider determines that a claim cannot be appealed electronically or through AIS, the claim may be appealed on paper by completing the following:

1) Submit a copy of the R&S Report page on which the claim is paid or denied. A copy of other official notification from TMHP may also be submitted.
2) Submit one copy of the R&S Report for each claim appealed.
3) Circle only one claim per R&S Report page.
4) Identify the reason for the appeal.
5) If applicable, indicate the incorrect information and provide the corrected information that should be used to appeal the claim.
6) Attach a copy of any supporting medical documentation that is required or has been requested by TMHP. Supporting documentation must be on a separate page and not copied on the opposite side of the R&S Report.

Note: It is strongly recommended that providers submitting paper appeals retain a copy of the documentation being sent. It also is recommended that paper documentation be sent by certified mail with a return receipt requested. This documentation, along with a detailed listing of the claims enclosed, provides proof that the claims were received by TMHP, which is particularly important if it is necessary to prove that the 120-day appeals deadline has been met. If a certified receipt is provided as proof, the certified receipt number must be indicated on the detailed listing along with the Medicaid number, billed amount, date of service (DOS), and a signed claim copy. The provider may need to keep such proof regarding multiple claims submissions if the provider identifier is pending.

Medicare crossovers and inpatient hospital appeals related to medical necessity denials or DRG assignment/adjustment must be submitted on paper with the appropriate documentation.

Submit correspondence, adjustments, and appeals (including routine inpatient hospital claims) to the following address:

Texas Medicaid & Healthcare Partnership
Appeals/Adjustments
PO Box 200645
Austin, TX 78720-0645

Exception: Hospitals appealing HHSC OIG UR Unit final technical denials, admission denials, DRG revisions, continued-stay denials for Tax Equity and Fiscal Responsibility Act (of 1982) (TEFRA) Hospitals, or cost/day outliers must appeal to HHSC at the following address:

Texas Health and Human Services Commission
Medical and UR Appeals, H-230
PO Box 85200
Austin, TX 78708-5200

All other provider fields on the claim forms (referring, facility, admitting, operating, and other) require only an NPI.

Providers that choose to appeal the claim with NPI information must continue submitting both a TPI and an NPI until the claim is finalized.
7.1.5.1 Texas Medicaid Fee-for-Service DRG Adjustment Appeal

Texas Medicaid fee-for-service hospital providers who are appealing a DRG adjustment (higher weight DRG) must provide the original and revised UB-04 CMS-1450 paper claim form, the complete medical record, and a statement defining the reason for the requested change. Hospitals have 120 days from the date of the R&S Report to request an addition of a diagnosis or procedure resulting in a DRG adjustment. Providers appealing a DRG that has not been revised by the OIG Utilization Review Unit should appeal to TMHP.

Refer to: Subsection 7.3.3, "Utilization Review Appeals" in this section.

7.1.5.2 Medical Necessity Denial Appeals

Appeals of denials relating to medical necessity decisions made for all medical services with the exception of HHSC Inpatient UR cases may be submitted for further review if providers find denials are inappropriate. All necessary documentation must accompany the request for review. Incomplete appeals and adjustment requests are denied by TMHP with an explanation of benefits (EOB) code requesting additional information.

TMHP reviews each appeal (DRG adjustment and medical necessity) and forwards written notice of final action in the form of a letter or an adjustment transaction on the R&S Report.

7.1.5.3 Other Insurance Appeals

To appeal a claim denial due to other insurance coverage, the provider must submit complete other insurance information including the disposition date. The disposition date indicates when the other insurance company processed the payment or denial. An appeal submitted without this information will be denied.

If submitting a paper appeal the provider must submit EOBs containing disposition dates. If the disposition date appears only on the first page of an EOB that has multiple pages and the claim that is being appealed is on a subsequent page, the provider must also include the first page of the EOB that shows the disposition date.

7.1.6 Appeals Submitted Incorrectly

If an incomplete appeal is received, it is returned to the sender with further appeal instructions and a request for more information. Documentation (either by letter or facsimile) that does not clearly indicate the reason for submission is returned to the sender for clarification.

If an appeal is received that may be more appropriately addressed in another department, the appeal is forwarded to the appropriate department for research and response.

If the TMHP Medical Director or designee identifies a pattern of ineffective use of the appeals process, the provider may be referred to a provider relations representative for assistance.

7.2 Refunds to TMHP

The TMHP Cash Reimbursement Unit is responsible for processing financial adjustments when any of the following occur: overpayment, duplicate payment, payment to incorrect providers, and overlapping payments by Medicaid and a third party resource (TPR).

Providers have the option of refunding payments by issuing a check to TMHP or requesting a recoupment through the paper appeal process. The paper appeal process does not require a provider to issue a check because the refund amount is reduced on the R&S Report. To accurately process claim refunds, the TMHP Cash Reimbursement Unit requests that the refund check be accompanied by Form 7.2, "Texas Medicaid Refund Information Form" in this section, with the following information:

- Refunding provider’s name and provider identifier.
- Client’s name and Medicaid ID number.
• Date of service.
• A copy of the R&S Report showing the claim to which the refund is being applied.
• The specific reason for the refund.
• Name and address of the attorney or casualty insurance company (including the policy and claim number).
• TPR subscriber information.
• Amount of insurance payment.

To request the forms, contact the TMHP Contact Center at 1-800-925-9126, or write to the following address:

Texas Medicaid & Healthcare Partnership
Contact Center
12357-B Riata Trace Parkway, Suite 100
Austin, TX 78727

Refer to: Subsection 4.14, “Third Party Liability (TPL)” in Section 4, “Client Eligibility” (Vol. 1, General Information) for additional TPL information.

7.2.1 Refunds Resulting from Other Insurance Payments

Providers are prohibited from receiving payment from Medicaid, billing a TPR, and then refunding the lesser of the two payments to Medicaid.

Refunds owed to TMHP must not be held until the end of an accounting year. If within 12 months of the date of service a provider identifies a TPR and wants to submit a claim for payment, the provider must refund any amounts previously paid by TMHP before submitting the claim to the third party.

If private insurance paid for the services submitted on the claim, the provider must provide the exact amount paid, the insurance company’s name and address, and the client’s policy number and group number.

Providers are limited to the Medicaid payable amount and are required to accept the amount paid by TMHP as payment in full if:

• A claim for payment has been paid by TMHP.
• The provider failed to refund the payment to TMHP before submitting a claim for payment to a third party as outlined above.

Third party payments received after receipt of the TMHP payment must be refunded to TMHP in full, even if the amount paid by the third party insurer exceeds the Medicaid payment.

If the amount paid by a third party health insurer is less than the amount payable for the service by Medicaid, providers may bill TMHP for the difference between the amount paid by the third party health insurer and the Medicaid payable amount if the claim is filed timely and in accordance with all the applicable rules.

In accordance with Title 1 Texas Administrative Code (TAC) §§354.2321 [g] and 354.2322 [i], providers that do not follow TPR rules “may be referred for investigation and prosecution for violations of state or federal Medicaid or false claims laws.” Providers should refer to the full text of these rules for a full description of payment requirements.
7.3 Appeals to HHSC Texas Medicaid Fee-for-Service

7.3.1 Administrative Claim Appeals

An administrative appeal is a request for review of (not a hearing on) claims that are denied by TMHP or claims processing entity for technical and nonmedical reasons. There are two types of administrative appeals:

- **Exception requests to the 95-day filing deadline or 120-day appeal deadline.** A provider’s formal written request for review of (not a hearing on) a claim that is denied or adjusted by TMHP for failure to meet the 95-day filing deadline or 120-day appeal deadline. Exception requests to the 95-day filing deadline should meet one of the five exceptions in subsection 7.3.1.2, “Exceptions to the 95-Day Filing Deadline” in this section. Exceptions to the 120-day appeal deadline should meet one of the situations in subsection 7.3.1.3, “Exceptions to the 120-Day Appeal Deadline” in this section.

- **Standard Administrative Appeal.** A provider’s formal written request for review of (not a hearing on) a claim or prior-authorization that is denied by TMHP for technical or non-medical reasons.

An administrative claims appeal is a request for a review as defined in Title 1 TAC §354.2201(2).

An administrative appeal must be:

- Submitted in writing to HHSC Claims Administrator Contract Management by the provider delivering the service or claiming reimbursement for the service.

- Received by HHSC Claims Administrator Contract Management after the appeals process with TMHP or the claims processing entity has been exhausted, and must contain evidence of appeal dispositions from TMHP or the claims processing entity:
  - All correspondence and documentation from the provider to TMHP or the claims processing entity including copies of supporting documentation submitted during the appeal process.
  - All correspondence from TMHP or the claims processing entity to the provider including TMHP’s final decision letter or such from the claims processing entity.

- Complete and contain all of the information necessary for consideration and determination by HHSC Claims Administrator Contract Management to include the following:
  - A written explanation specifying the reason/request for appealing the claim.
  - Supporting documentation for the request.
  - All R&S Reports identifying the claims/services in question.
  - Identification of the incorrect information and the corrected information that is to be used to appeal the claim.
  - A copy of the original claim, if available. Claim copies are helpful when the appeal involves medical policy or procedure coding issues. Also provide a corrected signed claim.
  - A copy of supporting medical documentation that is necessary or requested by TMHP.
  - Provider’s internal notes and logs or ticket numbers from the TMHP Contact Center when pertinent (cannot be used as proof of timely filing).
  - Memos from HHSC, TMHP, or claims processing entity indicating any problems, policy changes, or claims processing discrepancies that may be relevant to the appeal.
  - Other documents, such as receipts (i.e., certified mail along with a detailed listing of the claims enclosed), in-service notes, minutes from meetings, if relevant to the appeals. Receipts can be helpful when the issue is late filing.
  - Received by HHSC Claims Administrator Contract Management within 120 days from the date of disposition by TMHP or the claims processing entity as evidenced by the weekly R&S Report.
Providers who have submitted their claims electronically must identify the batch submission ID with the date on the electronic claims report. This report must indicate the TMHP assigned batch ID. In addition, this report must include the individual claim that is being appealed. The claim information on the batch report, including date of service and billed amount, must match the information on the claim that is being appealed. This required information constitutes proof of timely filing.

**Note:** Only reports accepted or rejected from TMHP or the claims processing entity to the vendor will be honored unless the provider is a direct submitter (TexMedConnect). Office notes indicating claims were submitted on time or personal screen prints of claim submissions are not considered proof of timely filing.

HHSC Claims Administrator Contract Management only reviews appeals that are received within 18 months from the DOS. All claims must be paid within 24 months from the DOS as outlined in 1 TAC §354.1003.

Providers must adhere to all filing and appeal deadlines for an appeal to be reviewed by HHSC Claims Administrator Contract Management. The filing and appeal deadlines are described in 1 TAC §354.1003.

Additional information requested by HHSC Claims Administrator Contract Management must be returned to HHSC Claims Administrator Contract Management within 21 calendar days from the date of the letter from HHSC Claims Administrator Contract Management. If the information is not received within 21 calendar days, the case is closed.

A determination made by HHSC Claims Administrator Contract Management is the final decision for claim appeals. No additional consideration is available. Therefore, ensure that all documents pertinent to the appeal are submitted. New evidence is required for an additional appeal to HHSC Claims Administrator Contract Management.

Mail appeal requests to the following address:

Texas Health and Human Services Commission  
HHSC Claims Administrator Contract Management  
Mail Code-91X  
PO Box 204077  
Austin, Texas 78720-4077

### 7.3.1.1 Requirements for Exception Requests

HHSC Claims Administrator Contract Management makes the final decision on whether claims fall within one of the exceptions to the 95-day or 120-day filing deadlines.

Providers must submit the following documentation for all exception requests:

- Exception requests must be in writing and mailed directly to HHSC.
- Adequate back-up documentation must accompany the exception request. Failure to provide adequate documentation results in the case being closed. Providers are notified of the reason for denial.
- All claims that are to be considered for an exception must accompany the request. HHSC will consider only the claims that are attached to the request.
- Additional claims cannot be added to an exception request after the exception request has been completed by HHSC. Additional claims must be submitted as a separate request and must include all required documentation. Information from a previous request will not be linked by HHSC to process additional claims.
• All exception requests must include an affidavit or statement from the provider stating the details of the cause for the delay, the exception being requested, and verification that the delay was not caused by neglect, indifference, or lack of diligence of the provider or the provider’s employee or agent. This affidavit or statement must be made by the person with personal knowledge of the facts.

• Multiple requests submitted simultaneously must be sorted by provider identifier first, and then alphabetically by client name. The orderly submission of exception requests facilitates the review process. Exception requests are returned to the provider if not submitted in the required format.

HHSC may request additional information which must be received within 21 calendar days from the date of the letter from HHSC. If the information is not received within 21 calendar days, the case will remain closed.

HHSC notifies providers about the outcome of the case upon completion of an exception request review.

7.3.1.2 Exceptions to the 95-Day Filing Deadline

HHSC Claims Administrator Contract Management is responsible for reviewing requests for exceptions to the 95-day filing deadline for Texas Medicaid fee-for-service. Only providers can submit exception requests. Requests from billing companies, vendors, or clearinghouses are not accepted unless accompanied by a signed authorization from the provider (with each appeal). Without provider authorization, these requests are returned without further action.

HHSC will only consider exceptions to the 95-day filing deadline for claims that are submitted within the 365-day federal filing deadline from the date of service as outlined in 1 TAC §354.1003.

Exceptions to the filing deadline are considered when one of the following situations exists:

• Catastrophic event that substantially interferes with normal business operations of the provider, or damage or destruction of the provider’s business office or records by a natural disaster, including, but not limited to, fire, flood, or earthquake; or damage or destruction of the provider’s business office or records by circumstances that are clearly beyond the control of the provider, including, but not limited to, criminal activity. The damage or destruction of business records or criminal activity exception does not apply to any negligent or intentional act of an employee or agent of the provider because these persons are presumed to be within the control of the provider. The presumption can only be rebutted when the intentional acts of the employee or agent lead to termination of employment and filing of criminal charges against the employee or agent.

Providers requesting an exception for catastrophic events must include independent evidence of insurable loss; medical, accident, or death records; or police or fire report substantiating the exception of damage, destruction, or criminal activity.

• Delay or error in the eligibility determination of a client, or delay due to erroneous written information from HHSC, its designee, or another state agency.

Providers requesting an exception for the delay or error in the eligibility determination of a client or delay due to erroneous written information from HHSC, its designee, or another state agency must include the written document from HHSC or its designee that contains the erroneous information or explanation of the delayed information.

• Delay due to electronic claim or system implementation problems experienced by HHSC, its designee, or Texas Medicaid providers.

Providers requesting an exception for the delay due to electronic claim or system implementation problems experienced by HHSC, its designee, or Texas Medicaid providers must include the written repair statement, invoice, computer or modem generated error report (indicating attempts to transmit the data failed for reasons outside the control of the provider), or the explanation for the system implementation problems.
The documentation must include a detailed explanation made by the person making the repairs or installing the system, specifically indicating the relationship and impact of the computer problem or system implementation to claims submission, and a detailed statement explaining why alternative billing procedures were not initiated after the delay in repairs or system implementation was known.

If the provider is requesting an exception based upon an electronic claim or system implementation problem experienced by HHSC or its designee, the provider must submit a written statement outlining the details of the electronic claim or system implementation problems experienced by HHSC or its designee that caused the delay in the submission of claims by the provider, any steps taken to notify the state or its designee of the problem, and a verification that the delay was not caused by the neglect, indifference, or lack of diligence on the part of the provider or its employees or agents.

- Submission of claims occurred within the 365-day federal filing deadline, but the claim was not filed within 95 days from the date of service because the service was determined to be a benefit of the Medicaid program, and an effective date for the new benefit was applied retroactively.

Providers requesting an exception for claims that were submitted within the 365-day federal filing deadline, but were not filed within the 95-days of the date of service because the service was determined to be a benefit of Texas Medicaid and an effective date for the new benefit was applied retroactively, must include a written, detailed explanation of the facts and documentation to demonstrate the 365-day federal filing deadline for the benefit was met.

- Client eligibility is determined retroactively and the provider is not notified of retroactive coverage.

Providers requesting an exception for client eligibility determined retroactively and the provider is not notified of retroactive coverage must include a written, detailed explanation of the facts and activities illustrating the provider’s efforts in requesting eligibility information for the client. The explanation must contain dates, contact information, and any responses from the client.

### 7.3.1.3 Exceptions to the 120-day Appeal Deadline

HHSC must receive a written exception request within 120 days of TMHP’s final action. HHSC shall consider exceptions to the 120-day appeal deadline for the situations listed below. This is a one-time exception request; therefore, all claims that are to be considered within the request for an exception must accompany the request. Claims submitted after HHSC’s determination has been made for the exception will be denied consideration because they were not included in the original request.

- An exception request must be received by HHSC within 18 months from the date of service to be considered. This requirement will be waived for the exceptions listed in the following bullets (b) and (c), as well as the situation listed under “Exceptions to the 24-month deadline.”

- The following exceptions to the 120-day appeal deadline are considered if the criteria in the previous bullet is met and there is evidence to support one of the bullets below:
  - (a) Errors made by a third party payor that were outside the control of the provider. The provider must submit a statement outlining the details of the cause for the error, the exception being requested, and verification that the error was not caused by neglect, indifference, or lack of diligence of the provider, the provider’s employee, or agent. This affidavit or statement should be made by the person with personal knowledge of the facts. In lieu of the above affidavit or statement from the provider, the provider may obtain an affidavit or statement from the third party payor including the same information, and provide this to HHSC as part of the request for appeal.
  - (b) Errors made by the reimbursement entity that were outside the control of the provider. The provider must submit a statement from the original payor outlining the details of the cause of the error, the exception being requested, and verification that the error was not caused by neglect, indifference, or lack of diligence on the part of the provider, the provider’s employee, or
agent. In lieu of the above reimbursement entity’s statement, the provider may submit a statement including the same information and provide this to HHSC as part of the request for appeal.

- (c) Claims were adjudicated, but an error in the claim’s processing was identified after the 120-day appeal deadline. The error is not the fault of the provider. An error occurred in the claims processing system that is identified after the 120-day appeal deadline has passed.

### 7.3.1.4 Exceptions to the 24-Month Payment Deadline

HHSC shall consider exceptions to the 24-month claims payment deadline for the situations listed below, as identified in 42 CFR §447.272. The final decision about whether a claim falls within one of the following exceptions will be made by HHSC.

- Claims for providers with retroactive adjustments who are reimbursed under a retrospective payment system.
- Claims paid within six months from the Medicare paid date.
- Claims from providers under investigation for fraud or abuse.
- Claims paid at any time in accordance with a court order, to carry out hearing decisions or agency corrective actions taken to resolve a dispute, or to extend the benefits of a hearing decision, corrective action, or court order to others in the same situation as those directly affected by it.

Mail exception requests to HHSC at the following address:

Texas Health and Human Services Commission
HHSC Claims Administrator Contract Management
Mail Code 91X
PO Box 204077
Austin, TX 78720-4077

### 7.3.2 Medical Necessity Appeals

Medical necessity appeals are defined as disputes regarding medical necessity of services. Providers must appeal to TMHP and exhaust the appeal/grievance process before submitting an appeal to HHSC.

Medical necessity appeals related to UR decisions made by the HHSC OIG UR Unit must be appealed to HHSC not TMHP.

When filing appeals to HHSC, providers must submit copies of all supporting documentation, including information sent to TMHP.

Refer to: Subsection 7.1.5.1, “Texas Medicaid Fee-for-Service DRG Adjustment Appeal” in this section for additional information.

### 7.3.3 Utilization Review Appeals

Hospitals may appeal adverse UR decisions made by the HHSC OIG UR Unit to the HHSC Medical and UR Appeals Unit. The written appeal request, with complete medical record and approved affidavit in section 6.5 of this handbook, must be received by the Medical and UR Appeals Unit within 120 days of the date of the original HHSC OIG UR decision letter. If the request is not received within 120 days, the appeal is not conducted, and the HHSC OIG UR decision is considered final. Any claim the facility may have to the Medicaid funds at issue are barred. Extensions of time are not granted for filing the written appeal request, submission of the complete medical record, or the original, properly completed, notarized affidavit in the format approved by HHSC. Procedures and specific requirements for appealing these decisions can be found in the sections that follow.
Hospitals may appeal adverse HHSC OIG UR Unit determinations to the following address:

Texas Health and Human Services Commission
Medical and UR Appeals, H-230
PO Box 85200
Austin, TX 78708-5200

7.3.3.1 Admission Denials, Continued Stay Denials for TEFRA Hospitals, DRG Revisions, and Cost/Day Outlier Denials

If a hospital is dissatisfied with the original retrospective review conducted by the HHSC OIG UR Unit, it may submit a written request for an appeal to the HHSC Medical and Utilization Review Appeals Unit. The HHSC Medical and UR Appeals Unit is responsible for conducting an independent review in response to a provider’s appeal. The professional staff uses only the documentation submitted in the medical record to determine whether an inpatient admission was appropriate and whether the diagnoses and procedures were correct. The HHSC UR and Medical Appeals physician performs a complete review for the medical necessity of inpatient admission, DRG validation, quality of care, continued stay medical necessity, and ancillary charges (TEFRA cases) using the medical record documentation submitted on appeal. After completion of the review, the physician renders a final decision on the case. The final decision may include determinations regarding multiple aspects of the admission. The hospital is notified in writing of the final decision. Inpatient admission denials cannot be rebilled as outpatient claims except as noted in subsection 4.2.4, “Outpatient Observation Room Services” in the Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks).

The request for an appeal must include a copy of the complete medical record, a letter explaining the reasons why the HHSC OIG UR decision is incorrect, a copy of the HHSC OIG UR decision letter, and an original, properly completed, and notarized affidavit in the format approved by HHSC. The affidavit allows the hospital to certify the record as a business and legal document. Complete medical records must be provided to HHSC at no charge. A complete medical record must include, but is not limited to, a discharge summary, history and physical, emergency room record, operative report, pathology report, anesthesia record, consultation reports, physician progress notes, physician orders, laboratory reports, X-ray reports, special diagnostic reports, nurses’ notes, and medication records.

Refer to: Form 7.1, “Business Records Affidavit Form” in this section.

The HHSC Medical UR Unit will notify hospitals if a complete medical record or a properly completed, notarized affidavit is not submitted with the initial appeal request. The hospital has 21 calendar days from the date of notification to submit the requested information. If the required documentation is not received within this time frame, the case is closed without an opportunity for further review, and the original HHSC OIG UR decision is considered the final decision.

If the hospital is displeased with the appeals decision, the attending physician or medical director of the hospital may request an educational conference with the HHSC Medical and UR Appeals physician. The educational conference is held by telephone between the physician and the hospital medical director or attending physician. This is an opportunity for the physicians to discuss the deciding factors in the case and any hospital billing processes that may have affected the adjudication of the case. The educational conference will not alter the previous appeal decision.

The HHSC Medical and Utilization Review Unit recognizes that hospital staff may use guidelines, such as the American Hospital Association’s Coding Clinic, to assist them in identifying diagnoses or procedures for statistical and billing purposes. However, the HHSC Medical and Utilization Review Appeals Unit determines the appropriate diagnoses or procedures for reimbursement purposes using the documentation in the medical record (submitted on appeal) and the following guidelines:

- Principal diagnosis assignment. The diagnosis (condition) established after study to be chiefly responsible for causing the admission of the client to the hospital for care. The principal diagnosis must be treated or evaluated during the admission to the hospital.
• **Secondary diagnosis assignment.** Conditions that affect patient care in terms of requiring clinical evaluation, therapeutic treatment, diagnostic procedures, extended length of hospital stay, or increased nursing care or monitoring, or, in the case of a newborn (birth through 28 days of age), which the physician deems to have clinically significant implications for future health care needs. Normal newborn conditions or routine procedures should not be considered as complications or comorbidities for DRG assignment.

If the principal diagnosis, secondary diagnoses, or procedures are not substantiated in the medical record, not sequenced correctly, or have been omitted, the codes may be changed, added, or deleted by the HHSC Medical and UR Appeals physician. When it is determined the diagnoses or procedures are substantiated and sequenced correctly, a final DRG assignment is made.

### 7.3.3.2 Final Technical Denials

Hospitals may submit a request for a written appeal to HHSC Medical and UR Appeals only if the hospital has evidence that the HHSC OIG UR Unit issued a final technical denial in error, or did not provide proper notification of the preliminary technical denial. The request must include a letter explaining the reasons why the HHSC OIG UR decision is incorrect and a copy of the HHSC OIG UR decision letter.

The written appeal request must be received by HHSC Medical and UR Appeals within 120 days of the date of the original HHSC OIG UR decision letter. If the request is not received within the 120 days, the appeal is not conducted and the HHSC OIG UR decision is considered final. Any claim the facility may have to the Medicaid funds at issue are barred. Extensions of time are not granted for filing the written appeal request.

If the appeal time frame is met, the HHSC Medical and UR Appeals Unit reviews all the documentation and renders a final decision on the case. If it is determined the technical denial was issued correctly by the HHSC OIG UR Unit, HHSC’s decision is upheld. The hospital is notified in writing of the decision. This decision is the final decision.

If it is determined that the final technical denial decision should be overturned, the HHSC Medical and UR Appeals Unit will request a copy of the complete medical record and an original, properly completed, notarized affidavit in the format approved by HHSC. The affidavit allows the hospital to certify the record as a business and legal document. The HHSC Medical and UR Appeals physician performs a complete review for the medical necessity of the admission, DRG validation, quality of care or continued stay, and ancillary charges (for TEFRA Hospitals) using only the medical record documentation. After completion of the review, the physician renders a final decision on the case. The hospital is notified in writing of the final decision.

If the requested documentation is not received within the required 21-day time frame, the case is closed without further opportunity for review and the original HHSC OIG UR decision is considered final.

### 7.3.4 Provider Complaints

TMHP provides for due process for resolving all provider complaints. A **complaint** is defined as any dissatisfaction expressed by telephone or in writing by the provider, or on behalf of that provider, concerning Texas Medicaid. The definition of complaint does not include a misunderstanding or a problem of misinformation that is resolved promptly by clearing up the misunderstanding or supplying the appropriate information to the provider’s satisfaction. The definition also does not include a provider’s oral or written dissatisfaction with an adverse determination or appeals regarding claim payments and denials.
Procedures governing the provider complaints process are designed to identify and resolve provider complaints in a timely and satisfactory manner. Most complaints are resolved within 30 calendar days. Complaints to TMHP may be submitted using the following methods:

- By telephone at 1-800-925-9126
- By fax to 1-888-235-8399
- In writing to:

  TMHP  
  Complaints Resolution Department  
  PO Box 204270  
  Austin, TX 78720-4270

Questions regarding the complaint process or the status of a complaint should be directed to the TMHP Contact Center at 1-800-925-9126.

7.3.4.1 Provider Complaint Policy

TMHP takes seriously and acts on each provider complaint. Depending on the level and nature of the complaint, TMHP works with the provider to resolve the issue or directs the complaint to the appropriate department.

The Medical Affairs Division handles complaints that relate to utilization of services (including ER use), denial of continued stay, and all clinical and access issues. This includes provider’s appeal of an adverse authorization decision.

If the complaint relates to a medical issue, the Medical Affairs Division staff may assist in resolving the complaint. The provider complaints process applies only to the resolution of disputes within the control of Texas Medicaid, such as administrative or medical issues. The provider complaint process does not apply to allegations of negligence against third parties, including other Texas Medicaid providers. These complaints are referred to HHSC for review and evaluation and are resolved by HHSC.

7.3.4.2 Provider Complaint Process

The TMHP Complaints Resolution Department Unit handles all provider complaints. The processing of a provider’s complaint is described as follows:

- Providers must submit their complaint by telephone or in writing (mail or fax). All requests to remove clients from panel reports must be submitted in writing.
- Providers will receive a written acknowledgement letter from TMHP within five business days of receipt of the complaint.
- Referrals to other departments, such as Provider Relations or Medical Affairs, are made when appropriate.
- If the complaint cannot be resolved within 30 calendar days, the provider is notified in writing of the status of the complaint.

Providers who believe they did not receive due process regarding their complaint from TMHP may file a complaint with HHSC. Providers are encouraged to utilize the appeals and grievance process with TMHP before filing a complaint with HHSC.

7.3.4.3 Complaints to HHSC—Texas Medicaid Fee-for-Service

Texas Medicaid fee-for-service providers may file complaints to the HHSC Claims Administrator Contract Management if they find they did not receive full due process from TMHP in the management of their appeal. Texas Medicaid fee-for-service providers must exhaust the appeals and grievance process with TMHP before filing a complaint with the HHSC Claims Administrator Contract Management.
Refer to: Subsection 7.3, “Appeals to HHSC Texas Medicaid Fee-for-Service” in this section for information about submission of an appeal to HHSC.

A complaint is defined as any dissatisfaction expressed in writing by the provider, or on behalf of that provider, concerning Texas Medicaid. The term complaint does not include the following:

- A misunderstanding or a problem of misinformation that is resolved promptly by clearing up the misunderstanding or supplying the appropriate information to the provider’s satisfaction.
- A provider’s oral or written dissatisfaction with an adverse determination.

Under the complaint process, the HHSC Claims Administrator Contract Management works with TMHP and providers to verify the validity of the complaint, determine if the established due process was followed in resolving appeals and grievances, and addresses other program and contract issues, as applicable.

Complaints must be in writing and received by the HHSC Claims Administrator Contract Management within 60 calendar days from TMHP’s written notification of the final appeal decision.

When filing a complaint, providers must submit a letter explaining the specific reasons they believe the final appeal decision by TMHP is incorrect and copies of the following documentation:

- All correspondence and documentation from the provider to TMHP, including copies of supporting documentation submitted during the appeal process.
- All correspondence from TMHP to the provider, including TMHP’s final decision letter.
- All R&S Reports of the claims and services in question, if applicable.
- Provider’s original claim or billing record, electronic or manual, if applicable.
- Provider’s internal notes and logs when pertinent.
- Memos from HHSC or TMHP indicating any problems, policy changes, or claims’ processing discrepancies that may be relevant to the complaint.
- Other documents, such as certified mail receipts, original date-stamped envelopes, in-service notes, or minutes from meetings if relevant to the complaint. Receipts can be helpful when the issue is late filing.

Complaint requests may be mailed to the following address:

Texas Health and Human Services Commission
HHSC Claims Administrator Contract Management
Mail Code 91X
PO Box 204077
Austin, TX 78720-4077

7.4 Cost Report Settlement Appeal Process

A provider who is dissatisfied with the determination contained in the Notice of Program Reimbursement (NPR) from TMHP Medicaid Audit may request an appeal as follows:

- The request for appeal must be in writing.
- The request for appeal must be filed within 180 calendar days from the date of receipt of the NPR.
- If the amount in controversy is at least $1,000, the request for the appeal must be filed with TMHP Medicaid Audit.
- If the NPR shows that the provider is indebted to Texas Medicaid, TMHP must take the necessary action to recover the overpayment, including a suspension of interim payments. This process will take place even if an appeal has been requested.
7.4.1 Appeals to TMHP Medicaid Audit

A provider’s request to appeal his or her NPR must include the following:

- Identify specific individual items in TMHP Medicaid Audit’s determination with which the provider disagrees.
- Give the reasons the provider believes these are incorrect.
- Identify the amount in controversy for each item and provide a calculation of that amount.

The appeal may include any materials the provider believes will support its position.

TMHP Medicaid Audit completes a desk review of the appeal within six months of the date of receipt of complete documentation supporting the appeal. TMHP does the following:

- Reviews the materials submitted by the provider.
- Informs the provider if it appears that the request for an appeal was not timely or the amount of controversy is not at least $1,000.
- Reviews the record that formed the basis for the determination of the total payment due to the provider.
- Attempts to resolve as many points in controversy as possible with the provider and inform him or her in writing the issues that have been resolved and those that the provider may appeal to HHSC.
- Ensures all available documentation in support of the provider or TMHP Medicaid Audit is part of the record.

To appeal to TMHP Medicaid Audit, send the written notice within 120 days of receipt of the NPR letter to the following address:

Texas Medicaid & Healthcare Partnership
Medicaid Audit Operations Director
PO Box 200345
Austin, TX 78720-0345

B.3 Palivizumab (Synagis) Available Through the VDP ............................. B-6
   B.3.1 Participating Palivizumab Distribution Pharmacies .............................. B-7
B.1 Vendor Drug Program

The Texas Medicaid Vendor Drug Program (VDP) makes payment for prescriptions of covered outpatient drugs to those pharmacy providers contracted with the VDP. In-state pharmacies licensed as Class A or C by the Texas State Board of Pharmacy are eligible for enrollment in the VDP. Out-of-state pharmacies and pharmacies holding any other class of pharmacy license are considered for inclusion in the program on a case-by-case basis, relative to the benefits made available to a client eligible for Texas Medicaid. Contracts are not granted to applicants unless additional benefits to the recipient are established.

VDP provides statewide access to prescription drugs as prescribed by treating physician or other healthcare provider for clients eligible for:

- Medicaid fee-for-service
- Children’s Health Insurance Program (CHIP)
- Children with Special Health Care Needs (CSHCN) Services Program
- Kidney Health Care (KHC)

S.B. 7. 82nd Legislature, First Called Session, 2011, requires the Texas Health and Human Services Commission (HHSC) to transition pharmacy benefits to the managed care service delivery model for most clients who are enrolled in Texas Medicaid and Children’s Health Insurance Program (CHIP) statewide. By March 2012, the majority of Texas Medicaid and CHIP clients will receive their pharmacy benefits from a managed care plan. Vendor Drug will remain responsible as claims processor for Medicaid fee-for-service (FFS) clients.

Note: Pharmacy services rendered to Medicaid managed care clients are administered by the clients’ managed care organizations (MCOs).

Refer to: Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks) for additional information about managed care prescription drug and pharmacy benefits.

B.1.1 VDP Benefits for Medicaid Fee-for-Service (FFS) Clients

The Medicaid drug benefit for Medicaid FFS clients is limited to three prescriptions per month with the following exceptions that have unlimited prescriptions:

- Clients enrolled in waiver programs such as Community Living Assistance (CLASS) and Community-Based Alternatives (CBA)
- Texas Health Steps (THSteps)-eligible clients (clients who are 20 years of age and younger)
- Clients in skilled nursing facilities

Note: Prescriptions for family planning drugs and supplies are not subject to the three-prescription limit.

The following categories of drugs do not count against the three prescription per month limit:

- Family planning drugs
- Smoking cessation drugs
- Insulin syringes

FFS clients can be “locked-in” or “limited” to a specific pharmacy. FFS clients who are “locked-in” to a primary-care pharmacy have “LIMITED” printed on their Your Texas Benefits Medicaid card. Clients who are not “locked-in” to a specific pharmacy may obtain their drugs or supplies from any contracted Medicaid provider of pharmaceutical services.

Refer to: Subsection 4.4.2, “Client Limited Program” in Section 4, “Client Eligibility” (Vol. 1, General Information) for more information about lock-in limitations.
Family planning services are excluded from lock-in limitation. Though TMHP reimburses family planning agencies and physicians for family planning drugs and supplies, the following family planning drugs and supplies are also available through the VDP and are not subject to the three-prescription limit:

- Diaphragms
- Oral contraceptives
- Jellies, creams, foams, suppositories, vaginal contraceptive film, and contraceptive sponge
- Medication for treatment of vaginal/cervical/genital infections (subject to the three-prescription limit)

The VDP does not reimburse claims for nutritional products (enteral or parenteral), medical supplies, or equipment other than limited home health supplies (LHHS).

### B.1.2 VDP Formulary Information

VDP drug formulary information is available to health-care providers to help their clients efficiently get their medications. Information includes which state health-care program covers the drug, whether a drug is on the Medicaid Preferred Drug List (PDL), whether a Medicaid non-preferred prior authorization or clinical prior authorization is required, and other important drug information. VDP drug formulary information is available:

- Online at [www.txvendordrug.com](http://www.txvendordrug.com) (All state health-care program formulary information with prior authorization type (PDL or clinical) required indicator)
- Online at [www.txvendordrug.com/formulary/enhanced-form-search.shtml](http://www.txvendordrug.com/formulary/enhanced-form-search.shtml). Here providers can find Medicaid drug formulary and PDL information with links attached to selected non-preferred drugs that will guide providers to the preferred drugs in that therapeutic class.
- Through Epocrates, a free drug information service that can be downloaded to your Palm, BlackBerry, Windows Mobile phone, or iPhone. In addition to listing a drug’s preferred status, Epocrates includes drug monographs, dosing information, and warnings. For more information, go to [www.epocrates.com](http://www.epocrates.com). All providers are also eligible to register for Epocrates.

### B.1.3 Obtaining Outpatient Prescribed Drug Prior Authorization for FFS Clients

To obtain prior authorization for any VDP medication for FFS clients, prescribing providers or their representatives should call the Texas Prior Authorization Hotline at 1-877-PA-TEXAS (1-877-728-3927). The Hotline is available Monday through Friday, 7:30 a.m. to 6:30 p.m. Central Time. To submit an online VDP prior authorization request for non-preferred drugs, prescribing providers must first register online at [https://paxpress.txpa.hidinc.com](https://paxpress.txpa.hidinc.com). For Synagis prior authorization, see subsection B.3, “Palivizumab (Synagis) Available Through the VDP” in this appendix.

**Note:** Pharmacists cannot obtain prior authorization for medications. If the client arrives at the pharmacy without prior authorization for a non-preferred drug, the pharmacist will alert the provider’s office and ask the provider to get prior authorization.

### B.1.4 Dispensing Life of Prescriptions

Medicaid prescriptions for noncontrolled substances are valid one year and up to 11 refills if authorized by prescriber.

Medicaid prescriptions for controlled substances in drug classes C3-C5 are valid for six months and up to 5 refills if authorized by prescriber provider.

Medicaid prescriptions controlled substances in C2 drug class have no refills and must be dispensed within 21 days of the date on which the prescription was written.

Texas State Board of Pharmacy website at www.tsbp.state.tx.us/rules/for rules about issuance of identical sets of C2 prescriptions.

B.1.5 National Drug Code (NDC)

All Texas Medicaid providers must submit an NDC for professional or outpatient claims submitted to TMHP with a physician-administered prescription drug procedure code.

The NDC is an 11-digit number on the package or container from which the medication is administered. Providers must enter modifier N4 before the NDC code on all professional or outpatient claims that are submitted to TMHP.

Note: Procedure codes in the A-code series do not require an NDC on claims that are submitted to TMHP.

A list of drugs that require an NDC for Texas Medicaid reimbursement is available on the TMHP website at www.tmhp.com under the Topics section. The list contains the physician-administered, multiple-source drugs that the U.S. Secretary of Health and Human Services has determined to have the highest dollar volume of physician-administered drugs that are dispensed through Medicaid.

Refer to: Subsection 6.3.4, “National Drug Code (NDC)” in Section 6, “Claims Filing” (Vol. 1, General Information) for additional information on claims filing using NDC.

B.1.6 VDP Contact Information

</tr>
</tbody>
</table>

7.5.1 72-Hour Emergency Supply

Federal and Texas law requires that a 72-hour emergency supply of a prescribed drug be provided when a medication is needed without delay and prior authorization is not available. This rule applies to non-preferred drugs on the Preferred Drug List (PDL) and any drug that is affected by a clinical prior authorization edit and needs the prescriber’s prior approval.

Refer to: VDP website at www.txvendordrug.com/pdl/72hour.shtml.

B.1.7 Cost Avoidance Coordination of Benefits

Cost avoidance coordination of benefits (COB) for pharmacy claims ensures compliance with the Centers for Medicare & Medicaid Services (CMS) regulations. Under federal rules, Medicaid agencies must be the payer of last resort. The cost avoidance model checks for other known insurance at the point of sale, preventing Medicaid from paying a claim until the pharmacy attempts to obtain payment from the client’s third party insurance.

B.1.8 Tamper-Resistant Prescription Pads

Providers are required by federal law (Public Law 110-28) to use a tamper-resistant prescription pad when writing a prescription for any drug for Medicaid clients. Pharmacies are required to ensure that all written Medicaid prescriptions submitted for payment to the VDP were written on a compliant tamper resistant pad.

CMS has stated that special copy-resistant paper is not a requirement for electronic medical records (EMRs) or ePrescribing-generated prescriptions. These prescriptions may be printed on plain paper and will be fully compliant if they contain at least one feature from each of the following three categories:

- Prevents unauthorized copying of completed or blank prescription forms
- Prevents erasure or modification of information written on the prescription form
- Prevents the use of counterfeit prescription forms

Two features that can be incorporated into computer-generated prescriptions printed on plain paper to prevent passing a copied prescription as an original prescription are as follows:

- Use a very small font that is readable when viewed at 5x magnification or greater and illegible when copied.
- Use a “void” pantograph accompanied by a reverse “Rx,” which causes a word such as “Void” to appear when the prescription is photocopied.

B.1.9 Schedule II Controlled Substances (CII) through Schedule V Controlled Substances (CV)

Pharmacies must report all CIII, CIV, and CV prescriptions to the Texas Department of Public Safety (DPS) in addition to the CII prescriptions that are already being reported. This DPS process requires reporting by the DPS registration number of the practitioner issuing the prescription. The prescription forms for Schedule CII controlled substances that are issued by the Texas Department of Public Safety (DPS) under the Texas Prescription Program meet the baseline standards set forth above.

Refer to: The DPS website at www.txdps.state.tx.us/RegulatoryServices/narcotics/narccsr.htm.

B.1.10 Free Delivery of Medicaid Prescriptions for FFS Clients

Many Medicaid pharmacies across the state offer free delivery of prescriptions to Medicaid FFS clients. To find out which pharmacies offer home delivery, refer FFS clients to the HHSC website at www.txvendordrug.com/delivery-pharmacies.pdf. Contracted Medicaid pharmacy providers are reimbursed a delivery fee that is included in the medication dispensing fee formula. The delivery fee is paid to HHSC-approved pharmacy providers that have certified that delivery services meet minimum conditions for payment of the delivery fee.

The conditions include:

- Making deliveries to individuals rather than to institutions, such as nursing homes.
- Offering no-charge prescription delivery to all Medicaid clients who request it in the same manner as to the general public.
- Displaying publicly the availability of prescription delivery services at no charge in a prominent place in the pharmacy store (window or door).
- Providing the delivery service without requiring retention of the Your Texas Benefits Medicaid card.

This delivery fee is not applicable for mail-order prescriptions.

For more information, call the Vendor Drug Resolution Help Desk at 1-800-435-4165 and ask for Pharmacy Contracts.
B.1.11 Delivery of Medicaid Prescriptions for MCO Clients
Medicaid and CHIP MCOs pay local pharmacies to deliver pharmaceuticals to clients. Each MCO develops its own participating pharmacy network for this delivery service. Pharmacies that are interested in receiving payment for the delivery of pharmaceuticals to MCO clients should contact their MCOs to request information on how to apply.

The VDP website at www.txvendordrug.com has several managed care expansion resources for pharmacies. The Enrollment Chart at www.txvendordrug.com/downloads/enrollment_chart.pdf includes the pharmacy contract phone number for each MCO.

B.1.12 Pharmacies Can Dispense Limited Home Health Supplies (LHSS) to Medicaid Clients
Pharmacies that are enrolled with VDP can dispense LHHS that are commonly found in a pharmacy to fee-for-service Medicaid clients. Pharmacies can also dispense LHHS to clients who are enrolled in a Medicaid MCO if the pharmacy is enrolled in the client’s MCO.

The home health supplies that can be dispensed include the following:
- Diabetic insulin syringe with needle 1 cc or less
- Diabetic insulin needles
- Diabetic blood glucose test strips
- Diabetic lancets
- Spring-powered device for lancet
- Home glucose disposable monitor (includes test strips)
- Talking diabetic blood glucose monitors
- Aerosol holding chamber
- Oral electrolytes
- Hypertonic saline solution

More information about the provision of these supplies through a fee-for-service pharmacy can be found on the VDP website at www.txvendordrug.com/formulary/limited-hhs.shtml.

Providers should contact the appropriate MCO or pharmacy benefit manager for more information about providing these supplies to Medicaid clients who are enrolled in a Medicaid managed care plan.

B.2 Medicaid Children’s Services Comprehensive Care Program (CCP) Available for Children and Adolescents
Medically necessary drugs and supplies that are not covered by the VDP may be available to children and adolescents (birth through 20 years of age) through the CCP (i.e., some over the counter drugs, nutritional products, diapers, and disposable or expendable medical supplies).

The Prior Authorization fax number is (512) 514-4212.

Refer to: Subsection 2.4.1.1, “Pharmacies (CCP)” in the Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information about pharmacy enrollment in CCP.

B.3 Palivizumab (Synagis) Available Through the VDP
Palivizumab is available to physicians for administering to Medicaid clients through the VDP. This option enables physicians to have palivizumab shipped directly to their office from a network pharmacy. Physicians will not need to purchase the drug. Physicians who obtain palivizumab through the VDP may not submit claims to Medicaid (TMHP) for the drug.
B.3.1 Participating Palivizumab Distribution Pharmacies

For a list of participating pharmacies, refer to the HHSC Vendor Drug website at www.txvendordrug.com.

Note: Palivizumab forms are updated every year. Providers must use the most current version of the forms to submit prior authorization requests.

The Texas Medicaid Palivizumab (Synagis) Prior Authorization Request Form is required if the prescribing provider purchases the drug and bills TMHP.

The Texas Medicaid Vendor Drug Program for Outpatient Pharmacies Synagis (Palivizumab) Prior Authorization Request & Prescription Form for 2012 is required when the prescribing provider obtains the drug through VDP.

Providers can refer to the following forms:

C.1 CDC Revised Recommendations for HIV Testing of Adults, Adolescents, and Pregnant Women in Health-Care Settings

The revised Centers for Disease Control and Prevention (CDC) recommendations advocate routine voluntary human immunodeficiency virus (HIV) screening as a normal part of medical practice, similar to screening for other treatable conditions. Screening is a basic public health tool used to identify unrecognized health conditions so treatment can be offered before symptoms develop and, for communicable diseases, so interventions can be implemented to reduce the likelihood of continued transmission. HIV screening should be offered as an opt-out test in accordance with CDC testing guidelines, which may be viewed at www.cdc.gov/mmwr/preview/mmwrhtml/rr5514a1.htm.

C.1.1 Routine HIV Testing Procedure Codes

The following table lists the procedure codes for routine HIV testing and the corresponding modifiers that must be submitted for rapid testing. Routine HIV testing is covered as a preventative or screening benefit. Medical necessity is not required.

C.2 Model Workplace Guidelines for Businesses, State Agencies, and State Contractors

C.2.1 Purpose

The purpose of this policy is to protect the employment rights and privileges of individuals infected with HIV and acquired immunodeficiency syndrome (AIDS) through compliance with federal, state, and local laws. This policy will provide Texas employers, especially state agencies, with a uniform approach to developing policies and education programs that address HIV/AIDS in the workplace. The Department of State Health Services (DSHS) encourages all employers to establish workplace policies concerning persons with HIV/AIDS. Employers can adapt this model to fit the particular needs of their organization, work force, and clients; however, the content and intent must remain consistent with this document and the Health and Safety Code (HSC).
C.2.2 Authority

The model workplace guidelines, developed by the DSHS HIV/Sexually Transmitted Disease (STD) Comprehensive Services Branch, as required by HSC §85.012, “Model Workplace Guidelines,” and adopted as HIV/STD Policy No. 090.021, are considered the minimum standards for the development of guidelines for state agencies. This policy also serves as the minimum standard for contractors of certain designated state agencies and organizations funded by those state agencies (HSC §85.113).

These guidelines are also the standard for health-care facilities licensed by DSHS and the Department of Aging and Disability Services (DADS) as stated in HSC §85.010, “Educational Course for Employees and Clients of Health Care Facilities.”

C.2.3 Who Must Use Workplace Guidelines

C.2.3.1 State Agencies

State law requires that each state agency adopt and carry out workplace guidelines. The agency’s workplace guidelines should incorporate, at a minimum, the DSHS model workplace guidelines in this policy.

C.2.3.2 State Contractors

A program that involves direct client contact and that contracts with or is funded by any of the state agencies listed in subsection C.2.7, “State Agencies Listed Under Health and Safety Code (HSC) §85.113” in this appendix will adopt and carry out workplace guidelines as stated in HSC §85.113.

C.2.4 Why Have Guidelines

Employers should develop and carry out policies and education programs concerning potentially limiting medical conditions before a crisis arises. Such policies and education programs help reduce employees’ fears and misconceptions about HIV/AIDS and help to:

- Provide current and accurate scientific evidence that people with HIV infection do not pose a risk of transmitting the virus to coworkers through ordinary workplace contact.
- Provide workers with current information about HIV risk reduction for employees and their families.
- Avoid conflict between the infected employee and the employer regarding discrimination or other employment issues.
- Prevent work disruption and rejection of the infected employee by coworkers.
- Inform employees that they have rights regarding work continuation, confidentiality of medical and insurance records, and general health and safety.
- Provide specific and ongoing education and equipment to employees in health-care settings who are at risk of exposure to HIV, and to assure that appropriate infection-control procedures are used.
- Reduce the financial impact, legal implications, and other possible effects of HIV/AIDS in the workplace.
C.2.5 Development of Workplace Policy Content

Individuals infected with HIV have the same rights and opportunities as other individuals. While some employers prefer a policy specific to HIV/AIDS and its unique issues, others prefer a general policy concerning illnesses and disabilities. A general policy should address HIV/AIDS in the same way as other major illnesses. Use of the following statements in agency policy is encouraged:

- **Use of a person’s HIV status to decide employment status, service delivery, or to deny services to HIV-infected individuals is not acceptable. Employees who believe that they have been discriminated against because of HIV or AIDS should contact the personnel office to discuss the matter, or initiate action through the agency’s grievance procedure. Other legal options may also be available.**

- **This policy is consistent with current information from public health authorities, such as the CDC of the U.S. Public Health Service, and with state and federal laws and regulations.**

While the approach and resolution of each employee’s situation may vary, similar issues may arise. A workplace policy should address the following issues about HIV/AIDS and other life-threatening illnesses or disabilities:

- **Discrimination.** The Americans with Disabilities Act of 1990 prohibits discrimination against people with disabilities, which includes HIV and AIDS, in employment, public accommodations, public transportation, and other situations.

  A specific policy statement that no one will be denied employment or employment opportunities because of a disability, satisfies the employer and employee’s need to address discrimination. Such a statement might be, “This agency complies with the Americans with Disabilities Act protections of all people with disabilities against discrimination in job application procedures, hiring, promotions, discharge, compensation, job training, and other terms or conditions of employment.”

  Managers may want to define ways in which they will deal with discriminatory actions.

- **Desire and Ability to Work.** A workplace policy should address the infected employee’s desire and need to work and the infected employee’s value to the workplace. Such a statement reassures employees that the employer supports them.

  The health status of someone with HIV may vary from healthy to critically ill. In the work setting, the ultimate concern is whether or not the employee can satisfy job expectations. A policy statement may say, for example, “Procedures may be adapted to provide reasonable accommodation so that people with disabilities may remain employed and productive for as long as possible. All employees, however, are expected to perform the essential functions of their job with or without reasonable accommodation.”

- **Performance Standards.** The Americans with Disabilities Act provides protections for disabled persons qualified to perform their jobs. And although an employer may be expected to provide reasonable accommodation to a disabled employee or applicant; employers may terminate employees and refuse to hire individuals who cannot perform the essential functions of the job, with or without the reasonable accommodation.

  One suggested statement is, “While the Americans with Disabilities Act does protect disabled employees from employment discrimination, all employees, those with and without disabilities, have the same performance and conduct standards regarding hiring, promotion, transfer, and dismissal.”

- **Reasonable Accommodation.** The Americans with Disabilities Act requires employers to provide reasonable accommodations for employees with disabilities. Employers do not have an obligation to provide any accommodation that imposes an undue hardship on the employer. Specific questions about the issue of reasonable accommodation and undue hardship should be directed to staff responsible for coordinating the requirements of the Americans with Disabilities Act.

  Such a policy statement might read, “The following options may be considered for people with HIV/AIDS: possible assignment or reassignment of job duties, working at home, leaves of absence, and flexible work schedules.”
• **Confidentiality and Privacy.** Organizations that receive funds from a state agency for residential or direct client services or programs shall develop and use confidentiality guidelines to protect their clients' HIV/AIDS-related medical information (HSC §85.115, “Confidentiality Guidelines”). Organizations that fail to adopt and use confidentiality guidelines are ineligible to receive state funds. Employees are not required to reveal their HIV status to employers. All medical information that an HIV-infected employee provides to medical or management personnel is confidential and private. Employers may not reveal this information without the employee’s knowledge and written consent, except as provided by law (HSC §81.103, “Confidentiality; Criminal Penalty”). A suggested policy statement might be, “This agency will protect the confidentiality of employee medical records and information. Written consent of the employee must be obtained to share any confidential information with other staff. Those with access to confidential information must maintain strict confidentiality and privacy, separating this information from employees’ personnel records. Individuals who fail to protect these employee rights commit a serious offense, which may be cause for litigation resulting in both civil and criminal penalties, and may result in dismissal.”

• **Coworker Concerns.** Employers need to be aware of the concerns that coworkers may have about an HIV-infected coworker. A policy statement that acknowledges employee concerns and offers HIV/AIDS education helps to increase awareness and decrease fear. Equally important is a policy statement that clarifies the limits of an employer’s response to coworker concerns, e.g., “Employees do not have the right to refuse to work with someone who has any disability.”

• **Employee Education.** Any health-care facility licensed by DSHS or DADS must require its employees to complete an educational course about HIV infection (HSC §85.010). A suggested policy statement may be: “All employees will receive education about methods of transmission and prevention of HIV infection and related conditions.” In response to HSC, §85.004, “Educational Programs,” DSHS developed model education program guidelines. These are available from DSHS, HIV/STD Comprehensive Services Branch, 1100 W. 49th St., Austin, TX. 78756-3199, 1-512-533-3000. Employers may also find the CDC’s educational kit, *Business Responds to AIDS*, useful in developing educational courses. HIV/AIDS education should address employee concerns about HIV communicability to themselves, their families, and coworkers. Experience shows that educated coworkers usually respond to persons with HIV/AIDS with support, rather than with fear and ostracism due to misconceptions. Education programs must stress that agency employees who provide direct client services may face occupational exposure to a client’s blood, semen, vaginal secretions, or other body fluids that are considered to be high-risk for transmission of blood born pathogens, including HIV/AIDS. All individuals receiving direct services are clients and include individuals who are physically or mentally impaired and individuals confined to correctional or residential facilities. All state agencies should have, as part of their employee education program, comprehensive policies and protocols based on universal precautions, body substance isolation, and barrier methods. These precautions prevent the spread of infection in clinical settings. The employer’s careful planning will reflect a commitment to the health and well-being of the work force and the community being served.

• **Assistance.** Some employers have designated benefits programs available to employees and family members with HIV infection. Such programs may:
  • Make referrals for testing, counseling, medical, and psychosocial services.
  • Provide HIV/AIDS workplace training for managerial staff.
  • Serve as a liaison between management and the employer’s clinical and occupational health programs.
  • Provide counseling for employees who irrationally fear coworkers or clients.
Employers who have no employee assistance program may consider working with other organizations that provide assistance. Some of these groups include local health departments, AIDS services organizations, American Red Cross chapters, community support groups, clinical treatment and counseling services, and the religious community.

A suggested policy statement might be: “An employee who wants assistance concerning a disability or a life-threatening illness should contact the Personnel Office. This agency offers the following resources to help employees and managers deal with these issues: education and information concerning HIV/AIDS; confidential referral to supportive services for employees and dependents affected by life-threatening illnesses; and benefits consultation to help employees effectively manage health, leave, and other benefits.”

C.2.6 Where to Go for Help

Employees may call 2-1-1 for HIV/STD testing locations in Texas. For questions related to issues such as transmission, signs and symptoms, or other concerns about HIV or other sexually transmitted infections, employees may call 1-800-CDC-INFO (English/Español) or 1-888-232-6348 (TTY).

C.2.7 State Agencies Listed Under Health and Safety Code (HSC) §85.113

HSC §85.113, “Workplace Guidelines for State Contractors” states “An entity that contracts with or is funded by... to operate a program involving direct client contact shall adopt and implement workplace guidelines similar to the guidelines adopted by the agency that funds or contracts with the entity.” H.B. 2292, 78th Leg., abolished 10 of the 12 existing health and human services agencies and transferred their powers and duties to three new state agencies and to HHSC, which rendered the state agency list found in HSC §85.113 obsolete. The list below reflects the state agency consolidation brought about by H.B. 2292 and identifies the state agencies to which HSC §85.113 applies.

- DADS
- Department of Assistive and Rehabilitative Services (DARS)
- DSHS
- Health and Human Services Commission (HHSC)
- Texas Department of Criminal Justice
- Texas Juvenile Probation Commission
- Texas Youth Commission

1. GENERAL INFORMATION

The information in this handbook is intended for Texas Medicaid ambulance providers. The handbook provides information about Texas Medicaid’s benefits, policies, and procedures applicable to emergency and nonemergency ambulance transports.

**Important:** All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1617(6)(A). Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.

**Refer to:** Section 1: Provider Enrollment and Responsibilities (Vol. 1, General Information) for more information about enrollment procedures.

The Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks).

2. AMBULANCE SERVICES

2.1 Enrollment

To enroll in Texas Medicaid, ambulance providers must operate according to the laws, regulations, and guidelines governing ambulance services under Medicare Part B; equip and operate under the appropriate rules, licensing, and regulations of the state in which they operate; acquire a license from the Texas Department of State Health Services (DSHS) approving equipment and training levels of the crew; and enroll in Medicare.

A hospital-operated ambulance provider must be enrolled as an ambulance provider and submit claims using the ambulance provider identifier, not the hospital provider identifier.

**Refer to:** Subsection 2.4.3, “Medicare and Medicaid Coverage” in this handbook.

**Note:** Air ambulance providers are not required to enroll with Medicare.

**Reminder:** When ambulance providers enroll in Texas Medicaid, they accept Medicaid payment as payment in full. They cannot bill clients for Texas Medicaid-covered benefits.

2.1.1 Subscription Plans

The Texas Insurance Code does not apply to ambulance providers who finance, in part or in whole, an ambulance service by subscription plan. DSHS’s license requirements do not permit providers of membership or subscription programs to enroll Medicaid clients. Emergency Medical Services (EMS) Subscription Programs are regulated by the DSHS-EMS Compliance Group. An EMS provider must have specific approval to operate a subscription program.

For more information, providers should contact the DSHS Office of EMS/Trauma Systems Coordination at (512) 834-6700. A list of EMS office and contact information is available at www.dshs.state.tx.us/emstraumasystems/about.shtm.
2.2 Services, Benefits, Limitations, and Prior Authorization

Emergency and nonemergency ambulance transport services are a benefit of Texas Medicaid when the client meets the definition of emergency medical condition or meets the requirements for nonemergency transport.

Cardiopulmonary resuscitation (CPR) is included in ambulance transport when needed and is not a separately billable service. Claims for CPR during transport will be denied. If CPR is performed during a nonemergency transport, the advanced life support (ALS) procedure code must be billed.

Reimbursement for disposable supplies is separate from the established global fee for ambulance transports and is limited to one billable code per trip.

Medical necessity and coverage of ambulance services are not based solely on the presence of a specific diagnosis. Medicaid payment for ambulance transportation may be made only for those clients whose condition at the time of transport is such that ambulance transportation is medically necessary. For example, it is insufficient that a client merely has a diagnosis such as pneumonia, stroke, or fracture to justify ambulance transportation. In each of those instances, the condition of the client must be such that transportation by any other means is medically contraindicated. In the case of ambulance transport, the condition necessitating transportation is often an accident or injury that has occurred giving rise to a clinical suspicion that a specific condition exists (for instance, fractures may be strongly suspected based on clinical examination and history of a specific injury).

It is the requesting provider’s responsibility to supply the contractor with information describing the condition of the client that necessitated ambulance transportation. Medicaid recognizes the limitations of ambulance personnel in establishing a diagnosis, and recognizes therefore, that diagnosis coding of a client’s condition using International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM) codes when reporting ambulance services may be less specific than those reported by other professional providers. Providers who submit ICD-9-CM diagnosis codes must choose the code that best describes the client’s condition at the time of transport. As a reminder to providers of ambulance services, “rule out” or “suspected” diagnoses must not be reported using specific ICD-9-CM codes. In such instances where a diagnosis is not confirmed, it is correct to use a symptom, finding, or injury code.

The ambulance provider may be sanctioned, including nonparticipation in the Medicaid Title XIX programs, for completing or signing a claim form that includes false or misleading representations of the client’s condition or the medical necessity of the transport.

2.2.1 Emergency Ambulance Transport Services

An emergency ambulance transport service is a benefit when the client has an emergency medical condition. An emergency medical condition is defined, according to 1 TAC §354.1111, as a medical condition (including emergency labor and delivery) manifesting itself by acute symptoms of sufficient severity (including severe pain, psychiatric disturbances, or symptoms of substance abuse) such that a prudent layperson with an average knowledge of health and medicine, could reasonably expect the absence of immediate medical attention to result in one of the following:

- Placing the client’s health (or, with respect to a pregnant woman, the health of the woman or her unborn child) in serious jeopardy
- Serious impairment to bodily functions
- Serious dysfunction of any bodily organ or part

Facility-to-facility transport may be considered an emergency if emergency treatment is not available at the first facility and the client still requires emergency care. The transport must be to an appropriate facility, meaning the nearest medical facility equipped in terms of equipment, personnel, and the capacity to provide medical care for the illness or injury of the client involved.
Transports to out-of-locality providers (one-way transfers of 50 or more miles from the point of pickup to the point of destination) are covered if a local facility is not adequately equipped to treat the condition. Transports may be cut back to the closest appropriate facility.

2.2.1.1 Prior Authorization for Emergency Out-of-State Transport

All emergency out-of-state (air, ground, or specialized vehicle) transports require authorization before the transport is considered for payment.

Prior authorization for emergency transport is required for out-of-state providers with the exception of those providers located within 200 miles of the Texas border.

Refer to: Subsection 2.6, “Out-of-State Medicaid Providers” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (Vol. 1, General Information) for additional information on providers who are not considered out-of-state providers.

To initiate the prior authorization process, providers must call 1-800-540-0694.

Texas Medicaid & Healthcare Partnership (TMHP) is responsible for processing prior authorization requests for all Medicaid clients.

2.2.2 Nonemergency Ambulance Transport Services

According to 1 TAC §354.1111, nonemergency transport is defined as ambulance transport provided for a Medicaid client to or from a scheduled medical appointment, to or from a licensed facility for treatment, or to the client’s home after discharge from a hospital when the client has a medical condition such that the use of an ambulance is the only appropriate means of transportation (i.e., alternate means of transportation are medically contraindicated).

Note: In this circumstance, contraindicated means that the client cannot be transported by any other means from the origin to the destination without endangering the individual’s health.

According to Human Resource Code (HRC) §32.024 (t), a Medicaid-enrolled physician, nursing facility, health-care provider, or other responsible party is required to obtain authorization before an ambulance is used to transport a client in circumstances not involving an emergency.

Medical necessity must be established through prior authorization for all nonemergency ambulance transports. Retrospective review may be performed to ensure that documentation supports the medical necessity of the transport.

Clients who do not meet medical necessity requirements for nonemergency ambulance transport may be able to receive transport through the Medical Transportation Program (MTP).

Transports must be limited to those situations where the transportation of the client is less costly than bringing the service to the client.

Refer to: Subsection 5.1.8, “* Prior Authorization for Nonemergency Ambulance Transport” in Section 5, "Prior Authorization" (Vol 1, General Information) for more information about nonemergency ambulance transport prior authorization.

The Medical Transportation Program Handbook (Vol. 2, Provider Handbooks) for more information about the Medical Transportation Program.

2.2.3 Levels of Service

Levels of services are defined by the Centers for Medicare & Medicaid Services (CMS) and the Texas Health and Safety Code.

Basic Life Support (BLS) is emergency care that uses noninvasive medical acts and, if allowed by licensing jurisdiction, may include the establishment of a peripheral intravenous (IV) line.

Advanced Life Support, Level 1 (ALS 1) is emergency care that uses invasive medical acts including an ALS assessment or at least one ALS intervention.
Advanced Life Support, Level 2 (ALS 2) is emergency care that uses invasive medical acts including:

- At least three separate administrations of one or more medications by intravenous push/bolus or by continuous infusion (excluding crystalloid fluids), or
- At least one of the ALS 2 procedures: manual defibrillation/cardioversion, endotracheal intubation, central venous line, cardiac pacing, chest decompression, surgical airway, or intra-osseous line.

### 2.2.4 Oxygen

Reimbursement for oxygen (procedure code A0422) is limited to one billable code per transport.

### 2.2.5 Types of Transport

#### 2.2.5.1 Multiple Client Transports

Multiple client transports occur when more than one client with Medicaid coverage is transported simultaneously in the same vehicle. A claim for each client must be completed and must reference multiple transfers with the names and Medicaid numbers of other clients sharing the transfer in Block 19 of the CMS-1500 paper claim form. Providers must enter charges on a separate claim for each client. TMHP adjusts the payment to 80 percent of the allowable base rate for each claim and divides mileage equally among the clients who share the ambulance.

**Important:** Mileage determinations are based on the Official State Mileage Guide. All ground ambulance transports must be billed with mileage procedure code A0425.

**Refer to:** Subsection 6.4, “Claims Filing Instructions” in Section 6, “Claims Filing” (Vol. 1, General Information).

#### 2.2.5.2 Air or Specialized Vehicle Transports

Air ambulance transport services, by means of either fixed or rotary wing aircraft, and other specialized emergency medical services vehicles may be covered only if one of the following conditions exists:

- The client’s medical condition requires immediate and rapid ambulance transportation that could not have been provided by standard automotive ground ambulance.
- The point of client pick up is inaccessible by standard automotive ground vehicle.
- Great distances or other obstacles are involved in transporting the client to the nearest appropriate facility.

#### 2.2.5.3 Specialty Care Transport (SCT)

SCT (procedure code A0434) is the interfacility transport of a critically injured or ill client by a ground ambulance vehicle, including the provision of medically necessary supplies and services, at a level of service beyond the scope of the emergency medical technician (EMT) or paramedic. SCT is necessary when a client’s condition requires ongoing care that must be furnished by one or more health-professionals in an appropriate specialty area, for example, emergency or critical-care nursing, emergency medicine, respiratory care, cardiovascular care, or a paramedic with additional training.

#### 2.2.5.4 Transports for Pregnancies

Transporting a pregnant woman may be covered as an emergency transfer if the client’s condition is documented as an emergency situation at the time of transfer.

Claims documenting an emergency home delivery or delivery en route are considered emergency transfers. Premature labor and early onset of delivery (less than 37 weeks gestation) may also be considered an emergency. Active labor without more documentation of an emergency situation is not payable as an emergency transport.
The first day of the client’s last menstrual period (LMP) or the estimated date of delivery (EDD) must be included in Block 14 of the CMS-1500 paper claim form and on the documentation.

If the pregnant client is transported in an ambulance for a nonemergency situation, all criteria for nonemergency prior authorization must be met.

2.2.5.5 Transports to or from State Institutions

Ambulance transports to or from a state-funded hospital for admission or following discharge are covered when nonemergency transfer criteria are met. Ambulance transfers of clients while they are inpatients of the institution are not covered. The institution is responsible for routine nonemergency transportation.

2.2.5.6 Not Medically Necessary Transports

Providers must use the GY modifier to submit claims for instances when the provider is aware no medical necessity existed. When billing for this type of transportation, ambulance providers must maintain a signed Client Acknowledgment Statement indicating that the client was aware, prior to service rendered, that the transport was not medically necessary. The Client Acknowledgment Statement is subject to retrospective review.

Refer to: Subsection 1.6.9.1, “Client Acknowledgment Statement” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).

2.2.5.7 Transports for Nursing Facility Residents

Nursing facilities are responsible for providing or arranging transportation for their residents. Arranging transportation for Medicaid clients includes obtaining prior authorizations for nonemergency ambulance transports. Ambulance providers may assist nursing facilities in obtaining prior authorizations (e.g., faxing the required documentation to TMHP). Ambulance providers, however, may not call TMHP’s Ambulance Prior Authorization Unit to request prior authorization.

Transports from a nursing facility to a hospital are covered if the client’s condition meets emergency criteria.

A return trip to a nursing facility following an emergency transport is not considered routine; therefore, transport back to the facility must be requested by the discharging hospital. Nonemergency transport for the purpose of required diagnostic or treatment procedures that are not available in the nursing facility (such as dialysis treatments at a freestanding facility) are also allowable only for clients whose medical condition is such that the use of an ambulance is the only appropriate means of transport (e.g., alternate means of transport are medically contraindicated).

The cost of routine nonemergency transportation is included in the nursing facility vendor rate. This nonemergency transport requires the nursing facility to request and obtain a PAN from the TMHP Ambulance Unit before contacting the ambulance company for the transport.

Transports of nursing facility residents for rehabilitative treatment (e.g., physical therapy) to outpatient departments or physicians’ offices for recertification examinations for nursing facility care are not reimbursable ambulance services.

Claims for services to nursing facility residents must indicate the medical diagnosis or problem requiring treatment, the medical necessity for use of an ambulance for the transport, and the type of treatment rendered at the destination (e.g., admission or X-ray).

If a client is returned by ambulance to a nursing facility following inpatient hospitalization, the acute condition requiring hospitalization must be noted on the ambulance claim form. This transport is considered for payment only if the client’s medical condition is appropriate for transport by ambulance. This nonemergency transport requires the nursing facility to request and obtain a PAN from the TMHP Ambulance Unit before contacting the ambulance company for the transport.
Ambulance providers may bill a nursing facility or client for a nonemergency ambulance transport only under the following circumstances:

- **Providers may bill the nursing facility** when the nursing facility requests the nonemergency ambulance transport without a PAN.
- **Providers may bill the client** only when the client requests transport that is not an emergency and the client does not have a medical condition such that the use of an ambulance is the only appropriate means of transport (i.e., alternate means of transport are medically contraindicated). The provider must advise the client of acceptance as a private pay patient at the time the service is provided, and the client is responsible for payment of all services. Providers are encouraged to have the client sign the **Private Pay Agreement**.

Providers may refer questions about a nursing facility’s responsibility for payment of a transport to the TMHP Contact Center at 1-800-925-9126 or TMHP provider relations representatives.

### 2.2.5.8 Emergency Transports Involving a Hospital

Hospital-to-hospital transports that meet the definition of an emergency transport do not require prior authorization.

Providers must use modifier ET and one of the facility-to-facility transfer modifiers (HH, HI, or IH) on each procedure code listed on the claim.

<table>
<thead>
<tr>
<th>Modifier</th>
<th>Transport Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>HH</td>
<td>From hospital to hospital</td>
</tr>
<tr>
<td>HI</td>
<td>From hospital to site of transfer</td>
</tr>
<tr>
<td>IH</td>
<td>From site of transfer to hospital</td>
</tr>
</tbody>
</table>

### 2.2.5.9 No Transport

Texas Medicaid does not reimburse ambulance providers for services that do not result in a transport to a facility, regardless of whether any medical care was rendered. If a client contacts an ambulance provider, but the call does not result in a transport, the provider should have the client sign an acknowledgement statement and may bill the client for services rendered.

### 2.3 Documentation Requirements

The requesting provider, which may include a physician, nursing facility, health-care provider, or other responsible party, is required to maintain the supporting documentation, physician’s orders, the Nonemergency Ambulance Prior Authorization Request form and if applicable, the Nonemergency Ambulance Exception form.

An ambulance provider is required to maintain documentation that represents the client’s medical condition and other clinical information to substantiate medical necessity, the level of service, and the mode of transportation requested. This supporting documentation is limited to documents developed or maintained by the ambulance provider.

Physicians, nursing facilities, health-care providers, or other responsible parties are required to maintain physician orders related to requests for prior authorization of nonemergency and out-of-state ambulance services. These providers must also maintain documentation of medical necessity for the ambulance transport.

In hospital-to-hospital transports or hospital-to-outpatient medical facility transports, the TMHP Ambulance Unit considers information by telephone from the hospital. Providers are not required to fax medical documentation to TMHP; however, in certain circumstances, TMHP may request that the
hospital fax the supporting documentation. Hospitals are allowed to release a client’s protected health information (PHI) to a transporting emergency medical services provider for treatment, payment, and health-care operations.

The hospital must maintain documentation of medical necessity, including a copy of the authorization from TMHP in the client’s medical record for any item or service that requires prior authorization. The services provided must be clearly documented in the medical record with all pertinent information regarding the client’s condition to substantiate the need and medical necessity for the services.

2.4 Claims Filing and Reimbursement

2.4.1 Claims Information

Emergency and nonemergency claims may be billed electronically. For electronic billers, the hospital’s provider identifier must be entered in the Facility ID field. Providers should consult their software vendor for the location of this field on the electronic claim form.

The Healthcare Common Procedure Coding System (HCPCS)/Current Procedural Terminology (CPT) codes included in policy are subject to National Correct Coding Initiative (NCCI) relationships. Exceptions to NCCI code relationships that may be noted in the Texas Medicaid medical policy are no longer valid.

Providers should refer to the CMS NCCI web page at www.medicaid.gov/Medicaid-CHIP-Program-Information/By-Topics/Data-and-Systems/National-Correct-Coding-Initiative.html for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid medical policy quantity limitations are more restrictive than NCCI Medically Unlikely Edits (MUE) guidance, medical policy prevails.

2.4.2 Reimbursement

Ground and air ambulance providers are reimbursed in accordance with 1 TAC §355.8600. Providers can refer to the Online Fee Lookup (OFL) or the applicable fee schedule on the TMHP website at www.tmhp.com.

Refer to: Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (Vol. 1, General Information) for more information about reimbursement methodologies.

Subsection 1.10, “Texas Medicaid Limitations and Exclusions” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for information on Medicaid exclusions.

2.4.2.1 Ambulance Disposable Supplies

Ambulance disposable supplies are included in the global fee for specialty care transport and must not be billed separately.

Reimbursement for BLS or ALS disposable supplies (procedure codes A0382 and A0398 respectively) is separate from the established fee for ALS and BLS ambulance transports and is limited to one billable procedure code per transport.

2.4.2.2 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission

The three-day and one-day payment window reimbursement guidelines do not apply for ambulance services.
Refer to: Subsection 3.6.3.8, “Payment Window Reimbursement Guidelines” of the Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks) for additional information about the payment window reimbursement guidelines.

2.4.3 Medicare and Medicaid Coverage
Medicaid is the secondary payor to other health insurance sources, including Medicare. Ambulance claims for Medicaid and Medicare Part B claims must be filed with Medicare first.

Medicaid prior authorization is not required for ambulance services for Qualified Medicare Beneficiary (QMB) clients because QMB clients are not eligible for Medicaid benefits. Providers can contact Medicare for the Medicare prior authorization guidelines.

Medicaid Qualified Medicare Beneficiary (MQMB) clients are eligible for all Medicaid benefits; therefore, the provider should simultaneously request prior authorization for the nonemergency transport from TMHP for the MQMB client in the event the service requested is denied by Medicare as a non-covered service.

Refer to: Subsection 4.13, “Medicare and Medicaid Dual Eligibility” in Section 4, “Client Eligibility” (Vol. 1, General Information).

Subsection 2.7, “Medicare Crossover Claim Reimbursement” (Vol. 1, General Information), for additional information about Medicare coinsurance and deductible payments and exceptions.

2.4.3.1 Medicare Services Paid
Assigned claims filed with and paid by Medicare should automatically transfer to TMHP for payment of the deductible and coinsurance liability. According to current guidelines, providers must submit Medicare-paid claims that do not cross over to TMHP for the coinsurance and deductible. Providers must send the Medicare Remittance Advice Notice (MRAN) with the client information circled in black ink.

2.4.3.2 Medicare Services Denied
A Medicare ambulance claim that has been denied must go through the appropriate Medicare claim appeals process with a decision by the administrative law judge before TMHP will process the ambulance claim. An assigned claim that was denied by Medicare because the client has no Part B benefits or because the transport destination is not allowed can be submitted to TMHP for consideration. Providers must send claims to TMHP on a CMS-1500 paper claim form with the ambulance provider identifier, unless they are a hospital-based provider. Hospital-based ambulance providers must send Medicare denied claims to TMHP on a CMS-1500 paper claim form with the ambulance provider identifier and a copy of the MRAN.

Note: All claims for STAR+PLUS clients with Medicare and Medicaid must follow the same requirements used for obtaining prior authorization for Medicaid-only services from TMHP. The STAR+PLUS HMO is not responsible for reimbursement of these services.

2.4.4 Ambulance Claims Coding
Providers must submit claims for emergency transport with the ET modifier on each procedure code submitted. Any procedure code submitted on the claim for emergency transport without the ET modifier will be subject to prior authorization requirements.

2.4.4.1 Place of Service Codes
The place of service (POS) for all ambulance transports is the destination. POS codes 41 and 42 (other) are national POS codes that are accepted by Texas Medicaid only for electronic claims. Paper claims must be submitted using POS 9.
2.4.4.2 Origin and Destination Codes

All claims submitted on paper or electronically must include the two-character origin and destination codes for every claim line. The origin is the first character, and the destination is the second character.

The following are the origin and destination codes accepted by Texas Medicaid:

<table>
<thead>
<tr>
<th>Origin and Destination Code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>D</td>
<td>Diagnostic or therapeutic site/freestanding facility (e.g., radiation therapy center) other than P or H</td>
</tr>
<tr>
<td>E</td>
<td>Residential/domiciliary/custodial facility (e.g., nonskilled facility)</td>
</tr>
<tr>
<td>G</td>
<td>Hospital-based dialysis facility (hospital or hospital-related)</td>
</tr>
<tr>
<td>H</td>
<td>Hospital (e.g., inpatient or outpatient)</td>
</tr>
<tr>
<td>I</td>
<td>Site of transfer (e.g., airport or helicopter pad) between modes of ambulance transport</td>
</tr>
<tr>
<td>J</td>
<td>Non-hospital-based dialysis facility</td>
</tr>
<tr>
<td>N</td>
<td>Skilled Nursing Facility (SNF) (swingbed is considered an SNF)</td>
</tr>
<tr>
<td>P</td>
<td>Physician’s office (includes HMO and nonhospital facility)</td>
</tr>
<tr>
<td>R</td>
<td>Residence (client’s home or any residence)</td>
</tr>
<tr>
<td>S</td>
<td>Scene of accident or acute event</td>
</tr>
<tr>
<td>X</td>
<td>Intermediate stop at physician’s office en route to the hospital (destination code only)</td>
</tr>
</tbody>
</table>

Nonemergency claims filed electronically must include the PAN in the appropriate field. For nonemergency hospital-to-hospital transfers, indicate the services required from the second facility and unavailable at the first facility in Block 19 of the CMS-1500 paper claim form. If the destination is a hospital, enter the name and address and the provider identifier of the facility in Block 32.

For nonemergency transports, ambulance providers must enter the ICD-9-CM diagnosis code to the highest level of specificity available for each diagnosis observed in Block 21 of the claim form.

**Reminder:** Providers must submit multiple transports for the same client on the same date of service through one claim submission. Additional claims information can be found within individual topics in this section.

Providers should consult their software vendor for the location of the field on the electronic claim form. Providers must submit ambulance services to TMHP on a CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from a vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as TMHP does not key information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

**Refer to:** Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (Vol. 1, General Information). Blocks that are not referenced are not required for processing by TMHP and may be left blank.
2.4.4.3  Transports Billed Without Mileage

Ambulance transport claims with a billed mileage amount of $0.00 will be reimbursed. To qualify for reimbursement, the transport claim must include a mileage quantity that is greater than zero.

Providers may not include a mileage charge as part of the transport charge or as part of any other charges on the claim.

Payments for ambulance transports are only made if the client is actually transported and the mileage quantity billed is greater than zero. Mileage charges greater than zero will be considered for reimbursement when a transport procedure code is included on the claim.

2.4.5  Air or Specialized Vehicle Transports

Procedure codes A0430 and A0435 or A0431 and A0436 are used to bill air transport. Procedure code A0999 is used to bill for specialized vehicle transports. Transport claims may be submitted electronically with a short description of the client’s physical condition in the comment field. If the client’s condition cannot be documented, providers must file a paper claim with supporting documentation.

Refer to: Subsection 2.2.5.2, “Air or Specialized Vehicle Transports” in this handbook for more information about how to meet the specific criteria for reimbursement consideration for air or specialized transport claims.

2.4.6  Emergency Transport Billing

Emergency transport is a benefit when billed with the ET modifier and the most appropriate emergency medical condition codes. The ET modifier must be included on every claim line in the first position.

The following procedure codes are for emergency transport:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>A0382 A0398 A0422 A0424 A0425* A0427 A0429 A0430 A0431 A0433</td>
</tr>
<tr>
<td>A0434 A0435 A0436 A0999</td>
</tr>
</tbody>
</table>

*A0425 is denied if it is billed without procedure code A0427, A0429, A0433, or A0434.

An emergency medical condition code is required on all ambulance claims and must be listed in Box 21 of the CMS-1500 claim form.

While ICD-9-CM codes are not precluded from use on ambulance claims, they are currently not required (per the Health Insurance Portability and Accountability Act [HIPAA] of 1996) on most ambulance claims and the use of these codes generally does not trigger a payment or a denial of a claim.

</table>
Claims for emergency transports that are denied for not meeting the emergency criteria will be considered on appeal with additional documentation to support the emergency nature of the transport. Claims that have denied for not meeting emergency transport criteria cannot be appealed for reimbursement as a nonemergency claim.

Refer to: + in this handbook.

2.4.7 Nonemergency Transport Billing

The following procedure codes are used when billing for nonemergency ambulance services:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>A0382</th>
<th>A0398</th>
<th>A0420</th>
<th>A0422</th>
<th>A0424</th>
<th>A0425*</th>
<th>A0426</th>
<th>A0428</th>
<th>A0430</th>
<th>A0431</th>
</tr>
</thead>
<tbody>
<tr>
<td>A0433</td>
<td>A0434</td>
<td>A0435</td>
<td>A0436</td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

*A0425 is denied if it is billed without procedure code A0426, A0428, A0433, or A0434.

2.4.8 Extra Attendant

The use of additional attendants (procedure code A0424) must be related to extraordinary circumstances when the basic crew is unable to transport the client safely.

An extra attendant on a nonemergency transport must be prior authorized. On an emergency transport, the billing provider’s medical documentation must clearly indicate the services the attendant performs along with a rationale for the services to indicate medical necessity of the attendant.

The information supporting medical necessity must be kept in the billing provider’s medical record and is subject to retrospective review.

Situations when an extra attendant may be required beyond the basic crew include, but are not limited to:

- Necessity of additional special medical equipment or treatment en route to destination (describe what special treatment and equipment is required and why it requires an attendant).
- Client behavior that may be a danger to self or ambulance crew or that requires, or may require, restraints.
- Extreme obesity of client (provide weight and client’s functional limitations).
- The extra attendant must be certified by DSHS to provide emergency medical services.
- The use of an extra attendant for air transport is not a benefit of Texas Medicaid. Claims submitted with procedure code A0424 will be denied if billed with air transports (procedure code A0430 or A0431).

2.4.8.1 Emergency Transports

Emergency transports that use an extra attendant do not require prior authorization. Modifier ET must be billed with the extra attendant procedure code A0424.
The billing provider’s medical documentation must clearly indicate the services the attendant performed along with rationale for the services to indicate the medical necessity of having the attendant. The billing provider must keep the information that supports medical necessity in the client’s medical record, which will be subject to retrospective review.

When more than one client is transported at the same time in the same vehicle, the use of an extra attendant may be required when each client who is being transported requires medical attention or close monitoring.

### 2.4.8.2 Nonemergency Transports

Prior authorization is required when an extra attendant is needed for any nonemergency transport. When a client’s condition changes, such as a need for oxygen or an extra attendant for transport, the prior authorization request must be updated.

To receive prior authorization, the requesting provider must prove medical necessity and identify attendant services that could not be provided by the basic crew. The information supporting medical necessity must be kept in the requesting provider’s medical record and is subject to retrospective review.

Texas Medicaid does not reimburse for an extra attendant based only on an ambulance provider’s internal policy.

### 2.4.9 Night Call

Texas Medicaid does not reimburse an extra charge for a night call.

### 2.4.10 Waiting Time

Procedure code A0420 may be billed when it is the general billing practice of local ambulance companies to charge for unusual waiting time (longer than 30 minutes). Providers must use the following procedures:

- Separate charges must be billed for all clients, Medicaid and non-Medicaid, for unusual waiting time.
- The circumstances requiring waiting time and the exact time involved must be documented in Block 24 of the CMS-1500 paper claim form.
- The amount charged for waiting time must not exceed the charge for a one-way transfer.

**Important:** Waiting time is reimbursed up to one hour.

### 2.4.11 Appeals

Only a denial of prior authorization may be appealed. Clients may appeal prior authorization request denials by contacting TMHP Client Notification at 1-800-414-3406. The Nonemergency Ambulance Prior Authorization Request form is not considered to be documentation after the service has been rendered.

Claims denied due to an inappropriate emergency medical condition code may be resubmitted with the appropriate emergency medical condition code.

On appeal, supporting documentation is critical for determining the client’s condition at the time of transport. Ambulance providers who file paper claims must include all information that supports the reason for the transport and attach a copy of the run sheet to the claim. The EMT who transported the client must sign the documentation.

**Refer to:** Subsection 2.3, “* Documentation Requirements” in this handbook.
2.4.12 Relation of Service to Time of Death
Medicaid benefits cease at the time of the client’s death. However, if the client dies in the ambulance while en route to the destination, Texas Medicaid covers the transport. If a physician pronounces the client dead after the ambulance is called, Texas Medicaid covers the ambulance service (base rate plus mileage) to the point of pick up. Providers must indicate the date and time the client died in Block 9 of the CMS-1500 paper claim form. If a physician or coroner pronounces the client dead before the ambulance is called, the service is not covered.

Equipment and nondisposable supplies are included in the base rate. These items are not separately reimbursable and are considered part of another procedure. Therefore, equipment and supplies cannot be billed to the client.

2.5 Claims Resources
Providers may refer to the following sections or forms when filing claims:

<table>

The TMHP Contact Center at 1-800-925-9126 is available Monday through Friday from 7 a.m. to 7 p.m., Central Time.

3. FORMS
AM. 1 Nonemergency Ambulance Prior Authorization Request (2 Pages)
Non-emergency Ambulance Prior Authorization Request
Texas Medicaid and CSHCN Services Program

1.) Is an ambulance the only appropriate means of transport? □ Yes □ No
2.) If no, this client does not qualify for non-emergency ambulance transport.  
3.) If yes, please complete the remainder of the form.  

In order for this service to be covered, the service must be medically necessary and reasonable. Medical necessity is established when the client's medical condition is such that the use of an ambulance is the only appropriate means of transport, and other alternate means of transport are medically contraindicated. Alternate means of transport include services provided through Medicaid's Medical Transportation Program or services included in the rate for Long Term Care - Nursing Facilities, if applicable.

This form is to be completed by the provider requesting non-emergency ambulance transportation. [Medicaid Reference: Chapter 32.024(t) Texas Human Resources Code]

Certification:  I certify that the information supplied in this document constitutes true, accurate, and complete information and is supported in the medical record of the patient. I understand that the information I am supplying will be utilized to determine approval of services resulting in payment of state and federal funds. I understand that falsifying entries, concealment of a material fact, or pertinent omissions may constitute fraud and may be prosecuted under applicable federal and / or state law which can result in fines or imprisonment, in addition to recoupment of funds paid and administrative sanctions authorized by law.

