Services provided without the required level of supervision are not considered medically appropriate and will be recouped upon retrospective record review.

Claims denied for more than two times per year may be appealed with documentation of medical necessity.

Documentation of MSLT must be maintained in the client's medical record at the sleep facility and include a hard copy or electronic copy of four to five, 20-minute recordings of sleep-wake states and stages spaced at two-hour intervals throughout the day, taking approximately seven to nine hours to complete. In addition, documentation must include the physiological recordings typically made during daytime testing. These typically include:

- EEG
- Electro-oculogram (EOG)
- EMG
- EKG

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Audio and video recordings made during the monitored portion of the day

Documentation must also include the technologist's analysis and report, the client's subjective report, and the influence of intervention applied during the night.

Interpretation and treatment recommendations must be completed by a sleep specialist. The physician's interpretation and report must include inspection of the entire recording, examination of the technologist's analysis and observations, and integration of the information gathered from all physiological systems. Documentation of the interpretation must be maintained in the sleep facility and by the interpreting physician.

MSLT procedure code 95805 must be performed in conjunction with polysomnography procedure code 95808, 95810, or 95811. Polysomnography must be performed on the date before MSLT. MSLT that is not performed in conjunction with polysomnography will be denied, but may be considered on appeal with documentation that explains why the polysomnography did not occur.

9.2.73 Speech Therapy (ST) Services

Speech therapy (ST) is a payable benefit to physicians.

Refer to: Section 4, "Therapy Services Overview" in the *Physical Therapy, Occupational Therapy, and Speech Therapy Services Handbook* (*Vol. 2, Provider Handbooks*) for information about speech therapy services provided by a physician.

9.2.74 Surgery Billing Guidelines

9.2.74.1 Primary Surgeon

A primary surgeon may be reimbursed for services provided in the inpatient hospital, outpatient hospital setting, and ASC/HASC Center.

A surgeon billing for a surgery and an assistant surgery fee on the same day may be reimbursed if two separate procedures are performed.

Refer to: Subsection 9.2.74.7, "Multiple Surgeries" in this handbook.

9.2.74.2 Anesthesia Administered by Surgeon

If the physician bills for a surgical procedure and anesthesia for the same procedure, the surgery is paid and the anesthesia is denied as part of the surgical procedure. The exception to this policy is an epidural during labor and delivery.

Refer to: Subsection 9.2.7, "Anesthesia" in this handbook.

9.2.74.3 Assistant Surgeon

Assistant surgeons may be reimbursed 16 percent of the TMRM fee for the surgical procedures performed.

Medicaid follows the TEFRA regulations for assistant surgeons in teaching hospitals. TEFRA states that an assistant surgeon will not be paid in a hospital classified by Medicare as a teaching facility with an approved graduate training program in the performing physician's specialty. Medicaid may consider reimbursement for an assistant surgeon at a teaching hospital classified by Medicare as a teaching facility with approved graduate training program if one of the following situations is present and documented on the claim:

- No qualified resident was available. (Modifier 82 may be used to document this exception.)
- There were exceptional medical circumstances such as an emergency or life-threatening situation requiring immediate attention (modifiers 80 and KX).
- The primary surgeon has a policy of never, without exception, involving a resident in the preoperative, operative, or postoperative care of a patient (modifiers 80 and KX).

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The surgical procedure was complex and required a team of physicians (modifiers 80 and KX).

Use of these modifiers is not required but expedites claims processing. Therefore, it is *recommended* that these modifiers be used in conjunction with the procedure code rather than a narrative statement when these specific circumstances exist.

All claims for assistant surgeon services must include in Block 32 of the CMS-1500 paper claim form the name, address, and NPI of the hospital in which the surgery was performed. If the physician seeks an exception to this TEFRA regulation based on unavailability of a qualified resident, the following certification statement must appear on or attached to the claim form:

> "I understand that section 1842(b)(6)(D) of the Social Security Act generally prohibits reasonable charge payment for the services of assistants at surgery in teaching hospitals when qualified residents are available to furnish such services. I certify that the services for which payment is claimed were medically necessary, and that no qualified residents were available to perform the services. I further understand that these services are subject to postpayment review by TMHP."

Surgical procedures that do not ordinarily require the services of an assistant, as identified by Medicare, are denied when billed as an assistant surgery. One assistant surgeon is reimbursed for surgical procedures when appropriate.

Use modifier AS when the physician assistant is not enrolled as an individual provider and provides assistance at surgery. The claim must include the PA's name and license number. Only procedures currently allowed for assistant surgeons are payable.

PAs actively enrolled as a Medicaid provider with an assigned NPI may bill assistant surgery services on a separate claim form using the PA's individual NPI and modifiers U7 and 80.

9.2.74.4 Bilateral Procedures

When a bilateral procedure is performed and an appropriate bilateral code is not available, a unilateral code must be used. The unilateral code must be billed twice with a quantity of 1 for each code. For all procedures, use modifiers LT (left) and RT (right) as appropriate. For example, bilateral application of short leg cast is billed as follows:

Procedure Code	Modifier
29405	LT
29405	RT

9.2.74.5 Cosurgery

Cosurgery (two surgeons) may be reimbursed when the skills of two surgeons (usually with different skills) are required in the management of a specific surgical procedure. Cosurgery is for a surgery where the two surgeons' separate contributions to the successful outcome of the procedure are considered to be of equal importance.

> ***Note:*** *No additional reimbursement will be made for an assistant surgeon.*

Cosurgeons may be reimbursed for surgical procedure codes that are billed with modifier 62 if the CMS fee schedule indicates that the procedure allows for cosurgeons. Claims will not suspend for manual review of the documentation of medical necessity. Reimbursement will be calculated at 62.5 percent of the amount allowed for the intraoperative portion of the surgical procedure's fee.

No cosurgery payment is made for claims submitted without modifier 62. In instances where the surgeons do not use modifier 62, the first claim received at TMHP for the service is considered that of the primary surgeon, and the subsequent claim is denied as a previously paid service.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

9.2.74.6 Global Fees

Texas Medicaid uses global surgical periods to determine reimbursement for services that are related to surgical procedures. The following services are included in the global surgical period:

- Preoperative care, including history and physical
- Hospital admission work-up
- Anesthesia (when administered and monitored by the primary surgeon)
- Surgical procedure (intraoperative)
- Postoperative follow-up and related services
- Complications following the surgical procedure that do not require return trips to the operating room

Texas Medicaid adheres to a global fee concept for minor and major surgeries and invasive diagnostic procedures. Global surgical periods are defined as follows:

- 0-day Global Period-Reimbursement includes the surgical procedure and all associated services that are provided on the same day.
- 10-day Global Period-Reimbursement includes the surgical procedure, any associated services that are provided on the same day of the surgery, and any associated services that are provided for up to 10 days following the date of the surgical procedure.
- 90-day Global Period-Reimbursement includes the surgical procedure, preoperative services that are provided on the day before the surgical procedure, any associated services that are provided on the same day of the surgery, and any associated services that are provided for up to 90 days following the date of the surgical procedure.

Procedure codes that are designated as "Carrier Discretion" will have their global periods determined by HHSC.

Note: *All unlisted surgical procedure codes have a 42 day global period assigned by Texas Medicaid.*

The global surgical fee period applies to both emergency and nonemergency surgical procedures. Physicians who are in the same group practice and specialty must bill, and are reimbursed, as if they were a single provider.

Modifiers

For services that are rendered in the preoperative, intraoperative, or postoperative period to be correctly reimbursed, providers must use the appropriate modifiers from the following table. Failure to use the appropriate modifier may result in recoupment.

Modifiers Related to Surgical Fees					
24	25	54	55	56	57
58	62	76	77	78	79

For services that are billed with modifier 54, 55, or 56, medical record documentation must be maintained by both the surgeon and the physician who provides preoperative or postoperative care. Reimbursement for claims associated with modifier 54, 55, or 56 is limited to the same total amount as would have been paid if only one physician provided all of the care, regardless of the number of physicians who actually provide the care.

If a physician provided all of the preoperative, intraoperative, and postoperative care, claims may be considered for reimbursement when they are submitted without a modifier.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Documentation Requirements

For services that are billed with any of the listed modifiers to be considered for reimbursement, providers must maintain documentation in the client's medical record that supports the medical necessity of the services. Acceptable documentation includes, but is not limited to, progress notes, operative reports, laboratory reports, and hospital records.

On a case-by-case basis, providers may be required to submit additional documentation that supports the medical necessity of services before the claim will be reimbursed.

Note: *Retrospective review may be performed to ensure that the submitted documentation supports the medical necessity of the surgical procedure and any modifier used to bill the claim.*

Preoperative Services

Preoperative physician E/M services (such as office or hospital visits) that are directly related to the planned surgical procedure and provided during the preoperative limitation period will be denied if they are billed by the surgeon or anesthesiologist who was involved in the surgical procedure.

Reimbursement will be considered when the E/M services are performed for distinct reasons that are unrelated to the procedure. E/M services that meet the definition of a significant, separately identifiable service may be billed with modifier 25 if they are provided on the same day by the same provider as the surgical procedure.

Modifier 25 is not used to report an E/M service that results in a decision to perform a surgical procedure. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client's medical record and made available to Texas Medicaid upon request. If the decision to perform a minor procedure is made during an E/M visit immediately before the surgical procedure, the E/M visit is considered a routine preoperative service and is not separately billable.

Physicians who provide only preoperative services for surgical procedures with a 10- or 90-day global period may submit claims using the surgical procedure code with the identifying modifier 56. Reimbursement will be limited to a percentage of the fee for the surgical procedure.

E/M services that are provided during the preoperative period (one day before or the same day) of a major surgical procedure (90-day global period) and result in the initial decision to perform the surgical procedure may be considered for reimbursement when billed with modifier 57. The client's medical record must clearly indicate when the initial decision to perform the procedure was made.

Intraoperative Services

Physicians who perform a surgical procedure with a 10- or 90-day global period but do not render postoperative services must bill the surgical procedure code with modifier 54. Modifier 54 indicates that the surgeon provided the surgical care only. Documentation in the medical record must support the transfer of care and must indicate that an agreement has been made with another physician to provide the postoperative management.

Postoperative services

Postoperative services that are directly related to the surgical procedure are included in the global surgical fee and are not reimbursed separately. Postoperative services include, but are not limited to, all of the following:

- Postoperative follow-up visits (any place of service)
- Postoperative pain management
- Miscellaneous services, including:
  - Dressing changes
  - Local incision care

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Platelet gel
- Removal of operative packs
- Removal of cutaneous sutures, staples, lines, wires, drains, casts, or splints
- Replacement of vascular access lines
- Insertion, irrigation, and removal of urinary catheters, routine peripheral intravenous lines, nasogastric tubes, and rectal tubes
- Changes or removal of tracheostomy tubes

Note: *Removal of postoperative dressings or anesthetic devices is not eligible for separate reimbursement as the removal is considered part of the allowance for the primary surgical procedure.*

If the surgeon provides the surgery and only the postoperative care for a procedure that has a 10- or 90-day global period, the surgeon must include the following details on the claim form:

- The surgical procedure, date of the surgery, and modifier 54, which indicates that he or she was the surgeon.
- The surgical procedure, date of service, and modifier 55 to denote the postoperative care.

Note: *Providers must not submit a claim for the postoperative care until after the client has been seen during a face-to-face follow-up visit.*

When a transfer of care occurs for postoperative care for procedures that have a 10- or 90-day global period, the following conditions apply:

- When transfer of care occurs immediately after surgery, the surgeon or other provider assuming in-hospital postoperative care must bill subsequent care procedure code 99231, 99232, or 99233.
- When the transfer of care occurs after hospital discharge, the surgeon or other provider who provides postdischarge care must bill the appropriate surgical code with modifier 55. Reimbursement will be limited to a percentage of the allowable fee for the surgical procedure.
- Documentation in the medical record must include all of the following:
  - A copy of the written transfer agreement.
  - The dates the care was assumed and relinquished.
- The claim must indicate in the comments field of the claim form the dates on which care was assumed and relinquished, and the units field must reflect the total number of postoperative care days provided. Claims that are submitted on the CMS-1500 paper claim form must include the date of surgery in Block 14 and the dates on which care was assumed and relinquished in Block 19.

Staged or related surgical procedures or services that are performed during the postoperative period may be reimbursed when they are billed with modifier 58. A postoperative period will be assigned to the subsequent procedure. Documentation must indicate that the subsequent procedure or service was not the result of a complication and any of the following:

- It was planned at the time of the initial surgical procedure.
- It is more extensive than the initial surgical procedure.
- It is for therapy following an invasive diagnostic surgical procedure.

Note: *Modifier 58 does not apply to procedure codes that are already defined as staged or sessioned services in the Current Procedural Terminology (CPT) Manual (e.g., 65855 or 66821).*

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Hospital visits by the surgeon during the same hospitalization as the surgery are considered to be related to the surgery and, as a result, not separately billable; however, separate payment for such visits can be allowed if any of the following conditions apply:

- Immunotherapy management is provided by the transplant surgeon. Immunosuppressant therapy following transplant surgery is covered separately from other postoperative services, so postoperative immunosuppressant therapy is not part of the global fee allowance for the transplant surgery. This coverage applies regardless of the setting.
- Critical care is provided by the surgeon for a burn or trauma patient.
- The hospital visit is for a diagnosis that is unrelated to the original surgery.

E/M services that are provided by the same provider for reasons that are unrelated to the operative surgical procedure may be considered for reimbursement if they are billed with modifier 24. The submitted documentation must substantiate the reasons for providing E/M services.

- Modifier 24 may be billed with modifier 25 if a significant, separately identifiable E/M service that was performed on the day of a procedure falls within the postoperative period of another unrelated procedure.
- Modifier 24 may be billed with modifier 57 if an E/M service that was performed within the postoperative period of another unrelated procedure results in the decision to perform major surgery.

Return Trips to the Operating Room

Return trips to the operating room for a repeat surgical procedure on the same part of the body may be considered for reimbursement when billed with modifiers 76 and 77. Billing with modifier 76 or 77 initiates the beginning of a new global period. Medical record documentation must support the need for a repeat procedure.

All surgical procedure codes with a predefined limitation (e.g., once per lifetime, one every 5 years) must not be submitted with modifier 76 or 77.

For modifiers 76 and 77, the repeated procedure must be the same as the initial surgical procedure. The repeat procedure must be billed with the appropriate modifier. The reason for the repeat surgical procedure should be entered in the narrative field on the claim form.

Return trips to the operating room for surgical procedures that are related to the initial surgery (i.e., complications) may be considered for reimbursement when they are billed with modifier 78 by the same provider.

- When a surgical procedure has a 0-day global period, the full value of the surgical procedure will be reimbursed; when the procedure has a 10- or 90-day global period only the intraoperative portion will be reimbursed.
- When an unlisted procedure is billed because no code exists to describe the treatment for the complications, reimbursement is a maximum of 50 percent of the value of the intraoperative services that were originally performed.

Reimbursement for the postoperative period of the first surgical procedure includes follow-up services from both surgical procedures, and no additional postoperative reimbursement is allotted. The global period will be based on the first surgical procedure.

Billing with modifier 78 does not begin a new global period.

Surgical procedures that are performed by the same provider during the postoperative period may be considered for reimbursement when they are billed with modifier 79 for any of the following:

- When the same procedure is performed with a different diagnosis.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- When the same procedure is performed on the left and right side of the body in different operative sessions and that procedure is billed with the RT or LT modifier.
- When a different procedure is performed with the same diagnosis.
- When a different procedure is performed with a different diagnosis.

Billing with modifier 79 initiates a new global surgical period.

9.2.74.7 Multiple Surgeries

Medicaid payment for multiple surgeries is based on the following guidelines:

- When two surgical procedures are performed on the same day at the same operative session, the primary procedure (such as the higher paying procedure) is paid at the full TMRM allowance. Secondary procedures performed on the same day are paid at half of the TMRM allowance when medically justified.
- Surgical procedures performed at different operative sessions on the same day are paid at the full TMRM allowance for each primary procedure at each session.
- Vaginal deliveries followed by tubal ligations are considered different operative sessions and are paid at full allowance for each primary procedure at a different session (i.e., both vaginal delivery and tubal ligation are paid at full allowance).
- Procedure code 58611 performed in conjunction with a Cesarean section is reimbursed at full allowance in cases where the allowance already represents half of the primary procedure.
- When a surgical procedure and a biopsy on the same organ or structure is done on the same day, the charges will be reviewed and reimbursement will be made only for the service with the higher of the allowed amounts.

9.2.74.8 Office Procedures

CMS has identified certain surgical procedures that are more appropriately performed in the office setting rather than as outpatient hospital, ASC/HASC procedures. The following list of surgical procedure codes should be billed in POS 1 (physician's office). The medical necessity and/or special circumstances that dictate that these surgical procedures be performed in a POS other than the office must be documented on the claim. These surgical procedures are evaluated on a retrospective basis that may cause recoupment and/or adjustment of the original claim payment. This list is not all inclusive.

Procedure Codes		
Excision benign lesions	**Excision malignant lesions**	**Manipulation (urethral)**
11400	11600	53600
11401	11601	53601
11402	11602	53620
11403	11603	53621
11404	11604	53660
11420	11620	53661
11421	11621	
11422	11622	
11423	11623	
11440	11624	
11441	11640	
11442	11641	

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Procedure Codes		
11443	11642	
11444	11643	
	11644	
Simple repairs	**Endoscopy**	**Biopsy (tongue)**
28010	31505	41100
28011		
Lesions (penile)	**Lesions (eyelid)**	
54060	67801	

9.2.74.9 Orthopedic Hardware

Reimbursement for the orthopedic hardware (e.g., buried wire, pin, screw, metal band, nail, rod, or plate) is part of the surgeon's global fee or the facility's payment group. The hardware is not reimbursed separately to either the surgeon or the facility.

The removal of orthopedic hardware is not payable to the same provider who inserted it, if removed within the global operative care period of the original insertion.

Services for removal of orthopedic hardware may be reimbursed separately after the global post operative care period.

9.2.74.10 Second Opinions

Texas Medicaid benefits include payment to physicians when eligible clients request second opinions about specific problems. The claim must be coded with the appropriate office or hospital visit codes, and the notation "Client Initiated Second Opinion" should be identified in Block 24D of the CMS-1500 paper claim form.

Refer to: Subsection 9.2.60.4.4, "Office and Outpatient Consultation Services" in this handbook.

9.2.74.11 Supplies, Trays, and Drugs

Payment to physicians for supplies is not allowed under Texas Medicaid. All supplies, including anesthetizing agents, inhalants, surgical trays, or dressings are included in the surgical payment on the day of surgery when the surgery is performed in the office or home setting.

Reimbursement for office visits includes overhead for supplies. If any of these items are submitted separately, they are denied as included in the surgical fee. If the supplies are submitted with a place of service (POS) other than the office, these supplies are denied as services that must be billed by the hospital, or as services that are included in nursing facility charges.

Silver nitrate applicators, used to treat granulated tissue around gastrostomy tubes and tracheostomies, are considered part of the office/hospital visit. Silver nitrate applicators are not a benefit for home use.

9.2.75 Telemedicine Services

Telemedicine services are a benefit of Texas Medicaid.

Refer to: The *Telecommunication Services Handbook* (*Vol. 2, Provider Handbooks*) for information about telemedicine services.

9.2.76 * Therapeutic Apheresis

The following conditions must be met for therapeutic apheresis:

- To perform the medical services, including all nonphysician services, and to respond to medical emergencies at all times during client care, direct supervision by a physician is required.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Each client must be under the care of a physician.

Procedure codes 36511, 36512, 36513, 36514, and 36516 are limited to the following diagnosis codes:

[Revised] Diagnosis Codes

Procedure code 36516 may be considered for reimbursement when billed for the low density lipoprotein (LDL) apheresis (such as Liposorber LA 15) or the protein A immunoadsorption (such as Prosorba) columns.

The protein A immunoadsorption column is indicated for use in either of the following cases:

- Clients who have a platelet count of less than 100,000 mm3.
- Adult clients who have signs and symptoms of moderate to severe rheumatoid arthritis with long-standing disease who have failed, or are intolerant to, DMARDs.

The LDL apheresis column is indicated for use in clients who have severe familial hypercholesterolemia whose cholesterol levels remain elevated despite a strict diet and ineffective or untolerated maximum drug therapy. Coverage is considered for the following high-risk population, for whom diet has been ineffective and maximum drug therapy has either been ineffective or not tolerated:

- Functional hypercholesterolemia homozygotes with LDL-C > 500 mg/dL.
- Functional hypercholesterolemia heterozygotes with LDL-C > 300 mg/dL.
- Functional hypercholesterolemia heterozygotes with LDL-C > 200 mg/dL and documented coronary heart disease.

Baseline LDL-C levels are to be obtained after the client has had, at a minimum, a six-month trial on an American Heart Association (AHA) Step II diet or equivalent and maximum tolerated combination drug therapy designed to reduce LDL-C. Baseline lipid levels are to be obtained during a two- to four-week period and should be within 10 percent of each other, indicating a stable condition.

Therapeutic apheresis using the LDL apheresis column may be reimbursed for diagnosis code E780.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Apheresis is denied for all other diagnosis codes. Other diagnosis codes can be reviewed by the TMHP Medical Director or designee on appeal with documentation of medical necessity.

Laboratory work before and during the apheresis procedure is covered when apheresis is performed in the outpatient setting (POS 5). Laboratory work billed in conjunction with apheresis performed in the inpatient setting (POS 3) is included in the DRG reimbursement and is not paid separately.

9.2.77 Therapeutic Phlebotomy

Therapeutic phlebotomy is a treatment whereby a prescribed amount of blood is withdrawn for medical reasons. Conditions that cause an elevation of the red blood cell volume or disorders that cause the body to accumulate too much iron may be treated by therapeutic phlebotomy.

Therapeutic phlebotomy is a benefit of Texas Medicaid and may be billed using procedure code 99195. This procedure code should be used only for the therapeutic form of phlebotomy and not for diagnostic reasons.

Reimbursement of therapeutic phlebotomy is limited to the following diagnosis codes:

Diagnosis Codes							
D45	D649	D750	D751	E800	E801	E8020	E8021
E8029	E8310	E83110	E83118	E8319	P611		

Therapeutic phlebotomy will be automatically denied for all other diagnosis codes.

9.2.78 Therapeutic Radiopharmaceuticals

Therapeutic radiopharmaceuticals, when used for therapeutic treatment, are a benefit of Texas Medicaid.

The following procedure codes may be submitted for therapeutic radiopharmaceuticals:

Procedure Codes								
79403	A9513	A9542	A9543	A9563	A9564	A9590	A9600	A9699

9.2.78.1 Prior Authorization for Therapeutic Radiopharmaceuticals

Prior authorization is required for ibritumomab tiuxetan procedure codes A9542 and A9543.

Only one ibritumomab tiuxetan (procedure codes A9542 and A9543) may be prior authorized and reimbursed once per lifetime, any provider with one of the following diagnosis codes:

Diagnosis Codes							
C8259	C8399	C8499	C84A9	C84Z9	C8519	C8529	C8589
C8599							

Ibritumomab tiuxetan may be prior authorized when all of the following criteria are met:

- Client has a diagnosis of either a low-grade follicular or transformed B-cell non-Hodgkin's lymphoma.
- Client has failed, relapsed, or become refractory to conventional chemotherapy and the following is documented:
  - Marrow involvement is less than 26 percent.
  - Platelet count is 100,000 cell/mm3 or greater.
  - Neutrophil count is 1,500 cell/mm3 or greater.
- Client has failed a trial of rituximab.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Prior authorization must be submitted through Special Medical Prior Authorization department.

Prior authorization is required for lutetium lu 177 dotatate (Lutathera) procedure code A9513.

Lutetium lu 177 dotatate (Lutathera) procedure code A9513 will be considered with documentation that meets all of the following criteria:

- The client has a diagnosis of somatostatin receptor-positive gastroenteropancreatic neuroendocrine tumors (GEP-NETs) (one of the following diagnosis codes must be submitted on the prior authorization request: C7A00, C7A010, C7A011, C7A012, C7A019, C7A020, C7A021, C7A022, C7A023, C7A024, C7A025,C7A026,C7A029, C7A092, C7A094, C7A095, C7A096).
- The client is 18 years of age or older.
- The client is not pregnant or breastfeeding.
- The official pathology report documents a GEP-NET with Ki67 index less than 20 percent.
- The disease is metastatic, or locally advanced and unresectable as indicated by one of the following:
  - Positive somatostatin receptor scintigraphy with correlative magnetic resonance imaging (MRI)
  - Computed tomography (CT) imaging of metastatic measurable disease
  - 68-Ga-Dotate positron emission tomography (PET) scan positive for metastatic disease
- The client experienced disease progression while on a long-acting somatostatin analog (e.g. octreotide, lanreotide).
- The client has not had prior treatment with Peptide Receptor Radionuclide Therapy (PRRT), and has not had prior external radiation therapy to more than 25 percent of the bone marrow.
- The documentation includes an oncologist's or nuclear medicine specialist's complete written order and prescription for Lutetium lu 177 dotatate intravenous infusion.
- A treatment plan that includes all of the following documentation:
  - Lutetium lu 177 dotatate 7.4 GBq (200 mCi) every 60 days for a total of 4 doses that is administered in a facility under the control of a physician who is licensed and authorized to administer radiopharmaceuticals
  - The recommended use of premedication and concomitant medications of somatostatin analogs, antiemetics, and specialized amino acid solution
  - The restrictions and usage of long- and short-acting octreotide agents before, during, and after lutetium lu 177 dotatate intravenous infusions
  - Details of withholding the treatments for contraindicated circumstances including, but not limited to:
    - Thrombocytopenia
    - Anemia neutropenia
    - Renal toxicity
    - Hepatotoxicity
    - Other non-hematologic toxicities

Prior authorization requests must be submitted to the TMHP Prior Authorization Department by mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Refer to: Subsection 5.5.1.2, "Document Requirements and Retention" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*) for additional information about electronic signatures.

An SMPA Request Form must be completed, signed, and dated by the prescribing provider. The SMPA form will not be accepted after 90 days from the date of the prescribing provider's signature.

The completed SMPA Request Form must be maintained by the prescribing provider in the client's medical record and is subject to retrospective review.

Section C of the SMPA Request Form under Statement of Medical Necessity must contain the following:

- Documentation of the client's dosage
- The administration schedule
- The number of injections to be administered during the prior authorization period
- The requested units/millicuries per injection
- The dosage calculation

To facilitate the determination of medical necessity and avoid unnecessary denials, the prescribing provider must submit correct and complete information, including documentation of medical necessity for the equipment or supplies requested, the procedure codes, and the numerical quantities for services requested. The provider must maintain documentation of medical necessity in the client's medical record.

Prior authorization must be requested through the Special Medical Prior Authorization (SMPA) department with appropriate documentation.

Requests can be mailed or faxed to:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12365-A Riata Trace Parkway
Austin, TX 78727-6418
Fax: 1-512-514-4213

Requests for prior authorization can also be submitted online through the TMHP website at www.tmhp.com.

9.2.78.1.1 Reimbursement Limitations for Ibritumomab tiuxetan and Lutetium lu 177 dotatate

Ibritumomab tiuxetan is indicated for the treatment of clients that have failed rituximab and have CD20 antigen-expressing relapsed or refractory, low grade, follicular, or transformed non-Hodgkin's lymphoma or refractory non-Hodgkin's lymphoma.

Ibritumomab tiuxetan may only be considered once per lifetime, any provider, and only one of the agents.

Lutetiem Lu 177 dotatate (Lutathera) intravenous injection (procedure code A9513) is indicated for the treatment of adult clients who are 18 years of age or older with a diagnosis of somastatin receptor-positive gastroenteropancreatic neuroendocrine tumors (GEP-NETs), including foregut, midgut, and hindgut neuroendocrine tumors. For all other indications, Lutetiem Lu 177 dotatate (Lutathera) injection for intravenous use is not proven to be medically effective and is considered experimental. Lutetium lu 177 dotatate (Lutathera) must be administered under the control of an oncologist or a nuclear medicine specialist who is licensed and authorized to administer radiopharmaceuticals and must be administered in an outpatient setting.

Lutetium lu 177 dotatate (Lutathera) procedure code A9513 is limited to one service every 60 days for a total of four services per lifetime, any provider.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

9.2.78.2 Other Limitations on Therapeutic Radiopharmaceuticals

Strontium-89 chloride (procedure code A9600) may be reimbursed when submitted with diagnosis code C7951 or C7952.

Strontium-89 chloride is limited to a total of 10 mci intravenously injected every 90 days, any provider.

Sodium phosphate P-32, therapeutic (procedure code A9563) may be reimbursed when submitted with the following diagnosis codes:

Diagnosis Codes							
C7951	C7952	C9110	C9112	C9192	C91Z2	C9292	C92Z2
C9512	C9592	D45					

Chromic phosphate P-32 suspension (procedure code A9564) may be reimbursed when submitted with diagnosis codes C782 and C786.

An appropriate modifier may be used when billing for services more than once per day, same provider.

Iodine i-131 iobenguane procedure code A9590 is a benefit for clients who are 12 years of age and older.

Iodine i-131 iobenguane is a radiopharmaceutical indicated for the treatment of adult and pediatric clients who are 12 years of age and older with iobenguane scan positive, unresectable, locally advanced or metastatic pheochromocytoma or paraganglioma who require systemic anticancer therapy. Iodine i-131 iobenguane should be handled with appropriate safety measures to minimize radiation exposure and should be administered by or under the control of physicians who are licensed and authorized to administer radiopharmaceuticals.

Procedure code A9590 is limited to the following diagnosis codes:

Diagnosis Codes						
C7410	C7411	C7412	C755	C7A1	C7A8	D447

9.2.79 Urethral Dilation

If urethral dilation (procedure code 53600, 53601, 53605, 53620, 53621, 53660, 53661, or 53665) is billed on the same date of service by the same provider as procedure code 52000, the charges will be combined and processed as procedure code 52281.

Urethral dilation will be denied when billed on the same date of service by the same provider as any other cystoscopy.

9.2.80 Ventilation Assist and Management for the Inpatient

Use the following procedure codes and guidelines for reimbursement of ventilation assist and management: 94002 and 94003. Procedure codes 94002 and 94003 may be reimbursed only when the client is in observation or inpatient status. Respiratory care billed in any other POS will be denied.

Use the ventilation assist and management subsequent code (procedure code 94003) when respiratory support must be established for a patient in the postoperative period in the hospital (POS 3). Subsequent days of ventilation assistance are payable when documentation indicates a respiratory problem.

When the use of a ventilator is required as part of a major surgery, initial ventilation assist and management will be denied. It should be billed as ventilation assist and management subsequent procedure code 94003.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Procedure codes 94002 and 94003 apply only to hospital care for critically ill patients. They do not apply to routine recovery room ventilation services. Separate support service charges billed on the same day as ventilatory support are denied (for example, arterial or venous punctures; interpretations of arterial blood gases; or pulmonary function tests and management of the hemodynamic functions of the patient).

Use ventilation assist and management and initiation of pressure or volume preset ventilators for assisted or controlled breathing–first day (procedure coed 94002) when respiratory support must be established for a patient. It is a one-time charge per hospitalization that may be paid when the claim documents that a respiratory problem exists (for example, respiratory distress, asphyxia). After the first day, use subsequent days (procedure code 94003).

9.2.81 Wearable Cardiac Defibrillator (WCD)

A WCD (procedure codes 93292, 93745, and K0606) are a benefit of Texas Medicaid.

The rental of a WCD (procedure code K0606) is limited to once per month and must be submitted with modifier RR.

Modifier 25 may be used to identify a significant separately identifiable evaluation and management service performed (for example, different diagnosis) on the same day as the initial set up of a WCD by the same provider for the same client. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client's medical record and made available to Texas Medicaid upon request.

Procedure code 93292 will be denied as part of procedure code 93745 when submitted on the same date of service by any provider.

Procedure codes 93000, 93005, 93010, 93040, 93041, and 93042 will be denied as part of procedure code 93745 when submitted on the same date of service by any provider.

9.2.81.1 Prior Authorization for WCD

Prior authorization is required for the rental of WCD (procedure code K0606).

The WCD may be prior authorized for clients at high-risk of sudden cardiac arrest who meets one of the following criteria:

- Has completed electrophysiologic studies to determine the type of arrhythmia present and confirm that a wearable cardiac defibrillator is the best course of treatment.
- Is contraindicated for an implantable cardiac defibrillator (ICD) at the current time, such as with a systemic infection.
- Is waiting for ICD implantation.
- Is waiting for ICD implantation and is undergoing treatment for a systemic infection.
- Has had an ICD explantation due to pocket infection.
- Is waiting for heart transplantation.
- Has self-limiting arrhythmias from iatrogenic (drug loading with potentially pro-arrhythmic medications) or other causes.
- Has a familial or inherited condition with a high risk of life-threatening ventricular tachyarrhythmias, such as long QT syndrome or hypertrophic cardiomyopathy.
- Has had either documented prior myocardial infarction or dilated cardiomyopathy and a measured left ventricular ejection fraction (LVEF) less than or equal to 35 percent.
- Has received a documented diagnosis of any one of the following conditions:

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Clinically inducible hemodynamically significant ventricular tachycardia (HSVT) or ventricular fibrillation (VF), where drug treatment has been ineffective, or the side effects of the medication used to treat the arrhythmia are intolerable.
- Inducible VT or VF despite endocardial ablation or surgical excision when drug therapy has failed.
- VF or syncopal ventricular tachycardia.
- Specific ST-T wave changes, borderline CPK-MB isoenzymes, and dangerous ventricular arrhythmias are exhibited in a postmyocardial infarction patient.
- VT caused by ischemic heart disease not associated with an acute myocardial infarction, and where drug therapy or surgical therapy has failed.
- Recurrent syncope of undetermined etiology in a patient with HSVT or VF induced by EPS in whom no effective or tolerated drug is available or appropriate. Symptoms must be linked to HSVT or VF.
- Recurrent syncope of undetermined etiology with positive EPS studies where ventricular arrhythmia is documented as the cause.
- Palliative treatment for VT or VF in clients awaiting heart transplant.

The WCD is contraindicated in clients with an active ICD and should not be used in clients who meet the following criteria:

- Have a vision or hearing problem that may interfere with the perception of alarms or messages from the WCD.
- Is taking medications that would interfere with responding to the alarms or message from the WCD by depressing buttons.
- Is unwilling or unable to wear the device continuously, except when bathing or showering.
- Is pregnant or breastfeeding.
- Is of childbearing age and is not attempting to prevent pregnancy.

The WCD is considered investigational and not medically necessary for all other indications, including but not limited to, the following:

- Clients with drug-refractory class IV congestive heart failure who is not candidates for heart transplantation.
- Clients who have a history of psychiatric disorders that interfere with the necessary care and follow-up.
- Clients in whom a reversible triggering factor for VT/VF can be definitely identified, such as ventricular tachyarrhythmias in evolving acute myocardial infarction or electrolyte abnormalities.
- Clients with terminal illnesses.

A completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form requesting the DME and/or supplies must be signed and dated by a physician familiar with the client before requesting prior authorization for all DME equipment and supplies. The completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form must include the procedure codes and quantities for services requested.

Note: *A physician assistant (PA), certified nurse practitioner (CNP), or clinical nurse specialist (CNS) is not allowed to sign the Title XIX form to lease a WCD.*

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form with the original dated signature must be maintained by the prescribing physician in the client's medical record. A copy of the completed, signed, and dated form must be maintained by the DME provider in the client's medical record.

To complete the prior authorization process by paper, the DME provider must fax or mail the completed form to the Home Health Services Prior Authorization Department at 1-512-514-4209 or in writing to the following address:

Texas Medicaid & Healthcare Partnership
Home Health Services
PO Box 202977
Austin, TX 78720-2977

When a WCD is not covered as a home health service, it may be considered for reimbursement through the CCP for clients who are 20 years of age and younger. All of the following criteria must be met for CCP reimbursement for a WCD:

- The client is eligible for CCP benefits.
- The documentation submitted with the request supports the determination of medical necessity based on the criteria listed in the policy.
- Federal financial participation is available.
- The client's cardiac status would be compromised without the requested equipment.
- The requested equipment is safe in the home setting.

Note: *For clients who are 21 years of age or older, requests for a WCD that does not meet the criteria through Title XIX Home Health Services may be considered under the Texas Medicaid Home Health—Durable Medical Equipment (DME) Exceptional Circumstances process.*

Rental of an automatic external defibrillator, with integrated electrocardiogram analysis, garment type (procedure code K0606) may be prior authorized (initially for up to three months) with documentation supporting the medical necessity and appropriateness of the device.

The provider may be reimbursed only for the length of time the device is used even though the authorization for the rental may be for a longer period of time.

The rental of the device includes the monitor, electrode belt (four sensors or electrodes and three treatment pads), garment, two rechargeable batteries, a battery charger and modem.

The purchase of a replacement battery (procedure code K0607), the purchase of a garment (procedure code K0608), and electrodes (procedure code K0609) will be considered part of the rental.

Prior authorization extensions for WCDs beyond the initial three-month rental may be considered by the medical director when documentation supports continued medical necessity for the device. Providers must submit new documentation to support continued medical necessity for an extension of the rental to be considered.

To facilitate the determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including documentation of medical necessity for the device and is subject to retrospective review. The physician must maintain documentation of medical necessity in the client's medical record. The requesting DME provider may be asked for additional information to clarify or complete a request for the WCD.

Retrospective review may be performed to ensure documentation supports the medical necessity of the service when billing the claim.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

9.2.82 Wound Care Management

Wound care management includes the care of acute and chronic wounds, which include, but are not limited to, open ulcers (venous pressure or diabetic ulcers), fistulas, or erosion of skin related to cancer. Acute and chronic wounds are defined as the following:

- Acute wounds: Wounds taking less than or up to 30 days for complete healing
- Chronic wounds: Wounds taking more than 30 days for complete healing

Wound care includes the following:

- Optimization of nutritional status
- Debridement by any means to remove devitalized tissue
- Maintenance of a clean, moist bed of granulation tissue
- Necessary treatment to resolve any infection that may be present
- Education of the client or their caregiver on how to clean and properly dress their wound

For clients with an ulcer, wound care may include the following:

- Frequent repositioning of a client who has a pressure ulcer
- Off-loading pressure and good glucose control for a client who has a diabetic ulcer
- Establishment of adequate circulation for a client who has an arterial ulcer
- Use of a compression system for clients who have a venous ulcer

Wound care management includes first- and second-line therapies. First-line wound care is used for acute wounds. If the wound does not improve with first-line treatment, adjunctive second-line therapy may be used. Measurable signs of improved healing can be used as outcome measures in a wound care treatment plan and include the following:

- A decrease in wound size, either in surface area or volume
- A decrease in amount of exudate
- A decrease in amount of necrotic tissue

Wound care must be performed by a licensed health professional who is qualified to safely and effectively provide the medically necessary care. Providers are expected to exercise their clinical judgment to render the most appropriate care in accordance with their scope of practice as designated by their regulatory and governing boards. Education of the client or their caregiver during wound care interventions is a standard of care. Clients or their caregivers should be able to explain why each intervention is being performed for their specific type of wound.

All wound care services require documentation of the wound, and a comprehensive treatment plan is required to be maintained in the client's medical record as outlined in the documentation requirements section. Providers will document progress with each client encounter and use the measurable signs of healing to determine the degree of improvement.

The following services are not a benefit of Texas Medicaid:

- Infrared therapy
- Ultraviolet therapy
- Topical hyperbaric oxygen therapy
- Low-energy ultrasound wound cleanser (MIST therapy)

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Services that are submitted as debridement but do not include the removal of devitalized tissue. Examples include removal of non-tissue integrated fibrin exudates, crusts, biofilms, or other materials from a wound, without the removal of tissue.
- Electrical stimulation and electromagnetic therapy

9.2.82.1 First-Line Wound Care Therapy

First-line wound care therapy includes the following:

- Cleansing, antibiotics, and pressure off-loading
- Compression
- Debridement
- Dressing
- Whirlpool for burns

9.2.82.1.1 Cleansing, Antibiotics, and Pressure Off-loading

Wound cleansing helps to create an optimal healing environment and decreases the potential for infection by loosening and removing cellular debris and residual topical agents from previous dressings.

Wound cleansing agents may include normal saline, commercial wound cleansers, providone iodine, hydrogen peroxide, or sodium hydrochlorite. Cleansing solutions and methods vary based on effectiveness and individual client needs.

Systemic or topical antibiotics may be used to prevent or treat wound infections and to aid in the healing of wounds.

Pressure off-loading devices, such as pillows, boots, mattresses, and protectors, may also be used as part of first-line wound care therapy to prevent or relieve pressure on the wound.

Procedure code 29445 may be reimbursed for pressure off-loading performed as part of wound care management.

9.2.82.1.2 Compression

Compression performed as a part of wound care management is a benefit and may be reimbursed when billed with procedure code 29580 or 29581.

9.2.82.1.3 Debridement

Wound debridement includes the pre-debridement wound assessment, the debridement, and the post-procedure instructions provided to the client on the date of service.

Selective debridement consists of the following:

- Conservative sharp debridement
- High-pressure lavage to selected areas

Non-selective debridement consists of the following:

- Autolytic debridement
- Blunt debridement
- Enzymatic debridement
- Hydrotherapy and wound immersion rossr
- Mechanical debridement

The following procedure codes may be reimbursed for wound debridement:

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Procedure Codes									
11000	11001	11042	11043	11044	11045	11046	11047	97597	97598
97602									

Professional services for selective wound debridement (procedure codes 97597 and 97598) may be reimbursed to a licensed physical therapist, when it is determined to be within the provider's scope of practice, and the service is prescribed by a Medicaid-enrolled supervising physician or qualified non-physician provider.

Procedure codes 16020, 16025, and 16030 may be reimbursed for debridement of partial-thickness burns.

Prior authorization is not required for debridement of partial-thickness burns (procedure codes 16020, 16025, or 16030).

Prior authorization is required for wound debridement procedure codes 11042, 11043, and 11044. A request for prior authorization must be submitted to TMHP with the Special Medical Prior Authorization (SMPA) Request Form before the procedure is performed. Providers must retain a copy of the signed and dated form in the client's medical record at the provider's place of business. The requesting provider may be asked for additional information to clarify or complete a request for the equipment/supply requested.

Requests for prior authorization for wound debridement procedure codes 11042, 11043, and 11044 must include the following documentation:

- Location of the wound
- Characteristics of the wound, which include all of the following:
  - Dimensions (diameter and depth)
  - Drainage (amount and type)
  - Related signs and symptoms (swelling, pain, inflammation)
  - Presence of necrotic tissue/slough

When submitting an initial prior authorization request, the treating provider (registered nurse, physician, physical therapist) must submit a signed and dated wound care treatment plan or letter of medical necessity that includes all the following documentation:

- Planned interventions for the problem identified
- Treatment goals
- Expected outcomes

The treatment plan or letter of medical necessity is considered current when it is signed and dated within 30 calendar days prior to or on the date the procedure is performed. Otherwise, a new treatment plan must be submitted.

Retroactive authorization requests for wound debridement performed on an urgent or emergent basis (procedure code 11042, 11043, or 11044) will be denied if not submitted within 14 calendar days, beginning the day after the procedure is performed.

For wound debridement retroactive authorization to be considered, the treatment plan or letter of medical necessity must be signed and dated within 14 calendar days beginning the day after the procedure is performed. If the treatment plan is not signed and dated within the 14-calendar-day period, the request will be denied.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

For procedure codes 11043 and 11044, at least one of the following conditions must be present and documented:

- Stage III or IV wounds
- Venous or arterial insufficiency ulcers
- Dehisced wounds or wounds with exposed hardware or bone
- Neuropathic ulcers
- Complications of surgically created or traumatic wound where accelerated granulation therapy is necessary but cannot be achieved by other available topical wound treatment

Wound debridement procedure codes 11042, 11043, and 11044 are not appropriate and will not be approved for the following:

- Washing bacteria or fungal debris from the feet
- Paring or cutting of corns or calluses
- Incision and drainage of an abscess
- Trimming or debridement of nails, or avulsion of nail plates
- Acne surgery
- Destruction of warts
- Burn debridement

Prior authorization requests must be submitted by the provider within 30 calendar days prior to, or on the date the procedure is performed. If the prior authorization request is not submitted within 30 calendar days prior to, or on the date the procedure is performed, the request will be denied. The SMPA Request Form must be signed by the requesting provider on or within 30 days prior to the requested start of service. All dates of service prior to the prescribing providers signature date will be denied.

The physician's signature on the SMPA Request Form is considered current when signed and dated within 30 calendar days prior to, or on the date the procedure is performed. If the physician's signature is not signed and dated within the 30-calendar-day period prior to or on the date the procedure is performed, the request will be denied.

Prior authorization requests for procedure codes 11042, 11043, and 11044 will be considered for three calendar months, beginning on the requested procedure date.

Retroactive authorization is required for wound debridement procedure codes 11042, 11043, and 11044 that are performed on an urgent or emergent basis. The provider must submit a request for retroactive authorization within 14 calendar days, beginning the day after the procedure is performed.

For wound debridement retroactive authorization requests, the physician's signature on the SMPA Request Form is considered current when signed and dated within 14 calendar days, beginning the day after the procedure is performed. Requests with the physician's signature not signed and dated within the 14-calendar-day period will be denied.

Prior authorization requests for subsequent debridement will be considered on a case-by-case basis with documentation of medical necessity. These requests will be reviewed by the Medical Director.

The wound debridement procedure code submitted on the prior authorization or retroactive authorization request must reflect the level of debrided tissue, e.g., partial-thickness skin, full-thickness skin, subcutaneous tissue, muscle, and/or bone, and not the extent, depth, or grade of the ulcer or wound.

9.2.82.1.4 Dressings and Metabolically Active Skin Equivalents

Wound dressings may include wet and dry dressings.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

All dressings applied to the wound during a wound debridement procedure are considered part of the service for wound debridement.

9.2.82.1.5 Whirlpool for Burns

Whirlpool is a benefit when used as first-line wound care therapy for the treatment of burn wounds.

9.2.82.2 Second-Line Wound Care Therapy

Second-line wound care therapy is limited to chronic Stage III or IV wounds and may be covered only after first-line therapy has been tried for at least 30 days without measurable signs of improved healing. First-line wound care therapy may continue as appropriate, with the addition of second line wound care measures as indicated by the client's medial condition.

Second-line wound care therapy includes the following:

- Whirlpool
- Irrigation, including pulsatile jet irrigation
- Application of metabolically active skin equivalents/skin substitutes

9.2.82.2.1 Pulsatile-Jet Irrigation

Pulsatile-jet irrigation is a benefit for the treatment of Stage III or IV wounds when other forms of treatment have failed. Removal of devitalized tissue using pulsatile-jet irrigation may be reimbursed when claims are submitted for procedure code 97597 or 97598.

9.2.82.2.2 Negative Pressure Wound Therapy (NPWT)

Negative pressure wound therapy (NPWT) procedure codes 97605, 97606, 97607, and 97608 are a benefit of Texas Medicaid for clients who are 18 years of age or older.

NPWT may be provided utilizing durable medical equipment (DME), or nondurable medical equipment to treat acute and chronic wounds that include diabetic foot ulcers, venous leg ulcers, pressure ulcer wounds, non-healing surgical wounds, non-adhering skin grafts. NPWT may consist of using a traditional computerized electric vacuum pump, or a disposable single use mechanical device which includes the collection canister and the hydrocolloid dressing with the integrated nozzle and tubing.

NPWT may promote tissue granulation and wound healing by providing a warm moist wound bed while removing excessive secretions or bacterial material from the wound and should be considered only when other treatments are not effective.

Procedure codes 97605 and 97606 include management of the exudate collection system, topical application, wound assessment, and instructions for ongoing care services.

DME and supplies are not included for procedure codes 97605 and 97606 and may be reimbursed separately.

Procedure codes 97607 and 97608 include management of the exudate collection system, topical application, wound assessment, instructions for ongoing care services, and the disposable device.

The disposable device is included with procedure codes 97607 and 97608 and is not separately reimbursed.

NWPT is contraindicated for any of the following wound types and conditions:

- Necrotic tissue with eschar present
- Untreated osteomyelitis
- Fistulas
- Wounds containing malignancy

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Exposed vasculature, nerves, anastomotic site, or organs
- Actively bleeding wounds

Prior authorization is not required for the initial 90 days of NPWT. A maximum of 36 NPWT treatments will be allowed in any 90-day period per rolling year, which will begin on the first day of the first NPWT treatment.

Prior authorization is required for more than 36 NPWT treatments within or after the initial 90 days and will be considered on a case-by-case basis with documentation of medical necessity. A request submitted to TMHP may be considered for services beyond the initial 90 days for an additional 30-day treatment period. These requests will be reviewed by the medical director.

Claims for procedure codes 97605, 97606, 97607, and 97608 must include the authorization number on the claim at the time of claim submission.

9.2.82.2.3 Skin Substitutes and Surgical Wound Preparation

The application of skin substitutes is a benefit for the treatment of chronic Stage 3 or 4 wounds that have failed to respond to standard wound care treatment after 30 days. A failed response is defined as a wound that has increased in size or depth, or has not changed in baseline size or depth, and shows no measurable signs of healing improvements after 30 days of appropriate wound-care measures.

Use of the appropriate specific skin substitute product(s) for the episode of each documented wound is expected. Compliance with the Food and Drug Administration (FDA) assessments and submitted guidelines for the specific skin substitute product(s) used is expected. Skin substitute products not used within the scope of the FDA's intended use and indications are considered experimental and/or investigational. All wound care services require documentation of the wound, and a comprehensive treatment plan is required to be maintained in the client's medical record.

The following procedure codes may be reimbursed for the application of skin substitute grafts:

Procedure Codes									
15271	15272	15273	15274	15275	15276	15277	15278		

Approved skin substitute products used in wound care services that are provided in an office-based setting will be considered for separate reimbursement when submitted with an appropriate application procedure code from the table above.

The approved skin substitute product(s) must have a published average sales price, must be FDA cleared/approved or be designated as 361 HCT/P exempt, and should be used in accordance with each product's individualized labeling and application guidelines. The approved list of skin substitute products are reviewed and updated biannually. Providers should refer to the Center for Medicare & Medicaid Services (CMS) Medicare Part B Drug Average Sales Price web page at www.cms.gov for updates to the list of approved skin substitute products.

All skin substitute products used in wound care services that are provided in a facility setting are considered part of the application services (procedure codes listed in the table above) and are not separately reimbursed.

Surgical Wound Preparation

Appropriate surgical wound preparation is expected at least once at the initiation of care, prior to placement of the skin substitute graft. Repeated use of surgical preparation services in conjunction with skin substitute application codes will be considered not reasonable or necessary and will not be reimbursed.

The following procedure codes may be reimbursed for surgical wound preparation:

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Procedure Codes							
15002	15003	15004	15005	15040	15050	15271	15272
15273	15274	15275	15276	15277	15278	G0681	G0682
G0683	G0684						

Note: *Procedure code 15005 is not a benefit for ambulatory surgical center providers.*

Limitations

The treatment of any chronic skin wound will typically last no more than 12 weeks.

Skin substitute applications and grafts are limited to 10 per episode of care in a 12-week period, per rolling year beginning on the first day of the first skin substitute application. If more than one specific product is used or a product change occurs during the 12-week period of care, the expectation remains that the cumulative number of applications will not exceed 10.

More than 10 skin substitute applications in a 12-week period will be considered on a case-by-case basis with documentation of medical necessity. These requests will be reviewed by the Medical Director.

Re-Treatment of Healed, Stage 3, or Stage 4 Chronic Wounds

Retreating healed skin wounds showing greater than 75 percent in size reduction and smaller than 0.5 square cm is not considered medically reasonable or necessary and will not be reimbursed.

Retreating a venous stasis ulcer or diabetic neuropathic foot ulcer with any skin substitute product(s) within one year of previous treatment is considered treatment failure. This unsuccessful treatment does not meet reasonable and necessary criteria for re-treatment and will not be reimbursed.

Unsuccessful treatment is defined as an increase in size or depth of an ulcer, or no change in baseline size or depth and no sign of improvement or indication that improvement is likely (such as granulation, epithelialization, or progress towards closing) for a period of 4 weeks past the start of therapy.

Contraindications

Skin substitute grafts are contraindicated for the following:

- Clients with known hypersensitivity to any component of the specific skin substitute graft (e.g., allergy to avian, bovine, porcine, or equine products).
- Skin substitute grafts will not be considered reasonable and necessary for clients with inadequate control of underlying conditions or exacerbating factors, such as the following:
- Clients with uncontrolled diabetes
- Clients with active infection
- Clients with active Charcot arthropathy of the ulcer extremity
- Clients with vasculitis
- Clients who continue smoking tobacco and have not received smoking cessation guidance from their physician

9.2.82.3 Specialized Wound Care Education

Specialized wound care education with prior authorization may be reimbursed when provided by a wound care services provider.

In addition to the education included in the standard of care, specialized wound care education can be provided by a wound care services provider (with modifier U1) for additional reimbursement. These client interactions are denoted by the addition of the modifier U1 to the Healthcare Common Procedure

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Coding System (HCPCS) procedure code or other applicable HCPCS code billed for the wound care procedure performed. When the modifier U1 is used, documentation (client chart records) should be filed with the claim.

To evaluate progress and determine the degree of improvement, the wound care provider performing the specialized education must document in the client's chart each client encounter including the education provided and a description of the client's wound using measurable signs of healing.

The documentation must include:

- A record of teaching specific to the knowledge and skills necessary for independent care of the client's wound provided to the client or their caregiver.
- An affirmative statement that the client or their caregiver has received the education.

9.2.82.3.1 Limitations of Wound Care Education

Specialized wound care education is limited to the following:

- Two claims with a wound care procedure code submitted with modifier U1 per wound occurrence in an office setting or facility
- Four claims with modifier U1 per wound occurrence in an ambulatory surgical center

Each wound occurrence is defined as a three-month rolling time period. Additional prior authorization requests for more than the limitation number of claims submitted for wound occurrence will be considered on a case-by-case basis with documentation of medical necessity. These requests will go to a clinical review for consideration.

9.2.82.3.2 Reimbursement

Specialized wound care education will be limited to four wound care education services per 90 days by the same provider for services rendered in the ambulatory surgical center and may be reimbursed with the following procedure codes with modifier U1:

Procedure Codes						
11000	11042	11043	11044	15002	15004	15040
15050	15271	15273	15275	15277	16020	16025
16030	29445	29580	29581			

Specialized wound care education will be limited to two wound care education services per 90 days by the same provider for services rendered in the office, home, or facility setting and may be reimbursed with the following procedure codes with modifier U1:

Procedure Codes						
97597	97598	97602	97605	97606	97607	97608

9.2.82.4 Documentation Requirements

For all wound care management services, documentation that supports the medical necessity of the service must be maintained in the client's medical records, which includes but is not limited to the following information:

- Accurate diagnostic information that pertains to the underlying diagnosis and condition as well as any other medical diagnoses and conditions, which include the client's overall health status.
- Appropriate medical history related to the current wound, including the following:
- Wound location

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Wound measurements, which includes length, width, and depth, any tunneling and/or undermining
- Wound color, drainage (type and amount), and odor, if present
- The prescribed wound care regimen, which includes frequency, duration, and supplies needed
- Treatment for infection, if present
- All previous wound care therapy regimens, if appropriate
- The client's use of a pressure reducing support surface, mattress, and/or cushion, when appropriate

Documentation maintained in the client's medical record must support the level of debridement service provided.

Fewer than five surgical debridements that involve removal of muscle or bone are typically required for management of most wounds. Documentation that is maintained in the client's medical record must support the number of debridements involving muscle or bone that are performed.

Wound care services providers must document the specialized education covered and the client's progress in the client's wound care education treatment plan with each billed encounter using the U1 modifier.

The measurable signs of healing described will be used as outcome measures to determine the degree of improvement as a result of such education.

9.2.82.4.1 Skin Substitutes

Documentation maintained in the client's medical record must support the need for skin substitute applications and the product used.

Documentation for all wound care treatments involving the application of skin substitute products must include, but is not limited to, the following:

- Wound treatments are accompanied by the appropriate adjunctive measures, and identify the specific adjunctive therapies being provided to the client as part of the wound treatment regimen.
- Clients who use tobacco must satisfy one of the following documentation requirements:
  - The client will have ceased smoking or have refrained from systemic tobacco intake for at least 4 weeks prior to beginning skin substitute applications and during the conservative wound care.
  - Smoking history, cessation counseling on the effects of smoking on surgical outcomes, treatment for smoking cessation (if applicable), and the outcome of counseling must be recorded in the client's medical record.
- Adequate circulation/oxygenation to support tissue growth/wound healing must be present as evidenced by physical examination (e.g., Ankle-Brachial Index [ABI] of no less than 0.60, toe pressure greater than 30 millimeters of mercury [mmHg]).
- The wound has a skin deficit at least 1.0 square centimeter in size.
- For diabetic foot ulcers, the client's medical record reflects a diagnosis of Type 1 or Type 2 diabetes.
- Partial or full thickness ulcers must have a clean granular base without tendon and or muscle involvement, bone exposure, or sinus tracts.
- Documentation of the wound's response to the treatment is required at least every 30 days for each treatment episode. The documentation requirements must include measurements of the initial wound, measurements at the completion of appropriate wound care every 30 days, and measurements immediately prior to placement and with each subsequent placement of the skin substitute.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Wound care services that include the use of skin substitutes must be FDA cleared/approved or be designated as 361 HCT/P exempt and should be used in accordance with each product's individualized labeling and application guidelines. Skin substitute products not used within the scope of the FDA's intended use and indications are considered experimental, investigational, or both.

9.2.82.5 Exclusions

The following services are not a benefit of Texas Medicaid:

- Separately billed, repeated use of a skin substitute product after 12 weeks for a single wound or episode
- Skin substitute grafting for partial thickness loss with the retention of epithelial appendages is not covered, as epithelium will repopulate the deficit from the appendages, negating the benefit of over grafting

9.3 Collaborative Care Model (CoCM)

The Collaborative Care Model (CoCM) is a systematic approach to the treatment of behavioral health conditions (mental health or substance use) in primary care settings. The model integrates the services of behavioral health care managers (BHCMs) and psychiatric consultants with primary care provider oversight to proactively manage behavioral health conditions as chronic diseases, rather than treating acute symptoms.

CoCM services are benefits for persons of all ages who are enrolled in Texas Medicaid and who have a mental health or substance use condition to include a pre-existing or suspected mental health or substance use condition, when provided by a physician, physician assistant, nurse practitioner, clinic or group practices, federally qualified health center (FQHC), or rural health clinic (RHC) (henceforth, referred to as the Primary Care Provider).

Prior to delivering CoCM services, the primary care provider must attest in the Provider Enrollment and Management System (PEMS) that their practice location has an established CoCM program as described in this section. To ensure continued adherence to the CoCM core principles and the specific functional requirements of the model, the primary care provider must also re-attest in PEMS at the time of enrollment revalidation.

CoCM services must be provided under the direction of the primary care provider and are benefits when provided in an office, outpatient hospital, inpatient hospital, skilled nursing facility or intermediate care facility, extended care facility or other locations.

An episode of care of CoCM services begins when the person receiving services is referred by the primary care provider to the BHCM for CoCM services and ends after 12 calendar months (initial calendar month plus 11 subsequent calendar months) of services or earlier if treatment goals are met. A new episode of care must be initiated when either:

- The person receiving services is referred to a behavioral health provider for ongoing treatment of the behavioral health condition.
- There is a break in services, which is defined as no CoCM services provided for six consecutive calendar months.

CoCM services are individually delivered, time-based, monthly services that include outreach and engagement, completing an initial assessment, developing an individualized and person-centered plan of care, monitoring and tracking a person's progress using a registry, providing brief interventions and other focused treatments, and conducting weekly caseload reviews with the psychiatric consultant. For more information on registry requirements refer to The Advancing Integrated Mental Health Solutions (AIMS) Center, University of Washington, Psychiatry and Behavioral Sciences Division of Population Health.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Initial CoCM services (procedure code 99492) are those BHCM activities provided to the person receiving services in the first calendar month of services. Initial CoCM services, using procedure code 99492, must include the following elements and be documented in the electronic medical record (EMR) or electronic health record (EHR) for reimbursement:

- Conducting outreach to and engagement of the person needing services, directed by the primary care provider
- Completing an initial assessment to include administration of a validated rating scale
- Developing a person-centered plan of care that is reviewed and modified, as needed, by the psychiatric consultant
- Monitoring progress and updating the person-centered plan of care, as needed
- Entering information into the registry and tracking follow-up activities and progress through the registry with appropriate documentation
- Participating in weekly caseload consultation meetings with the psychiatric consultant
- Providing evidenced-based brief interventions, such as motivational interviewing or other focused strategies

Subsequent CoCM services (procedure code 99493) are those BHCM activities provided to the person receiving services in the months following the first calendar month of services.

Initial or subsequent CoCM services (procedure code G2214) are those BHCM activities provided to the person receiving services in the first calendar month or subsequent calendar months of services.

Procedure codes 99493 and G2214 must include the following elements and be documented in the EMR or EHR for reimbursement:

- Tracking follow-up activities and progress of the person receiving services through the registry with appropriate documentation
- Participating in weekly caseload consultation meetings with the psychiatric consultant
- Collaborating with and coordinating of the person's care and treatment with the primary care provider or other treating behavioral health providers
- Reviewing progress and recommendations from the psychiatric consultant for changes in treatment to include modifications to the medication regimen
- Providing evidenced-based brief interventions
- Monitoring clinical outcomes using a validated rating scale
- Planning for relapse prevention as the person receiving services prepares for discharge from services

9.3.1 CoCM Team Member Qualifications and Responsibilities

The primary care provider must be a physician (including specialists, such as a cardiologist or oncologist), physician assistant, or nurse practitioner that has an established CoCM program.

The primary care provider must:

- Direct the BHCM and other clinical staff.
- Oversee the care of the person receiving services to include prescribing medications, providing treatments for medical conditions, and making referrals to specialty care when needed.
- Remain actively involved in the care and treatment of the person receiving services through continuous oversight, management, collaboration, and reassessment.
- Comply with all applicable licensure board rules.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The BHCM must be credentialed as a Qualified Mental Health Professional-Community Services (QMHP-CS), as defined in Title 1 Texas Administrative Code (TAC) §353.1415. The BHCM works under the oversight and direction of the primary care provider and, in consultation with the psychiatric consultant, provides care management services, including:

- Completing an initial assessment
- Administrating a validated rating scale
- Developing a person-centered plan of care
- Providing evidenced-based brief interventions
- Collaborating with the primary care provider
- Maintaining the registry

The BHCM must:

- Be available to provide CoCM services in person when needed.
- Maintain a continuous relationship with the person receiving CoCM services.
- Be able to engage the person receiving CoCM services outside of regular office hours, as needed, to perform CoCM duties.

Note: *BHCM activities may be provided in person or by synchronous audio-visual or audio only (telephone) technology, if clinically appropriate, safe, and agreed to by the person receiving CoCM services. Providers must defer to the needs of the person receiving services, allowing the mode of service delivery to be accessible, person- and family-centered, and primarily driven by the person's choice and not provider convenience*

Refer to: The *Telecommunication Services Handbook* (*Vol. 2, Provider Handbooks*) for more information about telemedicine and telehealth.

The psychiatric consultant must be a medical professional who is trained in psychiatry and qualified to prescribe the full range of medications. The psychiatric consultant must engage, at a minimum, in weekly caseload reviews with the BHCM that may be conducted in person or by synchronous audio-visual or audio only (telephone) technology. Caseload reviews typically focus on persons who are new to CoCM services or who are not improving as expected under their current person-centered plan of care. The psychiatric consultant advises and makes recommendations, either directly to the primary care provider or through the BHCM, regarding psychiatric and other medical care to include:

- Psychiatric and other medical diagnoses
- Treatment strategies to include appropriate therapies, medication management, and medical management of complications associated with treatment of psychiatric disorders
- Referral for specialty services

The psychiatric consultant typically does not meet with the person receiving services but must be able to do so either in person or by synchronous audio-visual technology if clinically indicated. The psychiatric consultant must also facilitate referrals to a behavioral health provider when clinically appropriate.

9.3.2 Prior Authorization Requirements

Prior authorization is not required for the first six calendar months (initial month and five subsequent months) of CoCM services.

Prior authorization is required for an additional six calendar months (beyond the first six calendar months) of CoCM services.

Note: *Prior authorization is a condition of reimbursement, not a guarantee of payment.*

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Prior authorization requests are considered on a case-by-case basis with documentation supporting medical necessity for an additional six calendar months of CoCM services. Requests must be received prior to the last day of the sixth calendar month of services. The documentation must demonstrate the person receiving services continues to meet eligibility criteria, as outlined in the section above, and include the following:

- The current person-centered recovery plan that includes goals and objectives
- Progress made relative to the goals and objectives outlined in the person-centered recovery plan

Requests must be submitted by the primary care provider to the Special Medical Prior Authorization (SMPA) department using the Special Medical Prior Authorization (SMPA) Request Form. The form must be signed and dated within 30 calendar days prior to the start of an additional six calendar months of CoCM services, and must include the following information:

- Identifying information for the person receiving services
- Provider information
- Service and procedure code information
- Expected dates of service
- Diagnosis or diagnoses
- Medical necessity information

Note: *A nurse practitioner and physician assistant may sign all documentation related to the provision of CoCM services on behalf of the physician when the physician delegates this authority to the nurse practitioner or physician assistant.*

Primary care providers are required to adhere to prior authorization requirements.

Prior authorization requests may be submitted to the TMHP Prior Authorization Department through mail, fax, or the electronic portal. The electronic signature technology must meet all applicable federal and state statutes and administrative rules. Electronically signed documents must have an electronic date on the same page as the signature, electronic signatures that are generated through an EMR or EHR system that complies with applicable federal and state statutes and rules are acceptable. All electronically signed transactions and electronically signed documents must be kept in the person's medical record. Prescribing and dispensing providers that utilize electronic signatures must provide a certification that the electronic signature technology that they use complies with all applicable federal and state statutes and administrative rules. Providers who submit a prior authorization request must also attest that the electronic signatures included in the request are true and correct to the best of their knowledge. A hard copy of electronic transactions and signed documents must be available upon request. Stamped signatures and images of wet signatures will not be accepted. Prescribing or ordering providers, dispensing providers, responsible adults of persons receiving services, and persons receiving services may sign prior authorization forms and supporting documentation using electronic or wet signatures.

To complete the prior authorization process by paper, the provider must fax or mail the completed prior authorization request form to the TMHP Prior Authorization Department and retain a copy of the signed and dated prior authorization form in the client's medical record.

To complete the prior authorization process electronically, the provider must complete the prior authorization requirements through any approved electronic methods and retain a copy of the signed and dated prior authorization form in the person's medical record.

To facilitate determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including documentation for medical necessity for the services requested. The physician must maintain documentation of medical necessity in the person's medical record.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The requesting provider may be asked for additional information to clarify or complete a request.

Retrospective review may be performed to ensure documentation supports the medical necessity of the requested services.

9.3.3 Documentation Requirements

Prior to receiving CoCM services, the primary care provider must obtain verbal or written consent from the person being referred for CoCM services to consult with the psychiatric consultant and other relevant specialists. A new consent is not required for each subsequent calendar month of services or annually unless the person receiving services changes primary care providers. If the person receiving services changes primary care providers, then a new verbal or written consent must be obtained and documented by the new primary care provider prior to the provision of CoCM services. Informed consent must be documented in the EMR or EHR.

Primary care providers must use a registry that is used jointly with the EMR or EHR of the practice to track clinical outcomes.

All elements for the procedure code being billed (99492, 99493 or G2214), as described in this section must be documented in the registry for reimbursement. In addition, documentation must also include the following:

- The initial assessment and any subsequent assessments
- The validated rating scale, or scales, used to include results
- All versions of the individualized, person-centered plan of care.
- The person-centered plan of care must:
    - Identify the goals of treatment
    - Indicate progress of the person receiving services towards their goals
    - Include any modifications to care and treatment.

All services outlined in this section are subject to retrospective review to ensure that the documentation in the person's medical record supports the medical necessity of the services provided.

9.3.4 Claims Reimbursement

CoCM services are time-based and reported as the total amount of time the BHCM spends engaging in clinical activities over the course of a calendar month.

Only the primary care provider may submit claims for CoCM services. The BHCM and psychiatric consultant are reimbursed by the primary care provider through a contract, employment, or other arrangement. If a contract or other arrangement is pursued, it must be as a billing agent, such as billing service or accounting firm, that furnishes statements and receives payments in the name of the provider; a facility under which the service is provided; or a foundation plan or similar organization under which the organization submits the claim, in accordance with 42 CFR 447.10.

To be reimbursed for CoCM services, the primary care provider must meet the following core components:

- Provide active treatment and care management for an identified population
- Use a registry to monitor treatment and outcomes, and to conduct psychiatric caseload reviews

The primary care provider must use procedure codes 99492, 99493, 99494, or G2214 to bill for monthly CoCM services in all settings. The primary care provider must also use the place of service code for the location where services would normally be provided for in-person care and treatment.

CoCM services begin after the referral is made by the primary care provider and the BHCM starts engaging in reimbursable clinical activities, as described in this section.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The primary care provider must use procedure code 99492 for the first 70 minutes accrued during the initial calendar month of BHCM activities, in consultation with the psychiatric consultant.

The primary care provider must use procedure code 99493 for the first 60 minutes accrued during each subsequent calendar month of BHCM activities, in consultation with the psychiatric consultant.

The primary care provider must use add-on procedure code 99494 for each additional 30 minutes accrued during the initial calendar month or subsequent calendar months of BHCM activities, in consultation with the psychiatric consultant. The add-on procedure code must be billed with the appropriate primary procedure code 99492 or 99493.

The primary care provider must use procedure code G2214 for no more than 30 minutes accrued during an initial calendar month or subsequent calendar months of BHCM activities, in consultation with the psychiatric consultant.

The primary care provider may not bill both procedure codes 99492 and G2214 during the initial calendar month of services or procedure codes 99493 and G2214 during any subsequent calendar month of services for the same person, same provider. See the CoCM procedure codes table for information about time thresholds.

The primary care provider must use the appropriate evaluation and management (E/M) code for the initial presenting visit with the person.

All required elements of the procedure codes, as described in this section, must be performed and documented, and time thresholds met, to be reimbursed for services.

The BHCM may provide other outpatient mental health services, if eligible for reimbursement, in the same calendar month as CoCM services but those services are separate and distinct from CoCM services and do not count toward the time thresholds for CoCM services. Therefore, the BHCM must report separately those other mental health services that are delivered in the same calendar month as CoCM services.

The psychiatric consultant may provide E/M services and other outpatient mental health services, if eligible for reimbursement, in the same calendar month as CoCM consultation services but those services are separate and distinct from CoCM services and do not count toward the time thresholds for CoCM services. Therefore, the psychiatric consultant must report separately E/M or other mental health services that are delivered in the same calendar month as CoCM services.

Refer to: The "Behavioral Health and Case Management Services Handbook" in the *Behavioral Health and Case Management Services Handbook* (*Vol. 2, Provider Handbooks*) for more information about outpatient mental health services, and Section 9.2.60, "Physician Evaluation and Management (E/M) Services" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*) for more information about physician evaluation and management (E/M) services.

FQHCs and RHCs should submit claims using the CoCM standard procedure codes only, which will be reimbursed at the fee-for-service rate outside the FQHC or RHC encounter rate.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The following procedure codes may be reimbursed for CoCM services based on the time thresholds listed:

Procedure Code	Additional Information
99492	Billable at 36 minutes. Time threshold is 36 to 85 minutes. Administrative and clerical duties do not count towards the time threshold. May only be billed by the primary care provider during the initial calendar month of an episode of care. Limited to one per initial calendar month, same person, same provider. May not be billed in subsequent months of services.
99493	Billable at 31 minutes. Time threshold is 31 to 75 minutes. Administrative and clerical duties do not count towards the time threshold. May only be billed by the primary care provider during subsequent calendar months of an episode of care. Limited to one per subsequent calendar month, same person, same provider. May not be billed in the initial calendar month of services.
99494	Billable at 16 minutes, beyond total time, to 30 minutes. Administrative and clerical duties do not count towards the time threshold. May only be billed by the primary care provider during any calendar month (initial or subsequent) of an episode of care. Limited to two per calendar month (initial or subsequent), same person, same provider. Add-on code must be billed with primary procedure code 99492 or 99493. May not be submitted with procedure code G2214.
G2214	Billable at 16 minutes. Time threshold is 16 to 30 minutes. Administrative and clerical duties do not count towards the time threshold. May only be billed by the primary care provider during any calendar month (initial or subsequent) of an episode of care. Limited to one per calendar month (initial or subsequent), same person, same provider. The primary care provider may not bill both procedure codes 99492 and G2214 during the initial calendar month of services or procedure codes 99493 and G2214 during any subsequent calendar month of services for the same person, same provider.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Procedure code 99492 is limited to one occurrence or unit in the initial calendar month of CoCM services, same person, same provider during an episode of care. Procedure code 99492 will be denied if billed during any subsequent calendar month of CoCM services.

Procedure code 99493 is limited to one occurrence or unit per calendar month for all subsequent calendar months of CoCM services, same client, same provider during an episode of care. Procedure code 99493 will be denied if billed during the initial calendar month of CoCM services.

Procedure code 99494 is limited to two occurrences or units per calendar month (initial or subsequent) of CoCM services, same person, same provider during an episode of care. Procedure code 99494 will be denied if billed without primary procedure code 99492 or 99493 for the same person, same provider.

Procedure code G2214 is limited to one occurrence or unit per calendar month (initial or subsequent) of CoCM services, same person, same provider during an episode of care.

Procedure codes 99492, 99493, and G2214 will be denied if billed in the same calendar month of CoCM services, same person, same provider.

9.3.5 Exclusions

Administrative and clerical duties, except for entering information in the registry which is a required element of the procedure codes are not a covered benefit of Texas Medicaid.

9.4 Doctor of Dentistry Practicing as a Limited Physician

This section outlines the guidelines for the Doctor of Dentistry practicing as a limited physician. The THSteps dental program is not addressed in these guidelines.

Services by a dentist (DDS or DMD) are covered by Texas Medicaid in accordance with the Omnibus Budget Reconciliation Act (OBRA) of 1987 §4103 and Title 2 *Texas Human Resources Code* §32.054, if the services are furnished within the dentist's scope of practice as defined by Texas state law and would be covered under Texas Medicaid when provided by a licensed physician (MD or DO).

Dentist (DDS or DMD) who want to participate as a dentist-physician in Texas Medicaid must be separately enrolled as a Doctor of Dentistry practicing as a limited physician even if they are enrolled in the THSteps Dental Program.

Dual licensure (MD, DO, and DDS) is not required for a dentist to enroll as a limited physician. Medicare enrollment is required for a dentist to enroll as a limited physician.

9.4.1 Prior Authorization for General Dental Services Due to Life-Threatening Medical Condition

Reimbursement for general dental services by any provider, irrespective of the medical or dental qualifications of the provider, is not a Medicaid benefit for Medicaid clients who are 21 years of age and older (who do not reside in an ICF-IID facility).

The TMHP Medical Director or designee may allow an exception for a dental condition causally related to a life-threatening medical condition. *Mandatory prior authorization is required* and the dental diagnoses *must* be secondary to a life-threatening medical condition.

Examples of dental procedures that may be authorized for a *general dentist* who is enrolled as a limited physician are:

- Extractions.
- Alveolectomies (in limited situations).
- Incision and drainage.
- Curettement.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Examples of dental procedures that may be authorized for an *oral and maxillofacial surgeon* who is enrolled as a limited physician are:

- Extractions.
- Alveolectomies (in limited situations).
- Incision and drainage.
- Curettement maxillofacial surgeries to correct defects caused by accident or trauma.
- Surgical corrections of craniofacial dysostosis.

Note: *Therapeutic procedures such as restorations, dentures, and bridges are not a benefit of the program and will not be authorized.*

9.4.1.1 Guidelines for Requesting Mandatory Prior Authorization

The limited physician dentist must request the mandatory prior authorization, and the request must include:

- A treatment plan that clearly outlines the dental condition as related to the life-threatening medical condition.
- Narrative describing the current medical problem, client status, and medical need for requested services.
- The client name and Medicaid number.
- The limited physician dentist's NPI.
- The name and address of the facility.
- CPT procedure codes.
- The history and physical.
- The limited physician dentist's signature.

Note: *The "limited physician" dentist who will perform the procedure(s) must submit the request for prior authorization.*

All supporting documentation must be included with the request for authorization. Providers are to send requests and documentation to the following address:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization
12365-A Riata Trace Parkway
Austin, TX 78727-6418
Fax: 1-512-514-4213

9.4.2 Benefits and Limitations

Dental procedure codes and their corresponding CPT procedures may not be billed on the same date of service by any provider.

Cosmetic procedures are not a benefit of Texas Medicaid. Certain procedure codes, including, but not limited to, the procedure codes in the following table, may be considered cosmetic and are not a benefit except when the procedure is performed as a result of trauma or injury for the purpose of:

- Reconstructing tissues/body structures.
- Repairing damaged tissues.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

9.4.2.2 Radiographs by a Doctor of Dentistry Practicing as a Limited Physician

When a Doctor of Dentistry Practicing as a Limited Physician uses appropriate radiograph equipment to produce required radiographs, the following procedure codes are eligible for reimbursement:

Procedure Codes									
70100	70110	70120	70130	70140	70150	70160	70190	70200	70250
70260	70300	70310	70320	70328	70332	70336	70350	70355	70370
70371	70380	70390	73100	70450	70460	70470	70480	70481	70482
70486	70487	70488	70490	70491	70492				

9.4.2.3 Dental Anesthesia by a Doctor of Dentistry Practicing as a Limited Physician

A Doctor of Dentistry Practicing as a Limited Physician who is licensed by the Texas State Board of Dental Examiners (TSBDE) practicing in Texas, who has obtained an Anesthesia Permit from the TSBDE in accordance with Title 22 TAC §§110.1 through 110.15, may be reimbursed for anesthesia services on clients having dental/oral and maxillofacial surgical procedures in the dental office or hospital in accordance with all applicable rules for physician administration and supervision of anesthesia services.

Dentists providing sedation/anesthesia services must have the appropriate permit from TSBDE for the level of sedation/anesthesia provided.

The following anesthesia services are payable to dentists as physician services:

Procedure Codes									
00100	00102	00160	00162	00164	00170	00190	00192	00300	99100
99116	99135	99140							

9.5 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including physician services. Physician services are subject to retrospective review and recoupment if documentation does not support the service billed.

9.6 Claims Filing and Reimbursement

9.6.1 Claims Information

Claims for physician and doctor services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply them.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills and itemized statements are not accepted as claim supplements.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Physicians who submit a claim using the physician's own NPI for services provided by an NP, CNS, PA, or CNM must submit one of the following modifiers on each claim detail if the physician does not make a decision regarding the client's care or treatment on the same date of service as the billable medical visit:

- SA – Services were provided by an NP or CNS
- U7 – Services were provided by a physician assistant
- SB – Services were provided by a CNM

Refer to: "Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on electronic claims submissions.

"Section 6: Claims Filing" (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

9.6.2 National Drug Codes (NDC)

Refer to: Subsection 6.3.4, "National Drug Code (NDC)" in "Section 6: Claims Filing" (*Vol. 1, General Information*).

9.6.3 Reimbursement

Texas Medicaid rates for physicians and other practitioners are calculated in accordance with TAC §355.8085. Providers can refer to the online fee lookup (OFL) or the applicable fee schedule on the TMHP website at www.tmhp.com.

Physicians may be reimbursed 92 percent of the established reimbursement rate for services provided by an NP, CNS, PA, or CNM if the physician does not make a decision regarding the client's care or treatment on the same date of service as the billable medical visit. The 92 percent reimbursement rate will not apply to laboratory services, X-ray services, and injections provided by an NP, CNS, PA, or CNM.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/resources/rate-and-code-updates.

Section 104 of the Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982 requires that Medicare/Medicaid limit reimbursement for those physician services furnished in outpatient hospital settings (e.g., clinics and emergency situations) that are ordinarily furnished in physician offices.

Reimbursement for these services will be 60 percent of the Texas Medicaid rate for the service furnished in the physician's office. The following table identifies the services applicable to the 60-percent limitation when furnished in outpatient hospital settings:

Procedure Codes									
99202	99203	99204	99205	99211	99212	99213	99214	99215	99281
99282	99283								

These procedures are designated with note code "1" in the current physician fee schedule, which is available at www.tmhp.com. The following list shows the services excluded from the 60-percent limitation:

- Services furnished in rural health clinics (RHCs).

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Surgical services that are covered ambulatory surgical center (ASC)/hospital-based ambulatory surgical center (HASC) services.
- Anesthesiology and radiology services.
- Prenatal services when billed with modifier TH and the appropriate E/M procedure code to the highest level of specificity.
- Emergency services provided in a hospital emergency room after the sudden onset of a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain), such that the absence of immediate medical attention could reasonably be expected to result in one of the following:
  - Serious jeopardy to the client's health.
  - Serious impairment to bodily functions.
  - Serious dysfunction of any bodily organ or part.

Because of TEFRA, Texas Medicaid reimbursement for a payable nonemergency office service that is performed in the outpatient department of a hospital is limited to 60 percent of Texas Medicaid rate for that service. If the condition qualifies as an emergency or if the client is critically ill or critically injured, the 60 percent professional service reimbursement limit does not apply.

Refer to: Subsection 2.2, "Fee-for-Service Reimbursement Methodology" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for more information about reimbursement.

Subsection 2.2.1.1, "Non-emergent and Non-urgent Evaluation and Management (E/M) Emergency Department Visits" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for more information about conditions that are excluded from the 60-percent limitation.

Subsection 9.2.7, "Anesthesia" in this handbook for information on anesthesia services that are reimbursed according to relative value units (RVUs).

9.6.3.1 Affordable Care Act of 2010 (ACA) Rate Increase for Primary Care Services

To qualify for the Affordable Care Act of 2010 (ACA) rate increase for primary care services, a physician must have a specialty designated of general internal medicine, family practice, or pediatrics and must attest to one of the following:

- The provider has a certification recognized by the American Board of Allergy and Immunology (ABAI), American Board of Medical Specialties (ABMS), American Board of Physician Specialties (ABPS), or American Osteopathic Association (AOA) and meets the requirements as required by federal and state regulation to receive the increased payment.
- The provider does not have a certification recognized by the ABAI, ABMS, ABPS, or AOA, but at least 60 percent of the provider's Medicaid billings for the previous calendar year (or for the previous calendar month if the provider has been enrolled in Medicaid for less than one year) were for the evaluation and management (E/M) and vaccine administration procedure codes as published in the final federal and state regulations and the provider meets the requirement to receive payment.

  Note: *New providers with no history of Medicaid billings can attest that 60 percent of their Medicaid billing will be for primary care services.*

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Providers can attest using the Texas Medicaid Attestation for ACA Primary Care Services Rate Increases form. ABAI-certified allergists must indicate "ABAI-allergy" in the "List subspecialties" field of the attestation form.

Important: *By signing the form, providers attest that they qualify for the rate increase, and that the increase will be applied to paid claims for primary care services on or after the effective date. Payment of the rate increase may be subject to retrospective review and recoupment if it is determined at a later time that the provider did not qualify for the ACA primary care services rate increase. Federal regulations require states to conduct an annual audit of provider attestations.*

Non-physician practitioners who are under the supervision of a provider who has self-attested, are not required to submit a separate provider attestation form. Increased payment may be available to the supervising physician when the following conditions are met:

- The non-physician practitioner renders services under the personal supervision of a provider who has self-attested to meeting the requirements.
- Services are billed under the qualifying provider's provider identification number.

10 Physician Assistant

10.1 Enrollment

To enroll in Texas Medicaid, a PA must be licensed and recognized as a PA by the Texas Physician Assistant Board. Texas Medicaid accepts a signed letter of certification from the Texas Physician Assistant Board as acceptable documentation of appropriate licensure and certification for enrollment. The PA must identify their supervising physician in the appropriate field of the enrollment application.

Providers cannot be enrolled if their license is due to expire within 30 days.

Enrollment as an individual provider is optional. PAs currently treating clients and billing under the supervising physician's NPI may continue this billing arrangement.

All PA services must be delivered according to protocols developed jointly within the scope of practice and state law governing PAs.

All providers of laboratory services must comply with the rules and regulations of CLIA. Providers not complying with CLIA are not reimbursed for laboratory services.

PAs may enroll as providers of THSteps medical checkups.

Refer to: Subsection 1.1, "Provider Enrollment" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*).

Subsection 2.1.1, "Clinical Laboratory Improvement Amendments (CLIA)" in the *Radiology and Laboratory Services Handbook* (*Vol. 2, Provider Handbooks*).

Subsection 4.2, "Enrollment" in the *Children's Services Handbook* (*Vol. 2, Provider Handbooks*) for more information about enrolling as a THSteps provider.

PAs may be included as primary care providers in the provider network for Medicaid and CHIP programs (both fee-for-service and managed care), regardless of whether the physician supervising the PA is enrolled in Medicaid or in the provider network.

10.2 Services, Benefits, Limitations, and Prior Authorization

Services performed by PAs are covered if the services meet the following criteria:

- Are within the scope of practice for PAs, as defined by Texas state law

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Are consistent with rules and regulations promulgated by the Texas Medical Board or other appropriate state licensing authority
- Are covered by Texas Medicaid when provided by a licensed physician (MD or DO)
- Are reasonable and medically necessary as determined by HHSC or its designee

Services provided to Medicaid clients must be documented in the client's medical record to include the following:

- Services provided
- Date of service
- Pertinent information about the client's condition supporting the need for service
- The individual practitioner of the service

PAs who are employed or remunerated by a physician, hospital, facility, or other provider must not bill Texas Medicaid for their services if the billing results in duplicate payment for the same services.

Physicians who submit a claim using the physician's own NPI for services provided by a PA must submit modifier U7 on each claim detail if the physician does not make a decision regarding the client's care or treatment on the same date of service as the billable medical visit.

Laboratory (including pregnancy tests) and radiology services provided during pregnancy must be billed separately from antepartum care visits and claims must be received within 95 days from the date of service.

Note: *Payment to providers for supplies is not a benefit of Texas Medicaid. Costs of supplies are included in the reimbursement for office visits.*

Refer to: Section 2, "Medicaid Title XIX Family Planning Services" in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook* (*Vol. 2, Provider Handbooks*).

Section 9, "Physician" in this handbook.

Section 4, "THSteps Medical" in the *Children's Services Handbook* (*Vol. 2, Provider Handbooks*).

Subsection 9.3, "Collaborative Care Model (CoCM)" in this handbook for information about CoCM services.

10.2.1 Prior Authorization

Services performed by a PA are subject to the same prior authorization guidelines as services performed by other provider types.

10.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including PA services. PA services are subject to retrospective review and recoupment if documentation does not support the service billed.

10.4 Claims Filing and Reimbursement

10.4.1 Claims Information

Claims for PA services must include modifier U7 on the claim details to indicate that the client was treated by a PA.

PA services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

When completing a CMS-1500 claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: "Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on electronic claims submissions.

"Section 6: Claims Filing" (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

10.4.2 Reimbursement

According to 1 TAC §355.8093, the Medicaid rate for PAs is 92 percent of the rate paid to a physician (MD or DO) for the same professional service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections.

Note: *PA providers who are enrolled in Texas Medicaid as THSteps providers also receive 92 percent of the rate paid to a physician for THSteps services when a claim is submitted with their THSteps NPI as the billing provider.*

PAs who bill Medicaid directly for services they perform must use their individual NPI. If the services were performed by the PA but billed by a physician or physician group, the billing provider is the physician or physician group. Physicians may be reimbursed 92 percent of the established reimbursement rate for services provided by a PA if the physician does not make a decision regarding the client's care or treatment on the same date of service as the billable medical visit. This 92 percent reimbursement rate does not apply to laboratory services, X-ray services, or injections provided by a PA.

Providers can refer to the online fee lookup (OFL) or the applicable fee schedule on the TMHP website at www.tmhp.com. To request a hard copy, call the TMHP Contact Center at 1-800-925-9126.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/resources/rate-and-code-updates.

Refer to: Subsection 1.1, "Provider Enrollment" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*).

"Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on how to obtain electronic fee schedules from the TMHP website.

1 General Information

The Medical Transportation Program (MTP), under the direction of the Texas Health and Human Services Commission (HHSC), arranges nonemergency medical transportation services and travel-related services for eligible fee-for-service (FFS) Medicaid, Children with Special Health Care Needs (CSHCN) Services Program, and Transportation for Indigent Cancer Patients (TICP) clients who have no other means of transportation. MTP is responsible for the prior authorization of all FFS MTP services. Medicaid managed care organizations (MCOs) are responsible for approval of managed care nonemergency medical transportation services. This handbook does not apply to managed care.

MTP provides for the following general services:

- Mass transit (intercity and intracity): Passes or tickets for client transport within a city and from city to city. Air travel is also an allowable service.
- Demand response transportation: Common carriers such as taxi, wheelchair van, and other transportation according to contractual requirements.
- Mileage reimbursement for registered individual transportation participant (ITP): The registered ITP can be the responsible party, family member, friend, neighbor, or client.
- Meals: Eligible for clients birth through 20 years of age and their guardian or responsible adult.
- Lodging: Eligible overnight stays for clients birth through 20 years of age and their guardian or responsible adult.
- Advanced funds: Financial services travel-related expenses for clients birth through 20 years of age.

Under the contract between Texas Medicaid & Healthcare Partnership (TMHP) and HHSC, TMHP is responsible for enrollment of Demand Response Transportation Service (DRTS) providers, including Transportation Network Companies (TNC), registration of ITPs, and processing of certain MTP claims.

MTP contracts with various provider types to arrange transportation and travel-related services for eligible MTP clients and their attendants.

There are two MTP provider types that enroll directly with TMHP:

- DRTS
- TNC

Note: *ITPs register with TMHP but do not enroll as Medicaid providers.*

1.1 Contacting MTP

If health-care providers have MTP-eligible clients who express difficulty accessing health-care services, advise the clients or their advocates to call the statewide MTP toll-free number at 1-877-633-8747 to request transportation services. Clients or their advocates must call the MTP office at least 2 business days before the scheduled appointment. For clients who need to travel beyond the county where they live, clients or their advocates must call the MTP office at least 5 business days before the scheduled appointment. Appointments are available with less than 48-hour notice if they involve:

- Discharge of a client from a health care facility.
- Obtaining pharmacy services and prescription drugs.
- Receipt of urgent care.

The client must provide the following information to the intake operator at the time of the call:

- Client name, address, and, if available, the telephone number

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Medicaid, TICP or CSHCN Services Program client identification number (if applicable) or Social Security number, and date of birth
- Name, address, and telephone number of health-care provider and/or referring health-care provider
- Purpose and date of trip and time of appointment
- Affirmation that other means of transportation are unavailable
- Special needs, including wheelchair lift or attendant(s)
- Medical necessity verified by the Health Care Provider's Statement of Need, if applicable
- Affirmation that advance funds are needed in order for the recipient to access health-care services

Note: *Clients must reimburse the department for any advance funds, and any portion thereof, that are not used for the specific prior authorized service.*

2 Individual Transportation Participants (ITP)

ITPs are individuals who use their personal vehicle to drive themselves, a friend, or a family member safely to the doctor, dentist, or drug store.

