## 1. INTRODUCTION

### Scope

Under the Administrative Simplification provisions of the Health Insurance Portability and Accountability Act (HIPAA) of 1996, the Secretary of the Department of Health and Human Services (HHS) is directed to adopt standards to support the electronic exchange of administrative and financial health care transactions. The purpose of the Administrative Simplification portion of HIPAA is to enable health information to be exchanged electronically and to adopt standards for those transactions.

Texas Medicaid defines a Trading Partner as any entity trading data with Texas Medicaid EDI. Trading partners include vendors, clearinghouses, Providers and billing agents.

The 5010 Technical Report Type 3 (TR3) dated May 2006 was used to create this Companion Guide for the 837 file format. All instructions in this document are written using information known at the time of publication and are subject to change.

### Overview

This guide is intended as a resource to submitter in successfully conducting EDI 837 Health Care Claim: Institutional transactions with Texas Medicaid. This document does not provide detailed data specifications, which are published separately by the industry committees responsible for their creation and maintenance.

The purpose of this document is to assist the provider with Texas Medicaid-particular data sets for information specified in the National Electronic Data Interchange Transaction Set Implementation Guide for the file type. The federal government has set standards to simplify Electronic Data Interchange (EDI). To comply with the standard, Texas Medicaid has updated the data sets for EDI files to be in accordance with HIPAA and is utilizing the ASC X12 nomenclatures.

The instructions in this companion guide are not intended to be stand-alone requirements documents, and must be used in conjunction with the associated ANSI ASC X12N National Implementation Guide. This companion guide conforms to all the requirements of any associated ASC X12 Implementation Guide and is in conformance with ASC X12's Fair Use and Copyright statements.

## Additional Information

### Security and Privacy Statement

Covered entities were required to implement HIPAA Privacy Regulations no later than April 14, 2003. A covered entity is defined as a health plan, a health care clearinghouse, or a health care provider who transmits any health information in electronic form in connection with a HIPAA transaction. Providers that conduct certain electronic transmissions are responsible for ensuring these privacy regulations are implemented in their business practices. Health and Human Services Commission (HHSC) is a HIPAA Covered Entity. Accordingly, Texas Medicaid is operating as a HIPAA Business Associate of HHSC as defined by the federally mandated rules of HIPAA. A Business Associate is defined as a person or organization that performs a function or activity on behalf of a covered entity, but is not part of the covered entity's workforce.

The privacy regulation has three major purposes:

- To protect and enhance the rights of consumers by providing them access to their health information and controlling the appropriate use of that information;
- To improve the quality of health care in the United States by restoring trust in the health care system among consumers, health care professionals and the many organizations and individuals committed to the delivery of health care; and
- To improve the efficiency and effectiveness of health care delivery by creating a national framework for health privacy and protection.

## 9. TRADING PARTNER AGREEMENTS

This section contains general information concerning Trading Partner Agreements (TPA).

### Trading Partners

An EDI Trading Partner is defined as any Texas Medicaid customer (provider, billing service, software vendor, employer group, financial institution, etc.) that transmits to, or receives electronic data from, Texas Medicaid.

Submitters have EDI Trading Partner Agreements that accompany the standard implementation guide to ensure the integrity of the electronic transaction process. The Trading Partner Agreement is related to the electronic exchange of information, whether the agreement is an entity or a part of a larger agreement, between each party to the agreement.

For example, a Trading Partner Agreement may specify, among other things, the roles and responsibilities of each party to the agreement in conducting standard transactions.

Texas Medicaid Trading Partner Agreement will be found on this web page:

## 10. TRANSACTION SPECIFIC INFORMATION

This section describes how ASC X12N Implementation Guides (IGs) adopted under HIPAA will be detailed with the use of a table. The tables contain a row for each segment that Texas Medicaid has something additional, over and above, the information in the IGs. That information can:

- Limit the repeat of loops, or segments
- Limit the length of a simple data element
- Specify a sub-set of the IGs internal code listings
- Clarify the use of loops, segments, composite and simple data elements
- Any other information tied directly to a loop, segment, composite or simple data element pertinent to trading electronically with Texas Medicaid

In addition to the row for each segment, one or more additional rows are used to describe Texas Medicaid’s usage for composite and simple data elements and for any other information.

This section is used to describe the required data values that will be used by Texas Medicaid for those who submit an Institutional claim.

# 11. APPENDICES

## Transmission Examples

The 837I transaction is designed to transmit one or more claims for each billing provider. The hierarchy of the looping structure is billing provider, subscriber, claim level, and claim service line level. Billing providers who sort claims using this hierarchy will use the 837I more efficiently because information that applies to all lower levels in the hierarchy will not have to be repeated within the transaction.

### Texas Medicaid Note:

As an assumption for these file formats, if the Subscriber is the same individual as the Patient then the Patient Loop is not to be populated per HIPAA compliance. Information sent in the 2000C loop will be ignored by Texas Medicaid.

In the following example carriage return line feeds are inserted in place of ~ character for improved readability purposes.