Name: ______________________________ Title: ______________________________ Provider Identifier: ______________________________

Signature: ___________________________________________ Date Signed: __ __/ __ __/ __ __ __ __
All non-emergency ambulance transportation must be medically necessary. Texas Medicaid, CSHCN Services Program, and Medicare have similar requirements for this service to qualify for reimbursement. This form is intended to accommodate all of the programs’ requirements. The criteria for determining medical necessity include: the client is bed-confined and other methods of transportation are contraindicated, or the client’s condition is such that transportation by ambulance is medically required. For additional information and changes to this policy and process refer to the respective program information: Texas Medicaid’s Provider Procedures Manual, CSHCN Services Program Provider Manual, bulletins and Banner Messages; and to Medicare’s manuals, newsletters and other publications.

1. Request Date—Enter the date the form is submitted.

2. Requesting Provider Information—Enter the name of the entity requesting authorization. (i.e., hospital, nursing facility, dialysis facility, physician).

3. Requesting Provider Identifiers—Enter the following information for the requesting provider (facility or physician):
   - Enter the Texas Provider Identifier (TPI) number.
   - Enter the National Provider Identifier (NPI) number. An NPI is a ten-digit number issued by the National Plan and Provider Enumeration System (NPPES).
   - Enter the primary national taxonomy code. This is a ten-digit code associated with your provider type and specialty. Taxonomy codes can be obtained from the Washington Publishing Company website at www.wpc-edi.com.

4. Ambulance Provider Identifier—Enter the TPI or NPI number of the requested ambulance provider. If the ambulance provider changes from the provider you originally requested, notify TMHP of the new provider by phone (1-800-540-0694, Option 3) or fax (1-512-514-4205).

5. Client’s Current Condition—This section must be filled out to indicate the client’s current condition and not to list all historical diagnoses. Do not submit a list of the client’s diagnoses unless the diagnoses are relevant to transport (i.e., if client has a diagnosis of hip fracture, the date the fracture was sustained must be included in documentation). It must be clear to TMHP when reviewing the request form, exactly why the client requires transport by ambulance and cannot be safely transported by any other means.

6. Isolation Precautions—Vancomycin-Resistant Enterococci (VRE) and Methicillin-Resistant Staphylococcus Aureus (MRSA) are just two examples of isolation precautions. Please indicate in the notes exactly what type of precaution is indicated.

7. Details for Checked Boxes—For each checked answer, a detailed explanation is required (i.e., if contractures is checked, please give the location and degree of contracture[s]). If a client has a decreased tolerance for sitting time, please indicate why the client has a decreased tolerance as well as the maximum length of time the client is able to sit upright. Additional documentation can be submitted with this request form if needed.

8. Request Type—Check the box for the request type. A One Time, non-repeating request is for a one day period. A Short Term request is for a period of 2-60 days when repeated transports are expected to occur; Medicaid, CSHCN Services Program, and Medicare permit short term requests. A Long Term request is for a period of 61-180 days when repeated transports are expected to occur; Medicare does not permit a Long Term request. Medicaid and CSHCN Services Program require a physician signature for Short Term and Long Term requests. Enter the begin and end dates of the authorization period for short and long term requests.

9. Transport Time—This field must be filled out for all hospital discharge requests. The anticipated time of transport must be entered in order to ensure the request was initiated prior to the actual time of transport.

10. Name of Person Signing the Request—All request forms require a signature, date, and title of the person signing the form. A One Time request must be signed and dated by a physician, physician assistant (PA), nurse practitioner (NP), clinical nurse specialist (CNS), registered nurse (RN), or discharge planner with knowledge of the client’s condition. A request of a Short Term or Long Term authorization period must be signed and dated by the physician. The signature must be dated not earlier than the 60th day before the date on which the request for authorization is made.

11. Signing Provider Identifier—This field is for the TPI or NPI number of the requesting facility or provider signing the form. The signature must be dated no earlier than 60 days prior to the transport.

BEHAVIORAL HEALTH, REHABILITATION, AND CASE MANAGEMENT SERVICES HANDBOOK

1. GENERAL INFORMATION

The information in this handbook is intended for the Case Management for the Blind Children’s Vocational Discovery and Development Program (BCVDDP), Case Management for Children and Pregnant Women, and services provided by a licensed clinical social worker (LCSW), licensed marriage and family therapist (LMFT), licensed professional counselor (LPC), Mental Health and Mental Retardation Center (MHMR), or psychologist.

All providers are required to report suspected child abuse or neglect as outlined in subsection 1.6.1.2, “Reporting Child Abuse or Neglect” and subsection 1.6.1.5, “Training” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).

Important: All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1617(a)(6)(A). Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure to deliver, at all times, health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.

Refer to: Section 1: Provider Enrollment and Responsibilities (Vol. 1, General Information).

Appendix B: Vendor Drug Program (Vol. 1, General Information) for information about outpatient prescription drugs and the Medicaid Vendor Drug Program.

1.1 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission

According to the three-day and one-day payment window reimbursement guidelines, most professional and outpatient diagnostic and nondiagnostic services that are rendered within the designated timeframe of an inpatient hospital stay and are related to the inpatient hospital admission will not be reimbursed separately from the inpatient hospital stay if the services are rendered by the hospital or an entity that is wholly owned or operated by the hospital.

These reimbursement guidelines do not apply for professional services that are rendered in the inpatient hospital setting.

Refer to: Subsection 3.6.3.8, “Payment Window Reimbursement Guidelines” in the Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks) for additional information about the payment window reimbursement guidelines.
2. BLIND CHILDREN’S VOCATIONAL DISCOVERY AND DEVELOPMENT PROGRAM (BCVDDP)

2.1 Overview

BCVDDP services are provided to help children who are blind and visually impaired to develop their individual potential. This program offers a wide range of services that are tailored to each child and their family’s needs and circumstances. By working directly with the entire family, this program can help children develop the concepts and skills needed to realize their full potential.

BCVDDP services include the following:

- Assisting the client in developing the confidence and competence needed to be an active part of their community
- Providing support and training to children in understanding their rights and responsibilities throughout the educational process
- Assisting family and children in the vocational discovery and development process
- Providing training in areas like food preparation, money management, recreational activities, and grooming
- Supplying information to families about additional resources

2.2 Enrollment

The Department of Assistive and Rehabilitative Services (DARS) Division for Blind Services (DBS) is the Medicaid provider of case management for clients who are 21 years of age and younger and blind or visually impaired. Providers must meet educational and work experience requirements that are commensurate with their job responsibilities and must be trained in DBS case management activities.

Refer to: Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for more information about procedures for enrolling as a Medicaid provider.

2.3 Services, Benefits, Limitations, and Prior Authorization

Services eligible for reimbursement are limited to one contact per month, per client, regardless of the number of contacts that are made during the month. DARS DBS providers should bill procedure code G9012.

A contact is defined as “an activity performed by a case manager with the client or with another person or organization on behalf of the client to locate, coordinate, and monitor necessary services.”

2.3.1 Prior Authorization

Prior authorization is not required for BCVDDP case management services.

2.4 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including BCVDDP services.

BCVDDP services are subject to retrospective review and recoupment if documentation does not support the service billed.
2.5 Claims Filing and Reimbursement

BCVDDP case management services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills or itemized statements are not accepted as claim supplements. Providers must not submit a claim when or after the client turns 16 years of age.

Any child who has a suspected or diagnosed visual impairment may be referred to BCVDDP. DARS DBS assesses the impact the visual impairment has on the child’s development and provides blindness-specific services to increase the child’s skill level in the areas of independent living, communication, mobility, social, recreational, and vocational discovery and development. For more information, visit the DARS website at www.dars.state.tx.us.

Case management services for BCVDDP are reimbursed at a fixed rate in accordance with 1 TAC §355.8381. Providers can refer to the Online Fee Lookup (OFL) or the applicable fee schedule on the TMHP website at www.tmhp.com.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied.

Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Subsection 2.8, “Federal Medical Assistance Percentage (FMAP)” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (Vol. 1, General Information) for federal matching percentage.

3. CASE MANAGEMENT FOR CHILDREN AND PREGNANT WOMEN

3.1 Overview

Case management services are provided to help eligible clients get necessary medical, social, educational, and other services; encourage cost-effective health and health-related care; discourage overutilization or duplication of services; and make appropriate referrals to providers. Case managers assess a client’s need for medical, social, educational, and other services and then develop a service plan to address those needs.

3.1.1 Eligibility

To be eligible for services, a person must:

- Be eligible for Texas Medicaid.
- Be a pregnant woman who has a high-risk condition or a child (birth through 20 years of age) who has a health condition or health risk.
• Be in need of services to prevent illnesses or medical conditions, to maintain function, or to slow further deterioration.

• Want to receive case management services.

Pregnant women who have a high-risk condition are defined as women who are pregnant and have one or more high-risk medical or psychosocial conditions during pregnancy. Children with a health condition are defined as children who have a health condition or health risk or children who have or are at risk for a medical condition, illness, injury, or disability that results in the limitation of function, activities, or social roles in comparison with healthy same-age peers in the general areas of physical, cognitive, emotional, or social growth and development.

3.1.2 Referral Process

To refer a Medicaid client for Case Management for Children and Pregnant Women services, providers may do one of the following:

• Visit www.dshs.state.tx.us/caseman/default.shtm to obtain a Case Management for Children and Pregnant Women referral form and fax the completed form to the Texas Health Steps (THSteps) Special Services Unit at (512) 533-3867.

• Call THSteps toll free at 1-877-847-8377 from 8 a.m. to 8 p.m., Central Time, Monday through Friday.

• Contact a Case Management for Children and Pregnant Women provider directly at www.dshs.state.tx.us/caseman/providerRegion.shtm. A case management provider will contact the family to offer a choice of providers and obtain information necessary to request prior authorization for case management services.

A referral for Case Management for Children and Pregnant Women services can be received from any source.

3.2 Enrollment

Enrollment for Case Management for Children and Pregnant Women providers is a two-step process.

Step 1

Potential providers must submit a Department of State Health Services (DSHS) Case Management for Children and Pregnant Women provider application to the DSHS Health Screening and Case Management Unit.

Both registered nurses who have an associate’s, bachelor’s, or advanced degree and social workers who have a bachelor’s or advanced degree are eligible to become case managers if they are currently licensed by their respective Texas licensure boards and the license is not temporary in nature. To be eligible, case managers must also have at least two years of cumulative, paid, full-time work experience or two years of supervised full-time, educational, internship/practicum experience in the past ten years. The experience must be with pregnant women or with children who are 20 years of age and younger. The experience must include assessing psychosocial and health needs and making community referrals for these populations.
For more information about provider qualifications and enrollment, contact DSHS at (512) 458-7111, Ext. 2168, visit the case management website at www.dshs.state.tx.us/caseman/default.shtm, or write to the following address:

Department of State Health Services  
Case Management for Children and Pregnant Women  
PO Box 149347, MC 1938  
Austin, TX 78714-9347

Note: Before providing services, each case manager must attend DSHS case manager training. Training is conducted by DSHS regional staff.

Step 2
Upon approval by DSHS, potential providers must enroll as a Medicaid provider for Case Management for Children and Pregnant Women and submit a copy of their DSHS approval letter. Facility providers must enroll as a Case Management for Children and Pregnant Women group, and each eligible case manager must enroll as a performing provider for the group. Federally Qualified Health Center (FQHC) facilities that provide Case Management for Children and Pregnant Women services will use their FQHC number and should not apply for an additional provider number for Case Management for Children and Pregnant Women.

Refer to: Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for more information about the procedures for enrolling as a Medicaid provider.

3.3 Services, Benefits, Limitations, and Prior Authorization
Case Management for Children and Pregnant Women services are limited to one contact per day per client. Additional provider contacts on the same day are denied as part of another service rendered on the same day.

Procedure code G9012 is to be used for all Case Management for Children and Pregnant Women services. Modifiers are used to identify which service component is provided.

</tbody>
</table>

Providers must adhere to Case Management for Children and Pregnant Women program rules, policies, and procedures.

Note: Case Management for Children and Pregnant Women providers are not required to file claims with other health insurance before filing with Medicaid.

Reminder: Billable services are defined in program rule 25 TAC §27.5.

Case Management for Children and Pregnant Women services are not billable when a client is an inpatient at a hospital or other treatment facility.

Reimbursement will be denied for services rendered by providers who have not been approved by the DSHS Health Screening and Case Management Unit.
3.3.1 Prior Authorization
All services must be prior authorized. One comprehensive visit is approved for all eligible clients. Follow-up visits are authorized based on contributing factors. Additional visits can be requested and may be authorized based on a continuing need for services. A prior authorization number is required on all claims for Case Management for Children and Pregnant Women services.

Note: Prior authorization is a condition of reimbursement, not a guarantee of payment.
Approved case management providers may request prior authorization from DSHS by fax at (512) 458-7574 or on the website at www.dshs.state.tx.us/caseman/subpaweb.shtm.

3.4 Technical Assistance
Providers may contact DSHS program staff as needed for assistance with program concerns. Providers should contact TMHP provider relations staff as needed for assistance with claims problems or concerns.

3.4.1 Assistance with Program Concerns
Providers who have questions, concerns, or problems with program rule, policy, or procedure may contact DSHS program staff. Contact names and numbers can be obtained from the case management website at www.dshs.state.tx.us/caseman/default.shtm, or by calling (512) 458-7111, Ext. 2168.
Regional staff make routine contact with providers to ensure providers are delivering services as required.

3.5 Documentation Requirements
All services require documentation to support the medical necessity of the service rendered, including Case Management for Children and Pregnant Women services.

Case Management for Children and Pregnant Women services are subject to retrospective review and recoupment if documentation does not support the service billed.

3.6 Claims Filing and Reimbursement
3.6.1 Claims Information
Case Management for Children and Pregnant Women services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Case Management for Children and Pregnant Women providers are reimbursed in accordance with 1 TAC §355.8401. Providers can refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied.

Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.
3.6.2 Managed Care Clients

Case Management for Children and Pregnant Women services are carved out of Medicaid managed care and must be billed to TMHP for payment consideration. Carved-out services are those that are rendered to Medicaid managed care clients, but are administered by TMHP and not the client’s managed care organization (MCO).

4. LICENSED CLINICAL SOCIAL WORKER (LCSW), LICENSED MARRIAGE AND FAMILY THERAPIST (LMFT), AND LICENSED PROFESSIONAL COUNSELOR (LPC)

4.1 Enrollment

4.1.1 LCSW

To enroll in Texas Medicaid, whether as an individual or as part of a group, an LCSW must be licensed by the Texas State Board of Social Worker Examiners. LCSWs must also be enrolled in Medicare or obtain a pediatric practice exemption from TMHP Provider Enrollment. If a pediatric-based LCSW is enrolling as part of a Medicare-enrolled group, then the LCSW must also be enrolled in Medicare. Providers that hold a temporary license are not eligible to enroll in Medicaid. LCSWs cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

4.1.2 LMFT

To enroll in Texas Medicaid, whether as an individual or as part of a group, an LMFT must be licensed by the Texas State Board of Examiners of Licensed Marriage and Family Therapists. LMFTs are covered as Medicaid-only providers; therefore, enrollment in Medicare is not a requirement. LMFTs can enroll as part of a multi-specialty group whether or not they are enrolled in Medicare. Providers that hold a temporary license are not eligible to enroll in Medicaid. LMFTs cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

4.1.3 LPC

To enroll in Texas Medicaid, whether as an individual or as part of a group, an LPC must be licensed by the Texas Board of Examiners of Professional Counselors. LPCs are covered as Medicaid-only providers; therefore, enrollment in Medicare is not a requirement. LPCs can enroll as part of a multi-specialty group whether or not they are enrolled in Medicare. Providers that hold a temporary license are not eligible to enroll in Medicaid. LPCs cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

Refer to: Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for more information about procedures for enrolling as a Medicaid provider.
4.2 Services, Benefits, Limitations, and Prior Authorization

Psychotherapy and counseling services that are provided by LCSWs, LMFTs, and LPCs are benefits of Texas Medicaid for clients of any age who are experiencing a significant behavioral health issue that is causing distress, dysfunction, or maladaptive functioning as a result of a confirmed or suspected psychiatric condition as defined in the American Psychiatric Association Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition, Text Revision (DSM-IV-TR).

LCSWs, LMFTs, and LPCs must bill therapy or counseling services with procedure code 90832, 90834, 90837, 90847, or 90853.

**Note:** LMFTs must use modifier U8 when billing these procedure codes.

Psychotherapy and counseling services can be provided in the office, home, skilled nursing or intermediate care facility (SNF/ICF), outpatient hospital, extended care facility (ECF), or in other locations.

LCSWs, LMFTs, and LPCs must not bill for services that were provided by people under their supervision, including services provided by students, interns, and licensed professionals. Services may only be billed to Texas Medicaid if they were provided by a licensed LCSW, LMFT, or LPC who is a Medicaid-enrolled practitioner. LCSWs, LMFTs, and LPCs who are employed by or remunerated by another provider may not bill Texas Medicaid directly for counseling services if that billing would result in a duplicate payment for the same services.

If more than one type of session is provided on the same date of service (outpatient individual, group, or family psychotherapy or counseling), each session type will be reimbursed individually. The only services that can be reimbursed are those provided to the Medicaid-eligible client per session.

Services that are provided by a psychiatric nurse, mental health worker, psychiatric assistant, or psychological assistant (excluding a Masters-level licensed psychological associate [LPA]) are not covered by Texas Medicaid and cannot be billed under the provider identifier of any other outpatient behavioral health provider.

Documentation of the face-to-face time with the client must be maintained in the client’s medical record to support the procedure code billed. All entries must be documented clearly, be legible to individuals other than the author, and be dated (month/date/year) and signed by the performing provider.

Documentation must include the following:

- The times at which the session began and ended
- All of the pertinent information about the client’s condition that is necessary to substantiate the need for services, including, but not limited to, the following:
  - A complete diagnosis, as listed in the current edition of the DSM
  - Background, symptoms, impression
  - Narrative description of the assessment
  - Behavioral observations made during the session
  - Narrative description of the counseling session
  - Treatment plan and recommendations

All payments are subject to recoupment if the required documentation is not maintained in the client’s medical record.

Family psychotherapy and counseling is reimbursed for only one Medicaid-eligible client per session, regardless of the number of family members present during that session. When providing family counseling services, the Texas Medicaid client and a family member must be present during the face-to-
face encounter or visit. Regardless of the number of family members present per outpatient session, family counseling and psychotherapy (procedure code 90847) is reimbursed for only one Medicaid-eligible client per session. Procedure code 90847 is limited to one service per family per day.

According to the definition of “family” provided by HHSC Household Determination Guidelines, only specific relatives are allowed to participate in family counseling services. These guidelines also address the roles of relatives in the supervision and care of children with Temporary Assistance for Needy Families (TANF). The following specific relatives are included in family counseling services:

- Father
- Mother
- Grandfather
- Grandmother
- Brother
- Sister
- Uncle
- Aunt
- Nephew
- Niece
- First cousin
- First cousin once removed
- Stepfather
- Stepmother
- Stepbrother
- Stepsister
- Foster parent
- Legal guardian

Behavioral health services are limited to a total of four hours per client, per day, regardless of the provider.

Outpatient behavioral health services are limited to 30 encounters or visits per client, per calendar year (January 1 through December 31) regardless of provider, unless prior authorized. This limitation includes encounters or visits by all practitioners. School Health and Related Services (SHARS) behavioral rehabilitation services, MHMR services, laboratory, radiology, and medication monitoring services are not counted toward the 30-encounter or visit limitation. An encounter or visit is defined as any and all behavioral health services (such as examinations, therapy, psychological or neuropsychological testing) by any provider, in the office, outpatient hospital, nursing home, or home settings. This limitation includes encounters or visits by all behavioral health practitioners.

Each individual practitioner is limited to performing a combined total of 12 hours of behavioral health services per day. Claims submitted with a prior authorization number are not exempt from the 12-hour limitation.

HHSC and TMHP routinely perform retrospective review of all providers’ billing practices. Retrospective review may include all behavioral health procedure codes included in the 12-hour system limitation.
Behavioral health services subject to the 12-hour system limitation and retrospective review will be based on the provider’s Texas Provider Identifier (TPI) base (the first 7 digits of the TPI). The location where the services occurred will not be a basis for exclusion of hours. If a provider practices at multiple locations and has a different suffix for the various locations, but has the same TPI base, all services identified for restriction to the provider 12-hour limit will be counted regardless of whether they were performed at different locations.

Refer to: Subsection 6.3, “The 12-Hour System Limitation” in this handbook for details about the 12-hours-per-day behavioral health services limitation.

Psychotherapy or counseling services (procedure codes 90832, 90834, 90837, 90847, and 90853) must be submitted with one of the following diagnosis codes:

<table>

### 4.2.1 Prior Authorization

#### 4.2.1.1 Initial Prior Authorization Request for Encounters or Visits Beyond the 30 Encounter or Visit Limit

Each Medicaid client is limited to 30 encounters or visits per calendar year. It is anticipated that this limitation, which allows for 6 months of weekly therapy or 12 months of biweekly therapy, is adequate for 75 to 80 percent of clients. Clinicians should plan therapy with this limit in mind, and the documentation must support the medical necessity of the behavioral therapy for the duration of the therapy from beginning to end. However, it may be medically necessary for some clients to receive extended encounters or visits. In these situations, prior authorization is required.

Providers with established clients must request prior authorization when they determine the client is approaching 30 encounters or visits to all behavioral health providers for the calendar year and more visits are needed to accomplish goals of treatment. If the client changes providers during the year and the new provider is unable to obtain complete information on the client’s encounters or visits, providers are encouraged to obtain prior authorization before rendering services.

After the 30 encounter or visit annual limitation has been met, prior authorization will be considered in increments of up to 10 additional encounters or visits per request. All requests for prior authorization of extensions beyond the 30 initial encounter or visit annual limit must be submitted on a completed Outpatient Psychotherapy/Counseling Request Form, which must include the following:

- Client name and Medicaid number, date of birth, age, and sex
- Provider name and identifier
- A complete diagnosis as listed in the DSM-IV-TR
- History of substance abuse
- Current medications
- Current living condition
- Clinical update, including specific symptoms and response to past treatment, treatment plan (measurable short term goals for the extension, specific therapeutic interventions to be used in therapy, measurable expected outcomes of therapy, length of treatment anticipated, and planned frequency of encounters or visits)
- Number and type of services requested
- Dates for services requested (based on the frequency of encounters or visits for services that will be provided)
- Date on which the current treatment is to begin
- Indication of court-ordered or Department of Family and Protective Services (DFPS)-directed services, when appropriate

Refer to: Form BH. 3, “Outpatient Psychotherapy/Counseling Request Form” in this handbook.

Note: All areas of the request form must be completed with the required information as stated on the form. If additional room is needed for a particular section of the form, providers may state “see attached,” in that section and attach the additional pages to the form. The attachment must contain the specific information required in that section of the form.

A request for outpatient behavioral health services must be submitted no sooner than 30 days before the date of service being requested and no later than the date of service being requested so that the most current information is provided.
Prior authorization requests will be reviewed by a mental health professional. The number of encounters or visits authorized will be dependent upon the client’s symptoms and response to past treatment. If the client requires additional extensions, the provider must submit a new request for prior authorization at the end of each extension period. The additional requests must include new documentation concerning the client’s current condition.

4.2.1.1.1 Client Condition Requirements

The following documentation requirements indicating the client’s condition must be submitted when requesting prior authorization of initial outpatient services beyond the 30-encounter or visit annual limitation:

- A description of why treatment is being sought at the present time
- A mental status examination that verifies that a diagnosis is listed in the DSM-IV-TR
- A description of any existing psychosocial or environmental problems
- A description of the current level of social and occupational or educational functioning

4.2.1.1.2 Initial Assessment Requirements

There must be a pertinent history containing the following assessment requirements:

- A chronological psychiatric, medical or substance use disorder history with time frames of prior treatment and the outcomes of that treatment
- A social and family history
- An educational and occupational history

4.2.1.1.3 Active Treatment Plan Requirements

The treatment plan must contain the following:

- A description of the primary focus of the treatment
- Clearly defined discharge goals that indicate that treatment can be successfully accomplished
- The expected number of sessions it will take to reach the discharge goals, which must be based on the standards of practice for the client’s diagnosis
- Family therapy services are appropriately planned unless there are valid clinical contraindications

4.2.1.1.4 Discharge Plan Requirements

Discharge planning must reflect the following:

- A plan for concluding the client’s treatment based on an assessment of the client’s progress in meeting the discharge goals
- Identification of the client’s aftercare needs that includes a plan for transition

4.2.1.2 Subsequent Prior Authorization Request for Encounters or Visits after the Initial Prior Authorized Encounters

4.2.1.2.1 Client Condition Requirements

The following documentation requirements indicating the client’s condition must be submitted when requesting prior authorization for subsequent encounters or visits.

All of the requirements for the initial authorized treatment sessions must be met in addition to an assessment of the client’s response to treatment, which indicates one of the following:

- The client has not achieved the discharge goals necessary to conclude treatment, but the client’s progress indicates that treatment can be concluded within a short period of time.
• The client’s psychiatric condition has not responded to a trial of short-term outpatient therapy and there is potential for serious regression or admission to a more intensive setting without ongoing outpatient management (requiring several months or longer of outpatient therapy).

• The client’s condition is one that includes long-standing, pervasive symptoms or patterns of maladaptive behavior.

4.2.1.2.2 Active Treatment Plan Requirements

There must be an assessment that explains why the client was unable to achieve the expected treatment objectives that were previously set. The assessment must address the following:

• Factors that interfered or are interfering with the client’s ability to make progress as expected

• The continued appropriateness of the treatment goals

• The continued appropriateness of the type of therapy being utilized

• The need for obtaining consultation

• The current diagnosis and the need for revisions or additional assessments

• The ongoing treatment plan must reflect the initial treatment plan requirements, and the additional information must include:

  • Changes in primary treatment focus or discharge goals have been identified and are consistent with the client’s current condition

  • The expected progress toward the discharge goals is described within the extended time frame

  • Appropriate adjustments have been made in the medication regimen based on the client’s therapeutic response

  • No contraindications to the use of the prescribed medications are present

4.2.1.2.3 Discharge Plan Requirements

Discharge planning must reflect the following:

• A plan for concluding the client’s treatment based on an assessment of the client’s progress in meeting the discharge goals

• An identification of the client’s aftercare needs that includes a plan for transition

4.2.1.3 Prior Authorization for Court-Ordered and Department of Family and Protective Services (DFPS)-Directed Services

A request for prior authorization of court-ordered or DFPS-directed services must be submitted no later than seven calendar days after the date on which the services began.

Specific court-ordered outpatient behavioral health services for evaluations, psychological or neuropsychological testing, or treatment may be prior authorized as mandated by the court. Prior authorization requests must be accompanied by a copy of the court document signed by the judge. If the requested services differ from or go beyond the court order, the additional services will be reviewed for medical necessity.

Specific DFPS-directed services for outpatient behavioral health services may be prior authorized as directed. Prior authorization requests must be accompanied by a copy of the directive or summary signed by the DFPS employee. If the requested services differ from or go beyond the DFPS direction, the additional services will be reviewed for medical necessity.

Court-ordered or DFPS-directed services must be submitted with modifier H9.
Mail or fax prior authorization request to:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12357-B Riata Trace Parkway, Suite 100
Austin, TX 78727
Fax: (512) 514-4213

Providers can submit requests for extended outpatient psychotherapy or counseling through the TMHP website at www.tmhp.com.

Refer to: Subsection 5.5.1, “Prior Authorization Requests Through the TMHP Website” in Section 5, “Prior Authorization” (Vol. 1, General Information) for additional information, including mandatory documentation and retention requirements.

4.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including behavioral health services. The documentation must support the medical necessity of the behavioral therapy for the duration of the therapy from beginning to end.

Behavioral health services are subject to retrospective review and recoupment if documentation does not support the service billed.

4.4 Claims Filing and Reimbursement

Providers must bill Medicare before Medicaid when clients are eligible for services under both programs. Medicaid’s responsibility for the coinsurance or deductible is determined in accordance with Medicaid benefits and limitations. Providers must check the client’s Medicare card for Part B coverage before billing Medicaid. When Medicare is primary, it is inappropriate to bill Medicaid without first billing Medicare.

Note: Texas Medicaid may reimburse the full amount of the Medicare coinsurance and deductible for services rendered by licensed clinical social worker (LCSW) providers.

Refer to: Subsection 2.7.2, “Part B” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (Vol. 1, General Information).

Subsection 4.13.2, “Medicare Part B Crossovers” in Section 4, “Client Eligibility” (Vol. 1, General Information) for information about how coinsurance and deductibles may be reimbursed by Texas Medicaid.

LCSW, LMFT, and LPC services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a CMS-1500 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (Vol. 1, General Information). Blocks that are not referenced are not required for processing by TMHP and may be left blank.
According to 1 TAC §355.8091, the Texas Medicaid rate for LCSWs, LMFTs, and LPCs is 70 percent of the rate paid to a psychiatrist or psychologist for a similar service per 1 TAC §355.8085. Providers can refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com. Under 1 TAC §355.8261, an FQHC is reimbursed according to its specific prospective payment system (PPS) rate per visit for LCSW services.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied.

Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

**Note:** Texas Medicaid may reimburse the full amount of the Medicare coinsurance and deductible for services rendered by licensed clinical social worker (LCSW) providers.

**Refer to:** Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (Vol. 1, General Information) for more information about reimbursement.

Subsection 6.3, “The 12-Hour System Limitation” in this handbook for details about the 12-hours-per-day behavioral health services limitation.

### 5. MENTAL HEALTH REHABILITATION, MENTAL HEALTH CASE MANAGEMENT, AND INTELLECTUAL DISABILITY SERVICE COORDINATION

#### 5.1 Enrollment

To enroll in Texas Medicaid, mental health (MH) providers must contact DSHS at (512) 206-5810. Qualified MH providers are eligible to enroll for MH rehabilitative services with the approval of DSHS.

**5.1.1 Local Authority (LA) Providers**

An LA provider who is authorized by the Department of Aging and Disability Services (DADS) to provide coordination services, must be enrolled as a Long Term Care provider, and must submit claims through the Long Term Care system.

Local authorities are the only entities that provide targeted case management (service coordination) services to clients who have an intellectual disability.

**Refer to:** The TMHP website at www.tmhp.com for additional information about Long Term Care enrollment and billing requirements.

#### 5.2 Services, Benefits, Limitations, and Prior Authorization

**5.2.1 Service Coordination**

Texas Medicaid provides the following service coordination services:

- Service coordination for people who have an intellectual disability or a related condition (adult or child). Persons who have a related condition are eligible if they are being enrolled into the home and community based waiver (HCS); the Texas Home Living Waiver; or an intermediate care facility for persons who have an intellectual disability (ICF/MR) facility.
- Service coordination for persons who have an intellectual disability or a related condition who are enrolled in HCS or Texas Home Living waiver programs.

Service coordination funded by Medicaid as TCM is reimbursed by encounter.
There are two types of encounters:

- **Comprehensive encounter (Type A):** A face-to-face contact with an individual to provide service coordination. The comprehensive encounter is limited to one billable encounter per individual per calendar month. DADS will not authorize payment for a comprehensive encounter that exceeds the cap of one encounter per individual per calendar month.

- **Supportive encounter (Type B):** A face-to-face, telephone, or telemedicine contact with an individual or with a collateral on the individual’s behalf to provide service coordination.

An LA is allowed up to three Type B encounters per calendar month for each Type A encounter that has occurred within the calendar month.

The Type B encounters are not limited to three per individual. Rather, the allowed Type B encounters may be delivered to any individual who needs a Type B encounter. These Type B encounters are allowable as long as the individual who received the Type B encounter also received a Type A encounter that same month.

For example, Sam and Mary receive a Type A encounter in June. It is allowable for the LA to bill for one Type B encounter for Sam in June and five Type B encounters for Mary in June.

Payment for an individual’s Type B encounter is contingent on that individual having a Type A encounter within the same calendar month.

Within the calendar month, the Type A encounter does not have to occur on a date before any of the Type B encounters occur.

### 5.2.2 Case Management

Texas Medicaid provides the following case management services:

- **Case management for people who have serious emotional disturbance (child, 3 through 17 years of age), which includes routine and intensive case management services.**

- **Case management for people who have severe and persistent mental illness (adult, 18 years of age or older).**

Providers must use the following procedure code and applicable modifiers for MH targeted case management:

<table>
<thead>
<tr>
<th>Service</th>
<th>Procedure Code</th>
<th>Modifier</th>
<th>Limitations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Routine mental health targeted</td>
<td>T1017</td>
<td>TF and HZ</td>
<td>32 units (8 hours) per calendar day for clients who are 18 years of age and older</td>
</tr>
<tr>
<td>case management (adult)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Routine case management (child and</td>
<td>T1017</td>
<td>TF, HA,</td>
<td>32 units (8 hours) per calendar day for clients who are 17 years of age and younger</td>
</tr>
<tr>
<td>adolescent)</td>
<td></td>
<td>HZ</td>
<td></td>
</tr>
<tr>
<td>Intensive case management (child and</td>
<td>T1017</td>
<td>TG, HA,</td>
<td></td>
</tr>
<tr>
<td>adolescent)</td>
<td></td>
<td>HZ</td>
<td></td>
</tr>
</tbody>
</table>

An MH case management reimbursable contact is the provision of a case management activity by an authorized case manager during a face-to-face meeting with an individual who is authorized to receive that specific type of case management. A billable unit of case management is 15 continuous minutes of contact.
Service coordination and case management services are not reimbursable when they are provided to a client who is eligible for Medicaid and who receives services through the HCS waiver. These services are included in the waiver. Claims submitted to TMHP for people who receive services under the HCS waiver are identified quarterly by DADS and payments are recouped.

Texas Medicaid must not be billed for service coordination except for the purpose of discharge planning or waiver enrollments up to 180 days prior to the discharge for persons in ICF/ID facilities or state supported living centers, or case management services provided to people who are residents or inpatients of:

- Nursing facilities (residents who have not been identified through the Preadmission Screening and Resident Review [PASRR] process as needing specialized mental health services.).
- An ICF-ID.
- State-supported living centers.
- State MH facilities.
- Title XIX participating hospitals, including general medical hospitals.
- Private psychiatric hospitals.
- A Texas Medicaid-certified residence not already specified.

Texas Medicaid must not be billed for ID service coordination provided to people enrolled in Community Living Assistance and Support Services (CLASS), Community-Based Alternatives (CBA), Program of All-inclusive Care for the Elderly (PACE), Deaf-Blind Multiple Disabilities (DBMD) or Medically Dependent Children Program (MDCP).

- An institution for mental diseases, such as a hospital, nursing facility, or other institution of more than 16 beds that is primarily engaged in providing the diagnosis, treatment, or care of people who have mental diseases, including medical attention, nursing care, and related services.
- A jail or public institution.

**Note:** A contact by the service coordinator to assist in the discharge planning of some of the above may be reimbursed, if it is provided within 180 days before discharge. Service coordination services provided to people who are on predischarge furlough to the community from a nursing facility, intermediate care facility, or state-supported living centers may be reimbursed. Service coordination services provided to people who are on trial placement from a state MR facility to the community may be reimbursed if the person remains eligible for Texas Medicaid upon release from the facility and receives regular Texas Medicaid coverage.

Texas Medicaid must not be billed for MH case management services provided before the establishment of a diagnosis of mental illness and the authorization of services.

**Note:** For more information about billing for MH Case Management, providers should refer to 25 TAC, Part 1, Chapter 412, Subchapter I and the Mental Health Case Management Billing Guidelines available through the DSHS Mental Health and Substance Abuse Program Services Division.

### 5.2.3 MH Rehabilitative Services

The following rehabilitative services may be provided to individuals who satisfy the criteria of the MH priority population and who require rehabilitative services as determined by an assessment:

- Adult Day Program
- Medication Training and Support
- Crisis Intervention
- Skills Training and Development
- Psychosocial Rehabilitative Services

These services may be provided to a person who has a single severe mental disorder (excluding MR, pervasive developmental disorder, or substance abuse) or a combination of severe mental disorders as defined in the DSM-IV-TR.

The following modifiers must be billed with the most appropriate procedure code as indicated in the sections below:

<table>
<thead>
<tr>
<th>Modifier</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>ET</td>
<td>Emergency treatment</td>
</tr>
<tr>
<td>HA</td>
<td>Child/adolescent program</td>
</tr>
<tr>
<td>HQ</td>
<td>Group setting</td>
</tr>
<tr>
<td>HZ*</td>
<td>Funded by criminal justice agency</td>
</tr>
<tr>
<td>TD</td>
<td>RN</td>
</tr>
</tbody>
</table>

*Note: Modifier HZ must be used in addition to the modifiers indicated in the sections below if the service is funded by a criminal justice agency.

**Important:** If multiple modifiers are indicated for a specific service as shown below, all applicable modifiers must be included on the claim with the most appropriate procedure code.

### 5.2.3.1 Day Program

Procedure code G0177 may be reimbursed for up to 6 units (4.5 to 6 hours) per calendar day, in any combination, for clients who are 18 years of age and older.

<table>
<thead>
<tr>
<th>Service</th>

### 5.2.3.6 Rehabilitative Services Limitations

Texas Medicaid must not be billed for the following:

- Rehabilitative services provided:
  - Before the establishment of a diagnosis of mental illness and authorization of services.
  - Rehabilitative services provided to individuals who reside in an institution for mental diseases.
  - Rehabilitative services provided to general acute care hospital inpatients.
- Vocational services
- Educational services
- Nursing facility residents who have not been identified through the Preadmission Screening and Resident Review (PASRR) process as needing specialized mental health services.
- Services provided to individuals in jail or a public institution

With the exception of Crisis Intervention Services and Psychosocial Rehabilitation Services delivered in a crisis situation, no reimbursement is available for a combination of MH rehabilitative services delivered in excess of eight hours per individual, per day.

**Refer to:** 25 TAC, Part I, Chapter 419, Subchapter L and the Medicaid MH rehabilitative billing guidelines, which are available through the DSHS Mental Health and Substance Abuse Division, for more information.
5.2.3.7 Billing Units

All claims for reimbursement for rehabilitative services are based on the actual amount of time the eligible individual or primary caregiver or legal guardian of an eligible individual is engaged in face-to-face contact with a service provider. The billable units are individual, group (15 continuous minutes), and day programs (45 to 60 continuous minutes). No reimbursement is available for partial units of service.

5.2.4 Prior Authorization

Prior authorization is not required for intellectual disability services. The following Mental Health Rehabilitative Services require prior authorization:

- Mental Health Rehabilitative Services must be authorized in accordance with 25 TAC §419.456.
- Mental Health Targeted Case Management Services must be pre-authorized in accordance with 25 TAC §412.406

5.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including MH and MR services. MH and MR services are subject to retrospective review and recoupment if documentation does not support the service billed.

5.4 Claims Filing and Reimbursement

MR coordination services and MH case management and rehabilitative services must be submitted to TMHP in an approved electronic claims format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply them.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

MHMR are cost reimbursed in accordance with 1 TAC §§355.743, 355.746, and 355.781. Providers can refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com.

5.4.1 Managed Care Clients

Targeted case management services and MH rehabilitation services are carved out of Medicaid managed care for STAR and STAR+PLUS clients and must be billed to TMHP for payment consideration. Carved-out services are those that are rendered to Medicaid managed care clients, but are administered by TMHP and not the client’s MCO.

5.4.2 Reimbursement Reductions

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied.

Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.
Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (Vol. 1, General Information). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (Vol. 1, General Information) for more information about reimbursement and the federal matching percentage.

6. PHYSICIAN, PSYCHOLOGIST, AND LICENSED PSYCHOLOGICAL ASSOCIATE (LPA) PROVIDERS

6.1 Enrollment

6.1.1 Physicians

To enroll in Texas Medicaid to provide medical services, physicians (doctor of medicine [MD] or doctor of osteopathy [DO]) and doctors (doctor of dental medicine [DMD], doctor of dental surgery [DDS], doctor of optometry [OD], and doctor of podiatric medicine) must be authorized by the licensing authority of their profession to practice in the state where the services are performed at the time they are provided.

Providers cannot be enrolled in Texas Medicaid if their licenses are due to expire within 30 days. A current Texas license must be submitted.

Important: The Centers for Medicare & Medicaid Services (CMS) guidelines mandate that physicians who provide durable medical equipment (DME) products such as spacers or nebulizers are required to enroll as Texas Medicaid DME providers.

All physicians except gynecologists, pediatricians, pediatric subspecialists, pediatric psychiatrists, and providers performing only Texas Health Steps (THSteps) medical or dental checkups must be enrolled in Medicare before enrolling in Medicaid. TMHP may waive the Medicare enrollment prerequisite for pediatricians or physicians whose type of practice and service may never be billed to Medicare.

6.1.2 Psychologists

To enroll in Texas Medicaid, whether as an individual or as part of a group, a psychologist must be licensed by the Texas State Board of Examiners of Psychologists (TSBEP). Psychologists must also be enrolled in Medicare or obtain a pediatric practice exemption from TMHP Provider Enrollment. If a pediatric-based psychologist is enrolling as part of a Medicare-enrolled group, then the psychologist must also be enrolled in Medicare. Psychologists cannot be enrolled if they have a license that is due to expire within 30 days. A current license must be submitted. Texas Medicaid accepts temporary licenses for psychologists.

Refer to: Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for more information about procedures for enrolling as a Medicaid provider.

6.1.3 Licensed Psychological Associate (LPA)

LPAs must be licensed by TSBEP. LPAs are expected to abide by their scope and standards of practice.

Services performed by an LPA are a Medicaid-covered benefit when the following conditions are met:
• The services must be performed under the direct supervision of a licensed, Medicaid-enrolled psychologist.
• The supervising psychologist must be in the same office, building, or facility when the service is provided and must be immediately available to furnish assistance and direction.
• The LPA performing the behavioral health service must be an employee of either the licensed psychologist or the legal entity that employs the licensed psychologist.

The TSBEP requires an LPA to work under the direct supervision of a licensed psychologist and does not allow an LPA to engage in independent practice. Therefore, an LPA will not be independently enrolled in the Medicaid program and must provide services under the delegating psychologist’s provider identifier.

LPAs may perform the same outpatient behavioral health services as licensed psychologists when the licensed psychologist delegates the services and directly supervises the LPA. These services include psychiatric diagnostic evaluations, psychological and neuropsychological testing, and psychotherapy or counseling (including individual, group, or family counseling.) A modifier must be used to identify whether the psychologist or the LPA performed the service.

Psychological services provided by a psychologist or LPA must be billed with a modifier. Any claim submitted without a modifier will be denied. Psychological services provided by an LPA must be billed under the supervising psychologist’s Medicaid identifier or the Medicaid identifier of the legal entity employing the supervising psychologist.

The following modifiers are to be used with procedure codes for licensed psychologist services:

<table>
<thead>
<tr>
<th>Modifier</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>AH</td>
<td>Identifies services provided by a clinical psychologist</td>
</tr>
<tr>
<td>UC</td>
<td>Identifies services provided by an LPA</td>
</tr>
</tbody>
</table>

Services performed by an LPA and billed with modifier UC must include the LPA license number. Any claim submitted with modifier UC indicating services provided by an LPA and billed without a license number will be denied.

Retrospective review may be performed to validate that services performed on the same client are not billed for the same time and date of service, and that modifiers billed match the provider performing the services.

Services performed by the LPA will be reduced to 70 percent of the psychologist reimbursement fee schedule rate.

### 6.2 Services, Benefits, Limitations, and Prior Authorization

#### 6.2.1 Physicians

Behavioral health services, including diagnostic evaluations, psychotherapy or counseling (including individual, group, or family counseling), psychological and neuropsychological testing, pharmacological regimen oversight, and pharmacological management are benefits of Texas Medicaid when these services are provided to clients who are experiencing a significant behavioral health issue that is causing distress, dysfunction, or maladaptive functioning as a result of a confirmed or suspected psychiatric condition, as defined in the current edition of the DSM-IV-TR.

#### 6.2.2 Psychologists and LPAs

Psychologists who are licensed by the TSBEP and enrolled as Medicaid providers and LPAs who are under the direct supervision of a psychologist are authorized to perform counseling and testing for mental illness or debility. Treatment does not include the practice of medicine.
The services provided by a social worker, psychiatric nurse, or mental health worker are not covered by Texas Medicaid and cannot be billed under the provider identifier of any other outpatient behavioral health provider.

Psychologists must not bill for services performed by students, interns, or licensed professionals under their supervision except for services provided by LPAs. For mental health services, only the licensed psychologist and other Medicaid enrolled provider actually performing the service may bill Texas Medicaid. The services provided by an LCSW, LPC, or LMFT are reimbursable directly to the LCSW, LPC, or LMFT.

### 6.3 The 12-Hour System Limitation

The following provider types are limited in the Medicaid claims processing system to reimburse for a maximum combined total of 12-hours per day, per provider system limitation for inpatient and outpatient behavioral health services:

- Clinical nurse specialist (CNS)
- LCSW
- LMFT
- LPC
- Nurse practitioner (NP)
- Physician assistant (PA)
- Psychologist

Because MDs and DOs can delegate and may submit claims in excess of 12 hours per day, they are not subject to the 12-hour system limitation.

Providers who perform group therapy may possibly submit claims in excess of 12 hours in a given day due to the manner in which group therapy is billed.

Because a psychologist can delegate to multiple LPAs and may submit claims for LPA services in excess of 12 hours per day, LPAs are not subject to the 12-hour system limitation.

All providers, including MDs and DOs and each provider to whom they delegate, are subject to retrospective review as outlined below, including the following:

- MDs and DOs and each provider to whom they delegate.
- LPAs performing services under the direct supervision of a psychologist.

Court-ordered and DFPS services are not subject to the 12-hour system limitation per provider, per day when billed with modifier H9.

### 6.3.1 Retrospective Review of Behavioral Health Services Billed in Excess of 12 Hours per Day

HHSC and TMHP routinely perform retrospective review of all providers. In addition, all provider types including MDs and DOs and each provider to whom they delegate are subject to retrospective review for the total hours of services performed and billed in excess of 12 hours per day.

Retrospective review of any behavioral health provider may include:

- All behavioral health procedure codes included in the 12-hour system limitation
- All evaluation and management (E/M) procedure codes, including those listed in the E/M section of the Current Procedural Terminology (CPT), billed with a psychiatric diagnosis
All remaining behavioral health procedure codes not included in the 12-hour system limitation such as group therapy and pharmacological management

Documentation requirements for all services billed are listed for each individual specialty in this handbook. If inappropriate payments are identified on retrospective review for any provider type, the reimbursement will be recouped.

Behavioral health services subject to the 12-hour system limitation and retrospective review will be based on the provider’s TPI base (the first seven digits of the TPI). The location where the services occurred will not be a basis for exclusion of hours. If a provider practices at multiple locations and has a different suffix for the various locations, but has the same TPI base, all services identified for restriction to the provider 12-hour limit will be counted regardless of whether they were performed at different locations.

6.3.2 Procedure Codes Included in the 12-Hour System Limitation

The table below lists the inpatient and outpatient behavioral health procedure codes included in the system limitation, along with the time increments the system will apply based on the billed procedure code. The time increments applied will be used to calculate the 12-hour per day system limitation.

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Time Assigned by Procedure Code Description</th>

</tr>
<tr>
<td>96116</td>
<td>60 minutes</td>
<td>60 minutes</td>
</tr>
<tr>
<td>96118</td>
<td>60 minutes</td>
<td>60 minutes</td>
</tr>
</tbody>
</table>

N/A= Not Applicable
* Note: Procedure codes 90833, 90836, and 90838 are add-on procedure codes to be billed with the most appropriate E/M procedure code.

If a cutback occurs for procedure codes included in the system limitation, the quantity allowed per service session designated is rounded up to one decimal point or rounded down to one decimal point following standard rounding procedures (as shown in the following example):

<table>
<thead>
<tr>
<th>Total Time</th>
<th>Rounded Time</th>
</tr>
</thead>
<tbody>
<tr>
<td>11.71 hours</td>
<td>11.7 hours</td>
</tr>
<tr>
<td>11.72 hours</td>
<td>11.7 hours</td>
</tr>
<tr>
<td>11.73 hours</td>
<td>11.7 hours</td>
</tr>
<tr>
<td>11.74 hours</td>
<td>11.7 hours</td>
</tr>
</tbody>
</table>
### 6.3.3 Formula Applied

For client L on the table below, 80 billed minutes are applied, but the provider only has 40 available minutes before reaching the 12-hour daily limit (720 minutes); therefore, only 40 minutes are considered for reimbursement. The 40 allowed minutes are divided into the 80 applied minutes to get an allowed unit of 0.5 for payment.

<th>Amount Applied*</th>
<th>Total Time Paid</th>
<th>Qty.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>735 billed minutes for 1 day</td>
<td>720 paid minutes for 1 day</td>
<td></td>
</tr>
</tbody>
</table>

* Time applies towards the 12-hour limit.

**Reminder:** The procedure codes listed above have time ranges built in, so the quantity billed should be reflected in quantities of one, versus the actual amount of time spent with the client, i.e., procedure code 90832 is 30 minutes of time spent with the client. The provider would bill a quantity of one when submitting a claim.

**Refer to:** Form BH. 14, “Psychotherapy with Evaluation and Management (E/M)” in this handbook for an claim form example for psychotherapy services billed with an E/M procedure code and an add-on procedure code.

If a claim is adjusted and causes additional minutes to be available to the provider for that day, the system does not automatically reprocess any previously denied or cutback claims that would now be payable. It is up to the provider to request reprocessing of the denied or cutback claims.

Claims submitted for psychological evaluation or testing performed by a qualified provider at the request of the DFPS, or by a court order, are not counted against the benefit limitations. These claims must be submitted with the following information:
The provider must submit the claim using modifier H9 with the procedure codes billed.

If psychological services are court ordered, the claim must include a copy of the court order for outpatient treatment signed by the judge, and documentation of medical necessity.

If psychological services are directed by DFPS, the claim must include the name and telephone number of the DFPS employee who provided the direction, the reason for the DFPS request, and documentation of medical necessity.

Texas Medicaid does not cover treatment for chronic diagnoses such as intellectual disability and organic brain syndrome. Psychiatric daycare is not a covered service.

Refer to: Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (Vol. 1, General Information) for more information about reimbursement methodologies.

Form BH. 3, “Outpatient Psychotherapy/Counseling Request Form” in this handbook.

Section 4, “Licensed Clinical Social Worker (LCSW), Licensed Marriage and Family Therapist (LMFT), and Licensed Professional Counselor (LPC)” in this handbook.

6.4 Outpatient Behavioral Health Services

Outpatient behavioral health services performed by the following providers are benefits to clients of any age who have a diagnosis as outlined below when provided in the office, home, skilled nursing or intermediate care facility, outpatient hospital, extended care facility, or in other locations:

- CNS
- LCSW
- LPC
- LMFT
- Licensed Psychologist
- Licensed LPA under the direct supervision of a psychologist in accordance with the TSBEP
- PA
- Physicians/psychiatrist
- NP

The following procedure codes may be used for psychiatric services:

<table>
<thead>
<tr>
<th>Service</th>
<th>Procedure Code(s)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Diagnostic</td>
<td>90791 (without medical services), 90792 (with medical services)</td>

</tr>
<tr>
<td>Crisis psychotherapy</td>
<td>90839 and 90840 are noncovered procedure codes. This service is included in the appropriate therapy procedure code and is not reimbursed separately.</td>
</tr>
</tbody>
</table>
Interactive complexity add-on procedure code 90875 is informational only and will not be reimbursed separately from the appropriate psychotherapy procedures code.

### 6.4.1 Annual Encounter or Visit Limitations

Outpatient behavioral health services without prior authorization are limited to 30 encounters or visits per client, for each calendar year. An encounter or visit is defined as any outpatient behavioral health services (i.e., examination, therapy, psychological and neuropsychological testing) by any provider, in the office, outpatient hospital, nursing home, or home settings. This limitation includes outpatient encounters or visits by all practitioners.

Each individual encounter or visit and each hour of psychological or neuropsychological testing will count toward the 30-encounter or visit limitation even when services are performed by different providers on the same date of service.

Services exceeding 30 encounters or visits per calendar year, per client must be prior authorized.

### 6.4.2 Prior Authorization Requirements After the Annual Encounter or Visit Limitations Have Been Met

All outpatient behavioral health services for all provider types approved to deliver outpatient services will require prior authorization with the exception of the following:

- County Indigent Health Care Program (CIHCP) services
- FQHC and rural health clinic (RHC) services
- Laboratory and radiology services
- MHMR services
- Pharmacological regimen oversight (procedure code M0064) and pharmacological management services (billed with the most appropriate E/M procedure code)
- SHARS behavioral health rehabilitation services
- One psychiatric diagnostic evaluation (procedure code 90791 or 90792) per year, per client, per provider (same provider)

Prior authorization requests in increments of up to 10 additional encounters or visits may be considered. Providers with established clients must request prior authorization when they determine the client is approaching 30 encounters or visits to all behavioral health providers for the calendar year. If the client changes providers during the year and the new provider is unable to obtain complete information on the client’s encounters or visits, providers are encouraged to obtain prior authorization before rendering services.

All requests for prior authorization with the exception of psychological and neuropsychological testing must include a completed Outpatient Psychotherapy/Counseling Request Form dated and signed by the performing provider with the following information:

- Client name, Medicaid number, date of birth, age, and sex
- Provider name and identifier
- A complete diagnosis as listed in the DSM-IV-TR

<table>

</tr>
<tr>
<td>Unlisted</td>
<td>90899</td>
</tr>
</tbody>
</table>
• History of substance abuse
• Current medications
• Current living condition
• Clinical update, including specific symptoms and responses to past treatment, treatment plan (measurable short term goals for the extension of services, specific therapeutic interventions to be used, measurable expected outcomes of therapy, anticipated length of treatment, and the planned frequency of encounters or visits)
• Number of services requested for each type of therapy and the dates based on the frequency of encounters or visits for the services to be provided
• The date on which current treatment is to begin
• An indication of court-ordered or DFPS-directed services

The Outpatient Psychotherapy/Counseling Request Form may be mailed to the TMHP Special Medical Prior Authorization Department at:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization Department
12357-B Riata Trace Parkway, Suite 100
Austin, TX 78727

The form may also be faxed to (512) 514-4214 or submitted online on the TMHP website at www.tmhp.com.

All of the required areas on the request form must be completed. If additional space is needed for a particular section of the form, providers may state “see attached” in that section and attach the additional pages to the form. The attachment must contain the specific information required in that section of the form.

The request must be signed and received no later than the start date listed on the request form and no earlier than 30 days prior to the start date listed on the form so the most current clinical information is provided.

To avoid unnecessary denials, the provider must provide correct and complete information, including accurate documentation of medical necessity for the services requested. The provider must maintain documentation of medical necessity in the client’s medical record. The requesting provider may be asked for additional information to clarify or complete a request for outpatient behavioral health services.

Requests for prior authorization for procedure code 90899 (psychiatric service or a procedure that is unlisted) must be submitted by the provider to the Special Medical Prior Authorization Department by mail or approved electronic method using the Special Medical Prior Authorization Request Form with documentation supporting medical necessity including:

• Client’s diagnosis
• Prior treatment for this diagnosis and the medical necessity of the requested procedure
• A clear, concise description and the procedure to be performed
• The reason for recommending this particular procedure
• A procedure code that is comparable to the procedure being requested
• Documentation that this procedure is not investigational or experimental
• The physician’s intended fee for this procedure
Prior authorization requests will be reviewed by a mental health professional. The number of encounters or visits authorized will be dependent upon the client’s symptoms and response to past treatment. If the client requires additional extensions, the provider must submit a new request for prior authorization at the end of each extension period. The additional requests must include new documentation concerning the client’s current condition.

### 6.5 Court-Ordered and DFPS-Directed Services

Court-ordered services are not subject to the 12-hour system limitation per provider, per day when billed with modifier H9.

Retrospective review may occur for both the total hours of services performed per day and for the total hours of services billed per day.

#### 6.5.1 Prior Authorization

A request for prior authorization of court-ordered or DFPS-directed services must be submitted no later than seven calendar days after the date on which the services began.

#### 6.5.2 Documentation Requirements

If the client requires more than four hours of psychological or neuropsychological testing per day or more than eight hours of psychological or neuropsychological testing per calendar year, additional documentation is required to support the medical necessity for the additional hours. Additional psychological or neuropsychological testing hours may be considered when supported by a court-order or DFPS-direction, or as an exception on a case-by-case basis. All documentation must be maintained by the provider in the client’s record.

For court-ordered admissions, a copy of the doctor’s certificate and all court-ordered commitment papers signed by the judge must be submitted with the psychiatric hospital inpatient form.

Specific court-ordered services for evaluations, psychological or neuropsychological testing, or treatment may be prior authorized as mandated by the court. Prior authorization requests must be accompanied by a copy of the court document signed by the judge. If the requested services differ from or go beyond the court order, the additional services will be reviewed for medical necessity.

Specific DFPS-directed services for evaluations, psychological or neuropsychological testing, or treatment may be prior authorized as directed. Prior authorization requests must be accompanied by a copy of the directive or summary signed by the DFPS employee. If the requested services differ from the DFPS direction, the additional services will be reviewed for medical necessity. Requested services beyond those directed by DFPS are subject to medical necessity review.

### 6.6 Electroconvulsive Therapy (ECT)

ECT (procedure code 90870) is the induction of convulsions by the passage of an electric current through the brain. It is used in the treatment of certain psychiatric disorders. ECT treatments are limited to one per day.

ECT performed by the following providers may be provided in the office, outpatient hospital, and inpatient hospital setting:

- Physicians
- CNS
- PA
- NP

Authorization is not required for ECT services.
Psychotherapy billed in addition to ECT on the same day will be denied as part of another procedure on the same day.

Hospital subsequent care (procedure codes 99231, 99232, or 99233) billed on the same day as ECT is not a separate benefit. Hospital subsequent care for diagnoses unrelated to the ECT will be considered on appeal.

6.7 Family Therapy or Counseling Services

When providing family counseling services (procedure code 90847), the client and a family member must be present during the face-to-face visit.

According to the definition of family provided by the HHSC Household Determination Guidelines, only specific relatives are allowed to participate in family counseling services. The following specific relatives are included in family counseling services:

- Father
- Mother
- Grandfather
- Grandmother
- Brother
- Sister
- Uncle
- Aunt
- Nephew
- Niece
- First cousin
- First cousin once removed
- Stepfather
- Stepmother
- Stepbrother
- Stepsister
- Foster parent
- Legal guardian

6.7.1 Prior Authorization

Family therapy or counseling services do not require prior authorization unless the limitation of 30 encounters or visits per calendar year has been met.

6.7.2 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including family therapy or counseling services.

6.7.3 Reimbursement

Regardless of the number of family members present per outpatient session, family counseling or psychotherapy (procedure code 90847) is reimbursed for only one Medicaid-eligible client per session. Procedure code 90847 is limited to one outpatient service per family, per day.
Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied.

Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

### 6.8 Pharmacological Regimen Oversight

Pharmacological regimen oversight (procedure code M0064) is a benefit of Texas Medicaid when provided by a physician, CNS, NP, or PA and are limited to the following diagnosis codes:

<table>

</table>

The focus of a pharmacological management encounter or visit is the use of medication to treat a client's signs and symptoms of mental illness. When the client continues to experience signs and symptoms of mental illness necessitating discussion beyond minimal outpatient psychotherapy or counseling in a given day, the focus of the service is broader and would be outpatient psychotherapy or counseling rather than pharmacological management.
Pharmacological regimen oversight and pharmacological management services do not count towards the 12-hour per day, per provider system limitation or the 30 encounter or visit annual limitation.

**6.8.1 Indications for Pharmacological Regimen Oversight**

Pharmacological regimen oversight refers to a brief, face-to-face office encounter or visit for the sole purpose of evaluating, monitoring, or changing drug prescriptions or simple drug dosage adjustments.

Pharmacological management refers to the in-depth management of psychopharmacological agents, which are medications with potentially significant side effects, and represents a very skilled aspect of client care. It is intended for use for clients who are being managed primarily by psychotropics, antidepressants, ECT, or other types of psychopharmacologic medications. Pharmacological management can be provided in both the inpatient and outpatient settings.

Pharmacological management must be provided during a face-to-face encounter or visit with the client and any inpatient or outpatient psychotherapy or counseling provided during the pharmacological management encounter or visit must be less than 20 minutes.

Procedure code M0064 describes a physician service and cannot be provided by a nonphysician or “incident to” a physician service, with the exception of CNS, NP, and PA providers whose scope of license in this state permits them to prescribe. Procedure code M0064 does not refer to the actual administration of medication or observation of the patient taking an oral medication. The administration and supply of oral medication are non-covered services.

**6.8.2 Prior Authorization**

Pharmacological regimen oversight and pharmacological management do not require prior authorization.

**6.8.3 Documentation Requirements**

Documentation of medical necessity for pharmacological management must be dated (month/date/year) and signed by the performing provider and must address all of the following information in the client’s medical record in legible format:

- A complete diagnosis as listed in the current edition of the DSM-IV-TR
- Medication history
- Current symptoms and problems to include presenting mental status or physical symptoms that indicate the client requires a medication adjustment
- Problems, reactions, and side effects, if any, to medications or ECT
- Description of optional minimal psychotherapeutic intervention (less than 20 minutes), if any
- Any medication modifications
- The reasons for medication adjustments, changes, or continuation
- Desired therapeutic drug levels, if applicable
- Current laboratory values, if applicable
- Anticipated physical and behavioral outcome

Documentation of medical necessity for pharmacological regimen oversight (procedure code M0064) must address the following in the client’s medical record:

- The client is evaluated and determined to be stable, but continues to have a psychiatric diagnosis that needs close monitoring of therapeutic drug levels; or
- The client requires evaluation for prescription renewal, a new psychiatric medication, or a minor medication dosage adjustment; and
• Provider has documented the medication history in the client’s records with current signs and symptoms, and new medication modifications with anticipated outcome.

The treating provider must document the medical necessity for the chosen treatment in the client’s medical record as well as the diagnosis code that most accurately describes the client’s condition that necessitated the pharmacological regimen oversight (procedure code M0064) or pharmacological management in the client’s medical record. The medical record (outpatient hospital records, reports, or progress notes) should be clear and concise, documenting the reasons for the pharmacological regimen oversight or pharmacological management treatment and the outcome.

6.8.4 Reimbursement

Texas Medicaid does not reimburse pharmacological regimen oversight or pharmacological management for the actual administration of medication, or for observation of the client taking an oral medication.

Only one pharmacological regimen oversight (procedure code M0064) will be reimbursed for the same date of service.

If the primary reason for the office encounter or visit is for outpatient psychotherapy or counseling, then the specific outpatient psychotherapy or counseling procedure code must be billed.

Pharmacological regimen oversight is limited to one service per day, per client, by any provider in any setting. Pharmacological regimen oversight is limited to the office setting.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied.

Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

6.9 Psychiatric Diagnostic Evaluations

Psychiatric diagnostic evaluations (procedure code 90791 or 90792) are benefits of Texas Medicaid when provided by psychiatrists, psychologists, NPs, CNSs, and PAs when performed in the inpatient and outpatient setting.

Psychiatric diagnostic evaluations are limited to the following:

• Once per day, per client, by any provider regardless of the number of professionals involved in the evaluation.

• Once per year, per client, by the same provider. (This limitation does not apply to inpatient setting.)

Psychiatric diagnostic evaluations (procedure code 90791 or 90792) are limited to the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>29040 29041 29042 29043 2910 2911 2912 2913 2915 29181</td>
</tr>
<tr>
<td>29182 29189 2919 2920 29211 29212 29281 29282 29283 29284</td>
</tr>
<tr>
<td>29285 29289 2929 2930 29381 29382 29383 29384 29389 2939</td>
</tr>
<tr>
<td>2940 29410 29411 29420 29421 2948 2949 29510 29520 29530</td>
</tr>
<tr>
<td>29540 29560 29570 29590 29600 29601 29602 29603 29604 29605</td>
</tr>
<tr>
<td>29606 29620 29621 29622 29623 29624 29625 29626 29630 29631</td>
</tr>
<tr>
<td>29632 29633 29634 29635 29636 29640 29641 29642 29643 29644</td>
</tr>
<tr>
<td>29645 29646 29650 29651 29652 29653 29654 29655 29656 29660</td>
</tr>
</tbody>
</table>
An interactive psychiatric diagnostic evaluation (procedure code 90791 or 90792) may be covered to the extent that it is medically necessary. Examples of medical necessity include, but are not limited to, clients whose ability to communicate is impaired by expressive or receptive language impairment from various causes, such as conductive or sensorineural hearing loss, deaf mutism, or aphasia.

**Note:** Interactive complexity for psychotherapy services is not reimbursed separately. Interactive complexity add-on procedure code 90875 is informational only and will not be reimbursed separately from the appropriate psychotherapy procedures code.

A psychiatric diagnostic evaluation may be incorporated into an E/M service provided the required elements of the E/M service are fulfilled. An E/M procedure code may be appropriate when the level of decision making is more complex or advanced than that commonly associated with a psychiatric diagnostic evaluation.

Due to the nature of these encounters or visits, the general time frame for such a diagnostic evaluation visit is one hour. A psychiatric diagnostic evaluation or an interactive psychiatric diagnostic evaluation examination counts towards the 12-hour per day, per provider system limitation.

### 6.9.1 Prior Authorization

Psychiatric diagnostic evaluations performed in the inpatient setting are not limited to once per year, but must be based on medical necessity.

Psychiatric diagnostic evaluations do not require prior authorization when performed in the office, home, nursing facility, outpatient hospital, or other settings.

Additional psychiatric diagnostic evaluations may be considered for prior authorization on a case-by-case basis when submitted with supporting documentation, including but not limited to the following:
- A court order or a DFPS directive
- If a new episode of illness occurs after a hiatus

### 6.9.2 Documentation Requirements

In addition to the inpatient and outpatient psychotherapy or counseling documentation requirements outlined in this section, supporting documentation for psychiatric diagnostic evaluation examinations must include:

- Reason for referral or presenting problem
- Prior history, including prior treatment
- Other pertinent medical, social, and family history
- Clinical observations and mental status examinations
- A complete diagnosis as listed in the current edition of the DSM-IV-TR
- Recommendations, including expected long term and short term benefits
- For the interactive psychiatric diagnostic evaluation (procedure code 90791 or 90792), the medical record must indicate the adaptations utilized in the session and the rationale for employing these interactive techniques

### 6.9.3 Domains of a Clinical Evaluation

The following domains must be included in the evaluation documentation:

- Reason for the evaluation
- History of the present illness
- Past psychiatric history
- History of alcohol and other substance use
- General medical history
- Developmental, psychosocial, and sociocultural history
- Occupational and military history
- Legal history
- Family history of psychiatric disorder
- Mental status examination

The treating provider must document the medical necessity for the chosen treatment in the client’s medical record and also include the diagnosis code that most accurately describes the client’s condition that necessitated the psychiatric diagnostic evaluation (procedure code 90791 or 90792). The medical record (inpatient or outpatient hospital records, reports, or progress notes) must be signed and dated by the performing provider, and should be clear and concise, documenting the reasons for the psychiatric diagnostic evaluation, and the outcome.

### 6.10 Psychological and Neuropsychological Testing

Psychological testing (procedure code 96101) and neuropsychological testing (procedure code 96118) are covered services when provided by a psychiatrist, psychologist, or LPA under the direct supervision of the psychologist and are limited to the following diagnosis codes:

<table>

</table>
Psychologists licensed by the TSBEP and enrolled as Medicaid providers are authorized to perform counseling and testing for mental illness or debility.

Psychological and neuropsychological testing are not covered benefits when provided by a CNS, NP, or PA. Each hour of psychological or neuropsychological testing counts toward the 12-hour per day, per provider system limitation.

6.10.1 Prior Authorization

Psychological or neuropsychological testing requires prior authorization for services rendered in any place of service except the inpatient setting under the following circumstances:

- After the 30 encounter or visit annual limitation has been met
- If more than four hours of testing per day, or more than eight hours of testing per calendar year, are medically necessary

Prior authorization must include documentation of medical necessity, and must be submitted on a Psychological/Neuropsychological Testing Request Form.

If the client requires more than four hours of testing per day, or more than eight hours of psychological or neuropsychological testing per calendar year, additional documentation is required to support the medical necessity for the additional hours. Additional testing hours may be considered as an exception on a case-by-case basis when supported by medical necessity. The number of hours prior authorized are based on the medical necessity as supported by the documentation provided. All documentation must be maintained by the provider in the client’s medical record.

6.10.2 Documentation Requirements

The treating provider must document the medical necessity for the chosen treatment in the client’s medical record and also include the diagnosis code that most accurately describes the client’s condition that necessitated the psychological or neuropsychological testing. The medical record (inpatient or outpatient hospital records, reports, or progress notes) must be signed and dated by the performing provider, and should be clear and concise, documenting the reasons for the psychological or neuropsychological testing and the outcome.

In addition, the following documentation must be maintained by the provider in the client’s medical record:

- The Psychological/Neuropsychological Testing Request Form.
- The name of the tests that were performed (e.g., Wechsler Adult Intelligence Scale–Revised [WAIS-R], Rorschach, Minnesota Multiphasic Personality Inventory [MMPI]).
- How the tests were scored.
- The location at which the test was performed.
- The name and credentials of each of the providers who were involved in administering the test, and in the interpretation and preparation of the report.
- The interpretation of the test, which must include narrative descriptions of the findings of the tests.
- The length of time that each provider spent in face-to-face administration, interpretation, reporting the test, integrating the test interpretation, and documenting the comprehensive report based on the integrated data.
- The treatment being administered, including how the test results affect the prescribed treatment.
- Any recommendation for further testing, including an explanation that substantiates the necessity for retesting, if testing is repeated.
• Rationale or extenuating circumstances that impact the ability to complete the testing, such as, but not limited to, the client’s condition requires testing over two days and client does not return, or the client’s condition precludes completion of the testing.

The original testing material must be maintained by the provider and must be readily available for retrospective review by HHSC.

6.10.3 Reimbursement

Psychological (procedure code 96101) and neuropsychological (procedure code 96118) testing is limited to a total of four hours per day, and eight hours per client, per calendar year for any provider. Hours billed beyond four hours per day will be denied without prior authorization. All supporting documentation must be maintained by the provider in the client’s medical record.

Reimbursement for the psychological and neuropsychological testing (procedure codes 96101 and 96118) include both the time spent during face-to-face testing with the client and the time spent scoring and interpreting the results. If the scoring and interpretation are performed on a different date of service from the testing, then the date of service on the claim must reflect the date and time spent for each service performed. Even if scoring and interpretation are completed on a different date from the testing, providers must submit only one claim for each psychological or neuropsychological test performed. If necessary, providers can submit the claim with multiple details for each date of service.

The correct modifier AH or UC must be appended to the procedure code to identify who rendered the service. If both the LPA and psychologist perform services on the same date, one detail must be submitted for each provider with each detail accurately representing the time spent by the psychologist or LPA. Time billed for services performed on the same client must not be billed for the same time and date of service.

Services provided by both the psychologist and LPA count toward the total four hours of testing allowed per client, per day.

Psychological and neuropsychological testing will not be reimbursed to a CNS, NP, or a PA. Behavioral health testing may be performed during an assessment by a CNS, NP, or a PA, but will not be reimbursed separately. The most appropriate office encounter or visit procedure code must be billed. Behavioral health testing performed by a CNS, NP, or a PA during an assessment will be denied as part of another service.

Psychological or neuropsychological testing may be reimbursed on the same date of service as an initial psychiatric diagnostic evaluation or interactive psychiatric diagnostic evaluation.

Psychological testing performed on the same date of service as neuropsychological testing will be denied as part of another service. All documentation must be maintained by the provider in the client’s medical record.

Providers must bill the preponderance of each half hour of testing and indicate that number of units on the claim form.

6.11 Psychotherapy or Counseling

Psychotherapy or counseling is the treatment for mental illness and behavioral disturbances in which the clinician establishes a professional contract with the client and, through definitive therapeutic communication or therapeutic interactions, attempts to alleviate the emotional disturbances, reverse or change maladaptive patterns of behavior, and encourage personality growth and development.

Psychotherapy or counseling is limited to the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>29040</td>
</tr>
<tr>
<td>29182</td>
</tr>
</tbody>
</table>
The appropriate service is chosen based on the type of inpatient or outpatient psychotherapy or counseling, the place of service, the face-to-face time spent with the client during inpatient or outpatient psychotherapy or counseling, and whether E/M services are furnished on the same date of service as inpatient or outpatient psychotherapy or counseling.

The treating provider must document the medical necessity for the chosen treatment in the client’s medical record and also include the diagnosis code that most accurately describes the client’s condition that necessitated the psychotherapy or counseling. The medical record (inpatient or outpatient hospital records, reports, or progress notes) must be signed and dated by the performing provider, and should be clear and concise, documenting the reasons for the psychotherapy or counseling and the outcome.

Inpatient and outpatient psychotherapy or counseling counts towards the 12-hour per day, per provider system limitation.

### 6.11.1 Prior Authorization

Prior authorization for inpatient psychotherapy or counseling is not required for 30 encounters or visits per calendar year.
After the 30 encounter or visit annual limitation has been met, prior authorization will be considered in increments of up to 10 additional encounters or visits per request. All requests for prior authorization of extensions beyond the 30 initial encounter or visit annual limit must include a completed Outpatient Psychotherapy/Counseling Request Form, including:

- Client name and Medicaid number, date of birth, age, and sex
- Provider name and identifier
- A complete diagnosis as listed in the current edition of the DSM-IV-TR
- History of substance abuse
- Current medications
- Current living condition
- Clinical update, including specific symptoms and response to past treatment, treatment plan (measurable short term goals, specific therapeutic interventions to be used in therapy, measurable expected outcomes of therapy, length of treatment anticipated, and planned frequency of encounters or visits)
- Number, type of services requested, and the dates based on the frequency of encounters or visits for which the services will be provided
- Date on which the current treatment is to begin
- Indication of court-ordered or DFPS-directed services

All areas of the request form must be completed with the required information. If additional space is needed for a particular section of the form, providers may state, “see attached,” in that section and attach the additional pages to the form. The attachment must contain information specific to that section of the form.

A request for outpatient behavioral health services must be submitted no sooner than 30 days before the date of service being requested, so that the most current information is provided.

The number of encounters or visits authorized will be dependent upon the client’s symptoms and response to past treatment. The provider must submit a new prior authorization request at the end of each extension period. The additional requests must include new documentation concerning the client’s current condition.

Prior authorization requests will be reviewed by a mental health professional.

### 6.11.2 Documentation Requirements

Each client for whom services are provided must have supporting documentation included in their medical record. All entries must be documented clearly, be legible to individuals other than the author, and be dated (month/date/year) and signed by the performing provider. Those services not supported by the documentation in the client’s medical record are subject to recoupment. Documentation must include the following:

- Notations of the session beginning and ending times
- All pertinent information regarding the client’s condition to substantiate the need for services, including, but not limited to, the following:
  - A complete diagnosis as listed in the current edition of the DSM-IV-TR
  - Background, symptoms, impression
  - Narrative description of the assessment
  - Behavioral observations during the session
• Narrative description of the counseling session
• Treatment plan and recommendations

6.11.3 Initial Outpatient Psychotherapy or Counseling for an Individual, Group, or Family

Client Condition Requirements
The following documentation requirements must be submitted when requesting prior authorization for outpatient services beyond the 30-encounter or visit annual limitation:
• A description of why treatment is being sought at the present time
• A mental status examination, which validates a diagnosis as listed in the current edition of the DSM-IV-TR
• A description of any existing psychosocial or environmental problems
• A description of the current level of social and occupational or educational functioning

Initial Assessment Requirements
There must be pertinent history that contains all of the following:
• A chronological psychiatric, medical and substance use history with time frames of prior treatment and the outcomes of that treatment
• A social and family history
• An educational and occupational history

Active Treatment Plan Requirements
The treatment plan must contain the following elements:
• A description of the primary focus of the treatment
• Clearly defined discharge goals that indicate treatment can be successfully accomplished
• The expected number of sessions it will take to reach the discharge goals, and standards of practice for the client’s diagnosis
• Family therapy services are appropriately planned unless there are valid clinical contraindications

When a medication regimen is planned by a psychiatrist, PA, NP, or CNS, it must meet the following:
• Guidelines specific to the medication or medications prescribed
• Accepted standard of practice for the diagnosis for which it is prescribed
• Accepted standard of practice for the age group for which it is prescribed

Discharge Plan Requirements
Discharge planning must reflect the following:
• A plan for concluding the client’s treatment based on an assessment of the client’s progress in meeting the discharge goals
• Identification of the client’s aftercare needs that includes a plan for transition
6.11.4 Subsequent Outpatient Psychotherapy or Counseling for an Individual, Group or Family

Client Condition Requirements
All of the requirements for the first authorized treatment sessions must be met in addition to an assessment of the client’s response to treatment that indicates one of the following:

- The client has not achieved the discharge goal necessary to conclude treatment, but the description of the client’s progress indicates that successful treatment can be concluded with this extension request.
- The client has not achieved the discharge goal necessary to conclude treatment and there is potential for serious regression or admission to a more intensive setting without ongoing outpatient management (requiring several months or longer of outpatient therapy).
- The client’s condition is one that includes long standing, pervasive symptoms or patterns of maladaptive behavior.

6.11.4.1 Active Treatment Plan Requirements
There must be an assessment, which explains the client’s inability to achieve the treatment objectives as expected. This assessment must address the following:

- Factors that interfere with the client’s ability to make progress as expected
- The continued appropriateness of the treatment goals
- The continued appropriateness of the type of therapy being utilized
- The need for obtaining consultation
- The current diagnosis and the need for revisions or additional assessments

The ongoing treatment plan must reflect the initial treatment plan requirements, and the following additional information must be included:

- Changes in primary treatment focus or discharge goals have been identified and are consistent with the client’s current condition
- The expected progress toward the discharge goals is described within the extended time frame
- Appropriate adjustments have been made in the medication regimen based on the client’s therapeutic response
- No contraindications to the use of the prescribed medications are present

6.11.4.2 Discharge Plan Requirements
Discharge planning must reflect the following:

- A plan for concluding the client’s treatment based on an assessment of the client’s progress in meeting the discharge goals
- Identification of the client’s aftercare needs that includes a plan for transition

6.11.5 Reimbursement
The following procedure codes may be submitted when billing for inpatient psychotherapy or counseling services: 90832, 90834, or 90837, or an E/M procedure code with add-on procedure code 90833, 90836, or 90838.

Outpatient psychotherapy or counseling is limited to no more than four hours per client, per day.
When more than one type of session is provided on the same date of service (inpatient or outpatient individual, group, or family psychotherapy or counseling) each session type will be reimbursed individually. Services are reimbursed only for the Medicaid eligible client per session.

When multiples of each type of session is billed, the most inclusive procedure code from each type of session is paid and the others are denied.

A CNS, NP, PA, or psychiatrist may bill an E/M visit if less than 20 minutes of outpatient psychotherapy or counseling is provided.

Only the CNS, LCSW, LMFT, LPC, NP, or PA actually performing the mental health service may bill Texas Medicaid. The CNS, LCSW, LMFT, LPC, NP, or PA must not bill for services performed by people under their supervision. A psychiatrist may bill for services performed by people under their supervision. A psychologist may bill for services performed by an LPA under their direct supervision.

The services of a psychiatric nurse or behavioral health worker are not covered by the Texas Medicaid program and cannot be billed under the provider identifier of any other outpatient behavioral health provider.

Interpretation and documentation time, including time to document test results in the client’s medical record, is not reimbursed separately. Reimbursement is included in the covered procedure codes. Providers must bill the preponderance of each half hour of group counseling sessions and indicate that number of units on the claim form.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied.

Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

### 6.12 Narcosynthesis

Narcosynthesis (procedure code 90865) is a benefit of Texas Medicaid when billed by a physician.

### 6.13 Noncovered Services

The following services are not benefits of Texas Medicaid:

- Administration and supply of oral medication
- Adult and individual activities
- Biofeedback for psychological, psychophysiological, behavioral health therapy, and psychosomatic conditions
- Day-care
- Family psychotherapy without client present (procedure code 90846)
- Hypnosis
- Intensive outpatient program services (excluding substance use disorder [SUD] services)
- Marriage counseling
- Multiple family group psychotherapy (procedure code 90849)
- Music or dance therapy
- Psychiatric day treatment program services
- Psychiatric services for chronic disease, such as MR
• Psychoanalysis (procedure code 90845)
• Recreational therapy
• Services provided by a psychiatric nurse, mental health worker, psychiatric assistant, psychological assistant (excluding Master’s level LPA), or licensed chemical dependency counselor (LCDC)
• Thermogenic therapy

**6.14 Psychiatric Services for Hospitals**

Inpatient admissions to acute care hospitals for adults and children for psychiatric conditions are a benefit of Texas Medicaid. Admissions must be medically necessary and are subject to Texas Medicaid’s retrospective utilization review (UR) requirements. The UR requirements are applicable regardless of the hospital’s designation of a unit as a psychiatric unit versus a medical or surgical unit.

Clients who are 20 years of age and younger may be admitted to a freestanding psychiatric facility or a state psychiatric facility. Clients who are 21 years of age and older may be admitted only to an acute care facility. Providers should use the most appropriate revenue code when billing for inpatient psychiatric services in an acute care facility. A certification of need must be completed and placed in the client’s medical record within 14 days of the admission or once the client becomes Medicaid-eligible while in the facility.

Inpatient psychiatric treatment is a benefit of Texas Medicaid if all the following apply:

- The client has a psychiatric condition that requires inpatient treatment.
- The inpatient treatment is directed by a psychiatrist.
- The inpatient treatment is provided in a nationally accredited facility or hospital.
- The provider is enrolled in Texas Medicaid.

Clients of all ages may be admitted to an acute care facility. Inpatient admissions for the single diagnosis of chemical dependency or abuse (such as alcohol, opioids, barbiturates, and amphetamines) without an accompanying medical complication are not benefits of Texas Medicaid. Additionally, admissions for chronic diagnoses such as intellectual disability, organic brain syndrome, or chemical dependency or abuse are not covered benefits for acute care hospitals without an accompanying medical complication or medical condition. The UB-04 CMS-1450 paper claim form must indicate all relevant diagnoses that necessitate the inpatient stay.

Supporting documentation (certification of need) must be documented in the client’s medical record. This documentation must be maintained by each facility for a minimum of five years and be readily available for review when requested by HHSC or its designee.

Additional coverage through the Comprehensive Care Program (CCP) may be allowed for Medicaid-eligible clients who are 20 years of age and younger. Providers should use revenue code 124 when billing for inpatient psychiatric services in freestanding and state psychiatric facilities.

Refer to: Section 2.12, “Inpatient Rehabilitation Facility (Freestanding) (CCP)” in the Children’s Services Handbook (Vol. 2, Provider Handbooks).

**6.14.1 Prior Authorization Requirements**

Prior authorization is not required for fee-for-service clients who are admitted to psychiatric units in acute care hospitals. Out-of-network admissions require notification within the next business day and submission of clinical information to determine appropriateness for transfer to a contracted facility.

For clients who are 20 years of age and younger, initial admission to a state psychiatric facility or freestanding psychiatric facility may be prior authorized through CCIP for a maximum of five days based on Medicaid eligibility and documentation of medical necessity. Court-ordered services are not subject to the five-day admission limitation.
Refer to: Section 2.12.3, “Prior Authorization and Documentation Requirements” in the Children’s Services Handbook (Vol. 2, Provider Handbooks) for more information about inpatient psychiatric services.

6.14.2 Documentation Requirements
Documentation of medical necessity for inpatient psychiatric care must specifically address the following issues:

- Why the ambulatory care resources in the community cannot meet the treatment needs of the client.
- Why inpatient psychiatric treatment under the care of a psychiatrist is required to treat the client’s acute episode.
- How the services can reasonably be expected to improve the client’s condition or prevent further regression of the client’s condition in a proximate time period.

6.14.3 Psychological and Neuropsychological Testing Services
Psychological (procedure code 96101) and neuropsychological (procedure code 96118) testing, when performed in an acute care hospital or in a freestanding or state psychiatric facility, does not require prior authorization; however, these facilities must maintain documentation that supports medical necessity for the testing and the testing results of any psychological or neuropsychological testing that are performed while the client is an inpatient. Psychological and neuropsychological testing services are diagnosis restricted.

6.14.4 Inpatient Hospital Discharge
Procedure codes 99238 and 99239 must be submitted when billing for a hospital discharge.

6.15 Claims Filing and Reimbursement
Providers must bill Medicare before billing Medicaid. Medicaid’s responsibility for the coinsurance or deductible is determined in accordance with Medicaid benefits and limitations. Providers must check the client’s Medicare card for Part B coverage before billing Texas Medicaid. When Medicare is primary, it is inappropriate to bill Medicaid without first billing Medicare.

Note: Texas Medicaid may reimburse the full amount of the Medicare coinsurance and deductible for services rendered by psychiatrists and psychologists.

Claims for behavioral health services must be submitted to TMHP in an approved electronic format or on the CMS-1500 or UB-04 CMS-1450 paper claim forms. Providers may purchase CMS-1500 and UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a CMS-1500 or UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements. The diagnosis code that supports medical necessity for the billed outpatient behavioral health service must be referenced on the claim.

The Medicaid rates for psychologists are calculated in accordance with 1 TAC §355.8081 and §355.8085. Providers can refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com. An FQHC is reimbursed for psychological services according to its specific Prospective Payment System (PPS) rate per visit calculated in accordance with 1 TAC §355.8261.

A freestanding psychiatric hospital or facility is reimbursed for psychological services in accordance with 1 TAC §355.8060.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 4, “Federally Qualified Health Center (FQHC)” in the Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks) for more information.
Subsection 4.13.2, “Medicare Part B Crossovers” in Section 4, “Client Eligibility” (Vol. 1, General Information)

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (Vol. 1, General Information). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (Vol. 1, General Information) for more information about reimbursement.

Subsection 2.7.2, “Part B” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (Vol. 1, General Information) for information about how coinsurance and deductibles may be reimbursed by Texas Medicaid.

6.15.1 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the Texas Medicaid Provider Procedures Manual are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manual. Providers should refer to the CMS NCCI web page at www.medicaid.gov/Medicaid-CHIP-Program-Information/By-Topics/Data-and-Systems/National-Correct-Coding-Initiative.html for correct coding guidelines and specific applicable code combinations.

Whenever Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

7. SCREENING, BRIEF INTERVENTION, AND REFERRAL TO TREATMENT (SBIRT)

SBIRT is a comprehensive, public health approach to the delivery of early intervention and treatment services for clients who have substance use disorders and those who are at risk of developing such disorders. Substance abuse includes, but is not limited to, the abuse of alcohol and the abuse of, improper use of, or dependency on illegal or legal drugs. SBIRT is used for intervention directed to individual clients and not for group intervention.

SBIRT is targeted to clients who are 14 years through 20 years of age and who present to the hospital emergency department for a traumatic injury, condition, or accident related to substance abuse. SBIRT may also be medically necessary for clients who are 10 years through 13 years of age.

The first SBIRT session, including screening and brief intervention, must be billed by the hospital using an appropriate revenue code and procedure code H0050. Brief treatment is performed during the second, third, and fourth sessions, outside of the hospital. The second, third, and fourth sessions cannot be billed if clients were not referred from the hospital.

Additional services, outside the four sessions, will not be provided as SBIRT.