2.1 Registration for ITPs

To initiate the registration process, the MTP client must contact MTP to request a ride from an individual who is a potential ITP. This request is the first step in the registration process for the ITP.

After the client's call, MTP sends the potential ITP's information to TMHP, and TMHP mails the potential ITP a registration package. The ITP must fill out the Individual Transportation Participant Application and mail it to TMHP with all requested documentation.

The participant must identify the MTP clients they will be transporting and whether they are related to the client. The application packet also includes an Electronic Funds Transfer (EFT) Agreement form that authorizes TMHP to deposit payments directly into a bank account, which results in faster payments.

After the ITP application has been processed, the ITP will receive a letter from TMHP that includes the Atypical Provider Identifier (API) and the Taxonomy Code to be used when the ITP submits claim forms for mileage reimbursement.

2.2 Prior Authorization for ITPs

Once an ITP is registered with TMHP and a client calls MTP to request a ride, MTP will mail a preprinted ITP Service Record (Form H3017) to the MTP client. The H3017 is the form the ITP must mail to TMHP to be reimbursed for the ride.

Important: *Only claims that are authorized by MTP will be considered for payment. All claims must be prior authorized to be paid.*

Refer to: Subsection 3, "Prior Authorization" in this handbook.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

2.3 Claims Filing for ITPs

To file a claim, the ITP must complete the H3017 form that was sent to the Medicaid client and mail it to TMHP at the following address:

Texas Medicaid & Healthcare Partnership
Claims
PO Box 200555
Austin, TX 78720-0555

The H3017 includes the following transportation details:

- Date of the ride
- Number of miles authorized
- MTP Authorization Number
- MTP client's name
- ITP's name
- API
- Taxonomy code

The H3017 claim form must be signed by the doctor, dentist, or drug store representative that rendered services to the MTP client. This signature stands as proof that the ride authorized by MTP was taken. The ITP must also sign the claim form and include the API and taxonomy code that was assigned to them by TMHP. If any of this required information is missing, the claim will be denied.

The ITP must mail the completed claim form to TMHP after the client's authorized ride, but no later than 95 days from the date of the ride. Any claims received by TMHP more than 95 days after the date of the ride will be denied.

An ITP may not charge an MTP client a fee for completing claim forms or for denied claims or additional fees above the rate approved. TMHP also cannot be charged for the filing of claim forms.

3 Prior Authorization

All MTP services must be prior authorized by MTP, which issues all prior authorizations for transportation services. The eligible MTP client must contact MTP to obtain an authorization. Claims that are submitted without proper prior authorization will be denied.

3.1 Retention of Prior Authorization Documents

MTP prior authorization documents relating to Medicaid services or benefits provided to clients who are 20 years of age and younger must not be destroyed until the provider receives notice from HHSC. Examples of such documents include but are not limited to:

- Correspondence with HHSC/MTP;
- Invoices
- Receipts
- Contacts with clients who are class members

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

3.2 Definition of Prior Authorization Documents

The term "prior authorization document" is broad and includes, but is not limited to, the following:

- Paper records
- Electronic files in any format
- Database entries
- The original and any drafts or non-identical copies of any document
- Exhibits or attachments to documents
- Handwritten documents
- Emails
- Drawings, graphs, charts
- Electronic or videotape recordings
- Computer disks
- Other forms of computer memory storage

3.3 Copies of Prior Authorization Documents

Providers are not required to retain multiple exact copies of a document. For example:

- An exact electronic copy (e.g., scanned computer image, microfiche) may be retained instead of a paper copy.
- If the last in a chain of emails is retained, it is not necessary to retain each of the individual emails included in the chain, as long as the email that is retained reflects all of the earlier emails.

However, a document containing any substantive editorial comment, margin notes, underlining, etc., is not an exact copy and becomes a new original that must be retained.

3.4 Storage of Prior Authorization Document Storage

Relevant information and documents should be stored in a way that is protected from unintentional disclosure or destruction.

4 Claims Filing

This section contains instructions for completion of Medicaid-required claim forms. When filing a claim, providers should review the instructions carefully and complete all requested information. A correctly completed claim form is processed faster.

Texas Medicaid cannot make payments to clients, so the provider who performs the service must file an assigned claim. Federal regulations prohibit providers from charging clients a fee for completing or filing Medicaid claim forms or for denied claims or additional fees above the rate approved. Providers are not allowed to charge TMHP for filing claims. The cost of claims filing is part of the usual and customary rate for doing business. Providers cannot bill Texas Medicaid or Medicaid clients for missed appointments or failure to keep an appointment. Only claims for services rendered are considered for payment.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Medicaid providers are also required to complete and sign authorized medical transportation forms (e.g., Form H3017, Individual Transportation Participant (ITP)) Service Record, or Form 3111, Verification of Travel to Healthcare Services by Mass Transit) or provide an equivalent (e.g., provider statement on official letterhead) to attest that services were provided to a client on a specific date. The client presents these forms to the provider.

Providers are not allowed to bill clients or Texas Medicaid for completing these forms.

Medicaid claims are subject to the following procedures:

- TMHP verifies all required information is present.
- Claims filed under the same provider identifier and program and ready for disposition at the end of each week are paid to the provider with an explanation of each payment or denial. The explanation is called the Remittance and Status (R&S) Report, which may be received as a downloadable portable document format (PDF) version or on paper. A Health Insurance Portability and Accountability Act (HIPAA)-compliant 835 transaction file is also available for those providers who wish to import claim dispositions into a financial system.

An R&S Report is generated for providers that have weekly claim or financial activity with or without payment. The report identifies pending, paid, denied, and adjusted claims. If no claim activity or outstanding account receivables exist during the time period, an R&S Report is not generated for the week.

Providers can participate in the most efficient and effective method of submitting claims to TMHP by submitting claims through the TMHP Electronic Data Interchange (EDI) claims processing system using TexMedConnect or a third party vendor. Claims must contain the provider's complete name, address, and provider identifier to avoid unnecessary delays in processing and payment.

4.1 Claims Filing Deadlines

All claims for services rendered to eligible MTP clients are subject to a filing deadline from the date of service (DOS) of:

- 95 days for in-state providers
- 365 days for out-of-state providers

Claims submitted by newly-enrolled MTP providers must be received within 95 days of the date the national provider identifier or the atypical provider identifier (API) is issued, and within 365 days of the DOS. Providers with a pending application should submit any claims that are nearing the 365-day deadline from the DOS. TMHP will reject all claims until an API is issued. MTP providers can use the TMHP rejection report or Return to Provider (RTP) letters as proof of meeting the 365 day deadline and submit an appeal.

4.2 Auditing of Claims

Reimbursement may be recouped when the medical record does not document that the level of service provided accurately matches the level of service claimed. Furthermore, the level of service provided and documented must be medically necessary based on the clinical situation and needs of the patient.

HHSC and TMHP routinely perform retrospective reviews of all providers. HHSC ultimately is responsible for Texas Medicaid utilization review activities. This review includes comparing services billed to the client's clinical record. The following requirements are general requirements for all providers. Any mandatory requirement not present in the client's medical record subjects the associated services to recoupment.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

4.3 Important Codes for All MTP Providers

MTP providers must use the following codes when submitting claims:

- Benefit Code = MTP
- Provider Type = MT
- Diagnosis Code = Z753
- Place of Service = 09 for paper claims, 99 for TexMedConnect claims
- Type of Service = 9
- Taxonomy Code = 347C00000X

The following table shows additional codes that TMHP recommends for filing MTP claims. The codes are based on transportation provider type:

MTP Provider Description	Provider Specialty	Taxonomy Code	Recommended Procedure Code	Modifier Codes
Individual Transportation Participant (ITP)	T4	347C00000X	S0215	
Demand Response Transportation Service Provider (DRTS)	TS	343800000X	T2003	U1
				U2
				U3
DRTS Transportation Network Company	TS	347C00000X	T2003	U1
				U2
				U3

4.4 Delegation of Signature Authority

A provider that delegate signatory authority to a member of the office staff or to a billing service remains responsible for the accuracy of all information on a claim submitted for payment. A provider's employees or a billing service and its employees are equally responsible for any false billings in which they participated or directed.

If the claim is prepared by a billing service or printed by data processing equipment, it is permissible to print "Signature on File" in place of the provider's signature. When claims are prepared by a billing service, the billing service must obtain and keep a letter on file that is signed by the provider authorizing claim submission.

4.5 Electronic Claims

4.5.1 TMHP Electronic Data Interchange (EDI)

Providers are encouraged to submit claims using electronic methods. Providers can participate in the most efficient and effective method of submitting requests to TMHP by submitting through the TMHP EDI Gateway. TMHP uses the HIPAA-compliant American National Standards Institute (ANSI) ASC X12 5010 file format through a Secure File Transfer Protocol (SFTP) connection for maximum security. Providers can access TMHP's electronic services through the TMHP website at www.tmhp.com, TexMedConnect, vendor software, and billing agents. Providers may also submit claims using paper forms. Version 2001 0805 3 MTP Claim Filing.

Note: *This option is not applicable to ITPs.*

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

4.5.2 TexMedConnect

TexMedConnect is a free, web-based, claims submission application provided by TMHP. Technical support and training for TexMedConnect are also available free from TMHP. DRTS/TNC Providers can submit claims, eligibility requests, claim status inquiries, appeals, and download ER&S Reports (in either PDF or ANSI 835 formats) using TexMedConnect. TexMedConnect can interactively submit individual claims that are processed in seconds. To use TexMedConnect, providers must have:

- An internet service provider (ISP)

One of the following:

- Microsoft Edge®
- Google Chrome®
- Mozilla Firefox®

A broadband connection is recommended but not required. Providers that use TexMedConnect can find the online instruction manual on the home page and on the EDI page of the TMHP website at www.tmhp.com.

Note: *This option is not applicable to ITPs.*

4.5.3 Vendor Software

Providers that do not use TexMedConnect may use vendor software to create, submit, and retrieve data files. Providers can use software from any vendor listed on the EDI Submitter List, which is located on the EDI Vendor Testing web page of the TMHP website at www.tmhp.com. There are hundreds of software vendors that have a wide assortment of services and that have been approved to submit electronic files to TMHP. Providers that plan to access TMHP's electronic services with vendor software should contact the vendor for details on software requirements. TMHP does not make vendor recommendations or provide any assistance for vendor software. Not all vendor software offers the same features or levels of support. Providers are encouraged to research their software thoroughly to make certain that it meets their needs and that it has completed testing with TMHP.

Providers must setup their software or billing agent services to access the TMHP EDI Gateway. Providers who use billing agents or software vendors should contact those organizations for information on installation, settings, maintenance, and their processes and procedures for exchanging electronic data.

Providers that download the ANSI 835 file through TexMedConnect and providers that use vendor software must request a submitter ID. A submitter ID is necessary for vendor software to access TMHP's electronic services. It serves as an electronic mailbox for the provider and TMHP to exchange data files. To order a submitter ID, providers must call the EDI Help Desk at 1-888-863-3638. Providers that use a billing agent do not need a submitter ID.

Providers may receive an ER&S Report by completing the Electronic Remittance and Status (ER&S) Agreement and submitting it to the EDI Help Desk after setting up access to the TMHP EDI Gateway. 4 Version 2001 0805 MTP Claim Filing.

Note: *This option is not applicable to ITPs.*

4.5.4 Third Party Vendor Implementation

TMHP requires all software vendors and billing agents to complete EDI testing before access to the production server is allowed. Vendors that wish to begin testing may call the EDI Help Desk at 1-888-863-3638, Option 3. After the successful submission of a Trading Partner Agreement, vendors must then complete end-to-end testing on the TMHP test server. Software vendors and billing agents must be partnered with at least one Texas provider before a test submitter ID can be issued. When end-to-end testing has been completed, the software vendor or billing agent will be added to the EDI Submitter List.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Providers and billing agents may then order production submitter IDs for use with the vendor's software. Companion guides and vendor specifications are available in the EDI section of the TMHP website at www.tmhp.com.

Note: *This option is not applicable to ITPs.*

4.6 Paper Claims

MTP providers can also file claims using the CMS-1500 paper claim form. Providers obtain copies of the CMS-1500 paper claim form from a vendor of their choice. ITPs are required to submit H3017 claim form; TMHP does not supply them.

Providers must submit paper claims to TMHP at the following address:

Texas Medicaid & Healthcare Partnership
Claims
PO Box 200555
Austin, TX 78720-0555

4.6.1 Tips on Expediting Paper Claims

Use the following guidelines to enhance the accuracy and timeliness of paper claims processing.

4.6.1.1 General requirements

- Use original claim forms. Don't use copies of claim forms.
- Detach claims at perforated lines before mailing.
- Use 10 x 13 inch envelopes to mail claims. Don't fold claim forms, appeals, or correspondence.
- Don't use labels, stickers, or stamps on the claim form.
- Don't send duplicate copies of information.
- Use 8 ½ x 11 inch paper. Don't use paper smaller or larger than 8 ½ x 11 inches.
- Don't mail claims with correspondence for other departments. Version 2001 0805 5 MTP Claim Filing

4.6.1.2 Data Fields

- Print claim data within defined boxes on the claim form.
- Use black ink, but not a black marker. Don't use red ink or highlighters.
- Use all capital letters.
- Print using 10-pitch (12-point) Courier font, 10 point. Don't use fonts smaller or larger than 12 points. Don't use proportional fonts, such as Arial or Times Roman.
- Use a laser printer for best results. Don't use a dot matrix printer, if possible.
- Don't use dashes or slashes in date fields.

4.6.1.3 Attachments

- Use paper clips on claims or appeals if they include attachments. Don't use glue, tape, or staples.
- Place the claim form on top when sending new claims, followed by any medical records or other attachments.
- Number the pages when sending when sending attachments or multiple claims for the same client (e.g., 1 of 2, 2 of 2).

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Don't total the billed amount on each claim form when submitting multi-page claims for the same client.

  Note: *It is strongly recommended that providers who submit paper claims keep a copy of the documentation they send.*

- All paper claims must be submitted with an API or NPI.
- Modifiers describe and qualify the services provided by Texas Medicaid. A modifier is placed after the five-digit procedure code.

4.6.1.4 Attachments to Claims

To expedite claims processing, providers and ITPs must supply all information on the claim form itself and limit attachments to those required by TMHP or necessary to supply information to properly adjudicate the claim.

4.6.2 CMS-1500 Instruction Table

The table below describes what information must be entered in each of the block numbers of the CMS-1500 claim form. Providers obtain copies of the CMS-1500 paper claim form from a vendor of their choice; TMHP does not supply them.

Block numbers not referenced in the table may be left blank. They are not required for TMHP to process MTP claims.

CMS 1500 - Required MTP Information		
Block No	Description	Guidelines
1a	Insured's ID No. (for program checked above, include all letters)	Enter the patient's MPCN (10-digit) patient number from the MTP authorization form.
2	Patient's name	Enter the patients last name, first name, and middle initial as printed on the MTP authorization form.
		If the insured uses a last name suffix (e.g., Jr, Sr) enter it after the last name and before the first name.
21	Diagnosis or nature of illness or injury	The ICD-10-CM diagnosis codes recommended for MTP claims are Z753.
23	Prior authorization number	Enter the Prior Authorization Number issued by MTP.
24a	Date(s) of service	Enter the date of service for each MTP authorization provided in a MM/ DD/YYYY format.
24b	Place of service	The recommended POS code for MTP paper claims is 09. For electronic filing using TexMedConnect, the POS code is 99.
24d	Fully describe procedures, medical services, or supplies furnished for each date given	The recommended procedure code for DRTS claim is T2003.
24e	Diagnosis pointer	The recommended diagnosis codes are Z753 for all MTP claims.
24f	Charges	Indicate the charges for the service listed
24g	Days or units	Enter the number of services performed (such as the quantity billed) per MTP.
27	Accept assignment	Required
		All providers of the Texas Medicaid must accept assignment to receive payment by checking Yes.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

CMS 1500 - Required MTP Information		
Block No	Description	Guidelines
28	Total charge	Enter the total charges.
31	Signature of physician or supplier	An authorized representative must sign and date the claim.
		Billing services may print "Signature on File" in place of the provider's signature if the billing service obtains and retains on file a letter signed by the provider authorizing this practice.
33	Billing provider info & PH #	Enter the billing provider's name, street, city, state, ZIP+4 code, and telephone number.
33A	NPI	DRTS providers enter your NPI or API ITPs and TNCs enter your API
33B	Other ID #	Enter your taxonomy code

1 General Information

The information in this handbook provides information about Texas Medicaid's benefits, policies, and procedures applicable to outpatient drugs.

Important: *All providers are required to read and comply with "Section 1: Provider Enrollment and Responsibilities" (Vol. 1, General Information). In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers may also be subject to Texas Medicaid sanctions for failure, at all times, to deliver healthcare items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

Refer to: "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*).

1.1 About the Vendor Drug Program

The Texas Vendor Drug Program (VDP) provides statewide access to prescription drugs as authorized by a prescribing provider for clients enrolled in:

- Medicaid (fee-for-service and managed care).
- Children's Health Insurance Program (CHIP).
- Children with Special Health Care Needs (CSHCN) Services Program.
- Healthy Texas Women (HTW) Program.
- Kidney Health Care (KHC) Program.

VDP manages the Medicaid and CHIP drug formularies and Medicaid Preferred Drug List (PDL).

Note: *Pharmacy services for clients in Medicaid managed care are administered by a client's managed care organization (MCO).*

Refer to: The *Medicaid Managed Care Handbook* (*Vol. 2, Provider Handbooks*) for additional information about managed care prescription drug and pharmacy benefits.

1.2 Pharmacy Enrollment

VDP enrolls any eligible, in-state pharmacy licensed as Class A or C by the Texas State Board of Pharmacy.

Any out-of-state pharmacies or pharmacies holding any other class of pharmacy license are considered for inclusion in the program on a case-by-case basis. Consideration is relative to the benefits made available to the client eligible for pharmacy benefits. Enrollment is not granted unless additional benefits are established.

Pharmacy providers must enroll with Texas Medicaid through the Provider Enrollment and Management System (PEMS) before providing outpatient prescription services and prior to participating in any Medicaid managed care network. To participate in the Medicaid or CHIP managed care networks, the pharmacy must contact the health plan.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Pharmacy providers enrolled with HHSC should refer to the VDP Pharmacy Provider Procedure Manual for policies and procedures pertaining to fee-for-service outpatient pharmacy claims, including drug benefit guidance, pharmacy prior authorization, coordination of benefits, drug pricing, and reimbursement.

Refer to: The *VDP Pharmacy Provider Procedure Manual* on the VDP website.

Subsection 1.1, "Provider Enrollment" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*) for more information about procedures for enrolling as a Medicaid provider.

Subsection 2.2, "Provider Enrollment and Responsibilities" in the *Medicaid Managed Care Handbook* (*Vol. 2, Provider Handbooks*).

1.3 Program Contact Information

Vendor Drug Program	Contact
Pharmacy Benefits Access: for questions about outpatient drug and billing (the 800 number is for pharmacy use only and can be used to reach any area within VDP).	1-800-435-4165

1.4 Education

HHSC and TMHP provide several provider education and training opportunities.

1.4.1 Continuing Education

Texas Health Steps offers more than 40 continuing education courses accredited by the Accreditation Council of Pharmacy Education (ACPE). Pharmacy-related continuing education modules.

The Pharmacy module equips pharmacists and pharmacy providers in delivering outpatient pharmacy services to clients enrolled in Texas Medicaid, Children's Health Insurance Program, Children with Special Health Care Needs Services Program, Healthy Texas Women Program, and Kidney Health Care Program.

1.4.2 Texas Health Steps Quick Course

Quick courses are short, targeted training modules available to anyone. Most take 15 minutes or less to complete and do not offer continuing education credit. Outpatient drug-related quick-courses include the following:

- Prescriber's Guide to Medicaid Prior Authorizations
- Texas Medicaid Mosquito Repellent Benefit: What Pharmacy Providers Need to Know

1.4.3 * TMHP Learning Management System

The TMHP Learning Management System is an education portal. To access the LMS, providers must register and obtain a username. Refer to the LMS Registration and Navigation Job Aid to learn more about creating an account and navigating the LMS.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- [Revised] TMHP LMS
- [Revised] LMS Registration and Navigation Job Aid

Pharmacy-related computer-based training (CBT) modules include the following:

- Durable Medical Equipment
  - The Pharmacy DME CBT provides DME and pharmacy DME providers information and resources necessary to enroll in Texas Medicaid as a DME provider and provide DME and supplies to Texas Medicaid clients.
- NDC Requirements for the Submission of Clinician-Administered Drug Claims
  - Provides information about national drug code (NDC) and healthcare common procedure coding system (HCPCS) requirements on clinician-administered drug (CAD) claims.

2 Clinician-Administered Drugs

2.1 Services, Benefits, Limitations, and Prior Authorization

Clinician-administered drugs or biologicals (CADs), also known as physician-administered drugs, are injectable medications given in an office or outpatient clinic setting when oral medications are not appropriate and may be reimbursable as a medical benefit through Texas Medicaid and CHIP.

Newly released HCPCS codes for CADs and biologicals are reviewed by Texas Medicaid throughout the year. If the CADs are determined to be appropriate benefits for Medicaid, then the HCPCS codes are presented at a rate hearing as part of the process to become a benefit. An application to initiate this review process is not necessary. HHSC's review of any new CAD does not guarantee that the new CAD will become a benefit. If a manufacturer is interested in having a CAD included on the Texas Vendor Drug Program (VDP) formulary list it is necessary to contact VDP for an application.

If a HCPCS code that already is a benefit of Texas Medicaid has a new NDC that needs to be added to the Texas NDC-to-HCPCs crosswalk, contact the Texas Vendor Drug Program. A new NDC for a currently payable HCPCs code generally does not require a new rate hearing.

Refer to: Subsection 10, "Pharmacy Benefit" in this handbook for more information.

The *Medicaid Managed Care Handbook* (*Vol. 2, Provider Handbooks*) for information about the managed care prescription drug and pharmacy benefits.

2.1.1 Clinician-administered Drug Search

The VDP clinician-administered drug search is an online tool available to health-care providers to help clients get access to medications.

Users can search by either brand or generic name of the drug or product, the 11-digit national drug code (NDC), the HCPCS code, or the HCPCS description for products.

Refer to: The VDP CAD Search for more information.

2.1.2 Prior Authorization Requests

Prior authorization requests for CADs must be submitted to the TMHP Prior Authorization Department by mail, fax, or the electronic portal.

To facilitate determination of medical necessity and avoid unnecessary denials, the prescribing provider must submit correct and complete information, including documentation for medical necessity for the equipment or supplies requested, procedure codes, and numerical quantities for services requested. The provider must maintain documentation of medical necessity in the client's medical record.

The requesting provider may be asked for additional information to clarify or complete a request.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

To complete the prior authorization process by paper, the provider must fax or mail the completed Special Medical Prior Authorization (SMPA) Request form to the Special Medical Prior Authorization (SMPA) unit.

To complete the prior authorization process electronically, the provider must complete the prior authorization requirements through any approved electronic methods and retain a copy of the signed and dated SMPA Request form in the client's medical record.

A SMPA Request Form must be completed, signed, and dated by the prescribing provider. The SMPA form will not be accepted beyond 90 days from the date of the prescribing provider's signature.

The completed SMPA Request Form must be maintained by the prescribing provider in the client's medical record and is subject to retrospective review.

Documentation of the client's dosage, administration schedule, number of injections to be administered during the prior authorization period, requested units per injection, and the dosage calculation must be submitted in Section C of the Special Medical Prior Authorization (SMPA) Request Form under Statement of Medical Necessity.

2.1.3 Electronic Signatures in Prior Authorizations

Prior authorization requests may be submitted to the TMHP Prior Authorization Department by mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

Refer to: Subsection 5.5.1.2, "Document Requirements and Retention" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*) for additional information about electronic signatures.

3 Reimbursement

Clinician-administered drugs, vaccines, and biologicals are reimbursed under Texas Medicaid in accordance with 1 TAC rule §355.8085. Reimbursement for clinician-administered drugs, vaccines, and biologicals are based on the lesser of the billed amount, a percentage of the Medicare rate, or one of the following methodologies:

- If the drug or biological is considered a new drug or biological (that is, approved for marketing by the Food and Drug Administration within 12 months of implementation as a benefit of HHSC-administered programs), it may be reimbursed at an amount equal to 89.5 percent of average wholesale price (AWP).
- If the drug or biological does not meet the definition of a new drug or biological, it may be reimbursed at an amount equal to 85 percent of AWP.
- Vaccines may be reimbursed at an amount equal to 89.5 percent of AWP.
- Infusion drugs furnished through an item of implanted durable medical equipment may be reimbursed at an amount equal to 89.5 percent of AWP.
- Drugs, other than vaccines and infusion drugs, may be reimbursed at a percentage of the Medicare rate.

HHSC may use other data sources or methodologies to establish its fees for physician-administered drugs, vaccines, and biologicals when HHSC determines that the above methodologies are unreasonable or insufficient.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Texas Medicaid reimburses providers using several different reimbursement methodologies, including fee schedules, reasonable cost with interim rates, hospital reimbursement methodology, provider-specific encounter rates, reasonable charge payment methodology, and manual pricing. Each Texas Medicaid service describes the appropriate reimbursement for each service area.

Note: *If a client is covered by a Medicaid managed care organizations (MCO) or dental plan, providers must contact the client's MCO or dental plan for reimbursement information. The MCOs and dental plans are not required to follow the Texas Medicaid fee schedules, so there may be some differences in reimbursement based on decisions made by the individual health and dental plans.*

When services or products do not have an established reimbursement amount, the detail or claim is manually reviewed to determine an appropriate reimbursement.

Texas Medicaid (FFS and MCO) providers can bill and receive reimbursement for the unused portion of weight-based or variable dosing CADs that are only manufactured in single-dose vials. A multi-dose vial is a vial of liquid medication that is intended for parenteral administration (injection or infusion), contains more than one dose of medication, and may be used for more than one patient preparation or administration. Multi-dose vials are excluded from reimbursement under Texas Medicaid for any unused or discarded portions.

Claims will only be considered for reimbursement if an HHSC review has determined that the medication has a weight-based, variable dosing schedule or that it requires dosing adjustments for pharmacokinetic or pharmacodynamic considerations. The administration of the medication for the recommended dosing must result in a patient dose portion plus a discarded portion of a drug vial. The provider may be eligible for reimbursement up to the amount of drug or biological in accordance with the drug label.

Claims submitted for the unused portion and discarded portion of weight-based or variable dosing clinician-administered drugs (CADs) manufactured only in single-dose vials must include the modifier JW for consideration of reimbursement.

This only applies to medical claims for weight-based or variable dosing CADs billed with Healthcare Common Procedure Coding System (HCPCS) procedure codes, manufactured only in single-dose vials, and provided in a professional or outpatient setting.

Providers must use the modifier JW to identify the unused portion of the vial contents and the discarded amount of the drug or biological. Medicaid and CHIP providers must bill the JW on a separate line.

Example: *A single use vial labeled to contain 100 units of a drug has 95 units administered to the client and 5 units discarded. The 95-unit dose is billed on one line, while the discarded 5 units are billed on another line by using the JW modifier. Both line items are reviewed for reimbursement. The provider must record the discarded amounts of drugs and biologicals in the client's medical record.*

Refer to: Subsection 9.1, "JW Modifier Claims Filing Instructions" in this handbook for further instructions about the JW modifier.

4 Injectable Medications as a Pharmacy Benefit

Some injectable drugs or biologicals are available by prescription and are reimbursable as a pharmacy benefit through the Vendor Drug Program (VDP) under Texas Medicaid.

Refer to: Subsection 10, "Pharmacy Benefit" in this handbook for more information.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Oral medications that are given in the hospital or physician's office are considered part of the hospital or office visit and cannot be reimbursed separately. Take-home and self-administered drugs may be a pharmacy benefit when they are provided to eligible Texas Medicaid fee-for-service clients through VDP with a valid prescription.

Providers may utilize the "white-bagging" delivery method, in which the treating provider submits prescriptions to pharmacies and the prescription is shipped or mailed to the provider's office.

Refer to: Subsection 11.5.1, "Pharmacy Delivery Method for Clinician-Administered Drugs" in this handbook for additional information on the "white-bagging" delivery method.

Providers must use oral medication in preference to injectable medication in the office and outpatient hospital. If an oral medication cannot be used, the KX modifier must be submitted on the claim. The following situations are acceptable reasons for the use of administering an injectable medication instead of administering an oral medication.

Claim Form	Reason for Injection
Modifier KX	• No acceptable oral equivalent is available. • Injectable medication is the standard treatment of choice. • The oral route is contraindicated. • The client has a temperature over 102 degrees Fahrenheit (documented on the claim and in the medical record) and a high blood level of antibiotic is needed quickly. • The client has demonstrated noncompliance with orally prescribed medication (must be documented on the claim and in the medical record). • Previously attempted oral medication regimens have proven ineffective (must be supported by documentation in the medical record). • Situation is emergent.

The claim and the client's medical record must include documentation of medical necessity to support the need for the service. Retrospective review may be performed to ensure that the documentation supports the medical necessity of the service and any modifier used when billing the claim.

5 National Drug Code (NDC)

The NDC is an 11-digit number on the package or container from which the medication is administered.

Some packages may display less than 11 digits. In those cases, leading zeros can be assumed and are required for billing. For example, 5678-0123-01 becomes 05678-0123-01. In another example, 78513-677-2 becomes 78513-0677-02.

Note: *The NDCs in the examples show hyphens between the segments for easier visualization. NDCs submitted on claims should not include hyphens or spaces between the segments.*

Refer to: Subsection 6.3.4, "National Drug Code (NDC)" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for more information on NDC requirements as well as drug rebates.

5.1 Calculating Billable HCPCS and NDC Units

All drug claims must include HCPCS billing units as well as NDC billing units. HCPCS billing units are calculated by dividing the amount administered by the units found in the procedure code description. The calculated HCPCS billing unit is also needed to determine the correct NDC billing unit. NDC billing units are calculated by multiplying the HCPCS billing unit by the conversion factor. The conversion

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

factor is calculated by dividing the HCPCS unit (found in the code description) by the NDC unit (found on the box or packaging). See calculation examples in the following sections. Conversion factors are already computed and included on the Texas NDC-to-HCPCS Crosswalk. The NDC billing unit also requires a unit of measurement. For example, if the NDC is for a liquid medication the submitted units must be in milliliters (ML). If the NDC is for a powder form then the submitted units are Unit (UN). Other allowable NDC units are GR for gram, F2 for international unit, and ME for milligram. For all claims, the HCPCS and NDC billing units are required, along with the specific NDC and HCPCS procedure code. Claims submitted with incorrect unit calculations may cause delayed or incorrect payment.

5.1.1 Single-Dose Vials Calculation Examples

Below are three examples of how to calculate the HCPCS and NDC billing units using single-dose vials.

1) A patient receives 4 mg Zofran IV in the physician's office. The NDC of the product used is 00173-0442-02 (Zofran 2 mg/ml in solution form). There are 2 milliliters per vial. The provider should bill J2405 for ondansetron hydrochloride with 4 HCPCS units and the NDC units submitted should be 2 ML.
2) A patient receives 8mg of Avastin IV in the physician's office. The NDC of the product used is 50242-060-01 (Avastin 25mg/ml). The provider should bill J9035 for bevacizumab with 0.8 HCPCS unit. The NDC unit is 0.32 ML.
3) A patient receives 1 gm Rocephin IM in the physician's office. The NDC of the product used is 00004-1963-02 (Rocephin 500 mg vial in a powder form that is reconstituted prior to the injection). The provider should bill J0696 for ceftriaxone sodium with 4 HCPCS units. The NDC units are 2 UN because this NDC is in powder form.

	Zofran	Avastin	Rocephin
Dose Administered to Patient	4 mg	8mg	1gm = 1000mg
HCPCS Code and Unit found in description	J2405 Per 1 mg	J9035 Per 10 mg	J0696 Per 250 mg
HCPCS CODE BILLING UNIT(s) = Dose divided by units found in HCPCS code description	4mg/1mg=4	8mg/10mg=0.8	1000mg/250mg=4
NDC Information on Vial/Box	2mg/ml	25mg/ml	500mg/vial (powder form)
Determining Conversion Factor (CF) = HCPCS unit from code description divided by NDC unit from vial/box	1mg/2mg=0.5 CF = 0.5	10mg/25mg=0.4 CF = 0.4	250mg/500mg=0.5 CF = 0.5
NDC BILLING UNIT(s) = HCPCS Units x CF	4 x 0.5 = 2 ML	0.8 x 0.4 = 0.32 ML	4 x 0.5 = 2 UN
Quantity Information Required on Claim (HCPCS and NDC)	4 and 2 ML	0.8 and 0.32 ML	4 and 2 UN

5.1.2 Multi-Dose Vials Calculation Examples

Below is an example of calculating the correct billing units for a drug administered from a multi-dose vial. Calculations for multi-dose vials differ from those for single-dose vials.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

A patient receives 8 mg Dexamethasone in the physician's office. A 20 mg multi-dose vial is used. The NDC of the product used is 63323-0165-05 (Dexamethasone 20 MG/5 ml Vial). The provider should bill J1100 for dexamethasone with 8 HCPCS units and the NDC units submitted should be 2 ML. There are 12mg (3 ml) remaining in the vial.

Multi-Dose Calculation Examples for Dexamethasone	
Dose Administered to Patient	8 mg
HCPCS Code and Given Unit	J1100 Per 8 mg
HCPCS CODE BILLING UNIT(s) = Dose divided by units found in HCPCS code	8mg/1mg = 8
NDC Information on Vial/Box	20mg/5ml = 4mg/1ml
NDC BILLING UNIT(s) = Dose divided by NDC unit from vial/box	8/4 = 2
Quantity Information Required on Claim (HCPCS and NDC)	8 and 2 ML

5.1.3 Single and Multi-Use Vials

A single-dose (or single-use) vial of medication intended for administration through injection or infusion contains a single dose of medication. A multi-dose (or multi-use) vial of medication intended for administration through injection or infusion contains more than one dose of medication.

Many drugs have recommended doses that are based on factors such as height, weight, and initial tolerance for the drug. It is important to clearly document how the dosage is calculated so those who review the patient health record can verify the dosage amount when reviewing the claim.

Other resources on clinician-administered drugs may be found online by visiting the TMHP, CDC and CMS websites.

5.1.4 Nonspecific, Unlisted, or Miscellaneous Procedure Codes

Drugs or biologicals that do not have a unique CPT or HCPCS procedure code must be billed using a nonspecific, unlisted, unclassified, or miscellaneous procedure code. All claims for nonspecific, unlisted, unclassified, or miscellaneous procedure codes are processed manually and must be submitted on paper with accompanying documentation. The billing provider must include the following required documentation:

- The name and NDC number of the drug administered.
- The quantity of the drug administered, the amount discarded (if applicable for reimbursement), and the units of measurement.
- A brief description of the recipient's condition(s) that supports the medical need for the drug.
- One of the following pricing information sources:
  - The manufacturer's average wholesale price (AWP)
  - A copy of the invoice for the drug

The claim and attached information will suspend for manual review to determine whether the drug is clinically appropriate based on the information provided and to price the claim using the information provided. Miscellaneous drug or biological procedure codes are reimbursed a percentage of the average wholesale price (AWP). HHSC reserves the option to use other data sources to determine Texas Medicaid fees for drugs when AWP calculations are determined to be unreasonable or insufficient.

The claim will be denied when:

- The information is not sufficient to determine medical necessity.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The pricing information is insufficient for pricing the claim.
- There is a more appropriate billing procedure code for the drug or biological.
- The NDC and HCPCs (if applicable) codes are missing.

Providers are responsible for administering drugs based on the U.S. Food and Drug Administration (FDA)-approved guidelines.

Retrospective review may be performed to ensure documentation supports the medical necessity of the service.

Some injectable medications require prior authorization, which is a condition for reimbursement; it is not a guarantee of payment. To avoid unnecessary denials, the physician must provide correct and complete information, including documentation for medical necessity for the service requested. The physician must maintain documentation of medical necessity in the client's medical record. Providers may fax or mail prior authorization requests, including all required documentation, to the TMHP Special Medical Prior Authorization Department at:

Texas Medicaid & Healthcare Partnership
Special Medical Prior Authorization Department
12365-A Riata Trace Parkway
Austin, TX 78727-6418
Fax: 1-512-514-4213

The following injections in the table below are benefits of Texas Medicaid but are subject to the indicated limitations. Those with an asterisk have more information and can be found listed after the table.

6 Outpatient Drugs—Benefits and Limitations

The clinician administered drugs identified throughout this handbook are benefits of Texas Medicaid, but are subject to the indicated limitations.

Clinician administered drugs may be considered for reimbursement in the home, office, or outpatient hospital settings. Certain procedure codes may be restricted for place of service and provider types. Providers should verify the restrictions for specific procedure codes of injectable or infused medications prior to rendering services.

6.1 Abatacept (Orencia)

Abatacept (Orencia) (procedure code J0129) is a selective T-cell costimulation modulator that is indicated for the following:

- Moderate to severe rheumatoid arthritis in adult clients. Concomitant use of abatacept with other immunosuppressives [e.g., biologic disease modifying antirheumatic drugs (bDMARDS), Janus kinase (JAK) inhibitors] is not recommended. Concomitant use with a Tumor necrosis factor (TNF) antagonist can increase the risk of infections and serious infections.
- Moderate to severe juvenile arthritis in adult and pediatric clients who are 2 years of age or older (clients who are 2 years of age or older may receive subcutaneous formulation and clients who are 6 years of age or older may receive intravenous formulation). Abatacept may be used as monotherapy or concomitantly with methotrexate.
- Psoriatic arthritis in clients who are 2 years of age or older.
- The prophylaxis of acute graft versus host disease (aGVHD), in combination with a calcineurin inhibitor and methotrexate, in adults and pediatric clients who are 2 years of age or older undergoing hematopoietic stem cell transplantation (HSCT) from a matched or 1 allele-mismatched unrelated donor.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

6.1.1 Prior Authorization for Abatacept (Orencia)

Prior authorization may be given for an initial six months for eight doses. Prior authorization for an initial request for abatacept injections will be considered when all of the following criteria are met:

- Dates of treatment
- The number of anticipated doses
- The dosage to be administered
- Diagnosis of adult RA, juvenile idiopathic arthritis (JIA), adult psoriatic arthritis (PsA), or as prophylaxis of acute graft versus host disease (aGVHD)

A diagnosis of RA in an adult client must conform to the American College of Rheumatology (ACR) RA classification that requires the following:

- Presence of synovitis in at least one joint
- Absence of an alternative diagnosis to explain the synovitis
- Abatacept will not be used in combination with another biologic agent
- A combined score of at least six out of ten on the level of involved joints, abnormality, and symptom duration from the individual scores in four domains:
    - The number and sites of involved joints
    - Serologic abnormality
    - Elevated acute-phase response
    - Symptom duration

Prior authorization for moderate to severe Juvenile Idiopathic Arthritis (JIA) will be considered when the following criteria are met:

- The client is an adult or pediatric client who is 2 years of age or older.
- Clients who are 2 years of age or older may receive subcutaneous formulation, and clients who are 6 years of age or older may receive intravenous formulation.
- Abatacept (Orencia) may be used as monotherapy or concomitantly with methotrexate.

Prior authorization for adult Psoriatic Arthritis (PsA) will be considered when the following criteria are met:

- The client is 2 years of age or older.
- Abatacept (Orencia) will not be used in combination with another biologic agent.

Prior authorization for prophylaxis acute graft versus host disease will be considered when the following criteria are met:

- The client is 2 years of age or older.
- Abatacept should be used in combination with a calcineurin inhibitor and methotrexate.
- The client is undergoing hematopoietic stem cell transplantation (HSCT) from a matched or 1 allele-mismatched unrelated-donor.

Screening for latent tuberculosis (TB) infection and viral hepatitis should be carried out prior to therapy initiation.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Prior authorization for subsequent dosing may be given when documentation supports medical necessity for continued treatment with abatacept. Prior authorization for a subsequent request must include all of the following:

- Documentation from the physician stating that there has been at least an improvement
- The number of anticipated doses
- The dosage to be administered

The documentation of medical necessity must be maintained by the requesting provider in the client's medical record and is subject to retrospective review.

6.2 Adalimumab

Adalimumab is a benefit when billed with one of the following procedure codes:

Procedure Codes									
J0139	Q5140	Q5141	Q5142	Q5143	Q5144	Q5145			

Procedure codes Q5141, Q5142, and Q5144 are restricted to clients who are 2 years of age or older.

Procedure codes Q5140, Q5143, and Q5145 are restricted to clients who are 4 years of age or older.

Procedure codes Q5140, Q5142, Q5144, and Q5145 may be reimbursed when billed with diagnosis codes M05A and R7681, in addition to the diagnosis codes listed in the table below.

Procedure code Q5141 may be reimbursed when billed with diagnosis code R7681, in addition to the diagnosis codes listed in the table below.

The procedure codes in the table above may be reimbursed when billed with one of the following diagnosis codes:

6.3 Ado-trastuzumab entansine (Kadcyla)

Ado-trastuzumab emtansine (Kadcyla), procedure code J9354, is a benefit of Texas Medicaid for clients of any age when all of the following indications are present:

- Individuals have a diagnosis of HER2 positive metastatic breast cancer
- Individuals have previously received trastuzumab and a taxane separately or in combination, and have either:
  - Received prior therapy for metastatic disease
  - Experienced disease reoccurrence during or within six months of completing adjuvant therapy

Documentation must be maintained by the treating physician in the client's medical record to support administration of Ado-trastuzumab emtansine (Kadcyla). Prior authorization is not required for ado-trastuzumab emtansine (Kadcyla).

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

At initiation of treatment, documentation must include all of the following:

- Evidence of HER2 positive breast cancer as evidenced by immunochemistry (IHC) test or fluorescent in situ hybridization (FISH) test
- Evidence of metastatic breast cancer
- Evidence demonstrating prior treatment for this diagnosis with trastuzumab and a taxane oncology agent separately or in combination
- Evidence demonstrating receipt of prior therapy for this diagnosis or recurrent disease, including the previous treatment protocol, within six months of completing adjuvant therapy.

6.4 Afamelanotide Implant (Scenesse)

Afamelanotide implant (Scenesse) (procedure code J7352) is a benefit of Texas Medicaid for clients who are 18 years of age or older and is restricted to diagnosis code E800.

6.5 Afamitresgene autoleucel (Tecelra)

Afamitresgene autoleucel (Tecelra) is a melanoma-associated antigen A4 (MAGE-A4)-directed genetically modified autologous T cell immunotherapy indicated to treat adult clients with unresectable or metastatic synovial sarcoma who have received prior chemotherapy, are HLA-A*02:01P, HLA-A*02:02P, HLA-A*02:03P, or HLA-A*02:06P positive and whose tumor expresses the MAGE-A4 antigen as determined by FDA-approved or cleared companion diagnostic devices.

Afamitresgene autoleucel (Tecelra) (procedure code Q2057) is a benefit of Texas Medicaid with prior authorization.

6.5.1 Prior Authorization Requirements

Afamitresgene autoleucel (Tecelra) is administered as a single intravenous infusion and is indicated to treat clients who meet all the following requirements:

- The client is 18 years of age or older.
- The client has a diagnosis of unresectable or metastatic synovial sarcoma with one of the following diagnosis codes:

Diagnosis Codes							
C380	C381	C382	C383	C384	C388	C481	C482
C488	C490	C4910	C4911	C4912	C4920	C4921	C4922
C493	C494	C495	C496	C498	C499		

- The client's tumor is positive for human leukocyte antigen HLA-A*02:01P, HLA-A*02:02P, HLA-A*02:03P, or HLA-A*02:06P.
- The client's tumor expresses the MAGE-A4 antigen (as determined by an FDA-approved or cleared companion diagnostic device).
- The client is not heterozygous or homozygous for HLA-A*02:05P.
- The client has experienced disease progression following at least one or more prior systemic chemotherapy.
- The client has not received prior treatment with CAR-T therapy.
- The client has not had a prior hematopoietic stem cell transplant (HSCT).
- The client does not have any active or clinically significant infections and/or inflammatory disorders.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Afamitresgene autoleucel (Tecelra) (procedure code Q2057) is limited to one transfusion treatment per lifetime.

Monitoring parameters for Afamitresgene autoleucel (Tecelra) are as follows:

- Monitor for signs and symptoms of cytokine release syndrome (CRS) for at least 7 days following afamitresgene autoleucel (Tecelra) treatment with continued monitoring for at least 4 weeks.
- Monitor for signs and symptoms of immune effector cell-associated neurotoxicity syndrome (ICANS) for at least 7 days following afamitresgene autoleucel (Tecelra) treatment with continued monitoring for at least 4 weeks.

6.5.2 Documentation Requirements

In addition to documentation requirements outlined in the Prior Authorization Requirements section, all services are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

6.6 Allogeneic Processed Thymus Tissue-agdc (Rethymic)

Allogeneic processed thymus tissue-agdc (Rethymic) is indicated for immune reconstruction in pediatric clients with congenital athymia.

Allogeneic processed thymus tissue-agdc (Rethymic) is a benefit of Texas Medicaid with prior authorization and may be reimbursed using procedure code J3590.

Allogeneic processed thymus tissue-agdc (Rethymic) is limited to once per lifetime.

6.6.1 Prior Authorization Requirements

Providers must submit prior authorization requests for allogeneic processed thymus tissue-agdc (Rethymic) on a Special Medical Prior Authorization (SMPA) Request Form.

The prior authorization request for the one-time surgical procedure for allogeneic processed thymus tissue-agdc (Rethymic) administration must include documentation of the following:

- The client is 18 years of age or younger.
- The client has a diagnosis of congenital athymia that is confirmed by flow cytometry (diagnosis code D821).
- Severe combined immunodeficiency (SCID) has been conclusively ruled out.
- An anti-human leukocyte antigen (HLA) antibody test was conducted prior to treatment. If the client tests positive for anti-HLA antibodies, they must receive allogeneic processed thymus tissue-agdc (Rethymic) from a donor who does not express HLA alleles.
- The prescriber must attest that the benefits and risks of treatment have been evaluated for clients with preexisting cytomegalovirus (CMV) infection or renal impairment.
- The client has not previously received thymus tissue transplantation.

After the surgical implantation of allogeneic processed thymus tissue-agdc (Rethymic), the prescriber must monitor the client for:

- The risk of developing of graft versus host disease (GVHD).
- The possibility of developing autoimmune or lymphoproliferative disorders, which is monitored through complete blood counts (CBC) with differential, liver enzymes, serum creatinine, urinalysis, and thyroid function.
- Renal impairment or failure.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The occurrence of an infectious disease, as these may develop due to allogeneic processed thymus tissue-agdc (Rethymic) is derived from human tissue.

In addition to documentation requirements outlined in this section, all services are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

6.7 Alzheimer's Disease (AD)

Donanemab-azbt (Kisunla) (procedure code J0175) and lecanemab-irmb (Leqembi) (procedure code J0174) are benefits of Texas Medicaid for clients with prior authorization. Procedure codes J0174 and J0175 are limited to diagnosis codes G300, G301, G308, or G309.

Donanemab-azbt (Kisunla) and lecanemab-irmb (Leqembi) are amyloid beta-directed antibodies indicated to treat Alzheimer's disease (AD) by reducing amyloid-beta plaques in clients with mild cognitive impairment (MCI) or mild dementia stage of disease.

This clinical prior authorization applies to Medicaid clients only. Dual eligible clients must follow the Medicare National Coverage Determination policy guidelines for monoclonal antibodies directed against amyloid for the treatment of Alzheimer's disease.

6.7.1 Prior Authorization

Initial Requests

Initial therapy for donanemab-azbt (Kisunla) or lecanemab-irmb (Leqembi) may be approved for a 6-month duration if all the following criteria are met:

- Client has a confirmed diagnosis of Alzheimer's disease (G300, G301, G308, or G309).
- Prescriber attestation that other forms of dementia except Alzheimer's disease have been ruled out by appropriate lab and/or other diagnostic testing.
- Prescriber's confirmation of amyloid beta-plaques presence.
- Clinical testing must confirm client has mild cognitive impairment caused by Alzheimer's disease or mild stage of Alzheimer's disease.
- Documentation that client has received a baseline brain-magnetic resonance imaging (MRI) prior to initiating treatment (within the past year) to evaluate for pre-existing Amyloid Related Imaging Abnormalities (ARIA).
- The prescriber attests to having tested for ApoE ε4 status and counsel ApoE ε4 homozygotes clients on higher incidence of developing ARIA prior to initiation of treatment.
- The following are the monitoring requirements during the donanemab-azbt (Kisunla) treatment period:
  - Prescriber must ensure the client is not currently taking any anti-coagulant (except for aspirin at a prophylactic dose or less) or have a history of clotting disorder.
  - Prescriber must monitor for ARIA during the first 24 weeks of treatment.
  - Prescriber attestation to obtain a brain MRI prior to the 2nd, 3rd, 4th, and 7th infusion to check for asymptomatic ARIA.
  - Clients with severe amyloid-related imaging abnormalities-hemosiderin deposition (ARIA-H) may continue therapy only if radiographic stabilization has been confirmed by a follow-up brain MRI and supported by clinical evaluation.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The following are the monitoring requirements during the lecanemab-irmb (Leqembi) treatment period:

- Prescriber must monitor for ARIA during the first 14 weeks of treatment.
- Prescriber attestation to obtain a brain MRI prior to the 5th, 7th, and 14th infusion to check for ARIA.
- Clients with severe ARIA-H may continue therapy only if radiographic stabilization has been confirmed by a follow-up brain MRI and supported by clinical evaluation.

Re-certification/Extension

For renewal or continuation therapy of donanemab-azbt (Kisunla) or lecanemab-irmb (Leqembi), the client must meet the following requirements:

- Client continues to meet all the initial authorization approval criteria.
- Client has not progressed to moderate or severe dementia caused by Alzheimer's disease.
- Client experienced positive clinical response to therapy as demonstrated by no increase in amyloid plaque or radiographic stabilization as compared to baseline.
- Documentation of a brain MRI prior to the 2nd, 3rd, 4th, and 7th infusion to check for ARIA with donanemab-azbt (Kisunla) treatment.
- Documentation of brain MRI prior to the 5th, 7th, and 14th infusion to check for ARIA with lecanemab-irmb (Leqembi) treatment.
- Client has not experienced any complications or unacceptable toxicities during donanemab-azbt (Kisunla) or lecanemab-irmb (Leqembi) treatment.

6.8 Amisulpride (Barhemsys)

Amisulpride (procedure code J0184) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.9 Antibiotics and Steroids

Injectable antibiotic or steroid medications may be considered for reimbursement even if the same oral medications are appropriate and available. Injected antibiotics or steroid medications, when used in place of oral medications, require the use of the modifier KX.

Physicians billing for injectable antibiotic and steroid medications must indicate the appropriate modifiers with the appropriate injection code and quantity.

Modifier	Use
AT	For acute conditions*
KX	To indicate any of the following: • Oral route contraindicated or an acceptable oral equivalent is not available. • Injectable medication is the accepted treatment of choice. Oral medication regimen has proven ineffective or is not applicable. • The patient has a temperature over 102 degrees and a high level of antibiotic is needed immediately. • Injection is medically necessary into joints, bursae, tendon sheaths, or trigger points to treat an acute condition or the acute flare-up of a chronic condition.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

If a steroid medication is injected into joints, bursae, tendon sheaths, or trigger points, modifier AT must be used to indicate an acute condition. When performed for a chronic condition, these procedures are denied.

6.10 Antineoplastic (Oncology) Agents

6.10.1 Amivantamab-vmjw (Rybervant)

Amivantamab-vmjw (procedure code J9061) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.10.2 Cemiplimab-rwlc (Libtayo)

Cemiplimab-rwlc (procedure code J9119) is a benefit for clients who are 18 years of age and older.

6.10.3 Daratumumab and Hyaluronidase-fihj (Darzalex Faspro)

Daratumumab and hyaluronidase-fihj (procedure code J9144) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.10.4 Degarelix (Firmagon)

Degarelix injection (procedure code J9155) is a benefit when billed with diagnosis codes C61, C7982, D400.

Refer to: Subsection 6.62.9, "Hormonal Therapy Agents" in this handbook for additional information.

6.10.5 Dostarlimab-gxly (Jemperli)

Dostarlimab-gxly (procedure code J9272) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.10.6 Enfortumab Vedotin-ejfv (Padcev)

Enfortumab vedotin-ejfv (procedure code J9177) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.10.7 Hydroxyprogesterone Caproate

Hydroxyprogesterone caproate (procedure code J1729) is a benefit and restricted to clients who are nonpregnant women when billed with the following diagnosis codes:

Diagnosis Codes							
C541	N897	N910	N911	N912	N925	N938	

6.10.8 Isatuximab-irfc (Sarclisa)

Isatuximab-irfc (procedure code J9227) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.10.9 Loncastuximab Tesirine-lpyl (Zynlonta)

Loncastuximab tesirine-lpyl (procedure code J9359) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.10.10 Lurbinectedin (Zepzelca)

Lurbinectedin (procedure code J9223) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

6.10.11 Margetuximab-cmkb (Margenza)

Margetuximab-cmkb (procedure code J9353) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.10.12 Melphalan (Evomela)

Melphalan (procedure codes J9245 and J9246) are a benefit when billed with diagnosis codes C9000, C9001, and C9002.

6.10.13 Mitomycin for Pyelocalyceal Solution (Jelmyto)

Mitomycin for pyelocalyceal solution (procedure code J9281) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.10.14 Naxitamab-gqgk (Danyelza)

Naxitamab-gqgk (procedure code J9348) is a benefit of Texas Medicaid for clients who are 1 year of age or older.

6.10.15 Polatuzumab vedotin (Polivy)

Polatuzumab vedotin (procedure code J9309) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.10.16 Sacituzumab govitecan-hziy (Trodelvy)

Sacituzumab govitecan-hziy (procedure code J9317) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.10.17 Tafasitamab-cxix (Monjuvi)

Tafasitamab-cxix (procedure code J9349) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.10.18 Tisotumab Vedotin-tftv (Tivdak)

Tisotumab Vedotin-tftv (procedure code J9273) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.11 Antisense Oligonucleotides (eteplirsen, golodirsen, and nusinersen)

Antisense oligonucleotides, casimersen (Amondys 45) (procedure code J1426), eteplirsen (Exondys 51) (procedure code J1428), golodirsen (Vyondys 53) (procedure code J1429), nusinersen (Spinraza) (procedure code J2326), tofersen (Qalsody) (procedure code J1304), or viltolarsen (Viltepso) (procedure code J1427) may be benefits of Texas Medicaid with prior authorization.

An antisense oligonucleotide is a synthetic single stranded nucleic acid that binds to RNA and thereby alters or reduces expression of the target RNA. This may result in an improvement in physical function.

6.11.1 Prior Authorization Requirements

Prior authorization requests for procedure codes J1304, J1426, J1427, J1428, J1429, and J2326 must be submitted by the prescribing provider to the Special Medical Prior Authorization (SMPA) department at TMHP using the Special Medical Prior Authorization (SMPA) Request Form.

Prior authorization is not required for physician services associated with the administration of casimersen, eteplirsen, golodirsen, nusinersen, tofersen, or viltolarsen. Physician services include the procedural costs and the associated supplies for the administration of the medication.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

For situations in which procedure code J1304, J1426, J1427, J1428, J1429, or J2326 are being dispensed by a pharmacy via white bagging, the prescribing provider must provide the dispensing durable medical equipment (DME) pharmacy the authorization approval number.

The dispensing DME pharmacy may not request prior authorization.

The DME pharmacy provider billing for nusinersen (Spinraza) (procedure code J2326) will be responsible for coordinating with the rendering provider to obtain the prior authorization request approval number.

The requesting provider (physician or hospital) may coordinate with the DME Pharmacy provider for the initial or recertification prior authorization request for the specific oligonucleotide. DME Pharmacy providers may assist in providing necessary information such as their National Provider Identifier (NPI) number, fax number, and business address to the requesting provider. However, the Special Medical Prior Authorization (SMPA) form must be signed and dated and submitted by the Medicaid-enrolled requesting provider, not the DME Pharmacy provider.

The dispensing pharmacy must submit the authorization approval number when billing for the drug. Reimbursement for dispensing of the drug by the pharmacy may not occur unless an approved prior authorization for the specific oligonucleotide is in place.

Note: *For additional information on white bag delivery, providers may refer to Subsection 11.5.1, "Pharmacy Delivery Method for Clinician-Administered Drugs" in this handbook.*

Documentation of the client's dosage, administration schedule, the number of injections to be administered during the prior authorization period, the requested units per injection, and the dosage calculation must be submitted in Section C of the SMPA Request Form under Statement of Medical Necessity. When the FDA approves dosing guidelines that require a weight based calculation, the client's current weight must be included.

Refer to: Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

6.11.1.1 Initial Requests (for all Antisense Oligonucleotides)

Initial prior authorization requests for all antisense oligonucleotides will be considered by Medical Director Review for a six month period. The initial request must include documentation supporting medical necessity for the requested antisense oligonucleotide in addition to the SMPA request form completed, signed, and dated by the prescribing provider.

Documentation supporting medical necessity for an initial prior authorization for all requested antisense oligonucleotides must include the following information:

- A diagnosis specific to the requested antisense oligonucleotide
- Genetic testing specific to the requested antisense oligonucleotide
- Documentation of baseline physical function. Testing tools used to measure physical function must be age appropriate for the client being tested.
- Documentation of the requested antisense oligonucleotide dosage and administration schedule, including the number of injections to be administered during the prior authorization period, the requested units per injection, and the dosage calculation. This information must be submitted in Section C of the SMPA request form under Statement of Medical Necessity.

Each antisense oligonucleotide has specific clinical indications and unique documentation requirements.

The initial request for casimersen (Amondys 45) must include the following documentation to support medical necessity for casimersen.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Genetic testing must confirm that the client's Duchenne muscular dystrophy (DMD) gene is amenable to exon 45 skipping (diagnosis code G7101).
- Serum cystatin C, urine dipstick, and urine protein-to-creatinine ratio should be measured prior to initiating Amondys 45.
- Monitor baseline renal function (i.e. Glomerulus Filtration Rate, GFR) with therapy initiation and continuation.
- Current client weight, including the date the weight was obtained; the weight must be dated no more than 30 days before the requestdate.

Testing tools that can be used to demonstrate physical function include, but are not limited to:

- Baseline 6MWT (6-minute walk test)
- BrookeUpperExtremity Scale
- North Star Ambulatory Assessment

Amondys 45 should not be used concomitantly with other exon skipping therapies for DMD.

The initial request for eteplirsen (Exondys 51) must include the following documentation to support medical necessity for eteplirsen:

- Genetic testing must confirm that the client's DMD gene is amenable to exon 51 skipping (diagnosis code G7101).
- Current client weight, including the date the weight was obtained; the weight must be dated no more than 30 days before the request date.

Testing tools that can be used to demonstrate physical function include, but are not limited to:

- Brooke Upper Extremity Scale
- Baseline 6-minute walk test (6MWT)
- Pediatric Evaluation of Disability Inventory

Exondys 51 should not be used concomitantly with other exon skipping therapies for DMD.

The initial request for golodirsen (Vyondys 53) must include the following documentation to support medical necessity for golodirsen:

- Genetic testing must confirm that the client's Duchenne muscular dystrophy (DMD) gene is amenable to exon 53 skipping (diagnosis code G7101).
- Baseline renal function test (i.e. Glomerulus Filtration Rate, GFR) with therapy initiation and continuation.
- Current client weight, including the date the weight was obtained; the weight must be dated no more than 30 days before the request date.
- Baseline function testing documented in patient chart or electronic health record.

Testing tools that can be used to demonstrate physical function include, but are not limited to:

- Brooke Upper Extremity Scale
- Baseline 6MWT (6-minute walk test)
- Pediatric Evaluation of Disability Inventory

Vyondys 53 should not be used concomitantly with other exon skipping therapies for DMD.

The initial request for nusinersen (Spinraza) must include the following documentation to support medical necessity for nusinersen:

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Genetic testing must confirm biallelic pathogenic variants in the client's survival motor neuron 1 (SMN1) gene (diagnosis codes G120, G121, G128, and G129).
- Baseline pulmonary status, including any requirements for invasive or non-invasive ventilation

Testing tools that can be used to demonstrate physical function include, but are not limited to:

- The Hammersmith Infant Neurological Exam (HINE).
- The Hammersmith Functional Motor Scale Expanded (HFMSE).
- The Upper Limb Module (UML).
- Baseline 6MWT.
- Children's Hospital of Philadelphia Infant Test of Neuromuscular Disorders (CHOP-INTEND).

The initial request for tofersen (Qalsody) must include the following documentation:

- The client is 18 years of age or older.
- Diagnostic testing confirming client has amyotrophic lateral sclerosis (ALS) (diagnosis code G1221).
- Genetic testing must confirm there is the presence of a mutation in the superoxide dismutase1 (SOD1) gene.
- Documentation of baseline measure of the plasma neurofilament light chain (NfL).
- Documentation of baseline functional ability (e.g., climbing stairs, walking, and speech) prior to treatment initiation.

The initial request for viltolarsen (Viltepso) must include the following documentation:

- Genetic testing must confirm that the client's Duchenne muscular dystrophy (DMD) gene is amenable to exon 53 skipping (diagnosis code G7101).
- Current client weight, including the date the weight was obtained; the weight must be dated no more than 30 days before the request date.
- Baseline renal function test (i.e. Glomerulus Filtration Rate) and urine protein-to-creatinine ratio should be measured before starting treatment.

Testing tools that can be used to demonstrate physical function include, but are not limited to:

- Brooke Upper Extremity Scale
- Baseline 6MWT (6-minute walk test)
- Pediatric Evaluation of Disability Inventory

Viltepso should not be used concomitantly with other exon skipping therapies for DMD.

6.11.1.2 Recertification/Extension Requests (for all Antisense Oligonucleotides)

Recertification/extension prior authorization requests for antisense oligonucleotides, excluding nusinersen (Spinraza), will be considered by Medical Director Review for additional six month periods. Recertification/extension prior authorization requests for nusinersen (Spinraza) will be considered by Medical Director Review for additional 12-month periods. All recertification/extension requests must include documentation supporting the ongoing medical necessity for the requested antisense oligonucleotide in addition to a new SMPA request form completed, signed, and dated by the prescribing provider.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

A complete recertification/extension request must be received no earlier than 30 days before the current authorization period expires. Requests for recertification/extension of prior authorization received after the current prior authorization expires will be denied for dates of service that occurred before the date the request is received.

Documentation supporting a recertification/extension prior authorization for all requested antisense oligonucleotide must include the following:

- A diagnosis specific to the requested antisense oligonucleotide
- Current documentation of physical function
- Testing tools used to measure physical function must be age appropriate for the client being tested. Providers must use the same testing instrument as used in the initial evaluation. If re-use of the initial testing instrument is not appropriate, for example, due to change in client status or restricted age range of the testing tool, the provider must explain the reason for the change.
- The physical function testing tool results must include one of the following:
  - An increase in physical function from baseline has been observed
  - Baseline physical function has been maintained
- Statement from prescribing clinician that the client has been compliant with the treatment
- Documentation of the requested antisense oligonucleotide dosage and administration schedule, including the number of injections to be administered during the prior authorization period, the requested units per injection, and the dosage calculation must be submitted in Section C of the Special Medical Prior Authorization (SMPA) Request Form under Statement of Medical Necessity.

The medical necessity documentation for eteplirsen (Exondys 51) recertification/extension requests must include the client's current weight the date on which the weight was obtained. The weight must be dated no more than 30 days before the request date.

The medical necessity documentation for casimersen, golodirsen and viltolarsen recertification/ extension requests must include the client's continual renal function test while on therapy and current client weight, including the date the weight was obtained. The weight must be dated no more than 30 days before the request date.

The medical necessity documentation for nusinersen (Spinraza) recertification/extension requests must include the client's pulmonary status, including any requirements for invasive or non-invasive ventilation. Any changes in pulmonary status that have occurred since the previous prior authorization request must be addressed.

The medical necessity documentation for tofersen (Qalsody) recertification/extension requests must include the following:

- The client has met all initial authorization approval criteria sat the time of initial approval.
- The client has responded positively to therapy as evident by any improvement in the plasma neurofilament light chain (NfL) measurement as compared to baseline.
- Documentation that client has stabilization in disease state and has shown a slowed pattern in disease progression.
- Absence of unacceptable toxicities (aseptic meningitis, serious myelitis and/or radiculitis, papilledema, and elevated cranial pressure) from tofersen therapy.

6.11.1.3 Exclusions

Casimersen (Amondys 45), Eteplirsen (Exondys 51), Golodirsen (Vyondys 53), nusinersen (Spinraza), tofersen (Qalsody), and viltolarsen (Viltepso) should not be continued on clients who experience decreasing physical function while on the medication.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Casimersen (Amondys 45), Eteplirsen (Exondys 51) and Golodirsen (Vyondys 53) should not be used concomitantly or with other exon skipping therapies for DMD.

Nusinersen (Spinraza) is not a continuing benefit for clients with decreasing pulmonary function while on the medication.

6.12 Aripiprazole (Abilify Asimtufii)

Aripiprazole (Abilify asimtufii) (procedure code J0402) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.13 Aripiprazole Lauroxil, (Aristada Initio)

Aripiprazole lauroxil (procedure codes J1943 and J1944) are benefits of Texas Medicaid for clients who are 18 years of age or older.

6.14 Asparginine Specific Enzymes

6.14.1 Calaspargase Pegol-Mknl (Asparlas)

Calaspargase pegol-mknl (procedure code J9118) is a benefit of Texas Medicaid for clients who are birth through 21 years of age.

Procedure code J9118 is limited to diagnosis codes C9100, C9101, and C9102.

6.14.2 Pegaspargase (Oncaspar)

Pegaspargase injection (procedure code J9266) is a benefit of Texas Medicaid when billed with diagnosis codes C9100, C9101, or C9102.

6.15 Atidarsagene Autotemcel (Lenmeldy)

Atidarsagene Autotemcel (Lenmeldy) (procedure code J3391) is a benefit of Texas Medicaid with prior authorization.

Atidarsagene Autotemcel (Lenmeldy) is an autologous hematopoietic stem cell-based gene therapy indicated for the treatment of clients with pre-symptomatic late infantile (PSLI), pre-symptomatic early juvenile (PSEJ), or early symptomatic early juvenile (ESEJ) metachromatic leukodystrophy.

6.15.1 Prior Authorization Requirements

Atidarsagene Autotemcel (Lenmeldy) is a once per lifetime infusion therapy indicated for the treatment of a client for whom hematopoietic stem cell therapy (HSCT) is appropriate and must meet all the following requirements:

- The client is 7 years of age or younger or the client is between 7 years and 17 years of age with the onset of symptoms before 7 years of age.
- The client has a documented biochemical and molecular diagnosis of one of the following forms of metachromatic leukodystrophy (MLD) (diagnosis code E7525):
  - Pre-symptomatic late infantile
  - Pre-symptomatic early juvenile (PSEJ)
  - Early symptomatic early juvenile
- The client has an MLD diagnosis that is confirmed by:
  - Biochemical testing indicating Arylsulfatase A (ARSA) activity below the normal range.
  - Genetic testing confirming two disease causing ARSA alleles.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

  - If ARSA mutations are present, a 24-hour urine collection showing elevated sulfatide levels.
- The client is a candidate for and has not previously received HSCT.
- The client will not take prophylactic human immunodeficiency virus (HIV) anti-retroviral medications for at least one month prior to mobilization or for the expected duration of time needed for the elimination of medications.

The required monitoring parameters following atidarsagene autotemcel (Lenmeldy) are:

- Monitor for signs and symptoms of encephalitis, thrombocytopenia and/or serious infection after atidarsagene autotemcel (Lenmeldy) infusion.
- Monitor for signs and symptoms of veno-occlusive disease including liver function tests during the first month post atidarsagene autotemcel (Lenmeldy) infusion.
- Monitor life-long for hematologic malignancies, including a complete blood count (with differential) annually and integration site analysis, as warranted, for at least 15 years after treatment.

In addition to the documentation requirements outlined in the Prior Authorization Requirements section, all services outlined in this section are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

6.16 Axatilimab-csfr (Niktimvo)

Axatilimab-csfr (Niktimvo) (procedure code J9038) is a benefit of Texas Medicaid with prior authorization.

Axatilimab-csfr (Niktimvo) is a colony stimulating factor-1 receptor (CSF-1R)-blocking antibody indicated for the treatment of chronic graft-versus-host disease (cGVHD) after failure of at least two prior lines of systemic therapy in adult and pediatric clients weighing at least 40 kilograms.

6.16.1 Prior Authorization Requirements

Axatilimab-csfr (Niktimvo) is an intravenous infusion indicated for clients who meet the following requirements:

- The client weighs at least 40 kg (88 pounds).
- The client has a confirmed diagnosis of cGVHD (diagnosis codes D89811 and D89812).
- The client has undergone allogenic stem cell transplantation.
- The client has previously had at least two failed systemic therapies for cGVHD.
- The prescribing provider attests to counseling female clients of childbearing age regarding the use of an effective method of contraception to prevent pregnancy during treatment of axatilimab-csfr (Niktimvo) and for 30 days after the last dose of therapy.

Clients who are taking axatilimab-csfr (Niktimvo) must be monitored prior to starting axatilimab-csfr (Niktimvo) therapy, every two weeks for the first month of axatilimab-csfr (Niktimvo) therapy, and one to two months after completing axatilimab-csfr (Niktimvo) therapy. Clients will be monitored for aspartate aminotransferase (AST), alanine aminotransferase (ALT), alkaline phosphatase (ALP), creatine phosphokinase (CPK), amylase, and lipase.

For continuation therapy, the client must meet the following requirements:

- The client must meet the initial requirements for prior authorization.
- The client must be undergoing treatment with axatilimab-csfr (Niktimvo) with the absence of unacceptable toxicity (e.g., severe infusion-related reactions).
- The client must experience a positive clinical response to therapy.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

In addition to the documentation requirements outlined in the Prior Authorization Requirements section, all services outlined in this section are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

6.17 Azacitidine (Vidaza)

Procedure code J9025 is a benefit when billed with one of the following diagnosis codes:

Diagnosis Codes							
C9200	C9202	C9210	C9212	C9220	C9222	C9232	C9242
C9252	C9262	C9290	C9292	C92A2	C92Z2	C9310	C9312
C9330	C9332	C9502	C9510	C9512	C9592	D460	D461

6.18 Beremagene geperpavec-svdt (Vyjuvek)

Beremagene geperpavec-svdt (Vyjuvek) is a herpes-simplex virus type 1 (HSV-1) vector-based gene therapy indicated to treat wounds in adults and pediatric clients with dystrophic epidermolysis bullosa (DEB) with mutation in the collagen type VII alpha 1 chain (COL7A1) gene.

Beremagene geperpavec-svdt (Vyjuvek) (procedure code J3401) is a benefit of Texas Medicaid for clients who are 6 months of age or older with prior authorization and restricted to diagnosis code Q812.

6.18.1 Prior Authorization Requirements

Prior authorization is required for beremagene geperpavec-svdt (Vyjuvek) therapy and must be submitted with a Special Medical Prior Authorization (SMPA) Request Form.

Initial therapy for beremagene geperpavec-svdt (Vyjuvek) may be approved for a 6-month duration if all the following criteria are met:

- The client has a confirmed diagnosis of DEB (diagnosis code Q812).
- Genetic test confirming client has a mutation in the collagen type VII alpha 1 chain (COL7A1) gene.
- The client does not have current evidence or history of squamous cell carcinoma or active infection in the area requiring beremagene geperpavec-svdt (Vyjuvek) application.
- The prescriber attests to counseling female clients of childbearing age regarding the use of an effective method of contraception to prevent pregnancy during treatment with beremagene geperpavec-svdt (Vyjuvek).

For renewal or continuation of beremagene geperpavec-svdt (Vyjuvek) therapy, the client must meet the following requirements:

- The client continues to meet all the initial requirements for prior authorization and is currently treated with beremagene geperpavec-svdt (Vyjuvek) with no severe adverse reactions.
- The client has experienced positive clinical response to therapy as documented by any of the following:
  - Reduction in the number of wounds, decrease in wound size, increase in granulation tissue, and/or complete wound closure.
  - The client has not experienced any complications while being treated with beremagene geperpavec-svdt (Vyjuvek).

All services outlined in this section are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Refer to: Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

Subsection 5.5.1.2, "Document Requirements and Retention" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*) for additional information about electronic signatures.

6.19 Betibeglogene Autotemcel (Zynteglo)

Betibeglogene autotemcel (Zynteglo) (procedure code J3393) is a benefit of Texas Medicaid for clients who are 4 years of age or older with prior authorization. Prior authorization may be approved for a duration of 12 months.

Betibeglogene autotemcel (Zynteglo) is an autologous hematopoietic stem cell-based gene therapy indicated for treating adult and pediatric clients with β-thalassemia who require regular red blood cell (RBC) transfusions.

Betibeglogene autotemcel (Zynteglo) (procedure code J3393) is limited to one transfusion treatment per lifetime and may be infused as a single infusion in one or more infusion bags.

6.19.1 Prior Authorization Requirements

Betibeglogene autotemcel (Zynteglo) is a one-time infusion therapy indicated for the treatment of clients with β-thalassemia who meet the following requirements:

- The client is 4 years of age or older.
- The client has a documented diagnosis of β-thalassemia (diagnosis code D561) and other forms of thalassemia have been ruled out.
- The client is RBC transfusion dependent and has documented history of receiving RBC transfusions of at least 100 ml per kilogram per year (pRBC/kg/yr) or at least 8 or more transfusions of regular RBCs per year for two years.
- The client has not had a prior hematopoietic stem cell transplant (HSCT) and is unable to find a matched related donor.
- The client is stable and eligible for HSCT, according to the following criteria:
  - No advanced liver disease
  - No human immunodeficiency virus (HIV) positive diagnosis
  - No hepatitis B virus (HBV) and hepatitis C virus (HCV)
  - No prior or current malignancies
  - No bleeding disorders
  - Normal iron levels in the heart
  - Normal levels of white blood cells
  - Normal platelet counts
- The prescriber attests to avoid the use of anti-retroviral medications or hydroxyurea for one month prior to mobilization and until all cycles of apheresis are completed
- The prescriber attests to discontinue iron chelators at least seven days prior to initiation of myeloablative conditioning and the use of myelosuppressive iron chelators should be avoided for 6 months after betibeglogene autotemcel (Zynteglo) infusion

In addition to the documentation requirements outlined in the Prior Authorization Requirements section, the prescriber must monitor the following:

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The client's platelet count for thrombocytopenia and bleeding during the treatment period with betibeglogene autotemcel (Zynteglo)
- The client for at least 15 years post betibeglogene autotemcel (Zynteglo) infusion for possible hematologic malignancies

All services outlined in this section are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

6.20 * Botulinum Toxin Type A and Type B

OnabotulinumtoxinA (Botox brand of botulinum toxin type A), abobotulinumtoxinA (Dysport brand of botulinum toxin type A), incobotulinumtoxin A (Xeomin brand of botulinum toxin type A), rimabotulinumtoxinB (Myobloc brand of botulinum toxin type B), and daxibotulinumtoxinA-lanm (Daxxify brand toxin type A) are benefits of Texas Medicaid.

Botulinum toxins are potent neuromuscular blocking agents that are useful in treating various focal muscle spastic disorders and excessive muscle contractions, such as dystonia, spasms, and twitches. They produce a presynaptic neuromuscular blockade by preventing the release of acetylcholine from the nerve endings. Since the resulting chemical denervation of muscle produces local paresis or paralysis, selected muscles can be treated. Two of the seven naturally occurring serotypes of botulinum toxin have been approved by the FDA for human use in the United States-type A and type B.

Due to the unique manufacturing process of each toxin, botulinum toxins are chemically, clinically, and pharmacologically distinct; as a consequence, these products are not interchangeable. The units of biological activity of one botulinum toxin product cannot be compared to, nor converted into, units of any other botulinum toxin product. The established drug names of the botulinum products emphasize the differing dose-to-potency ratios of these products.

Procedure code J0585 is a benefit when billed with one of the following diagnosis codes:

Procedure codes J0586, J0587, J0588, and J0589 are denied when billed on the same date of service by any provider as procedure code J0585. Procedure codes J0587, J0588, and J0589 are denied when billed on the same date of service by any provider as procedure code J0586. Procedure code J0587 and J0589 are denied when billed on the same date of service by any provider as procedure code J0588. Procedure code J0588 is denied when billed on the same date of service by any provider as procedure code J0589.

IncobotulinumtoxinA, procedure code J0588, is FDA-approved for the treatment of adults with blepharospasm previously treated with onabotulinumtoxinA (J0585).

Physicians, hospitals, and other providers and suppliers should care for and administer drugs to patients in such a way that they can use drugs or biologicals most efficiently, in a clinically appropriate manner. Texas Medicaid encourages scheduling patients to make the most efficient use of the drugs administered. Safe handling guidelines per manufacturer must be observed (e.g., shelf life, cold chain requirements). The smallest size vial to cover the dose is encouraged to be used.

Claims for botulinum toxin type A and B must indicate the number of units used. If the number of units is not specified, the claim will be paid a quantity of one. Claims that exceed the following quantity limitations, per day, may be considered on appeal with documentation of medical necessity:

Procedure Codes	Quantity Limitations of Medication	Billing Units
J0585	400 units	One billing unit is equal to 1 unit of medication. ***Example:*** *A provider that administers 400 units of medication would submit a claim for a quantity of 400.*
J0586	1,500 units	One billing unit is equal to 5 units of medication. ***Example:*** *A provider that administers 1,500 units of medication would submit a claim for a quantity of 300.*
J0587	10,000 units	One billing unit is equal to 100 units of medication. ***Example:*** *A provider that administers 10,000 units of medication would submit a claim for a quantity of 100.*
J0588	400 units	One billing unit is equal to 1 unit of medication. ***Example:*** *A provider that administers 400 units of medication would submit a claim for a quantity of 400.*

Procedures performed in conjunction with botulinum toxin injections are subject to guidelines set forth in the policies specific for those procedures. Any supplies billed by the provider for the administration of botulinum toxin type A or B are not separately payable.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Botulinum toxins administered more frequently than every 12 weeks must include documentation of medical necessity justifying why the medication was given at an interval sooner than 12 weeks.

Documentation in the client's medical record must include the following elements:

- Support for the medical necessity of the botulinum toxin injection:
- A covered diagnosis
- Dosage and frequency of the injections
- Support of the clinical effectiveness of the injections
- Specific site(s) injected

All documentation is subject to retrospective review.

6.21 Brolucizumab-DBLL (Beovu)

Brolucizumab-dbll (procedure code J0179) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.22 Bupivacaine

Bupivacaine (procedure code J0665) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.23 Burosumab-Twza (Crysvita)

Burosumab-Twza (Crysvita) (procedure code J0584) is a benefit of Texas Medicaid with prior authorization. Burosumab-Twza (Crysvita) may be approved for a duration of every 12 months per prior authorization request.

Burosumab-twza (Crysvita) is a fibroblast growth factor 23 (FGF23) blocking antibody, indicated to treat the following:

- X-linked hypophosphatemia (XLH, a rare, inherited form of rickets) in adult and pediatric clients who are 6 months of age and older
- FGF23-related hypophosphatemia in tumor-induced osteomalacia associated with phosphaturic mesenchymal tumors that cannot be localized or is not amenable by surgical excision in adult and pediatric clients who are two years of age and older

The initial therapy for X-linked hypophosphatemia (XLH) must meet the following criteria:

- The client is 6 months of age or older.
- The client has a diagnosis of X-linked hypophosphatemia (XLH) (diagnosis code E8331 or E8339) that is supported by one of the following:
  - Confirmed phosphate regulating gene with homology to endopeptidases located on the X chromosome (PHEX-gene) mutation
  - Serum fibroblast growth factor-23 (FGF23) level >30 pg/ml
- The prescriber discontinues any oral phosphate or active vitamin D analog supplementation at least one week prior to starting burosumab-twza (Crysvita) therapy.
- The prescriber agrees to measure serum phosphate throughout therapy and withhold medication when serum phosphorus is above 5 mg/dl.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The initial therapy for FGF23-related hypophosphatemia in tumor-induced osteomalacia must meet the following criteria:

- The client is 2 years of age or older.
- The client has a diagnosis of FGF23-related hypophosphatemia produced by an underlying tumor that cannot be localized or is not amenable to surgical excision (diagnosis code M838).
- The prescriber discontinues any oral phosphate or vitamin D analog supplement at least two weeks prior to starting burosumab-twza (Crysvita) therapy.
- The prescriber agrees to measure serum phosphate throughout therapy.

For renewal or continuation therapy, the following criteria must be met:

- The client has previously received treatment with burosumab-twza (Crysvita).
- Documentation from the physician that the client has demonstrated a positive clinical response to burosumab-twza (Crysvita) (e.g., enhanced height velocity, improvement in a skeletal deformity, reduction of fractures, reduction of generalized bone pain).
- The physician continues to monitor serum phosphate level.

Burosumab-twza (Crysvita) is not a benefit for the following:

- Clients who currently use oral phosphates and active vitamin D analogs.
- Clients whose serum phosphorus is within or above the normal range for client's age.
- Clients with severe renal impairment or end stage renal disease.

Refer to: Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

6.24 Cabotegravir and Rilpivirine (Cabenuva)

Cabotegravir and Rilpivirine (Cabenuva) (procedure code J0741) is a benefit of Texas Medicaid for clients who are 12 years of age or older.

Cabotegravir (Apretude) (procedure code J0739) is a benefit of Texas Medicaid for clients who are 10 years of age or older.

6.25 Caffeine Citrate (Cafcit)

Caffeine citrate (procedure code J0706) is a benefit of Texas Medicaid for clients who are birth through 6 months of age.

6.26 Calcitonin Gene Related Peptide (CGRP) agents

6.26.1 Eptinezumab-JJMR (Vyepti)

Eptinezumab-jjmr (procedure code J3032) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.26.2 Ajovy (Fremanezumab-vfrm)

Ajovy (fremanezumab-vfrm) (procedure code J3031) is a benefit of Texas Medicaid for clients who are 6 years of age or older.

6.27 Cantharidin

Cantharidin (procedure code J7354) is a benefit of Texas Medicaid for clients who are 2 years of age or older and is restricted to diagnosis code B081.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

6.28 Cefiderocol (Fetroja)

Cefiderocol (procedure code J0699) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.29 Chelating Agents

Chelating agent procedure code J0895 is a benefit of Texas Medicaid when billed with an appropriate diagnosis code.

6.29.1 Deferoxamine Mesylate (Desferal)

Procedure code J0895 must be billed with one of the following diagnosis codes:

6.30 Chimeric Antigen Receptor (CAR) T-Cell Therapy

Axicabtagene ciloleucel (Yescarta) (procedure code Q2041), brexucabtagene autoleucel (Tecartus) (procedure code Q2053), ciltacabtagene autoleucel (Carvykti) (procedure code Q2056), idecabtagene vicleucel (ABECMA) (procedure code Q2055), lisocabtagene maraleucel (Breyanzi) (procedure code Q2054), obecabtagene autoleucel (Aucatzyl) (procedure code Q2058), and tisagenlecleucel (Kymriah) (procedure code Q2042) are benefits of Texas Medicaid with prior authorization.

Procedure codes Q2041, Q2042, Q2053, Q2054, Q2055, Q2056, and Q2058 are limited to once per lifetime, any provider.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Axicabtagene ciloleucel (Yescarta) is a CD-19-directed genetically modified autologous T-cell immunotherapy indicated to treat the following:

- Adult clients with relapsed or refractory large B-cell Lymphoma after two or more lines of systemic therapy, including diffuse large B-cell lymphoma (DLBCL) not otherwise specified, primary mediastinal large B-cell lymphoma, high grade B-cell lymphoma, and DLBCL arising from follicular lymphoma.
- Adult clients with large B-cell lymphoma that is refractory to first-line chemoimmunotherapy or that relapses within 12 months of first-line chemoimmunotherapy.
- Adult clients with relapsed or refractory follicular lymphoma (FL) after two or more lines of systemic therapy.

Brexucabtagene autoleucel (Tecartus) is a CD-19-directed genetically modified autologous T-cell immunotherapy indicated to treat adult clients with relapsed or refractory mantel cell lymphoma (MCL). Brexucabtagene autoleucel is also indicated to treat adult clients with relapsed or refractory B-cell precursor acute lymphoblastic leukemia (ALL).

Ciltacabtagene autoleucel (Carvykti) is a B-cell maturation antigen-directed genetically modified autologous T-cell immunotherapy indicated to treat adult clients with relapsed or refractory multiple myeloma after one or more lines of therapy, including a proteasome inhibitor, an immunomodulatory agent, and are refractory to lenalidomide.

Idecabtagene vicleucel (ABECMA) is a B-cell maturation antigen directed genetically modified autologous T-cell immunotherapy indicated to treat adult clients with relapsed or refractory multiple myeloma after two or more prior lines of therapy including an immunomodulatory agent, a proteasome inhibitor and an anti-CD38 monoclonal antibody.

Lisocabtagene maraleucel (Breyanzi) is a CD-19 directed genetically modified autologous T-cell immunotherapy indicated to treat adult clients with the following:

- Large B-cell lymphoma, including diffuse large B-cell lymphoma (DLBCL) not otherwise specified (including DLBCL arising from indolent lymphoma), high-grade B-cell lymphoma, primary mediastinal large B-cell lymphoma, and follicular lymphoma grade 3B who have:
  - Refractory disease to first-line chemoimmunotherapy or relapse within 12 months of first- line chemoimmunotherapy.
  - Refractory disease to first-line chemoimmunotherapy or relapse after first-line chemoimmunotherapy and are not eligible for hematopoietic stem cell transplant (HSCT) due to comorbidities or age.
  - Relapsed or refractory disease after two or more lines of systemic therapy.
- Relapsed or refractory chronic lymphocytic leukemia (CLL) or small lymphocytic lymphoma (SLL) who have received at least two prior lines of therapy, including a Bruton tyrosine kinase (BTK) inhibitor and a B-cell lymphoma 2 (BCL-2) inhibitor.
- Relapse or refractory follicular lymphoma who has received two or more lines of systemic therapy.
- Relapse or refractory mantle cell lymphoma (MCL) who have received at least two prior lines of systemic therapy.

Obecabtagene autoleucel (Aucatzyl) is a CD19-directed genetically modified autologous T-cell immunotherapy indicated to treat adult clients with relapsed or refractory B-cell precursor acute lymphoblastic leukemia (ALL).

Tisagenlecleucel (Kymriah) is a CD-19-directed genetically modified autologous T-cell immunotherapy indicated to treat the following:

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Clients who are 25 years of age or younger who have acute lymphoblastic leukemia (ALL) that is refractory or second/later relapse.
- Adult clients who have relapsed or refractory large B-cell lymphoma after two or more lines of systemic therapy, including diffuse large B-cell lymphoma (DLBCL) not otherwise specified, high grade B-cell lymphoma, and DLBCL arising from follicular lymphoma.
- Adult clients with relapsed or refractory follicular lymphoma (FL) after two or more lines of systemic therapy.

Providers and facilities must ensure that the client:

- Receives the recommended pre-medications before treatment.
- Is closely monitored for at least two weeks, including daily monitoring for at least one week.
- Is instructed to remain within proximity of a certified healthcare facility for at least two weeks and to avoid driving for two weeks following product administration.

6.30.1 Prior Authorization Criteria for Axicabtagene Ciloleucel (Yescarta)

Prior authorization approval of axicabtagene ciloleucel (Yescarta) (procedure code Q2041) infusion therapy will be considered for the following:

- The client is 18 years of age or older.
- The client has one of the following:
  - Relapsed or refractory disease, defined as progression after two or more lines of systemic therapy (which may or may not include therapy supported by autologous stem cell transplant)
  - Large B-cell lymphoma that is refractory to first-line chemoimmunotherapy or that relapses within 12 months of first-line chemoimmunotherapy
- The client does not have primary central nervous system lymphoma/disease.
- The client does not have an active infection or inflammatory disorder.
- The client has not received prior CD-19 directed CAR-T therapy.
- The client must have a histologically confirmed diagnosis of one of the following types of aggressive non-Hodgkin's lymphoma diagnosis codes:

Diagnosis Codes							
C8330	C8331	C8332	C8333	C8334	C8335	C8336	C8337
C8338	C83398	C833A	C8510	C851A	C8520	C852A	

Prior authorization approval for clients with relapsed or refractory follicular lymphoma (FL) after two or more lines of systemic therapy will be considered when all of the following criteria are met:

- The client is 18 years of age or older.
- The client has relapsed or refractory disease defined as progression after two or more lines of systemic therapy (which may or may not include therapy supported by autologous stem cell transplant).
- The client does not have primary central nervous system lymphoma/disease.
- The client does not have an active infection or inflammatory disorder.
- The client has not received prior CD-19 directed CAR-T therapy.
- The client has a histologically confirmed diagnosis of one of the following types of follicular lymphoma:

6.30.2 Prior Authorization Criteria for Brexucabtagene Autoleucel (Tecartus)

Prior authorization approval for brexucabtagene autoleucel (Tecartus) (procedure code Q2053) infusion therapy for mantel cell lymphoma will be considered when all of the following criteria are met:

- The client has histologically confirmed diagnosis of relapse or refractory mantel cell lymphoma (diagnosis codes C8310, C8311, C8312, C8313, C8314, C8315, C8316, C8317, C8318, C8319, and C831A).
- The client is 18 years of age or older.
- The client does not have primary central nervous system lymphoma/disease.
- The client has not received prior CD-19 directed CAR-T therapy.

Prior authorization approval for clients with B-cell Precursor Acute Lymphoblastic Leukemia (ALL) will be considered once all of the following criteria are met:

- The client has histologically confirmed diagnosis of relapse or refractory B-cell precursor Acute Lymphoblastic Leukemia (ALL) (diagnosis codes C9100, C9101, C9102).
- The client is 18 years of age or older.
- The client does not have primary central nervous system lymphoma/disease.
- The client does not have an active infection or inflammatory disorder.
- The client has not received prior CD-19 directed CAR-T therapy.

6.30.3 Prior Authorization Criteria for Ciltacabtagene Autoleucel (Carvykti)

Prior authorization approval for ciltacabtagene autoleucel (Carvykti) (procedure code Q2056) infusion therapy will be considered when all of the following criteria are met:

- The client is 18 years of age or older.
- The client has histologically confirmed diagnosis of relapse or refractory multiple myeloma (diagnosis codes C9000 and C9002).
- The client has relapsed or refractory disease and has received at least one line of the following systemic therapies before treatment with ciltacabtagene autoleucel (Carvykti) and are refractory to lenalidomide, which must include:

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

  - A proteasome inhibitor
  - An immunomodulatory agent
- The client does not have primary central nervous system lymphoma/disease.
- The client does not have an active infection or inflammatory disorder.
- The client has not received prior CAR-T therapy.
- Ciltacabtagene autoleucel (Carvykti) (procedure code Q2056) is limited to once per lifetime.

6.30.4 Prior Authorization Criteria for Idecabtagene Vicleucel (ABECMA)

Prior authorization approval of idecabtagene vicleucel (ABECMA) (procedure code Q2055) infusion therapy will be considered when all of the following criteria are met:

- The client is 18 years of age or older.
- The client has a histologically confirmed diagnosis of relapse or refractory multiple myeloma (diagnosis codes C9000 and C9002).
- The client must have received two or more prior lines of the following therapies before treatment with idecabtagene vicleucel:
  - An immunomodulatory agent
  - A proteasome inhibitor
  - An anti-CD-38 monoclonal antibody
- The client does not have primary central nervous system lymphoma/disease.
- The client does not have an active infection or inflammatory disorder.
- The client has not received prior CAR-T therapy.

Idecabtagene vicleucel (ABECMA) (procedure code Q2055) is limited to once per lifetime.

6.30.5 Prior Authorization Criteria for Lisocabtagene Maraleucel (Breyanzi)

Prior authorization approval of lisocabtagene maraleucel (Breyanzi) (procedure code Q2054) infusion therapy will be considered when the client has one of the diagnoses listed below, and also meets the following criteria:

- The client has a histologically confirmed diagnosis of large B-cell lymphoma, including diffuse large B-cell lymphoma not otherwise specified (including DLBCL arising from indolent lymphoma), high-grade B-cell lymphoma, primary mediastinal large B-cell lymphoma, or follicular lymphoma grade 3B with one of the following:
  - Refractory disease to first-line chemoimmunotherapy or relapse within 12 months of first line chemoimmunotherapy; or
  - Refractory disease to first-line chemoimmunotherapy or relapse after first line chemoimmunotherapy, and are not eligible for hematopoietic stem cell transplant (HSCT) due to comorbidities or age; or
  - Relapsed or refractory disease after two or more lines of systemic therapy.
- The client has confirmed diagnosis of relapsed or refractory chronic lymphocytic leukemia (CLL) or small lymphocytic lymphoma (SLL) who has received at least two prior lines of therapy, including a Bruton tyrosine kinase (BTK) inhibitor and a B-cell lymphoma 2 (BCL-2) inhibitor.
- The client has confirmed diagnosis of relapsed or refractory follicular lymphoma who has received two or more lines of systemic therapy.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The client has confirmed diagnosis of relapsed or refractory mantle cell lymphoma (MCL) who has received at least two prior lines of systemic therapy.
- The client is 18 years of age or older.
- The client does not have primary central nervous system lymphoma/disease.
- The client does not have an active infection or inflammatory disorder.
- The client has not received prior CD-19 directed CAR-T therapy.
- The client has one of the following lymphoma diagnosis codes:

Diagnosis Codes							
C8200	C8201	C8202	C8203	C8204	C8205	C8206	C8207

Lisocabtagene maraleucel (Breyanzi) (procedure code Q2054) is limited to once per lifetime.

6.30.6 Prior Authorization Criteria for Obecabtagene Autoleucel (Aucatzyl)

Obecabtagene autoleucel (Aucatzyl) may be approved for a duration of 12 months.

Obecabtagene autoleucel (Aucatzyl) is a once in a lifetime cell suspension therapy with split dose infusion and is indicated for clients who meet all the following requirements:

- The client is 18 years of age or older.
- The client has a confirmed diagnosis of relapsed or refractory B-cell precursor ALL (diagnosis codes C9100 and C9102).
- The client has adequate cardiac, hepatic, pulmonary, and renal function.
- A bone marrow blast assessment was conducted, and results from the sample were obtained in order to start lymphodepleting chemotherapy.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The client does not have a clinically significant active infection or inflammatory disorder.
- The client has been screened and does not have active/latent Hepatitis B virus, active Hepatitis C virus or human immunodeficiency virus (HIV).
- The client has not previously received CAR-T therapy.

Obecabtagene autoleucel (Aucatzyl) (procedure code Q2058) is limited to a one-time split dose transfusion treatment.

The required monitoring parameters following obecabtagene autoleucel (Aucatzyl) are:

- Monitor for signs and symptoms of cytokine release syndrome (CRS), neurologic toxicities/ immune effector cell-associated neurotoxicity syndrome (ICANS), and other acute toxicities daily for at least 14 days at the healthcare facility following Aucatzyl infusion.
- Monitor blood counts for cytopenia (e.g., anemia, neutropenia, thrombocytopenia) and secondary malignancies.

6.30.7 Prior Authorization Criteria for Tisagenlecleucel (Kymriah)

Prior authorization approval of tisagenlecleucel (Kymriah) (procedure code Q2042) infusion for the treatment of clients with refractory or second relapse B-cell precursor acute lymphoblastic leukemia will be considered when all of the following criteria are met:

- The client has a confirmed diagnosis of B-cell acute lymphoblastic leukemia (diagnosis codes C9100, C9101, and C9102).
- The client is 25 years of age or younger.
- The client has a confirmed CD-19 tumor expression.
- The client has not received prior CAR-T therapy.

Prior authorization approval of tisagenlecleucel (Kymriah) infusion for the treatment of clients with relapsed or refractory diffuse large B-cell lymphoma will be considered when all of the following criteria are met:

- The client has a confirmed diagnosis of relapsed or refractory large B-cell lymphoma (diagnosis codes C8330, C8331, C8332, C8333, C8334, C8335, C8336, C8337, C8338, C83398, and C833A):
  - Diffuse large B-cell lymphoma, not otherwise specified
  - High grade B-cell lymphoma
  - Diffuse large B-cell lymphoma arising from follicular lymphoma
- The client is 18 years of age or older.
- The client must have relapsed or refractory disease defined as progression after two or more lines of systemic therapy (which may or may not include therapy supported by autologous stem cell transplant).
- The client does not have primary central nervous system lymphoma
- The client has not received prior CD-19 directed CAR-T therapy

Prior authorization approval for clients with relapsed or refractory follicular lymphoma (FL) after two or more lines of systemic therapy will be considered once all the following criteria are met:

- The client is 18 years of age or older
- The client has relapsed, or refractory disease defined as progression after two or more lines of systemic therapy.
- The client does not have primary central nervous system lymphoma/disease

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The client does not have an active infection or inflammatory disorder
- The client has not received prior CD-19 directed CAR-T therapy
- The client has histologically confirmed diagnosis of one of the following types of follicular lymphoma:

Refer to: Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

6.31 Clofarabine

Clofarabine is used for the treatment of relapsed or refractory acute lymphoblastic leukemia for clients who are 1 through 21 years of age. Clofarabine is administered by IV infusion once daily for five days and is repeated every two to six weeks, as needed.

6.31.1 Prior Authorization for Clofarabine

Prior authorization is required for treatment with clofarabine (procedure code J9027) and may be granted for a maximum of six weeks.

Clofarabine may be prior authorized for the treatment of relapsed or refractory acute lymphoblastic leukemia. The following criteria apply to requests for prior authorization:

- The number of anticipated injections needed as well as the dosage per injection must be submitted with the request for prior authorization.
- Prior authorization must be obtained before services are rendered whenever possible. If authorization cannot be obtained prior to the rendering of the service, the authorization request must be submitted within three business days from the date the treatment is initiated.

Prior authorization requests may be considered with documentation of the following:

- The client is 1 through 21 years of age.
- A diagnosis of refractory or relapsed acute lymphoblastic leukemia
- A history of at least two prior failed chemotherapy regimens

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The prior authorization number must be included on the claim along with the number of units, based on the dosage given. Failure to place the prior authorization number on the claim or to obtain prior authorization within the allotted timeframe will result in denied claims.

Refer to: Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

6.32 Coagulation Factor IX (Ixinity)

Coagulation factor IX (Ixinity) (procedure code J7213) is a benefit of Texas Medicaid for clients who are 12 years of age or older.

6.33 * Colony Stimulating Factors (Filgrastim and Pegfilgrastim)

Colony stimulating factors (CSFs) are growth factors (glycoproteins) that support survival, clonal expansion and differentiation of blood forming cells and are a benefit of Texas Medicaid. CSFs reduce the likelihood of neutropenic complications due to chemotherapy and bone marrow transplant.

Filgrastim (Neupogen) (procedure code J1442), tbo-filgrastim (Granix) (procedure code J1447), pegfilgrastim (Neulasta) (procedure code J2506), sargramostim (Leukine) (procedure code J2820), eflapegrastim-xnst (Rolvedon) (procedure code J1449), and efbemalenograstim alfa-vuxw (Ryzneuta) (procedure code J9361) are granulocyte colony stimulating factors (G-CSFs).

[Revised] Filgrastim (Neupogen) (procedure code J1442) biosimilars are filgrastim-aafi (Nivestym) (procedure code Q5110), filgrastim-ayow (Releuko) (procedure code Q5125), filgrastim-sndz (Zarxio) (procedure code Q5101), filgrastim-txid (Nypozi) (procedure code Q5148), and filgrastim-laha (Filkri) (procedure code Q5172).

[Revised] Pegfilgrastim (Neulasta) (procedure code J2506) biosimilars are pegfilgrastim-jmdb (Fulphila) (procedure code Q5108), pegfilgrastim-pbbk (Fylnetra) (procedure code Q5130), pegfilgrastim-apgf (Nyvepria) (procedure code Q5122), pegfilgrastim-fpgk (Stimufend) (procedure code Q5127), pegfilgrastim-cbqv (Udenyca) (procedure code Q5111), pegfilgrastim-bmez (Ziextenzo) (procedure code Q5120), and pegfilgrastim-unne (Armlupeg) (procedure code Q5169).

To submit claims for reimbursement of colony stimulating factors, providers must submit the most appropriate procedure code with the number of units administered.

Procedure code J2506 will be denied if billed on the same date of service as procedure codes J1442, J1449, and J2820.

Procedure code J1442 will be denied if billed on the same date of service as procedure codes J1449, J2506, and J2820.

Procedure code J1449 will be denied if billed on the same date of service as procedure codes J1442, J2506, and J2820.

Procedure code J2820 will be denied if billed on the same date of service as procedure codes J1442, J1449, and J2506.

Procedure code 96377 must be billed with procedure code J2506 on the same day by the same provider.

Procedure code J1449 is restricted to clients who are 18 years of age or older.

Procedure code J9361 is restricted to clients who are 18 years of age or older.

6.34 Crizanlizumab-tmca (Adakveo)

Crizanlizumab-tmca (Adakveo) (procedure code J0791) is a benefit of Texas Medicaid for clients who are 16 years of age and older.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Crizanlizumab-tmca (Adakveo) is indicated for clients with sickle cell disease to reduce the frequency of vaso-occlusive crises (VOCs).

6.34.1 Prior Authorization

Prior authorization is required for crizanlizumab-tmca (Adakveo) and may be approved for a duration of 12 months.

Initial therapy requests for Crizanlizumab-tmca (Adakveo) may be approved for a 12-month duration if all of the following criteria are met:

- The client must be 16 years of age or older.
- The client has a diagnosis of sickle cell disease of any genotype.
- The client has experienced two or more vaso-occlusive events in the past 12 months.

For renewal or continuation therapy requests, the client must meet all of the following requirements:

- The client continues to meet the following initial approval criteria:
  - The client must be 16 years of age or older.
  - The client has a diagnosis of sickle cell disease of any genotype.
- The client experienced positive clinical response to therapy as demonstrated by reduced frequency of vaso-occlusive crisis.
- The client has previously received treatment with Crizanlizumab-tmca (Adakveo) without complications.

Refer to: Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

6.35 * Delandistrogene moxeparvovec-rokl (Elevidys)

[Revised] Delandistrogene moxeparvovec-rokl (Elevidys) is an adeno-associated virus vector-based gene therapy indicated for the treatment of ambulatory clients who are 4 years of age or older with Duchenne muscular dystrophy (DMD) with a confirmed mutation in the DMD gene.

Delandistrogene moxeparvovec-rokl (Elevidys) (procedure code J1413) is a benefit of Texas Medicaid and limited to one transfusion treatment per lifetime. Procedure code J1413 is restricted to diagnosis code G7101.

6.35.1 * Prior Authorization Requirements

Prior authorization is required for delandistrogene moxeparvovec-rokl (Elevidys) therapy and must be submitted with a Special Medical Prior Authorization (SMPA) Request Form.

Delandistrogene moxeparvovec-rokl (Elevidys) is a one-time intravenous infusion therapy indicated for the treatment of clients with Duchenne muscular dystrophy who meet the following requirements:

- [Revised] The client is 4 years of age or older and ambulatory.
- The client has a confirmed mutation in the DMD gene (diagnosis code G7101). Prescribers should monitor clients with a mutation in exon0s 1-17 and/or 59-71 of the DMD gene, for immune-mediated myositis.
- The client does not have any deletion in exon 8 or exon 9 in the DMD gene.
- The client is not on concomitant DMD antisense oligonucleotide therapy (e.g., golodirsen, casimersen, viltolarsen, eteplirsen, etc.).
- Documentation of client's baseline testing for presence of anti-AAVrh74 total binding antibody titers of <1:400.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The client has no current infection. If there are signs of infection prior to infusion, treatment with delandistrogene moxeparvovec-rokl (Elevidys) should be postponed until the infection clears.
- Due to the possibility of acute serious liver injury, client's liver function must be monitored prior and post delandistrogene moxeparvovec-rokl (Elevidys) therapy.
- Documentation of client's platelet count and troponin-l level should be obtained prior to infusion.
- The client does not have a history of previously receiving treatment with delandistrogene moxeparvovec-rokl (Elevidys) infusion.

The required monitoring parameters following delandistrogene moxeparvovec-rokl (Elevidys) infusion are:

- Liver function should be monitored upon initiation of therapy and continued on a weekly schedule for the first 3 months after delandistrogene moxeparvovec-rokl (Elevidys) infusion.
- Troponin-l level should be monitored weekly for the first month after treatment with delandistrogene moxeparvovec-rokl (Elevidys).

All services outlined in this section are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

Refer to: Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

Subsection 5.5.1.2, "Document Requirements and Retention" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*) for additional information about electronic signatures.

6.36 Denileukin Diftitox-cxdl (Lymphir)

Denileukin diftitox-cxdl (Lymphir) (procedure code J9161) is a benefit of Texas Medicaid for clients with prior authorization.

Denileukin diftitox-cxdl (Lymphir) is an IL-2 receptor directed cytotoxin indicated for the treatment of adult patients with relapsed or refractory stage I–III cutaneous T-cell lymphoma (CTCL) after at least one prior systemic therapy.

6.36.1 Prior Authorization Requirements

6.36.1.1 Initial Requests

Denileukin diftitox-cxdl (Lymphir) is a subcutaneous injection and the initial prior authorization for this drug will be approved for 12 months for clients who meet the following requirements:

- The client is 18 years of age or older.
- The client has a confirmed diagnosis of cutaneous T-cell lymphoma (CTCL).
  - The client's lymphoma is categorized as Stage I to III.
  - The client's CTCL is relapsed or refractory after at least one prior systemic treatment.

Diagnosis Codes							
C8400	C8401	C8402	C8403	C8404	C8405	C8406	C8407
C8408	C8409	C8410	C8411	C8412	C8413	C8414	C8415
C8416	C8417	C8418	C8419	C84A0	C84A1	C84A2	C84A3
C84A4	C84A5	C84A6	C84A7	C84A8	C84A9	C84AA	

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The client's serum albumin level must be > 3 g/dL prior to treatment cycle.
- The prescriber attests to counseling female clients of childbearing age regarding the use of an effective method of contraception during treatment with denileukin diftitox-cxdl (Lymphir) as there may be potential risk to the fetus.

The required monitoring parameters following denileukin diftitox-cxdl (Lymphir) are:

- Monitor the client for signs and symptoms of capillary leak syndrome (e.g., low blood pressure, severe swelling).
- Monitor the client's liver enzymes and bilirubin at baseline and during treatment as hepatotoxicity may occur.
- Monitor the client's renal function prior to starting each treatment. If serum albumin is less than 3 g/dL, delay administration of Lymphir until serum albumin is ≥ 3 g/dL.
- Monitor and evaluate the client for any visual impairment throughout treatment.

6.36.1.2 Recertification/Extension

For renewal or continuation of denileukin diftitox-cxdl (Lymphir) therapy, the client must meet the following requirements:

- The client meets the initial requirements for prior authorization and is currently treated with denileukin diftitox-cxdl (Lymphir) with the absence of severe adverse reactions or unacceptable toxicity (e.g., visual impairment, infusion related reactions, or hepatotoxicity).
- The client demonstrates partial/complete response to treatment or stabilization of disease, as shown by a decrease in spread or size of the tumor.

6.36.2 Documentation Requirements

In addition to the documentation requirements outlined in this section, all services are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the services provided.

6.37 Dexamethasone (Hemady)

Dexamethasone (Hemady) (procedure code J8541) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.38 Dexmedetomidine

Dexmedetomidine (procedure code J1105) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.39 Dimethyl sulfoxide

Dimethyl sulfoxide (procedure code J1212) is a benefit of Texas Medicaid and is limited to diagnosis codes N3010 and N3011.

6.40 Eculizumab (Soliris)

Eculizumab (Soliris) (procedure code J1299) is a benefit of Texas Medicaid and is limited to the following diagnosis codes:

Diagnosis Codes							
D5932	D5939	D595	G360	G7000	G7001		

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

6.41 Edaravone (Radicava)

Procedure code J1301 is a benefit of Texas Medicaid for clients who are 18 years of age and older with prior authorization. Client must have a diagnosis of amyotrophic lateral sclerosis (ALS).

6.42 Efgartigimod

Efgartigimod alfa-fcab (Vyvgart) (procedure code J9332) and efgartigimod alfa (Vyvgart Hytrulo) (procedure code J9334) are benefits of Texas Medicaid and are limited to clients who are 18 years of age or older and restricted to diagnosis codes G700 and G7001. Procedure code J9334 is also restricted to diagnosis code G6181.

6.43 Elivaldogene Autotemcel (Skysona)

Elivaldogene autotemcel (Skysona) (procedure code J3387) is a benefit of Texas Medicaid for male clients who are 4 through 17 years of age with prior authorization.

Elivaldogene autotemcel (Skysona) is indicated to slow the progression of neurological dysfunction in boys who are 4 through 17 years of age with early, active cerebral adrenoleukodystrophy (CALD).

Elivaldogene autotemcel (Skysona) (procedure code J3387) is limited to one transfusion treatment per lifetime.

6.43.1 Prior Authorization Requirements

Elivaldogene autotemcel (Skysona) is a one-time infusion therapy indicated for the treatment of clients who meet the following requirements:

- The client is male who is 4 through 17 years of age.
- The client has a documented diagnosis of CALD (diagnosis code E71511, E71520, E71521, E71528, or E71529).
- The client has a variant in the ABCD1 gene as evident by a genetic test.
- The client's CALD is caused by the presence of a variant of the ABCD1 gene causing elevated very long chain fatty acid (VLCFA) and not secondary to head trauma.
- The client has early, active CALD as defined by all the following:
  - The client is asymptomatic or mildly symptomatic with neurologic function score (NFS) of less than or equal to 1.
  - The client has gadolinium enhancement on brain magnetic resonance imaging (MRI).
  - The client has a Loes score ranging from 0.5 to 9.
- The client has not had a hematopoietic stem cell transplant (HSCT), is eligible for HSCT, and is unable to find a matched related donor.
- The client's screening result is negative for hepatitis B virus (HBV), hepatitis C virus (HCV), human immunodeficiency virus (HIV)-1 and HIV-2, and Human T-lymphotropic virus type I (HTLV-I) and type II (HTLV-II) prior to the collection of cells for manufacturing.
- The prescriber must attest to monitor the client closely for evidence of life-threatening hematological malignancy through complete blood counts (CBC) at least every six months and through assessment for possible clonal expansion a least twice in the first year and annually thereafter.
- The prescriber must attest to monitor the client for signs of bleeding and infections after the treatment with elivaldogene autotemcel (Skysona) as life-threatening bacterial or viral infections may occur as well as thrombocytopenia and prolonged cytopenia.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The client must avoid taking anti-retroviral medications for at least one month prior to initiating medication for stem cell mobilization and for the expected duration for elimination of the medications, and until all cycles of apheresis are complete.

In addition to the documentation requirements outlined in the Prior Authorization Requirements section, all services outlined in this section are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

6.44 Elranatamab-bcmm (Elfrexio)

Elranatamab-bcmm (Elfrexio) (procedure code J1323) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.45 Emapalumab-lzsg (Gamifant)

Emapalumab-lzsg (Gamifant) is an interferon gamma (IFNy) blocking antibody that is indicated for the treatment of the following:

- Adult and pediatric (newborn and older) clients with primary hemophagocytic lymphohistiocytosis (HLH) with refractory, recurrent, or progressive disease or intolerance with conventional HLH therapy.
- Adult and pediatric (newborn and older) clients with HLH/macrophage activation syndrome (MAS) in known or suspected Still's disease, including systemic juvenile idiopathic arthritis (sJIA), with an inadequate response or intolerance to glucocorticoids, or with recurrent MAS.

Emapalumab-lzsg (Gamifant) (procedure code J9210) is a benefit of Texas Medicaid for clients (newborn and older) with prior authorization.

Prescriber must administer dexamethasone concomitantly with emapalumab-lzsg (Gamifant) therapy.

Emapalumab-lzsg (Gamifant) is administered as part of the induction/maintenance phase of hematopoietic stem cell transplant (HSCT) and therapy will be discontinued once client is at the initiation phase for HSCT and no longer requires emapalumab-lzsg (Gamifant) therapy for HLH.

6.45.1 Prior Authorization Requirements

Prior authorization is required for emapalumab-lzsg (Gamifant) (procedure code J9210).

Prior authorization for initial therapy will be approved for a duration of six months when the client has one of the diagnoses listed below and meets the following criteria:

- Client has a documented diagnosis of primary HLH (diagnosis code D761) based on the following:
  - Genetic mutation of the gene known to cause primary HLH (e.g., PRF1, UNC13D, STX11, or STXBP2) or a family history consistent with primary HLH or
  - Confirmation of least 5 of the following criteria:
    - Fever ≥101.3 °F
    - Splenomegaly
    - Cytopenia defined by at least 2 of the following: Hemoglobin <9 g/dl; OR platelet count <100 x 10^9/L; OR neutrophils <1 x 10 Fasting triglycerides >265 mg/dl OR fibrinogen ≤1.5 g/L
    - Hemophagocytosis in the liver, bone marrow, spleen or lymph node
    - Low or absent natural killer (NK) cell activity
    - Serum ferritin concentration ≥ 500 mg/L

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

    - High plasma concentration of soluble CD25 (i.e., soluble interleukin-2 receptor) >2,400 U/mL
- Client has refractory, recurrent or progressive disease or intolerance with conventional HLH therapy (e.g., etoposide, cyclosporine A, or anti-thymocyte globulin).
- Client has been tested/screened for latent tuberculosis infection prior to initiation of emapalumab-lzsg (Gamifant) therapy.
- Client has not undergone hematopoietic stem cell transplant and is candidate for HSCT once emapalumab-lzsg (Gamifant) therapy has been discontinued.
- Client has a documented diagnosis of HLH/MAS in Still's disease based on the following:
    - Client has a diagnosis of HLH along with a confirmed or suspected diagnosis of systemic juvenile idiopathic arthritis or adult onset of Still's disease.

Diagnosis Codes							
D761	M061	M0820	M08211	M08212	M08219	M08221	M08222
M08229	M08231	M08232	M08239	M08241	M08242	M08249	M08251
M08252	M08259	M08261	M08262	M08269	M08271	M08272	M08279
M0828	M0829						

    - Client has a diagnosis of active MAS with ferritin level greater than 684 ng/mL and any two of the four laboratory criteria listed below:
        - Platelet count ≤ 181×109/L
        - Aspartate aminotransferase (AST) > 48 U/L
        - Triglycerides > 156 mg/dL
        - Fibrinogen levels ≤ 360 mg/dL
    - Client has an inadequate response to high-dose IV glucocorticoids.
    - Client does not have any active infections caused by specific pathogens favored by IFNγ neutralization (e.g., mycobacteria and Histoplasma capsulatum).

For renewal or continuation therapy with emapalumab-lzsg (Gamifant), the client must meet all of the following requirements:

- Client continues to meet the initial approval criteria.
- Client continues to require emapalumab-lzsg (Gamifant) as HLH treatment pending the initiation of HSCT or when treatment is no longer needed for HLH/MAS.

Refer to: Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

6.46 * Enzyme Replacement Therapy (ERT)

ERT is a medical treatment that replaces a specific enzyme that is deficient or absent in the body.

The following ERT therapies are benefits of Texas Medicaid:

- Agalsidase beta (Fabrazyme) is indicated in clients who are 2 years of age or older with Fabry disease and may be reimbursed with diagnosis code E7521.
- Alglucosidase alfa (Lumizyme) is indicated for clients with Pompe disease (GAA deficiency) and may be reimbursed with diagnosis code E7402.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Apadamtase alfa (Adzynma) is indicated in pediatric and adult clients for prophylactic or on demand ERT for congenital thrombotic thrombocytopenic purpura (cTTP) and may be reimbursed with diagnosis code D6942.
- Avalglucosidase alfa-ngpt (Nexviazyme) is indicated for clients who are 1 year of age or older with late onset Pompe disease (lysosomal acid alpha-glucosidase [GAA] deficiency) and may be reimbursed with diagnosis code E7402.
- Cerliponase alfa (Brineura) is indicated to slow the loss of ambulation in pediatric clients with late neuronal ceroid lipofuscinosis type 2 (CLN2) and may be reimbursed with diagnosis code E754.
- Cipaglucosidase alfa-atga (Pombiliti) is indicated to treat adult clients who are 18 years of age or older with Pompe disease (lysosomal acid alpha-glucosidase [GAA] deficiency) who weigh over 40 kilograms, are not improving on current ERT, and may be reimbursed with diagnosis code E7402.
- Elosulfase alfa (Vimizim) is a hydrolytic lysosomal glycosaminoglycan- (GAG) specific enzyme indicated for clients who are 5 years of age or older with mucopolysaccharidosis type IVA and may be reimbursed with diagnosis code E76210.
- [Revised] Galsulfase (Naglazyme) is a hydrolytic lysosomal glycosaminoglycan- (GAG) specific enzyme indicated for clients who are 5 years of age or older with mucopolysaccharidosis VI (MPS VI; Maroteaux-Lamy syndrome) and may be reimbursed with diagnosis code E7629.
- Idursulfase (Elaprase) is a hydrolytic lysosomal glycosaminoglycan- (GAG) specific enzyme indicated for clients with Hunter syndrome (mucopolysaccharidosis II [MPS II]) and may be reimbursed with diagnosis code E761.
- [Revised] Imiglucerase (Cerezyme) is indicated for long-term ERT for adult and pediatric clients with a confirmed diagnosis of Type 1 Gaucher disease (diagnosis code E7522) that results in one or more of the following conditions:
  - Anemia (low red blood cell count)
  - Thrombocytopenia (low blood platelet count)
  - Bone disease
  - Hepatomegaly or splenomegaly (enlarged liver or spleen)
- Laronidase (Aldurazyme) is indicated in clients with Hurler and Hurler-Scheie forms of mucopolysaccharidosis I (MPS I) and clients with the Scheie form who have moderate to severe symptoms and may be reimbursed with diagnosis codes E7601, E7602, and E7603.
- Olipudase alfa-rpcp (Xenpozyme) is indicated for the treatment of non-central nervous system manifestations of acid sphingomyelinase deficiency (ASMD) in adult and pediatric patients and may be reimbursed with diagnosis codes E75240, E75241, E75244, E75248, and E75249. The following requirements must be met:
  - Pregnancy status of female clients of reproductive potential must be verified prior to initiating treatment.
  - Client's baseline transaminase level must be obtained.
  - Assessment of alanine transaminase (ALT) and aspartate aminotransferase (AST) must be conducted within one month prior to initiation of Olipudase alfa-rpcp, within 72 hours prior to any infusion during dose escalation, or prior to the next scheduled Olipudase alfarpcp infusion upon resuming treatment following a missed dose.
- Pegunigalsidase alfa-iwxj (Elfabrio) is indicated for the treatment of adult clients with confirmed Fabry disease and may be reimbursed with diagnosis code E7521.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- [Revised] Pegzilarginase-nbln (Loargys) is indicated to treat hyperargininemia in clients who are 2 years of age or older with arginase 1 deficiency (ARG1-D) in conjunction with dietary protein restriction with diagnosis code E7221.
- Protein C concentrate, human (Ceprotin) is indicated in pediatric and adult clients with severe congenital protein C deficiency for the prevention and treatment of venous thrombosis and purpura fulminans and may be reimbursed with diagnosis cod D6859.
- Sebelipase alfa (Kanuma) is indicated for the treatment of pediatric and adult clients with a diagnosis of lysosomal acid lipase (LAL) deficiency and may be reimbursed with diagnosis code E755.
- [Revised] Taliglucerace alfa (Elelyso) is indicated for long-term ERT for adult and pediatric clients who are 4 years of age or older with Type 1 Gaucher disease and may be reimbursed with diagnosis code E7522.
- [Revised] Tividenofusp alfa-eknm (Avlayah) is indicated for the treatment of neurologic manifestations of Hunter syndrome (Mucopolysaccharidosis type II, MPS II) in presymptomatic or symptomatic pediatric clients weighing at least five kilograms before advanced neurologic impairment with diagnosis code E761.
- Velaglucerase alfa (VPRIV) is indicated for long-term ERT for clients with Type 1 Gaucher disease and may be reimbursed with diagnosis code E7522.
- Velmanase alfa-tycv (Lamzede) is indicated to treat non-central nervous system manifestation of alpha-mannosidosis in adult and pediatric clients and may be reimbursed with diagnosis code E771. The following requirement must be met:
    - Pregnancy status of female clients of reproductive potential must be verified prior to initiating treatment.

Vestronidase alfa-vjbk (Mepsevii) is indicated to treat Mucopolysaccharidosis VII (MPS VII, Sly syndrome) in pediatric and adult clients with prior authorization. Vestronidase alfa-vjbk (Mepsevii) may be approved for a duration of every 12 months per prior authorization request.

For initial therapy, the following criteria must be met:

- Documentation of clinical signs and symptoms of Mucopolysaccharidosis VII (MPS VII) (e.g., skeletal deformities; enlarged liver, spleen, or both; airway obstruction or pulmonary problems; joint limitations; etc.)
- Diagnosis of Mucopolysaccharidosis VII (MPS VII, Sly syndrome) (diagnosis code E7629 or E763) supported by elevated urine glycosaminoglycans excretion at a minimum of 3-fold over the mean normal for age at screening and either or the following:
    - Beta-glucuronidase enzyme deficiency in peripheral blood based on leukocytes or cultured fibroblasts
    - Mutation in the glucuronidase beta (GUSB) gene, confirmed by molecular genetic testing

For renewal or continuation of therapy, the following criteria must be met:

- Client has previously received treatment with vestronidase alfa-vjbk without an adverse reaction.
- Documentation from physician confirms the client has experienced an improvement in clinical response compared to pretreatment baseline (e.g., stability in skeletal deformities; reduction in liver volume; reduction in spleen volume, or both; stable or improved pulmonary function; improved endurance; and functional capacity, etc.).

Refer to: Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

6.46.1 * Reimbursement for ERT

The following procedure codes may be reimbursed for ERT services:

[Revised] Procedure Codes									
J0180	J0217	J0218	J0219	J0221	J0567	J1203	J1322	J1458	J1743
J1757	J1786	J1818	J1931	J2508	J2724	J2840	J3060	J3385	J3397
J7171									

6.46.2 Prior Authorization

Prior authorization is required for enzyme replacement therapy and documentation must include all of the following:

- A request for the specific enzyme replacement therapy.
- Laboratory evidence of the enzyme deficiency, (i.e., below the laboratory-defined cut-off value as determined by the laboratory).

The requesting provider may be asked for additional information to clarify or complete a request for enzyme replacement therapy.

Retrospective review may be performed to ensure documentation supports the medical necessity of the requested equipment or supplies.

6.47 Epcoritamab-bysp (Epkinly)

Epcoritamab-bysp (procedure code J9321) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.48 Eravacycline (Xerava)

Eravacycline (procedure code J0122) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.49 Esketamine (Spravato)

Esketamine (Spravato) is a benefit of Texas Medicaid for clients who are 18 years of age or older with prior authorization. Providers must submit claims for esketamine (Spravato) with procedure code J0013.

Esketamine (Spravato) nasal spray is an N-methyl-D-aspartate (NMDA) receptor antagonist that is indicated for any of the following treatments:

- Treatment-resistant depression (TRD) in adult clients, as monotherapy or in conjunction with an oral antidepressant
- Depressive symptoms in adult clients with major depressive disorder (MDD) with acute suicidal ideation or behavior in conjunction with an oral antidepressant

Esketamine (Spravato) is only available through a restricted program under a Risk Evaluation and Mitigation Strategy (REMS).

Providers/health-care settings must be certified in the Spravato REMS program to administer Spravato to clients enrolled in the REMS program. Administration of the drug must take place in a health-care facility under the direct observation of a health-care provider.

Pharmacies must be certified in the Spravato REMS program to dispense to health-care settings who are authorized to administer the drug.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Clients must be enrolled in the Spravato REMS program and comply with the ongoing requirements for Spravato treatment.

Esketamine (Spravato) is not a benefit for clients who have aneurysmal vascular disease, arteriovenous malformation or history of intracerebral hemorrhage.

6.49.1 Prior Authorization

Prior authorization is required for esketamine (Spravato) (procedure code J0013) and may be approved for a duration of six months.

Initial therapy for esketamine (Spravato) nasal spray may be approved when all of the following criteria is met:

- The client is 18 years of age or older.
- The client has a diagnosis of major depressive disorder (MDD) with one of the following diagnosis codes:

Diagnosis Codes							
F0631	F0632	F0634	F320	F321	F322	F323	F324
F325	F3289	F329	F32A	F330	F331	F332	F333
F3340	F3341	F3342	F338	F339	F341	F350	

- Client has either of the following:
  - A treatment-resistance depression (as monotherapy or in combination with an oral antidepressant) that has been confirmed as an inadequate response/failure to previous antidepressant treatment.
  - A major depressive disorder with acute suicidal ideation or behavior (in conjunction with an oral antidepressant) and the prescriber's evaluation shows that the client:
    - Has suicidal ideation with intent.
    - Needs acute psychiatric hospitalization due to an imminent risk of suicide.
- Esketamine (Spravato) must be administered under the direct observation of a health-care provider and the client must be monitored for at least 2 hours after each treatment.
- Prior to starting esketamine (Spravato) treatment, there must be an attestation of baseline scoring of clinical assessment of MDD.
- The client must not have contraindications to esketamine (Spravato), such as aneurysmal vascular disease, arteriovenous malformation, or intracerebral hemorrhage.

For renewal or continuation therapy, the client must meet all of the following requirements:

- The client continues to meet the initial prior authorization approval criteria.
- The client demonstrates positive clinical response to esketamine (Spravato) therapy by an improvement from baseline assessment.
- The client has previously received treatment esketamine (Spravato) without complications.

Refer to: Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

6.50 Esmolol Hydrochloride

Esmolol hydrochloride (procedure code J1805 and J1806) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

6.51 Etranacogene Dezaparvovec-drlb (Hemgenix)

Etranacogene dezaparvovec-drlb (Hemgenix) is an adeno-associated virus vector-based gene therapy indicated to treat adult clients with Hemophilia B (congenital Factor IX deficiency).

Etranacogene dezaparvovec-drlb (Hemgenix) (procedure code J1411) is a benefit of Texas Medicaid for adult clients who are 18 years of age or older with prior authorization.

6.51.1 Prior Authorization Requirements

Prior authorization is required for etranacogene dezaparvovec-drlb (Hemgenix) therapy.

Etranacogene dezaparvovec-drlb (Hemgenix) is a one-time infusion therapy indicated for the treatment of clients who meet the following requirements:

- The client is 18 years of age or older.
- The client has a confirmed diagnosis of Hemophilia B (Hereditary factor IX deficiency) (diagnosis code D67) and all other bleeding disorders not related to Hemophilia B have been ruled out.
- The client must meet one of the following criteria:
  - Is currently using Factor IX prophylaxis therapy, or
  - Has current or historical life-threatening hemorrhage, or
  - Has a history of repeated, serious spontaneous bleeding episodes.
- A Factor IX inhibitor titer testing must be performed, and client must have a baseline anti-AAV5 antibody titer of ≤1:678.
- The client must be tested for Factor IX inhibitor presence and testing result must be negative.
  - If testing yields a positive result, a second Factor IX inhibitor titer test should be performed within two weeks.
  - Etranacogene dezaparvovec-drlb (Hemgenix) should not be administered if the results for the initial and second test for human Factor IX inhibitor are positive.
- Baseline liver condition and function assessment must be assessed prior to etranacogene dezaparvovec-drlb (Hemgenix) infusion.
  - Documentation includes, but is not limited to alanine aminotransferase (ALT), aspartate aminotransferase (AST), alkaline phosphatase (ALP), and total bilirubin
  - Documentation of hepatic ultrasound and elastography must be provided.
- The client does not have a history of previously receiving treatment with etranacogene dezaparvovec-drlb (Hemgenix) infusion.

Etranacogene dezaparvovec-drlb (Hemgenix) (procedure code J1411) is limited to one infusion per lifetime.

These are the required monitoring parameters following etranacogene dezaparvovec-drlb (Hemgenix) infusion:

- Liver transaminase levels must be assessed once weekly for at least three months after etranacogene dezaparvovec-drlb (Hemgenix) infusion to monitor for any signs of potential hepatotoxicity.
- Factor IX activity must be monitored weekly for at least three months post-infusion.

In addition to the documentation requirements outlined in this section, if any, all services are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

6.52 Evinacumab-dgnb (Evkeeza)

Evinacumab-dgnb (procedure code J1305) is a benefit of Texas Medicaid for clients who are 1 year of age or older.

6.53 Fam-trastuzumab Deruxtecan-nxki

Fam-trastuzumab Deruxtecan-nxki (procedure code J9358) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.54 * Fecal Microbiota

[Revised] Fecal microbiota (procedure code J1440) is a benefit of Texas Medicaid for clients who are 18 years of age or older and restricted to diagnosis codes A0471, A0472, and Z8617.

6.55 Fluocinolone Acetonide (Retisert)

Procedure code J7311 is a benefit of Texas Medicaid for clients of all ages but is only considered for reimbursement with a posterior uveitis diagnosis of more than six months in duration and only when the condition has been unresponsive to oral or systemic medication treatment.

Refer to: Subsection 4.2.11, "Fluocinolone Acetonide" in the *Inpatient and Outpatient Hospital Services Handbook* (*Vol. 2, Provider Handbooks*) for additional prior authorization requirements.

6.56 Furosemide (Furoscix)

Furosemide (Furoscix) (procedure code J1941) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.57 Givosiran (Givlaari)

Givosiran (procedure code J0223) is a benefit of Texas Medicaid for clients who are 18 years of age or older and when billed with diagnosis codes E8020, E8021, and E8029.

6.58 Glofitamab-gxbm

Glofitamab-gxbm (procedure code J9286) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.59 Granisetron Hydrochloride

Granisetron hydrochloride (procedure code J1626) is a benefit of Texas Medicaid and is limited to diagnosis codes Z510, Z5111, Z5112, and Z5189.

6.60 Hematopoietic Injections

Hematopoietic agents erythropoietin alfa, epoetin alfa (EPO), methoxy polyethylene glycol-epoetin beta (Mircera), and darbepoetin alfa are benefits of Texas Medicaid and reimbursed using procedure codes J0881, J0885, and J0888 with an appropriate diagnosis code.

Providers must maintain medical records in their offices that document regular monitoring of hemoglobin or hematocrit levels and explain the rationale for the dosing of epoetin alfa, methoxy polyethylene glycol-epoetin beta, and darbepoetin alfa. These records are subject to retrospective review to determine appropriate utilization and reimbursement for this service.

EPO, Mircera, and darbepoetin alfa injections are limited to specific diagnosis codes as indicated in this section.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Refer to: Subsection 7.2.7.1, "Hematopoietic Injections" in the *Clinics and Other Outpatient Facility Services Handbook* (*Vol. 2, Provider Handbooks*) for information about outpatient facility criteria.

6.60.1 Darbepoetin Alfa

Darbepoetin alfa (procedure code J0881) is an erythropoiesis-stimulating protein closely related to erythropoietin. Darbepoetin stimulates erythropoiesis by the same mechanism as EPO. Darbepoetin alfa has approximately a three-fold longer half-life than EPO, resulting in a sustained erythropoietic effect and less frequent dosing. Darbepoetin alfa is indicated for:

- Treatment of anemia associated with chronic renal failure (CRF), including clients on dialysis and clients not on dialysis.
- Treatment of anemia in clients who have non-myeloid malignancies where anemia is due to the effect of chemotherapy.

Procedure code J0881 must be billed with one of the following diagnosis codes:

Diagnosis Codes							
C9000	C9001	C9002	D460	D461	D4621	D464	D46A
D46B	D611	D612	D613	D6189	D619	D630	D631
D644	D6481	D6489	D649	N181	N182	N1830	N1831
N1832	N184	N189	N19	Z5111	Z5112		

Darbepoetin alfa injections are limited to once weekly (Sunday through Saturday).

6.60.2 Epoetin Alfa (EPO)

EPO (procedure code J0885) is a glycoprotein that stimulates the formation of red blood cells and the production of the precursor red blood cells of the bone marrow. EPO is indicated for:

- Anemia associated with chronic renal failure (CRF), including clients not on dialysis.
- Anemia related to therapy with zidovudine (AZT) in HIV-infected clients.
- Anemia due to the effects of concomitantly administered chemotherapy in clients who have non-myeloid malignancies.
- Anemia of prematurity.
- Clients scheduled to undergo elective noncardiac, nonvascular surgery to decrease need for allogenic blood transfusion.

Procedure code J0885 must be billed with one of the following diagnosis codes:

Diagnosis Codes							
B20	C9000	C9001	C9002	D460	D461	D4621	D4622
D464	D469	D46A	D46B	D46C	D46Z	D471	D479
D47Z9	D611	D612	D613	D6189	D619	D630	D631
D644	D6481	D6489	D649	I120	N181	N182	N1830
N1831	N1832	N184	N189	N19	P612		

EPO may be considered for reimbursement when the dose is titrated consistent with prevailing, evidence-based clinical guidelines, as published by the National Kidney Foundation Kidney Disease Outcomes Quality Initiative, including appropriate monitoring of the rise and fall of the hemoglobin or hematocrit levels.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

EPO is limited to three injections per calendar week (Sunday through Saturday).

6.60.3 Methoxy Polyethylene Glycol-Epoetin Beta (Mircera)

Methoxy polyethylene glycol-epoetin beta (Mircera) is indicated for the treatment of anemia associated with chronic kidney disease (CKD) and may be administered subcutaneously or intravenously. Mircera is not indicated for use in the treatment of anemia due to cancer chemotherapy or as a substitute for red blood cell transfusions in clients who require immediate correction of anemia. Mircera is indicated for the following:

- Treatment of anemia associated with CKD in adult clients on hemodialysis and adult clients not on hemodialysis.
- Treatment of anemia associated with CKD in pediatric clients who are 5 through 17 years of age. These clients must be on hemodialysis and converting from another erythropoiesis-stimulating agent (ESA) after their hemoglobin level was stabilized with an ESA.

Note: *In pediatric clients, Mircera is administered by intravenous injection only.*

Methoxy polyethylene glycol-epoetin beta (Mircera) (procedure code J0888) is limited to the following diagnosis codes:

Diagnosis Codes							
D631	I129	I130	N181	N182	N1830	N1831	N1832
N184							

Methoxy polyethylene glycol-epoetin beta (Mircera) may be considered for reimbursement when the dose is titrated consistent with prevailing, evidence-based, clinical guidelines as published by the National Kidney Foundation Kidney Disease Outcomes Quality Initiative, including appropriate monitoring of the rise and fall of the hemoglobin or hematocrit levels.

Methoxy polyethylene glycol-epoetin beta (Mircera) is limited to one injection every 2 calendar weeks, any provider (Sunday through Saturday).

6.61 Hemophilia Drugs

6.61.1 Alhemo (Concizumab-mtci)

Alhemo (Concizumab-mtci) (procedure code J7173) is a benefit of Texas Medicaid for clients who are 12 years of age or older.

6.61.2 Coagulation factor Xa (Recombinant), Inactivated-zhzo (Andexxa)

Coagulation factor XA (recombinant), inactivated-zhzo (procedure code J7169) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.61.3 Factor VIIa (Antihemophilic factor, Recombinant-JNCW) (Sevenfact)

Factor VIIa (Antihemophilic factor, recombinant-jncw) (procedure code J7212) is a benefit of Texas Medicaid for clients who are 12 years of age or older.

6.61.4 Prothrombin complex concentrate (Human-lans), per I.U. of factor 1x activity

Prothrombin complex concentrate, human-lans, (procedure code J7165) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.61.5 Prothrombin complex (Human), per I.U. of factor 1x activity (Kcentra)

Prothrombin complex, human (procedure code J7168) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

6.61.6 Qfitlia (Fitusiran)

Qfitlia (Fitusiran) (procedure code J7174) is a benefit of Texas Medicaid for clients who are 12 years of age or older.

6.62 Hereditary Angioedema (HAE) agents

6.62.1 C1 Esterase Inhibitor (Human) (Berinert)

C-1 esterase inhibitor (human) (Berinert) (procedure code J0597) is a benefit of Texas Medicaid for clients who are 5 years of age or older when billed with diagnosis code D841.

6.62.2 C1 Esterase Inhibitor (Human) (Cinryze)

C-1 esterase inhibitor (human) (Cinryze) (procedure code J0598) is a benefit of Texas Medicaid for clients who are 6 years of age or older when billed with diagnosis code D841.

6.62.3 C1 Esterase Inhibitor (Human) (Haegarda)

C1 esterase inhibitor (human) (Haegarda) (procedure code J0599) is a benefit of Texas Medicaid for clients who are 6 years of age or older when billed with diagnosis code D841.

6.62.4 C1 Esterase Inhibitor (Recombinant) (Ruconest)

C1 esterase inhibitor (recombinant) (procedure code J0596) is a benefit of Texas Medicaid for clients who are 13 years of age or older when billed with diagnosis code D841.

6.62.5 Ecallantide (Kalbitor)

Ecallantide (Kalbitor) (procedure code J1290) is a benefit of Texas Medicaid for clients who are 12 years of age or older when billed with diagnosis code D841.

6.62.6 Hympavzi (Marstacimab-hncq)

Hympavzi (Marstacimab-hncq) (procedure code J7172) is a benefit of Texas Medicaid for clients who are 6 years of age or older.

6.62.7 Icatibant (Firazyr)

Icatibant (Firazyr) (procedure code J1744) is a benefit of Texas Medicaid for clients who are 18 years of age or older when billed with diagnosis code D841.

6.62.8 Lanadelumab-flyo (Takhzyro)

Lanadelumab-flyo (Takhzyro) (procedure code J0593) is a benefit of Texas Medicaid for clients who are 2 years of age or older when billed with diagnosis code D841.

6.62.9 Hormonal Therapy Agents

The following hormonal therapy agent procedure codes require prior authorization. Hormonal therapy agents are not a benefit when submitted with diagnosis codes F640, F641, F642, F648, and F649.

Procedure Codes									
J1000	J1071	J1072	J1073	J1380	J1950	J1951	J3121	J3145	J3315
J3316	J9155	J9217	J9218	J9226					

6.63 Ibalizumab-uiyk (Trogarzo)

Ibalizumab-uiyk (Trogarzo) (procedure code J1746) is a benefit of Texas Medicaid for clients who are 18 years of age and older with prior authorization. Ibalizumab-uiyk (Trogarzo) may be approved for a duration of every 12 months per prior authorization request.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

For initial therapy, all of the following criteria must be met:

- The client is 18 years of age or older.
- The client has a documented diagnosis of multi-drug resistant human immunodeficiency virus (diagnosis code B20) from the provider and meets the following criteria:
  - Has received antiretroviral treatment for at least 6 months and is failing or has recently failed therapy
  - Has documented resistance, measured by resistance testing, to at least one antiretroviral medication from each of the following 3 classes of ARV:
    - Nucleoside reverse transcriptase inhibitors (NRTI)
    - Non-Nucleoside reverse transcriptase inhibitors (NNRTI)
    - Protease inhibitor (PI)
- The client has documented RNA viral load greater than 1,000 copies/mL.

Providers must use ibalizumab-uiyk (Trogarzo) concomitantly with another antiretroviral medication to which the client's virus is susceptible.

For renewal or continuation of therapy, all of the following criteria must be met:

- The client has previously received treatment with ibalizumab-uiyk (Trogarzo).
- Documentation from the physician confirming that the client has achieved a clinical viral response defined as one of the following:
  - Decrease in viral load
  - Sustained viral load reduction
- The physician continues ibalizumab-uiyk (Trogarzo) therapy with another antiretroviral.

Trogarzo is not a benefit for clients who fail to demonstrate heavily treated multi-drug resistance.

Refer to: Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

6.64 Imetelstat (Rytelo)

Imetelstat (Rytelo) is an oligonucleotide telomerase inhibitor indicated for the treatment of adult clients meeting both of the following criteria:

- The client has low- to intermediate-1 risk myelodysplastic syndromes (MDS) with transfusion-dependent anemia requiring four or more red blood cell (RBC) units over eight weeks.
- The client has not responded to, has lost response to, or is ineligible for erythropoiesis-stimulating agents (ESA).

Imetelstat (Rytelo) (procedure code J0870) is a benefit of Texas Medicaid for clients with prior authorization.

6.64.1 Prior Authorization Requirements

Prior authorization requests for imetelstat (Rytelo) must be submitted with a Special Medical Prior Authorization (SMPA) Request Form and documentation of all the following.

Imetelstat (Rytelo) is an intravenous infusion indicated for the treatment of a client who meets all of the following requirements:

- The client is 18 years of age or older.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The client has a confirmed diagnosis of low- to intermediate-1 risk MDS (diagnosis codes D460, D461, D464, D469, D46A, D46B, D46C, and D46Z).
- The client has transfusion-dependent anemia requiring regular RBC transfusions defined as >4 RBC units over eight weeks.
- The prescriber has ruled out or addressed other causes of anemia (e.g., abnormal bleeding, hemolysis, nutritional deficiency, renal disease)
- The prescriber attests that the client has not responded to, has lost response to, or is ineligible for ESAs.
- The client does not have deletion 5q cytogenic abnormalities.
- Imetelstat (Rytelo) will not be prescribed concomitantly with other erythropoiesis stimulating agents.
- The prescriber attests to counseling female clients of childbearing age regarding the use of an effective method of contraception to prevent pregnancy during treatment with imetelstat (Rytelo).

The required monitoring parameters following imetelstat (Rytelo) infusion are:

- Monitor for thrombocytopenia and neutropenia.
- Monitor liver function tests prior to imetelstat (Rytelo) administration, then weekly for the first cycle, and prior to each cycle thereafter.

6.64.2 Documentation Requirements

In addition to documentation requirements outlined in this section, all services are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

6.65 Imipenem, Cilastatin, and Relebactam (Recarbrio)

Imipenem, Cilastatin, and Relebactam (procedure code J0742) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.66 * Immunosuppressive Drugs

Immunosuppressive drugs weaken or modulate the activity of the immune system and are most often used in organ transplantation to prevent rejection or to treat autoimmune diseases such as rheumatoid arthritis.

The following procedure codes are benefits of Texas Medicaid:

[Revised] Procedure Codes									
J0202	J0257	J0480	J0485	J0717	J1595	J1602	J7501	J7516	J7524
J7525	J7526	J7529	J7530						

The following procedure codes may be indicated for, but are not limited to, treatment of the following conditions:

[Revised] Procedure Code	Conditions
J0202	Multiple sclerosis (MS): For treatment of relapsing forms of MS and should be reserved for adult clients who have had an inadequate response to two or more drugs indicated for the treatment of MS.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

[Revised] Procedure Code	Conditions
J0257	Alpha-1 proteinase inhibitor deficiency: For the treatment of adult clients who have a deficiency of the alpha-1 proteinase inhibitor enzyme (also known as alpha-1 antitrypsin deficiency) in the treatment of emphysema.
J0480	Organ rejection: For the prophylaxis of acute organ rejection in clients receiving renal transplantation when used as part of an immunosuppressive regimen that includes cyclosporine and corticosteroids.
J0485	Organ rejection: For the prophylaxis of organ rejection in adult clients receiving a kidney transplant, to be used in combination with basiliximab injection, mycophenolate mofetil, and corticosteroids.
J0717	Psoriatic arthritis, ankylosing spondylitis, Crohn's disease, rheumatoid arthritis, polyarticular juvenile idiopathic arthritis, non-radiographic axial spondylarthritis, and plaque psoriasis.
J1595	Multiple sclerosis (MS): For the reduction of the frequency of relapses in adult clients with relapsing remitting MS, including clients who have experienced a first clinical episode and have magnetic resonance imaging (MRI) features consistent with MS.
J1602	Psoriatic arthritis, rheumatoid arthritis, ankylosing spondylitis, and polyarticular juvenile idiopathic arthritis.
J7501	Renal homotransplantations: Adjunct for the prevention of rejection in renal homotransplantation. Rheumatoid arthritis: Azathioprine is indicated only in clients meeting the criteria for classic or definite rheumatoid arthritis as specified by the American Rheumatism Association.
J7516, J7524, J7526, J7529, J7530	Allogeneic transplants: For prophylaxis of organ rejection in kidney, liver, and heart allogeneic transplants.
J7525	Organ rejection prophylaxis: For the prophylaxis of organ rejection in clients receiving allogeneic liver, kidney, or heart transplants.

Note: *Oral, self-administered immunosuppressive drugs may be reimbursed for Medicaid fee-for-service clients through the Texas Vendor Drug Program (VDP).*

Retrospective review may be performed to ensure documentation supports the medical necessity of the service. Authorization is not required for immunosuppressive drugs.

6.67 Inclisiran (Leqvio)

Inclisiran (Leqvio) (procedure code J1306) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.68 * Inebilizumab-cdon (Uplizna)

Inebilizumab-cdon (Uplizna) (procedure code J1823) is a benefit of Texas Medicaid for clients who are 18 years of age or older with prior authorization.

Inebilizumab-cdon (Uplizna) is indicated for the treatment of adult clients with the following:

- Neuromyelitis optica spectrum disorder (NMOD/NMOSD) who are anti-aquaporin-4 antibody positive

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Immunoglobulin G4-related disease (IgG4-RD)
- [Revised] Generalized myasthenia gravis (gMG) in adult patients who are anti-acetylcholine receptor (AChR) or anti-muscle-specific tyrosine kinase (MuSK) antibody positive.

6.68.1 * Prior Authorization Criteria

Prior authorization approval for initial therapy for inebilizumab-cdon (Uplizna) will be considered and approved for a 12-month duration when the client has one of the diagnoses listed below and meets the following criteria:

Neuromyelitis Optica Spectrum Disorder

- Client must be 18 years of age or older.
- Client has a diagnosis of neuromyelitis optica spectrum disorder (diagnosis code G360).
- Client is anti-aquaporin 4 (AQP4) antibody seropositive.
- Client has been screened for hepatitis B virus (HBV), quantitative serum immunoglobulins, and tuberculosis (TB) prior to initiating treatment.
- Client has at least one attack requiring rescue therapy in the last year OR two attacks requiring rescue therapy in the last 2 years.
- Client is not receiving Inebilizumab-cdon (Uplizna) concomitantly with the following therapies:
  - Anti-CD20 monoclonal antibody treatments
  - Complement inhibitors (e.g. Eculizumab, Ravulizumab)
  - Immunosuppressant drugs (e.g. Cyclosporine, Methotrexate)
  - Satralizumab

Immunoglobulin Related Disease

- Client must be 18 years of age or older.
- Client has a diagnosis of immunoglobulin G4-related disease (diagnosis code D8984) and other conditions that mimic IgG4-RD have been ruled out (e.g., malignancy, infection, other autoimmune disorders).
- Client experiences (or recently experienced) an IgG4-RD flare that requires initiation or continuation of glucocorticoid treatment.
- Client has history of IgG4-RD affecting at least two organs.

For renewal or continuation of therapy, the client must meet all of the following requirements:

- Client continues to meet the following initial approval criteria.
- Client experienced positive clinical response to therapy as demonstrated by decreased attacks or disease stabilization.
- Client has previously received inebilizumab-cdon (Uplizna) treatment without complications or unacceptable toxicity (e.g., infusion reactions, serious infections).

*** Generalized myasthenia gravis (gMG)**

- [Revised] Client must be 18 years of age or older.
- [Revised] Client has a diagnosis of gMG, Myasthenia Gravis Foundation of America (MGFA) clinical classification of II, III, or IV (diagnosis codes G7000 and G7001).

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- [Revised] Client is anti-acetylcholine receptor (AChR) or anti-muscle-specific tyrosine kinase (MuSK) antibody positive.
- [Revised] Client's Myasthenia Gravis-Activities of Daily Living (MG-ADL) score is between six and ten.
- [Revised] Client has a Quantitative Myasthenia Gravis (QMG) score greater than 11.
- [Revised] Client is on a stable dose of corticosteroid, a specific non-steroidal immunosuppressive therapy, or a combination of both.
- [Revised] Client is not receiving inebilizumab-cdon (Uplizna) to treat myasthenia gravis concomitantly with the following therapies:
  - [Revised] Anti-CD20 monoclonal antibody treatments
  - [Revised] Complement inhibitors (e.g., ravulizumab-cwvz (Ultomiris), or zilucoplan (Zilbrysq))
  - [Revised] A neonatal Fc receptor (FcRn) blocker (e.g., nipocalimab-aahu (Imaavy), rozanolixizumab-noli (Rystiggo), efgartigimod alfa-fcab (Vyvgart), efgartigimod alfa or hyaluronidase-qvfc (Vyvgart Hytrulo))

6.69 Infliximab (Remicade), Avsola, Inflectra, Renflexis, and Zymfentra

Procedure codes J1745, Q5103, Q5104, and Q5121 are benefits of Texas Medicaid, and may not be reimbursed for the same date of service by any provider. Procedure codes J1745, Q5103, Q5104, and Q5121 are limited to the following diagnosis codes:

Diagnosis Codes							
K5000	K50011	K50012	K50013	K50014	K50018	K5010	K50111

6.70 Inotuzumab ozogamicin (Besponsa)

Inotuzumab ozogamicin (Besponsa) (procedure code J9229) is a benefit of Texas Medicaid for pediatric and adult clients who are 1 year of age or older with prior authorization.

Inotuzumab ozogamicin (Besponsa) is a CD22-directed antibody-drug conjugate (ADC) that has 3 components:

- The antibody inotuzumab
- N-acetyl-gamma-calicheamicin dimethylhydrazide (a cytotoxic agent)
- An acid cleavable linker

Besponsa is indicated for the treatment of relapsed or refractory precursor B-cell acute lymphoblastic leukemia (ALL).

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

6.70.1 Prior Authorization Requirements for Inotuzumab ozogamicin (Besponsa)

Prior authorization approval for Besponsa intravenous injection (procedure code J9229) will be considered when all of the following criteria are met:

- Client is 1 year of age or older
- Client has a confirmed diagnosis of precursor B-cell acute lymphoblastic leukemia (ALL) that is refractory or in relapse
- The prescriber must agree to monitor the client for signs and symptoms of hepatic veno-occlusive disease (VOD) for the duration of Besponsa therapy

Refer to: Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

6.70.2 Documentation Requirements

In addition to documentation requirements outlined above all services are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

6.70.3 Exclusions

Besponsa is not a benefit for patients who have hepatic veno-occlusive disease.

6.71 Insulin

Insulin [Fiasp (procedure code J1812) and Lyumjev (procedure code J1814)] is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.72 Invega Hafyera

Invega hafyera (procedure code J2427) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.73 Iron Injections

Ferric derisomaltose (procedure code J1437) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

Ferric carboxymaltose (procedure code J1439) is a benefit of Texas Medicaid for clients who are 1 year of age or older.

Iron Dextran injection (procedure code J1750) is a benefit of Texas Medicaid for clients who are 4 months of age or older.

Iron Sucrose injection (procedure code J1756) is a benefit of Texas Medicaid for clients who are 2 years of age or older.

Sodium Ferric Gluconate Complex injection (procedure code J2916) is a benefit of Texas Medicaid for clients who are 6 years of age or older.

Ferumoxytol injection (procedure code Q0138) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.74 Eladocagene Exuparvovec-tneq (Kebilidi)

Eladocagene exuparvovec-tneq (Kebilidi) is an adeno-associated virus (AAV) vector-based gene therapy indicated to treat adult and pediatric clients with aromatic L-amino acid decarboxylase (AADC) deficiency.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Eladocagene exuparvovec-tneq (Kebilidi) is a benefit of Texas Medicaid with prior authorization.

Eladocagene exuparvovec-tneq (Kebilidi) may be reimbursed using procedure code J3590 and is limited to once per lifetime.

6.74.1 Prior Authorization Requirements

Providers must submit prior authorization requests for eladocagene exuparvovec-tneq (Kebilidi) on a Special Medical Prior Authorization (SMPA) Request Form.

Eladocagene exuparvovec-tneq (Kebilidi) is a single-dose intraputaminal infusion indicated for clients who meet the following requirements:

- The client is 16 months of age or older.
- The client has a confirmed diagnosis of AADC deficiency (diagnosis code E7081).
- The client has presence of biallelic mutations in the dopa decarboxylase (DDC) gene identified by molecular genetic testing.
- There is documentation of skull assessment confirming that the client has achieved skull maturity by neuroimaging, which is necessary for stereotactic neurosurgical administration of eladocagene exuparvovec-tneq (Kebilidi) therapy.
- The client has not previously received eladocagene exuparvovec-tneq (Kebilidi) infusion for AADC deficiency.

After eladocageneexuparvovec-tneq (Kebilidi) infusion, providers must monitor the client for the following:

- Post-procedural complications, which may include events of respiratory and cardiac arrest after administration
- Additional procedure-related adverse events, such as cerebrospinal fluid leak, intracranial bleeding, neuroinflammation, acute infarction, and infection
- Signs of dyskinesia or involuntary movements of the face, arm, leg, or entire body (fidgeting, writhing, wriggling, head bobbing, or body swaying) after administration

In addition to documentation requirements outlined in this section, all services are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

6.75 Labetalol Hydrochloride

Labetalol hydrochloride [(procedure code J1920) and Hikma (procedure code J1921)] is a benefit of Texas Medicaid for clients who are 1 year of age or older.

6.76 Lactated Ringer's

Lactated Ringer's (procedure code J7121) is a benefit of Texas Medicaid for clients who are birth through 20 years of age.

6.77 Lenacapavir (Sunlenca)

Lenacapavir (Sunlenca) (procedure code J1961) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

6.78 Leuprolide Acetate (Lupron Depot)

Procedure codes J1950, J9217, or J9218 may be reimbursed for leuprolide acetate injections with prior authorization. The following limitations apply to procedure codes J1950 and J9217:

Procedure Code	Limitation(s)
J1950	Reimbursed once every 28 days

Procedure code J9217 may be reimbursed in monthly, three-month, four-month, and six-month doses as follows:

Frequency	Dosage	Limitations
Monthly	7.5 mg	Billed with a quantity of 1 Reimbursed once every 28 days
3-month	22.5 mg	Billed with a quantity of 3 Reimbursed once every 84 days
4-month	30 mg	Billed with a quantity of 4 Reimbursed once every 112 days
6-month	45 mg	Billed with a quantity of 6 Reimbursed once every 168 days

The total dosage allowed within a 6-month period is 45 mg.

Procedure codes J1950, J9217, and J9218 will be denied if billed on the same date of service by the same provider.

Refer to: Subsection 6.62.9, "Hormonal Therapy Agents" in this handbook for additional information.

6.79 Lumasiran (Oxlumo)

Lumasiran (procedure code J0224) is a benefit of Texas Medicaid for clients when billed with diagnosis code E72530.

6.80 Lupus Treatment Agents

Anifrolumab-fnia (Saphnelo) (procedure code J0491) and Belimumab (Benlysta) (procedure code J0490) are benefits of Texas Medicaid for clients with prior authorization.

Anifrolumab-fnia (Saphnelo) is indicated to treat moderate to severe systemic lupus erythematosus (SLE) in adult clients who are receiving standard therapy.

Belimumab (Benlysta) is indicated to treat the following:

- Active, autoantibody-positive, systemic lupus erythematosus (SLE) in clients who are 5 years of age or older, and receiving standard therapy.
- Adult clients with active Lupus Nephritis who are receiving standard therapy.

6.80.1 Initial Requests

Initial therapy for anifrolumab-fnia (Saphnelo) may be approved for a 12-month duration if all the following criteria are met:

- The client is 18 years of age or older.
- The client has a confirmed diagnosis of systemic lupus erythematosus (M3210, M3211, M3212, M3213, M3214, M3215, M3219, M328, M329).
- The client does not have active lupus nephritis or severe active central nervous lupus.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The client is currently receiving at least one stable standard-of-care treatment for active systemic lupus erythematosus.
- The client is not receiving anifrolumab-fina (Saphnelo) in combination with a biologic agent.

Initial therapy for belimumab (Benlysta) may be approved for a 12-month duration if all the following criteria are met:

- Diagnosis of SLE:
  - The client is 5 years of age or older.
  - The client has a confirmed diagnosis of SLE (M320, M3210, M3211, M3212, M3213, M3214, M3215, M3219, M328, M329).
  - The client has laboratory testing confirming the presence of autoantibodies.
  - The client is currently receiving at least one standard-of-care treatment for active SLE.
  - The client is not receiving belimumab (Benlysta) in combination with a biologic disease-modifying antirheumatic drug (DMARD) agent.
- Diagnosis of active lupus nephritis:
  - The client is 18 years of age or older.
  - The adult client has a confirmed diagnosis of active lupus nephritis.
  - The client has laboratory testing confirming the presence of autoantibodies.
  - The client is currently receiving at least one standard-of-care treatment.
  - The client is not receiving belimumab (Benlysta) in combination with a biologic DMARD agent.

6.80.2 Recertification or Extension

For renewal or continuation therapy for anifrolumab-fnia (Saphnelo), the client must meet the following criteria:

- The client continues to meet the initial authorization approval criteria.
- The client has experienced a positive clinical response to therapy as demonstrated by stabilization of the disease or absence of disease progression.
- The client has not experienced any complications or unacceptable toxicities during anifrolumab-fnia (Saphnelo) treatment.

For renewal or continuation therapy for belimumab (Benlysta), the client must meet the following criteria:

- The client continues to meet the initial authorization approval criteria.
- The client has experienced a positive clinical response to therapy as demonstrated by stabilization of the disease or absence of disease progression.
- The client has not experienced any complications or unacceptable toxicities during belimumab (Benlysta) treatment.

6.81 Luspatercept-aamt (Reblozyl)

Luspatercept-aamt (Reblozyl) (procedure code J0896) is a benefit of Texas Medicaid with prior authorization.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Luspatercept-aamt (Reblozyl) is restricted to clients who are 18 years of age or older, and may be approved for treatment of the following:

- Anemia in adult clients with beta thalassemia requiring red blood cell (RBC) transfusions
- Anemia failing an erythropoiesis stimulating agent and requiring two or more red blood cell units over eight weeks in adult clients with low to intermediate-risk myelodysplastic syndrome with ring sideroblasts (MDS-RS) or with myelodysplastic/myeloproliferative neoplasm with ring sideroblasts and thrombocytosis (MDS/MPN-RS-T)

6.81.1 Prior Authorization for Luspatercept-aamt (Reblozyl)

Prior authorization requests for procedure code J0896 must be submitted with a Special Medical Prior Authorization (SMPA) Request Form.

For initial prior authorization requests for Luspatercept-aamt (Reblozyl), the client must be 18 years of age or older and meet the following criteria:

- Client who has anemia with beta thalassemia requiring regular RBC transfusions:
  - The client must have a diagnosis of beta thalassemia.
  - The client requires regular RBC transfusions of six or more units within the previous 24 weeks and has had no transfusion-free period for 35 days or longer during the review period.
- Client who has anemia failing an erythropoiesis stimulating agent:
  - The client must have a diagnosis of myelodysplastic syndrome classified as low to intermediate risk disease.
  - The client must require RBC transfusions of two or more units over a period of eight weeks.
  - The client must be ineligible or must have failed prior erythropoietin stimulating agent treatment.

For renewal or continuation of therapy, the client must meet the initial age and diagnosis criteria, in addition to the following requirements:

- Client who has anemia with beta thalassemia requiring regular RBC transfusions:
  - The client had a positive response/hematological improvement demonstrated by a reduction in RBC transfusion as indicated by the prescribing physician.
  - The client previously received treatment with luspatercept-aamt (Reblozyl) without complications.
- Client who has anemia failing an erythropoiesis stimulating agent:
  - The client had a positive response demonstrated by RBC transfusion independence during any consecutive eight-week period or a decrease in transfusion requirement as indicated by the prescribing physician.
  - The client previously received treatment with luspatercept-aamt (Reblozyl) without complications.

6.82 Medroxyprogesterone Acetate (Depo Provera)

Refer to: The *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook* (*Vol. 2, Provider Handbooks*) for information about procedure code J1050.

6.83 Meloxicam (Anjeso)

Meloxicam (procedure code J1738) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

6.84 Methotrexate

Methotrexate (Jylamvo) (procedure code J8611) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

Methotrexate (Xatmep) (procedure code J8612) is a benefit of Texas Medicaid for clients who are 18 years of age or younger.

6.85 Mirikizumab-mrkz

Mirikizumab-mrkz (procedure code J2267) is a benefit of Texas Medicaid for clients who are 18 years of age or older and is restricted to the following diagnosis codes:

Diagnosis Codes							
K5100	K51011	K51012	K51013	K51014	K51018	K51019	K5120
K51211	K51212	K51213	K51214	K51218	K51219	K5130	K51311
K51312	K51313	K51314	K51318	K51319	K5180	K51811	K51812
K51813	K51814	K51818	K51819	K5190	K51911	K51912	K51913
K51914	K51918	K51919					

6.86 Mirvetuximab Soravtansine-gynx (Elahere)

Mirvetuximab Soravtansine-gynx (Elahere) (procedure code J9063) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.87 Mogamulizumab-kpkc (Poteligeo)

Mogamulizumab-kpkc (Poteligeo) procedure code J9204 is a benefit of Texas Medicaid. Mogamulizumab-kpkc (Poteligeo) is a CCR4-directed monoclonal antibody indicated for the treatment of an adult client with relapsed or refractory mycosis fungoides or Sézary syndrome after at least one prior systemic therapy.

Mogamulizumab-kpkc (Poteligeo) (procedure code J9204) may be approved for a duration of every 12 months.

6.87.1 Prior Authorization Criteria

Prior authorization for initial therapy using mogamulizumab-kpkc (Poteligeo) infusion will be considered when all of the following criteria are met:

- The client is 18 years of age or older
- The client has relapsed or refractory disease
- The client has received at least one prior systemic therapy
- The client has a histologically confirmed diagnosis of Mycosis fungoides or Sézary syndrome

One of the following diagnosis codes must be submitted with procedure code J9204 if the diagnosis is mycosis fungoides:

Diagnosis Codes for Mycosis Fungoides							
C8400	C8401	C8402	C8403	C8404	C8405	C8406	C8407
C8408	C8409						

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

One of the following diagnosis codes must be submitted with procedure code J9204 if the diagnosis is sézary syndrome:

Diagnosis for Sézary Syndrome							
C8410	C8411	C8412	C8413	C8414	C8415	C8416	C8417
C8418	C8419						

For renewal or continuation of therapy, the client must meet all the following requirements:

- The client demonstrates partial or complete response to treatment or stabilization of disease, shown by a decrease in spread or size of the tumor
- The absence of unacceptable drug toxicity, such as dermatological toxicity, severe infection, infusion reactions (Stevens-Johnson Syndrome or toxic epidermal necrolysis), and life-threatening autoimmune complications

Refer to: Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

6.88 Monoclonal Antibodies

Monoclonal antibodies omalizumab (Xolair) (procedure code J2357), benralizumab (Fasenra) (procedure code J0517), mepolizumab (Nucala) (procedure code J2182), reslizumab (Cinqair) (procedure code J2786), tezepelumab-ekko (Tezspire) (procedure code J2356), or depemokimab-ulaa (Exdensur) (procedure code J2361) are benefits of Texas Medicaid when medically necessary with prior authorization. Clients who are younger than the FDA-approved age indicated for each medication will be considered on a case-by-case basis and determined by the TMHP medical director.

6.88.1 Omalizumab (Xolair)

Omalizumab (Xolair) (procedure code J2357) is an injectable drug that is FDA-approved for the following treatments:

- Clients who are 6 years of age or older with moderate to severe persistent asthma (as defined by the National Heart, Lung, and Blood Institute's Guidelines for the Diagnosis and management of Asthma).
- Clients who are 12 years of age or older and have chronic spontaneous urticaria (CSU) who remain symptomatic despite H1 antihistamine treatment.
- Add-on maintenance treatment of chronic rhinosinusitis with nasal polyps (CRwNP) in adult clients who are 18 years of age or older with inadequate response to nasal corticosteroids.
- IgE-mediated food allergy in adult and pediatric clients who are 1 year of age or older for the reduction of allergic reactions (Type I), including anaphylaxis, that may occur with accidental exposure to one or more foods.

6.88.2 Benralizumab (Fasenra)

Benralizumab (Fasenra) (procedure code J0517) is an injectable drug that is FDA-approved and indicated for the following treatment:

- Add-on maintenance treatment of clients who are 6 years of age or older and have severe asthma with an eosinophilic phenotype
- Adult clients who are 18 years of age or older with eosinophilic granulomatosis with polyangiitis (EGPA)
- Adult and pediatric clients who are 12 years of age or older with hypereosinophilic syndrome (HES) without an identifiable non-hematologic secondary cause.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

6.88.3 Mepolizumab (Nucala)

Mepolizumab (Nucala) (procedure code J2182) is an injectable drug that is approved by the FDA and indicated for the following treatments:

- Add-on maintenance treatments for clients who are 6 years of age or older and have severe asthma with an eosinophilic phenotype
- Adult clients who are 18 years of age or older with eosinophilic granulomatosis with polyangiitis (EGPA)
- Adult and pediatric clients who are 12 years of age or older with hypereosinophilic symptoms (HES) for 6 months or longer without identifiable non-hematologic secondary cause
- Add-on maintenance treatment of chronic rhinosinusitis with nasal polyps (CRSwNP) in adult clients who are 18 years of age or older with inadequate response to nasal corticosteroids
- Add-on maintenance treatment for adult clients who are 18 years of age or older with inadequately controlled chronic obstructive pulmonary disease (COPD) and an eosinophilic phenotype

6.88.4 Reslizumab (Cinqair)

Reslizumab (Cinqair) (procedure code J2786) is an injectable drug that is FDA-approved and indicated for the treatment of clients who are 18 years of age or older and have severe asthma (as defined by the National Heart, Lung, and Blood Institute's Guidelines for the Diagnosis and Management of Asthma) with an eosinophilic phenotype.

6.88.5 Tezepelumab-ekko (Tezspire)

Tezepelumab-ekko (Tezspire) (procedure code J2356) is an injection drug that is FDA-approved and indicated as an add-on maintenance treatment of adult and pediatric clients who are 12 years of age or older with severe asthma or inadequately controlled chronic rhinosinusitis with nasal polyps (CRSwNP).

6.88.6 Depemokimab-ulaa (Exdensur)

Depemokimab-ulaa (Exdensur) (procedure code J2361) is a subcutaneous injection that is FDA-approved and indicated as an add-on maintenance treatment of severe asthma characterized by an eosinophilic phenotype in adult and pediatric clients who are 12 years of age or older.

6.88.7 Prior Authorization for Omalizumab, Benralizumab, Mepolizumab, Reslizumab, Tezepelumab-ekko, and Depemokimab-ulaa

Prior authorization for omalizumab (Xolair) will be considered for the following:

- Moderate to severe persistent asthma
  - Client is 6 years of age or older.
  - Client has a diagnosis of moderate to severe asthma (as defined by the National Heart, Lung, and Blood Institute's Guidelines for the Diagnosis and management of Asthma) (diagnosis code J4540 or J4550).
  - Client has a positive skin test or radioabsorbent assay test (RAST) to a perennial (not seasonal) aeroallergen within the past 36 months.
  - Client has a total IgE level greater than 30 IU/ml but less than 1300 IU/ml within the past 12 months.
- Chronic Spontaneous Urticaria (CSU)
  - Client is 12 years of age or older

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

    - Client has a diagnosis of CSU with symptomats despite H1 antihistamine treatment (diagnosis code L501).
    - Documentation supporting medical necessity for the treatment of CSU with omalizumab (Xolair) must be submitted with request and include the following:
        - Documented failure of, or contraindication to, antihistamine
        - Evidence of an evaluation that excludes other medical diagnosis associated with chronic urticaria
- Add-on maintenance treatment of chronic rhinosinusitis with nasal polyps (CRwNP)
    - Client is 18 years of age or older
    - Client has a diagnosis of CRwNP (diagnosis code J330, J331, J338, or J339) with inadequate response to nasal corticosteroids
    - Documentation supporting medical necessity for maintenance treatment of nasal polyps with omalizumab (Xolair) must be submitted with the request and include the following:
        - Client has bilateral nasal polyposis confirmed by physical examination or nasal endoscopy
        - Documented failure of, or contraindication to, prior corticosteroids as monotherapy
        - Documented inadequate response to prior corticosteroid treatments
- IgE-mediated food allergy to reduce allergic reactions (Type I)
    - Client has a diagnosis of IgE-mediated food allergy (diagnosis code Z91010, Z910110, Z910111, Z910112, Z910120, Z910121, Z910122, Z91013, or Z91018)
    - Client is 1 year of age or older
    - Must use drug in conjunction with food allergen avoidance

Prior authorization for benralizumab (Fasenra) will be considered for the following:

- Severe asthma with eosinophilic phenotype
    - Client is 6 years of age or older
    - Client has a diagnosis of severe asthma with eosinophilic phenotype (as defined by the National Heart, Lung, and Blood Institute's Guidelines for the Diagnosis and Management of Asthma) (diagnosis code J4550, J4551, J4552, or J8283)
- Eosinophilic Granulomatosis with Polyangiitis (EGPA)
    - Client is 18 years of age or older
    - Client has a medical history of asthma
    - Client has a diagnosis of EGPA (diagnosis code M301)
    - Client has a refractory disease or has had a history of EGPA relapse
- Hypereosinophilic Symptoms (HES)
    - Client is 12 years of age or older
    - Client has a diagnosis of HES without identifiable non-hematologic secondary cause (diagnosis code D72110, D72111, D72118, or D72119)
    - Documents supporting medical necessity for treatment of benralizumab must be submitted with the request and meet the following:
        - Diagnosis or sign, and symptoms of HES without any non-hematologic secondary cause

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- History of two or more HES flares (flare defined as worsening clinical symptoms or blood eosinophil counts requiring an increase in prior therapy) within the past 12 months prior to the initiation of benralizumab therapy
- Prescriber's attestation that the client has been on a stable dose of HES therapy which includes, but is not limited to, oral corticosteroids, immunosuppressive and cytotoxic therapy.

Prior authorization for mepolizumab (Nucala) will be considered for the following:

- Severe asthma with eosinophilic phenotype
  - Client is 6 years of age or older
  - Client has a diagnosis of severe asthma with eosinophilic phenotype (as defined by the National Heart, Lung, and Blood Institute's Guidelines for the Diagnosis and management of Asthma) (diagnosis code J4550, J4551, J4552, or J8283).
- Eosinophilic granulomatosis with polyangiitis (EGPA)
  - Client is 18 years of age or older
  - Confirmed diagnosis of eosinophilic granulomatosis with polyangiitis (diagnosis code M301)
  - Documentation supporting medical necessity for treatment of EGPA with mepolizumab (Nucala) must be submitted with the requestand meet the following:
    - Diagnosis of EGPA
    - Medical history of asthma
    - Presence of at least 2 of the following EGPA characteristics below:
      - Histopathological findings of eosinophilic vascularitis, perivascularitis eosinophilic infiltration or eosinophil-rich granulomatous inflammation
      - Neuropathy
      - Pulmonary infiltrates, non-fixed; Sino-nasal abnormality
      - Cardiomyopathy
      - Glomerulonephritis
      - Alveolar hemorrhage
      - Palpable purpura
      - Anti-neutrophils cytoplasmic antibody
    - Client use of an oral glucocorticoid and/or cyclophosphamide, azathioprine, methotrexate, or leflunomide
    - Refractory disease or has had a history of EGPA relapse
- Hypereosinophilic Symptoms (HES)
  - Client is 12 years of age or older
  - Client has a diagnosis of hypereosinophilic symptoms (HES) for 6 months or longer without identifiable non-hematologic secondary cause (diagnosis code D72110, D72111, D72118, or D72119)

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Documents supporting medical necessity for treatment of HES in clients who are 12 years of age or older with mepolizumab (Nucala) must be submitted with the request and meet all of the following:
  - Diagnosis of HES for 6 months or longer without any non-hematologic secondary cause
  - History of two or more HES flares (flare defined as worsening clinical symptoms or blood eosinophil counts requiring an increase in prior therapy) within the past 12 months prior to the initiation of mepolizumab (Nucala) therapy
  - Prescriber's attestation that client has been on a stable dose of HES therapy which includes, but no limited to corticosteroids, immunosuppressive and cytotoxic therapy

Prior authorization for mepolizumab (Nucala) will be considered for clients as an add-on maintenance treatment of:

- Chronic Rhinosinusitis with Nasal Polyps (CRSwNP)
  - Client is 18 years of age or older
  - Confirmed diagnosis of chronic rhinosinusitis with nasal polyps (diagnosis code J330, J331, J338, or J339)
  - Evidence of inadequate response to nasal corticosteroid
- Eosinophilic Chronic Obstructive Pulmonary Disease (COPD)
  - The client is 18 years of age or older.
  - The client has a diagnosis of inadequately controlled COPD (diagnosis codes J440, J441, J4489, or J449), confirmed by either spirometry or classic signs and symptoms.
  - The client's COPD is uncontrolled despite treatment with triple therapy, which includes an inhaled corticosteroid (ICS), long-acting beta agonist (LABA), and long-acting muscarinic antagonist (LAMA).
  - The client's inadequately controlled COPD is demonstrated by one or both of the following within the previous year:
    - At least two moderate exacerbations despite treatment with triple inhaled therapy.
    - One or more severe exacerbations despite treatment with triple inhaled therapy.
  - The client has an eosinophilic phenotype defined by a baseline blood eosinophil level of at least ≥ 150 cells per microliter prior to treatment with mepolizumab (Nucala).

Mepolizumab (Nucala) will be used as an add-on maintenance therapy and not as the primary treatment for COPD.

Prior authorization for reslizumab (Cinqair®) will be considered for clients who are 18 years of age or older with severe asthma (as defined by the National Heart, Lung and Blood Institute's Guidelines for the Diagnosis and management of Asthma) (diagnosis code J4550, J4551, J4552, or J8283).

Prior authorization for tezepelumab-ekko (Tezspire) will be considered for the following:

- Add-on maintenance for severe asthma or chronic rhinosinusitis with nasal polyps
  - Client is 12 years of age or older.
  - Client has one of the following diagnoses:
    - Severe asthma (as defined by the National Heart, Lung, and Blood Institute's Guidelines for the Diagnosis and Management of Asthma) (diagnosis code J4550 or J4551)
    - Chronic rhinosinusitis with nasal polyps (diagnosis code J330, J331, J338, or J339)

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Tezepelumab-ekko (Tezspire) is being used as an add-on maintenance therapy and not to be used as a single or primary therapy.
- For severe asthma client is currently on the following as a regular treatment and compliant on the therapy:
  - Medium or high-dose inhaled corticosteroid therapy, and
  - An additional asthma controller
- Tezepelumab-ekko (Tezspire) should not be used for relief of acute bronchospasm or status asthmaticus.
- Tezepelumab-ekko (Tezspire) may not be used in combination with anti-IgE, anti-IL4 or anti-IL5 monoclonal antibody agents (i.e., benralizumab [Fasenra], omalizumab [Xolair], mepolizumab [Nucala], reslizumab [Cinqair], etc.)
- Tezepelumab-ekko (Tezspire) should not be administered concurrently with live attenuated vaccination.

Prior authorization for depemokimab-ulaa (Exdensur) will be considered when the following criteria are met:

- The client is 12 years of age or older.
- The client has a diagnosis of severe asthma (as defined by the National Heart, Lung, and Blood Institute's Guidelines for the Diagnosis and Management of Asthma) (diagnosis code J4550, J4551, or J8283).
- The client's asthma is characterized by an eosinophilic phenotype with baseline blood eosinophilic count of at least 150 cells/microliter or greater.
- The client has asthma that is uncontrolled before administration of depemokimab-ulaa (Exdensur) as add-on treatment.
- The client has adhered to at least three consecutive months of inhaled corticosteroid therapy and used at least one additional asthma controller or asthma maintenance medication.
- The client's asthma is inadequately controlled despite the use of controller therapy, i.e., medium- to high-dose inhaled corticosteroid (ICS) plus at least one asthma controller with or without maintenance oral corticosteroids (OCS), indicated by either of the following within the previous year:
  - At least two or more asthma exacerbations that required treatment with systemic corticosteroids (SCS)
  - Reduced lung function with forced expiratory volume in one second (FEV1) that was less than 80% of predicted
- Depemokimab-ulaa (Exdensur) will be used as an add-on maintenance therapy to the client's medication for asthma and may not be used as a single or primary therapy.
- Depemokimab-ulaa (Exdensur) may not be used in combination with anti-IgE, anti-IL4 or anti-IL5 monoclonal antibody agents (i.e., omalizumab (Xolair), benralizumab (Fasenra), mepolizumab (Nucala), reslizumab (Cinqair), etc.).

A client with preexisting helminth infections should be treated prior to receiving omalizumab (Xolair), benralizumab (Fasenra), mepolizumab (Nucala), reslizumab (Cinqair), tezepelumab-ekko (Tezspire), or depemokimab-ulaa (Exdensur) therapy.

- If there is active helminth infection, the client should be treated with anti-helminth treatment.
- If there is no response, treatment should be discontinued until the parasitic infection resolves.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Refer to: Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

6.88.8 Prior Authorization Criteria for Asthma — Moderate to Severe (Omalizumab) and Severe (Benralizumab, Mepolizumab, Reslizumab, Tezepelumab-ekko, and Depemokimab-ulaa)

Requests for prior authorization must be submitted by the treating physician to the Special Medical Prior Authorization (SMPA) department by mail or approved electronic method using the SMPA request form.

Documentation supporting medical necessity for treatment of asthma with omalizumab (Xolair), benralizumab (Fasenra), mepolizumab (Nucala), reslizumab (Cinqair), tezepelumab-ekko (Tezspire), or depemokimab-ulaa (Exdensur) must be submitted with the request and must indicate the following:

- Symptoms are inadequately controlled with use of any of the following combination therapies:
    - A minimum of 3 months of controller medication (which includes but is not limited to a long-acting beta2-agonist [LABA], an inhaled or oral corticosteroid, leukotriene receptor antagonist [LTRA], or theophylline), unless the individual is intolerant of or has a medical contraindication to these agents

Note: *Exceptions to the criteria above will be considered on a case-by-case basis, which will require a letter from the prescribing provider stating the medical necessity for these monoclonal antibodies, the client's asthma severity level, and the duration of current and past therapies and lack of asthma control. Consideration for these exceptions will be reviewed by the TMHP medical director.*

Prior authorization approvals for omalizumab (Xolair), benralizumab (Fasenra), mepolizumab (Nucala), reslizumab (Cinqair), or tezepelumab-ekko (Tezspire) are for intervals of six months at a time. Prior authorization approvals for Depemokimab-ulaa (Exdensur) are for intervals of 12 months. Clients must be compliant with their regimen in order to qualify for additional prior authorizations. The provider must submit a statement documenting compliance with the requests for each renewal.

Treatment of benralizumab (Fasenra), mepolizumab (Nucala), or reslizumab (Cinqair) may not be used concurrently with omalizumab (Xolair) or any other interleukin-5 antagonist.

Tezepelumab-ekko (Tezspire) may not be used in combination with anti-IgE, anti-IL4 or anti-IL5 monoclonal antibody agents (i.e., benralizumab [Fasenra], omalizumab [Xolair], mepolizumab [Nucala], reslizumab [Cinqair], dupilumab [Dupixent], depemokimab-ulaa [Exdensur], etc.).

6.88.9 Requirements for Continuation of Therapy for Omalizumab, Benralizumab, Mepolizumab, Reslizumab, Tezepelumab-ekko, or Depemokimab-ulaa

For continuation of therapy with omalizumab (Xolair), benralizumab (Fasenra), mepolizumab (Nucala), reslizumab (Cinqair), tezepelumab-ekko (Tezspire), or depemokimab-ulaa (Exdensur), the requesting provider must submit the following documentation of the client's compliance and satisfactory clinical response to omalizumab (Xolair), benralizumab (Fasenra), mepolizumab (Nucala), reslizumab (Cinqair), tezepelumab-ekko (Tezspire), or depemokimab-ulaa (Exdensur):

- Documentation of clinical improvement must include one or more of the following:
- Decreased utilization of rescue medications; or
- Increase in predicted FEV1 (forced expiratory volume) from pretreatment baseline; or
- Reduction in reported asthma-related symptoms, as evidenced by decreases in frequency or magnitude of one or more of the following symptoms:
    - Asthma attacks

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Chest tightness or heaviness
- Coughing or clearing throat
- Difficulty taking deep breath or difficulty breathing out
- Shortness of breath
- Sleep disturbance, night wakening, or symptoms upon awakening
- Tiredness
- Wheezing/heavy breathing/fighting for air, and

- Member has not exhibited symptoms of hypersensitivity or anaphylaxis (bronchospasm, hypotension, syncope, urticaria, and/or angioedema) after administration of omalizumab (Xolair), benralizumab (Fasenra), mepolizumab (Nucala), reslizumab (Cinqair), tezepelumab-ekko (Tezspire), or depemokimab-ulaa (Exdensur).

After lapses in treatment of 3 months or greater, prior authorization requests submitted with documentation will be reviewed by the TMHP medical director.

Requests for clients who do not meet the above criteria will be reviewed for medical necessity by the TMHP medical director.

6.88.10 Reimbursement

Procedure codes J0517, J2182, J2356, J2357, J2361, and J2786 may not be billed in any combination for the same date of service by any provider.

Providers may not bill for an office visit if the only reason for the visit is an omalizumab (Xolair), benralizumab (Fasenra), mepolizumab (Nucala), reslizumab (Cinqair), tezepelumab-ekko (Tezspire), or depemokimab-ulaa (Exdensur) injection.

6.89 Mosunetuzumab-axgb

Mosunetuzumab-axgb (procedure code J9350) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.90 Nadofaragene Firadenovec-vncg (Adstiladrin)

Nadofaragene firadenovec-vncg (Adstiladrin) is an adenoviral vector-based gene therapy indicated to treat adult clients with high-risk Bacillus Calmette-Guérin (BCG)-unresponsive non-muscle invasive bladder cancer (NMIBC) with carcinoma in situ (CIS) with or without papillary tumors.

Nadofaragene firadenovec-vncg (Adstiladrin) (procedure code J9029) is a benefit of Texas Medicaid for clients who are 18 years of age or older with prior authorization.