Refer to: Section 8, “Substance Use Disorder (SUD) Services (Abuse and Dependence)” in this handbook for additional information on SUD treatment.
7.1 Screening
Screening to identify clients who have problems related to substance use must be performed during the first session in the hospital emergency department or inpatient setting, but will not be separately reimbursed. Screening may be completed through interview and self-report, blood alcohol content, toxicology screen, or by using a standardized tool. Standardized tools that may be used include, but are not limited to, the following:

- Alcohol, Smoking, and Substance Involvement Screening Test (ASSIST)
- Drug Abuse Screening Test (DAST)
- Alcohol Use Disorders Identification Test (AUDIT)
- Cut-down, Annoyed, Guilty, Eye-opener (CAGE) questionnaire
- Car, Relax, Alone, Forget, Family or Friends, Trouble (CRAFFT) questionnaire
- Binge drinking questionnaire

7.2 Brief Intervention
Brief intervention is performed during the first session in the ED or inpatient hospital setting following a positive screen or a finding of at least a moderate risk for substance or alcohol abuse. Brief intervention is directed to the client and involves motivational discussion that is focused on raising the client’s awareness of his or her substance use and its consequences. The session is also focused on motivating the client toward behavioral change.

Successful brief intervention encompasses support of the client’s empowerment to make behavioral changes. A client who is found to have a moderate risk for substance or alcohol abuse should be referred for brief treatment of up to three sessions. Upon determination that the client has a severe risk for substance or alcohol abuse, the client should also be referred for more extensive treatment to the appropriate chemical dependency treatment center or outpatient behavioral health provider. If the client is currently under the care of a behavioral health provider, the client must be referred back to that provider.

SBIRT documentation for the first session must include:

- Whether the client has an alcohol or drug-related traumatic injury or condition.
- Positive screening by a standardized screening tool.
- Laboratory results such as blood alcohol content, toxicology screen, or other measures showing at least a moderate risk for alcohol or substance abuse.
- The name, address, and telephone number of the provider to which the client is referred, if a referral is made.

The provider who performed the screening must document that a follow-up appointment was made for a subsequent session.

7.3 Brief Treatment
A client found to have a moderate-to-high risk for substance abuse should be referred for brief treatment. Brief treatment is performed during the second, third, and fourth sessions, outside of the hospital emergency department or inpatient setting.

Brief treatment, although it includes a motivational discussion and client empowerment, is a more comprehensive intervention than the first session. Brief treatment includes assessment, education, problem solving, coping mechanisms, building a supportive social environment, goal setting, and a plan of action.
Procedure code H0050 will be eligible for reimbursement to the following provider types for the second, third, and fourth sessions:

- NP
- CNS
- PA
- LPC
- Social worker enrolled in CCP
- Physician and physician group
- Psychologist and psychologist group
- LCSW

7.4 Referral to Treatment

If the provider determines that the client is in need of more extensive treatment or has a severe risk for substance abuse, the client must be referred to an appropriate chemical dependency treatment center or outpatient behavioral health provider.

Referral to more extensive treatment is a proactive process that facilitates access to care for clients who require a more extensive level of service than SBIRT provides. Referral is an essential component of the SBIRT intervention because referral ensures that all clients who are screened have access to the appropriate level of care.

Referral to more extensive treatment must be integrated during the second, third, and fourth SBIRT sessions, if necessary, unless the client’s condition changes. Referral to more extensive treatment may also occur during the first session.

Providers must refer the client to more extensive treatment as soon as the need is determined.

7.5 Reimbursement and Limitations

SBIRT is limited to clients who are 10 years through 20 years of age.

SBIRT is limited to a maximum of three dates of service following the first session, per calendar year, by any provider. If a client requires more than three dates of services per year, the client must be referred for chemical dependency treatment.

Procedure code H0050 must be submitted in 15-minute increments, with a maximum of 3 units (45 minutes) per date of service by any provider.

Procedure code H0050 will be denied if it is billed for the same date of service, by the same provider, as any of the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>90791</th>
<th>90792</th>
<th>90832</th>
<th>90833*</th>
<th>90834</th>
<th>90836*</th>
<th>90837</th>
<th>90838*</th>
<th>90838</th>
<th>90870</th>
<th>96101</th>
</tr>
</thead>
<tbody>

<td></td>
<td></td>
</tr>
</tbody>
</table>

*Note: Procedure codes 90833, 90836, and 90838 are add-on procedure codes and must be submitted with the most appropriate E/M procedure code.
7.6 Documentation Requirements

Client record documentation must support medical necessity for the services provided and must be maintained and made readily available for review when requested by the Health and Human Services Commission (HHSC) or its designee. SBIRT documentation must include the following:

- An indication that the client has an alcohol or drug-related traumatic injury or condition
- Positive screening by a standardized substance abuse screening tool
- Laboratory results, such as blood alcohol content, toxicology screen, or other measures, that show at least a moderate risk for substance abuse
- If a referral is made, the name, address, and telephone number of the provider to whom the client was referred
- A written, client-centered plan for the delivery of medically necessary SBIRT. The plan must be completed at the time the client is admitted to the second session (referral). The plan must include the following:
  - Real-life goals expected
  - Strategies to achieve the goals
  - Support system such as family members, a legal guardian, friends, or anyone the client identifies as important to them, who can help the client achieve their goals
  - A mechanism for following up with the client to ensure that the client keeps appointments for additional sessions

The provider who performed the screening must document that a follow-up appointment was made for a subsequent session.

If inappropriate payments are identified on retrospective review for any provider, the payments will be recouped.

7.7 Claims Filing and Reimbursement

SBIRT services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a CMS-1500 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to:
Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Texas Medicaid rates for Hospitals are calculated according to 1 TAC §355.8061.

According to 1 TAC §355.8091, the Medicaid rate for LCSWs, LMFTs, and LPCs is 70 percent of the rate paid to a psychiatrist or psychologist for a similar service per 1 TAC §355.8085.

The Medicaid rates for psychologists are calculated in accordance with 1 TAC §355.8081 and §355.8085.

Texas Medicaid rates for physicians and certain other practitioners are calculated in accordance with TAC §355.8085.
Texas Medicaid rates for Nurse Practitioners and Clinical Nurse Specialists are calculated in accordance with TAC §355.8281.

According to 1 TAC §355.8093, the Medicaid rate for PAs is 92 percent of the rate paid to a physician (MD or DO) for the same professional service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections. Services performed by a PA and billed under a physician’s or RHC’s provider identifier are reimbursed according to the Texas Medicaid Reimbursement Methodology (TMRM) for physician services.

Note: For more information about Texas Medicaid rates for the provider types above, refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied.

Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

Note: Certain rate reductions including, but not limited to, reductions by place of service, client type program, or provider specialty may not be reflected in the Adjusted Fee column.

8. SUBSTANCE USE DISORDER (SUD) SERVICES (ABUSE AND DEPENDENCE)

8.1 Overview

Treatment for SUD is a benefit of Texas Medicaid. SUD treatment services are age appropriate medical and psychotherapeutic services designed to treat a client’s substance use disorder and restore function. Services and provider requirements associated with this benefit are found in Texas Department of Insurance (TDI) regulations (28 TAC, part 1 subchapter 3 subcategory HH) and TAC §448.902 and must be strictly followed. Medical necessity for substance abuse services will be determined based on the TDI regulations and nationally recognized standards such as those from the American Society of Addiction Medicine (ASAM) or the Center for Substance Abuse Treatment (CSAT).

The following SUD services are a benefit of Texas Medicaid:

- Assessment by a CDTF for admission into a SUD treatment program.
- Detoxification services when provided in a general acute care hospital, residential, or ambulatory CDTF setting.
  
  Note: Crisis stabilization is not a component of detoxification. Crisis stabilization for a mental health condition may be provided as needed when the service is medically necessary and the clinical criteria for psychiatric care are met.
- Residential SUD treatment services.
- Ambulatory SUD treatment services provided by a CDTF.
- Medicaid assisted therapy (MAT) in an outpatient setting.

SUD services provided by a CDTF are limited to those provided by facilities that are licensed and regulated by DSHS to provide SUD services within the scope of that facility’s DSHS license.

Intensive outpatient (IOP) services are ambulatory outpatient services that are provided by CDIF providers.

IOP services are benefits of Texas Medicaid. IOP services are available to clients of all ages and include a maximum of 135 hours of group counseling and 26 hours of individual counseling per calendar year.
The modifiers listed in the following table must be used in the appropriate combination for SUD services to identify the services performed:

<table>
<thead>
<tr>
<th>Modifiers</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>HF</td>
<td>Use to identify a substance abuse program in a facility</td>
</tr>
<tr>
<td>HG</td>
<td>Use to identify an opioid addiction treatment program</td>
</tr>
<tr>
<td>UA</td>
<td>Use to identify supervised administered dosing</td>
</tr>
<tr>
<td>U1</td>
<td>Use to identify unsupervised dosing</td>
</tr>
</tbody>
</table>

### 8.2 Enrollment

#### 8.2.1 CDTFs

Only CDTFs licensed by DSHS are eligible to enroll and participate in Texas Medicaid. Each facility must submit a copy of its DSHS license with the enrollment packet. Facilities that are maintained or operated by the federal government or directly operated by the state of Texas are exempt from the licensing requirements.

*Refer to:* Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for information on the provider enrollment process.

### 8.3 Assessment

Clients must be assessed by a Medicaid-enrolled CDTF for treatment services to begin. Clients who are in fee-for-service Medicaid can obtain their assessment from any Medicaid-enrolled CDTF.

CDTF assessment must be performed by a qualified credentialed counselor (QCC) (as defined by the DSHS licensure standard) to determine the severity of a client’s SUD and identify their treatment needs. Assessments are limited to once per episode of care. An assessment must be billed with procedure code H0001 and modifier HF.

Documentation of the QCC assessment must be maintained in the client’s medical record.

### 8.4 Detoxification Services

Detoxification services are a set of interventions aimed at managing acute physiological substance dependence. According to TAC §448.902 detoxification services include, but are not limited to, the following components:

- Evaluation
- Monitoring
- Medication
- Daily interactions

All clients who are admitted to a detoxification program must meet the current DSM criteria for physiological substance dependence and must meet the admission requirements based on a nationally-recognized standard.

#### 8.4.1 Ambulatory (Outpatient) Detoxification Services

Ambulatory (outpatient) detoxification is appropriate when the client’s medical needs do not require close monitoring.

Ambulatory (outpatient) detoxification is not a stand-alone service and must be provided in conjunction with ambulatory (outpatient) substance abuse treatment services.
Ambulatory (outpatient) detoxification services must be billed with procedure codes H0016, H0050, or S9445 and modifier HF.

**8.4.2 Residential Detoxification Services**

Residential detoxification is appropriate when the client’s medical needs do not warrant an acute inpatient hospital admission, but the severity of the anticipated withdrawal requires close monitoring. The assessment by a CDTF is required before services begin; however, if the client’s condition is such that a comprehensive assessment cannot be completed, it is appropriate to conduct an abbreviated assessment on admission. The full assessment must be completed within 24 hours of admission.

Residential detoxification services must be billed with procedure codes H0012, H0031, H0047, S9445, or T1007 and modifier HF.

Medically-supervised hospital inpatient detoxification is appropriate when one of the following criteria is met:

- The client has complex medical needs or complicated comorbid conditions that necessitate hospitalization for stabilization.
- The services that are provided to a client are incidental to other medical services that are provided as a component of an acute care hospital stay.

**8.5 Treatment Services**

Treatment services may be provided by a CDTF in a residential facility or as an ambulatory (outpatient) service.

*Note:* MAT is recognized as a separately identifiable service in the ambulatory (outpatient) setting and may be provided during the treatment period in conjunction with other ambulatory (outpatient) treatment services.

**8.5.1 Residential Treatment Services**

Residential treatment services include counseling and psycho-education and must be billed with procedure codes H0047 and H2035 and modifier HF.

**8.5.2 Ambulatory (Outpatient) Treatment Services**

Ambulatory (outpatient) treatment services must be billed with procedure codes H0004 or H0005 and modifier HF.

Procedure codes H0004 and H0005 are limited to the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>29181</td>
</tr>
<tr>
<td>30430</td>
</tr>
<tr>
<td>30570</td>
</tr>
</tbody>
</table>

**8.5.3 Physician Services**

Physician services may be reimbursed separately using the appropriate E/M procedure codes.

**8.6 Medication Assisted Therapy (MAT)**

MAT may be a benefit of Texas Medicaid when using a drug or biological recognized in the treatment of SUD and provided as a component of a comprehensive treatment program per TAC §448.902, or as a conjunctive treatment regimen for individuals addicted to abusable substances who meet the current DSM criteria for a SUD.
MAT is considered part of detoxification (residential and ambulatory outpatient) and residential treatment except for the following:

- Pregnant women with an opioid addiction
- Clients in current treatment for an opioid addiction who also have a substance addiction to another substance other than opioids

Documentation requirements supporting the medical necessity for MAT must be maintained in the client’s medical record according to the requirements in Federal Regulation 42 CFR §8. MAT must be performed by a physician; however, the physician may delegate this responsibility to other licensed personnel under his supervision. Documentation must include the name and title of the physician performing or delegating other MAT services. The client’s medical records are subject to retrospective review.

Clients who are 18 years of age and younger may not be admitted to a narcotic maintenance program unless a parent, legal guardian, or responsible adult designated by the relevant state authority consents in writing to such treatment. To be eligible for narcotic maintenance treatment, clients who are 18 years of age and younger must have had two documented attempts at short-term detoxification or drug-free treatment. A waiting period of no less than seven days is required between the first and the second short-term detoxification treatment.

Every exception to the general age requirement must be clinically justified and documented by a QCC. The facility must maintain the supporting documentation, including the QCC admission approval in the client’s medical record.

MAT for the treatment of opioid addiction must comply with the requirements in Federal Regulation 42 CFR §8.

Refer to: Subsection 8.9.3, "MAT Services" in this handbook for more information on claims filing.

8.7 Prior Authorization

The following services do not require prior authorization:

- Assessment
- Ambulatory (outpatient) treatment services
- MAT
- Inpatient hospital detoxification for fee-for-service clients in a general acute care facility

The following services require prior authorization:

- Ambulatory (outpatient) detoxification services
- Ambulatory (outpatient) treatment for clients who are 20 years of age and younger and who exceed the benefit limitation of 135 hours of group service and 26 hours of individual services per calendar year
- Residential detoxification services
- Residential treatment services

Providers must submit the appropriate prior authorization request form for the initial or continuation of ambulatory (outpatient) or residential detoxification treatment and residential treatment services. A physician (who does not need to be affiliated with the CDTF) must complete and sign the Ambulatory (Outpatient) Substance Abuse Extension Request Form. A QCC (as defined by the DSHS licensure standard) must complete and sign the other prior authorization request forms listed below.
Providers must submit one of the following forms to obtain prior authorization:

- Ambulatory (Outpatient) Detoxification Authorization Request Form
- Ambulatory (Outpatient) Substance Abuse Counseling Extension Request Form
- Residential Detoxification Authorization Request Form
- Residential Substance Abuse Treatment Authorization Request Form

Prior authorization for ambulatory and residential detoxification services will not be issued for clients who are 12 years of age or younger unless the request is accompanied by a waiver from DSHS Regulatory and Licensing Division.

Prior authorization will be considered for the least restrictive environment appropriate to the client’s medical need as determined in the client’s plan of care (POC), based on national standards.

Prior authorization requests for clients who are 20 years of age and younger for services beyond the limitations outlined in this section, may be considered with documentation from a physician (who does not need to be affiliated with the CDTF) supporting the medical necessity for continuation of the treatment.

8.7.1 Prior Authorization for Fee-for-Service Clients

Prior authorization requests for fee-for-service clients may be submitted to the TMHP Prior Authorization Unit online at www.tmhp.com, by fax at (512) 514-4211, or by mail to:

Texas Medicaid & Healthcare Partnership
TMHP Prior Authorization Department
12357-B Riata Trace Parkway, Suite 100
Austin, TX 78727

Providers may contact the TMHP Prior Authorization Unit by telephone at 1-800-213-8877, Option 2, to obtain information about substance use disorder benefits, the prior authorization process, or the status of a prior authorization request. Prior authorization for substance use disorder services cannot be obtained through this line.

Prior authorization for ambulatory (outpatient) detoxification, residential treatment, or residential detoxification services may be considered when requested within three business days after the date of admission.

8.7.2 Prior Authorization for Ambulatory (Outpatient) Detoxification Treatment Services

Ambulatory (outpatient) detoxification services may be prior authorized for up to 21 days. The level of service and number of days that are prior authorized will be based on the substances that are abused, level of intoxication and withdrawal potential, and the client’s medical needs.

8.7.2.1 Admission Criteria for Ambulatory (Outpatient) Detoxification Treatment Services

To be considered eligible for treatment for ambulatory detoxification services, the client must meet the following conditions:

Chemical Substance Withdrawal
The client must meet all of the following criteria with regard to chemical substance withdrawal:

- The client is expected to have a stable withdrawal from alcohol or drugs.
- The diagnosis must meet the criteria for the definition of substance (chemical) dependence, as detailed in the most current revision of the ICD-9-CM, or the most current revision of the Diagnostic and Statistical Manual for Professional Practitioners, accompanied by evidence that some of the symptoms have persisted for at least one month or have occurred repeatedly over a longer period of time.
Medical Functioning
The client must meet all of the following criteria with regard to medical functioning:

- No history of recent seizures or past history of seizures during withdrawal.
- No clinical evidence of altered mental state as manifested by disorientation to self, alcoholic hallucinations, toxic psychosis, or altered level of consciousness (clinically significant obtundation, stupor, or coma).
- The symptoms are due to withdrawal and not due to a general medical condition. Absence of any presumed new asymmetric or focal findings (i.e., limb weakness, clonus, spasticity, unequal pupils, facial asymmetry, eye ocular movement paresis, papilledema, or localized cerebellar dysfunction, as reflected in asymmetrical limb coordination).
- Stable vital signs as interpreted by a physician. The client must also be without a previous history of complications from acute chemical substance withdrawal and judged to be free of a health risk as determined by a physician.
- No evidence of a coexisting serious injury or systemic illness either newly discovered or progressive in nature.
- Absence of serious disulfiram-alcohol (Antabuse) reaction with hypothermia, chest pains, arrhythmia, or hypotension.
- Clinical condition that allows for a comprehensive and satisfactory assessment.

Family, Social, or Academic Dysfunction
The client must meet at least one of the following criteria with regard to family, social, or academic dysfunction:

- The client’s social system and significant others are supportive of recovery to the extent that the client can adhere to a treatment plan and treatment service schedules without substantial risk of reactivating the client’s addiction.
- The client’s family or significant others are willing to participate in the ambulatory (outpatient) detoxification treatment program.
- The client may or may not have a primary or social support system to assist with immediate recovery, but the client has the social skills to obtain such a support system or to become involved in a self-help fellowship.
- The client does not live in an environment where licit or illicit mood altering substances are being used. A client living in an environment where licit or illicit mood altering substances are being used may not be a candidate for this level of care.

Emotional and Behavioral Status
The client must meet all of the following criteria with regard to emotional and behavioral status:

- Client is coherent, rational, and oriented for treatment.
- The mental state of the client does not preclude the client’s ability to comprehend and understand the materials presented, and the client is able to participate in the ambulatory (outpatient) detoxification treatment process.
- Documentation exists in the medical record that the client expresses an interest to work toward ambulatory (outpatient) detoxification treatment goals.
- Client has no neuropsychiatric condition that places the client at imminent risk of harming self or others (e.g. pathological intoxication or alcohol idiosyncratic intoxication).
• Client has no neurological, psychological, or uncontrolled behavior that places the client at imminent risk of harming self or others (depression, anguish, mood fluctuations, overreactions to stress, lower stress tolerance, impaired ability to concentrate, limited attention span, high level of distractibility, negative emotions, or anxiety).

• Client has no documented DSM-IV Axis I condition or disorder that, in combination with alcohol or drug use, compounds a pre-existing or concurrent emotional or behavioral disorder and presents a major risk to the client.

• The client has no mental confusion or fluctuating orientation.

Chemical Substance Use
The client must meet the criteria in at least one of the following conditions with regard to recent chemical substance use:

• The client’s chemical substance use is excessive, and the client has attempted to reduce or control it but has been unable to do so (as long as chemical substances are available).

• The client is motivated to stop using alcohol or drugs and is in need of a supportive, structured treatment program to facilitate withdrawal from chemical substances.

8.7.2.2 Continued Stay Criteria for Ambulatory (Outpatient) Detoxification Treatment Services
A client is considered eligible for continued stay in the ambulatory (outpatient) detoxification treatment service when the client meets at least one of the conditions for either chemical substance withdrawal or psychiatric or medical complications. Requests for continuation of services must be received on or before the last date authorized or denied. The prior authorization unit will notify the provider by fax. If the date of the prior authorization unit determination letter is on or after the last date authorized or denied, the request for continuation of services is due by 5 p.m. of the next business day.

Chemical Substance Withdrawal
The client must meet at least one of the following conditions with regard to chemical substance withdrawal complications:

• The client, while physically abstinent from chemical substance use, is exhibiting incomplete stable withdrawal from alcohol or drugs, as evidenced by psychological and physical cravings.

• The client, while physically abstinent from chemical substance use, is exhibiting incomplete stable withdrawal from alcohol or drugs, as evidenced by significant drug levels.

Psychiatric or Medical Complications
The client must meet the following condition:

• Documentation in the medical record indicates an intervening medical or psychiatric event that was serious enough to interrupt ambulatory (outpatient) detoxification treatment, but also that the client is again progressing in treatment.

8.7.3 Prior Authorization for Residential Detoxification Treatment Services
Detoxification services may be prior authorized for up to 21 days. The level of service and number of prior authorized days will be based on the substances that are abused, level of intoxication and withdrawal potential, and the client’s medical needs.

Requests for detoxification services for clients who are 20 years of age and younger and who need more than 21 days of residential detoxification require Medical Director review with documentation of medical necessity from a physician who is familiar with the client.
**8.7.3.1 Admission Criteria for Residential Detoxification Treatment Services**

Clients are eligible for admission to a residential detoxification service when they have failed two previous individual treatment episodes of ambulatory (outpatient) detoxifications or when they have a diagnosis that meets the criteria for the definition of chemical dependence, as detailed in either the most current revision of the ICD-9-CM, or the most current revision of the *Diagnostic and Statistical Manual for Professional Practitioners*.

In addition, the client must meet at least one of the following criteria for chemical substance withdrawal, major medical complication, or major psychiatric illness for admission to residential treatment for detoxification:

**Chemical Substance Withdrawal**

- Impaired neurological functions as evidenced by:
  - Extreme depression (e.g., suicidal).
  - Altered mental state with or without delirium as manifested by disorientation to self; alcoholic hallucinosis, toxic psychosis, altered level of consciousness, as manifested by clinically significant obtundation, stupor, or coma.
  - History of recent seizures or past history of seizures on withdrawal.
  - The presence of any presumed new asymmetric or focal findings (i.e., limb weakness, clonus, spasticity, unequal pupils, facial asymmetry, eye ocular movement paresis, papilledema, or localized cerebellar dysfunction, as reflected in asymmetrical limb incoordination).
  - Unstable vital signs combined with a history of past acute withdrawal syndromes that are interpreted by a physician to be indication of acute alcohol or drug withdrawal.
  - Evidence of coexisting serious injury or systemic illness, newly discovered or progressive.
  - Clinical condition (e.g., agitation, intoxication, or confusion) that prevents satisfactory assessment of the above conditions and indicates placement in residential detoxification service may be justified.
  - Neuropsychiatric changes of such severity and nature that they put the client at imminent risk of harming self or others (e.g., pathological intoxication or alcohol idiosyncratic intoxication, etc.).
  - Serious disulfiram-alcohol (Antabuse) reaction with hypothermia, chest pains, arrhythmia, or hypotension.

**Major Medical Complications**

The client must meet the following condition with regard to major medical complications:

- The individual must present a documented condition or disorder that, in combination with alcohol or drug use, presents a determined health risk (e.g., gastrointestinal bleeding, gastritis, severe anemia, uncontrolled diabetes mellitus, hepatitis, malnutrition, cardiac disease, hypertension, etc.).

**Major Psychiatric Illness**

The client must meet at least one of the following conditions with regard to major psychiatric illness:

- Documented DSM III-R AXIS I condition or disorder that, in combination with alcohol or drug use, compounds a pre-existing or concurrent emotional or behavioral disorder and presents a major risk to the individual.
- Severe neurological and psychological symptoms: (e.g., anguish, mood fluctuations, overreactions to stress, lowered stress tolerance, impaired ability to concentrate, limited attention span, high level of distractibility, extreme negative emotions, or extreme anxiety).
• Danger to others or homicidal.
• Uncontrolled behavior that endangers self or others, or documented neuropsychiatric changes of a severity and nature that place the individual at imminent risk of harming self or others.
• Mental confusion or fluctuating orientation.

8.7.3.2 Continued Stay Criteria for Residential Detoxification Treatment Services
Eligibility for continued stay for residential detoxification services is based on the client meeting at least one of the criteria for chemical substance withdrawal, major medical complications, or major psychiatric complications.

Chemical Substance Withdrawal
The client must exhibit one of the following conditions with regard to chemical substance withdrawal complications:
• Incomplete medically stable withdrawal from alcohol or drugs, as evidenced by documentation of at least one of the following conditions:
  • Unstable vital signs
  • Continued disorientation
  • Abnormal laboratory findings related to chemical dependency
  • Continued cognitive deficit related to withdrawal so that the client is unable to recognize alcohol or drug use as a problem
  • Laboratory finding that, in the judgment of a physician, indicates that a drug has not sufficiently cleared the client’s system

Major Medical Complications
The client must meet the following condition with regard to major medical complications:
• Documentation in the medical record must indicate that a medical condition or disorder (e.g., uncontrolled diabetes mellitus) continues to present a health risk and is actively being treated.

Major Psychiatric Complications
The client must meet at least one of the following with regard to major psychiatric complications:
• Documentation in the medical record that a DSM III-R AXIS I psychiatric condition or disorder that, in combination with alcohol or drug use, continues to present a major health risk, is actively being treated.
• Documentation in the medical record that severe neurological or psychological symptoms have not been satisfactorily reduced but are actively being treated.

8.7.4 Prior Authorization for Residential Treatment Services
Residential treatment may be prior authorized for up to 35 days per episode of care, with a maximum of two episodes of care per rolling six-month period, and four episodes of care per rolling year.

8.7.4.1 Admission Criteria for Residential Treatment Services
The diagnosis must meet the criteria for the definition of chemical dependence, as detailed in the most current revision of the ICD-9-CM, or the most current revision of the Diagnostic and Statistical Manual for Professional Practitioners, accompanied by evidence that some of the symptoms have persisted for at least one month or have occurred repeatedly over a longer period of time.
Clients must meet the following conditions in order to receive treatment in a residential treatment service program:

**Medical Functioning**
The following must be present with regard to medical functioning:

- Documented medical assessment following admission (except in instances where the client is being referred from an inpatient service) indicates that the client is medically stable and not in acute withdrawal.
- The client is not bed-confined and has no medical complications that would hamper participation in the residential service.

**Family, Social, or Academic Dysfunction and Logistic Impairments**
At least one of the following must be present with regard to family, social, or academic dysfunction and logistic impairments:

- The client manifests severe social isolation or withdrawal from social contacts.
- The client lives in an environment (social and interpersonal network) in which treatment is unlikely to succeed (e.g., a chaotic family dominated by interpersonal conflict, which undermines client’s efforts to change).
- Client’s family or significant others are opposed to the client’s treatment efforts and are not willing to participate in the treatment process.
- Family members or significant others living with the client manifest current chemical dependence disorders and are likely to undermine treatment.
- Logistic impairments (e.g., distance from treatment facility or mobility limitations) preclude participation in a partial hospitalization or ambulatory (outpatient) treatment service.

**Emotional and Behavioral Status**
The client must meet all three of the following criteria with regard to emotional and behavioral status:

- Client is coherent, rational, and oriented for treatment.
- Mental state of the client does not preclude the client’s ability to comprehend and understand the materials presented and participate in rehabilitation or the treatment process.
- The medical record contains documentation that with continued treatment the client will be able to improve or internalize the client’s motivation toward recovery within the recommended length of stay time frames (e.g., becoming less defensive, verbalizing, and working on alcohol or drug related issues). Interventions, treatment goals, or contracts are in place to help the client deal with or confront the blocks to treatment (e.g., family intervention or employee counseling confrontation).

**Chemical Substance Use**
The client must meet at least one of the following criteria with regard to chemical substance use:

- The client’s chemical substance use is excessive, and the client has attempted to reduce or control it but has been unable to do so (as long as chemical substances are available).
- Virtually all of the client’s daily activities revolve around obtaining, using, or recuperating from the effects of chemical substances, and the client requires a secured environment to control the client’s access to chemical substances.
8.7.4.2 Residential Treatment Services for Adolescents

Clients who are 13 through 17 years of age must meet all above conditions and the following conditions in order to receive treatment in an adolescent residential treatment service program.

- At the maturation level, the adolescent client must meet both of the following criteria:
  - The client is assessed as manifesting physical maturation at least in middle adolescent range (i.e., post-pubescent; not growth-retarded).
  - The history of the adolescent reflects cognitive development of at least 11 years of age.
- The adolescent client must display at least one of the following with regard to developmental status:
  - Documented history of inability to function within the expected age norms despite normal cognitive and physical maturation (e.g., refusal to interact with family members, overt prostitution, felony, or other criminal charges).
  - A recent history of moderate to severe conduct disorder, as defined in the Diagnostic and Statistical Manual for Professional Practitioners, or impulsive disregard for social norms and rights of others.
  - Documented difficulty in meeting developmental expectations in a major area of functioning (e.g., social, academic, or psychosexual) to an extent that interferes with the capacity to remain behaviorally stable.

8.7.4.3 Continued Stay Criteria for Residential Treatment Services

At least one of the following conditions must be present for continued stay in a residential treatment program:

Chemical Dependency Rehabilitation or Treatment Complications

- The client recognizes or identifies with the severity of the alcohol or drug problem but demonstrates minimal insight into the client’s defeating the use of alcohol or drugs. However, documentation in the medical record indicates that the client is progressing in treatment; or
- The client identifies with the severity of the alcohol or drug problem and manifests insight into the client’s personal relationship with mood-altering chemicals, yet does not demonstrate behaviors that indicate the development of problem-solving skills that are necessary to cope with the problem; and
- The client would predictably relapse if moved to a lesser level of care.

Psychiatric or Medical Complications:

- Documentation in the medical record indicates an intervening medical or psychiatric event that was serious enough to interrupt rehabilitation or treatment, but the client is again progressing in treatment.
- Documentation in the medical record indicates that the client is being held pending an immediate transfer to a psychiatric, acute medical service, or inpatient detoxification alcohol or drug service.

8.7.5 Prior Authorization for Ambulatory (Outpatient) Treatment Services for Clients Who Are 20 Years of Age and Younger

Prior authorization for ambulatory (outpatient) treatment services beyond the annual limitation of 135 hours of group services and 26 hours of individual services per calendar year, may be considered for clients who are 20 years of age and younger with documentation from a physician (who does not need to be affiliated with the CDTF) of the supporting medical necessity for continued treatment services.
Requests must be submitted before providing the extended services. The documentation must include the following information:

- The client is meeting treatment goals.
- The client demonstrates insight and understanding into relationship with mood altering chemicals, but continues to present with issues addressing the life functions of work, social, or primary relationships without the use of mood-altering chemicals.
- And one of the following:
  - Although physically abstinent from chemical substance use, the client remains mentally preoccupied with such use to the extent that the client is unable adequately to address primary relationships or social or work tasks. Nevertheless, there are indications that, with continued treatment, the client will effectively address these issues.
  - Although other psychiatric or medical complications exist that affect the client’s treatment, documentation exists that the client continues to show treatment progress and that there is evidence to support the benefits of continued treatment.

**8.8 Documentation Requirements**

All services require documentation to support the medical necessity of the service rendered, including SUD services.

All SUD services are subject to retrospective review. All documentation must be maintained in the client’s medical record and be made available upon request.

**8.9 Reimbursement and Limitations**

**8.9.1 Detoxification Services**

Inpatient detoxification is reimbursed by the reimbursement methodology specific to the inpatient hospital. Separate reimbursement may be provided for physician services performed during an inpatient stay.

Residential detoxification and treatment services are considered outpatient services for the purposes of reimbursement and should be billed accordingly.

Residential detoxification (procedure codes H0012, H0031, S9445, and T1007) are limited to once per day.

Residential detoxification (procedure codes H0031, H0047, S9445, or T1007) will be denied if billed without procedure code H0012.

Room and board for residential detoxification and treatment (procedure code H0047) is limited to once per date of service. Procedure code H0047 is reimbursed for clients who are 21 years of age and older as an access-based fee, and as an informational detail for clients who are 20 years of age and younger.

Ambulatory (outpatient) detoxification (procedure codes H0016, H0050, and S9445) are limited to once per day and may be reimbursed on the same date of service as ambulatory (outpatient) SUD treatment by the same or different provider when medically necessary and identified in the client’s treatment plan. For services rendered in the CDTF setting, providers must use the HF modifier.

Ambulatory (outpatient) detoxification (procedure codes H0050 and S9445) will be denied if billed without procedure code H0016.

Separate reimbursement may be provided for physician services during a residential stay.
8.9.2 Treatment Services
Ambulatory (outpatient) treatment (procedure codes H0004 and H0005) is reimbursed at a time-based rate.

Ambulatory (outpatient) treatment services are limited to 135 hours of group counseling and 26 hours of individual counseling per calendar year when provided by a CDTF.

Residential treatment services (procedure code H2035) are limited to one per day and are allowed up to a maximum of 35 days.

Ambulatory (outpatient) treatment (procedure codes H0004 and H0005) will be denied if billed on the same date of service as residential detoxification (procedure codes H0012, H0031, H0047, and T1007) or residential treatment (procedure code H2035).

Procedure code H0047 will be denied if billed without procedure code H2035.

8.9.3 MAT Services
MAT may be considered for reimbursement on appeal on the same date of service as residential detoxification, ambulatory (outpatient) detoxification, or residential treatment services. For the claim to be considered, providers must:

- Submit supporting documentation that indicates one of the following:
  - The client is a pregnant woman with an opioid addiction.
  - The client is in current MAT treatment for an opioid addiction and is also receiving residential services for a substance other than opioids.
- Submit one of each of the following diagnosis codes (opioid, non-opioid, and pregnancy diagnoses) on the claim:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Opioid Diagnoses</strong></td>
</tr>
<tr>
<td>30400</td>
</tr>
<tr>
<td>30552</td>
</tr>
<tr>
<td><strong>Non-opioid/Pregnancy Diagnoses</strong></td>
</tr>
<tr>
<td>30390</td>
</tr>
<tr>
<td>30422</td>
</tr>
<tr>
<td>30460</td>
</tr>
<tr>
<td>64830</td>
</tr>
</tbody>
</table>

Claims billed for MAT must include the client’s substance use disorder diagnosis.

Procedure codes H0020 or H2010 will be denied if a claim is submitted for the same date of service as procedure codes H0012, H0016, H0031, H0047, H0050, H2035, S9445, or T1007.

Methadone administration (procedure code H0020) for opioid addiction must be submitted with the following modifiers:

- When methadone is administered with supervision in a facility the provider must submit claims using the UA modifier to indicate the facility administered doses
- When methadone is dispensed without supervision as a take home dose the provider must submit claims using the U1 modifier to indicate take home doses
Methadone administration (procedure code H0020) with modifier U1 for unsupervised take home doses must be submitted on the same claim and with the same date of service as methadone administration (procedure code H0020) with modifier UA for supervised facility doses or the take home doses will be denied.

MAT provided in an ambulatory (outpatient) setting (procedure code H0020) is limited to once per date of service, except for unsupervised take home doses (U1 modifier), by any provider and is reimbursed at a fixed daily rate.

Methadone administration (procedure code H0020) submitted without a modifier will be denied.

Non-methadone (e.g., buprenorphine) administration (procedure code H2010) for opioid addiction must be submitted with the following modifiers:

- When non-methadone is administered with supervision in a facility the provider must submit claims using the modifier combination of HG and UA to indicate opioid addiction treatment facility doses or claims will be denied
- When non-methadone is dispensed without supervision as a take home dose the provider must submit claims using the modifier combination of HG and U1 to indicate opioid addiction take home doses or claims will be denied

MAT provided in an ambulatory (outpatient) setting (procedure code H2010 with modifier HG and procedure code H2010 with modifier HF), is limited to once per date of service, except for unsupervised take home doses (U1 modifier), by any provider.

Non-methadone administration (procedure code H2010-HG) with modifier U1 for unsupervised take home doses must be submitted on the same claim and with the same date of service as non-methadone administration (procedure code H2010-HG) with modifier UA for supervised facility doses or the take home doses will be denied.

When non-methadone is administered in a facility for a non-opioid treatment, providers must use procedure code H2010 with the HF modifier to indicate non-opioid treatment in a facility.

Non-methadone administration (procedure code H2010) submitted without a modifier will be denied. Physician services may be reimbursed separately using the appropriate evaluation and management procedure codes.

Injectable administration is considered part of MAT and is not reimbursed separately. Procedure code 96372 will be denied when billed for the same date of service by any provider as procedure code H0020 or H2010.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied.

Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

Note: Certain rate reductions including, but not limited to, reductions by place of service, client type program, or provider specialty may not be reflected in the Adjusted Fee column.

8.10 Noncovered Services

The following SUD services are not a benefit of Texas Medicaid:

- Aftercare
- Occupational therapy as part of a residential detoxification or treatment program
- Services for which the client fails to meet the treatment eligibility or authorization criteria, or which are not clinically appropriate in the setting requested based on the client’s medical condition
• Services for tobacco and caffeine addiction
• Detoxification services and MAT for hashish or marijuana addiction
• Detoxification with an opioid when the client has had two or more unsuccessful opioid detoxification episodes (has left the program against medical advice) within a 12-month period (see 42 CFR Section 8)
• Detoxification or substance abuse counseling services provided by electronic means such as telemedicine, email, or telephone

8.11 Claims Filing

Claims for SUD services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a CMS-1500 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

9. CLAIMS RESOURCES

</tbody>
</table>

For admission complete all sections except section VI

### II. Criteria for Admission

- The individual is expected to have a stable withdrawal from alcohol/drugs: Yes ☐ No ☐
- No history of recent seizures or past history of seizures on withdrawal: Yes ☐ No ☐
- Disorientation to self: Yes ☐ No ☐
- Alcoholic hallucinosis: Yes ☐ No ☐
- Toxic psychosis: Yes ☐ No ☐

### III. Family, social, academic dysfunction

- Client’s social system/significant others are supportive of recovery to the extent that the client can adhere to a treatment plan and treatment service schedules without substantial risk of reactivating the client’s addiction: Yes ☐ No ☐
- Client has the social skills to obtain such a support system and/or to become involved in a self-help fellowship: Yes ☐ No ☐

### IV. Emotional/behavioral status

- Client is coherent, rational and oriented for treatment: Yes ☐ No ☐
- Client expresses an interest to work toward detoxification treatment goals: Yes ☐ No ☐
- Client has no neurological, psychological, or uncontrolled behavior that places the individual at imminent risk of harming self or others: Yes ☐ No ☐

### V. Recent chemical substance use

- Client's chemical substance use is excessive, and the client has attempted to reduce or control it, but has been unable to do so: Yes ☐ No ☐

### VI. Continued Stay Criteria for Ambulatory Detoxification (Complete only sections I, VI, VII and VIII if additional detoxification days are needed)

- Client, while physically abstinent from chemical substance use, exhibits incomplete stable withdrawal from alcohol/drugs, evidenced by psychological and physical cravings: Yes ☐ No ☐
- Client, while physically abstinent from chemical substance use, is exhibiting incomplete stable withdrawal from alcohol/drugs, as evidenced by significant drug levels: Yes ☐ No ☐
- Documentation in the medical record indicates an intervening medical or psychiatric event which was serious enough to interrupt ambulatory detoxification treatment, but the client is again progressing in treatment: Yes ☐ No ☐

### VII. Diagnosis (DSM):

<table>
<thead>
<tr>
<th>Axis I:</th>
<th>Axis II:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Axis III:</td>
<td>Axis IV:</td>
</tr>
<tr>
<td>Axis V: (GAF)</td>
<td></td>
</tr>
</tbody>
</table>

### VIII. Number of detoxification days requested:

<table>
<thead>
<tr>
<th>Dates Requested: from / / / to / / /</th>
</tr>
</thead>
</table>

QCC Signature: [Signature]

Provider license number
### I. Identifying Information  
*(Extensions are limited to clients who are 20 years of age or younger)*

<table>
<thead>
<tr>
<th>Client Name</th>
<th>Last:</th>
<th>First:</th>
<th>Middle Initial:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Medicaid Number:</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Date submitted:</td>
<td>/</td>
<td>/</td>
<td></td>
</tr>
<tr>
<td>Date of birth:</td>
<td>/</td>
<td>/</td>
<td>Age:</td>
</tr>
<tr>
<td>Sex:</td>
<td></td>
<td></td>
<td>Date of admission:</td>
</tr>
</tbody>
</table>

### CDTF Information

<table>
<thead>
<tr>
<th>Facility Name:</th>
<th>Contact Person:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Address:</td>
<td></td>
</tr>
<tr>
<td>Phone:</td>
<td>Fax:</td>
</tr>
</tbody>
</table>

### II. Client is meeting treatment goals: Yes ☐ No ☐

The client demonstrates an insight and understanding into relationship with mood altering chemicals, but continues to present with issues addressing the life functions of work, social, or primary relationship without the use of mood-altering chemicals:

Yes ☐ No ☐

Client is physically abstinent from chemical substance use, but remains mentally preoccupied with such use to the extent that the client is unable to adequately address primary relationships, or social or work tasks, but there are indications that, with continued treatment, the client will effectively address these issues:

Yes ☐ No ☐

### III. Psychiatric or medical complications that affect the client’s treatment, but the client continues to show treatment progress and there is evidence to support the benefits of continued treatment.
*(Required only if ‘No’ is checked to any question in section II)*

<table>
<thead>
<tr>
<th>Axis I:</th>
<th></th>

## II. Factors for Admission (for admission complete all sections except section V)

| Impaired neurological functions / altered mental state as evidenced by: |
| Failure of two previous treatment episodes of outpatient detoxification: |
| Yes | No |
| Extreme depression: Yes | No |
| History of recent seizures or past history of seizures on withdrawal: |
| Yes | No |
| Disorientation to self: Yes | No |
| Presence of any presumed new asymmetric and/or focal findings: |
| Yes | No |
| Alcoholic hallucinosis: Yes | No |
| Unstable vital signs combined with a history of past acute withdrawal syndromes: Yes | No |
| Toxic psychosis: Yes | No |
| Clinical condition (e.g., agitation, intoxication, or confusion) which prevents satisfactory assessment: Yes | No |
| Altered level of consciousness: Yes | No |
| Serious disulfiram-alcohol (Antabuse) reaction with hypothermia, chest pains arrhythmia, or hypotension: Yes | No |

## III. Medical Complications (e.g., GI bleeding; gastritis; anemia, severe; diabetes mellitus, uncontrolled; hepatitis; malnutrition; cardiac disease, hypertension, etc.)

## IV. Psychiatric Symptoms

| Severe neurological and/or psychological symptoms: Yes | No |
| Danger to self or others: Yes | No |
| Mental confusion and/or fluctuating orientation: Yes | No |

## V. Continued Stay (complete only sections I, V, VI and VII if additional detoxification days are required)

| Unstable vital signs: Yes | No |
| Continued disorientation: Yes | No |
| Abnormal laboratory findings related to chemical dependency: Yes | No |
| Cognitive deficit related to withdrawal affecting the client's ability to recognize alcohol/drug use as a problem: Yes | No |
| Laboratory finding that a drug has not sufficiently cleared the client's system: Yes | No |
| Major medical complications continuing to present a health risk: |
| Major psychiatric complication continuing to present a health risk or severe neurological and/or psychological symptoms have not been satisfactorily reduced: |

## VI. Diagnosis (DSM):

II. Factors for Admission (For admission complete all sections except section IV)

- Client is medically stable and not in acute withdrawal: Yes ☐ No ☐
- Client is coherent, rational, and oriented for treatment: Yes ☐ No ☐
- Client is not bed-confined or has no medical complications that would hamper participation in the residential service: Yes ☐ No ☐
- Client manifests severe social isolation or withdrawal from social contacts: Yes ☐ No ☐
- Client lives in an environment (social and interpersonal network) in which treatment is unlikely to succeed: Yes ☐ No ☐
- Client recognizes/identifies with the severity of the alcohol/drug problem, but demonstrates minimal insight into defeating use of alcohol/drugs and the client is progressing in treatment: Yes ☐ No ☐
- Client identifies severity of alcohol/drug problem and manifests insight into relationship with mood-altering chemicals, yet does not demonstrate behaviors indicating problem solving skills necessary to cope with the problem: Yes ☐ No ☐
- Client would predictably relapse if moved to a lesser level of care: Yes ☐ No ☐
- Documentation in the medical record indicates an intervening medical or psychiatric event which was serious enough to interrupt rehabilitation/treatment, but the client is again progressing in treatment: Yes ☐ No ☐

III. Adolescent Clients Only

- Adolescent is assessed as manifesting physical maturation at least in middle adolescent range: Yes ☐ No ☐
- History of the adolescent reflects cognitive development of at least 11 years of age: Yes ☐ No ☐
- History of inability to function within the expected age norms despite normal cognitive and physical maturation: Yes ☐ No ☐
- Recent history of moderate/severe conduct disorder/impulsive disregard for social norms and rights of others: Yes ☐ No ☐
- Difficulty in meeting developmental expectations in a major area of functioning to an extent which interferes with the capacity to remain behaviorally stable: Yes ☐ No ☐

IV. Continued Stay (complete only sections I, IV, V and VI if additional residential days are required)

- Client recognizes/identifies with the severity of the alcohol/drug problem, but demonstrates minimal insight into defeating use of alcohol/drugs and the client is progressing in treatment: Yes ☐ No ☐
- Client identifies severity of alcohol/drug problem and manifests insight into relationship with mood-altering chemicals, yet does not demonstrate behaviors indicating problem solving skills necessary to cope with the problem: Yes ☐ No ☐
- Client would predictably relapse if moved to a lesser level of care: Yes ☐ No ☐
- Documentation in the medical record indicates an intervening medical or psychiatric event which was serious enough to interrupt rehabilitation/treatment, but the client is again progressing in treatment: Yes ☐ No ☐
- Documentation in the medical record indicates that the client is being held pending an immediate transfer to a psychiatric, acute medical service, or inpatient detoxification alcohol/drug service: Yes ☐ No ☐

V. Diagnosis (DSM):

CHILDREN’S SERVICES HANDBOOK

1. GENERAL INFORMATION

The information in this handbook is intended for dentists, school districts, physicians, physician assistants (PAs), rural health clinics (RHCs), federally qualified health centers (FQHCs), advanced practice registered nurses (APRNs), home health agencies (HHAs), durable medical equipment (DME) suppliers, hospitals, and clinics. The handbook provides information about Texas Medicaid’s benefits, policies, and procedures applicable to these providers.

Important: All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in 1 Texas Administrative Code (TAC) §371.1617(6)(A). Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.

All providers are required to report suspected child abuse or neglect as outlined in Subsection 1.6, “Provider Responsibilities” in Section 1, “Provider Enrollment and Responsibilities” (Vol 1, General Information).

1.1 Medical Transportation Program

The Medical Transportation Program (MTP) is funded with federal and state dollars to arrange nonemergency transportation to medical or dental appointments for eligible clients and their attendants.

Refer to: The Medical Transportation Program Handbook (Vol. 2, Provider Handbooks) for more information.

1.2 Rates Reduction

Texas Medicaid implemented mandated rate reductions for certain services. The Online Fee Lookup (OFL) and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the Texas Medicaid & Healthcare Partnership (TMHP) website at www.tmhp.com/pages/topics/rates.aspx.

1.3 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission

According to the three-day and one-day payment window reimbursement guidelines, most professional and outpatient diagnostic and nondiagnostic services that are rendered within the designated time frame of an inpatient hospital stay and are related to the inpatient hospital admission will not be reimbursed separately from the inpatient hospital stay if the services are rendered by the hospital or an entity that is wholly owned or operated by the hospital.

These reimbursement guidelines do not apply for FQHC, RHC, THSteps, and professional services that are rendered in the inpatient hospital setting.
Refer to: Subsection 3.6.3.8, “Payment Window Reimbursement Guidelines” of the Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks) for additional information about the payment window reimbursement guidelines.

2. MEDICAID CHILDREN’S SERVICES COMPREHENSIVE CARE PROGRAM (CCP)

2.1 CCP Overview

CCP is an expansion of the Early Periodic Screening, Diagnosis, and Treatment (EPSDT) service as mandated by the Omnibus Budget Reconciliation Act (OBRA) of 1989, which requires all states to provide all medically necessary treatment for correction of physical or mental problems to Texas Health Steps (THSteps)-eligible clients when federal financial participation (FFP) is available, even if the services are not covered under the state’s Medicaid plan.

The following CCP provider sections describe the specific requirements of each area of responsibility:

- Subsection 2.2, “Clinician-Directed Care Coordination Services (CCP)” in this handbook.
- Subsection 2.3, “Comprehensive Outpatient Rehabilitation Facilities (CORFs) and Outpatient Rehabilitation Facilities (ORFs)” in this handbook.
- Subsection 2.4, “Durable Medical Equipment (DME) Supplier (CCP)” in this handbook.
- Subsection 2.6, “Medical Nutrition Counseling Services (CCP)” in this handbook.
- Subsection 2.8, “Personal Care Services (PCS) (CCP)” in this handbook.
- Subsection 2.9, “Private Duty Nursing (PDN)(CCP)” in this handbook.
- Subsection 2.10, “Therapy Services (CCP)” in this handbook.
- Subsection 2.12, “Inpatient Rehabilitation Facility (Freestanding) (CCP)” in this handbook.

2.1.1 Client Eligibility

The client must be birth through 20 years of age and eligible for THSteps on the date of service. If the client’s Your Texas Benefits card states “Emergency Care,” “PE,” or “QMB,” the client is not eligible for CCP benefits.

Clients are ineligible for CCP services beginning the day of their 21st birthday.

2.1.2 Enrollment

CCP providers must meet Medicaid and Health and Human Services Commission (HHSC) participation standards to enroll in the program. All CCP providers must be enrolled in Texas Medicaid to be reimbursed for services. Provider enrollment inquiries and application requests must be sent to the TMHP Provider Enrollment department at:

Provider Enrollment
Texas Medicaid & Healthcare Partnership
PO Box 200555
Austin, TX 78720-0555
Home and community support services agencies (HCSSAs) that want to provide CCP private-duty nursing (PDN), occupational therapist, physical therapist, or speech therapist services under the licensed-only home health (LHH) category must first enroll with TMHP. To enroll with TMHP in the LHH category, an HCSSA must:

- Complete a provider enrollment form, which can be found on the TMHP website at www.tmhp.com, provide its license information, and check the “Only CCP services” box on the form.
- Obtain a Texas Provider Identifier (TPI) for CCP services.
- Provide PDN, occupational therapy (OT), physical therapy (PT), or speech therapy (ST) services only to eligible CCP clients and use the TPI number assigned for CCP services. Texas Medicaid home health services must be delivered under the licensed and certified home health (LCHH) category.

2.1.3 Services, Benefits, and Limitations

Payment is considered for any health-care service that is medically necessary and for which FFP is available. CCP benefits are allowable services not currently covered under Texas Medicaid (e.g., speech-language pathology [SLP] services for nonacute conditions, PDN, prosthetics, orthotics, apnea monitors and some DME, some specific medical nutritional products, medical nutrition services, inpatient rehabilitation, travel strollers, and special needs car seats). CCP benefits also include expanded coverage of current Texas Medicaid services where services are subject to limitations (e.g., diagnosis restrictions for total parenteral nutrition [TPN] or diagnosis restrictions for attendant care services).

Requests for services that require a prior authorization must be submitted to TMHP. Prior authorization is a condition for reimbursement, not a guarantee of payment. For information about specific benefits, providers can refer to provider-specific sections of this manual.

Payment cannot be made for any service, supply, or equipment for which FFP is not available. The following are some examples:

- Vehicle modification, mechanical, or structural (such as wheelchair lifts).
- Structural changes to homes, domiciles, or other living arrangements.
- Environmental equipment, supplies, or services, such as room dehumidifiers, air conditioners, filters, space heaters, fans, water purification systems, vacuum cleaners, and treatments for dust mites, rodents, and insects.
- Ancillary power sources and other types of standby equipment (except for technology-dependent clients such as those who are ventilator-dependent for more than six hours per day).
- Educational programs, supplies, or equipment (such as a personal computer or software).
- Equine or hippotherapy.
- Exercise equipment, home spas or gyms, toys, therapeutic balls, or tricycles.
- Tennis shoes.
- Respite care (relief to caregivers).
- Aids for daily living (toothbrushes, spoons, reachers, and foot stools).
- Take-home drugs from hospitals (Eligible hospitals may enroll in and bill Vendor Drug Program (VDP). Pharmacies that want to enroll should call (512) 491-1429.
- Therapy involving any breed of animal.
2.1.4 Prior Authorization and Documentation Requirements

Prior authorization is a condition for reimbursement; it is not a guarantee of payment. A prior authorization number (PAN) is a TMHP-assigned number establishing that a service or supply has been determined to be medically necessary and for which FFP is available. It is each provider’s responsibility to verify the client’s eligibility at the time each service is provided. Any service provided while the client is not eligible cannot be reimbursed by TMHP. The responsibility for payment of services is determined by private arrangements made between the provider and client.

Prior authorization of CCP services may be requested in writing by completing the appropriate request form, attaching any necessary supportive documentation, and mailing or faxing it to the TMHP-CCP department. Prior authorization may also be requested through the TMHP website. (Providers can refer to subsection 5.5.1, "Prior Authorization Requests Through the TMHP Website" in Section 5, “Prior Authorization” (Vol. 1, General Information) for additional information to include mandatory documentation and retention requirements). All requested information on the form must be completed, or the request is returned to the provider. Incomplete forms are not accepted. If prior authorization is granted, the potential service provider (such as the DME supplier, pharmacy, registered nurse (RN), or physical therapist) receives a letter that includes the PAN, the procedures prior authorized, and the length of the authorization. Providers are notified in writing when additional information is needed to process the request for services.

Providers must submit a CCP Prior Authorization Request Form and documentation to support medical necessity to the CCP department before providing services. Providers must submit the CCP Prior Authorization Request Form when requesting a medically necessary service if the service is not addressed in the Texas Medicaid Provider Procedures Manual and the client is 20 years of age or younger.

**Important:** Documentation to support medical necessity of the service, equipment, or supply (such as a prescription, letter, or medical records) must be current, signed, and dated by a physician (M.D. or D.O.) before services are performed. Providers must keep the information on file.

**Refer to:** CCP provider-specific sections for prior authorization requirements of specific services.

2.1.4.1 Diagnosis Coding

All providers must obtain the client’s medical diagnosis from the physician. This information must be reflected on each claim submitted to TMHP using International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM) coding.

2.1.4.2 Drug and Medical Device Approval

Manufacturers may request to have drug or medical device products added as a CCP benefit by sending the information in writing to the following address:

```
HHSC
1100 West 49th Street
Austin, TX 78756-3179
```

HHSC reviews the information. Requests for consideration must not be sent to TMHP.

2.1.4.3 Physician Signature

The dated signature of the physician (M.D. or D.O.) on a prescription or CCP Authorization Request Form must be current to the service date(s) of the request, i.e., the signature must always be on or before the service start date and no older than three months before the current date(s) of service requested. Physician signatures dated after the service start date on initial requests cannot be accepted as documentation supporting medical necessity for dates of service prior to the signature date. A request for prior authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply. If services begin as a result of a verbal order before the physician’s dated signature, proof of the verbal order must be submitted with the request.
Stamped signatures and dates are not accepted on CCP Authorization Request Forms or prescriptions for CCP prior authorized services, supplies, or equipment. Verbal orders must be cosigned and dated by a physician (M.D. or D.O.) within two weeks, per provider policy. Signatures of chiropractors or doctors of philosophy (PhDs) are not accepted on CCP Authorization Request Forms or prescriptions for CCP prior authorized services.

Certified nurse midwife (CNM), clinical nurse specialist (CNS), nurse practitioner (NP), and PA providers may sign on behalf of the physician for private duty nursing, physical, occupational and speech therapy services when the physician delegates this authority.

Physician prescriptions must be specific to the type of service requested. For example, if the provider is requesting PT, the prescription must request physical therapy, not just therapy.

2.2 Clinician-Directed Care Coordination Services (CCP)

2.2.1 Services, Benefits, and Limitations

Clinician-directed (physician, NP, CNS, and PA) care coordination services are a benefit of CCP for eligible clients who are birth through 20 years of age and have special health needs. These services are payable only to the clinician (primary care, specialist, or sub-specialist) who provides the medical home for the client.

To provide a medical home for the client, the primary care clinician directs care coordination together with the client and family. Care coordination consists of managing services and resources for clients with special health needs and their families to maximize the clients’ potential and provide them with optimal health care.

Clinician-directed care coordination services (face-to-face and non-face-to-face) must include the following components:

- A written care plan (either a formal document or documentation contained in the client’s progress notes) developed and revised by the medical home clinician, in partnership with the client, family, and other agreed-upon contributors. This plan is shared with other providers, agencies, and organizations involved with the care of the client, including educational and other community organizations with permission of the client or family. The care plan must be maintained by the medical home clinician and reviewed every six months or more frequently as necessary for the client’s needs.

- Care among multiple providers that are coordinated through the clinician.

- A central record or database maintained by the medical home clinician containing all pertinent medical information, including hospitalizations and specialty care.

- Assistance for the client or family in communicating clinical issues when a client is referred for a consultation or additional care, such as evaluation, interpretation, implementation, and management of the consultant recommendations for the client or family in partnership and collaboration with other providers, the client, or family.

Clinician-directed care coordination services must also include the supervision of the development and revision of the client’s emergency medical plan in partnership with the client, the family, and other providers for use by emergency medical services (EMS) personnel, utility service companies, schools, other community agencies, and caregivers.

Face-to-face care coordination services are encompassed within the various levels of evaluation and management (E/M) encounters and prolonged services.

Non-face-to-face clinician-directed care coordination services include:

- Prolonged services (procedure codes 99358 and 99359).

- Medical team conference (procedure code 99367).
• Care plan oversight and supervision, including telephone consultations with a specialist or subspecialist (procedure codes 99339, 99340, 99374, 99375, 99377, 99378, 99379, and 99380).
• Specialist or subspecialist telephone consultations (procedure code 99499 with modifier U9).

Non-face-to-face clinician-directed care coordination services are not considered case management by Texas Medicaid.

Specifically, non-face-to-face medical home clinician oversight and supervision of the development or revision of a client’s care plan may include the following activities, which do not have to be contiguous:
• Review of charts, reports, treatment plans, and lab or study results, except for the initial interpretation or review of lab or study results ordered during, or associated with, a face-to-face encounter.
• Telephone calls with other Medicaid-enrolled health-care professionals (not employed in the same practice) involved in the care of the client.
• Telephone or face-to-face discussions with a pharmacist about pharmacological therapies (not just ordering a prescription).
• Medical decision-making.
• Activities to coordinate services, if the coordination activities require the skill of a clinician.
• Documenting the services provided, which includes writing a note in the client’s chart describing the services provided, decision-making performed, and the amount of time spent performing the countable services, including the start and stop times and time spent by the physician working on the care plan after the nurse has conveyed pertinent information from agencies and facilities to the physician.

The following activities are not covered as non-face-to-face clinician supervision of the development or revision of the client’s care plan (care plan oversight services):
• Time that the staff spends getting or filing charts, calling home health agencies or clients, and similar administrative actions.
• Clinician telephone calls to client or family, except when necessary to discuss changes in client’s care plan.
• Clinician time spent telephoning prescriptions to a pharmacist (does not require clinician work and does not require a clinician to perform).
• Clinician time getting or filing the chart, dialing the telephone, or time on hold (does not require clinician work and does not meaningfully contribute to the treatment of the illness or injury).
• Travel time.
• Time spent preparing claims and for claims processing.
• Initial interpretation or review of lab or study results that were ordered during, or associated with, a face-to-face encounter.
• Services included as part of other E/M services.
• Consultations with health professionals not involved in the client’s case.
• Work included in hospital discharge day management (procedure codes 99238 and 99239) and discharge from observation (procedure code 99217).

2.2.1.1 Non-Face-to-Face Services

2.2.1.1.1 Non-Face-to-Face Medical Conferences

Procedure code 99367 must be used when billing for medical team conferences.
2.2.1.1.2 Non-Face-to-Face Clinician Supervision of a Home Health Client
Procedure code 99374 or 99375 must be used when billing for services requiring interaction with a home health agency.

2.2.1.1.3 Non-Face-to-Face Clinician Supervision of a Hospice Client
Procedure code 99377 or 99378 must be used when billing for services requiring interaction with a hospice.

2.2.1.1.4 Non-Face-to-Face Clinician Supervision of a Nursing Facility Client
Procedure code 99379 or 99380 must be used when billing for services requiring interaction with a nursing facility.

2.2.1.1.5 Other Non-Face-to-Face Supervision
Procedure code 99339 or 99340 must be used when billing for services requiring interaction with an independently-enrolled nurse or other provider (e.g., not a home health agency, nursing facility, or hospice provider).

2.2.1.1.6 Non-Face-to-Face Prolonged Services
Procedure code 99358 or 99359 must be used when billing for prolonged services without face-to-face contact. This service is to be reported in addition to other clinician services, including E/M services at any level, or health-care professionals outside of a home health agency, hospice, or nursing facility.

Non-face-to-face prolonged services are limited to a maximum of 90 minutes once per client by the same provider unless one of the following significant changes in the client’s clinical condition occurs:

- The client will soon be, or has recently been, discharged from a prolonged and complicated hospitalization that required coordination of complex care with multiple providers in order for the client to be adequately cared for in the home.
- The client has experienced recent trauma resulting in new medical complications that require complex interdisciplinary care.
- The client has a new diagnosis of a medically complex condition requiring additional interdisciplinary care with additional specialists.

Procedure code 99359 must be billed on the same date of service as procedure code 99358. Additional prolonged non-face-to-face services may be authorized if the provider submits supporting documentation for authorization.

Procedure code 99358 must be used to report the first hour of prolonged services and must be billed with the appropriate physician E/M procedure code listed in the table below. Prolonged services of less than 30 minutes are considered part of the physician’s E/M service being provided.

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99201 99202 99203 99204 99205 99211 99212 99213 99214 99215</td>
</tr>
<tr>
<td>99221 99222 99223 99231 99232 99233 99241 99242 99243 99244</td>
</tr>
<tr>
<td>99245 99251 99252 99253 99254 99255 99304 99305 99306 99307</td>
</tr>
<tr>
<td>99308 99309 99310 99318 99324 99325 99326 99327 99328 99334</td>
</tr>
<tr>
<td>99335 99336 99337 99341 99342 99343 99344 99345 99347 99348</td>
</tr>
<tr>
<td>99349 99350</td>
</tr>
</tbody>
</table>

Procedure code 99359 is used to report an additional 15 to 30 minutes of prolonged non-face-to-face services beyond the first hour. Prolonged services of less than 15 minutes beyond the first hour are considered part of the first hour.
**2.2.1.1.7 Non-Face-to-Face Specialist or Subspecialist Telephone Consultation**

Telephone consultations are limited to two every six months to the same provider and will not be reimbursed to the clinician providing the medical home.

The clinician providing the medical home must have an authorization on file for one of the following procedure codes before the specialist or subspecialist can be reimbursed:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>99339</td>
</tr>
</tbody>
</table>

Because the specialist or sub-specialists cannot be reimbursed without the medical home clinician’s current prior authorization information, the clinician providing the medical home should provide their information to the specialist or subspecialist.

The specialist or subspecialist will not be separately reimbursed for the telephone consultation if he or she is the medical home clinician because care plan oversight by the medical home provider includes telephone consultations. The referring provider identifier and prior authorization number must be submitted on the claim.

**2.2.1.1.8 General Requirements for Non-Face-to-Face Clinician-Directed Care Coordination Services**

These services may be reimbursed for the medical home clinician time involved in this coordination. The clinician billing the services must personally perform the services. Care coordination services delegated to, or performed by others, do not count towards care coordination reimbursement. Care coordination provided during post-surgical care is a benefit if the care is unrelated to the surgery.

**2.2.1.1.9 Non-Face-to-Face Care Plan Oversight**

The medical home clinician who bills for the care plan oversight must be the clinician who signed the plan of care (POC) in the home or domiciliary (procedure codes 99339 and 99340), home health agency (procedure codes 99374 and 99375), hospice (procedure codes 99377 and 99378), or nursing facility (procedure codes 99379 and 99380).

Procedure code 99339 is denied when billed on the same date of service by the same provider as procedure code 99340.

Procedure code 99374 is denied when billed on the same date of service by the same provider as procedure code 99375.

Procedure code 99377 is denied when billed on the same date of service by the same provider as procedure code 99378.

Procedure code 99379 is denied when billed on the same date of service by the same provider as procedure code 99380.

Care plan oversight services may be reimbursed for the clinician time involved in this coordination. The clinician billing the services must personally perform the services. Care coordination services delegated to or performed by others do not count towards care coordination reimbursement.

Only one clinician-directed care plan oversight service (procedure codes 99339, 99340, 99374, 99375, 99377, 99378, 99379 or 99380) is reimbursed every six months.

Payment is made only to one clinician per client, per calendar month for procedure code 99374 or 99375.

The medical home clinician may not have a significant financial or contractual relationship with the home health agency as defined in 42 Code of Federal Regulations (CFR) §424.

The medical home clinician may not be the medical director or employee of the hospice and may not furnish services under arrangements with the hospice, including volunteering.
2.2.1.10 Medical Team Conference

One medical team conference (procedure code 99367) may be reimbursed once every six months when the medical home coordinating clinician attests that they are providing the medical home for the client. The coordinating clinician may be the client’s primary care provider or a specialist.

Additional medical team conferences may be considered with documentation of a change in the client’s medical home.

The medical team conference time must be documented in the client’s record.

2.2.1.2 Face-to-Face Services

2.2.1.2.1 General Requirements for Face-to-Face Clinician-Directed Care Coordination Services

Providers must use the most appropriate face-to-face E/M procedure codes to bill for care coordination services.

- When counseling or care coordination requires more than 50 percent of the client or family encounter (face-to-face time in the office or other outpatient setting, or floor/unit time in the hospital), then time may be considered the key or controlling factor to qualifying for a particular level of E/M service.

- Counseling is a discussion with the client or family concerning diagnostic studies or results, prognosis, risks and benefits, management options, importance of adhering to the treatment regimen, and client and family education.

Modifiers must be used as appropriate for billing.

Any face-to-face inpatient or outpatient E/M procedure code that is a benefit of Texas Medicaid, except hospital discharge-day management (procedure codes 99238 and 99239) and discharge from observation (procedure code 99217), may be billed on the same day as the following non-face-to-face clinician-directed care coordination procedure codes when the procedure requires significant, separately-identifiable E/M services by the same physician on the same day.

### Procedure Codes

2.2.2 Prior Authorization and Documentation Requirements

Non-face-to-face clinician-directed care coordination services provided by the medical home require prior authorization. Providers must submit a request for prior authorization within seven business days of the date of service. Prior authorization is limited to a maximum of six months. Prior authorization is required to recertify the client for additional six-month periods and requires submission of a new request with documentation supporting medical necessity for ongoing services.

Prior authorization for initial non-face-to-face clinician-directed care coordination requires documentation of at least one covered face-to-face inpatient or outpatient E/M visit by the medical home clinician directing the care coordination during the six months preceding the provision of the first non-face-to-face care coordination service.

Prior authorization for subsequent non-face-to-face clinician-directed care coordination services requires at least one covered face-to-face inpatient or outpatient E/M visit by the medical home clinician directing the care coordination during the previous 12 months or more frequently as indicated by the client’s condition.
Prior authorization of CCP services may be requested in writing by completing a CCP Prior Authorization Request Form, attaching the necessary supportive documentation as detailed below, and mailing or faxing it to the TMHP-CCP department:

Texas Medicaid & Healthcare Partnership
Comprehensive Care Program
PO Box 200735
Austin, TX 78720-0735
Fax: (512) 514-4212

For prior authorization to be considered, clients must require complex and multidisciplinary care modalities involving regular clinician development or revision of care plans, review of subsequent reports of client status, and review of related laboratory and other studies:

- **Medically complex.** The health care needed by a Medicaid client achieves the designation of medically complex when the approved POC necessitates a clinical professional practicing within the scope of his or her license and in the context of a medical home to coordinate ongoing treatment to ensure its safe and effective delivery. The diagnosis must be covered under Texas Medicaid and be characterized by one of the following:
  - Significant and interrelated disease processes that involve more than one organ system (including behavioral health diagnoses) and require the services of two or more licensed clinical professionals, specialists, or subspecialists.
  - Significant physical or functional limitations that require the services of two or more therapeutic or ancillary disciplines, including, but not limited to, nursing, nutrition, OT, PT, ST, orthotics, and prosthetics.
  - Significant physical, developmental, or behavioral impairment that requires the integration of two or more medical or community-based providers, including, but not limited to, educational, social, and developmental professionals, that impact the care of the client.

- **Multidisciplinary Care.** Care is multidisciplinary when the medically necessary covered services of an approved POC include the need to coordinate the assessment, treatment, or services of a Medicaid-enrolled clinical provider with two or more additional medical, educational, social, developmental, or other professionals impacting the health care of the client.

Prior authorization is effective for care coordination services provided over a period of six months. Medical home clinicians must submit a revised care plan for subsequent periods of prior authorization.

Documentation of the following components must be submitted with the prior authorization form to obtain an initial authorization or renewal:

- A current medical summary, encompassing all disciplines and all aspects of the client’s care, and containing key information about the client’s health, including conditions, complexity, medications, allergies, past surgical procedures, and so on.
- A current list of the main concerns, issues, and problems as well as key strengths and assets and the related current clinical information including a list of all diagnoses with ICD-9-CM diagnosis codes.
- Planned action steps and interventions to address the concerns and to sustain and build strengths, with the expected outcomes.
- Disciplines involved with the client’s care and how the multiple disciplines will work or are working together to meet the client’s need. Providers must explain how the multidisciplinary approach will or do benefit the client’s needs.
- Short-term and long-term goals with timeframes.
The supporting documentation can be any of the following:

- A formal written care plan
- Progress note detailing the care coordination planning
- A letter of medical necessity detailing the care plan oversight and care coordination

Clinician-directed care coordination services must be documented in the client’s medical record. Documentation must support the services being billed and must include a record of the medical home clinician’s time spent performing specific care coordination activities, including start and stop times. The documentation must also include a formal care plan and an emergency services plan. The supporting documentation maintained in the client’s medical records must be dated and include the following components and requirements:

- Problem list
- Interventions
- Short-term and long-term goals
- Responsible parties

Client medical records are subject to retrospective review.

Documentation for care coordination provided during post-surgical care must clearly indicate the care coordination is unrelated to the surgery.

**2.2.2.1 Documentation Requirements for the Medical Home Clinician for a Telephone Consult with a Specialist**

The clinician providing the medical home must maintain the following documentation in the client’s medical record:

- Start and stop times showing that the consultation was at least 15 minutes
- The reason for the call
- The specialist’s or subspecialist’s medical opinion
- The recommended treatment or laboratory services
- The name of the specialist or subspecialist

**2.2.2.2 Documentation Requirements for the Specialist or Subspecialist for a Telephone Consult with the Medical Home Clinician**

Specialists or subspecialists must complete and retain the Specialist or Subspecialist Telephone Consultation Form for Non-Face-to-Face Clinician Directed Care Coordination Services-CCP. These records are subject to retrospective review. The supporting documentation must include, but is not limited to the following:

- The client’s name, date of birth, and Medicaid identification number
- Start and stop times indicating the consultation lasted at least 15 minutes
- The reason for the call
- The specialist’s or subspecialist’s medical opinion
- The recommended treatment or laboratory services
- The name and telephone number of the clinician providing the medical home
- Provider information for the specialist’s or subspecialist’s and the clinician providing the medical home
2.2.3 Claims Information

Claims for clinician-care coordination services must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Category 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, Claims Filing (Vol. 1, General Information) for instructions on completing paper claims.

2.2.4 Reimbursement

Clinician-directed care coordination services are reimbursed in accordance with 1 TAC §355.8441.

2.3 Comprehensive Outpatient Rehabilitation Facilities (CORFs) and Outpatient Rehabilitation Facilities (ORFs)

2.3.1 Enrollment

CORFs and ORFs must be certified by Medicare, have a valid provider agreement with HHSC, and have documentation that the TMHP enrollment process has been completed.

For questions about enrollment or billing, call the TMHP Contact Center at 1-800-925-9126.

Refer to: Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for information about enrollment procedures.

2.3.2 * Services, Benefits, and Limitations

OT, PT, and ST services are a benefit for clients who are 20 years of age or younger and who are CCP eligible when:

- Therapy is prescribed by a licensed physician.
- Documentation of medical necessity supports a condition that requires ongoing therapy or rehabilitation in the usual course, treatment, and management of the client’s condition.
- Therapy services are provided by a licensed therapist in an outpatient rehabilitation facility.

Therapy may be performed by a licensed occupational therapist, physical therapist, speech therapist, or one of the following under the supervision of a licensed therapist: licensed therapy assistant or licensed speech-language pathology intern.

Services performed by an occupational therapist aide, occupational therapist orderly, occupational therapist student, occupational therapist technician, physical therapist aide, physical therapist orderly, physical therapist student, physical therapist technician, SLP aide, SLP orderly, SLP student, or SLP technician are not a benefit of Texas Medicaid.

Therapy services performed by an unlicensed provider are subject to retrospective review and recoupment.

CORF and ORF services provided at schools, homes, daycare facilities, or any other non-Medicare-approved ORF or CORF facility is not a covered CCP benefit.

Services That Are Not a Benefit

The following services are not a benefit of CCP:

- Procedure code 97010 (application of a modality to one or more areas; hot or cold packs).
• Services that are not medically necessary. Examples include, but are not limited to:
  • Massage therapy that is the sole therapy or is not part of a therapeutic POC to address an acute condition.
  • Hippotherapy.
  • Separate reimbursement for VitalStim® therapy for dysphagia.
  • Treatment solely for the instruction of other agency or professional personnel in the client’s PT, OT, or ST program.
  • Training in nonessential tasks (e.g., homemaking, gardening, recreational activities, cooking, driving, assistance with finances, scheduling).
  • Emotional support, adjustment to extended hospitalization or disability, and behavioral readjustment.
  • Therapy prescribed primarily as an adjunct to psychotherapy.

2.3.3 Occupational Therapy

2.3.3.1 Services, Benefits, and Limitations

A procedural modifier is required when submitting claims for occupational therapist services. Providers must use modifier GO for occupational therapist services. Procedural modifiers are not required for evaluations and re-evaluations.

Evaluations (procedure code 97003) are limited to once every 180 calendar days, any provider. Re-evaluations (procedure code 97004) are limited once per 30 calendar days, any provider.

An evaluation or re-evaluation performed on the same day as therapy from a different therapy type must be performed at distinctly separate times to be considered for reimbursement.

If a therapy evaluation or re-evaluation procedure code and like therapy procedure codes are billed for the same date of service by any provider, the like therapy evaluation or re-evaluation will be denied.

OT evaluation (procedure code 97003) or re-evaluation (procedure code 97004) will be denied as part of the following OT procedure codes billed with Modifier GO.

The following procedure codes are billed in 15-minute increments:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97012     97014  97016  97018  97022  97024  97026  97028  97032  97033</td>
</tr>
<tr>
<td>97034     97035  97036  97039  97110  97112  97113  97116  97124  97139</td>
</tr>
<tr>
<td>97140     97150  97530  97535  97537  97542  97750  97760  97761  97762</td>
</tr>
<tr>
<td>97799     $8990</td>
</tr>
</tbody>
</table>

Procedure codes that may be billed in multiple quantities (i.e., 15 minutes each) are limited to two hours (eight units) per day of individual, group, or a combination of individual and group therapy, per therapy type (two hours of OT and two hours of PT). Each 15 minutes equals one unit.

All 15-minute increment procedure codes are based on the actual amount of billable time associated with the service. For those services for which the unit of service is 15 minutes (1 unit = 15 minutes), partial units must be rounded up or down to the nearest quarter hour.

The documentation retained in the client’s file must include the billable start time, billable stop time, total billable minutes, and activity that was performed.
To calculate billing units, count the total number of billable minutes for the calendar day for the client, and divide by 15 to convert to billable units of service. If the total billable minutes are not evenly divisible by 15, minutes greater than 7 are converted to 1 unit and 7 or fewer minutes are converted to 0 unit.

For example, 68 total billable minutes/15 = 4 units + 8 minutes. Since the 8 minutes are more than 7 minutes, those 8 minutes are converted to 1 unit. Consequently, 68 total billable minutes = 5 units of service. The following table indicates the time intervals for 0 through 8 units:

<table>
<thead>
<tr>
<th>Units</th>
<th>Number of Minutes</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 units</td>
<td>0 minutes through 7 minutes</td>
</tr>
<tr>
<td>1 units</td>
<td>8 minutes through 22 minutes</td>
</tr>
<tr>
<td>2 units</td>
<td>23 minutes through 37 minutes</td>
</tr>
<tr>
<td>3 units</td>
<td>38 minutes through 52 minutes</td>
</tr>
<tr>
<td>4 units</td>
<td>53 minutes through 67 minutes</td>
</tr>
<tr>
<td>5 units</td>
<td>68 minutes through 82 minutes</td>
</tr>
<tr>
<td>6 units</td>
<td>83 minutes through 97 minutes</td>
</tr>
<tr>
<td>7 units</td>
<td>98 minutes through 112 minutes</td>
</tr>
<tr>
<td>8 units</td>
<td>113 minutes through 127 minutes</td>
</tr>
</tbody>
</table>

Electrical stimulation therapy (procedure code 97032) may be considered with documentation of medical necessity.

### 2.3.3.2 Prior Authorization and Documentation Requirements

Prior authorization is required for OT except evaluations and re-evaluations.

The following documentation must be submitted to TMHP prior to the start of care for the current episode of therapy for consideration for prior authorization:

- A current written order by a physician based on medical necessity.
- A prescription is considered current when it is signed and dated, on or no later than, 60 days before the start of therapy.
- A “Request for Initial Outpatient Therapy (Form TP-1)” or “Request for Extension of Outpatient Therapy (Form TP-2) (2 Pages)” must be submitted to TMHP prior to the start of care for the current episode of therapy.
- The most recent evaluation and treatment plan. To establish medical necessity, the written treatment plan must include the following:
  - The age of the client at the time of evaluation.
  - Diagnosis.
  - Description of specific therapy being prescribed.
  - Specific treatment goals related to the client’s individual needs. Therapy goals may include improving function, maintenance of function, or slowing of the deterioration of function.
- For an initial request, anticipated measurable progress toward goals, the prognosis, and the client’s gross motor skills in years or months.
- For a new request for additional therapy, documentation of all progress made from the beginning of the previous treatment period.
- Duration and frequency of therapy.
- Requested date of service.
The number of sessions per week must be supported by documentation supporting the medical necessity for the frequency requested.

When requesting prior authorization for group OT, the provider must submit documentation supporting the group process as being medically necessary and beneficial to the client. When group therapy is authorized, weekly therapy limits will not be exceeded.

A CNM, CNS, NP, or PA may sign all documentation related to the provision of therapy services on behalf of the client’s physician when the physician delegates this authority.

A request for occupational therapist services may be prior authorized for no longer than 180 days duration. A new request must be submitted if therapy is required for a longer duration. A physician’s prescription is required every 180 days.

The GO modifier is required on all prior authorization requests for OT.

If a provider discontinues therapy with a client and a new provider begins therapy during an existing authorization period, submission of a new plan of care and documentation of the last therapy visit with the previous provider is required along with a letter from the client, or responsible adult, stating the date therapy ended with the previous provider.

### 2.3.4 Physical Therapy

#### 2.3.4.1 Services, Benefits, and Limitations

A procedural modifier is required when submitting claims for physical therapist services. Providers must use modifier GP for physical therapist services. Procedural modifiers are not required for evaluations and re-evaluations.

Evaluations (procedure code 97001) are limited to once every 180 calendar days, any provider. Re-evaluations (procedure code 97002) are limited to once per 30 calendar days, any provider.

An evaluation or re-evaluation performed on the same day as therapy from a different therapy type must be performed at distinctly separate times to be considered for reimbursement.

If a therapy evaluation or re-evaluation procedure code and like therapy procedure codes are billed for the same date of service by any provider, the like therapy evaluation or re-evaluation will be denied.

PT evaluation (procedure code 97001) or re-evaluation (procedure code 97002) will be denied as part of the following PT procedure codes billed with Modifier GP.

The following procedure codes are billed in 15-minute increments:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97012</td>
</tr>
<tr>
<td>97014</td>
</tr>
<tr>
<td>97016</td>
</tr>
<tr>

</tr>
<tr>
<td>97762</td>
</tr>
<tr>
<td>97799</td>
</tr>
<tr>
<td>S8990</td>
</tr>
</tbody>
</table>

Procedure codes that may be submitted in multiple quantities (i.e., 15 minutes each) are limited to two hours (eight units) per day of individual, group, or a combination of individual and group therapy, per therapy type (two hours of OT, two hours of PT). Each 15 minutes equals one unit.

All 15-minute increment procedure codes are based on the actual amount of billable time associated with the service. For those services for which the unit of service is 15 minutes (1 unit = 15 minutes), partial units must be rounded up or down to the nearest quarter hour.

The documentation retained in the client’s file must include the billable start time, billable stop time, total billable minutes, and activity that was performed.
To calculate billing units, count the total number of billable minutes for the calendar day for the client, and divide by 15 to convert to billable units of service. If the total billable minutes are not evenly divisible by 15, minutes greater than 7 are converted to 1 unit, and 7 or fewer minutes are converted to 0 unit.

For example, 68 total billable minutes/15 = 4 units + 8 minutes. Since the 8 minutes are more than 7 minutes, those 8 minutes are converted to 1 unit. Consequently, 68 total billable minutes = 5 units of service.

Refer to: Section 2.3.3, "Occupational Therapy" in this handbook for the 15-minute conversion table.

Electrical stimulation therapy (procedure code 97032) may be considered with documentation of medical necessity.

2.3.4.2 Prior Authorization and Documentation Requirements

Prior authorization is required for PT except evaluations and re-evaluations. The following documentation must be submitted to TMHP prior to the start of care for the current episode of therapy for consideration for prior authorization:

- A current written order by a physician based on medical necessity.
- A prescription is considered current when it is signed and dated on, or no later than, 60 days before the start of therapy.
- A "Request for Initial Outpatient Therapy (Form TP-1)" or "Request for Extension of Outpatient Therapy (Form TP-2) (2 Pages)" must be submitted to TMHP prior to the start of care for the current episode of therapy.
- The most recent evaluation and treatment plan. To establish medical necessity, the written treatment plan must include the following:
  - The age of the client at the time of evaluation.
  - Diagnosis.
  - Description of specific therapy being prescribed.
  - Specific treatment goals related to the client’s individual needs. Therapy goals may include improving function, maintenance of function, or slowing of the deterioration of function.
  - For an initial request, anticipated measurable progress toward goals, the prognosis, and the client’s gross motor skills in years or months.
  - For a new request for additional therapy, documentation of all progress made from the beginning of the previous treatment period.
  - Duration and frequency of therapy.
  - Requested date of service.

The number of sessions per week must be supported by documentation supporting the medical necessity for the frequency requested.

When requesting prior authorization for group PT, the provider must submit documentation supporting the group process as being medically necessary and beneficial to the client. When group therapy is authorized, weekly therapy limits will not be exceeded.

A CNM, CNS, NP, or PA may sign all documentation related to the provision of therapy services on behalf of the client’s physician when the physician delegates this authority.
A request for physical therapist services may be prior authorized for no longer than 180 days duration. A new request must be submitted if therapy is required for a longer duration. A physician’s prescription is required every 180 days.

The GP modifier is required on all prior authorization requests for PT.

If a provider discontinues therapy with a client and a new provider begins therapy during an existing authorization period, submission of a new plan of care and documentation of the last therapy visit with the previous provider is required along with a letter from the client, or responsible adult, stating the date therapy ended with the previous provider.

### 2.3.5 Speech Therapy (ST)

#### 2.3.5.1 Services, Benefits, and Limitations

A procedural modifier is required when submitting claims for ST services. Providers must use modifier GN for ST services. Procedural modifiers are not required for evaluations and re-evaluations.

ST evaluations (procedure code 92506) are limited to once every 180 calendar days, any provider. ST re-evaluations (procedure code S9152) are limited to once per 30 calendar days, any provider.

ST treatment codes 92507, 92508, and 92526 are payable in 15-minute increments at a maximum of eight units (two hours) per day.

All 15-minute increment procedure codes are based on the actual amount of billable time associated with the service. For those services for which the unit of service is 15 minutes (1 unit = 15 minutes), partial units must be rounded up or down to the nearest quarter hour.

The documentation retained in the client’s file must include the billable start time, billable stop time, total billable minutes, and activity that was performed.

To calculate billing units, count the total number of billable minutes for the calendar day for the client, and divide by 15 to convert to billable units of service. If the total billable minutes are not evenly divisible by 15, minutes greater than 7 are converted to 1 unit and 7 or fewer minutes are converted to 0 unit.

For example, 68 total billable minutes/15 = 4 units + 8 minutes. Since the 8 minutes are more than 7 minutes, those 8 minutes are converted to 1 unit. Consequently, 68 total billable minutes = 5 units of service.

Refer to: Section 2.3.3, “Occupational Therapy” in this handbook for the 15-minute conversion table.

ST evaluation and re-evaluations will be denied when billed on the same date of service, any provider as procedure code 92507 and 92508 with modifier GN.

Procedure codes 92526 and 92610 may be considered for treatment and evaluation of swallowing dysfunctions and oral functions for feeding.

Procedure code 97535 is used for ST services for training for augmentative communication devices.

#### 2.3.5.2 Prior Authorization and Documentation Requirements

Prior authorization is required for ST except evaluations and re-evaluations.

The following documentation must be submitted to TMHP prior to the start of care for the current episode of therapy for consideration for prior authorization:

- A current written order by a physician based on medical necessity.
- A prescription is considered current when it is signed and dated on, or no later than, 60 days before the start of therapy.
• A “Request for Initial Outpatient Therapy (Form TP-1)” or “Request for Extension of Outpatient Therapy (Form TP-2) (2 Pages)” must be submitted to TMHP prior to the start of care for the current episode of therapy.

• The most recent evaluation and treatment plan. To establish medical necessity, the written treatment plan must include the following:
  • The age of the client at the time of evaluation.
  • Diagnosis.
  • Description of specific therapy being prescribed.
  • Specific treatment goals related to the client’s individual needs. Therapy goals may include improving function, maintenance of function, or slowing of the deterioration of function.
  • For an initial request, anticipated measurable progress toward goals, the prognosis, and the client’s gross motor skills in years or months.
  • For a new request for additional therapy, documentation of all progress made from the beginning of the previous treatment period.
  • Duration and frequency of therapy.
  • Requested date of service.

The number of sessions per week must be supported by documentation supporting the medical necessity for the frequency requested.

When requesting prior authorization for group ST, the provider must submit documentation supporting the group process as being medically necessary and beneficial to the client. When group therapy is authorized, weekly therapy limits will not be exceeded.

A CNM, CNS, NP, or PA may sign all documentation related to the provision of therapy services on behalf of the client’s physician when the physician delegates this authority.

A request for ST services may be prior authorized for no longer than 180 days duration. A new request must be submitted if therapy is required for a longer duration. A physician’s prescription is required every 180 days.

The GN modifier is required on all prior authorization requests for ST.

If a provider discontinues therapy with a client and a new provider begins therapy during an existing authorization period, submission of a new plan of care and documentation of the last therapy visit with the previous provider is required along with a letter from the client, or responsible adult, stating the date therapy ended with the previous provider.

2.3.6 Claims Information

Providers must submit services provided by CORFs and ORFs in an approved electronic claims format or on the UB-04 CMS-1450 paper claim form from the vendor of their choice. TMHP does not supply the forms.

Revenue and Current Procedural Terminology (CPT) procedure codes are used when submitting claims for CORF and ORF services. The only POS is outpatient facility (POS 5).

Refer to: Form CH.19, “Comprehensive Outpatient Rehabilitation Facility (CORF) (CCP Only)” in this handbook for a claim form example.

Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.
Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

2.3.7 Reimbursement
CORSFs and ORFs are reimbursed in accordance with 1 TAC §355.8441.

See the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com for reimbursement rates.

2.4 Durable Medical Equipment (DME) Supplier (CCP)

2.4.1 Enrollment
To be eligible to participate in CCP, providers of DME (including customized or non-basic medical equipment) and expendable medical supplies must be enrolled in Medicare.

Home health agencies that provide DME and supplies should refer to subsection 2.1, “Enrollment” in the Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks) to enroll as DME–Home Health Services (DMEH) providers.

2.4.1.1 Pharmacies (CCP)
Pharmacy providers are eligible to participate in CCP. To be enrolled in CCP, the pharmacy must also be enrolled in VDP.

This enrollment allows pharmacy providers to bill for those medications and supplies payable by Medicaid for clients who are birth through 20 years of age but not covered by VDP (e.g., some over-the-counter drugs, some nutritional products, diapers, and disposable or expendable medical supplies). Pharmacy providers must continue to bill HHSC for drugs covered under VDP.

To locate a pharmacy CCP provider, use the Online Provider Lookup (OPL) at http://opl.tmhp.com/ProviderManager/AdvSearch.aspx.

Refer to: Subsection 2.1.2, “Enrollment” in this handbook for more information about CCP enrollment procedures.

Appendix B: Vendor Drug Program (Vol. 1, General Information).

Section 2, “Texas Medicaid (Title XIX) Home Health Services” in the Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks) for details about coverage through Texas Medicaid (Title XIX) Home Health Services.

2.4.2 Services, Benefits, and Limitations
Medicaid clients who are birth through 20 years of age are entitled to all medically necessary DME and expendable medical supplies. DME or supplies are medically necessary when required to correct or ameliorate disabilities or physical or mental illnesses or conditions. Any numerical limit on the amount of a particular item of DME or expendable medical supply can be exceeded if medically necessary for Medicaid clients who are birth through 20 years of age. Likewise, time periods for replacement of DME and expendable medical supplies do not apply to Medicaid clients who are birth through 20 years of age if the replacement is medically necessary.

DME is defined as medical equipment that is manufactured to withstand repeated use, ordered by a physician for use in the home, and required to correct or ameliorate the client’s disability, condition, or illness.
Because there is no single authority (such as a federal agency) that confers the official status of “DME” on any device or product, HHSC retains the right to make such determinations with regard to DME covered by Texas Medicaid. DME covered by Texas Medicaid must either have a well-established history of efficacy or, in the case of novel or unique equipment, valid peer-reviewed evidence that the equipment corrects or ameliorates a covered medical condition or functional disability.

Requested DME may be a benefit of Texas Medicaid when it meets the Medicaid definition of DME.

The majority of DME and expendable medical supplies are covered through Texas Medicaid (Title XIX) Home Health Services.

If a service cannot be provided through Texas Medicaid (Title XIX) Home Health Services, the service may be covered through CCP if it is determined to be medically necessary for the client and if FFP is available.

If a DME provider is unable to deliver a piece of equipment, the provider must allow the client the option of obtaining the DME or expendable medical supplies from another provider.

Periodic rental payments are made only for the lesser of the following:

- The period of time the equipment is medically necessary
- The total monthly rental payments equal the reasonable purchase cost for the DME

DME will be purchased when a purchase is determined to be medically necessary and more cost effective than leasing the device with supplies. Only new, unused equipment will be purchased. When a provider is replacing a piece of rental DME with purchased DME, the provider must supply a new piece of DME to the client.

Purchase is justified when the estimated duration of need multiplied by the rental payments would exceed the reasonable purchase cost of the equipment or it is otherwise more practical to purchase the equipment.

DME repair will be considered based on the age of the item and cost to repair it. A request for repair of DME must include:

- A statement or medical information that is provided by the attending physician and that substantiates the medical appliance or equipment continues to serve a specific medical purpose.
- An itemized estimated cost list from the vendor or DME provider who will make the repairs.

Rental equipment may be provided to replace purchased medical equipment for the period of time it will take to make necessary repairs to purchased medical equipment.

All adjustments and modifications that are made within the first six months after delivery are considered part of the purchase price. However, DME that has been delivered to the client’s home and then found to be inappropriate for the client’s condition will not be eligible for an upgrade within the first six months following purchase unless there had been a significant change in the client’s condition, as documented by the physician familiar with the client.

Rental reimbursement to the same provider cannot exceed the purchase price, except as addressed in specific policies.

All DME purchased for a client becomes the Medicaid client’s property upon receipt of the item. Delivered equipment will become the Medicaid client’s property in the following instances even though it will not be prior authorized or reimbursed:

- Equipment delivered to the client before the physician signature date on the CCP Prior Authorization Form or prescription.
- Equipment delivered more than three business days before obtaining prior authorization from TMHP that meets the criteria for purchase.
As long as the client is eligible for CCP services on the date the custom equipment is ordered from the manufacturer, the provider must use the order date as the date of service since custom equipment is client specific and cannot be used for another client.

To establish medical necessity of the equipment for the client, the provider must have on file in the client’s records current documentation that is signed by a physician (e.g., a signed and dated prescription) showing the following:

- A diagnosis relative to each item requested.
- The specific type of supply needed.
- The length of time needed.

### 2.4.2.1 Purchase Versus Equipment Rental

When providing equipment not prior authorized under Texas Medicaid (Title XIX) Home Health Services for CCP clients with long-term or chronic conditions, it is more cost-effective, in many cases, to purchase the equipment rather than rent it. The client’s condition and length of time the equipment will be used must be carefully assessed before prior authorization for rental or purchase is requested. CCP nurses determine whether the equipment will be rented, purchased, repaired, or modified based on the client’s needs, the duration of use, and the age of the equipment.

CCP does not pay for the purchase of certain types of equipment; consequently, long-term rental may be considered. Most other equipment is rented for only four months initially. During this time, the provider must assess whether the equipment should be purchased before the rental lapses. Rentals and purchases must be prior authorized.

After prior authorization is obtained for purchase, new equipment must be provided and the rental discontinued. CCP does not purchase used equipment.

Providers of customized or nonbasic medical equipment also must be enrolled as Medicare DME providers.

### 2.4.3 Prior Authorization and Documentation Requirements

Providers can request prior authorization for most DME through the TMHP website. Providers that make written requests for prior authorization must complete Form CH.2, “CCP Prior Authorization Request Form” in this handbook, and they must attach the documentation necessary to support the request. The documentation must include a current prescription that has been signed and dated by a physician (M.D. or D.O.), and it must be mailed or faxed to TMHP with the prior authorization request. For specific policy information not contained in this manual related to the purchase of DME, providers can call TMHP-CCP Customer Service at 1-800-846-7470.

A completed CCP Prior Authorization Request Form prescribing the DME or medical supplies must be signed and dated by the prescribing physician familiar with the client before requesting prior authorization. All signatures and dates must be current, unaltered, original, and handwritten. Computerized or stamped signatures and dates are not accepted. The completed CCP Prior Authorization Request Form must be maintained by the requesting provider and the prescribing physician. The original signature copy must be kept in the physician’s medical record for the client.

To avoid unnecessary denials, the physician must provide correct and complete information, including accurate documentation of the medical necessity for the equipment and services requested. The physician must maintain documentation of medical necessity in the client’s medical record. The requesting provider may be asked for additional information to clarify or complete a request for the mobility aid.

A determination is made by the CCP nurses as to whether the equipment will be rented, purchased, repaired, or modified based on the client’s needs, duration of use, and age of equipment.
A request for prior authorization must include documentation from the provider to support the medical necessity of the service, equipment, or expendable medical supply. Physician prescriptions must be specific to the item requested. For example, if the provider is requesting a customized wheelchair, the prescription must request a customized wheelchair, not just a wheelchair. Providers must submit a CCP Prior Authorization Request Form and documentation to support medical necessity to the CCP department before providing services. Providers must obtain prior authorization within three business days of the requested date of service.

2.4.3.1 Equipment Accessories
CCP may consider prior authorization of equipment accessories, such as ventilator and oxygen trays and positioning inserts, when supporting documentation takes into account all the client’s needs, capabilities, and physical or mental status.

2.4.3.2 Equipment Modifications
A modification is the replacement of a component due to changes in the client’s condition, not the replacement of a component that is no longer functioning.

DME that has been delivered to the client’s home and then found to be inappropriate for the client’s condition will not be eligible for an upgrade within the first six months following purchase. All modifications that are made within the first six months after delivery are considered part of the purchase price.

However, CCP may consider prior authorization of modifications to custom equipment if a change occurs in the client’s needs, capabilities, or physical or mental status that cannot be anticipated.

Documentation must include:
- All projected changes in the client’s needs.
- The age of the current equipment, and the cost of purchasing new equipment versus modifying current equipment.

2.4.3.3 Equipment Adjustments
Adjustments do not require supplies.

Labor for adjustments within the first six months after delivery are not prior authorized because these are considered part of the purchase price.

Up to one hour of labor for adjustments may be considered for reimbursement with prior authorization through CCP as needed after the first six months. Providers must use procedure code K0739 for adjustments.

2.4.3.4 Equipment Repairs
Repairs require replacement of components that are no longer functional. Repairs to client-owned equipment may be considered for reimbursement with prior authorization through CCP.

Technician fees are considered part of the cost of the repair. Providers must use procedure code K0739.

Repairs for non-warranty DME may be billed using procedure code K0739. Non-warranty DME repairs will require prior authorization. Providers are responsible for maintaining documentation in the client’s medical record that specifies the repairs and supporting medical necessity.

Rentals may be considered for reimbursement during the repair period of the client’s owned equipment.

Routine maintenance of rental equipment is the provider’s responsibility.
2.4.3.5 DME Certification and Receipt Form

The DME Certification and Receipt Form is required and must be completed before reimbursement can be made for any DME delivered to a client. The certification form must include the name of the item, the date the client received the DME, and the signatures of the provider and the client or primary caregiver.

The DME provider must maintain the signed and dated form in the client’s medical record. DME claims and appeals that meet or exceed a billed amount of $2,500 for the same date of service will suspend for verification of client receipt of the DME item(s). The DME Certification and Receipt Form must be faxed to (512) 506-6615. If the claim is submitted without the form or if receipt of the DME item(s) cannot be verified, the DME item(s) on the claim will be denied. TMHP may contact the client that received the product for verification of services rendered.

Refer to: Form CH.4, “DME Certification and Receipt Form (3 Pages)” in this handbook.

2.4.3.6 Documentation of Supply Delivery

Providers must retain individual delivery slips or invoices for each date of service to document the date of delivery for all supplies provided to a client. Providers must disclose this documentation to HHSC or its designee upon request. These records and claims must be retained for a minimum of five years from the date of service (DOS) or until all audit questions, appeals, hearings, investigations, or court cases are resolved. The DOS is the date on which supplies are delivered to the client or shipped by a carrier to the client as evidenced by the dated tracking document attached to the invoice for that date.

Documentation of delivery must include one of the following:

- Delivery slip or invoice signed and dated by the client or caregiver.
- A dated carrier tracking document that includes the shipping date and delivery date must be printed from the carrier’s website as confirmation that the supplies were shipped and delivered. The dated carrier tracking document must be attached to the delivery slip or invoice.

The dated delivery slip or invoice must include the client’s full name and address to where supplies were delivered, and an itemized list of goods that includes the descriptions and numerical quantities of the supplies delivered to the client. This document could also include prices, shipping weights, shipping charges, and any other description.

All claims submitted for DME supplies must include the same quantities or units that are documented on the delivery slip or invoice and on the CCP Prior Authorization Request form. They must reflect the number of units by which each product is measured. For example, diapers are measured as individual units. If one package of 300 diapers is delivered, the delivery slip or invoice and the claim must reflect that 300 diapers were delivered and not that one package was delivered. Diaper wipes are measured as boxes or packages. If one box of 200 wipes is delivered, the delivery slip or invoice and the claim must reflect that one box was delivered and not that 200 individual wipes were delivered. There must be one dated delivery slip or invoice for each claim submitted for each patient. All claims submitted for DME supplies must reflect the same date as the delivery slip or invoice and the same timeframe covered by the CCP Prior Authorization Request form. The DME Certification and Receipt Form is still required for all equipment delivered.

2.4.3.7 Specific CCP Policies

Most DME and expendable medical supplies are available under Texas Medicaid (Title XIX) Home Health Services. If the service is not available under Texas Medicaid (Title XIX) Home Health Services, CCP may cover the requested service, if the client is CCP-eligible and the service is medically necessary, requested by a physician, and for which FFP is available.
Refer to: Form DM.1, “DME Certification and Receipt Form (4 pages)” in the Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks).

Section 2, “Texas Medicaid (Title XIX) Home Health Services” in the Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks) for specific policies.

2.4.4 Blood Pressure Devices

2.4.4.1 Services, Benefits, and Limitations

The following blood pressure devices and their components are benefits of CCP in the home setting for self-monitoring when the equipment is prescribed by a physician:

- **Manual blood pressure device.** A device that requires manual cuff inflation with real-time visualization of the results displayed on the manometer.

- **Automated blood pressure device.** A device that inflates the cuff manually or automatically and displays the blood pressure results on a small screen.

  Note: Finger cuff automated blood pressure devices for diagnostic purposes are not a benefit of Texas Medicaid.

- **Hospital-grade blood pressure device.** A device that includes memory for continuous recording, has an alarm system to notify the caregiver of abnormal readings, and is capable of frequent or continuous automatic blood pressure and heart rate monitoring with correction of motion artifact.

Documentation that supports medical necessity of the requested equipment, including the diagnosis, must be maintained in the client’s medical record and is subject to retrospective review.

2.4.4.1.1 Manual and Automated Blood Pressure Devices

Providers must use procedure code A4660 or A4670 when billing for manual or automated blood pressure devices.

Manual and automated blood pressure devices that have been purchased are anticipated to last a minimum of one year and may be considered for replacement when one year has passed or when the equipment is not functional and not repairable.

Manual and automated blood pressure devices may be reimbursed when billed with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>4010</td>
</tr>
<tr>
<td>40301</td>
</tr>
<tr>
<td>40411</td>
</tr>
<tr>
<td>40519</td>
</tr>
<tr>
<td>4168</td>
</tr>
<tr>
<td>4254</td>
</tr>
<tr>
<td>42651</td>
</tr>
<tr>
<td>4270</td>
</tr>
<tr>
<td>42822</td>
</tr>
</tbody>
</table>
2.4.4.1.2 Hospital-Grade Blood Pressure Devices

Providers must use procedure code A9279 with modifier U1 when billing for hospital-grade blood pressure devices.

Hospital-grade blood pressure devices that have been purchased are anticipated to last a minimum of three years and may be considered for replacement when three years have passed or when the equipment is not functional and not repairable.

For clients who are birth through 11 months of age, the rental or purchase of a hospital-grade blood pressure device is a benefit when documentation supports medical necessity and includes an explanation of why the client cannot use a standard automated blood pressure device.

For clients who are 12 months of age and older, the rental or purchase of a hospital-grade blood pressure device is a benefit on a case-by-case basis. Supporting documentation of medical necessity must be provided.

The following indications are recognized by Texas Medicaid for hospital-grade blood pressure devices:

- Hypotension
- Essential hypertension
- Hypertensive heart disease
- Hypertensive renal disease
- Acute pulmonary heart disease
- Chronic pulmonary heart disease
- Cardiomyopathy
- Conduction disorders
- Cardiac dysrhythmias
- Heart failure
- Acute kidney failure
- Chronic kidney disease
- Hydronephrosis
- Vesicoureteral reflux with neuropathy
- Bulbus cordis anomalies and anomalies of cardiac septal closure

All rental costs of the hospital-grade blood pressure device apply toward the purchase price.

2.4.4.1.3 Blood Pressure Device Components, Replacements, and Repairs

The following may be considered for reimbursement of blood pressure device:

- Replacement of blood pressure cuffs (procedure code A4663)
• Replacement of other components (procedure code A4660)
• Repairs of the equipment (procedure code A4660)

2.4.4.2 Prior Authorization and Documentation Requirements
A CCP Prior Authorization Request Form, signed and dated by the physician, must be submitted with the documentation supporting medical necessity for the device. Supporting documentation of medical necessity must include the diagnosis.

2.4.4.2.1 Manual and Automated Blood Pressure Devices
Prior authorization is not required for manual and automated blood pressure devices except when the following situations apply:

• Another blood pressure device is medically necessary within the same year. Replacement of equipment within the same year as the purchase requires prior authorization. When equipment needs to be replaced sooner than the anticipated lifespan, the provider must submit a copy of the police or fire report, when appropriate, and the measures to be taken to prevent reoccurrence.

• The client has a diagnosis code other than those in the diagnosis table listed above. If the client has a diagnosis code other than those listed in the above table, a request for prior authorization for an initial or replacement device with all necessary documentation supporting medical necessity of the blood pressure device.

2.4.4.2.2 Hospital-Grade Blood Pressure Devices
Prior authorization is required for the rental or purchase of a hospital-grade blood pressure device. A determination will be made by HHSC or its designee as to whether the equipment will be rented, purchased, repaired, or modified based on the client’s needs, duration of use, and age of the equipment. Repairs and modifications can only be performed on purchased equipment.

Documentation of medical necessity for the hospital-grade blood pressure device must support the client’s need for self-monitoring and address why an automated blood pressure device will not meet the client’s needs. The documentation must include:

• All pertinent diagnoses.
• Initial evaluation.
• Symptoms.
• Duration of symptoms.
• Any recent hospitalizations (within past 12 months).
• Comorbid conditions.
• How frequent or continuous self-monitoring will affect treatment.
• All pertinent laboratory and radiology results.
• Client’s weight.
• A family or caregiver(s) who has an understanding of cause and effect and object permanence and who has agreed to accept the responsibility to be trained to use the hospital-grade monitor.

Prior authorization may be granted for a six-month rental period when the request is submitted with documentation of medical necessity supporting the client’s need for self-monitoring and addressing why an automated blood pressure device will not meet the client’s needs.

Recertification for an additional six-month period may be considered when the physician provides current documentation that supports the ongoing medical necessity for self-monitoring and confirms the client or family is compliant with its use.
A hospital-grade blood pressure device will not be considered for prior authorization of purchase until the client has completed a six-month trial period.

Purchase of a hospital-grade blood pressure device may be prior authorized when all of the following criteria are met:

- The client is 12 months of age or older.
- Documentation of medical necessity supports the client’s need for ongoing self-monitoring and addresses why an automated blood pressure device will not meet the client’s needs.

### 2.4.4.2.3 Blood Pressure Device Components, Replacements, and Repairs

Replacement of blood pressure cuffs and other components may be considered for purchase with prior authorization and documentation of medical necessity that explains the need for the replacement.

Repair of equipment must be prior authorized when irreparable damage has occurred and documentation exists that supports the need for repair. Repair of equipment will be considered after the factory warranty has expired.

### 2.4.5 Cardiorespiratory (Apnea) Monitor

#### 2.4.5.1 Services, Benefits, and Limitations

Apnea monitors are a benefit of CCP for clients who are birth through 20 years of age. The purchase of an apnea monitor (procedure code E0618 or E0619) is limited to once every five years. The rental of an apnea monitor (procedure code E0619) is limited to once per month.

The rental of an apnea monitor with recording feature may be considered for two months without prior authorization for infants birth through 4 months of age with one of the following diagnosis codes.

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>33700</td>
</tr>
<tr>
<td>33709</td>

<td>77982</td>
</tr>
<tr>
<td>7850</td>
</tr>
<tr>
<td>78603</td>
</tr>
<tr>
<td>V198</td>
</tr>
</tbody>
</table>

Diagnosis code 42789 includes atrial tachycardia (supraventricular tachycardia [SVT], atrioventricular [AV] nodal re-entry, nodal, and sinoauricular) and bradycardia (nodal, sinoatrial).

Other diagnoses may be considered for prior authorization based on medical necessity. Use of diagnosis code V198 may be considered on appeal, and requires submission of additional documentation to support medical necessity.

Procedure code 94774 may be used by the physician to bill for the interpretation of the apnea monitor recordings.

Electrodes and lead wires (procedure codes A4556 and A4557) for the apnea monitor are a benefit only if the apnea monitor is owned by the client. Additional documentation such as the purchase date, the serial number, and purchasing entity may be requested. Procedure code A4556 may be considered for purchase for a maximum of 15 pairs per month. Procedure code A4557 may be considered for purchase for a maximum of two pairs per month. Additional lead wires may be requested on appeal with documentation of medical necessity. The physician must provide medical necessity for the electrodes, lead wires, and a statement that the client owns the monitor. If the apnea monitor is rented, the electrodes and lead wires are considered part of the rental fee.

The apnea monitor and pulse oximeter combination device is not a benefit of Texas Medicaid.
2.4.5.2 Prior Authorization and Documentation Requirements

Prior authorization for the purchase of an apnea monitor with or without recording features may be considered for use in the home with one of the diagnosis codes listed in the table above.

Prior authorization is required for rental of an apnea monitor, and may be considered for clients who are birth through 20 years of age that are CCP-eligible when documentation submitted clearly shows that the equipment is medically necessary and will correct or ameliorate the client’s disability or physical or mental illness or condition. Documentation must include one of the following:

- The client is five months of age or older.
- A documented cardiorespiratory episode occurred during the initial two-month rental period requiring continued monitoring.

Clients who are five months of age and older must have demonstrated an apparent life-threatening event, tracheostomy, anatomic abnormality of the airway, chronic lung disease requiring oxygen or ventilatory support, or other diagnoses based on documented medical necessity.

Prior authorization must be obtained in writing and must include all of the following:

- A completed CCP Prior Authorization Request Form signed and dated by the physician
- Documentation to support medical necessity and appropriateness of the apnea monitor
- A physician interpretation, signed and dated by the physician, of the most recent two month’s apnea monitor downloads if the client has used an apnea monitor

Apnea monitors are not prior authorized if the documentation does not support medical necessity.

2.4.6 Pulse Oximeter

2.4.6.1 Services, Benefits, and Limitations

A pulse oximeter (procedure code E0445) is a benefit of Texas Medicaid through CCP. A higher-level pulse oximeter (procedure code E0445 with modifier TG) may be reimbursed based on documentation of medical necessity. Modifier TG must be submitted in addition to procedure code E0445. Modifier TG is used for complex or high level of care.

A pulse oximeter rental is limited to once per month for a maximum of six months. For those clients who require long-term monitoring, recertification may be considered for up to a maximum of six additional months. Purchase may be considered when it is determined to be medically necessary and more cost-effective than leasing the device with supplies. Before purchase, the provider must supply a new pulse oximeter to the client.

A pulse oximeter may be reimbursed for purchase once every five years.

The provider is responsible for retaining a current prescription.

The rental of equipment includes all necessary supplies, adjustments, repairs, and replacement parts. Pulse oximeter sensor probes (procedure code A4606) for client-owned equipment are limited to four per month without prior authorization.

2.4.6.2 Prior Authorization and Documentation Requirements

A pulse oximeter requires prior authorization.

A pulse oximeter may be considered for prior authorization for clients who are birth through 20 years of age who are CCP-eligible when documentation submitted clearly shows that the equipment is
medically necessary and will correct or ameliorate the client’s disability or physical or mental illness or condition. Documentation must include the following for the level requested:

- **Level One.** Basic level monitoring capable of spot checks and heart rate or capable of continuous monitoring, alarm, memory, and correction of motion artifact. Applicable if there is a caregiver or medical provider identified and present who has been trained in use of the oximeter and how to respond to readings in a medically safe way and the client meets at least one of the following criteria:
  - Client is oxygen- or ventilator-dependent (up to 16 hours per day).
  - Client is clinically stable and able to wean from oxygen or ventilator.
  - Client has other medically necessary condition(s) requiring monitoring of oxygen saturation or needs continuous monitoring of oxygen saturation during sleep or to maintain optimal levels.

- **Level Three.** Providers must use modifier TG if the oximeter device is for a serious condition and there is critical need for continuous monitoring. Applicable if the client meets all the following criteria:
  - Client has frequent need for changes in oxygen and ventilator settings.
  - Client is oxygen- or ventilator-dependent (e.g., 16 to 24 hours per day).
  - Client is in the weaning process from oxygen or ventilator and experiencing respiratory complications.
  - Client requires equipment that is motion-sensitive or that has more complex readouts or monitoring capabilities.
  - There is a caregiver or medical provider identified and present who has been trained in use of the oximeter and how to respond to readings in a medically safe way.

For all requests providers must:

- Submit the completed Form CH.9, “Pulse Oximeter Form” and Form CH.2, “CCP Prior Authorization Request Form” in this handbook.
- Clearly indicate medical necessity using the TG modifier on the Pulse Oximeter Form.
- Continue to use the current code for lease (E0445 with modifier RR) and purchase (E0445 with modifier NU).

A pulse oximeter rental includes the system, the sensor probes, and all necessary supplies.

Pulse oximeter sensor probes (procedure code A4606) for client-owned equipment are limited to four per month without prior authorization. Providers may obtain additional probes for clients who are birth through 20 years of age with documentation of medical necessity. Additional probes require prior authorization through CCP.

### 2.4.7 Diabetic Equipment and Supplies

**Note:** This section is only for tubeless external insulin infusion pumps.

**Refer to:** Subsection 2.2.10, “Diabetic Equipment and Supplies” in the *Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2 Provider Handbooks)* for all other diabetic equipment and supplies, including the external insulin pump.

#### 2.4.7.1 Services, Benefits, and Limitations

The tubeless external insulin infusion pump and supplies are a benefit of Texas Medicaid through CCP. The tubeless external insulin pump must be ordered by, and the client’s follow-up care must be managed by, a prescribing provider who has experience managing clients with insulin infusion pumps and who is knowledgeable in the use of insulin infusion pumps.
Providers must use procedure code E0784 and modifier U1 for the rental or purchase of the tubeless external insulin pump and procedure code A9274 for the tubeless external insulin pump supplies. Procedure code A9274 is limited to 15 per month.

A tubeless external insulin pump that has been purchased is expected to last a minimum of three years and may be considered for replacement when three years have passed or the equipment is no longer repairable. The replacement of the equipment may also be considered when it has been lost or irreparably damaged. A copy of the police or fire report, when appropriate, and the measures to be taken to prevent a reoccurrence must be submitted. Additional services may be considered based on documentation of medical necessity.

Routine maintenance of rental equipment is the provider’s responsibility.

### 2.4.7.2 Prior Authorization and Documentation Requirements

Prior authorization is required for the tubeless external insulin pump with carrying cases and related supplies and repairs. The tubeless external insulin pump supplies may be considered separately when a tubeless external insulin pump is rented.

The tubeless external insulin pump and supplies may be obtained through one of the following methods:

- **CCP Prior Authorization Request Form.** The completed CCP Prior Authorization Request Form must be maintained by the dispensing provider and the prescribing physician in the client’s medical record. The physician must maintain the original signed and dated copy of the CCP Prior Authorization Request Form. The completed CCP Prior Authorization Request Form is valid for a period up to six months from the physician’s signature date.

- **Verbal or detailed written order.** The verbal or detailed written order must be provided by a physician, PA, NP, CNS, or a CNM.

If the dispensing provider does not have a detailed written order, a verbal order is required to be on file until the written order is received from the prescribing provider and before providing diabetic equipment and supplies. The prescribing provider’s order may be a written, fax, electronic, or verbal order and must include:

- A description of the item(s).
- The client’s name.
- The name of the physician or authorized prescribing provider.
- The date of the order.

A detailed written order must be received by the DME supplier within 90 days from the date of the prescribing provider’s signature. For initial orders, the detailed written order for diabetic equipment and supplies is valid for six months from the date of the order or the date of the prescribing provider’s signature, whichever is earlier. For renewal orders the detailed written order is valid for six months from the start date, or in absence of a start date, the date of the authorized prescribing signature.

#### 2.4.7.2.1 Tubeless External Insulin Pump Rentals

Tubeless external insulin pump rentals may be considered for prior authorization with the submission of clinical documentation that indicates one of the following:

- The client has a diagnosis of type 1 or type 2 diabetes and meets at least two of the following criteria while on multiple daily injections of insulin:
  - Elevated glycosylated hemoglobin level (HbA1c) > 7.0 percent.
  - A history of dawn phenomenon with fasting blood sugars frequently exceeding 200 mg/dl.
  - A history of severe glycemic excursions with wide fluctuations in blood glucose.
• A history of recurring hypoglycemia (less than 60 mg/dL) with or without hypoglycemic unawareness.
• Expectation of becoming pregnant within three months.
• The client has a diagnosis of gestational diabetes and meets at least one of the following criteria:
  • Erratic blood sugars in spite of maximal compliance and split dosing.
  • Other evidence that adequate control is not being achieved by current methods.

In addition to the clinical documentation, the provider must submit an External Insulin Pump form that indicates:
• The client or caregiver possesses:
  • The cognitive and physical abilities to use the recommended insulin pump treatment regimen.
  • An understanding of cause and effect.
  • The willingness to support the use of the external insulin pump.
• The prescribing provider has attested that:
  • A training and education plan will be completed prior to initiation of pump therapy.
  • The client or caregiver will be given face-to-face education and instruction and will be able to demonstrate the necessary proficiency to integrate insulin pump therapy with their current treatment regimen for ambient glucose control.

The External Insulin Pump form has been updated to incorporate the required prior authorization criteria for the rental of the external insulin pump.

2.4.7.2.2 Purchase of Tubeless External Insulin Pump
The purchase of a tubeless external insulin pump may be considered for prior authorization after it has been rented for a three-month trial and all of the following documentation has been provided:
• The training or education plan has been completed.
• The pump is the appropriate equipment for the specific client.
• The client is compliant with the use of the pump.

2.4.8 Donor Human Milk
2.4.8.1 Services, Benefits, and Limitations
Donor human milk is a benefit of CCP for clients who are birth through 11 months of age who are CCP-eligible when documentation submitted clearly shows that it is medically necessary and will correct or ameliorate the client’s disability or physical or mental illness or condition. Documentation must include all of the following:
• The requesting physician has documented medical necessity and appropriateness.
• The parent or guardian has signed and dated an informed consent form indicating that the risks and benefits of using banked donor human milk have been discussed with them.
• The donor human milk bank adheres to quality guidelines consistent with the Human Milk Bank Association of North America or such other standards as may be adopted by HHSC.

Additional donor human milk benefits beyond the limitations listed above may be available to clients who are birth through 20 years of age with documentation of medical necessity.

Procedure code B9998 must be used when requesting or billing for donor human milk.

Donor human milk is reimbursed at a maximum fee determined by HHSC or manual pricing.
Donor human milk is only reimbursed to a Texas Medicaid-enrolled donor milk bank and only for children who are in the home setting.

The physician must address the benefits and risks of using donor human milk, such as HIV, freshness, effects of pasteurization, nutrients, and growth factors to the parent. The physician also must address donor screening, pasteurization, milk storage, and transport of the donor milk. The physician may obtain this information from the donor milk bank.

2.4.8.2 Prior Authorization and Documentation Requirements

Donor human milk may be considered for a maximum of six months per authorization. The authorization may be extended with documentation of medical necessity.

Prior authorization is required for donor human milk provided through Texas Medicaid CCP Services. To obtain prior authorization, providers must complete the CCP Prior Authorization Request Form and a Donor Human Milk Request Form every 180 days. Both the ordering physician and the providing milk bank must maintain copies of the form in the client’s medical records.

The physician ordering the donor human milk must complete all of the fields in Part A of the original form, including the documentation of medical necessity. This information must be substantiated by written documentation in the clinical report. The physician must specify the quantity and the time frame in the Quantity Requested field (e.g., cubic centimeters per day or ounces per month). All of the fields in Part B of the form must be completed by the donor milk bank providing the donor human milk.

The prior authorization request and all completed documentation must be submitted to the TMHP CCP Prior Authorization Unit at:

Texas Medicaid & Healthcare Partnership
Comprehensive Care Program (CCP)
PO Box 200735
Austin, TX 78720-0735
Fax: (512) 514-4212

The documentation of medical necessity and appropriateness and the signed and dated written informed consent form must be maintained in the client’s clinical records. The documentation of medical necessity must be completed by the physician ordering the donor human milk. The clinical records are subject to retrospective review. The documentation must address all of the following:

- Medical necessity, including why the particular client cannot survive and gain weight on any appropriate formula (e.g., elemental, special, or routine formula or food), or any enteral nutritional product other than donor human milk.
- A clinical feeding trial of an appropriate nutritional product has been considered with each authorization.
- The informed consent provided to the parent or guardian details the risks and benefits of using banked donor human milk.
- A copy of the CCP Prior Authorization Request Form and the Donor Human Milk Request Form.

Refer to: Form CH.5, “Donor Human Milk Request Form” in this handbook.

Form CH.2, “CCP Prior Authorization Request Form” in this handbook.

2.4.9 Incontinence Supplies

2.4.9.1 Services, Benefits, and Limitations

Incontinence supplies, such as diapers, briefs, pull-ons, liners, wipes, and underpads, may be considered for reimbursement through CCP for those clients who are birth through 3 years of age with a medical condition resulting in an increased urine or stool output beyond the typical output for this age group,
such as celiac disease, short bowel syndrome, Crohn’s disease, thymic hypoplasia, Acquired Immunodeficiency Syndrome (AIDS), congenital adrenal hyperplasia, diabetes insipidus, Hirschsprung’s disease, or radiation enteritis.

For clients who are 4 years of age and older, incontinence supplies may be considered through Title XIX Home Health Services when their medical condition results in an impairment of urination and/or stool. For clients who do not meet criteria through Title XIX Home Health Services, incontinence supplies may be considered through CCP with documentation of medical necessity.

Lack of bladder or bowel control is considered normal development for clients who are 4 years of age or younger.

Reusable diapers, briefs, pull-ons, liners, wipes, and underpads are not a benefit of CCP. Gloves used to change diapers, briefs, and pull-ons are not considered medically necessary unless the client has skin breakdown or a documented disease that may be transmitted through the urine.

2.4.9.1.1 Skin Sealants, Protectants, Moisturizers, Ointments

Skin sealants, protectants, moisturizers, and ointments may be considered for clients with documented incontinence associated dermatitis.

*Note:* Skin sealants, protectants, moisturizers, and ointments for diagnoses other than incontinence-associated dermatitis (e.g., wounds, decubitus ulcers, periwound skin complications, peristomal skin complications) may be considered for prior authorization through home health services wound care supplies and systems.

Incontinence-associated dermatitis is classified using the following categories:

- **Category 1.** A small area of skin breakdown (less than 20 cm2) with mild redness (blotchy and non-uniform) and mild erosion involving the epidermis only.
- **Category 2.** A moderate area of skin breakdown (20 cm2 through 50 cm2) with moderate redness (severe in spots, but not uniform in appearance) and moderate erosion involving epidermis and dermis with no or little exudate.
- **Category 3.** A large area of skin breakdown (greater than 50 cm2) with severe redness (uniformly severe in appearance) and severe erosion of epidermis with moderate involvement of the dermis and no or small volume of exudate.
- **Category 4.** A large area of skin breakdown (greater than 50 cm2) with severe redness (uniformly severe in appearance) and extreme erosion of epidermis and dermis with moderate volume of persistent exudate.

The category of incontinence-based dermatitis determines the benefit limitation and whether to use a modifier when submitting a claim for procedure code A6250, as shown in the following table:

<table>
<thead>
<tr>
<th>Dermatitis Category</th>
<th>Procedure Code</th>
<th>Modifier</th>
<th>Benefit Limitation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Category 1 or 2</td>
<td>A6250</td>
<td>UA</td>
<td>Up to 2 containers (no less than 4 ounces per container) of skin sealants, protectants, moisturizers, and ointments per month.</td>
</tr>
<tr>
<td>Category 3 or 4</td>
<td>A6250</td>
<td>None</td>
<td>Skin sealants, protectants, moisturizers, and ointments may be considered.</td>
</tr>
</tbody>
</table>
2.4.9.1.2 Diapers, Briefs, and Liners

The following procedure codes must be used when billing for diapers, briefs, and liners and are limited to a combined total of 240 per month:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Maximum Limitation</th>
</tr>
</thead>
<tbody>
<tr>
<td>T4521-T4528</td>
<td></td>
</tr>
<tr>
<td>T4529-T4532</td>
<td></td>
</tr>
<tr>
<td>T4533-T4535</td>
<td></td>
</tr>
</tbody>
</table>

2.4.9.1.3 Diaper Wipes

Diaper wipes may be considered for clients who are receiving diapers, briefs, or pull-ons through CCP. Providers must use procedure code A4335 and modifier U9 when billing for diaper wipes. Procedure code A4335 is limited to 2 boxes per month.

2.4.9.1.4 Underpads

Underpads may be considered for clients who are receiving diapers, briefs, or pull-ons through CCP. Providers must use procedure code A4554 when billing for underpads. Procedure code A4554 is limited to 120 per month.

2.4.9.1.5 External Urinary Collection Devices

External urinary collection devices, including, but not limited to, male external catheters, female collection devices, and related supplies may be considered with a documented medical condition resulting in an increased urine or stool output beyond the typical output.

The following procedure codes must be used when billing for external urinary collection devices:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Maximum Limitation</th>
</tr>
</thead>
<tbody>
<tr>
<td>A4326</td>
<td>31 per month</td>
</tr>
<tr>
<td>A4327</td>
<td>4 per month</td>
</tr>
<tr>
<td>A4328</td>
<td>4 per month</td>
</tr>
<tr>
<td>A4349</td>
<td>31 per month</td>
</tr>
</tbody>
</table>

2.4.9.2 Prior Authorization and Documentation Requirements

Prior authorization is required for incontinence supplies through CCP.

A determination is made by HHSC or its designee as to the number of incontinence supplies prior authorized based on the client’s medical needs.

Additional quantities may be considered with documentation of medical necessity.

The quantity of incontinence supplies billed for a one-month period must be consistent with the number of times per day the physician has ordered the supply be used on the CCP Prior Authorization Request Form.

To request prior authorization for incontinence supplies, the following documentation must be provided for the items requested:

- Accurate diagnostic information pertaining to the underlying diagnosis or condition as well as any other medical diagnoses or conditions, to include the client’s overall health status
- Diagnosis or condition causing increased urination or stooling
- Client’s height, weight, and waist size
- Number of times per day the physician has ordered the supply be used
• Quantity of disposable supplies requested per month

Additional information may be requested to clarify or complete a request for the supplies and equipment.

2.4.10 Mobility Aids

2.4.10.1 Services, Benefits, and Limitations

Mobility aids and related supplies, including, but not limited to, strollers, special-needs car seats, and travel safety restraints are a benefit to assist clients to move about in their environment when medically necessary and Federal Financial Participation is available.

Mobility aids and related supplies may be considered for reimbursement through CCP for clients who are birth through 20 years of age who are CCP-eligible when documentation submitted clearly shows that the equipment is medically necessary and will correct or ameliorate the client’s disability or physical or mental illness or condition. Documentation must include the following:

- The client’s mobility status would be compromised without the requested equipment.
- The requested equipment or supplies are safe for use in the home.

Mobility aids may be considered through CCP if the requested equipment is not available through Texas Medicaid (Title XIX) Home Health Services or the client does not meet criteria through Texas Medicaid (Title XIX) Home Health Services.

Mobility aid lifts for vehicles and vehicle modifications are not reimbursed through Texas Medicaid in accordance with federal regulations.

Note: Permanent ramps, vehicle ramps, and home modifications are not a benefit of Texas Medicaid.

2.4.10.1.1 Portable Client Lifts for Outside the Home Setting

Providers must use procedure code E0635 with modifier TG for the purchase of the portable client lift and is limited to once per lifetime, any provider. Portable electric lifts are a benefit of Texas Medicaid if they can fold-up for transport and can be used outside the home setting if the client must attend health-related services that require an overnight stay in a noninstitutional setting.

2.4.10.1.2 Wheeled Mobility Systems

A wheeled mobility system is a manual or power wheelchair, or scooter that is a customized power or manual mobility device, or a feature or component of the mobility device, including, but not limited to, the following:

- Seated positioning components
- Manual seating options
- Adjustable frame
- Other complex or specialized components

A stroller (a multipositional client transfer system with integrated seat, operated by caregiver) for medical needs may be considered for clients who are CCP-eligible when documentation submitted clearly shows that the equipment is medically necessary and will correct or ameliorate the client’s disability or physical or mental illness or condition. Documentation must include the following:

- The client does not own another seating system, including, but not limited to, a wheelchair.
- The client’s condition does not require another type of seating system, including, but not limited to, a wheelchair.
If the client does not meet criteria for a stroller, a wheelchair may be considered through Texas Medicaid (Title XIX) Home Health Services.

Scooters may be considered for reimbursement through Texas Medicaid (Title XIX) Home Health Services.

Definitions and Responsibilities
The following definitions and responsibilities apply to the provision of wheeled mobility systems:

Adjustments. The adjustment of a component or feature of a wheeled mobility system. Adjustments require labor only and do not include the addition, modification, or replacement of components or supplies needed to complete the adjustment.

Texas Medicaid will consider adjustments only to client-owned equipment that is considered a benefit of Texas Medicaid.

Major Modification. The addition of a custom or specialized feature or component of a wheeled mobility system that did not previously exist on the system due to changes in the client’s needs, including but not limited to, the items listed in this paragraph. This definition also includes the modification of a custom or specialized feature or component due to a change in the client’s needs, including but not limited to, the following:

- Seated positioning components including, but not limited to, specialized seating or positioning components
- Powered or manual seating options including, but not limited to, power tilt or recline seating systems and seat elevation systems
- Specialty driving controls including, but not limited to, nonstandard alternative power drive control systems
- Adjustable frame including, but not limited to, nonstandard seat frame dimensions
- Other complex or specialized components including, but not limited to, power elevating leg rests and specialized electronic interfaces

The replacement of a previously existing custom or specialized feature or component with an identical or comparable component is considered a repair and not a major modification.

Texas Medicaid will consider major modifications only to client-owned equipment that is considered a benefit of Texas Medicaid.

Minor Modification. The addition or modification of non-custom or non-specialized features or components due to changes in the client’s needs, including but not limited to, the following:

- Armpads/armrests
- Legrests/Leg extensions
- Modification of seating and positioning components to accommodate for a change in the client’s size.

The replacement of a previously existing noncustom or nonspecialized feature or component with an identical or comparable component is considered a repair and not a minor modification.

Texas Medicaid will consider minor modifications only to client-owned equipment that is considered a benefit of Texas Medicaid.

Mobility Related Activity to Daily Living (MRADL). An activity of daily living that requires the use of mobility aids (i.e., toileting, feeding, dressing, grooming, and bathing).

Occupational Therapist. A person who is currently licensed by the Executive Council of Physical Therapy & Occupational Therapy Examiners to practice OT.
Physical Therapist. A person who is currently licensed by the Executive Council of Physical Therapy & Occupational Therapy Examiners to practice PT.

Note: An occupational or physical therapist is responsible for completing the required seating assessment for a client to obtain a wheeled mobility system.

Qualified Rehabilitation Professional (QRP). A QRP is a person who meets one or more of the following criteria:

- Holds a certification as an Assistive Technology Professional (ATP) or a Rehabilitation Engineering Technologist (RET) issued by, and in good standing with, the Rehabilitation Engineering and Assistive Technology Society of North America (RESNA).
- Holds a certification as a Seating and Mobility Specialist (SMS) issued by, and in good standing with, RESNA.
- Holds a certification as a Certified Rehabilitation Technology Supplier (CRTS) issued by, and in good standing with, the National Registry of Rehabilitation Technology Suppliers (NRRTS).
- The QRP is responsible for:
  - Being present at and involved in the seating assessment of the client for the rental or purchase of a wheeled mobility system.
  - Being present at the time of delivery of the wheeled mobility system to direct the fitting of the system to ensure that the system functions correctly relative to the client.

Repairs. The replacement of a component or feature of a wheeled mobility system with an identical or comparable component that does not change the size or function of the system due to the component no longer functioning as designed.

Texas Medicaid will consider repairs only to client-owned equipment that is considered a benefit of Texas Medicaid.

2.4.10.1.3 Seating Assessment

A seating assessment is required for the rental or purchase of any device meeting the definition of a wheeled mobility system or purchase of any device meeting the definition of a wheelchair for a client with a congenital or neurological condition, myopathy, or skeletal deformity that requires the use of a wheelchair as defined under subsection 2.4.10.1.2, “Wheeled Mobility Systems” in this handbook.

A seating assessment with measurements, including specifications for exact mobility and seating equipment and all necessary accessories, must be completed by a physician, licensed occupational therapist, or licensed physical therapist.

A QRP directly employed or contracted by the DME provider must be present at, and participate in all seating assessments, including those provided by a physician.

Upon completion of the seating assessment, the QRP must attest to his or her participation in the assessment by signing the Wheelchair/Scooter/Stroller Seating Assessment Form. This form must be submitted with all requests for wheeled mobility systems.

When the practitioner completing the seating assessment is an occupational therapist or physical therapist, the occupational therapist or physical therapist may perform the seating assessment as the therapist, or as the QRP, but may not perform in both roles at the same time. If the occupational therapist or physical therapist is attending the seating assessment as the QRP, the occupational therapist or physical therapist must meet the credentialing requirements and be enrolled in Texas Medicaid as a QRP.

If the seating assessment is completed by a physician, reimbursement is considered part of the physicians office visit and will not be reimbursed separately.
The practitioner (occupational therapist or physical therapist) completing the assessment must submit procedure code 97001 or 97003 with modifier U1, to bill for the seating assessment.

Services for the QRP’s participation in the seating assessment must be submitted for reimbursement by the DME provider billing for the wheeled mobility system using procedure code 97542 with modifier U1. The DME provider must include the QRP specialty as the performing provider on the claim for all components of the wheeled mobility system, including the QRP’s participation in the seating assessment.

**Note:** Seating assessment services performed by a QRP are limited to four units (one hour).

### 2.4.10.1.4 Fitting of Custom Wheeled Mobility Systems

The fitting of a wheeled mobility system is defined as the time the QRP spends with the client fitting the various systems and components of the system to the client. It may also include time spent training the client or caregiver in the use of the wheeled mobility system. Time spent setting up the system, or travel time without the client present, is not included.

A fitting is required for any device meeting the definition of a wheeled mobility system as defined under subsection 2.4.10.1.2, “Wheeled Mobility Systems” in this handbook.

The fitting of a wheeled mobility system must be:

- Performed by the same QRP that was present for, and participated in, the seating assessment of the client.
- Completed prior to submitting a claim for reimbursement of a wheeled mobility system.

The QRP performing the fitting will:

- Verify the wheeled mobility system has been properly fitted to the client.
- Verify that the wheeled mobility system will meet the client’s functional needs for seating, positioning, and mobility.
- Verify that the client, parent, guardian of the client, and/or caregiver of the client has received training and instruction regarding the wheeled mobility system’s proper use and maintenance.

The QRP must complete and sign the DME Certification and Receipt form after the wheeled mobility system has been delivered and fitted to the client. Completion of this form by the QRP signifies that all components of the fitting as outlined above have been satisfied. The form must be completed prior to submission of a claim for a wheeled mobility system, and submitted to HHSC’s designee according to instructions on the form to allow for proper claims processing.

Services for fitting of a wheeled mobility system by the QRP must be submitted for reimbursement by the DME provider of the wheeled mobility system using procedure code 97542 with modifier U2. The DME provider must list the QRP who participated in the seating assessment as the performing provider on the claim for all components of the wheeled mobility system, including the fitting performed by the QRP.

Procedure code 97542 with modifier U2 must be billed on the same claim as the procedure code(s) for the wheeled mobility system in order for both services to be reimbursed.

### 2.4.10.1.5 Modifications, Adjustments, and Repairs

Major and minor modifications, adjustments, and repairs to standard mobility aid equipment within the first six months after delivery are considered part of the purchase price.

Modifications, adjustments, and repairs, as well as the associated services by the QRP for the seating assessment and fitting, within the first six months after delivery are considered part of the purchase price.
Major modifications to a wheeled mobility system requires the completion of a new seating assessment by a qualified practitioner (physician, physical therapist, or occupational therapist), with the participation of a QRP.

Minor modifications, adjustments, or repair to a wheeled mobility system does not require the completion of a new seating assessment.

A wheeled mobility system that has been fitted and delivered to the client’s home by a QRP and then found to be inappropriate for the client’s condition will not be eligible for an upgrade, replacement, or major modification within the first six months following purchase unless there has been a significant change in the client’s condition. The significant change in the client’s condition must be documented by a physician familiar with the client.

Claims submitted for equipment provided as a minor modification or repair to a wheeled mobility system must be submitted with modifier RB.

2.4.10.1.6 Stroller Ramps—Portable and Threshold
A portable ramp is defined as a ramp that is able to be carried as needed to access a home and weighing no more than 90 pounds and measuring no more than 10 feet in length. A threshold ramp is defined as a ramp that provides access over elevated thresholds.

Portable ramps exceeding the above criteria may be considered on a case-by-case basis with documentation of medical necessity and a statement that the requested equipment is safe for use.

Ramps may be considered for rental for short-term disabilities. Ramps may be considered for purchase for long-term disabilities.

Providers must use procedure code E1399 for the purchase of portable and threshold stroller ramps.

2.4.10.1.7 Feeder Seats, Floor Sitters, Corner Chairs, and Travel Chairs
Feeder seats, floor sitters, corner chairs, and travel chairs are not considered medically necessary and are not a benefit of CCP. If a client requires seating support and meets the criteria for a seating system, a stroller may be considered for reimbursement with prior authorization through CCP, or a wheelchair may be considered through Texas Medicaid (Title XIX) Home Health Services.

2.4.10.1.8 Special-Needs Car Seats
A special-needs car seat may be considered for a client who has outgrown an infant car seat and is unable to travel safely in a booster seat or seat belt.

A special-needs car seat for a client who does not meet the criteria may be considered on a case-by-case basis with documentation of medical necessity upon review by the state or its designee.

Providers must use procedure code E1399 for the purchase of a special-need car seat.

2.4.10.1.9 Travel Safety Restraints
A travel safety restraint and ankle or wrist belts may be considered for clients with a medical condition requiring transportation in either a prone or supine position. The DME provider and the prescribing physician familiar with the client must maintain documentation in the client’s medical record supporting the medical necessity of the travel safety restraint.

Providers must use procedure code E0700 for the purchase of travel safety restraints, including ankle and wrist belts.

2.4.10.2 Prior Authorization and Documentation Requirements
Prior authorization is required for all mobility aids and related services, except travel safety restraints for clients with a medical condition requiring them to be transported in either a prone or supine position.
Mobility aid equipment that has been purchased is anticipated to last a minimum of five years and may be considered for replacement with prior authorization when five years have passed or the equipment is no longer repairable. Prior authorization for replacement of mobility aid equipment may also be considered when loss or irreparable damage has occurred. A copy of the police or fire report, when appropriate, and the measures to be taken to prevent recurrence must be submitted.

When prior authorization of a mobility aid replacement is requested before five years have passed, the following information must be submitted with the request:

- A statement from the prescribing physician or licensed occupational therapist or physical therapist stating that the equipment no longer meets the client’s needs
- Documentation supporting why the equipment no longer meets the client’s needs

HHSC or its designee determines whether the equipment is rented, purchased, repaired, or modified based on the client’s needs, duration of use, and age of equipment.

Rental of equipment includes all necessary accessories, supplies, adjustments, repairs, and replacement parts.

2.4.10.2.1 Portable Client Lifts for Outside the Home Setting

Prior authorization is required and will be considered on a case-by-case basis for portable client electric lifts that can fold-up for transport and that are necessary for use outside the home setting.

The provider must submit a prior authorization request with the following documentation for consideration of medical necessity:

- An explanation of why a home-based portable lift will not meet the client’s needs.
- A description of the circumstances, including duration of need, when the client is required to attend health-related services requiring an overnight stay in a non-institutional setting.
- The family member or caregiver(s) supporting the client in the use of the portable client lift when required to travel outside the home setting for health related visits.

2.4.10.2.2 Wheeled Mobility System

A medical stroller does not have the capacity to accommodate the client’s growth. Strollers for medical use may be considered for prior authorization when all of the following criteria are met:

- The client weighs 30 pounds or more.
- The client does not already own another seating system, including, but not limited to, a standard or custom wheelchair.
- The stroller must have a firm back and seat, or insert.
- The client is expected to be ambulatory within one year of the request date or is not expected to need a wheelchair within two years of the request date.

To request prior authorization for the purchase of procedure code E1035, the criteria must be met for the level of stroller requested:

- **Level One, Basic Stroller.** The client meets the criteria for a stroller. Providers must use procedure code E1035.
- **Level Two, Stroller with Tray for Oxygen or Ventilator.** The client meets the criteria for a level-one stroller and is oxygen- or ventilator-dependent. Providers must use procedure code E1035 with modifier TF.
- **Level Three, Stroller with Positioning Inserts.** The client meets the criteria for a level-one or level-two stroller and requires additional positioning support. Providers must use procedure code E1035 with modifier TG.
The following supporting documentation must be submitted:

- A completed Wheelchair/Stroller Seating Assessment Form that includes documentation supporting medical necessity. This documentation must address why the client is unable to ambulate a minimum of 10 feet due to his or her condition (including, but not limited to, AIDS, sickle cell anemia, fractures, a chronic diagnosis, or chemotherapy), or if able to ambulate further, why a stroller is required to meet the client’s needs.

- If the client is three years of age or older, documentation must support that the client’s condition, stature, weight, and positioning needs allow adequate support from a stroller.

  **Note:** A stroller may be considered on a case-by-case basis with documentation of medical necessity for a client who does not meet the criteria listed above.

2.4.10.2.3 Modifications

Modifications to custom equipment after the first six months from fitting and delivery may be considered for prior authorization should a change occur in the client’s needs, capabilities, or physical and mental capability, which cannot be anticipated.

Documentation supporting the medical necessity of the requested modification must include the following:

- Description of the change in the client’s condition that requires accommodation by different seating, drive controls, electronics, or other mobility base components.

- All projected changes in the client’s mobility needs.

- The date of purchase, the serial number of the current equipment, and the cost of purchasing new equipment versus modifying current equipment.

Major modifications to a wheeled mobility system also require that a new seating assessment be completed and submitted with the prior authorization request. A request for authorization of the QRP’s participation in the seating assessment for the major modification must be included with the prior authorization request for the major modification.

Minor modifications to a wheeled mobility system do not require the completion of a new seating assessment.

Requests for equipment submitted as a minor modification to a wheeled mobility system must be submitted with modifier RB.

2.4.10.2.4 Adjustments

Adjustments within the first six months after delivery, including adjustments to a wheeled mobility system within the first six months after fitting and delivery by a QRP will not be prior authorized.

A seating or positioning component alteration to accommodate a change in the client’s size (height or weight) that does not require replacement components is considered an adjustment and not a major modification.

A maximum of one hour of labor for adjustments may be prior authorized as needed after the first six months from delivery.

Documentation must include the date of purchase, the serial number of the current equipment, and the reason for adjustments.

2.4.10.2.5 Repairs

Repairs to client owned equipment may be considered for prior authorization, as needed, with documentation of medical necessity. Technician fees are considered part of the cost of the repair.
HHSC or its designee reserves the right to request additional documentation about the need for repairs when there is evidence of abuse or neglect to equipment by the client, client’s family or caregiver. Requests for repairs when there is documented proof of abuse or neglect will not be authorized.

Requests for equipment submitted as a repair to a wheeled mobility system must be submitted with modifier RB.

Providers are responsible for maintaining documentation in the client’s medical record specifying the repairs and supporting medical necessity.

Documentation must include the date of purchase and serial number of the current equipment, the cause of the damage or need for repairs, the steps the client or caregiver will take to prevent further damage if repairs are due to an accident and, when requested the cost of purchasing new equipment as opposed to repairing current equipment.

2.4.10.2.6 Seating Assessments

A seating assessment performed by an occupational therapist, physical therapist, or a physician, with the participation of a QRP, does not require prior authorization. A seating assessment performed by a physician is considered part of the physician E/M service.

A seating assessment must be completed by a physician or licensed occupational therapist or physical therapist, who is not employed by the equipment supplier, before requesting prior authorization.

The seating assessment must clearly show that the equipment is medically necessary and will correct or ameliorate the client’s disability or physical or mental illness or condition.

The QRP’s participation in the seating assessment requires authorization before the service can be reimbursed. Authorization must be requested at the same time and on the same prior authorization request form as the prior authorization request for the QRP fitting and the wheeled mobility system or major modification to the wheeled mobility system.

- Prior authorization requests for the QRP’s participation in the seating assessment will be returned to the provider if the seating assessment is requested separately from the prior authorization for the QRP fitting and the wheeled mobility system or major modification to the wheeled mobility system.

- The QRP participating in the seating assessment must be directly employed by, or contracted with, the DME provider requesting the wheeled mobility system or major modification to a wheeled mobility system.

- An authorization for the QRP’s participation in the seating assessment for a wheeled mobility system or major modification to a wheeled mobility system may be issued to the QRP in 15-minute increments, for a time period of up to one hour (4 units).

Documentation must include the following:

- Explain how the family will be trained in the use of the equipment.

- Anticipate changes in the client’s needs and include anticipated modifications or accessory needs, as well as the anticipated width of the medical stroller to allow client growth with use of lateral and thigh supports.

- Include significant medical information pertinent to the client’s mobility and how the requested equipment will accommodate these needs, including intellectual, postural, physical, sensory (visual and auditory), and physical status.

- Address trunk and head control, balance, arm and hand function, existence and severity of orthopedic deformities, any recent changes in the client’s physical or functional status, and any expected or potential surgeries that will improve or further limit mobility.

- Include information on the client’s current mobility and seating equipment, how long the client has been in the current equipment, and why it no longer meets the client’s needs.
• Include the client’s height, weight, and a description of where the equipment is to be used. Seating measurements are required.
• Include information on the accessibility of the client’s residence.
• Include manufacturer’s information, including the description of the specific base, any attached seating system components, and any attached accessories.

2.4.10.2.7 Stroller Ramps—Portable and Threshold
One portable and one threshold ramp for stroller access may be considered for prior authorization when documentation supports medical necessity and includes the following:
• Diagnosis with duration of expected need
• A diagram of the house showing the access points with the ground-to-floor elevation and any obstacles

A request for prior authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

Ramps may be considered for rental for short-term disabilities. Ramps may be considered for purchase for long-term disabilities.

Mobility aid lifts for vehicles and vehicle modifications are not reimbursed through Texas Medicaid according to federal regulations.

**Note:** Permanent ramps, vehicle ramps, and home modifications are not a benefit of Texas Medicaid.

2.4.10.2.8 Special-Needs Car Seats
A special-needs car seat may be considered for prior authorization for a client who has outgrown an infant car seat and is unable to travel safely in a booster seat or seat belt. Consideration should be given to the manufacturer’s weight and height limitations, and must reflect allowances for at least 12 months of growth.

Car seat accessories available from the manufacturer may be considered for prior authorization when medically necessary for correct positioning.

A special-needs car seat must have a top tether installed. The top tether is essential for proper use of the car seat. The installer is reimbursed for the installation by the manufacturer. The provider must maintain a statement that has been signed and dated by the client’s parent or legal guardian in the client’s medical record that states the following:
• A top tether has been installed in the vehicle in which the client will be transported by a manufacturer-trained vendor.
• Training in the correct use of the car seat has been provided by a manufacturer-trained vendor.
• The client’s parent or guardian has received instruction and has demonstrated the correct use of the car seat to a manufacturer-trained vendor.

To request prior authorization for a special-needs car seat or accessories, all of the following criteria must be met:
• The client must weigh at least 40 pounds or be at least 40 inches in height.
• The supporting documentation must include the following:
  • Accurate diagnostic information pertaining to the underlying diagnosis or condition as well as any other medical diagnoses or conditions, including the client’s overall health status.
• A description of the client’s postural condition specifically including head and trunk control (or lack of control) and why a booster chair or seatbelt will not meet the client’s needs. The car seat must be able to support the head if head control is poor.

• The expected long term need for the special needs car seat.

• A copy of the manufacturer’s certification for the installer’s training to insert the specified car seat, such as Columbia Medical Manufacturing Corporation for Columbia products.

### 2.4.11 Nutritional Products

#### 2.4.11.1 Services, Benefits, and Limitations

Medical nutritional products including enteral formulas and food thickener, may be approved for clients who are CCP-eligible, birth through 20 years of age, and have specialized nutritional requirements. Medical nutritional products must be prescribed by a physician and be medically necessary.

Nutritional products may be reimbursed with the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>Limitations</th>
</tr>
</thead>
<tbody>
<tr>
<td>B4100 B4103 B4104 B4149 B4150 B4152 B4153 B4154 B4155 B4157 B4158 B4159 B4160 B4161 B4162</td>
<td></td>
</tr>
</tbody>
</table>

Enteral nutrition supplies and equipment may be reimbursed with the following procedure codes and limitations:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>Limitations</th>
</tr>
</thead>
<tbody>
<tr>
<td>A4322</td>
<td>4 per month</td>
</tr>
<tr>
<td>A5200</td>
<td>2 per month</td>
</tr>
<tr>
<td>B4034</td>
<td>Up to 31 per month</td>
</tr>
<tr>
<td>B4035</td>
<td>Up to 31 per month</td>
</tr>
<tr>
<td>B4036</td>
<td>Up to 31 per month</td>

<tr>
<td>B9998 with modifier U2</td>
<td>2 per rolling year</td>
</tr>
<tr>
<td>B9998 with modifier U3</td>
<td>4 per month</td>
</tr>
<tr>
<td>B9998 with modifier U5</td>
<td>4 per month</td>
</tr>
<tr>
<td>T1999*</td>
<td>As needed* If procedure code T1999 is used for a needleless syringe, the allowed amount is eight per month.</td>
</tr>
</tbody>
</table>

* Appropriate limitations for miscellaneous procedure codes B9998 and T1999 are determined on a case-by-case basis through prior authorization. Specific items may be requested using procedure code B9998 and the modifiers outlined in the table above.
The purchase of a backpack or carrying case for a portable enteral feeding pump may be a benefit of CCP, using procedure code B9998, if it is medically necessary and prior-authorized.

Clients for whom nutritional products are being requested may benefit from nutritional counseling. Nutritional counseling is a benefit of CCP if it is provided to treat, prevent, or minimize the effects of illness, injury, or other impairment.

Refer to: Subsection 2.6, “Medical Nutrition Counseling Services (CCP)” in this handbook for information about nutritional counseling.

2.4.11.2 Women, Infants, and Children Program (WIC)

Generic nutritional products that have been approved by the United States Department of Agriculture (USDA) for use in the Women, Infants, and Children Program (WIC) may be approved for use by CCP clients.

While CCP does not require that a client access WIC, it is only recommended as another source of services for clients who are 4 years of age and younger, or clients who are pregnant or breast feeding. Nutritional products are not provided to infants who are 11 months of age and younger unless medical necessity is documented.

2.4.11.3 Noncovered Services

CCP will not cover the following:

- Nutritional products that are traditionally used for infant feeding.
- Nutritional products for the primary diagnosis of failure to thrive, failure to gain weight, or lack of growth. The underlying cause of failure to thrive, gain weight, and lack of growth is required.
- Nutritional bars.
- Nutritional products for clients who could be sustained on an age-appropriate diet.

2.4.11.4 Prior Authorization and Documentation Requirements

Prior authorization for nutritional products is not required for a client who meets at least one of the following criteria:

- Client receives all or part of their nutritional intake through a tube.
- Client has a metabolic disorder that has been documented with one of the following diagnosis codes:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>2700 2701 2702 2703 2704 2705 2706 2707 2708 2709</td>

<tr>
<td>2798 2799 V1367 V441 V444 V551</td>
</tr>
</tbody>
</table>
Prior authorization is required for nutritional products that are provided through CCP to clients who do not meet the criteria above and for all related supplies and equipment.

A completed CCP Prior Authorization Request Form that prescribes the DME and supplies must be signed and dated by a prescribing physician who was familiar with the client before making the authorization request. All signatures must be current, unaltered, original, and handwritten. Computerized or stamped signatures will not be accepted. The completed CCP Prior Authorization Request Form must include the procedure codes and numerical quantities for the services requested. A copy of the completed, signed, and dated CCP Prior Authorization Form must be maintained by the prescribing physician in the client’s medical record at the provider’s place of business.

Requests for prior authorization must include the following documentation:

- Accurate diagnostic information pertaining to the underlying diagnosis or condition that resulted in the requirement for a nutritional product, as well as any other medical diagnoses or conditions, including:
  - The client’s overall health status.
  - Height and weight.
  - Growth history and growth charts.
  - Why the client cannot be maintained on an age-appropriate diet.
  - Other formulas tried and why they did not meet the client’s needs.
- Diagnosis or condition (including the appropriate ICD-9-CM code).
- The goals and timelines on the medical plan of care.
- Total caloric intake prescribed by the physician.
- Acknowledgement that the client has a feeding tube in place.

Related supplies and equipment for clients who require nutritional products may be considered for prior authorization when the criteria for nutritional products are met and medical necessity is included for each item requested.

Prior authorization may be given for up to 12 months. Prior authorization may be recertified with documentation that supports the ongoing medical necessity of the requested nutritional products.

A retrospective review may be performed to ensure that the documentation included in the client’s medical record supports the medical necessity of the requested service.

2.4.11.4.1 Nutritional Products

Requests for prior authorization, when required, must include the necessary product information.

Enteral formulas consisting of semi-synthetic intact protein or protein isolates (procedure codes B4150 and B4152) are appropriate for the majority of clients who require enteral nutrition.

Special enteral formula or additives (procedure code B4104) may be considered for prior authorization with supporting documentation submitted by the client’s physician indicating the client’s medical needs for these special enteral formulas. Special enteral formula may be reimbursed with the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>B4149</td>
</tr>
</tbody>
</table>

Food thickener may be considered for clients with a swallowing disorder.
Prior authorization of nutritional pudding products may be considered for children who have a documented oropharyngeal motor dysfunction and receive greater than 50 percent of their daily caloric intake from a nutritional pudding product.

Requests for electrolyte replacement products, such as Pedialyte or Oralyte, require documentation of medical necessity, including:
- The underlying acute or chronic medical diagnoses or conditions that indicate the need to replace fluid and electrolyte losses.
- The presence of mild to moderate dehydration due to the persistent mild to moderate diarrhea or vomiting.

Electrolyte replacement products are not indicated for clients with:
- Intractable vomiting
- Adynamic ileus
- Intestinal obstruction or perforated bowel
- Anuria, oliguria, or impaired homeostatic mechanism
- Severe, continuing diarrhea, when intended for use as the sole therapy

**Nasogastric, Gastrostomy, or Jejunostomy Feeding Tube**
Feeding tubes require prior authorization. Additional feeding tubes may be prior authorized if the submitted documentation supports medical necessity, such as documentation of an infection at the gastrostomy site, leakage, or occlusion.

**Enteral Feeding Pumps**
The prior authorization of the lease or purchase of enteral feeding pumps may be considered with documentation of medical necessity that indicates that the client meets the following criteria:
- Gravity or syringe feedings are not medically indicated.
- The client requires an administration rate of less than 100 ml. per hr.
- The client requires night-time feedings.
- The client has one of the following medical conditions (this list is not all-inclusive):
  - Reflux or aspiration
  - Severe diarrhea
  - Dumping syndrome
  - Blood glucose fluctuations
  - Circulatory overload

**Enteral Supplies**
Enteral supplies require prior authorization, with the exception of irrigation syringes (procedure code A4322) and percutaneous catheter/tube anchoring devices (procedure code A5200) with the allowable limits.

Additional enteral feeding supply kits beyond the stated benefit limitation may be considered for prior authorization on a case-by-case basis with documentation of medical necessity.

Procedure code B4034 will not be prior authorized for use in place of procedure code A4322 for irrigation syringes if they are not part of a bolus administration kit. Gravity bags and pump nutritional containers are included in the feeding supply kits and will not be prior authorized separately.
Specific items may be considered for prior authorization using miscellaneous procedure code B9998 and modifier U1, U2, U3, or U5.

Requests for a backpack or carrying case or for a portable enteral feeding pump will be considered for prior authorization for clients who meet all of the following medical necessity criteria:

- The client requires enteral feedings that last more than eight continuous hours, or feeding intervals that are greater than the time that the client must be away from home to:
  - Attend school or work.
  - Participate in extensive, physician-ordered outpatient therapies.
  - Attend frequent, multiple medical appointments.
- The client is ambulatory or uses a wheelchair that will not support the use of a portable pump by other means, such as an intravenous (IV) pole.
- The portable enteral feeding pump is client-owned.

### 2.4.11.5 Managed Care Clients

Nutritional products that are provided to WIC clients are carved-out of the Medicaid Managed Care Program and must be billed to TMHP for payment consideration. Carved-out services are those that are rendered to Medicaid Managed Care clients but are administered by TMHP and not the client’s managed care organization (MCO).

Nutrition products that are provided to other Medicaid Managed Care Program clients (other than WIC clients) are not carved out and must be submitted to the managed care organization that administers the client’s Medicaid managed care benefits.

### 2.4.12 Hospital Beds, Cribs, and Equipment

#### 2.4.12.1 Services, Benefits, and Limitations

The following items may be considered under CCP:

- Pediatric hospital cribs and beds
- Enclosure frame, canopy, or bubble tops
- Positioning pillows or cushions
- Reflux wedges
- Reflux slings

Non-pediatric hospital cribs or enclosed beds can be considered through Texas Medicaid (Title XIX) Home Health Services.

The items listed above may be a benefit for clients who are CCP-eligible when documentation submitted clearly shows that the equipment is medically necessary and will correct or ameliorate the client’s disability or physical or mental illness or condition. Hospital beds, cribs, and equipment are a benefit when all the following criteria are met:

- FFP must be available.
- The requested equipment or supplies must be safe for use in the home.

A pediatric hospital bed or pediatric crib is defined as a fully enclosed bed with all of the following features:

- A bed that allows adjustment of the head and foot of the bed.
- A manual pediatric hospital bed (procedure code E0328) or pediatric crib (procedure code E0300) allows manual adjustment to the head and leg elevation.
• A semi-electric or fully electric hospital bed (procedure code E0329) allows manual or electric adjustments to height and electric adjustments to head and leg elevation.

• A headboard

• A footboard

• A mattress

• Side rails of any type (A side rail is defined as a hinged or removable rail, board, or panel.)

Pediatric hospital beds and pediatric cribs that do not have all of these features will not be considered for prior authorization.

A bed that has side rails that extend 24 inches or less above the mattress is considered a pediatric hospital bed (procedure code E0328 or E0329). A pediatric hospital bed may be fixed or variable height. Variable height beds may be adjusted manually or electrically as required for the client’s medical condition.

Procedure codes E0328 and E0329 are restricted to clients who are 20 years of age and younger.

A bed that has side rails that extend more than 24 inches above the mattress is considered a pediatric crib (procedure code E0300).

A pediatric hospital bed or pediatric crib of any width that has all of the features defined above may be considered for prior authorization using only procedure code E0300, E0328, or E0329.

Hospital beds that are not fully enclosed can be considered through Texas Medicaid home health services.

Note: Texas Medicaid defines fully enclosed as having 360-degree side enclosures.

The following procedure codes are used when billing for the rental or purchase of pediatric hospital beds, cribs, and equipment:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>E0190*</td>
<td>E0300</td>
</tr>
</tbody>
</table>

* Purchase only

Note: Procedure code E1399 may be used for reflux slings only.

The purchase of a safety enclosure frame, canopy, or bubble top (procedure code E0316) may be a benefit when the protective crib top or bubble top is for safety use. It is not considered a benefit when it is used as a restraint or for the convenience of family or caregivers.

Procedure code E0316 may be used in conjunction with procedure codes E0300, E0328, or E0329 to request a pediatric fully-enclosed bed with a canopy.

Enclosed bed systems that are not approved by the Food and Drug Administration (FDA) are not a covered benefit.

Reflux slings or wedges may be considered for clients who are birth through 11 months of age. Reflux slings or wedges may be used as positioning devices for infants who require elevation after feedings when prescribed by a physician as medically necessary and appropriate.

Procedure code E0190 with modifier UD must be used to bill the purchase of reflex wedges and positional devices (positioning pillows and cushions). This code and modifier will require manual pricing. Procedure code E0190 is limited to once per three years, per client, any provider.

Procedure code K0739 may be reimbursed for the repair of equipment.
2.4.12.2 Prior Authorization and Documentation Requirements

Prior authorization is required for all DME and services provided through CCP, including any accessories, modifications, adjustments, replacements, and repairs to the equipment.

To be considered for prior authorization, the provider must include all of the following to support medical necessity:

- The diagnosis, medical needs, treatments, developmental level, and functional skills of the child. A diagnosis alone is insufficient information to consider prior authorization of the requested equipment.
- The age, length, and weight of the child.
- A description of any other devices that have been used, the length of time used, and why they were ineffective.
- How the requested equipment will correct or ameliorate the client’s condition beyond that of a standard child’s crib, regular bed, or standard hospital bed.
- The name of the manufacturer and the manufacturer’s suggested retail price (MSRP).

A determination will be made by HHSC or its designee whether the equipment will be rented, purchased, repaired, or modified based on the client’s needs, duration of use, and age of equipment. All modifications, adjustments, and repairs within the first six months after delivery are considered to be part of the purchase price.

2.4.12.2.1 Hospital Beds and Safety Enclosure

Pediatric hospital beds and pediatric cribs (procedure codes E0300, E0316, E0328, and E0329) may be considered for prior authorization when the documentation submitted clearly shows that the requested bed or crib will correct or ameliorate the client’s condition. The documentation must meet at least one of the following criteria:

- The client’s medical condition requires positioning of the body in ways that are not feasible in an ordinary bed, including, but not limited to, the need for positioning to alleviate pain.
- The head of the bed must be elevated 30 or more degrees most of the time due to, but not limited to, congestive heart failure, chronic pulmonary disease, or problems with aspiration, and alternative measures, such as wedges or pillows, have been attempted but have failed to manage the client’s medical condition.

Note: Texas Medicaid defines a failed measure as having no clinically significant improvement after being introduced.

- The client requires traction equipment that can only be attached to a hospital bed.

A semi-electric or fully electric hospital bed (procedure code E0329) may be considered for prior authorization when the submitted documentation shows that the client has a medical condition that requires frequent changes in body position or might require an immediate change in body position to avert a life-threatening situation.

The safety enclosure frame, canopy, or bubble top may be considered for prior authorization with documentation that the protective canopy top or bubble will provide for the client’s safety. Prior authorization will not be considered when it will be used as a restraint or for the convenience of family or caregivers.
2.4.12.2.2 Positioning Devices

Reflux slings or wedges may be considered for prior authorization for clients who are 11 months of age and younger. These may be used as positioning devices for infants who require the head of the bed or crib to be elevated greater than 30 degrees after feedings when prescribed by a physician as medically necessary and appropriate.

Positioning pillows and cushions may be considered for prior authorization with documentation of medical necessity that indicates the item will provide for or assist in the positioning needs of the client to maintain proper body alignment and skin integrity. Documentation must include what other devices have been used previously and why they proved to be ineffective.

Items used for PT or rehabilitation in the home are provided by the therapist. Requests for authorization for these purposes will not be considered.

2.4.12.2.3 Repair or Replacement

Repairs require replacement of components that are no longer functional. Technician fees are considered to be part of the cost of the repair.

Repairs to client-owned equipment may be considered with documentation of medical necessity.

Providers are responsible for maintaining documentation in the client’s medical record specifying the repairs and supporting medical necessity.

Rental equipment may be considered during the period of repair. Routine maintenance of rented equipment is the provider’s responsibility.

Pediatric hospital cribs and beds, enclosed beds, and safety enclosure frames, canopies, or bubble tops that have been purchased are anticipated to last a minimum of five years.

Prior authorization for replacement may be considered within five years of purchase if one of the following occurs:

- There has been a significant change in the client’s condition such that the current equipment no longer meets the client’s needs.
- The equipment is no longer functional and cannot be repaired or it is not cost effective to repair.

Replacement equipment may also be considered if loss or irreparable damage has occurred. A copy of the police or fire report, when appropriate, and the measures to be taken to prevent reoccurrence must be submitted.

2.4.13 Phototherapy Devices

2.4.13.1 Services, Benefits, and Limitations

The rental of phototherapy devices (procedure code E0202) for use in the home are a benefit of Texas Medicaid for low-risk infants.

Low-risk infants are 35 or more weeks gestation at birth, without comorbidity, and with a total serum bilirubin (TSB) level within the following ranges:

<table>
<thead>
<tr>
<th>Infant’s Gestation at Birth</th>
<th>TSB for infant 0-24 hours of age*</th>
<th>TSB for infant 25-48 hours of age*</th>
<th>TSB for infant 49-72 hours of age*</th>
<th>TSB for infant older than 72 hours of age*</th>
</tr>
</thead>
<tbody>
<tr>
<td>38 weeks or greater</td>
<td>6–11</td>
<td>12–15</td>
<td>15–18</td>
<td>18–21</td>
</tr>
</tbody>
</table>

* Infant age when TSB level is drawn.
TSB levels are expressed in milligrams per deciliter (mg/dl).
Consideration for the rental of a home phototherapy device includes, but is not limited to, the following primary diagnoses:

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>7740</td>
</tr>
</tbody>
</table>

The DME provider must perform routine maintenance and provide instructions to the parent or guardian on the safe use of the phototherapy device. Rental of a phototherapy device is reimbursed as a daily global fee and is limited to one per day, per client, any provider.

Providers may not bill for those days the phototherapy device is at the client’s home and is not in use.

Skilled nursing (SN) visits for clients requiring phototherapy services may be reimbursed separately through Title XIX Home Health Services for nonroutine clinical teaching and assessment. Routine laboratory specimens are obtained during the SN visit, and may only be considered when the alternative to obtaining the specimen is to transport the client by ambulance.

If a client who is receiving PDN services requires phototherapy, instructions in the use of the equipment must be part of the existing PDN authorized hours. SN visits will not be allowed on the same day as PDN services.

In accordance with American Academy of Pediatrics (AAP) guidelines, providers must conduct ongoing assessments for risk of severe hyperbilirubinemia for all infants who receive home phototherapy.

Initiation of home phototherapy for medium- and high-risk infants is not a benefit of Texas Medicaid. As defined by the AAP, medium- and high-risk infants should be considered for more extensive initial treatment in an inpatient setting. Medium- and high-risk infants include, but are not limited to, those who have one of the following known risk factors:

- Acidosis
- Albumin less than 3.0 g/dl
- Asphyxia
- Glucose-6-phosphate dehydrogenase (G6PD) deficiency
- Isoimmune hemolytic disease (blood group incompatibility)
- Jaundice within the first 24 hours
- Sepsis
- Significant lethargy
- Temperature instability

### 2.4.13.2 Prior Authorization and Documentation Requirements

Home phototherapy devices require prior authorization and are provided only for the days that are medically necessary.

For low-risk infants, prior authorization will be considered for phototherapy services that begin in the home.

For stabilized infants who began phototherapy treatment during their hospitalization and have been discharged from the hospital, prior authorization will be considered for the continuation of phototherapy services in the home. Initial prior authorization may be given for a maximum of seven days of home phototherapy. A new “CCP Prior Authorization Request Form” must be submitted to request more than seven days of home phototherapy.
The following documentation is required to support medical necessity when requesting home phototherapy services:

- A diagnostic evaluation, which must include, but is not limited to, a normal history and physical exam, and normal laboratory values for the following, as medically indicated:
  - Complete blood count with differential
  - Platelets
  - Blood smear for red blood cell morphology
  - Reticulocyte count
  - Urinalysis
  - Maternal and infant blood typing
  - Coombs test
  - TSB level (in mg/dl)
  - Gestational age
  - Documentation of adequate infant hydration, as demonstrated by 4-6 wet diapers per day and 3-4 stools per day
  - Documentation stating that infant weight loss does not exceed 10 percent of the infant’s birth weight
  - Physician’s plan of care
  - Anticipated number of days the client will need the phototherapy treatment
  - Documentation of parental education regarding the importance of monitoring and follow-up

When requesting prior authorization for a hospitalized infant that requires continued home phototherapy, providers must submit documentation that indicates all pre-existing medium- or high-risk factors have resolved or stabilized.

Providers must submit the following additional documentation for prior authorization requests for previously hospitalized infants that require continued home phototherapy or for more than seven days of home phototherapy:

- TSB level greater than 13 mg/dl and trending downward. TSB levels less than 13 will require medical review to determine medical necessity.

  **Note:** According to AAP guidelines, phototherapy may be discontinued when the TSB level falls below 13–14 mg/dl; however, exceptions to the guidelines may be considered. As a result, documentation must include the rationale for not discontinuing phototherapy when the TSB level drops below 13 mg/dl.

- Birth weight and current weight demonstrating weight gain.

  **Note:** According to AAP guidelines, breast-fed infants are expected to gain 15-30 grams per day (1/2-1 ounce per day) through the first 2-3 months of life.

2.4.13.2.1 **Retroactive Eligibility**

Newborn babies may not have a Medicaid number at the time that services are ordered by the physician and provided by the supplier. In these cases, prior authorization may be given retroactively for services rendered between the start date and the date that the client’s Medicaid number becomes available.

- The provider is responsible for finding out the effective dates of client eligibility.

- The provider has 95 days from the date on which the client’s Medicaid number becomes available (add date) to obtain prior authorization for services that were already rendered.
2.4.14 Special Needs Car Seats and Travel Restraints

2.4.14.1 Services, Benefits, and Limitations

2.4.14.1.1 Special Needs Car Seats

A special needs car seat must have a top tether installed. The top tether is essential for proper use of the car seat. The installer is reimbursed for the installation by the manufacturer.

Providers must use procedure code E1399 for a special needs car seat.

Car seat accessories available from the manufacturer may be considered for reimbursement with prior authorization when medically necessary for correct positioning.

A stroller base for a special needs car seat is not a benefit of Texas Medicaid.

2.4.14.1.2 Travel Safety Restraints

Providers must use procedure code E0700 for the purchase of travel safety restraints, such as ankle and wrist belts.

2.4.14.2 Prior Authorization and Documentation Requirements

2.4.14.2.1 Special Needs Car Seats

A special needs car seat may be considered for reimbursement with prior authorization for a client who has outgrown an infant car seat and is unable to travel safely in a booster seat or seat belt. Consideration must be given to the manufacturer’s weight and height limitations and must reflect allowances for at least 12 months of growth.

The provider must maintain a statement that has been signed and dated by the client’s parent or legal guardian in the client’s medical record that states the following:

- A top tether has been installed in the vehicle in which the client will be transported, by a manufacturer-trained vendor.
- Training in the correct use of the car seat has been provided by a manufacturer-trained vendor.
- The client’s parent or legal guardian has received instruction and has demonstrated the correct use of the car seat to a manufacturer-trained vendor.

To request prior authorization for a special needs car seat or accessories, the following documentation must be provided:

- The client’s weight must be at least 40 pounds, or the client’s height must be at least 40 inches.
- Supporting documentation must include the following and must be submitted for prior authorization:
  - Accurate diagnostic information pertaining to the underlying diagnosis or condition as well as any other medical diagnoses or conditions, to include the client’s overall health status.
  - A description of the client’s postural condition specifically including head and trunk control (or lack of control) and why a booster chair or seatbelt will not meet the client’s needs (the car seat must be able to support the head if head control is poor).
  - The expected long-term need for the special needs car seat.
  - A copy of the manufacturer’s certification for the installer’s training to insert the specified car seat.

A request for a client who does not meet the criteria may be considered on a case-by-case basis on review by HHSC or its designee.
2.4.14.2.2 Travel Safety Restraints

A travel safety restraint and ankle or wrist belts may be considered for reimbursement through CCP without prior authorization for clients with a medical condition requiring them to be transported in either a prone or supine position. The DME provider and the prescribing physician familiar with the client must maintain documentation in the client’s medical record supporting the medical necessity of the travel safety restraint.

2.4.15 Total Parenteral Nutrition (TPN)

2.4.15.1 Services, Benefits, and Limitations

In-home TPN is a benefit of CCP for clients who require short-term or long-term nutritional support. Covered services must be medically necessary and prescribed by the physician.

Parenteral nutrition solution, supplies, and infusion pumps services may be reimbursed with the following procedure codes:

<table>
<thead>
<tr>
<th>Solution Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>B4164</td>
</tr>
<tr>
<td>B4199</td>
</tr>
<tr>
<td>Supply Procedure Codes</td>
</tr>
<tr>
<td>--------------------------</td>
</tr>
<tr>
<td>B4220</td>
</tr>
<tr>
<td>Infusion Pump Procedure Codes</td>
</tr>
<tr>
<td>-----------------------------</td>
</tr>
<tr>
<td>B9004</td>
</tr>
</tbody>
</table>

If the solutions and additives are shipped and not used because of the client’s loss of eligibility, change in treatment, or inpatient hospitalization, then no more than a one-week supply of solutions and additives will be reimbursed. Any days on which the client is an inpatient of a hospital or other medical facility or institution will be excluded from the daily billing. Payment for partial months will be prorated based upon the actual days of administration. The administration of intravenous fluids and electrolytes cannot be billed as in-home TPN.

A backpack or carrying case for a portable infusion pump may be a benefit when it is medically necessary and must be billed using procedure code B9999.

The infusion pump may be rented once a month or purchased once every five years.

2.4.15.2 Prior Authorization and Documentation Requirements

Prior authorization is required for TPN solutions, lipids, supply kits, and infusion pumps that are provided through CCP. Renewal of the prior authorization will be considered on the basis of medical necessity.

TPN solutions, lipids, supply kits, and infusion pumps will be considered for the prior authorization of short-term or long-term nutritional therapy for clients who are CCP-eligible when documentation submitted clearly shows that it is medically necessary and will correct or ameliorate the client’s disability or physical or mental illness or condition. Documentation must include the following:

- Conditions that result in a loss of function of the gastrointestinal (GI) tract and the inability to obtain adequate nutrition by the enteral route, such as:
  - Infections of the pancreas, intestines, or other body organs that result in a loss of GI function
  - Inflammatory bowel disease
  - Necrotizing enterocolitis
• Malnutrition
• Trauma
• Overwhelming systemic infections
• Serious burns
• Conditions that result in an inability of the bowel to absorb nutrition, such as:
  • Extensive bowel resection
  • Severe, advanced bowel disease. Examples include short bowel syndrome (SBS), chronic intestinal pseudo-obstruction (CIPS), Hirschsprung’s disease (HD), Crohn’s disease, and ulcerative colitis
• Prematurity
• Leukemias
• Congenital gastrointestinal anomalies
• Acquired immunodeficiency syndrome

To facilitate determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including documentation of medical necessity for the equipment and supplies requested. The physician must also maintain documentation of medical necessity in the client’s medical record.