6.90.1 Prior Authorization Requirements

Prior authorization is required for nadofaragene firadenovec-vncg (Adstiladrin) therapy and must be submitted with a Special Medical Prior Authorization (SMPA) Request Form.

Initial therapy for nadofaragene firadenovec-vncg (Adstiladrin) may be approved for a 6-month duration for clients who meet the following requirements:

- The client is 18 years of age or older.
- The client has a confirmed diagnosis of non-muscle invasive bladder cancer (NMIBC) with carcinoma in situ (CIS) with or without papillary tumors.
- The client's disease is high-risk and BCG unresponsive as defined as persistent disease following adequate BCG therapy, disease recurrence after an initial tumor-free state following adequate BCG therapy, or T1 disease following a single induction course of BCG.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The client does not have any metastatic urothelial carcinoma.
- The client does not have a hypersensitivity to interferon alfa.
- The client is not immunocompromised or immunodeficient.

For renewal or continuation of therapy, the client continues to meet the requirements listed above and must:

- Have been treated with nadofaragene firadenovec-vncg (Adstiladrin) with no adverse reactions.
- Have no signs of unacceptable toxicity (e.g., risk of disseminated adenovirus infection) while on treatment with nadofaragene firadenovec-vncg (Adstiladrin).

All services outlined in this section are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

Refer to: Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

Subsection 5.5.1.2, "Document Requirements and Retention" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*) for additional information about electronic signatures.

6.91 Natalizumab

Procedure code J2323 is a benefit when billed with one of the following diagnosis codes:

Diagnosis Codes							
G35A	G35C0	G35D	G35C1	K5000	K50011	K50012	K50013
K50014	K50018	K5010	K50111	K50112	K50113	K50114	K50118
K5080	K50811	K50812	K50813	K50814	K50818	K5090	K50911
K50912	K50913	K50914	K50918	K50919			

6.92 Nitroglycerin

Nitroglycerin (procedure code J2305) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.93 Nivolumab and Relatlimab-rmbw

Nivolumab and relatlimab-rmbw (procedure code J9298) is a benefit of Texas Medicaid for clients who are 12 years of age or older.

6.94 Nogapendekin Alfa Inbakicept-pmln (Anktiva)

Nogapendekin alfa inbakicept-pmln (Anktiva) is an interleukin-15 (IL-15) receptor agonist indicated to treat adult clients with Bacillus Calmette-Guérin (BCG)-unresponsive non-muscle invasive bladder cancer (NMIBC) with carcinoma in situ (CIS) with or without papillary tumors.

Nogapendekin alfa inbakicept-pmln (Anktiva) is a benefit of Texas Medicaid (procedure code J9028) for adult clients with prior authorization.

6.94.1 Initial Requests

Initial therapy for nogapendekin alfa inbakicept-pmln (Anktiva) may be approved for a 6-month duration for clients who meet the following requirements:

- The client is at least 18 years of age or older.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The client has a confirmed diagnosis of NMIBC with CIS with or without papillary tumors.
- The client's disease is high-risk and BCG unresponsive, defined as persistent disease following adequate BCG therapy, disease recurrence after an initial tumor-free state following adequate BCG therapy, or T1 disease following a single induction course of BCG.
- Nogapendekin alfa inbakicept-pmln (Anktiva) is used in combination with BCG.
- The client has undergone transurethral resection of bladder tumor (TURBT) to remove all resectable disease (Ta and T1 components).
- The client does not have any metastatic urothelial carcinoma.

6.94.2 Recertification or Extension

For renewal or continuation of therapy of nogapendekin alfa inbakicept-pmln (Anktiva), the client must meet the following requirements:

- The client continues to have a diagnosis as listed in the initial authorization section above and has been treated with nogapendekin alfa inbakicept-pmln (Anktiva) in the past with no adverse reactions.
- The client has no signs of unacceptable toxicity (e.g., hematuria, dysuria, or micturition urgency) while on treatment with nogapendekin alfa inbakicept-pmln (Anktiva).

All services outlined in this section are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

6.95 * Omidubicel-onlv (Omisirge)

Omidubicel-onlv (Omisirge) is a nicotinamide modified allogeneic hematopoietic progenitor cell therapy derived from cord blood and indicated for the following:

- Hematologic malignancies in clients who are 12 years of age or older and are scheduled for umbilical cord blood transplantation (UCBT) following myeloablative conditioning to reduce the time to neutrophil recovery and the risk of developing infection.
- Severe aplastic anemia (SAA) in clients who are 6 years of age or older, following reduced intensity conditioning.

[Revised] Omidubicel-onlv (Omisirge) is a benefit of Texas Medicaid with prior authorization and may be reimbursed using procedure code J3406.

Omidubicel-onlv (Omisirge) is administered as a one-time infusion treatment per lifetime.

6.95.1 Prior Authorization Requirements

Providers must submit prior authorization requests for omidubicel-onlv (Omisirge) on the Special Medical Prior Authorization (SMPA) Request Form.

Prior authorization for omidubicel-onlv (Omisirge) may be approved for 12 months for clients who have one of the following diagnoses:

- Hematologic malignancies in clients who meet all the following criteria:
  - The client is 12 years of age or older.
  - The client has a confirmed diagnosis of a high-risk hematologic malignancy and is scheduled for UCBT after undergoing a myeloablative conditioning regimen such as radiation and chemotherapy (diagnosis code D701, D708, D709, or Z9481).
  - The client is receiving therapy to reduce the time to neutrophil recovery and the risk of developing infection.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The client does not have a matched related or unrelated donor for allogeneic hematopoietic stem cell transplantation (HSCT).
- The client does not have a history of receiving prior allogeneic HSCT.

- SAA in clients who meet all the following criteria:
  - The client is 6 years of age or older.
  - The client has a confirmed diagnosis of SAA following a reduced intensity conditioning regimen (diagnosis code D611, D612, D6189, or D619).
  - The client has a history of intolerance or failure to respond to immunosuppressive therapy.
  - The client does not have a matched related or unrelated donor.

Note: *Regardless of the diagnosis, the client does not have known sensitivity to dimethyl sulfoxide (DMSO), Dextran 40, gentamicin, human serum albumin, or bovine material.*

After omidubicel-onlv (Omisirge) infusion, providers must monitor the client for the following:

- Allergic reactions, particularly in clients with a history of allergic reactions to antibiotics
- Graft failure
- Graft-versus-host disease
- Engraftment syndrome
- Infections
- Secondary malignancies
- Other post-transplant complications

In addition to documentation requirements outlined in this section, all services are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

6.96 Onasemnogene Abeparvovec-brve (Itvisma)

Onasemnogene abeparvovec-brve (Itvisma) is an adeno-associated virus (AAV) vector-based gene therapy indicated for the treatment of spinal muscular atrophy (SMA) in adult and pediatric clients who are 2 years of age or older with confirmed mutation in the survivor motor neuron 1 (SMN1) gene.

Onasemnogene abeparvovec-brve (Itvisma) is a benefit of Texas Medicaid with prior authorization.

Onasemnogene abeparvovec-brve (Itvisma) (procedure code J3405) is limited to once per lifetime.

Onasemnogene abeparvovec-brve (Itvisma) is not a benefit for clients with tracheostomy or invasive ventilator support.

6.96.1 Prior Authorization Requirements

Providers must submit prior authorization requests for onasemnogene abeparvovec-brve (Itvisma) on the Special Medical Prior Authorization (SMPA) Request Form.

A prior authorization request for onasemnogene abeparvovec-brve (Itvisma) single-dose intrathecal injection must include documentation of all the following:

- The client is 2 years of age or older.
- The client has a confirmed diagnosis of SMA (diagnosis code G120, G121, G1225, G128, or G129).
- An SMA diagnostic test has confirmed SMN1 deletion, or the client has documentation of a previous test that confirmed SMN1 deletion.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The client's medical record supports any one of the following mutations or deletions of genes in chromosome 5q:
  - Homozygous gene deletion of the SMN1 gene (e.g., absence of the SMN1 gene)
  - Homozygous mutation of the SMN1 gene (e.g., biallelic mutation of exon 7)
  - Compound heterozygous mutation in the SMN1 gene (e.g., deletion of SMN1 exon 7 [allele 1] and mutation of SMN1 [allele 2])
- The client has a baseline documentation of AAV serotype 9 (AAV9) antibody titer of 1:50 or lower as determined by enzyme-linked immunosorbent assay (ELISA) binding immunoassay.
- The client's overall baseline health status is stable, as evidenced by the following:
  - The client's complete blood count, liver function, and creatinine are within normal limits.
  - The client has no signs or symptoms of active infection.
- The prescriber attests to counseling female clients of childbearing age regarding the use of an effective method of contraception to prevent pregnancy during treatment and to refrain from egg donation for up to six months after dose administration of onasemnogene abeparvovecbrve (Itvisma) therapy.

Important: *Male clients should refrain from fathering a child or donating sperm for three months following therapy.*

- Physician attests that the client has not previously received onasemnogene abeparvovec-brve (Itvisma), onasemnogene abeparvovec-xioi (Zolgensma), or any other gene therapy for SMA.

If nusinersen (Spinraza) or risdiplam (Evrysdi) have been previously prescribed, the prescriber must provide documentation of one of the following prior to switching to onasemnogene abeparvovec-brve (Itvisma) therapy:

- The client's clinical deterioration (e.g., decreased physical function and motor skill/function test scores) while receiving nusinersen (Spinraza) or risdiplam (Evrysdi) therapy
- Discontinuation of nusinersen (Spinraza) or risdiplam (Evrysdi) therapy

6.96.1.1 Requirements for Safe Drug Administration

The administration of onasemnogene abeparvovec-brve (Itvisma) may cause acute serious liver injury or failure. To administer the drug, providers must:

- Examine the client's liver function using clinical examination and laboratory testing such as hepatic aminotransferases (aspartate aminotransferase [AST] and alanine aminotransferase [ALT]), total bilirubin, and prothrombin time prior to infusion of onasemnogene abeparvovec-brve (Itvisma).
- Administer a systemic corticosteroid before and after the infusion.
- Continue to monitor client's liver function for at least three months after the infusion.

6.96.1.2 Required Monitoring Parameters

After administering onasemnogene abeparvovec-brve (Itvisma) intrathecal injection, the prescriber must monitor the client for signs of the following:

- Hepatotoxicity
- Thrombocytopenia
- Peripheral sensory neuropathy
- Thrombotic microangiopathy

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Elevated cardiac troponin I levels

In addition to documentation requirements outlined in this section, all services are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

6.97 Onasemnogene abeparvovec-xioi (Zolgensma)

Onasemnogene abeparvovec-xioi (Zolgensma) is a benefit of Texas Medicaid, with prior authorization. Claims for onasemnogene abeparvovec-xioi (Zolgensma) must be submitted with unlisted procedure code J3399.

Onasemnogene abeparvovec-xioi (Zolgensma) (procedure code J3399) is limited to one treatment per lifetime, per client.

Onasemnogene abeparvovec-xioi (Zolgensma) is a one-time infusion therapy indicated for the treatment of a client who meets all of the following requirements:

- Has spinal muscular atrophy (SMA)
- Has biallelic mutations in the survival motor neuron 1 (SMN1) gene
- Is 24 months of age or younger

Onasemnogene abeparvovec-xioi (Zolgensma) is not a benefit for clients with a tracheostomy or invasive ventilator support.

6.97.1 Prior Authorization Requirements

To be considered for the approval of a one-time intravenous infusion, prior authorization requests for onasemnogene abeparvovec-xioi (Zolgensma) (unlisted procedure code J3399) must be submitted with a Special Medical Prior Authorization (SMPA) Request Form.

All of the following must be included in Section C (located under Statement of Medical Necessity) of the Special Medical Prior Authorization (SMPA) Request Form:

- Documentation of the client's dosage
- Administration schedule
- Number of injections to be administered during the prior authorization period
- Requested units per injection
- Dosage calculation

The Special Medical Prior Authorization (SMPA) Request Form must be completed, signed, and dated by the prescribing provider. The completed form must be maintained by the prescribing provider in the client's medical record and is subject to retrospective review. The form will not be accepted beyond 90 days from the date of the prescribing provider's signature.

6.97.2 Documentation Requirements

The prior authorization request for an onasemnogene abeparvovec-xioi (Zolgensma) single-dose intravenous infusion must include documentation of all of the following:

- Client is 24 months of age or younger.
- Medical record supports any of the following mutation or deletion of genes in chromosome 5q:
  - Homozygous gene deletion of the SMN1 gene (e.g., absence of SMN1 gene)
  - Homozygous mutation of the SMN1 gene (e.g., biallelic mutation of exon 7)

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

  - Compound heterozygous mutation in the SMN1 gene (e.g., deletion of SMN1 exon 7 [allele 1] and mutation of SMN1 [allele 2])
- Confirmed diagnosis of SMA (diagnosis codes G120, G121, G128, and G129) based on gene mutation analysis with biallelic SMN1 mutation (deletion or point mutation).
- The administration of onasemnogene abeparvovec-xioi (Zolgensma) may cause serious liver injury or failure. Providers must also complete the following to administer the drug:
  - Examine the client's liver function by clinical examination and laboratory testing (e.g., hepatic aminotransferases [aspartate aminotransferase (AST) and alanine aminotransferase (ALT)], total bilirubin, and prothrombin time) before infusion of onasemnogene abeparvovec-xioi (Zolgensma).
  - Administer a systemic corticosteroid before and after the administration of the drug.
  - Continue to monitor the client's liver function at least 3 months after the infusion of the drug.
- Evaluation of motor skill and function must be documented using a standardized test. However, it is not a prerequisite of therapy and should not delay treatment. Standardized testing tools that may be used to evaluate motor skill/function include, but are not limited to:
  - Children's Hospital of Philadelphia Infant Test of Neuromuscular Disorder (CHOP-INTEND) score
  - Bayley scale of infant and toddler development screening test
  - WHO Multicenter Growth Reference Study (WHO MGRS)
- Baseline documentation supports an AAV9 antibody titer of 1:50 or lower, as determined by enzyme-linked immunosorbent assay (ELISA) binding immunoassay.
- Baseline platelet counts, and the provider must assess safety by continually checking weekly counts for the first month and then every other week for the second and third months until platelet counts return to baseline.

  Note: *In addition to the documentation requirements outlined in the Prior Authorization section, post-monitoring requirements like liver function tests and platelet counts must be part of the client's record and are subject to retrospective review.*
- Physician attestation supports that the client has not received prior onasemnogene abeparvovec-xioi (Zolgensma) therapy.

If nusinersen (Spinraza) (procedure code J2326) or risdiplam (Evrysdi) have been previously prescribed, the prescriber must provide documentation of one of the following before switching to onasemnogene abeparvovec-xioi (Zolgensma) therapy:

- Evidence of clinical deterioration (e.g., decreased physical function and motor skill/function test scores) while on nusinersen (Spinraza) or risdiplam (Evrysdi) therapy
- Prescriber's attestation that nusinersen (Spinraza) or risdiplam (Evrysdi) therapy has been discontinued

6.98 Panhematin

Panhematin (procedure code J1640) is a benefit of Texas Medicaid and is limited to diagnosis code E8021.

6.99 Pegcetacoplan (Syfovre)

Pegcetacoplan (Syfovre) (procedure code J2781) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

6.100 Phenylephrine Hydrochloride (Immphentiv)

Phenylephrine hydrochloride (Immphentiv) (procedure code J2373) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.101 * Polyneuropathy of Hereditary Transthyretin-mediated (hATTR) Amyloidosis

[Revised] Eplontersen (Wainua), patisiran (Onpattro), and vutrisiran (Amvuttra) are benefits of Texas Medicaid with prior authorization for the treatment of the polyneuropathy of hereditary transthyretin-mediated (hATTR) amyloidosis in adult clients. Patisiran (Onpattro) and vutrisiran (Amvuttra) are transthyretin-directed small interfering ribonucleic acid (RNA), while eplontersen (Wainua) is an antisense oligonucleotide.

[Revised] Prior authorization requests for eplontersen (Wainua) (procedure code C9311), patisiran (Onpattro) (procedure code J0222), and vutrisiran (Amvuttra) (procedure code J0225) must be submitted with a Special Medical Prior Authorization (SMPA) Request Form and may be approved for 12 months per prior authorization request.

For initial therapy of patisiran (Onpattro), all of the following criteria must be met:

- The client is 18 years of age or older.
- The client has a diagnosis of hATTR amyloidosis (diagnosis code E851), supported by the following:
  - Transthyretin (TTR) mutation proven by genetic testing
  - [Revised] Clinical signs and symptoms of the disease (e.g., peripheral autonomic neuropathy, or motor disability)
- [Revised] The client will not receive patisiran (Onpattro) therapy in combination with other polyneuropathy hATTR amyloidosis therapies (e.g., eplontersen, inotersen, tafamidis, meglumine, or vutrisiran).
- The client has not had a liver transplant.

For initial therapy of vutrisiran (Amvuttra), all of the following criteria must be met:

- The client is 18 years of age or older
- The client has a diagnosis of hATTR amyloidosis (diagnosis code E851), supported by the following:
  - Transthyretin (TTR) mutation proven by genetic testing
  - [Revised] Clinical signs and symptoms of the disease (e.g., peripheral autonomic neuropathy, or motor disability)
- [Revised] The client will not receive vutrisiran (Amvuttra) therapy in combination with other therapies for polyneuropathy caused by hATTR amyloidosis (e.g., eplontersen, inotersen, patisiran, or tafamidis meglumine).
- The client will receive vitamin A supplementation at the recommended daily allowance while on vutrisiran (Amvuttra) therapy.
- The client has not had a liver transplant.

[Revised] For initial therapy of eplontersen (Wainua), all of the following criteria must be met:

- [Revised] The client must be 18 years of age or older.
- [Revised] The client has a diagnosis of polyneuropathy of hereditary transthyretin (hATTR) amyloidosis (diagnosis code E851), supported by the following:
  - [Revised] Transthyretin (TTR) mutation proven by genetic testing

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

  - [Revised] Clinical signs and symptoms of the disease (e.g., peripheral autonomic neuropathy, or motor disability)
- [Revised] The client will not receive eplontersen (Wainua) therapy in combination with other polyneuropathy hATTR amyloidosis therapies (e.g., inotersen, patisiran, vutrisiran, or tafamidis meglumine).
- [Revised] The client will receive vitamin A supplementation at the recommended daily allowance while on eplontersen (Wainua) therapy.

For renewal or continuation of therapy, all of the following criteria must be met:

- [Revised] The client has previously received treatment with eplontersen (Wainua), patisiran (Onpattro) or vutrisiran (Amvuttra) without an adverse reaction.
- [Revised] The client has a positive clinical response to eplontersen (Wainua), patisiran (Onpattro) or vutrisiran (Amvuttra) (e.g., improved neurologic impairment, improved motor function, or slowing of disease progression).

Documentation of the client's dosage, administration schedule, number of injections to be administered during the prior authorization period, requested units per injection, and the dosage calculation must be submitted in Section C of the Special Medical Prior Authorization (SMPA) Request Form under Statement of Medical Necessity.

Refer to: Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

6.102 Plasminogen Human-tvmh (Ryplazim)

Plasminogen human-tvmh (Ryplazim) (procedure code J2998) is a benefit of Texas Medicaid and is limited to diagnosis code E8802.

6.103 Plazomicin

Plazomicin (procedure code J0291) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.104 Prademagene Zamikeracel (Zevaskyn)

Prademagene zamikeracel (Zevaskyn) (procedure code J3389) is a benefit of Texas Medicaid for clients with prior authorization.

Prademagene zamikeracel (Zevaskyn) is an autologous cell sheet-based gene therapy indicated to treat wounds in adult and pediatric clients with recessive dystrophic epidermolysis bullosa (RDEB).

6.104.1 Prior Authorization Requirements

6.104.1.1 Initial Requests

Prademagene zamikeracel (Zevaskyn) is indicated as a surgical topical application for treating wounds.

Prior authorization may be approved for 12 months for clients who:

- Are at least 6 years of age or older.
- Have a confirmed diagnosis of RDEB (diagnosis code Q812) that has been confirmed by biopsy and by genetic testing that detected biallelic mutations in the COL7A1 gene.
- Have chronic cutaneous stage 2 wounds that are adequate for treatment and:
  - Have been open/present for at least 6 months.
  - Have an area of ≥ 20 cm2.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Have not previously been treated with prademagene zamikeracel (Zevaskyn).
- Are not infected.

- Have a wound area that shows no current evidence or history of squamous cell carcinoma.
- Do not have severe hypersensitivity (i.e., anaphylaxis) to vancomycin or amikacin.

Authorization will not be approved for administration to wounds that have previously been treated with prademagene zamikeracel (Zevaskyn).

6.104.1.2 Recertification or Extension

For continued therapy, the client must meet the following requirements:

- Reauthorization for the same wound is not permitted. The client must meet the initial approval criteria if the request is for previously untreated or newly developed wounds.
- Absence of unacceptable toxicity from prademagene zamikeracel (Zevaskyn) (e.g., severe hypersensitivity reactions and development of new malignance).
- The client shows a positive response to treatment as defined by improvement (healing) of treated wound sites or reduction in skin infections.

6.104.2 Documentation Requirements

In addition to the documentation requirements outlined in this section, all services are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the services provided.

6.105 Ravulizumab-cwvz (Ultomiris)

Ravulizumab-cwvz (procedure code J1303) is a benefit of Texas Medicaid and is limited to the following diagnosis codes:

Diagnosis Codes							
D588	D5930	D5932	D5939	D594	D595	D598	G360
G7000	G7001						

6.106 Remestemcel-L-rknd (Ryoncil)

Remestemcel-L-rknd (Ryoncil) (procedure code J3402) is a benefit of Texas Medicaid with prior authorization.

Remestemcel-L-rknd (Ryoncil) is an allogeneic bone marrow-derived mesenchymal stromal cell (MSC) therapy approved to treat steroid-refractory acute graft versus host disease (SR-aGVHD) in pediatric clients who are 2 months of age or older.

6.106.1 Prior Authorization Requirements

6.106.1.1 Initial Requests

Remestemcel-L-rknd (Ryoncil) is an intravenous infusion which may be approved for clients who meet all of the following requirements:

- The client is at least 2 months of age or older.
- The client has a confirmed diagnosis of aGVHD (diagnosis code D89810) following an allogenic hematopoietic stem cell transplant.
- The client's aGVHD is steroid refractory, as documented by the following:

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Progression of acute GVHD within three days of consecutive treatment with 2 mg/kg/day of methylprednisolone or equivalent.
- No signs of improvement within 7 days of therapy with 2mg/kg/day of methylprednisolone or equivalent treatment.

- The client has no known hypersensitivity to dimethyl sulfoxide or porcine and bovine proteins.

6.106.1.2 Re-certification or Extension

For renewal or continuation of therapy, the client must meet the following requirements:

- The client has received remestemcel-L-rknd (Ryoncil) for at least 28 days.
- The client has documentation of partial or mixed response to remestemcel-L-rknd (Ryoncil) treatment.
- The client is currently receiving or has received remestemcel-L-rknd (Ryoncil) without any serious or life-threatening reactions.

6.106.2 Documentation Requirements

In addition to documentation requirements outlined in this section, all services are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

6.107 Remimazolam

Remimazolam (procedure code J2249) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.108 Retifanlimab-dlwr (Zynyz)

Retifanlimab-dlwr (procedure code J9345) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.109 Revakinagene taroretcel-lwey (Encelto)

Revakinagene taroretcel-lwey (Encelto) (procedure code J3403) is a benefit of Texas Medicaid with prior authorization.

Revakinagene taroretcel-lwey (Encelto) is an allogeneic encapsulated cell-based gene therapy indicated for the treatment of adults with idiopathic macular telangiectasia type 2 (MacTel).

6.109.1 Prior Authorization Requirements

6.109.1.1 Initial Requests

Revakinagene taroretcel-lwey (Encelto) is administered as an intravitreal implantation under aseptic conditions and is indicated for clients who meet all the following requirements:

- The client is 18 years of age or older.
- The client has a confirmed diagnosis of retinal telangiectasis in at least one eye (diagnosis codes H35071, H35072, H35073, or H35079).
- The client has type 2 MacTel in at least one eye.
- The client does not have neovascular or proliferative MacTel.
- The client has no ocular and/or periocular infections.
- The client has no known hypersensitivity to endothelial serum-free media (Endo-SFM).

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The client has temporarily discontinued any antithrombotic medication prior to revakinagene taroretcel-lwey (Encelto) insertion surgery.
- The client has not previously received revakinagene taroretcel-lwey (Encelto) insertion.

Prior authorization is limited to one revakinagene taroretcel-lwey (Encelto) treatment per eye per lifetime.

Clients must be monitored for signs and symptoms of vision loss, infectious endophthalmitis, and retinal tear or detachment.

6.109.1.2 Re-certification or Extension

Re-authorization of revakinagene taroretcel-lwey (Encelto) is not permitted for previously treated eyes.

If the request is for treatment of an eye that has not previously received an ocular implant, the client must meet the approval criteria listed in the prior authorization requirement section.

6.109.2 Documentation Requirements

In addition to documentation requirements outlined in this section, all services are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

6.110 Rilonacept (Arcalyst)

Rilonacept (procedure code J2793) is a benefit of Texas Medicaid for clients who are 12 years of age or older.

6.111 Risperidone

Risperidone (Perseris) (procedure code J2798) and (Uzedy) (procedure code J2799) are benefits of Texas Medicaid for clients who are 18 years of age or older.

6.112 Rituximab-Abbs, (Truxima)

Rituximab-abbs (Truxima) (procedure code Q5115) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.113 Romosozumab

Romosozumab (procedure code J3111) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.114 Ronzanolixizum-noli (Rystiggo)

Ronzanolixizum-noli (procedure code J9333) is a benefit of Texas Medicaid for clients who are 18 years of age or older and is restricted to diagnosis codes G7000 and G7001.

6.115 Sickle Cell Disease Gene Therapy

Exagamglogene autotemcel (Casgevy) is an autologous genome edited hematopoietic stem cell-based gene therapy indicated for the treatment of clients who are 12 years of age or older with one of the following:

- Sickle cell disease (SCD) with recurrent vaso-occlusive crises, or
- Transfusion-dependent ß-thalassemia

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Exagamglogene autotemcel (Casgevy) (procedure code J3392) and lovotibeglogene autotemcel (Lyfgenia) (procedure code J3394) are benefits of Texas Medicaid with prior authorization. Prior authorization is approved for a duration of 12 months.

Exagamglogene autotemcel (Casgevy) (procedure code J3392) is limited to one transfusion treatment per lifetime.

Lovotibeglogene autotemcel (Lyfgenia) is an autologous hematopoietic stem cell-based gene therapy indicated for the treatment of clients who are 12 years of age or older with sickle cell disease and a history of vaso-occlusive events with at least four vaso-occlusive events in the past 24 months or currently receiving chronic transfusion therapy for recurrent vaso-occlusive events.

Lovotibeglogene autotemcel lovotibeglogene autotemcel (Lyfgenia) (procedure code J3394) is limited to one transfusion treatment per lifetime.

6.115.1 Prior Authorization Requirements

Exagamglogene Autotemcel (Casgevy)

Prior authorization requests for exagamglogene autotemcel (Casgevy) and lovotibeglogene autotemcel (Lyfgenia) must be submitted using the Special Medical Prior Authorization (SMPA) Request Form.

Exagamglogene autotemcel (Casgevy) is a one-time infusion therapy indicated for the treatment of clients for whom autologous hematopoietic stem cell transplantation is appropriate and who meet all the following criteria:

- The client is 12 years of age or older and has been diagnosed with sickle cell disease.
- The client has a diagnosis of sickle cell disease as confirmed by genetic testing with recurrent vaso-occlusive crises, with at least two vaso-occlusive crisis events per year in the past 2 years, as documented with one of the following diagnosis codes or provider attestation:

Diagnosis Codes							
D5700	D5701	D5702	D5703	D5704	D5709	D571	D5720
D57211	D57212	D57213	D57214	D57218	D57219	D5740	D57411
D57412	D57413	D57414	D57418	D57419	D5742	D57431	D57432
D57433	D57434	D57438	D57439	D5744	D57451	D57452	D57453
D57454	D57458	D57459	D5780	D57811	D57812	D57813	D57814
D57818	D57819						

- The client has inadequate response to hydroxyurea or crizanlizumab.
- The client is 12 years of age or older and has been diagnosed with transfusion-dependent ß-thalassemia, and the following additional criteria must be met:
  - Genetic testing confirms the client's diagnosis of transfusion-dependent ß-thalassemia, as documented with diagnosis code D561 or D565.
  - The client has a history of requiring at least 100 mL/kg/year or ten units/year of red blood cell (RBC) transfusions in the past 24 months.
- The client has not previously received allogeneic or autologous hematopoietic stem cell transplantation.
- The client has not previously received exagamglogene autotemcel (Casgevy) or any other gene therapy.
- The client has a confirmed negative serum pregnancy test.
- The client does not have active HIV-1, HIV-2, HBV, or HCV.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The client does not have advanced liver or chronic kidney disease.
- For transfusion-dependent ß-thalassemia diagnosis, prescriber attestation will be required to discontinue iron chelators at least 7 days prior to initiation of myeloablative conditioning.

For diagnosis of sickle cell disease, the prescriber attestation is required for the following:

- Hydroxyurea is discontinued at least eight weeks before mobilization and conditioning.
- Crizanlizumab is discontinued at least eight weeks before mobilization or conditioning.
- Iron chelators are discontinued at least seven days before initiation of myeloablative conditioning.

Monitoring parameters for exagamglogene autotemcel (Casgevy) are as follows:

- Monitor for bleeding and conduct frequent platelet counts until platelet engraftment and platelet recovery are achieved.
- Monitor absolute neutrophil counts until engraftment has been achieved.

Lovotibeglogene autotemcel (Lyfgenia)

Lovotibeglogene autotemcel (Lyfgenia) is a one-time infusion therapy indicated for the treatment of clients for whom autologous hematopoietic stem cell transplantation is appropriate and who meets the following requirements:

- The client is 12 years of age or older at the expected time of gene therapy administration.
- The client has a diagnosis of sickle cell disease confirmed by genetic testing and a history of vaso-occlusive events, with at least four vaso-occlusive events in the past 24 months, or currently receiving chronic transfusion therapy for recurrent vaso-occlusive events, as documented with one of the following diagnosis codes or provider attestation:

Diagnosis Codes							
D5700	D5701	D5702	D5703	D5704	D5709	D571	D5720
D57211	D57212	D57213	D57214	D57218	D57219	D5740	D57411
D57412	D57413	D57414	D57418	D57419	D5742	D57431	D57432
D57433	D57434	D57438	D57439	D5744	D57451	D57452	D57453
D57454	D57458	D57459	D5780	D57811	D57812	D57813	D57814
D57818	D57819						

- The client has not previously received allogeneic or autologous hematopoietic stem cell transplantation.
- The client has inadequate response or contraindication to hydroxyurea per the healthcare provider's discretion.
- The client has not previously received lovotibeglogene autotemcel (Lyfgenia) or any other gene therapy.
- The client has a confirmed negative serum pregnancy test and is not breastfeeding.
- The client has confirmed negative serology test for HIV-1 or HIV-2.
- The client does not have advanced liver or chronic kidney disease.
- Prescribers must attest and document the following:
  - Hydroxyurea is discontinued two months before mobilization and two days before conditioning.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Anti-retroviral medication is discontinued at least one month before mobilization and until all cycles of apheresis are completed.
- Iron chelators are discontinued at least seven days before initiation of myeloablative conditioning.

Monitoring parameters for lovotibeglogene autotemcel (Lyfgenia) are as follows:

- Monitor for evidence of malignancy through complete blood counts at least every six months and through integration site analysis at month 6, month 12, and as warranted.
- Monitor for thrombocytopenia and bleeding.
- Monitor neutrophil counts until engraftment has been achieved.

6.115.2 Documentation Requirements

In addition to documentation requirements outlined in this section, all services are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

6.116 Secukinumab (Cosentyx)

Secukinumab (Cosentyx) (procedure code J3247) is a benefit of Texas Medicaid for clients who are 18 years of age or older and is restricted to the following diagnosis codes:

Diagnosis Codes							
L400	L401	L402	L403	L404	L405	L4050	L4051
L4052	L4053	L4054	L4059	L408	L409	M0880	M450
M451	M452	M453	M454	M455	M456	M457	M458
M459	M4680	M4681	M4682	M4683	M4684	M4685	M4686
M4687	M4688	M4689					

6.117 Sirolimus Protein-bound Particles (Fyarro)

Sirolimus protein-bound particles (Fyarro) (procedure code J9331) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.118 Spesolimab-sbzo (Spevigo)

Spesolimab-sbzo (Spevigo) (procedure code J1747) is a benefit of Texas Medicaid for clients who are 12 years of age or older and restricted to diagnosis code L401.

6.119 Sutimlimab-jome (Enjaymo)

Sutimlimab-jome (Enjaymo) (procedure code J1302) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.120 Sumatriptan succinate (Imitrex)

Procedure code J3030 is a benefit when billed with one of the following diagnosis codes:

Diagnosis Codes							
G43001	G43009	G43011	G43019	G43101	G43109	G43111	G43119
G43401	G43409	G43411	G43419	G43501	G43509	G43511	G43519
G43601	G43609	G43611	G43619	G43701	G43709	G43711	G43719

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Diagnosis Codes							
G43801	G43809	G43811	G43819	G43821	G43829	G43831	G43839
G43901	G43909	G43911	G43919	G43A0	G43A1	G43B0	G43B1
G43C0	G43C1	G43D0	G43D1				

6.121 * Blastic Plasmacytoid Dendritic Cell Neoplasm Therapy (Elzonris and Decnupaz)

[Revised] Tagraxofusp-erzs (Elzonris) and pivekimab sunirine-pvzy (Decnupaz) are indicated to treat blastic plasmacytoid dendritic cell neoplasm (BPDCN). Tagraxofusp-erzs (Elzonris) is a CD 123-directed cytotoxin while pivekimab sunirine-pvzy (Decnupaz) is a CD 123-directed antibody and alkylating agent conjugate indicated to treat BPDCN.

[Revised] Tagraxofusp-erzs (Elzonris) (procedure code J9269) and pivekimab sunirine-pvzy (Decnupaz) (procedure code C9313) are benefits of Texas Medicaid with prior authorization.

6.121.1 * Prior Authorization Requirements

[Revised] Prior authorization is required for tagraxofusp-erzs (Elzonris) (procedure code J9269) and pivekimab sunirine-pvzy (Decnupaz) (procedure code C9313), and may be approved for a duration of every 12 months.

Prior authorization approval for tagraxofusp-erzs (Elzonris) infusion will be considered once all of the following criteria are met for initial therapy:

- [Revised] Client is 2 years of age or older
- Client has a diagnosis of blastic plasmacytoid dendritic cell neoplasm (diagnosis code C8640) excluding, acute promyelocytic leukemia (APL, FAB, M3)
- Client has a CD-123 positive/expressing disease
- Client has adequate serum albumin level and baseline organ function, including cardiac, renal, and hepatic function prior to each course of therapy:
  - Baseline serum albumin level of 3.2 g/dl or greater
  - Left ventricular ejection fraction (LVEF) of 40% or greater
  - Serum creatinine (Scr) of 1.5 mg/dl or less
  - Bilirubin level of 1.5 mg/dl or less

[Revised] Prior authorization approval for pivekimab sunirine-pvzy (Decnupaz) therapy will be considered once all of the following criteria are met for initial therapy:

- [Revised] Client is 18 years of age or older
- [Revised] Client has a diagnosis of blastic plasmacytoid dendritic cell neoplasm excluding acute promyelocytic leukemia (APL, FAB, M3) (diagnosis code C8640)
- [Revised] Client has a CD-123 positive/expressing disease
- [Revised] Client does not have moderate-to-severe hepatic impairment. Baseline aspartate amino-transferase (AST), alanine aminotransferase (ALT), and total bilirubin must be obtained and reviewed prior to treatment with pivekimab sunirine-pvzy (Decnupaz)
- [Revised] Pivekimab sunirine-pvzy (Decnupaz) may cause hepatotoxicity, including veno-occlusive disease (VOD), a severe form of hepatotoxicity.
  - [Revised] The client's hepatic function must be monitored prior to each course of therapy to mitigate the risk of severe or fatal VOD.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

  - [Revised] Treatment with pivekimab sunirinepvzy (Decnupaz) should be delayed with liver test elevations and permanently discontinued therapy in clients who experience VOD
- [Revised] Prescriber attests to closely monitor for signs and symptoms of VOD including elevations in liver tests, hepatomegaly, rapid weight gain, and ascites
- For renewal or continuation therapy, the client must meet all of the following criteria:
  - Client continues to meet initial approval criteria
  - [Revised] Client has previously received treatment with tagraxofusp-erzs (Elzonris) or pivekimab sunirine-pvzy (Decnupaz) with absence of adverse drug reactions or drug toxicity
  - Client has a positive clinical response demonstrated by disease stabilization

Refer to: Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

6.122 Talquetamab-tgvs (Talvey)

Talquetamab-tgvs (procedure code J3055) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.123 Tarlatamab-dlle (Imdelltra)

Tarlatamab-dlle (Imdelltra) is a bispecific delta-like ligand 3 (DLL3)-directed CD3 T-cell engager indicated for the treatment of adult clients with extensive stage small cell lung cancer (ES-SCLC) with disease progression on or after platinum-based chemotherapy.

Tarlatamab-dlle (Imdelltra) (procedure code J9026) is a benefit of Texas Medicaid with prior authorization.

Tarlatamab-dlle (Imdelltra) infusion is to be administered by a qualified healthcare professional in a healthcare setting with appropriate medical support.

6.123.1 Initial Requests

Tarlatamab-dlle (Imdelltra) is an intravenous infusion indicated for the treatment of a client who meets the following requirements:

- The client is 18 years of age or older.
- The client has a confirmed diagnosis of extensive stage small cell lung cancer with one of the following diagnosis codes:

Diagnosis Codes							
C3400	C3401	C3402	C3410	C3411	C3412	C342	C3430
C3431	C3432	C3480	C3481	C3482	C3490	C3491	C3492

- The client has previously received platinum-based chemotherapy (e.g., cisplatin, or carboplatin).
- The client does not have a clinically significant active systemic infection.
- The prescriber attests to counseling female clients of childbearing age regarding the risk of embryo-fetal toxicity and counseling to prevent pregnancy during treatment period and two months after the last infusion of tarlatamab-dlle (Imdelltra) by using an effective method of contraception.

Providers should monitor the following parameters:

- Signs and symptoms of severe reactions such as cytokine release syndrome (CRS).
- Neurologic toxicity, including immune effector cell-associated neurotoxicity syndrome (ICANS).

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Cytopenia including neutropenia, thrombocytopenia, and anemia. Perform complete blood counts before each tarlatamab-dlle (Imdelltra) treatment.
- Signs and symptoms of hepatotoxicity. Monitor liver enzymes and bilirubin before each tarlatamab-dlle (Imdelltra) treatment.

6.123.2 Recertification or Extension

For renewal or continuation therapy of tarlatamabdlle (Imdelltra), the client must meet the following requirements:

- The client continues to meet the requirements listed above and has been treated with tarlatamabdlle (Imdelltra) in the past.
- The client experienced positive clinical response to treatment, as documented by stabilization of disease, and/or decrease in tumor size or spread.
- The client has not experienced any unacceptable, clinically significant adverse reactions or toxicity (e.g., severe cytopenia, hepatotoxicity, neurotoxicity, etc.) while on tarlatamab-dlle (Imdelltra) therapy.

All services outlined in this section are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

6.124 Tebentafusp-tebn (Kimmtrak)

Tebentafusp-tebn (Kimmtrak) (procedure code J9274) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.125 Teclistamab-cqyv (Tecvayli)

Teclistamab-cqyv (Tecvayli) (procedure code J9380) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.126 Teplizumab-mzwv (Tzield)

Teplizumab-mzwv (Tzield) is a cluster of differentiation 3 (CD3)-directed antibody that is indicated to:

- Delay the onset of stage 3 type 1 diabetes (T1D) in adult and pediatric clients who are 1 year of age or older with stage 2 T1D.
- Delay the decline in endogenous insulin production in pediatric clients who are 8 through 17 years of age who have recently been diagnosed with stage 3 T1D.

Teplizumab-mzwv (Tzield) (procedure code J9381) is a benefit of Texas Medicaid with prior authorization.

Teplizumab-mzwv (Tzield) therapy may be approved for up to 14-day treatment duration when the client meets the following criteria:

- The request is to delay the onset of stage 3 T1D
  - The client is 1 year of age or older.
  - The client is given teplizumab-mzwv (Tzield) to delay the onset of stage 3 T1D. The use of teplizumab-mzwv (Tzield) is not approved in type 2 diabetes or any other stages of T1D other than stage 2 TID.
  - The client has a diagnosis of stage 2 T1D confirmed by documentation of at least two positive pancreatic islet autoantibodies:
    - Islet cell autoantibody (ICA)

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

    - Insulinoma-associated antigen 2 autoantibody (IA-2A)
    - Insulin autoantibody (IAA)
    - Zinc transporter 8 autoantibody (ZnT8A)
    - Glutamic acid decarboxylase 65 (GAD) autoantibodies
  - Documentation of dysglycemia without overt hyperglycemia using oral glucose tolerance test (OGTT), or another appropriate test for dysglycemia may be used if OGTT is not available.
- The request is to delay the decline in endogenous insulin production in pediatric clients recently diagnosed with stage 3 T1D.
  - The client is 8 through 17 years of age
  - The client has a diagnosis of stage 3 T1D confirmed by the documentation of at least one positive pancreatic islet cell autoantibody:
    - Islet cell autoantibody (ICA)
    - Insulinoma-associated antigen 2 autoantibody (IA-2A)
    - Insulin autoantibody (IAA)
    - Zinc transporter 8 autoantibody (ZnT8A)
    - Glutamic acid decarboxylase 65 (GAD) autoantibodies
  - The client has residual beta cell function, as indicated by peak stimulated C-peptide > 0.2 pmol/mL on a mixed-meal tolerance test (MMTT) or alternative method if appropriate and MMTT is not available.
- The clinical history does not suggest that the client has type 2 diabetes.
- The prescriber must obtain and assess a complete blood count and liver enzyme tests prior to the initiation of treatment with teplizumab-mzwv (Tzield) because the use of teplizumab-mzwv (Tzield) is not recommended in clients with certain lab abnormalities.
- The prescriber must assess client's history of chronic infection and monitor for any signs of active serious infection while on teplizumab-mzwv (Tzield). If a serious infection develops, teplizumab-mzwv (Tzield) therapy should be discontinued.

6.127 Teprotumumab-trbw (Tepezza)

Teprotumumab-trbw (Tepezza) (procedure code J3241) is a benefit of Texas Medicaid and prior authorization is required. Teprotumumab-trbw (Tepezza) is indicated for the treatment of thyroid eye disease (TED) regardless of TED activity or duration.

6.127.1 Prior Authorization Requirements

Prior authorization requests for procedure code J3241 must be submitted with a Special Medical Prior Authorization (SMPA) Request Form.

The client must meet all of the following requirements for approval of Teprotumumab-trbw (Tepezza):

- The client has a diagnosis of Graves' disease associated with TED.
- The client is euthyroid, or the client has either mild hypothyroidism or mild hyperthyroidism.
- The client has no history of prior surgical intervention for TED and does not plan to have surgical treatment while on Teprotumumab-trbw (Tepezza).
- The client may not exceed the course of eight total infusions per lifetime.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

6.127.2 Exclusions

Teprotumumab-trbw (Tepezza) should not be used in pregnancy as it may potentially lead to fetal loss. Females of reproductive potential should use effective contraception prior to initiation, during treatment with Teprotumumab-trbw (Tepezza) and for 6 months after the last dose of Teprotumumab-trbw (Tepezza).

6.128 Thyrotropin alpha for injection (Thyrogen)

Thyrotropin alpha for injection (Thyrogen) (procedure code J3240) is a benefit of Texas Medicaid and is limited to the following diagnosis codes:

Diagnosis Codes							
C323	C73	D020	D093	D098	D380	D440	D442
D449	D497	E010	E011	E012	E040	E042	E048
E049	E0500	E0520	Z85850				

6.129 Tildrakizumab (Ilumya)

Tildrakizumab (procedure code J3245) is a benefit of Texas Medicaid for clients who are 18 years of age or older, and is limited to diagnosis code L400.

6.130 Tisotumab Vedotin-tftv

Tisotumab Vedotin-tftv (procedure code J9273) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.131 Tocilizumab-aazg (Tyenne)

Tocilizumab-aazg (Tyenne) (procedure code Q5135) is a benefit of Texas Medicaid for clients who are 2 years of age or older, and is limited to the following diagnosis codes:

Diagnosis Codes

6.133 Toripalimab-tpzi

Toripalimab-tpzi (procedure code J3263) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.134 Trastuzumab

Procedure code J9355 is a benefit of Texas Medicaid. Reimbursement for this drug is considered when it is used as a single agent for the treatment of clients who have metastatic breast cancer whose tumors overexpress the Her-2 protein and who have received one or more chemotherapy regimens for their metastatic disease. Trastuzumab may also be reimbursed when:

- Used in combination with paclitaxel for the treatment of clients who have metastatic breast cancer whose tumors overexpress the Her-2 protein and who have not received chemotherapy for their metastatic disease.
- Used as part of a treatment regimen containing doxorubicin, cyclophosphamide, and paclitaxel for the adjuvant treatment of clients who have Her-2-overexpressing, node-positive breast cancer.

Trastuzumab is a benefit for clients whose tumors have Her-2 protein overexpression.

When billing for the test used to determine whether a client overexpresses the Her-2 protein, use procedure code 83950. Diagnosis of overexpression of the Her-2 protein must be made before Texas Medicaid will consider reimbursement for trastuzumab. This test may be reimbursed only once in a client's lifetime to the same provider. An additional test by the same provider requires documentation to support the medical necessity.

6.135 Travoprost

Travoprost (procedure code J7355) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

6.136 Tremelimumab-actl (Imjudo)

Tremelimumab-actl (Imjudo) (procedure code J9347) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.137 Treosulfan (Grafapex)

Treosulfan (Grafapex) (procedure code J0614) is a benefit of Texas Medicaid with prior authorization.

Treosulfan (Grafapex) is an alkylating drug indicated for use in combination with fludarabine as a preparative regimen for allogeneic hematopoietic stem cell transplantation (HSCT) in adult and pediatric clients who are 1 year of age or older with acute myeloid leukemia (AML) or myelodysplastic syndrome (MDS).

6.137.1 Prior Authorization Requirements

Treosulfan (Grafapex) is an intravenous infusion, given on three consecutive days in conjunction with fludarabine prior to hematopoietic stem cell infusion. It is indicated for clients who meet the following requirements:

- The client is 1 year of age or older.
- The client has a confirmed diagnosis of one of the following:
  - Acute myeloid leukemia (diagnosis code C9200)
  - Myelodysplastic syndrome (diagnosis code D469)
- The client is undergoing allogeneic hematopoietic stem cell transplantation.
- Fludarabine must be administered in conjunction with treosulfan (Grafapex) as a preparative regimen for allogeneic HSCT.
- The prescriber attests to counseling female clients of childbearing age regarding the use of an effective method of contraception to prevent pregnancy during treatment and up to six months after the last dose of therapy. Male clients with female partners of reproductive potential should also be counseled.

The required monitoring parameters following treosulfan (Grafapex) are:

- Monitor hematologic laboratory parameters, as treosulfan (Grafapex) can cause severe and prolonged myelosuppression.
- Monitor for signs of neurological adverse reactions (e.g., seizures).
- Monitor for extravasation and tissue necrosis.
- Monitor for infections, anemia, thrombocytopenia, and secondary malignancies.

In addition to the documentation requirements outlined in the Prior Authorization Requirements section, all services outlined in this section are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

6.138 Triamcinolone Acetonide

Procedure code J3304 is a benefit of Texas Medicaid and is restricted to the following diagnosis codes:

Diagnosis Codes							
M170	M1711	M1712	M172	M1731	M1732	M174	M175
M1909	M1919	M1929					

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

6.139 Trilaciclib (Cosela)

Trilaciclib (procedure code J1448) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.140 Ublituximab-xiiy (Briumvi)

Ublituximab-xiiy (Briumvi) (procedure code J2329) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.141 Valrubicin sterile solution for intravesical instillation (Valstar)

Procedure code J9357 valrubicin sterile solution for intravesical instillation (Valstar), is a benefit for clients with the diagnosis of bladder cancer in situ who have been treated unsuccessfully with BCG therapy and have an unacceptable morbidity or mortality risk if immediate cystectomy should be performed. Documentation of diagnosis and treatment must be submitted with the claim.

6.142 Vasopressin

Vasopressin (procedure codes J2598, J2599, and J2601) is a benefit of Texas Medicaid for clients who are 18 years of age or older.

6.143 Vitamin B12 (Cyanocobalamin) Injections

Vitamin B12 injections (procedure code J3420) are a benefit of Texas Medicaid. Vitamin B12 injections should only be considered for clients with conditions that are refractory to, or have a contraindication to, oral therapy.

6.144 Voretigene neparvovec-rzyl (Luxturna)

Voretigene neparvovec-rzyl (Luxturna) is an adeno-associated virus vector-based gene therapy indicated for the treatment of patients with confirmed biallelic RPE65 mutation-associated retinal dystrophy, who have viable retinal cells in each eye as determined by the treating physician.

Luxturna (procedure code J3398) is a benefit of Texas Medicaid for clients who are 1 year through 65 years of age with prior authorization.

Voretigene neparvovec-rzyl (Luxturna) must be prescribed and administered by a retinal surgeon at an ocular gene therapy treatment center with experience performing intraocular surgery.

6.144.1 Prior Authorization Requirements

Prior authorization is not required for the physician services associated with administration of Luxturna. Physician services include the procedural costs and the associated supplies for administration of the medication.

Prior authorization is required for voretigene neparvovec-rzyl (Luxturna) (procedure code J3398).

For situations in which voretigene neparvovec-rzyl (Luxturna) is being dispensed by a pharmacy via white bagging, the prescribing provider must provide the dispensing DME pharmacy the authorization approval number. The dispensing DME pharmacy may not request prior authorization.

The DME Pharmacy provider billing for voretigene neparvovec-rzyl (Luxturna) will be responsible for coordinating with the rendering provider to obtain the prior authorization request approval number.

The requesting provider (physician or hospital) may coordinate with the DME Pharmacy provider for the initial request for voretigene neparvovec-rzyl (Luxturna). DME Pharmacy providers may assist in providing necessary information, such as their NPI number, fax number, and business address, to the requesting provider. However, the Special Medical Prior Authorization (SMPA) form must be signed, dated, and submitted by the Medicaid-enrolled requesting provider, not the DME Pharmacy provider.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The dispensing pharmacy must submit the authorization approval number when billing for the drug. Reimbursement for dispensing of the drug by the pharmacy may not occur unless an approved prior authorization for voretigene neparvovec-rzyl (Luxturna) is in place.

Refer to: Subsection 11.5.1, "Pharmacy Delivery Method for Clinician-Administered Drugs" in this handbook for additional information on the "white bagging" delivery method.

Subsection 2.1.2, "Prior Authorization Requests" in this handbook for additional prior authorization information.

Prior authorization request for Luxturna injections will be considered when all of the following criteria are met:

- Client is 1 year of age through 65 years of age
- A documented diagnosis of a confirmed biallelic RPE65 mutation-associated retinal dystrophy (e.g., Leber's congenital amaurosis subtype 2, retinitis pigmentosa, or early onset severe retinal dystrophy)
- Genetic testing documenting biallelic mutations of the RPE65 gene
- Systemic corticosteroids equivalent to prednisone 1 mg/kg/day are administered for a total of 7 days, starting 3 days before administration of voretigene neparvovec-rzyl to each eye and followed by a tapering dose
- Client has viable retinal cells in each eye as determined by the treating physician and assessed in the previous 6 months. Verification of viable retinal cells must be documented and evident by one of the following:
- An area of retina within the posterior pole of greater than 100 μm thickness shown on optimal coherence tomography (OCT)
- Greater than or equal to 3 disc areas of retina without atrophy or pigmentary degeneration within the posterior pole
    - Remaining visual field within 30 degrees of fixation as measured by a III4e isopter or equivalent
- Prescribed and administered by retinal surgeon at an ocular gene therapy treatment center with experience performing intraocular surgery
- Patient has not previously received RPE65 gene therapy in intended eye
- Injection of the second eye must be administered at least 6 days after the first eye
- Have not had intraocular surgery within 6 months in either eye indicated for treatment

Benefit not to exceed more than 1 injection per eye per lifetime.

Authorization is valid for a period of 6 months from approval.

All services outlined in this section are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the services provided.

6.144.2 Exclusions

Luxturna is not a benefit for patients who have previously received RPE65 gene therapy and who do not have viable retinal cells in each eye as determined by the treating physician.

6.145 Zopapogene Imadenovec-drba (Papzimeos)

Zopapogene imadenovec-drba (Papzimeos) (procedure code J3404) is a benefit of Texas Medicaid for clients with prior authorization.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Zopapogene imadenovec-drba (Papzimeos) is a non-replicating adenoviral vector-based immunotherapy indicated to treat adults with recurrent respiratory papillomatosis.

6.145.1 Prior Authorization Requirements

6.145.1.1 6.142.1.1 Initial Requests

Zopapogene imadenovec-drba (Papzimeos) is a subcutaneous injection, and the initial prior authorization will be approved for 6 months for clients who meet the following requirements:

- The client is 18 years of age or older.
- The client has a confirmed diagnosis of recurrent respiratory papillomatosis (diagnosis code D141).
- The client has documented human papillomavirus (HPV) serotype 6 or 11.
- The prescriber must perform a surgical debulking of visible papilloma prior to the initiation of zopapogene imadenovec-drba (Papzimeos) treatment (Day 1) to establish minimal residual disease.
- The prescriber attests to remove visible papilloma prior to the third and fourth zopapogene imadenovec-drba (Papzimeos) administration to maintain minimal residual disease during treatment.

Authorization will be issued for no more than one treatment course (i.e., four doses).

Monitor the client for signs and symptoms of thrombotic events, including shortness of breath, chest pain, leg swelling, persistent abdominal pain, or neurological symptoms such as severe or persistent headache or blurred vision.

6.145.1.2 Documentation Requirements

In addition to the documentation requirements outlined in this section, all services are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the services provided.

7 * Separate Reimbursement of Certain Inpatient HCCADs

Inpatient high-cost clinician-administered drugs (HCCADs) are drugs or biologics that HHSC has approved to be "carved out" of the All-Patient Refined Diagnosis Related Group (APR-DRG) and can be billed on an outpatient claim.

This section allows for the use of specialty pharmacy billing for the HCCAD if it is available for the drug or bill for the HCCAD on a separate outpatient claim.

Refer to: Section 6, "Outpatient Drugs—Benefits and Limitations" in this handbook for the prior authorization criteria for the HCCADs.

The section below contains the list of HCCADs and procedure codes approved by HHSC:

HCCADs	[Revised] Procedure Codes
Abecma	Q2055
Aucatzyl	Q2058
Breyanzi	Q2054
Carvykti	Q2056
Casgevy	J3392
Elevidys	J1413
Hemgenix	J1411
Itvisma	J3405

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

HCCADs	[Revised] Procedure Codes
Kebilidi	J3590
Kymriah	Q2042
Lenmeldy	J3391
Lyfgenia	J3394
Omisirge	J3406
Rethymic	J3590
Skysona	J3387
Tecartus	Q2053
Tecelra	Q2057
Yescarta	Q2041
Zevaskyn	J3389
Zolgensma	J3399
Zynteglo	J3393

Refer to: Subsection 9.2, "HCCADs Claims Processing Requirements" in this handbook" for claims processing requirements.

8 Cell and Gene Therapy Access Model (CGT)

The CGT Access Model is a Centers for Medicare & Medicaid Services (CMS) led multi-year initiative focusing on potentially lifesaving gene therapies for sickle cell disease.

Unique to this model, clients have access to fertility preservation services that otherwise are not a covered Texas Medicaid benefit. The drug manufacturers will cover the cost of these services.

Medications

In alignment with CMS, only the following gene therapies are part of the CGT Access Model:

- Lyfgenia by bluebird bio, Inc.
- Casgevy by Vertex Pharmaceuticals, Inc.

The CGT Access Model is only for the treatment of sickle cell disease (beta-thalassemia indication is not included).

As part of the CGT Access Model, the prior authorizations for the gene therapy and related care (i.e., genetic and laboratory testing, prescription) are authorized until the end of the original authorization period regardless of whether the client transitions between fee-for-service and managed care or from amongst MCOs. Additionally, the client must have access to the same qualified treatment center that administered the medication for at least one year after receiving their gene therapy infusion.

Eligibility

Clients who are eligible to participate must meet the following conditions:

- Be actively enrolled in Texas Medicaid and have Medicaid as their primary insurance
- Meet the clinical prior authorization criteria outlined in section "6.115 Sickle Cell Disease Gene Therapy" in this handbook.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Billing

Providers submitting a claim under the CGT Access Model must:

- Be a member of the CMS Designated Registry through the Center for International Blood and Marrow Transplant Research (CIBMTR) prior to administering the gene therapy.
- Participate in the study related to this model; providers will receive study information directly from CIBMTR.
- Adhere to billing requirements outlined in section "7 * Separate Reimbursement of Certain Inpatient HCCADs" in this handbook and subsection "9.2 HCCADs Claims Processing Requirements" in this handbook for claims submission guidelines.
- Submit the invoice of the actual acquisition cost of the drug.

Resources

CGT Access Model:

- CMS: Cell and Gene Therapy Access Model
- CMS: Improved Access to Gene Therapy for Sickle Cell Disease: Maya's Care Journey
- CMS: CMS Expands Access to Lifesaving Gene Therapies Through Innovative State Agreements

For information and enrollment information related to additional client support in navigating through the client's journey, including the fertility preservation services, see:

- Lyfgenia: my bluebird support
- Casgevy: Vertex Connects

For fee-for-service, providers may contact the following:

- TMHP: Provider Enrollment
- TMHP: Prior Authorization

9 Claims Filing Information

Claims for clinician-administered drugs must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply them.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills and itemized statements are not accepted as claim supplements.

Refer to: "Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on electronic claims submissions.

"Section 6: Claims Filing" (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

9.1 JW Modifier Claims Filing Instructions

Providers must not use the JW modifier for medications manufactured in a multi-dose vial format.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Providers must choose the most appropriate vial size(s) required to prepare a dose to minimize the discarded portion of the vial payable.

Claims considered for reimbursement must not exceed the package size of the vial used for preparation of the dose. Providers must not bill for vial contents overfill.

Providers must not use the JW modifier when the actual dose of the drug or biological administered is less than the billing unit.

Example: *One billing unit for a drug is equal to 10mg of the drug in a single use vial. A 7mg dose is administered to a client while 3mg of the remaining drug is discarded. The 7mg dose is billed using one billing unit that represents 10mg on a single line item. The single line item of 1 unit would process for payment of the total 10mg of drug administered and discarded. Billing another unit on a separate line item with the JW modifier for the discarded 3mg of drug is not permitted because it would result in overpayment. Therefore, when the billing unit is equal to or greater than the total actual dose and the amount discarded, the use of the JW modifier is not permitted.*

Reimbursement for JW modifier claims is only available for drugs covered in an outpatient setting.

Inpatient and diagnostic radiopharmaceuticals claims are not eligible for reimbursement, and may not include the JW modifier.

Coverage is for "buy and bill" providers only. Specialty pharmacies billing through the medical benefit must not submit claims with a JW modifier because they are unaware of how much the provider administered or discarded.

Federally Qualified Health Center (FQHC) and Rural Healthcare Clinic RHC) are not eligible to bill with the JW modifier because these providers do not bill for the coverage of drugs or biologicals separately.

Critical Access Hospitals (CAH) are eligible to bill with the JW modifier because these providers bill for the coverage of drugs or biologicals separately.

The JW modifier is not allowed for medications prepared in an institutional setting via "batch processing or bulk productions" methods. An example of a batch processing method is when a hospital or repackaging facility produces multiple non-patient specific doses of medications in advance of anticipated use. These preparations are labeled and distributed with client specific information only when orders are received. Because these doses may be recycled for other client use, they are not eligible.

Providers may utilize automatic systems to calculate dose and discard amounts. However, providers must continue to document the exact usage/discard accurately.

Providers must enter the dose administered (used portion) line item detail of the CAD and also enter the dose discarded (unused portion) line item detail of the CAD on the same claim. The dose discarded (unused portion) line item detail must include the JW modifier to be considered for reimbursement. When billing for reimbursement of wastage on an outpatient claim, the HCPCS and Current Procedural Terminology (CPT) code should always be provided along with the revenue code.

9.2 HCCADs Claims Processing Requirements

The following special requirements apply when billing the HCCAD on a separate outpatient claim.

Providers must claim separate payment for the HCCAD on an outpatient claim. Payment for the HCCAD must not be bundled with any other service.

The claim for the HCCAD must be separate from any facility or institutional claim the hospital submits for all other hospital services delivered to the member during the same visit. The associated inpatient or outpatient charges with the same date(s) of service are billed separately and remain part of the APR-DRG.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The date of administration of the drug should be used on the HCCAD outpatient claim along with the member's name and other required information. The HCCAD claim must include:

- The NDC qualifier of N4 (paper claims only).
- The appropriate 11-digit National Drug Code (NDC) and corresponding HCPCS code for the drug.
- The number of units of the drug administered to the member that is covered by the claim.
- The NDC unit of measurement. There are five allowed values: F2, GR, ML, UN, or ME.

Drugs administered in an inpatient setting do not qualify for 340B discounts.

9.2.1 * Claims Submissions for HCCADs Covered Under Procedure Code J3590

Hospitals that have prior authorization can submit a separate outpatient claim for HCCADs when the drug is provided in an inpatient setting. In addition to the criteria listed in section 9.2, HCCADs Claims Processing Requirements, providers must submit modifier U3 on a fee-for service (FFS) outpatient claim so that TMHP can easily identify the HCCAD under (procedure code J3590) for claims, and reimburse them appropriately for the following drugs:

- Rethymic
- Kebilidi

Note: *Providers should not submit these HCCADs on the related inpatient services claim.*

Providers can refer to the current National Drug Codes fee schedule on the Online Fee Lookup (OFL) on the TMHP website at www.tmhp.com.

10 Pharmacy Benefit

The Texas Drug Code Index, or formulary (or list of available drugs), includes non-legend (over-the counter) drugs. Additionally, certain supplies and select vitamin and mineral products are also available as a pharmacy benefit. Some drugs are subject to one or both types of prior authorization, clinical and non-preferred. VDP does not reimburse claims for nutritional products (enteral or parenteral), medical supplies, or equipment other than a limited set of home health supplies.

The PDL is arranged by drug therapeutic class, and contains a subset of many, but not all, drugs that are on the Medicaid formulary. Most drugs are identified as preferred or non-preferred. Drugs listed on the PDL as preferred or not listed at all are available without prior authorization unless there is a clinical prior authorization associated with that drug. For more information about prior authorization, refer to Subsection 13, "Pharmacy Prior Authorization" in this handbook.

10.1 Drug and Product Search

The Drug and Product Searches are online tools available to health-care providers to help clients get access to medications.

Users can search by either brand or generic name of the drug or product, the 11-digit national drug code (NDC), the PDL drug class, or HCPCS description (for products).

Detailed filters allow searches as follows:

- By program:
  - Medicaid
  - CHIP
  - CSHCN Services Program

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

  - HTW Program
  - HTW Plus Program
  - KHC Program (e.g., CHIP, CSHCN, HTW, and KHC)
- By prior authorization status:
  - PDL prior authorization
  - Clinical prior authorization
- By drug types:
  - Family planning
  - Diabetic supplies
  - Injectable drugs
  - LARCs
  - Over-the-counter (OTC)
  - Drugs requiring 90% utilization before refilling (refer to section 10.4)
- By product types:
  - Flu vaccines
  - Mosquito repellents
  - COVID-19 vaccines

Refer to: The Drug Search and Product Search on the VDP website for more information.

10.1.1 Epocrates

The Texas Medicaid formulary and Preferred Drug List are available on the Epocrates drug information system. Epocrates (epocrates.com) is the publisher of mobile device software applications designed to provide information about drugs to doctors and other health care professionals.

Once registered, providers can utilize Epocrates Rx, the free drug reference, and search for brand, generic, or over-the-counter medicines. Providers can select the "Texas Medicaid" formulary option, allowing searches by drug name to find products identified as preferred or non-preferred or are subject to clinical prior authorization criteria. In addition to listing a drug's preferred status, Epocrates includes drug monographs, dosing information, and warnings.

Epocrates does not mirror the HHSC designations differentiated by dosage form. In these situations, the designation includes an explanatory message.

10.2 Drug Shortages

HHSC encourages prescribing providers to notify HHSC about potential drug shortages impacting prescribing choice and pharmacy claim processing using the Drug Shortage Notification and Expedited Formulary or Preferred Drug List Request (HHS Form 1315).

Significant drug shortages affecting multiple pharmacies and distributors can have a continuing adverse impact on people enrolled in Medicaid if not resolved promptly. The process ensures notification of alternatives to the shorted drug, the timeline of the shortage, and the drug's availability for use.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

10.3 Hepatitis C Direct-Acting Antiviral Treatment Products

The Texas Health and Human Services Commission (HHSC) launched a public health initiative called Texas Medicaid HepCure to reduce the rate of Hepatitis C virus (HCV) in Texas. No HCV medication is required to be prescribed by or in consultation with a hepatologist, gastroenterologist, or infectious disease specialist. All providers with prescriptive authority can prescribe this treatment to their clients with HCV.

HHSC allows prescribers to write prescriptions for the entire course of therapy for DAAs, and clients do not need to request additional refills throughout their treatment duration. Prescribers may choose to write a prescription for the entire treatment cycle or have the client return for further testing if warranted. This applies to all Hepatitis C DAA medications.

10.3.1 Background on Hepatitis C

Hepatitis C is a liver infection caused by HCV. It spreads through contact with blood from an infected person. For some people, hepatitis C is a short-term illness that resolves spontaneously, but it becomes a chronic infection for most people who become infected with HCV. Chronic HCV can result in serious, even life-threatening, health problems like cirrhosis and liver cancer.

People with HCV often have no symptoms and do not feel sick. When symptoms appear, they often are a sign of advanced liver disease. The number of people unknowingly living with undiagnosed HCV infection is why broad population-based HCV screening is important. Screening, testing and treatment can save and prolong life.

DAA medications use molecules that target specific nonstructural proteins of the virus which results in disruption of viral replication and infection. They are oral medications taken once per day for several weeks. With cure rates above 90%, these drugs can virtually eliminate the disease. The medications can be prescribed using simplified treatment algorithms for most clients and do not require specialized clinical oversight or management.

10.3.2 HCV Screening and Testing

The Centers for Disease Control and Prevention (CDC) recommends that all adults who are 18 years of age or older be screened for HCV at least once in a lifetime. They also recommend that people with certain risk factors, including people who inject drugs, be tested regularly. The US Preventative Services Task Force recommends screening for Hepatitis C infection in adults who are 18 through 79 years of age and gives a “B” recommendation (moderate certainty of substantial net benefit).

Screening for HCV involves measuring antibodies to HCV in a client’s serum. A reactive or positive test (detection of the antibody) is not a disease diagnosis; it only indicates that a person was previously exposed to the virus. If the antibody test is reactive, a nucleic acid test (also known as a polymerase chain reaction [PCR] test) for HCV ribonucleic acid (RNA) is needed to determine whether the client currently has active HCV infection. Often, the antibody test and the RNA test can be performed on a single blood draw, with a positive antibody test automatically reflexing to the HCV RNA test. The client can be prescribed HCV treatment if the HCV RNA test is positive. In most instances, a simplified HCV treatment algorithm can be followed.

10.3.3 Treatment Coverage

After confirmatory testing, individuals may not have previously received treatment for Hepatitis C. HHSC encourages Medicaid providers to evaluate their clients at risk for Hepatitis C or previously ineligible for HCV treatment to assess if they would benefit from treatment.

Prior authorization is required for PDL non-preferred agents.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

10.3.4 Follow-Up After Treatment

Clients who have received treatment should be tested for HCV RNA 12 weeks (or longer) after treatment completion. Undetectable or unquantifiable HCV RNA 12 weeks or longer after treatment completion is defined as a sustained virologic response (SVR) consistent with the cure of HCV infection.

10.3.5 Pregnant Clients

The CDC recommends that all pregnant clients should be screened for HCV during each pregnancy, regardless of age. This will aid providers in identifying HCV-infected pregnant clients, which can lead to treatment for the birthing client during the postpartum period. It can also help identify infants with perinatal exposure who should receive testing at a pediatric visit. There are currently no approved curative treatments available for pregnant clients or children who are 3 years of age or younger, but curative treatments are available for non-pregnant clients and for children who are 3 years of age or older.

10.3.6 Resources for Providers

HCV DAAs are safe, associated with high rates of cure, and have few side effects and contraindications. Some HCV clients may need to have their treatment managed by a specialist, such as those with hepatitis B virus or HIV co-infection, those who previously failed HCV treatment, or those with liver cancer or who have had a liver transplant. However, most cases of HCV can be treated by primary care physicians or advanced practice providers. Providers may find the following resources helpful, and can also visit the Hepatitis C Treatment page for more information on Texas Medicaid HepCure and Hepatitis C:

- CDC Resources:
  - Recommended Testing Sequence for Identifying Current HCV Infection: www.cdc.gov/hepatitis/hcv/pdfs/hcv_flow.pdf
  - Testing Recommendations for HCV infection: www.cdc.gov/hepatitis-c/hcp/diagnosis-testing/
  - Hepatitis C Questions and Answers for Health Professionals: www.cdc.gov/hepatitis-c/hcp/clinical-overview/
- Prescriber Resources: www.hcv.com/resources
- Resources from the American Association for the Study of Liver Diseases: www.hcvguidelines.org
- Texas Hepatitis C Report Card: stateofhepc.org/states/texas/

10.4 Home Health Supplies

Pharmacies enrolled with VDP can dispense a limited set of home health supplies that are commonly found in a pharmacy to clients enrolled in traditional Medicaid. These supplies are also available to clients enrolled in Medicaid managed care, provided the dispensing pharmacy is contracted by the client's health plan.

The list of supplies that can be dispensed at a pharmacy and information about the provisions of these supplies for clients enrolled in traditional Medicaid can be found on the VDP Product Search page. Users can search by product NDC or name or the HCPCS description.

Providers should contact the appropriate health plan or pharmacy benefit manager for more information about providing these supplies to clients enrolled in managed care.

10.5 Long-Acting Reversible Contraception Products

Long-acting reversible contraception (LARC) products are available to clients through either a Medicaid or HTW pharmacy or medical benefit.

The list of LARC drugs dispensed at a pharmacy can be found on the VDP Drug Search page. Users can select the "LARC" check-box for a list of all drugs.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Providers can obtain LARC products with no upfront cost by submitting a completed and signed prescription request form to certain specialty pharmacies. The specialty pharmacy will dispense the LARC product by shipping it to the practice address in care of the client and bill Medicaid or HTW for the product. Providers can only bill for product administration at the time of service. LARC products obtained by providers from specialty pharmacies must be returned if unused and unopened.

10.5.1 Product Billing

The specialty pharmacy bills Medicaid or HTW for LARC products when obtained from a specialty pharmacy. Providers will continue to bill Medicaid or HTW for insertion of the LARC product. Providers may only bill for the LARC product if it was obtained through the buy-and-bill process.

For clients enrolled in traditional Medicaid (fee-for-service (FFS)) or HTW, providers bill HHSC for the insertion of the LARC product using procedure code 58300.

For clients enrolled in Medicaid managed care, providers bill the patient's managed care organization for the insertion of the LARC product. Contact the patient's MCO for specific billing instructions.

10.5.2 Specialty Pharmacy Participation

Providers do not need to enroll with specialty pharmacies to obtain LARC products. Any provider currently enrolled with Medicaid or HTW may prescribe and obtain a LARC product and bill Medicaid or HTW for insertion of the LARC product. The participating pharmacies ship statewide.

Prescribing providers should identify whether the patient is enrolled in traditional Medicaid or managed care. For clients enrolled in managed care, the provider's office should coordinate with the managed care organization (MCO) to determine which pharmacy should receive the prescription because the MCO may be contracted with a single specialty pharmacy. The name, phone number, and national provider identifier (NPI) is provided for each specialty pharmacy is listed in the "Manufacturer Information" section.

10.5.3 Product Returns and Abandoned Units

Manufacturers offer abandoned unit return programs that allow a provider to return an abandoned LARC product. An "abandoned unit" is an unused and unopened product that was shipped by a participating specialty pharmacy with a prescription label that includes the name of the patient. In order to be returnable, the LARC product should be in its original packaging.

10.5.4 Manufacturer Information

10.5.4.1 Bayer (Kyleena, Mirena, and Skyla)

10.5.4.1.1 Specialty Pharmacy Participation

Products are available from CVS CarePlus Specialty Pharmacy or Walgreens Specialty Pharmacy, both shipping statewide.

Walgreens Specialty Pharmacy
Frisco, TX
1-800-424-9002
NPI 1851463087

CVS Caremark Specialty Pharmacy
Fort Worth, TX
817-336-7281
NPI 1366551848

10.5.4.1.2 Obtaining Products

Providers use Bayer's Specialty Pharmacy Prescription Request Form. This form is available on the VDP website at https://www.txvendordrug.com/resources/forms.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Complete the Bayer's Specialty Pharmacy Prescription Request Form as follows:

- Enter the patient and prescriber information, including the patient's pharmacy drug benefit and medical insurance information and copies of the patient's pharmacy benefit and medical insurance cards.
- Complete the prescribing information and keep a copy for future use.
- Identify the drug to be administered in the prescription section, including the appropriate diagnosis code, and sign the prescription. Advanced Practice Registered Nurses, Physician Assistants, and Nurse Practitioners should identify who their collaborative agreement is with to write prescriptions, if necessary
- Have the patient read and sign the "Patient Authorization" section of the form.
- Fax the form, including the "Patient Authorization" section, to the pharmacy.
- The pharmacy will call the patient to confirm the patient's intent to receive an intrauterine device (IUD). This is done to limit potentially abandoned IUD units. The pharmacy will not mail the IUD to the provider until confirmation from the patient is received.

10.5.4.1.3 Returning Products

Providers may return abandoned units. The box must be sealed and have been abandoned for at least 60 days (2 months) from the dispensing date but no more than 210 days (7 months) past the fill date. Only LARC products obtained through a specialty pharmacy can be returned through this program.

To return abandoned units complete the Bayer Abandoned Unit Program Return Form. This form is available on the VDP website at https://www.txvendordrug.com/resources/forms.

The Bayer Abandoned Unit Program Return Form may be submitted by mail or fax as follows:

- Fax the form to the dispensing specialty pharmacy for verification.
- Wait for an authorization number and return mailing label, and then
- Confirm the specialty pharmacy identification number matches the ID number listed on the return authorization form.
- Package the unit in one of the cardboard boxes the drug was initially shipped in or a large envelope.
- Mail the unit to the specialty pharmacy.

10.5.4.2 Organon (Nexplanon)

10.5.4.2.1 Specialty Pharmacy Participation

Nexplanon is available from CVS CarePlus Specialty Pharmacy or Accredo Specialty Pharmacy, both of which ship statewide.

CVS Caremark Specialty Pharmacy
Fort Worth, TX
817-336-7281
NPI 1366551848

Accredo Specialty Pharmacy
Irving, TX
972-929-6800
NPI 1073569034

10.5.4.2.2 Obtaining Products

Providers use Organon's Nexplanon Direct Service Request Form. Request the form from Organon Customer Support Center for Nexplanon (CSCN) at 1-844-639-4321.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Complete the CSCN Direct Service Request Form as follows:

- At the top of the first page of the form, check the "Prescription Order" box and select a specialty pharmacy.
- Complete the patient and prescriber information including the patient's pharmacy drug benefit and medical insurance information. Include copies of the patient's insurance card and prescription drug card.
- Have the patient read and sign the "Patient Authorization" section.
- Ensure the physician signs both the Dispense as Written and prescriber signature lines, and the appropriate diagnosis code is selected.
- Fax the completed form to the CSCN at 1-844-232-2618.
- The CSCN will forward the prescription to the specialty pharmacy you selected after confirming the benefits of the patient.

10.5.4.2.3 Returning Products

Providers may return an abandoned unit. The Nexplanon box must be sealed and been abandoned for at least 120 days (4 months) from date of dispense but no more than 180 days (6 months) past the fill date.

Complete the Organon Abandoned Unit Program Return Form. This form is available on the VDP website at https://www.txvendordrug.com/resources/forms.

The Organon Abandoned Unit Program Return Form may be submitted by mail or fax as follows:

- Fax the form to the specialty pharmacy for verification.
- Wait to receive the return identification number from the specialty pharmacy and return mailing label and instructions, which will be provided by C3i, Organon's third-party processor.
- Confirm the specialty pharmacy return identification number matches the ID number listed in the return mailing label provided by C3i.
- Package the unit in the box in which the Nexplanon was originally shipped or other appropriately sized shipping box or envelope.
- Mail the unit along with the Organon Abandoned Unit Program for Nexplanon Return Form to Cardinal Health 3PL. A pre-paid shipping label and address will be provided by C3i.

Only LARC products obtained through a specialty pharmacy can be returned through this program.

10.5.4.3 Cooper Surgical (Paragard)

10.5.4.3.1 Specialty Pharmacy Participation

Paragard is available from the following specialty pharmacy, which ships statewide:

Biologics by McKesson Specialty Pharmacy
Cary, NC 27513
1-888-275-8596
NPI 1487640314

10.5.4.3.2 Obtaining Products

To obtain products providers should use the Cooper Surgical Patient Authorization Form and Patient Referral Form:

- Patients should complete the Patient Authorization Form and return to the provider.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Providers should ensure the box next to "PARAGARD T 380A Qty: 1" is checked on the Teva Patient Authorization Form and Patient Referral Form.
- Forms may be returned to the Specialty Pharmacy by fax to 1-855-215-5315 for Biologics by McKesson or fax to 1-212-988-4501 for City Drugs. Upon receipt of your completed forms, Cooper Surgical will send you written confirmation by fax.

10.5.4.3.3 Returning Products

The original Paragard box must be sealed and have been abandoned at least 90 days since it was shipped.

The following will occur ninety days following shipment:

- Paragard will follow-up with your office to confirm the product was placed into the intended Medicaid client.
- If the product was not placed, the Paragard Specialist will obtain your email address to send you the return shipping label.
- Place the original unused and unopened Paragard unit and original packaging with affixed prescription label into a shipping box. You can reuse the original shipping box.
- Print the return shipping label and ship the unused and unopened Paragard unit back to Paragard as soon as possible.
- For additional questions regarding Cooper Surgical Abandoned Unit Return program contact Paragard at 1-877-727-2427.

10.5.4.3.4 Loss of Client Eligibility

If the client was eligible for Medicaid or HTW on the date of service when the LARC product was prescribed and ordered, but the client loses eligibility before the LARC product is inserted, the provider is not required to return the LARC product. If the client is no longer eligible for Medicaid or HTW, the provider may insert the LARC device, but reimbursement for all care and services provided must be resolved between the provider and the client.

If a provider accepts a client as a private pay client, the provider must advise the client she is accepted as a private pay client at the time the service is provided and is responsible for paying for all services received. In this situation, HHSC strongly encourages the provider to ensure the client signs written notification so there is no question how the client was accepted.

10.5.4.3.5 Questions

Contact the specialty pharmacy for questions related to obtaining LARC products. Further questions may be directed to the client's health plan or the TMHP provider help line for FFS Medicaid or HTW clients at 1-800-925-9126.

10.6 Mosquito Repellent Benefit

HHSC covers mosquito repellent year-round for the prevention of the Zika virus.

A list of products is available through the VDP Product Search page. Users can search by product name, the 11-digit National Drug Code (NDC), or click the "mosquito repellent" checkbox to view all products.

Clients that are eligible for the benefit include the following demographics:

- Females who are 10 through 55 years of age
- Pregnant females of any age
- Males who are 14 years of age and older

HHSC requires a prescription for all clients.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

10.7 Palivizumab (Synagis)

Palivizumab is available to physicians for administration to clients in Medicaid and the CSHCN Services Program through VDP. This enables physicians to have palivizumab shipped directly to their office from a network pharmacy, and not purchase the drug.

Physicians who obtain palivizumab through VDP may not submit claims to TMHP for the drug. The administering provider may submit a claim to TMHP for an injection administration fee and any medically necessary office-based evaluation and management service provided at time of injection.

10.7.1 Schedule

The following sections provide information about the forms used for prior authorization requests.

Refer to: The Synagis page on the VDP website for the current season's schedule.

10.7.2 Forms

Note: *Palivizumab is also available for clients enrolled in the Children with Special Health Care Needs (CSHCN) Services Program. Providers can refer to the CSHCN Services Program Provider Manual for details.*

10.7.2.1 Managed Care

Medicaid managed care and CHIP require the Texas Standard Prior Authorization Request Form for Prescription Drug Benefits (Texas Department of Insurance Form NOFR002). Prescribing providers should contact the MCO for prior authorization requirements and forms. MCOs may require additional information in addition to the MCO-specific addendum form. The MCO's form will reflect the appropriate MCO contact information and reconsideration request process.

10.7.2.2 Traditional Medicaid

The prescribing provider must send the Texas Standard Prior Authorization Request Form for Prescription Drug Benefits (TDI NOFR002), the Palivizumab (Synagis) Standard Prior Authorization Request (HHS 1321), the prescription for Synagis, and any supporting information to the Medicaid-enrolled pharmacy. Pharmacy staff will submit the form to the Texas Prior Authorization Call Center.

10.8 Vitamin and Mineral Products

HHSC-enrolled pharmacies with VDP can dispense vitamin and mineral products to clients who are 20 years of age and younger and enrolled in traditional Medicaid. These products are also available to clients enrolled in Medicaid managed care, if the dispensing pharmacy is contracted with the client's health plan.

To expedite pharmacy claim processing for vitamin and mineral products, prescribing providers are encouraged to include the diagnosis on the prescription.

The list of products that can be dispensed at a pharmacy and information about the provision of these products to clients enrolled in fee-for-service can be found on the VDP Product Search page. Users can search by product NDC or name or the HCPCS description.

For clients enrolled in Medicaid managed care or CHIP, claims are submitted to the clients' health plans. Pharmacy staff must work with the health plan's pharmacy benefit manager to determine the billing requirements, reimbursement rates, and coverage limitations for these products.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

11 Prescribing Information

The federal Patient Protection and Affordable Care Act and the Code of Federal Regulations Title 42 §455.410(b) require all physicians or other professionals who order, refer, or prescribe drugs, supplies and services for a recipient of traditional Medicaid, CHIP, CSHCN, and HTW Program to be enrolled as participating Medicaid providers.

Refer to: "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*) for more information.

11.1 Tamper-Resistant Prescription Pads

Providers are required by federal law (Public Law 110-28) to use a tamper-resistant prescription pad when writing a prescription for any drug for Medicaid clients. Pharmacies are required to ensure that all written Medicaid prescriptions submitted for payment to the VDP were written on a compliant tamper resistant pad.

The Centers for Medicare & Medicaid Services (CMS) has stated that special copy-resistant paper is not a requirement for electronic medical records (EMRs) or e-prescribing-generated prescriptions and prescriptions that are faxed directly to the pharmacy. These prescriptions may be printed on plain paper and will be fully compliant if they contain at least one feature from each of the following three categories:

- Prevents unauthorized copying of completed or blank prescription forms
- Prevents erasure or modification of information written on the prescription form
- Prevents the use of counterfeit prescription forms

Two features that can be incorporated into computer-generated prescriptions printed on plain paper to prevent passing a copied prescription as an original prescription are as follows:

- Use a very small font that is readable when viewed at 5x magnification or greater and illegible when copied.
- Use a "void" pantograph accompanied by a reverse "Rx," which causes a word such as "Void" to appear when the prescription is photocopied.

Refer to: The *VDP Pharmacy Provider Procedure Manual* on the VDP website.

11.2 Prescription Refills and Expirations

Medicaid prescriptions for non-controlled substances are valid for one year from the date written and up to 11 refills if authorized by prescriber.

Medicaid prescriptions for controlled substances in Schedules III, IV, and V are valid for six months from the date written and up to five refills if authorized by prescriber provider. Controlled substance prescriptions written by advanced practice registered nurses and physicians assistants are valid for 90 days.

Medicaid prescriptions for Schedule II drugs cannot be refilled and must be dispensed within 21 days of the date on which the prescription was written.

Prescriptions for Schedule II drugs may be written as multiples of three for a total of a 90 day supply subject to federal and state law.

Refer to: The *VDP Pharmacy Provider Procedure Manual* on the VDP website.

Pharmacy Laws and Rules page of the Texas State Board of Pharmacy (TSBP) website for rules about issuance of identical sets of Schedule II prescriptions.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

11.3 Prescription Monitoring of Controlled Substances

The Substance Use–Disorder Prevention that Promotes Opioid Recovery and Treatment (SUPPORT) for Patients and Communities Act requires states to have a qualified prescription drug monitoring program. The SUPPORT Act also requires certain Medicaid providers to check beneficiaries' prescription drug history before prescribing or dispensing controlled substances.

The Texas Prescription Monitoring Program (PMP) collects and monitors prescription data for all Schedule II, III, IV and V controlled substances dispensed by a pharmacy in Texas or to a Texas resident from a pharmacy located in another state. The PMP also provides a venue for monitoring patient prescription history for practitioners and the ordering of Schedule II Texas Official Prescription Forms.

Prescribers are required to check a Medicaid member's PMP history before prescribing Schedule II, III, IV, and V controlled substances.

Pharmacies that dispense Schedule II, III, IV, and V drugs are required to report the information directly to the Texas State Board of Pharmacy's contracted vendor. Prescription data is reported by the prescriber's federal Drug Enforcement Administration (DEA) number. Prescribers and pharmacies are required by statute to have a valid, active DEA numbers in order to possess, administer, prescribe or dispense controlled substances.

Refer to: The Texas Prescription Monitoring Program page of TSBP website.

11.4 Requirements for Early Refills

A refill is considered too soon, or early, if the client has not used at least 75 percent of the previous fill of the medication.

For clients enrolled in traditional Medicaid or the CSHCN Services Program, a refill for certain controlled substances is considered too soon if the client has not used at least 90 percent of the previous fill of the medication.

Note: *Some drugs, such as attention deficit hyperactivity disorder drugs and certain seizure medications, are excluded from this change.*

To identify drugs that require 90 percent utilization, refer to the VDP Drug Search and select the "90% Utilization" filter. The returned results will include only those drugs that meet this requirement.

Refer to: The VDP Drug Search on the VDP website for more information.

Justifications for early refills include, but are not limited to, the following:

- A verifiable dosage increase
- An anticipated prolonged absence from the state

If a client requests an early refill of a drug, the pharmacy must contact VDP to request an override of the early refill restriction. Prescribing providers may be asked to verify the reason for the early refill by the dispensing pharmacy or VDP staff.

Note: *Providers who are members of Medicaid managed care plans should contact the appropriate health plan or pharmacy benefits manager for specific requirements and processes related to dispensing early refills.*

11.5 Clinician-Administered Drugs

All Texas Medicaid providers must submit a rebate-eligible NDC for professional or outpatient claims submitted to TMHP with a clinician-administered drug procedure code.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The NDC is an 11-digit number on the package or container from which the medication is administered. Providers must enter identifier N4 before the NDC code. The NDC unit and the NDC unit of measure must be entered on all professional or outpatient claims that are submitted to TMHP and Medicaid managed care plans.

Clinician-administered drugs that do not have a rebate-eligible NDC will not be reimbursed by Texas Medicaid.

Refer to: Subsection 6.3.4, "National Drug Code (NDC)" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for additional information on claim filing using NDC.

The VDP CAD Search for more information.

11.5.1 Pharmacy Delivery Method for Clinician-Administered Drugs

Providers administering clinician-administered drugs in an outpatient setting for clients enrolled in Medicaid (both traditional and managed care) can send a prescription to a pharmacy and wait for the drug to be shipped or mailed to their office. This delivery method is called "white-bagging."

Providers should use the following steps for this delivery method:

1) The treating provider identifies that the client is enrolled in Medicaid.
2) The treating provider or treating provider's agent sends a prescription to a Texas Medicaid-enrolled pharmacy and obtains any necessary prior authorizations.
3) If any prior authorization is approved, the dispensing pharmacy fills the prescription and overnight ships an individual dose of the medication, in the client's name, directly to the treating provider.
4) The treating provider administers the medication in the office setting. The provider bills for an administration fee and any medically necessary service provided at time of administration. The provider should not bill Medicaid for the drug.

The pharmacy contacts the provider each month, prior to dispensing any refills, to ensure that the client received all previously dispensed medication. Auto-refills are not allowed.

These medications cannot be used on any other client and cannot be returned to the pharmacy for credit.

Exception: *Unused long-acting reversible contraceptives may be returned in certain circumstances.*

Note: *Physicians who use this delivery method will not have to buy the clinician-administered drug, therefore, the physician is allowed to administer the drug and should only bill for the administration of the drug.*

11.6 Opioid Limitations

For many people, substance use disorder starts after initially receiving opioid prescriptions for an episode of acute pain. To encourage the appropriate use of opioids and reduce the over-prescribing of opioids, Texas Medicaid has implemented the requirements in this section.

11.6.1 Affected Clients

The requirements in this section do not apply to clients who are:

- Receiving hospice care or palliative care
- Being treated for cancer
- Residing in a long-term care facility
- Residing in a facility in which residents receive opioid substitution therapy for the treatment of opioid use disorder (OUD).

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The requirements also do not apply to other clients that HHSC elects to exempt based on an objective, confirmable physical pathology known to cause severe chronic pain that is not ameliorated by other therapies and for which opioid treatment is appropriate (e.g., sickle cell disease). If diagnoses are not available in the medical data, prescribers can request exemptions on a case-by-case basis through the pharmacy prior authorization process.

11.6.2 Morphine Milligram Equivalents

Morphine milligram equivalents (MME) per day is used to compare the potency of one opioid to another. The clinical decision for the MME per day recommendations varies depending on the person's opioid use. Additionally, the Centers for Disease Control and Prevention (CDC) recommends starting opioid treatment with an immediate-release/short-acting formulation at the lowest effective dose instead of an extended-release/long-acting formulation.

A client is considered "opioid naive" if the client has taken opioids for a duration that is less than or equal to seven days in the last 60 days. For clients who are opioid naive, providers must submit a one-time prior authorization request for:

- An opioid prescription that exceeds a ten-day supply.
- A prescription for a long-acting opioid formulation.
- A claim or combination of claims in which the total daily dose of opioids exceeds 90.

The one-time requirement for prior authorization does not apply to subsequent claims because the member will no longer be opioid naive. The duration of the prior authorization is equal to the days' supply of the claim.

For clients who are not opioid naïve, prior authorization is required for opioid prescriptions if the total daily dose of opioids exceeds 90 MME. For those patients who may require a tapering plan, providers would determine the development and management of a patient specific course of therapy to help manage withdrawal symptoms. A prescriber may request a tapering plan through the pharmacy prior authorization process on a case-by-case basis. Prior authorization approvals last for six-months.

11.6.3 Days' Supply Limit

Opioid prescriptions for the treatment of acute pain are rarely required for more than ten days. To reduce the risk of addiction and the diversion of unused opioids, opioid prescriptions for clients who are opioid naïve are limited to a maximum ten-day supply without prior authorization.

11.6.4 Fee-For-Service Three Prescription Limit

Prescriptions for opioids to treat acute pain for clients who are 21 years of age and older are exempt from the three-prescription-per-month limit for members in fee-for-service.

12 Patient Information

12.1 Medicaid Drug Benefits

Clients enrolled in traditional Medicaid are limited to three prescriptions per month with the following exceptions:

- Clients enrolled in waiver programs such as Community Living Assistance (CLASS) and Community-Based Alternatives (CBA)
- Texas Health Steps (THSteps)-eligible clients (clients who are 20 years of age and younger)
- Clients in skilled nursing facilities

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The following categories of drugs do not count against the three prescription per month limit:

- Family planning drugs and supplies
- Smoking cessation drugs
- Insulin syringes

Note: *Prescriptions for family planning drugs and limited home health supplies are not subject to the three-prescription limit.*

Though TMHP reimburses family planning agencies and physicians for family planning drugs and supplies, the following family planning drugs and supplies are also available through the VDP and are not subject to the three-prescription limit:

- Oral contraceptives
- Long-acting injectable contraceptives
- Vaginal ring
- Hormone patch
- Certain drugs used to treat sexually transmitted diseases (STDs)

12.2 Cost Avoidance Coordination of Benefits

Cost avoidance coordination of benefits for pharmacy claims ensures compliance with CMS regulations. Under federal rules, Medicaid agencies must be the payer of last resort. The cost avoidance model checks for other known insurance at point of sale, preventing Medicaid from paying a claim until the pharmacy attempts to obtain payment from the client's primary third party insurance.

12.3 Medicaid Children's Services Comprehensive Care Program

Medically-necessary drugs and supplies that are not covered by the VDP may be available to children and adolescents (birth through 20 years of age) through the Medicaid Comprehensive Care Program (CCP). Drugs and supplies not covered could include, as examples, some over-the-counter drugs, nutritional products, diapers, and disposable or expendable medical supplies.

The Prior Authorization fax number is 1-512-514-4212.

Refer to: Subsection 2.8.1.1, "Pharmacies (CCP)" in the *Children's Services Handbook* (*Vol. 2, Provider Handbooks*) for more information about pharmacy enrollment in CCP.

12.4 Pharmacy Lock-In

Clients enrolled in traditional Medicaid can be "locked-in" to a specific primary care pharmacy. Those clients will have "Lock-in" identified on the face of their Your Texas Benefits Medicaid card. Clients who are not "locked-in" to a specific pharmacy may obtain their drugs or supplies from any enrolled Medicaid pharmacy.

Refer to: Subsection 4.3.2, "Client Lock-in Program" in "Section 4: Client Eligibility" (*Vol. 1, General Information*) for more information about lock-in limitations.

Family planning services are excluded from lock-in limitation.

12.5 Free Delivery of Medicaid Prescriptions

Many Medicaid pharmacies offer free delivery of prescriptions to clients enrolled in Medicaid.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

To find out which pharmacies offer delivery services:

- Refer clients enrolled in traditional Medicaid to the VDP Pharmacy Search. Click the "Delivers" indicator on the search. The returned results will include only those pharmacies that provide a delivery service. These HHSC-enrolled pharmacies have certified their delivery services meet the minimum conditions for the payment of the delivery fee. These certified delivery pharmacies are reimbursed a delivery fee that is included in the medication dispensing formula.
- Refer clients enrolled in Medicaid managed care to their respective health plan. Each health plan develops its own participating pharmacy network for the delivery service.

Deliveries are made to client's home and not institutions, such as nursing homes. Delivery service is not applicable for mail-order prescriptions and not is available for over-the-counter drugs.

Refer to: The VDP Pharmacy Search on the VDP website.

12.6 Medication Synchronization

12.6.1 Overview

Medication Synchronization establishes processes for early refills in order to align the filling or refilling of multiple medications for a client with chronic illnesses.

The Texas Insurance Code §1369(j) allows a client enrolled in Medicaid, their prescribing physician, or the dispensing pharmacist to initiate the medication synchronization request. This process allows for clients to pick up all their medication on a single day each month versus requiring clients to make multiple pharmacy visits to obtain different prescription medications with different refill dates.

12.6.2 Eligible Medications

A drug is eligible for medication synchronization if it meets the following conditions:

- It is listed on the Medicaid, CHIP, KHC or CSHCN formulary.
- It is used for treatment and management of chronic illnesses.
- It is a formulation or dosage form that can be effectively dispensed in a medication synchronization protocol.
- It must meet all prior authorization criteria applicable to the medication on the date the synchronization request is made. This includes clinical prior authorizations, non-preferred prior authorizations, and drug utilization review edits.
- The original prescription must have refills.

Exception: *The prescription could be new but the drug is categorized with the same Generic Code Number (GCN) class, and if the pharmacy uses the override code, the claim will pay. Having available refills is not required.*

A claim cannot be synchronized if it is a Schedule II controlled substance or a Schedule III controlled substance containing hydrocodone.

12.6.3 Chronic Illness

Medications eligible for synchronization must be used to treat chronic illnesses. A chronic illness is defined as an illness or physical condition that is:

- Reasonably expected to continue for an uninterrupted period of at least three months, and
- Controlled, but not cured by medical treatment. This includes drugs used to treat mental health conditions and substance use.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

12.6.4 Traditional Medicaid Claims Processing

A synchronized claim will count as one of the three prescriptions Medicaid will pay if a client is limited.

12.6.5 Medicaid Managed Care and CHIP Claims Processing

Each health plan has an HHSC-approved process for medication synchronization for clients eligible for Medicaid or CHIP. In CHIP, cost sharing or co-payment amounts will be prorated. Dispensing fees will not be prorated.

Pharmacy staff should contact the client's health plan for medication synchronization requirements using the contact information on the MCO Search page.

Refer to: The VDP MCO Search on the VDP website.

13 Pharmacy Prior Authorization

Some Medicaid drugs are subject to one or both types of prior authorization, clinical and non-preferred.

13.1 Clinical Prior Authorization

Clinical prior authorizations utilize evidence-based clinical criteria and nationally recognized peer-reviewed information. These prior authorizations may apply to an individual drug or a drug class on the formulary, including some preferred and non-preferred drugs. There are specific clinical prior authorizations that all health plans are required to perform. Usage of all other clinical prior authorizations will vary between health plans and at the discretion of each health plan.

Some clinical prior authorizations require prescribing providers to submit forms for clients enrolled in traditional Medicaid. Refer to each form's instruction page linked below for submission requirements and instructions. Prescribing providers must submit each form below with the Texas Standard Prior Authorization Request Form for Prescription Drug Benefits (TDI Form NOFR002). and submit by fax to the Texas Prior Authorization Call Center at 866-469-8590.

Health plans may require prior authorization for these drugs. Providers should contact the appropriate health plan for specific requirements and forms.

Drug Name	Number
Cystic Fibrosis Treatment Agents (Kalydeco, Orkambi, and Symdeko)	HHS Form 1338
Increlex	HHS Form 1357
Phosphate Binders	HHS Form 1348
Synagis Refer to: Subsection 10.7, "Palivizumab (Synagis)" in this section for information about Synagis prior authorizations.	HHS Form 1321
Xyrem	HHS Form 1356

Refer to: The Clinical Prior Authorization Assistance Chart is available on the VDP website https://www.txvendordrug.com/sites/default/files/docs/cpa-assistance-chart.pdf. It identifies each health plans prior authorization and how those authorizations relate to the authorizations used for traditional Medicaid claim processing. The chart is updated quarterly.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

13.2 Non-preferred Prior Authorization

The PDL is arranged by drug therapeutic class and contains a subset of many, but not all, drugs that are on the Medicaid formulary. Drugs are identified as preferred or non-preferred on the PDL. Drugs listed on the PDL as preferred, or those not listed at all, are available without PDL prior authorization. Drugs identified as non-preferred on the PDL require a PDL prior authorization.

Refer to: Medicaid health plans are required to adhere to the Texas Medicaid Preferred Drug List.

Note: *CHIP does not have a PDL.*

Refer to: The PDL Prior Authorization Criteria Guide that explains the criteria that are used to evaluate the PDL prior authorization requests.

13.3 Obtaining Prior Authorization

Prior authorization for clients enrolled in traditional Medicaid is requested through the Texas Prior Authorization Call Center.

The Texas Prior Authorization Call Center accepts prior authorization requests by phone at 1-877-PA-TEXAS (1-877-728-3927) (Monday through Friday, between 7:00 a.m. to 7:00 p.m., Central time) or online through the VDP Provider Portal. Online submissions are only available for non-preferred prior authorization requests. The prescriber can submit both clinical and non-preferred prior authorization requests online.

Refer to: The VDP Provider Portal Registration User Manual and the VDP Provider Portal User Manual.

The VDP Prescriber Prior Authorization Manual.

Note: *Pharmacists cannot obtain prior authorization for medications. If the client arrives at the pharmacy without prior authorization for a non-preferred drug and/or a drug requiring clinical prior authorization, the pharmacist will alert the provider's office and ask the provider to get prior authorization.*

13.4 Prior Authorization Reconsideration

The prescribing provider may request reconsideration if the prior authorization request is denied.

13.4.1 Managed Care

Prescribing providers should refer to the VDP MCO Search to find each MCO's prior authorization call center to learn about their reconsideration or appeal processes.

13.4.2 Fee-for-service Medicaid

The Texas Prior Authorization Call Center will notify prescribing providers of their right to request a reconsideration of the decision rendered. Providers should complete the Medicaid Fee-for-Service Prior Authorization Reconsideration Request (HHS Form 1322) and submit it to the Texas Prior Authorization Call Center. Refer to the form's instruction page for requirements and submission instructions. Providers may also include supporting documentation with their form submission, including:

- Medication documentation, such as the patient's medical records or lab results supporting the medical reason for the treatment
- Peer-reviewed literature supporting the safety, efficacy, and rationale for using the medication outside the current Medicaid criteria, if applicable

The Texas Prior Authorization Call Center will mail a copy of the reconsideration determinations to the requesting provider and client. The client's letter will include the HHSC prior authorization appeal process if the reconsideration request is denied.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

13.5 72-Hour Emergency Supply

Federal and Texas law allows for a 72-hour emergency supply of a prescribed drug to be provided when a medication is needed without delay and prior authorization is not available. This rule applies to non-preferred drugs on the PDL and any drug that is affected by a clinical prior authorization.

Drugs not on the PDL may also be subject to clinical prior authorization.

14 Retrospective Drug Utilization Reviews

Retrospective DUR provides for the ongoing periodic examination of claims data and other records to identify patterns of fraud, abuse, gross overuse, or inappropriate or medically unnecessary care among prescribing providers, pharmacists, and people associated with specific drugs or groups of drugs.

The retrospective review also allows for active and ongoing educational outreach in the form of letters or face-to-face discussions to educate prescribing providers on common drug therapy problems with the aim of improving prescribing or dispensing practices.

The Texas Drug Utilization Review Board reviews and recommends interventions for traditional Medicaid claims. A fixed-number of interventions are performed each calendar year. MCOs are required to create and perform interventions and education of their population.

1 General Information

This handbook contains information about Texas Medicaid fee-for-service benefits. For information about managed care benefits, refer to the Medicaid Managed Care Handbook.

Managed care carve-out services are administered as fee-for-service benefits. A list of all carve-out services is available in Section 8, "Carve-Out Services" in the Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks).

The information in this handbook is intended for therapy services for clients of all ages. Therapy services include occupational therapy (OT), physical therapy (PT), and speech therapy (ST). The handbook provides information about Texas Medicaid's benefits, policies, and procedures applicable to these therapies.

Important: *All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

Refer to: "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*) for more information about enrollment procedures.

All providers are required to report suspected child abuse and neglect, as outlined in subsection 1.7, "Provider Responsibilities" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*).

2 Enrollment

Refer to: Subsection 1.7.18, "Physical, Occupational, and Speech Therapy Providers" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*) for enrollment information.

3 Managed Care Organization (MCO) Clients Who Transition to Medicaid Fee-For-Service (FFS)

When client's transition from an MCO to FFS, providers can request previously approved authorizations be transferred from the MCO to FFS for Comprehensive Care Program (CCP) services, OT, PT, and ST.

3.1 Submission Guidelines

The following submission time frames apply for providers that request to transfer previously approved MCO authorizations for PT, OT, and ST services:

- TMHP will consider the reimbursement of claims for services that were rendered on or after the MCO's disenrollment date only when the provider submits a request to TMHP to transfer the previously approved authorization for PT, OT, and ST services.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The request to TMHP must be received on or before the end date of the previously approved MCO authorization. Any requests submitted after the MCO's authorization end date will have to meet the regular submission guidelines for the specific service type.

3.2 Documentation Requirements

All of the requests to transfer the authorizations from the MCO to FFS must include:

- A copy of the previously approved authorization letter.
- All of the documentation that was sent in the original authorization request, including any orders by the prescribing provider that were used to determine the start of care. TMHP will accept the prescribing provider orders as the required documentation for the requested services.
- The completed CCP prior authorization form, Special Medical Prior Authorization (SMPA) form, Home Health Plan of Care, or Texas Medicaid Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization Form whichever is applicable for the requested service. The form must include the dates of service and quantities that are being requested from TMHP, and they must match the dates of service and quantities that were approved in the original MCO authorization. It is not necessary to obtain signatures or dates on the forms if they are submitted to TMHP for the purpose of transferring an authorization from an MCO to FFS Medicaid.

  Note: *Authorizations for services transferred from an MCO to FFS Medicaid are subject to retrospective review.*

TMHP will verify the client's eligibility, the dates of service, and the quantities requested. TMHP will process reimbursement claims as follows:

- Claims for services that were rendered before the date on which the transfer request was received will be denied as a late submission, and the provider will be notified of their administrative appeal rights through the Health and Human Services Commission (HHSC).
- Claims for services that were rendered on or after the date of receipt use the required information from the transferred authorization and will be processed as if the request was received in a timely manner.

If a request to transfer an MCO authorization is submitted after the end date of the MCO authorization or the provider does not have an authorization letter from the MCO, TMHP will process the request to transfer the authorization based on established TMHP authorization submission guidelines for PT, OT, and ST services.

All new requests for rendered services must meet the documentation requirements.

3.3 New Services and Extension of Services

For new services that occur after the client's MCO disenrollment change date, the provider is responsible for submitting all TMHP required paperwork and meeting all established submission guidelines for prior authorization.

Requests for the extension of services that occur after the MCO disenrollment change date must include all of the paperwork that is required by TMHP and meet all established submission guidelines for prior authorization.

3.4 Loss of Eligibility

If an MCO disenrolled a client and the client also loses Medicaid eligibility, providers must anticipate, if and when Medicaid eligibility is restored, that the client will initially be considered a Medicaid FFS client and will have a retroactive eligibility period.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

All requests for services that require prior authorization and that occur during the client's retroactive eligibility period, must be submitted to TMHP following the process that is outlined in subsection 5.1.1, "Prior Authorization Requests for Clients with Retroactive Eligibility" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*).

If a client is retroactively disenrolled by an MCO, all of the services that are rendered by the provider during this retroactive disenrollment period (specifically from the date on which the client was eligible for FFS to the date of the client's MCO eligibility change) will be denied by TMHP, and the provider will be notified of their administrative appeal rights.

TMHP may consider services for the MCO transition beginning on the date of the client's MCO eligibility change date and going forward. TMHP uses the MCO transition process for the submission of paperwork and the processing of provider requests.

4 Therapy Services Overview

Physical, occupational and speech therapy services must be medically necessary to the treatment of the individual's chronic or acute need. A diagnosis alone is not sufficient documentation to support the medical necessity of therapy. To be considered medically necessary, all of the following conditions must be met:

- The services requested must be considered under the accepted standards of practice to be a specific and effective treatment for the patient's condition.
- The services requested must be of a level of complexity or the patient's condition must be such that the services required can only be effectively performed by or under the supervision of a licensed occupational therapist, physical therapist, or speech-language pathologist, and requires the skills and judgment of the licensed therapist to perform education and training.
- Functional goals refer to a series of behaviors or skills that allow the client to achieve an outcome relevant to his/her health, safety, or independence within the context of everyday environments. Functional goals must be specific to the client, objectively measurable within a specified time frame, attainable in relation to the client's prognosis or developmental delay, relevant to client and family, and based on a medical need.
- For clients who are 20 years of age and younger, the following conditions must be met:
  - The goals of the requested services to be provided are directed at improving, adapting, restoring, or maintaining functions which have been lost or impaired due to a recent illness, injury, loss of body part or congenital abnormality or as a result of developmental delay or the presence of a chronic medical condition.
  - Testing must establish a client with developmental delays meets the medical necessity criteria as defined in subsection 5.3, "Developmental Delay Criteria" in this handbook for chronic therapy services.
  - Evidence of care coordination with the prescribed pediatric extended care center (PPECC) provider, when the client receives therapy services in a PPECC setting.
- For clients who are 21 years of age and older, the following conditions must be met:
  - The goals of the requested services to be provided are directed at improving, adapting or restoring functions which have been lost or impaired due to a recent illness, injury, loss of body part and restore client's function to within normal activities of daily living (ADL).
  - There must be reasonable expectation that therapy will result in a meaningful or practical improvement in the client's ability to function within a reasonable and predictable time period.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Medical necessity criteria for therapy services provided in the home must be based on the supporting documentation of the medical need and the appropriateness of the equipment, service, or supply prescribed by the prescribing provider for the treatment of the individual.

The therapy service must be related to the client's medical condition, rather than primarily for the convenience of the client or provider.

Frequency must always be commensurate with the client's medical and skilled therapy needs, level of disability (for clients who are 20 years of age and younger), and standards of practice; it is not for the convenience of the client or the responsible caregivers.

The following apply:

- Treatment plans and plans of care developed must include not only the initial frequency (high, moderate or low) but the expected changes of frequency throughout the duration period requested based on the client's anticipated therapy treatment needs.
- An example of a tapered down frequency request initiated with a high frequency is: 3 times a week for 2 weeks, 2 times a week for 2 weeks, 1 time a week for 2 weeks, 1 time every other week).

Refer to: Subsection 4.6, "Frequency and Duration Criteria for PT, OT, and ST Services" in this handbook for the frequency prior authorization criteria.

Therapy services are limited to one evaluation, re-evaluation or treatment up to the limits outlined in this handbook for each therapy discipline per date of service.

4.1 Physical Therapy

The practice of physical therapy includes:

- Measurement or testing of the function of the musculoskeletal, or neurological, system.
- Rehabilitative treatment concerned with restoring function or preventing disability caused by illness, injury, or birth defect.
- Treatment, consultative, educational, or advisory services to reduce the incidence or severity of disability or pain to enable, train, or retrain a person to perform the independent skills and activities of daily living.

Texas Medicaid limits physical therapy to the skilled treatment of clients who have acute or acute exacerbation of chronic disorders or chronic medical condition of the musculoskeletal and neuromuscular systems. Physical therapy may be provided by a prescribing provider or physical therapist within their licensed scope of practice.

4.2 Occupational Therapy

The practice of occupational therapy includes:

- Evaluation and treatment of a person whose ability to perform the tasks of living is threatened or impaired by developmental deficits, sensory impairment, physical injury, or illness.
- Using therapeutic goal-directed activities to:
  - Evaluate, prevent, or correct physical dysfunction.
  - Maximize function in a person's life.
- Applying therapeutic goal-directed activities in treating patients on an individual basis, in groups, or through social systems, by means of direct or monitored treatment or consultation.

Texas Medicaid limits occupational therapy to the skilled treatment of clients whose ability to function in life roles is impaired. Occupational therapy may be provided by a prescribing provider or occupational therapist within their licensed scope of practice.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Occupational therapy uses purposeful activities to obtain or regain skills needed for activities of daily living (ADL) and/or functional skills needed for daily life lost through acute medical condition, acute exacerbation of a medical condition, or chronic medical condition related to injury, disease, or other medical causes. ADLs are basic self-care tasks such as feeding, bathing, dressing, toileting, grooming, and mobility.

4.3 Speech Therapy

Speech therapy is a benefit of Texas Medicaid for the treatment of chronic (for clients who are 20 years of age and younger), acute, or acute exacerbations of pathological or traumatic conditions of the head or neck, which affect speech production, speech communication and oral motor, feeding and swallowing disorders. Speech therapy may be provided by a prescribing provider or speech language pathologist within their licensed scope of practice.

Speech-language pathologists treat speech sound and motor speech disorders, stuttering, voice disorders, aphasia and other language impairments, cognitive disorders, social communication disorders and swallowing (dysphagia) deficits.

Speech therapy is designed to ameliorate, restore, or rehabilitate speech language communication and swallowing disorders that have been lost or damaged as a result of a chronic, acute or acute exacerbation of a medical condition due to a recent injury, disease or other medical conditions, or congenital anomalies or injuries.

4.3.1 Types of Communication Disorders

There are three types of communication disorders:

- Language Disorders—Impaired comprehension and/or use of spoken, written and/or other symbol systems. This disorder may involve the following components: forms of language (phonology, morphology, and syntax), content and meaning of language (pragmatics) and/or the perception/processing of language. Language disorders may involve one, all or a combination of the above components.
- Speech Production Disorders—Impairment of the articulation of speech sounds, voice and/or fluency. Speech Production Disorders may involve one, all or a combination of these components of the speech production system. An articulation disorder may manifest as an individual sound deficiency, i.e., traditional articulation disorder, incomplete or deviant use of the phonological system, i.e., phonological disorder, or poor coordination of the oral-motor mechanism for purposes of speech production, i.e., verbal and/or apraxia, dysarthria.
- Oral Motor/Swallowing/Feeding Disorders—Impairment of the muscles, structures and/or functions of the mouth (physiological or sensory-based) involved with the entire act of deglutition from placement and manipulation of food in the mouth through the oral and pharyngeal phases of the swallow. These disorders may or may not result in deficits to speech production.

4.4 Co-Treatment

Co-treatment is defined as two different therapy disciplines performing therapy on the same client at the same time by a licensed therapist as defined in this handbook for each therapy discipline, and rendered in accordance with the Executive Council of Physical Therapy and Occupational Therapy Examiners and State Board of Examiners for Speech-Language Pathology and Audiology.

Co-treatment may be a benefit when it is medically necessary for the client to receive therapy from two different therapy disciplines at the same time. The therapy performed requires the expertise of two different disciplines (i.e., licensed physical therapist, licensed occupational therapist, or licensed speech-language pathologist), to perform the therapy safely and effectively to reach the client's goals as determined by the approved plan of care, signed and dated by the client's prescribing provider.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

When performing co-treatment, a primary therapist must be designated by the two performing therapists. Only the primary performing therapist may bill for the therapy services rendered. The secondary therapist will not be reimbursed for assisting a designated primary performing therapist.

The following co-treatment documentation requirements must be maintained in the client's medical records as follows:

- Medical necessity for the individual therapy services must be justified before performing co-treatment.
- Documentation supports co-treatment goals and how co-treatment will help the therapist achieve the therapist's goals for the client, for each therapy discipline.
- An explanation of why the client requires and will receive multi-disciplinary team care, defined as at least two therapy disciplines (physical, occupational, or speech therapy) during the same therapy session.

Retrospective review may be performed to ensure documentation supports that the medical necessity of the co-treatment performed and that the billing was appropriate for the services provided by the designated primary-performing therapist.

4.5 Telehealth Services

Providers must defer to the needs of the person receiving services, allowing the mode of service delivery (synchronous audiovisual or in-person) to be accessible, person- and family-centered, and primarily driven by the person's choice and not provider convenience.

Evaluation, reevaluation, and treatment of some PT, OT, and ST services may be provided by synchronous audiovisual technology.

Telehealth services for OT, PT or ST by synchronous audiovisual technology are allowed for specific procedure codes if clinically appropriate as determined by the practitioner, per standard of care, safe, agreed to by the person receiving services or by the legally authorized representative (LAR), and in compliance with each discipline's rules.

The following procedure codes may be provided by synchronous audiovisual technology:

- Physical Therapy Evaluations- Low, Moderate, and High Complexity and re-evaluation (procedure codes 97161, 97162, 97163, 97164)
- Occupational Therapy Evaluation– Low, Moderate, and High Complexity and re-evaluation (procedure codes 97165, 97166, 97167, 97168)
- PT or OT Services (individual or group) (procedure codes 97110, 97112, 97116, 97150, 97530, 97535, 97750, 97537)
- Community reintegration (procedure code 97537) may be provided if the person receiving services is currently receiving other therapeutic procedure codes and may not be billed separately.
- Speech Evaluations and re-evaluations (procedure codes 92521, 92522, 92523, 92524, 92610, S9152)
- ST (individual or group) services (procedure codes 92507, 92508, 92526)
- The provider should obtain informed consent for treatment from the patient, patient's parent, or the patient's legal guardian prior to rendering a telehealth service. Verbal consent is permissible and should be documented in the client's medical record.
- Services delivered by synchronous audiovisual technology may require participation of a caregiver or parent to assist with the treatment.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Therapy assistants may deliver services and receive supervision by synchronous audiovisual technology within limits outlined in each discipline's rules. Providers should refer to state practice rules and national guidelines regarding supervision requirements for each discipline.
- Providers must use modifier 95 to indicate remote delivery. Providers are reminded to use the required modifiers GP, GO, and GN on all claims for physical, occupational, or speech therapy treatment

During a Declaration of State of Disaster, HHSC may issue direction to providers regarding the use of a telemedicine or telehealth service to include the use of a synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein to the extent permitted by Texas law. A Declaration of State of Disaster is when an executive order or proclamation by the governor declaring a state of disaster in accordance with Section 418.014 of the Texas Government Code.

Refer to: The *Telecommunication Services Handbook* (*Vol. 2, Provider Handbooks*) for more information about telehealth documentation requirements including requirements for informed consent.

Note: *Telehealth services must adhere to documentation, privacy and security requirements as outlined in this handbook and those in theTelecommunication Services Handbook (Vol. 2, Provider Handbooks).*

4.5.1 Group Therapy

Group therapy consists of simultaneous treatment to two or more clients who may or may not be doing the same activities. If the therapist is dividing attention among the clients, providing only brief, intermittent personal contact, or giving the same instructions to two or more clients at the same time, the treatment is recognized as group therapy. The prescribing provider or therapist involved in group therapy services must be in constant attendance, but one-on-one client contact is not required.

The following requirements must be met in order to meet the Texas Medicaid criteria for group therapy:

- Prescribing provider's prescription for group therapy.
- Performance by or under the general supervision of a qualified licensed therapist as defined by licensure requirements.
- The licensed therapist involved in group therapy services must be in constant attendance (in the same room) and active in the therapy.
- Each client participating in the group must have an individualized treatment plan for group treatment, including interventions and short-and long-term goals and measurable outcomes.

Texas Medicaid does not limit the number of clients who can participate in a group therapy session. Providers are subject to certification and licensure board standards regarding group therapy.

4.5.1.1 Group Therapy Documentation Requirements

The following documentation must be maintained in the client's medical record:

- Prescribing provider's prescription for group therapy.
- Individualized treatment plan that includes frequency and duration of the prescribed group therapy and individualized treatment goals.
- Name and signature of licensed therapist providing supervision over the group therapy session.
- Specific treatment techniques utilized during the group therapy session and how the techniques will restore function.
- Start and stop times for each session.
- Group therapy setting or location.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Number of clients in the group.

The client's medical record must be made available upon request.

4.6 Frequency and Duration Criteria for PT, OT, and ST Services

Frequency must always be commensurate with the client's medical and skilled therapy needs, level of disability and standards of practice; it is not for the convenience of the client or the responsible adult.

Exceptions to therapy limitations may be covered if the medically necessary criteria are met for the following:

- Presentation of new acute condition
- Therapist intervention is critical to the realistic rehabilitative/restorative goal, provided documentation proving medical necessity is received.

When therapy is initiated, the therapist must provide education and training of the client and responsible caregivers, by developing and instructing them in a home treatment program to promote effective carryover of the therapy program and management of safety issues.

Providers may request high, moderate, or low frequencies on the Texas Medicaid Physical, Occupational or Speech Therapy (PT, OT, ST) Prior Authorization Form by indicating 3, 2, or 1 time per week respectively. Providers may request low or maintenance level by requesting 1, 2, or 3 times per month. Additional documentation is required when requesting a frequency of 3 times a week or more.

> ***Note:*** *The reference to "maintenance" in the above statement is applicable to clients who are 20 years of age and younger.*

4.6.1 High Frequency

High frequency (3 times per week) can only be considered for a limited duration (approximately 4 weeks or less) or as otherwise requested by the prescribing provider with documentation of medical need to achieve an identified new skill or recover function lost due to surgery, illness, trauma, acute medical condition, or acute exacerbation of a medical condition, with well-defined specific, achievable goals within the intensive period requested.

Therapy provided three times a week may be considered for 2 or more of these exceptional situations:

- The client has a medical condition that is rapidly changing.
- The client has a potential for rapid progress (e.g., excellent prognosis for skill acquisition) or rapid decline or loss of functional skill (e.g., serious illness, recent surgery).
- The client's therapy plan and home program require frequent modification by the licensed therapist.

On a case-by-case basis, a high frequency requested for a short-term period (4 weeks or less) which does not meet the above criteria may be considered with all of the following documentation:

- Letter of medical need from the prescribing provider documenting the client's rehabilitation potential for achieving the goals identified,
- Therapy summary documenting all of the following:
  - Purpose of the high frequency requested (e.g., close to achieving a milestone)
  - Identification of the functional skill which will be achieved with high frequency therapy
  - Specific measurable goals related to the high frequency requested and the expected date the goal will be achieved.

A higher frequency (4 or more times per week) may be considered on a case-by-case basis with clinical documentation supporting why 3 times a week will not meet the client's medical needs.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

4.6.2 Moderate Frequency

Therapy provided two times a week may be considered when documentation shows one or more of the following:

- The client is making very good functional progress toward goals.
- The client is in a critical period to gain new skills or restore function or is at risk of regression.
- The licensed therapist needs to adjust the client's therapy plan and home program weekly or more often than weekly based on the client's progress and medical needs.
- The client has complex needs requiring ongoing education of the responsible adult.

4.6.3 Low Frequency

Therapy provided one time per week or every other week may be considered when the documentation shows one or more of the following:

- The client is making progress toward the client's goals, but the progress has slowed, or documentation shows the client is at risk of deterioration due to the client's development or medical condition.
- The licensed therapist is required to adjust the client's therapy plan and home program weekly to every other week based on the client's progress.
- Every other week therapy is supported for clients whose medical condition is stable, they are making progress, and it is anticipated the client will not regress with every other week therapy.

Note: *As the client's medical need for therapy decreases, it is expected that the therapy frequency will decrease as well.*

4.6.4 Maintenance Level/Prevent Deterioration

For clients who are 20 years of age and younger only, this frequency level (e.g., every other week, monthly, every 3 months) is used when the therapy plan changes very slowly, the home program is at a level that may be managed by the client or the responsible adult, or the therapy plan requires infrequent updates by the skilled therapist. A maintenance level or preventive level of therapy services may be considered when a client requires skilled therapy for ongoing periodic assessments and consultations and the client meets one of the following criteria:

- Progress has slowed or stopped, but documentation supports that ongoing skilled therapy is required to maintain the progress made or prevent deterioration.
- The submitted documentation shows that the client may be making limited progress toward goals or that goal attainment is extremely slow.
- Factors are identified that inhibit the client's ability to achieve established goals (e.g., the client cannot participate in therapy sessions due to behavior issues or issues with anxiety).
- Documentation shows the client and the responsible adult have a continuing need for education, a periodic adjustment of the home program, or regular modification of equipment to meet the client's needs.

4.6.5 Requesting Therapy Services

Providers may request physical, occupational, or speech therapy services frequency by week for one or more visits per week, or by month for 1, 2, or 3 visits per month.

- A week includes the day of the week on which the prior authorization period begins and continues for seven days. For example, if the prior authorization starts on a Thursday, the prior authorization week runs Thursday through Wednesday.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The number of therapy services authorized for a week or month must be contained in that prior authorization period.
- Services billed, in excess of those authorized are subject to recoupment.

Missed visits may be made up within the authorization period as long as total number of visits or units authorized does not exceed the amount authorized. Provider should document reason for visits outside of the weekly or monthly frequency in the client's medical record.

4.7 Criteria for Discontinuation of Therapy

Discontinuation of therapy may be considered in one or more of the following situations:

- Client no longer demonstrates functional impairment or has achieved goals set forth in the treatment plan or plan of care.
- Client has returned to baseline function.
- Client can continue therapy with a home treatment program and deficits no longer require a skilled therapy intervention and, for clients who are 20 years of age and younger only, maintain status.
- Client has adapted to impairment with assistive equipment or devices.
- Client is able to perform ADLs with minimal to no assistance from caregiver.
- Client has achieved maximum functional benefit from therapy in progress or will no longer benefit from additional therapy.
- Client is unable to participate in the treatment plan or plan of care due to medical, psychological, or social complications; and responsible adult has had instruction on the home treatment program and the skills of a therapist are not needed to provide or supervise the service.
- Testing shows client no longer has a developmental delay.
- Plateau in response to therapy/lack of progress towards therapy goals. Indication for therapeutic pause in treatments or, for those under age 21, transition to chronic status and maintenance therapy.
- Non-compliance due to poor attendance and with client or responsible adult, non-compliance with therapy and home treatment program.

4.8 Exclusions (Non-covered Services)

The following services are not a benefit of Texas Medicaid:

- Speech therapy provided in the home to adult clients who are 21 years of age and older
- Therapy services that are provided after the client has reached the maximum level of improvement or is now functioning within normal limits
- Massage therapy that is the sole therapy or is not part of a therapeutic plan of care to address an acute condition
- Separate reimbursement for VitalStim therapy for dysphagia. VitalStim must be a component of a comprehensive feeding treatment plan to be considered a benefit.
- Repetitive therapy services that are designed to maintain function once the maximum level of improvement has been reached, which no longer require the skills of a therapist to provide or oversee
- Therapy services related to activities for the general good and welfare of clients who are not considered medically necessary because they do not require the skills of a therapist, such as:
    - General exercises to promote overall fitness and flexibility or improve athletic performance

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

  - Activities to provide diversion or general motivation
  - Supervised exercise for weight loss
- Treatment solely for the instruction of other agency or professional personnel in the client's physical, occupational or speech therapy program
- Emotional support, adjustment to extended hospitalization and/or disability, and behavioral readjustment
- Therapy prescribed primarily as an adjunct to psychotherapy
- Treatments not supported by medically peer-reviewed literature, including but not limited to investigational treatments such as sensory integration, vestibular rehabilitation for the treatment of attention deficit hyperactivity disorder, anodyne therapy, craniosacral therapy, interactive metronome therapy, cranial electro stimulation, low-energy neuro-feedback, and the Wilbarger brushing protocol.
- Therapy not expected to result in practical functional improvements in the client's level of functioning
- Treatments that do not require the skills of a licensed therapist to perform in the absence of complicating factors (i.e., massage, general range of motion exercises, repetitive gait, activities and exercises that can be practiced by the client on their own or with a responsible adult's assistance)
- The therapy requested is for general conditioning or fitness, or for educational, recreational or work-related activities that do not require the skills of a therapist
- Equipment and supplies used during therapy visits are not reimbursed separately; they are considered part of the therapy services provided
- Therapy services provided by a licensed therapist who is the client's responsible adult (e.g., biological, adoptive, or foster parents, guardians, court-appointed managing conservators, other family members by birth or marriage)

Auxiliary personnel (aide, orderly, student, or technician) may participate in physical therapy, occupational therapy, or speech therapy sessions when they are appropriately supervised according to each therapy discipline's scope of practice and provider licensure requirements. Providers may not bill Texas Medicaid for therapy services provided solely by auxiliary personnel

Auxiliary personnel, a licensed therapy assistant, and a licensed speech-language pathology intern (Clinical Fellow) are not eligible to enroll as therapist providers in Texas Medicaid.

4.8.1 Telehealth Exclusions

Texas Medicaid does not reimburse for PT, OT, or ST delivered through synchronous telephone (audio-only) technology. Certain procedure codes are not reimbursable for any telehealth service delivery. The following procedure codes must be provided in-person:

Procedure codes									
97012	97014	97016	97018	97022	97024	97026	97028	97032	97033
97034	97035	97036	97113	97124	97140	97542	97760	97761	97763

5 Children's Therapy Services Clients birth through 20 years of age

5.1 Services, Benefits, and Limitations

This section addresses acute and chronic physical therapy (PT), occupational therapy (OT), and speech therapy (ST) services for clients who are 20 years of age or younger. This section does not address freestanding inpatient rehabilitation services.

Unless otherwise specified, "days" refers to calendar days.

PT, OT, and ST are benefits of Texas Medicaid in Comprehensive Outpatient Rehabilitation Facilities (CORFs) and Outpatient Rehabilitation Facilities (ORFs) for clients who are 20 years of age or younger.

Note: *CORF and ORF services provided at schools, homes, daycare facilities, or any other non-Medicare approved ORF or CORF facility is not a covered Comprehensive Care Program (CCP) benefit.*

Services provided to a client on school premises are only permitted when delivered before or after school hours. The only PT, OT, and ST services that can be delivered during school hours are therapy services provided by school districts as School Health and Related Services (SHARS).

Clients who are eligible for PT, OT, and ST through the public school system (SHARS), may only receive additional therapy through Medicaid if medical necessity criteria is met as outlined in this handbook.

Refer to: Subsection 2.9, "Early Childhood Intervention (ECI) Services" in the *Children's Services Handbook* (*Vol. 2, Provider Handbooks*) for the specific guidelines for therapy services that are provided through Early Childhood Intervention (ECI).

Section 2.1.2, "Enrollment" in the *Children's Services Handbook* (*Vol. 2, Provider Handbooks*) for information about therapy services provided through SHARS.

Therapy services must be performed by one of the following: a licensed physical therapist, licensed occupational therapist, licensed speech-language pathologist, a prescribing provider within their scope of practice, or one of the following under the supervision of a licensed therapist of the specific discipline:

- Licensed therapy assistant
- Licensed speech-language pathology intern (Clinical Fellow)

Note: *An advanced practice registered nurse (APRN) or a physician assistant (PA) may sign all documentation related to the provision of therapy services on behalf of the client's prescribing provider when the prescribing provider delegates this authority to the APRN or PA.*

PT, OT, and ST services are provided in one of the following places of service by setting and provider:

Place of Service	Provider Types
Office	Physician, physical/occupational therapy group, independently enrolled therapist, podiatrist, SHARS and ECI
Home	Home health agency, independently enrolled therapist, physical/occupational therapy group, ECI, SHARS
Outpatient	Physician: podiatrist, outpatient hospital/clinic, outpatient rehabilitation center (includes comprehensive outpatient rehabilitation facility [CORF]/outpatient rehabilitation facility [ORF]) PPECC: home health agency, independently enrolled therapist, physical/occupational therapy group, ECI
Other	ECI, SHARS, independently enrolled therapist, home health agency, and physical/occupational therapy group

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

In determining whether a service requires the skill of a licensed physical and occupational therapist or speech language pathologist, consideration must be given to the inherent complexity of the service, the condition of the client, the accepted standards of medical and therapy practice guidelines, with consideration of the following:

- If the service could be performed by the average nonmedical person, the absence of a competent person (such as a family member or medical assistant) to perform it does not cause it to be a skilled therapy service.
- If the nature of a service is such that it can be safely and effectively performed by the average nonmedical person without direct supervision of a licensed therapist, the services cannot be regarded as skilled therapy.

Refer to: Subsection 2.1, "CCP Overview" in the *Children's Services Handbook* (*Vol. 2, Provider Handbooks*) for additional information about CCP.

5.1.1 Acute PT, OT, and ST Services

Acute PT, OT, and ST services are benefits of Texas Medicaid for the medically necessary short term treatment of an acute medical condition or an acute exacerbation of a chronic medical condition.

Treatments are expected to significantly improve, restore or develop physical functions diminished or lost as a result of a recent trauma, illness, injury, disease, surgery, or change in medical condition, in a reasonable and generally predictable period of time (60 days), based on the prescribing provider's and therapist's assessment of the client's restorative potential.

Note: *Recent is defined as occurring within the past 90 days of the prescribing provider's evaluation of condition.*

Treatments are directed towards restoration of or compensation for lost function.

Services do not duplicate those provided concurrently by any other therapy.

Services must meet acceptable standards of medical practice and be specific and effective treatment for the client's condition.

Services are provided within the provider's scope of practice, as defined by state law.

Acute is defined as an illness or trauma with a rapid onset and short duration.

A medical condition is considered chronic when 120 days have passed from the start of therapy or the condition is no longer expected to resolve or may be slowly progressive over an indefinite period of time.

With documentation of medical need physical, occupational, and speech therapy may continue for a maximum of 120 days for an acute medical condition or an acute exacerbation of a chronic medical condition.

Once the client's condition is no longer considered acute, continued therapy for a chronic condition will only be considered for clients who are 20 years of age or younger.

5.1.2 Chronic Services

Chronic physical, occupational, and speech therapy services are benefits of Texas Medicaid for the medically necessary treatment of chronic medical conditions and developmental delay when a medical need is established for the developmental delay as indicated in this handbook. All eligible clients who are birth through 20 years of age may continue to receive all medically necessary therapy services, with documentation proving medical necessity.

The goals of the services provided are directed at maintaining, improving, adapting, or restoring functions which have been lost or impaired due to a recent illness, injury, loss of body part, congenital abnormality, degenerative disease, or developmental delay.

Services do not duplicate those provided concurrently by any other therapy.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Services must meet acceptable standards of medical practice and be specific and effective treatment for the client's condition.

Services are provided within the provider's scope of practice, as defined by state law.

Treatment for chronic medical conditions and developmental delay will only be considered for clients who are birth through 20 years of age.

5.2 Authorization Requirements for PT, OT, and ST Services

Prior authorization requests may be submitted to the TMHP Prior Authorization Department via mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

Refer to: Subsection 5.5.1.2, "Document Requirements and Retention" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*) for additional information about electronic signatures.

Providers must list all relevant procedure codes on the Texas Medicaid Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization Form when requesting prior authorization for therapy services.

Therapy services performed in the acute care inpatient setting do not require prior authorization.

Coverage periods do not coincide necessarily with calendar weeks or months, but cover a number of services to be scheduled between a start and end date that is assigned during the prior authorization period.

5.2.1 Initial Evaluation and Considerations for Prior Authorization for Treatment

Initial evaluations do not require prior authorization (procedure codes 92521, 92522, 92523, 92524, 92610, 97161, 97162, 97163, 97165, 97166, and 97167); however, documentation kept in the client's record must include a signed and dated prescribing provider's order for the evaluation, support a medical need for the therapy evaluation, and be available when requested.

A therapy evaluation is considered current when it is performed within 60 days before the prior authorization request is received.

To complete the prior authorization process by paper, the provider must complete and submit the prior authorization requirements documentation through fax or mail, and must maintain a copy of the prior authorization request and all submitted documentation in the client's medical record at the therapy provider's place of business.

To complete the prior authorization process electronically, the provider must complete and submit the prior authorization requirements documentation through any approved electronic method, and must maintain a copy of the prior authorization request and all submitted documentation in the client's medical record at the therapy provider's place of business.

To avoid unnecessary denials, the prescribing provider must provide correct and complete information, including documentation of medical necessity for the service(s) requested. The prescribing provider must maintain documentation of medical necessity in the client's medical record. The requesting therapy provider may be asked for additional information to clarify or complete a request.

Therapy services, regardless of place or provider, occurring after the initial evaluation, require prior authorization. PT, OT, or ST services may be prior authorized to be provided in the following locations: home of the client, home of the caregiver or guardian, client's daycare facility or the client's school.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

5.2.1.1 Initial Evaluation for Acute and Chronic Therapy Services

For acute therapy services, i.e. acute services billed with an AT modifier, prior authorization requests may not exceed a 60 day period per each request. After two 60 day authorized periods, any continued requests for therapy services must be considered under the chronic sections of this handbook.

For chronic therapy services, prior authorization may be granted for up to 180 days with documentation of medical necessity and additional prior authorizations.

Initial prior authorization (PA) requests must be received no later than five business days from the date therapy treatments are initiated. Requests received after the five-business-day period will be denied for dates of service that occurred before the date that the PA request was received.

All of the following documentation is required when submitting an initial request for therapy services initiated after the completion of the evaluation for acute or chronic services:

- A completed Texas Medicaid Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization Form signed and dated by both the therapist and by the prescribing provider is required. When the request form is unsigned by the prescribing provider, it must be accompanied by a signed and dated written order or prescription or a documented verbal order delineating the prescribed therapy services.
- The prescribing provider must certify that the Texas Health Steps (THSteps) checkup is current or that a developmental screening has been performed within the last 60 days. Signature of prescribing provider on PA form will attest that this service has been provided. If prescribing provider provides verbal order or written order separate from PA form, staff member who conveys the verbal or written order must communicate that prescribing provider attests that THSteps checkup is current or that a developmental screening has been performed within the last 60 days.
- For acute services: Documentation from the prescribing provider that a visit for the acute or acute exacerbation of the medical condition requiring therapy has occurred within the last 90 days.
- Evaluation and Treatment Plan or Plan of Care (POC) with all of the following required elements:
  - Client's medical history and background
  - All medical diagnoses related to the client's condition
  - Date of onset of the client's condition requiring therapy or exacerbation date as applicable
  - Date of evaluation
  - Time in and time out
  - Baseline objective measurements based on standardized testing performed or other standard assessment tools

Refer to: Subsection 5.3, "Developmental Delay Criteria" in this handbook for information about chronic services.

  - Safety risks
  - Client-specific, measurable short and long-term functional goals within the length of time the service is requested
  - Interpretation of the results of the evaluation, including recommendations for therapy amount, frequency per week and duration of services
  - Therapy treatment plan/POC to include specific modalities and treatments planned
  - Documentation of client's primary language
  - Documentation of client's age and date of birth
  - Adaptive equipment or assistive devices, as applicable

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Prognosis for improvement
- Requested dates of service for planned treatments after the completion of the evaluation
- Responsible adult's expected involvement in client's treatment
- History of prior therapy and referrals as applicable
- Signature and date of treating therapist

5.2.2 Additional Evaluation and Documentation Requirements for Speech Therapy

Additional evaluation and documentation requirements for speech therapy include one or more of the following:

- Language evaluations—Oral-peripheral speech mechanism examination and formal or informal assessment of hearing, articulation, voice and fluency skills;
- Speech production (voice)—Formal screening of language skills, and formal or informal assessment of hearing, voice and fluency skills;
- Speech production (fluency and articulation)—Formal screening of language skills, formal or informal assessment of hearing, voice and fluency skills;
- Oral Motor/Swallowing/Feeding—In addition to formal screening of language skills, formal or informal assessment of hearing, voice, and fluency skills, if swallowing problems and/or signs of aspiration are noted, then a statement indicating that a referral has been made to the client's prescribing provider to consider a video fluoroscopic swallow study must be included.

5.2.2.1 Bilingual Testing Requirements

Bilingual and multilingual speakers are frequently misclassified as developmentally delayed. Equivalent proficiency in both languages should not be expected.

Criterion-referenced assessment tools can be used to identify and evaluate a client's strengths and weaknesses, as opposed to norm-referenced testing, which assesses an individual relative to a group.

When possible, use culturally and linguistically adapted test equivalents in both languages to compare potential deficits and include in the documentation. The therapist will show the highest score of the two languages to determine whether the child qualifies and which language will be used for the child's therapy. Testing for all subsequent re-evaluations should only be conducted in the language used in therapy.

5.2.3 Written and Verbal Orders

For new authorizations and recertifications of therapies, if the submitted request form is not signed and dated by the prescribing provider, the request must be accompanied by a verbal or written order.

The request form or written or verbal order must be signed and dated within the 60-day period before the initiation of services. A prescribing provider's order to evaluate and treat is acceptable for the evaluation or re-evaluation, but is not acceptable for the therapy treatment. The therapy treatment order must contain the prescribing provider's ordered frequency, duration, and affirmation that the client's THSteps checkup is current or that a developmental screening has been performed within the last 60 days.

The documentation for a verbal order must meet the following criteria:

- It must be signed and dated by the licensed professional who by state and federal law may take a verbal order.
- It must have the name and credentials of the licensed professional who took the order and who is responsible for furnishing or supervising the ordered services.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The verbal order must include the date on which the verbal order was taken.
- The verbal order must include the services, frequency, and duration that was prescribed by the ordering provider.

5.2.4 Requests for Recertification—Acute Therapy Services

A recertification for prior authorization of acute therapy services may be considered up to a maximum of 60 day increments, when services continue to meet authorization criteria. Re-evaluation codes (procedure codes 97164, 97168, and S9152) require authorization for acute therapy services and must be submitted with the recertification request. Therapy for clients who are birth through 20 years of age who do not meet the acute therapy services criteria may be considered for chronic therapy services.

Recertification for an acute or acute exacerbation of medical conditions includes a progress summary and a Texas Medicaid Physical, Occupational or Speech Therapy (PT, OT, ST) Prior Authorization Form.

A complete recertification request must be received no earlier than 30 days before the current authorization period expires. Requests for recertification services received after the current authorization expires will be denied for dates of service that occurred before the date the submitted request was received.

Prior authorization for recertification requests may be considered for increments up to 60 days for each therapy service request, with documentation supporting the medical necessity including all of the following:

- Texas Medicaid Physical, Occupational or Speech Therapy (PT, OT, ST) Prior Authorization Form or electronic equivalent signed and dated by the therapist and signed and dated by the prescribing provider. When the request form is unsigned by the prescribing provider, it must be accompanied by a written order or prescription or a verbal order for the prescribed therapy services.
- A progress summary (see progress summary documentation requirements), and
- A revised treatment plan or plan of care for the recertification dates of service requested, including all of the following:
    - Date therapy services started
    - Changes in the treatment plan, the rationale and the requested change in frequency of visits for changing the plan
    - Documentation of reasons continued therapy services are medically needed
    - Documentation of client's participation in treatment, as well as client or responsible adult's participation or adherence with a home treatment program
    - New treatment plan or plan of care for the recertification dates of service requested
    - Updated or new functional and measurable short and long-term treatment goals with new time frames, as applicable
    - Adaptive equipment or assistive devices, as applicable
    - Prognosis with clearly established discharge criteria
- Documentation of consults with other professionals and services or referrals made and coordination of service when applicable (e.g., for school aged clients, documentation of the coordination of care and referrals made for school therapies).
- The updated treatment plan or POC must be signed and dated by the therapist responsible for the therapy services.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

A progress summary, which may be contained in the last treatment note, must be included with the recertification request and contains all of the following:

- Date therapy started
- Date the summary completed
- Time period (dates of service) covered by the summary
- Client's medical and treatment diagnoses
- A summary of client's response to therapy and current treatment plan, to include:
  - Documentation of any issues limiting the client's progress
  - Documentation of objective measures of functional progress related to each treatment goal established on the initial evaluation
  - An assessment of the client's therapy prognosis and overall functional progress
  - Documentation of client's participation in treatment as well as client or responsible adult's participation or adherence with a home treatment program
  - Updated or new functional and measurable short and long-term treatment goals with time frames, as applicable
  - Documentation of client's continued need for therapy
  - Clearly established discharge criteria
  - Documentation of consults with other professionals and services or coordination of service when applicable.
- The progress summary must be signed and dated by the therapist responsible for the therapy services.

5.2.5 Requests for Recertification - Chronic Therapy Services

5.2.5.1 Re-evaluation (every 180 days)

A re-evaluation is a comprehensive evaluation and must take place every 180 days and contains all the elements of an initial evaluation, including affirmation that the client's THSteps checkup is current or that a developmental screening was performed by the prescribing provider within the last 60 days. It may be used to make a determination whether or not skilled therapy is medically necessary, or when determining the effectiveness of the current plan, or when the current plan requires significant modification and revision of the interventions and goals due to changes in the client's medical status or lack of progress with the current treatment. A re-evaluation requires authorization and must be submitted with the recertification request (procedure codes 97164, 97168, and S9152).

Routine reassessments that occur during each treatment session or visit or for a progress report required for an extension of services or discharge summary are not considered a comprehensive re-evaluation.

Tests used must be norm-referenced, standardized, and specific to the therapy provided.

Refer to: Subsection 5.3, "Developmental Delay Criteria" in this handbook for information about documentation about developmental delay criteria.

A recertification request may be considered when services will be medically needed after the previously approved authorization period ends.

A complete request must be received no earlier than 30 days before the current authorization period expires.

Requests for recertification services received after the current authorization expires will be denied for dates of service that occurred before the date the request is received.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

A re-evaluation may occur as early as 60 days prior to the end of the current authorization period.

A therapy re-evaluation is considered current when it is performed within 60 days before the current authorization period expires.

The re-evaluation must occur within 30 days of the signed and dated order from the referring provider.

Prior authorization for recertification requests may be considered for increments up to 180 days for each request with documentation supporting the medical necessity including all of the following:

- Texas Medicaid Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization Form or electronic equivalent signed and dated by the therapist and by the prescribing provider. When the request form is unsigned by the prescribing provider, it must be accompanied by a written order or prescription or a verbal order for the prescribed therapy services.
- A re-evaluation must include a revised treatment plan or plan of care including all of the following:
  - Documentation that the THSteps checkup is current or that a developmental screening was performed by the prescribing provider within the last 60 days

    Note: *Additional documentation is not necessary if the prescribing provider signs the Texas Medicaid Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization Form.*
  - Date therapy services started
  - Changes in the treatment plan, the rationale, and the requested change in frequency of visits
  - Documentation of reasons continued therapy services are medically needed
  - Documentation of developmental delay

Refer to: Subsection 5.3, "Developmental Delay Criteria" in this handbook for information about documentation about developmental delay criteria.

  - Documentation of client's participation in treatment, as well as client or responsible adult's participation or adherence with a home treatment program
  - New treatment plan or POC for the recertification dates of service requested
  - Updated or new functional and measurable short and long-term treatment goals with new time frames, as applicable. Previous authorization period's goals and progress must be included.
  - Prognosis with clearly established discharge criteria. The discharge plan must reflect realistic expectations from the episode of therapy.
  - Documentation of consults with other professionals and services or referrals made and coordination of service when applicable (e.g., for school aged clients, documentation of the coordination of care and referrals made for school therapies)
  - The updated treatment plan or POC must be signed and dated by the therapist responsible for the therapy services.

5.2.6 Requests for Revisions to Existing Prior Authorizations or Recertification for Acute and Chronic Therapy Services

A revision to an existing authorization/recertification must be documented in the client's record when significant changes occur in the frequency or treatment plan. When frequency is increased, or services requiring separate authorization are added, a request for revision must be submitted for prior authorization.

Requests for revisions must be received no later than five business days from the date the revised therapy treatments are initiated. Requests for revisions received after the five business day period will be denied for dates of service that occurred before the date the request was received.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

A prior authorization request for revisions to services may be considered up to the end of the current approved prior authorization.

Requests for revision must be submitted with the following documentation:

- Texas Medicaid Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization Form, including the date the revision was initiated, signed and dated by the therapist and signed and dated by the prescribing provider. When the request form is not signed and dated by the prescribing provider, it must be accompanied by a written order or prescription or a verbal order for the prescribed services.
- Progress summary for acute services indicating the medical rationale for the change requested, and
- Updated treatment plan or POC addressing all the elements of the previous plan and addressing all revisions to the services planned, including updated or new functional and measurable short and long-term treatment goals with new time frames, as applicable. Previous authorization period's goals and progress must be included.
- The updated treatment plan or POC must be signed and dated by the therapist responsible for the therapy services.

5.2.7 Change of Therapy Provider

If a provider or client discontinues therapy during an existing prior authorized period and the client requests services through a new provider outside the current group or agency, they must start a new request for authorization and submit all documentation required for an initial evaluation, and also the following:

- A change-of-therapy provider letter, signed by the client or responsible adult
- The letter must document the date that the client ended therapy (effective date of change) with the previous provider, or last date of service
- The name of the new provider and previous provider

When a provider or client discontinues therapy during an existing prior authorization period and the client requests services through a new provider located within the same enrolled group of providers or within a group of independently enrolled providers collaboratively working together, the new provider can use the same evaluation and plan of care.

The authorization period will not change when the provider changes.

5.2.8 Treatment Note

The following documentation must be kept on file by the treating provider and be available when requested:

- Client's name
- Date of service
- Time in and out of each therapy session
- Objectives addressed (should coincide with plan of care) and progress noted, if applicable
- A description of specific therapy services provided and the activities rendered during each therapy session, along with a form of measurement.
- Assessments of client's progress or lack of progress
- Treatment notes must be legible
- Therapy providers must sign each date of entry with full signature and credentials

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

All documentation for evaluations, re-evaluations, progress summaries, treatment notes, and discharge summaries must show client's name, date of service, time in and time out of each therapy session.

Note: *Documentation requirements for a telehealth service are the same as what is required for an in-person visit and must accurately reflect the services rendered. Additionally, documentation must identify the means of delivery when provided by telehealth.*

Refer to: The *Telecommunication Services Handbook* (*Vol. 2, Provider Handbooks*) for more information about telehealth services documentation requirements.

5.3 Developmental Delay Criteria

To establish a developmental delay, all of the following criteria must be met:

- Tests used must be norm-referenced, standardized, and specific to the therapy provided.
- Retesting with norm-referenced standardized test tools for re-evaluations must occur every 180 days. Tests must be age appropriate for the child being tested and providers must use the same testing instrument as used in the initial evaluation. If reuse of the initial testing instrument is not appropriate, i.e. due to change in client status or restricted age range of the testing tool, provider should explain the reason for the change.
- Eligibility for therapy will be based upon a score that falls 1.5 standard deviations (SD) or more below the mean in at least one subtest area of composite score on a norm-referenced, standardized test. Raw scores must be reported along with score reflecting SD from mean.
- When the client's test score is less than 1.5 SD below the mean, a criterion-referenced test along with informed evidenced-based clinical opinion must be included to support the medical necessity of services and will be sent to physician review to determine medical necessity.
- If a child cannot complete norm-referenced standardized assessments, then a functional description of the child's abilities and deficits must be included. Measurable functional short and long term goals will be considered along with test results. Documentation of the reason a standardized test could not be used must be included in the evaluation.

Specific developmental delay criteria requirements for speech diagnoses are as follows:

- Language—at least one norm-referenced, standardized test with good reliability and validity, a score that falls 1.5 SD or more below the mean, and clinical documentation of an informal assessment that supports the delay
- Articulation—at least one norm-referenced, standardized test with good reliability and validity, a score that falls 1.5 SD or more below the mean, and clinical documentation of an informal assessment that supports the delay
- Apraxia—at least one norm-referenced, standardized test with good reliability and validity, a score that falls 1.5 SD or more below the mean, and clinical documentation of an informal assessment that supports the delay
- Fluency—at least one norm-referenced, standardized test with good reliability, a score that falls 1.5 SD or more below the mean, and clinical documentation of an informal assessment that supports the delay
- Voice—a medical evaluation is required for eligibility and based on medical referral
- Oral Motor/Swallowing/Feeding—an in-depth, functional profile of oral motor structures and function

If the client's test score is less than 1.5 SD below the mean, additional documentation supporting the client's medical need for therapy will be considered and the request will be sent to physician review to determine medical necessity.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Additional speech therapy visits or sessions may be considered for moderate speech language, articulation, voice and dysphagia developmental delays when documentation submitted supports medical necessity as delineated in the frequency criteria in this handbook.

5.4 Age Adjustment for Children Born Prematurely

Age is adjusted for children born before 37 weeks gestation and is based on a 40-week term. The developmental age must be measured against the adjusted age rather than chronological age until the child is 24 months old. The age adjustment cannot exceed 16 weeks.

5.5 PT, OT, and ST Procedure Codes

PT, OT, and ST treatment procedure codes are either time-based and billable in units or untimed and billable per daily encounter.

5.5.1 Timed PT and OT Treatment Procedure Codes

All time-based PT and OT treatment procedure codes are cumulatively limited to one hour per date of service per discipline (4 units).

The following time-based PT and OT treatment procedure codes must be billed in 15 minute increments and are limited to a combined total of 2 units (thirty minutes) per date of service per discipline:

Procedure Codes	
97034	97035

The following time-based PT and OT treatment procedure code must be billed in 15 minute increments, is limited to a combined total of 3 units (45 minutes) per date of service per discipline, and is not payable in the home or other setting:

Procedure Codes
97036

The following time-based PT and OT treatment procedure codes must be billed in 15 minute increments and are limited to a combined total of 4 units (one hour) per date of service per discipline:

Procedure Codes									
97032	97033	97110	97112	97113	97116	97124	97140	97530	97535
97537	97542	97750	97760	97761	97763				

Note: *Procedure code 97113 is not payable to home health agencies.*

5.5.2 Untimed PT and OT Treatment Procedure Codes

The following supervised modality PT and OT treatment procedure codes are limited to once per date of service per procedure code and must be delivered on the same date of service as one or more time-based PT and OT procedure codes and are subject to CMS NCCI relationships:

Procedure Codes							
97012	97014	97016	97018	97022	97024	97026	97028

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The following PT and OT group therapy treatment procedure code is limited to once per date of service:

Procedure Codes
97150

Separate prior authorization is required for medically necessary therapeutic procedures not addressed by procedure codes outlined in this handbook.

The following procedure code requires supporting documentation indicating why an unlisted procedure code is required and is limited to once per date of service:

Procedure Codes
97799

If the therapy treatment services that are billed exceed one hour (four units per day), the claim will be denied, and it may be appealed. On appeal, the provider must meet the following conditions:

- The appeal must document the prior authorization period week or month for the date of service appealed.
- The appeal must include an attestation that the provider has billed all therapy services for the week or month in question.

For clients who are 20 years of age and younger, when physical or occupational group therapy is administered, providers can bill procedure code 97150 for each member of the group.

A client may receive therapy in more than one discipline (physical, occupational, or speech) in more than one setting (outpatient, office or home setting) in one day.

5.5.3 ST Treatment Procedure Codes

Individual speech treatment is limited to one encounter per date of service any provider. Only one of the following individual speech treatment procedure codes will be reimbursed per date of service:

Procedure Codes	
92507	92526

An encounter for speech therapy individual treatment is defined as face-to-face time with the patient and/or caregiver for a length of time compliant with nationally recognized professional speech-language pathology standards for a typical session.

The following group speech therapy procedure code is limited to once per date of service:

Procedure Codes
92508

5.5.4 PT, OT, and ST Evaluation and Re-evaluation Codes

Evaluation and re-evaluation procedure codes in the following table are untimed:

Procedure Codes									
92521	92522	92523	92524	92610	97161	97162	97163	97164	97165
97166	97167	97168	S9152						

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

5.5.5 PT, OT, and ST Reimbursement Guidelines

If a therapy evaluation or re-evaluation procedure code and like therapy procedure code are billed for the same date of service by any provider, the like therapy evaluation or re-evaluation will be denied.

An evaluation or re-evaluation performed on the same day as therapy from a different therapy type must be performed at distinctly separate times to be considered for reimbursement.

Therapy services provided in the nursing home setting are limited to the nursing facility because these services must be made available to nursing home residents on an "as needed" basis and must be provided directly by the staff of the facility or furnished by the facility through arrangements with outside qualified resources. Nursing home facilities should refrain from admitting clients who need goal directed therapy if the facility is unable to provide these services.

Procedure codes for PT, OT, and ST evaluations are payable once every three years to the same rendering provider.

For acute services, PT, OT, and ST re-evaluations may be reimbursed once every 60 days to any provider when a recertification of services is planned.

For chronic services, PT, OT, and ST re-evaluations are reimbursed once every 180 days to any provider when a recertification of services is planned.

Additional PT, OT, or ST evaluations or re-evaluations exceeding the limits outlined in this handbook may be considered for with documentation of one of the following:

- A significant change in the client's medical condition as documented in the plan of care or treatment plan
- A change of provider has occurred and a change of provider letter is submitted with the appeal.
- The re-evaluation is required for recertification of an existing authorization.

The following procedure codes are billable for telehealth services:

Procedure Codes									
92507	92508	92521	92522	92523	92524	92526	92610	97110	97112
97116	97150	97161	97162	97163	97164	97165	97166	97167	97168
97530	97535	97750	97537	S9152					

Therapy services may be billed when rendered in a PPECC even if the provider would typically be restricted to a home setting. Home health providers rendering therapy services in a PPECC must include the PPECC's NPI number on their institutional claim form, in addition to their own NPI. Therapy providers who bill using a professional claim form must include the PPECC name and NPI number on the claim and indicate outpatient hospital as the place of service. The therapy provider and PPECC must have a written agreement for each client related to the provision of therapy services provided at the PPECC. The written agreement must address responsibilities of both parties, and how the parties will coordinate related to the client's plan of care. The written agreement must be maintained in the client's medical record.

A modifier must be used to indicate when treatment services have been rendered by a licensed therapist/ prescribing provider or a therapy assistant under supervision of a licensed therapist. Providers must use modifier 95 for services delivered by synchronous audiovisual technology.

The following modifiers are not required for evaluation or re-evaluation codes because those services may not be rendered by therapy assistants.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Modifier	Description
UB	Services delivered by a licensed therapy assistant under supervision of a licensed therapist
U5	Services delivered by a licensed therapist or physician

5.5.6 Therapy Co-Treatment

Claims for co-treatment services must be submitted with modifier U3:

Modifier	Description
U3	Therapy Co-Treatment Modifier

Claims for telehealth must be submitted with modifier 95:

Modifier	Description
95	Services delivered by synchronous audiovisual technology

6 Adult Services

6.1 Services, Benefits, and Limitations

Unless otherwise specified, "days" refers to calendar days.

Physical therapy (PT), occupational therapy (OT), and speech therapy (ST) services are benefits of Texas Medicaid for the medically necessary short term treatment of an acute medical condition or an acute exacerbation of a chronic medical condition for clients who are 21 years of age and older.

Treatments are expected to significantly improve, restore, or develop physical functions diminished or lost as a result of a recent trauma, illness, injury, disease, surgery, or change in medical condition, in a reasonable and generally predictable period of time (60 days), based on the prescribing provider's and therapist's assessment of the client's restorative potential.

Note: *Recent is defined as occurring within the past 90 days of the prescribing provider's evaluation of condition.*

Treatments are directed towards restoration of or compensation for lost function.

Services do not duplicate those provided concurrently by any other therapy.

Services must meet acceptable standards of medical practice and be specific and effective treatment for the client's condition.

Services are provided within the provider's scope of practice, as defined by state law.

Acute is defined as an illness or trauma with a rapid onset and short duration.

Adult therapy services are limited to a maximum of 120 days per identified acute medical condition or acute exacerbation of a chronic medical condition requiring therapy or whenever the maximum benefit from therapy has been achieved, whichever comes first.

A medical condition is considered chronic when 120 days have passed from the start of therapy, or the condition is no longer expected to resolve or may be slowly progressive over an indefinite period of time.

Physical and occupational therapy services for acute conditions are benefits of Texas Medicaid for adult clients in the office, outpatient, and home settings.

Speech therapy services for acute conditions are benefits of Texas Medicaid for adult clients in the office and outpatient setting only.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Therapy services must be performed by one of the following:

- Licensed physical therapist
- Licensed occupational therapist
- Licensed speech-language pathologist
- Physician within their scope of practice

Therapy services may also be performed by one of the following under the supervision of a licensed therapist of the specific discipline:

- Licensed therapy assistant
- Licensed speech-language pathology intern (Clinical Fellow)

6.1.1 Adult Acute Therapy Place of Service

PT and OT providers render acute therapy services for adult clients who are 21 years of age and older in one of the following places of service:

Place of Service	Provider types
Office	Physician; podiatrist; independently enrolled therapist; physical/occupational therapy group
Home	Home health agency; independently enrolled physical therapist; and physical/occupational therapy group
Outpatient	Physician; podiatrist; outpatient hospital/clinic
Other	Independently enrolled therapist; home health agency; physical/occupational therapy group

ST providers render acute therapy services for adult clients who are 21 years of age and older in one of the following places of service:

Place of Service	Provider types
Office	Physician; independently enrolled speech-language pathologist
Outpatient	Physician; outpatient hospital/clinic

In determining whether a service requires the skill of a licensed therapist, consideration must be given to the inherent complexity of the service, the condition of the client, and the accepted standards of medical and therapy practice guidelines.

If the service could be performed by the average nonmedical person, the absence of a competent person to perform it does not cause it to be a skilled therapy service.

If the nature of a service is such that it can safely and effectively be performed by the average nonmedical person without direct supervision of a licensed therapist, the services cannot be regarded as skilled therapy.

6.2 Authorization Requirements for Outpatient and Home Health —PT, OT, and ST Services

Prior authorization requests may be submitted to the TMHP Prior Authorization Department via mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Refer to: Subsection 5.5.1.2, "Document Requirements and Retention" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*) for additional information about electronic signatures.

Coverage periods do not coincide necessarily with calendar weeks or months, but cover a number of services to be scheduled between a start and end date that is assigned during the prior authorization period.

6.2.1 Initial Evaluation and Considerations for Prior Authorization for Treatment

Initial evaluations do not require prior authorization (procedure codes 92521, 92522, 92523, 92524, 92610, 97161, 97162, 97163, 97165, 97166, and 97167); however, documentation kept in the client's record must include a signed and dated prescribing provider's order for the evaluation, support a medical need for the therapy evaluation and be available when requested.

To complete the prior authorization process by paper, the provider must complete and submit the prior authorization requirements documentation through fax or mail, and must maintain a copy of the prior authorization request and all submitted documentation in the client's medical record at the therapy provider's place of business.

To complete the prior authorization process electronically, the provider must complete and submit the prior authorization requirements documentation through any approved electronic method, and must maintain a copy of the prior authorization request and all submitted documentation in the client's medical record at the therapy provider's place of business.

To facilitate the determination of medical necessity and avoid unnecessary denials, the physician or allowed practitioner must provide correct and complete information, including documentation of medical necessity for the equipment, supplies, and services requested and is subject to retrospective review. The prescribing provider must maintain documentation of medical necessity in the client's medical record. The requesting therapy provider may be asked for additional information to clarify or complete a request.

Therapy services, regardless of place or provider, occurring after the initial evaluation, require prior authorization. Prior authorization requests may not exceed a 60 day period.

Prior authorization (PA) requests must be received no later than five business days from the date therapy treatments following the evaluation are initiated. Requests received after the five-business-day period will be denied for dates of service that occurred before the date that the PA request is received.

6.2.1.1 Documentation

All of the following documentation is required when submitting an initial request for therapy services initiated after the completion of the evaluation:

- A completed Texas Medicaid Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization Form signed and dated by the therapist and signed and dated by the prescribing provider is required). When the request form is unsigned by the prescribing provider, it must be accompanied by a signed and dated written order, or prescription, or a documented verbal order delineating the prescribed therapy services.
- Documentation of the acute or acute exacerbation of the medical condition requiring therapy. Evaluation and Treatment Plan or Plan of Care (POC) with all of the following required elements:
  - Client's medical history and background
  - All medical diagnoses related to the client's condition
  - Date of onset of the client's condition requiring therapy, or exacerbation date as applicable
  - Date of evaluation

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Baseline objective measurements documented based on any testing performed
- Explanation of how identified limitations impair the overall function of the client
- Safety risks
- Client-specific, measurable short and long-term functional goals within the length of service time requested
- Interpretation of the results of the evaluation, including recommendations for therapy amount, frequency per week and duration of services
- When a client also receives PPECC services, indicate if therapy services will be delivered in a PPECC setting, the amount, frequency, and duration of the therapy services to be delivered in a PPECC setting in contrast with other locations (e.g., the home)
- Therapy treatment plan/POC to include specific modalities and treatments planned
- Documentation of client's primary language
- Documentation of client's age and date of birth
- Adaptive equipment or assistive devices, as applicable
- Prognosis for improvement
- Time in and time out on evaluation
- Requested dates of service for planned treatments after the completion of the evaluation
- Responsible adult's expected involvement in client's treatment
- History of prior therapy and referrals as applicable
- Signature and date of treating therapist

Additional requirements for speech therapy include one or more of the following:

- Language evaluations—oral-peripheral speech mechanism examination and formal or informal assessment of hearing, articulation, voice and fluency skills.
- Speech production (voice)—formal screening of language skills, and formal or informal assessment of hearing, voice and fluency skills.
- Speech production (fluency)—formal screening of language skills, formal or informal assessment of hearing, voice and fluency skills.
- Oral Motor/Swallowing/Feeding—If swallowing problems and/or signs of aspiration are noted, then include a statement indicating that a referral for a video fluoroscopic swallow study has been made; formal screening of language skills, formal or informal assessment of hearing, voice and fluency skills.

6.2.2 Written and Verbal Orders

For new authorizations and recertifications of therapies, if the submitted request form is not signed and dated by the prescribing provider, the request must be accompanied by a verbal or written order.

The request form or written or verbal order must be signed and dated within the 60-day period before the initiation of services. A prescribing provider's order to evaluate and treat is acceptable for the evaluation or re-evaluation, but is not acceptable for the therapy treatment. The therapy treatment order must contain the prescribing provider's ordered frequency and duration.

The documentation for a verbal order must meet the following criteria:

- It must be signed and dated by the licensed professional who by state and federal law may take a verbal order.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- It must have the name and credentials of the licensed professional who took the order and who is responsible for furnishing or supervising the ordered services.
- The verbal order must include the date on which the verbal order was taken.
- The verbal order must include the services and the frequency and duration that was prescribed by the ordering provider.

6.2.3 Requests for Recertification-Up to an Additional 60 days for Acute Services

A recertification request may be considered when services will be medically needed after the previously approved authorization period ends.

Re-evaluation codes (procedure codes 97164, 97168, and S9152) require prior authorization and must be submitted with the recertification request. Required documentation for recertifications includes a progress summary and Texas Medicaid Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization Form.

A complete recertification request must be received no earlier than 30 days before the current authorization period expires. Requests for recertification services received after the current authorization expires will be denied for dates of service that occurred before the date the submitted request was received.

One recertification request may be considered for an additional 60 days for each therapy service request with documentation supporting the medical necessity including all of the following:

- Texas Medicaid Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization Form or electronic equivalent signed and dated by the therapist and signed and dated by the ordering provider. When the request form is unsigned by the provider, it must be accompanied by a written order or prescription or a verbal order for the prescribed therapy services.
- A progress summary (see progress summary documentation requirements), and
- An updated treatment plan or POC for the recertification dates of service requested, including all of the following:
  - Date therapy services started
  - Changes in the treatment plan, the rationale and the requested change in frequency of visits for changing the plan
  - Documentation of reasons continued therapy services are medically needed
  - Documentation of client's participation in treatment, as well as client and responsible adult's participation or adherence with a home treatment program
  - Updated or new functional and measurable short and long-term treatment goals with new time frames, as applicable
  - Adaptive equipment or assistive devices, as applicable
  - Prognosis with clearly established discharge criteria
  - Documentation of consults with other professionals and services or referrals made and coordination of service when applicable
  - The updated treatment plan or plan of care must be signed and dated by the therapist responsible for the therapy services.

A progress summary which may be contained in the last treatment note, must be included with the recertification request and contains all of the following:

- Date therapy started

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Date the summary completed
- Time period (dates of service) covered by the summary
- Client's medical and treatment diagnoses
- A summary of client's response to therapy and current treatment plan, to include:
  - Documentation of any issues limiting the client's progress
  - Documentation of objective measures of functional progress related to each treatment goal established on the initial evaluation
  - An assessment of the client's therapy prognosis and overall functional progress
  - Documentation of client's participation in treatment as well as client and responsible adult's participation or adherence with a home treatment program
  - Updated or new functional and measurable short and long-term treatment goals with time frames, as applicable
  - Documentation of client's continued need for therapy
  - Clearly established discharge criteria
  - Documentation of consults with other professionals and services or coordination of service when applicable.
- The progress summary must be signed and dated by the therapist responsible for the therapy services.

6.2.4 Requests for Revisions to Existing Prior Authorization or Recertification

A revision to an existing authorization/recertification must be documented in the client's record when significant changes occur in the frequency or treatment plan. When the frequency is increased or services requiring separate authorization are added, a request for revision must be submitted for prior authorization.

Requests for revisions must be received no later than five business days from the date the revised therapy treatments are initiated.

Requests for revisions received after the five business day period will be denied for dates of service that occurred before the date the request was received.

- A prior authorization request for revisions to services may be considered up to the end of the current approved prior authorization.
- Requests for revision must be submitted with the following documentation:
  - Texas Medicaid Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization Form, including the date the revision was initiated, signed, and dated by the therapist and signed and dated by the prescribing provider. When the request form is not signed and dated by the prescribing provider, it must be accompanied by a written order or prescription or a verbal order for the prescribed services.
  - Progress summary including the medical rationale for the change requested, and
- Updated treatment plan or POC addressing all the elements of the previous plan and addressing all revisions to the services planned, including updated or new functional and measurable short and long-term treatment goals with new time frames, as applicable. Previous authorization period's goals and progress must be included.
- The updated treatment plan or POC must be signed and dated by the therapist responsible for the therapy services.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

6.2.5 Change of Therapy Provider

If a provider or client discontinues therapy during an existing prior authorized period and the client requests services through a new provider outside the current group or agency, they must start a new request for authorization and submit all documentation required for an initial evaluation, and also all of the following:

- A change-of-therapy provider letter signed by the client or responsible adult,
- The letter must document the date that the client ended therapy (effective date of change) with the previous provider, or last date of service,
- The name of the new provider and previous provider

When a provider or client discontinues therapy during an existing prior authorization period and the client requests services through a new provider located within the same enrolled group of providers or within a group of independently enrolled providers collaboratively working together, the new provider can use the same evaluation and plan of care.

The authorization period will not change when the provider changes.

6.2.6 Treatment Note

The following documentation must be kept on file by the treating provider and available when requested:

- Client's name
- Date of service
- Time in and out of each therapy session
- Objectives addressed (should coincide with plan of care) and progress noted, if applicable
- A description of specific therapy services provided and the activities rendered during each therapy session, along with a form of measurement.
- Assessments of client's progress or lack of progress
- Treatment notes must be legible
- Therapy providers must sign each date of entry with full signature and credentials

All documentation for evaluations, re-evaluations, progress summaries, treatment notes, and discharge summaries must show client's name, date of service, time in and time out for each therapy session.

Note: *Documentation requirements for a telehealth service are the same as what is required for an in-person visit and must accurately reflect the services rendered. Additionally, documentation must identify the means of delivery when provided by telehealth.*

Refer to: The *Telecommunication Services Handbook* (*Vol. 2, Provider Handbooks*) for more information about telehealth services documentation requirements.

6.3 PT, OT, and ST Procedure Codes

PT, OT, and ST treatment procedure codes are either time-based and billable in units or untimed and billable per daily encounter.

6.3.1 PT and OT Treatment Procedure Codes

All time-based PT and OT treatment procedure codes are cumulatively limited to one hour per date of service per discipline (4 units).

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The following time-based PT and OT treatment procedure codes must be billed in 15 minute increments and are limited to a combined total of 2 units (thirty minutes) per date of service per discipline:

Procedure Codes	
97034	97035

The following time-based PT and OT treatment procedure code must be billed in 15 minute increments, is limited to a combined total of 3 units (45 minutes) per date of service per discipline, and is not payable in the home or other setting:

Procedure Codes
97036

The following time-based PT and OT treatment procedure codes must be billed in 15 minute increments and are limited to a combined total of 4 units (one hour) per date of service per discipline:

Procedure Codes									
97032	97033	97110	97112	97113	97116	97124	97140	97530	97535
97537	97542	97750							

Note: *Procedure code 97113 is not payable to home health agencies.*

6.3.2 Untimed PT and OT Treatment Procedure Codes

The following supervised modality PT and OT treatment procedure codes are limited to once per date of service per procedure code and must be delivered on the same date of service as one or more time-based PT and OT procedure code(s) and are subject to CMS NCCI relationships:

Procedure Codes							
97012	97014	97016	97018	97022	97024	97026	97028

The following PT and OT group therapy treatment procedure code is limited to once per date of service:

Procedure Codes
97150

Separate prior authorization is required for medically necessary therapeutic procedures not addressed by procedure codes outlined in this handbook.

The following procedure code requires supporting documentation indicating why an unlisted procedure code is required and is limited to once per date of service:

Procedure Codes
97799

If the therapy treatment services that are billed exceed one hour (four units per day), the claim will be denied, and it may be appealed. On appeal, the provider must meet the following conditions:

- The appeal must document the prior authorization period week or month for the date of service appealed.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The appeal must include an attestation that the provider has billed all therapy services for the week or month in question.

For clients who are 21 years of age and older, when physical or occupational group therapy is administered, providers should bill procedure code 97150 for each member of the group.

A client may receive therapy in more than one discipline (physical, occupational, or speech) in the outpatient, office or home setting in one day.

6.3.3 ST Treatment Procedure Codes

Individual speech treatment is limited to one encounter per date of service any provider. Only one of the following individual speech treatment procedure codes will be reimbursed per date of service:

Procedure Codes	
92507	92526

An encounter for speech therapy individual treatment is defined as face-to-face time with the patient and/or caregiver for a length of time compliant with nationally recognized professional speech-language pathology standards for a typical session.

The following group speech therapy procedure code is limited to once per date of service:

Procedure Codes
92508

6.3.4 PT, OT, and ST Evaluation and Re-evaluation Procedure Codes

Evaluation and re-evaluation procedure codes in the following table are untimed:

Procedure Codes									
92521	92522	92523	92524	92610	97161	97162	97163	97164	97165
97166	97167	97168	S9152						

6.3.5 PT, OT, and ST Reimbursement Guidelines

If a therapy evaluation or re-evaluation procedure code and like therapy procedure codes are billed for the same date of service by any provider, the like therapy evaluation or re-evaluation will be denied.

An evaluation or re-evaluation performed on the same day as therapy from a different therapy type must be performed at distinctly separate times to be considered for reimbursement.

Therapy services provided in the nursing home setting are limited to the nursing facility because these services must be made available to nursing home residents on an "as needed" basis and must be provided directly by the staff of the facility or furnished by the facility through arrangements with outside qualified resources. Nursing home facilities should refrain from admitting clients who need goal directed therapy if the facility is unable to provide these services.

Procedure codes for PT, OT, ST evaluations are payable once every three years to the same rendering provider.

For acute services, PT, OT, ST re-evaluations may be reimbursed once every 60 days to any provider when a recertification of services is planned.

Additional PT, OT, or ST evaluations or re-evaluations exceeding the limits outlined in this handbook may be considered for reimbursement on appeal with documentation of one of the following:

- A significant change in the client's medical condition as documented in the plan of care or treatment plan,

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- A change of provider has occurred and a change of provider letter is submitted with the appeal.

The re-evaluation is required for recertification of an existing authorization.

The following procedure codes are billable for telehealth services:

Procedure Codes									
92507	92508	92521	92522	92523	92524	92526	92610	97110	97112
97116	97150	97161	97162	97163	97164	97165	97166	97167	97168
97530	97535	97750	97537	S9152					

A modifier must be used to indicate when treatment services have been rendered by a licensed therapist/ prescribing provider or a therapy assistant under supervision of a licensed therapist. Providers must use modifier 95 for services delivered by synchronous audiovisual technology.

The following modifiers are not required for evaluation or re-evaluation codes because those services may not be rendered by therapy assistants:

Modifier	Description
UB	Services delivered by a licensed therapy assistant under supervision of a licensed therapist
U5	Services delivered by a licensed therapist or physician

This modifier is to be utilized as indicated with all physical, occupational, and speech therapy treatment procedure codes.

Claims for co-treatment services must be submitted with modifier U3:

Modifier	Description
U3	Therapy Co-Treatment Modifier

Claims for telehealth must be submitted with modifier 95:

Modifier	Description
95	Services delivered by synchronous audiovisual technology

7 Claims Filing and Reimbursement

7.1 Claims Information

Therapy services must be submitted to TMHP in an approved electronic format or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms. Claims may be filed electronically in a CMS-1500 format as long as the nine-digit prior authorization number is reflected in the equivalent electronic field.

CORF and ORF providers must submit services in an approved electronic claims format or on the UB-04 CMS-1450 paper claim form from the vendor of their choice. TMHP does not supply the forms. Revenue and Current Procedural Terminology (CPT) procedure codes are used when submitting claims for CORF and ORF services. The only POS is outpatient facility (POS 5).

When completing a CMS-1500 or a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as TMHP does not key information from attachments.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Refer to: Subsection 2.8, "Home Health Agency Reimbursement" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for additional claim information for Home Health agencies.

"Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on electronic claims submissions.

"Section 6: Claims Filing" (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Subsection 6.6, "UB-04 CMS-1450 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*).

7.2 Reimbursement/Billing Guidelines

Physical, occupational, and speech therapy services are reimbursed in accordance with 1 TAC § 355. See the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com for reimbursement rates.

Therapy providers are reimbursed in accordance with 1 TAC §355.8085.

Refer to: "Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on electronic claims submissions.

Subsection 6.4, "Claims Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/resources/rate-and-code-updates/rate-changes.

When there is a change of provider, or a change in the client's medical condition requiring therapy, a denied claim for a therapy (PT, OT, or ST) evaluation, re-evaluation or swallowing function evaluation that exceeded the limits outlined in this handbook may be considered on appeal for reimbursement with documentation of one of the following:

- A change in the client's medical condition or new therapy related diagnosis with date of onset documented in the plan of care or treatment plan
- A change of provider letter signed and dated by the client or responsible adult documenting all of the following:
  - The date the client ended therapy (effective date of change) with the previous provider
  - The name of the new provider and previous provider

7.2.1 Method for Counting Minutes for Timed Procedure Codes in 15-Minute Units

Modifiers GP, GO, and GN are required on all claims except when billing evaluation and re-evaluation procedure codes. The AT modifier must be included on claims for acute therapy services.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

All claims for reimbursement of procedure codes paid in 15 minute increments are based on the actual amount of billable time associated with the service. For those services for which the unit of service is 15 minutes (1 unit = 15 minutes), partial units should be rounded up or down to the nearest quarter hour.

To calculate billing units, count the total number of billable minutes for the calendar day for the client, and divide by 15 to convert to billable units of service. If the total billable minutes are not divisible by 15, the minutes are converted to one unit of service if they are greater than seven and converted to zero units of service if they are seven or fewer minutes.

For example, 68 total billable minutes/15 = 4 units + 8 minutes. Since the 8 minutes are more than 7 minutes, those 8 minutes are converted to one unit. Therefore, 68 total billable minutes = 5 units of service.

Time intervals for 1 through 8 units are as follows:

Units	Number of Minutes
0 units	0 minutes through 7 minutes
1 unit	8 minutes through 22 minutes
2 units	23 minutes through 37 minutes
3 units	38 minutes through 52 minutes
4 units	53 minutes through 67 minutes
5 units	68 minutes through 82 minutes
6 units	83 minutes through 97 minutes
7 units	98 minutes through 112 minutes
8 units	113 minutes through 127 minutes

7.3 Claims Resources

Providers may refer to the following sections or forms when filing claims:

Resource	Location
Appendix A: State, Federal, and TMHP Contact Information	Appendix A (*Vol. 1, General Information*)
Appendix D: Acronym Dictionary	Appendix D (*Vol. 1, General Information*)
Automated Inquiry System (AIS)	Appendix A: State, Federal, and TMHP Contact Information (*Vol. 1, General Information*)
CMS-1500 Paper Claim Filing Instructions	Subsection 6.5 (*Vol. 1, General Information*)
Section 3: TMHP Electronic Data Interchange (EDI)	Section 3 (*Vol. 1, General Information*)
TMHP Electronic Claims Submission	Subsection 6.2 (*Vol. 1, General Information*)
UB-04 CMS-1450 Paper Claim Filing Instructions	Subsection 6.6 (*Vol. 1, General Information*)

7.4 Contact TMHP

The TMHP Contact Center at 1-800-925-9126 is available Monday-Friday from 7 a.m. to 7 p.m., Central Time.

1 General Information

This information is intended for Texas Medicaid independent (freestanding) laboratories, radiological laboratories, and physiological laboratories.The handbook provides information about Texas Medicaid's benefits, policies, and procedures applicable to these providers.

Important: *All providers are required to read and comply with "Section 1: Provider Enrollment and Responsibilities" (Vol. 1, General Information). In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

Refer to: "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*).

1.1 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission

According to three-day and one-day payment window reimbursement guidelines, most professional and outpatient diagnostic and nondiagnostic services that are rendered within the designated timeframe of an inpatient hospital stay and are related to the inpatient hospital admission will not be reimbursed separately from the inpatient hospital stay if the services are rendered by the hospital or an entity that is wholly owned or operated by the hospital.

These reimbursement guidelines do not apply in the following circumstances:

- The professional services are rendered in the inpatient hospital setting.
- The hospital and the physician office or other entity are both owned by a third party, such as a health system.
- The hospital is not the sole or 100-percent owner of the entity.

Refer to: Subsection 3.7.4.17, "Payment Window Reimbursement Guidelines" in the *Inpatient and Outpatient Hospital Services Handbook* (*Vol. 2, Provider Handbooks*) for additional information about the payment window reimbursement guidelines.

2 Independent Laboratory

The requirements in this section apply to all providers who bill laboratory services.

2.1 Enrollment

Providers must meet the following requirements and submit a complete application in order to enroll as independent (freestanding) laboratory providers:

- The provider must be actively enrolled in Medicare as an independent laboratory.
- The independent laboratory must be independent from a physician's office or hospital.
- The independent laboratory must meet staff, equipment, and testing capability standards for certification by the Health and Human Services Commission (HHSC).

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

2.1.1 Clinical Laboratory Improvement Amendments (CLIA)

CLIA regulations set standards that are designed to improve quality in all laboratory testing and include specifications for quality control (QC), quality assurance (QA), patient test management, personnel, and proficiency testing.

The regulations concern all laboratory testing that is used for the assessment of human health or the diagnosis, prevention, or treatment of disease. Under CLIA 88, all clinical laboratory providers (including those located in physicians' offices), regardless of location, size, or type of laboratory, must meet certain standards based on the complexity of the tests they perform.

Providers must hold the appropriate CLIA certificates to perform certain tests as indicated in this handbook. Providers that are certified only to perform waived tests must use modifier QW as indicated on the CMS website.

Refer to: The CLIA Regulations and Federal Register Documents page of the Centers for Medicare & Medicaid Services (CMS) website at www.cms.gov for the CLIA rules and regulations. The regulations are found at Title 42 Code of Federal Regulations, Part 493.

2.1.2 CLIA Requirements

To be eligible for reimbursement by Medicare and Medicaid, all providers that perform laboratory tests must do the following:

- Pay the applicable fee to CMS.
- Contact HHSC at 1-512-834-6650 to receive a CLIA registration or certification number. Submit CLIA applications to the following address:

  Health Facility Licensing and Certification Division
  HHSC
  1100 West 49th Street
  Austin, TX 78756

- CLIA updates can be submitted through a PEMS Maintenance-Licenses Transaction.