Prior authorization requests for TPN must include the following information:
• Medical condition for which TPN is necessary
• Documentation of any trials with oral and enteral feedings
• Percent of daily nutritional needs from TPN
• A copy of the TPN formula or prescription that includes amino acids and lipids and is signed and dated by the physician
• A copy of the most recent laboratory results that includes potassium, calcium, liver function studies, and albumin

**Note:** Conditions or durations of need that are not listed above may be considered by HHSC or its designee with documentation of medical necessity.

Prior authorization requests for a portable parenteral nutrition infusion pump (procedure code B9004) must also include documentation of medical necessity that demonstrates at least one of the following:
• The client requires continuous feedings.
• Feeding intervals exceed the time that the client must be away from home to:
  • Attend school or work
  • Participate in extensive, physician-ordered outpatient therapies
  • Attend frequent, multiple, medical appointments

Prior authorization for parenteral nutrition infusion pumps are limited to one portable pump (procedure code B9004) or one stationary pump (procedure code B9006) at any one time, unless medical necessity for two infusion pumps is established. Supporting documentation for the additional pump must be included with the prior authorization request.

Prior authorization requests for miscellaneous procedure code B9999 must include the following:
• A detailed description of the requested item or supply
• Documentation that supports the medical necessity of the requested item or supply

Requests for a backpack or carrying case for the portable infusion pump will be considered for prior authorization under miscellaneous code B9999, if the clients meet the medical necessity criteria for the portable pump that are outlined above. The following criteria also apply:

• The client is ambulatory or uses a wheelchair that will not support the use of a portable pump by other means, such as an intravenous (IV) pole.

• The portable enteral feeding pump is client-owned.

The requesting provider may be asked for additional information to clarify or complete a request for TPN services.

Retrospective review may be performed to ensure that the documentation supports the medical necessity of the TPN services.

2.4.16 Vitamin and Mineral Products

2.4.16.1 Services, Benefits, and Limitations

Vitamin and mineral products prescribed or ordered by a physician to treat various conditions are a benefit of Texas Medicaid through CCP for clients who are 20 years of age and younger.

Vitamin and mineral products must be submitted with procedure code A9152 or A9153, the appropriate modifier, and the corresponding National Drug Code. Units must be based on the quantity dispensed, for up to a 30-day supply.

**Note:** It is acceptable for providers to bill in excess of a 30-day supply when billing for liquid formulations due to variances in container size.

For purposes of billing, one unit is equal to one dose. The total billable units are equal to the total doses requested on the prior authorization.

Providers must dispense the most cost-effective product prescribed in accordance with a prescription from a licensed physician. Organic products will not be reimbursed unless medical documentation is provided to substantiate the need for that formulation.

The following vitamin and mineral products may be a benefit when submitted with the corresponding procedure code and state-identified modifier:

<table>
<thead>
<tr>
<th>Vitamin or Mineral</th>
<th>Procedure Code</th>
<th>State-Identified Modifier</th>
</tr>
</thead>
<tbody>
<tr>
<td>Beta-carotene</td>

2.4.16.2 Prior Authorization and Documentation Requirements

Prior authorization for vitamin and mineral products must be requested using the CCP Prior Authorization Request Form. Requests for prior authorizations must be submitted and approved before the date of dispensing the vitamin or mineral products. Prior authorization requests for vitamin and mineral products that are initiated before the date of the physician’s order will not be approved.

The following documentation must be submitted with the prior authorization request:

- A physician’s prescription with the name of the vitamin or mineral product, dosage, frequency, duration, and route of administration
- The MSRP or average wholesale price (AWP), whichever is applicable, or the provider’s documented invoice price
- The calculated price per dose
- Documentation that supports the medical necessity of the requested vitamin or mineral

The following sample tables, taken from the CCP Prior Authorization Request Form, are examples of the information that is required to submit a request for vitamin and mineral products:

- Example 1: Vitamin D

<table>
<thead>
<tr>
<th>HCPCS Code</th>

</tr>
<tr>
<td></td>
<td>Route: PO</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Frequency: QD</td>
<td></td>
</tr>
</tbody>
</table>

*Note: HCPCS codes and descriptions must be provided.*

Prior authorization requests for products, conditions, or quantities other than those described in the “Benefits” section of this handbook will be considered on a case-by-case basis after review by the medical director. Providers must submit documentation that the prescribed products are for a medically accepted indication. Documentation must include one of the following:

- FDA approval
- The use is supported by one or more citations that are included or approved for inclusion in the following compendia:
  - The American Hospital Formulary Service Drug Information
  - The United States Pharmacopoeia-Drug Information (or its successor publications)
  - The DRUGDEX Information System
  - Two articles from major medical peer-reviewed literature that demonstrate validated, uncontested data for the use of the agent in a specific medical condition that is safe and effective
Prior authorization of vitamin and mineral products may be granted for up to six months, and for a quantity up to a 30-day supply.

**Note:** Quantities in excess of these limitations may be considered when requesting liquid formulations due to variances in container size.

Requests for additional vitamin and mineral products must be submitted before the current authorized period expires, but no more than 30 days before the expiration.

### 2.4.17 Claims Information

Claims for DME must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

**Refer to:** Section 3: TMHP Electronic Data Interchange (EDI) *(Vol. 1, General Information)* for information on electronic claims submissions.

Section 6: Claims Filing *(Vol. 1, General Information)* for general information about claims filing.

### 2.4.18 Reimbursement

DME and expendable medical supplies are reimbursed in accordance with 1 TAC §355.8441. See the applicable fee schedule on the TMHP website at www.tmhp.com.

Providers may be reimbursed for DME either by the lesser of the provider’s billed charges or the published fee determined by HHSC or through manual pricing. If manual pricing is used, the provider must request prior authorization and submit documentation of either of the following:

- The MSRP or AWP, whichever is applicable.
- The provider’s documented invoice cost.

Manually priced items are reimbursed as follows as is appropriate:

- MSRP less 18 percent or AWP less 10.5 percent, whichever is applicable.
- The provider’s documented invoice cost.

### 2.5 Early Childhood Intervention (ECI) Services

The Texas ECI Program is available statewide to all children who have been determined to be eligible for ECI services by ECI Program providers. To be eligible for ECI services, children must be 35 months of age and younger (i.e., before their third birthday) and have disabilities or developmental delays as defined by ECI criteria. Texas Medicaid covers the ECI claims for children who are Medicaid clients.

All health-care professionals are required by federal and state regulations to refer children who are 35 months of age and younger (i.e., before their third birthday) to the Texas ECI Program as soon as possible, but no longer than 7 days after identifying a disability or suspected delay in development. Referrals can be based on professional judgment or a family’s concern. A medical diagnosis or a confirmed developmental delay is not required for referrals.

To refer families for services, providers can call their local ECI program, or they can call the Department of Assistive and Rehabilitative Services (DARS) Inquiry Line at 1-800-628-5115. For additional ECI information, providers can visit the DARS website at www.dars.state.tx.us/ecis. Persons who are hearing-impaired can call the TDD/TTY line at 1-866-581-9328.
2.5.1 Enrollment

DARS contracts with local ECI providers to take referrals, determine clients’ eligibility for the Texas ECI Program, and provide services to ECI-eligible children and their families. ECI providers must be contracted with the Texas ECI Program and must comply with all of the applicable federal and state laws and regulations that govern the Texas ECI Program.

ECI providers are eligible to enroll as Texas Medicaid ECI providers to render services to eligible Medicaid clients. After providers meet the criteria of the Texas ECI Program, they must complete a Medicaid application.

To participate in Texas Medicaid, an ECI provider must be certified by the Texas ECI Program and must submit a copy of the current contract award from the Texas ECI Program.

Refer to: Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for more information about the procedures for enrolling as a Medicaid provider.

2.5.2 Services, Benefits, Limitations, and Prior Authorization

ECI services are usually provided in the client’s natural environments, which are defined as settings that individual families identify as natural or normal for their family, including the home, neighborhood, and community settings in which children without disabilities participate. ECI services may be provided in the following places of service (POS): office/facility (POS 1), home (POS 2), and other locations (POS 9).

The Texas ECI Program uses evaluations and assessments to determine eligibility. Clients are eligible for ECI if they are 35 months of age and younger and have a developmental delay, a medically diagnosed condition that has a high probability of resulting in developmental delay, or an auditory or visual impairment as defined by the Texas Education Agency.

Under the Texas ECI Program, families and professionals work together to develop an Individualized Family Service Plan (IFSP) which is based on the unique needs of the client and the client’s family. The IFSP serves as the authorization for the services and documents the medical necessity for the services.

ECI services must be provided as stated in 40 TAC, Part 2, Chapter 108.

Refer to: Texas Administrative Code, Title 40 (40 TAC), Part 2, Chapter 108, Subchapter H.

2.5.2.1 Therapy

Providers may submit claims for therapy services that are included in the client’s IFSP.

A client may receive a combination of PT, OT, ST, or specialized skills training (SST) in the home or community setting when the IFSP indicates necessity for two services to be provided at the same time and the parent(s) have agreed on the two services being provided at the same time.

PT, OT, and ST equipment and supplies used during therapy visits are included in the therapy visit and are not reimbursed separately.

2.5.2.1.1 Occupational Therapy (OT)

OT procedure codes must be submitted with modifier GO.

The following procedure codes must be submitted in 15-minute increments:

<table>
<thead>
<tr>
<th>OT Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97032 97033 97034 97035 97036 97110 97112 97113 97116 97124</td>
</tr>
<tr>
<td>97140 97530 97535 97542 97750 97760 97761 97762</td>
</tr>
</tbody>
</table>
The following procedure codes are limited to once per date of service, for each therapy type (PT and OT):

<table>
<thead>
<tr>
<th>OT Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97012</td>
</tr>
</tbody>
</table>

OT includes services that address the functional needs of a client that are related to adaptive development, adaptive behavior and play, and sensory, motor, and postural development. These services are designed to improve the client’s functional ability to perform tasks in the home and community settings.

- All services must be delivered according to §454.213 of the Texas Occupations Code.
- Occupational therapist services must be identified on the IFSP and prescribed by a physician.
- Occupational therapist services may be performed in an individual or group setting.
- Occupational therapist services may be provided in an outpatient, home, or other natural environment setting.

Occupational therapist services are provided by an ECI provider. The ECI provider ensures that occupational therapist services are performed by one of the following:

- A licensed occupational therapist who meets the requirements of 42 CFR §440.110(b).
- A certified occupational therapist assistant (COTA) when the assistant is acting under the direction of a licensed occupational therapist in accordance with 42 CFR §440.110 and all other applicable state and federal laws.

2.5.2.1.2 Physical Therapy (PT)

PT procedure codes must be submitted with modifier GP.

The following PT procedure codes may be reimbursed for therapy services and must be submitted in 15-minute increments:

<table>
<thead>
<tr>
<th>PT Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97032</td>
</tr>
<tr>
<td>97140</td>
</tr>
</tbody>
</table>

The following procedure codes are limited to once per date of service, for each therapy type (PT and OT):

<table>
<thead>
<tr>
<th>PT Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97012</td>
</tr>
</tbody>
</table>

PT includes services that address the promotion of sensory and motor function through enhancement of musculoskeletal status, neurobehavioral organization, perceptual and motor development, cardiopulmonary status, and effective environmental adaptation.

- All services must be delivered according to 22 TAC Part 16, Chapter 322, §322.1(a)(2)(A).
- Physical therapist services must be identified on the IFSP and prescribed by a physician.
- Physical therapist services may be performed in an individual or group setting.
- Physical therapist services may be provided in an outpatient, home, or other natural environment setting.
Physical therapist services are provided by an ECI provider. The ECI provider ensures that physical therapist services are performed by one of the following:

- A licensed physical therapist who meets the requirements of 42 CFR §440.110(a).
- A licensed PT assistant (LPTA) when the assistant is acting under the direction of a licensed physical therapist in accordance with 42 CFR §440.110 and all other applicable state and federal laws.

2.5.2.1.3 *Speech Therapy (ST)*

ST procedure codes must be submitted with modifier GN.

The following ST procedure codes may be reimbursed for therapy services and must be submitted in 15-minute increments:

<table>
<thead>
<tr>
<th>ST Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>92507</td>
</tr>
</tbody>
</table>

Speech and language therapy includes services designed to promote rehabilitation and remediation of delays or disabilities in language-related symbolic behaviors, communication, language, speech, emergent literacy, or feeding and swallowing behavior.

- All services must be delivered according to §401.001(6) of the Texas Occupations Code.
- ST services must be identified on the IFSP.
- ST services may be performed on an individual or group setting.
- ST services may be provided in an outpatient setting, home, or other natural environment setting.

ST services are provided by an ECI provider. The ECI provider ensures that ST services are performed by one of the following:

- A licensed SLP who meets the requirements of 42 CFR §440.110(c) and all other applicable state and federal law.
- A licensed assistant in speech language pathology when the assistant is acting under the direction of a licensed SLP in accordance with 42 CFR §440.110.
- A licensed intern when the intern is acting under the direction of a licensed SLP in accordance with 42 CFR §440.110 and all other applicable state and federal law.

2.5.2.2 *Specialized Skills Training (SST)*

SST is a rehabilitative service that promotes age-appropriate development by providing skills training to correct deficits and teach compensatory skills for deficits that directly result from medical, developmental, or other health-related conditions.

- SST services must be provided as stated in 40 TAC, Part 2, Chapter 108, Subchapter E. Documentation of each SST visit must comply with 40 TAC, Part 2, Chapter 108, Subchapter E, §108.501.
- SST services must be identified on the IFSP and have been recommended by a licensed practitioner of the healing arts (as defined in 40 TAC, Part 2, Chapter 108, Subchapter A, §108.103).
- SST services may be performed in an individual or group setting.

Providers must submit procedure code T1027 for SST services, which are billed in 15-minute increments. Providers must submit procedure code T1027 when services are performed in a group setting or T1027 with modifier U1 when performed in an individual setting.

SST services are provided by an ECI provider. The ECI provider ensures that SST services are provided by an early intervention specialist who meets the criteria established in 40 TAC Part 2, Chapter 108, Subchapter C, §108.313.
2.5.2.3 Targeted Case Management (TCM)

Targeted Case Management (TCM) services are provided to help eligible clients gain access to needed medical, social, educational, developmental, and other appropriate services.

Providers may perform and submit claims for TCM services after the client’s ECI eligibility has been established. The IFSP does not have to be completed before providers may perform TCM services and submit claims to Texas Medicaid.

DARS provides additional guidance to ECI contractors about requirements for including ongoing case management services on the IFSP.

Providers must use procedure code T1017 when billing for TCM services, which are billed in 15-minute increments.

TCM services may be delivered face-to-face or by telephone. Providers must use procedure code T1017 for telephone interaction and T1017 with modifier U1 for face-to-face interaction. The POS is determined by the service coordinator’s location at the time the service is rendered.

Claims may be submitted to Texas Medicaid when the interaction is with the client or the client’s parent(s) (as defined in 10 United States Code (U.S.C.) §1401) or other routine caregiver(s), or occurs in the presence of the client or the client’s parent(s) or other routine caregiver.

Providers may contact other individuals to help eligible clients gain access to needed medical, social, educational, developmental, and other appropriate services, to help identify the eligible client’s needs, to assist the eligible client in obtaining services and to receive useful feedback and alert the service coordinator to changes in the eligible client’s needs. These contacts must be documented in the client’s record, but claims may not be submitted to Texas Medicaid for reimbursement unless the contacts occur in the presence of the client and the client’s parent(s) or other routine caregiver.

TCM must be provided as stated in 40 TAC, Part 2, Chapter 108, Subchapter D.

All documentation must be retained in the client’s record and available upon request. The documentation must be in compliance with 40 TAC, Part 2, Chapter 108, Subchapter D, §108.415.

TCM services are provided by an ECI provider. The ECI provider ensures that TCM services are provided by a service coordinator who meets the criteria established in 40 TAC Part 2, Chapter 108, Subchapter C, §108.315.

2.5.3 Documentation Requirements

All ECI services require documentation to support the medical necessity of the services rendered. ECI services are subject to retrospective review and recoupment if documentation does not support the service that was submitted.

2.5.4 Claims Filing and Reimbursement

2.5.4.1 Claims Information

Claims for ECI therapy, SST, and TCM services that have been rendered by an ECI provider must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers can purchase CMS-1500 paper claim forms from the vendor of their choice; TMHP does not supply the forms. When completing a CMS-1500 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills or itemized statements are not accepted as claim supplements.

Claims for ECI services must include the ECI provider identifier and EC1 benefit code.
Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, “Claims Filing” (Vol. 1, General Information) to find the instructions for completing paper claims.

Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (Vol. 1, General Information) for more information about reimbursement.

2.5.4.1.1 Billing Units Based on 15 Minutes

All claims for reimbursement are based on the actual amount of billable time associated with the service. For those services for which the unit of service is 15 minutes (1 unit = 15 minutes), partial units should be rounded to the nearest quarter hour.

The following table shows the time intervals for 1 through 8 units:

<table>
<thead>
<tr>
<th>Units</th>
<th>Number of Minutes</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 units</td>
<td>0 minutes through 7 minutes</td>
</tr>
<tr>
<td>1 unit</td>
<td>8 minutes through 22 minutes</td>

</tr>
<tr>
<td>8 units</td>
<td>113 minutes through 127 minutes</td>
</tr>
</tbody>
</table>

2.5.4.1.2 Managed Care Clients

ECI case management and specialized skills training are carved-out of Medicaid managed care and must be billed to TMHP for payment consideration. Carved-out services are those that are rendered to Medicaid managed care clients but are administered by TMHP and not the client’s MCO.

ECI therapies (PT/OT/ST) are not carved out and must be submitted to the managed care organization (MCO) that administers the client’s managed care benefits.

2.5.4.2 Reimbursement

ECI therapy, SST, and TCM services are reimbursed according to a maximum allowable fee established by HHSC. See the applicable fee schedule on the TMHP website at www.tmhp.com.

- ECI therapy services are reimbursed in accordance with 1 TAC §355.8441.
- SST services are reimbursed in accordance with 1 TAC §355.8422.
- TCM services are reimbursed in accordance with 1 TAC §355.8421.
2.6 Medical Nutrition Counseling Services (CCP)

2.6.1 Enrollment

Independently practicing licensed dietitians may enroll in Texas Medicaid to provide services to CCP-eligible clients. Dietitians who provide nutrition assessments and counseling must be currently licensed by the Texas State Board of Examiners of Dietitians in accordance with the Licensed Dietitians Act, Chapter 701, Texas Occupations Code.

Refer to: Subsection 2.1.2, “Enrollment” in this handbook for more information about CCP enrollment procedures.

2.6.2 Services, Benefits, and Limitations

Medical nutrition therapy (assessment, re-assessment, and intervention) and medical nutrition counseling may be beneficial for treating, preventing, or minimizing the effects of illness, injuries, or other impairments. A case manager, school counselor, or school nurse may refer a client for medical nutrition counseling services.

Medical nutrition counseling services are a benefit when all of the following criteria are met:

- The client is 20 years of age or younger
- The client is eligible for CCP
- The services are prescribed by a physician
- The services are performed by a Medicaid-enrolled licensed dietitian
- Clinical documentation supports medical necessity and medical appropriateness
- FFP is available

Medical nutrition therapy and nutrition counseling may be considered beneficial for disease states for which dietary adjustment has a therapeutic role. Such disease states include, but are not limited to, the following conditions:

- Abnormal weight gain
- Cardiovascular disease
- Diabetes or alterations in blood glucose
- Eating disorders
- Gastrointestinal disorders
- Gastrostomy or other artificial opening of gastrointestinal tract
- Hypertension
- Inherited metabolic disorders
- Kidney disease
- Lack of normal weight gain
- Multiple food allergies
- Nutritional deficiencies

Nutrition intervention for the following conditions is considered experimental and investigational and is not a benefit:

- Attention-deficit hyperactivity disorder
- Chemical sensitivities
• Chronic fatigue syndrome
• Idiopathic environmental intolerance

Medical nutrition counseling services for the diagnosis of obesity without a comorbid condition is not a benefit.

Medical nutrition therapy (procedure code 97802) is a more comprehensive service than medical nutrition counseling and is provided to individual clients for assessment and intervention. Procedure code 97802 is limited to one session per day and four units per rolling year.

Medical nutrition therapy (procedure code 97803) is provided to individual clients for a reassessment and intervention, after the initial assessment and intervention. Procedure code 97803 may be used for direct therapy sessions with clients. These sessions are limited to 1 session per day and 12 units per rolling year.

Nutrition assessments and re-assessments are in-depth evaluations of both objective and subjective data related to an individual’s food and nutrient intake, lifestyle, and medical history. Nutrition assessments and re-assessments are performed as part of medical nutrition therapy. Nutrition assessments and re-assessments may be required as a result of a medical diagnosis and may be performed in conjunction with other therapies for treatment or as a goal to help clients make and maintain dietary changes. Documentation must include the following:

• Objective and subjective data obtained
• Height, weight, body mass index (BMI), and correlating percentiles on the growth curves
• Estimated caloric needs
• Nutritional diagnosis
• Intervention and plan
• Evaluation

Medical nutrition counseling (procedure code S9470) is provided to individual clients after an initial assessment and is less comprehensive than medical nutrition therapy. Nutritional counseling may be used to discuss the plan of care or intervention and to determine whether modifications are needed. Procedure code S9470 is limited to one visit per day and four visits per rolling year.

Medical nutrition group therapy (procedure code 97804) is not a benefit in the home setting, and does not include an individual nutrition assessment. Medical nutrition group therapy is limited to eight units per rolling year.

Medical nutrition group therapy may be provided to a group of clients with the same condition. While medical nutrition group therapy must be led by a Medicaid-enrolled dietitian licensed by the Texas State Board of Examiners of Dietitians, other health-care providers may participate in the group sessions. The focus of the therapy is on nutrition and health for chronic conditions such as the following:

• Acquired acanthosis nigricans
• Diabetes
• Dysmetabolic syndrome X
• Eating disorder
• Hyperlipidemia
• Other specified hypoglycemia
• Pure hypercholesterolemia
• Pure hyperglyceridemia
Medical nutrition group therapy sessions must last at least 30 minutes, have a minimum of two clients and a maximum of ten clients, and must include the following:

- An age-appropriate presentation on nutrition issues related to the chronic condition. (The presentation may include information about prevention of disease exacerbation or complications and living with chronic illness. The presentation may also offer suggestions for making healthy food choices or changing ideas about food.)
- A question-and-answer period.

Client participation in medical nutrition group therapy is optional. Providers must obtain an informed consent from a client’s parent or guardian before rendering services. The medical documentation maintained in a client’s medical record must include the following:

- Physician prescription
- Referral, if applicable
- Location where the services were provided
- Services that were provided during medical nutrition group therapy
- Goals or objectives for the group therapy
- Client participation
- Beginning and ending time of the group therapy session

In the following table, the procedure codes in Column A will be denied as part of another service if they are submitted by any provider for the same date of service as the corresponding procedure codes in Column B.

<table>
<thead>
<tr>
<th>Column A: Procedure Codes Denied When Submitted With…</th>
<th>Column B: Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>S9470</td>
<td>97802, 97803, or 97804</td>

**2.6.3 Prior Authorization and Documentation Requirements**

Prior authorization is required for services that exceed the limitations for medical nutrition therapy (assessment, re-assessment, and intervention), medical nutrition group therapy, and nutrition counseling visits.

Prior authorization is also required for consideration of other health conditions that are not addressed.
The following documentation must be submitted to the CCP Prior Authorization Unit for prior authorization:

- Completed CCP Prior Authorization Request Form
- Treatment plan
- Diagnosis of a condition for which there is medical necessity for the service
- Obstacles for not meeting goals
- Interventions planned to meet goals

The prescribing physician and provider must maintain documentation of medical necessity, including the completed CCP Prior Authorization Request Form, in a client's medical record. The physician must maintain the original signed copy of the CCP Prior Authorization Request Form. The completed CCP Prior Authorization Request Form is valid for a period of up to six months from the date of the physician's signature.

2.6.4 Claims Information

Providers must submit services provided by licensed dietitians in an approved electronic claims format or on a CMS-1500 paper claim form from the vendor of their choice. TMHP does not supply the forms. Claims for services that have been prior authorized must reflect the PAN in Block 23 of the CMS-1500 paper claim form or its equivalent.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in Section 6, Claims Filing (Vol. 1, General Information) for instructions on completing paper claims.

Form CH.26, “Medical Nutrition Counseling (CCP Only)” in this handbook for a claim form example.

2.6.5 Reimbursement

Dietitian services are reimbursed in accordance with 1 TAC §355.8441.

2.7 Orthotic and Prosthetic Services (CCP)

2.7.1 Enrollment

To be eligible to participate in CCP, providers of orthotics and prosthetics services must be enrolled in Medicare.

Texas Medicaid enrolls and reimburses orthotic and prosthetic suppliers only for CCP services and Medicare crossovers. The information in this section is applicable to CCP services only.

Refer to: Subsection 2.1.2, “Enrollment” in this handbook for more information about CCP enrollment procedures.

2.7.2 Orthotics Services

2.7.2.1 Services, Benefits, and Limitations

Orthoses, including orthopedic shoes, wedges, and lifts, are a benefit of Texas Medicaid when provided by a licensed orthotist or a licensed prosthetist/orthotist through CCP for clients who are birth through 20 years of age.
The following orthoses and related services may be reimbursed when medical necessity criteria are met:

- Spinal orthoses and additions to spinal orthoses, including those for scoliosis
- Lower-limb orthoses and additions to lower-limb orthoses, including fracture orthoses
- Foot orthoses, including inserts, orthopedic shoes, surgical boots, heel lifts, and wedges
- Upper-limb orthoses and additions to upper-limb orthoses, including fracture orthoses
- Other orthopedic devices, including protective helmets and dynamic splints
- Repairs, replacements, and modifications
- Orthotic device training

**Note:** Training in the use of an orthotic device for a client who has not worn one previously, has not worn one for a prolonged period, or is receiving a different type is a benefit when the training is provided by a physical or occupational therapist.

**Refer to:** Subsection 2.10, “Therapy Services (CCP)” in this handbook for more information on physical and occupational therapy services.

As defined by the Texas State Board of Orthotics and Prosthetics the following definitions are used by Texas Medicaid:

- An orthosis is defined as: A custom-fabricated or custom-fitted medical device designed to provide for the support, alignment, prevention or correction of neuromuscular or musculoskeletal disease, injury, or deformity. The term does not include a fabric or elastic support, corset, arch support, low-temperature plastic splint, a truss, elastic hose, cane, crutch, soft cervical collar, orthosis for diagnostic or evaluation purposes, dental appliance, or other similar device carried in stock and sold by a drugstore, department store or corset shop.

- A brace is defined as: An orthosis or orthopedic appliance that supports or holds in correct position any movable part of the body, and that allows for motion of that part. It must be a rigid or semirigid device used for the purpose of supporting a weak or deformed body part or restricting or eliminating motion in a diseased or injured body part.

To be considered for reimbursement, orthoses must be dispensed, fabricated, or modified by a licensed orthotist or licensed prosthetist/orthotist enrolled with Medicare and CCP. The following applies:

- Upper extremity customized splints made with low-temperature materials and inhibitive casting may be provided by occupational or physical therapists.

- Other orthopedic devices addressed in the orthotic section may be provided by a Medicaid-enrolled DME vendor.

- Orthopedic shoes must be provided by a shoe vendor enrolled as a DME provider.

The date of service for a custom-made or custom-fitted orthosis is the date the supplier places an order for the equipment and incurs liability for the equipment. The custom-made or custom-fitted orthosis will be eligible for reimbursement as long as the service is provided during a month the client is eligible for Medicaid.

The following items and services are included in the reimbursement for an orthotic device and not reimbursed separately:

- Client evaluation, measurement, casting, or fitting of the orthosis.
- Repairs due to normal wear and tear during the 90 days following delivery.
- Adjustments or modifications of the orthotic device made when fitting the orthosis and for 90 days from the date of delivery (adjustments and modifications during the first 90 days are considered part of the purchase of the initial device).
Orthopedic shoes that are attached to a brace must be billed by the vendor that bills for the brace. Reimbursement for lifts and wedges may include the cost of the prescription shoe.

2.7.2.1.1 Noncovered Orthotic Services

The following circumstances are not a benefit of Texas Medicaid:

- Orthoses whose sole purpose is for restraint
- Orthoses provided solely for use during sports-related activities in the absence of an acute injury or other indicated medical condition
- Orthotic devices prescribed by a chiropractor

Diagnoses that are not considered medically necessary include, but are not limited to, the following:

- Tired feet
- Fatigued feet
- Nonsevere bow legs
- Valgus deformity of the foot, except as outlined in the orthotic section
- Pes planus (flat feet), except when there is a coexisting medical condition as outlined in the orthotic section

Orthopedic shoes with deluxe features, such as special colors, special leathers, and special styles, are not considered medically necessary, and the features do not contribute to the accommodative or therapeutic function of the shoe.

A foot-drop splint and recumbent positioning device and replacement interface are not considered medically necessary in a client with foot drop who is nonambulatory, because there are other more appropriate treatment modalities.

A static ankle-foot orthosis (AFO) or AFO component is not medically necessary if:

- The contracture is fixed.
- The client has foot drop without an ankle flexion contracture.
- The component is used to address knee or hip positioning, because the effectiveness of this type of component is not established.

A pneumatic thoracic-lumbar-sacral orthosis is considered experimental and investigational and is not a benefit of Texas Medicaid.

2.7.2.2 Prior Authorization and Documentation Requirements

Prior authorization is required for all orthoses and related services.

Before submitting a request for prior authorization for orthosis, the orthosis provider must have a completed CCP Prior Authorization Form requesting the orthosis or related services that has been signed and dated by a physician who is familiar with the client. All signatures and dates must be current, unaltered, original, and handwritten. Computerized or stamped signatures and dates will not be accepted. The completed CCP Prior Authorization Form must include the procedure codes and quantities for requested services. A copy of the completed, signed, and dated form must be maintained by the orthosis provider in the client’s medical record. The completed CCP Prior Authorization Form with the original dated signature must be maintained by the prescribing physician in the client’s medical record.

- To complete the prior authorization process electronically, the orthosis provider must complete the prior authorization requirements through any approved electronic methods and retain a copy of the
signed and dated CCP Prior Authorization Request form in the client’s medical record at the provider’s place of business.

- To complete the prior authorization process by paper, the orthosis provider must fax or mail the completed CCP Prior Authorization Request Form to the CCP prior authorization unit and retain a copy of the signed and dated CCP form in the client’s medical record at the provider’s place of business.

To facilitate determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including documentation for medical necessity of the equipment and supplies requested. The physician must maintain documentation of medical necessity in the client’s medical record. The provider may be asked for additional information to clarify or complete a request for the service or device.

All requests for prior authorization must include documentation of medical necessity including, but not limited to, documentation that the device is needed for one of the following general indications:

- To reduce pain by restricting mobility of the affected body part.
- To facilitate healing following an injury to the affected body part or related soft tissue.
- To facilitate healing following a surgical procedure on the affected body part or related soft tissue.
- To support weak muscles or a deformity of the affected body part.

Prior authorization requests for some types of orthosis require additional documentation. See the appropriate sections for additional documentation needed for each service.

The provider must keep the following written documentation in the client’s medical record:

- The prescription for the device.
  - Orthotic devices must be prescribed by a physician (M.D. or D.O.) or a podiatrist. A podiatrist prescription is valid for conditions of the ankle and foot.
  - The prescription must be dated on or before the initial date of the requested dates of service, which can be no longer than 90 days from the signature date on the prescription.
  - Accurate diagnostic information that supports the medical necessity for the requested device. A retrospective review may be performed to ensure that the documentation included in the client’s medical record supports the medical necessity of the requested service or device.

A prior authorization is valid for a maximum period of six months from the prescription signature date. At the end of the six-month authorization period, a new prescription is required for prior authorization of additional services.

The actual date of service is the date the supplier has placed an order for the equipment and has incurred liability for the equipment.

2.7.2.2.1 Spinal Orthoses

Spinal orthoses include, but are not limited to, cervical orthoses, thoracic rib belts, thoracic-lumbar-sacral orthoses (TLSO), sacroiliac orthoses, lumbar orthoses, lumbar-sacral orthoses (LSO), cervical-thoracic-lumbar-sacral orthoses (CTLSO), halo procedures, spinal corset orthoses, and spinal orthoses for scoliosis.

Spinal orthoses will be considered for prior authorization with documentation of one of the general indications.
2.7.2.2.2 Lower-Limb Orthoses

Lower-limb orthoses include, but are not limited to, hip orthoses (HO), Legg Perthes orthoses, knee orthoses (KO), ankle-foot orthoses (AFO), knee-ankle orthoses (KAFO), hip-knee-ankle-foot orthoses (HKAFO), fracture orthoses, and reciprocating gait orthoses (RGO).

In addition to the general indication requirements, lower-limb orthoses will be considered for prior authorization with documentation of the following criteria for specific orthotic devices:

**Ankle-Foot Orthoses**

AFOs used during ambulation will be considered for prior authorization for clients with documentation of all of the following:

- Weakness or deformity of the foot and ankle.
- A need for stabilization for medical reasons.
- Anticipated improvement in functioning during activities of daily living (ADLs) with use of the device.

AFOs not used during ambulation (static AFO) will be considered for prior authorization for clients with documentation of one of the following conditions:

- Plantar fasciitis.
- Plantar flexion contracture of the ankle, with additional documentation that includes all of the following:
  - Dorsiflexion on pretreatment passive range of motion testing is at least ten degrees.
  - The contracture is interfering or is expected to interfere significantly with the client’s functioning during ADLs.
  - The AFO will be used as a component of a physician-prescribed therapy plan care, which includes active stretching of the involved muscles or tendons.
  - There is reasonable expectation that the AFO will correct the contracture.

**Knee-Ankle-Foot Orthoses**

KAFOs used during ambulation will be considered for prior authorization for clients with documentation that supports medical necessity for additional knee stabilization.

KAFOs that are custom-fabricated (molded-to-patient model) for ambulation will be considered for prior authorization when at least one of the following criteria is met:

- The client cannot be fit with a prefabricated AFO/KAFO.
- The condition that necessitates the orthosis is expected to be permanent or of long-standing duration (more than six months).
- There is a need to control the knee, ankle, or foot in more than one plane.
- The client has a documented neurological, circulatory, or orthopedic status that requires custom fabrication to prevent tissue injury.
- The client has a healing fracture that lacks normal anatomical integrity or anthropometric proportions.

**Reciprocating Gait Orthoses**

Reciprocating gait orthoses will be considered for prior authorization for clients with spina bifida or similar functional disabilities.
The prior authorization request must include a statement from the prescribing physician that indicates medical necessity for the RGO, the PT treatment plan, and documentation that the client and family are willing to comply with the treatment plan.

2.7.2.2.3 Foot Orthoses

Foot orthoses include, but are not limited to, foot inserts, orthopedic shoes, wedges, and lifts.

Foot orthoses will be considered for prior authorization for clients with documentation of all the following:

- The client has symptoms associated with the particular foot condition.
- The client has failed to respond to a course of appropriate, conservative treatment, including PT, injections, strapping, or anti-inflammatory medications.
- The client has at least one of the following:
  - Torsional conditions, such as metatarsus adductus, tibial torsion, or femoral torsion.
  - Structural deformities.
  - Hallux valgus deformities.
  - In-toe or out-toe gait.
  - Musculoskeletal weakness.

In addition to the general indication requirements, foot orthoses will be considered for prior authorization with documentation of the following criteria for specific orthotic devices:

**Foot Inserts**

Removable foot inserts will be considered for prior authorization for clients with documentation of at least one of the following medical conditions:

- Diabetes mellitus.
- History of amputation of the opposite foot or part of either foot.
- History of foot ulceration or pre-ulcerative calluses of either foot.
- Peripheral neuropathy with evidence of callus formation of either foot.
- Deformity of either foot.
- Poor circulation of either foot.

Removable foot inserts may be covered independently of orthopedic shoes with documentation that the client has appropriate footwear into which the insert can be placed.

A University of California at Berkeley (UCB) removable foot insert will be considered for prior authorization with documentation that the device is required to correct or treat at least one of the following conditions:

- A valgus deformity and significant congenital pes planus with pain.
- A structural problem that results in significant pes planus, such as Down syndrome.
- Acute plantar fasciitis.

**Orthopedic Shoes**

Orthopedic shoes must be prescribed by a licensed physician (M.D. or D.O.) or a podiatrist. An orthopedic shoe is used by clients whose feet, although impaired, are essentially intact. An orthopedic shoe differs from a prosthetic shoe, which is used by clients who are missing all or most of the forefoot.
Orthopedic shoes will be considered for prior authorization when at least one of the following criteria is met:

- The shoe is permanently attached to a brace.
- The shoe is necessary to hold a surgical correction, postoperative casting, or serial or clubfoot casting.

An orthopedic shoe may be prior authorized up to one year from the date of the surgical procedure. Only one pair of orthopedic shoes will be prior authorized every three months. Two pairs of shoes may be purchased at the same time; in such situations, however, additional requests for shoes will not be considered for another six months.

Requests for orthopedic shoes that do not meet the criteria listed above may be considered for prior authorization with documentation of medical necessity.

**Wedges and Lifts**
Wedges and lifts must be prescribed by a licensed physician (M.D. or D.O.) or a podiatrist and must be for treatment of unequal leg length greater than one-half inch.

2.7.2.2.4 Upper-Limb Orthoses
Upper-limb orthoses include, but are not limited to, shoulder orthoses (SO), elbow orthoses (EO), elbow-wrist-hand orthoses (EWHO), elbow-wrist-hand-finger orthoses (EWHFO), wrist-hand-finger orthoses (WHFO), wrist-hand orthoses (WHO), hand-finger orthoses (HFO), finger orthoses (FO), shoulder-elbow-wrist-hand orthoses (SEWHO), shoulder-elbow orthoses (SEO), and fracture orthoses.

In addition to the general indication requirements, upper-limb orthoses will be considered for prior authorization with documentation of the following criteria for specific orthotic devices.

2.7.2.2.5 Other Orthopedic Devices

**Protective Helmets**
Protective helmets will be considered for prior authorization for clients with a documented medical condition that makes the client susceptible to injury during ADLs. Covered medical conditions include the following:

- Neoplasm of the brain
- Subarachnoid hemorrhage
- Epilepsy
- Cerebral palsy

Requests for all conditions other than those listed above require submission of additional documentation that supports the medical necessity of the requested device.

**Dynamic Splints**
Dynamic splints such as Dynasplint® will be considered for prior authorization for a three-month trial period when the request is submitted with the following documentation:

- Client’s condition
- Client’s current course of therapy
- Rationale for the use of the dynamic splint
- Agreement by the client or family that the client will comply with the prescribed use of the dynamic splint
After completion of the three-month trial period, the provider may submit a request for purchase of the dynamic splint. Requests for purchase of the splint must include documentation that the three-month trial period was successful and showed improvement in the client’s condition as measured by the following:

- Demonstrated increase in range of motion
- Demonstrated improvement in the ability to complete ADLs or perform activities outside the home

2.7.2.2.6 Related Services

Repairs, Replacements, and Modifications to Orthoses

Within the guarantee of the manufacturer, providers are responsible, without charge to the client or to Texas Medicaid, for replacement or repair of equipment or any part thereof that is found to be nonfunctional because of faulty material or workmanship.

Service and repairs must be handled under any warranty coverage an item may have. If there is no warranty, providers may request prior authorization for the necessary service and repairs.

A repair because of normal wear or a modification because of growth or change in medical status will be considered for prior authorization if it proves to be more cost effective than replacing the device.

The request for repairs must include a breakdown of charges for parts and the number of hours of labor required to complete the repairs. No charge is allowed for pickup or delivery of the item or for the assembly of Medicaid-reimbursed parts. The following information must be submitted with the request:

- The description and procedure code of the item being serviced or repaired.
- The age of the item.
- The number of times the item has been previously repaired.
- The replacement cost for the item.

The anticipated life expectancy of an orthotic device is six months. Requests for prior authorization for the replacement of a device before its usual life expectancy has ended must include documentation that explains the need for the replacement.

Replacement of orthotic equipment will be considered when the item is out of warranty and repairing the item is no longer cost-effective or when loss or irreparable damage has occurred. A copy of the police or fire report, when appropriate, and the measures to be taken to prevent reoccurrence must be submitted with the prior authorization request.

2.7.3 Cranial Molding Orthosis

2.7.3.1 Services, Benefits, and Limitations

Cranial molding orthosis (procedure code S1040) may be a benefit when all of the following criteria are met:

- The client is CCP eligible.
- The client is 3 through 18 months of age.
- The client requires a cranial molding orthosis as part of the treatment plan for a documented diagnosis of synostotic plagiocephaly (diagnosis code 7560).

The limitation for procedure code S1040 is one device per lifetime.

The definition for cosmetic, as it applies to cranial molding orthosis, includes surgery or other services used primarily to improve appearance and not to restore or correct significant deformity resulting from disease, trauma, congenital or developmental anomalies, or previous therapeutic process.
2.7.3.2 Noncovered Services

Cranial molding orthosis when used for the treatment of positional plagiocephaly is considered cosmetic, and therefore is not a benefit of Texas Medicaid.

The effective use of cranial molding orthosis for the treatment of brachycephaly, or a high cephalic index without cranial asymmetry has not been clearly documented, is not medically necessary, and therefore is not a benefit of Texas Medicaid.

2.7.3.3 Prior Authorization and Documentation Requirements

Cranial molding orthoses does not require prior authorization for clients who meet the medical necessity criteria outlined in this section. Documentation of medical necessity must be maintained in the client’s medical record.

Additional devices beyond the once-per-lifetime benefit may be considered for prior authorization with documentation of all of the following:

- The initial device was obtained to treat synostotic plagiocephaly.
- Treatment with the device has been effective.
- The new device is needed due to growth.

**Note:** For CCP clients who are 20 years of age or younger, who have congenital conditions or duration of need not listed above may be considered by the Medical Director on a case-by-case basis with documentation of medical necessity.

To facilitate determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including documentation of medical necessity for the equipment requested. The physician must maintain documentation of medical necessity in the client’s medical record. The requesting provider may be asked for additional information to clarify or complete a request for an additional cranial molding orthosis.

The completed CCP Prior Authorization Form, which includes the DME must be signed and dated by the prescribing physician familiar with the client’s condition. All signatures must be current, unaltered, original, and handwritten. Computerized or stamped signatures will not be accepted. The completed CCP Prior Authorization Form must be maintained by the requesting provider and the prescribing physician. The original signature copy must be kept by the physician in the client’s medical record.

2.7.4 Thoracic-Hip-Knee-Ankle Orthoses (THKAO) (Vertical or Dynamic Standers, Standing Frames, Braces, and Parapodiums)

2.7.4.1 Services, Benefits, and Limitations

THKAO (vertical or dynamic standers, standing frames or braces, and parapodiums), including all accessories, require prior authorization. A THKAO may be considered if the client requires assistance to stand and remain standing.

2.7.4.1.1 Parapodium

A parapodium is used to help clients with neuromuscular diseases or conditions resulting in a lack of sufficient muscle power in the trunk and lower extremities to stand with their hands free. It helps develop a sense of balance and aids in learning functional movements such as standing with the hands free. A parapodium acts as an exoskeleton, providing side struts and chest, hip, knee, and foot bracing.

A parapodium may be considered for reimbursement for one of the following levels:

- **Level One:** Small Parapodium. The client has a maximum axillary height of 35 inches and a maximum weight of 55 pounds (normal age range is 1 through 10 years of age).
- **Level Two:** Medium parapodium. The client has a maximum axillary height of 41 inches and a maximum weight of 77 pounds (normal age range is 5 through 12 years of age).
• **Level Three:** Large parapodium. The client has a maximum axillary height of 45 inches and a maximum weight of 115 pounds (normal age range is 10 through 16 years of age). Labor for parapodium assembly may be prior authorized.

2.7.4.1.2 *Standing Frame or Brace*

A standing frame or brace is used to help very young clients, who are 12 months of age and older, who have good head control in the upright position and who have a neuromuscular disease or condition resulting in a lack of sufficient muscle power in the trunk and lower extremities to stand with their hands free.

Providers must use procedure code E0638 for a standing frame or brace.

2.7.4.1.3 *Vertical or Dynamic Stander*

A vertical stander or dynamic stander is used to initiate standing for clients who cannot maintain a good standing posture or may never be able to stand independently. A vertical stander is used to develop weight bearing through the legs in order to decrease demineralization and to promote better body awareness. Documentation for these standers must address medical necessity for the standers to be mobile.

Providers must use procedure code E0642 for the purchase of a dynamic stander.

2.7.4.2 *Prior Authorization and Documentation Requirements*

THKAO (vertical or dynamic standers, standing frames or braces, and parapodiums), including all accessories, requires prior authorization.

THKAO may be considered for clients who are CCP-eligible and who require assistance to stand and remain standing when documentation submitted clearly shows that it is medically necessary and will correct or ameliorate the client’s disability or physical or mental illness or condition.

Prior authorization may be considered for the THKAOs with the following documentation:

• Diagnoses relevant to the requested equipment, including functioning level and ambulatory status
• Anticipated benefits of the equipment
• Frequency and amount of time of a standing program
• Anticipated length of time the client will require this equipment
• Client’s height, weight, and age
• Anticipated changes in the client’s needs, anticipated modifications, or accessory needs, as well as the growth potential of the stander

2.7.5 *Prosthetic Services*

2.7.5.1 *Services, Benefits, and Limitations*

External prostheses are a benefit of Texas Medicaid when provided by a licensed prosthetist or licensed prosthetist/orthotist through CCP for clients who are birth through 20 years of age.

The following prostheses and related services may be reimbursed when medical necessity criteria are met:

• Lower limb
• Upper limb
• Craniofacial
• External breast
• Repair, replacements, and modifications
Prosthetic training

Accessories to prostheses

Prosthetic training by a physical or occupational therapist for a lower limb prosthesis or an upper extremity prosthesis is a benefit for clients who have not worn one previously or for a prolonged period or who are receiving a different type.

Refer to: Subsection 2.10, “Therapy Services (CCP)” in this handbook for more information on physical and occupational therapy services.

To be considered for reimbursement, prostheses must be dispensed, fabricated, or modified by a licensed prosthetist or licensed prosthetist/orthotist enrolled with Medicare and CCP.

The date of service for a custom-made or custom-fitted prosthesis is the date the supplier places an order for the equipment and incurs a liability for the equipment. The custom-made or custom-fitted prosthesis will be eligible for reimbursement as long as the service is provided during a month the client is eligible for Medicaid.

The following items and services are included in the reimbursement for a prosthetic device and not reimbursed separately:

- Evaluation of the residual limb and gait
- Measurement, casting, or fitting of the prosthesis
- Cost of base component parts and labor contained in the base procedure code description
- Repairs due to normal wear and tear during the 90 days following delivery
- Adjustments or modifications of the prosthesis or the prosthetic component made when fitting the prosthesis or component and for 90 days from the date of delivery when the adjustments are not necessitated by changes in the residual limb or the client’s functional ability

In general, base codes do not represent a complete device. To include the additional components necessary for a complete device, providers may bill additional components with a code that is used in addition to a base code. Addition codes may also be used to indicate modifications to a device. The values assigned to the additional codes do not represent the actual value of the component or modification, but only the difference between the total value and the value of the base code. As a result, reimbursement of an addition does not involve subtraction of any amounts from the base code allowance.

2.7.5.1 Noncovered Prosthetic Services

Prosthetic devices prescribed by a chiropractor are not a benefit of Texas Medicaid.

A vacuum-assisted socket system (procedure code L5781 or L5782), which is a specialized vacuum pump, is considered experimental and investigational, and is not a benefit of Texas Medicaid.

Myoelectric hand prostheses for conditions other than the absence of forearm(s) and hand(s) are considered experimental and investigational and are not a benefit of Texas Medicaid.

A prosthetic device customized with enhanced features is not considered medically necessary if ADLs can be met with a standard prosthetic device.

Accessories that are not required for the effective use of a prosthetic device are not considered medically necessary.

2.7.5.2 Prior Authorization and Documentation Requirements

Prior authorization is required for all prosthetic devices.
A completed CCP Prior Authorization Form requesting the prosthesis must be signed and dated by a physician familiar with the client before requesting prior authorization for all prostheses. All signatures and dates must be current, unaltered, original, and handwritten. Computerized or stamped signatures and dates will not be accepted. The completed CCP Prior Authorization Form must include the procedure codes and numerical quantities for services requested. A copy of the completed, signed, and dated form must be maintained by the prosthesis provider in the client’s medical record. The completed CCP Prior Authorization Form with the original dated signature must be maintained by the prescribing physician in the client’s medical record.

To complete the prior authorization process by paper, the prosthesis provider must fax or mail the completed CCP Prior Authorization Request Form to the CCP prior authorization unit and retain a copy of the signed and dated CCP form in the client’s medical record at the provider’s place of business.

To complete the prior authorization process electronically, the prosthesis provider must complete the prior authorization requirements through any approved electronic methods and retain a copy of the signed and dated CCP Prior Authorization Request form in the client’s medical record at the provider’s place of business.

To facilitate determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including documentation for medical necessity of the equipment or supplies requested. The physician must maintain documentation of medical necessity in the client’s medical record. The provider may be asked for additional information to clarify or complete a request for the service or device.

All requests for prior authorization must include documentation of medical necessity including, but not limited to, documentation that the client meets the following general indications for the requested device:

- The prosthesis replaces all or part of the function of a permanently inoperative, absent, or malfunctioning part of the limb, and identification of the specific limb that is being replaced by the prosthesis.
- The prosthesis is required for ADLs or for rehabilitation purposes, and identification of the ADLs or rehabilitation purpose for which the prosthesis is required.

The provider must keep the following written documentation in the client’s medical record:

- The prescription for the device.
- Prosthetic devices must be prescribed by a physician (M.D. or D.O.).
- The prescription must be dated prior to or on the initial date of the requested dates of service, which can be no longer than 90 days from the signature date on the prescription.
- Accurate diagnostic information that supports the medical necessity for the requested device. (A retrospective review may be performed to ensure that the documentation included in the client’s medical record supports the medical necessity of the requested service or device.)
- The specific make, model, and serial number of the prosthetic components.
- The treatment plan outlining the therapy program prescribed by the treating physician, including expected goals with the use of the prosthesis.
- A statement submitted by the physician that indicates that the client or client’s family or caregiver demonstrates willingness to comply with the therapy program.

Prior authorization is valid for a maximum period of six months from the prescription signature date. At the end of the six-month authorization period, a new prescription is required for prior authorization of additional services.
The actual date of service is the date the supplier has placed an order for the equipment and has incurred liability for the equipment.

2.7.5.2.1 Lower-Limb Prostheses

Lower limb prostheses include, but are not limited to, the following:

- Partial foot, ankle, and knee disarticulation sockets
- Above-knee short prostheses
- Hip and knee disarticulation prostheses
- Postsurgical prostheses
- Preparatory prostheses
- Additions to lower extremity prostheses
- Replacement sockets

A basic lower limb prosthesis consists of the following:

- A socket or connection between the residual limb and the prosthesis
- A suspension mechanism attaching the socket to the prosthesis
- A knee joint that provides support during stance, smooth control during the swing phase, and unrestricted motion for sitting and kneeling
- An exoskeleton or endoskeleton pylon (tube or shell) that attaches the socket to the terminal device
- A terminal device (foot)

In addition to the general indication requirements, the following additional documentation is also required for all lower limb prostheses:

- Written documentation of the client’s current and potential functional levels. A functional level is defined as a measurement of the capacity and potential of the individuals to accomplish their expected post-rehabilitation daily function. The potential functional ability is based on reasonable expectations of the treating physician and the prosthetist and includes, but is not limited to, the following:
  - The client’s history, including prior use of a prosthesis if applicable
  - The client’s current condition, including the status of the residual limb and any coexisting medical conditions
  - The client’s motivation to ambulate and ability to achieve independent transfers or ambulation with the use of a lower limb prosthesis

The following functional classification levels have been defined by the Centers for Medicare & Medicaid Services (CMS):

<table>
<thead>
<tr>
<th>Level</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Level 0</td>
<td>Does not have the ability or potential to ambulate or transfer safely with or without assistance, and a prosthesis does not enhance quality of life or mobility.</td>
</tr>
<tr>
<td>Level 1</td>
<td>Has the ability or potential to use a prosthesis for transfers or ambulation on level surfaces at fixed cadence. Typical of the limited and unlimited household ambulator</td>
</tr>
<tr>
<td>Level 2</td>
<td>Has the ability or potential for ambulation with the ability to traverse low level environmental barriers such as curbs, stairs, or uneven surfaces. Typical of the limited community ambulator.</td>
</tr>
</tbody>
</table>
A client whose functional level is zero (0) is not a candidate for a prosthetic device; the device is not considered medically necessary.

**Microprocessor-Controlled Lower Limb Prostheses**

Microprocessor-controlled lower limb prostheses (e.g., Otto Bock C-Leg, Intelligent Prosthesis, or Ossur Rheo Knee) will be considered for prior authorization for clients who have a transfemoral amputation from a nonvascular cause, such as trauma or tumor and a functional level of 3 or above, and who meet the following criteria:

- The individual has adequate cardiovascular reserve and cognitive learning ability to master the higher level of technology and to allow for faster than normal walking speed.
- The individual demonstrates the ability to ambulate at a faster than baseline rate using a standard prosthetic application with a swing and stance control knee.
- The individual has a demonstrated need for long-distance ambulation at variable rates (greater than 400 yards) on a daily basis. Use of the limb in the home or for basic community ambulation is not sufficient to justify provision of the computerized limb instead of standard limb applications.
- The individual has a demonstrated need for regular ambulation on uneven terrain or for regular use on stairs. Use of the limb for limited stair climbing in the home or employment environment is not sufficient evidence for prescription of this device over standard prosthetic application.

The licensed prosthetist or licensed prosthetist/orthotist providing the device must be trained in the fitting and programming of the microprocessor-controlled prosthetic device.

**Foot Prostheses**

The following foot prostheses will be considered for prior authorization for clients whose documented functional level is 1 or above:

- A solid ankle-cushion heel (SACH) foot
- An external keel SACH foot or single axis ankle/foot

A flexible-keel foot or multi-axial ankle/foot will be considered for prior authorization for clients whose documented functional level is 2 or above.

A flex foot system, energy storing foot, multiaxial ankle/foot, dynamic response, or flex-walk system or equivalent will be considered for prior authorization for clients whose documented functional level is 3 or above.

A prosthetic shoe will be considered for prior authorization if it is an integral part of a prosthesis for clients with a partial foot amputation.

**Ankle Prosthesis**

An axial rotation unit will be considered for prior authorization for clients whose documented functional level is 2 or above.
Knee Prosthesis  
A single-axis, constant-friction knee and other basic knee systems will be considered for prior authorization for clients whose documented functional level is 1 or above. A fluid, pneumatic, or electronic knee prosthesis will be considered for prior authorization for clients whose documented functional level is 3 or above. A high-activity knee control frame will be considered for prior authorization for clients whose documented functional level is 4.

Prosthetic Substitutions or Additions for Below-Knee Prostheses  
Prosthetic substitutions or additions (procedure codes L5629, L5638, L5639, L5646, L5647, L5704, L5785, L5962, and L5980) are not considered medically necessary when an initial below-knee prosthesis (procedure code L5500) or a preparatory below-knee prosthesis (procedure codes L5510, L5520, L5530, or L5540) is provided.

Prosthetic substitutions or additions (procedure codes L5620, L5629, L5645, L5646, L5670, L5676, L5704, and L5962) are not considered medically necessary when a below-knee preparatory, prefabricated prosthesis (procedure code L5535) is provided.

Prosthetic Substitutions or Additions for Above-Knee Prostheses  
Prosthetic substitutions or additions (procedure codes L5610, L5631, L5640, L5642, L5644, L5648, L5705, L5706, L5710, L5780, L5790, L5795, L5964, and L5980) are not considered medically necessary when an above-knee initial prosthesis (procedure code L5505) or an above-knee preparatory prosthesis (procedure codes L5560, L5570, L5580, L5590, L5595, or L5600) is provided.

Prosthetic substitution or additions (procedure codes L5624, L5631, L5648, L5651, L5652, L5705, L5706, L5964, and L5966) are not considered medically necessary when an above-knee preparatory, prefabricated prosthesis (procedure code L5585) is provided.

Sockets  
Prior authorization for test (diagnostic) sockets for an individual prosthesis is limited to a quantity of two test sockets. Prior authorization for same-socket inserts for an individual prosthesis is also limited to a quantity of two. Requests for test sockets or same-socket inserts beyond these limitations must include documentation of medical necessity that supports the need for the additional sockets.

2.7.5.2.2 Upper-Limb Prostheses  
Upper limb prostheses include, but are not limited to, the following:

- Partial hand prostheses
- Wrist and elbow disarticulation prostheses
- Shoulder and interscapular thoracic prostheses
- Immediate postsurgical or early fitting prostheses
- Preparatory prostheses
- Terminal devices
- Replacement sockets
- Inner sockets-externally powered
- Electric hand, wrist, and elbow prostheses

Upper limb prostheses will be considered for prior authorization with documentation of all of the general indication requirements. The additional criteria in the following sections apply for specific prosthetic devices.
Myoelectric Upper Limb Prostheses
A myoelectric upper limb prosthetic device is considered medically necessary when all of the following criteria have been met:

- The client has sufficient neurological, myocutaneous, and cognitive function to operate the prosthesis effectively.
- The client has an amputation or missing limb at the wrist or above (e.g., forearm, elbow, and so on).
- The client is free of comorbidities that could interfere with maintaining function of the prostheses (e.g., neuromuscular disease).
- The client retains sufficient microvolt threshold in the residual limb to allow proper function of the prostheses.
- Standard body-powered prosthetic devices cannot be used or are insufficient to meet the functional needs of the patient in performing ADLs.
- The client does not function in an environment that would inhibit function of the prosthesis (e.g., a wet environment or a situation involving electrical discharges that would affect the prosthesis).

2.7.5.2.3 External Breast Prostheses
External breast prostheses will be considered for prior authorization for clients who have congenital absence of a breast or who have had a mastectomy.

2.7.5.2.4 Craniofacial Prostheses
Craniofacial prostheses include, but are not limited to, external nasal, ear, and facial prostheses.
Craniofacial prostheses will be considered for prior authorization with documentation that the device is necessary to correct an absence or deformity of the affected body part.

2.7.5.2.5 Related Services

Accessories to Prostheses
Accessories to prostheses, such as stump stockings and harnesses will be considered for prior authorization when they are essential to the effective use of the prosthetic device.

Repairs, Replacements, and Modifications to Prostheses
Repairs due to normal wear and tear will be considered for prior authorization after 90 days from the date of delivery of the initial prosthesis, when the repair is:

- Necessary to make the equipment functional.
- More cost-effective than the replacement of the prosthetic device.

Providers must include documentation that supports medical necessity when they request prior authorization. Additional information from the provider may be requested to determine cost-effectiveness.

Replacement of prosthetic equipment will be considered for coverage when loss or irreparable damage has occurred. A copy of the police or fire report when appropriate and the measures to be taken to prevent re-occurrence must be submitted with the prior authorization request.

Socket replacements will be considered for prior authorization with documentation of functional or physiological need, including, but not limited to, changes in the residual limb, functional need changes, or irreparable damage or wear due to excessive weight or prosthetic demands of very active amputees.

Children typically require new prosthetic devices every 12 to 18 months, although the actual lifespan of a device depends on the child’s rate of skeletal growth. Prosthetic devices for children must accommodate growth and other physiological changes.
Components and systems that allow for growth or increase the lifespan of the prosthesis may include the following:

- Growth-oriented suspension systems and modifications
- Use of modular systems
- Use of flexible sockets
- Use of removable sockets (slip or triple-wall sockets)
- Use of distal pads
- Modification of socket liners
- Increasing or decreasing sock thickness

Modifications due to growth or change in medical status will be considered for prior authorization with documentation of medical necessity.

Medical necessity for requested components or additions to the prosthesis is based on the client’s current functional ability and the expected functional potential as defined by the prosthetist and the ordering physician.

2.7.6 Claims Information

Submit services provided by orthotic and prosthetic suppliers in an approved electronic format or on a CMS-1500 paper claim form. Providers must purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

**Important:** Attach the invoice to the claim for any specialized equipment.

Include the name of the referring physician in Block 17 of the CMS-1500 paper claim form or its electronic equivalent. Orthotics or prosthetics may be billed in the office, home, or outpatient setting. Claims for services that have been prior authorized must reflect the PAN in Block 23 of the CMS-1500 paper claim form or its electronic equivalent.

**Refer to:** Form CH.28, “Orthotic and Prosthetic Services (CCP Only)” in this handbook for a claim form example.

2.7.7 Reimbursement

Orthotic and prosthetic services are reimbursed in accordance with 1 TAC §355.8441. Outpatient hospitals are reimbursed for THSteps DME and expendable supplies in accordance with 1 TAC §355.8061.

2.8 Personal Care Services (PCS) (CCP)

2.8.1 Enrollment

CCP providers that want to participate in the delivery of PCS to Medicaid clients must be enrolled with TMHP and have the appropriate Texas Department of Aging and Disability Services (DADS) licensure or certification.

All PCS providers must have a TPI and a National Provider Identifier (NPI).

LCHH agencies that are currently enrolled through TMHP do not need to enroll as a CCP-PCS provider.

Providers that are currently contracted with DADS to administer consumer-directed services (CDS) or provide PCS through the service responsibility option (SRO), including providers currently enrolled in Texas Medicaid, are required to enroll or re-enroll separately as a CDS or SRO provider. Texas Medicaid enrolls only new providers that are currently contracted with DADS to provide PCS through CDS and SRO.
Providers (other than those discussed above) that want to provide PCS to Medicaid clients must enroll through TMHP. Texas Medicaid enrollment rules for PCS participation require providers to have one of the following categories of DADS licensure prior to enrollment:

- Personal Assistance Services (PAS)
- Licensed Home Health Services (LHHS)
- Licensed and Certified Home Health Services (LCHHS)

Additionally, providers must have a TPI in one of the following enrollment categories: LHHS agency, LCHHS agency, or PCS provider.

Providers that are enrolled as any entity other than an LHHS agency or LCHHS agency are required to meet the provider enrollment rules in order to participate in the delivery of PCS through Texas Medicaid.

Refer to: Subsection 2.1.2, “Enrollment” in this handbook for more information about CCP enrollment procedures.

2.8.2 Services, Benefits, and Limitations

PCS is a benefit of CCP for Texas Medicaid clients who are birth through 20 years of age and who are not inpatients or residents of a hospital, in a nursing facility or intermediate care facility for persons with intellectual disabilities (ICF/ID), or in an institution for mental disease. PCS will be denied when billed on the same date of service as an inpatient stay service. The provider may appeal the denied claim with documentation supporting that PCS was performed while the client was not in a hospital setting. PCS are support services provided to clients who meet the definition of medical necessity and require assistance with the performance of ADLs, instrumental activities of daily living (IADLs), and health-related functions due to a physical, cognitive, or behavioral limitation related to a client’s disability or chronic health condition. PCS are provided by someone other than the legal responsible adult of the client who is a minor child or the legal spouse of the client.

A responsible adult is an individual who is an adult, as defined by the Texas Family Code, and who has agreed to accept the responsibility for providing food, shelter, clothing, education, nurturing, and supervision for the client. Responsible adults include, but are not limited to, biological parents, adoptive parents, foster parents, guardians, court-appointed managing conservators, and other family members by birth or marriage.

PCS are those services that assist eligible clients in performing ADLs, IADLs, and other health-related functions. The scope of ADLs, IADLs, and health-related functions includes a range of activities that healthy, non-disabled adults can perform for themselves. Typically, developing children gradually and sequentially acquire the ability to perform these ADLs, IADLs, and health-related functions for themselves. If a typically developing child of the same chronological age could not safely and independently perform an ADL, IADL, or health-related function without adult supervision, then the client’s responsible adult ensures that the client’s needs for the ADLs, IADLs, and health-related functions are met.
PCS include direct intervention (assisting the client in performing a task) or indirect intervention (cueing or redirecting the client to perform a task). ADLs, IADLs, and health-related functions include, but are not limited to, the following:

<table>
<thead>
<tr>
<th>ADLs</th>
<th>IADLs</th>
<th>Health-Related Functions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bathing</td>
<td>Accessing and utilizing health services</td>
<td></td>
</tr>
<tr>
<td>Dressing</td>
<td>Application/maintenance of prosthetics and orthotics</td>
<td>Medication administration and management</td>
</tr>
<tr>
<td>Eating</td>
<td>Communication</td>
<td></td>
</tr>
<tr>
<td>Grooming</td>
<td>Grocery/household shopping</td>
<td>Reporting as to the client’s condition, including changes to the client’s condition or needs and completing appropriate records</td>
</tr>
<tr>
<td>Maintaining continence</td>
<td>Light housework</td>
<td>Skin care — maintenance of the hygienic state of the client’s skin under optimal conditions of cleanliness and comfort</td>
</tr>
<tr>
<td>Mobility</td>
<td>Laundry</td>
<td>Use of DME</td>
</tr>
<tr>
<td>Positioning</td>
<td>Meal preparation</td>
<td></td>
</tr>
<tr>
<td>Transferring</td>
<td>Money management</td>
<td></td>
</tr>
<tr>
<td>Toileting</td>
<td>Personal hygiene</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Medical transportation*</td>
<td></td>
</tr>
</tbody>
</table>

* Medical transportation includes the coordination of transportation to medical appointments and accompaniment to appointments. PCS does not include the payment for transportation or transportation vehicles since these services are available through MTP.

Note: Exercise and range of motion are not available through PCS, but are services that could be provided through PT, PDN, or home health SN.

PCS do not include the following:

- ADLs, IADLs, or health-related functions that a typically developing child of the same chronological age could not safely and independently perform without adult supervision.
- Services that provide direct intervention when the client has the physical, behavioral, and cognitive abilities to perform an ADL, IADL, or health-related function without adult supervision.
- Services provided to an inpatient or a resident of a hospital, nursing facility, ICF/ID, or an institution for mental disease.
- Duplication of services provided by other programs.
- Services used for or intended to provide respite care or child care.

PCS is considered for reimbursement when providers use procedure code T1019 in conjunction with the appropriate modifier listed in the table below. PCS provided by a home health agency or PCS-only provider, including PCS being provided under the SRO defined in 40 TAC Part 1, Chapter 41, must be billed in 15-minute increments. PCS provided by a consumer-directed services agency (CDSA) under the CDS option defined in 40 TAC Part 1, Chapter 41, must submit the attendant fee in 15-minute increments. CDSAs must bill the administration fee once per calendar month per client for any month in
which the client receives PCS under the CDS option and regardless of the number of PCS units of service the client receives under the CDS option during the month. PCS claims are considered for reimbursement only when TMHP has issued a valid PAN to a PCS provider.

### 2.8.2.1 Place of Services

PCS may be provided in the following settings if medically necessary:

- The client’s home
- The client’s school
- The client’s daycare facility
- Other community setting in which the client is located

**Note:** For claims filing purposes, the PCS provider must bill POS 2 (home) when submitting claims to TMHP.

Texas Medicaid does not reimburse providers for PCS that duplicate services that are the legal responsibility of school districts. The school district, through the School Health and Related Services (SHARS) program, is required to meet the client’s personal care needs while the client is at school. If those needs cannot be met by SHARS or the school district, the school district must submit documentation to the Texas Department of State Health Services (DSHS) case manager indicating the school district is unable to provide all medically necessary services. When clients are receiving both PCS and PDN services from an individual person over the same span of time, the combined total number of hours for PCS and PDN are reimbursed according to the maximum allowable rate.

### 2.8.2.2 Client Eligibility

The PCS benefit is available to Texas Medicaid clients who:

- Are birth through 20 years of age.
- Are enrolled with Texas Medicaid.
- Are eligible for CCP.
- Have physical, cognitive, or behavioral limitations related to a disability or chronic health condition that inhibits the client’s ability to accomplish ADLs, IADLs, or health-related functions.

When the client has a functional condition that meets the criteria for PCS, the following needs of the client’s responsible adult will be considered:

- The responsible adult’s need to sleep, work, attend school, and meet his or her own medical needs.

### PCS Procedure Codes

* 40 TAC Part 1, Chapter 41
• The responsible adult’s legal obligation to care for, support, and meet the medical, educational, and psychosocial needs of his or her other dependents.

• The responsible adult’s physical ability to perform the PCS.

Clients who are enrolled in a DADS waiver program may also receive PCS if they are eligible for it, as long as the services that are provided through the waiver program and PCS are not duplicated. Clients who are enrolled in the following DADS waiver programs may access the PCS benefits if they meet the PCS eligibility requirements:

• Community Living Assistance and Support Services (CLASS)
• Deaf/Blind Multiple Disabilities (DBMD)
• Community-Based Alternatives (CBA)
• Consolidated Waiver Program (CWP)
• Medically Dependent Children Program (MDCP)
• Texas Home Living Waiver (TxHmL)
• Youth Empowerment Services (YES)
• Home and Community Services (HCS)

  Note: Clients who receive HCS Residential Support Services, Supervised Living Services, or Foster/Companion Care Services are not eligible to receive attendant care services through PCS.

Clients must choose the program through which they receive attendant care, if they meet the eligibility requirements of both programs. Clients will be given the following options for the delivery of attendant care services:

• A client can receive all attendant care services through PCS.

• A client can decline PCS and receive all attendant care service through a waiver program, if the waiver program offers attendant care.

Clients who participate in the CDS option for PCS and for a waiver program are required to choose one CDSA to provide services through both programs. CDSAs will only be permitted to file the financial management services (FMS) fee, also known as the monthly administrative fee, through one program. The CDSA must file the FMS claim through the program that provides the highest reimbursement rate.

2.8.2.2.1 Accessing the PCS Benefit

Clients must be referred to DSHS before receiving the PCS benefit. A referral can be made by any person who recognizes a client may have a need for PCS, including, but not limited to, the following:

• The client, a parent, a guardian, or a responsible adult

• A primary practitioner, primary care provider, or medical home

• A licensed health professional who has a therapeutic relationship with the client and ongoing clinical knowledge of the client

• A family member

• Home health, personal assistance, or consumer-directed service agency providers

Referrals to DSHS can be made to the appropriate DSHS Health Service Region, based on the client’s place of residence in the state. Clients, parents, or guardians may also call the TMHP PCS Client Line at 1-888-276-0702 for more information on PCS. PCS providers must provide contact information for the client or responsible adult to DSHS or the TMHP PCS Client Contact Line when making a referral.
Upon receiving a referral, DSHS assigns the client a case manager, who then conducts an assessment in the client’s home with the input and assistance of the client or responsible adult. Based on the assessment, the case manager identifies whether the client has a need for PCS. If the case manager identifies a need for PCS, the client or responsible adult is asked to select a Medicaid-enrolled PCS provider in their area.

Once a provider is selected, the DSHS case manager prior authorizes a quantity of PCS based on the assessment and requests TMHP to issue a PAN to the selected PCS provider. The PCS provider uses the PAN to submit claims to TMHP for the services provided. DSHS also contacts the client’s primary practitioner (a licensed physician, APRN, or PA) or primary care provider to obtain a statement of need.

2.8.2.2.2 The Primary Practitioner’s Role in the PCS Benefit

A client who is assessed for the PCS benefit must have a primary practitioner (a licensed physician, APRN, or PA) or a primary care provider who has a therapeutic relationship and ongoing clinical knowledge of the client. The primary practitioner or primary care provider must have established a diagnosis for the client and must provide continuing care and medical supervision of the client. When the DSHS case manager has determined the client has a need for the PCS benefit, the case manager contacts the client’s primary practitioner or primary care provider to obtain a Practitioner Statement of Need (PSON). The PSON certifies the client has a physical, cognitive, or behavioral limitation related to a disability or chronic health condition and is birth through 20 years of age. The PSON must be signed and dated by the primary practitioner or primary care provider within 60 days of the initial start of care (SOC). The primary practitioner or primary care provider must mail or fax the completed PSON to the appropriate DSHS Health Services Region. DSHS keeps the signed and dated PSON in the client’s case management record for the duration of the client’s participation in the benefit.

When a behavioral health condition exists, the primary practitioner may be a behavioral health provider. The primary practitioner must maintain the PSON in the client’s medical record.

In the absence of primary practitioner medical record documentation and a Practitioner Statement of Need to support the client has a physical, cognitive or behavioral health condition impacting the client’s ability to perform an ADL or IADL PCS, payment may be recouped.

2.8.2.3 PCS Provided in Group Settings

PCS may be provided in a provider to client ratio other than one-to-one. Only the time spent on direct PCS for each client may be billed. Total PCS billed for all clients cannot exceed the individual provider’s total number of hours spent at the POS. PCS may be provided by more than one attendant to an individual client, or PCS may be provided to more than one client by one attendant. Settings in which providers can provide PCS in a provider to client ratio other than one-to-one include homes with more than one client needing PCS, foster homes, and independent living arrangements.

A PCS provider may provide PCS to more than one client over the span of the day as long as:

- Each client’s care is based on an individualized service plan.
- Each client’s needs and service plan do not overlap with another client’s needs and service plan.

**Example:** If the prior authorized PCS hours for Client A is four hours, Client B is six hours, and the actual time spent with both clients is eight hours, the provider must bill for the actual one-on-one time spent with each client, not to exceed the client’s prior authorized hours or total hours worked. It would be acceptable to bill four hours for Client A and four hours for Client B, or three hours for Client A and five hours for Client B. It would not be acceptable to bill five hours for Client A and three hours for Client B. It would be acceptable to bill ten hours if the individual person actually spent ten hours onsite providing prior authorized PCS split as four hours for Client A and six hours for Client B. A total of ten hours cannot be billed if the individual person worked only eight hours.
2.8.3 Prior Authorization and Documentation Requirements

Prior authorization is required before services are provided. All PCS must be prior authorized by a DSHS case manager based upon client need, as determined by the client assessment. DSHS prior authorizes PCS for eligible clients. The DSHS case manager notifies TMHP of the authorized quantity of PCS. TMHP sends a notification letter with the PAN to the client or responsible adult and the selected PCS provider if PCS is approved or modified. Only the client or responsible adult receives a notification letter with an explanation of denied services. PCS is prior authorized for 12-month periods. PCS providers must provide services from the start of care date agreed to by the client or responsible adult, the case manager, and the PCS provider.

A PCS provider may obtain prior authorization to provide enhanced PCS to clients with a behavioral health condition when the following criteria are met:

- The DSHS case manager completes the Personal Care Assessment Form (PCAF) and identifies the health condition.
- The PCAF indicates that the identified behavioral health condition impacts the client’s ability to perform an ADL or IADL.
- The PCAF indicates which ADL(s) or IADL(s) cannot be performed by the client without assistance.
- The DSHS case manager submits the appropriate modifier on the authorization request.

When a client experiences a change in condition, the client or responsible adult must notify the DSHS Health Service Office in the client’s region. A DSHS case manager must perform a new assessment and prior authorize any revisions in the quantity of PCS based on the new assessment. TMHP issues a revised authorization and notifications are sent to the client or responsible adult and the selected PCS provider. If the change is made during a current 12-month prior authorization period, the new prior authorization will maintain the same end date as the original 12-month prior authorization period. The revised authorization period will begin on the SOC date stated in the new assessment.

For continuing and ongoing PCS needs beyond the initial 12-month prior authorization period, a DSHS case manager must conduct a new assessment and submit a new authorization request to TMHP. TMHP sends a notification letter updating the prior authorization to the client, responsible adults, and the selected PCS provider.

Providers can call a toll-free PCS Provider Inquiry Line at 1-888-648-1517 for assistance with inquiries about the status of a PCS prior authorization. Providers should direct inquiries about other Medicaid services to the TMHP Contact Center at 1-800-925-9126. PCS providers should encourage the client or responsible adult to contact the appropriate DSHS Health Service Region with inquiries or concerns about the PCS assessment.

2.8.3.1 PCS Provider Responsibilities

PCS providers must comply with all applicable federal, state, and local laws and regulations.

All PCS providers must maintain written policies and procedures for obtaining consent for medical treatment in the absence of the responsible adult. The procedure and policy must meet the standards of the Texas Family Code.

Providers must accept clients only when there is a reasonable expectation the client’s needs can be adequately met in the POS. The POS must be able to support the client’s health and safety needs and adequately support the use, maintenance, and cleaning of all required medical devices, equipment, and supplies. Necessary primary and backup utility, communication, and fire safety systems must be available in the POS.

The PCS provider is responsible for the supervision of the PCS attendant as required by the PCS provider’s licensure requirements.
2.8.3.2 Documentation of Services Provided and Retrospective Review

Documentation elements are routinely assessed for compliance in retrospective review of client records, including the following:

- All entries are legible to people other than the author, dated (month, day, year, time), and signed by the author.
- Each page of the record documents the client’s name and Medicaid identification number.
- All attendants’ arrival and departure times are documented with signature and time.
- Documentation of services correlates with, and reflects medical necessity for, the services provided on any given day.
- Client’s arrival or departure from the home setting is documented with the time of arrival, departure, mode of transportation, and who accompanied the client.

2.8.4 Claims Information

TMHP processes PCS claims. PCS providers must submit claims for services in an approved electronic claims format or on the appropriate claim form based on their provider type. Providers, other than home health agencies, enrolled as a PAS-only provider, a CDSA, or an SRO provider must file PCS claims using CMS-1500 paper claim form. Home health agencies, including those enrolled as a CDSA, or an SRO provider, must file PCS claims using the UB-04 CMS-1450 paper claim form. TMHP does not supply the forms.

Home health agencies and consumer-directed agencies that bill for PCS using procedure code T1019 must include the prior authorization number on claims submitted for reimbursement. Additionally, providers utilizing paper, TexMedConnect, or billing through EDI must include the prior authorization number with all claims submissions.

2.8.4.1 Managed Care Clients

PCS services are carved-out of the Medicaid Managed Care Program for State of Texas Access Reform (STAR) clients and must be billed to TMHP for payment consideration. Carved-out services are those that are rendered to Medicaid Managed Care clients but are administered by TMHP and not the client’s MCO. Claims for STAR Health and STAR+PLUS are not carved out and must be submitted to the client’s MCO for payment consideration.

2.8.4.2 PCS for STAR Health Clients

Personal care services for children and youth are authorized and processed by Superior HealthPlan. Medicaid providers that want to provide PCS services to clients in the STAR Health program should contact Superior HealthPlan for information regarding the contracting and credentialing process at:

Superior HealthPlan - Network Development
Telephone: 1-866-615-9399 Ext. 22534
Email: shp-networkdevelopment@centene.com

2.8.5 Reimbursement

Providers of PCS are reimbursed in accordance with 1 TAC §355.8441.

2.9 Private Duty Nursing (PDN)(CCP)

2.9.1 Enrollment

Home health agencies may enroll to provide PDN under CCP. RNs and licensed vocational nurses (LVNs) may enroll independently to provide PDN under CCP.
Home health agencies must do all of the following:

- Comply with provider participation requirements for home health agencies that participate in Texas Medicaid
- Comply with mandatory reporting of suspected abuse and neglect of children or adults
- Maintain written policies and procedures for obtaining consent for medical treatment for clients in the absence of the parent or guardian
- Comply with all requirements in this manual

Independently-enrolled RNs and LVNs must be enrolled as providers in CCP and comply with all of the following:

- The terms of the Texas Medicaid Provider Agreement
- All state and federal regulations and rules relating to Texas Medicaid
- The requirements of this manual, all handbooks, standards, and guidelines published by HHSC

Independently enrolled RNs and LVNs must also:

- Provide at least 30 days’ written notice to clients of their intent voluntarily to terminate services except in situations of potential threat to the nurse’s personal safety.
- Comply with mandatory reporting of suspected abuse and neglect of children.
- Maintain written policies and procedures for obtaining consent for medical treatment for clients in the absence of the parent or guardian.

Independently enrolled RNs must:

- Hold a current license from the Texas Board of Nursing (BON) or another compact state to practice as an RN.
- Agree to provide services in compliance with all applicable federal, state, and local laws and regulations, including the Texas Nursing Practice Act.
- Comply with accepted professional standards and principles of nursing practice.

Independently enrolled LVNs must:

- Hold a current license from the Texas Board of Nursing (BON) to practice as an LVN.
- Agree to provide services in compliance with all applicable federal, state, and local laws and regulations, including the Texas Nursing Practice Act.
- Comply with accepted standards and principles of vocational nursing practice.
- Be supervised by an RN once per month. The supervision must occur when the LVN is present and be documented in the client’s medical record.

Refer to: Subsection 2.1.2, “Enrollment” in this handbook for more information about CCP enrollment procedures.

2.9.2 Services, Benefits, and Limitations

Medicaid clients who are birth through 20 years of age are entitled to all medically necessary PDN services and home health SN services.

PDN is nursing services, as described by the Texas Nursing Practice Act and its implementing regulations, for clients who meet medical necessity criteria listed below and who require individualized, continuous, skilled care beyond the level of SN visits provided under Texas Medicaid (Title XIX) Home Health Services SN.
Nursing services are medically necessary under the following conditions:

- The requested services are nursing services as defined by the Texas Nursing Practice Act and its implementing regulations.
- The requested services correct or ameliorate the client’s disability, physical or mental illness, or condition. Nursing services correct or ameliorate the client’s disability, physical or mental illness, or condition when the services improve, maintain, or slow the deterioration of the client’s health status.
- There is no third party resource (TPR) financially responsible for the services.

Medically necessary nursing services may be either PDN services or home health SN services, depending on whether the client’s nursing needs can be met on a per-visit basis.

“Responsible adult” means an individual who is an adult, as defined by the Texas Family Code, and who has agreed to accept the responsibility for providing food, shelter, clothing, education, nurturing, and supervision for the client. Responsible adults include, but are not limited to: biological parents, adoptive parents, foster parents, guardians, court-appointed managing conservators, and other family members by birth or marriage.

PDN must be ordered or prescribed by a physician and provided by an RN, LVN, or a licensed practical nurse (LPN).

Professional nursing provided by an RN, as defined in the Texas Nursing Practice Act, means the performance of an act that requires substantial specialized judgment and skill, the proper performance of which is based on knowledge and application of the principles of biological, physical, and social science, as acquired by a completed course in an approved school of professional nursing. The term does not include acts of medical diagnosis or the prescription of therapeutic or corrective measures. Professional nursing involves:

- The observation, assessment, intervention, evaluation, rehabilitation, care and counsel, or health teachings of a person who is ill, injured, infirm, or experiencing a change in normal health processes.
- The maintenance of health or prevention of illness.
- The administration of a medication or treatment as ordered by a physician, podiatrist, or dentist.
- The supervision of delegated nursing tasks or teaching of nursing.
- The administration, supervision, and evaluation of nursing practices, policies, and procedures.
- The performance of an act delegated by a physician.
- Development of the nursing care plan.

Vocational nursing, as defined in the Texas Nursing Practice Act, means a directed scope of nursing practice, including the performance of an act that requires specialized judgment and skill, the proper performance of which is based on knowledge and application of the principles of biological, physical, and social science as acquired by a completed course in an approved school of vocational nursing. The term does not include acts of medical diagnosis or the prescription of therapeutic or corrective measures. Vocational nursing involves:

- Collecting data and performing focused nursing assessments of the health status of an individual.
- Participating in the planning of the nursing care needs of an individual.
- Participating in the development and modification of the nursing care plan.
- Participating in health teaching and counseling to promote, attain, and maintain the optimum health level of an individual.
- Assisting in the evaluation of an individual’s response to a nursing intervention and the identification of an individual’s needs.
• Engaging in other acts that require education and training, as prescribed by board rules and policies, commensurate with the nurse’s experience, continuing education, and demonstrated competency.

Professional and vocational nursing care consists of those services that must, under state law, be performed by an RN or LVN as defined by the Texas Nursing Practice Act §301.002. These services include observation, assessment, intervention, evaluation, rehabilitation, care and counseling, and health teaching, and which are further defined as nursing services in 42 CFR §§409.32, 409.33, and 409.44.

• In determining whether a service requires the skill of a licensed nurse, consideration must be given to the inherent complexity of the service, the condition of the client, and the accepted standards of medical and nursing practice.

• The fact that the nursing care can be, or is, taught to the client or to the client’s family or friends does not negate the skilled aspect of the service when the service is performed by a nurse.

• If the service could be performed by the average nonmedical person, the absence of a competent person to perform it does not cause it to be a nursing service.

• If the nature of a service is such that it can safely and effectively be performed by the average nonmedical person without direct supervision of a licensed nurse, the services cannot be regarded as nursing care.

• Some services are classified as nursing care on the basis of complexity alone (e.g., intravenous and intramuscular injections or insertion of catheters), and if reasonable and necessary to the treatment of the client’s illness or injury, would be covered on that basis. In some cases, however, the client’s condition may cause a service that would ordinarily not be considered nursing care to be considered nursing care. This would occur when the client’s condition is such that the service can be safely and effectively provided only by a nurse.

• A service that, by its nature, requires the skills of a nurse in order for it to be provided safely and effectively, continues to be a skilled service even if it is taught to the client, the client’s family, or other caregivers.

PDN should prevent prolonged and frequent hospitalizations or institutionalization and provide cost-effective and quality care in the most appropriate, least restrictive environment. PDN provides direct nursing care and caregiver training and education. The training and education is intended to optimize client health status and outcomes, and to promote family-centered, community-based care as a component of an array of service options.

A request must include documentation from the provider to support the medical necessity of the service, equipment, or supply. CCP is obligated to authorize all medically necessary PDN to promote independence and support the client living at home.

PDN cannot be considered for the primary purpose of providing respite care, childcare, or ADLs for the client, housekeeping services, or comprehensive case management beyond the service coordination required by the Texas Nursing Practice Act.

Claims for PDN services must be submitted to TMHP as follows:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Maximum Fee</th>
</tr>
</thead>
<tbody>
<tr>
<td>Independently Enrolled RNs/LVNs</td>
<td></td>
</tr>
<tr>
<td>T1000 with modifier TD or TE</td>
<td>15 minutes</td>
</tr>
<tr>
<td>Home Health Agencies</td>
<td></td>
</tr>
<tr>
<td>T1000 with modifier TD or TE</td>
<td>15 minutes</td>
</tr>
<tr>
<td>T1002</td>
<td>15 minutes</td>
</tr>
<tr>
<td>T1003</td>
<td>15 minutes</td>
</tr>
</tbody>
</table>
Note: Independently-enrolled LVNs must use the TE modifier, and independently-enrolled RNs must use the TD modifier.

Home health agencies that provide PDN services for clients with a tracheostomy or clients who are ventilator-dependent receive additional reimbursement. Providers must bill using procedure codes T1000, T1002, or T1003 with the UA modifier and one of the following diagnosis codes.

<table>
<thead>
<tr>
<th>Diagnosis Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>51900</td>
</tr>
<tr>
<td>V468</td>
</tr>
</tbody>
</table>

Because of the nature of the service being provided, some billing situations are unique to PDN. These billing requirements are as follows:

- All hours worked on one day must be billed together, on one detail, even if they involve two shifts. For example, if Nurse A works 7 a.m. to 11 a.m. and then returns and works 7 p.m. to 11 p.m., services must be billed for 8 hours (32 15-minute units) on one detail for that date of service.
- An individually-enrolled nurse will not be reimbursed for more than 16 hours of PDN services in one day.

PDN may be delivered in a provider to client ratio other than one-on-one. An RN or LVN may provide PDN services to more than one client over the span of the day as long as each client’s care is based on an individualized POC, and each client’s needs and POC do not overlap with another client’s needs and POC. Only the time spent on direct PDN for each client is reimbursed. Total PDN billed for all clients cannot exceed an individual provider’s total number of hours at the POS.

A single nurse may be reimbursed for services to more than one client in a single setting when the following conditions are met:

- The hours for PDN for each client have been authorized through CCP.
- Only the actual “hands-on” time spent with each client is billed for that client.
- The hours billed for each client do not exceed the total hours approved for that client and do not exceed the actual number of hours for which services were provided.

Example: If the prior authorized PDN hours for Client A is four hours, Client B is six hours, and the actual time spent with both clients is eight hours, the provider must bill for the actual one-on-one time spent with each client, not to exceed the client’s prior authorized hours or total hours worked. It would be acceptable to bill four hours for Client A and four hours for Client B, or three hours for Client A and five hours for Client B. It would not be acceptable to bill five hours for Client A and three hours for Client B. It would be acceptable to bill ten hours if the nurse actually spent ten hours onsite providing prior authorized PDN services split as four hours for Client A and six hours for Client B. A total of ten hours cannot be billed if the nurse worked only eight hours.

For reimbursement purposes, PDN must always be submitted with POS 2 (home) regardless of the setting in which services are actually provided. PDN may be provided in any of the following settings:

- Client’s home
- Client’s school
- Client’s daycare facility
PDN that duplicates services that are the legal responsibility of the school districts are not reimbursed. The school district, through the SHARS program, is required to meet the client’s SN needs while the client is at school; however, if those needs cannot be met by SHARS or the school district, documentation supporting medical necessity may be submitted to the CCP with documentation that nursing services are not provided in the school.

A responsible adult of a minor client or a client’s spouse may not be reimbursed for PDN even if the responsible adult is an enrolled provider or employed by an enrolled provider.

PDN is subject to retrospective review and possible recoupment when the medical record does not document that the provision of PDN is medically necessary based on the client’s situation and needs. The PDN provider’s record must explain all discrepancies between the service hours approved and the service hours provided. For example, the parents released the provider from all responsibility for the service hours or the agency was not able to staff the service hours. The release of provider responsibility does not indicate the client does not have a medical need for the services during those time periods.

2.9.2.1 PDN Provided During a Skill Nursing Visit for TPN Administration Education

For clients who receive PDN services and who also require TPN administration education, the intermittent SN visits may be reimbursed separately when the SN services are for client and caregiver training in TPN administration and the PDN provider is not an RN appropriately trained in the administration of TPN, and the PDN provider is not able to perform the function.

PDN and SN must not be routinely performed on the same date during the same time period.

PDN and SN will not be considered for reimbursement when the services are performed on the same date during the same time period without prior authorization approval.

If the SN visit for TPN education occurs during a time period when the PDN provider is caring for the client, both the PDN provider and the nurse educator must document in the client’s medical record the skilled services individually provided including, but not limited to:

- The start and stop time of each nursing providers specialized task(s)
- The client condition that requires the performance of skilled PDN tasks during the SN visit for TPN education
- The skilled services that each provided during that time period

Both the intermittent skilled nurse visit and the PDN services provided during the same time period may be recouped if the documentation does not support the medical necessity of each service provided.

2.9.2.2 Criteria

2.9.2.2.1 Client Eligibility Criteria

To be eligible for PDN services, a client must meet all the following criteria:

- Be birth through 20 years of age and eligible for Medicaid and THSteps
- Meet medical necessity criteria for PDN
- Have a primary physician who:
  - Provides a prescription for PDN.
  - Establishes a POC.
  - Provides documentation to support the medical necessity of PDN services.
• Provides continuing medical care and supervision of the client, including, but not limited to, examination or treatment within 30 days (initial requests of PDN services), or examination or treatment that complies with the THSteps periodicity schedule, or is within six months of the PDN extension SOC date, whichever is more frequent (for extensions of PDN services). This requirement may be waived based on review of the client’s specific circumstances.

• Provides specific written, dated orders for the client.

• Require care beyond the level of services provided under Texas Medicaid (Title XIX) Home Health Services

Clients who are birth through 17 years of age must reside with a responsible adult who is either trained to provide nursing care or is capable of initiating an identified contingency plan when the scheduled private duty nurse is unexpectedly unavailable.

2.9.2.2.2 Medical Necessity
PDN is considered medically necessary when a client has a disability, physical, or mental illness, or chronic condition and requires continuous, skillful observations, judgments, and interventions to correct or ameliorate his or her health status.

Documentation submitted for a request for PDN must address the following questions:

• Is the client dependent on technology to sustain life?

• Does the client require ongoing and frequent skilled interventions to maintain or improve health status?

• Will delaying skilled intervention impact the health status of the client? If so, how will the health status be affected?
  • Deterioration of a chronic condition
  • Risk of death
  • Loss of function
  • Imminent risk to health status due to medical fragility

2.9.2.2.3 Place of Service (POS)
PDN is based on the need for skilled care in the client’s home; however, these services may follow the client and may be provided in accordance with 42 CFR §440.80.

The POS must be able to support the client’s health and safety needs. It must be adequate to accommodate the use, maintenance, and cleaning of all medical devices, equipment, and supplies required by the client. Necessary primary and backup utilities, communication, fire, and safety systems must be available at all times.

2.9.2.2.4 Amount and Duration of PDN
The amount and duration of PDN must always be commensurate with the client’s medical needs. Requests for services must reflect changes in the client’s condition that affect the amount and duration of PDN.

2.9.3 Prior Authorization and Documentation Requirements
A request for prior authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

A CNM, CNS, NP, or PA may sign all documentation related to the provision of private duty nursing services on behalf of the client’s physician when the physician delegates this authority.
All signatures must be current, unaltered, original, and handwritten; computerized or stamped signatures will not be accepted. All documentation must be maintained by the requesting PDN provider. The PDN provider may be asked to submit additional documentation to support medical necessity.

Requests for nursing services must be submitted on the required Medicaid authorization forms and include supporting documentation. The supporting documentation must:

- Clearly and consistently describe the client’s current diagnosis, functional status, and condition.
- Consistently describe the treatment throughout the documentation.
- Provide a sufficient explanation as to how the requested nursing services correct or ameliorate the client’s disability, physical or mental illness, or condition.

When a provider receives a referral for PDN, the provider must have an RN perform a nursing assessment of the client within the client’s home environment. This assessment must be performed before seeking prior authorization for PDN, with any request for PDN recertification, or any request to modify PDN hours.

The assessment must demonstrate the following:

- Medical necessity for PDN.
- Safety of providing care in the proposed setting.
- If birth through 17 years of age, the client resides with a responsible adult who is either trained to provide nursing care or is capable of initiating an identified contingency plan when the scheduled private duty nurse is unexpectedly unavailable.

  - “Responsible adult” means an individual who is an adult, as defined by the Texas Family Code, and who has agreed to accept the responsibility for providing food, shelter, clothing, education, nurturing, and supervision for the client. Responsible adults include, but are not limited to: biological parents, adoptive parents, foster parents, guardians, court-appointed managing conservators, and other family members by birth or marriage.

  - An identified contingency plan is a structured process designed by the responsible adult and the PDN provider, by which a client will receive care when a scheduled private duty nurse is unexpectedly unavailable, and the responsible adult is unavailable, or is not trained to provide the nursing care. The identified responsible adult must be able to initiate the contingency plan.

- The existing level of care and any additional health-care services including the following: SHARS, MDCP, OT, PT, ST, primary home care (PHC), and case management services.

  **Note:** Services provided under these programs do not prevent a client from obtaining all medically necessary services. Certain school services are provided to meet education needs, not medical needs. Records related to a client’s Individuals with Disabilities Education Act (IDEA) services are confidential records that clients do not have to release or provide access to.

When an RN completes a client assessment and identifies a medical necessity for ADLs or health-related functions to be provided by a nurse, the scope of PDN services may include these ADLs or health-related functions.

  **Note:** CCP does not review or authorize PDN based on partial or incomplete documentation.

PDN must be prior authorized, and requests for PDN must be based on the current medical needs of the client.

The following criteria are considered for PDN prior authorization:

- The documentation submitted with the request is complete.
- The requested services are nursing services as defined by the Texas Nursing Practice Act and its implementing regulations.
• The explanation of the client's medical needs is sufficient to support a determination that the requested services correct or ameliorate the client's disability, physical or mental illness, or chronic condition.

• The client's nursing needs cannot be met on an intermittent or part-time basis through Texas Medicaid (Title XIX) Home Health Services skilled nursing services.

• There is no TPR financially responsible for the services.

Only those services that CCP determines to meet the medical necessity criteria for PDN are reimbursed. Before CCP determines the requested nursing services do not meet the criteria, the TMHP Medical Director contacts the treating physician to determine whether additional information or clarification can be provided that would allow for the prior authorization of the requested PDN. If the TMHP Medical Director is not successful in contacting the treating physician or cannot obtain additional information or clarification, the TMHP Medical Director makes a decision based on the available information.

Providers must obtain prior authorization within three calendar days of the SOC for services that have not been prior authorized. During the prior authorization process, providers are required to deliver the requested services from the SOC date. The SOC date is the date agreed to by the physician, the PDN provider, and the client or responsible adult and is indicated on the submitted POC as the SOC date.

Note: CCP does not prior authorize an SOC date earlier than seven calendar days before contact with TMHP.

Prior authorizations for more than 16 hours per day are not issued to a single, independently-enrolled nurse. Requests for prior authorizations of PDN must always be commensurate with the client's medical needs. Requests for services must reflect changes in the client's condition that affect the amount and duration of PDN.

The length of the prior authorization is determined on an individual basis and is based on the goals and timelines identified by the physician, provider, and client or responsible adult. PDN is not prior authorized for more than six months at a time.

PDN is not prior authorized under any of the following conditions:

• The client does not meet medical necessity criteria.

• The client does not have a primary physician.

• The client is 21 years of age or older.

• The client's needs are within the scope of services available through Texas Medicaid (Title XIX) Home Health Services SN or home health agency services because the needs can be met on a part-time or intermittent basis.

Intermittent SN visits for clients who receive PDN and who require TPN administration education may be considered for separate prior authorization if:

• The PDN provider is not an RN who has been appropriately trained in the administration of TPN, and the PDN provider is not able to perform the function.

• There is documentation that supports the medical need for an additional skilled nurse to perform TPN.

The SN services may be prior authorized only for the client and caregiver who will be trained in TPN administration.

Clients whose only SN need is the provision of education for self-administration of prescribed subcutaneous (SQ), intramuscular (IM), or intravenous (IV) injections will not qualify for PDN services. Nursing hours for the sole purpose of providing education to the client and caregiver may be considered through intermittent home health SN visits.
2.9.3.1 Retroactive Client Eligibility

Retroactive eligibility occurs when the effective date of a client’s Medicaid coverage is before the date that the client’s Medicaid eligibility is added to TMHP’s eligibility file, which is called the “add date.”

For clients with retroactive eligibility, prior authorization requests must be submitted after the client’s add date and before a claim is submitted to TMHP.

For services provided to Medicaid clients during the client’s retroactive eligibility period (i.e., the period from the effective date to the add date, prior authorization must be obtained within 95 days from the client’s add date and before a claim for those services is submitted to TMHP). For services provided on or after the client’s add date, the provider must obtain prior authorization within three business days of the date of service.

The provider is responsible for verifying eligibility. The provider is strongly encouraged to access the Automated Inquiry System (AIS) or TexMedConnect to verify eligibility frequently while providing services to the client. If services are discontinued before the client’s add date, the provider must still obtain prior authorization within 95 days of the add date to be able to submit claims.

2.9.3.2 Start of Care (SOC)

The SOC is the date that care is to begin, as agreed on by the family, the client’s physician, and the provider, and as listed on the POC and the CCP Prior Authorization Request Form. Providers are responsible for determining whether they can accept the client for services.

Once the provider accepts a client for service and accepts responsibility for providing PDN, the provider is required to deliver those services beginning with the SOC date. Providers are responsible for a safe transition of services when the authorization decision is a denial or a reduction of services. Providers are required to notify the physician and the client’s family on receipt of an authorization, a denial, or a change in PDN.

Providers must submit complete documentation no later than three business days from an SOC date to obtain initial coverage for the SOC date.

Note: Texas Medicaid (Title XIX) Home Health Services does not authorize an SOC date earlier than three business days before contact with TMHP.

For PDN recertification, CCP must receive complete documentation no later than three business days before the SOC date. It is recommended that recertification requests be submitted up to 30 days before the current authorization ends.

During the prior authorization process for initial and recertification requests, providers are required to deliver the requested services from the SOC date.

2.9.3.3 Prior Authorization of Initial Requests

Completed initial requests must be received and dated by CCP within three business days of the SOC. The request must be received by CCP no later than 5 p.m., Central Time, on the third day to be considered received within three business days. If a request is received more than three business days after the SOC, or after 5 p.m., Central Time, on the third day, authorization is given for dates of service beginning three business days before receipt of the completed request.

An initial PDN prior authorization request requires all of the following:

- CCP Prior Authorization Request form
- Home Health Plan of Care (POC) form
- CCP Nursing Addendum to Plan of Care form
All forms must be completed, signed, and dated by the primary physician within 30 calendar days prior to the SOC. The RN who completes the assessment and the client, or responsible adult, must also sign the CCP Nursing Addendum to Plan of Care form.

The CCP Nursing Addendum to Plan of Care form must include all of the following:

- Updated problem list
- Updated rationale/summary page
- Contingency plan
- 24-hour daily care flowsheet
- Signed acknowledgement

Initial requests for PDN may be prior authorized for up to 90 days.

Refer to: Form CH.8, “Nursing Addendum to Plan of Care (CCP) (7 Pages)” in this handbook.
Form CH.7, “Home Health Plan of Care (POC)” in this handbook.

2.9.3.4 Authorization for Revision of Current Services

The provider may request a revision at any time during the authorization period if medically necessary. The provider must notify TMHP at any time during an authorization period if the client’s condition changes and the authorized services are not commensurate with the client’s medical needs.

Completed requests for revision of PDN hours during the current authorization period must be received by CCP within three business days of the revised SOC. The request must be received by CCP no later than 5 p.m., Central Time, on the seventh day to be considered received within three business days. If a request is received more than three business days after the revised SOC or after 5 p.m., Central Time, on the third day, authorization is given for dates of service beginning three business days before receipt of the completed request.

The revised PDN prior authorization request must include all of the following:

- CCP Prior Authorization Request form
- Home Health Plan of Care (POC) form
- CCP Nursing Addendum to Plan of Care form

The provider is responsible for ensuring that the physician reviews and signs the POC within 30 calendar days of the start date of the revised authorization period or more often if required by the client’s condition or agency licensure. The provider must maintain the physician-signed POC in the client’s medical record. PDN providers should not submit a revised POC unless they are requesting a revision.

Revision requests for PDN may be prior authorized up to six months.

If all necessary documentation is not submitted for a six-month authorization, an authorization for a period up to three months may be approved.

Revisions to a current certification must fall within the certification period. If the revision extends beyond the current certification period, new authorization documentation must be submitted to CCP.

Refer to: Form CH.8, “Nursing Addendum to Plan of Care (CCP) (7 Pages)” in this handbook.
Form CH.7, “Home Health Plan of Care (POC)” in this handbook.
2.9.3.5 Recertifications of Authorizations

Completed extension requests must be received and dated by CCP at least seven calendar days before, but no more than 30 days before, the current authorization expiration date. The request must be received by CCP no later than 5 p.m., Central Time, on the seventh day, to be considered received within seven calendar days. If a request is received less than seven calendar days before the current authorization expiration date, or after 5 p.m., Central Time, on the seventh day, authorization is given for dates of service beginning no sooner than seven calendar days after the receipt of the completed request by CCP.

Recertifications may be prior authorized for up to six months. The following criteria are required for recertification authorization:

- The client has received PDN services for at least three months.
- No significant changes in the client’s condition have occurred for at least three months.
- No significant changes in the client’s condition are anticipated.
- The client’s responsible adult, physician, and provider agree that a recertification authorization is appropriate.

The recertification process includes the following:

- All required documentation for PDN services (including the Physician POC, the Nursing Addendum to POC, and the CCP Prior Authorization Request Form)
- CCP Private Duty Nursing six-Month Authorization form, which must be signed and dated by the primary physician, nurse provider, and client, or responsible adult

The nursing care provider is responsible for ensuring that a new Physician POC is obtained within 30 calendar days of the authorization period ending and maintained in the client’s record. Providers should not submit interim POCs to CCP unless requesting a revision.

The nursing care provider must notify CCP at any time during the authorization period if the client’s condition and need for SN care significantly changes.

The nursing care provider may request a revision from TMHP at any time during the authorization period if the client’s condition requires it.

All authorization timelines apply to recertifications also.

Refer to:

Form CH.8, “Nursing Addendum to Plan of Care (CCP) (7 Pages)” in this handbook.
Form CH.7, “Home Health Plan of Care (POC)” in this handbook.

2.9.3.6 Termination of Authorization

An authorization may be terminated when the:

- Client is no longer eligible for CCP or Medicaid.
- Client no longer meets the medical necessity criteria for PDN.
- POS can no longer accommodate the client’s health and safety.
- Client or responsible adult refuses to comply with the service plan and compliance is necessary to ensure the client’s health and safety.

2.9.3.7 Client and Provider Notification

When PDN is approved as requested, the provider receives written notification. The provider is responsible for notifying the client/family and the physician of the authorized services.
CCP notifies the client and provider in writing when the following instances occur:

- PDN is denied.
- PDN hours authorized are less than the hours requested on the POC.
- PDN hours are modified (e.g., hours are requested by the week but are authorized by the day).
- CCP receives incomplete information from the provider.
- Dates of service authorized are different from those requested.
- The provider is responsible for notification and coordination with the physician and family.

### 2.9.3.8 Authorization Appeals

Providers may appeal denials or modifications of requested PDN with documentation to support the medical necessity of the requested PDN. A request for prior authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply. Appeals must be submitted to CCP with complete documentation and any additional information within two weeks of the date on the decision letter. If changes are made to the authorization based on this documentation, CCP goes back no more than three business days for initial or revision requests and no more than seven calendar days for recertification requests when additional documentation is submitted.

The client or responsible adult is notified of any denial or modification of requested services and is given information about how to appeal CCP’s decision.

Documentation forms have been designed to improve communication between providers and CCP. The forms are available in English and Spanish.

All documentation must be submitted together, and requests are not reviewed until all documentation is received. If complete documentation is received at CCP by 3 p.m., Central Time, a response is returned to the provider within one business day. Complete documentation for initial, revision, recertification, and extension requests for PDN authorizations include all of the following:

- Form CH.2, “CCP Prior Authorization Request Form” in this handbook
- Form CH.7, “Home Health Plan of Care (POC)” in this handbook
- Form CH.8, “Nursing Addendum to Plan of Care (CCP) (7 Pages)” in this handbook

### 2.9.3.9 CCP Prior Authorization Request Form

The CCP Prior Authorization Request Form must be completed, signed, and dated by the physician. When PDN services are ordered, by signing the form the physician attests and certifies the client’s medical condition is sufficiently stable to permit safe delivery of PDN as described in the plan of care. All requested dates of service must be included.

### 2.9.3.10 Home Health Plan of Care (POC)

The POC must be recommended, signed, and dated by the client’s primary physician. A POC must meet the standards outlined in the 42 CFR §484.18 related to the written POC. The primary physician must review and revise the POC, in consultation with the provider and the responsible adult, for each prior authorization, or more frequently as the physician deems necessary or the client’s situation changes.

Pursuant to 42 CFR §484.18, the POC must include the following elements:

- All pertinent diagnoses
- Client’s mental status
- Types of services requested including amount, duration, and frequency
- Medical equipment needed
• Prognosis
• Rehabilitation potential
• Functional limitations
• Activities permitted
• Nutritional requirements
• Medications, including dose, route, and frequency
• Treatments, including amount, duration, and frequency
• Safety measures needed
• Instructions for a timely discharge from service, if appropriate
• Date the client was last seen by the physician
• Other medical orders
• Start- and end-of-care dates
• Responsible adult or identified contingency plan

Note: Coverage periods do not coincide necessarily with calendar weeks or months but, instead, cover a number of services to be scheduled between a start and end date that is assigned during the prior authorization period. A week includes the day of the week on which the prior authorization period begins and continues for seven days. For example, if the prior authorization starts on a Thursday, the prior authorization week runs Thursday through Wednesday. The number of nursing hours authorized for a week must be contained in that prior authorization week. Hours billed in excess of those authorized for the PAN week are subject to recoupment.

2.9.3.11 Nursing Addendum to Plan of Care (CCP) Form

The Nursing Addendum to Plan of Care (CCP) Form addresses PDN eligibility criteria, nursing care plan summary, health history summary, 24-hour schedule, and the rationale for the hours of PDN requested.

The following is a description of the nursing care plan summary:

• The nursing care summary is not a complete nursing care plan.
• Information must be client-focused and detailed.
• The problem list must reflect the reasons that nursing services are needed. The problem list is not the nursing care plan. Providers must identify two-to-four current priority problems from their nursing care plan. The problem does not need to be stated as a nursing diagnosis. The problems listed must focus on the primary reasons that a licensed nurse is required to care for the client. Other attached documents are not accepted in lieu of this section.
• The Goals must relate directly to the problems listed and be client-specific and measurable. Goals may be short- or long-term; however, for many clients who receive PDN, the goals generally are long-term.
• The Outcomes are the effects of the provider’s nursing interventions and must be measurable. Generally, these are more short-term than goals. For initial requests, list expected outcomes. Extension requests should note the results of nursing interventions.
• The Progress must be viewed as a “yardstick” or continuum on which progress toward goals is marked. Initial requests must state expected progress for the authorization period. Extension requests must list the progress noted during the previous authorization period. It is recognized that all progress may not be positive.
• The addendum must summarize the client’s health problems relating to the medical necessity for PDN.
• The addendum must clearly communicate a picture of the client’s overall condition and nursing care needs.
• The summary of recent health history is imperative in determining whether the client’s condition is stable or if new nursing care needs have been identified. This section gives the PDN provider an opportunity to describe the client’s recent health problems, including acute episodes of illness, hospitalizations, injuries, and so on. The summary should create a complete picture of the client’s condition and nursing care needs. The summary may cover the previous 90 days, even though the authorization period is 60 days; however, the objective of the summary is to capture the client’s recent health problems and current health priorities. This section should not be merely a list of events. This section is the place to indicate the frequency of nursing interventions if they are different from the physician’s order on the POC, such as, the order may be for a procedure to be PRN (Pro Re Nata “As Needed”), but it is actually being performed every two hours.
• The addendum must include the rationale for increasing, decreasing, or maintaining the level of PDN and must relate to the client’s health problems and goals.
• The addendum must include the provider’s plan to decrease hours or discharge from service (if appropriate).

2.9.3.11.1 The client’s 24-Hour Daily Schedule
All direct-care services must be identified. It is understood that the schedule may change, as the client’s needs change. CCP does not have to be notified of changes in the schedule except as they occur when a PDN recertification is requested.

2.9.3.12 Responsible Adult or Identified Contingency Plan Requirement
For clients who are birth through 17 years of age, the client must reside with an identified responsible adult who is either trained to provide nursing care or is capable of initiating an identified contingency plan when the scheduled private duty nurse is unexpectedly unavailable.
• “Responsible adult” means an individual who is an adult, as defined by the Texas Family Code, and who has agreed to accept the responsibility for providing food, shelter, clothing, education, nurturing, and supervision for the client. Responsible adults include, but are not limited to: biological parents, adoptive parents, foster parents, guardians, court-appointed managing conservators, and other family members by birth or marriage.
• An identified contingency plan is a structured process, designed by the responsible adult and the PDN provider, by which a client will receive care when a scheduled private duty nurse is unexpectedly unavailable, and the responsible adult is unavailable, or is not trained, to provide the nursing care. The responsible adult must be able to initiate the identified contingency plan.

The responsible adult’s signature must be on the form acknowledging:
• Information about CCP PDN has been discussed and received.
• PDN may change or end based on a client’s need for nursing care.
• PDN is not authorized for the primary purpose of providing respite, childcare, ADLs, or housekeeping.
• All requirements have been met before seeking prior authorization for PDN.
• The responsible adult has participated in the development of the POC and the nursing care plan for the client.
• Emergency plans have been made and are part of the client’s care plan.
• The client or responsible adult agrees to follow the physician’s POC.

2.9.3.13 Special Circumstances
Prior authorization may be considered for PDN services provided in a school or day care facility, at the request of the family, provided the client requires the requested amount of PDN services in the home.

Prior authorization may be considered for PDN services provided in a hospital, SN facility, or intermediate care facility for the mentally retarded, or special care facility with documentation from the facility showing it is unable to meet the SN needs of the client and the services are medically necessary. These facilities are required by licensure to meet all the medical needs of the client.

2.9.3.14 Documentation of Services Provided and Retrospective Review
Documentation elements that are routinely assessed for compliance in retrospective review of client records include, but are not limited to, the required documentation noted previously, as well as the following:

• All entries are legible to people other than the author, dated (month, day, year, time), and signed by the author.

• Each page of the record documents the client’s name and Medicaid identification number.

• Client assessment time is documented at the beginning of each shift.

• All nurses’ arrival and departure times are documented with signature and time in the narrative section of the nurses’ notes.

• Entries in the nursing flowsheet or narrative notes must be dated and timed every 1 to 2 hours and must include the following:
  • The client’s condition.
  • The name of the medication, dose, route, time given, client response, and other pertinent information is recorded when medication is administered.
  • The name of treatment, time given, route or method used, client response, and other pertinent information is provided when treatments are administered.
  • The amount, type, times given, route or method used, client response, and other pertinent information is provided when feedings are administered.

• The POC and documentation of services correlate with and reflect medical necessity for the services provided on any given day.

• A request for prior authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

• Client’s arrival or departure from the home setting is documented with the time of arrival, departure, mode of transportation, and who accompanied the client.

• Documentation of teaching the client or the client’s responsible adult includes the length of time, the subject of the teaching, the understanding of the subject matter by the person receiving the teaching, and other pertinent information.

• Supervisory visits include specifics of the visit.

• If a client is receiving SN services through another program or service in addition to CCP, such as MDCP, each provider’s shift notes designate specifically which type of service they are providing during that shift.
2.9.4 Claims Information
PDN providers must submit claims for services in an approved electronic claims format or on the appropriate claim form based on their provider type. Home health agencies must submit claims on the UB-04 CMS-1450 paper claim form. Independently enrolled nurses must submit claims on the CMS-1500 paper claim form. TMHP does not supply the forms.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

2.9.5 Reimbursement
PDN services are reimbursed in accordance with 1 TAC §355.8441.

2.10 Therapy Services (CCP)
Occupational therapist, physical therapist, and speech therapist services beyond the limitations of Texas Medicaid and Title XIX Home Health Services are benefits of the CCP for clients who are birth through 20 years of age and who are CCP eligible when:

- Therapy is prescribed by a licensed physician.
- Documentation of medical necessity supports a condition that requires ongoing therapy or rehabilitation in the usual course, treatment, and management of the client’s condition.
- Therapy services are provided by a licensed therapist.
- Therapy is provided in one of the following places of service:
  - CORF and ORF
  - Inpatient rehabilitation facility (freestanding)
  - Home
  - Licensed hospital
  - Medicaid-enrolled private therapist office
  - Physician office

This section does not apply to CORFs and ORFs.

Refer to: Subsection 2.3, “Comprehensive Outpatient Rehabilitation Facilities (CORFs) and Outpatient Rehabilitation Facilities (ORFs)” in this handbook.

Subsection 2.12, “Inpatient Rehabilitation Facility (Freestanding) (CCP)” in this handbook.

Therapy may be performed by a licensed occupational therapist, physical therapist, speech therapist, or one of the following under the supervision of a licensed therapist: licensed therapy assistant or licensed speech-language pathology intern.

Services performed by an OT aide, OT orderly, OT student, OT technician, PT aide, PT orderly, PT student, PT technician, SLP aide, SLP orderly, SLP student, or SLP technician are not a benefit of Texas Medicaid.
Therapy services performed by an unlicensed provider are subject to retrospective review and recoupment.

OT, PT, and ST may be performed in the office or home setting and may be authorized to be provided in the following locations: home of the client, home of the caregiver or guardian, client’s daycare facility, or the client’s school.

Services provided to a client on school premises are only permitted when delivered before or after school hours. The only CCP therapy services that can be delivered in the client’s school during regular school hours are those delivered by school districts as SHARS in POS 9.

Refer to: Section 3, “School Health and Related Services (SHARS)” in this handbook for more information about SHARS.

PT provided in the nursing home setting is limited to the nursing facility because it must be available to nursing home residents on an “as needed” basis and must be provided directly by the staff of the facility or furnished by the facility through arrangements with outside-qualified resources. Nursing home facilities must refrain from admitting clients who need goal directed therapy if the facility is unable to provide these services.

Home health agencies that perform therapy services under CCP are allowed one visit per day, per therapy type, and may be reimbursed at the statewide visit rate.

Services That Are Not a Benefit
The following services are not a benefit of CCP.

- Procedure code 97010 (application of a modality to one or more areas; hot or cold packs).
- Services that are not medically necessary. Examples include, but are not limited to:
  - Massage therapy that is the sole therapy or is not part of a therapeutic POC to address an acute condition.
  - Hippotherapy.
  - Separate reimbursement for VitalStim® therapy for dysphagia.
  - Treatment solely for the instruction of other agency or professional personnel in the client’s PT, OT, or ST program.
  - Training in nonessential tasks (e.g., homemaking, gardening, recreational activities, cooking, driving, assistance with finances, scheduling).
  - Emotional support, adjustment to extended hospitalization or disability, and behavioral readjustment.
  - Therapy prescribed primarily as an adjunct to psychotherapy.

2.10.1 Occupational Therapy (OT)

2.10.1.1 Enrollment
HHSC allows enrollment of independently-practicing licensed occupational therapist under CCP. The information in this section applies to CCP services only.

2.10.1.2 Services, Benefits, and Limitations
A procedural modifier is required when submitting claims for occupational therapist services. Providers must use modifier GO for occupational therapist services. Procedural modifiers are not required for evaluations and re-evaluations.

Evaluations (procedure code 97003) are limited to once every 180 calendar days any provider. Re-evaluations (procedure code 97004) are limited once per 30 calendar days, any provider.
An evaluation or re-evaluation performed on the same day as therapy from a different therapy type must be performed at distinctly separate times to be considered for reimbursement.

If a therapy evaluation or re-evaluation procedure code and like therapy procedure codes are billed for the same date of service by any provider, the like therapy evaluation or re-evaluation will be denied. OT evaluation (procedure code 97003) or re-evaluation (procedure code 97004) will be denied as part of the following OT procedure codes billed with Modifier GO.

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97012</td>
</tr>
<tr>
<td>97034</td>
</tr>
<tr>
<td>97140</td>
</tr>
<tr>
<td>97799</td>
</tr>
</tbody>
</table>

The following procedure codes are billed in 15-minute increments:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97032</td>
</tr>
<tr>
<td>97124</td>
</tr>
<tr>
<td>97762</td>
</tr>
</tbody>
</table>

Procedure codes that may be billed in multiple quantities (i.e., 15 minutes each) are limited to two hours (eight units) per day individual, group, or a combination of individual and group therapy, per therapy type (two hrs. of OT and two hrs. of PT). Each 15 minutes equals one unit.

All 15-minute increment procedure codes are based on the actual amount of billable time associated with the service. For those services for which the unit of service is 15 minutes (1 unit = 15 minutes), partial units must be rounded up or down to the nearest quarter hour.

The documentation retained in the client’s file must include the billable start time, billable stop time, total billable minutes, and activity that was performed.

To calculate billing units, count the total number of billable minutes for the calendar day for the client, and divide by 15 to convert to billable units of service. If the total billable minutes are not evenly divisible by 15, minutes greater than 7 are converted to 1 unit and 7 or fewer minutes are converted to 0 unit.

For example, 68 total billable minutes/15 = 4 units + 8 minutes. Since the 8 minutes are more than 7 minutes, those 8 minutes are converted to 1 unit. Consequently, 68 total billable minutes = 5 units of service. The following table indicates the time intervals for 0 through 8 units:

<table>
<thead>
<tr>
<th>Units</th>
<th>Number of Minutes</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 units</td>
<td>0 minutes through 7 minutes</td>
</tr>
<tr>
<td>1 unit</td>
<td>8 minutes through 22 minutes</td>
</tr>
<tr>
<td>2 units</td>
<td>23 minutes through 37 minutes</td>
</tr>
<tr>
<td>3 units</td>
<td>38 minutes through 52 minutes</td>
</tr>
<tr>
<td>4 units</td>
<td>53 minutes through 67 minutes</td>
</tr>
<tr>
<td>5 units</td>
<td>68 minutes through 82 minutes</td>
</tr>
<tr>
<td>6 units</td>
<td>83 minutes through 97 minutes</td>
</tr>
<tr>
<td>7 units</td>
<td>98 minutes through 112 minutes</td>
</tr>
<tr>
<td>8 units</td>
<td>113 minutes through 127 minutes</td>
</tr>
</tbody>
</table>
The following procedure codes are limited to once per day, for each therapy type (OT and PT):

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97012</td>
</tr>
</tbody>
</table>

Electrical stimulation therapy (procedure code 97032) may be considered with documentation of medical necessity.

### 2.10.1.3 Prior Authorization and Documentation Requirements

Prior authorization is required for OT except for therapy provided in the inpatient setting, evaluations or re-evaluations, services provided through the SHARS or Early Childhood Intervention (ECI) programs.

**Refer to:** Section 3, “School Health and Related Services (SHARS)” in this handbook for more information about SHARS.

Subsection 2.5, “Early Childhood Intervention (ECI) Services” in this handbook for more information about ECI.

The following documentation must be submitted to TMHP prior to the start of care for the current episode of therapy for consideration for prior authorization:

- A current written order by a physician based on medical necessity.
- A prescription is considered current when it is signed and dated, on or no later than, 60 days before the start of therapy.
- A “Request for Initial Outpatient Therapy (Form TP-1)” or “Request for Extension of Outpatient Therapy (2 Pages) (Form TP-2)” must be submitted to TMHP prior to the start of care for the current episode of therapy.
- The most recent evaluation and treatment plan. To establish medical necessity, the written treatment plan must include the following:
  - The age of the client at the time of evaluation.
  - Diagnosis.
  - Description of specific therapy being prescribed.
  - Specific treatment goals related to the client’s individual needs. Therapy goals may include improving function, maintenance of function, or slowing of the deterioration of function.
  - For an initial request, anticipated measurable progress toward goals, the prognosis, and the client’s gross motor skills in years or months.
  - For a new request for additional therapy, documentation of all progress made from the beginning of the previous treatment period.
  - Duration and frequency of therapy.
  - Requested date of service.

The number of sessions per week must be supported by documentation supporting the medical necessity for the frequency requested.

When requesting prior authorization for group OT, the provider must submit documentation supporting the group process as being medically necessary and beneficial to the client. When group therapy is authorized, weekly therapy limits will not be exceeded.

A CNM, CNS, NP, or PA may sign all documentation related to the provision of therapy services on behalf of the client’s physician when the physician delegates this authority.
A request for occupational therapist services may be prior authorized for no longer than 180 days duration. A new request must be submitted if therapy is required for a longer duration. A physician’s prescription is required every 180 days.

The GO modifier is required on all prior authorization requests for OT.

If a provider discontinues therapy with a client and a new provider begins therapy during an existing authorization period, submission of a new plan of care and documentation of the last therapy visit with the previous provider is required along with a letter from the client, or responsible adult, stating the date therapy ended with the previous provider.

2.10.1.4 Claims Information

Providers must submit claims for therapy services in an approved electronic claims format, a CMS-1500, or UB-04 CMS-1450 paper claim form from the vendor of their choice. TMHP does not supply the forms.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Refer to: Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

2.10.1.5 Reimbursement

Occupational therapist services are reimbursed in accordance with 1 TAC §355.8441. See the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com for reimbursement rates.

2.10.2 Physical Therapy (PT)

2.10.2.1 Enrollment

HHSC allows enrollment of independently-practicing licensed physical therapist under CCP. The information in this section applies to CCP services only.

2.10.2.2 Services, Benefits, and Limitations

A procedural modifier is required when submitting claims for physical therapist services. Providers must use modifier GP for physical therapist services. Procedural modifiers are not required for evaluations and re-evaluations.

Evaluations (procedure code 97001) are limited to once every 180 calendar days any provider. Re-evaluations (procedure code 97002) are limited once per 30 calendar days, any provider.

An evaluation or re-evaluation performed on the same day as therapy from a different therapy type must be performed at distinctly separate times to be considered for reimbursement.

If a therapy evaluation or re-evaluation procedure code and like therapy procedure codes are billed for the same date of service by any provider, the like therapy evaluation or re-evaluation will be denied. PT evaluation (procedure code 97001) or re-evaluation (procedure code 97002) will be denied as part of the following PT procedure codes billed with Modifier GP.

<table>
<thead>
<tr>

<tr>
<td>97012</td>
</tr>
</tbody>
</table>
The following procedure codes are billed in 15-minute increments:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>97034 97035 97036 97039 97110 97112 97113 97116 97124 97139</td>
</tr>
<tr>
<td>97140 97150 97530 97535 97537 97542 97750 97760 97761 97762</td>
</tr>
<tr>
<td>97799 S8990</td>
</tr>
</tbody>
</table>

Procedure codes that may be billed in multiple quantities (i.e., 15 minutes each) are limited to two hours (eight units) per day individual, group, or a combination of individual and group therapy, per therapy type (two hrs of OT and two hrs of PT). Each 15 minutes equals one unit.

All 15-minute increment procedure codes are based on the actual amount of billable time associated with the service. For those services for which the unit of service is 15 minutes (1 unit = 15 minutes), partial units must be rounded up or down to the nearest quarter hour.

The documentation retained in the client’s file must include the billable start time, billable stop time, total billable minutes, and activity that was performed.

To calculate billing units, count the total number of billable minutes for the calendar day for the client, and divide by 15 to convert to billable units of service. If the total billable minutes are not evenly divisible by 15, minutes greater than 7 are converted to 1 unit and 7 or fewer minutes are converted to 0 unit.

For example, 68 total billable minutes/15 = 4 units + 8 minutes. Since the 8 minutes are more than 7 minutes, those 8 minutes are converted to 1 unit. Consequently, 68 total billable minutes = 5 units of service.

Refer to: Subsection 2.10.1, “Occupational Therapy (OT)” in this handbook for 15-minute conversion table.

The following procedure codes are limited to once per day, for each therapy type (OT and PT):

<table>
<thead>
<tr>

<tr>
<td>97762 97799 S8990</td>
</tr>
</tbody>
</table>

Electrical stimulation therapy (procedure code 97032) may be considered with documentation of medical necessity.

2.10.2.3 Prior Authorization and Documentation Requirements

Prior authorization is required for PT except for therapy provided in the inpatient setting, evaluations or re-evaluations, services provided through the SHARS or ECI programs.

Refer to: Section 3, “School Health and Related Services (SHARS)” in this handbook for more information about SHARS.

Subsection 2.5, “Early Childhood Intervention (ECI) Services” in this handbook for more information about ECI.

The following documentation must be submitted to TMHP prior to the start of care for the current episode of therapy for consideration for prior authorization:

- A current written order by a physician and based on medical necessity.
• A prescription is considered current when it is signed and dated on, or no later than, 60 days before the start of therapy.

• A “Request for Initial Outpatient Therapy (Form TP-1)” or “Request for Extension of Outpatient Therapy (2 Pages) (Form TP-2)” must be submitted to TMHP prior to the start of care for the current episode of therapy.

• The most recent evaluation and treatment plan. To establish medical necessity, the written treatment plan must include the following:
  • The age of the client at the time of evaluation
  • Diagnosis
  • Description of specific therapy being prescribed
  • Specific treatment goals related to the client’s individual needs. Therapy goals may include improving function, maintenance of function, or slowing of the deterioration of function.
  • For an initial request, anticipated measurable progress toward goals, the prognosis, and the client’s gross motor skills in years or months.
  • For a new request for additional therapy, documentation of all progress made from the beginning of the previous treatment period.
  • Duration and frequency of therapy
  • Requested date of service

The number of sessions per week must be supported by documentation supporting the medical necessity of the frequency requested.

When requesting prior authorization for group PT, the provider must submit documentation supporting the group process as being medically necessary and beneficial to the client. When group therapy is authorized, weekly therapy limits will not be exceeded.

A CNM, CNS, NP, or PA may sign all documentation related to the provision of therapy services on behalf of the client’s physician when the physician delegates this authority.

A request for physical therapist services may be prior authorized for no longer than 180 days duration. A new request must be submitted if therapy is required for a longer duration. A physician’s prescription is required every 180 days.

The GP modifier is required on all prior authorization requests for PT.

If a provider discontinues therapy with a client and a new provider begins therapy during an existing authorization period, submission of a new plan of care and documentation of the last therapy visit with the previous provider is required along with a letter from the client, or responsible adult stating the date therapy ended with the previous provider.

2.10.2.4 Claims Information

Providers must submit claims for therapy services in an approved electronic claims format, a CMS-1500, or UB-04 CMS-1450 paper claim form from the vendor of their choice. TMHP does not supply the forms.

Refer to:
Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

2.10.2.5 Reimbursement

Physical therapist services are reimbursed in accordance with 1 TAC §355.8441.

See the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com for reimbursement rates.

2.10.3 Speech Therapy (ST)

2.10.3.1 Enrollment

HHSC allows enrollment of independently-practicing licensed SLPs under CCP. The information in this section applies to CCP services only.

2.10.3.2 Services, Benefits, and Limitations

A procedural modifier is required when submitting claims for ST services. Providers must use modifier GN for ST services. Procedural modifiers are not required for evaluations and re-evaluations.

ST evaluation (procedure code 92506) is limited to once every 180 calendar days, any provider. ST re-evaluation (procedure code S9152) is limited to once every 30 calendar days, any provider.

ST treatment codes 92507, 92508, and 92526 are payable in 15-minute increments at a maximum of four units (one hour) per day.

All 15-minute increment procedure codes are based on the actual amount of billable time associated with the service. For those services for which the unit of service is 15 minutes (1 unit = 15 minutes), partial units must be rounded up or down to the nearest quarter hour.

The documentation retained in the client’s file must include the billable start time, billable stop time, total billable minutes, and activity that was performed.

To calculate billing units, count the total number of billable minutes for the calendar day for the client, and divide by 15 to convert to billable units of service. If the total billable minutes are not evenly divisible by 15, minutes greater than 7 are converted to 1 unit and 7 or fewer minutes are converted to 0 unit.

For example, 68 total billable minutes/15 = 4 units + 8 minutes. Since the 8 minutes are more than 7 minutes, those 8 minutes are converted to 1 unit. Consequently, 68 total billable minutes = 5 units of service.

Refer to: Subsection 2.10.1, “Occupational Therapy (OT)” in this handbook for the 15-minute conversion table.

ST evaluation and re-evaluations will be denied when billed on the same date of service, any provider, as procedure codes 92507 and 92508 with modifier GN.

Procedure codes 92526 and 92610 may be considered for reimbursement for treatment and evaluation of swallowing dysfunctions and oral functions for feeding.

Procedure code 97535 is used for ST services for training for augmentative communication devices.

2.10.3.3 Prior Authorization and Documentation Requirements

Prior authorization is required for ST except for therapy provided in the inpatient setting, evaluations or re-evaluations, or services provided through the SHARS or ECI programs.

Refer to: Section 3, “School Health and Related Services (SHARS)” in this handbook for more information about SHARS.

Subsection 2.5, “Early Childhood Intervention (ECI) Services” in this handbook for more information about ECI.
The following documentation must be submitted to TMHP prior to the start of care for the current episode of therapy for consideration for prior authorization:

- A current written order by a physician and based on medical necessity.
- A prescription is considered current when it is signed and dated on or no later than 60 days before the start of therapy.
- A “Request for Initial Outpatient Therapy (Form TP-1)” or “Request for Extension of Outpatient Therapy (2 Pages) (Form TP-2)” must be submitted to TMHP prior to the start of care for the current episode of therapy.
- The most recent evaluation and treatment plan. To establish medical necessity, the written treatment plan must include the following:
  - The age of the client at the time of evaluation.
  - Diagnosis.
  - Description of specific therapy being prescribed.
  - Specific treatment goals related to the client’s individual needs. Therapy goals may include improving function, maintenance of function, or slowing of the deterioration of function.
  - For an initial request, anticipated measurable progress toward goals, the prognosis, and the client’s gross motor skills in years or months.
  - For a new request for additional therapy, documentation of all progress made from the beginning of the previous treatment period.
  - Duration and frequency of therapy.
  - Requested date of service.
- The number of sessions per week must be supported by documentation supporting the medical necessity for the frequency requested.

When requesting prior authorization for group ST, the provider must submit documentation supporting the group process as being medically necessary and beneficial to the client. When group therapy is authorized, weekly therapy limits will not be exceeded.

A CNM, CNS, NP, or PA may sign all documentation related to the provision of therapy services on behalf of the client’s physician when the physician delegates this authority.

A request for ST services may be prior authorized for no longer than 180 days duration. A new request must be submitted if therapy is required for a longer duration. A physician’s prescription is required every 180 days.

The GN modifier is required on all prior authorization requests for ST.

If a provider discontinues therapy with a client and a new provider begins therapy during an existing authorization period, submission of a new plan of care and documentation of the last therapy visit with the previous provider is required along with a letter from the client, or responsible adult, stating the date therapy ended with the previous provider.

2.10.3.4 Claims Information

Providers must submit claims for therapy services in an approved electronic claims format, a CMS-1500, or UB-04 CMS-1450 paper claim form from the vendor of their choice. TMHP does not supply the forms.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.
Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Subsection 6.6, “UB-04 CMS-1450 Paper Claim Filing Instructions” in Section 6, Claims Filing (Vol. 1, General Information) for paper claims completion instructions.

2.10.3.5 Reimbursement

ST services are reimbursed in accordance with 1 TAC §355.8441.

See the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com for reimbursement rates.

2.11 Inpatient Psychiatric Hospital or Facility (Freestanding) (CCP)

Inpatient psychiatric treatment in a nationally accredited freestanding psychiatric facility or a nationally accredited state psychiatric hospital is a benefit of Texas Medicaid for clients who are birth through 20 years of age at the time of the service request and service delivery, if the client meets certain conditions.

2.12 Inpatient Rehabilitation Facility (Freestanding) (CCP)

2.12.1 Enrollment

Note: Rehabilitation provided at an acute care facility is covered through Texas Medicaid fee-for-service.

To be eligible to participate in CCP, a freestanding inpatient rehabilitation facility must be certified by Medicare, have a valid provider agreement with HHSC, and have completed the TMHP enrollment process. Texas Medicaid enrolls and reimburses freestanding inpatient rehabilitation facilities for CCP services and Medicare deductibles or coinsurance according to current payment guidelines. The information in this section is applicable to CCP services only.

Refer to: Subsection 2.1.2, “Enrollment” in this handbook for more information about CCP enrollment procedures.

2.12.1.1 Continuity of Hospital Eligibility Through Change of Ownership

Under procedures set forth by the CMS and HHSC, a change in ownership of a hospital does not terminate Medicare eligibility; therefore, Medicaid participation may be continued subject to the following requirements:

• Recertification as a Title XVIII (Medicare) hospital must be obtained.
• A new Title XIX (Medicaid) agreement between the hospital and HHSC under new ownership must be obtained.

Providers can obtain the Medicaid hospital participation agreement by contacting TMHP Provider Enrollment.

2.12.2 Services, Benefits, and Limitations

Note: Rehabilitation provided at an acute care facility is covered through Medicaid fee-for-service.
Inpatient rehabilitation services include medically necessary items and services ordinarily furnished by a Medicaid hospital or by an approved out-of-state hospital under the direction of a physician for the care and treatment of inpatient clients. Inpatient rehabilitation services will be considered for an acute problem or an acute exacerbation of a chronic problem resulting in a significant decrease in functional ability that will benefit from inpatient rehabilitation services. A condition is considered to be acute or an acute exacerbation of a chronic condition only during the six months from the onset date of the acute condition or the acute exacerbation of the chronic condition.

### 2.12.2.1 Comprehensive Treatment

The intensity of necessary rehabilitative service cannot be provided in the outpatient setting.

Comprehensive rehabilitation treatment must be under the leadership of a physician. Comprehensive rehabilitation treatment must be an active interdisciplinary team, defined as at least two types of therapies.

Comprehensive treatment must consist of at least two appropriate physical modalities designed to resolve or improve the client’s condition (OT, PT, and ST), and must be provided for a minimum of three hours per day for five days per week.

### 2.12.3 Prior Authorization and Documentation Requirements

Prior authorization is required. After receiving the documentation establishing the medical necessity and plan of medical care by the treating physician, prior authorization is considered by CCP for the initial service and an extension of service as applicable. A request for prior authorization must include documentation from the provider to support the medical necessity of the service.

All inpatient rehabilitation services provided to clients who are birth through 20 years of age in a freestanding inpatient rehabilitation facility require prior authorization.

Prior authorization will be considered when the client has met all of the following criteria:

- The client has an acute problem or an acute exacerbation of a chronic problem resulting in a significant decrease in functional ability that will benefit from inpatient rehabilitation services.
- The intensity of necessary rehabilitative service cannot be provided in the outpatient setting.
- The client requires and will receive multidisciplinary team care defined as at least two therapies (OT, PT, or ST).
- This therapy will be provided for a minimum of three hours per day, five days per week.

The physician and the provider must maintain all documentation in the client’s medical record.

Requests for subsequent services for increments up to 60 days may be prior authorized based on medical necessity. Requests for prior authorization of subsequent services must be received before the end-date of the preceding prior authorization.

A prior authorization request for an additional 60 days of therapy will be considered with documentation supporting medical necessity.

Supporting documentation for an initial request must include the following:

- A signed physician’s order including the physician’s original handwritten signature (stamped signatures and dates are not accepted). The physician’s signature is valid for no more than 90 days prior to the requested start of care date.
- A CCP Prior Authorization Form signed and dated by the physician.
• A current therapy evaluation with the documented age of the client at the time of evaluation.
• Therapy goals related to the client’s individual needs; goals may include improving or maintaining function, or slowing of deterioration of function.
• An updated written comprehensive treatment plan established by the attending physician or by the therapist to be followed during the inpatient rehabilitation admission that:
  • Is under the leadership of a physician and includes a description of the specific therapy being prescribed, diagnosis, treatment goals related to the client’s individual needs, and duration and frequency of therapy.
  • Includes the date of onset of the illness or injury requiring the freestanding inpatient rehabilitation facility admission.
  • Includes the requested dates of service.
  • Incorporates an active interdisciplinary team.
  • Consists of at least two appropriate physical modalities (OT, PT, and ST) designed to resolve or improve the client’s condition.
  • Includes a minimum of three hours of team interaction with the client every day, five days per week.
• In addition to the documentation for an initial request, supporting documentation for a request for subsequent services must include the following:
  • A brief synopsis of the outcomes of the previous treatment relative to the debilitating condition.
  • The expected results to be achieved by an extension of the active treatment plan, and the time interval at which this extension outcome should be achieved.
  • Discussion why the initial two months of inpatient rehabilitation has not met the client’s needs and why the client cannot be treated in an outpatient setting.

2.12.4 Claims Information

Providers must submit inpatient rehabilitation services to TMHP in an approved electronic claims format or on a UB-04 CMS-1450 paper claim form. Providers must purchase the UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

For OT, PT, and ST services, freestanding inpatient rehabilitation facilities and acute care hospitals can use revenue codes 128, 420, 424, 430, 434, 440, and 444.

TMHP must receive claims for payment consideration according to filing deadlines for inpatient claims. Claims for services that have been prior authorized must reflect the PAN in Block 63 of the UB-04 CMS-1450 paper claim form or its electronic equivalent.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Form CH.25, “Inpatient Rehabilitation Facility (Freestanding) (CCP Only)” in this handbook for a claim form example.
2.12.5 Reimbursement

Reimbursement for care provided in the freestanding inpatient rehabilitation facility is made under the Texas Diagnosis-Related Group (DRG) Payment System.

A new provider is given a reimbursement interim rate of 50 percent until a cost audit has been performed. Payment is calculated by multiplying the standard dollar amount (SDA) for the hospital’s payment division indicator times the relative weight associated with the DRG assigned by Grouper.

Important: Outpatient services are not reimbursed.

The DRG payment may be enhanced by an adjusted day or cost outlier payment, if applicable. For example, the limit per spell-of-illness under Texas Medicaid guidelines is waived for clients who are birth through 20 years of age. An outlier payment may be made to compensate for unusual resource utilization or a lengthy stay.

The following criteria must be met to qualify for a day outlier payment. Inpatient days must exceed the DRG day threshold for the specific DRG. Additional payment is based on inpatient days that exceed the DRG day threshold multiplied by 70 percent of the per diem amount of a full DRG payment. The per diem amount is established by dividing the full DRG payment amount by the arithmetic mean length of stay for the DRG.

To establish a cost outlier, TMHP determines the outlier threshold by using the greater of the full DRG payment amount multiplied by 1.5 or an amount determined by selecting the lesser of the universe mean of the current base year data multiplied by 11.14 or the hospital’s SDA multiplied by 11.14.

The calculation that yields the greater amount is used in calculating the actual cost outlier payment. The outlier threshold is subtracted from the amount of reimbursement for the admission established under the TEFRA principles and the remainder multiplied by 70 percent to determine the actual amount of the cost outlier payment.

If an admission qualifies for both a day and a cost outlier, the outlier resulting in the highest payment to the hospital is paid.

The Remittance and Status (R&S) Report reflects the outlier reimbursement payment and defines the type of outlier paid, day or cost.

Providers should call the TMHP provider relations representative for their area with questions about the outlier payment.

2.12.5.1 Client Transfers

When more than one hospital provides care for the same case, the hospital furnishing the most significant amount of care receives consideration for a full DRG payment.

The other hospital(s) is/are paid a per diem rate based on the lesser of the mean length of stay for the DRG or eligible days in the facility. The DRG modifier PT on the R&S Report indicates per diem pricing related to a client transfer.

Client transfers within the same facility are considered one continuous stay and receive only one DRG payment. The facility must bill only one claim.

After all hospital claims have been submitted, TMHP performs a post-payment review to determine whether the hospital furnishing the most significant amount of care received the full DRG. If the review reveals that the hospital furnishing the most significant amount of care did not receive the full DRG, an adjustment is initiated.
3. SCHOOL HEALTH AND RELATED SERVICES (SHARS)

3.1 Overview

Medicaid services provided by school districts in Texas to Medicaid-eligible students are known as SHARS. The oversight of SHARS is a cooperative effort between the Texas Education Agency (TEA) and HHSC. SHARS allows local school districts, including public charter schools, to obtain Medicaid reimbursement for certain health-related services provided to students in special education under IDEA that are documented in a student’s Individualized Education Program (IEP).

**Important:** CMS requires school districts to be enrolled as a SHARS Medicaid provider, participate in the Random Moment Time Study (RMTS), claim on an interim basis, and submit an annual SHARS Cost Report.

SHARS reimbursement is provided for students who meet all of the following requirements:
- Are 20 years of age and younger and eligible for Medicaid
- Meet eligibility requirements for special education described in IDEA
- Have IEPs that prescribe the needed services

Services covered by SHARS includes:
- Audiology services
- Counseling
- Nursing services
- Occupational therapy (OT)
- Personal care services (PCS)
- Physical therapy (PT)
- Physician services
- Psychological services, including assessments
- Speech therapy (ST)
- Transportation in a school setting

These services must be provided by qualified personnel who are under contract with or employed by the school district.

3.1.1 Random Moment Time Study (RMTS)

CMS requires SHARS providers to participate in the RMTS to be eligible to submit claims and receive reimbursement for SHARS services. SHARS providers must comply with the Texas Time Study Guide, which includes, but is not limited to, Mandatory Annual RMTS Contact training certification of RMTS participants for all three annual RMTS quarters, and compliance with participation requirements for selected sampled moments. The three annual RMTS quarters are October through December, January through March, and April through June. A July through September RMTS is not conducted.

An existing school district can only become a SHARS provider effective October 1, each year and they must participate in all three RMTS quarters for that annual period. SHARS providers that do not participate in all three required RMTS quarters, or are RMTS non-compliant, cannot be a SHARS provider for that entire annual period (October 1 through September 30) and will be required to return any Medicaid payments received for SHARS services delivered during that annual cost report period. The school district can return to participating in the SHARS program the following federal fiscal year beginning on October 1.
A new school district (i.e., a newly formed district that began operations after October 1) can become a SHARS provider effective with the first day of the federal quarter in which it participates in the RMTS. New SHARS providers may not submit claims or be reimbursed for SHARS services provided prior to the RMTS quarter in which they begin to participate and they must participate in all remaining RMTS quarters for that annual period.

School districts can access the Texas Time Study Guide, on the HHSC website at www.hhsc.state.tx.us/rad/time-study/ts-isd.shtml and refer to the link titled Guides/Manuals. SHARS providers can contact the HHSC Time Study Unit via email at TimeStudy@hhsc.state.tx.us or by telephone at (512) 491-1715.

### 3.1.2 Eligibility Verification

The following are means to verify Medicaid eligibility of students:

- Verify electronically through third party software or TexMedConnect.
- School districts may inquire about the eligibility of a student by submitting the student’s Medicaid number or two of the following: name, date of birth, or Social Security number (SSN). A search can be narrowed further by entering the county code or sex of the student. Verifications may be submitted in batches without limitations on the number of students.
- Contact AIS at 1-800-925-9126.

### 3.2 Enrollment

#### 3.2.1 SHARS Enrollment

To enroll in Texas Medicaid as a SHARS provider, school districts, including public charter schools, must employ or contract with individuals or entities that meet certification and licensing requirements in accordance with the Texas Medicaid State Plan for SHARS to provide program services. Since public school districts are government entities, they should select “public entity” on the enrollment application. SHARS providers are required to notify parents or guardians of their rights to a “freedom of choice of providers” (42 CFR §431.51) under Texas Medicaid. Most SHARS providers currently provide this notification during the initial Admission, Review, and Dismissal (ARD) process. If a parent requests that someone other than the employees or currently contracted staff of the SHARS provider (school district) provide a required service listed in the student’s IEP, the SHARS provider must make a good faith effort to comply with the parent’s request. The SHARS provider can negotiate with the requested provider to provide the services under contract. The requested provider must meet, comply with, and provide all of the employment criteria and documentation that the SHARS provider normally requires of its employees and currently contracted staff. The SHARS provider can negotiate the contracted fee with the requested provider and is not required to pay the same fee that the requested provider might receive from Medicaid for similar services.

**Refer to:** Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (Vol. 1, General Information) for more information.

#### 3.2.2 Private School Enrollment

A private school may not participate in the SHARS program as a SHARS provider.
3.3 Services, Benefits, Limitations, and Prior Authorization

All of the SHARS procedures listed in the following sections require a valid International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM) diagnosis code. SHARS includes audiology services, counseling, physician services, nursing services, psychological services, OT, PT, or ST services, personal care services, and transportation.

Reminder: SHARS are the services determined by the ARD committee to be medically necessary and reasonable to ensure that children with disabilities who are eligible for Medicaid and who are 20 years of age and younger receive the benefits accorded to them by federal and state law in order to participate in the educational program.

3.3.1 Audiology

Audiology evaluation services include:

- Identification of children with hearing loss
- Determination of the range, nature, and degree of hearing loss, including the referral for medical or other professional attention for the habilitation of hearing
- Determination of the child’s need for group and individual amplification

Audiology therapy services include the provision of habilitation activities, such as language habilitation, auditory training, audiological maintenance, speech reading (lip reading), and speech conversation.

Audiology services must be provided by a professional who holds a valid state license as an audiologist or by an audiology assistant who is licensed by the state when the assistant is acting under the supervision of a qualified audiologist. State licensure requirements are equal to American Speech-Language-Hearing Association (ASHA) certification requirements.

Audiology evaluation is billable on an individual (procedure code 92506) basis only. Audiology therapy is billable on an individual (procedure code 92507) and group (procedure code 92508) basis.

Only the time spent with the student present is billable; time spent without the student present is not billable.

Session notes for evaluations are not required; however, documentation must include the billable start time, billable stop time, and total billable minutes with a notation of the activity performed (e.g., audiology evaluation).

Session notes are required for therapy. Session notes must include the billable start time, billable stop time, total billable minutes, activity performed during the session, student observation, and the related IEP objective.

3.3.1.1 Audiology Billing Table

<table>
<thead>

</tr>
</tbody>
</table>

*Place of Service: 1=office; 2=home; 9=other locations

Providers must use a 15-minute unit of service for billing.
Refer to: Subsection 3.5.1.2, “Billing Units Based on 15 Minutes” in this handbook.

The recommended maximum billable time for audiology evaluation is three hours, which may be billed over several days. The recommended maximum billable time for direct audiology therapy (individual or group) is one hour per day. Providers must submit documentation of the reasons for the additional time, if more than the recommended maximum time is billed.

3.3.2 Counseling Services

Counseling services are provided to help a child with a disability benefit from special education and must be listed in the IEP. Counseling services include, but are not limited to, the following:

- Assisting the child or parents in understanding the nature of the child’s disability
- Assisting the child or parents in understanding the special needs of the child
- Assisting the child or parents in understanding the child’s development
- Health and behavior interventions to identify the psychological, behavioral, emotional, cognitive, and social factors that are important to the prevention, treatment, or management of physical health problems
- Assessing the need for specific counseling services

Counseling services must be provided by a professional who has one of the following certifications or licensures: a licensed professional counselor (LPC), a licensed clinical social worker (LCSW), or a licensed marriage and family therapist (LMFT).

Counseling services are billable on an individual (procedure code 96152) or group (procedure code 96153) basis. Session notes are required and documentation must include the billable start time, billable stop time, total billable minutes, activity performed during the session, student observation, and the related IEP objective.

School districts may receive reimbursement for emergency counseling services as long as the student’s IEP includes a behavior improvement plan that documents the need for emergency services.

*Place of Service: 1 = Office; 2 = Home; 9 = Other Locations

Providers must use a 15-minute unit of service for billing.

Refer to: Subsection 3.5.1.2, “Billing Units Based on 15 Minutes” in this handbook.

The recommended maximum billable time (individual or group) is one hour per day. Providers must submit documentation of the reasons for the additional time, if more than the recommended maximum time is billed.

3.3.3 Psychological Testing and Services

3.3.3.1 Psychological Testing

Evaluations or assessments include activities related to the evaluation of the functioning of a student for the purpose of determining eligibility, the needs for specific SHARS services, and the development or revision of IEP goals and objectives. An evaluation or assessment is billable if it leads to the creation of an IEP for a student with disabilities who is eligible for Medicaid and who is 20 years of age or younger, whether or not the IEP includes SHARS.
Evaluations or assessments (procedure code 96101) must be provided by a professional who is a licensed specialist in school psychology (LSSP), a licensed psychologist, or a licensed psychiatrist in accordance with 19 TAC §89.1040(b)(1) and 34 CFR §300.136(a)(1).

Evaluation or assessment billable time includes the following:

- Psychological, educational, or intellectual testing time spent with the student present
- Necessary observation of the student associated with testing
- A parent/teacher consultation with the student present that is required during the assessment because a student is unable to communicate or perform certain activities
- Time spent without the student present for the interpretation of testing results
- Report writing

Time spent gathering information without the student present or observing a student is not billable evaluation or assessment time.

Session notes are not required; however, documentation must include the billable start time, billable stop time, total billable minutes, and must note which assessment activity was performed (e.g., testing, interpretation, or report writing).

### 3.3.3.1.1 Evaluation or Assessment Billing Table

<table>
<thead>
<tr>
<th>POS*</th>
<th>Procedure Code</th>
<th>Individual/Group</th>
<th>Unit of Service</th>
</tr>
</thead>
<tbody>
<tr>
<td>1, 2, or 9</td>
<td>96101 Individual</td>
<td>1 hour</td>
<td></td>
</tr>
</tbody>
</table>

*Place of Service: 1=office; 2=home; 9=other locations

**Important:** One unit (1.0) is equivalent to one hour or 60 minutes. Providers may bill in partial hours, expressed as 1/10th of an hour (six-minute segments). For example, express 30 minutes as a billed quantity of 0.5.

**Refer to:** Subsection 3.5.1.2, “Billing Units Based on 15 Minutes” in this handbook.

When billing, minutes of Evaluations or Assessments are not accumulated over multiple days. Minutes of Evaluations or Assessments can only be billed per calendar day.

The recommended maximum billable time for psychological testing is eight hours (8.0 units) over a 30-day period. Time spent for the interpretation of testing results without the student present is billable time. Providers must submit documentation of the reasons for the additional time, if more than the recommended maximum time is billed.

### 3.3.3.2 Psychological Services

Psychological services are counseling services provided to help a child with a disability benefit from special education and must be listed in the IEP.

Psychological services must be provided by a licensed psychiatrist, a licensed psychologist, or an LSSP. Nothing in this rule prohibits public schools from contracting with licensed psychologists and licensed psychological associates who are not LSSPs to provide psychological services, other than school psychology, in their areas of competency. School districts may contract for specific types of psychological services, such as clinical psychology, counseling psychology, neuropsychology, and family therapy, that are not readily available from the LSSP who is employed by the school district. Such contracting must be on a short-term or part-time basis and cannot involve the broad range of school psychological services listed in 22 TAC §465.38(1)(B).

All psychological services are billable on an individual (procedure code 96152) or group (procedure code 96153) basis.
Session notes are required. Session notes must include the billable start time, billable stop time, total billable minutes, activity performed during the session, student observation, and the related IEP objective.

School districts may receive reimbursement for emergency psychological services as long as the student’s IEP includes a behavior improvement plan that documents the need for the emergency services.

### 3.3.3.2.1 Psychological Services Billing Table

<table>
<thead>
<tr>
<th>POS*</th>
<th>Procedure Code</th>
<th>Individual or Group</th>
</tr>
</thead>
<tbody>
<tr>
<td>1, 2, or 9</td>
<td>96152 with modifier AH</td>
<td>Individual</td>
</tr>
<tr>
<td>1, 2, or 9</td>
<td>96153 with modifier AH</td>
<td>Group</td>
</tr>
</tbody>
</table>

*Place of Service: 1=office; 2=home; 9=other locations

Providers must use a 15-minute unit of service for billing.

Refer to: Subsection 3.5.1.2, “Billing Units Based on 15 Minutes” in this handbook.

The recommended maximum billable time for direct psychological therapy (individual or group) is a total of one hour per day for nonemergency situations. Providers must maintain documentation of the reasons for the additional time, if more than the recommended maximum time is billed.

### 3.3.4 Nursing Services

Nursing services are SN tasks, as defined by the Texas BON, that are included in the student’s IEP. Nursing services may be direct nursing care or medication administration. Examples of reimbursable nursing services include, but are not limited to, the following:

- Inhalation therapy
- Ventilator monitoring
- Nonroutine medication administration
- Tracheostomy care
- Gastrostomy care
- Ileostomy care
- Catheterization
- Tube feeding
- Suctioning
- Client training
- Assessment of a student’s nursing and personal care services needs

Direct nursing care services are billed in 15-minute increments and medication administration is reimbursed on a per-visit increment. The RN or APRN determines whether these services must be billed as direct nursing care or medication administration.

Nursing services must be provided by an RN, an APRN (including NPs and CNSs), LVN, LPN, or a school health aide or other trained, unlicensed assistive person delegated by an RN or APRN.

Nursing services are billable on an individual or group basis. Only the time spent with the student present is billable. Time spent without the student present is not billable. Session notes are not required for nursing services; however, documentation must include the billable start time, billable stop time, total billable minutes, and must note the type of nursing service that was performed.
### 3.3.4.1 Nursing Services Billing Table

<table>
<thead>
<tr>
<th>POS*</th>

<td>Group</td>
<td>15 minutes</td>
</tr>
<tr>
<td>1, 2, or 9</td>
<td>T1502 with modifier TE</td>
<td>Medication, administration per visit</td>
<td></td>
</tr>
</tbody>
</table>

*Place of Service: 1=office; 2=home; 9=other locations  
Modifier TD = nursing services provided by an RN or APRN  
Modifier U7 = nursing services delivered through delegation  
Modifier TE = nursing services delivered by an LVN/LPN  
Modifier UD = nursing services delivered on a group basis

The Medicaid-allowable fee is determined based on 15-minute increments. Providers must use a 15-minute unit of service for billing.

All of the nursing services minutes that are delivered to a student during a calendar day must be added together before they are converted to units of service. Do not convert minutes of nursing services separately for each nursing task that was performed.

Minutes of nursing services cannot be accumulated over multiple days. Minutes of nursing services can only be billed per calendar day. If the total number of minutes of nursing services is less than eight minutes for a calendar day, then no unit of service can be billed for that day, and that day’s minutes cannot be added to minutes of nursing services from any previous or subsequent days for billing purposes.

Refer to: Subsection 3.5.1.2, “Billing Units Based on 15 Minutes” in this handbook.

The recommended maximum billable time for direct nursing services is four hours per day. The recommended maximum billable units for procedure code T1502 with modifier TD, T1502 with modifier U7, or T1502 with modifier TE is a total of four medication administration visits per day. Providers must submit documentation of the reasons for the additional time, if more than the recommended maximum time is billed.

### 3.3.5 Occupational Therapy (OT)

#### 3.3.5.1 Referral

In order for a student to receive OT through SHARS, the name and complete address or the provider identifier of the licensed physician who prescribed the OT must be provided.
3.3.5.2 Description of Services

OT evaluation services include determining what services, assistive technology, and environmental modifications a student requires for participation in the special education program.

OT includes:

- Improving, developing, maintaining, or restoring functions impaired or lost through illness, injury, or deprivation.
- Improving the ability to perform tasks for independent functioning when functions are impaired or lost.
- Preventing, through early intervention, initial or further impairment or loss of function.

OT must be provided by a professional who is licensed by the Texas Board of Occupational Therapy Examiners or a COTA acting under the supervision of a qualified occupational therapist.

OT evaluation is billable on an individual (procedure code 97003) basis only. OT is billable on an individual (procedure code 97530) or group (procedure code 97150) basis.

The occupational therapist or COTA can only bill for time spent with the student present, including time spent assisting the student with learning to use adaptive equipment and assistive technology.

Time spent without the student present, such as training teachers or aides to work with the student (unless the student is present during the training time), report writing, and time spent manipulating or modifying the adaptive equipment is not billable.

Session notes are not required for procedure code 97003; however, documentation must include the billable start time, billable stop time, total billable minutes, and must note the activity that was performed (e.g., OT evaluation).

Session notes are required for procedure codes 97530 and 97150. Session notes must include the billable start time, billable stop time, total billable minutes, activity performed during the session, student observation, and the related IEP objective.

3.3.5.3 Occupational Therapy Billing Table

<td>97530 with modifier GO and U1</td>
<td>Individual</td>
<td>Licensed/certified assistant</td>
</tr>
</tbody>
</table>

*Place of Service: 1=office; 2=home; 9=other locations

Providers must use a 15-minute unit of service for billing.

Refer to: Subsection 3.5.1.2, “Billing Units Based on 15 Minutes” in this handbook.

The recommended maximum billable time for OT evaluation is three hours, which may be billed over several days. The recommended maximum billable time for direct therapy (individual or group) is a total of one hour per day. Providers must submit documentation of the reasons for the additional time, if more than the recommended maximum time is billed.
3.3.6 Personal Care Services

Personal care services are provided to help a child with a disability or chronic condition benefit from special education. Personal care services include a range of human assistance provided to persons with disabilities or chronic conditions which enables them to accomplish tasks that they would normally do for themselves if they did not have a disability. An individual may be physically capable of performing ADLs and IADLs but may have limitations in performing these activities because of a functional, cognitive, or behavioral impairment.

Refer to: Subsection 2.8, “Personal Care Services (PCS) (CCP)” in this handbook for a list of ADLs and IADLs.

For personal care services to be billable, they must be listed in the student’s IEP. Personal care services are billable on an individual (procedure code T1019 with modifier U5 or U6) or group (procedure code T1019 with modifier U5 and UD or U6 and UD) basis.

Session notes are not required for procedure codes T1019 with modifier U5 or T1019 with modifier U5 and UD; however, documentation must include the billable start time, billable stop time, total billable minutes, and must note the type of personal care service that was performed.

Procedure codes T1019 with modifier U6 and T1019 with modifier U6 and UD are billed using a one-way trip unit of service.

3.3.6.1 Personal Care Services Billing Table

<table>
<thead>

<td>T1019 with modifier U6 and UD</td>
<td>Group, bus</td>
<td>Per one-way trip</td>
</tr>
</tbody>
</table>

*Place of Service: 1=office; 2=home; 9=other locations

Refer to: Subsection 3.5.1.2, “Billing Units Based on 15 Minutes” in this handbook.

The recommended maximum billable units for T1019 with modifier U6 or T1019 with modifier U6 and UD is a total of four one-way trips per day. Providers must submit documentation of the reasons for the additional time, if more than the recommended units of service are billed.

3.3.7 Physical Therapy (PT)

3.3.7.1 Referral

In order for a student to receive PT through SHARS, the name and complete address or the provider identifier of the licensed physician who prescribes the PT must be provided.

3.3.7.2 Description of Services

PT evaluation includes evaluating the student’s ability to move throughout the school and to participate in classroom activities and the identification of movement dysfunction and related functional problems. PT is provided for the purpose of preventing or alleviating movement dysfunction and related functional problems.

PT must be provided by a professional who is licensed by the Texas Board of Physical Therapy Examiners or a licensed physical therapist assistant (LPTA) acting under the supervision of a qualified physical therapist.
PT evaluation is billable on an individual (procedure code 97001) basis only. PT is billable on an individual (procedure code 97110) or group (procedure code 97150) basis.

The physical therapist can only bill time spent with the student present, including time spent helping the student to use adaptive equipment and assistive technology.

Time spent without the student present, such as training teachers or aides to work with the student (unless the student is present during the training time) and report writing, is not billable.

Session notes are not required for procedure code 97001; however, documentation must include the billable start time, billable stop time, total billable minutes, and must note the activity that was performed (e.g., PT evaluation). Session notes are required for procedure codes 97110 and 97150.

Session notes must include the billable start time, billable stop time, total billable minutes, activity performed during the session, student observation, and the related IEP objective.

### 3.3.7.3 Physical Therapy Billing Table

<td>97150 with modifier GP and U1</td>
<td>Group</td>
<td>Licensed or certified assistant</td>
</tr>
</tbody>
</table>

*Place of Service: 1=office; 2=home; 9=other locations

Providers must use a 15-minute unit of service for billing.

Refer to: Subsection 3.5.1.2, “Billing Units Based on 15 Minutes” in this handbook.

The recommended maximum billable time for PT evaluation is three hours, which may be billed within a 30 day period. The recommended maximum billable time for direct therapy (individual or group) is a total of one hour per day. Providers must submit documentation of the reasons for the additional time, if more than the recommended maximum time is billed.

### 3.3.8 Physician Services

Diagnostic and evaluation services are reimbursable under SHARS physician services. Physician services must be provided by a licensed physician (M.D. or D.O.). A physician prescription is required before PT or OT services may be reimbursed under SHARS. ST services require either a physician prescription or a referral from a licensed SLP before the ST services may be reimbursed under the SHARS program. The school district must maintain the prescription or referral. The prescription or referral must relate directly to specific services listed in the IEP. If a change is made to a service on the IEP that requires a prescription or referral, the prescription or referral must be revised accordingly.

The expiration date for the physician prescription is the earlier of either the physician’s designated expiration date on the prescription or three years, in accordance with the IDEA three-year re-evaluation requirement.

SHARS physician services are billable only when they are provided on an individual basis. The determination as to whether or not the provider needs to see the student while reviewing the student’s records is left up to the professional judgment of the provider. Therefore, billable time includes the following:

- The diagnosis or evaluation time spent with the student present
- The time spent without the student present reviewing the student’s records for the purpose of writing a prescription or referral for specific SHARS services
• The diagnosis or evaluation time spent with the student present, or the time spent without the student present reviewing the student’s records for the evaluation of the sufficiency of an ongoing SHARS service to see whether any changes are needed in the current prescription or referral for that service.

Session notes are not required for procedure code 99499; however, documentation must include the billable start time, billable stop time, total billable minutes, and must note the medical activity that was performed.

### 3.3.8.1 Physician Services Billing Table

<table>
<thead>
<tr>
<th>POS*</th>
<th>Procedure Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>1, 2, or 9</td>
<td>99499</td>
</tr>
</tbody>
</table>

*Place of Service: 1 = Office; 2 = Home; 9 = Other Locations

Providers must use a 15-minute unit of service for billing.

Refer to: Subsection 3.5.1.2, “Billing Units Based on 15 Minutes” in this handbook.

The recommended maximum billable time is one hour per day. Providers must submit documentation of the reasons for the additional time, if more than the recommended maximum time is billed.

### 3.3.9 Speech Therapy (ST)

#### 3.3.9.1 Referral

The name and complete address or the provider identifier or license number of the referring licensed physician or licensed SLP is required before ST services can be billed under SHARS. A licensed SLP’s evaluation and recommendation for the frequency, location, and duration of ST serves as the speech referral.

#### 3.3.9.2 Description of Services

ST evaluation services include the identification of children with speech or language disorders and the diagnosis and appraisal of specific speech and language disorders. ST services include the provision of speech and language services for the habilitation or prevention of communicative disorders.

ST evaluation is billable on an individual (procedure code 92506) basis only. ST is billable on an individual (procedure code 92507) or group (procedure code 92508) basis.

Providers can only bill time spent with the student present, including assisting the student with learning to use adaptive equipment and assistive technology.

Time spent without the student present, such as report writing and training teachers or aides to work with the student (unless the student is present during training), is not billable. Session notes are not required for procedure code 92506; however, documentation must include the billable start time, billable stop time, total billable minutes, and must note the activity that was performed (e.g., speech evaluation).

Session notes are required for procedure codes 92507 and 92508. Session notes must include the billable start time, billable stop time, total billable minutes, activity performed during the session, student observation, and the related IEP objective.

#### 3.3.9.3 Provider and Supervision Requirements

ST services are eligible for reimbursement when they are provided by a qualified SLP, who holds a Texas license or an ASHA-equivalent SLP (has a master’s degree in the field of speech-language pathology and a Texas license). ST services are also eligible for reimbursement when provided by an SLP with a state education agency certification, a licensed SLP intern, or a grandfathered SLP when acting under the supervision or direction of an SLP.
The supervision must meet the following provisions:

- The supervising SLP must provide supervision that is sufficient to ensure the appropriate completion of the responsibilities that were assigned.
- The direct involvement of the supervising SLP in overseeing the services that were provided must be documented.
- The SLP who provides the direction must ensure that the personnel who carry out the directives meet the minimum qualifications set forth in the rules of the State Board of Examiners for Speech-Language Pathology and Audiology which relate to Licensed Interns or Assistants in Speech-Language Pathology.

CMS interprets “under the direction of a speech-language pathologist,” as an SLP who:

- Is directly involved with the individual under his direction.
- Accepts professional responsibility for the actions of the personnel he agrees to direct.
- Sees each student at least once.
- Has input about the type of care provided.
- Reviews the student’s speech records after the therapy begins.
- Assumes professional responsibility for the services provided.

### 3.3.9.4 Speech Therapy Billing Table

<td>Licensed/certified assistant acting under the supervision or direction of an SLP</td>
</tr>
</tbody>
</table>

*Place of Service: 1=office; 2=home; 9=other locations

Providers must use a 15-minute unit of service for billing.

**Refer to:** Subsection 3.5.1.2, “Billing Units Based on 15 Minutes” in this handbook.

The recommended maximum billable time for evaluation is three hours, which may be billed over several days. The recommended maximum billable time for direct therapy (individual or group) is a total of one hour per day. Providers must submit documentation of the reasons for the additional time, if more than the recommended maximum time is billed.

### 3.3.10 Transportation Services in a School Setting

Transportation services in a school setting may be reimbursed when they are provided on a specially adapted vehicle and if the following criteria are met:

- Provided to or from a Medicaid-covered service on the day for which the claim is made
- A child requires transportation in a specially adapted vehicle to serve the needs of the disabled
• A child resides in an area that does not have school bus transportation, such as those in close proximity to a school
• The Medicaid services covered by SHARS are included in the student’s IEP
• The special transportation service is included in the student’s IEP

A specially adapted vehicle is one that has been physically modified (e.g., addition of a wheelchair lift, addition of seatbelts or harnesses, addition of child protective seating, or addition of air conditioning). A bus monitor or other personnel accompanying children on the bus is not considered an allowable special adaptive enhancement for Medicaid reimbursement under SHARS specialized transportation. Specialized transportation services reimbursable under SHARS requires the Medicaid-eligible special education student has the following documented in his or her IEP:

• The student requires a specific physical adaptation or adaptations of a vehicle in order to be transported
• The reason the student needs the specialized transportation

Children with special education needs who ride the regular school bus to school with other nondisabled children are not required to have the transportation services in a school setting listed in their IEP. Also, the cost of the regular school bus ride cannot be billed to SHARS. Therefore, the fact that a child may receive a service through SHARS does not necessarily mean that the transportation services in a school setting may be reimbursed for them.

Reimbursement for covered transportation services is on a student one-way trip basis. If the student receives a billable SHARS service (including personal care services on the bus) and is transported on the school’s specially adapted vehicle, the following one-way trips may be billed:

• From the student’s residence to school
• From the school to the student’s residence
• From the student’s residence to a provider’s office that is contracted with the district
• From a provider’s office that is contracted with the district to the student’s residence
• From the school to a provider’s office that is contracted with the district
• From a provider’s office that is contracted with the district to the student’s school
• From the school to another campus to receive a billable SHARS service
• From the campus where the student received a billable SHARS service back to the student’s school

Covered transportation services from a child’s residence to school and return are not reimbursable if, on the day the child is transported, the child does not receive Medicaid services covered by SHARS (other than transportation). Documentation of each one-way trip provided must be maintained by the school district (e.g., trip log). This service must not be billed by default simply because the student is transported on a specially adapted bus.

### 3.3.10.1 Transportation Services in a School Setting Billing Table

<table>
<thead>
<tr>
<th>POS*</th>
<th>Procedure Code</th>
<th>Unit of Service</th>
</tr>
</thead>
<tbody>
<tr>
<td>1, 2, or 9</td>
<td>T2003</td>
<td>Per one-way trip</td>
</tr>
</tbody>
</table>

*Place of Service: 1=office; 2=home; 9=other locations

The recommended maximum billable units for procedure code T2003 is a total of four one-way trips per day.
3.3.11 Prior Authorization
Prior authorization is not required for SHARS services.

3.4 Documentation Requirements

3.4.1 Record Retention
Student-specific records that are required for SHARS become part of the student’s educational records and must be maintained for seven years. All records that are pertinent to SHARS billings must be maintained by the school district until all audit questions, appeal hearings, investigations, or court cases are resolved. Records must be stored in a readily accessible location and format and must be available for state or federal audits.

The following is a checklist of the minimum documents to collect and maintain:

- IEP
- Current provider qualifications (licenses)
- Attendance records
- Prescriptions and referrals
- Medical necessity documentation (e.g., diagnoses and history of chronic conditions or disability)
- Session notes or service logs, including provider signatures
- Supervision logs
- Special transportation logs
- Claims submittal and payment histories

All services require documentation to support the medical necessity of the service rendered, including SHARS services. SHARS services are subject to retrospective review and recoupment if documentation does not support the service billed.

3.5 Claims Filing and Reimbursement
During the cost report period, school districts participating in SHARS are reimbursed on an interim claiming basis using district-specific interim rates. It is important that SHARS providers understand that SHARS interim payments are provisional in nature. The total allowable costs for providing services for SHARS must be documented by submitting the required annual cost report.

3.5.1 Claims Information
Claims for SHARS must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

Claims must be submitted within 365 days from the date of service, or no later than 95 days after the end of the Federal Fiscal Year (i.e., January 3), whichever comes first.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

3.5.1.1 Appealing Denied SHARS Claims

SHARS providers that appeal claims denied for exceeding benefit limitations must submit documentation of medical necessity with the appeal. Documentation submitted with an appeal must include the pages from the IEP and ARD documents that show the authorization of the services, including the specified frequency and duration and the details of the need for additional time or the reasons for exceeding the benefit limitations.

Each page of the documentation must have the client’s name and Medicaid number.

3.5.1.2 Billing Units Based on 15 Minutes

All claims for reimbursement are based on the actual amount of billable time associated with the SHARS service. For those services for which the unit of service is 15 minutes (1 unit = 15 minutes), partial units must be rounded up or down to the nearest quarter hour.

Reminder: Enter the number of billing units in Block 24G of the CMS-1500 paper claim form. Claims without this information may be reimbursed as a unit of 1.

To calculate billing units, count the total number of billable minutes for the calendar day for the SHARS student, and divide by 15 to convert to billable units of service. If the total billable minutes are not divisible by 15, the minutes are converted to one unit of service if they are greater than seven and converted to 0 units of service if they are seven or fewer minutes.

For example, 68 total billable minutes/15 = 4 units + 8 minutes. Since the 8 minutes are more than 7 minutes, those 8 minutes are converted to one unit. Therefore, 68 total billable minutes = 5 units of service.

Examples:

<table>
<thead>
<tr>
<th>Minutes</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 min–7 mins</td>
<td>0 units</td>
</tr>
<tr>
<td>8 mins–22 mins</td>
<td>1 unit</td>
</tr>
<tr>
<td>23 mins–37 mins</td>
<td>2 units</td>
</tr>
<tr>
<td>38 mins–52 mins</td>
<td>3 units</td>
</tr>
<tr>
<td>53 mins–67 mins</td>
<td>4 units</td>
</tr>
<tr>
<td>68 mins–82 mins</td>
<td>5 units</td>
</tr>
</tbody>
</table>

3.5.1.3 Billing Units Based on an Hour

All claims for reimbursement are based on the actual amount of billable time associated with the SHARS service. For those services for which the unit of service is an hour (1 unit = 60 minutes = one hour), partial units must be billed in tenths of an hour and rounded up or down to the nearest six-minute increment.

Enter the number of billing units in Block 24G of the CMS-1500 paper claim form. Claims without this information may be reimbursed as a unit of 1.

To calculate billing units, count the total number of billable minutes for the calendar day for the SHARS student and divide by 60 to convert to billable units of service. If the total billable minutes are not divisible by 60, the minutes are converted to partial units of service as follows:

<table>
<thead>
<tr>
<th>Minutes</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>0 mins–3 mins</td>
<td>0 units</td>
</tr>
<tr>
<td>4 mins–9 mins</td>
<td>0.1 unit</td>
</tr>
<tr>
<td>10 mins–15 mins</td>
<td>0.2 unit</td>
</tr>
</tbody>
</table>
Other examples:

<table>
<thead>
<tr>

### 3.5.2 Managed Care Clients

SHARS services are carved-out of the Medicaid Managed Care Program and must be billed to TMHP for payment consideration. Carved-out services are those that are rendered to Medicaid Managed Care clients, but are administered by TMHP and not the client’s MCO.