TMHP monitors claims that are submitted by clinical laboratory providers to verify that the clinical laboratory has a CLIA number on file. If the provider does not have a CLIA number on file with TMHP, the laboratory services claims may be denied.

2.2 Services, Benefits, Limitations, and Prior Authorization

Texas Medicaid only covers professional and technical services that an independent laboratory is certified by CLIA to perform.

Provider documentation must be maintained in the client's medical record and must delineate the medical need for administering the laboratory test.

The physician is responsible for providing to the performing laboratory the clinical diagnosis code that is associated with the individual test so that the performing laboratory may bill Texas Medicaid directly for the analysis of the specimen.

Refer to: The Current Procedural Terminology (CPT) manual for information regarding examples of laboratory codes. Correct use of CPT coding requires using the most specific laboratory code that matches the services provided, based on the code's description.

2.2.1 CLIA Certificates

Texas Medicaid follows the Medicare categorization of tests for CLIA certificate holders.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Refer to: The TMHP website Required CLIA Lab Certifications web page at https://www.tmhp.com/resources/rate-and-code-updates/required-clia-lab-certifications for required laboratory certifications for each HCPCS procedure code.

2.2.2 Laboratory Handling Fees and Reference Laboratories

2.2.2.1 Independent Laboratory Providers

An independent laboratory provider may be reimbursed for tests performed in the laboratory and for laboratory handling fees for tests that are forwarded to another laboratory (i.e., reference laboratory).

An independent laboratory that forwards a specimen to another laboratory without performing any tests on that specimen may not bill for any laboratory tests.

An independent laboratory may only bill Texas Medicaid for tests referred to another independent or hospital laboratory if it performs at least one test that it is certified by CLIA to perform, and forwards a portion of the same specimen to the other laboratory to have one or more tests performed. The referring laboratory may then bill for tests it has performed on the specimen. When billing, the following information must be on the claim:

- Block 20: "Yes" box must be checked.
- Block 32: The name, address, and ZIP Code of the reference laboratory (i.e., the laboratory to which the specimen was referred).
- Block 24-J: The provider number of the reference laboratory must be included next to each procedure to be performed by the reference laboratory.

An independent laboratory that forwards a specimen to another laboratory (independent or hospital) may bill a handling fee (procedure code 99001) for collecting and forwarding the specimen to the other laboratory if the specimen is collected by routine venipuncture or catheterization.

2.2.2.2 Physician Providers

A physician may bill only one laboratory handling charge (procedure code 99000) per client visit when the specimen is collected by drawing a blood sample through venipuncture or collecting a urine specimen by catheterization, unless the specimen is divided and sent to different laboratories or there are different specimens collected and sent to different laboratories.

The claim must indicate the name and address of each laboratory where a specimen is sent for more than one laboratory handling charge to be paid.

Refer to: Subsection 9.2.42, "Laboratory Services" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*) for more information about laboratory services reimbursed to physician providers.

2.2.2.3 Outpatient Hospital Providers

An outpatient hospital may be reimbursed for a laboratory handling charge (procedure code 99001) for each independent laboratory to where it sends specimens when the laboratory handling charge is not being billed through other methods.

2.2.2.4 Family Planning Laboratory Tests

Family planning agencies must use procedure code 99000 with a family planning diagnosis code to bill their laboratory handling charges for laboratory specimens sent out; modifier FP must be omitted. Providers may refer to the appropriate section in the provider manual for instructions for billing family planning services. As with procedure code 99000, only one handling fee may be charged for each laboratory to where the agency sends specimens, regardless of the number of specimens taken.

When family planning test specimens, such as Pap smears, are collected, providers must direct the laboratory to indicate that the claim for the test is to be billed as a family planning service.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Refer to: Subsection 6.1, "Services, Benefits, Limitations, and Prior Authorization" in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook* (*Vol. 2, Provider Handbooks*) for the complete list of family planning diagnosis codes.

2.2.3 Nonclinical Laboratory Procedures

The reimbursement for nonclinical laboratory procedure codes can be found on the appropriate Texas Medicaid fee schedules on the TMHP website at www.tmhp.com.

2.2.4 Clinical Laboratory Procedures

The reimbursement for clinical laboratory procedures can be found on the appropriate Texas Medicaid fee schedule. Fee schedules are available on the TMHP website at www.tmhp.com.

2.2.4.1 Repeat Procedures

Modifier 91 should be used for repeat clinical diagnostic tests as follows:

- Modifier 91 must not be used when billing the initial procedure. It must be used to indicate the repeated procedure.
- If more than two services are billed on the same day by the same provider, regardless of the use of modifier 91, the claim or detail is denied.
- If a repeated procedure performed by the same provider on the same day is billed without modifier 91, it is denied as a duplicate procedure.
- If a claim is denied for a quantity more than two or as a duplicate procedure, the times of these procedures and services must be documented on appeal.

Providers may appeal claims that have been denied for documentation of time. Most procedure codes that initially required modifier 91 will continue to be audited for modifier 91.

When appealing claims with modifier 91 for repeat procedures, providers must separate the details. One detail should be appealed without the modifier and one detail with the modifier, including documentation of times for each repeated procedure.

2.2.5 Automated Laboratory Tests and Laboratory Paneling

The reimbursement for the complete panel procedure code represents the total payment for all automated laboratory tests that are covered under that panel combined with any other automated tests that are billed for the client for the same date of service. The Texas Medicaid allowable fee for the individual components of the complete laboratory panel will not exceed the automated test panel (ATP) fee for the total number of automated tests that are billed for the client for the same date of service.

When all of the components of the panel are performed, the complete panel procedure code must be billed. When only two or more components of the panel are performed, the individual procedure codes for each laboratory test performed may be billed.

2.2.5.1 Fee Calculations for Automated Tests and Laboratory Panels

Automated test and laboratory panel procedure codes may be reimbursed according to the appropriate ATP level payment based on the total number of automated tests that are performed on the same day for the same client.

Refer to: The "Clinical Laboratory, Automated Test Panels - Insert" Texas Medicaid fee schedule on the TMHP website at www.tmhp.com for the ATP level payment for automated test and lab panel procedure codes.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

ATP Level Pricing

The amount that is allowed for each automated test and lab panel procedure code that is billed with the same date of service for the same client will be a percentage of the total ATP level payment. To calculate the automated test pricing, the following information is necessary:

- The number of automated tests that are billed for the client for the same date of service (including individual automated tests and all automated tests that are represented by the laboratory panels.) Procedure codes that are duplicated between panels are not counted more than once.
- The ATP pricing fee that corresponds to the number of automated tests that are billed for the client for the same date of service.
- The total billed amount for all automated test and laboratory panel procedure codes that are billed for the client for the same date of service.

The automated test pricing may be calculated as follows:

Step 1

A percentage for each automated test or lab panel detail is derived from dividing the billed amount (B/A) for each procedure by the total billed amount (TB/A) for all automated test and laboratory panel procedure codes with the same date of service for the same client.

Example:

Automated Test	B/A	Percentage
Detail 1 Automated Test	= $50.00	= 29%
Detail 2 Automated Test	= $25.00	= 14%
Detail 3 Lab Panel	= $100.00	= 57%
Detail 4 Clinical Lab Test	= $20.00	= 0%
	TB/A = $175.00	

Note: *The TB/A is for automated test and laboratory panel procedure codes (details 1, 2, and 3 only). Detail 4 is not included in the calculations for the automated tests because it is a clinical lab procedure code and may be reimbursed as indicated on the fee schedule.*

Calculations:

Detail 1	= 50.0 0 / 175.00	= .285714285714…	= 29%
Detail 2	= 25.00 / 175.00	= .142857142857…	= 14%
Detail 3	= 100.00 / 175.00	= .571428571428…	= 57%

Step 2

The detail allowed amount for each automated test (AT) procedure code will be the calculated percentage of the ATP level payment.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Example:

Automated Test	Number of Automated Tests	Allowed Amount
Detail 1 Automated Test	= 1	= $3.10
Detail 2 Automated Test	= 1	= $1.55
Detail 3 Lab Panel	= 4	= $6.19
Detail 4 Clinical Lab Test	= 0	= Fee Schedule
	ATP = 6 = $10.84	

Note: *The total number of automated tests includes the individual automated test procedure codes and the number of automated tests that are represented by each panel procedure code that is billed. Automated tests that are duplicated between panels are not counted more than once.*

Calculations:

Detail 1	= 29% of 10.84	= (.285714285714…)X(10.84)	= $3.10
Detail 2	= 14% of 10.84	= (.142857142857…)X(10.84)	= $1.55
Detail 3	= 57% of 10.84	= (.571428571428…)X(10.84)	= $6.19
			$10.84

Note: *If a clinical laboratory procedure code is included in a panel, the fee schedule rate for the clinical laboratory procedure is added to the ATP rate, and the resulting sum is divided among the automated test and laboratory panel procedure codes that are billed for the date of service.*

The total allowed amount for all laboratory services that are billed for the client for the same date of service will represent the ATP level pricing combined with any clinical laboratory test fee schedule pricing.

2.2.6 Complete Blood Count (CBC)

A CBC and its components may be reimbursed by Texas Medicaid without prior authorization. The medical necessity for all laboratory services must be documented in the client's medical record, and the services must be referenced to an appropriate diagnosis code.

Texas Medicaid considers a baseline CBC appropriate for the evaluation and management of existing and suspected disease processes. CBC tests should be individualized and based on client history, clinical indications, or proposed therapy, and will not be reimbursed for screening purposes.

When related CBC procedure codes are billed for the same date of service by the same provider, the first procedure code will be reimbursed and all other procedure codes will be denied.

Reticulocyte procedure codes may be reimbursed in addition to the CBC, hemogram, differential analysis, and platelet procedure codes indicated above.

Refer to: The appropriate Texas Medicaid fee schedule on the TMHP website at www.tmhp.com for CBC procedure codes that may be reimbursed.

80370	80371	80372	80373	80374	80375	80376	80377	G0480	G0481
G0482	G0483	G0659							
^ QW Modifier									

Note: *The procedure codes above do not require prior authorization.*

Providers are encouraged to reference the American Board of Internal Medicine (ABIM) Foundation's "Choosing Wisely" lists to determine appropriateness of laboratory tests.

Procedure codes G0480, G0481, G0482, G0483, and G0659 are limited to once per day by any provider.

Chemistry procedure codes used for specimen validity testing (procedure codes 82540, 82550, 82552, 82553, 82554, 83986, and 84311) will be denied when submitted on the same date of service by the same provider, as procedure code G0480, G0481, G0482, G0483, or G0659.

The following CPT Drug Assay procedure codes will be denied when billed on the same date of service, by the same provider with the corresponding HCPCS Drug Assay procedure codes identified with an "X":

2.2.7.1 Documentation Requirements

All services outlined in this section are subject to retrospective review. Documentation in the client's medical record must be maintained by the physician and support the medical necessity for the services provided.

2.2.8 Evocative and Suppression Testing

The following procedure codes for evocative and suppression testing may be reimbursed by Texas Medicaid:

Procedure codes									
80400	80402	80406	80408	80410	80412	80414	80415	80416	80417

*** CLIA Waived Test** **^ QW Modifier**									

Note: *The procedure codes above do not require prior authorization.*

The following procedure codes are limited to one per day by the same provider:

Procedure Codes						
85027	85347	85397	85520	85576^	85610^	85730
^ QW Modifier						

Procedure codes 85460 and 85461 may be reimbursed for female clients who are 10 through 55 years of age.

Procedure code 85004 will deny if billed on the same day by the same provider as procedure code 85007.

Procedure code 85660 is limited to once per lifetime, any provider. An additional test may be considered on appeal with documentation indicating the provider was unaware the client was tested previously or was unable to obtain client's medical records.

Providers are encouraged to reference the American Board of Internal Medicine (ABIM) Foundation's "Choosing Wisely" lists to determine appropriateness of laboratory tests.

2.2.10 Human Immunodeficiency Virus (HIV) Drug Resistance Testing

Standard treatment regimens for HIV therapy require a combination of three or more drugs. Standard therapy continues if a reduction in viral load is achieved. Incomplete virus suppression favors the development of a drug resistance and jeopardizes the success of future therapy. Testing for drug resistance as a prerequisite to further therapy is indicated under such circumstances.

To ensure accurate testing results, the client must be on appropriate antiretroviral therapy at the time of testing or have discontinued the drug regimen within the past four weeks.

Testing for antiretroviral drug resistance is indicated in certain clinical situations. These indications include any of the following:

- Individuals who have an initial (new onset) acute HIV infection, to determine if a drug-resistant viral strain was transmitted and to plan a drug regimen accordingly.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Individuals who have virological failure during antiretroviral therapy, laboratory results showing HIV RNA levels greater than 500 and less than 1,000 copies/ml.
- HIV-infected pregnant women before initiation of therapy.
- HIV-infected pregnant women entering pregnancy with HIV RNA levels at or below 400 copies/ml while the women are on therapy.

Documentation must be maintained in the client's medical record to support medical necessity for the HIV drug-resistance testing. Specific documentation requirements are dependent on the rationale for the testing. Documentation must include, but is not limited to, the date the drug regimen was initiated, the dosage and frequency of the prescribed medication, and laboratory tests that support all of the following:

- Acute HIV infection, with identification of the specific viral strain
- Virological failure during antiretroviral therapy with HIV RNA levels greater than 500 and less than 1,000 copies/ml
- Positive pregnancy results in an HIV positive female client
- HIV RNA levels of 400 copies/ml or less during pregnancy

HIV drug-resistance testing is not recommended when one of the following criteria is met:

- The drug regimen has been discontinued for more than four weeks
- The viral load is less than 500 copies/ml

Refer to: Subsection B.1.1, "Routine HIV Testing Procedure Codes" in "Appendix B: HIV/AIDS" (*Vol. 1, General Information*) for additional information about HIV testing laboratory procedures.

2.2.11 Microbiology

The following procedure codes may be reimbursed by Texas Medicaid:

^ QW Modifier									

Procedure code G0433 will be denied if billed on the same day by any provider as procedure code 86703.

Providers are encouraged to reference the American Board of Internal Medicine (ABIM) Foundation's "Choosing Wisely" lists to determine appropriateness of laboratory tests.

2.2.11.1 Zika Virus Testing

Procedure codes 86794 and 87662 may be used to bill for Zika virus testing.

Procedure code 87662 may be reimbursed up to two times on the same day by the same provider.

2.2.12 Organ or Disease-Oriented Panels

The following organ or disease-oriented panel procedure codes may be reimbursed by Texas Medicaid:

Procedure Codes									
80047^	80048^	80050	80051^	80053^	80055	80061^	80069^	80074	80076
80081									
^ QW Modifier									

Note: *The procedure codes above do not require prior authorization.*

Procedure codes 80055 and 80081 are limited to female clients who are 10 through 55 years of age. Only one service for procedure code 80055 or one service for procedure code 80081 will be reimbursed per pregnancy to the same provider.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Procedure code 80061 is limited to once per rolling year, by any provider, when performed as part of a preventative care medical checkup.

The reimbursement for the complete panel procedure code represents the total payment for all automated laboratory tests that are covered under that panel combined; including any other automated tests billed for the client for the same date of service (DOS). The Texas Medicaid allowable fee for the individual components of the complete laboratory panel will not exceed the automated test panel (ATP) fee for the total number of automated tests that are billed for the client for the same DOS.

When all of the components of the panel are performed, the complete panel procedure code must be billed. When only two or more components of the panel are performed, the individual procedure codes for each laboratory test may be billed.

Providers are encouraged to reference the American Board of Internal Medicine (ABIM) Foundation's "Choosing Wisely" lists to determine appropriateness of laboratory tests.

2.2.13 Urinalysis and Chemistry

The following urinalysis and chemistry procedure codes may be reimbursed by Texas Medicaid for once per day:

Procedure Codes									
Urinalysis									
81000	81001	81002*	81003^	81005	81007^	81015	81020	81025*	81050

***CLIA Waived test** **+Add-on code** **^ QW Modifier**									

Texas Medicaid follows the Medicare categorization of tests for CLIA certificate holders.

Refer to: The TMHP website Required CLIA Lab Certifications web page at https://www.tmhp.com/resources/rate-and-code-updates/required-clia-lab-certifications for required laboratory certifications for each HCPCS procedure code.

Texas Medicaid limits reimbursement for the procedure codes listed in the table above to one per day without a modifier and one per day with a modifier when billed by the same provider.

Procedure code 84583 will be denied if it is billed on the same day by the same provider as procedure code 81000, 81001, 81002, 81003, 81005, or 81020.

Procedure codes 82013, 82105, 82106, 82677, 83080, 84163, and 84704 are limited to one per 210 days when billed by any provider.

Procedure code 83698 is limited to the following diagnosis codes:

Diagnosis Codes							
E1165	E119	E11A	E139	E7800	E78010	E78011	E78019

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Diagnosis Codes							
E781	E782	E783	E7841	E7849	E785	I2584	

Procedure code 83698 is limited to two per rolling year when billed by any provider. Claims submitted for procedure code 83698 that are in excess of two per year may be considered on appeal with documentation of any of the following:

- Medical necessity for the additional test.
- The provider was unable to obtain the previous records from a different provider.
- The provider was new to treating the client and was not aware the client had received the test.

Procedure codes 82757, 84066, 84152, and 84154 are limited to male clients.

Procedure codes 82120, 84135, and 84138 are limited to female clients.

The following procedure codes are restricted to females who are 10 through 55 years of age:

Procedure Codes									
81025*	82106	82143	82731	83632	83661	83662	83663	83664	84112
84163									
*CLIA waived tests									

Refer to: Subsection 9.2.26.8, "Helicobacter Pylori (H. pylori)" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*) for information about limitations on procedure codes 83009, 83013, and 83014.

2.2.14 Additional Laboratory Services

2.2.14.1 Colorectal Cancer Screening

Refer to: Subsection 4.2.8, "Colorectal Cancer Screening" in the *Inpatient and Outpatient Hospital Services Handbook* (*Vol. 2, Provider Handbooks*).

Subsection 9.2.15.1.1, "Colorectal Cancer Screening" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*).

2.2.14.2 Cytopathology Studies

Refer to: Subsection 9.2.26.4, "Cytopathology Studies—Other Than Gynecological" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*).

Subsection 6.14, "Pap Smear (Cytopathology Studies)" in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook* (*Vol. 2, Provider Handbooks*).

2.2.14.3 Helicobacter pylori Testing

Refer to: Subsection 9.2.26.8, "Helicobacter Pylori (H. pylori)" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*).

2.2.14.4 Laboratory Services for Clients on Dialysis

Refer to: Subsection 7.2.7, "Laboratory and Radiology Services" in the *Clinics and Other Outpatient Facility Services Handbook* (*Vol. 2, Provider Handbooks*).

2.2.14.5 Prognostic Breast and Gynecological Cancer Studies

Refer to: Subsection 7.2.7, "Laboratory and Radiology Services" in the *Clinics and Other Outpatient Facility Services Handbook* (*Vol. 2, Provider Handbooks*).

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

2.2.14.6 THSteps Outpatient Laboratory Services

Refer to: Subsection 4.3.12.6, "Laboratory Test" in the *Children's Services Handbook* (*Vol. 2, Provider Handbooks*).

2.2.14.7 Authorization Requirements

Prior authorization is not required for most laboratory services. Providers may refer to the specific sections for those services that require authorizations.

2.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including independent laboratory services. Independent laboratory services are subject to retrospective review and recoupment if documentation does not support the service billed.

Independent laboratory documentation must include the physician's signed and dated order for the laboratory tests. The specific tests ordered by the physician must be listed on the order. The test results must also be included in the documentation.

2.4 Claims Filing and Reimbursement

2.4.1 Claims Information

When family planning test specimens, such as Pap smears, are collected, providers must direct the laboratory to indicate that the claim for the test is to be billed as a family planning service using a family planning diagnosis code.

Refer to: Subsection 2.2, "Services, Benefits, Limitations, and Prior Authorization" in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook* (*Vol. 2, Provider Handbooks*) for information about Medicaid Title XIX Family Planning Services.

Subsection 6.1, "Services, Benefits, Limitations, and Prior Authorization" in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook* (*Vol. 2, Provider Handbooks*) for information about the Texas Women's Health Program.

A National Provider Identifier (NPI) is required for all claims. In addition, for paper claims, the NPI is required for the billing and performing provider only. All paper claims must be submitted with an NPI and taxonomy code for the billing and performing provider. All other provider fields on the claim forms require an NPI only.

Providers must submit independent laboratory services to TMHP in an approved electronic format or on a CMS-1500 paper claim form. Providers must purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: "Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on electronic claims submissions.

"Section 6: Claims Filing" (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

2.4.1.1 Electronic Filing for Laboratory Providers

Referring provider information is always required on laboratory claims. Failure to submit this data will result in a claim rejection on the TMHP Electronic Data Interchange (EDI).

When the place of service is 6, and the billing NPI belongs to a laboratory, there is no need to submit the same NPI in the facility ID field. This notation causes the claim to suspend processing unnecessarily, and may cause a delay in the disposition of the claim. For questions about the electronic fields, contact the commercial software vendor or the TMHP EDI Help Desk at 1-888-863-3638.

2.4.2 Reimbursement

The Medicaid rates for independent laboratories are calculated in accordance with 1 TAC §355.8085 and §355.8610, and the Deficit Reduction Act (DEFRA) of 1984. By federal law, Medicaid payments for clinical laboratory services cannot exceed the Medicare payment for that service.

As the result of the Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982, independent laboratories are not directly reimbursed by Texas Medicaid when providing tests to clients who are registered as hospital inpatients. Hospital reimbursements (i.e., inpatient DRG reimbursement) include payment for all pathology and laboratory services, including those sent to referral laboratories. Hospital-based and referral laboratory providers must obtain reimbursement for the technical portion from the hospital. The technical portion includes the handling of specimens and the automated or technician-generated reading and reporting of results. These services are not billable to Medicaid-covered clients.

Refer to: Subsection 2.2, "Fee-for-Service Reimbursement Methodology" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*).

Texas Medicaid pays up to the amount allowed for the total component for the same procedure, same client, same date of service, any provider.

- Providers who perform the technical service and interpretation must bill for the total component.
- Providers who perform only the technical service must bill for the technical component.
- Providers who perform only the interpretation must bill for the interpretation component.

Claims filed in excess of the amount allowed for the total component for the same procedure, same dates of service, same client, any provider, are denied. Claims are paid based on the order in which they are received.

For example, if a claim is received for the total component and TMHP has already made payment for the technical or interpretation component for the same procedure, same dates of service, same client, any provider, the claim for the total component will be denied as previously paid to another provider. The same is true if a total component has already been paid and claims are received for the individual components. Texas Medicaid implemented mandated rate reductions for certain services. The Online Fee Lookup (OFL) and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/resources/rate-and-code-updates/rate-changes.

2.4.2.1 National Correct Coding Initiative (NCCI) and Medically Unlikely Edit (MUE) Guidelines

The Healthcare Common Procedure Coding System (HCPCS) and Current Procedural Terminology (CPT) codes included in the *Texas Medicaid Provider Procedures Manual* and the *Texas Medicaid Bulletin* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals and bulletins. Providers should refer to the CMS NCCI web page for correct coding guidelines and specific applicable code combinations.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

3 Genetic Testing

Genetic testing is the study of heredity covering an array of techniques, including analysis of human deoxyribonucleic acid (DNA), ribonucleic acid (RNA), or protein. Genetic testing may be a benefit of Texas Medicaid program when all of the following conditions of medical necessity are met:

- The client displays clinical features or is at direct risk of inheriting the mutation in question (pre-symptomatic).
- The result of the test will directly impact the treatment or management being delivered to the client.
- After history, physical examination, pedigree analysis, genetic counseling, and completion of conventional diagnostic studies, a definitive diagnosis remains uncertain.
- Disease-specific criteria met.

Definition of medical necessity for genetic testing is also made in accordance with Chapter 1372 of Subtitle E, Title 8 of the Texas Insurance Code, which requires biomarker testing to include relevant genetic tests, supported by medical and scientific evidence as described by one or more of the criteria outlined below:

- A United States Food and Drug Administration (FDA) labeled indication for the test or an indicated test for a drug approved by the FDA.
- A national coverage determination made by the Centers for Medicare and Medicaid Services (CMS), or a local coverage determination made by a Medicare administrative contractor.
- Nationally recognized clinical practice guidelines.
- Consensus statement recommendations for specific clinical circumstances when biomarker testing may optimize clinical care outcomes.

Genetic testing includes:

- Single-analyte tests
- Multiplex panel tests
- Whole genome sequencing (WGS) or whole exome sequencing (WES)

Providers may refer to the Texas Medicaid fee schedule for procedure codes that may be reimbursed for specific genetic testing.

Refer to: Subsection 2.2.1, "Online Fee Lookup (OFL) and Static Fee Schedules" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*)

The following procedure codes may be reimbursed for Genetic Testing services:

Procedure Codes									
0037U	0239U	0364U	0493U	0540U	81105	81106	81107	81109	81110

81519	81520	81528	81595	S3800	S3840	S3841	S3842	S3846	

Genetic testing is allowed once per lifetime, with some exception.

3.1 ClonoSEQ (procedure code 0364U)

Reimbursement for ClonoSEQ (procedure codes 0364U), the next generation sequencing (NGS) of tumor DNA to detect or quantify minimal residual disease (MRD) in clients with acute lymphocytic leukemia (ALL), chronic lymphocytic leukemia (CLL), or multiple myeloma is limited to claims with one of the following diagnoses. All other diagnoses will be denied.

Diagnosis Codes							
C9000	C9001	C9002	C9100	C9101	C9102	C9110	C9111
C9112							

Procedure code 0364U is limited to six times per rolling year by any provider. Additional tests may be reimbursed for the same client on appeal with medical necessity.

3.2 * Enhanced Liver Fibrosis (ELF) (Procedure code 81517)

Reimbursement of ELF (procedure code 81517) for the detection and prognosis of liver fibrosis in clients with chronic liver diseases is limited to claims with one of the following diagnoses. All other diagnoses will be denied.

[Revised] Diagnosis Codes							
K700	K7010	K7011	K702	K7030	K7031	K7040	K7041
K709	K710	K7110	K7111	K712	K713	K714	K7150
K7151	K716	K717	K718	K719	K7200	K7201	K7210

K77							

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Enhanced Liver Fibrosis (ELF) test more than twice per year is considered not medically necessary. Performance of this test within 6 months following a liver biopsy (or other test for liver fibrosis) is considered not medically necessary.

Documentation of medical necessity for a liver biopsy (procedure code 47000 or 47100) performed within 6 months following TE (procedure code 91200) or MRE (procedure code 76391) must be maintained in the client's records and is subject to retrospective review.

3.3 Documentation Requirements

To facilitate determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including documentation for medical necessity for the equipment or supplies requested. Providers must maintain documentation of medical necessity in the client's medical record.

Documentation must support medical necessity for the procedure code and modifier billed. All services outlined in this handbook are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the services provided.

3.4 Authorization Requirements

Prior authorization is not required for genetic testing unless otherwise described. Certain genetic tests do require prior authorization. Providers can refer to the provider handbooks for the guidelines and requirements listed for a specific service.

Refer to: Subsection 5.5, "Prior Authorization Submission Methods" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*)

Prior authorization requests may be submitted to the TMHP Prior Authorization Department via mail, fax, or the electronic portal. The electronic signature technology must meet all applicable federal and state statutes and administrative rules. Electronically-signed documents must have an electronic date on the same page as the signature. Electronic signatures that are generated through an electronic medical record (EMR) or electronic health record (EHR) system that complies with applicable federal and state statutes and rules are acceptable. All electronically-signed transactions and electronically-signed documents must be kept in the client's medical record. Prescribing and dispensing providers that utilize electronic signatures must provide a certification that the electronic signature technology that they use complies with all applicable federal and state statutes and administrative rules. Providers who submit a prior authorization request must also attest that electronic signatures included in the request are true and correct to the best of their knowledge. A hard copy of electronic transactions and signed documents must be available upon request. Stamped signatures and images of wet signatures will not be accepted. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

For tests requiring prior authorization, a completed Special Medical Prior Authorization (SMPA) Request Form must be signed, dated, and submitted by the ordering provider rendering direct care. Requests from laboratories will not be processed.

Note: *The provider is expected to share the authorization number with the lab submitting the claim.*

Any provider's signature, including the prescribing provider's, on a submitted document indicates the provider certifies, to the best of the provider's knowledge, the information in the document is true, accurate, and complete.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

3.4.1 Authorization Requirements for Whole Genome Sequencing and Whole Exome Sequencing

WGS describes the sequencing of the entire human genome, including protein-coding regions (exons) and noncoding regions. WGS captures most genomic variation in a single test and is useful for clients who have rare disorders where hypothesis-driven approaches have failed to produce a diagnosis. WGS can identify or confirm the genetic etiology of a disorder in clients (procedure code 81425). When needed for additional diagnostic insight, comparator genomes can be used from a relative such as parents or siblings (procedure code 81426). Re-evaluation of the genome is also available when needed for additional diagnostic yield (procedure code 81427).

Procedure codes 81425 and 81427 may be a benefit once per lifetime with any provider. Procedure code 81426 may be a benefit up to a maximum of twice per lifetime.

WES is an alternative to WGS. It is a laboratory test used to determine the sequence of the protein coding regions of the genome. The exome is the part of the genome that encodes protein, where roughly 85% of variants are known to contribute to diseases in humans. WES can identify or confirm the genetic etiology of a disorder in clients (procedure code 81415). When needed for additional diagnostic insight, comparator genomes can be used from a relative, such as parents or siblings, (procedure code 81416). Re-evaluation of the genome is also available when needed for additional diagnostic yield (procedure code 81417).

Procedure codes 81415 or 81417 may be a benefit once per lifetime with any provider. Procedure code 81416 may be a benefit up to a maximum of twice per lifetime.

Prior authorization is required for WGS and WES, and they are considered medically necessary when all the following criteria are met for individuals under 21 years of age:

- Pre-test genetic counseling is required for any individual undergoing WGS or WES.
- The individual has been evaluated by a physician board-certified in one of the following fields:
  - Medical genetics
  - Maternal-fetal medicine
  - Neonatology
  - Neurology
  - Developmental Pediatrics
- The evaluation may be one of the following:
  - In person
  - Via synchronous audio-visual telemedicine in consultation with a consulting physician who has personally examined the individual
- A three-generation pedigree must be completed, as appropriate.
- The ordering physician must conduct a mandatory pre-test and commits to conducting post-test follow-up counseling.
- Test results are expected to directly impact clinical decision-making and/or clinical outcome for the client being tested.
- No other causative circumstances (e.g., environmental exposures, injury, prematurity, infection) can explain symptoms.
- A genetic etiology is considered the most likely explanation for the phenotype, based on either of the following:
  - Multiple congenital abnormalities affecting unrelated organ systems, or two of the following:

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

    - Abnormality affecting at minimum a single organ system.
    - Profound global developmental delay, intellectual disability, symptoms of a complex neuro-developmental disorder, and/or severe neuropsychiatric condition.
    - Family history strongly suggestive of a genetic etiology, including consanguinity.
    - Period of unexplained developmental regression.
    - Biochemical findings suggestive of an inborn error of metabolism where targeted testing is not available.
- Clinical presentation does not fit a well-described syndrome for which single-gene or targeted panel testing (e.g., when comparative genomic hybridization [CGH]/chromosomal microarray analysis [CMA]) is available.
- The differential diagnosis list and/or phenotype warrant testing of multiple genes and one of the following:
    - WGS is more practical than the separate single gene tests or panels that would be recommended based on the differential diagnosis.
    - WGS results may preclude the need for multiple and/or invasive procedures, follow-up, or screening that would be recommended in the absence of testing.

Conditions that may be considered to qualify for WGS or WES include, but are not limited to, the following:

- Unexplained or global developmental delay
- Moderate, severe, or profound intellectual disability diagnosed before 21 years of age.
- Epileptic encephalopathy with onset before 3 years of age.
- Clinical history strongly suggests a genetic cause and two or more of the following features are present:
    - Congenital anomaly
    - Significant hearing or visual impairment diagnosed before 21 years of age
    - Laboratory abnormalities suggestive of an inborn error of metabolism (IEM)
    - Autism spectrum disorder neuropsychiatric condition (e.g., bipolar disorder, schizophrenia, obsessive-compulsive disorder)
    - Hypotonia or hypertonia in infancy
    - Dystonia, ataxia, hemiplegia, neuromuscular disorder, movement disorder, or other neurologic abnormality
    - Unexplained developmental regression, unrelated to autism or epilepsy
    - Growth abnormality (e.g., failure to thrive, short stature, microcephaly, macrocephaly, or overgrowth)
    - Persistent and severe immunologic or hematologic disorder
    - Dysmorphic features
    - Consanguinity
    - Other first- or second-degree family member(s) with similar clinical features

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Re-evaluation for WGS (procedure code 81427) and WES (procedure code 81417) of a previously obtained sequence (procedure code 81425 for WGS and procedure code 81415 for WES) is considered medically necessary when the above criteria for WGS or WES and any of the following conditions are met:

- Onset of additional symptoms that broadens the phenotype assessed during the original exome/genome evaluation.
- Birth or diagnosis of a similarly affected first-degree relative that has expanded the clinical picture.
- New scientific knowledge suggests a previously unknown link between the individual's findings and specific genes/pathogenic or likely pathogenic variants, and at least 18 months have passed since the last analysis.

WES is an alternative to WGS. Only one of the two tests is allowed per lifetime for those who meet the medical criteria for WGS and WES. It is the responsibility of the ordering providers to choose which test to perform for those who met the medical criteria for WGS and WES.

3.4.2 Authorization Requirements for Expanded Carrier Screening (ECS)

ECS is genetic testing performed to identify individuals who are at risk of having children with an inherited recessive (both parents must have the variant to pass the disorder to children or X-linked disorder [variant only occurs in the X chromosome]). Carriers are typically asymptomatic but can pass the disorder-causing genetic variant(s) to their children. Carrier screening may be performed in the preconception or prenatal periods. Risk-based carrier screening is performed in individuals with an increased risk to be a carrier of a specific disorder based on population carrier frequency, family history and/or ethnicity and typically tests for a single gene, or a small number of genes, known to have the disorder-causing variant(s).

ECS uses a panel test that screens for many genes simultaneously (5 genes up to 100s of genes) for disorders that are present in the general population and may have increased frequency in specific populations. The genes tested in an ECS panel vary by laboratory and may not all test for the same genes.

A targeted screening approach may be appropriate instead of ECS. Instances when targeted screening would be appropriate include but are not limited to:

- The individual or their reproductive partner is a known carrier for one or more conditions being screened.
- The individual or their reproductive partner has a first- or second-degree relative who is affected with a condition being screened.
- The individual or their reproductive partner has a first-degree relative with offspring affected with the condition being screened.
- The individual or their reproductive partner are members of a population known to have a carrier frequency rate that exceeds the threshold for American College of Medical Genetics and Genomics Tier 1 risk-based screening.

ECS (procedure code 81443) is limited to once per lifetime with any provider.

Prior authorization may be granted for ECS (procedure code 81443) when the following criteria are met:

- ECS is considered medically necessary when all the following criteria are met for females ages 10-55 years who are pregnant or considering pregnancy.
- Pre-test genetic counseling from one of the following is required for any individual undergoing ECS:
  - Board-certified physician in:
    - Medical genetics
    - Maternal-fetal medicine

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

    - Obstetrics/Gynecology
    - Family Medicine
  - Board-certified genetic counselor
  - Physician Assistant, Nurse Practitioner, Clinical Nurse Specialist, or Certified Nurse Midwife with training and expertise in genetics and genetic counseling
- Knowledge of the pathogenic variant(s) may be used for the management of:
  - Pregnancy or antenatal interventions
  - Delivery or other care planning for the potentially affected fetus of a pregnant individual
  - Pre-conception family planning
- The ECS panel should screen for conditions:
  - With childhood onset.
  - Which can be diagnosed prenatally.
  - With a well-defined phenotype.
  - Known to cause cognitive or physical impairment.
  - With a known pathogenic or likely pathogenic gene variant.
- The ECS panel does not include genes associated with known adult-onset conditions, including but not limited to, hereditary cancers, dementia, or blood clotting disorders (e.g., hereditary breast and ovarian cancer, Lynch Syndrome, Alzheimer's Disease, Huntington's Disease, or Factor V Leiden).
- The ECS panel must include sequencing of at least 15 genes including:
  - Conditions in American College of Medical Genetics and Genomics (ACMG) Tier 2, with a carrier frequency of 1 in 100 or greater
  - Conditions in ACMG Tier 1
  - X-linked conditions

Note: *A first-degree relative is defined as a blood relative with whom an individual shares approximately 50% of his/her genes, including the individual's parents, full siblings, and children. A second-degree relative is defined as a blood relative with whom an individual shares approximately 25% of his/her genes, including the individual's grandparents, grandchild, uncle, aunt, niece, nephew, or half-sibling.*

3.4.3 Prior Authorization Requirements for FoundationOne

FoundationOne tests are next-generation sequencing (NGS) to analyze hundreds of cancer-related genes and identify the four main classes of genomic alterations (base substitutions, insertions/deletions, copy number alterations, and gene rearrangements/fusions for clients with advanced solid tumor).

FoundationOne CDx test (procedure code 0037U) identifies alterations in 324 genes as well as genomic signatures, including microsatellite instability, tumor mutational burden, and positive homologous recombination deficiency status on DNA isolated from solid tumor tissue samples.

FoundationOne liquid CDx test (procedure code 0239U) using plasma, cell-free DNA, analysis of 311 or more genes, interrogation for sequence variants, including substitutions, insertions, deletions, select rearrangements, and copy number variations.

FoundationOne, either CDx or liquid CDx, may be a benefit of Texas Medicaid program when all of the following criteria are met:

- The test is ordered by an oncologist.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Used for advanced tumors.
- The test is intended to assist physicians in identifying treatment options and providing information about potential targeted therapies to better inform treatment decisions.
- The test for the intended use as a broad molecular profiling tool to identify biomarkers present in the tumor are not considered as medical necessary. It must be conducted for FDA-approved therapies as companion test.

FoundationOne testing, either CDx or liquid CDx, is allowed once per lifetime for one type of cancer to guide targeted therapy.

Only one of the two tests (procedure code 0037U or procedure code 0239U) is allowed for those who meet the medical necessity criteria for FoundationOne. It is the responsibility of the ordering provider to choose which test to perform for those who meet the medical criteria for FoundationOne.

3.4.4 Prior Authorization Requirements for Transplant Rejection Testing

Transplant Rejection testing involves an immune response to a transplanted organ. The client's immune system recognizes the donated organ as "foreign," thereby initiating an immune response as if the transplanted organ was a foreign antigen. This response may cause the transplanted organ to fail. Gene expression profiling tests and serum cell-free DNA evaluation are possible ways to monitor organ transplant rejection.

Transplant Rejection testing is considered medically necessary when all of the following are met:

- The transplant rejection test must provide information about at least one of the two following clinical status determinations:
  - Active Rejection (AR) status, or
  - Cellular or Antibody-mediated rejection (ACR or AMR) status
- The intended use of the transplant rejection test must be:
  - To assist in the evaluation of adequacy of immunosuppression, wherein a non-invasive or minimally invasive test can be used in lieu of a tissue biopsy in a client for whom information from a tissue biopsy would be used to make a management decision regarding immunosuppression, or
  - As a rule-out test for AR in validated populations of clients with clinical suspicion of rejection with a non-invasive or minimally invasive test to make a clinical decision regarding obtaining a biopsy, or
  - For further evaluation of allograft status for the probability of allograft rejection after a physician assessed pretest, or
  - To assess rejection status in clients that have received a biopsy, but the biopsy results are inconclusive or limited by insufficient material.
- For a given client encounter, only one molecular transplant rejection test for assessing allograft status may be performed unless a second transplant rejection test, meeting all the criteria established herein, is reasonable and necessary as an adjunct to the first test.

For heart transplant recipients who are 15 years of age or older and who are 55 or more days post-transplant, the use of procedure code 81595 is considered medically necessary at the following frequency:

- Every month for clients who are 2–12 months post-transplant.
- Every three months for clients who are greater than 12 months post-transplant.
- Every six months for clients who are greater than 36 months post-transplant.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

For heart transplant clients who are 15 years of age or older and who are 28 or more days post-transplant, the use of donor-derived, cell-free DNA tests procedure codes 0493U and 0540U is considered medically necessary at the following frequency:

- Every month for clients who are 1–12 months post-transplant.
- Every three months for clients who are greater than 12 months post-transplant.
- Every six months for clients who are greater than 36 months post-transplant.

For any other organ transplant not listed above (e.g., lungs, liver), the use of donor-derived cell-free DNA tests is considered not medically necessary.

For any other organ transplant not listed above (e.g., kidneys, lungs, liver), the use of peripheral blood gene expression profiling tests is considered not medically necessary.

To assess for rejection and injury in transplanted organs, mRNA expression profiling of biopsied tissue from a transplanted organ is considered not medically necessary.

To assist in the detection of moderate grade 2R/grade 3 heart transplant rejection, the measurement of volatile organic compounds is considered not medically necessary.

3.5 Breast Cancer Gene 1 and 2 (BRCA) Testing

Breast Cancer Gene 1 and 2 (BRCA) testing services are benefits of Texas Medicaid when billed with the following procedure codes:

Procedure Codes									
81162	81163	81164	81165	81166	81167	81212	81215	81216	81217

Breast cancer gene 1, early onset (BRCA1) and breast cancer gene 2, susceptibility protein (BRCA2) are tumor repressor genes responsible for keeping breast cells from growing too rapidly or in an uncontrolled way. Mutations within the gene interrupt this regulatory function and increase the risk of breast and ovarian cancer, have been linked to other types of cancer such as pancreatic and prostate, and can be inherited from a person's mother or father.

> ***Note:*** *Coverage of BRCA mutation analysis testing, including large rearrangement gene mutation analysis testing, are based on the National Comprehensive Cancer Network (NCCN) guidelines.*

Interpretation of gene mutation analysis results is not separately reimbursable. Interpretation is part of the physician E/M service.

BRCA gene mutation analysis testing must be ordered based on familial medical history and the availability of previous familial gene mutation analysis testing results and only if the test results will affect treatment decisions or provide prognostic information.

Unaffected male or females with a family history of breast cancer, including diagnosis of ductal carcinoma in situ (DCIS), should only be considered for testing when the appropriate affected family member is unavailable. Clinical judgment should be used to determine if the client has a reasonable likelihood of a mutation, considering the client's current age and the age of the unaffected female relatives who link the client with the affected relatives.

It is mandatory that a client who is at risk for BRCA1, BRCA2, or BRCA large rearrangement genetic mutation receive genetic counseling before and after BRCA gene mutation testing.

BRCA gene mutation analysis testing (procedure codes 81162, 81163, 81164, 81165, 81166, 81167, 81212, 81215, 81216, 81217) is limited to once per lifetime.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The ordering provider is responsible for ordering the appropriate BRCA test (e.g., BRCA1 versus BRCA2) based on medical necessity of the testing criteria and genetic counseling results. If a client's BRCA test has a positive result, any further BRCA testing services requested with documentation of medical necessity will be considered on a case-by-case basis by Medical Director review for prior authorization.

Procedure codes 81162 and 81163 are for comprehensive BRCA gene mutation analysis testing. Procedure 81162 may only be used for clients who meet the criteria for both BRCA comprehensive and BRCA large rearrangement gene mutation analysis testing.

3.5.1 Genetic Counseling

Genetic counseling must be provided by a trained genetic counselor, nurse specialist in genetics, or other medical provider possessing expertise in genetic counseling for clients before and after BRCA gene mutation testing.

Both pre- and post-test counseling must provide the depth of content and time for the client to make an informed testing decision. The genetic counseling must be nondirective, and information about the purpose and nature of the tests must be provided to the client.

Pre-test genetic counseling must include:

- The risks and benefits of the specific genetic testing.
- The limitations of the specific genetic testing to be performed and the limitations of interpreting test results for an unaffected individual.

3.5.2 Documentation

Providers must maintain the following gene mutation analysis testing documentation in the client's medical record:

- The appropriateness of the genetic testing
- The client's specific high-risk criteria
- The benefit of the specific genetic testing to be performed
- Pre-testing genetic counseling, including all of the following:
  - Pre-test counseling date with the name and qualifications of the counseling professional
  - The risks, benefits, and limitations discussed with the client
  - The client's ability to understand the risks, benefits, and limitations and the client's informed choice to proceed with the specific gene mutation analysis testing as evidenced by the client's signature on a consent form specific to the genetic mutation testing to be performed.
- The client's previous BRCA comprehensive gene mutation analysis testing results to support medical necessity for ordering BRCA gene mutation analysis testing
- Post-testing genetic counseling, including all the following:
  - Post-test counseling date with the name and qualifications of the counseling professional
  - The client's ability to understand the results of the gene mutation analysis testing and the appropriate medical treatment resulting from the test results.
- The client's treatment plan and any treatment plan changes based on interpretation of the test results

The medical record is subject to retrospective review.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

3.5.3 Prior Authorization for BRCA Testing

Prior authorization is required for initial BRCA testing (procedure codes 81162, 81163, 81164, 81165, 81166, 81167, 81212, 81215, 81216, 81217).

For clients with a known familial BRCA variant, targeted testing for BRCA1 (procedure code 81215) and BRCA2 (procedure 81217) for the specific variant must be performed before utilizing more comprehensive tests.

If the client is of Ashkenazi Jewish, Icelandic, Swedish, or Hungarian descent, testing for the three known founder variants (procedure code 81212) should be performed first.

The prior authorization request must include documentation that indicates that the client meets one or more of the criteria below:

- An individual (male or female) from a family with a known deleterious BRCA1/BRCA2 mutation
- A female with a personal history of breast cancer, including invasive or ductal carcinoma in situ (DCIS), diagnosed at age 45 years or younger
- A female with a personal history of breast cancer, including DCIS, diagnosed at any age and of an ethnicity associated with higher mutation frequency, such as: Ashkenazi Jewish, Icelandic, Swedish, or Hungarian descent
- A female with a personal history of epithelial ovarian cancer, including fallopian tube and primary peritoneal cancers, diagnosed at any age
- A male with a personal history of breast cancer, including DCIS, diagnosed at any age
- A female with a personal history of breast cancer, including DCIS, diagnosed at age 50 years or younger, and has one of the following:
  - An additional primary (2 primary sites, including bilateral or clearly separate ipsilateral) tumors occurring either synchronously or asynchronously
  - At least one close blood relative with breast cancer at any age
  - An unknown or limited family history
- A female with a personal history of breast cancer, including DCIS, diagnosed at age 60 years or younger with triple negative breast cancer
- A female with a personal history of breast cancer, including DCIS, diagnosed at any age, and has one of the following:
  - At least one close blood relative with breast cancer diagnosed at age 50 years or younger
  - At least two close blood relatives with breast cancer at any age
  - At least one close blood relative with epithelial ovarian cancer, including fallopian tube and primary peritoneal cancers
  - At least two close blood relatives with pancreatic cancer or prostate cancer (Gleason score 7 or greater) at any age
  - A close male blood relative with breast cancer at any age
- A male or female with a personal history of pancreatic cancer or prostate cancer (Gleason score 7 or greater) at any age regardless of ancestry with at least two close blood relatives with one of the following:
  - Breast cancer
  - Ovarian cancer, including fallopian tube and primary peritoneal cancers
  - Prostate cancer (Gleason score 7 or greater)

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

    - Pancreatic cancer
- A male or female with a personal history of pancreatic cancer at any age and of an ethnicity associated with higher mutation frequency, such as Ashkenazi Jewish, Icelandic, Swedish, or Hungarian descent and one or more close blood relatives with pancreatic cancer
- A male or female with a family history of breast or ovarian cancer, including DCIS with one of the following:
    - At least one first or second degree blood relative meeting any of the criteria above; or
    - At least one third degree blood relative who has breast cancer, including DCIS, or ovarian cancer, including fallopian tube and primary peritoneal cancers, and at least two close blood relatives with one of the following:
        - Breast cancer, including DCIS, of which at least one with breast cancer was diagnosed at 50 years of age or younger
        - Ovarian cancer, including fallopian tube and primary peritoneal cancers

Note: *The term "close blood relative" includes first-degree male or female relatives (e.g., parents, siblings), second-degree relatives (e.g., aunts, uncles, grandparents), and third-degree relatives (e.g., first cousins, great grandparents), from the same side of the family as the client.*

Prior authorization for additional BRCA testing may be considered on a case-by-case basis by Medical Director review when testing criteria for these studies are met for clients who:

- Have previously been tested for BRCA sequencing gene mutation analysis testing and received negative results. Documentation of negative results for all previous BRCA1 sequencing gene mutation analysis testing is required.
- Every reasonable effort and documentation of the specific efforts made to obtain the previous BRCA sequencing gene mutation analysis test results from the client's genetic testing physician or the testing laboratory.

A completed Hereditary Breast and Ovarian Cancer (HBOC) Genetic Testing Prior Authorization Request Form that has been signed and dated by the ordering provider must be submitted.

A provider's signature on a submitted document indicates that the provider certifies, to the best of the provider's knowledge, the information in the document is true, accurate, and complete.

For comprehensive sequencing (procedure codes 81162 or 81163), the ordering physician must indicate one of the following on the prior authorization request form:

- The client's familial genetic history that supports medical necessity for the requested BRCA1 and BRCA2 comprehensive sequencing gene mutation analysis testing.
- Every reasonable effort was made to obtain the client's familial genetic history and have been unable to obtain BRCA1 and BRCA2 comprehensive sequencing gene mutation analysis testing results for the affected family member(s). Documentation of the specific efforts made to obtain the client's familial genetic history must be submitted with the request.

To facilitate a determination of medical necessity and avoid unnecessary denials, the ordering physician must provide correct and complete information, including accurate medical necessity of the services requested. Medical documentation that is submitted by the ordering physician must verify the client's diagnosis or family history. Requisition forms from the laboratory are not sufficient for the establishment of a client's personal and family history.

To complete the prior authorization process, the ordering provider must mail or fax the request to the TMHP Special Medical Prior Authorization Unit and include documentation of medical necessity.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

A request for retroactive authorization must be submitted no later than seven calendar days beginning the day after the lab draw is performed.

3.6 Genetic Testing for Colorectal Cancer

Genetic testing is provided to clients who have a first- or second-degree relative who has or has had colorectal cancer in order to determine if the client may have increased risk for developing colorectal cancer.

Note: *A first-degree relative is defined as: sibling, parent, or offspring. A second-degree relative is defined as: uncle, aunt, grandparent, nephew, niece, or half-sibling.*

Interpretation of gene mutation analysis results are part of the evaluation and management service and will not be reimbursed separately.

Genetic test results, when informative, may influence clinical management decisions. The documentation that is maintained in the client's medical record must reflect that the client or family member has been given information on the nature, inheritance, and implications of genetic disorders to help them make informed medical and personal decisions prior to the genetic testing. The testing must be medically necessary and supported by documentation with a clear rationale for testing, which must be retained in the client's medical record and made available upon request.

3.6.1 Documentation Requirements

Providers must maintain the following documentation in the client's medical record for genetic testing for colorectal cancer:

- Documentation of formal pre-test counseling, including assessment of the client's ability to understand the risks and limitations of the test.
- The client's informed choice to proceed with the genetic testing for colorectal cancer.

The ordering provider must select the test based on the familial medical history and the availability of previous family testing results. The medical record is subject to retrospective review.

Refer to: The appropriate Texas Medicaid fee schedule on the TMHP website at www.tmhp.com for genetic testing procedure codes that may be reimbursed.

3.6.2 Authorization Requirements

Prior authorization is required for gene mutation analysis. A completed Special Medical Authorization (SMPA) Request Form, signed and dated by the provider rendering direct care, must be submitted to the TMHP Prior Authorization Department via mail, fax, or the electronic portal. Prior authorized services may be reimbursed once per lifetime when billed by any provider. Additional services will not be prior authorized.

Prior authorization requests may be considered for Familial Adenomatous Polyposis (FAP) testing for clients of any age with well defined hereditary cancer syndromes and for which either a positive or negative result will change medical care. The client for whom the request is made must have more than 20 polyps or a first-degree relative with FAP and a documented mutation.

Note: *Clients who are seven years of age or younger must have clear rationale for testing and documentation of medical necessity from the client's medical record must be submitted with the prior authorization request.*

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Prior authorization requests may be considered for Hereditary Nonpolyposis Colorectal Cancer (HNPCC) testing for clients of any age. Testing for HNPCC is used to determine whether an individual has an increased risk for colorectal cancer or other HNPCC-associated cancers. Results of the test may influence clinical management decisions. The request must include one or more of the following criteria for testing:

- The client has three or more family members (at least one must be a first-degree relative) who have colorectal cancer, and FAP has been ruled out. Two successive generations were affected, and one or more of the relatives was diagnosed with colorectal cancer at 50 years of age or younger.
- The client has had two HNPCC cancers.
- The client has colorectal cancer and a first-degree relative who also has colorectal cancer or HNPCC extracolonic cancer at 50 years of age or younger or colorectal adenoma at 40 years of age or younger.
- The client has had colorectal cancer or endometrial cancer at 50 years of age or younger.
- The client has had right-sided colorectal cancer with an undifferentiated pattern on histology at 50 years of age or younger.
- The client has had signet-cell type colorectal cancer at 50 years of age or younger.
- The client has had colorectal adenoma at 40 years of age or younger.
- The client is an asymptomatic individual with a first- or second-degree relative with a documented HNPCC mutation.

Note: *Clients who are 20 years of age or younger must have clear rationale for testing and documentation of medical necessity from the client's medical record must be submitted with the prior authorization request.*

The ordering provider's signature on a submitted document indicates that the provider certifies, to the best of the provider's knowledge, the information in the document is true, accurate, and complete.

Requisition forms from the laboratory are not sufficient for verification of the personal and family history.

To facilitate a determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including accurate medical necessity of the services requested. Medical documentation that is submitted by the physician must verify the client's diagnosis or family history.

Guidelines for MLH1 and MLH2 mutation testing are based on guidelines established by the American College of Medical Genetics and the American Gastroenterological Association.

A request for retroactive authorization must be submitted no later than seven calendar days beginning the day after the lab draw is performed.

3.7 Pharmacogenetics

Refer to: Subsection 9.2.43, "Pharmacogenetics" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*)

3.8 Exclusions

The following services are not benefits of the Texas Medicaid Program:

- Genetic testing that is not supported by medical and scientific evidence as outlined in S.B. 989 Biomarker, or that does not show evidence of clinical utility. Clinical utility is defined under S.B.989 Biomarker Sec. 1372.003(a)(1-5), as a test result that provides information that is used in the formu-

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

lation of a treatment or monitoring strategy that informs a patient's outcome and impacts the clinical decision. The most appropriate test may include both information that is actionable and some information that cannot be immediately used in the formulation of a clinical decision.

- Genetic testing that does not predominately address the acute or chronic issue for which the test is being ordered, except that a test may include some information that cannot be immediately used in the formulation of a clinical decision.

4 Radiological and physiological laboratory services

4.1 Enrollment

To enroll in Texas Medicaid, physiological laboratory, portable X-ray supplier, independent diagnostic testing facility (IDTF), and radiological laboratory providers must be actively enrolled in Medicare.

4.1.1 Enrollment Criteria for Mammography Providers

All mammography providers, including those providing stereotactic biopsies, must be certified by the Bureau of Radiation Control (BRC).

Additionally, the Department of State Health Services (DSHS) issues mammography certification to providers who render mammography services. Providers can submit this certification to the TMHP Provider Enrollment Department in lieu of certification issued by the Food and Drug Administration (FDA), because a mammography certification issued by DSHS is recognized by the FDA. TMHP will also accept mammography certification issued by the FDA. The certificate will contain the BRC certification number, dates of issue and expiration, type of service, and Texas Medicaid and Children with Special Health Care Needs (CSHCN) Services Program provider identifiers.

Providers must check the expiration date of their mammography certification and submit an updated mammography certification prior to the expiration date. The certifications can be uploaded to the Provider Enrollment and Management System (PEMS).

4.2 * Services, Benefits, Limitations, and Prior Authorization

The following high-technology radiology services may be reimbursed by Texas Medicaid with prior authorization:

- Cardiac nuclear imaging
- Computed tomography (CT)
- Computed tomography angiography (CTA)
- Functional MRI (fMRI)
- Magnetic resonance angiography (MRA)
- Magnetic resonance elastography (MRE)
- Magnetic resonance imaging (MRI)
- Positron emission tomography (PET) scan imaging

Note: *Providers and facilities are required to use the lowest possible radiation dose that is consistent with acceptable image quality for cardiac nuclear imaging, CT, and PET examinations of all clients. It is recommended that providers and facilities use national standards such as those established by the American College of Radiology (ACR) in their ACR Practice Guidelines and Technical Standards manual.*

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Radiology interpretations in any place of service will be denied if they are billed by the attending physician. Services that are billed by the attending physician are included in the facility fee and are not reimbursed separately.

Note: *The 3-dimensional (3-D) obstetric ultrasound is not a benefit of Texas Medicaid.*

Refer to: ***[Revised]*** The appropriate radiology service authorization section for exceptions to prior authorization requirements.

4.2.1 Cardiac Nuclear Imaging

Cardiac nuclear imaging is a benefit of Texas Medicaid and may be reimbursed using the following procedure codes:

Procedure Codes									
78414	78428	78451	78452	78453	78454	78466	78468	78472	78473
78481	78483	78494	78496						

The cardiac nuclear imaging study may be reimbursed separately from the diagnostic radiopharmaceutical.

Refer to: The online fee lookup (OFL) or the applicable fee schedules on the TMHP website at www.tmhp.com to review the diagnostic radiopharmaceuticals that are reimbursed by Texas Medicaid.

4.2.1.1 Authorization Requirements

Authorization is required for cardiac nuclear imaging.

Refer to: Subsection 4.2.6, "Authorization Requirements for Cardiac Nuclear Imaging Services, CT, CTA, fMRI, MRA, MRE, MRI, and PET" in this handbook.

4.2.2 Computed Tomography, Magnetic Resonance Imaging, and Related Services

CT, CTA, fMRI, MRA, MRE, MRI, and ultrasound transient elastography (TE) services are benefits of Texas Medicaid.

The following procedure codes may be reimbursed with prior authorization for CT, CTA, fMRI, MRA, MRE, and MRI radiology services:

Procedure Codes									
70336	70450	70460	70470	70471	70472	70473	70480	70481	70482
70486	70487	70488	70490	70491	70492	70496	70498	70540	70542
70543	70544	70545	70546	70547	70548	70549	70551	70552	70553
70554	70555	71250	71260	71270	71271	71275	71550	71551	71552
71555	72125	72126	72127	72128	72129	72130	72131	72132	72133
72141	72142	72146	72147	72148	72149	72156	72157	72158	72159
72191	72192	72193	72194	72195	72196	72197	72198	73200	73201
73202	73206	73218	73219	73220	73221	73222	73223	73225	73700
73701	73702	73706	73718	73719	73720	73721	73722	73723	73725
74150	74160	74170	74174	74175	74176	74177	74178	74181	74182
74183	74185	75557	75559	75561	75563	75565	75571	75572	75573
75574	75577	75580	75635	76376	76377	76380	76390	76391	76497
76498	77011	77046	77047	77048	77049	77084			

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The professional component may be reimbursed when the service is rendered in the office, inpatient hospital, or outpatient hospital setting by physician providers.

The technical component will be a benefit when rendered in the office setting by physician, radiation treatment center, portable X-ray supplier, radiological laboratory, and physiological laboratory providers.

Procedure codes 76497 and 76498 will be a benefit when rendered in the outpatient hospital setting by radiation treatment center providers.

The following revenue codes must be billed with the most appropriate corresponding procedure code for CT, CTA, fMRI, MRA, MRE, and MRI radiology services rendered by outpatient hospital providers:

Revenue Codes									
350	351	352	359	610	611	612	619		

The addition of post 3-D reconstruction (procedure codes 76376 and 76377) CT, CTA, MRA, and MRI studies must be prior authorized. No additional payment will be made in absence of prior authorization.

4.2.2.1 Functional MRI (fMRI)

Texas Medicaid considers fMRI medically necessary when it is being used as part of a preoperative evaluation for a planned craniotomy and is required for localization of eloquent areas of the brain, such as those responsible for speech, language, motor function, and senses, which might potentially be put at risk during the proposed surgery.

Neurofunctional testing procedure code 96020 must be reported in conjunction with brain fMRI procedure code 70555. Procedure code 96020 is informational and will not be reimbursed separately.

4.2.2.2 Intraoperative MRI (iMRI)

Indications for intracranial neurosurgical procedures using intraoperative MRI (iMRI) include, but are not limited to, the following:

- Oncologic neurosurgical procedures
- Epilepsy
- Chiari surgery
- Deep brain stimulators

Only one iMRI procedure code may be billed per operative session. Procedure codes 70557, 70558, and 70559 must not be billed in conjunction with procedure code 61751, 77021, or 77022.

Intraoperative MRI procedure codes 70557, 70558, and 70559 that are billed with modifier 26 may be reimbursed to physician providers for interpretation.

Procedure codes 75559 and 75563 must be billed in conjunction with stress testing procedure codes 93015, 93016, 93017, and 93018.

4.2.2.2.1 Laser Interstitial Thermal Therapy (LITT)

Laser interstitial thermal therapy (LITT) is an iMRI procedure used when a patient has one of the following diagnoses and is not a surgical candidate:

- Relapsed brain metastasis
- Acute cerebrovascular insufficiency
- Radiation Necrosis
- Secondary malignant neoplasm of brain

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

LITT therapy is billed under procedure codes 61736 or 61737, and requires prior authorization.

4.2.2.3 Magnetic Resonance Elastography (MRE)

MRE is a diagnostic tool for assessing hepatic fibrosis by relying on visualization of the passage of acoustic waves through liver tissue while the patient is undergoing magnetic resonance imaging (MRI). MRE combines MRI imaging with low-frequency vibrations to create a visual map (elastogram) that identifies stiffness of the liver.

MRE (procedure code 76391) may be reimbursed for diagnosis or monitoring of liver fibrosis or cirrhosis in clients suspected of having, or who have been diagnosed with chronic liver disease.

Performance of MRE may be reimbursed two times per rolling year. Performance of MRE may not be reimbursed within 6 months following a liver biopsy or TE, as it is not medically necessary.

4.2.2.4 * Ultrasound Transient Elastography (TE)

TE is a noninvasive device that uses a patented ultrasound-controlled attenuation parameter (CAP) technology, and aspartate-aminotransferase (AST) values to detect or monitor liver fibrosis. TE involves the analysis of ultrasonographic wave propagation and tissue deformation in patients suspected of having or diagnosed with chronic liver disease. TE is used to measure the presence and extent of liver fibrosis.

TE (procedure code 91200) may be reimbursed for the diagnosis or monitoring of liver fibrosis or cirrhosis in clients suspected of having, or who have been diagnosed with chronic liver disease.

Reimbursement for procedure code 91200 is limited to the following diagnosis codes:

[Revised] Diagnosis Codes									
K710	K7110	K7111	K712	K713	K714	K7150	K7151	K716	K717
K718	K719	K7400	K7401	K7402	K740A	K742	K7581	K760	

Performance of TE may be reimbursed up to two times per rolling year. Performance of TE may not be reimbursed within 6 months following a liver biopsy or MRE, as it is not medically necessary.

TE may be inappropriate and ineffective in clients with obesity, ascites, or narrow intercostal spaces.

4.2.2.5 Authorization Requirements and Flexibility

Authorization is required for CT, CTA, fMRI, MRA, MRE, and MRI procedures.

Note: *Intraoperative MRI (iMRI) does not require prior authorization, except for LITT (procedure codes 61736 and 61737), which does require prior authorization. TE does not require prior authorization (procedure code 91200).*

Refer to: Subsection 4.2.6, "Authorization Requirements for Cardiac Nuclear Imaging Services, CT, CTA, fMRI, MRA, MRE, MRI, and PET" in this handbook.

If the ordering physician or radiologist determines that a CT, CTA, fMRI, MRA, MRE, or MRI procedure that is different from the authorized procedure is required or that additional procedures are required, the following will apply:

- The procedure performed is less complex than the procedure authorized but of the same modality (e.g., an MRI with contrast is prior authorized and the actual procedure performed is an MRI without contrast). Full reimbursement is allowed for the billed procedure.
- The authorized procedure is performed and an additional higher-level procedure of the same modality is deemed medically necessary within the same authorization period. A separate authorization is required. The additional procedure must be prior authorized separately and submitted on a separate claim.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The procedure billed is more complex than the procedure authorized but of the same modality. No authorization update will result in reimbursement according to the rate of the lesser authorized code. For full reimbursement of the more complex procedure, the authorization requires an update.

The following table includes the recognized relationships for authorization flexibility:

Level 1 (High)	Level 2 (Moderate)	Level 3 (Low)
70470	70460	70450
70471	70482	70481
70472	70480	70488
70473	70487	70486
70492	70491	70490
70543	70542	70540
70546	70545	70544
70549	70548	70547
70553	70552	70551
71270	71260	71250
71552	71551	71271
72127	72126	71550
72130	72129	72125
72133	72132	72128
72156	72142	72131
72157	72147	72141
72158	72149	72146
72194	72193	72148
72197	72196	72192
73202	73201	72195
73220	73219	73200
73223	73222	73218
73702	73701	73221
73720	73719	73700
73723	73722	73718
74170	74160	73721
74178	74177	74150
74183	74182	74176
75559	75557	74181
75563	75561	

4.2.3 Positron Emission Tomography (PET) Scan Imaging

PET scan imaging services are benefits of Texas Medicaid and may be reimbursed using the following procedure codes:

Procedure Codes						
78608	78811	78812	78813	78814	78815	78816

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Procedure codes 78459, 78491, and 78492 are not reimbursed by Texas Medicaid.

The PET scan procedure may be reimbursed separately from the diagnostic radiopharmaceutical.

Refer to: The online fee lookup (OFL) or the applicable fee schedules on the TMHP website at www.tmhp.com to review the diagnostic radiopharmaceuticals that are reimbursed by Texas Medicaid.

4.2.3.1 Authorization Requirements

Prior authorization is required for PET imaging services.

Refer to: Subsection 4.2.6, "Authorization Requirements for Cardiac Nuclear Imaging Services, CT, CTA, fMRI, MRA, MRE, MRI, and PET" in the *Radiology and Laboratory Services Handbook* (*Vol. 2, Provider Handbooks*).

4.2.4 Radiology/Diagnostic Imaging

Radiography and radiology/diagnostic imaging may be reimbursed by Texas Medicaid using the following procedure codes:

Procedure Codes									
33880	33881	33882	33883	33886	74775				

Procedure code 74775 may be reimbursed for services rendered to clients who are 20 years of age and younger.

4.2.4.1 Authorization Requirements

Prior authorization is not required for the radiology/diagnostic imaging procedure codes in this section.

4.2.5 Physician-Performed Radiology Services

Refer to: Subsection 9.2.65, "Radiology Services" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*).

4.2.6 Authorization Requirements for Cardiac Nuclear Imaging Services, CT, CTA, fMRI, MRA, MRE, MRI, and PET

Prior authorization is not required for emergency department services, outpatient observation services, or inpatient hospital radiology services.

Prior authorization is required for outpatient nonemergent services (i.e., those that are planned or scheduled). Prior authorization must be obtained before the service is rendered.

The following table summarizes the authorization requirements for cardiac nuclear imaging services, CT, CTA, fMRI, MRA, MRE, MRI, and PET:

Condition	Authorization Requirements
Emergency department visit	Authorization is not required for emergency department radiology services that are rendered during an emergency department visit. • For professional claims, the appropriate radiology procedure code must be billed with modifier U6. • The facility may be reimbursed using the appropriate, corresponding emergency services revenue code.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Condition	Authorization Requirements
Outpatient observation	Authorization is not required for radiology services rendered during outpatient observation. • For professional claims, the appropriate radiology procedure code must be billed with modifier U6. • The facility may be reimbursed using the appropriate, corresponding outpatient observation revenue code.
Nonemergent condition: planned or scheduled radiology service	Texas Medicaid defines a nonemergent condition as a symptom or condition that is neither acute nor severe and can be diagnosed and treated immediately, or that allows adequate time to schedule an office visit for a history, physical, or diagnostic studies prior to diagnosis and treatment. Prior authorization is required for outpatient nonemergent (i.e., those studies that are planned or scheduled) cardiac nuclear imaging services, CT, CTA, fMRI, MRA, MRE, MRI, and PET scan. ***Important:*** *The authorization number must be on the claim when it is submitted to TMHP for reimbursement. Only one authorization is allowed per claim. For the most accurate and efficient claims processing, TMHP recommends that the procedure code that is submitted on the claim match the procedure code that is authorized. Providers are encouraged to contact TMHP and update the prior authorization if the ordering physician or radiologist changes the actual procedure that is performed. Providers have 14 calendar days after the day on which the study was completed to update the prior authorization.* Additional or alternate studies identified and ordered by the radiologist at the time of a prior-authorized study meet the definition of urgent condition and require retroactive authorization. ***Refer to:*** Subsection 4.2.6.1, "Retroactive Authorization" in this handbook.
Outpatient urgent condition	Retroactive authorization is required for unplanned radiology procedures performed during other planned or scheduled outpatient visits or procedures. Texas Medicaid defines an urgent condition as a symptom or condition that is not an emergency, but requires further diagnostic work-up or treatment within 24 hours to avoid a subsequent emergent situation. ***Refer to:*** Subsection 4.2.6.1, "Retroactive Authorization" in this handbook. ***Note:*** *Additional or alternate studies identified and ordered by the radiologist at the time of a prior-authorized study meet the definition of urgent condition and require retroactive authorization.*

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Condition	Authorization Requirements
Outpatient emergent condition	Retroactive authorization is required for unplanned radiology procedures performed during other planned or scheduled outpatient visits or procedures. Texas Medicaid defines an emergent condition as a medical condition (including emergency labor and delivery) manifesting itself by acute symptoms of sufficient severity (including severe pain, psychiatric disturbances, or symptoms of substance use) such that a prudent layperson with an average knowledge of health and medicine could reasonably expect the absence of immediate medical attention to result in at least one of the following: • Placing the recipient's health (or, with respect to a pregnant woman, the health of the woman or her unborn child) in serious jeopardy • Serious impairment to bodily functions • Serious dysfunction to any bodily organ or part The physician must determine that a medical emergency, which imminently threatens life or limb exists and that the medical emergency requires advanced diagnostic imaging. ***Refer to:*** Subsection 4.2.6.1, "Retroactive Authorization" in this handbook.
Inpatient hospital	Authorization is not required for inpatient hospital radiology services.

Prior authorization of nonemergent services is considered on an individual basis, adhering to standard clinical evidence-based guidelines. Documentation must support medical necessity for the service and must be maintained in the client's medical record, both by the ordering physician (i.e., the physician who orders the study) and the performing facility.

Nationally-accepted guidelines and radiology protocols based on medical literature are used in the authorization processes for urgent, emergent, and nonemergent services. These include, but are not limited to:

- American College of Radiology (specifically, their Appropriateness Criteria)
- American Academy of Neurology
- American Academy of Orthopedic Surgeons
- American College of Cardiology
- American Heart Association
- National Comprehensive Cancer Care Network

Refer to: Subsection 4.2.2.5, "Authorization Requirements and Flexibility" in this handbook for information about authorization flexibility for CT, CTA, fMRI, MRA, and MRI procedures.

4.2.6.1 Retroactive Authorization

A request for retroactive authorization for an emergent or urgent cardiac nuclear imaging service, CT, MR, or PET must be submitted no later than 14 calendar days after the day on which the study was completed.

Retroactive authorization of urgent or emergent services is considered on an individual basis, adhering to standard clinical evidence-based guidelines. Documentation must support medical necessity for the study and must be maintained in the client's medical record, both by the ordering physician (i.e., the physician ordering the study) and the performing facility.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Retroactive authorization for outpatient urgent services is considered when all of the following criteria are met:

- The physician who renders the imaging service determines, during the provision of prior-authorized services, that additional or alternate procedures are medically indicated.
- The urgent condition requires additional or alternate advanced diagnostic imaging.

Retroactive authorization for outpatient emergent services is considered when all of the following criteria are met:

- The physician determines that a medical emergency that imminently threatens life or limb exists.
- The medical emergency requires advanced diagnostic imaging.

Retroactive authorization is not required when a prior-authorized CT or MR procedure is changed by the ordering physician or radiologist to a lesser procedure of the same modality (e.g., MRI with contrast is authorized and the actual procedure performed is MRI without contrast).

Documentation of medical necessity for a liver biopsy (procedure code 47000 or 47100) performed within 6 months following TE (procedure code 91200) or MRE (procedure code 76391) must be maintained in the client's records and is subject to retrospective review.

4.2.6.2 Request Form and Documentation

Regardless of method of submission, the ordering physician must complete and retain the Radiology Prior Authorization Request Form with an original signature in the client's medical record.

Providers must submit the form with the request information related to the medical necessity for the service, including all of the following:

- Diagnosis
- Treatment history
- Treatment plan
- Medications that the client is currently taking
- Previous imaging results

Providers may also be asked to provide additional documentation as necessary during the authorization process.

Section A of the Radiology Prior Authorization Request Form must be completed, signed, and dated by the ordering physician before requesting prior authorization, regardless of the method of request for authorization.

Section B of the Radiology Prior Authorization Request Form must be completed, signed, and dated by the physician who performs the service prior to requesting retroactive authorization for urgent or emergent studies.

Residents, physician assistants (PAs), and nurse practitioners (NPs) may order radiological procedures; however, the ordering or referring clinician must sign the authorization form and provide the group or supervising provider's NPI.

Refer to: Section 3, "Inpatient Hospital (Medical/Surgical Acute Care Inpatient Facility)" in the *Inpatient and Outpatient Hospital Services Handbook* (*Vol. 2, Provider Handbooks*).

Section 9, "Physician" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*) for more information on MRI and contrast material.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

4.2.6.3 Methods of Submission

Authorization requests for cardiac nuclear imaging studies, CT, CTA, fMRI, MRA, MRE, MRI, and PET for Texas Medicaid clients must be submitted to TMHP. Providers can submit authorizations to TMHP:

- By fax to 833-912-1129
- By mail to:

Texas Medicaid & Healthcare Partnership
Radiology Prior Authorization
12365A Riata Trace Parkway
Austin, TX 78727

Requests for retroactive authorization may be submitted by fax or mail.

4.2.7 Additional Radiology and Physiological Laboratory Services

4.2.7.1 Ambulatory Electroencephalogram

Refer to: Subsection 9.2.26.2, "Ambulatory and Long-Term Electroencephalogram (Ambulatory EEG)" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*).

4.2.7.2 Brachytherapy

Refer to: Subsection 9.2.64.1, "Brachytherapy" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*).

4.2.7.3 Diagnostic Doppler Sonography

Refer to: Subsection 9.2.27, "Diagnostic Doppler Sonography" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*).

4.2.7.4 Electrocardiograms

Refer to: Subsection 9.2.26.6, "Electrocardiogram (ECG)" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*).

4.2.7.5 Electromyography (EMG) and Nerve Conduction Studies (NCS)

Refer to: Subsection 9.2.26.7, "Esophageal pH Probe Monitoring" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*) for more information.

Subsection 4.2.10, "Electrodiagnostic (EDX) Testing" in the *Inpatient and Outpatient Hospital Services Handbook* (*Vol. 2, Provider Handbooks*).

4.2.7.6 Esophageal pH Probe Monitoring

Refer to: Subsection 9.2.26.7, "Esophageal pH Probe Monitoring" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*).

4.2.7.7 Mammography Services

The following procedure codes will be denied if the provider does not have a BRC mammography certification on file:

Procedure Codes		
77032	77053	77054

Refer to: Subsection 9.2.15.4, "Prognostic Breast and Gynecological Cancer Studies" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*) for more information about mammography services.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

4.2.7.8 Nonsurgical Vision Services

Refer to: Subsection 4.3.6.2, "Ophthalmic Ultrasound" in the *Vision and Hearing Services Handbook* (*Vol. 2, Provider Handbooks*).

4.2.7.9 Obstetric Services

Refer to: Section 4, "Obstetric Services" in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook* (*Vol. 2, Provider Handbooks*).

4.2.7.10 Radiation Therapy Services

Refer to: Subsection 9.2.64, "Radiation Therapy" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*) for information about radiation therapy, including brachytherapy and stereotactic radiosurgery.

4.2.7.11 Screening and Diagnostic Studies of the Breast

Refer to: Subsection 9.2.15.3, "Mammography (Screening and Diagnostic Studies of the Breast)" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*).

4.2.7.12 Sleep Studies

Refer to: Subsection 9.2.72, "Sleep Studies" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*).

4.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including radiological and physiological laboratory services. Radiological and physiological laboratory services are subject to retrospective review and recoupment if documentation does not support the service billed.

4.4 Claims Filing and Reimbursement

4.4.1 Claims Information

Claims for radiological and physiological laboratory services and portable X-ray supplier services must include the referring or ordering provider. Radiological and physiological laboratory services and portable X-ray supplier services must be submitted to TMHP in an approved electronic format or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: "Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on electronic claims submissions.

"Section 6: Claims Filing" (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

4.4.1.1 Diagnosis Requirements

A diagnosis is not required with a provider's request for payment except when providing the following services:

- Ambulatory Electroencephalogram (A/EEG)

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Arteriogram
- Cardiac nuclear imaging
- Chest X-ray
- Computed tomography imaging (CT)
- Echography
- Electrocardiogram (ECG)
- Functional MRI (fMRI)
- Magnetic resonance angiography (MRA)
- Magnetic resonance imaging (MRI)
- Mammographies, noninvasive diagnostic studies
- Positron emission tomography (PET) scan
- Polysomnographies
- Venographies

Claims for all services provided to clients who are eligible for "Emergency Care Only" must have a diagnosis to be considered for reimbursement. As with all procedures billed to Texas Medicaid, most baseline screening or comparison studies are not a benefit.

Refer to: Section 9, "Physician" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*) for more information on these services.

4.4.1.2 Modifier Requirements for Type of Service Assignment

For the radiology, physiological lab, and X-ray procedures in this chapter, providers must bill modifier 26 for the interpretation component or modifier TC for the technical component. No modifier is necessary for the total component.

Refer to: Subsection 6.2.5, "Modifier Requirements for TOS Assignment" in "Section 6: Claims Filing" (*Vol. 1, General Information*).

Subsection 6.3.2, "Type of Service (TOS)" in "Section 6: Claims Filing" (*Vol. 1, General Information*).

4.4.2 Reimbursement

Radiological and physiological laboratory and portable X-ray supplier providers are reimbursed in accordance with 1 TAC §355.8085. Providers can refer to the Online Fee Lookup (OFL) or the applicable fee schedule on the TMHP website at www.tmhp.com.

Refer to: Subsection 2.2, "Fee-for-Service Reimbursement Methodology" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for more information about reimbursement.

Texas Medicaid pays only up to the amount allowed for the total component for the same procedure submitted for reimbursement by the same provider for the same client with the same date of service. Providers who perform the technical service and the interpretation must bill the total component. Providers who perform only the technical service must bill the technical component, and those who perform only the interpretation must bill the interpretation component. The total component and the technical or interpretation component for the same procedure are not reimbursed separately when billed by any provider with the same date of service; the first claim may be reimbursed and the additional claim(s) will be denied. Claims are considered for reimbursement based on the order in which they are received.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

For example, if a claim is received for the total component and TMHP has already made payment for the technical or interpretation component for the same procedure with the same date of service for the same client, regardless of provider, the claim for the total component is denied. The same is true if a total component has already been paid and claims are received for the individual components.

Radiology and physiological laboratory and portable X-ray services are not payable when the client is in an inpatient setting. The reimbursement for these services are included in the diagnosis-related group (DRG) payment.

Imaging services submitted by outpatient hospital providers may be reimbursed a flat fee.

Imaging services procedure codes can be found on the TMHP fee schedule website titled, "Hospital Outpatient Imaging Services."

Texas Medicaid implemented mandated rate reductions for certain services. The Online Fee Lookup (OFL) and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/resources/rate-and-code-updates/rate-changes.

4.4.2.1 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* and the *Texas Medicaid Bulletin* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals and bulletins. Providers should refer to the CMS NCCI web page for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

1 General Information

The information in this handbook is intended for school districts and healthcare providers who provide school-based health services for children aged 20 years and younger. This handbook contains information about Texas Medicaid benefits, policies, and procedures applicable to these providers.

Important: *All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver healthcare items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

All providers are required to report suspected child abuse or neglect as outlined in subsection 1.7, "Provider Responsibilities" in "Section 1: Provider Enrollment and Responsibilities" (Vol. 1, General Information).

2 School Health and Related Services (SHARS)

2.1 Overview

SHARS are direct medical services and transportation services available to children who are 20 years of age or younger, enrolled in Medicaid and are eligible to receive services under the Individuals with Disabilities Education Act (IDEA). The services must be included in the child's individualized education program (IEP) established under IDEA.

SHARS also includes audiology evaluation and management services provided to eligible students under Section 504 of the Rehabilitation Act of 1973. The services must be included in the child's written Section 504 Plan.

Local Education Agencies (LEAs), which include Texas independent school districts (ISDs) and public charter schools, must enroll in Texas Medicaid as a SHARS provider to be reimbursed for providing direct medical and transportation services to Medicaid enrolled students in a school setting.

The oversight of SHARS is a cooperative effort between the Texas Education Agency (TEA) and the Texas Health and Human Services Commission (HHSC).

According to Title 34 Code of Federal Regulations (CFR) §300.303, re-evaluations for SHARS services must occur at least once every 3 years, unless the parent and the public agency agree that a re-evaluation is unnecessary.

SHARS allows LEAs to be reimbursed for direct medical and transportation services that are determined to be medically necessary and are documented in the IEP.

The Centers for Medicare & Medicaid Services (CMS) require LEAs to be enrolled as SHARS Medicaid providers, participate in the Random Moment Time Study (RMTS), submit claims that are reimbursed on an interim basis, and submit an annual SHARS Cost Report.

To receive SHARS services, Medicaid-enrolled students must:

- Be enrolled in a public school's special education program; and

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Be 20 years of age or younger; and
- Have a disability or chronic medical condition; and
- Have an IEP documenting disability and medical necessity; or
  - An IEP is a written plan mandated by IDEA that is developed by the school, in conjunction with the parents or guardians, teachers and other health professionals. This plan authorizes the services that can be provided and defines the individualized objectives of a child who has been found to have a disability.
  - The IEP is created by an ARD (Admission, Review, and Dismissal) Committee.
  - Title 34 CFR §300.320 outlines what must be included in an IEP.
  - The SHARS program cannot reimburse for services beyond what is detailed in the IEP.
- Have a written Section 504 plan, documenting disability and medical necessity for audiology evaluation and management services.
  - A Section 504 plan is a plan mandated by 29 United States Code (U.S.C.) Section 794, regulated by 34 CFR §104, and developed by the school, in conjunction with the parents or guardians, teachers, and school administration. The plan must include evaluation data along with placement information regarding the type of services the student needs.
  - Evaluation under a Section 504 plan may be conducted using the same process to evaluate the needs of students under IDEA. In accordance with 34 CFR §104.35, LEAs may choose to adopt a separate process for evaluating students under a Section 504 plan.
  - The SHARS program cannot reimburse for services under a Section 504 plan beyond audiology evaluation and management services.

SHARS covers the following services:

- Audiology, delivered by licensed audiologist
- Counseling, individual and group, delivered by licensed master's level therapist
- Nursing services, including medication administration and nursing services delegated by a registered nurse (RN) (in compliance with RN delegated nursing tasks criteria as determined by the Texas Board of Nursing) to an employee or health aide
- Occupational therapy (OT), individual and group, delivered by licensed therapist or licensed assistant
- Personal care services (PCS)
- Physician services
- Physical therapy (PT), individual and group, delivered by licensed therapist or licensed assistant
- Psychological services, individual and group, delivered by a licensed psychiatrist/psychologist or a licensed specialist in school psychology (LSSP)
- Special transportation services
- Speech therapy (ST), individual and group, delivered by licensed therapist or licensed assistant

Note: *These services must be provided by qualified personnel who are employed by the LEA or under contract with the LEA.*

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Subject to the specifications, conditions, limitations, and requirements established by HHSC, SHARS are the services outlined above and determined by the ARD committee to be medically necessary and reasonable to ensure that children with disabilities who are eligible for Medicaid and who are 20 years of age or younger receive the benefits accorded to them by federal and state law guaranteeing a free and appropriate public education.

Care coordination between SHARS OT, PT, and ST providers and non-SHARS OT, PT, and ST providers is strongly encouraged to reduce or avoid duplication of services. Care coordination requires parental consent and must be carried out in a manner that complies with privacy and confidentiality requirements in accordance with state and federal law and regulations including Health Insurance Portability and Accountability Act (HIPAA) and Family Educational Rights and Privacy Act (FERPA).

Multi-disciplinary team evaluations performed collaboratively with any combination of OT, PT, ST, and Psychology are billable by each provider when performed during overlapping time periods.

Reimbursement is available for OT, PT, or ST prescribed on the student's IEP when delivered as co-treatment. Providers should document in the session notes the reason for co-treatment.

Co-treatment is defined as two different therapy disciplines performing therapy on the same client at the same time by a licensed therapist as defined in this handbook for each therapy discipline and rendered in accordance with the Executive Council of Physical Therapy and Occupational Therapy Examiners (ECPTOTE) and Texas Department of Licensing and Regulation (TDLR).

Providers of SHARS services must meet Texas Medicaid provider qualifications for each service according to the Texas Medicaid state plan and the Texas Medicaid Provider Procedures Manual (TMPPM).

All SHARS policies must be consistent with the Texas state plan and the following Texas Administrative Code rules:

- 1 TAC §354.1341 & §354.1342 SHARS
- 1 TAC §354.1003(a)(5)(J) Time Limits for Submitted Claims
- 1 TAC §355.8441(a)(12)(A) Reimbursement Methodologies for Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) Services
- 1 TAC §355.8443 Reimbursement Methodology for SHARS
- 1 TAC §355.101 - §355.114 Cost Determination Process

In accordance with 34 CFR §300.154, 1 TAC §354.1342, and FERPA, LEAs are required to obtain parental consent prior to disclosing personally identifiable student information maintained in a student's education record, and are also required to obtain parental consent for Medicaid-enrolled students prior to billing Medicaid for SHARS services prescribed in the Medicaid-enrolled student's IEP or Section 504 plan.

Providers must adhere to the documentation requirements for each SHARS service outlined in this handbook.

SHARS services may be provided in the following places of service: office, home, or other location (e.g., school).

A prescription is defined as a written order for services from the ordering physician or other eligible prescribing provider. Prescriptions are required for SHARS OT and PT services.

Other eligible prescribing provider is defined as an advanced practice registered nurse (APRN) under the delegation of a physician, or a physician assistant (PA) under the delegation of a physician.

Referrals are required for SHARS audiology and speech therapy (ST) services.

Note: *A prescription may serve as a referral.*

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

A referral is defined as a written document requesting evaluation for services from the referring physician or other eligible referring provider, defined as follows:

- For SHARS audiology - an audiologist referring for audiology services, an APRN under the delegation of a physician, or a PA under the delegation of a physician
- For SHARS ST services - a speech-language pathologist (SLP) with an unrestricted license to provide services independently referring for speech and language services, an APRN under the delegation of a physician, or a PA under the delegation of a physician

2.1.1 Eligibility Verification

The following are means to verify Medicaid eligibility of students:

- Verify electronically through third party software or TexMedConnect.
- School districts may inquire about the eligibility of a student by submitting the student's Medicaid number or two of the following: name, date of birth, or Social Security number (SSN). A search can be narrowed further by entering the county code or sex of the student. Verifications may be submitted in batches without limitations on the number of students.
- Contact AIS at 1-800-925-9126.

2.2 Enrollment

2.2.1 School Health and Related Services Enrollment

To enroll in Texas Medicaid as a SHARS provider, the provider must:

- Be an LEA school that employs or contracts with individuals or entities that meet health care practitioner certification and licensing requirements in accordance with the Texas Medicaid state plan for SHARS.
- Since LEAs are government entities, they should select "public entity" on the enrollment application.
- Comply with all applicable federal and state laws and regulations governing the services provided.
- Be enrolled and approved for Texas Medicaid participation.
- Sign a written provider agreement.
- Comply with the terms of the provider agreement and all requirements of Texas Medicaid, including the rules, policies and procedures, manuals, bulletins, banners, standards, and guidelines published by Texas Health and Human Services Commission (HHSC) or its designee.
- Bill for services covered by Texas Medicaid in the manner and format prescribed by HHSC or its designee.

SHARS providers are required to notify parents or guardians of their rights to a "freedom of choice of providers" (42 CFR §431.51) under Texas Medicaid. SHARS providers may provide this notification during the initial Admission, Review, and Dismissal (ARD) process. If a parent requests that someone other than the employees or currently contracted staff of the SHARS provider LEA provide a required SHARS service listed in the student's IEP, the SHARS provider must make a good faith effort to comply with the parent's request. The SHARS provider can negotiate with the requested provider to provide the services under contract. The requested provider must meet, comply with, and provide all of the employment criteria and documentation that the SHARS provider normally requires of its employees and currently contracted staff. The SHARS provider can negotiate the contracted fee with the requested provider and is not required to pay the same fee that the requested provider might receive from Medicaid for similar services.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

If the requested provider is a currently enrolled Medicaid provider, the requested provider can bill Medicaid for the services they provide. The services provided to the student can only be billed once; either by the requested provider or the SHARS provider. If the requested provider signs a contract with the SHARS provider, then only the SHARS provider can bill for the services provided by the requested provider.

2.2.2 Private School Enrollment

A private school may not participate in the SHARS program as a SHARS provider.

2.3 Services, Benefits, Limitations, and Prior Authorization

All of the SHARS procedures listed in the following sections require a valid diagnosis code. SHARS includes audiology services, counseling services, nursing services, occupational therapy services, personal care services, physical therapy services, physician services, psychological services (including testing), special transportation services, and speech therapy services.

Reminder: *SHARS are the services determined by the ARD committee to be medically necessary and reasonable to ensure that children with disabilities who are eligible for Medicaid and who are 20 years of age and younger receive the benefits accorded to them by federal and state law in order to participate in the educational program.*

2.3.1 Audiology Services

Audiology services include, but are not limited to, the following:

- Identification of children with hearing loss
- Determination of the range, nature, and degree of hearing loss, including the referral for medical or other professional attention for the amelioration of hearing
- Provision of amelioration activities, such as language amelioration, auditory training, speech reading (lip reading), hearing evaluation and speech conversion
- Determination of the child's need for group and individual amplification
- Hearing services

Audiology services must be provided by a professional who holds a valid state license as an audiologist. An audiology assistant who is licensed by the state may provide services within the guidelines of state licensure when the assistant or intern is acting under the supervision of a qualified audiologist.

A referral is required for audiology services. The referral must be updated a minimum of one time every three calendar years.

The LEA must maintain the referral in the student's medical record.

Audiology services must be referred by a physician or other eligible referring provider. A referral for audiology services must be signed and dated within three calendar years before the initiation of services.

In order for audiology services to be reimbursed through SHARS, the name and national provider identifier (NPI) of the referring licensed physician, or other eligible referring provider, must be listed on the claim and kept in the student's medical record.