### 3.5.3 Reimbursement

Providers are reimbursed for medical and transportation services provided under the SHARS Program on a cost basis using federally mandated allocation methodologies in accordance with 1 TAC §355.8443.

In order to accommodate participating SHARS districts that require interim cash flow to offset the financial burden of providing for students, an interim fee-for-service claiming system still exists for SHARS. The interim claims are based on district-specific interim rates but are provisional in nature.

The provider’s final reimbursement amount is arrived at by a cost report, cost reconciliation, and cost settlement process. The provider’s total costs for both direct medical and transportation services as reported in the cost report are adjusted using the federally mandated allocation methodologies.

- If a provider’s interim payments exceed the provider’s federal portion of the total certified Medicaid allowable costs, HHSC will recoup the federal share of the overpayment.
- If the provider’s federal portion of the total certified Medicaid allowable costs exceeds the interim Medicaid payments, HHSC will pay the federal share of the difference to the provider in accordance with the final actual certification agreement.

Submittal of a SHARS cost report is mandatory for each provider that requests and receives interim payments. Failure to file a SHARS cost report will result in sanctions, which includes recoupment of all interim payments for the cost report period in which the default occurs.

School districts can access district-specific interim rates and published cost report guidance documents, on the HHSC website at www.hhsc.state.tx.us/rad/acute-care/shars/index.shtml.

For additional information SHARS providers can contact a SHARS Rate Analyst via email at ra_shars@hhsc.state.tx.us or by telephone at (512) 491-1361.
Refer to: Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (Vol. 1, General Information) for more information.

Subsection 2.8, “Federal Medical Assistance Percentage (FMAP)” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (Vol. 1, General Information).

3.5.3.1 Quarterly Certification of Funds

SHARS providers are required to certify on a quarterly basis the amount reimbursed during the previous federal fiscal quarter. TMHP Provider Enrollment mails the quarterly Certification of Funds statement to SHARS providers after the end of each quarter of the federal fiscal year (October 1 through September 30). The purpose of the statement is to verify that the school district incurred costs on the dates of service that were funded from state or local funds in an amount equal to, or greater than, the combined total of its interim rates times the paid units of service. While the payments were received the previous federal fiscal quarter, the actual dates of service could have been many months prior. Therefore, the certification of public expenditures is for the date of service and not the date of payment.

In order to balance amounts in the Certification of Funds, providers will receive, or have access to, the Certification of Funds Claims Information Report. For help balancing the amounts in the statement, providers can contact the TMHP Contact Center at 1-800-925-9126.

Refer to: “Preliminary Information” in (Vol 1, General Information) for more information about provider relations representatives.

The Certification of Funds statement must be:

- Signed by the business officer or other financial representative who is responsible for signing other documents that are subject to audit.
- Notarized.
- Returned to TMHP within 25 calendar days of the date printed on the letter.

Failure to do so may result in recoupment of funds or the placement of a vendor hold on the provider’s payments until the signed Certification of Funds statement is received by TMHP. Providers must contact the TMHP Contact Center at 1-800-925-9126 if they do not receive their Certification of Funds statement.

On an annual basis, SHARS providers are required to certify through their cost reports their total, actual, incurred costs, including the federal share and the nonfederal share. Refer to the section below for additional information about cost reporting.

3.6 Cost Reporting, Cost Reconciliation, and Cost Settlement

CMS requires annual cost reporting, cost reconciliation, and cost settlement processes for all Medicaid SHARS services delivered by school districts. CMS requires that school districts, as public entities, not be paid in excess of their Medicaid-allowable costs and that any overpayments be recouped through the cost reconciliation and cost settlement processes. In an effort to minimize any potential recoupments, HHSC has assigned district-specific interim rates that are as close as possible to each district’s Medicaid-allowable costs for providing each SHARS service.

3.6.1 Cost Reporting

Each SHARS provider is required to complete an annual cost report for all SHARS that were delivered during the previous federal fiscal year (October 1 through September 30). The cost report is due on or before April 1 of the year following the reporting period.

School districts can access published cost report guidance documents, on the HHSC website at www.hhsc.state.tx.us/rad/acute-care/shars/index.shtml.
The following certification forms must be submitted and received by HHSC for the cost report. The
annual cost report includes two certification forms which must be completed to certify the provider’s
incurred actual costs:

• Cost report certification
• Claimed expenditures

The certification forms received by HHSC for the cost report must be:

• The original certification pages.
• Signed by the business officer or other financial representative who is responsible for legally binding
  the district.
• Notarized.

The primary purpose of the cost report is to document the provider’s costs for delivering SHARS,
including direct costs and indirect costs, and to reconcile the provider’s interim payments for SHARS
with its actual total Medicaid-allowable costs. All annual SHARS cost reports that are filed are subject to
desk review by HHSC or its designee.

For additional information, SHARS providers can contact a SHARS Rate Analyst via email at
re_shars@hhsc.state.tx.us or by telephone at (512) 491-1361.

3.6.2 Cost Reconciliation and Cost Settlement

The cost reconciliation process must be completed within 24 months of the end of the reporting period
covered by the annual SHARS cost report. The total Medicaid-allowable costs are compared to the
provider’s interim payments for SHARS delivered during the reporting period, which results in a cost
reconciliation.

If a provider has not complied with all cost report requirements or a provider’s interim payments exceed
the actual certified Medicaid-allowable costs of the provider for SHARS to Medicaid clients, HHSC will
recoup the federal share of the overpayment by one of the following methods:

• Offset all future claims payments to the provider until the amount of the federal share of the
  overpayment is recovered
• Recoup an agreed-upon percentage from future claims payments to the provider to ensure recovery
  of the overpayments within one year
• Recoup an agreed-upon dollar amount from future claims payments to ensure recovery of the
  overpayment within one year

If the actual certified Medicaid-allowable costs of a provider for SHARS exceed the provider’s interim
payments, HHSC will pay the federal share of the difference to the provider in accordance with the final,
actual certification agreement and submit claims to CMS for reimbursement of that payment in the
federal fiscal quarter following payment to the provider.

HHSC issues a notice of settlement that denotes the amount due to or from the provider.

3.6.3 Informal Review of Cost Reports Settlement

An ISD or the Superintendent, Chief Financial Officer, Business Officer, or other ISD Official with legal
authority who disagrees with the adjustments made during the cost reconciliation process has the right
to request an informal review of the adjustments. Requests for informal reviews must be sent by certified
mail and received by HHSC within the time frame designated on the settlement notice. Furthermore,
the request for informal review must include a concise statement of the specific actions or determinations
the district disputes, the ISD’s recommended resolution, and any supporting documentation deemed
relevant to the dispute. Failure to follow these instructions will result in the denial of the request for an
informal review.
School districts can access published cost report guidance documents, on the HHSC website at www.hhsc.state.tx.us/rad/acute-care/shars/index.shtml. For additional information, SHARS providers can contact a SHARS Rate Analyst via email at re_shars@hhsc.state.tx.us or by telephone at (512) 491-1361.

4. TEXAS HEALTH STEPS (THSTEPS) DENTAL

Medicaid dental services rules are described under Title 25 Texas Administrative Code (TAC) Part 1, Chapter 33. The online version of TAC is available at the Secretary of State’s website at www.sos.state.tx.us/tac/index.shtml. All dental providers must comply with the rules and regulations of the Texas State Board of Dental Examiners (TSBDE), including standards for documentation and record maintenance as stated in 22 TAC $108.7, Minimum Standard of Care, General, and §108.8, Records of the Dentist.

Note: THSteps dental benefits are administered as Children’s Medicaid Dental Services by dental managed care organizations for most Medicaid fee-for-service and managed care clients who are 20 years of age and younger.

Refer to: The Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks), or to the Medicaid Managed Care Initiatives website at www.hhsc.state.tx.us/medicaid/MMC.shtml, for additional information about Children’s Medicaid Dental Services.

4.1 Enrollment

To become a provider of THSteps or intermediate care facility for persons with intellectual disability (ICF/ID) dental services, a dentist must:

- Practice within the scope of the provider’s professional licensure.
- Complete the Dental Provider Enrollment Application and return it to TMHP.

Dental providers are required to maintain an active license status with the TSBDE. TMHP receives a monthly automated board feed from TSBDE to update licensure information. If licensure cannot be verified with the automated board feed, it is the providers’ responsibility to provide a copy of the active TSBDE license to TMHP. If TSBDE has a delay in processing license applications and renewals, the provider must request a letter from TSBDE for their individual provider information and send the letter of verification of current licensure to TMHP. The letter must contain the provider’s specific identification information, license number, and licensure period.

If TMHP cannot verify a valid license at the time of enrollment, it is the providers’ responsibility to provide a copy of the active TSBDE license to TMHP.

A dental provider cannot be enrolled if his or her dental license is due to expire within 30 days; a current license must be submitted. Dental licensure for owners of a dental practice is a requirement of the Occupations Code, Vernon’s Texas Codes Annotated (VTCA), Subtitle D, Chapters 251-267 (the Texas Dental Practice Act).

Providers can download and print dental provider enrollment application forms from the TMHP website at www.tmhp.com or call the TMHP Contact Center at 1-800-925-9126 to request them.

All owners of a dental practice must maintain an active license status with the TSBDE to receive reimbursement from Texas Medicaid. Any change in ownership or licensure status for any enrolled dentist must be immediately reported in writing to TMHP Provider Enrollment and will affect reimbursement by Texas Medicaid.

A dentist must complete the Dental Provider Enrollment Application for each separate practice location and will receive a unique provider identifier for each practice location if the application is approved.
The application form includes a written agreement with HHSC.

Dental providers may enroll in the THSteps Dental program and ICF/ID Dental Programs or as a Doctor of Dentistry Practicing as a Limited Physician, or both. The enrollment requirements are different with respect to the category of enrollment.

- All dental providers must declare one or more of the following categories:
  - General practice
  - Pediatric dentist
  - Periodontist
  - Endodontist
  - Oral and maxillofacial surgeon
  - Orthodontist
  - Other (prosthodontist, public health, and others)

Dentists (D.D.S., D.M.D.) who want to provide orthodontic services must be enrolled as a dentist or orthodontist provider for THSteps and must have at least one of the qualifications listed below.

THSteps dental providers may perform and be reimbursed for orthodontic services if they have attested to at least one of the following requirements:

- Completion of a dental pediatric specialty residency
- Completion of a minimum of 200 hours of continuing education in orthodontics within the last 10 years (8 hours can be online or self instruction) (Proof of the completion of continuing education hours is not required to be submitted with a request for prior authorization of orthodontic services; however, documentation must be produced by the dentist during retrospective review.)

Orthodontist providers are eligible to provide orthodontic services. In order to comply with the TSBDE rules and regulations, this designation can only be associated with dentists who are board-eligible or board-certified by an American Dental Association (ADA) recognized orthodontic specialty board.

Refer to: Section 1: Provider Enrollment and Responsibilities (Vol. 1, General Information).

4.1.1 THSteps Dental Eligibility

The client must be Medicaid- and THSteps-eligible (birth through 20 years of age) at the time of the service request and service delivery. However, Medicaid-approved orthodontic services already in progress may be continued even after the client loses Medicaid eligibility if the orthodontic treatment:

- Began before the loss of Medicaid eligibility.
- Began before the day of the client’s 21st birthday.
- Was completed within 36 months of the beginning date.

The client is not eligible for a THSteps medical checkup or THSteps dental benefits if the client’s Your Texas Benefits card or Medicaid Eligibility Verification Form (Forms H1027 and H1027-A-C) states any of the following:

- Emergency care only
- Presumptive eligibility (PE)
- Qualified Medicare beneficiary (QMB)
- Texas Women’s Health Program

Refer to: Section 1: Provider Enrollment and Responsibilities (Vol. 1, General Information).
4.1.2 THSteps Dental and ICF/ID Dental Services
A provider may enroll as an individual dentist, a group practice, or both. Regardless of the category of practice designation under THSteps Dental, providers can only submit claims for THSteps and ICF/ID Dental Services.

4.1.3 THSteps Dental Checkup and Treatment Facilities
All THSteps dental checkup and treatment policies apply to examinations and treatment completed in a dentist’s office, a health department, clinic setting, hospital operating room, or in a mobile/satellite unit. Enrollment of a mobile/satellite unit must be under a dentist or clinic name. Mobile units can be a van or any temporary site away from the primary office and are considered extensions of that office and are not separate entities. The physical setting must be appropriate so that all elements of the checkup or treatment can be completed. The checkup must meet the requirements detailed in subsection D.5, “Parental Accompaniment” in Appendix D, “Texas Health Steps Statutory State Requirements,” of this handbook. The provider with a mobile unit or who uses portable dental equipment must obtain a permit for the mobile unit from the TSBDE.

4.1.4 Doctor of Dentistry Practicing as a Limited Physician
Dentists who serve clients and submit claims using medical (CPT) procedure codes, such as oral-maxillofacial surgeons, may enroll as a doctor of dentistry practicing as a limited physician. Providers may enroll as an individual dentist or as a dental group. To enroll as a doctor of dentistry practicing as a limited physician, a dentist must:

- Be currently licensed by the TSBDE or currently licensed in the state where the service was performed.
- Have a Medicare provider identification number before applying for a Medicaid provider identifier.
- Enroll as a Medicaid provider with a limited physician provider identifier.

4.1.5 Client Rights
Dental providers enrolled in Texas Medicaid enter into a written contract with HHSC to uphold the following rights of the Medicaid client:

- To receive dental services that meet or exceed the standards of care established by the laws relating to the practice of dentistry and the rules and regulations of the TSBDE.
- To receive information following a dental examination about the dental diagnosis; scope of proposed treatment, including alternatives and risks; anticipated results; and the need and risks for administration of sedation or anesthesia.
- To have full participation in the development of the treatment plan and the process of giving informed consent.
- To have freedom from physical, mental, emotional, sexual, or verbal abuse, or harm from the provider or staff.
- To have freedom from overly aggressive treatment in excess of that required to address documented medical necessity.

A provider’s failure to ensure any of the client rights may result in termination of the provider agreement or contract and other civil or criminal remedies.
4.1.6 Complaints and Resolution
Complaints about dental services are typically received through the TMHP Contact Center, although a complaint is accepted from any source. A complaint is researched by TMHP and resolved or escalated as appropriate. Examples of complaints from clients about providers include:

- The provider did not consult with the client, explain what services were necessary, or obtain parent or guardian informed consent.
- The treating provider refused to make the child’s record available to the new provider.
- The provider did not give the child the appropriate local anesthesia or pain medication.
- The provider did not use sterile procedures; the facility or equipment were not clean.
- The provider or his staff were verbally abusive.
- The client did not receive a service, but the provider submitted a claim to Texas Medicaid.
- The provider charged a Medicaid client for benefits covered by Medicaid.

4.2 Services, Benefits, Limitations, and Prior Authorization

4.2.1 THSteps Dental Services
THSteps is the Texas version of the Medicaid program known as Early and Periodic Screening, Diagnosis, and Treatment (EPSDT).

THSteps dental services are mandated by Medicaid to provide for the early detection and treatment of dental health problems for Medicaid-eligible clients who are birth through 20 years of age. THSteps dental service standards are designed to meet federal regulations and incorporate the recommendations of representatives of national and state dental professional organizations.

THSteps’ designated staff (DSHS, DADS, or contractor), through outreach and informing, encourage eligible children to use THSteps dental checkups and services when children first become eligible for Medicaid, and each time children are periodically due for their next dental checkup.

Children within Medicaid have free choice of Medicaid-enrolled providers and are given names of enrolled providers. A list of THSteps dental providers in a specific area can be obtained using the Online Provider Lookup on the TMHP website at www.tmhp.com, or by calling 1-877-847-8377.

Upon a provider’s request, DSHS (or its contractor) will assist eligible children with the scheduling of free transportation to their dental appointment or clients can call the Medical Transportation Program at 1-877-633-8747.

Refer to: The Medical Transportation Program Handbook (Vol. 2, Provider Handbooks) for information about transportation arrangements.

4.2.1.1 Eligibility for THSteps Dental Services
A client is eligible for THSteps dental services from birth through 20 years of age. The eligibility period is determined by the client’s age on the first of the month. If a client’s birthday is not on the first of a month, the new eligibility period begins on the first day of the following month. When the client turns 21 years of age during a month, the client is eligible for THSteps dental non-CCP services through the end of that month.

A client is eligible for Comprehensive Care Program (CCP) dental services until their 21st birthday. The eligibility period ends on their 21st birthday and does not continue through the end of the month in which the birthday falls.
4.2.1.2 Parental Accompaniment

Children who are 14 years of age and younger must be accompanied to THSteps dental appointments by a parent, legal guardian, or another adult who is authorized by the parent or guardian unless the services are provided by an exempt entity as defined by the Human Resources Code. For additional information and exceptions, see subsection D.5, “Parental Accompaniment” in Appendix D, “Texas Health Steps Statutory State Requirements,” in this handbook.

4.2.2 Comprehensive Care Program (CCP)

The Omnibus Budget Reconciliation Act (OBRA) of 1989 mandated the expansion of the federal EPSDT program to include any service that is medically necessary and for which federal financial participation (FFP) is available, regardless of the limitations of Texas Medicaid. This expansion is referred to as the Comprehensive Care Program (CCP).

CCP services are provided only for those clients who are birth through 20 years of age who are eligible to receive THSteps services. When the client becomes 21 years of age, all CCP benefits stop. Dental services that are a benefit through CCP are designated in the Limitations column of the Medicaid dental fee schedules beginning in subsection 4.2.13, “* Diagnostic Services” of this handbook, with the notation “CCP.”

4.2.3 Children’s Medicaid Dental Plan Choices

Children’s Medicaid dental services benefits are administered by two dental managed care organizations (i.e., dental plans) across the state of Texas.

<table>
<thead>
<tr>
<th>Medicaid Managed Care Dental Plan</th>
<th>Dental Plan Provider Services</th>

<td>1-800-685-9971</td>
</tr>
<tr>
<td>MCNA Dental</td>
<td>1-855-776-6262</td>
</tr>
</tbody>
</table>

Note: Services provided to Medicaid managed care clients must be provided by their main dentist.

4.2.4 Authorization Transfers for Medicaid Managed Care Dental Orthodontic Services

If a client transitions to a managed care dental plan after their orthodontic services were initially authorized by TMHP, the claims for the orthodontic services will be processed and reimbursed by the managed care dental plan. Providers should check client eligibility to identify the managed care dental plan to which the client transitions.

Claims for orthodontic services remain the responsibility of the dental managed care plan until the authorized services are completed, even if the client loses dental managed care or Medicaid eligibility.

4.2.5 ICF/ID Dental Services

ICF/ID dental services are mandated by Medicaid. Reimbursement is provided for treatment of dental problems for Medicaid-eligible residents of ICF/ID facilities who are 21 years of age and older. Residents of ICF-MR facilities who are 20 years of age and younger receive services through the regular THSteps Program. Eligibility for ICF/ID services is determined by DADS.

Procedure codes that do not have a CCP designation in the Limitations column of the dental fee schedule may be submitted in a routine manner for ICF/ID clients. These procedures must be documented as medically necessary and appropriate. ICF/ID clients are not subject to periodicity for preventive care. For procedure codes that have a CCP designation, a provider may request authorization with documentation or provide documentation on the submitted claim.

Refer to: Subsection 4.2.12, “Medicaid Dental Benefits, Limitations, and Fee Schedule” of this handbook.
4.2.5.1 THSteps and ICF/ID Provision of Dental Services

All THSteps and ICF/ID dental services must be performed by the Medicaid-enrolled dental provider except for permissible work that is delegated to a licensed dental hygienist, dental assistant, or dental technician in a dental laboratory on the premises where the dentist practices, or in a commercial laboratory registered with the TSBDE. The Texas Dental Practice Act and the rules and regulations of the TSBDE (22 TAC, Part 5) define the scope of work that dental auxiliary personnel may perform. Any deviations from these practice limitations shall be reported to the TSBDE and HHSC, and could result in sanctions or other actions imposed against the provider.

THSteps and ICF/ID clients must receive:

- Dental services specified in the treatment plan that meet the standards of care established by the laws relating to the practice of dentistry and the rules and regulations of the TSBDE.
- Dental services free from abuse or harm from the provider or the provider’s staff.
- Only the treatment required to address documented medical necessity that meets professionally recognized standards of health care.

4.2.5.2 Children in Foster Care

Clients in foster care receive services from Superior HealthPlan’s dental contractor. Providers may contact DentaQuest at 1-888-308-9345 for more information.

Paper claims and requests for prior authorization must be mailed to:

DentaQuest
12121 North Corporate Parkway
Mequon, WI 53092
Fax: (262) 241-7150 or 1-888-313-2883

4.2.6 Written Informed Consent and Standards of Care

As outlined in 22 TAC §108.7, the dental provider must maintain written informed consent signed by the patient, or a parent or legal guardian of the patient if the patient is a minor, or a legal guardian of the patient if the patient has been adjudicated incompetent to manage the patient’s personal affairs.

Such consent is required for all treatment plans and procedures where a reasonable possibility of complications from the treatment planned or a procedure exists, and such consent should disclose risks or hazards that could influence a reasonable person in making a decision to give or withhold consent.

Written consent must be given within the one-year period prior to the date the services are provided, and must not have been revoked. THSteps clients or their parents or legal guardians who can give written informed consent must receive information following a dental examination about the dental diagnosis, scope of proposed treatment, including alternatives and risks, anticipated results, and need for and risks of the administration of sedation or anesthesia. Additionally, they must receive a full explanation of the treatment plan and give written informed consent before treatment is initiated. The parent or guardian being present at the time of the dental visit facilitates the provider obtaining written informed consent. Dentists must comply with TSBDE Rule 22 TAC §108.2, “Fair Dealing.”

4.2.7 First Dental Home

Based on the American Academy of Pediatric Dentistry’s (AAPD) definition, Texas Medicaid defines a dental home as the dental provider who supports an ongoing relationship with the client that includes all aspects of oral health care delivered in a comprehensive, continuously accessible, coordinated, and family-centered way. Establishment of a client’s dental home begins no later than 6 months of age and includes referrals to dental specialists when appropriate.
In providing a dental home for a client, the dental provider enhances the ability to assist clients and their parents in obtaining optimum oral health care. The first dental home visit can be initiated as early as 6 months of age and must include, but is not limited to, the following:

- Comprehensive oral examination
- Oral hygiene instruction with primary caregiver
- Dental prophylaxis, if appropriate
- Topical fluoride varnish application when teeth are present
- Caries risk assessment
- Dental anticipatory guidance

Clients who are from 6 through 35 months of age may be seen for dental checkups by a certified First Dental Home provider.

First Dental Home services are submitted using procedure code D0145. The dental home provider must retain supporting documentation for procedure code D0145 in the client’s record. The supporting documentation must include, but is not limited to, the following:

- Oral and physical health history review
- Dental history review
- Primary caregiver’s oral health
- Oral evaluation
- Caries risk assessment
- Dental prophylaxis, which may include a toothbrush prophylaxis
- Oral hygiene instruction with parent or caregiver
- Fluoride varnish application
- An appropriate preventive oral health regimen (recall schedule)
- Anticipatory guidance communicated to the client’s parent, legal guardian, or primary caregiver to include the following:
  - Oral health and home care
  - Oral health of primary caregiver/other family members
  - Development of mouth and teeth
  - Oral habits
  - Diet, nutrition, and food choices
  - Fluoride needs
  - Injury prevention
  - Medications and oral health
  - Any referrals, including dental specialist’s name

Procedure code D0145 is limited to individual dentists certified by the DSHS Oral Health Program to perform this service. Training for certification as a First Dental Home provider is available as a free continuing education course on the THSteps website at www.txhealthsteps.com.
Procedure codes D0120, D0150, D0160, D0170, D0180, D1120, D1206, D1208, and D8660 are denied if procedure code D0145 is submitted for the same DOS by any provider. A First Dental Home examination is limited to ten services per client lifetime with at least 60 days between visits by any provider to prevent denials of the service.

4.2.8 Dental Referrals by THSteps Primary Care Providers

Dental providers may receive referrals for clients who are 6 months of age and older from THSteps primary care providers. The primary care provider must provide information about the initiation of routine dental services with the recommendation to the client’s parent or guardian that an appointment be scheduled with a dental provider in order to establish a dental home. If a THSteps dental checkup reveals a dental health condition that requires follow-up diagnosis or treatment, the provider performing the dental checkup should assist the client in planning follow-up care within their practice or in making a referral to another qualified dental provider.

**Note:** For clients who are 20 years of age and younger, the client’s guardian may refer the client for dental services or a client of legal age may refer themselves for dental services.

4.2.9 Change of Provider

A provider may refer a client to another dental provider for treatment for any of the following reasons:

- Treatment by a dental specialist such as a pediatric dentist, periodontist, oral surgeon, endodontist, or orthodontist is indicated and is in the best interests of the THSteps client.
- The services needed are outside the skills or scope of practice of the initial provider.

A provider may discontinue treatment if there is documented failure to keep appointments by the client, noncompliance with the treatment plan, or conflicts with the client or other family members. In any such action to discontinue treatment, providers must comply with 22 TAC §108.5, “Patient Abandonment.”

The client also may select another provider, if desired. HHSC may refer the client to another provider as a result of adverse information obtained during a utilization review or resolution of a complaint from either provider or client.

4.2.9.1 Interrupted or Incomplete Orthodontic Treatment Plans

Authorizations for orthodontic or extensive restorative treatment plans that have been prior authorized for a provider are not transferable to another provider. If a client’s treatment plan is interrupted and the services are not completed, the original or new provider must request a new prior authorization to complete the interrupted, incomplete, and prior authorized treatment plan.

To complete the treatment plan, the client must be eligible for Medicaid. It is the provider’s responsibility to verify the client’s eligibility through www.YourTexasBenefitsCard.com, TexMedConnect, or the TMHP Contact Center.

If the client does not return for the completion of services and there is a documented failure to keep appointments by the client, the dental provider who initiated the services may submit a claim for reimbursement in compliance with the 95-day filing deadline.

**Refer to:** Subsection 4.2.27.4, “Premature Termination of Comprehensive Orthodontic Treatment” in this handbook.

4.2.10 Periodicity for THSteps Dental Services

For clients who are 6 months through 20 years of age, dental checkups may occur at 6-month (181-day) intervals. Texas Medicaid has adopted the AAPD’s “Guideline on Periodicity of Examination, Preventive Dental Services, Anticipatory Guidance, and Oral Treatment for Children” to serve as a guide and reference for dentists when scheduling and providing services to THSteps clients.
In November 2004, the ADA, in conjunction with the FDA, established “Guidelines for Prescribing Dental Radiographs.” The guidelines include type of encounters relevant to the client’s age and dental developmental stage. Texas Medicaid has adopted the ADA guidelines to serve as a guide and reference for dentists who treat THSteps clients.

**Refer to:** Subsection G.1, “American Academy of Pediatric Dentistry Periodicity Guidelines (9 Pages)” and subsection G.2, “American Dental Association Guidelines for Prescribing Dental Radiographs (3 Pages)” in this handbook.

THSteps dental providers may provide any medically necessary dental services such as emergency, diagnostic, preventive, therapeutic, and orthodontic services that are within the Texas Medicaid guidelines and limitations specified for each area as long as the client’s Medicaid eligibility is current for the date that dental services are being provided.

### 4.2.10.1 Exceptions to Periodicity

If a periodic dental checkup has been conducted within the last six months, the client still may be able to receive another periodic dental checkup in the same six-month period by any provider. For THSteps clients, exceptions to the six-month periodicity schedule for dental checkup services may be approved for one of the following reasons:

- Medically necessary service, based on risk factors and health needs (includes clients who are birth through 6 months of age).
- Required to meet federal or state exam requirements for Head Start, daycare, foster care, preadoption, or to provide a checkup prior to the next periodically-due checkup if the client will not be available when due. This includes clients whose parents are migrant or seasonal workers.
- Clients’ choice to request a second opinion or change service providers (not applicable to referrals).
- Subsequent therapeutic services necessary to complete a case for clients who are 5 months of age and younger when initiated as emergency services, for trauma, or early childhood caries.
- Medical checkup prior to a dental procedure requiring general anesthesia.
- A First Dental Home client can be seen up to ten times within the age of 6 through 35 months.

It is the provider’s responsibility to verify that the client is eligible for the date that dental services are to be provided. Eligibility may be verified through [www.YourTexasBenefitsCard.com](http://www.YourTexasBenefitsCard.com), TexMedConnect, or the TMHP Contact Center.

When the need for an exception to periodicity is established, a narrative explaining the reason for the exception to periodicity limitations must be documented in the client’s file and on the claim submission. For claims filed electronically, check “yes” when prompted. For claims filed on paper, place comments in Block 35.

For ICF/ID clients who are 21 years of age and older, the periodicity schedule for preventive dental procedures (exams, prophylaxis, fluoride, and radiographs) does not apply.
4.2.11 Tooth Identification (TID) and Surface Identification (SID) Systems

Claims are denied if the procedure code is not compatible with TID or SID. Use the alpha characters to describe tooth surfaces or any combination of surfaces. For SID designation on anterior teeth, use facial (F) and incisal (I). For SID purposes, use buccal (B) and occlusal (O) designations for posterior teeth.

### 4.2.11.1 Supernumerary Tooth Identification

Each identified permanent tooth and each identified primary tooth has its own identifiable supernumerary number. This developed system can be found in the Current Dental Terminology (CDT) published by the ADA.

The TID for each identified supernumerary tooth will be used for paper and electronic claims and can only be submitted for payment with the following procedure codes:

- For primary teeth only: D7111.
- For both primary and permanent teeth the following codes can be submitted: D7140, D7210, D7220, D7230, D7240, D7241, D7250, D7285, D7286, and D7510.

4.2.12 Medicaid Dental Benefits, Limitations, and Fee Schedule

For THSteps clients, dental procedure limitations may be waived when all the following have been met. The dental procedure is:

- Medically necessary and FFP is available for it.
- Prior authorized by the TMHP Dental Director.
- Properly documented in the client’s record.

Refer to: Subsection 4.3, “Documentation Requirements” in this handbook.

For ICF/ID clients, services designated as CCP-type are available. In the Limitations column of the fee schedule, abbreviations indicate the age range limitations and documentation requirements. The following abbreviations also appear in a table at the bottom of each page of the fee schedule:

4.2.13 * Diagnostic Services

Diagnostic services should be performed for all clients, starting within the first six months of the eruption of the first primary tooth, but no later than one year of age.

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Limitations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Procedure codes D0140, D0160, D0170, and D0180 are limited dental codes and may be paid in addition to a comprehensive oral exam (procedure code D0150) or periodic oral exam (procedure code D0120), when submitted within a six-month period. When submitting a claim for procedure code D0140, D0160, D0170, or D0180, the provider must indicate documentation of medical necessity on the claim. These claims are subject to retrospective review. If no comments are indicated on the claim form, the payment may be recouped.</td>
<td></td>
</tr>
</tbody>
</table>

A=Age range limitations, N=Narrative required, FMX=Full-mouth radiographs (nonpanoramic), MTID=Missing tooth ID(s), PPXR=Preoperative and postoperative radiographs required, PXR=Preoperative radiographs required, PHO=preoperative and postoperative photographs required, PC=Periodontal charting required, PATH=Pathology report required and must be retained in the client’s record, CCP=Comprehensive Care Program, NC=No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter |
The provider must document medical necessity and the specific tooth or area of the mouth on the claim for procedure codes D0140, D0160, and D0170.

Documentation supporting medical necessity for procedure codes D0140, D0160, and D0170 must also be maintained by the provider in the client’s medical record and must include the following:

- The client’s complaint supporting medical necessity for the examination
- The specific area of the mouth that was examined or the tooth involved
- A description of what was done during the visit
- Supporting documentation of medical necessity which may include, but is not limited to, radiographs or photographs

Documentation supporting medical necessity for procedure code D0180 must be maintained by the provider in the client’s medical record and must include the following:

- The client’s complaint supporting medical necessity for the examination
- A description of what was done during the treatment

</tr>
</tbody>
</table>
4.2.15 Therapeutic Services

Medicaid reimbursement is contingent on compliance with the following limitations:

- **Documentation requirements**
  
  **Refer to:** Subsection 4.3, “Documentation Requirements” in this handbook.

- **Total restorative fee per tooth on primary teeth cannot exceed $156.06, which is the fee for a stainless steel crown (exceptions: D2335 and D2933).**

- **All fees for tooth restorations include local anesthesia and pulp protective media, where indicated, without additional charges. These services are considered part of the restoration.**

---

**Procedure Code | Limitations**
---

**D1351**

Sealants may be applied to the occlusal, buccal, and lingual pits and fissures of any tooth that is at risk for dental decay and is free of proximal caries and free of restorations on the surface to be sealed. Sealants are a benefit when applied to deciduous (baby or primary) teeth or permanent teeth. Indicate the tooth numbers and surfaces on the claim form. Reimbursement will be considered on a per-tooth basis, regardless of the number of surfaces sealed. Denied when billed for the same DOS as any D4000 series periodontal procedure code. Sealants and replacement sealants are limited to one every 3 years per tooth by the same provider or provider group. Dental sealants performed more frequently than once every three years by a different provider are also a benefit if the different provider is not associated with the provider or provider group that initially placed the sealant on the tooth. A Birth–20

**D1352**

A 1–20

**Space Maintenance (Passive Appliances)**

Space maintainers are a benefit of Texas Medicaid after premature loss of primary or secondary molars (TID A, B, I, J, K, L, S, and T for clients who are 1 through 12 years of age, and after loss of permanent molars (TID 3, 14, 19, and 30) for clients who are 3 through 20 years of age. Limited to 1 space maintainer per TID per client.

When procedure code D1510 or D1515 have been previously reimbursed, the recementation of space maintainers (procedure code D1550) may be considered for reimbursement to either the same or different THSteps dental provider. Replacement space maintainers may be considered upon appeal with documentation supporting medical necessity. Removal of a fixed space maintainer is not payable to the provider or dental group practice that originally placed the device.

**D1510**

A 1–20 (TIDs #3, 14, 19, 30), MTID

**Space Maintenance (Passive Appliances) continued**

**D1515**

A 1–20 (TIDs #3, 14, 19, 30), MTID

**D1520**

A 1–20 (TIDs #3, 14, 19, 30), MTID

**D1525**

A 1–20 (TIDs #3, 14, 19, 30), MTID

**D1550**

A 1–20 (TIDs #3, 14, 19, 30), MTID

**D1555**

A 1–20 (TIDs #3, 14, 19, 30), MTID

**A=Age range limitations, N=Narrative required, FMX=Full-mouth radiographs (nonpanoramic), MTID=Missing tooth ID(s), PPXR=Preoperative and postoperative radiographs required, PXR=Preoperative radiographs required, PHO=Preoperative and postoperative photographs required, PC=Periodontal charting required, PATH=Pathology report required and must be retained in the client’s record, CCP=Comprehensive Care Program, NC=No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter**
• More than one restoration on a single surface is considered a single restoration.
• Multiple surface restorations must show definite crossing of the plane of each surface listed for each primary and permanent tooth completed.
• A multiple surface restoration cannot be submitted as two or more separate one-surface restorations.
• Restorations and therapeutic care are provided as a Medicaid service based on medical necessity and reimbursed only for therapeutic reasons and not preventive purposes (refer to CDT).

All dental restorations and prosthetic appliances that require lab fabrication may be submitted for reimbursement using the date the final impression was made as the DOS. If the client did not return for final seating of the restoration or appliance, a narrative must be included on the claim form and in the client’s chart in lieu of a postoperative radiograph. The 95-day filing deadline is in effect from the date of the final impression. If the client returns to the office after the claim has been filed, the dentist is obligated to attempt to seat the restoration or appliance at no cost to the client or Texas Medicaid. For records retention requirements, refer to subsection 4.3, “Documentation Requirements” in this handbook.

Direct pulp caps may be reimbursed separately from any final tooth restoration performed on the same tooth (as noted by the TID) on the same DOS by the same provider.

### Crowns—Single Restorations Only

For procedure codes D2710 through D2794, single crown restorations (permanent teeth only), the following limitations apply:

- Prior authorization is required for any combination of inlays/onlays or permanent crowns that exceed the limit of four inlays/onlays or permanent crowns per lifetime, any provider.

Stainless steel crowns and permanent all-metal cast crowns are not reimbursed on anterior permanent teeth (6–11, 22–27).

4.2.17 * Endodontics Services

Therapeutic pulpotomy (procedure code D3220) and apexification and recalcification procedures (procedure codes D3351, D3352, and D3353) are considered part of the root canal (procedure codes D3310, D3320, and D3330) or retreatment of a previous root canal (procedure codes D3346, D3347, and D3348). When therapeutic pulpotomy or apexification and recalcification procedures are submitted with root canal codes, the reimbursement rate is adjusted to ensure that the total amount reimbursed does not exceed the total dollar amount allowed for the root canal procedure.

Reimbursement for a root canal includes all appointments necessary to complete the treatment. Pulpotomy and radiographs performed pre, intra, and postoperatively are included in the root canal reimbursement.

Root canal therapy that has only been initiated, or taken to some degree of completion, but not carried to completion with a final filling, may not be submitted as a root canal therapy code. It must be submitted using code D3999 with a narrative description of what procedures were completed in the root canal therapy.

Documentation supporting medical necessity must be kept in the client’s record and include the following: the medical necessity as documented through periapical radiographs of tooth treated showing pre-treatment, during treatment, and post-treatment status; the final size of the file to which the canal was enlarged; and the type of filling material used. Any reason that the root canal may appear radiographically unacceptable must be documented in the client’s record.

If the client is pregnant and does not want radiographs, use alternative treatment (temporary) until after delivery.

* A=Age range limitations, N=Narrative required, FMX=Full-mouth radiographs (nonpanoramic), MTID=Missing tooth ID(s), PPXR=Preoperative and postoperative radiographs required, PXR=Preoperative radiographs required, PHO=Preoperative and postoperative photographs required, PC=Periodontal charting required, PATH=Pathology report required and must be retained in the client’s record, CCP=Comprehensive Care Program, NC=No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter
4.2.18 * Periodontal Services

Procedure codes D4210 and D4211, when submitted for clients who are 12 years of age and younger, will be initially denied, but may be appealed with documentation of medical necessity. Preoperative and postoperative photographs are required for the following procedure codes: D4210, D4211, D4270, D4273, D4275, D4276, D4277, D4278, D4355, and D4910.

Preoperative and postoperative photographs are required when medical necessity is not evident on radiographs for the following procedure codes: D4240, D4241, D4245, D4266, and D4267. Documentation is required when medical necessity is not evident on radiographs for the following procedure codes: D4210, D4211, D4240, D4241, D4245, D4266, D4267, D4270, D4273, D4275, D4276, D4277, D4278, D4355, and D4910.

Procedure code D4278 must be billed on the same date of service as procedure code D4277 or the service will be denied.

Claims for preventive dental procedure codes D1110, D1120, D1206, D1208, and D1351 will be denied when submitted for the same DOS as any D4000 series periodontal procedure codes.

Procedure codes D4266 and D4267 may be appealed with documentation of medical necessity. Medical necessity for third molar sites are:

- Medical or dental history documenting need due to inadequate healing of bone following third molar extraction, including the date of third molar extraction.
- Secondary procedure several months postextraction.
- Position of the third molar preoperatively.
- Postextraction probing depth to document continuing bony defect.
- Postextraction radiographs documenting continuing bony defect.
- Bone graft and barrier material used.

Medical necessity for other than third molar sites are:

- Medical or dental history documenting comorbid condition (e.g., juvenile diabetes, cleft palate, avulsed tooth or teeth, traumatic oral injuries).
- Intra- or extra-oral radiographs of treatment site(s).
- If not radiographically evident, intraoral photographs are optional unless requested preoperatively by HHSC or its agent.
- Periodontal probing depths.
- Number of intact walls associated with an angular bony defect.
- Bone graft and barrier material used.

4.2.20 Implant Services

Implant services require prior authorization.

Refer to: Subsection 4.2.32, “Mandatory Prior Authorization” in this handbook for documentation requirements.

Periapical radiographs are required for each tooth involved in the authorization request. The criteria used by the TMHP Dental Director are:

- At least one abutment tooth requires a crown (based on traditional requirements of medical necessity and dental disease).
- Space cannot be filled with removable partial denture.
- The purpose is to prevent the drifting of teeth in all dimensions (anterior, posterior, lateral, and the opposing arch).

4.2.21 * Prosthodontic (Fixed) Services

Prosthodontic procedure codes require prior authorization.

Refer to: Subsection 4.2.32, “Mandatory Prior Authorization” in this handbook for documentation requirements.

Periapical radiographs are required for each tooth involved in the authorization request. The criteria used by the TMHP Dental Director are:

- At least one abutment tooth requires a crown (based on traditional requirements of medical necessity and dental disease).
- The space cannot be filled with a removable partial denture.
- The purpose is to prevent the drifting of teeth in all dimensions (anterior, posterior, lateral, and the opposing arch).
- Each abutment or each pontic constitutes a unit in a bridge.
• Porcelain is allowed on all teeth.

D9440 Visits for routine postoperative care are included in all therapeutic and oral surgery fees. A 1–20, N

Drugs

Procedure code D9630 is not payable for take home fluorides or drugs. Prescriptions should be given to clients to be filled by the pharmacy for these medications as the pharmacy is reimbursed by the Medicaid Vendor Drug Program. Procedure code D9630 is payable for medications (antibiotics, analgesics, etc.) administered to a client in the provider’s office. Documentation of dosage and route of administration must be provided in the Remarks section of the claim.

Refer to: Appendix B: Vendor Drug Program (Vol. 1, General Information).

D9610 May not be submitted with code D9220 or D9221. A 1–20, N

D9612

D9630 Includes, but is not limited to, oral antibiotics, oral analgesic, and oral sedatives administered in the office. May not be submitted with codes D9220, D9221, D9230, D9241, D9248, D9610, and D9920. A 1–20, N

Miscellaneous Services

D9910 Per whole mouth application, does not include fluoride. Not to be used for bases, liners, or adhesives under or with restorations. Limited to once per year. A 18–20, N, CCP

D9920 The provider must indicate the client’s medical diagnosis of intellectual disability using one of the following diagnosis codes or indicate that the client is ICF/ID eligible in the Remarks field of the claim form:

- 317 – mild intellectual disability (IQ 50–70)
- 3180 – moderate intellectual disability (IQ 35–49)
- 3181 – severe intellectual disability (IQ 20–34)
- 3182 – profound intellectual disability (IQ under 20)
- 319 – unspecified intellectual disability

Documentation supporting the medical necessity and appropriateness of dental behavior management must be retained in the client’s chart and available to state agencies upon request, and is subject to retrospective review. Documentation of medical necessity must include:

- A current physician statement addressing the intellectual disability. The statement must be signed and dated within one year prior to the dental behavior management.
- A description of the service performed (including the specific problem and the behavior management technique applied).
- Personnel and supplies required to provide the behavioral management.
- The duration of the behavior management (including session start and end times).

Dental behavior management is not reimbursed with an evaluation, prophylactic treatment, or radiographic procedure. Denied if submitted with D9248. A 1–20

A=Age range limitations, N=Narrative required, FMX=Full-mouth radiographs (nonpanoramic), MTID=Missing tooth ID(s), PPXR=Preoperative and postoperative radiographs required, PXR=Preoperative radiographs required, PHO=Preoperative and postoperative photographs required, PC=Periodontal charting required, PATH=Pathology report required and must be retained in the client’s record, CCP=Comprehensive Care Program, NC=No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter
4.2.24 Dental Anesthesia

Dental providers must have the following information on file with TMHP to be eligible for reimbursement for dental anesthesia:

- A current anesthesia permit level issued by the TSBDE.
- A portability permit from the TSBDE (required to be reimbursed for anesthesia provided in a location other than the provider’s office or satellite office). If the provider does not have a permit, the services will be denied.
- Providers must have a level 4 permit, a TSBDE portability permit, and an anesthesiology residency recognized by the American Dental Board of Anesthesiology to bill the enhanced rate for procedure code D9220.

All dental providers must comply with the American Academy of Pediatric Dentistry (AAPD) guidelines and TSBDE rules and regulations, including the standards for documentation and record maintenance for dental anesthesia.

Anesthesia Permit Levels

The following table shows the levels of anesthesia permits that are issued by the TSBDE:

<table>
<thead>
<tr>

Local anesthesia in conjunction with operative or surgical services (procedure code D9215) is all inclusive with any other dental service and is not reimbursed separately.

### 4.2.25 Dental Therapy Under General Anesthesia

Providers must comply with TSBDE Rules and Regulations, Chapter 8, Subsection C and 22 TAC §108.30 – 108.35. Any anesthesia type services are paid only to the provider. The dental provider is responsible for determining whether a client meets the minimum criteria necessary for receiving general anesthesia. A local anesthesia fee is not paid in addition to other restorative, operative, or surgical procedure fees.

Prior authorization is required for the use of general anesthesia while rendering treatment (to include the anesthesia fee and the facility fee), regardless of place of service, for a client who does not meet the requirements of the “Criteria for Dental Therapy Under General Anesthesia” (22 point threshold) and the “Criteria for Dental Therapy Under General Anesthesia, Attachment 1” forms. Supporting documentation, including the appropriate narrative, must be submitted to TMHP for prior authorization. Prior authorization is required for medically necessary dental general anesthesia that exceeds once per six months, per client, per provider. The dental provider is responsible for obtaining prior authorization for the services performed under general anesthesia. Hospitals, ASC’s, and anesthesiologists must obtain the prior authorization number from the dental provider.

**Refer to:** Form CH.13, “THSteps Dental Criteria for Dental Therapy Under General Anesthesia (2 Pages)” in this handbook. Dental rehabilitation or restoration services requiring general anesthesia are performed in an outpatient facility.

Surgical services related to THSteps dental services requiring general anesthesia must be coded as follows:

- Procedure code 00170 with modifier EP is for the anesthesiologist or certified registered nurse anesthetist (CRNA) to use on the claim form.
- Procedure code 41899 with modifier EP is for the facility to use on the claim form. Procedure code 41899 does not require prior authorization for ASCs and Hospital-based Ambulatory Surgical Centers (HASCs).
- An appropriate diagnosis code, such as 52100 or 5220, must be used on the claim form.
- Modifier EP identifies that the service is associated with THSteps.
The claim forms used are the CMS-1500 or the UB-04 CMS-1450 paper claim forms. The examining physician, anesthesiologist, hospital, ASC, or HASC must submit claims to TMHP separately for the medical and facility components of their services.

Refer to: Form CH.12, “THSteps Dental Mandatory Prior Authorization Request Form” in this handbook.
### Criteria for Dental Therapy Under General Anesthesia

Total points needed to justify treatment under general anesthesia = 22.

4.25.2 Criteria for Dental Therapy Under General Anesthesia, Attachment 1

Medicaid Dental Policy Regarding Criteria for Dental Therapy Under General Anesthesia—Attachment 1

Purpose: To justify I.V. Sedation or General Anesthesia for Dental Therapy, the following documentation is required in the Child’s Dental Record.

Elements: Note those required* and those as appropriate**:

1) The medical evaluation justifying the need for anesthesia
2) Description of relevant behavior and reference scale
3) Other relevant narrative justifying the need for general anesthesia.
4) Client’s demographics, including date of birth.
5) Relevant dental and medical history.
6) Dental radiographs, intraoral/perioral photography and/or diagram of dental pathology.
7) Proposed Dental Plan of Care.
8) Consent signed by parent/guardian giving permission for the proposed dental treatment and acknowledging that the reason for the use of IV sedation or general anesthesia for dental care has been explained.
10) The parent/guardian dated signature on the Criteria for Dental Therapy Under General Anesthesia form attesting that they understand and agree with the dentist’s assessment of their child’s behavior.
11) Dentist’s attestation statement and signature, which may be put on the bottom of the Criteria for Dental Therapy Under General Anesthesia form or included in the record as a stand alone form.

“I attest that the client’s condition and the proposed treatment plan warrant the use of general anesthesia. Appropriate documentation of medical necessity is contained in the client’s record and is available in my office.”

REQUESTING DENTIST’S SIGNATURE: ____________________________ DATE: ______________

Effective Date_01012009/Revised Date_12172008
4.2.26 Hospitalization and ASC/HASC

Dental services performed in an ASC, HASC, or a hospital (either as an inpatient or an outpatient) may be benefits of THSteps based on the medical or behavioral justification provided, or if one of the following conditions exist:

- The procedures cannot be performed in the dental office.
- The client is severely disabled.

To satisfy the preadmission history and physical examination requirements of the hospital, ASC, or HASC, a THSteps medical checkup for dental rehabilitation or restoration may be performed by the child’s primary care provider. Physicians who are not enrolled as THSteps medical providers must submit claims for the examination of a client before the procedure with the appropriate evaluation and management procedure code from the following table:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Place of Service (POS)</th>
</tr>
</thead>
<tbody>
<tr>
<td>99202</td>
<td>POS 1 (office)</td>
</tr>
<tr>
<td>99222</td>
<td>POS 3 (inpatient hospital)</td>
</tr>
<tr>
<td>99282</td>
<td>POS 5 (outpatient hospital)</td>
</tr>
</tbody>
</table>

Refer to: Subsection 4.2.10.1, “Exceptions to Periodicity” in this handbook.

Note: The dental provider must submit claims to TMHP using the ADA Dental Claim Form to be considered for reimbursement through THSteps Dental Services.

The dental provider is responsible for obtaining prior authorization for the services performed under general anesthesia. Hospitals, ASC’s, and anesthesiologists must obtain the prior authorization number from the dental provider.

Contact the individual HMO for precertification requirements related to the hospital procedure. If services are precertified, the provider receives a precertification number effective for 90 days.

In those areas of the state with Medicaid managed care, the provider should contact the managed care plan for specific requirements or limitations. It is the dental provider’s responsibility to obtain precertification from the client’s HMO or managed care plan for facility and general anesthesia services if precertification is required.

To be reimbursed by the HMO, the provider must use the HMO’s contracted facility and anesthesia provider. These services are included in the capitation rates paid to HMOs, and the facility or anesthesiologist risk nonpayment from the HMO without such approval. Coordination of all specialty care is the responsibility of the client’s primary care provider. The primary care provider must be notified by the dentist or the HMO of the planned services.

Dentists providing sedation or anesthesia services must have the appropriate current permit from the TSBDE for the level of sedation or anesthesia provided.

The dental provider must be in compliance with the guidelines detailed in General Information.

Note: Post-treatment authorization will not be approved for codes that require mandatory prior authorization.

4.2.27 Orthodontic Services (THSteps)

Orthodontic services are a benefit for THSteps clients who are 13 years of age and older who have either permanent dentition and a severe handicapping malocclusion or one of the following special medical conditions:

- Cleft palate
- Head-trauma injury involving the oral cavity
Skeletal anomalies involving the oral cavity

A severe handicapping malocclusion is defined by Texas Medicaid as dysfunctional masticatory (chewing) capacity as a result of the existing relationship between the maxillary (upper) and mandibular (lower) dental arches or teeth that without correction will result in damage to the temporomandibular joint (s) (TMJ) or other supporting oral structures (e.g., bone, tissues, intra- or extra-oral muscles, etc.).

Exception to the age restriction may be considered for clients who are 12 years of age and younger if medical necessity has been verified by the dental director for one of the following:

- Interceptive orthodontic treatment services
- Crossbite therapy
- Limited orthodontic treatment and minor treatment to control harmful habits
- Special medical conditions

Dental services that are not covered by THSteps Dental Services but are medically necessary and allowable may be a benefit under CCP according to federal Medicaid guidelines and TAC.

As required by the Texas Human Resources Code, if the client is 14 years of age and younger and services are not provided by an exempt entity, THSteps dental providers shall require the client to be accompanied to THSteps dental appointments by a parent, guardian, or other adult who is authorized by the parent or guardian.

Exempt entities (school health clinics, Head Start program, or childcare facilities) that provide services must as a condition of reimbursement:

- Obtain written, unrevoked consent for the services from the client’s parent or legal guardian within a one-year period before the date of service.
- Encourage parental involvement in and management of the health care of the clients who receive services from the clinic, program, or facility.

The following definitions of dentition established by the ADA’s Current Dental Terminology (CDT) manual are recognized by Texas Medicaid:

- Primary Dentition: Teeth developed and erupted first in order of time.
- Transitional Dentition: The final phase of the transition from primary to adult teeth, in which the deciduous molars and canines are in the process of shedding and the permanent successors are emerging.
- Adolescent Dentition: The dentition that is present after the normal loss of primary teeth and prior to cessation of growth that would affect orthodontic treatment.
- Adult Dentition: The dentition that is present after the cessation of growth that would affect orthodontic treatment.

The American Association of Orthodontists classification of occlusion or malocclusion is as follows:

- Class I: A Class I occlusion exists with the teeth in a normal relationship when the mesialbuccal cusp of the maxillary first permanent molar coincides with the buccal groove of the mandibular first molar.
- Class II: A Class II malocclusion occurs when the mandibular teeth are distal or behind the normal relationship with the maxillary teeth. This can be due to a deficiency of the lower jaw or an excess of the upper jaw and therefore, presents two types:
  - Division I is when the mandibular arch is behind the upper jaw with a consequential protrusion of the upper front teeth.
• Division II exists when the mandibular teeth are behind the upper teeth, with a retrusion of the maxillary front teeth. Both of these malocclusions have a tendency toward a deep bite because of the uncontrolled migration of the lower front teeth upwards.

• **Class III:** A Class III malocclusion occurs when the lower dental arch is in front of (mesial to) the upper dental arch. People with this type of occlusion usually have a strong or protrusive chin, which can be due to either horizontal mandibular excess or horizontal maxillary deficiency. Commonly referred to as an underbite.

4.2.27.1 **Benefits and Limitations for Orthodontic Services**

Comprehensive orthodontic services must be provided by a board-eligible or board-certified orthodontist.

*Note:* *Exceptions to a board-eligible or board-certified orthodontist may be considered for clients in a rural or frontier area or where access to care is an issue.*

The diagnostic workup is considered part of the pre-orthodontic treatment visit (procedure code D8660). The following procedure codes are used to submit claims for the diagnostic workup:

<table>
<thead>
<tr>
<th>Diagnostic Workup Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>D0330</td>
</tr>
</tbody>
</table>

Comprehensive orthodontic services include all of the following:

- Diagnostic workups
- Banding
- Initial brackets
- Replacement brackets
- Monthly visits
- Initial retainers
- Special orthodontic treatment appliance(s)

The following procedure codes are used to submit claims for orthodontic services:

<table>
<thead>
<tr>
<th>Orthodontic Services Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>D8080</td>
</tr>
</tbody>
</table>

Full banding is allowed on permanent dentition only, and treatment should be accomplished in one stage and is limited to once per lifetime.

Exception: Cases of mixed dentition may be considered when the treatment plan includes extractions of remaining primary teeth or in the case of cleft palate.

4.2.27.2 **Crossbite Therapy**

Crossbites (anterior and posterior) are defined by the American Academy of Pediatric Dentistry (AAPD) as malocclusions involving one or more teeth in which the maxillary teeth occlude lingually with the mandibular antagonistic (opposing) teeth. A crossbite can be of a dental or skeletal origin or a combination of both.

The intent of crossbite therapy is to prevent the need for comprehensive orthodontic treatment. This treatment may lessen the severity or future effects of a malformation, eliminate its cause, or may include localized tooth movement.
Crossbite therapy (limited orthodontics) is allowed for primary or transitional dentition. Crossbite therapy will not be considered for transitional dentition when there is a need for full banding of the adult teeth.

Crossbite therapy must be submitted with procedure code D8050 or D8060. Clients with special medical conditions may be considered for interceptive orthodontic services of the primary dentition if the services are medically necessary and submitted with procedure code D8050.

Crossbite therapy is an inclusive charge for treating the crossbite to completion. Adjustments, maintenance, diagnostic models, and diagnostic workup procedures are not reimbursed separately.

**4.2.27.3 Minor Treatment to Control Harmful Habits**

Special orthodontic appliances are a benefit for minor treatment to control harmful habits.

Orthodontic appliances for minor treatment to control harmful habits must be submitted with procedure codes D8210, D8220, and D8670.

Monthly adjustments (procedure code D8670) for minor treatment to control harmful habits are limited up to 10 visits.

Claims for panoramic films (procedure code D0330), cephalometric films (procedure code D0340), oral/facial photographic images (procedure code D0350) and diagnostic models (procedure code D0470) will be denied when they are submitted with procedure code D8210 or D8220.

Each orthodontic appliance (procedure code D8210 and D8220) are limited to once per arch, per lifetime.

**4.2.27.4 Premature Termination of Comprehensive Orthodontic Treatment**

Premature termination of comprehensive orthodontic treatment includes the following:

- Removal of the brackets and arch wires
- Removal of appliances with the fabrication of retainers
- Delivery of orthodontic retainers

Documentation of one of the following must be retained for premature termination of comprehensive orthodontic treatment:

- Documentation of a lack of cooperation from the client.
- Documentation that the client requested premature removal and a release of liability form has been signed by the parent, guardian, or client if he or she is at least 18 years of age.

Premature termination of comprehensive orthodontic treatment must be submitted with procedure code D8680.

Removal of the appliance (procedure code D8680) will be denied if the claim is submitted by any provider on the same date of service as orthodontic treatment (procedure codes D8050, D8060, and D8080).

Providers must keep a copy of the release of liability form on file and are responsible for this documentation during a review process.

If premature removal of the appliances is requested before completion of treatment, future orthodontic services may not be considered. The provider must document why the premature removal was necessary.

**4.2.27.5 Other Orthodontic Services**

Replacement brackets (procedure code D8690) are a benefit when the client transfers from one provider to another or when trauma is involved.
Providers are responsible for any replacement brackets that are required as part of the comprehensive orthodontic treatment. Additional reimbursement for replacement brackets (procedure code D8690) is limited to a combined total amount of $100.00, same provider.

Rebonding, recementing, or repair of fixed orthodontic appliances (procedure code D8693) may be reimbursed once per lifetime per orthodontic appliance.

Only one retainer per arch per lifetime (procedure code D8680) is allowed; however, each retainer may be replaced with prior authorization once per lifetime due to loss or breakage. Retainer adjustments are not reimbursed separately.

Appliances required as part of the cleft palate treatment plan may be reimbursed separately.

Special orthodontic appliances may be used with full banding and crossbite therapy when approved by the TMHP Dental Director or Associate Dental Director.

### 4.2.27.6 Non-covered Services

Single arch comprehensive orthodontic treatment is not a benefit of Texas Medicaid.

Orthodontic services that are performed solely for cosmetic purposes are not a benefit of Texas Medicaid. Although aesthetics is an important part of self-esteem, services primarily for self-worth are not within the scope of this Texas Medicaid benefit.

Orthodontic services for a client who initiated orthodontic treatment through a private arrangement while Medicaid-eligible are not a benefit of Texas Medicaid.

An initial orthodontic or pre-orthodontic treatment visit (procedure code D8660) is considered part of the exam in an oral evaluation (procedure codes D0120 or D0150).

### 4.2.27.7 Comprehensive Orthodontic Treatment

Comprehensive orthodontic services (procedure code D8080) are restricted to clients who are 13 years of age and older or clients who have exfoliated all primary dentition.

National procedure codes do not allow for any work-in-progress or partial submission of a claim by separating the three orthodontic components: diagnostic workup, orthodontic appliance (upper), or orthodontic appliance (lower).

When submitting claims for comprehensive orthodontic treatment procedure code D8080, three local codes must be submitted as remarks codes along with procedure code D8080. Local codes (procedure codes Z2009, Diagnostic workup approved; Z2011, Orthodontic appliance, upper; or Z2012, Orthodontic appliance, lower) must be placed in the Remarks Code field on electronic claims or Block 35 on paper claims.

**Note:** If the remarks code and procedure code D8080 are not submitted, the claim will be denied.

Each remarks code pays the correct reimbursement rate which, when combined, totals the maximum payment of $775. Procedure code D8080 must be submitted on three separate details, with the appropriate remarks code, even if the claim submission is for the workup and full banding. Submission of only one detail for a total of $775 will not be accepted.

**Example 1:** A client is approved for full banding, but after the initial workup, the client discontinues treatment. This provider would submit the national procedure code D8080 and place the local code Z2009, Diagnostic workup approved, in the Remarks/comment field. The claim would pay $175.

**Example 2:** A client is approved for full banding. The provider continues treatment and places the maxillary bands. The provider would submit the national procedure code D8080 and place the local procedure code Z2009, Diagnostic workup approved, and Z2011, Maxillary bands, in the Remarks/comment field. The claim would pay $475.
All electronic claims for procedure code D8080 must have the appropriate remarks code associated with the procedure code.

Providers must adhere to the following guidelines for electronic claim submission so TMHP can accurately apply the correct remarks code to the appropriate claim detail.

A Diagnostic Procedure Code (DPC) remarks code must be submitted, only once, in the first three bytes of the NTE02 at the 2400 loop.

**Example 1:** For a claim with one detail, submitted with procedure code D8080 and remarks code Z2009, enter the information as follows: DPCZ2009. The total submitted would be $175.

**Example 2:** For a claim with two details, where details one and two are procedure code D8080 and the remarks codes are Z2009 and Z2011, enter the information as follows: DPCZ2009Z2011. The total submitted would be $475.

**Example 3:** For a claim with three details, where all three details are submitted separately with procedure code D8080, enter the remarks code based on the order of the claim detail as follows: DPCZ2009Z2011Z2012. The total submitted would be $775.

This method ensures accurate and appropriate payment for services rendered and addresses the need for submission of a partial claim.

4.2.27.8 *Orthodontic Procedure Codes and Fee Schedule*

When submitting claims for orthodontic procedures, use the following procedure codes:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Limitations</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Orthodontic Services</strong></td>
<td></td>
</tr>
<tr>
<td>D0330*, D0340*, D0350*, and D0470*</td>
<td></td>
</tr>
<tr>
<td>D7280</td>
<td>A 1-20</td>
</tr>
<tr>
<td><strong>Interceptive Orthodontic Treatment</strong></td>
<td></td>
</tr>
<tr>
<td>D8050*</td>
<td>Replaces Z2018 and 8110D. Limited to one per lifetime.</td>
</tr>
<tr>
<td>D8060*</td>
<td>Replaces Z2018 and 8120D. Limited to one per lifetime.</td>
</tr>
<tr>
<td><strong>Comprehensive Orthodontic Treatment</strong></td>
<td></td>
</tr>
<tr>
<td><strong>Minor Treatment to Control Harmful Habits</strong></td>
<td></td>
</tr>
<tr>
<td>D8210*</td>
<td>Refer to subsection 4.2.28, &quot;Special Orthodontic Appliances&quot; in this handbook for associated remarks field code.</td>
</tr>
<tr>
<td>D8220*</td>
<td>Refer to subsection 4.2.28, &quot;Special Orthodontic Appliances&quot; in this handbook for associated remarks field code.</td>
</tr>
<tr>
<td><strong>Other Orthodontic Services</strong></td>
<td></td>
</tr>
<tr>
<td>D8660*</td>
<td>Replaces Z2008. Denied when submitted for the same DOS as D0145 by any provider. Denied when submitted for the same DOS as D0120 or D0150 by the same provider.</td>
</tr>
<tr>
<td>D8670*</td>
<td>Replaces Z2013.</td>
</tr>
<tr>
<td>D8680*</td>
<td>Replaces Z2014 and Z2015; one retainer per arch per lifetime; may be replaced once because of loss or breakage (prior authorization is required).</td>
</tr>
</tbody>
</table>

* = Services payable to an FQHC for a client encounter.
All removable or fixed special orthodontic appliances must be prior authorized. The prior authorization request must include both the national code and remarks code. However, prior authorization requests may omit the DPC prefix to the eight-digit remarks code.

All removable or fixed special orthodontic appliances must be submitted with national procedure code D8210 or D8220. To ensure appropriate claims processing, the DPC remarks code (local procedure code) reflecting the specific service is also required. The appropriate remarks codes must be entered on the prior authorization request form. Failure to follow the following steps will cause the claims to deny. Failure to enter the DPC remarks code and the appropriate procedure code will not result in claim denial; however, manual intervention is required to process the claim, which may result in a delay of payment.

For paper claim submissions, providers must enter the local procedure code in Block 35 (Remarks) of the 2006 ADA claim form.

For electronic submissions, providers enter the DPC remarks code in the Comments field to ensure correct authorization, accurate records, and reimbursement.

For electronic submissions other than TexMedConnect submissions, providers must follow the instructions below to ensure TMHP accurately applies the correct local procedure code to the appropriate claim detail:

- The DPC prefix must be submitted, only once, in the first three bytes of the NTE02 at the 2400 loop.
- In bytes 4–8, providers must submit the remark code (local procedure code) based on the order of the claim detail. Do not enter any spaces or punctuation between remark codes, unless to designate the detail is not submitted with D8210 or D8220.

**Example:** *For a claim with three details, where details one and three are submitted with procedure code D8210 and detail two is not, enter the following information in the NTE02 at the 2400 loop: DPC1014D 1046D. (The space shows that detail two needs no local code.) If all details require a local code, enter DPC, no spaces, and the appropriate local codes.*

To submit using TexMedConnect, providers must enter the local code into the Remarks Code field, located under the details header. The Remarks Code field is the field directly after the Procedure Code field. TexMedConnect submitters are not required to manually enter the DPC prefix as it is placed in the appropriate field on the TexMedConnect electronic claim.
The following table identifies the appropriate DPC remarks codes to use when requesting prior authorization or submitting a claim for procedure code D8210 or D8220:

4.2.29 Handicapping Labio-lingual Deviation (HLD) Index

The orthodontic provider must complete and sign the HLD Index (Angle classification).

The HLD index requires the use of an HLD score sheet and a Boley gauge for measuring.

Providers should be conservative in scoring. The client must be considered severe handicapping malocclusion with dysfunctional masticatory (chewing) capacity as a result of the existing relationship between the maxillary (upper) and mandibular (lower) dental arches and/or teeth that, without correction, will result in damage to the temporomandibular joint(s) (TMJ) and/or other supporting oral structures (e.g., bone, tissues, intra and/or extra oral muscles, etc.) and have a minimum of 26 points on the HLD index to be considered for any orthodontic care other than crossbite correction. “Half-mouth” treatment cannot be approved.

With the client or models in the centric position, the HLD index is to be scored as follows. Record all measurements rounded-off to the nearest millimeter (mm). Enter a score of “0” if the condition is absent.

Cleft Palate
A cleft palate case request for mixed dentition will be considered only if narrative justification supports treatment before the client reaches full dentition.

Note: Intermittent treatment requests may exceed the allowable 26 reimbursable treatment visits.

Severe Traumatic Deviations
Refers to facial accidents only. Points cannot be awarded for congenital deformity. Severe traumatic deviations do not include traumatic occlusions for crossbites.

Overjet in Millimeters
Score the case exactly as measured. The measurement must be recorded from the most protrusive incisor, then subtract 2 mm (considered the norm), and enter the difference as the score.

Overbite in Millimeters
Score the case exactly as measured. The measurement must be recorded from the labio-incisal edge of the overlapped anterior tooth or teeth to the point of maximum coverage, then subtract 3 mm (considered the norm), and enter the difference as the score.

Mandibular Protrusion in Millimeters
Score the client exactly as measured. The measurement must be recorded from the “line of occlusion” of the permanent teeth, not from the ectopically erupted teeth in the anterior segment. Caution is advised in undertaking treatment of open bites in older teenagers because of the frequency of relapse.

Open Bite in Millimeters
Score the case exactly as measured. Measurement must be recorded from the line of occlusion of the permanent teeth, not from ectopically erupted teeth in the anterior segment. Caution is advised in undertaking treatment of open bites in older teenagers, because of the frequency of relapse.
Ectopic Eruption
An unusual pattern of eruption, such as high labial cuspids or teeth that are grossly out of the long axis of the alveolar ridge.

Ectopic eruption does not include teeth that are rotated or teeth that are leaning or slanted especially when the enamel-gingival junction is within the long axis of the alveolar ridge.

Note: Record the more serious condition. Do not include (score) teeth from an arch if that arch is to be counted in the category of Anterior Crowding. For each arch, either the ectopic eruption or anterior crowding may be scored, but not both.

Anterior Crowding
Arch length insufficiency must exceed 3.5 mm to be considered as crowding in either arch. Mild rotations that may react favorably to stripping or moderate expansion procedures are not to be scored as crowded.

Excessive Anterior Spacing in Millimeters
The score for this category must be the total, in millimeters, of the anterior spaces.

Providers should be conservative in scoring. Liberal scoring will not be helpful in the evaluation and approval of the case. The case must be considered dysfunctional and have a minimum of 26 points on the HLD index to qualify for any orthodontic care other than crossbite correction. Half-mouth cases cannot be approved.

The intent of the program is to provide orthodontic care to clients with handicapping malocclusion to improve function. Although aesthetics is an important part of self-esteem, services that are primarily for aesthetics are not within the scope of benefits of this program.

The proposals for treatment services should incorporate only the minimal number of appliances required to properly treat the case. Requests for multiple appliances to treat an individual arch will be reviewed for duplication of purpose.

If attaining a qualifying score of 26 points is uncertain, providers must include a brief narrative when submitting the case. The narrative may reduce the time necessary to gain final approval and reduce shipping costs incurred to resubmit records.

Providers must properly label and protect all records (especially plaster diagnostic models) when shipping. If plaster diagnostic models are requested by and shipped to TMHP, the provider should assure that the models are adequately protected from breakage during shipping. TMHP will return intact models to the provider.
### 4.2.29.1 HLD Score Sheet

This sheet and a Boley Gauge are required to score.

**Procedure:**
- Occlude client or models in centric position.
- Record all measurements rounded-off to the nearest millimeter.
- Enter a score of 0 if the condition is absent.

**PLEASE PRINT CLEARLY:**

4.2.30 Emergency or Trauma Related Services for All THSteps Clients and Clients Who Are 5 Months of Age and Younger

THSteps clients who are birth through 5 months of age are not eligible for routine dental checkups; however:

- They can be seen for emergency dental services by the dentist at any time for trauma, early childhood caries, or other oral health problems.
- They may be referred to a dentist by their primary care provider when a medical checkup identifies the medical necessity for dental services.

Prior authorization is not required for emergency or trauma-related dental services. Claims for these dental services must be filed separately from nonemergency dental services. Only one emergency or trauma-related dental claim per client, per day, may be considered for reimbursement. Routine therapeutic procedures are not considered emergency or trauma-related procedures.

When submitting a claim for emergency or trauma-related dental services, the provider must:

- Enter the word “Emergency” or “Trauma” in the description field (Block 30) of the claim form (also enter a brief description of the CDT procedure code used). Claims are subject to retrospective review. If no comments are indicated on the claim form, the payment may be recouped.
- If checking the Other Accident box, briefly describe what caused the emergency or trauma.
- Check the appropriate box in Block 45, Treatment Resulting From, of the claim form (the options to check are Occupational Illness/Injury, Auto Accident, or Other Accident).

Documentation to support the diagnosis and treatment of trauma must be retained in the client’s record.

**Note:** Indicating Trauma in the description field allows the provider to be reimbursed for treatment on an emergency, continuing, and long-term basis without regard to periodicity, subject to the client’s eligibility and program limitations. An exception to periodicity for THSteps dental services is granted automatically for immediate treatment and any future follow-up treatment, as long as each claim submitted for payment is marked “Trauma” in the Description field, Block 30, and the original date of treatment or incident is referenced in the Remarks field, Block 35.

**Refer to:** Subsection 6.7, “2006 American Dental Association (ADA) Dental Claim Filing Instructions” in Section 6, “Claims Filing” (Vol. 1, General Information).

Subsection 4.2.12, “Medicaid Dental Benefits, Limitations, and Fee Schedule” of this handbook.

4.2.31 Emergency Services for Medicaid Clients Who Are 21 Years of Age and Older

Limited dental services are available for clients who are 21 years of age and older (not residing in an ICF/ID facility) whose dental diagnosis is secondary to and causally related to a life-threatening medical condition.

4.2.31.1 Long Term Care (LTC) Emergency Dental Services

DADS provides a limited range of dental services for Medicaid-eligible residents of LTC facilities. All claims for dental services provided to LTC residents are submitted to DADS. For information, providers should contact the appropriate LTC facility or DADS at (512) 438-2633.

4.2.31.2 Laboratory Requirements

Dental laboratories must be registered with TSBDE laboratories, and technicians must not be under restrictions imposed by TSBDE or a court.

4.2.32 Mandatory Prior Authorization

Mandatory prior authorization is required for consideration of reimbursement to dental providers who render the following services:

- Orthodontia
- Implants
- Fixed prosthetic services
- Removable prosthodontics
- Dental general anesthesia
- A combination of inlays/onlays or permanent crowns in excess of four per client
- Procedure code D4276
- Procedure code D7272
- Procedure code D7472
- Limited dental services for clients who are 21 years of age and older (not residing in an ICF/ID facility) whose dental diagnosis is secondary to and causally related to a life-threatening medical condition
- Cone beam imaging

Approved orthodontic treatment plans must be initiated before the client’s loss of Medicaid eligibility and before the 21st birthday, and must be completed within 36 months of the authorization date. Authorization for other procedures is valid for up to 90 days.

To obtain prior authorization for implants and fixed prosthodontics, a prior authorization form together with documentation supporting medical necessity and appropriateness must be submitted. Required documentation includes, but is not limited to:

- The THSteps Dental Mandatory Prior Authorization Request Form.
- Appropriate pretreatment radiographs.
- Necessary radiographs of each involved tooth, such as periapical views. Panoramic films are inadequate to document caries.
- Documentation supporting that the mouth is free of disease; no untreated periodontal or endodontic disease, or rampant caries.
- Documentation supporting only one virgin abutment tooth; at least one tooth must require a crown unless a Maryland Bridge is being considered.
- Tooth Identification (TID) System noting only permanent teeth.
- Documentation supporting that a removable partial is not a viable option to fill the space between the teeth.
Prior authorization will not be given when films show two abutment teeth (virgin teeth do not require a crown, except for Maryland Bridge) or there is untreated periodontal or endodontic disease, or rampant caries which would contraindicate the treatment.

Removable prosthodontics (procedure codes D5951, D5952, D5953, D5954, D5955, D5958, D5959, and D5960) for clients with cleft lip or cleft palate requires prior authorization with a completed THSteps Dental Mandatory Prior Authorization Request Form and narrative documenting the medical need for these appliances. Additional information may be requested by the TMHP Dental Director if necessary before making a determination.

The prior authorization number is required on claims for processing. If the client is not eligible for Medicaid on the DOS or the claim is incomplete, it will affect reimbursement. Prior authorization is a condition for reimbursement; it is not a guarantee of payment.

Note: Post-treatment authorization will not be approved for codes that require mandatory prior authorization.

Refer to: Form CH.12, “THSteps Dental Mandatory Prior Authorization Request Form” in this handbook.

4.2.32.1 Cone Beam Imaging

Prior authorization is required for procedure codes D0363 and D0367.

Cone beam imaging is used to determine the best course of treatment for cleft palate repair, skeletal anomalies, post-trauma care, implanted or fixed prosthodontics, and orthodontic or orthognathic procedures. Cone beam imaging is limited to initial treatment planning, surgery, and postsurgical follow up.

To obtain prior authorization, a THSteps Dental Mandatory Prior Authorization Request Form must be submitted with documentation supporting medical necessity and appropriateness. Required documentation includes, but is not limited to, the following:

- Presenting conditions
- Medical necessity
- Status of the client’s treatment

4.2.32.2 General Anesthesia for Dental Treatment

Prior authorization is required for the use of general anesthesia while rendering treatment (to include the dental service fee, the anesthesia fee, and facility fee) regardless of place of service. A client must meet the minimum requirement of 22 total points on the Criteria for Dental Therapy Under General Anesthesia form.

Refer to: Subsection 4.2.25.1, “Criteria for Dental Therapy Under General Anesthesia” in this handbook.

In those areas of the state with Medicaid Managed Care, precertification or approval is required from the client’s health maintenance organization (HMO) for anesthesia and facility charges. It is the dental provider’s responsibility to obtain precertification from the client’s HMO or managed care plan for facility and general anesthesia services. A medical checkup prior to a dental procedure requiring general anesthesia is considered an exception to THSteps periodicity. A referral to the client’s primary care physician is not required. Prior authorization is available for exceptions to periodicity. Providers must include all appropriate supporting documentation with the submittal. The criteria for general anesthesia applies only to treatment of clients who are 20 years of age and younger or ICF/ID program clients.
4.2.32.3 Orthodontic Services

Prior authorization is required for all orthodontic services except for rebonding, recementing, or repair, as required, of fixed retainers (procedure code D8693). Providers must maintain documentation of medical necessity in the client’s dental record for rebonding or recementing of fixed retainers.

Orthodontic services do not include any related services outside those listed in this section (e.g., extractions or surgeries); however, all services must be included in the orthodontic treatment plan.

Approved orthodontic treatment plans must be initiated before clients lose Medicaid eligibility or reach 21 years of age, and all active orthodontic treatments must be completed within 36 months of the authorization date. Services cannot be added or approved after eligibility has expired.

Note: If a client reaches 21 years of age or loses Medicaid eligibility before the authorized orthodontic services are completed, reimbursement is provided to complete the orthodontic treatment plan that was authorized and initiated while the client was 20 years of age or younger and eligible for Texas Medicaid as long as the orthodontic treatment plan is completed within the appropriate time frames.

Any non-orthodontic service that is included as part of the treatment plan (extractions or surgeries) must be completed before the client loses eligibility or reaches 21 years of age in order to be reimbursed through Texas Medicaid. Services cannot be added or approved after Texas Medicaid eligibility has expired.

Once prior authorization is obtained, the provider is obligated to advise the client that he or she is able to receive the approved orthodontic service (including monthly orthodontic adjustment visits and retainers) even if the client loses eligibility or reaches his or her 21st birthday.

All requests must be reviewed by the TMHP Dental Director or other state dental contractor’s board-eligible or board-certified orthodontist employee or consultant who is licensed in Texas.

To avoid unnecessary denials, providers must submit correct and complete information, including documentation for medical necessity for the services requested. Providers must maintain documentation of medical necessity in the client’s medical record. Requesting providers may be asked for additional information to clarify or complete a request.

A completed Texas Health Steps (THSteps) Dental Mandatory Prior Authorization Request Form must be signed and dated by the performing dental provider. All signatures and dates must be current, unaltered, original, and handwritten. Computerized or stamped signatures and dates will not be accepted. The completed authorization form must include the procedure codes for all services requested along with a written statement of medical necessity for the proposed orthodontic treatment.

All prior authorization requests for orthodontic services must be accompanied by an attestation from the requesting provider that the provider is either a pediatric dentist or orthodontist.

General dentists who are requesting prior authorization for orthodontic services must attest and maintain documentation of a minimum of 200 hours of continuing dental education specifically in orthodontics within the last 10 years; 8 hours can be online or self-instruction.

Proof of the completion of continuing education hours is not required to be submitted with a request for prior authorization of orthodontic services; however, documentation must be produced by the dentist during retrospective review. All attestations are subject to compliance review and orthodontic services may be subject to recoupment.

4.2.32.3.1 Initial Orthodontic Services Request

The prior authorization form must include all of the procedures that are required to complete the requested treatment including, but not limited to, the following:

- Diagnostic workup
- Medically necessary extractions (Tooth ID must be included)
• Orthognathic surgery
• Upper and lower appliance
• Monthly adjustments
• Special orthodontic treatment appliances
• Placement of banding and brackets
• Replacement of brackets
• Removal of the brackets and arch wires
• Other special orthodontic appliances
• Fabrication of special orthodontic appliances
• Delivery of orthodontic retainers
• Appliance removal (if indicated)

A completed and scored Handicapping Labio-Lingual Deviations (HLD) Index with a diagnosis of Angle class (a minimum of 26 points are required for approval of non-cleft palate cases). If attaining a qualifying score of 26 points is uncertain, a brief narrative should be provided.

Note: A score of a minimum 26 points on the HLD index does not indicate an automatic approval for comprehensive orthodontics. Approval will be based on the diagnostic workup supporting the HLD index. Documentation provided must be reviewed by a qualified board eligible or board certified orthodontist.

When requesting prior authorization, providers must include diagnostic models, radiographs (X-rays), cephalometric X-ray with tracings, photographs, and other supporting documentation with the THSteps Dental Mandatory Prior Authorization Request Form.

All required documents must be submitted together in one package per prior authorization request. Prior authorization requests that are not submitted in one package per request will be considered incomplete.

Note: All documentation submitted with an incomplete request will be sent back to the provider with a letter that indicates the prior authorization request was incomplete. Providers may resubmit prior authorization requests with all the required documentation.

4.2.32.3.2 Diagnostic Tools

Prior authorization requests must include the date of service the diagnostic tools were obtained (the date of service the dental records were produced). All diagnostic tools must be properly labeled and protected when shipped by the provider. If any diagnostic tool is damaged during shipment, the provider may be required to reproduce the documentation for consideration of the case for prior authorization.

Note: If medical necessity cannot be determined from the diagnostic tools that are submitted with the request, the prior authorization request may be denied.

TMHP will be responsible for retaining an image of each diagnostic tool that is submitted for every complete orthodontic prior authorization request.

Copies of diagnostic models, X-rays, and any other paper diagnostic tools will be accepted and are preferred. Copies will not be returned, but providers will be required to maintain the dental records for retrospective review. Originals will be returned to the submitting provider only when the document is clearly marked “original.”

Diagnostic models in the form of plaster casts are preferred; however, providers may choose the positions in which the casts are made. E-models must be in the centric occlusion position.
Radiographs that are submitted must include, but are not limited to, the following:

- Panoramic or a full mouth series
- Cephalometric with tracings

Photographic images must be submitted with the request and must be in a 1:1 ratio format (actual size), including, but not limited to, the following:

- Full face, smiling
- Left and right profiles
- Full maxillary arch (open mouth view)
- Full mandibular arch (open mouth view)
- Right side occluded in centric occlusion
- Left side occluded in centric occlusion
- Anterior occluded in centric occlusion

X-rays must be of diagnostic quality and do not have to be submitted on photographic quality paper.

Submitting providers must attest that radiographs, photographs, and other documentation are unaltered.

4.2.32.3.3 Authorization Extensions

Extensions on allowed time frames may be considered no sooner than 60 days before the authorization expires. Extra monthly adjustments (procedure code D8670) will not be prior authorized, but the time frame may be considered for extension not to exceed 36 months of actual treatment. Providers must submit the following:

- Diagnostic workup.
  
  **Note:** Photographs may be substituted for models.

- The reason the treatment was not completed in the original time frame.

- An explanation of the treatment plan status.

4.2.32.3.4 Crossbite Therapy

Requests for crossbite therapy (procedure codes D8050 or D8060) require the submission of diagnostic models to receive authorization. An HLD score sheet is not required for crossbite therapy.

Providers that submit requests for crossbite therapy must maintain documentation in the client’s record that demonstrates the following criteria:

- Posterior teeth—Are not end-to-end, but the buccal cusp of the upper teeth is lingual to the buccal cusp of the lower teeth.

- Anterior teeth—The incisal edge of the upper teeth are lingual to the incisal edge of the opposing arch.

4.2.32.3.5 Minor Treatment to Control Harmful Habits

A THSteps Dental Mandatory Prior Authorization Form must be completed when requesting prior authorization for orthodontic appliances for minor treatment to control harmful habits. Documentation must support medical necessity of any appliance requested.

Providers must submit diagnostic models when requesting prior authorization for a removable appliance or fixed appliance.
Procedure codes D8210 or D8220 may only be approved for control of harmful habits including, but not limited to, thumb sucking or tongue thrusting and may not be prior authorized for services that are related to comprehensive orthodontic services.

4.2.32.3.6 Premature Termination of Orthodontic Services

Prior authorization for the premature termination of orthodontic services (procedure code D8680) is required.

Premature termination of orthodontic services includes all of the following:

- Removal of the brackets and arch wires.
- Other special orthodontic appliances.
- Fabrication of special orthodontic appliances.
- Delivery of orthodontic retainers.

The prior authorization must include all of the following for consideration:

- Panoramic radiograph (copies are preferred).
- Cephalometric radiograph with tracing (copies are preferred).
- Six intra-oral photographs (copies are preferred).
- Three extra-oral photographs (copies are preferred).
- A narrative documenting why the provider is terminating the orthodontic services early.
- Documentation that the parent, legal guardian, or the client, if he or she is 18 years of age or older or an emancipated minor, understands that the provider is terminating the orthodontic services, and the client is no longer eligible for orthodontic services by Texas Medicaid/THSteps.

In addition to the final record, the provider requesting premature termination of orthodontic services must submit a copy of the signed release form that includes the following:

A signature by one of the following:

- The parent
- Legal guardian
- The client, if he or she is 18 years of age or older or an emancipated minor

One of the following statements:

- The client is uncooperative or non-compliant with the treating dentist’s directions and does not intend to complete orthodontic treatment.
- The client requested the premature removal of orthodontic appliances and does not intend to complete orthodontic treatment.

**Note:** A client for whom removal of an appliance has occurred due to the client’s request, or is uncooperative or non-compliant will not be eligible for any additional Medicaid orthodontic services.

- The client has requested the premature removal of orthodontic appliances due to extenuating circumstances including, but not limited to, the following:
  - Incarceration.
  - Mental health complications with a recommendation from the treating physician.
  - Foster care placement.
  - Child of a migrant farm worker. With the intent to complete orthodontic treatment at a later date if Medicaid eligibility for orthodontic services continues.
• Special medical conditions.

**Note:** If comprehensive orthodontic services are terminated due to extenuating circumstances, clients will be eligible for completion of their Medicaid orthodontic services if the services are re-initiated while the client is eligible for Medicaid.

The requesting provider will be responsible for removal of the orthodontic appliances, final records, and fabrication and delivery of orthodontic retainers at the time of premature removal or at any future time should the client present to the treating provider’s office.

### 4.2.32.3.7 Transfer of Services

Prior authorization that is issued to a provider for orthodontic services is not transferable to another provider. The new provider must request a new prior authorization to complete the orthodontic treatment that was initiated by the original provider. The original prior authorization will be end-dated when services are transferred to another provider.

The new provider must obtain his or her own records, and the new request for orthodontic services must include the date of service on which the documentation was obtained (the date of service on which the records were produced) and the following supporting documentation:

- All of the documentation that is required for the original request

**Note:** Photographs may be substituted for models.

- The reason the client left the previous provider
- An explanation of the treatment status

The authorization request for clients who are undergoing orthodontic treatment services and subsequently become eligible for Medicaid are subject to the same requirements.

### 4.2.32.3.8 Orthodontic Cases Initiated Through a Private Arrangement

Authorization may be given for continuation of orthodontic cases for clients who initiated orthodontic treatment through a private arrangement before becoming eligible for Medicaid.

Authorization will not be given for continuation of orthodontic cases for clients who initiated orthodontic treatment through a private arrangement and were eligible for Medicaid at the start of service.

### 4.2.33 THSteps and ICF/ID Dental Prior Authorization

Submit claims, dental correspondence, and THSteps and ICF/ID prior authorization requests to the appropriate address listed in the table below:

<table>

### 4.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including dental services. Dental services are subject to retrospective review and recoupment if documentation does not support the service submitted for payment.
The provider must educate all staff members, including dentists, about the following documentation requirements and charting procedures:

- For THSteps and ICF/ID dental claims, providers are not required to submit preoperative and postoperative radiographs unless these are specifically requested by HHSC, the TMHP Dental Director, or are needed for prior authorization or pre-payment review.