Within SHARS, Medicaid-enrolled audiologists may refer for their own services or those of another SHARS audiologist. They may not refer for any services outside of SHARS or for SHARS services of other disciplines.

SHARS audiologists whose evaluations serve as the referral must be enrolled in Texas Medicaid as either individual practitioners or ordering, referring, or prescribing (ORP) providers. When submitting claims for SHARS audiology services, LEAs must include the referring provider's NPI in the referring provider NPI field of the claim form.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

IDEA requires that a student receiving services must have a re-evaluation every three years, which requires current information; unless the parent and the LEA agree that a re-evaluation is unnecessary (IDEA §1414 (a)(2)(B)).

A separate referral is not required for a re-evaluation. The need for a re-evaluation should be determined by the student's ARD committee.

Only the time spent with the student present is billable; time spent without the student present is not billable. Direct audiology evaluation time with the student present is billable. Indirect time for interpretation and report writing is not billable.

Hearing aids and fittings are not covered by the SHARS program, but may be reimbursed through Texas Medicaid outside of the SHARS program. Audiologists and hearing aid fitters and dispensers employed by or contracted with school districts must enroll in Texas Medicaid as individual practitioners and choose "Hearing Aid" on the enrollment application to be reimbursed for hearing aid devices and accessories, and fitting and dispensing visits and revisits.

Functional listening evaluations are not billable.

Audiometry is the testing of a person's ability to hear various sound frequencies and is performed with the use of calibrated electronic equipment. The results of the audiometry test may be recorded on a grid or graph called an audiogram. Audiometry is used to identify and diagnose hearing loss.

Audiology Services Procedure Codes

Audiology Services Modifiers

Modifier	Description
52	Reduced Services
TM	Audiology services provided to students with individualized education program (IEP)
U4	Audiology services provided to students with Section 504 plan

Refer to: Subsection 2.4, "Documentation Requirements" in this handbook for additional information relating to documentation requirements for therapy, evaluations, and re-evaluations.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Pure tone audiometry (procedure codes 92552 and 92553) is limited to one per day, any provider. If both procedure codes are billed for the same date of service, same provider, and same student, procedure code 92553 will be reimbursed and procedure code 92552 will be denied.

Speech audiometry threshold (procedure codes 92555 and 92556) is limited to one of either procedure code per day, any provider. If both procedure codes are billed for the same date of service, same provider, and same student, procedure code 92556 will be reimbursed and procedure code 92555 will be denied.

Comprehensive audiometry (procedure code 92557) is limited to one per day, same provider. This service includes testing of both ears. If procedure codes 92552, 92553, 92555, or 92556 are billed for the same date of service, same provider, and same student as procedure code 92557, only procedure code 92557 will be reimbursed.

Procedure codes 92553 and 92556 are not reimbursed on the same day by the same provider for the same student. Instead of billing both procedure codes for the same date of service, same provider, and same student, providers should bill with the more appropriate, comprehensive audiometry procedure code 92557.

Tympanometry (procedure code 92567) is limited to one per day, any provider. Acoustic reflex testing, threshold (procedure code 92568) is limited to one per day, any provider.

Conditioning play audiometry (procedure code 92582) is limited to one per day, any provider.

The use of procedure codes 92552, 92553, 92555, 92556, 92557, 92567, 92568, and 92582 implies that testing is performed in both ears. Audiologists must use modifier 52, reduced services, if a test is applied to one ear instead of both.

Auditory processing evaluation (procedure codes 92620 and 92621) is billable on an individual basis only. The maximum billable time for the first hour of an auditory processing evaluation (procedure code 92620) is 60 minutes (1 unit). The maximum billable time for each additional 15 minutes of an auditory processing evaluation (procedure code 92621) is 60 minutes (4 units).

Auditory processing evaluation (procedure code 92620) is limited to one per day, any provider.

Auditory rehabilitative treatment (procedure codes 92630 and 92633) is limited to one per day, any provider. Session notes for therapy services (procedure codes 92630 and 92633) are required.

2.3.2 Nursing Services

Nursing services are defined as the promotion of health, prevention of illness, and the care of ill, disabled and dying people through the provision of services essential to the maintenance and restoration of health. SHARS nursing services are skilled nursing tasks, as defined by the Texas Board of Nursing (BON) that are included in the student's IEP.

Examples of reimbursable nursing services include, but are not limited to, the following:

- Inhalation therapy
- Ventilator monitoring
- Nonroutine medication administration
- Tracheostomy care
- Gastrostomy care
- Ileostomy care
- Catheterization
- Suctioning
- Client training

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Assessment of a student's nursing service's needs

Nursing services must be provided by a registered nurse (RN), advanced practice registered nurse (APRN) (including nurse practitioners [NPs] and clinical nurse specialists [CNSs]), licensed vocational nurse/licensed practical nurse (LVN/LPN), or a school health aide or other trained, unlicensed assistive person delegated and supervised by an RN or APRN.

As defined by 22 TAC §225.4, nurse-delegated tasks are those in which a registered nurse authorizes an unlicensed person to perform tasks of nursing care in selected situations and indicates that authorization in writing. Nurse-delegated tasks includes tasks listed in 22 TAC §225.10 and must meet the professional standards of the Texas Board of Nursing.

Personal Care Services (PCS) cannot be billed as a nursing service. If a SHARS provider is not sure whether to bill a service as PCS or a nursing service, the SHARS provider must discuss the services provided to the student with the RN or APRN who can make that determination.

A prescription is not needed to provide nursing services through SHARS.

Only the time spent with the student present is billable. Time spent without the student present is not billable.

Private duty nursing (PDN) is not a SHARS covered service.

Providers of nursing services must follow the Texas BON guidelines for documenting the administration of medication.

Nursing Services Procedure Codes

Procedure Code	Individual or Group	Unit of Service
T1002 with modifier TD	Individual	15 minutes
T1002 with modifier TD and UD	Group	15 minutes
T1002 with modifier U7	Delegation, Individual	15 minutes
T1002 with modifier U7 and UD	Delegation, Group	15 minutes
T1003 with modifier TE	Individual	15 minutes
T1003 with modifier TE and UD	Group	15 minutes
T1502 with modifier TE	Unspecified	Medication, administration per visit
T1502 with modifier TD	Unspecified	Medication administration, per visit
T1502 with modifier U7	Unspecified	Delegation, medication administration, per visit

Refer to: Subsection 2.7.2.1, "Interim Claiming" in this handbook.

The following 15-minute procedure codes for direct nursing services are limited to 16 combined units (four hours) per day:

Procedure Codes					
T1002 with modifier TD	T1002 with modifier TD and UD	T1002 with modifier U7	T1002 with modifier U7 and UD	T1003 with modifier TE	T1003 with modifier TE and UD

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The following procedure codes are limited to a total of four combined medication administration visits per day:

Procedure Codes		
T1502 with modifier TD	T1502 with modifier U7	T1502 with modifier TE

All of the nursing services minutes that are delivered to a student during a calendar day must be added together before they are converted to units of service.

Minutes of nursing services cannot be accumulated over multiple days. Minutes of nursing services can only be billed per calendar day.

Direct nursing care services are billed in 15-minute increments and medication administration is reimbursed on a per-visit increment. The RN or APRN determines whether these services must be billed as direct nursing care or medication administration.

Nursing Services Modifiers

Modifier	Description
TD	Nursing services provided by an RN or APRN
TE	Nursing services delivered by an LVN/LPN
U7	Nursing services delivered through delegation
UD	Nursing services delivered on a group basis

2.3.3 Occupational Therapy (OT) Services

OT evaluation services include determining what services, assistive technology, and environmental modifications a student requires for participation in the special education program.

Occupational therapy services include the following:

- Improving, developing, maintaining, or restoring functions impaired or lost through illness, injury, or deprivation.
- Improving the ability to perform tasks for independent functioning when functions are impaired or lost.
- Preventing, through early intervention, initial or further impairment or loss of function.

Occupational therapy uses purposeful activities to obtain or regain skills needed for activities of daily living (ADL) and/or functional skills needed for daily life lost through an acute medical condition, acute exacerbation of a medical condition, or chronic medical condition related to injury, disease, or other medical causes.

ADLs are basic self-care tasks such as feeding, bathing, dressing, toileting, grooming, and mobility.

A prescription is required for OT services. The prescription must be updated a minimum of one time every three calendar years.

Occupational therapy services must be prescribed by a physician or other eligible prescribing provider. A prescription for OT services must be signed and dated within three calendar years before the initiation of services.

OT services may be reimbursed up to (but not to exceed) the amount designated in the prescription.

In order for OT services to be reimbursed through SHARS, the name and national provider identifier (NPI) of the prescribing licensed physician, or other eligible prescribing provider, must be listed on the claim and kept in the student's medical record.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

IDEA requires that a student receiving SHARS services must have a re-evaluation every three years, which requires current information; unless the parent and the LEA agree that a re-evaluation is unnecessary (IDEA §1414 (a)(2)(B)).

A separate prescription is not required for a re-evaluation.

The need for a re-evaluation should be determined by the student's ARD committee.

The LEA must maintain the prescription in the student's medical record.

Occupational therapy must be provided by a professional who is licensed by the Texas Board of Occupational Therapy Examiners to provide OT within his or her licensed scope of practice. An occupational therapist assistant (OTA) must act under the supervision of a qualified occupational therapist.

Services provided by an unlicensed person acting under the supervision of a licensed occupational therapist are not a benefit of Texas Medicaid.

OT treatment may be provided in an individual or group setting.

OT evaluation is billable on an individual basis only.

If an evaluation is performed over several days, the provider must submit the same evaluation procedure code for each evaluation session. The procedure code submitted must reflect the complexity level of the entire evaluation.

The therapist who performs the evaluation should use professional clinical judgment to decide which evaluation code to use. The selection of low (procedure code 97165), moderate (procedure code 97166), or high complexity (procedure code 97167) evaluation codes must be based on professional clinical judgment and may not be made by staff other than the rendering therapist.

The occupational therapist or OTA can only bill for time spent with the student present, including time spent assisting the student with learning to use adaptive equipment and assistive technology.

Time spent without the student present, such as training teachers or aides to work with the student (unless the student is present during the training time), report writing, and time spent manipulating or modifying the adaptive equipment is not billable.

Occupational Therapy Services Procedure Codes

Procedure Code	Individual or Group	Provider	Unit of Service
97150 with modifier GO	Group	Licensed occupational therapist	15 minutes
97150 with modifier GO and U1	Group	Licensed occupational therapy assistant	15 minutes
97165 (low), 97166 (moderate), and 97167 (high)	Individual	Licensed occupational therapist	15 minutes
97530 with modifier GO	Individual	Licensed occupational therapist	15 minutes
97530 with modifier GO and U1	Individual	Licensed occupational therapy assistant	15 minutes

Refer to: Subsection 2.7.2.1, "Interim Claiming" in this handbook.

Session notes for procedure codes 97530 and 97150 (therapy services) are required.

Refer to: Subsection 2.4, "Documentation Requirements" in this handbook for additional information relating to documentation requirements for therapy, evaluations, and re-evaluations.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Providers must use a 15-minute unit of service for billing.

The following direct therapy procedure codes must be billed in 15-minute increments and are limited to a combined total of 4 units (one hour) per day:

Procedure Codes	
97150 with modifier GO	97530 with modifier GO
97150 with modifier GO and U1	97530 with modifier GO and U1

The maximum billable time for the following OT evaluation procedure codes is 12 units (three hours), which may be billed over several days within a 30-day period:

Procedure Codes		
97165	97166	97167

Occupational Therapy Modifiers

Modifier	Description
GO	OT therapy, individual/group, by licensed therapist
GO and U1	OT therapy, individual/group, by licensed/certified assistant

Note: *OT services delivered via telehealth are a benefit of the SHARS program under Texas Medicaid.*

Refer to: Subsection 2.3.10, "Telehealth and Telemedicine Services" in this handbook for more information on SHARS telehealth services.

2.3.4 Personal Care Services

Personal care services (PCS) are medical support services provided to students who require assistance with activities of daily living (ADLs) and instrumental activities of daily living (IADLs) because of a physical, functional, cognitive, or behavioral limitation related to a student's disability or chronic health condition.

PCS are medically necessary only when the student's physical, functional, cognitive, or behavioral limitation related to the student's disability or chronic health condition inhibits the student's ability to accomplish ADLs or IADLs.

PCS are not educational in nature and may not be reimbursed for activities that teach the student academic or functional skills.

2.3.4.1 PCS Provider Requirements

All PCS providers must:

- Be employed by or contracted with the local education agency (LEA).
- Meet the requirements of 42 CFR § 440.167.
- Have demonstrated the understanding and competence necessary to perform the eligible PCS tasks required by a student's IEP, including written documentation procedures.

PCS providers must understand and be competent to perform PCS in the following two competence areas:

- Appropriate techniques for assisting with ADLs and IADLs, including basic body mechanics, mobility, and techniques for transferring students.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The needs of students with disabilities, including appropriate techniques for managing adverse behaviors of the student and communicating with students with communication or sensory impairments.

The LEA may use the following methods to determine whether an individual is qualified to perform PCS in the two competence areas:

- A review of the individual's education, related certification, or related training
- An evaluation from one or more qualified employees of the LEA verifying competence, which may additionally consider work experience, evaluations from other qualified employees of the LEA, and on-site demonstration.

The LEA may provide training to develop understanding and competence if the individual lacks understanding and competence in an area of PCS.

LEAs must document the PCS provider's ability to perform assistance generally with ADLs and IADLs for students enrolled in special education. In a centralized location, the LEA must keep a statement that is signed and dated by a qualified employee of the LEA, that the individual is able to perform PCS tasks under the direction of a qualified employee of the LEA.

For the purposes of verifying PCS provider qualifications, a qualified employee of the LEA is defined as:

- An individual with current special education teacher certification under 19 TAC §233.8 whose work responsibilities include working with PCS providers; or
- An individual whose primary work responsibilities include supervising, training, and confirming the qualifications of PCS providers; or
- A licensed health care practitioner eligible to provide reimbursable services under a SHARS benefit other than PCS.

A prescription is not needed to provide PCS through SHARS.

2.3.4.2 Activities Eligible for PCS

PCS facilitate the completion of ADLs and IADLs through direct intervention or indirect intervention, which includes but is not limited to the following:

- Hands-on assistance
- Performing the tasks for the student
- Cueing or redirecting the student to perform a task

PCS are not intended to teach the student how to independently perform the task.

For the purposes of reimbursement, activities eligible for personal care services are limited to the ADLs and IADLs listed in this section. ADLs are activities that are essential to daily self-care. IADLs are activities related to living independently in the community.

> ***Note:*** *Health Maintenance Activities (HMAs) and nurse-delegated tasks, as defined by 22 TAC §225.4, should be considered Nursing Services and may only be billed under PCS if the task is listed as an ADL or IADL.*

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

For the purposes of reimbursement, the activities that are eligible for PCS are limited to the following ADLs and IADLs. ADLs are activities that are essential to daily self-care. IADLs are activities related to living independently in the community.

ADLs	Description
Bathing	Assisting the student with any or all parts of bathing, including selecting appropriate water temperature and flow speed; turning water on and off; laying out and putting away supplies; transferring in and out of the bathtub or shower; washing and drying hair and body; and clean-up after task is completed
Dressing	Assisting the student with any or all parts of getting dressed, including putting on, fastening, and taking off all items of clothing; donning and removing shoes or prostheses; and choosing and laying out weather-appropriate clothing
Eating	Assisting the student with some or all parts of eating and drinking, including feeding the student; assistance with utensils or special or adaptive eating devices; and clean-up after task is completed.
Locomotion or mobility	Assisting the student with moving between locations, including assisting the student with walking or using a wheelchair, walker, or other mobility equipment
Personal hygiene	Assisting the student with some or all parts of personal hygiene, including routine hair care; oral care; ear care; shaving; applying makeup; managing feminine hygiene; washing and drying face, hands, and perineum; basic nail care; applying deodorant; routine skin care; and clean-up after task is completed
Positioning	Assisting the student with positioning their body while in a chair, bed, or other piece of furniture or equipment, including changing and adjusting positions; moving to or from a sitting position; turning side-to-side; and assisting the student to sit upright
Toileting	Assisting the student with some or all parts of toileting, including using a commode, bedpan, urinal, or toilet chair; transferring on and off; cleansing; changing diapers, pads, and incontinence supplies; adjusting clothing; and clean-up after task is completed
Transferring	Assisting the student with moving from one surface to another with or without a sliding board, including moving from a bed, chair, wheelchair, or vehicle to a new surface; moving to or from a standing or sitting position; and moving the student with lift devices

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

IADLs	Description
Escort	Assisting the student in making transportation arrangements for medical and other appointments; accompanying the student to a SHARS-eligible service or health care appointment on or off campus to assist with needed ADLs or with carrying equipment (feeding pump, oxygen tank, etc.) or other necessary supplies; accompanying the student between locations to facilitate assistance with needed ADLs or assistance with carrying equipment or other necessary supplies. Escort includes monitoring a student's behaviors that create an unsafe situation for the student, such as removing a seatbelt, attempting to open the vehicle door while the vehicle is in motion, or elopement. Escort duration includes the entire time that the PCS provider accompanies the student during a SHARS-eligible service or health care service on or off campus.
Meal preparation	Assisting the student in preparing meals and snacks, including cooking; assembling ingredients; cutting, chopping, grinding, or pureeing food; setting out food and utensils; serving food; preparing and pouring a predetermined amount of liquid nutrition; cleaning the feeding tube; cleaning the area after a meal; and washing dishes
Medication assistance	Assisting the student with oral medications that are normally self-administered
Money management	Assisting the student with managing their day-to-day finances, including paying bills and adhering to a budget
Telephone use or other communication	Assisting the student in making or receiving telephone calls, managing, and setting up communication devices, and sending and receiving communication for the student

Note: *For students receiving services in a school-based residential program managed by the LEA, the LEA may be reimbursed for the additional ADLs and IADLs listed in subsection 2.12.2, "Services, Benefits, and Limitations," in the Children's Services Handbook (Vol. 2, Provider Handbooks), as appropriate.*

PCS does not include the following:

- ADLs or IADLs that a typically developing child of the same chronological age could not safely and independently perform without adult supervision
- Services that provide direct intervention when the student has the physical, behavioral, and cognitive abilities to perform the ADL or IADL without adult supervision
- Services used for or intended to provide respite care, childcare, or restraint of a student
- Stand-by supervision related to safety
- Teaching a life skills or vocational curriculum
- Services delivered solely for the purpose of education, such as reading, English, language arts, writing, mathematics, science, social studies, physical education, functional curriculum, or electives
- Orientation and mobility or sign language interpretive services

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Any form of assistance that does not facilitate the above-listed ADLs and IADLs. Supervision, monitoring, cueing, and redirection are not independently considered ADLs or IADLs, but may be used to facilitate the completion of ADLs and IADLs.

PCS may be billed simultaneously with another SHARS-eligible service if the student is receiving assistance with ADLs and IADLs from a PCS provider while receiving the SHARS-eligible service from another provider.

PCS may not be billed for activities that are encompassed in the other SHARS-eligible service being provided by the same provider.

Only the time spent on authorized PCS tasks for each student is eligible for reimbursement.

For PCS services to be reimbursed they must be listed in the student's IEP.

If PCS are provided on the bus, documentation of the type of personal care service that was performed must be included on service logs. Personal care services provided on a bus shall not be provided by a bus monitor, bus aide, or transportation aide.

PCS may be provided in a group setting. A provider may perform PCS for more than one student over the span of the day as long as each student's care is based on their IEP and needs. The time the provider is assisting one student must not overlap with the time the provider is working with another student. PCS must be provided to one student at a time but may be provided to multiple students sequentially.

Personal Care Services Procedure Codes

Procedure Code	Setting	Unit of Service
T1019 with modifier U5	Individual, School	15 minutes
T1019 with modifier U6	Individual, Bus	Per one-way trip

Refer to: Subsection 2.7.2.1, "Interim Claiming" in this handbook.

Procedure code T1019 with modifier U6 may not be billed more than a total of four one-way trips per day.

Personal Care Services Modifiers

Modifier	Description
U5	Personal care services in school, individual
U6	Personal care services on the bus, individual per one-way trip

2.3.5 Physical Therapy (PT) Services

Physical therapy services include, but are not limited to, the following:

- Rehabilitative treatment concerned with restoring function or preventing disability caused by illness, injury, or birth defect
- Evaluation of the purpose of determining the nature, extent, and degree of the need for physical therapy services
- Physical therapy services provided for the purpose of preventing or alleviating movement dysfunction and related functional problems
- A PT evaluation includes evaluating the student's ability to move throughout the school and participate in classroom activities and the identification of movement dysfunction and related functional problems.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

A prescription is required for PT services. The prescription must be updated a minimum of one time every three calendar years.

Physical therapy services must be prescribed by a physician or other eligible prescribing provider. A prescription for PT services must be signed and dated within three calendar years before the initiation of services.

PT services may be reimbursed up to (but not to exceed) the amount designated in the prescription.

In order for PT services to be reimbursed through SHARS, the name and national provider identifier (NPI) of the licensed physician, or other eligible prescribing provider, must be listed on the claim and kept in the student's medical record.

IDEA requires that a student receiving SHARS services must have a re-evaluation every three years, which requires current information; unless the parent and the LEA agree that a re-evaluation is unnecessary (IDEA §1414 (a)(2)(B)).

A separate prescription is not required for a re-evaluation.

The need for a re-evaluation should be determined by the student's ARD committee.

The LEA must maintain the prescription in the student's medical record.

Physical therapy must be provided by a professional who is licensed by the Texas Board of Physical Therapy Examiners to provide PT within his or her licensed scope of practice. A licensed physical therapist assistant (PTA) must act under the supervision of a licensed physical therapist.

Services provided by an unlicensed person acting under the supervision of a licensed physical therapist is not a benefit under Texas Medicaid.

If the nature of a service is such that it can safely and effectively be performed by the average nonmedical person without direct supervision of a licensed therapist, the services cannot be regarded as skilled therapy.

PT evaluation is billable on an individual basis only. Procedure codes 97161, 97162, and 97163 may be submitted for initial evaluations and re-evaluations.

If an evaluation is performed over several days, the provider must submit the same evaluation procedure code for each evaluation session. The procedure code submitted must reflect the complexity level of the entire evaluation.

The physical therapist who performs the evaluation should use professional clinical judgment to decide which evaluation code to use. The selection of low (procedure code 97161), moderate (procedure code 97162), or high complexity (procedure code 97163) evaluation codes must be based on professional clinical judgment and may not be made by staff other than the rendering therapist.

The physical therapist can only bill time spent with the student present, including time spent helping the student to use adaptive equipment and assistive technology.

Time spent without the student present, such as training teachers or aides to work with the student (unless the student is present during the training time) and report writing, is not billable.

Physical Therapy Services Procedure Codes

Procedure Code	Individual or Group	Provider	Unit of Service
97110 with modifier GP	Individual	Licensed physical therapist	15 minutes
97110 with modifier GP and U1	Individual	Licensed physical therapy assistant	15 minutes
97150 with modifier GP	Group	Licensed physical therapist	15 minutes

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Procedure Code	Individual or Group	Provider	Unit of Service
97150 with modifier GP and U1	Group	Licensed physical therapy assistant	15 minutes
97161 (low), 97162 (moderate), and 97163 (high)	Individual	Licensed physical therapist	15 minutes

Refer to: Subsection 2.7.2.1, "Interim Claiming" in this handbook.

Session notes for procedure codes 97110 and 97150 (therapy services) are required.

Refer to: Subsection 2.4, "Documentation Requirements" in this handbook for additional information relating to documentation requirements for therapy, evaluations, and re-evaluations.

The following direct therapy procedure codes must be billed in 15-minute increments and are limited to a combined total of 4 units (one hour) per day

Procedure Codes	
97110 with modifier GP	97150 with modifier GP
97110 with modifier GP and U1	97150 with modifier GP and U1

The maximum billable time for the following PT evaluation procedure codes is 12 units (three hours), which may be billed over several days within a 30-day period:

Procedure Codes		
97161	97162	97163

Physical Therapy Modifiers

Modifier	Description
GP	PT therapy, individual/group, by licensed therapist
GP and U1	PT therapy, individual/group, by licensed/certified assistant

Note: *PT services delivered via telehealth are a benefit of the SHARS program under Texas Medicaid.*

Refer to: Subsection 2.3.10, "Telehealth and Telemedicine Services" in this handbook for more information on SHARS telehealth services.

2.3.6 Physician Services

Physician services include diagnostic and evaluation services to determine a child's medically related disabling condition that results in the child's need for services in the school setting.

Physicians are responsible for writing prescriptions for students that require PT or OT services.

In the school setting, speech therapy, and audiology services may be referred by either a physician or other eligible referring provider within the scope of his or her practice under state law in accordance with 42 CFR §440.110(c).

Physician services must be provided by a licensed physician Doctor of Medicine (M.D.) or Doctor of Osteopathic Medicine (D.O.).

Physician services may also be provided by an APRN under the delegation of a physician, or a PA under the delegation of a physician.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The following are billable physician services and must be provided on an individual basis:

- The diagnosis or evaluation time spent with the student present.
- The time spent without the student present reviewing the student's records for writing a prescription or referral for specific SHARS services.
- The diagnosis or evaluation time spent with the student present, or the time spent without the student present reviewing the student's records for the evaluation of the sufficiency of an ongoing SHARS service to see whether any changes are needed in the current prescription or referral for that service.
- When reviewing the student's records, the provider must use professional judgment to determine whether or not the student needs to be seen in person.

Procedure code T1023 is limited to 1 unit of service per day.

Refer to: Subsection 2.7.2.1, "Interim Claiming" in this handbook.

SHARS physician services are billable only when they are provided on an individual basis.

Note: *Physician services delivered via telemedicine are a benefit of the SHARS program under Texas Medicaid.*

Refer to: Subsection 2.3.10, "Telehealth and Telemedicine Services" in this handbook for more information on SHARS telemedicine services.

2.3.7 Psychological Services and Counseling

2.3.7.1 Psychological Testing

Psychological Testing Services include the following activities:

- Administering psychological tests and other assessment procedures and interpreting testing and assessment results
- Obtaining, integrating, and interpreting information about a student's behavior and conditions related to learning and functional needs, planning, and managing a program of psychological services
- Evaluating a student for the purpose of determining the student's eligibility for specific psychological, health or related services, the needs for specific SHARS services, and the development or revision of IEP goals and objectives
- Assessing the effectiveness of the delivered services on achieving the goals and objectives of the student's IEP

Billable time includes the following:

- Psychological, educational, or intellectual testing time spent with the student present
- Necessary observation of the student associated with testing
- A parent or teacher consultation with the student present that is required during the assessment because a student is unable to communicate or perform certain activities
- Test interpretation and report writing

Psychological testing is billable if it leads to the creation of an IEP for a student with disabilities who is eligible for Medicaid and who is 20 years of age or younger, whether or not the IEP includes SHARS.

An assessment write-up during an ARD meeting is billable, however, participation in the ARD meeting itself is not billable under SHARS.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Psychological testing (procedure codes 96130 and 96131) must be provided by a professional who is a licensed specialist in school psychology (LSSP), a licensed psychologist, or a licensed psychiatrist in accordance with 19 TAC 89.1040(b)(1) and 42 CFR 440.60(a).

A prescription is not needed to provide psychological testing through SHARS.

When billing, minutes of psychological testing are not accumulated over multiple days. Psychological testing can only be billed based on accumulated time per calendar day.

The following one-hour procedure codes are limited to eight hours (8 units) over a 30-day period:

Procedure Code	Unit of Service
96130	Initial (1 hour)
96131	Each additional hour

Important: *One unit (1.0) is equivalent to one hour or 60 minutes. Providers may bill in partial hours, expressed as 1/10th of an hour (six-minute segments). For example, express 30 minutes as a billed quantity of 0.5.*

Refer to: Subsection 2.7.2.1, "Interim Claiming" in this handbook.

Time spent for the interpretation of testing results without the student present is billable time.

2.3.7.2 Counseling Services

Counseling services include, but are not limited to, the following:

- Assisting the child or parents in understanding the nature of the child's disability
- Assisting the child or parents in understanding the special needs of the child
- Assisting the child or parents in understanding the child's development
- Assisting to identify the psychological, behavioral, emotional, cognitive, and social factors that are important to the prevention, treatment, or management of physical health problems
- Assessing the need for specific counseling services
- To help a child with a disability benefit from special education

Counseling services must be provided by one of the following:

- Licensed Clinical Social Worker (LCSW)
- Licensed Marriage and Family Therapist (LMFT)
- Licensed Professional Counselor (LPC)
- Counseling services may also be delivered by a psychologist, psychiatrist, or a licensed psychological associate.

Note: *Medicaid does not allow services delivered by LPC, LCSW, or LMFT interns to be billed under SHARS.*

A prescription is not needed to provide counseling services through SHARS.

LEAs may receive reimbursement for emergency counseling services if the student's IEP includes a behavior improvement plan (BIP) that documents the need for emergency services.

Health and Behavior Assessment and Intervention (HBAI) services are designed to identify the psychological, behavioral, emotional, cognitive, and social factors important to prevention, treatment, or management of physical health symptoms.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The following HBAI procedure codes (96158, 96159, 96164, and 96165) are limited to three units (one hour) per day, cumulative between procedure codes (initial procedure code plus two additional 15 minutes), same procedure, same provider:

- The initial 30 minutes (procedure codes 96158 and 96164) are limited to one unit per day.
- Each additional 15 minutes (procedure codes 96159 and 96165) are limited to two units per day.

Procedure Code	Individual or Group	Unit of Service	Provider Type
96158 with modifier UB	Individual	30 minutes	LPC, LCSW, LMFT
96159 with modifier UB (add-on procedure code)	Individual	15 minutes	LPC, LCSW, LMFT
96164 with modifier UB	Group	30 minutes	LPC, LCSW, LMFT
96165 with modifier UB (add-on procedure code)	Group	15 minutes	LPC, LCSW, LMFT

Individual psychotherapy is defined as therapy that focuses on a single person.

The following individual psychotherapy procedure codes (90832, 90834, and 90837) are limited to two services per day, same procedure, same provider, and will be denied as follows:

- Procedure codes 90834 and 90837 will be denied if submitted on the same day as procedure code 90832.
- Procedure codes 90832 and 90837 will be denied if submitted on the same day as procedure code 90834.
- Procedure codes 90832 and 90834 will be denied if submitted on the same day as procedure code 90837.

Procedure Code	Individual or Group	Unit of Service	Provider Type
90832 with modifier UB	Individual	30 minutes	LPC, LCSW, LMFT
90834 with modifier UB	Individual	45 minutes	LPC, LCSW, LMFT
90837 with modifier UB	Individual	60 minutes	LPC, LCSW, LMFT

Group psychotherapy is a type of psychotherapy that involves one or more therapists working with several clients at the same time.

Group psychotherapy (procedure code 90853) is limited to one service per day, same procedure, same provider.

Procedure codes 90832, 90834, and 90837 will be denied if submitted on the same day as 90853.

Procedure Code	Individual or Group	Unit of Service	Provider Type
90853 with modifier UB	Group	Untimed, one per date of service	LPC, LCSW, LMFT

Session notes are required for all counseling services.

Refer to: Subsection 2.4, "Documentation Requirements" in this handbook for additional information relating to documentation requirements for therapy, evaluations, and re-evaluations.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Counseling Services Delivered by Licensed/Certified Therapist Modifier

Modifier	Description
UB	Counseling services, individual/group, by LPC, LCSW, LMFT

Note: *Counseling services delivered via telehealth are a benefit of the SHARS program under Texas Medicaid.*

Refer to: Subsection 2.3.10, "Telehealth and Telemedicine Services" in this handbook for more information on SHARS telehealth services.

2.3.7.3 Psychological Services

Psychological services are counseling services provided to help a child with a disability benefit from special education and must be listed in the IEP.

Psychological services must be provided by a licensed psychiatrist, a licensed psychologist, or an LSSP.

LEAs may contract for specific types of psychological services, such as clinical psychology, counseling psychology, neuropsychology, and family therapy, that are not readily available from the LSSP who is employed by the LEA. 22 TAC §465.38 (Psychological Services for Schools) does not prohibit public schools from contracting with licensed psychologists, licensed psychological associates, and provisionally licensed psychologists who are not LSSPs to provide psychological services, other than school psychology, in their areas of competency. Such contracting must be on a short-term or part-time basis and cannot involve the broad range of school psychological services listed in 22 TAC §465.38(b)(1).

LEAs may receive reimbursement for emergency psychological services if the student's IEP includes a behavior improvement plan that documents the need for the emergency services. These services may exceed the one-hour daily limit.

HBAI services are designed to identify the psychological, behavioral, emotional, cognitive, and social factors important to prevention, treatment, or management of physical health symptoms.

The following HBAI procedure codes (96158, 96159, 96164, and 96165) are limited to three units (one hour) per day, cumulative between procedure codes (initial procedure code plus two additional 15 minutes) same procedure, same provider, for non-emergency situations:

- The initial 30 minutes (procedure codes 96158 and 96164) are limited to one unit per day.
- Each additional 15 minutes (procedure codes 96159 and 96165) are limited to two units per day.

Procedure Code	Individual or Group	Unit of Service	Provider Type
96158 with modifier AH	Individual	30 minutes	Licensed psychiatrist, Licensed psychologist, LSSP
96159 with modifier AH (add-on procedure code)	Individual	15 minutes	Licensed psychiatrist, Licensed psychologist, LSSP
96164 with modifier AH	Group	30 minutes	Licensed psychiatrist, Licensed psychologist, LSSP
96165 with modifier AH (add-on procedure code)	Group	15 minutes	Licensed psychiatrist, Licensed psychologist, LSSP

Individual psychotherapy is defined as therapy that focuses on a single person.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The following individual psychotherapy procedure codes (90832, 90834, and 90837) are limited to two services per day, same procedure, same provider, and will be denied as follows:

- Procedure codes 90834 and 90837 will be denied if submitted on the same day as 90832.
- Procedure codes 90832 and 90837 will be denied if submitted on the same day as 90834.
- Procedure codes 90832 and 90834 will be denied if submitted on the same day as 90837.

Procedure Code	Individual or Group	Unit of Service	Provider Type
90832 with modifier AH	Individual	30 minutes	Licensed psychiatrist, Licensed psychologist, LSSP
90834 with modifier AH	Individual	45 minutes	Licensed psychiatrist, Licensed psychologist, LSSP
90837 with modifier AH	Individual	60 minutes	Licensed psychiatrist, Licensed psychologist, LSSP

Group psychotherapy is a type of psychotherapy that involves one or more therapists working with several clients at the same time.

Group psychotherapy (procedure code 90853) is limited to one service per day, same procedure, same provider.

Procedure codes 90832, 90834, and 90837 will be denied if submitted on the same day as procedure code 90853.

Procedure Code	Individual or Group	Unit of Service	Provider Type
90853 with modifier AH	Group	Untimed, one per date of service	Licensed psychiatrist, Licensed psychologist, LSSP

Session notes are required for all psychological services.

Refer to: Subsection 2.4, "Documentation Requirements" in this handbook for additional information relating to documentation requirements for therapy, evaluations, and re-evaluations.

Note: *Psychological services delivered via telehealth or telemedicine are a benefit of the SHARS program under Texas Medicaid.*

Refer to: Subsection 2.3.10, "Telehealth and Telemedicine Services" in this handbook for more information on SHARS telehealth and telemedicine services.

2.3.8 Special Transportation Services

Transportation services in a school setting may be reimbursed when they are provided on a specially adapted vehicle and if the following criteria are met:

- Provided to or from a Medicaid-covered service on the day for which the claim is made
- A child requires transportation in a specially adapted vehicle to serve the needs of the disabled
- A child resides in an area that does not have school bus transportation, such as those in close proximity to a school
- The Medicaid services covered by SHARS are included in the student's IEP

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- The special transportation service is included in the student's IEP

Transportation services are provided on a specially adapted school bus to or from the location where the school-based service is provided.

A specially adapted vehicle is one that has been physically modified (e.g., addition of a wheelchair lift, addition of harnesses, or addition of child protective seating).

If an LEA already provides a modification for all students, then the modification is not considered a special adaptation.

Bus monitor or other personnel accompanying children on the bus is not considered an allowable special adaptive enhancement for Medicaid reimbursement under SHARS specialized transportation.

The student's IEP must document the need for transportation to be provided on a specially adapted vehicle.

Specialized transportation services reimbursable under SHARS requires the Medicaid enrolled special education student has the following documented in his or her IEP:

- The student requires a specific physical adaptation or adaptations of a vehicle in order to be transported
- The reason the student needs the specialized transportation

If a SHARS student rides the regular school bus to and from school with other nondisabled students, then that student is not required to have specialized transportation services listed in their IEP.

The cost of the regular school bus ride cannot be billed to SHARS.

The fact that a child may receive a service through SHARS does not necessarily mean that transportation services may be reimbursable.

Reimbursement for covered transportation services is on a per-student one-way trip basis. If the student receives a billable SHARS service (including personal care services on the bus) and is transported on the school's specially adapted vehicle, the following one-way trips may be billed:

- From the student's residence to school
- From the school to the student's residence
- From the student's residence to a provider's office that is contracted with the LEA
- From a provider's office that is contracted with the LEA to the student's residence
- From the school to a provider's office that is contracted with the LEA
- From a provider's office that is contracted with the LEA to the student's school
- From the school to another campus to receive a billable SHARS service
- From the campus where the student received a billable SHARS service back to the student's school

Covered transportation services from a child's residence to school and return are not reimbursable if, on the day the child is transported, the child does not receive Medicaid services covered by SHARS (other than transportation). This service must not be billed by default simply because the student is transported on a specially adapted bus.

Transportation services procedure code T2003 is limited to a total of four one-way trips per day.

2.3.8.1 Documentation for Special Transportation Services

Documentation of each one-way trip provided must be maintained by the LEA (e.g., trip log).

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Trip logs must be maintained daily to record one-way specialized transportation trips. This documentation must also include the number of one-way trips per day and the time for each trip (can be indicated using AM/PM).

At a minimum, trip logs must also include the following:

- Name of the LEA
- Route name or number
- Bus driver's name
- Dates of service and indicate day of the week
- If a service is not provided on a school day, Monday–Friday, mark the student as absent
- Copy of the school district's calendar (to be submitted once during the annual desk review)
- Student's full name and Medicaid number

  Note: *If the Medicaid number is not in the log, a separate ledger detailing student name, date of birth, and Medicaid status and number must be provided.*

- Dated signature of the bus driver

  Note: *Dated signatures should be captured after all trips have been documented.*

LEAs must adhere to all HIPAA and FERPA guidelines when documenting and submitting special transportation logs.

2.3.9 Speech and Language Services

Speech and language services include, but are not limited to, the following:

- Identification of students with speech or language disorders
- Diagnosis and appraisal of specific speech or language disorders
- Referral for medical or other professional attention necessary for the habilitation of speech or language disorders
- Provision of speech or language services for the habilitation or prevention of communicative disorders.

Speech and language services must be delivered by a qualified speech-language pathologist (SLP) holding an unrestricted Texas state license to provide services independently.

Speech and language services may also be delivered by a licensed SLP intern acting under the supervision and direction of a licensed SLP, or a licensed assistant in speech-language pathology acting under the supervision and direction of a licensed SLP.

A referral is required for ST services. The referral must be updated a minimum of one time every three calendar years.

The LEA must maintain the referral in the student's medical record.

Speech and language services must be referred by a physician or other eligible referring provider. A referral for speech therapy services must be signed and dated within three calendar years before the initiation of services.

In order for ST services to be reimbursed through SHARS, the name and national provider identifier (NPI) of the referring licensed physician, or other eligible referring provider, must be listed on the claim and kept in the medical record.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Within SHARS, Medicaid-enrolled SLPs who may practice independently may refer for their own services or those of another SHARS provider of the same discipline. They may not refer for any services outside of SHARS or for other SHARS services of other disciplines.

A speech evaluation that documents the medical necessity for speech therapy may serve as the referral.

SHARS SLPs whose evaluations serve as the referral must be enrolled in Texas Medicaid as either individual practitioners or ordering, referring, or prescribing (ORP) providers. When submitting claims for SHARS audiology services, LEAs must include the referring provider's NPI in the referring provider NPI field of the claim form.

IDEA requires that a student receiving SHARS services must have a re-evaluation every three years, which requires current information; unless the parent and the LEA agree that a re-evaluation is unnecessary (IDEA §1414 (a)(2)(B)).

A separate referral is not required for a re-evaluation. The need for a re-evaluation should be determined by the student's ARD committee.

2.3.9.1 Supervision Requirements for SLPs

A supervisor of an intern or assistant shall:

- Ensure that all services provided are in compliance with 16 TAC §111.154 and current state licensure

A supervisor of an assistant shall:

- Be responsible for evaluations, interpretation, and case management
- Not designate anyone other than a licensed speech-language pathologist or intern in speech-language pathology to represent speech-language pathology to an Admission, Review, and Dismissal (ARD) meetings, except as provided by 16 TAC §111.51 and §111.52.

A licensed intern or assistant shall abide by the decisions made by his or her supervisor relating to the intern's or assistant's practice and duties. If the supervisor requests that the intern or assistant violate this policy, the Act, or any other law, the intern or assistant shall refuse to do so and immediately notify the Texas Department of Licensing and Regulation (TDLR) and any other appropriate authority.

The SLP who provides the direction must ensure that the personnel who carry out the directives meet the minimum qualifications set forth in the rules of the TDLR that relate to licensed interns or assistants in speech-language pathology.

Speech Therapy Services Procedure Codes

Procedure Code	Individual or Group	Provider	Unit of Service
92507 with modifier GN and U8	Individual	Licensed speech-language therapist	Untimed
92507 with modifier GN and U1	Individual	Licensed speech-language assistant	Untimed
92508 with modifier GN and U8	Group	Licensed speech-language therapist	Untimed
92508 with modifier GN and U1	Group	Licensed speech-language assistant	Untimed
92521, 92522, 92523, or 92524 with modifier GN	Individual	Licensed speech-language therapist	15 minutes

Refer to: Subsection 2.7.2.1, "Interim Claiming" in this handbook.

Session notes are required for procedure codes 92507 and 92508.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Refer to: Subsection 2.4, "Documentation Requirements" in this handbook for additional information relating to documentation requirements for therapy, evaluations, and re-evaluations.

ST evaluation (procedure codes 92521, 92522, 92523, and 92524) is billable on an individual basis only. ST is billable on an individual (procedure code 92507) or group (procedure code 92508) basis.

The maximum billable time for ST evaluation procedure codes 92521, 92522, 92523, and 92524 with modifier GN is 12 units (three hours), which may be billed over several days, within a 30-day period.

Speech evaluation (procedure codes 92521, 92522, and 92523, and 92524) will be denied if submitted on the same date of service as speech therapy (procedure codes 92507 and 92508).

Procedure code 92522 will be denied if submitted on the same date of service as procedure code 92523.

Procedure code 92523 will be denied if submitted on the same date of service as procedure code 92522.

Providers can only bill time spent with the student present, including assisting the student with learning to use adaptive equipment and assistive technology.

Time spent without the student present, such as report writing and training teachers or aides to work with the student (unless the student is present during training), is not billable.

The following direct therapy procedure codes are limited to a total of one unit per day:

Procedure Codes	
92507 with modifier GN and U8	92508 with modifier GN and U8
92507 with modifier GN and U1	92508 with modifier GN and U1

Speech Therapy Modifiers

Modifier	Description
GN	SLP evaluation by licensed speech-language therapist
GN and U1	SLP therapy, individual/group, by licensed/certified speech-language therapy assistant
GN and U8	SLP therapy, individual/group, by licensed speech-language therapist

Note: *ST services delivered via telehealth are a benefit of the SHARS program under Texas Medicaid.*

Refer to: Subsection 2.3.10, "Telehealth and Telemedicine Services" in this handbook for more information on SHARS telehealth services.

2.3.10 Telehealth and Telemedicine Services

LEAs that participate in the SHARS program may be reimbursed for telehealth and telemedicine services delivered to children in school-based settings, or while receiving remote instruction.

A school-based setting is defined in Texas Government Code §548.0203 as a school district or an open enrollment charter school.

Remote instruction is defined according to requirements set forth by TEA and includes technology-based learning in home or community-based settings.

Providers may be reimbursed for telehealth and telemedicine services delivered to children in school-based settings, or while learning remotely with the following criteria:

- Reimbursement for providers is only available when the patient site is a school, home, or community-based setting.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

  - A patient site is the physical location of the student while the service is being rendered.
- Reimbursement for providers is only available when the distant site is a school or office-based setting.
  - A distant site is the physical location of the Texas Medicaid provider rendering the service.
- A telehealth or telemedicine visit may not be conducted if the provider and student are both physically located at the same school at the time the services are rendered.
- All medical necessity criteria for in-person services apply when services are delivered to children in school-based settings.

Providers must be able to defer to the needs of the student receiving services, allowing the mode of service delivery (synchronous audiovisual, synchronous telephone (audio-only), or in-person) to be accessible.

Providers should obtain informed consent for treatment from the student's parent or legal guardian and the student prior to rendering a telehealth or telemedicine service. Verbal consent is permissible and should be documented in the student's medical record.

Services delivered by synchronous audiovisual or synchronous telephone (audio-only) technology may require participation of a parent or caregiver to assist with the treatment.

During a Declaration of State of Disaster, HHSC may issue direction to providers regarding the use of a telemedicine or telehealth service to include the use of a synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein to the extent permitted by Texas law.

A Declaration of State of Disaster is when an executive order or proclamation is issued by the governor declaring a state of disaster in accordance with Section 418.014 of the Texas Government Code.

Refer to: The *Telecommunication Services Handbook* (*Vol. 2, Provider Handbooks*) for additional information about telehealth or telemedicine and informed consent. All telehealth or telemedicine services must adhere to documentation, privacy, and security requirements as outlined in this handbook and those in the *Telecommunication Services Handbook* (*Vol. 2, Provider Handbooks*).

2.3.10.1 Telehealth Services

Telehealth services are a benefit of Texas Medicaid and SHARS. Telehealth services has the meaning assigned by Texas Occupations Code (TOC) §111.001. Telehealth services are defined as healthcare services, other than telemedicine medical services or a teledentistry service, delivered by a health professional licensed, certified, or otherwise entitled to practice in Texas and acting within the scope of the health professional's license, certification, or entitlement to a patient at a different physical location than the health professional using telecommunications or information technology.

Telehealth services must be provided in compliance with standards established by the respective licensing or certifying board of the professional providing the services.

LEAs that participate in the SHARS program may be reimbursed for telehealth occupational therapy (OT), physical therapy (PT), speech therapy (ST), counseling, and psychological services.

All other reimbursement and billing guidelines that are applicable to in-person services will also apply when OT, PT, ST, counseling, and psychological services are delivered as telehealth services.

OT, PT, ST, counseling, and psychological telehealth services provided by LEAs during school hours through SHARS may be delivered via synchronous audiovisual technologies.

Synchronous audiovisual technology is defined as an interactive, two-way audio and video telecommunications platform that meets the privacy requirements of HIPAA.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Counseling and psychological telehealth services provided by LEAs during school hours through SHARS may also be delivered via synchronous telephone (audio-only) technologies.

Synchronous telephone (audio-only) technology is defined as an interactive, two-way audio telecommunications platform, including telephone technology, that uses only sound and meets the privacy requirements of HIPAA.

Synchronous Audiovisual Technology

The following procedure codes may be provided to children eligible through SHARS as telehealth services via synchronous audiovisual technology if clinically appropriate (as determined by the treating provider), safe and agreed to by the student receiving services.

The patient site must be a school, home, or community-based setting in order for the distant site provider to be eligible for reimbursement of these services.

All telehealth services provided by synchronous audiovisual technology must be billed using modifier 95.

The following procedure codes must be billed for telehealth services delivered via synchronous audiovisual technology:

Procedure Code	Individual or Group	Unit of Service	Provider
90832 with modifier UB and 95	Individual	30 minutes	LPC, LCSW, LMFT
90832 with modifier AH and 95	Individual	30 minutes	Licensed psychologist, LSSP
90834 with modifier AH and 95	Individual	45 minutes	Licensed psychologist, LSSP
90834 with modifier UB and 95	Individual	45 minutes	LPC, LCSW, LMFT
90837 with modifier AH and 95	Individual	60 minutes	Licensed psychologist, LSSP
90837 with modifier UB and 95	Individual	60 minutes	LPC, LCSW, LMFT
90853 with modifier AH and 95	Group	Untimed, one per date of service	Licensed psychologist, LSSP
90853 with modifier UB and 95	Group	Untimed, one per date of service	LPC, LCSW, LMFT
92507 with modifier GN, U8, and 95	Individual	Untimed, one per date of service	Licensed speech therapist
92507 with modifier GN, U1, and 95	Individual	Untimed, one per date of service	Licensed speech assistant
92508 with modifier GN, U8, and 95	Group	Untimed, one per date of service	Licensed speech therapist
92508 with modifier GN, U1, and 95	Group	Untimed, one per date of service	Licensed speech assistant
92521, 92522, 92523, or 92524 with modifier GN and 95	Individual	15 minutes	Licensed speech therapist
96158 with modifier AH and 95	Individual	30 minutes	Licensed psychologist, LSSP
96158 with modifier UB and 95	Individual	30 minutes	LPC, LCSW, LMFT

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Procedure Code	Individual or Group	Unit of Service	Provider

96164 with modifier UB and 95	Group	30 minutes	LPC, LCSW, LMFT
96165 with modifier AH and 95 (add-on procedure code)	Group	15 minutes	Licensed psychologist, LSSP
96165 with modifier UB and 95 (add-on procedure code)	Group	15 minutes	LPC, LCSW, LMFT
97110 with modifier GP and 95	Individual	15 minutes	Licensed physical therapist
97110 with modifier GP, U1, and 95	Individual	15 minutes	Licensed physical therapy assistant
97150 with modifier GP and 95	Group	15 minutes	Licensed physical therapist
97150 with modifier GP, U1, and 95	Group	15 minutes	Licensed physical therapy assistant
97150 with modifier GO and 95	Group	15 minutes	Licensed occupational therapist
97150 with modifier GO, U1, and 95	Group	15 minutes	Licensed occupational therapy assistant
97161 (low), 97162 (moderate), and 97163 (high) with modifier 95	Individual	15 minutes	Licensed physical therapist
97165 (low), 97166 (moderate), and 97167 (high) with modifier 95	Individual	15 minutes	Licensed occupational therapist
97530 with modifier GO and 95	Individual	15 minutes	Licensed occupational therapist
97530 with modifier GO, U1, and 95	Individual	15 minutes	Licensed occupational therapist assistant

Synchronous Telephone (Audio-Only) Technology

The following procedure codes may be provided to children eligible through SHARS as telehealth services via synchronous telephone (audio-only) technology to students with whom the treating provider has an 'established relationship' and if clinically appropriate (as determined by the treating provider), safe, and agreed to by the student receiving services.

HHSC encourages the use of synchronous audiovisual technology over telephone (audio-only) delivery of telehealth services whenever possible. Therefore, if delivered by synchronous telephone (audio-only) technology, providers must document in the student's medical record the reason(s) for why a synchronous audiovisual platform was not used.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The patient site must be a school, home, or community-based setting in order for the distant site provider to be eligible for reimbursement of these services.

All telehealth services provided by synchronous telephone (audio-only) technology must be billed using modifier 93.

Procedure Code	Individual or Group	Unit of Service	Provider
90832 with modifier AH and 93	Individual	30 minutes	Licensed psychologist, LSSP
90832 with modifier UB and 93	Individual	30 minutes	LPC, LCSW, LMFT
90834 with modifier AH and 93	Individual	45 minutes	Licensed psychologist, LSSP
90834 with modifier UB and 93	Individual	45 minutes	LPC, LCSW, LMFT
90837 with modifier AH and 93	Individual	60 minutes	Licensed psychologist, LSSP
90837 with modifier UB and 93	Individual	60 minutes	LPC, LCSW, LMFT
90853 with modifier AH and 93	Group	Untimed, one per date of service	Licensed psychologist, LSSP

96165 with modifier UB and 93 (add-on procedure code)	Group	15 minutes	LPC, LCSW, LMFT

2.3.10.2 Telemedicine Services

Telemedicine medical services, also known as telemedicine services, are a benefit of Texas Medicaid and SHARS. Telemedicine medical services has the meaning assigned by TOC §111.001. Telemedicine services are defined as health care services delivered by a physician licensed in the state of Texas, or a health professional acting under the delegation and supervision of a physician licensed in Texas and

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

acting within the scope of the physician's or health professional's license to a patient at a different physical location than the physician or health professional using telecommunications or information technology.

Telemedicine medical services must be provided in compliance with standards established by the respective licensing or certifying board of the professional providing the services.

LEAs that participate in the SHARS program may be reimbursed for telemedicine psychological and physician services.

All other reimbursement and billing guidelines that are applicable to in-person services will also apply when psychological and physician services are delivered as telemedicine services.

Psychological and physician telemedicine services provided by LEAs during school hours through SHARS may be delivered via synchronous audiovisual technologies.

Synchronous audiovisual technology is defined as an interactive, two-way audio and video telecommunications platform that meets the privacy requirements of HIPAA.

Psychological telemedicine services provided by LEAs during school hours through SHARS may also be delivered via synchronous telephone (audio-only) technologies.

Synchronous telephone (audio-only) technology is defined as an interactive, two-way audio telecommunications platform, including telephone technology, that uses only sound and meets the privacy requirements of HIPAA.

Synchronous Audiovisual Technology

The following procedure codes may be provided to children eligible through SHARS as telemedicine services via synchronous audiovisual technology if clinically appropriate (as determined by the treating provider), safe and agreed to by the student receiving services.

The patient site must be a school, home, or community-based setting in order for the distant site provider to be eligible for reimbursement of these services.

All telemedicine services provided by synchronous audiovisual technology must be billed using modifier 95.

Procedure Code	Individual or Group	Unit of Service	Provider Type
90832 with modifier AH and 95	Individual	30 minutes	Licensed psychiatrist
90834 with modifier AH and 95	Individual	45 minutes	Licensed psychiatrist
90837 with modifier AH and 95	Individual	60 minutes	Licensed psychiatrist
90853 with modifier AH and 95	Group	Untimed, one per date of service	Licensed psychiatrist
96158 with modifier AH and 95	Individual	30 minutes	Licensed psychiatrist
96159 with modifier AH and 95 (add-on procedure code)	Individual	15 minutes	Licensed psychiatrist
96164 with modifier AH and 95	Group	30 minutes	Licensed psychiatrist
96165 with modifier AH and 95 (add-on procedure code)	Group	15 minutes	Licensed psychiatrist

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Procedure Code	Individual or Group	Unit of Service	Provider Type
T1023 with modifier 95	Individual	Untimed	MD, DO

Synchronous Telephone (Audio-Only) Technology

The following procedure codes may be provided to children eligible through SHARS as telemedicine services via synchronous telephone (audio-only) technology to students with whom the treating provider has an 'established relationship' and if clinically appropriate (as determined by the treating provider), safe, and agreed to by the student receiving services.

HHSC encourages the use of synchronous audiovisual technology over telephone (audio-only) delivery of telemedicine services whenever possible. Therefore, if delivered by synchronous telephone (audio-only) technology, providers must document in the student's medical record the reason(s) for why a synchronous audiovisual platform was not used.

The patient site must be a school, home, or community-based setting in order for the distant site provider to be eligible for reimbursement of these services.

All telemedicine services provided by synchronous telephone (audio-only) technology must be billed using modifier 93.

Procedure Code	Individual or Group	Unit of Service	Provider Type
90832 with modifier AH and 93	Individual	30 minutes	Licensed psychiatrist
90834 with modifier AH and 93	Individual	45 minutes	Licensed psychiatrist
90837 with modifier AH and 93	Individual	60 minutes	Licensed psychiatrist
90853 with modifier AH and 93	Group	Untimed, one per date of service	Licensed psychiatrist
96158 with modifier AH and 93	Individual	30 minutes	Licensed psychiatrist

96164 with modifier AH and 93	Group	30 minutes	Licensed psychiatrist
96165 with modifier AH and 93 (add-on procedure code)	Group	15 minutes	Licensed psychiatrist

Refer to: *Telecommunication Services Handbook* (*Vol. 2, Provider Handbooks*) for additional information on restrictions for services delivered by synchronous telephone (audio-only) technologies.

2.3.11 Prior Authorization

Prior authorization is not required for Medicaid services provided by a SHARS provider.

2.4 Documentation Requirements

Documentation of services should be generated at the time of service or shortly thereafter, in order to maintain an accurate medical record. Documentation of services must occur within 1 week (7 days) of the time the service is rendered.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The following service log documentation is required for all SHARS services prescribed in the student's IEP or Section 504 plan:

- Student's name
- Student's date of birth
- Student's Medicaid identification number on every page of the chart/record/note
- Date of service; and for each date of service:
  - Billable start and stop time
  - Total billable minutes
  - Student observation
  - Procedure code(s)
  - Note activity performed. Documentation of service provided must support the services billed.
- The SHARS provider's printed name, title, and original handwritten or electronic signature
  - Any electronic signature technologies that are used must comply with all federal and state statutes and administrative rules.

Service logs for PCS must include all elements of a SHARS service log with the following:

- The specific PCS task
- The total billable minutes for each ADL and IADL recorded

The total billable minutes for PCS are determined by the combined total billable minutes for each ADL and IADL recorded.

The total billable minutes for PCS performed by a PCS provider cannot exceed the PCS provider's total number of hours at the place of service.

Session notes for evaluations are not required; however, documentation must include the billable start time, billable stop time, and total billable minutes with a notation of the activity performed (e.g., audiology evaluation, speech therapy evaluation). Service providers are expected to perform and document evaluations in accordance with discipline-specific standards of practice and retain records in the student's file.

Session notes are required for therapy. Session notes must include the billable start time, billable stop time, total billable minutes, activity performed during the session, student observation, and the related IEP objective.

Session notes will include all elements of a service log plus:

- Student's progress towards goals (if applicable)
- Note whether the service was provided individually or in a group
- The related IEP objective

If a SHARS provider is supervising an assistant or intern, then the supervising provider must adhere to current state licensure signature requirements.

All SHARS services require documentation to support the medical necessity of the service rendered. SHARS services are subject to retrospective review and recoupment if documentation does not support the service billed.

The following are mandatory general requirements for all providers:

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- All entries are legible to individuals other than the author, dated (month, day, and year), and signed by the performing provider.
- Each page of the medical record documents the client's name and Texas Medicaid number.

Refer to: "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*) for more information on additional mandatory general documentation requirements for all providers.

All services outlined in this section are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the services provided.

2.4.1 Record Retention

Student-specific records that are required for SHARS become part of the student's educational records and must be maintained for seven years. All records that are pertinent to SHARS must be maintained by the LEA until all audit questions, appeal hearings, investigations, or court cases are resolved. Records must be stored in a secure and readily accessible location and format and must be available for state or federal audits.

The following is a checklist of the minimum documents to collect and maintain:

- Signed consent to bill Medicaid by parent or guardian
- IEP
- Current provider qualifications (licenses)

  Note: *Qualified PCS provider documentation must include a signed and dated statement from a qualified employee of the LEA, as described by the PCS Provider Requirements, verifying the individual is able to perform PCS tasks in accordance with the required PCS competence areas. Supporting documents or information must also be included as applicable.*
- Attendance records
- Prescriptions and referrals
- Medical necessity documentation (e.g., diagnoses and history of chronic conditions or disability)
- Session notes or service logs, including provider signatures, for each service/event
- Supervision logs
- Special transportation logs
- Claims submittal and payment histories
- Assessments/evaluations
- Written agreements (contracts) for contracted service providers
- Copies of signed Certification of Funds (COF) letters and supporting documentation, including quarterly COF reports
- E-signature authorization forms(s) if applicable

2.5 Managed Care Clients

SHARS services are available to clients regardless of Medicaid service delivery mechanism (traditional Medicaid or Medicaid Managed Care). SHARS services are carved-out of the Medicaid Managed Care Program and must be billed to TMHP for payment consideration. Carved-out services are those that are rendered to Medicaid Managed Care clients but are administered by TMHP and not the client's Managed Care Organization (MCO).

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

2.6 Third Party Liability

SHARS claims are subject to Third Party Liability via the pay and recover later method.

Refer to: "Section 8: Third Party Liability (TPL)" (*Vol. 1, General Information*) for more information.

2.7 Claims Filing and Reimbursement

2.7.1 Claims Information

Claims for SHARS must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

Claims must be submitted within 365 days from the date of service, or no later than 95 days after the end of the federal fiscal year (FFY) (i.e., January 3), whichever comes first.

Refer to: "Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on electronic claims submissions.

"Section 6: Claims Filing" (*Vol. 1, General Information*) for instructions on completing paper claims and additional general information about claims filing.

2.7.1.1 Appealing Denied SHARS Claims

SHARS providers that appeal claims denied for exceeding benefit limitations must submit documentation of medical necessity with the appeal. Documentation submitted with an appeal must include the pages from the IEP and ARD documents that show the authorization of the services, including the specified frequency and duration and the details of the need for additional time or the reasons for exceeding the benefit limitations.

Each page of the documentation must have the student's name and Medicaid number.

2.7.2 Reimbursement Guidelines: Cost Reporting and Interim Claims

During the cost report period, LEAs participating in SHARS are reimbursed on an interim claiming basis using SHARS interim rates. In order to accommodate participating SHARS districts that require interim cash flow to offset the financial burden of providing for students, an interim fee-for-service claiming system still exists for SHARS. It is important that SHARS providers understand that SHARS interim payments are provisional in nature. Providers are reimbursed for direct medical services and transportation services provided under the SHARS Program on a cost basis using federally mandated allocation methodologies in accordance with 1 TAC §355.8443.

There is no lifetime benefit cap for SHARS services provided so long as the services are medically necessary and documented in the student's IEP. The services provided to the student at the school do not affect the type or amount of Medicaid services the student receives outside the school setting.

2.7.2.1 Interim Claiming

LEAs must submit the following:

- At least one interim claim for each direct medical service that an eligible student receives within the cost report period.
- Interim claims for all personal care services that an eligible student receives within the cost report period
- Interim claims for all eligible specialized transportation trips provided within the cost report period.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Untimed Units

For untimed procedure codes, claims that are submitted for reimbursement must include one unit of service for each unit billed. Untimed codes are reimbursed on a per unit basis and are subject to frequency limitations for each SHARS service category.

Timed Units

For timed procedure codes, providers must only report billable time when the midpoint of the total duration for the procedure code has been passed. All claims for reimbursement of timed procedure codes are based on the actual amount of billable time associated with the SHARS service.

For those services for which the unit of service is 15 minutes based on code description for SHARS services (i.e., 1 unit = 15 minutes), partial units must be rounded up or down to the nearest quarter hour for 15-minute units.

Enter the number of billing units in Block 24G of the CMS-1500 paper claim form. Claims without this information may be reimbursed as a unit of 1.

To calculate billing units, count the total number of billable minutes for the calendar day for the SHARS student, and divide by 15 to convert to billable units of service. If the total billable minutes are not divisible by 15, the minutes are converted to one unit of service if they are greater than seven and converted to 0 units of service if they are seven or fewer minutes.

For example, 68 total billable minutes/15 = 4 units + 8 minutes. Since the 8 minutes are more than 7 minutes, those 8 minutes are converted to one unit. Therefore, 68 total billable minutes = 5 units of service.

Examples of Billing Units Based on 15 Minutes

Minutes	Units
0 min - 7 mins	0 units
8 mins - 22 mins	1 unit
23 mins - 37 mins	2 units
38 mins - 52 mins	3 units
53 mins - 67 mins	4 units
68 mins - 82 mins	5 units

All claims for reimbursement are based on the actual amount of billable time associated with the SHARS service.

For 30-minute codes at least 16 minutes must pass in order to report a code with 1 unit = 30 minutes.

For those services for which the unit of service is an hour (1 unit = 60 minutes = one hour), partial units must be billed in tenths of an hour and rounded up or down to the nearest six-minute increment.

To calculate billing units, count the total number of billable minutes for the calendar day for the SHARS student and divide by 60 to convert to billable units of service. If the total billable minutes are not divisible by 60, the minutes are converted to partial units of service as follows:

Examples of Billing Units Based on an Hour

Minutes	Units
0 mins - 3 mins	0 units

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Minutes	Units
4 mins - 9 mins	0.1 unit
10 mins - 15 mins	0.2 unit
16 mins - 21 mins	0.3 unit
22 mins - 27 mins	0.4 unit
28 mins - 33 mins	0.5 unit
34 mins - 39 mins	0.6 unit
40 mins - 45 mins	0.7 unit
46 mins - 51 mins	0.8 unit
52 mins - 57 mins	0.9 unit
58 mins - 63 mins	1 unit
64 mins - 69 mins	1.1 units
70 mins - 75 mins	1.2 units
76 mins - 81 mins	1.3 units
82 mins - 87 mins	1.4 units
88 mins - 93 mins	1.5 units

2.7.2.2 Cost Reporting

The total allowable costs for providing services for SHARS must be documented by submitting the required annual cost report.

The provider's final reimbursement amount is arrived at by a cost report, cost reconciliation, and cost settlement process. The provider's total costs for both direct medical and transportation services as reported in the cost report are adjusted using the federally mandated allocation methodologies.

The provider's interim payments will be reimbursed in compliance with 1 TAC §355.8443.

Submittal of a SHARS cost report is mandatory for each provider that requests and receives interim payments. Failure to file a SHARS cost report will result in sanctions, which includes recoupment of all interim payments for the cost report period in which the default occurs.

CMS requires annual cost reporting, cost reconciliation, and cost settlement processes for all Medicaid SHARS services delivered by LEAs. CMS requires that LEAs, as public entities, not be paid in excess of their Medicaid-allowable costs and that any overpayments be recouped through the cost reconciliation and cost settlement processes. In an effort to minimize any potential recoupments, HHSC has assigned SHARS interim rates that are as close as possible to each district's Medicaid allowable costs for providing each SHARS service.

Each SHARS provider is required to complete an annual cost report for all SHARS that were delivered during the previous FFY (October 1 through September 30). The cost report is due on or before April 1 of the year following the reporting period.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The following certification forms must be submitted and received by HHSC for the cost report. The annual cost report includes two certification forms which must be completed to certify the provider's incurred actual costs:

- Cost report certification
- Claimed expenditures

The certification forms received by HHSC for the cost report must be:

- The original certification pages.
- Signed by the business officer or other financial representative who is responsible for legally binding the district.
- Notarized.

The primary purpose of the cost report is to document the provider's costs for delivering SHARS, including direct costs and indirect costs, and to reconcile the provider's interim payments for SHARS with its actual total Medicaid-allowable costs.

All annual SHARS cost reports that are filed are subject to desk review by HHSC or its designee.

2.7.2.3 Cost Reconciliation and Cost Settlement

The cost reconciliation process must be completed within 24 months of the end of the reporting period covered by the annual SHARS cost report. The total Medicaid-allowable costs are compared to the provider's interim payments for SHARS delivered during the reporting period, which results in a cost reconciliation.

If a provider has not complied with all cost report requirements or a provider's interim payments exceed the actual certified Medicaid-allowable costs of the provider for SHARS to Medicaid clients, HHSC will recoup the federal share of the overpayment by one of the following methods:

- Offset all future claims payments to the provider until the amount of the federal share of the overpayment is recovered
- Recoup an agreed-upon percentage from future claims payments to the provider to ensure recovery of the overpayments within one year
- Recoup an agreed-upon dollar amount from future claims payments to ensure recovery of the overpayment within one year

If the actual certified Medicaid-allowable costs of a provider for SHARS exceed the provider's interim payments, HHSC will pay the federal share of the difference to the provider in accordance with the final, actual certification agreement and submit claims to CMS for reimbursement of that payment in the federal fiscal quarter following payment to the provider.

HHSC issues a notice of settlement that denotes the amount due to or from the provider.

2.7.2.4 * Informal Review of Cost Reports Settlement

An LEA or the Superintendent, Chief Financial Officer, Business Officer, or other LEA Official with legal authority who disagrees with the adjustments made during the cost reconciliation process has the right to request an informal review of the adjustments. Requests for informal reviews must be sent by certified mail and received by HHSC within the time frame designated on the settlement notice. Furthermore, the request for informal review must include a concise statement of the specific actions or determinations the LEA disputes, the LEA's recommended resolution, and any supporting documentation deemed relevant to the dispute. Failure to follow these instructions will result in the denial of the request for an informal review.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

[Revised] For more information on the Cost Report and SHARS interim rates please reference the Cost Report Instructions and the HHSC Rate Analysis SHARS webpage at pfd.hhs.texas.gov/acute-care/school-health-and-related-services-shars. Further information can be found in 1 TAC §355.8443.

SHARS providers can also contact a SHARS Rate Analyst by email at ProviderFinance-SHARS@hhs.texas.gov or by telephone at 512-730-7400.

Refer to: "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for more information on reimbursement and the Federal Medical Assistance Percentage (FMAP).

2.7.2.5 Quarterly Certification of Funds

SHARS providers are required to certify on a quarterly basis the amount reimbursed during the previous federal fiscal quarter. TMHP Provider Enrollment mails the quarterly Certification of Funds statement to SHARS providers after the end of each quarter of the FFY (October 1 through September 30). The purpose of the statement is to verify that the LEA incurred costs on the dates of service that were funded from state or local funds in an amount equal to, or greater than, the combined total of its interim rates times the paid units of service. While the payments were received the previous FFY, the actual dates of service could have been many months prior. Therefore, the certification of public expenditures is for the dates of the FFY quarter and not the dates of service paid within the quarter.

In order to balance amounts in the Certification of Funds, providers will receive, or have access to, the Certification of Funds Claims Information Report. For help balancing the amounts in the statement, providers can contact the TMHP Contact Center at 800-925-9126.

Refer to: "Appendix A: State, Federal, and TMHP Contact Information" (*Vol. 1, General Information*).

The Certification of Funds statement must be:

- Signed by the business officer or other financial representative who is responsible for signing other documents that are subject to audit.
- Notarized.
- Returned to TMHP within 25 calendar days of the date printed on the letter.

Failure to do so may result in recoupment of funds or the placement of a vendor hold on the provider's payments until the signed Certification of Funds statement is received by TMHP. Providers must contact the TMHP Contact Center at 800-925-9126 if they do not receive their Certification of Funds statement.

On an annual basis, SHARS providers are required to certify through their cost reports their total, actual, incurred costs, including the federal share and the nonfederal share.

Refer to: Subsection 2.7.2, "Reimbursement Guidelines: Cost Reporting and Interim Claims" in this handbook for additional information about cost reporting.

2.8 * Random Moment Time Study (RMTS)

CMS requires SHARS providers to participate in the RMTS to be eligible to submit claims and receive reimbursement for SHARS services. SHARS providers must comply with the Texas Time Study Guide, which includes, but is not limited to, Mandatory Annual RMTS Contact training certification of RMTS participants for all four annual RMTS quarters, and compliance with participation requirements for selected sampled moments. The four annual RMTS quarters are October through December, January through March, April through June, and July through September.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

An existing LEA can only become a SHARS provider effective October 1, each year and they must participate in all four RMTS quarters for that annual period. SHARS providers that do not participate in all four required RMTS quarters, or are RMTS non-compliant, cannot be a SHARS provider for that entire annual period (October 1 through September 30) and will be required to return any Medicaid payments received for SHARS services delivered during that annual cost report period. The LEA can return to participating in the SHARS program the following FFY beginning on October 1.

A new LEA (i.e., a newly formed district that began operations after October 1) can become a SHARS provider effective with the first day of the federal quarter in which it participates in the RMTS. New SHARS providers may not submit claims or be reimbursed for SHARS services provided prior to the RMTS quarter in which they begin to participate, and they must participate in all remaining RMTS quarters for that annual period.

[Revised] LEAs can access the Texas Time Study Guide, on the HHSC website at pfd.hhs.texas.gov/acute-care/time-study.

SHARS providers can contact the HHSC Time Study Unit by email at TimeStudy@hhsc.texas.gov or by telephone at 512-491-1715.

1 General Information

This handbook contains information about Texas Medicaid fee-for-service benefits. For information about managed care benefits, refer to the *Medicaid Managed Care Handbook* (*Vol. 2, Provider Handbooks*).

Managed care carve-out services are administered as fee-for-service benefits. A list of all carve-out services is available in section 8, "Carve-Out Services" in the *Medicaid Managed Care Handbook* (*Vol. 2, Provider Handbooks*).

The information in this handbook is intended for home health agencies, hospitals, nurse practitioners (NP), clinical nurse specialists (CNS), certified nurse midwives (CNM), licensed professional counselors (LPC), licensed marriage and family therapists (LMFT), licensed clinical social workers (LCSW), physicians, physician assistants (PA), psychologists, licensed psychological associates, provisionally licensed psychologists, and licensed dieticians.

Important: *All providers are required to read and comply with "Section 1: Provider Enrollment and Responsibilities" (Vol. 1, General Information). In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

Refer to: "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*).

2 Enrollment

Providers may provide telecommunication services for Texas Medicaid clients under the provider's National Provider Identifier (NPI). No additional enrollment is required to provide telemedicine medical service or telehealth services.

Home health agency and hospital providers who wish to provide telemonitoring services must notify the Texas Medicaid & Healthcare Partnership (TMHP) as follows:

- Current providers must use the Provider Enrollment and Management System (PEMS) to indicate that they provide telemonitoring services.
- Newly enrolling or re-enrolling home health agency or outpatient hospital providers must indicate whether they provide telemonitoring services during the enrollment process.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Refer to: Subsection 3.1, "Provider Enrollment" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*) for information about CNM provider enrollment.

Subsection 8.1, "Enrollment" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*) for information about NP and CNS provider enrollment.

Subsection 9.1, "Enrollment" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*) for information about physician provider enrollment.

Subsection 10.1, "Enrollment" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*) for information about PA provider enrollment.

Subsection 4.1, "Provider Enrollment" in the *Behavioral Health and Case Management Services Handbook* (*Vol. 2, Provider Handbooks*) for information about mental health services provider enrollment.

Subsection 4.1, "Provider Enrollment" in the *Behavioral Health and Case Management Services Handbook* (*Vol. 2, Provider Handbooks*) for information about psychologist and licensed psychological associate provider enrollment.

Subsection 2.11.1, "Enrollment" in the *Children's Services Handbook* (*Vol. 2, Provider Handbooks*) for information about licensed dietitian enrollment.

3 Services, Benefits, Limitations, and Prior Authorization

Health professionals who deliver telemedicine and telehealth services must follow applicable Texas statutes, including the Texas Occupations Code, Title 3, and any rules and standards established by their respective licensing or certifying board. This includes all requirements for obtaining and documenting informed consent for treatment, data collection, and data sharing, while ensuring the privacy and security of patient data, in compliance with all record retention requirements.

The use of telemedicine and telehealth services within intermediate care facilities for individuals with intellectual disabilities (ICF-IID) and State Supported Living Centers is subject to the policies established by the Health and Human Services Commission (HHSC).

More than one medically necessary telemedicine service or telehealth service may be reimbursed for the same date and same place of service if the services are billed by providers of different specialties.

All confidentiality and Health Insurance Portability and Accountability Act (HIPAA) standards apply to telemedicine medical service and telehealth transmissions.

Refer to: Subsection 1.7.7, "Release of Confidential Information" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*) for more information about confidentiality standards.

3.1 Patient Health Information Security

The software system used by the distant site provider must allow secure authentication of the distant site provider and the client.

The physical environments of the client and the distant site provider must ensure that the client's protected health information remains confidential. A parent or legal guardian may be physically located in the patient site or distant site environment during a telehealth or telemedicine service with a child.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

A parent or legal guardian must provide written or verbal consent to the distant site provider to allow any other individual to be physically present in the distant or patient site environment during a telehealth or telemedicine service with a child.

An adult client must also provide written or verbal consent to the distant site provider to allow any other individual to be physically present in the distant or patient site environment during a telehealth or telemedicine service.

Providers of telehealth or telemedicine must maintain the confidentiality of protected health information (PHI) as required by Federal Register 42, Code of Federal Regulations (CFR) Part 2, 45 CFR Parts 160 and 164, Chapters 111 and 159 of the Texas Occupations Code, and other applicable federal and state law.

Providers of telehealth or telemedicine must also comply with the requirements for authorized disclosure of PHI relating to clients in state mental health facilities and residents in state supported living centers, which are included in, but not limited to, 42 CFR Part 2, 45 CFR Parts 160 and 164, Texas Health and Safety Code §611.004, and other applicable federal and state law.

All client health information generated or utilized during a telehealth or telemedicine service must be stored by the distant site provider in a client health record. If the distant site provider stores the patient health information in an electronic health record, the provider should use software that complies with Health Insurance Portability and Accountability Act (HIPAA) confidentiality and data encryption requirements, as well as with the United States Department of Health and Human Services (HHS) rules implementing HIPAA.

3.2 General Guidelines for Texas Medicaid MCOs

Texas Medicaid managed care organiziations (MCOs) are prohibited from denying reimbursement for covered services solely because they are delivered remotely. MCOs must consider reimbursement for all medically necessary Medicaid-covered services that are provided using telemedicine or telehealth.

Texas Medicaid MCOs must determine whether to reimburse for a telemedicine or telehealth service based on clinical and cost effectiveness, among other factors.

Texas Medicaid MCOs cannot deny, limit, or reduce reimbursement for a covered health-care service or procedure based on the provider's choice of telecommunications platform to provide the service or procedure using telemedicine or telehealth.

Providers should refer to individual MCO policies for additional coverage information.

Clinical and cost effectiveness determinations that result in prohibiting a service from being delivered using a synchronous audio-only technology, or store and forward technology in conjunction with synchronous audio-only technology are not considered denying, limiting, or reducing reimbursement for a covered health care service.

3.3 Services Provided through Telecommunications

3.3.1 Definitions of Terminology for Telemedicine and Telehealth Services

The following are definitions of terms used in telemedicine and telehealth services:

Telecommunications - The exchange of information by electronic and electrical means.

Platform - The technology, system, software, application, modality, or other method or means of delivery through which a health professional remotely interfaces with a client when providing a health care service or procedure as a telemedicine service or telehealth service.

Audiovisual - Synchronous audiovisual technology or store and forward technology in conjunction with synchronous audio-only technology.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Synchronous audiovisual technology - An interactive, two-way audio and video telecommunications platform that meets the privacy requirements of the Health Insurance Portability and Accountability Act.

Synchronous audio-only, also called synchronous telephone (audio-only), technology - An interactive, two-way audio telecommunications platform, including telephone technology, that uses only sound and meets the privacy requirements of the Health Insurance Portability and Accountability Act.

Store and forward technology - A telecommunications platform that stores and transmits or grants access to a person's clinical information for review by a health professional at a different physical location than the person that meets the privacy requirements of the Health Insurance Portability and Accountability Act.

In-person (or in person) - Within the physical presence of another person.

Not all Medicaid-covered services are authorized by HHSC for telemedicine or telehealth delivery in fee-for-service. Providers must always ensure the covered service is allowable by HHSC for telemedicine or telehealth services delivery.

Note: *For example, if a service is authorized for telemedicine or telehealth delivery only when using synchronous audiovisual technology, that service may not be delivered using store and forward technology, store and forward technology in conjunction with synchronous audio-only technology, synchronous audio-only technology, or asynchronous audio-only technology.*

Telemedicine or telehealth may be provided if clinically appropriate and safe, as determined by the provider, and agreed to by the person receiving services. Whenever possible, HHSC encourages face-to-face interaction, such as an in-person visit.

3.3.2 Telemedicine and Telehealth Conditions for Reimbursement

Conditions for reimbursement applicable to telemedicine and telehealth provided using a synchronous audiovisual technology platform, or using store and forward technology in conjunction with synchronous audio-only are those that meet the following conditions:

- Must be designated for reimbursement by HHSC.
- Must be clinically effective and cost-effective, as determined and published in the benefit language by HHSC.
- May not be denied solely because an in-person medical service between a provider and client did not occur.
- May not be limited by requiring the provider to use a particular synchronous audiovisual technology platform to receive reimbursement for the service.

Other conditions for reimbursement applicable to services may vary by service type. Providers may refer to the appropriate TMPPM handbook for additional information on synchronous audiovisual technology platform coverage conditions.

Note: *Telemedicine and telehealth services that HHSC has determined are clinically effective and cost-effective when provided via a synchronous audiovisual technology platform or using store and forward technology in conjunction with synchronous audio-only technology can be found in the appropriate TMPPM handbooks.*

Conditions for reimbursement applicable to behavioral health services provided using a synchronous audio-only technology platform are those that meet the following conditions:

- Must be designated for reimbursement by HHSC.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Provider must obtain informed consent from the client, client's parent, or the client's legally authorized representative prior to rendering a behavioral health service through a synchronous audio-only technology platform; except when doing so is not feasible or could result in death or injury to the client. Verbal consent is permissible and must be documented in the client's medical record.
- Must be clinically effective and cost-effective, as determined and published in the benefit language by HHSC.
- May not be denied solely because an in-person medical service between a provider and client did not occur.
- May not be limited by requiring the provider to use a particular synchronous audio-only technology platform to receive reimbursement for the service.
- Other conditions for reimbursement applicable to behavioral health services may vary by service type. Providers may refer to the appropriate TMPPM handbook for additional information on audio-only coverage conditions.

Conditions for reimbursement applicable to non-behavioral health services provided using a synchronous audio-only technology platform:

- Must be designated for reimbursement by HHSC.
- Clinically effective and cost-effective, as determined and published by HHSC.
- May not be denied solely because an in-person medical service between a provider and client did not occur.
- May not be limited by requiring the provider to use a particular synchronous audio-only technology platform to receive reimbursement for the service.

Note: *Behavioral or non-behavioral health services that HHSC has determined are clinically effective and cost-effective when provided via a synchronous audio-only technology platform can be found in the appropriate TMPPM handbooks.*

Telemedicine and telehealth services are reimbursed in accordance with 1 TAC §355.

In the event of a Declaration of State of Disaster, HHSC will issue direction to providers regarding the use of telemedicine or telehealth services to include the use of a synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein to the extent permitted by Texas law.

Declaration of State of Disaster is when to an executive order or proclamation is issued by the governor declaring a state of disaster in accordance with Texas Government Code §418.014.

3.4 Telemedicine Services

Telemedicine medical services, also known as telemedicine, are allowable for Texas Medicaid. Telemedicine has the meaning assigned by *Texas Occupations Code* §111.001. Telemedicine services are defined as health-care services delivered by a physician licensed in Texas or a health professional who acts under the delegation and supervision of a health professional licensed in Texas and within the scope of the health professional's license to a client at a different physical location using telecommunications or information technology. Telemedicine excludes teledentistry services.

3.4.1 Distant Site

A distant site is the location of the provider rendering the service. Distant-site telemedicine benefits include services that are performed by the following providers, who must be enrolled as a Texas Medicaid provider:

- Physician

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- CNS
- NP
- PA
- CNM
- Federally Qualified Health Center (FQHC)

A distant site provider is the physician, or PA, NP, CNM, FQHC, Rural Health Clinic (RHC), or CNS who is supervised by and has delegated authority from a licensed Texas physician, who uses telemedicine to provide health-care services to a client in Texas.

Distant site providers must be licensed in Texas.

Distant site providers that provide mental health services must be appropriately licensed or certified in Texas, or be a qualified mental health professional-community services (QMHP-CS), as defined in 26 TAC §301.303(48).

A valid practitioner-patient relationship must exist between the distant site provider and the patient. A valid practitioner-patient relationship exists between the distant site provider and the patient if:

- The distant site provider meets the same standard of care required for and in-person service.
- The relationship can be established through:
  - A prior in-person service.
  - A prior telemedicine service that meets the delivery method requirements specified in *Texas Occupations Code* §111.005(a)(3).
  - The current telemedicine service that meets the delivery method requirements specified in *Texas Occupations Code* §111.005(a)(3).

A call coverage agreement established in accordance with Texas Medical Board (TMB) administrative rules in 22 TAC §174.1.

The distant site provider must obtain informed consent to treatment from the patient, patient's parent, or the patient's guardian prior to rendering a telemedicine medical service.

Distant site providers that communicate with clients using electronic communication methods other than phone or facsimile must provide clients with written notification of the physician's privacy practices prior to evaluation and treatment. A good faith effort must be made to obtain the client's written acknowledgment of the notice, including by email response.

A distant site provider should provide patients who receive a telemedicine service with guidance on the appropriate follow-up care.

Procedure codes that are reimbursed to distant site providers when billed with the 95 modifier (synchronous audiovisual technology) are included in the individual TMPPM handbooks. Procedure codes that indicate remote (telemedicine) delivery in the description do not need to be billed with the 95 modifier.

Procedure codes that are reimbursed to distant site providers when billed with the 93 modifier (audio-only services) are included in the individual TMPPM handbooks. Procedure codes that indicate telephone or audio-only delivery in their description do not need to be billed with the 93 modifier.

Behavioral health procedure codes that are reimbursed to distant site providers when billed with the FQ modifier (audio-only services) are included in the individual TMPPM handbooks. Procedure codes that indicate telephone or audio-only delivery in their description do not need to be billed with the FQ modifier.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Texas Medicaid MCOs must reimburse the following procedure codes when delivered via telemedicine services:

Procedure Codes									
G0406	G0407	G0408	G0425	G0426	G0427				

3.4.2 Telemedicine Service Delivery

The following delivery methods may be used to provide telemedicine within fee-for-service (FFS) Medicaid:

- Synchronous audiovisual technology between the distant site provider and the client in another location
- Synchronous audio-only technology between the distant site provider and the client in another location
- Store and forward technology in conjunction with synchronous audio-only technology between the distant site provider and the client in another location. The distant site provider must use one of the following:
  - Clinically relevant photographic or video images, including diagnostic images
  - The client's relevant medical records, such as medical history, laboratory and pathology results, and prescriptive histories

A Texas Medicaid managed care organization (MCO) is not required to provide reimbursement for telemedicine services that are provided through the following methods:

- A text-only email message
- A facsimile transmission

Texas Medicaid MCOs may optionally provide reimbursement for telemedicine services that are provided through asynchronous audio-only technology, such as voice mail technology. Distant site providers should contact each MCO to determine whether an MCO provides reimbursement for a specified modality.

3.4.2.1 Prescriptions Generated from a Telemedicine Medical Service

A distant site provider may issue a valid prescription as part of a telemedicine service. An electronic prescription (e-script) may be used as permitted by applicable federal and state statues and rules.

The same standards that apply for the issuance of a prescription during an in-person setting apply to prescriptions issued by a distant site provider.

The prescription must be issued for a legitimate medical purpose by the distant site provider as part of a valid practitioner-patient relationship.

The prescribing physician must be licensed in Texas. If the prescription is for a controlled substance, the prescribing physician must have a current valid U.S. Drug Enforcement Administration (DEA) registration number.

A licensed health professional acting under the delegation and supervision of a physician licensed in Texas may also issue a valid prescription. Prescribing must be in accordance with the required prescriptive authority agreement or other forms of delegation.

If the prescription is for a controlled substance, the health professional must have a current valid DEA registration number. If the prescription is for a schedule II controlled substance, the health professional must comply with DEA regulations regarding the use of electronic prescriptions. The health professional may also use the official prescription forms issued with their name, address, phone number, DEA registration number, delegating physician's name, and delegating physician's DEA registration number.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

As applicable, all drug prescriptions must meet the requirements of the Texas Controlled Substance Act (*Texas Health and Safety Code* §481), the Texas Dangerous Drug Act (*Texas Health and Safety Code* §483), and any other federal or state statutes or rules.

Telemedicine medical services used for the treatment of chronic pain with scheduled drugs via audio-only is prohibited, unless a patient:

- Is an established chronic pain patient of the physician or health professional issuing the prescription;
- Is receiving a prescription that is identical to a prescription issued at the previous visit; and
- Has been seen by the prescribing physician or health professional defined under Section 111.001(1) of Texas Occupations Code, in the last 90 days either in-person or via telemedicine using audio-visual communication.

Treatment of a client for acute pain with scheduled drugs using telemedicine is permitted. Acute pain is defined by 22 TAC §172.1(1).

All physicians must comply by 22 TAC §175.3 when issuing prescriptions through a telemedicine service.

3.4.3 Patient Site

A patient site is the place where the client is physically located. A client's home may be the patient site for telemedicine.

Patient-site providers that are enrolled in Texas Medicaid may only be reimbursed for the facility fee using procedure code Q3014. Procedure code Q3014 is payable to NP, CNS, PA, physicians, and outpatient hospital providers. Charges for other services that are performed at the patient site may be submitted separately. Procedure code Q3014 is not a benefit if the patient site is the client's home.

3.4.3.1 School-Based Setting

Telemedicine provided in a school-based setting by a physician, even if the physician is not the client's primary care physician or provider, are benefits if all of the following criteria are met:

- The physician is an authorized health-care provider enrolled in Texas Medicaid.
- The client is a child who is receiving the service in a primary or secondary school-based setting.
- The parent or legal guardian of the client provides consent before the service is provided.

Telemedicine services provided in a school-based setting are also a benefit if the physician delegates provision of services to a nurse practitioner, clinical nurse specialist, or physician assistant, as long as the nurse practitioner, clinical nurse specialist, or physician assistant is working within the scope of their professional license and within the scope of their delegation agreement with the physician.

3.4.4 Telemedicine Services for FQHCs

3.4.4.1 Distant Site

FQHCs may be reimbursed the distant-site provider fee for telemedicine services at the Prospective Payment System (PPS) rate or Alternative Prospective Payment System (APPS) rate.

FQHC practitioners may be employees of the FQHC or contracted with the FQHC.

FQHCs may be reimbursed the facility fee (procedure code Q3014) as an add-on procedure code that should not be included in any cost reporting that is used to calculate a PPS or APPS per visit encounter rate.

To receive reimbursement for more than one facility fee for the same client on the same date of service, an FQHC must submit documentation of medical necessity that indicates that the client needed multiple distant-site provider consultations. An FQHC can use a signed letter from the client's treating health-

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

care provider at the FQHC to document the client's medical need for receiving multiple distant-site provider consultations on the same date of service. The letter must state that the client suffered an illness or injury that required additional diagnosis or treatment by a distant-site provider.

If an FQHC is eligible for payment of both an encounter fee and a facility fee for the same client on the same date of service, the FQHC must submit a claim for the facility fee separate from the claim that was submitted for the encounter.

3.4.5 Telemedicine Services for RHCs

RHCs may be reimbursed the distant-site provider fee for telemedicine services at the PPS rate. RHC practitioners may be employees of the RHC or contracted with the RHC.

The facility fee (procedure code Q3014) may be reimbursed as an add-on procedure code that should not be included in any cost reporting that is used to calculate the RHC AIR (All Inclusive Rate) PPS per visit encounter rate.

To receive reimbursement for more than one facility fee for the same client on the same date of service, an RHC must submit documentation of medical necessity that the client needed multiple distant-site provider consultations. An RHC can use a signed letter from the client's treating health care provider at the RHC documenting that the client suffered an illness or injury requiring additional diagnosis or treatment by a distant site provider. This will suffice to document the client's medical need for purposes of receiving additional facility fee payments for the same client on the same date of service. The letter must state that the client suffered an illness or injury that required additional diagnosis or treatment by a distant-site provider.