- Documentation of all restorative, operative, crown and bridge, and fixed and removable prosthodontics procedures must support the services that were performed and must demonstrate medical necessity that meets the professional standards of health care that are recognized by TSBDE. Documentation must include appropriate pretreatment, precementation and postcementation radiographs, study models and working casts, laboratory prescriptions, and invoices. Documentation must include the correct DOS. A panoramic radiograph without additional bitewing radiographs is considered inadequate as a diagnostic tool for caries detection. OIG may retrospectively recoup payment if the documentation does not support the services submitted for payment.

- All documentation must be maintained in the client’s record for a period of five years to support the medical necessity at the time of any post-payment utilization review. All documentation, including radiographs, must be of diagnostic and appropriate quality.

- In any situation where radiographs are required but cannot be obtained, intraoral photographs must be in the chart.

- Any complications, unusual circumstances encountered, morbidity, and mortality must be entered as a complete narrative in the client’s record.

- A provider must maintain a minimum standard of care through appropriate and adequate records, including a current history, limited physical examination, diagnosis, treatment plan, and written informed consent as a reasonable and prudent dentist would maintain. These records, as well as the actual treatment, must be in compliance with all state statutes, the Dental Practice Act, and the TSBDE Rules.

- Documentation for endodontic therapy must include the following: the medical necessity, pretreatment, during treatment, and post-treatment periapical radiographs, the final size of the file to which the canal was enlarged, and the type of filling material used. Any reason that the root canal may appear radiographically unacceptable must be entered in the chart. Endodontic therapy must be in compliance with the American Association of Endodontists quality assurance guidelines.

- Documentation for most periodontal services requires a six-point per tooth depth of pocket charting, a complete mouth series of periapical and bitewing radiographs, and any other narratives or supporting documentation consistent with the nationally accepted standards of care of the specialty of periodontics, and which conform to the minimum standard of care for periodontal treatment required of Texas dentists. A panoramic radiograph without additional bitewing or periapical radiographs is considered inadequate for diagnosis of periodontal problems.

- Documentation for surgical procedures requiring a definitive diagnosis for submitting a claim for a specific CDT code necessitates that a pathology report and a written record of clinical observations be present in the chart, together with any appropriate radiographs, operative reports, and appropriate supporting documentation. All impactions, surgical extractions, and residual tooth root extractions require appropriate preoperative periapical or panoramic radiographs (subject to limitations) be present in the chart.

- Any documentation requirements or limitations not mentioned in this manual that are present in the CDT are applicable. The written documentation requirements or limitations in this manual supercede those in the CDT.
4.3.1 General Anesthesia
The dental provider is required to maintain the following documentation in the client’s dental record:

- The medical evaluation justifying the need for anesthesia
- Description of relevant behavior and reference scale
- Other relevant narratives justifying the need for general anesthesia
- Client’s demographics, including date of birth
- Relevant dental and medical history
- Dental radiographs, intraoral/perioral photography, or diagram of dental pathology
- Proposed dental plan of care
- Consent signed by parent or guardian giving permission for the proposed dental treatment and acknowledging that the reason for the use of IV sedation or general anesthesia for dental care has been explained
- Completed Criteria for Dental Therapy Under General Anesthesia form
- The parent or guardian dated signature on the Criteria for Dental Therapy Under General Anesthesia form attesting that they understand and agree with the dentist’s assessment of their child’s behavior
- Dentist’s attestation statement and signature, which may be put on the bottom of the Criteria for Dental Therapy Under General Anesthesia form or included in the record as a stand alone form

4.3.2 Orthodontic Services
Requests for orthodontic services must be accompanied by all of the following documentation:

- An orthodontic treatment plan. The treatment plan must include all procedures required to complete full treatment (e.g., extractions, orthognathic surgery, upper and lower appliance, monthly adjustments, anticipated bracket replacements, appliance removal if indicated, special orthodontic appliances). The treatment plan should incorporate only the minimal number of appliances required to properly treat the case. Requests for multiple appliances to treat an individual arch are reviewed for duplication of purpose.
- Diagnostic models.
- Cephalometric radiograph with tracings.
- Completed and scored HLD sheet with diagnosis of Angle class (a minimum of 26 points is required for consideration of approval of non cleft palate cases).
- Facial photographs.
- Full series of radiographs or a panoramic radiograph; diagnostic-quality films are required (copies are preferred and will not be returned to the provider).
- Any additional pertinent information as determined by the dentist or requested by TMHP’s Dental Director. Requests for crossbite therapy require the submission of diagnostic models to receive authorization. Providers must maintain documentation in the client’s record that demonstrates the following criteria:
  - Posterior teeth. Not end-to-end, but buccal cusp of upper teeth should be lingual to buccal cusp of lower teeth.
  - Anterior teeth. The incisal edge of upper should be lingual to the incisal of the opposing arch.

The dentist should be certain that radiographs, photographs, and other information are properly packaged to avoid damage. TMHP is not responsible for lost or damaged materials.
Refer to: Form CH.12, “THSteps Dental Mandatory Prior Authorization Request Form” in this handbook.

4.4 Utilization Review
HHSC or a designated entity may conduct utilization reviews through automated analysis of a provider’s pattern(s) of practice, including peer group analysis. Such analysis may result in a subsequent on-site utilization review. HHSC or its claims processing contractor may conduct utilization reviews at the direction of the Office of Inspector General (OIG), according to HHSC rules.

DSHS may also conduct dental utilization reviews of randomly selected THSteps dental providers. These reviews compare Medicaid dental services that have been reimbursed to a dental provider to the results of an oral examination of the client as conducted by DSHS regional dentists.

Refer to: 25 TAC, §33.72 for more information about utilization review.

4.5 Claims Filing and Reimbursement

4.5.1 Reimbursement
The Medicaid rates for dentists are calculated as access-based fees in accordance with 1 TAC §§355.455(b), 355.8081, 355.8085, and 355.8441(11). Providers can refer to the online fee lookup (OFL) or the applicable fee schedule on the TMHP website at www.tmhp.com.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/pages/topics/rates.aspx.

4.5.2 Third Party Resources (TPR)
For THSteps and ICF/ID dental claims, TMHP is responsible for determining if a TPR exists and for recouping payment from the TPR.

THSteps providers are not required to bill other insurance before billing Medicaid. If the provider is aware of other insurance, however, the provider must choose whether or not to bill the other insurance. The provider has the following options:

- If the provider chooses to bill the other insurance, the provider must submit the claim to the client’s other insurance before submitting the claim to Medicaid.
- If the provider chooses to bill Medicaid and not the client’s other insurance, the provider is indicating that he or she accepts the Medicaid payment as payment in full. Medicaid then has the right to recovery from the other insurance. The provider does not have the right to recovery and cannot seek reimbursement from the other insurance after Medicaid has made payment.
- If the provider learns that a client has other insurance coverage after Medicaid has paid a claim, the provider must refund the payment to Medicaid before billing the other insurance.

Refer to: Section 6: Claims Filing (Vol. 1, General Information).

4.5.3 Claim Submission After Loss of Eligibility
The Texas Medicaid 95-day filing deadline applies to all THSteps and ICF/ID dental services. If a client has lost Medicaid eligibility or turned 21 years of age, continue to file claims for services provided on the DOS the client was eligible. Indicate the actual DOS on the claim form, and enter the authorization number in the appropriate block on each claim filed.

4.5.4 Claims Information

Dental services must be submitted to TMHP in an approved electronic format or on the ADA Dental Claim Form. Providers may purchase ADA Dental claim forms from the vendor of their choice. TMHP does not supply the forms. A sample of the ADA Dental Claim form can be found on the ADA website at www.ada.org/7119.aspx.

When completing an ADA Dental claim form, all required information must be included on the claim, as TMHP does not key information from attachments. Superbills or itemized statements are not accepted as claim supplements.

All THSteps and ICF/ID claims must be received by TMHP within 95 days from each DOS and submitted to the following address:

Texas Medicaid & Healthcare Partnership
PO Box 200555
Austin, TX 78720-0555

Claims for emergency, orthodontic, or routine dental services must each be filed on separate forms. A claim submitted for either emergency or orthodontic services must be identified as such in Block 35 (Remarks) of the claim form.

A THSteps and ICF/ID dental provider cannot submit claims to Texas Medicaid under his individual performing provider identifier for the services provided by one or more associate dentists practicing in his office as employees or independent contractors with specific employer-employee or contractual relationships. All dentists providing services to Medicaid clients must enroll as THSteps dental providers regardless of employer relationships. The individual provider submitting claims may be reimbursed into a single accounting office to maintain these described relationships.

Claims submitted by newly-enrolled providers must be received within 95 days of the date the new provider identifier is issued, and within 365 days of the DOS.

Providers should submit claims to Texas Medicaid for their usual and customary fees.

Claims for dental services provided to children in foster care must be filed with DentaQuest, the dental claims processor for Superior HealthPlan.

Refer to: Subsection 4.2.5.2, “Children in Foster Care” in this handbook.

Claims must not be submitted to Texas Medicaid for appointments missed by clients. A client with Medicaid cannot be billed for failure to keep an appointment. Only claims for actual services rendered are considered for payment.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information).

Subsection 1.6.9, “Billing Clients” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).

4.5.5 Claim Appeals

A claim denied because of age restrictions or other limitations listed in the Medicaid dental fee schedule may be considered for reimbursement on appeal when client medical necessity is provided to the TMHP Dental Director.

All denied claim appeals (see Section 7: Appeals [Vol. 1, General Information]) must be submitted to TMHP with the exception of a request to waive late filing deadlines. TMHP does not have the authority to waive state or federal mandates regarding claim filing deadlines.
If, after all appeal processes at TMHP have been exhausted, the provider remains dissatisfied with TMHP’s decision concerning the appeal, the provider may file a complaint with the HHSC Claims Administrator Contract Management Unit.

Refer to: Subsection 7.3.1, “Administrative Claim Appeals” in Section 7, “Appeals” (Vol. 1, General Information).

Note: Providers must exhaust the appeals process with TMHP before filing a complaint to the HHSC Claims Administrator Contract Management Unit.

Refer to: Subsection 7.1.5, “Paper Appeals” in Section 7, “Appeals” (Vol. 1, General Information).

Providers may use one of three methods to appeal Medicaid claims to TMHP: telephone (AIS), paper, or electronic.

All appeals of denied claims or requests for adjustments on paid claims must be received by TMHP within 120 days of the date of disposition of the R&S Report on which the claim appears. If the 120-day appeal deadline falls on a weekend or TMHP-recognized holiday, the deadline will be extended to the next business day.

Certain claims must be appealed on paper; they cannot be appealed either electronically or by telephone.

Refer to: Subsection 7.1.5, “Paper Appeals” in Section 7, “Appeals” (Vol. 1, General Information) for information about appeals that may not be appealed electronically and claims that may not be appealed through AIS.

To appeal in writing:

If a claim cannot be appealed electronically or by telephone, appeal the claim on paper by completing the following steps:

1) Provide a copy of the R&S Report page where the claim is reported.
2) Circle one claim per R&S Report page.
3) Identify the information that was incorrectly provided and note the correct information that should be used to appeal the claim. If necessary, specify the reason for appealing the claim.
4) Attach radiographs or other necessary supporting documentation.
5) If available, attach a copy of the original claim. Claim copies are helpful when the appeal involves dental policy or procedure coding issues.
6) Do not copy supporting documentation on the opposite side of the R&S Report.
7) It is strongly recommended that providers submitting paper appeals retain a copy of the documentation being sent. It is also recommended that paper documentation be sent via certified mail with a return receipt requested to establish TMHP’s receipt of the claim and the date the claim was received. The provider is urged to retain copies of multiple claim submissions if the Medicaid provider identifier is pending.

Note: Claims submitted by newly-enrolled providers must be received within 95 days of the date the new provider identifier is issued, and within 365 days of the DOS.

8) Submit the paper appeal with supporting documentation and any radiographs and adjustment requests to the following address:

Texas Medicaid & Healthcare Partnership
Inquiry Control Unit
12357-B Riata Trace Parkway, Suite 100
Austin, TX 78727
To appeal by telephone:

1) Contact the Dental Line at 1-800-568-2460.
2) For each claim in question, have the R&S Report listing the claim and any supporting documents readily available.
3) Identify the claim submitted for appeal. The internal control number (ICN) will be requested.
4) Supply the information necessary to correct the claim, such as the missing tooth number or letter, the corrected procedure code, surface ID, or Medicaid number.

The appeal will appear as finalized or pending on the following week’s R&S Report.

Providers may also appeal electronically.

Electronic appeal submission is a method of submitting Texas Medicaid appeals using a personal computer. The electronic appeals feature can be accessed directly through the TMHP EDI Gateway or by using TexMedConnect. For additional information, contact the TMHP EDI Help Desk at 1-888-863-3638.

Electronic appeals can increase accuracy of claims processing, resulting in a more efficient case flow to the provider:

- Download and printout capabilities help maintain audit trails for the provider.
- Appeal submission windows can be automatically filled in with electronic R&S Report information, thereby reducing data entry time.

4.5.6 Frequently Asked Questions About Dental Claims

Q Why is routine dental treatment not a benefit when performed at the same visit as an emergency visit?
A The following are reasons routine dental treatment is not a benefit when performed at the same visit as an emergency visit:

- The purpose of an emergency claim is to allow the provider to treat a true emergency without the concern that routine dental procedures may be denied.
- Medicaid program policy guidelines do not allow payment for both emergency and routine services to the same provider at the same visit. True emergency claims process through the audit system correctly when “emergency” is checked on either the paper or electronic claim and the Remarks or Narrative section of the claim form describes the nature of the emergency.

Q Why are some claims for oral exams and emergency exams on the same date for the same client denied?
A Medicaid program policy does not allow claims for an initial oral exam and an emergency exam to be submitted for the same DOS for the same client. An emergency exam performed by the same provider in the same six-month time period as an initial exam may be considered for reimbursement only when the claim for the emergency exam indicates it is an emergency and the emergency block is marked and the Remarks or Narrative section is completed. If the claim is not marked as an emergency, the claim will be denied.

Q How are orthodontic bracket replacements reimbursed? Can the client be charged for bracket replacements?
A The provider must use orthodontic procedure code D8690 to claim reimbursement for bracket replacement. Medical necessity must be documented in the client record. Payment is subject to retrospective review. The client with current Medicaid eligibility must not be charged for bracket replacement. If the provider charges the client erroneously, the provider must refund any amount paid by the client.
Q Why could an appeal of a denied claim take a long time?
A An appeal can take a long time if TMHP is required to research the denied claim and determine the reason the claim did not go through the system. For faster results, providers should submit appeals as soon as possible and not use the entire 120 days allowed to submit the appeal. The following are guidelines on filing claims efficiently:

- Use R&S Report dates to track filed claims.
- File claims electronically through TMHP EDI. Electronic claims submission does not allow a claim with an incorrect date to be accepted and processed, which saves time for the provider submitting claims and TMHP in processing claims. Call 1-888-863-3638, for more information about TMHP EDI.
- File claims with the correct information included. Most denied claims result from the omission of dates, signature, or narrative, or incorrect ID numbers such as client Medicaid numbers or provider identifiers.

Q Why are only ten appeals allowed per call?
A There is a limit on appeals per call to allow all providers equal access.

Q Why do reimbursement checks sometimes take a long time to arrive?
A Reimbursement may be delayed if a provider fails to submit claims in a timely manner.

Q Does electronic claims submission result in delayed payment?
A No. Providers who submit claims electronically report faster results than when submitting claims on paper. Providers are encouraged to use TMHP EDI for claims submission.

The following are helpful hints to a more efficiently processed claim:

- Ensure the provider identifier is on all claims.
- Include the performing provider’s signature on all paper claims.
- Verify client eligibility for procedures.
- Verify if the procedure code requires a narrative on the claim; the narrative is for medical necessity.
- Include the required client information, including name, birth date, and client number.
- Dental auxiliary staff (i.e., the hygienist or the chairside assistant) cannot enroll in Texas Medicaid; therefore, they cannot submit claims to Texas Medicaid. Any procedure performed by the auxiliary must be submitted by the supervising dentist, using the dentist’s provider identifier.

Claim Submission Reminders:

- Procedure code D8660 is allowed at different age levels, per provider. If a claim for procedure code D8660 is submitted within six months of procedure code D8080, procedure code D8080 will be reduced by the amount that was paid for procedure code D8660.
- Prior authorization is required with documentation of medical necessity when replacing lost or broken orthodontic retainers (procedure code D8680). Clients may not be billed for covered services.
- Prior authorization of orthodontic services is nontransferable. If a client changes an orthodontic provider for any reason, or a provider ceases to be a Medicaid provider, the new orthodontic services provider must submit a separate request for prior authorization. The provider requesting and receiving authorization for the service also must perform the service and submit the claim. Codes listed on the authorization letters are the only codes considered for payment. All other codes submitted for payment are denied. Providing the authorization number on the submitted claim results in more efficient claims processing.
• General anesthesia (provided in the dentist office, ambulatory service clinic, and inpatient/outpatient hospital settings) does not require prior authorization, unless the client does not meet the minimum required points for general anesthesia in subsection 4.2.25.1, “Criteria for Dental Therapy Under General Anesthesia” in this handbook. All THSteps dental charts for dental general anesthesia are subject to retrospective, random review for compliance with the Criteria for Dental Therapy Under General Anesthesia and requirements for chart documentation.

• Providers must not bill a client unless a formal denial for the requested item or service has been issued by TMHP stating the service is not a benefit of Texas Medicaid and the client has signed the Client Acknowledgment Statement in advance of the service being provided for that specific item or service. A provider must not bill Medicaid clients if the provided service is a benefit of Texas Medicaid.

Refer to: Subsection 1.6.9.1, “Client Acknowledgment Statement” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).

THSteps clients must receive:

• Dental services specified in the treatment plan that meet the standards of care established by the laws relating to the practice of dentistry and the rules and regulations of the TSBDE.

• Dental services that are free from abuse or harm from the provider or the provider’s staff.

• Only the treatment required to address documented medical necessity that meets professionally recognized standards of health care.

5. THSTEPS MEDICAL

5.1 THSteps Medical and Dental Administrative Information

5.1.1 Overview

This section describes the administrative requirements for THSteps, including provider requirements, client eligibility requirements, and billing and claims processing information. Providers that need additional information may call 1-800-757-5691 or refer to Appendix F: THSteps Quick Reference Guide in this handbook for a more specific list of resources and telephone numbers. Providers may also contact the Texas Department of State Health Services (DSHS) THSteps Provider Relations staff located in DSHS regional offices by calling the appropriate regional office as listed in Appendix A: State and Federal Offices Communication Guide (Vol. 1, General Information). THSteps Provider Relations contact information is also available on the DSHS website at www.dshs.state.tx.us/thsteps/regions.shtml. THSteps has developed online educational modules to provide additional information about the program, components of the medical checkup, and other information. These modules provide free continuing education hours for a variety of providers. Providers do not have to be enrolled in THSteps. These courses may be accessed at www.txhealthsteps.com.

The Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) service is Medicaid’s comprehensive preventive child health service for clients who are birth through 20 years of age. In Texas, EPSDT is known as THSteps. EPSDT was defined by federal law as part of the Omnibus Budget Reconciliation Act (OBRA) of 1989 and includes periodic screening, vision, hearing, and dental preventive and treatment services. The periodic screening for a checkup consists of five federally required components as noted on the THSteps Periodicity Schedule. In addition, Section 1905(r)(5) of the Social Security Act (SSA) requires that any medically necessary health-care service listed in the Act be provided to EPSDT clients even if the service is not available under the state’s Medicaid plan to the rest of the Medicaid population. A service is medically necessary when it corrects or ameliorates the client’s disability, physical or mental illness, or chronic condition. These additional services are available through CCP. For questions about coverage, providers can call CCP at 1-800-846-7470.
5.1.2 Statutory Requirements

Several specific legislative requirements affect THSteps and the providers participating in the program. These include, but are not limited to, the following:

- Newborn Screening, Health and Safety Code, Chapter 33, Section §33.011 Newborn Screening Test Requirement.
- Requirements for Reporting Abuse or Neglect, as outlined in subsection 1.6.1, “Compliance with Texas Family Code” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information).
- Early Childhood Intervention (ECI), 34 Code of Federal Regulations (CFR) Part 303; Chapter 73, Texas Human Resources Code, and Title 40 TAC, Chapter 108.
- Newborn Hearing Screening, Health and Safety Code, Chapter 47.
- Teen Confidentiality Issues. There are many state statutes that may affect consent to medical care for a minor, depending on the facts of the situation. Among the relevant statutes are Chapters 32, 33, 153, and 266 of the Texas Family Code. Providers may want to consult an attorney, their licensing board, or professional organization if guidance is needed or questions arise on matters of medical consent.

Refer to: Appendix D: Texas Health Steps Statutory State Requirements of this handbook for more information.

5.1.3 Texas Vaccines for Children (TVFC) Program

The TVFC program provides free vaccines that are recommended according to the Recommended Childhood and Adolescent Immunization Schedule (Advisory Committee on Immunization Practices [ACIP], AAP, and the American Academy of Family Physicians [AAFP]). Medicaid does not reimburse for vaccines/toxoids that are available from TVFC. THSteps providers must enroll in TVFC at DSHS to obtain free vaccines for clients who are birth through 18 years of age. Providers may not charge Texas Medicaid for the cost of the vaccines obtained from TVFC; however the administration fee, not to exceed $14.85, is considered for reimbursement.

When single antigen vaccine(s)/toxoid(s) or comparable antigen vaccine(s)/toxoid(s) are available for distribution through TVFC, but the provider chooses to use an ACIP-recommended product that is not distributed through TVFC, the vaccine/toxoid will not be covered; however, the administration fee will be considered.

Note: Administered vaccines/toxoids must be reported to DSHS. DSHS submits all vaccines/toxoids reported with parental consent to a centralized repository of immunization histories for clients younger than 18 years of age. This repository is known in Texas as ImmTrac.

For additional information about immunizations, providers can refer to the THSteps online educational module “Immunization” at www.txhealthsteps.com.

Refer to: Appendix B: Immunizations in this handbook.

Form CH.39, “TVFC Provider Enrollment (3 Pages)” in Appendix A, “THSteps Forms,” in this handbook for more information about enrolling as a TVFC provider.
5.1.4 Vaccine Adverse Event Reporting System (VAERS)

The National Childhood Vaccine Injury Act (NCVIA) of 1986 requires health-care providers to report:

- Any reaction listed by the vaccine manufacturer as a contraindication to subsequent doses of the vaccine.
- Any reaction listed in the Reportable Events Table that occurs within the specified time period after vaccination.

NCVIA requires health-care providers to report certain adverse events that occur following vaccination. As a result, VAERS was established by CDC and FDA in 1990. VAERS provides a mechanism for the collection and analysis of adverse events (side effects) associated with vaccines currently licensed in the United States. Adverse events are defined as health effects that occur after immunization that may or may not be related to the vaccine. VAERS data are monitored continually to detect unknown adverse events or increases in known side effects.

A copy of the Reportable Events Table can be obtained by calling VAERS at 1-800-822-7967 or by downloading it from www.dshs.state.tx.us/immunize/forms/vaers_table.pdf.

Clinically significant adverse events should be reported even if it is unclear whether a vaccine caused the event. For additional information about NCVIA, providers can refer to www.dshs.state.tx.us/immunize/forms/11-11246.

5.1.5 * Referrals for Medicaid-Covered Services

When a provider performing a checkup determines that a referral for diagnosis or treatment is necessary for a condition found during the medical checkup, that information must be discussed with the parents or guardians. A referral must be made to a provider who is qualified to perform the necessary diagnosis or treatment services. If the performing provider is competent to treat the condition found, a referral elsewhere is not necessary, unless it is to the primary care provider to assure continuity of care.

Providers that need assistance finding a specialist who accepts clients with Medicaid coverage can call the THSteps toll-free helpline at 1-877-847-8377, or they can find one using the Online Provider Lookup on the TMHP website at www.tmhp.com.

Continuity of care is an important aspect of providing services and follow-up. Efforts should be made to determine that the appointment was kept and that the provider who received the referral has provided a diagnosis and recommendations for further care to the referring provider.

In addition to referrals for conditions discovered during a checkup or for specialized care, the following referrals may be used:

- **Hearing Services referrals.** If the hearing screening returns abnormal results, clients who are birth through 20 years of age must be referred to a Texas Medicaid provider who is an audiologist or physician who is experienced with the pediatric population and who offers auditory services.

- **Routine Dental Referrals.** The provider must refer clients to establish a dental home beginning at 6 months of age or earlier if trauma or early childhood caries are identified. For established clients after the 6-month medical checkup visit, the provider must confirm if a dental home has been established and is ongoing; if not, additional referrals must be made at subsequent medical checkups until the parent or caregiver confirms that a dental home has been established for the client. Clients who
are birth through 5 months of age are not eligible for routine dental checkups but should be referred to a dentist if any dental issues are identified during a THSteps medical checkup visit or acute care visit. When possible, clients should be referred to a provider who has completed the required benefit education and is certified by the DSHS Oral Health Program to perform First Dental Home services. The First Dental Home provider may be located through the advanced search function in the Online Provider Look Up or by calling 1-877-847-8377.

- **Referrals for Dental Treatment.** If a THSteps medical provider identifies the medical necessity of dental services, the provider must refer the client to a THSteps dental provider. The THSteps medical provider can accomplish this by providing the parent or guardian a listing of THSteps dentists from the Online Provider Lookup. The parent or guardian can receive assistance in locating a THSteps dentist and assistance with scheduling of dental appointments by contacting the THSteps toll-free helpline at 1-877-847-8377. Clients who are birth through 5 months of age also can be seen for emergency dental services by the dentist at any time for trauma, early childhood caries, or other oral health problems. Clients who are birth through 20 years of age may self-refer for dental care.

- **Emergency Dental Referrals.** If a medical checkup provider identifies an emergency need for dental services, such as bleeding, infection, or excessive pain, the client may be referred directly to a participating dental provider. Emergency dental services are covered at any time for all Medicaid clients who are birth through 20 years of age.

  **Note:** Assistance in coordinating dental referrals can be obtained from the THSteps toll-free helpline at 1-877-847-8377 or the DSHS Regional THSteps Coordinator for the respective region (lists are provided in Appendix A: State and Federal Offices Communication Guide (Vol. 1, General Information). In cases of both emergency and nonemergency dental services, clients are able to make a choice when selecting a dental provider who is participating in the THSteps Dental Program.

- **Family Planning and Genetic Services Referrals.** For clients eligible for Medicaid who need genetic services or family planning services, a referral should be made. Information about Medicaid-covered genetic services is available in the Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks) and information about family planning services is available in Section 2, “Medicaid Title XIX family planning services” in the Gynecological and Reproductive Health and Family Planning Services Handbook (Vol. 2, Provider Handbooks). If a THSteps medical provider also provides family planning, the provider may inform clients that these services are available.

- **ECI Referrals.** Federal and state law requires providers to refer children as soon as possible, but no longer than 7 days after identification of a suspected developmental delay or disability to the local ECI program for children who are birth through 35 months of age regardless if a referral was made to another qualified provider. The provider may call the local ECI Program or the DARS Inquiries Line at 1-800-628-5115 to make referrals. Children who are 3 years of age and older with a suspected developmental delay or disability should be referred to the local school district.

- **WIC Referrals.** Clients who are birth through 5 years of age or who are pregnant are eligible for WIC and should be referred to WIC for nutrition education and counseling, and food benefits.

Refer to: Section 1, “General Information” in the Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks) for more information about referrals.

### 5.1.6 THSteps Medical Checkup Facilities

All THSteps medical checkup policies apply to checkups completed in a physician’s office, a health department, clinic setting, or in a mobile/satellite unit. Enrollment of a mobile/satellite unit must be under a physician or clinic name. Mobile units can be a van or any area away from the primary office and are considered extensions of that office and are not separate entities.

The physical setting must be appropriate so that all elements of the checkup can be completed.
Refer to: Subsection 5.3.8, "THSteps Medical Checkups Periodicity Schedule" in Section 5 of this handbook for information on the THSteps Periodicity Schedule.

Subsection 5.3.9, "Mandated Components" in Section 5 of this handbook for additional information on checkup components.

5.1.7 THSteps Dental Services

Access to THSteps dental services is mandated by Texas Medicaid and provides reimbursement for the early detection and treatment of dental health problems, including oral health preventive services, for Medicaid clients who are birth through 20 years of age. THSteps dental service standards are designed to meet federal regulations and to incorporate the recommendations of representatives of national and state dental professional groups.

OBRA 1989 mandated the expansion of the federal EPSDT program to include any service that is medically necessary and for which FFP is available, regardless of the limitations of Texas Medicaid. This expansion is referred to as CCP.

Refer to: Section 2, “Medicaid Children’s Services Comprehensive Care Program (CCP)” in this handbook for more information.

THSteps-designated staff (HHSC, DSHS, or its designee), through outreach and education, encourage the parents or caregivers of eligible clients to use THSteps dental checkups and preventive care when clients first become eligible for Medicaid and each time clients are due for their next periodic dental checkup.

Upon request, THSteps-designated staff (HHSC, DSHS, or its designee) assist the parents or caregivers of eligible clients with scheduling appointments and transportation. Medicaid clients have freedom of choice of providers and are given names of enrolled providers. Call the THSteps toll-free helpline at 1-877-847-8377 for a list of THSteps dental providers in a specific area.

For additional information about dental health, providers can refer to the THSteps online educational modules "Oral Health For Primary Care Providers" and "Oral Health Examinations for Dental Professionals" at www.txhealthsteps.com.

5.2 Enrollment

5.2.1 THSteps Medical Provider Enrollment

Providers cannot be enrolled if their professional license is due to expire within 30 days of application. Facility providers must submit a current copy of the supervising practitioner’s license. To provide Medicaid services, each NP or CNS must be licensed as an RN and be recognized as an APRN by Texas BON.

Refer to: Subsection 1.1, “Provider Enrollment” in Section 1, “Provider Enrollment and Responsibilities” (Vol. 1, General Information) for information about enrollment procedures.

The following provider types may provide THSteps preventive services within his or her scope of practice and must also be enrolled in Texas Medicaid and as a THSteps provider:

- A physician (doctor of medicine [M.D.] or doctor of osteopathy [D.O.]) or physician group
- A physician assistant (PA)
- A clinical nurse specialist (CNS)
- A nurse practitioner (NP)
- A certified nurse midwife (CNM)
- A federal qualified health center (FQHC)
- A rural health clinic (RHC)
• A health-care provider or facility with physician supervision including, but not limited to:
  • Community-based hospital and clinic
  • Family planning clinic
  • Home health agency
  • Local or regional health department
  • Maternity clinic
  • Migrant health center
  • School-based health center

**Medical Residents** – Medical residents may provide medical checkups in a teaching facility under the personal guidance of the attending staff as long as the facility’s medical staff by-laws and requirements of the Graduate Medical Education (GME) Program are met, and the attending physician has determined the intern or resident to be competent in performing these functions. THSteps does not require the supervising physician to examine the client as long as these conditions are met.

**Clinics** – In a clinic, a physician is not required to be present at all times during the hours of operation unless otherwise required by federal regulations. A physician must assume responsibility for the clinic’s operation.

**5.2.1.1 Requirements for Registered Nurses Who Provide Medical Checkups**

RNs without a CNS, NP, or CNM recognition as an APRN by the Texas BON may provide medical checkups only under direct physician supervision, meaning the physician is either on site during the checkup or immediately available to furnish assistance and direction to the RN during the checkup.

Required online education modules developed by THSteps must be completed prior to providing checkup services. All modules are approved for continuing education units (CEUs) for RNS as well as other medical disciplines. Required THSteps online education modules may be accessed at www.txhealthsteps.com. The RN or the RN’s employer must maintain documentation that the required modules were completed. Required modules include:

• Adolescent Health Screening
• Behavioral Health: Screening and Intervention
• Case Management Services in Texas
• Cultural Competence
• Developmental Surveillance and Screening
• Hearing and Vision Screening
• Immunization
• Introduction to the Medical Home
• Management of Overweight and Obesity in Children and Adolescents
• Newborn Hearing Screening
• Newborn Screening
• Nutrition
• Oral Health for Primary Care Providers
• Texas Health Steps: Overview
• Texas Medicaid Services for Children
• Using Developmental Screening Tools

Online modules are updated regularly to include new content. RNs that have completed the required modules previously are encouraged, but not required to retake online modules.

Before a physician delegates a THSteps checkup to an RN, the physician must establish the RN’s competency to perform the service as required by the physician’s scope of practice. The delegating physician is responsible for supervising the RN who performs the services. The delegating physician remains responsible for any service provided to a client.

Refer to: Subsection 5.2.1, “THSteps Medical Provider Enrollment” in this handbook for more information about enrollment procedures.

5.3 Services, Benefits, Limitations, and Prior Authorization

5.3.1 Eligibility for THSteps Services and Checkup Due Dates

Through outreach, THSteps staff (DSHS, HHSC, or contractors) encourage clients to use THSteps preventive medical checkup services when they first become eligible for Medicaid and each time thereafter when they are periodically due for their next medical checkup. THSteps will send clients a letter when they are due for a medical checkup.

A client is eligible for THSteps services, including medical checkups, from birth through 20 years of age. The following applies:

• If the client turns 21 on the first day of the month, the client is no longer eligible for THSteps services.

• If the client turns 21 on the second day of the month or later, the client is eligible for THSteps services through the end of the month.

Although the Medicaid Eligibility Verification Letter (Form H1027) identifies eligible clients when the client’s Your Texas Benefits Medicaid card is lost or has not yet been issued, Form H1027 does not indicate if the client is due for medical checkup services. Providers can verify the client's eligibility through www.YourTexasBenefitsCard.com, TexMedConnect, or the TMHP Contact Center.

A client is due for a THSteps medical checkup based on his or her date of birth and the ages indicated on the periodicity schedule. Children younger than three years of age are due at frequent intervals. Children and youth three years of age and older are considered due for a checkup on their birthday and are encouraged to have a yearly checkup as soon as practical. In addition, for children enrolled in Medicaid managed care, a new member is due for a THSteps medical checkup as soon as practicable, but in no case later than 14 days of enrollment for newborns, and no later than 90 days of enrollment for all other eligible child members.

Managed care organizations are also required to assure existing members of their health plan eligibility requirements to receive timely medical checkups. A checkup for an existing member from birth through 35 months of age is timely if received within 60 days beyond the periodic due date based on the client’s birth date. For existing members 36 months of age and older, a checkup is due beginning on the child’s birthday and is considered timely if it occurs within 364 calendar days after the child’s birthday in a non-leap year or 365 days after the child’s birthday in a leap year. Checkups received before the periodic due date are not reportable as timely medical checkups. Providers should contact the appropriate MCO for further details.

Providers should schedule checkups based on the ages in the periodicity schedule, but circumstances may support the need for a checkup prior to the client’s birthday (for example, a 4-year checkup could be performed prior to the child’s 4th birthday if the child is a member of a migrant family that is leaving the area). THSteps fee-for-service policy creates this flexibility by allowing a total number of checkups at each age range.

Refer to: “Subsection 5.3.4, “* THSteps Medical Checkups” in this handbook for additional details.
Providers are encouraged to notify the client when they are due for the next checkup according to the THSteps periodicity schedule.

A checkup that is necessary more frequently than indicated on the periodicity schedule is considered an exception-to-periodicity.

Refer to: Subsection 5.3.5, “* Exception-to-Periodicity Checkups” in this handbook for additional details about billing for a checkup performed as an exception-to-periodicity checkup.

5.3.2 Verification of Medical Checkups

The first source of verification that a THSteps medical checkup has occurred is a paid claim or encounter. THSteps encourages providers to file a claim either electronically or on a CMS-1500 paper claim form as soon as possible after the date of service, as the paid claim updates client information. The provider may contact TMHP through the TMHP website at www.tmhp.com or AIS at 1-800-925-9126 to verify that the client is due for a checkup.

A second source of acceptable verification is a physician’s written statement that the checkup occurred. If the provider chooses to give the client written verification, it must include the client’s name, Medicaid ID number, date of the medical checkup, and a notation that a complete THSteps medical checkup was performed.

Note: Verification of medical checkups must not be sent to THSteps but must be maintained by the client to be provided as needed by an HHSC eligibility caseworker.

If neither the first nor the secondary source of verification is available, a THSteps outreach worker may contact the provider’s office for verification.

5.3.3 Medical Home

HHSC and DSHS encourage the provision of the THSteps medical checkup as part of a medical home. Texas Medicaid defines a medical home as a model of delivering care that is accessible, continuous, comprehensive, family-centered, and coordinated. In providing a medical home for the client, the primary care clinician directs care coordination together with the client or youth and/or family.

Medical checkup providers with mobile units should encourage the families to establish a medical home for their child(ren) and obtain future checkups from their primary care provider.

When a checkup is provided in the home setting, mobile unit, or clinic other than the medical home, it should be in coordination with the medical home and the results must be provided to the medical home as soon as possible.

A mobile unit is an extension of the provider’s office and must be able to provide a complete checkup.

For additional information on the medical home, providers can refer to the “Introduction to the Medical Home” module provided by THSteps at www.txhealthsteps.com.

5.3.4 * THSteps Medical Checkups

THSteps medical checkups reflect the federal and state requirements for a preventive checkup. Preventive care medical checkups are a benefit of the THSteps program if they are provided by enrolled THSteps providers and all of the required components are completed. An incomplete preventive medical checkup is not a benefit. The THSteps periodicity schedule specifies screening procedures required at each stage of the client’s life to ensure that health screenings occur at age-appropriate points in a client’s life.

Components of a medical checkup that have an available CPT code are not reimbursed separately on the same day as a medical checkup, with the exception of initial point-of-care blood lead testing, a tuberculin skin test (TST), developmental and autism screening, vaccine administration, and OEFV.

Note: Initial blood lead testing, other than point-of-care, must be sent to the DSHS Laboratory for testing.
Reminder: Incomplete medical checkups are subject to recoupment unless there is documentation supporting why a component was not completed.

Sports physical examinations are not a benefit of Texas Medicaid. If the client is due for a THSteps medical checkup and a comprehensive medical checkup is completed, a THSteps medical checkup may be reimbursed and the provider may complete the documentation for the sports physical.

Refer to: The THSteps Medical Checkups Periodicity Schedule which may be found at www.dshs.state.tx.us/thsteps/providers.shtm.

Checkups should be scheduled, to the extent possible, based on the ages on the periodicity schedule to accommodate the need for flexibility when scheduling checkup appointments.

The following table lists the number of visits allowed at each age range:

<table>
<thead>
<tr>
<th>Age Range</th>
<th>Number of Visits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Birth through 11 months (does not include 12 month checkup)</td>
<td>6</td>
</tr>
<tr>
<td>1 through 4 years</td>
<td>7</td>
</tr>
<tr>
<td>5 through 11 years</td>
<td>7</td>
</tr>
<tr>
<td>12 through 17 years</td>
<td>6</td>
</tr>
<tr>
<td>18 through 20 years</td>
<td>3</td>
</tr>
</tbody>
</table>

All of the checkups listed on the periodicity schedule were developed according to the recommendations of the AAP and in consultation with recognized authorities in pediatric preventive health. In Texas, the THSteps periodicity schedule may differ from the AAP periodicity schedule based on the scheduling of laboratory or other tests in federal EPSDT or state regulations.

For more information about conducting a THSteps checkup, providers can refer to the THSteps online educational modules at www.txhealthsteps.com.

The following table includes the procedure codes for checkups and the referral and condition indicators. Condition indicators must be used to describe the results of a checkup. A condition indicator must be submitted on the claim with the periodic medical checkup visit procedure code. Indicators are required whether a referral was made or not. If a referral is made, then providers must use the Y referral indicator. If no referral is made, then providers must use the N referral indicator.

<table>
<thead>
<tr>
<th>Procedure Codes</th>
<th>Referral Indicator</th>
<th>Condition Indication</th>
</tr>
</thead>
<tbody>
<tr>
<td>99381, 99382, 99383, 99384, and 99385 (new client preventive visit)</td>
<td>N (no referral given)</td>
<td>NU (not used)</td>
</tr>
<tr>
<td>-or- 99391, 99392, 99393, 99394, and 99395 (Established client preventive visit)</td>
<td></td>
<td></td>
</tr>
<tr>
<td>99381, 99382, 99383, 99384, and 99385 (new client preventive visit)</td>
<td>Y (yes THSteps or EPSDT referral was given to the client)</td>
<td>S2 (under treatment) or ST* (new services requested)</td>
</tr>
<tr>
<td>-or- 99391, 99392, 99393, 99394, and 99395 (established client preventive visit)</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

* The ST condition indicator should only be used when a referral is made to another provider or the client must be rescheduled for another appointment with the same provider. It does not include treatment initiated at the time of the checkup.

A checkup must be submitted with diagnosis code V202.
When performed for a THSteps preventive care medical checkup, procedure codes 99385 and 99395 are restricted to clients who are 18 through 20 years of age.

Modifier AM, SA, TD, or U7 must be submitted with the THSteps medical checkups procedure code to indicate the practitioner who performed the unclothed physical examination during the medical checkup.

<table>
<thead>
<tr>
<th>Modifier</th>
<th>Practitioner</th>
</tr>
</thead>
<tbody>

<tr>
<td>U7</td>
<td>Physician assistant</td>
</tr>
</tbody>
</table>

THSteps medical checkups performed in an FQHC or RHC setting are paid an all-inclusive rate per encounter, which includes immunizations, developmental screening, autism screening, TST, blood lead test, and oral evaluation and fluoride varnish. When submitting claims for THSteps checkups and services, RHC providers must use the national POS code 72, and FQHC providers must use modifier EP in addition to the modifiers used to identify who performed the medical checkup. In accordance with the federal rules for RHCs and FQHCs, an RN in an RHC or FQHC may not perform THSteps checkups independently of a physician’s interactions with the client.

Refer to: Section 4, “Federally Qualified Health Center (FQHC)” in the Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks) for information related to billing

Section 7, “Rural Health Clinic” in the Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks) for information related to billing.

Checkups, exception-to-periodicity checkups, and follow-up visits are limited to once per day any provider.

A checkup and the associated follow-up visit may not be reimbursed on the same date of service. The follow-up visit will be denied.

An incomplete checkup is subject to recoupment unless there is documentation to support why the component was not completed as part of the checkup.

A new patient is one who has not received any professional services within the preceding three years from the provider or from another provider of the same specialty who belongs to the same group practice. As an exception, a new preventive care medical checkup (procedure code 99381, 99382, 99383, 99384, or 99385) may be billed when no prior checkups have been billed by the same provider or provider group, even if an acute care new patient E/M service was previously performed by the same provider.

An additional new checkup is allowed only when the client has not received any professional services in the preceding three years from the same provider or another provider who belongs to the same group practice, because subsequent acute care visits to the new patient THSteps checkup continues the established relationship with the provider.

If the provider that performs the medical checkup provides treatment for an identified condition on the same day, the provider may submit a separate claim for an acute care established-client office visit. The separate claim must include the established-client procedure code that is appropriate for the diagnosis and treatment of the identified problem. Treatment of minor illnesses or conditions (e.g., follow-up of a mild upper respiratory infection) during the THSteps medical checkup may not warrant additional billing.
Acute Care Visits
If a new patient checkup has been billed within the preceding three years, subsequent checkups and acute care visits billed as new patient services will be denied when billed by the same provider or provider group.

For a client that is a new patient, both the acute care visit and checkup visit may be reimbursed on the same date of service by the same provider or provider group.

Providers must use modifier 25 to describe circumstances in which an acute care E/M visit was provided at the same time as a checkup. Providers must submit modifier 25 with the E/M procedure code when the rendered services are distinct and provided for a different diagnosis. Providers must bill an appropriate level E/M procedure code with the diagnosis that supports the acute care visit. The medical record must contain documentation that supports the medical necessity and the level of service of the E/M procedure code that is submitted for reimbursement.

An acute care E/M visit for an insignificant or trivial problem or abnormality billed on the same date of service as a checkup or exception-to-periodicity checkup is subject to recoupment.

Providers must bill an acute care visit with their acute care provider identifier on a separate claim.

5.3.5 Exception-to-Periodicity Checkups
Exception-to-periodicity checkups are complete medical checkups completed outside the timeframes listed in the THSteps Periodicity Schedule due to extenuating circumstances.

Exception-to-periodicity checkups are complete medical checkups, which are medically necessary and might cause the total number of checkups to exceed the number allowed for the client’s age range if the client were to have all regular scheduled checkups. An exception-to-periodicity checkup is allowed when:

- Medically necessary, for example, for a client with developmental delay, suspected abuse, or other medical concerns or a client in a high-risk environment, such as living with a sibling with elevated blood lead.
- Required to meet state or federal exam requirements for Head Start, day care, foster care, or preadoption.
- When needed before a dental procedure requiring general anesthesia.

As noted in the Periodic Checkup Age Range table, the number of checkups is set for each age range. This may avoid an exception-to-periodicity checkup and allow flexibility for the provider and family to schedule a checkup including before the child’s birthday.

If a client is due for a medical checkup, a checkup outside of the regular THSteps schedule must be billed as a regular checkup rather than an exception to periodicity.

The checkup is considered complete when all the required components are documented in the client’s medical record or supporting documentation, which details the reason a component(s) was not completed. A plan to complete the component(s) if not due to reasons of conscious or parental concerns must be included in the documentation.

**Note:** A sports physical is not a reason for an exception-to-periodicity checkup.

When billing for an exception-to-periodicity visit, provider must also include the most appropriate exception-to-periodicity modifiers. Claims for periodic THSteps medical checkups exceeding periodicity that do not include one for these modifiers will be denied as exceeding periodicity.

</tr>
</tbody>
</table>
CHILDREN’S SERVICES HANDBOOK

5.3.6 Follow-up Medical Checkup

Use procedure code 99211 with the THSteps provider identifier and THSteps benefit code when billing for a follow-up visit.

Note: Reimbursement may not be allowed for the follow-up visit when submitted with certain procedure codes.

A follow-up visit may be required to complete necessary procedures related to a THSteps medical checkup or exception-to-periodicity checkup, such as:

- Reading the TST.
- Administering immunizations in cases where the client’s immunizations were not up-to-date, medically contraindicated, or unable to be given on the initial visit.
- Collection of specimens for laboratory testing that were not obtained during the original THSteps medical checkup or the original specimen could not be processed.
- Completion of sensory or developmental screening that was not completed at the time of the THSteps medical checkup due to the client’s condition.

A return visit to follow up on treatment initiated during a checkup or to make a referral is not a follow-up visit, but is considered an acute care visit under an appropriate E/M procedure code for an established client.

If the parent or guardian did not give consent for a component during the initial checkup, and supporting documentation is provided, no follow-up visit is necessary.

5.3.7 Newborn Examination

Providers do not have to be enrolled as THSteps providers to bill newborn examination procedure codes 99460, 99461, or 99463.

Newborn examinations that are billed with procedure code 99460, 99461, or 99463 may qualify as a THSteps medical checkup when all required components are completed according to the THSteps Periodicity Schedule and documented in the medical record.

Providers must use their Medicaid provider identifier when billing newborn examination services.

Note: In Texas, the mandated newborn hearing screening and newborn screening test is included as part of the in-hospital newborn exam.

Providers billing these newborn codes are not required to be THSteps providers, but they must be enrolled as Medicaid providers. TMHP encourages THSteps enrollment for all providers that offer a medical home for clients and provide them with medical checkups and immunizations. Physicians and

</thead>
<tbody>
<tr>
<td>23</td>
<td>Unusual Anesthesia: Occasionally, a procedure that usually requires either no anesthesia or local anesthesia must be done under general anesthesia because of unusual circumstances. This circumstance may be reported by adding the modifier “23” to the procedure code of the basic service.</td>
</tr>
<tr>
<td>32</td>
<td>Mandated Services: Services related to mandated consultation or related services (e.g., PRO, third party payer, governmental, legislative, or regulatory requirement) may be identified by adding the modifier “32” to the basic procedure.</td>
</tr>
</tbody>
</table>

THSteps medical exception-to-periodicity services must be billed with the same procedure codes, provider type, modifier, and condition indicators as a medical checkup. Additionally, providers must use modifiers 23, 32, and SC to indicate the exception.
hospital staff are encouraged to inform parents eligible for Medicaid that the next THSteps checkup on
the periodicity schedule should be scheduled from discharge to five days of age and that regular
checkups should be scheduled during the first year and after.

Refer to: Subsection 9.2.46, “Newborn Services” in the Medical and Nursing Specialists, Physicians,
and Physician Assistants Handbook (Vol. 2, Provider Handbooks) for additional inform-
ation on inpatient newborn services.

The THSteps online education module “Newborn Hearing Screening” on the THSteps
website at www.txhealthsteps.com for additional information about conducting a newborn
hearing screen.

5.3.8 THSteps Medical Checkups Periodicity Schedule
The client is periodically eligible for medical checkup services based on the THSteps Medical Checkups
Periodicity Schedule. All the checkups listed on the periodicity schedule have been developed based on
recommendations of the AAP and recognized authorities in pediatric preventive health. In Texas,
THSteps has modified the AAP periodicity schedule based on the scheduling of a laboratory or other test
in federal EPSDT or state regulations.

The THSteps Medical Checkups Periodicity Schedule is available on the DSHS website at
www.dshs.state.tx.us/thsteps/providers.shtm.

5.3.9 Mandated Components
THSteps medical checkups must include regularly scheduled examinations and screenings of the general
physical and mental health, growth, development, and nutritional status of infants, children, and youth.

The following federal and state mandated components must be documented in the client’s medical
record for the checkup to be considered complete:
- Comprehensive health and developmental history, including physical and mental health
development
- Comprehensive unclothed physical examination
- Immunizations appropriate for age and health history
- Laboratory test appropriate to age and risk, including lead toxicity at specific federally-mandated
ages
- Health education including anticipatory guidance
- Dental referral

The client’s medical record must include documentation to support the rationale a component was not
completed, and a plan to complete the component(s) if not due to parent or caregiver concern or reasons
of conscience, including religious beliefs. THSteps provides optional clinical records to assist the
provider in the documentation of the required components. These forms may be found at
www.dshs.state.tx.us/thsteps/forms.shtm.

If the client has a condition that has been previously diagnosed and is currently receiving treatment, the
associated standardized screening may be omitted with proper documentation.

Documented test or screening results obtained within the preceding 30 days for clients who are two years
of age and younger, and the preceding 90 days for clients who are three years of age and older may be
used to meet the testing or screening requirements. Results must include the dates of service and one of
the following:
- A clear reference to the previous visit by the same provider
- Results obtained from another provider
5.3.9.1 Comprehensive Health and Developmental History

5.3.9.1.1 Nutritional Screening

Dietary practices must be evaluated at each checkup to identify and address nutritional issues or concerns.

5.3.9.1.2 * Developmental Surveillance or Screening

Developmental surveillance or screening is a required component of every checkup for clients who are birth through 6 years of age. Autism screening is required at 18 months of age.

As a THSteps medical service, developmental screening (procedure code 96110) or autism screening (procedure code 96110 with modifier U6) is limited to once per day, per client, by the same provider or provider group. This service will be denied unless submitted by the same provider or provider group for the same date of service as a checkup, exception-to-periodicity checkup, or follow-up visit if submitted more than one time per year outside of the checkup.

Standardized developmental screening is required at the ages listed in the table below. Providers must use one of the validated, standardized tools listed below when performing a developmental or autism screening. A standardized screen is not required at other checkups up to and including the 6-year checkup; however, developmental surveillance is required at these visits and includes a review of milestones (gross and fine motor skills, communication skills, speech-language development, self-help/care skills, and social, emotional, and cognitive development) and mental health and is not considered a separate service.

Providers may be reimbursed separately when using one of the required screening tools listed in the table below in addition to the checkup visit at specific age visits. THSteps requires one of the following required standardized tools at the following ages:

<table>
<thead>
<tr>
<th>Required Screening Ages and Recommended Tools</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Screening Ages</strong></td>
</tr>
<tr>
<td>---------------------</td>
</tr>
<tr>
<td>9 months</td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td>18 months</td>
</tr>
<tr>
<td>24 months</td>
</tr>
<tr>
<td>3 years</td>
</tr>
<tr>
<td>4 years</td>
</tr>
</tbody>
</table>

If a developmental or autism screening that is required in the Required Screening Ages and Recommended Tools table is not completed during a checkup, the provider must document the reason why the screening was unable to be completed and schedule a follow-up appointment to complete the screening as soon as possible.

The provider must also complete a standardized and validated screening when seeing a client who is 6 months through 6 years of age for the first time at any checkup.

If a provider administers a standardized and validated developmental screening at additional checkups other than those listed in the Required Screening Ages and Recommended Tools table, the provider must document the rationale for the additional screening, which may be due to provider or parental concerns.

Developmental screening that is completed without the use of one of the required standardized screening tools is not a separately payable benefit, and the checkup will be considered incomplete.
Standardized developmental screening as part of a medical checkup and for ages other than required on the periodicity schedule is not covered when completed for the sole purpose of meeting day care, Head Start, or school program requirements.

Standardized developmental screening may be performed outside a THSteps medical checkup as part of development and neurological assessment testing.

Refer to: Subsection 9.2.26, “Developmental and Neurological Assessment and Testing” in the Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2 Provider Handbooks) for information related to developmental screening testing outside a THSteps medical checkup.

Referral for an in-depth developmental evaluation is determined by the criteria of the specific tool or at the provider’s discretion. Referral for in-depth evaluation of development should be provided when parents express concern about their child’s development, regardless of scoring on a standardized developmental screening tool. A medical diagnosis or a confirmed developmental delay is not required for referrals.

The ECI program serves clients who are birth through 35 months of age with disabilities or developmental delays. Under federal and state regulations, all health-care professionals are required to refer children to the Texas ECI program as soon as possible, but no longer than 7 days after identifying a disability or a suspected delay in development, even if referred to an appropriate provider for further testing. If the client is 3 years of age or older, referral should be made to the local school district’s special education program.

5.3.9.1.3 Mental Health Screening

Mental health screening for behavioral, social, and emotional development is required at each THSteps checkup.

When the clinician conducting the mental health screen has the appropriate training and credentials to conduct the mental health evaluation and provide treatment, the clinician may choose to provide the mental health services or refer the client to an appropriate clinician. Clinicians who do not have these qualifications must refer clients to a qualified Medicaid-enrolled mental health specialist for such care.

For additional information about conducting a mental health screen, providers can refer to the THSteps online educational module “Mental Health Screening” at www.txhealthsteps.com.

5.3.9.1.4 Tuberculosis (TB) Screening

Administer the TB risk screening tool annually beginning at 12 months of age and thereafter at other medical checkups.

The TB risk screening tool is available on the DSHS website at www.dshs.state.tx.us/thsteps/forms.shtm.

A TST is to be administered when the screening tool indicates a risk for possible exposure. Providers must use procedure code 86580 when a TST is administered.

A TST may be reimbursed separately when performed as part of a THSteps medical checkup visit. TB screenings are part of the encounter rates for FQHCs and RHCs and are not reimbursed separately.

A follow-up visit (procedure code 99211) is required to read all TSTs. The provider may bill the follow-up visit with a provider identifier and THSteps benefit code.

If further evaluation is required to diagnose either latent TB infection or active TB disease, the provider may bill the appropriate E/M office visit code. Diagnosis and treatment are provided as a medical office visit. Providers can also call the TB program at (512) 533-3000 for additional clinical information.

5.3.9.2 Comprehensive Unclothed Physical Examination

An age-appropriate unclothed physical examination is required at each checkup.

Recording of measurements and percentiles as appropriate to age to document growth and development including:

- Length or height and weight
- Fronto-occipital circumference (FOC) through the first 24 months of age
- Body mass index (BMI) calculated beginning at 2 years of age
- Blood pressure beginning at 3 years of age

5.3.9.2.1 Oral Health Screening

Oral health screening is a part of the medical checkup physical examination.

5.3.9.2.2 Sensory Screening

Documentation of test results from a school vision or hearing screening program may replace the required audiometric or visual acuity screening if conducted within 12 months prior to the checkup.

Clients who are birth through 35 months of age with suspected or confirmed hearing or visual impairment must be referred to ECI as soon as possible, but no longer than 7 days after identification.

5.3.9.2.3 Hearing Screening

State-mandated newborn hearing screening is offered by and performed in the birth facility in accordance with Health and Safety Code (HSC), Chapter 47, §§ 47.001 – 47.009 and TAC, Title 25, Part 1, Chapter 37, Subchapter S, §§ 37.501 – 37.512.

The provider must review the results with the parent or caregiver at the first visit and determine if any additional follow-up is necessary.

Hearing screening must be performed at each visit. Audiometric screening must be performed at specific ages indicated on the periodicity schedule. Subjective screening through provider observation or informant report is done at the other checkups.

Clients at high risk or with abnormal screening results must be referred to an appropriate Medicaid-enrolled provider who specializes in pediatric audiology services. Clients who are birth through 20 years of age enrolled with Texas Medicaid for the date(s) of service are eligible for Texas Medicaid hearing services benefits.

5.3.9.2.4 Vision Screening

Vision screening must be performed at each visit. A visual acuity test must be performed at ages indicated on the periodicity schedule. Subjective screening through provider observation or informant report is done at the other checkups.

All clients must be screened for eye abnormalities by history, observation, and physical exam and referred to a Medicaid-enrolled optometrist or ophthalmologist experienced with the pediatric population if at high risk.

Clients with abnormal visual acuity screening results must be referred to a Medicaid-enrolled optometrist or ophthalmologist experienced with the pediatric population.

5.3.9.3 *Immunizations

Providers must assess the immunization status at every medical checkup. The necessary vaccines and toxoids must be administered at the time of the checkup unless medically contraindicated or because of parent’s reasons of conscience including religious beliefs.
Vaccines and toxoids must be administered according to the current ACIP “Recommended Childhood and Adolescent Immunization Schedule - United States.” Providers must not refer clients to the local health department or other entity for immunization administration.

Vaccines and toxoids must be obtained from TVFC for clients who are birth through 18 years of age. Vaccines that are identified as being distributed through TVFC are not reimbursed separately.

The specific diagnosis necessitating the vaccine and toxoid is required when billing with the following administration procedure codes in combination with an appropriate vaccine/toxoid procedure code:

<table>
<thead>
<tr>
<th>Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>90460</td>
</tr>
</tbody>
</table>

Diagnosis code V202 may be used unless a more specific diagnosis code is appropriate.

Procedure codes 90460 and 90461 are benefits for services rendered to clients who are birth through 18 years of age when counseling is provided for the immunization administered.

Procedure codes 90471 and 90472 are benefits for services rendered to clients of any age when counseling is not provided for the immunization administered.

Procedure codes 90473 and 90474 are benefits for services rendered to clients who are birth through 20 years of age when counseling is not provided for the immunization administered.

The following vaccines and toxoids are a benefit of Texas Medicaid:

<table>
<thead>

<td>1</td>
<td>90746</td>
<td>1</td>
<td>90748*</td>
<td>2</td>
</tr>
</tbody>
</table>

Providers may use the state-defined modifier U1 in addition to the associated administered vaccine procedure code for clients who are birth through 18 years of age and the vaccine was unavailable through TVFC.

<table>
<thead>
<tr>
<th>Modifier</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>U1</td>
<td>State-defined modifier: Vaccine(s)/toxoid(s) privately purchased by provider when TVFC vaccine/toxoid is unavailable</td>
</tr>
</tbody>
</table>
**Note:** “Unavailable” is defined as a new vaccine approved by ACIP that has not been negotiated or added to a TVFC contract, funding for new vaccine that has not been established by TVFC, or national supply or distribution issues. Providers will be informed if a vaccine meets the definition of 'not available' from TVFC and when the provider's privately purchased vaccine may be billed with modifier U1.

Modifier U1 may not be used for failure to enroll in TVFC, maintain sufficient TVFC vaccine/toxoid inventory, or clients who are 19 through 20 years of age.

Each vaccine or toxoid and its administration must be submitted on the claim in the following sequence: the vaccine procedure code immediately followed by the applicable immunization administration procedure code(s). All of the immunization administration procedure codes that correspond to a single vaccine or toxoid procedure code must be submitted on the same claim as the vaccine or toxoid procedure code.

Each vaccine or toxoid procedure code must be submitted with the appropriate “administration with counseling” procedure code(s) (procedure codes 90460 and 90461) or the most appropriate “administration without counseling” procedure code (procedure code 90471, 90472, 90473, or 90474). If an “administration with counseling” procedure code is submitted with an “administration without counseling” procedure code for the same vaccine or toxoid, the administration of the vaccine or toxoid will be denied.

**Administration With Counseling**

Providers must submit claims for immunization administration procedure codes 90460 or 90461 based on the number of components per vaccine. Providers must specify the number of components per vaccine by billing 90460 and 90461 as defined by the procedure code descriptions:

- Procedure code 90460 is submitted for the administration of the 1st component.
- Procedure code 90461 is submitted for the administration of each additional component identified in the vaccine.

Procedure code 90461 will be denied if procedure code 90460 has not been submitted on the same claim for the same vaccine or toxoid.

The necessary counseling that is conducted by a physician or other qualified health-care professional must be documented in the client’s medical record.

The following is an example of how to submit claims for immunization administration procedure codes when counseling is provided:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Quantity Billed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Vaccine or toxoid procedure code with 1 component</td>
<td>1</td>
</tr>
<tr>
<td>90460 (1st component)</td>
<td>1</td>
</tr>
<tr>
<td>Vaccine or toxoid procedure code with 3 components</td>
<td>1</td>
</tr>
<tr>
<td>90460 (1st component)</td>
<td>1</td>
</tr>
<tr>
<td>90461 (2nd and 3rd components)</td>
<td>2</td>
</tr>
</tbody>
</table>

**Note:** The term "components" refers to the number of antigens that prevent disease(s) caused by one organism. Combination vaccines are those that contain multiple vaccine components.

**Administration Without Counseling**

Procedure codes 90471, 90472, 90473, and 90474 may be reimbursed per vaccine based on the route of administration.
The following is an example of how to submit claims for injection administration procedure codes when counseling is not provided:

<table>
<thead>
<tr>
<th>Procedure Code</th>
<th>Quantity Billed</th>
</tr>
</thead>
<tbody>
<tr>
<td>Vaccine or toxoid procedure code</td>
<td>1</td>
</tr>
<tr>
<td>90471 (Injection administration)</td>
<td>1</td>
</tr>
<tr>
<td>Vaccine or toxoid procedure code</td>
<td>1</td>
</tr>
<tr>
<td>90472 (Injection administration)</td>
<td>1</td>
</tr>
<tr>
<td>Vaccine or toxoid procedure code</td>
<td>1</td>
</tr>
<tr>
<td>90472 (Injection administration)</td>
<td>1</td>
</tr>
</tbody>
</table>

### 5.3.9.3.1 Vaccine Information Statement (VIS)

A VIS is required by federal mandate to inform parents and vaccine recipients of the risks and benefits of the vaccine they are about to receive. Not only is it important to explain the risks and benefits before a vaccine is administered, it is also important that providers use the most current forms available. For more about immunizations, vaccine-preventable diseases, or literature and forms, providers can call the DSHS Immunization Branch at 1-800-252-9152 or review information at www.dshs.state.tx.us/immunize.

**Refer to:** Appendix B: Immunizations in this handbook.

Form CH.39, “TVFC Provider Enrollment (3 Pages)” in Appendix A, “THSteps Forms,” in this handbook for more information on enrolling as a TVFC provider.

The THSteps online education module “Immunizations,” located on the THSteps website at www.txhealthsteps.com, for more information about immunizations.

### 5.3.9.4 Health Education and Anticipatory Guidance

Anticipatory guidance is a federally mandated component of the THSteps medical checkup and includes health education and counseling. Health education and counseling with parents or guardians and clients are required to assist parents in understanding what to expect in terms of the client’s development and to provide information about the benefits of healthy lifestyles and practices, as well as accident and disease prevention. Written material may also be given but does not replace counseling. The optional THSteps clinical records include age-appropriate topics on the back of each form. These forms can be found at www.dshs.state.tx.us/thsteps/forms.shtm.

### 5.3.9.5 Dental Referral

Based on the AAPD definition of a dental home, Texas Medicaid defines a dental home as the dental provider who supports an ongoing relationship with the client that is inclusive of all aspects of oral health care delivered in a comprehensive, continuously accessible, coordinated, and family-centered way. In Texas, establishment of a client’s dental home should begin at 6 months of age but no later than 12 months of age and includes referral to dental specialists when appropriate.

The physician must refer clients to establish a dental home beginning at 6 months of age or earlier if trauma or early childhood caries are identified. For established clients after the six-month medical checkup visit, the provider must confirm if a dental home has been established and is on-going; if not, additional referrals must be made at subsequent medical checkup visits until the parent or caregiver confirms that a dental home has been established for the client. The parent or caregiver of the client may self-refer for dental care at any age, including 12 months of age or younger.
5.3.9.6 Laboratory Test

The complete medical checkup may include laboratory testing. The periodicity schedule indicates which age-appropriate checkups require laboratory screening. The DSHS Laboratory provides supplies for specimen collection and mailing and shipping; and reporting of test results to enrolled THSteps medical providers that submit specimens to the DSHS Laboratory. These services and supplies are limited to THSteps medical checkup laboratory services provided in the course of a medical checkup to THSteps clients. Unauthorized use of services and supplies is a violation of federal regulations.

DSHS laboratory services are available at no cost to all enrolled THSteps medical providers for THSteps medical checkups only. THSteps laboratory services provided by a private laboratory and a medical provider are not reimbursed.

**Example:** If a provider needs immediate results for the anemia screening, the specimen may be processed in the office/clinic, and the test results must be documented in the client’s medical record but the provider will not be reimbursed.

**Exception:** For tests related to screening for type 2 diabetes, hyperlipidemia, HIV, and syphilis, the client or specimen may be sent to the laboratory of the provider’s choice. Point-of-care testing that is performed in the provider’s office to obtain the initial blood lead specimen may be reimbursed separately.

The date of service for the laboratory testing is to be the date the specimen was obtained as part of the medical checkup, follow-up visit, or exception-to-periodicity visit.

The procedure codes for any laboratory testing services other than screening for type 2 diabetes, hyperlipidemia, HIV, and syphilis are informational when obtained on the same day a checkup is completed, even if an acute care visit is performed on the same date of service.

If the laboratory testing as identified on the THSteps Medical Checkup Periodicity Schedule is obtained as part of an E/M visit on a different date of service than a checkup, the services may be considered as separate services and may be sent to the laboratory of the provider’s choice.

Laboratory specimens obtained for diagnostic evaluation, rather than for screening purposes and performed on the same day as a checkup, may be considered as separate services unless the test is required as part of a checkup. If the test is required as part of the checkup, the laboratory specimens, with the exception of screening tests for hyperlipidemia, type 2 diabetes, HIV, and syphilis must be submitted to the DSHS Laboratory for testing. Diagnostic specimens that are not part of the checkup can be sent to the laboratory of the provider’s choice.

Laboratory services that are related to a THSteps medical checkup are available from the DSHS Laboratory and may not be billed separately with an office visit or consultation on the same day as a THSteps medical checkup.

All of the laboratory tests that are listed on the THSteps Periodicity Schedule may be submitted to the DSHS laboratory if the specimen submission requirements can be met. Tests that are listed in the “Laboratory Test Procedure Codes” table below must be submitted to the DSHS lab. Tests that must be sent to a DSHS laboratory but that are processed elsewhere are not reimbursed; however, the documentation results may be used to meet the requirements for a checkup.

The following procedure codes may not be billed separately with an office visit or consultation on the same day as a THSteps medical checkup either by a provider or laboratory. Claims for procedure codes listed below submitted by a provider or a commercial laboratory for the same DOS as a THSteps medical checkup are denied and are subject to retrospective review:

<table>
<thead>
<tr>
<th>Laboratory Test Procedure Codes</th>
</tr>
</thead>
<tbody>
<tr>
<td>83665*</td>
</tr>
</tbody>
</table>

* Unless performed using point-of-care testing, the initial lead specimen must be sent to the DSHS Laboratory
For specimens sent to the DSHS Laboratory, the checkup includes the specimen collection and supplies, mailing and shipping supplies, and the review of the test results from the DSHS laboratory.

For specimens sent to a laboratory of the provider’s choice, the checkup includes the specimen collection or ordering of the test and the review of the test results from the laboratory.

### 5.3.9.6.1 Laboratory Supplies

The DSHS Laboratory verifies enrollment of THSteps medical providers before sending laboratory supplies and the informational packet to the medical providers. Newly enrolled providers should contact the DSHS Laboratory to request laboratory supplies. Upon request, the DSHS Laboratory provides THSteps medical providers with laboratory supplies associated with specimen collection, submission, and mailing and shipping of required laboratory tests related to medical checkups. Requests for specimen submission forms are routed to the DSHS Laboratory reporting staff and mailed separately to the providers. The Child Health Laboratory Supplies Order Form lists the laboratory supplies that the DSHS Laboratory provides to THSteps medical providers.

To obtain a THSteps Child Health Laboratory Supplies Order Form, providers can call (512) 776-7661 or 1-888-963-7111, ext. 7661, or download the form online at www.dshs.state.tx.us/lab/MRS_forms.shtm.

### 5.3.9.6.2 Newborn Screening Supplies

Providers that perform newborn screening (NBS) can order supplies by submitting a Newborn Screening Supplies Order Form to the DSHS Laboratory. The Newborn Screening Supplies Order Form lists the NBS supplies that the DSHS Laboratory provides to medical providers.

**Note:** For newborn screening, only the specimen collection form (NBS 3), mailing envelope and provider address labels are provided. Lancets, mailing, and shipping costs are the responsibility of the submitter.

To obtain a Newborn Screening Supplies Order Form, medical providers can call (512) 776-7661 or 1-888-963-7111, ext. 7661, or download the form online at www.dshs.state.tx.us/lab/MRS_forms.shtm.

Contact information for requesting laboratory supplies:

</tbody>
</table>

### 5.3.9.6.3 Laboratory Submission

All required laboratory testing for THSteps clients must be performed by the Department of State Health Services (DSHS) Laboratory in Austin, TX, with the following exceptions:

- Specimens collected for type 2 diabetes, hyperlipidemia, HIV, and syphilis screening may be sent to the laboratory of a provider’s choice or to the DSHS Laboratory in Austin if submission requirements can be met.

- Blood lead testing by point-of-care screening.

THSteps medical checkup laboratory specimens submitted to the DSHS Laboratory must be accompanied with the DSHS Laboratory Specimen Submission Form (Newborn Screening NBS 3 or G-THSTEPS as appropriate) for test(s) requested. All forms must include the client’s name and Medicaid number as they appear on the Your Texas Benefits card. If a number is not currently available but is
pending (i.e., a newborn or a newly certified client verified by a Medicaid Eligibility Verification [Form H1027] as eligible for Medicaid), providers must write “pending” in the Medicaid number space, which is located in the payor source section of the laboratory specimen submission form.

Laboratory specimens received at the DSHS Laboratory without a Medicaid number or the word “pending” written on the accompanying specimen submission form will be analyzed, and the provider will be billed.

Specimens submitted to the laboratory must also meet specific acceptance criteria. For additional information on specimen submission, providers can refer to the DSHS Laboratory web page at: www.dshs.state.tx.us/lab/MRS_specimens.shtm.

**Note:** If an extreme health problem exists and telephone results are needed quickly, providers should make a request on the laboratory form. With the exception of weekends and holidays, routine specimens are analyzed and reported within three business days after receipt by the DSHS Laboratory. Critical abnormal test results (e.g., hemoglobin equal to or below 7g/dL or blood lead levels greater than or equal to 40 mcg/dL) are identified in the laboratory within 36 hours after receipt of specimens and are reported to the submitter by telephone within one hour of confirmation.

The THSteps laboratory specimens that can be mailed at ambient temperature can be sent to the DSHS Laboratory Services Section through the U.S. Postal Service at no cost using the provided business reply labels:

```
DSHS Laboratory Services Section
Walter Douglass
PO Box 149163
Austin, TX 78714-9803
(512) 776-7318 or 1-888-963-7111 Ext. 7318
```

THSteps laboratory specimens that require overnight shipping on cold packs through a courier service must be sent to the DSHS Laboratory Services Section at:

```
DSHS Laboratory Services Section, MC-1947
1100 West 49th Street
Austin, TX 78756-3199
```

Newborn Screening specimens can be sent through the U.S. Postal Service to:

```
Texas Department of State Health Services
Laboratory Services Section
PO Box 149341
Austin, TX 78714-9341
```

Gonorrhea and Chlamydia specimens for regular delivery are sent to:

```
Department of State Health Services
Laboratory - MC 1947
Walter Douglass, (512) 776-7569
PO Box 149163
Austin, TX 78714-9803
```

Gonorrhea and Chlamydia specimens that are shipped cold overnight via courier are sent to:

```
Department of State Health Services
Laboratory - MC 1947
Walter Douglass, (512) 776-7569
1100 W. 49th Street
Austin, TX 78756-3199
```
Collectors are available from the DSHS Austin Laboratory. To order collectors, providers must complete the Order Form for Gonorrhea/Chlamydia (GC/CT) Laboratory Supplies (G-6C) that is posted on the DSHS website at www.dshs.state.tx.us/lab/mrs_forms.shtm and fax the completed form to (512) 776-7672.

Providers can call (512) 776-6030 or toll-free 1-888-963-7111, ext. 6030, for questions about submission requirements such as collection, supplies, and mailing of specimens for THSteps gonorrhea and chlamydia adolescent screening.

5.3.9.6.4 Send Comments

Providers with comments or feedback about THSteps specimen collection supplies should contact the DSHS Laboratory. Supplies are evaluated continually, and feedback from supply users is useful. Documented comments may support, justify, or initiate a change in a provided item. Providers can send a brief letter or fax to the following address:

Quality Assurance Unit
Laboratory Services Section, MC 1947
Department of State Health Services
PO Box 149347
Austin, TX 78714-9347
Fax: (512) 776-7294

5.3.9.6.5 Laboratory Reporting

A computer-generated result report is mailed or faxed to the submitting THSteps medical checkup provider. A statistical report is mailed quarterly to providers documenting their total number of submissions by diagnosis and adequacy. The DSHS Laboratory has web-based services (remote order and result reporting) available for THSteps and Newborn Screening laboratory services. For more information, providers can visit the DSHS website at www.dshs.state.tx.us/lab/remoteData.shtm or call 1-888-963-7111, Ext. 6030.

5.3.9.6.6 Required Laboratory Tests Related to Medical Checkups

The following laboratory screening procedures are required components of the THSteps medical checkup and are to be performed in accordance with the age and frequency specified on the THSteps medical checkup periodicity schedule. Due to changes in specimen collection, handling, and submission criteria, providers should contact the DSHS Laboratory for the most current specimen requirements by calling 1-888-963-7111, Ext. 7430 or visiting the DSHS website at www.dshs.state.tx.us/lab/MRS_labtests_toc.shtm.

Anemia Screening

Anemia screening by hemoglobin or hematocrit levels is required at ages as noted on the THSteps Periodicity Schedule. These tests may be completed in a provider’s office or clinic if there is an urgent need for test results, but will not be reimbursed separately. These test results must be documented in the client’s medical record.

Lead Screening and Testing

In accordance with current federal regulations, THSteps requires blood lead screening at ages notated on the THSteps Periodicity Schedule and must be performed during the medical checkup. Environmental lead risk may be addressed at other visits using the Lead Risk Questionnaire, Form Pb-110, which is provided in both English and Spanish at www.dshs.state.tx.us/thsteps/forms.shtm. Providers may use an equivalent form of their choice.
The initial lead testing may be performed using a venous or capillary specimen, and must either be sent to the DSHS lab or performed in the provider’s office using point-of-care testing. If the client has an elevated blood lead level of 10mcg/dL or greater, the provider must perform a confirmatory test using a venous specimen. The confirmatory specimen may be sent to the DSHS lab, or the client or specimen may be sent to a lab of the provider’s choice.

All blood lead levels in clients who are 14 years of age or younger must be reported to DSHS. Reports should include all information as required on the Child Blood Lead Reporting, Form F09-11709 or the Point-of-Care Blood Lead Testing report Form Pb-111, which can be found at www.dshs.state.tx.us/lead/providers.shtm or by calling 1-800-588-1248.

Elevated blood lead levels for clients who are 15 years of age or older must be reported to DSHS and should include all information required on the Adult Blood Lead Report Form F09-11624.

Point-of-care lead testing (procedure code 83655 with modifier QW) may be reimbursed to THSteps medical providers when performed in the provider’s office. Providers must have a Clinical Laboratory Improvement Amendments of 1988 (CLIA) certificate of waiver.

Blood lead testing is part of the encounter rates for FQHCs and RHCs and is not reimbursed separately. Providers may obtain more information about the medical and environmental management of lead-poisoned children from the DSHS Childhood Lead Poisoning Prevention Program by calling 1-800-588-1248 or visiting the web page at www.dshs.state.tx.us/lead.

Refer to: Appendix C: Lead Screening in this handbook for more information on lead screening procedures and follow-up.

Hyperlipidemia
Screening for hyperlipidemia is based on risk assessment. THSteps does not provide a formal risk assessment tool. Providers may refer to the AAP policy statement on cholesterol screening for more information. Specimens may be sent to the laboratory of the provider’s choice, including the DSHS Laboratory.

Diabetes
Screening for type 2 diabetes is based on risk assessment. THSteps does not provide a formal risk assessment tool. Specimens may be sent to the laboratory of the provider’s choice, including the DSHS Laboratory.

Newborn Screening
Each newborn delivered in Texas must be subjected to two screens to test for a number of genetic and heritable disorders. Each newborn screen is indicated on the THSteps Periodicity Schedule. A current list of screened disorders is available at www.dshs.state.tx.us/newborn/screened_disorders.shtm.

Additional information about newborn screening, is available on the Newborn Screening Program website at www.dshs.state.tx.us/newborn/default.shtm.

The initial newborn screen specimen must be obtained between 24 and 48 hours after birth. Newborns discharged from a hospital or birthing facility before this time criteria is met must have a newborn screen blood specimen obtained immediately prior to discharge. When the newborn is an inpatient in the hospital, the hospital shall ensure that the appropriate screens are done. When the newborn is not in the hospital, the physician or health-care practitioner who attends the newborn outside of the hospital shall be responsible for causing the appropriate screens to be done. TAC Title 25, Part 1, Chapter 37, Subchapter D, Rule §37.55.

A second screen is to be obtained between one and two weeks of age by the newborn’s physician or health-care practitioner, and is a required component of the THSteps medical checkup. Clients may not be referred to the local health department or other providers for this service. If there is any doubt that a
client younger than 12 months of age was properly tested, the provider should submit a screen on DSHS Form NBS 3 to the Texas Department of State Health Services, Laboratory Services Section, Austin, Texas.

Newborn screen results are mailed or faxed to the address that the provider indicated on DSHS Form NBS 3. Providers may sign up to receive results online through DSHS laboratory web-based services. For more information visit the DSHS website at www.dshs.state.tx.us/lab/remote.data.shtm or call 1-888-963-7111, Ext. 6030.

**Note:** Recommendations for necessary follow-up procedures are included with the newborn screen results. Newborn Screening (NBS) Clinical Care Coordination staff will contact providers when there are significant out of range newborn screening laboratory results.

### 5.3.9.6.7 Additional Required Laboratory Tests Related to Medical Checkups for Adolescents

The following is a list of required and risk-based laboratory tests related to medical checkups for adolescents and guidelines for testing for sexually transmitted diseases (STDs).

**Testing for Sexually Transmitted Diseases**

**Syphilis Testing**

Syphilis testing should be performed on adolescents that are at high risk for infection. Specimens may be sent to the laboratory of the provider’s choice, including the DSHS Laboratory.

**Gonorrhea and Chlamydia Infection Testing**

Testing for gonorrhea and Chlamydia should be performed on adolescents that are at high risk for infection. Specimens must be sent to the DSHS Laboratory in Austin.

**HIV Testing**

It is critical to maintain confidentiality when caring for clients, as well as their specimens. Testing should be performed only after informed consent is obtained from the adolescent. Informed consent does not have to be written as long as there is documentation in the medical record that the test has been explained and consent has been obtained. Specimens may be sent to the laboratory of the provider’s choice, including the DSHS Laboratory.

The CDC guidelines state that routine HIV screening should occur for everyone between 13 and 64 years of age. HIV testing is not required at these ages, but the offer should be made beginning at 13 years of age and if not performed at that time, should be offered at subsequent ages according to risk.

HIV testing may be performed for adolescents without requirement of parental consent. Adolescents at risk for HIV infection should be offered confidential HIV screening. If the client refuses the HIV test, the provider may not perform the test and must explain the option of anonymous testing and refer the client to a testing facility that offers anonymous testing. A notation must be made in the medical record that notification of the HIV test and the right to refuse was given. Providers may call the HIV/STD InfoLine for referrals to HIV/AIDS testing sites; prevention, case management, and treatment providers; STD clinics; and other related service organizations. The HIV/STD InfoLine is 1-800-299-2437. This toll-free HIV/AIDS and STD information and referral service is available for English- and Spanish-speaking callers and for those who are hearing-impaired.

**Communicable Disease Reporting**

Diagnoses of STDs, including HIV, are reportable conditions under 25 TAC, Chapter 97. Providers must report confirmed diagnoses of STDs as required by 25 TAC §97.132.
5.3.10 Non-mandated Components

5.3.10.1 Oral Evaluation and Fluoride Varnish (OEFV) in the Medical Home

An OEFV (procedure code 99429) is aimed at improving oral health outcomes for clients who are 6 through 35 months of age by initiating a limited set of preventive dental services (not a dental checkup) in the medical home. OEFV is not a required component of a THSteps medical checkup.

The OEFV must be billed on the same date of service as a medical checkup visit and is limited to six services per lifetime by any provider. Procedure code 99429 must be billed with modifier U5 and diagnosis code V202.

An OEFV is not a required component of a THSteps medical checkup, but providers are encouraged to participate in this preventive intervention. OEFV is limited to THSteps medical checkup providers who have completed the required benefit education and are certified by the DSHS Oral Health Program to perform OEFV services.

Training for certification is available as a free continuing education course on the THSteps website at www.txhealthsteps.com.

The OEFV add-on includes the following components:

- Intermediate oral evaluation
- Inspection of teeth for signs of early childhood caries, and other caries
- Inspection of the oral soft tissues for any abnormalities
- Inspection for bleeding, swelling, or infection
- Indications of lack of cleaning of the mouth

The intermediate oral evaluation components that may be performed by a trained staff member are:

- Fluoride varnish application
- Dental anticipatory guidance to include:
  - The need for thorough daily oral hygiene practices
  - Education in potential gingival manifestations for clients with diabetes and clients under long-term medication therapy
  - THSteps eligibility qualifies the client for dental services
  - Diet, nutrition, and food choices
  - Fluoride needs
  - Injury prevention
  - Antimicrobials, medications, and oral health

If the client has no erupted teeth, additional dental anticipatory guidance is expected.

Note: The physician must complete the intermediate oral evaluation but can delegate all other components.

5.4 Documentation Requirements

All THSteps services require documentation to support the medical necessity of the services rendered including THSteps medical services. THSteps services are subject to retrospective review and recoupment if documentation does not support the services billed.
The following federal and state mandated components must be documented in the client's medical record for the checkup to be considered complete:

- Comprehensive health and developmental history, including physical and mental health development
- Comprehensive unclothed physical examination
- Immunizations appropriate for age and health history
- Laboratory test appropriate to age and risk, including lead toxicity at specific federally mandated ages
- Health education including anticipatory guidance
- Dental referral

The client's medical record must include documentation to support the rationale a component was not completed, and a plan to complete the component(s) if not due to parent or caregiver concern or reasons of conscience, including religious beliefs.

5.4.1 Separate Identifiable Acute Care Evaluation and Management Visit

If an acute or chronic condition that requires E/M beyond the required components for a medical checkup is discovered, a separate E/M procedure code may be considered for reimbursement for the same date of service as a checkup or the client can be referred for further diagnosis and treatment.

- The client's medical record must contain documentation that the separate identifiable service(s) were medically necessary and include a diagnosis other than V202 (routine infant or child health check) and treatment. Documentation must be made available to Texas Medicaid upon request.
- An insignificant or trivial problem or abnormality that is encountered in the process of performing a checkup and does not require additional work and performance of the key components of a problem-oriented E/M service cannot be considered a separate established patient E/M acute care visit.
- Modifier 25 may be used to identify a significant, separately identifiable E/M service rendered by the same provider on the same day of the procedure or other service. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client's medical record.

5.5 Claims Filing and Reimbursement

Providers may refer to Volume 1 for general information about claims filing and reimbursement.

Refer to: Section 3: TMHP Electronic Data Interchange (EDI) (Vol. 1, General Information) for information on electronic claims submissions.

Section 6: Claims Filing (Vol. 1, General Information) for general information about claims filing.

Section 6: Claims Filing (Vol. 1, General Information) for paper claims completion instructions.

Section 2: Texas Medicaid Fee-for-Service Reimbursement (Vol. 1, General Information) for more information about reimbursement.

Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in Section 2, “Texas Medicaid Fee-for-Service Reimbursement” (Vol. 1, General Information) for more information.
5.5.1 Claims Information
THSteps Medical providers are not required to bill other insurance before billing Medicaid. If a provider is aware of other insurance, the provider must choose whether or not to bill the other insurance. The provider has the following options:

- If the provider chooses to bill the other insurance, the provider must submit the claim to the client’s other insurance before submitting the claim to Medicaid.
- If the provider chooses to bill Medicaid and not the client’s other insurance, the provider is indicating that he or she accepts the Medicaid payment as payment in full. Medicaid then has the right to recovery from the other insurance. The provider does not have the right to recovery and cannot seek reimbursement from the other insurance after Medicaid has made payment.
- If the provider learns that a client has other insurance coverage after Medicaid has paid a claim, the provider must refund the payment to Medicaid before billing the other insurance.

Providers should bill their usual and customary fee except for vaccines obtained from TVFC. Providers may not charge Medicaid or clients for the vaccine received from TVFC. Providers may charge a usual and customary fee not to exceed $14.85 for vaccine administration when providing immunizations to a client eligible for TVFC. Providers are reimbursed the lesser of the billed amount or the maximum allowable fee.

THSteps medical checkups may be billed electronically or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms. Providers may request information about electronic billing or the paper claim form by contacting the TMHP THSteps Contact Center at 1-800-757-5691.

All procedures, including the informational-only procedures, must have a billed amount associated with each procedure listed on the claim. Informational-only procedure codes must be billed in the amount of at least $.01.

Providers must record the following on the CMS-1500 claim form to receive reimbursement for a medical checkup:

- The provider identifier and benefit code EP1 (exception: FQHC providers must use their FQHC provider identifier.)
- The appropriate THSteps medical checkup procedure code (all ages) with diagnosis code V202
  - The condition indicator codes, which must be placed in 24C (ST, S2, or NU only)
  - The provider type modifiers
  - The exception-to-periodicity modifier, when applicable
- The immunization administration and vaccine procedure codes if any were administered (all ages)
- The place of service must be 72 for RHCs
- The EP modifier must be used for FQHCs

Immunizations performed outside of a THSteps medical checkup must be billed under the provider’s provider identifier.

5.5.2 Reimbursement
THSteps-enrolled providers are reimbursed for THSteps medical checkups and administration of immunizations in accordance with 1 TAC §355.8441.

Note: NP, CNS, and PA providers who are enrolled in Texas Medicaid as THSteps providers may receive the full reimbursement for THSteps services.

FQHCs are reimbursed using visit rates calculated in accordance with 1 TAC §355.8261.
RHCs are reimbursed using visit rates calculated in accordance with 1 TAC §355.8101.

Providers may refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com.