If an RHC is eligible for payment of both an encounter fee and a facility fee for the same client on the same date of service, the RHC must submit a claim for the facility fee separate from the claim submitted for the encounter.

The facility fee should not be included in any cost reporting that is used to calculate the RHC All Inclusive Rate (AIR) prospective payment system (PPS) per-visit encounter rate.

> ***Note:*** *Telemedicine and telehealth services must be billed with modifier 95. Procedure codes that indicate remote delivery (telemedicine medical services or telehealth services) in the description do not need to be billed with modifier 95.*

3.4.6 Documentation Requirements for Telemedicine

In addition to documentation requirements outlined in the Prior Authorization section, if any, all services outlined in this section are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

Medical records must be maintained for all telemedicine services.

Documentation for a service provided via telemedicine must be the same as for a comparable in-person service.

If a patient has a primary care provider who is not the distant site provider and the patient or their parent or legal guardian provides consent to a release of information, a distant site provider must provide the patient's primary care provider with the following information:

- A medical record or report with an explanation of the treatment provided by the distant site provider
- The distant site provider's evaluation, analysis, or diagnosis of the patient

Unless the telemedicine services are rendered to a child in a school-based setting, distant site providers of mental health services are not required to provide the patient's primary care provider with a treatment summary.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

For telemedicine provided to a child in a school-based setting, a notification provided by the telemedicine physician to the child's primary care provider must include a summary of the service, exam findings, prescribed or administered medications, and patient instructions.

If the child does not have a primary care provider, the notification must be provided to the child's parent or legal guardian. In addition to providing treatment information, the notification must include a list of primary care providers from which the child's parent or legal guardian may select a primary care provider.

3.5 Telehealth Services

Telehealth services, also known as telehealth, are allowable for Texas Medicaid. Telehealth has the meaning assigned by *Texas Occupations Code* §111.001. Telehealth services are defined as health-care services, other than telemedicine medical services or a teledentistry service, delivered by a health professional licensed, certified or otherwise entitled to practice in Texas and acting within the scope of the health professional's license, certification or entitlement to a patient at a different physical location other than the health professional using telecommunications or information technology.

Telehealth services are reimbursed in accordance with 1 TAC §355.

3.5.1 Distant Site

A distant site is the location of the provider rendering the service. A distant site provider is the health professional licensed, certified, or otherwise entitled to practice in Texas who uses telehealth services to provide health care services to a patient in Texas.

Licensed psychological associates (LPAs), provisionally licensed psychologists (PLPs), post-doctoral psychology fellows, and pre-doctoral psychology interns under psychologist supervision may also deliver telehealth services. All requirements outlined in the Outpatient Mental Health Services benefit language must be met.

Distant site providers that provide mental health services must be appropriately licensed or certified in Texas or be a QMHP-CS as defined in 26 *Texas Administrative Code* §301.303(48).

A distant-site provider that is located outside of state lines while rendering services is considered an out-of-state provider.

The distant site provider must obtain informed consent to treatment from the patient, patient's parent or the patient's legal guardian prior to rendering a telehealth service.

Distant site providers should meet all other telehealth service requirements specified in Texas Occupations Code §111.

Procedure codes that are benefits for distant site providers when billed with the 95 modifier (synchronous audiovisual technology) are included in the individual TMPPM handbooks. Procedure codes that indicate remote (telehealth service) delivery in the description do not need to be billed with the 95 modifier.

Procedure codes that are a benefit for distant site providers when billed with the 93 modifier (synchronous audio-only technology) are included in the individual TMPPM handbooks. Procedure codes that indicate telephone or audio-only delivery in their description do not need to be billed with the 93 modifier.

Behavioral health procedure codes that are a benefit for the distant site providers when billed with the FQ modifier (synchronous audio-only technology) are included in the individual TMPPM handbooks. Procedure codes that indicate telephone or audio-only delivery in their description do not need to be billed with the FQ modifier.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

3.5.2 Patient Site

A patient site is the place where the client is physically located while the service is rendered. Patient-site providers that are enrolled in Texas Medicaid may only be reimbursed for the facility fee using procedure code Q3014. Charges for other services that are performed at the patient site may be submitted separately.

A client's home may be the patient site for telehealth. Procedure code Q3014 is not a benefit if the patient site is the client's home.

3.5.3 Distant-Site Telehealth Services for FQHCs

FQHCs may be reimbursed the distant-site provider fee for telehealth services at the Prospective Payment System (PPS) rate or Alternative Prospective Payment System (APPS) rate.

FQHC practitioners may be employees of the FQHC or contracted with the FQHC.

The facility fee (procedure code Q3014) may be reimbursed as an add-on procedure code and should not be included in any cost reporting that is used to calculate a PPS or APPS per visit encounter rate.

To receive reimbursement for more than one facility fee for the same client on the same date of service, an FQHC must submit documentation of medical necessity indicating that the client needed multiple distant site provider consultations.

An FQHC can use a signed letter from the client's treating health care provider at the FQHC documenting that the client suffered an illness or injury requiring additional diagnosis or treatment by a distant site provider. This will suffice to document the client's medical need for purposes of receiving additional facility fee payments for the same client on the same date of service.

If an FQHC is eligible for payment of both an encounter and a facility fee for the same client on the same date of service, the FQHC must submit claims for the facility fee separate from claims submitted for the encounter.

3.5.4 Distant-Site Telehealth Services for RHCs

RHCs may be reimbursed the distant-site provider fee for telehealth services at the PPS rate.

RHC practitioners may be employees of the RHC or contracted with the RHC.

The facility fee (procedure code Q3014) may be reimbursed as an add-on procedure code that should not be included in any cost reporting that is used to calculate the RHC AIR (All Inclusive Rate) PPS per visit encounter rate.

To receive reimbursement for more than one facility fee for the same client on the same date of service, an RHC must submit documentation of medical necessity indicating that the client needed multiple distant site provider consultations.

A signed letter from the client's treating health care provider at the RHC documenting that the client suffered an illness or injury requiring additional diagnosis or treatment by a distant site provider will suffice to document the client's medical need for purposes of receiving additional facility fee payments for the same client on the same date of service.

If an RHC is eligible for payment of both an encounter and a facility fee for the same client on the same date of service, the RHC must submit claims for the facility fee separate from claims submitted for the encounter.

3.5.5 Telehealth Service Delivery

The following delivery methods may be used to provide telehealth services within FFS Medicaid:

- Synchronous audiovisual technology between the distant site provider and the client in another location

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Synchronous audio-only technology between the distant site provider and the client in another location
- Store and forward technology, in conjunction with synchronous audio-only technology between the distant site provider and the client in another location. The distant site provider must use one of the following:
  - Clinically relevant photographic or video images, including diagnostic images
  - The client's relevant medical records, such as medical history, laboratory and pathology results, and prescriptive histories

A Texas Medicaid MCO is not required to provide reimbursement for telehealth services that are provided through the following methods:

- A text-only email message
- A facsimile transmission

Texas Medicaid MCOs may optionally provide reimbursement for telehealth services that are provided through asynchronous audio-only technology, including voice mail technology. Distant site providers should contact each MCO to determine whether an MCO provides reimbursement for a specified modality.

3.5.6 Telehealth Service Documentation Requirements

In addition to documentation requirements outlined in the Prior Authorization section, if any, all services outlined in this section are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

Medical records must be maintained for all telehealth services.

Documentation for a telehealth service must be the same as a comparable in-person service.

If a client has a primary care provider, and the client or their parent or legal guardian provides consent to release information, a distant site provider must provide the client's primary care provider with the following information:

- A medical record or report with an explanation of the treatment provided by the distant site provider
- The distant site provider's evaluation, analysis, or diagnosis of the client

Providers of mental health services are not required to provide a client's primary care provider with a treatment summary.

ECI providers are not required to provide the client's primary care physician with a treatment summary.

3.6 Home Telemonitoring Services

Home telemonitoring services, also known as remote patient monitoring, is a benefit of Texas Medicaid. Home telemonitoring is a health service that requires scheduled remote monitoring of data related to a client's health, and transmission of the data from the client's home to a licensed home health agency, hospital, FQHC, or RHC. Data and information collected remotely will be transmitted from the client's home to the home health agency, hospital, FQHC, or RHC. The data transmission must comply with standards set by HIPAA.

Home telemonitoring providers must establish a plan of care (POC) with outcome measures based on the physician or requesting provider's order for each client, and the POC and outcome measures must be reviewed by the client's physician.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The RN, NP, CNS, or PA in a licensed home health agency, hospital, FQHC, or RHC is responsible for reporting data to the physician or requesting provider. Telemonitoring providers must be available 24 hours a day, 7 days a week. Although transmissions are generally at scheduled times, they can occur any time of the day or any day of the week, according to the client's plan of care.

Scheduled periodic reporting of the client data to the physician or requesting provider is required in the event of a measurement outside the parameters established in the physician's orders, or at least once per month when there have been no readings outside the established parameters.

Collection and interpretation of a client's data for home telemonitoring services (procedure code 99091) is a benefit in the office or hospital setting when services are provided by a physician or other qualified health care professional. Procedure code 99091 is limited to once in a 30-day period to the physician or provider ordering the services.

Home telemonitoring is a benefit for clients who have been diagnosed with either diabetes or hypertension or both.

Home telemonitoring services are also a benefit for clients who are 20 years of age and younger, with one or more of the following conditions:

- End-stage solid organ disease
- Organ transplant recipient
- Requiring mechanical ventilation

The physician or requesting provider who orders home telemonitoring services has a responsibility to ensure the following:

- The client has a choice of home telemonitoring providers.
- The client has the right to discontinue home telemonitoring services at any time.

Note: *A nurse practitioner (NP), clinical nurse specialist (CNS) or physician assistant (PA) are considered requesting providers and may request home telemonitoring and sign prior authorization forms.*

Although Texas Medicaid supports the use of home telemonitoring, clients are not required to use this service.

3.6.1 Facility Services

The provision and maintenance of home telemonitoring equipment is the responsibility of the home health agency, hospital, FQHC, or RHC. Procedure code S9110 with modifier U1 is reimbursed one time to a home health agency or hospital for the initial setup and installation in the client's home. A claim for a subsequent set up and installation will not be reimbursed unless there is a documented new episode of care. There will not be reimbursement for the addition of monitoring parameters during the current episode of care. Monthly home telemonitoring services (procedure code S9110 with the appropriate modifier) are a benefit when services are provided by a home health agency or hospital. Home health agency and hospital providers must submit revenue code 780 with procedure code S9110 and one of the appropriate modifiers listed in the table within this section.

Use one of the following modifiers with monthly home telemonitoring services procedure code S9110 to indicate the number of days per month data is transmitted from the client's home to the home telemonitoring provider:

Modifier	Number of Days Per Month
U2	1 through 5 days per month
U3	6 through 10 days per month
U4	11 through 15 days per month

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Modifier	Number of Days Per Month
U7	16 through 20 days per month
U8	21 through 25 days per month
U9	26 through 30 days per month

The unit of reimbursement for procedure code S9110 and the appropriate modifier is a rolling month.

Providers must bill the appropriate modifier to indicate the number of days that transmissions of data were received and reviewed for the client within a rolling month.

Providers are not required to submit modifiers U2, U3, U4, U7, U8, or U9 for telemonitoring on the prior authorization request, but are required to submit the appropriate modifier on the claim for reimbursement based on the number of days as outlined in the table.

Documentation supporting medical necessity for home telemonitoring services must be maintained in the client's medical record by the entity providing the service (home health agency, hospital, FQHC, or RHC) and is subject to retrospective review. All paid home telemonitoring services not supported by documentation of medical necessity are subject to recoupment.

3.7 Prior Authorization

Prior authorization is not required for telemedicine or telehealth services; however, it may be required for the individual procedure codes billed.

3.7.1 Prior Authorization of Telemonitoring Services

Procedure code 99091 does not require prior authorization.

Procedure code S9110 with or without modifier U1 requires prior authorization. Home telemonitoring services may be approved for up to 180 days per prior authorization request.

Procedure code S9110 with modifier U1 can only be prior authorized once per episode of care even if monitoring parameters are added after initial setup and installation, unless the provider submits documentation that extenuating circumstances require another installation of home telemonitoring equipment.

Procedure code S9110 for the transmission of client data will be prior authorized no more than once per month for the duration of the prior authorization period.

Prior authorization requests may be submitted to the TMHP Prior Authorization Department by mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

Refer to: Subsection 5.5.1.2, "Document Requirements and Retention" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*) for additional information about electronic signatures.

To facilitate determination of medical necessity and avoid unnecessary denials, the physician or requesting provider must provide correct and complete information, including documentation for medical necessity for the equipment, services or supplies requested. The physician or requesting provider and the home telemonitoring provider must maintain documentation of medical necessity in the client's medical record.

The initial request for prior authorization must be received no more than three business days from the date the home telemonitoring services are initiated. Requests received after the three-business day period will be denied for dates of service that occurred before the date the request was received.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Requests for additional home telemonitoring services received after the current prior authorization period ends will be denied for dates of service provided before the date the request was received.

Prior authorization requests for home telemonitoring must include all of the following:

- A completed Home Telemonitoring Services Prior Authorization Request Texas Medicaid form.
- The physician or requesting provider's signature dated within 30 days before the start of care.
- The frequency of the clinical data ordered by the physician or requesting provider.

An NP, CNS, or PA may sign the prior authorization request form. The NP, CNS, or PA's name, NPI, signature, and date must appear on the form.

The client's diagnoses or conditions and risk factors are necessary to qualify for home telemonitoring services.

For clients of any age who have diabetes or hypertension, at least one of the following risk factors will be required for approval of home telemonitoring services:

- Two or more hospitalizations in the previous 12-month period
- Frequent or recurrent emergency department visits
- A documented history of poor adherence to medication regimens
- Documented risk of falls
- A documented history of care access challenges

For clients who are 20 years of age or younger, one of the following conditions is required:

- End-stage solid organ disease
- Organ transplant recipient
- Mechanical ventilation

If the physician or requesting provider has not signed and dated the request form, the request must be accompanied by a written order or prescription that is signed and dated by the physician, or a complete verbal order from the physician. A complete written order or verbal order contains the following:

- Home telemonitoring transmission frequency
- The client's qualifying condition(s) and risk factors for home telemonitoring services.
- The ordered services including applicable procedure codes or descriptions.
- Dates of service matching or greater than those on the prior authorization request form.

If the initial setup and deployment is to be authorized, orders for initial requests must include the initial setup procedure code or description.

> ***Note:*** *A verbal order is considered current when the date received is on, or no more than, 30 days before the start of home telemonitoring services for the requested authorization period. A written order or prescription is considered current when it is signed and dated on, or no more than, 30 days before the start of home telemonitoring services.*

A request received without a physician's or a requesting provider's signature, documented verbal order, or written prescription will not be approved and may be denied.

3.8 Documentation Requirements

Documentation for a telecommunication service must be the same as for a comparable in-person service.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

3.8.1 Documentation Requirements for Telemonitoring Providers

Home telemonitoring providers, the home health agency, hospital, FQHC, or RHC must maintain all documentation in the client's medical record that shows:

- The home telemonitoring equipment is:
  - Capable of monitoring any data parameters included in the plan of care.
  - A Food and Drug Administration (FDA) Class II hospital-grade medical device.
  - Capable of measuring and transmitting the client's weight, oxygen levels in blood, glucose levels in blood, or blood pressure data.
- The monitoring equipment is being used, which must be demonstrated with data transmission information such as the:
  - Date of transmission.
  - Frequency of transmission.
  - Clinical data that was provided to the client's primary care physician or the requesting provider.
- The provider's staff is qualified to install the home telemonitoring equipment and to monitor the client's data, which will be transmitted according to the client's plan of care.
- No other provider is also monitoring the client's clinical data.
- Whether the client is able to operate the equipment or has a willing and able person to assist in completing electronic transmission of data. (Not required if the equipment does not require active participation from the client.)
- There are written protocols, policies, and procedures about the provision of the home telemonitoring services that are available to HHSC or its designee upon request and that they address the:
  - Authentication and authorization of users.
  - Authentication of the origin of client data transmitted.
  - Prevention of unauthorized access to the system or information.
  - System security, including the integrity of information that is collected, program integrity, and system integrity.
  - Maintenance of documentation about system and information usage.
  - Information storage, maintenance, and transmission.
  - Synchronization and verification of patient profile data.

4 Claims Filing and Reimbursement

4.1 Claims Information

Claims for telecommunication services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form or the UB-04 CMS-1450 paper claim form. Providers may purchase CMS-1500 paper claim forms or UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 paper claim form or a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills and itemized statements are not accepted as claim supplements.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Refer to: "Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on electronic claims submissions.

"Section 6: Claims Filing" (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Subsection 6.6, "UB-04 CMS-1450 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

4.1.1 Telemonitoring Services

Providers submitting claims for clients who have dual eligibility for Medicaid and Medicare must first submit their claims to Medicare for procedure code 99091. Claims for procedure code S9110 with any modifier should not be submitted to Medicare. Procedure code S9110 is not payable by Medicare.

4.2 Reimbursement

For fee information, providers can refer to the Online Fee Lookup (OFL) on the TMHP website at www.tmhp.com.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/resources/rate-and-code-updates/rate-changes.

Refer to: Subsection 2.2, "Fee-for-Service Reimbursement Methodology" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for more information about reimbursement.

1 General Information

The information in this handbook is intended for optometrists (doctors of optometry), ophthalmologists, and opticians who render services related to the eye and vision and for hearing aid professionals (fitters and dispensers, physicians, and audiologists) who provide hearing evaluations or fitting and dispensing services. The handbook provides information about Texas Medicaid's benefits, policies, and procedures applicable to these providers.

Important: *All providers are required to read and comply with subsection 4.1, "Enrollment" in this handbook. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver healthcare items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

Refer to: "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*).

This handbook contains information about Texas Medicaid fee-for-service benefits. For information about managed care benefits, refer to the *Medicaid Managed Care Handbook* (*Vol. 2, Provider Handbooks*).

Managed care carve-out services are administered as fee-for-service benefits. A list of all carve-out services is available in section 8, "Carve-Out Services" in the *Medicaid Managed Care Handbook* (*Vol. 2, Provider Handbooks*).

1.1 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission

According to the three-day and one-day payment window reimbursement guidelines, most professional and outpatient diagnostic and nondiagnostic services that are rendered within the designated timeframe of an inpatient hospital stay and are related to the inpatient hospital admission will not be reimbursed separately from the inpatient hospital stay if the services are rendered by the hospital or an entity that is wholly owned or operated by the hospital.

These reimbursement guidelines do not apply in the following circumstances:

- The professional services are rendered in the inpatient hospital setting.
- The hospital and the physician office or other entity are both owned by a third party, such as a health system.
- The hospital is not the sole or 100-percent owner of the entity.

Refer to: Subsection 3.7.4.17, "Payment Window Reimbursement Guidelines" in the *Inpatient and Outpatient Hospital Services Handbook* (*Vol. 2, Provider Handbooks*) for additional information about the payment window reimbursement guidelines.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

2 Nonimplantable Hearing Aid Devices and Related Services

2.1 Enrollment

To enroll in Texas Medicaid, hearing aid professionals (physicians, audiologists, and hearing aid fitters and dispensers) who provide hearing evaluations or fitting and dispensing services must be licensed by the licensing board of their profession to practice in the state where the service is performed. Hearing aid providers are eligible to enroll as individuals and facilities.

Providers cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

2.1.1 School Districts, State Agencies, and Inpatient Facilities

To be reimbursed for audiology and audiometry evaluation and diagnostic services for suspected and confirmed hearing loss (other than audiology evaluation and therapy services reimbursed to School Health and Related Services [SHARS] providers), audiologists employed by or contracted with school districts, state agencies, and inpatient hospitals must enroll as individual practitioners or group practitioners by choosing "Audiologist" on the enrollment application.

To be reimbursed for hearing aid devices and accessories, and fitting and dispensing visits and post-fitting follow-up visits, audiologists and hearing aid fitters and dispensers employed by or contracted with school districts, state agencies, and inpatient hospitals must enroll as individual practitioners or facilities by choosing "Hearing Aid" on the enrollment application.

2.2 Services, Benefits, Limitations, and Prior Authorization

The Texas Medicaid hearing services benefit includes those services that are medically necessary for clients of any age who have suspected or identified hearing loss that can be improved or ameliorated using a hearing aid device. Such services may be reimbursed to audiologists or hearing aid fitters and dispensers.

> ***Note:*** *Hearing-related services that are medically necessary because of a medical condition that cannot be improved or ameliorated using a nonimplantable hearing aid device are not considered part of the Texas Medicaid hearing services benefit. Providers may refer to the other Texas Medicaid Provider Procedures Manual Handbooks for benefit and limitation information about other hearing-related services.*

Texas Medicaid clients of any age are eligible to receive medically necessary hearing aid devices and services through the hearing services benefit outlined in the following sections. The Texas Medicaid hearing services benefit includes a broad range of hearing services for clients of all ages and reimburses providers who are appropriately enrolled with Texas Medicaid in accordance with their licensure and scope of practice. Prior authorization is not necessary for benefits within program limitations unless specifically addressed in the sections below.

The following hearing services are benefits of Texas Medicaid to appropriately-enrolled audiologists, hearing aid fitters and dispensers, and physicians according to their licensure, scope of practice, and enrollment as indicated:

- Audiologists and physicians may be reimbursed for audiology and audiometry evaluation and diagnostic services for suspected and confirmed hearing loss.
- Hearing aid fitters and dispensers may be reimbursed for hearing aid devices and accessories and fitting and dispensing visits and post-fitting follow-up visits.
- Physicians may be reimbursed for physician otology and otorhinolaryngology (ENT) services.

Texas Medicaid clients whose jobs are contingent on their possessing a hearing aid or who appear to have vocational potential and who need a hearing aid may be referred to the Texas Workforce Commission (TWC) for hearing aids.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

2.2.1 Limitations and Required Forms

All services provided to Texas Medicaid clients must be medically necessary. Unless otherwise specified, services may be reimbursed without prior authorization within the set limitations. In addition to services that always require prior authorization, providers may request prior authorization for medically necessary services that exceed benefit limitations.

Required forms, which are indicated in the specific sections below, are not required to be submitted with the claim, but the forms must be completed and maintained in the client's medical record and made available upon request by the Texas Health and Human Services Commission (HHSC) or the Texas Medicaid & Healthcare Partnership (TMHP) for retrospective review.

2.2.2 Hearing Screenings

Hearing screening provided due to client concern, or at the provider's discretion, is a benefit for clients of any age when the client is referred by a Medicaid-enrolled physician, and the screening is provided by a Medicaid-enrolled provider licensed to perform these services.

Note: *A nurse practitioner, clinical nurse specialist, or a physician assistant under physician supervision and delegation may also refer the client for hearing screening.*

Routine newborn hearing screenings and Texas Health Steps (THSteps) medical checkup hearing screenings are benefits for Texas Medicaid clients, and are included in the reimbursement for the routine service or visit.

2.2.2.1 Routine Hearing Screenings

Routine hearing screenings that are required as part of the newborn hospital stay and as part of a THSteps medical checkup are included in the Texas Medicaid hearing services benefit. These routine screenings are not reimbursed to audiologists, hearing aid fitters and dispensers, or physicians.

Newborn Hearing Screen

The newborn hearing screening is included in the reimbursement to the hospital for the newborn hospital stay and is not reimbursed separately. A newborn hearing screening must be offered to each newborn by the facility where the birth occurs, through a program mandated by the Texas State Legislature and certified by the Texas Department of State Health Services (DSHS). The screening is covered as part of the newborn delivery. An infant born outside a birthing facility and not admitted to a birthing facility shall be referred to a facility that provides newborn hearing screening. If a facility is not required by legislative mandate to perform newborn hearing screening, a referral must be made to a facility that offers the screening.

Refer to: Subsection 4.3.10, "Newborn Examination" in the *Children's Services Handbook* (*Vol. 2, Provider Handbooks*) for more information about the newborn hearing screening.

THSteps Medical Checkup Hearing Screen

Hearing screening is a required component of the THSteps medical checkup, and a standardized audiometric hearing screening is required at specific ages according to the periodicity schedule.

Refer to: The THSteps Medical Checkups Periodicity Schedule including the footnotes, which is available on the Texas HHS website, for coverage criteria when performed as part of a THSteps medical checkup.

Subsection 4.3.12.2.3, "Hearing Screening" in the *Children's Services Handbook* (*Vol. 2, Provider Handbooks*) for more information on THSteps checkup hearing screening.

2.2.2.2 Additional Hearing Screenings

A hearing screening requested outside of a routine newborn or THSteps medical checkup may be reimbursed as medically necessary without prior authorization using procedure code 92551.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Further diagnostic testing may also be reimbursed using the appropriate procedure code as indicated in subsection 2.2.3, "Audiology and Audiometry Evaluation and Diagnostic Services" in this handbook.

2.2.2.3 Abnormal Hearing Screening Results

If the screening returns abnormal results, the client must be referred to a Texas Medicaid-enrolled provider who is a licensed audiologist or physician who provides audiology services. Clients who are 20 years of age or younger and have abnormal screening results must be referred to a Texas Medicaid-enrolled provider who is an audiologist or physician who is experienced with the pediatric population and who offers auditory services.

The referring physician who performs the screening must complete the Physician's Examination Report, which is maintained in the client's medical record. A new Physician's Examination Report must be completed whenever there is a change in the client's hearing or a new hearing aid is needed. Retrospective review may be performed to ensure documentation supports the medical necessity of the service.

In addition to being referred to an appropriate provider for further testing, clients who are 35 months of age and younger and have suspected hearing loss must be referred to Early Childhood Intervention (ECI) as soon as possible but no longer than 7 days after identification, even if the client was referred to an appropriate provider for further testing.

The client's responsible adult may refuse to permit the referral or decline ECI services at any time. The provider must document the client's responsible adult's decision in the client's medical record.

Refer to: Subsection 2.9, "Early Childhood Intervention (ECI) Services" in the *Children's Services Handbook* (*Vol. 2, Provider Handbooks*) for more information about ECI.

2.2.3 Audiology and Audiometry Evaluation and Diagnostic Services

Audiometry is a benefit of Texas Medicaid for clients of any age. Physicians must recommend hearing evaluations based on examination of the client. Only physicians or licensed audiologists will be reimbursed for hearing evaluations. Hearing aid fitters and dispensers are not reimbursed for hearing evaluations.

Important: *The date of service for audiology and audiometry evaluations and diagnostic services is the date the service is rendered to the client. The date of service that is billed on the claim must match the date of service that is documented in the client's medical record.*

The following audiometry procedure codes are benefits of Texas Medicaid for a basic comprehensive audiometry survey:

Procedure Codes									
92550	92551	92552	92553	92555	92556	92557			

The following additional procedure codes may be benefits for audiometric testing:

Procedure Codes									
92558	92563	92565	92567	92568	92570	92571	92572	92575	92576
92578	92579	92582	92583	92584	92587	92588	92650	92651	92652
92653									

Refer to: The appropriate Texas Medicaid fee schedule on the TMHP web site at www.tmhp.com for procedure codes that may be reimbursed to individual types of providers.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Automated auditory brainstem response (AABR) and otoacoustic emissions (OAE) are benefits for clients of any ages when performed to identify and diagnose hearing loss and for newborns when performed for the purpose of a newborn hearing screening.

Note: *AABR and OAE tests performed as part of the newborn hearing screen are reimbursed as part of the hospital visit and are not reimbursed separately.*

2.2.3.1 Otological Examinations

Otological examinations are a benefit when medically necessary and provided by a Medicaid-enrolled physician licensed to perform this service.

Procedure codes 92504 and 92505 are benefits for otological examinations.

An otological examination may also include physician evaluation and management (E/M) services provided to diagnose or treat medical conditions.

Refer to: Subsection 9.2.60.3, "Group Clinical Visits" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*) for information about medically necessary physician E/M services.

2.2.3.2 Vestibular Evaluations

Vestibular evaluations are a benefit when medically necessary and provided by a Medicaid-enrolled physician or nonphysician provider licensed to perform this service.

The following procedure codes for vestibular evaluations are benefits:

Procedure Codes									
92531	92532	92533	92534	92537	92538	92540	92541	92542	92544
92545	92546	92547							

2.2.3.3 Evaluative and Therapeutic Services

The following procedure codes may be reimbursed for evaluative and therapeutic services:

Procedure Codes									
92620	92621	92625							

Audiology providers may be reimbursed for services rendered in the office setting for procedure code 92621.

2.2.3.4 Intraoperative Neurophysiology Monitoring (IONM)

Audiology providers may be reimbursed for performing intraoperative neurophysiology monitoring (IONM) with the following procedure codes:

Procedure Codes									
95940	95941								

Refer to: Section 9.2.28.3, "Evoked Potential Testing" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*) for more information about intraoperative neurophysiology monitoring.

2.2.3.5 Forms and Documentation

Providers of hearing evaluations must have a report in the client's record. Providers must include in the report hearing evaluation test data. The Hearing Evaluation and Fitting and Dispensing Report (Form 3503) must be completed by the physician or audiologist who conducts the diagnostic testing. The provider who signs the report must maintain it in the client's file. The report includes audiometric

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

assessment results of the hearing evaluation and must provide objective documentation that amplification improves communication ability. Retrospective review may be performed to ensure documentation supports the medical necessity of the service.

For physician diagnostic hearing services (procedure codes 92502, 92504, 92540, 95940, and 95941), providers must maintain documentation of medical necessity in the client's medical record. Retrospective review may be performed to ensure that the documentation supports medical necessity for the service.

2.2.3.6 Prior Authorization

Hearing screening and testing services do not require prior authorization. Documentation of medical necessity must be maintained by the provider in the client's medical record. Retrospective review may be performed to ensure that the documentation supports medical necessity for the service.

Prior authorization requests may be submitted to the TMHP Prior Authorization Department via mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

Providers should use the Special Medical Prior Authorization (SMPA) Request Form for all prior authorization requests.

2.2.3.7 Limitations

Newborn hearing screenings provided during the birth admission are considered part of the newborn delivery payment to the facility and are not reimbursed as separate procedures.

An otological examination is a benefit of Texas Medicaid when medically necessary and provided by a Medicaid-enrolled physician licensed to perform this service.

An otological examination may also include physician E/M services provided to diagnose or treat medical conditions.

Refer to: Subsection 9.2.60.3, "Group Clinical Visits" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*) for information about medically necessary physician E/M services.

Audiometry survey procedure codes and evoked potential and otoacoustic emissions screening procedure codes may be reimbursed once per day.

Procedure codes 92551, 92552, and 92553 for pure tone audiometry are limited to one of any of these procedure codes per day, same provider, same client.

Procedure codes 92553 and 92556 are not reimbursed on the same day by the same provider for the same client. If both procedure codes are billed for the same date of service, same provider, and same client, they are denied with instructions to bill with the more appropriate, comprehensive audiometry procedure code 92557.

Procedure codes 92558, 92587, 92588, 92650, 92651, 92652, and 92653 may be reimbursed once per day, same provider, same client, assuming testing is done in both ears and must be billed with modifier 52 if the testing is only performed on one ear.

Procedure codes 92620, 92621, and 92625 may be reimbursed to the same provider four times each per rolling year. Providers must submit a prior authorization request for additional reimbursement of either procedure code.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

2.2.3.7.1 Tympanometry

Tympanometry (procedure code 92567) must be limited to selected individual cases where its use demonstrably adds to the provider's ability to establish a diagnosis and provide appropriate treatment. Tympanometry is limited to three services per rolling year when billed by any provider and is based on medical necessity, which must be documented in the client's medical record.

2.2.3.7.2 Electrical Testing

Electrical testing may be reimbursed for services rendered to clients of any age.

Electrical testing (procedure code 92547) must be billed with the same date of service by the same provider as procedure codes 92540, 92541, 92542, 92544, 92545, or 92546.

2.2.3.7.3 Vestibular Evaluation

Vestibular evaluation is a benefit of Texas Medicaid when medically necessary and provided by a provider who is licensed to provide this service.

Hearing pathway tests such as audiometry, AABR, and electrocochleography (ECoG) can also be used for the same purpose and are frequently combined with vestibular tests.

2.2.3.7.4 AABR and OAE Hearing Screening Services

An electroencephalogram (EEG) may be reimbursed for the same date of service as evoked response testing by any provider.

Texas Medicaid may reimburse physicians for ear and throat examination procedure codes 92502 and 92504. Physicians and non-physician providers licensed to perform this service may be reimbursed for procedure code 92540.

Refer to: Subsection 9.2.60, "Physician Evaluation and Management (E/M) Services" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*) for more information about these services.

Procedure codes 95940 and 95941 may be reimbursed in addition to each evoked potential test. Procedure codes 95940 and 95941 are limited to a maximum of 2 hours per day, per client, any provider, without documentation of medical necessity. Procedure codes 95940 and 95941 cannot be reported by the surgeon or anesthesiologist.

2.2.3.8 SHARS Audiology Services

Audiology services may be reimbursed to school districts and state agencies that are enrolled with Texas Medicaid as SHARS providers.

Refer to: Subsection 2.3.1, "Audiology Services" in the *School Health and Related Services (SHARS) Handbook* (*Vol. 2, Provider Handbooks*) for more information about SHARS services.

Other hearing evaluation, diagnostic, and hearing aid services may be reimbursed to appropriately-enrolled audiologists, hearing aid fitters and dispensers, and physicians as outlined in this section.

2.2.3.9 Noncovered Services

Texas Medicaid does not reimburse for a hearing screening completed in a day care, Head Start location, or a school, unless it is performed in a school-based health clinic as follow-up to an acute care medical visit. Separate procedure codes must not be billed for these services.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

2.2.4 Hearing Aid Devices and Accessories (Nonimplantable)

Texas Medicaid may reimburse hearing aid fitters and dispensers for the following devices and accessories:

Service	Limitation
Hearing aid devices	**Limitation:** • For clients who are 20 years of age and younger, 1 hearing aid device per ear may be reimbursed every 5 rolling years from the month it is dispensed. • For clients who are 21 years of age and older, if the client has at least a 35 dB hearing loss in both ears, 1 hearing aid device may be reimbursed every 5 years from the month it is dispensed. Either the left or the right may be reimbursed, but not both in the same 5 year period. ***Refer to:*** Subsection 2.2.4.1, "Forms and Documentation" in this handbook for additional medical necessity criteria. Replacement hearing aid devices that are required within the same 5-year period must be prior authorized. Repairs or modifications may be reimbursed without prior authorization once per rolling year after the 1-year warranty period has lapsed if the requested repair or modification is a better alternative than a new purchase. **Procedure codes:** See below for monaural and binaural procedure codes. Procedure code V5014 may be reimbursed for repairs and modifications. **Date of service:** The date of service for the initial hearing aid device is the date the client successfully completes the 30-day trial period and accepts the hearing aid device. ***Note:*** *During the warranty period, Texas Medicaid may reimburse providers for a replacement hearing aid and replacement hearing aid batteries. Texas Medicaid will not reimburse hearing aid repairs or modifications that are rendered during the 12-month manufacturer's warranty period. Providers must follow the manufacturer's repair process as outlined in their warranty contract.*
Hearing aid accessories	**Limitation:** As often as is medically necessary for clients who are 20 years of age and younger with prior authorization. ***Note:*** *Hearing aid accessories include, but are not limited to, chin straps, clips, boots, and headbands.* **Procedure code:** V5267 **Date of service:** The date of service is the date the client successfully completes the 30-day trial period and accepts the hearing aid device or the date the client receives the replacement accessory item.
Ear impression	**Limitation:** 1 each per hearing aid device as follows: • For one impression, bill a quantity of 1. • For two impressions, bill a quantity of 2. **Procedure codes:** V5275 **Date of service:** The date of service for the ear impression is the date the ear impression is taken.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Service	Limitation
Ear mold	**Limitation:** As medically necessary for clients who are 20 years of age and younger. For clients who are 21 years of age and older: • 3 ear molds per rolling year for custom ear molds • 4 ear molds per 30 days for disposable ear molds Ear molds must be billed using the appropriate LT or RT modifier. Replacement ear molds may be reimbursed as often as is medically necessary without prior authorization. Documentation of medical necessity must be maintained in the client's medical record. **Procedure codes:** V5264 and V5265 **Date of service:** The date of service for the ear mold is the date the ear mold is dispensed to the client.
Batteries (Replacement only)	**Limitation:** Replacement batteries may be reimbursed as often as is medically necessary when a hearing aid device has been previously reimbursed by Texas Medicaid. ***Note:*** *If a hearing aid has not been reimbursed by Texas Medicaid in the last 5 years, the replacement batteries may be reimbursed on appeal with a statement that documents medical necessity.* **Procedure code:** V5266 **Date of service:** The date of service is the date the client receives the replacement batteries.

The following monaural procedure codes may be reimbursed for medically necessary hearing aid devices and replacements that are rendered to clients of any age when they are billed with the appropriate modifier LT or RT to indicate for which ear the hearing aid device was purchased and fitted:

Procedure Codes									
V5030	V5040	V5244	V5245	V5246	V5247	V5254	V5255	V5256	V5257
V5298									

Procedure codes V5171, V5172, and V5181 may be reimbursed for monaural hearing aids that are rendered to clients who are 20 years of age and younger only.

The following binaural procedure codes may be reimbursed for medically necessary hearing aid devices and replacements that are rendered to clients who are 20 years of age and younger:

V5100	V5211	V5212	V5213	V5214	V5215	V5221	V5249	V5250	V5251
V5252	V5253	V5258	V5259	V5260	V5261				

Binaural hearing aid procedure codes must be submitted with a quantity of 1 per procedure code. Providers can refer to the Online Fee Lookup (OFL) or the applicable fee schedule on the TMHP website at www.tmhp.com for reimbursement rates.

Refer to: Subsection 2.4.2, "Reimbursement" in this handbook for more information about manual pricing.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

2.2.4.1 Forms and Documentation

Monaural hearing aids may be reimbursed for clients who have no medical contraindication for using a hearing aid and who have documentation of medical necessity. The following documentation of medical necessity must be maintained in the client's medical record:

- Hearing loss in the better ear of 35 dB or greater for the pure tone average of 500, 1000, 1500, and 2000 Hz, or a spondee threshold in the better ear of 35 dB or greater when pure tone thresholds cannot be established
- Documentation of communication need and a statement that the patient is alert and oriented and able to use the device appropriately by themselves or with assistance

Clients who are 21 years of age and older must meet the medical necessity criteria outlined above and have at least a 35 dB hearing loss in both ears to qualify for the purchase of a monaural hearing aid device.

Clients who are 20 years of age and younger must meet the medical necessity criteria outlined above and have at least a 35 dB hearing loss in both ears to qualify for the purchase of binaural hearing aid devices.

Claims for non-implantable hearing aid devices must be submitted with a manufacturer invoice showing the net acquisition cost of the non-implantable hearing aid device.

An invoice printed from an email or the Internet will not be accepted and should not be submitted with the claim as documentation to show the net acquisition cost of the hearing aid device unless the invoice reflects the actual price the provider paid for the hearing aid device.

Note: *The requirement to submit the net acquisition cost of the hearing aid device applies only to non-implantable monaural and binaural hearing aid devices including, but not limited to, procedure code V5298.*

Refer to: Subsection 6.3.1.1, "Place of Service (POS) Coding" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for more information about coding place of service for other locations.

2.2.4.2 Prior Authorization

Prior authorization is not required for medically necessary hearing aid devices and supplies that are provided within the limitations outlined in the table above.

Prior authorization is required for the following:

- *Replacement hearing aid devices that are required within the same 5-year period.* A replacement hearing aid device may be considered for prior authorization when loss or irreparable damage has occurred. A copy of the police or fire report, when appropriate, and measures to be taken to prevent reoccurrence must be submitted with the prior authorization request. Replacements will not be authorized when the equipment has been abused or neglected by the client, the client's family, or the caregiver.
- Hearing aid repair in excess of one per rolling year. The prior authorization request must include documentation supporting the need for the requested repair.
- *Hearing aid accessories for clients who are birth through 20 years of age.* Requests for prior authorization for children's hearing aid accessories including, but not limited to, chin straps, clips, boots, and headbands will be considered when the requests are submitted with documentation that shows that the client is birth through 20 years of age and that the requested supply is medically necessary for the proper use or functioning of the hearing aid device.
- *Hearing aid devices that are not currently a benefit of Texas Medicaid but that are medically necessary for clients who are birth through 20 years of age (using procedure code V5298).*

  The prior authorization request must include:

  - The medical necessity for the requested hearing aid device.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

  - The name of the manufacturer.
  - The model number, serial number, and the dates that the warranty is in effect for the requested hearing aid.
- Additional medically necessary repairs or modifications beyond 1 per year.
  For additional repairs or modifications, requests for prior authorization must include documentation that supports the need for the requested repair.

For services that require prior authorization, prior authorization must be obtained before the services are rendered. The prior authorization number must be included on the claim form when the claim is submitted to TMHP.

Prior authorization requests must be submitted to the TMHP Special Medical Prior Authorization (SMPA) Department with documentation that supports medical necessity for the requested device, service, or supply. Authorization may be submitted on the TMHP website at www.tmhp.com or by fax to 1-512-514-4213.

Important: *For clients who are birth through 20 years of age, if the authorization request is denied because it does not meet benefit criteria, the TMHP SMPA Department will refer the request to the TMHP Comprehensive Care Program (CCP) Department for consideration under CCP. The provider is not required to complete additional forms or request referral to the TMHP CCP Department.*

Providers may use the form of their choice to submit the required information to the TMHP SMPA Department. No specific request form is required.

Refer to: "Section 6: Claims Filing" (*Vol. 1, General Information*) for more information about the authorizations and claims filing processes.

2.2.4.3 Limitations

The following services and supplies must be provided to Texas Medicaid clients if a nonimplantable hearing aid device is medically necessary:

- An individual client assessment to identify the appropriate type of device
- The fitting/implantation of the device
- The re-assessment to determine whether the device allows for adequate hearing
- Expendable supplies that are necessary to keep the device functioning properly, such as batteries and accessories

Hearing devices are a benefit for clients of any age. Some types of hearing devices are age restricted.

A hearing aid dispensed through Texas Medicaid must meet the following criteria:

- Be a new and current model
- Meet the performance specifications indicated by the manufacturer
- Include, at minimum, a standard 12-month warranty that begins on the dispensing date of the hearing aid.

Providers must dispense each hearing aid reimbursed through Texas Medicaid with all necessary hearing aid accessories and supplies, including a 1-month supply of batteries. The reimbursement for monaural and binaural procedure codes includes the required hearing aid package as follows, and no separate reimbursement will be made for these items:

- Acquisition cost of the hearing aid (the actual cost or net cost of the hearing aid after any discounts or rebates have been deducted)

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Manufacturer's postage and handling charges, including shipping insurance
- All necessary hearing aid accessories or supplies
- Instructions for care and use
- A 1-month supply of batteries

Note: *TMHP does not supply the hearing aid devices, supplies, and accessories. Providers must purchase equipment directly from manufacturers and submit claims to TMHP for reimbursement using the appropriate procedure codes.*

Claims for procedure code 92628 will be denied when submitted by any provider on the same date of service if performed on the same ear as procedure code 92622, 92623, 92626, 92627, 92634, 92635, 92636, 92637, or V5010.

Procedure code 92629 is an add-on procedure and must be billed on the same claim as the primary procedure code 92628 for reimbursement.

Claims for procedure code 92631 will be denied when submitted by any provider on the same date of service if performed on the same ear as procedure codes 92622, 92623, 92626, 92627, 92636, and 92637.

Procedure code 92632 is an add-on procedure and must be billed on the same claim as the primary procedure code 92631 for reimbursement.

One hearing aid fitting service (either procedure code 92634 or V5011) per hearing aid is allowed within a rolling five-year period by any provider.

Claims for procedure code 92634 will be denied when submitted by any provider on the same date of service as procedure code 92636, 92637, or V5011.

Clients should have one follow-up fitting visit within five weeks following the hearing aid fitting visit and is included as part of the hearing aid fitting service (procedure code 92634).

Procedure code 92635 is an add-on procedure and must be billed on the same claim as the primary procedure code 92634 for reimbursement.

Claims for procedure code 92636 will be denied when submitted by any provider on the same date of service as procedure code 92628, 92629, 92631, 92632, 92634, or 92635.

Claims for procedure code 92636 are limited to a total of two visits per hearing aid, per calendar year, by any provider. Additional services for procedure code 92636 may be reimbursed with prior authorization.

Procedure code 92637 is an add-on procedure and must be billed on the same claim as the primary procedure code 92636 for reimbursement.

Procedure code 92638 is an add-on procedure and must be billed on the same claims that include the primary procedure code 92634 or 92636 for reimbursement.

Providers may perform hearing aid measurement services (procedure code 92639) and hearing device verification services (procedure code 92641) for clients who are:

- 20 years of age or younger for unilateral or bilateral services.
- 21 years of age or older for only unilateral services.

Providers must submit claims for procedure code 92639 and 92641 with modifier 52 if the service is performed on only one ear.

Procedure code 92639 is an add-on procedure and must be billed on the same claims that include primary procedure code 92634 or 92636 for reimbursement.

Procedure code V5298 may be reimbursed with prior authorization for hearing aid devices that are not currently a benefit of Texas Medicaid but that are medically necessary for clients who are birth through 20 years of age.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Services for residents in a skilled nursing facility (SNF), intermediate care facility (ICF), or extended care facility (ECF) must be ordered by the attending physician. The order must be on the client's chart, must state the condition that necessitates the hearing aid services, and must be signed by the attending physician.

2.2.5 Hearing Aid Services

The following additional hearing aid related procedures are benefits for services that are rendered to clients of any age:

Procedure Codes									
92628	92629	92631	92632	92634	92635	92636	92637	92638	92639
92641	V5010	V5011	V5264	V5265	V5266	V5275			

Texas Medicaid may reimburse hearing aid fitters and dispensers for the following services:

Service	Limitation
Fitting and dispensing visits	**Limitation:** 1 fitting per hearing aid procedure code per 5 rolling year period, regardless of the number of times a device is returned as unacceptable during a 30-day trial period **Procedure code:** 92634 or V5011 **Limitation:** 1 dispensing fee each time a hearing aid is dispensed and a new 30-day trial period begins **Procedure codes:** V5090 and V5241 (for clients of any age) and V5110, V5160, V5200, and V5240 (for clients who are 20 years of age and younger) The dispensing fee may be reimbursed separately from the fitting of the hearing aid. A fitting follow-up visit should occur within five weeks of the fitting and dispensing visit and is included in the reimbursement for the fitting and dispensing procedure and is not reimbursed separately.
Post-fitting follow-up services	**Limitation:** 2 per calendar year when billed by any provider **Procedure codes:** 92636 (monaural and binaural) first 30 minutes; 92637 (monaural and binaural) each additional 15 minutes Post-fitting follow-up services are limited to a total of two per calendar year by any provider. Additional hearing aid checks may be reimbursed with prior authorization.

2.2.5.1 Forms and Documentation

The forms and documentation required for the fitting and dispensing visits are as follows:

- Physician's Examination Report—The referring physician who performs the screening must complete the Physician's Examination Report, which is maintained in the client's medical record.

  Note: *An advanced practice registered nurse (APRN) or a physician assistant (PA) under physician supervision and delegation may also complete the Physician's Examination Report.*

- Hearing Evaluation and Fitting and Dispensing Report (Form 3503)—The Hearing Evaluation and Fitting and Dispensing Report (Form 3503) must be completed by the fitter/dispenser that conducts the fitting and dispensing visit. The provider who signs the report must maintain it in the client's file. The report includes audiometric assessment results of the hearing evaluation and must provide objective documentation to support improved communication ability with amplification. Retrospective review may be performed to ensure documentation supports the medical necessity of the device, service, or supply.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Client Acknowledgement Statement (created by the provider)—At the time the hearing aid device and supplies are dispensed, the client must sign a client acknowledgement statement to verify the client was evaluated and offered an appropriate hearing aid that meets the client's hearing need. The acknowledgement statement must include language that indicates the client is responsible for paying any hearing aid rental fees if charged. The provider must obtain the signed acknowledgment statement before dispensing the hearing aid device and supplies and must keep the signed acknowledgment statement in the client's file. Retrospective review may be performed to ensure documentation supports the medical necessity of the device, service, or supply.
- Prior to dispensing a hearing instrument, a provider must enter into a written contract with the client that meets the Texas Department of Licensing and Regulation (TDLR) rule requirements in 16 TAC §112.140. The signed contract should verify that:
  - The client has a 30-day trial period for the hearing aid.
  - If the client is not satisfied with the purchased hearing aid, the client may return it to the provider within the 30-day trial period. If the device is returned within the 30-day trial period, the provider may charge the client a rental fee not to exceed $2.00 per day. This fee is not a benefit of Texas Medicaid. The 30-day trial period and any charged rental fee must meet TDLR rule requirements in 16 TAC §112.140.
  - The contract must be executed prior to dispensing and must be maintained in the client's file.
  - The client must receive a copy of the executed contract.
  - All charges and fees associated with the trial period must be stated in the contract, which shall also include the name, address, and telephone number of TDLR.

After at least 30 days and the successful completion of the trial period, the provider must update the statement to indicate that the trial was successful and the client accepted the dispensed hearing aid device. The updated statement must be maintained in the client's file. Retrospective review may be performed to ensure documentation supports the medical necessity of the device, service, or supply.

For hearing aids that are dispensed in a provider's office, if a client fails to return by the end date of the trial period, the provider must contact the client. After 3 attempts have been made, if the client does not return to the provider's office, the provider must document all attempts to contact the client and must maintain this documentation in the client's file. Retrospective review may be performed to ensure documentation supports the contact attempts and the client's failure to return to the provider's office. This requirement does not apply for services that are rendered to clients who receive hearing aids in other places of service (i.e., nursing homes).

2.2.5.2 Prior Authorization

Prior authorization is not required for fitting and dispensing visits and the first two post-fitting follow-up service visits.

2.2.5.3 Limitations

The following hearing aid visits may be reimbursed by Texas Medicaid:

- The fitting and dispensing visits that encompass a 30-day trial period and include a hearing aid fitting follow-up five weeks after the trial period has been successfully completed
- A first post-fitting follow-up visit as needed after the hearing aid fitting follow-up
- A second post-fitting follow-up as needed after the first post-fitting follow-up visit
- Additional hearing aid checks may be reimbursed within a period of six months after a second post-fitting follow-up visit. Providers must submit a prior authorization request and documentation of medical necessity for the additional hearing aid checks.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The fitting visit includes the fitting, dispensing, and post-fitting check of the hearing aid. A trial period of up to 30 days is authorized by *Texas Occupations Code* §402.401. The 30-day trial period, and any charged rental fee, must meet the Texas Department of Licensing and Regulation (TDLR) rule requirements in 16 TAC §112.140.

Providers must allow each Texas Medicaid client a 30-consecutive-day trial period that begins with the dispensing date. This trial period gives the client time to determine whether the hearing aid device meets the client's needs. If the client is not satisfied with the purchased hearing aid, the client may return it to the provider, who must accept it. If the device is returned within 30 days of the date it was dispensed, the provider may charge the client a rental fee not to exceed $2 per day. This fee is not a benefit of Texas Medicaid and will not be reimbursed. The client is responsible for paying the hearing aid rental fees if the provider chooses to charge a fee for the rental of returned hearing aid devices.

During the trial period, providers may dispense additional hearing aids as medically necessary until either the client is satisfied with the results of the hearing aid or the provider determines that the client cannot benefit from the dispensing of another hearing aid. The dispensing date of each additional hearing aid starts a new trial period.

A fitting follow-up check should be performed within 5 weeks of the initial hearing aid fitting visit. This evaluation is considered part of the hearing aid fitting visit and is not reimbursed separately.

The first and second post-fitting follow-up visits are available if additional visits are required after the post-fitting check.

- *First post-fitting follow-up visit (procedure code 92636).* The first post-fitting follow-up visit must include a hearing aid check.
- *Second post-fitting follow-up visit (procedure code 92636).* The second post-fitting follow-up visit is available as needed after the fitting follow-up visit and the first post-fitting follow-up visit. The second post-fitting follow-up visit must include either a real ear measurement or aided sound field testing according to the guidelines specified for the hearing evaluation. If the aided sound field test scores suggest a decrease in hearing acuity, the provider must include pure tone and speech audiometry readings from the first evaluation.

Services for residents in an SNF, ICF, or ECF must be ordered by the attending physician. The order must be on the client's chart, must state the condition that necessitates the hearing aid services, and must be signed by the attending physician.

Home visit hearing evaluations and fittings are permitted only with documentation of client need in the physician's, advanced practice registered nurse (APRN) or a physician assistant (PA) written order.

Note: *APRN or a PA under physician supervision and delegation may also perform the evaluation.*

2.3 Documentation Requirements

All services, including hearing services, require documentation to support the medical necessity of the service rendered. Hearing services are subject to retrospective review and recoupment if documentation does not support the service billed.

Required forms for nonimplantable hearing devices and services, which are indicated in the specific sections above, are not submitted with the claim to TMHP, but the forms must be completed and maintained in the client's medical record and made available upon request by HHSC or TMHP for retrospective review.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

2.4 Claims Filing and Reimbursement

2.4.1 Claims Filing

Hearing services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Refer to: Subsection 2.2, "Fee-for-Service Reimbursement Methodology" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for more information about reimbursement.

Subsection 1.7.12, "Billing Clients" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*).

"Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on electronic claims submissions.

Subsection 6.1, "Claims Information" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Providers must file all claims electronically or on the appropriate Centers for Medicare & Medicaid Services (CMS) paper claim form after providing the services.

Exception: *Claims for non-implantable hearing aid devices must be submitted on the CMS-1500 paper claim form because electronic claim submissions do not allow for the submission of attachments.*

Claims must include the following information:

- The most appropriate *International Classification of Diseases,* Tenth Revision, Clinical Modification (ICD-10-CM) diagnosis code that represents the purpose for the service.
- The most appropriate Current Procedural Terminology (CPT) or Healthcare Common Procedure Coding System (HCPCS) procedure code(s) that represent the service(s) provided.
- The appropriate information as indicated on the provider enrollment letter (Electronic claims must also include the most appropriate attested taxonomy code.)

Note: *For Texas Medicaid managed care clients, all hearing aid benefits and otology, and audiometry services are administered by the client's Medicaid managed care organization (MCO).*

2.4.1.1 Non-implantable Hearing Aid Devices

To be reimbursed for a non-implantable hearing aid device, providers must submit documentation with the paper claim showing their cost for the hearing aid device. The Texas Health and Human Services Commission (HHSC) requires providers to submit non-implantable hearing aid claims using the CMS-1500 paper claim form because electronic claim submissions do not allow for the submission of attachments.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Providers must use the net acquisition cost as the amount billed on the claim. The net acquisition cost is the actual price the provider paid for the device, including the wholesale cost plus sales tax, shipping and handling, and any reductions resulting from discounts or rebates. Providers must not use usual and customary fees as the amount billed.

The documentation submitted with the claim must be a manufacturer invoice showing the net acquisition cost of the non-implantable hearing aid device. An original invoice that includes the manufacturer name, model number, serial number, and warranty expiration date must be submitted. Invoice templates will not be accepted.

An invoice printed from an email or the Internet will not be accepted and should not be submitted with the claim as documentation to show the net acquisition cost of the hearing aid device unless the invoice reflects the actual price the provider paid for the hearing aid device.

2.4.1.2 Third Party Liability

Standard third party liability (TPL) rules apply to all hearing services claims.

Refer to: "Section 8: Third Party Liability (TPL)" (*Vol. 1, General Information*).

2.4.2 Reimbursement

Hearing aid devices and all hearing and audiological services are reimbursed in accordance with 1 TAC §355.8141. To be reimbursed for both audiology services and hearing aid fitting and dispensing services, audiologists must enroll with Texas Medicaid as audiologists and also as hearing aid fitters and dispensers. Audiology services must be billed using the audiologist provider number and benefit code (for electronic claims only) as indicated on the provider enrollment letter that indicates "Audiologist," and hearing aid and fitting and dispensing services must be billed with the hearing aid provider number and benefit code (for electronic claims only) as indicated on the provider enrollment letter that indicates "Hearing Aid."

Requested items that are not represented by a specific procedure code must be prior authorized and are priced manually during the authorization process. Manually priced items for clients who are birth through 20 years of age require prior authorization that must be obtained through the TMHP SMPA Department. The reimbursement will be determined based on either the MSRP less 18 percent or based on the provider's documented invoice cost if there is no MSRP available.

Manually priced items are indicated with "Note Code 5" in the Texas Medicaid fee schedule.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/resources/rate-and-code-updates/rate-changes.

Providers may refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com.

2.4.2.1 National Correct Coding Initiative (NCCI) and Medically Unlikely Edit (MUE) Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals. Providers should refer to the CMS NCCI web page for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

3 Implantable Hearing Devices and Related Services

3.1 Enrollment

To enroll in Texas Medicaid, hearing services professionals who provide implantable hearing devices and services must be appropriately enrolled according to their licensure and scope of practice.

Providers cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

3.2 Services, Benefits, Limitations and Prior Authorization

Implantable hearing devices, including the cochlear implant device, the auditory brainstem implant (ABI), and the bone anchored hearing device (BAHD), are benefits of Texas Medicaid for clients of all ages.

The following services and supplies must be provided to Texas Medicaid clients if an implantable hearing aid device is medically necessary:

- An individual client assessment to identify the appropriate type of device
- The fitting of the device
- The reassessment to determine whether the device allows for adequate hearing
- Expendable supplies that are necessary to keep the device functioning properly, such as batteries and accessories

Hearing devices are a benefit for clients of any age. Some types of hearing devices are age restricted.

3.2.1 Cochlear Implants

The following procedure codes may be reimbursed for the cochlear implant device, separate components, and services:

Procedure Codes									
69930	L7368	L8499	L8614	L8615	L8616	L8617	L8618	L8619	L8621
L8622	L8623	L8624	L8627	L8628	L8629				

The following procedure codes may be reimbursed for diagnostic analysis of the cochlear implant:

Procedure Codes									
92601	92602	92603	92604						

Note: *ASCs are paid based on a global fee, with the exception that certain pieces of equipment may be reimbursed separately from the ASC or HASC global rate.*

3.2.1.1 Prior Authorization

Prior authorization is required for the following:

- Cochlear implant surgery, device, and replacement parts
- Sound processor repair or replacement
- Battery recharger unit
- Replacement batteries beyond the limitations outlined in the sections below

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Requests for prior authorization must be submitted by the provider to the SMPA Department with documentation supporting the medical necessity for the requested device, service, or supply.

Note: *Requests for clients who are 20 years of age or younger who do not meet the medical necessity criteria may be considered through Comprehensive Care Program (CCP).*

Documentation submitted for review must indicate who will be providing the cochlear implant device (i.e., the facility or the Durable Medical Equipment (DME) or medical supplier). The supplier's provider number must be included on the prior authorization request.

Prior authorization for a unilateral or bilateral cochlear implant may be granted for clients who are 9 months of age and older with documentation of all of the following criteria:

- Cognitive ability to use auditory cues and written documentation of agreement by the client or the client's parent or guardian that the client will participate in a program of post-implantation auditory rehabilitation. This documentation must be maintained in the client's medical record.
- Postlingual deafness or prelingual deafness.
- Freedom from middle-ear infection, an accessible cochlear lumen that is structurally suited to implantation, and freedom from lesions in the auditory nerve and acoustic areas of the central nervous system.
- No contraindications to surgery.
- Inability to derive benefit from appropriately fitted hearing aid devices.
- Documentation of poor speech discrimination and a recommendation for cochlear implant candidacy and the most appropriate ICD-10-CM diagnoses for severe-to-profound bilateral sensorineural hearing loss.

The initial lithium-ion battery recharger unit, additional medically necessary units, and additional replacement batteries beyond the limitations indicated in the following sections may be reimbursed with prior authorization. Documentation must be submitted with the prior authorization request to support medical necessity for the request.

Refer to: Subsection 3.2.4, "Sound Processor Replacement and Repair" in this handbook for more information about sound processor repair or replacement.

Prior authorization requests may be submitted to the TMHP Prior Authorization Department by mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

3.2.1.2 Limitations

Surgery

Procedure code 69930 with the appropriate modifier LT or RT may be reimbursed for unilateral cochlear implantation. Procedure code 69930 with modifier 50 may be reimbursed for bilateral cochlear implantation performed simultaneously.

Device and Components

Procedure codes L8627, L8628, and L8629 for the cochlear implant device and components may be reimbursed for clients who are 9 months of age and older as follows:

- The device must be approved by the Food and Drug Administration (FDA) and be age-appropriate for the client.
- One per day may be reimbursed with prior authorization.

The cochlear implant device and the surgery to implant the device may be reimbursed separately.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Replacement Batteries and Related Items

Replacement batteries and related items for the cochlear implant device include non-rechargeable batteries, rechargeable batteries, and recharger units as follows:

Procedure Code	Prior Authorization	Limitation
L8621 (Zinc air non-rechargeable)	Not required	Maximum of 50 per month
L8622 (Alkaline non-rechargeable)	Not required	Maximum of 31 per month
L8623 (Lithium-ion rechargeable)	Not required	2 batteries per calendar year
L8624 (Lithium-ion rechargeable)	Not required	2 batteries per calendar year
L7368 (Battery recharger unit for lithium-ion rechargeable batteries)	Required	1 replacement unit every 5 rolling years

Replacement batteries for clients with bilateral cochlear implants and two sound processors may be reimbursed when billed with the applicable battery procedure code and the appropriate LT or RT modifier.

Replacement batteries for the cochlear device are limited to clients with a cochlear implant procedure, device, or supply that has been billed within the past five rolling years. Replacement batteries for clients who did not receive the cochlear implant through Texas Medicaid will be considered for reimbursement on appeal with a physician's statement documenting medical necessity.

Additional batteries and lithium-ion battery recharger units beyond these limitations may be reimbursed with prior authorization.

3.2.1.3 Auditory Rehabilitation

Auditory rehabilitation is a benefit of Texas Medicaid when it is medically necessary for clients who have received a surgically implanted hearing device, or who have prelingual or postlingual hearing loss when the treating physician has determined that auditory rehabilitation would be beneficial.

The following procedure codes may be reimbursed for auditory rehabilitation:

Procedure Codes									
92626	92627	92630	92633						

One auditory rehabilitation evaluation and 12 visits per 180 day period may be reimbursed without prior authorization. Additional visits during a six rolling month period for clients who are 12 months of age through 20 years of age require prior authorization.

Procedure code 92627 is an add-on procedure and must be billed with the primary procedure code 92626 to be considered for reimbursement.

Procedure code 92627 may be reimbursed up to four times per day to the same provider.

Note: *Additional therapy services may be a benefit through the Texas Medicaid speech therapy benefit.*

Refer to: The *Physical Therapy, Occupational Therapy, and Speech Therapy Services Handbook* (*Vol. 2, Provider Handbooks*) for information about speech therapy.

Personal frequency modulated (FM) systems are not benefits of Texas Medicaid.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

3.2.2 Auditory Brainstem Implant (ABI)

The following procedure codes may be reimbursed for the ABI, related components, and services:

Procedure Codes									
92640	L8499	L8614	L8621	L8622	S2235				

3.2.2.1 Prior Authorization

The following implantable hearing devices and services require prior authorization:

- ABI surgery, device, and replacement parts
- Sound processor repair or replacement
- Replacement batteries beyond the limitations outlined in the sections below

Requests for prior authorization must be submitted to the SMPA Department with documentation supporting the medical necessity for the requested device, service, or supply.

Prior authorization requests and claims for ABI is limited to clients with a condition of neurofibromatosis, type II or Schwannomatosis.

Refer to: Subsection 2.2.1, "Limitations and Required Forms" in this handbook for additional information about replacement batteries.

Subsection 3.2.4, "Sound Processor Replacement and Repair" in this handbook for more information about sound processor repair or replacement.

3.2.2.2 Limitations

ABI is a benefit for clients who are 12 years of age and older.

Diagnostic analysis of the ABI (procedure code 92640) is limited to 2 hours per day when billed by any provider.

Zinc air batteries (procedure code L8621) are limited to a maximum of 50 per month. Alkaline batteries (procedure code L8622) are limited to a maximum of 31 per month.

Non-rechargeable batteries (procedure codes L8621 and L8622) do not require prior authorization. Procedure codes L8621 and L8622 must be billed using a left (LT) or right (RT) modifier. Since the ABI is not ear-specific, procedure codes L8621 and L8622 may be billed using either the LT or RT modifier.

Replacement batteries for the ABI are limited to clients with an ABI surgical procedure, device, or replacement part that has been billed within the past 5 rolling years. Replacement batteries for clients who did not receive their ABI through Texas Medicaid are considered for reimbursement on appeal with a physician's statement documenting medical necessity.

3.2.3 Bone-Anchored Hearing Device (BAHD)

The following procedure codes must be submitted for the BAHD and related components:

Procedure Codes										
69714	69716	69717	69719	69726	69727	69728	69729	69730	92622	92623
L8625	L8690	L8691	L8692	L8693	L8694	V5266				

3.2.3.1 Prior Authorization

The following implantable hearing devices and services require prior authorization:

- BAHD implant surgery, revision, device, and replacement parts
- Sound processor repair or replacement

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Requests for prior authorization must be submitted to the SMPA Department with documentation supporting the medical necessity for the requested device, service, or supply.

Providers should use the Special Medical Prior Authorization (SMPA) Request Form for all prior authorization requests.

Prior authorization requests may be granted for clients who are 5 years of age and older with all of the following:

- Documentation of previous attempts at hearing aid devices and why these devices are inadequate or have failed
- Documentation of scores on hearing tests for bone conduction thresholds and on maximum speech discrimination
- Documentation of audiological testing showing good inner ear function
- Documentation of a multidisciplinary assessment including physical, cognitive, communicative, and behavioral limitations describing the client's auditory disability and expected benefit with use of the BAHD implant
- Documentation of an appropriate diagnosis.

Benefit-eligible conditions may include, but are not limited to the following:

- Conductive hearing loss
- Sensorineural hearing loss
- Other anomalies of external ear with impairment of hearing
- Anomalies of skull and face bones

Refer to: Subsection 3.2.4, "Sound Processor Replacement and Repair" in this handbook for more information about sound processor repair or replacement.

3.2.3.2 Limitations

Implanted BAHDs are a benefit for clients who are 5 years of age and older.

A BAHD sound processor that is specifically worn on a soft headband is a benefit for clients five years old or younger. If chosen by a client, a BAHD sound processor worn on a soft headband is also a benefit for clients who are five years of age or older. The BAHD sound processor is not implanted. A BAHD sound processor worn on a soft headband may be reimbursed using procedure code L8692.

Replacement batteries for the BAHD (procedure code V5266) do not require prior authorization. The replacement batteries are limited to clients with a hearing device that has been billed within the past five rolling years. Replacement batteries for clients who did not receive the hearing device through Texas Medicaid will be considered for reimbursement on appeal with a physician's statement documenting the medical necessity.

Procedure codes L8691, L8692, L8693, and L8694 will be denied as part of another service when billed by any provider with the same date of service as procedure code L8690.

Procedure code L8692 for the BAHD device and components may be reimbursed once per day with prior authorization.

Bilateral BAHD procedures are not benefits of Texas Medicaid.

3.2.4 Sound Processor Replacement and Repair

3.2.4.1 Prior Authorization

Replacement and repair of a sound processor require prior authorization.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Documentation by the provider must explain the need for the replacement of the sound processor. The processor must be used for a minimum of 12 months before replacement of the unit will be considered.

The prior authorization request must include evidence of the purchase, such as the manufacturer's warranty.

Repair of a sound processor will be considered for prior authorization with documentation of medical necessity for the requested repair. Repair of a sound processor will be manually priced at the time the prior authorization is reviewed and granted. If the actual cost of the repair differs from the prior authorized fee, the provider must contact the SMPA Department to update the authorization before filing a claim for the repair services.

3.2.4.2 Limitations

Procedure code L8499 with modifier RB may be reimbursed for sound processor repair.

Repair or replacement of a sound processor is not a benefit during the manufacturer's warranty period.

Procedure code 92623 is an add-on procedure and must be billed with the primary procedure code (92622) on the same day, by the same provider to be considered for reimbursement.

3.2.5 Electromagnetic Bone Conduction Hearing Device - Removal Only

The removal of the electromagnetic bone conduction hearing aid may be reimbursed by Texas Medicaid using procedure code 69711.

The removal or repair of an electromagnetic bone conduction hearing device is limited to two procedures per lifetime when billed by any provider.

The implantation of the device is not a benefit of Texas Medicaid.

3.3 Documentation Requirements

All implantable hearing aid services require documentation to support the medical necessity of the service rendered. Hearing services are subject to retrospective review and recoupment if documentation does not support the service billed.

3.4 Claims Filing and Reimbursement

3.4.1 Claims Filing

Hearing services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Refer to: Subsection 2.2, "Fee-for-Service Reimbursement Methodology" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for more information about reimbursement.

Subsection 1.7.12, "Billing Clients" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*).

"Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on electronic claims submissions.

Subsection 6.1, "Claims Information" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Note: *For Texas Medicaid managed care clients, all implantable hearing devices and services are administered by the client's Medicaid MCO.*

3.4.1.1 Third Party Liability

Standard TPL rules apply to all hearing services claims.

Refer to: "Section 8: Third Party Liability (TPL)" (*Vol. 1, General Information*).

3.4.2 Reimbursement

Implantable hearing aids and related services are reimbursed in accordance with 1 TAC §355.8141.

Implantable hearing aids and related services are reimbursed at the lesser of the billed charges or the published Texas Medicaid fee. Unless otherwise indicated, providers may not make additional charges to the client for covered services; such charges constitute a breach of the Texas Medicaid contract.

Requested items that are not represented by a specific procedure code must be prior authorized and are priced manually during the authorization process. Manually priced items for clients who are birth through 20 years of age require prior authorization that must be obtained through the TMHP SMPA Department. The reimbursement will be determined based on either the MSRP less 18 percent or based on the provider's documented invoice cost. Manually priced items are indicated with "MP" in the reimbursement rate table at the end of this article.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/resources/rate-and-code-updates/rate-changes.

Providers may refer to the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com.

3.4.2.1 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals. Providers should refer to the CMS NCCI web page for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

4 Vision Care Professionals

4.1 Enrollment

To enroll in Texas Medicaid, optometrists (doctors of optometry [ODs]) and ophthalmologists must be licensed by the licensing board of their profession to practice in the state where the service is performed, at the time the service is performed, and be enrolled as Medicare providers.

An optometrist or ophthalmologist cannot be enrolled if their license is due to expire within 30 days; a current license must be submitted.

4.2 Provider Responsibilities

Suppliers of eyewear must comply with all Medicaid provider responsibilities and adhere to the following guidelines:

- Do not delay the ordering of eyewear or the dispensing of eyeglasses to the client while payment is pending from TMHP.
- Deliver the eyewear in a reasonable amount of time (usually two or three weeks from the date the order is placed by the client).
- Check the client's eligibility
- Visit TexMedConnect or access the Medicaid Client Portal for providers to determine whether eyeglasses have been reimbursed by Texas Medicaid within the last 24 months. Providers should ask clients if they recently received vision care services that may not be documented in My Account yet.
- Submit claims for eyewear services as soon as possible so the client's record indicates that eyewear or eyeglasses have been dispensed.
- Have the client, parent, or guardian sign and date the Medicaid Vision Eyewear Client Certification Form and retain it in their records. When a client chooses an eyeglass or contact lens option beyond the program limitations, or if eyeglasses or contact lenses are replaced because of loss or destruction, the client must acknowledge their choice and his/her liability for the cost difference by signing the Medicaid Vision Eyewear Client Certification Form. The form must remain in the provider's records.
- Do not charge a Medicaid client more than a patient not enrolled in Texas Medicaid for noncovered services (e.g., tints, oversized lenses, or frames).
- Keep invoices on file for a minimum of five years.
- Submit claims using the date eyeglasses were ordered as the date of service (DOS) (the start of the 95-day filing period), not the date the eyeglasses were dispensed.

4.3 Services, Benefits, Limitations, and Prior Authorization

Examination and treatment of eye conditions, including prescribing and dispensing of medically necessary eyeglasses or contact lenses, are benefits of Texas Medicaid and may be reimbursed to optometrist, ophthalmologist, and optician providers within the scope of practice for each.

The following services are included in other services and will not be considered for separate reimbursement:

- Vision screening conducted to meet State screening requirements, such as the DSHS School Vision and Hearing Screening Program.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Expenses for medical supplies, equipment, and other items that are not specifically made-to-order for the client are considered to have been incurred on the date the item is delivered.

Note: *Medicaid clients 22 years old and younger who have been determined by their provider to have a vision impairment that may require intensive or comprehensive vision impaired related services should be referred to the Texas Health and Human Services Commission (HHSC) Blind Children's Vocational Discovery and Development Program. Adults, youths and students who have been determined by their provider to have a vision impairment that may require intensive or comprehensive vision impaired related services should be referred to the Texas Workforce Commission (TWC).*

Note: *Vision Services requests for clients birth through 20 years of age who do not meet criteria as outlined in this handbook may be considered through the Texas Health Steps (THSteps)-Comprehensive Care Program (CCP).*

Ophthalmologist and Optometrist

Examination and treatment services rendered by an ophthalmologist or optometrist are not limited to the procedure codes included in this handbook.

Refer to: The Texas Medicaid fee schedules on the TMHP web site at www.tmhp.com for a complete list of procedure codes that may be reimbursed by Texas Medicaid.

Optician

Services rendered by an optician are limited to fitting and dispensing of medically necessary eyeglasses and contact lenses.

Note: *In accordance with the Omnibus Reconciliation Act of 1986, Section 9336, a Doctor of Optometry is considered a physician, with respect to the provision of any item or service the optometrist is authorized to perform by state law or regulation.*

4.3.1 Services Performed in Long-Term Care Facilities

Ophthalmological, optometric, and eyeglass or contact lens services provided in a skilled or intermediate care facility may be reimbursed when the client's attending physician has ordered the service and the signed order is included in the client's medical record at the nursing facility.

The ordering physician's name and National Provider Identifier (NPI) and taxonomy code must be documented on the claim when ophthalmological, optometric, and eyeglasses or contact lenses services are performed in a skilled or intermediate care facility.

4.3.2 Services Performed in Federally Qualified Healthcare Centers (FQHC)

Vision services rendered by FQHC providers may be reimbursed based on an all-inclusive rate per visit.

Refer to: Subsection 2.2, "Services, Benefits, Limitations, and Prior Authorization" in the *Clinics and Other Outpatient Facility Services Handbook* (*Vol. 2, Provider Handbooks*) for information about vision services that may be reimbursed to FQHC providers.

4.3.3 THSteps Medical Checkup Vision Screening

A vision screening must be completed during each THSteps medical checkup with standardized screenings performed at specific ages, as listed in the THSteps Periodicity Schedule. Providers may perform a vision screening during an acute care visit with the appropriate screening tools or refer at-risk infants and children to an optometrist or ophthalmologist who is experienced with the pediatric population and who can perform further testing, diagnosis, and treatment.

Refer to: Subsection 4.3.12.2.4, "Vision Screening" in the *Children's Services Handbook* (*Vol. 2, Provider Handbooks*) for information about THSteps medical checkup vision screenings.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

4.3.3.1 Vision Screening Outside of a THSteps Preventive Care Medical Checkup

Vision screening for clients who are birth through 20 years of age may be completed at any primary care provider's office visit upon the following:

- Request from a parent
- Referral from a school vision screening program
- Referral from a school nurse

Clients who are birth through 20 years of age must be screened for eye abnormalities by history, observation, and physical exam. Clients who are identified as high risk must be referred to a Medicaid-enrolled optometrist or ophthalmologist.

4.3.4 Noncovered Services

The following services and supplies are not a benefit of Texas Medicaid:

- Artificial eyes for clients who are 21 years of age and older.

  Note: *Artificial eyes for clients who are birth through 20 years may be considered under Texas Health Steps-Comprehensive Care Program (THSteps-CCP).*

- Eyeglasses for residents of institutions where the reimbursement formula and vendor reimbursement include this service.
- Eyeglasses or contact lenses prescribed or dispensed to clients at a hospital or nursing facility without documented orders of the attending physician in the client's medical records.
- Low vision aids.

  Note: *Clients may be referred to TWC for low vision aids.*

- Optional eyeglass features that are requested by the client but that do not increase visual acuity (e.g., lens tint, industrial hardening, and decorative accessories or lettering).
- Plano sunglasses.
- Extended color vision examination, dark adaptation examination, and vision screening.
- Spectacle (eyeglass) fitting services when billed separately.

Clients may be billed for noncovered frames and other items beyond Medicaid benefits. Providers must have the client sign and date the Medicaid Vision Eyewear Client Certification Form and retain it in the provider's records. The client payment amount is not considered other insurance and must not be entered as a credit amount in the electronic field.

Example: *Texas Medicaid may reimburse providers a total of $32.55 for eyeglass frames that are within the provider's selection for Medicaid reimbursement plus the allowed cost per lens. If the client chooses a pair of frames (such as $200 frames) that are outside of the provider's selections for Medicaid reimbursement and if the client chooses other items or services that are not a benefit of Texas Medicaid (such as tinted lenses for an extra $10 charge), the client is responsible for and may be billed for the balance of the cost of the frames ($172.07) and the other items that are not a benefit of Medicaid ($10 for tinted lenses).*

The provider may withhold the noncovered eyewear, contacts, or eyeglasses until the client pays for those items. If the client fails to pay for the noncovered items or has not returned for finished eyewear within a reasonable length of time (two to three months), the provider may return any reusable items to stock. Any payment made by TMHP for frames or lenses must be refunded to Texas Medicaid. If a client requests eyewear that is beyond program benefits (for example, scratch-resistant coating), Medicaid allows reimbursement up to the maximum fee. The provider may charge the client the difference

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

between the Medicaid payment and the customary charge for the eyewear requested, when the client has been shown the complete selection of Medicaid-covered eyewear and when the following conditions are met:

- The client rejects the Medicaid-covered eyewear and wants eyewear that complies with Texas Medicaid specifications, but is not included in the selection of Medicaid-covered eyewear.
- The client indicates a willingness to pay the difference between the Medicaid payment and the actual charge. The provider must have the client sign the Medicaid Vision Eyewear Client Certification Form and retain it in the provider's records.

4.3.5 Vision Testing

Vision testing and examination and treatment of eye conditions are benefits of Texas Medicaid and may be reimbursed to ophthalmologist or optometrist providers.

Routine eye examinations with refraction testing may be reimbursed using the following procedure codes:

Procedure Codes									
S0620	S0621								

Medical evaluation and examination may be reimbursed when accompanied by a medical condition other than refractive error using the following procedure codes:

Procedure Codes									
92002	92004	92012	92014	92015					

Procedure codes 92002, 92004, 92012, and 92014 are limited to one service per day by any provider.

Procedure codes 92002 and 92004 are limited to one new client visit every three years when no other professional services have been billed by the physician, or another physician of the same specialty in the same group practice, within the past three years.

A new client is defined as one who has not received any professional services from a physician or physician within the same group practice, of the same specialty, within the past three years.

An established client is one who has received professional services from a physician or physician within the same group practice, of the same specialty, within the past three years.

Refer to: Subsection 9.2.60.1.1, "New and Established Patient Services" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*) for information about new patient and established patient E/M services.

Vision testing procedure codes are subject to the CMS NCCI relationships. Claims that are submitted by physicians with the same specialty who are in the same group practice are processed as if they were the same provider. Providers should refer to the *Current Procedural Terminology (CPT) Manual* for additional information about intermediate and comprehensive ophthalmological services.

4.3.5.1 Routine Vision Testing

Procedure codes S0620 and S0621 are considered routine eye examinations and are limited to diagnosis codes Z0100 or Z0101.

Procedure codes S0620 and S0621 will be denied if billed with the same date of service as procedure codes 92020, 92265, 92270, 92273, 92274, 92285, 92286, and 92287.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Clients who are birth through 20 years of age are eligible for a routine eye examination with refraction testing for the purpose of obtaining eyeglasses or contact lenses once every 12 months. The limitation for refraction testing can be exceeded for clients who are birth through 20 years of age only when:

- The parent, teacher, or school nurse requests the refraction testing and it is medically necessary.
- There is a significant change in vision, and documentation supports a diopter (d) change of 0.5 or greater in the sphere, cylinder, prism measurements, or axis changes.

Clients who are 21 years of age and older are eligible for a routine eye examination with refraction testing for the purpose of obtaining eyeglasses or contact lenses once every 24 months. The limitation for refraction testing can be exceeded for clients who are 21 years of age and older only when there is a significant change in vision, and documentation supports a diopter change of 0.5 or more in the sphere, cylinder, prism measurements, or axis changes.

4.3.5.2 Medically Necessary Eye Examinations

An eye examination with or without refraction (procedure code 92002, 92004, 92012, 92014, or 92015) may be reimbursed for medical evaluations and examinations of the eye. Procedure codes 92002, 92004, 92012, 92014, and 92015 will not be reimbursed for routine exams.

Documentation in the client's medical record must support the medical necessity of the service performed.

Procedure codes 92002, 92004, 92012, and 92014 may be reimbursed when it is medically necessary to ophthalmologist or optometrist providers for medically necessary eye examinations without refraction.

Procedure code 92015 may be reimbursed to ophthalmologist or optometrist providers for refraction in addition to the eye examination procedure code 92002, 92004, 92012, or 92014. A refractive state (procedure code 92015) will be denied as part of another service if it is billed with the same date of service by any provider as procedure code S0620 or S0621.

4.3.6 Special Ophthalmological Services and Diagnostic Testing

4.3.6.1 Ophthalmological Examination and Evaluation with General Anesthesia

An ophthalmological examination and evaluation under general anesthesia (procedure codes 92018 and 92019) performed by an ophthalmologist may be medically necessary when a client has significant injury or cannot otherwise tolerate the procedure while conscious.

Procedure codes 92018 and 92019 may be reimbursed once per service, per day, when billed by any provider.

4.3.6.2 Ophthalmic Ultrasound

Ophthalmic ultrasound is a diagnostic test that uses high frequency sound waves to provide additional information about the interior of the eye and surrounding areas. The following procedure codes may be reimbursed for ophthalmic ultrasound services:

Procedure Codes									
76510	76511	76512	76513	76514	76516	76519	76529	76999	

Procedure codes 76510, 76511, 76512, 76513, 76516, are limited to two services per calendar year by any provider.

Corneal pachymetry (procedure code 76514) is used to determine the corneal thickness. Procedure code 76514 (unilateral or bilateral code) may be reimbursed once per lifetime, when billed by any provider, and is restricted to the following diagnosis codes:

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Diagnosis Codes

Q150	Q8788	Z947					

The one per lifetime limitation for procedure code 76514 does not apply when submitted with the following diagnosis codes:

Diagnosis Codes							
H1811	H1812	H1813	H18211	H18212	H18213	H18231	H18232
H18233	H18511	H18512	H18513	H21551	H21552	H21553	T868401
T868402	T868403	T868411	T868412	T868413	Z947		

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

When billing for two or more services, providers must bill with one of the diagnosis listed as an exception to the limit.

Procedure code 76999 is limited to one service per day, same procedure, same provider, and may be reimbursed with prior authorization.

Ophthalmic ultrasounds may be reimbursed when they are billed with the same date of service by the same provider as an eye examination visit or consultation.

Ophthalmic ultrasounds (procedure codes 76514 and 76516) are limited to one service, per day, by any provider.

Ophthalmic coherence biometry with intraocular lens power calculation will be considered medically necessary when the measurements are used to calculate the intraocular lens power prior to cataract extraction.

Ophthalmic biometry procedure codes 76519 and 92136 are duplicative tests and cannot be performed together. Procedure codes 76519 and 92136 are limited two services per lifetime, any provider, any combination.

Procedure code 76519 is defined as a bilateral service for the technical component and unilateral service for the professional component. The professional component is only billed when a decision to remove the cataract has been made by the patient and surgeon.

- Two services per day are allowed when the professional component is performed on both eyes on the same date.
- One physician may do the technical component and another physician the professional component. Each will need to use the appropriate modifier. The professional component should also have the anatomic modifier (LT or RT) appended.

When the scan is performed with a calculation done on the first eye, the provider must bill the total component for procedure code 76519 with modifier LT or RT to identify the eye on which the service was performed, or bill procedure code 76519 with total component plus procedure code 76519 with professional component and modifier LT or RT.

When the calculation is performed on the second eye, the provider must only bill procedure code 76519 with professional component and modifier LT or RT to identify the eye on which the service was performed.

If the technical and professional components are performed on both eyes on the same date, the provider must bill procedure code 76519 with the LT or RT modifier and procedure code 76519 with professional component and the corresponding LT or RT modifiers.

Ophthalmic biometry may be repeated after 12 months if the patient decides to have the surgery later or the procedure is performed by a different provider. Requests for a second ophthalmic biometry in less than 12 months will not be payable without documentation of significant change in vision. Documentation must include at least one of the following changes:

- A change of 0.50 diopters or more in any corresponding meridian.
- A cylinder axis change of at least 20 degrees for a cylinder power of 0.50-0.62 diopters.
- A cylinder axis change of at least 15 degrees for a cylinder power of 0.75-0.87 diopters.
- A cylinder axis change of at least 10 degrees for a cylinder power of 1.00-1.87 diopters.
- A cylinder axis change of at least 5 degrees for a cylinder power of 2.00 diopters or greater.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Prior Authorization Requirements

Procedure code 76999 requires prior authorization. Prior Authorization requests must be submitted on the SMPA Request Form and must include the following documentation:

- A clear, concise description of the ophthalmic ultrasound being performed.
- Reason for recommending this particular procedure.
- A statement confirming that a CPT or HCPCS code is not available for the procedure requested.
- The client's diagnosis.
- Documentation that this procedure is not investigational or experimental.
- The physician's intended fee for this procedure, including a comparable CPT or HCPCS code.

Note: *Services and procedures that are investigational or experimental are not a benefit of Texas Medicaid.*

4.3.6.3 Gonioscopy

Gonioscopy is an eye examination to look at the front part of the eye (anterior chamber) between the cornea and the iris. A microscope (slit lamp) is used to look inside the eye.

Procedure code 92020 will be denied as part of another service if billed on the same date of service by the same provider as procedure codes S0620 and S0621.

Procedure code 92020 may be reimbursed for gonioscopy when billed with one of the diagnosis codes in the following table:

Diagnosis Codes							
H20011	H20012	H20013	H20021	H20022	H20023	H20031	H20032
H20033	H20041	H20042	H20043	H20051	H20052	H20053	H2010
H2011	H2012	H2021	H2022	H2023	H20811	H20812	H20813
H20821	H20822	H20823	H209	H2101	H2102	H2103	H211X1
H211X2	H211X3	H21211	H21212	H21213	H21221	H21222	H21223
H21231	H21232	H21233	H21241	H21242	H21243	H21251	H21252
H21253	H21261	H21262	H21263	H21271	H21272	H21273	H2129
H21301	H21302	H21303	H21311	H21312	H21313	H21321	H21322

4.3.6.4 Corneal Topography

Corneal topography is a computer assisted diagnostic tool that creates a three-dimensional map of the shape and curvature of the cornea. Procedure code 92025 may be reimbursed for corneal topography. Procedure code 92025 is considered medically necessary to diagnose, monitor, and treat various visual conditions such as, the following:

- Pre-operatively for evaluation of irregular astigmatism prior to cataract surgery
- Monocular diplopia
- Bullous keratopathy
- Post-surgical or post traumatic astigmatism, measuring at a minimum of 3.5 diopters
- Post penetrating keratoplasty surgery
- Corneal dystrophy
- Complications of transplanted cornea
- Post traumatic corneal scarring
- Keratoconus
- Pterygium and/or corneal ectasia that cause visual impairment

Corneal topography may be reimbursed when it is billed with the same date of service by the same provider as an eye examination visit or consultation.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Corneal topography (procedure code 92025) is limited to one service, per day, and two services per calendar year, by any provider.

4.3.6.5 Sensorimotor Examination

A sensorimotor examination is an evaluation of the function of the ocular neuro-muscular system. This exam consists of interpretation and reporting of multiple ocular deviation measurements, including:

- Visual motor integration
- Reversal frequency (letters and numbers)
- Motor speed and precision
- Visual memory
- Visualization to test eye movement and control
- Focusing ability
- Eye teaming ability
- Depth perception
- Visual perception skills

Sensorimotor examination (procedure code 92060) is limited to one service per day and two services per calendar year by any provider. Procedure code 92060 may be reimbursed in addition to an eye examination visit.

4.3.6.6 Orthoptic Training

Orthoptics, a component of vision training or vision therapy, are exercises designed to improve the function of the eye muscles with an emphasis on binocular vision and eye movements.

Procedure codes 92065 and 92066 may be reimbursed for orthoptic training when it is billed with one of the following diagnosis codes:

Diagnosis Codes							
H50011	H50012	H50021	H50022	H50031	H50032	H50041	H50042
H5005	H5006	H5007	H5008	H50111	H50112	H50121	H50122
H50131	H50132	H50141	H50142	H5015	H5016	H5017	H5018
H5021	H5022	H50311	H50312	H5032	H50331	H50332	H5034
H50411	H50412	H5042	H5043	H5051	H5052	H5053	H5054
H5055	H50611	H50612	H5069	H50811	H50812	H5089	H5111
H5112	H518	H53011	H53012	H53013	H53021	H53022	H53023
H53031	H53032	H53033	H5501	H5502	H5503	H5504	H5509
H5581	H5582	H5589					

Orthoptic training is limited to 12 services per lifetime per client, when it is billed with one of the diagnosis codes in the above diagnosis table.

Providers must document in the medical record a diagnosis, treatment plan, and the reason for continuous treatment if the client attends multiple training sessions.

Procedure codes 92065 and 92066 may be reimbursed in addition to an eye examination visit.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

4.3.6.7 Visual Field Examinations

The following procedure codes may be reimbursed for visual field examinations:

Procedure Codes		
92081	92082	92083

Procedure codes 92081, 92082, and 92083 may be reimbursed once per day and twice per calendar year by any provider, for any combination of visual field examinations.

Procedure codes 92081, 92082 and 92083 are considered medically necessary under the following conditions:

- Disorder of the eyelids potentially affecting the visual field.
- A documented diagnosis of glaucoma.
- A suspected diagnosis of glaucoma with supporting evidence documented.
- A documented disorder of the optic nerve, the neurologic visual pathway, or retina.
- A recent intracranial hemorrhage, an intracranial mass or a recent measurement of increased intracranial pressure with or without visual symptomatology.
- A recently documented occlusion and/or stenosis of cerebral and precerebral arteries, a recently diagnosed transient cerebral ischemia or giant cell arteritis.
- A history of a cerebral aneurysm, pituitary tumor, occipital tumor or other condition potentially affecting the visual fields.
- A visual field defect demonstrated by gross visual field testing (e.g., confrontation testing).
- An initial workup for buphthalmos, congenital anomalies of the posterior segment or congenital ptosis.
- A disorder of the orbit, potentially affecting the visual field (e.g., orbital tumor, thyroid disease, etc.).
- A significant eye injury.
- A pale or swollen optic nerve documented by a recent examination.
- New functional limitations which may be due to visual field loss (i.e., reports by family that patient is running into things).
- Medication treatment (e.g., hydroxychloroquine) which has a high risk of potentially affecting the visual system.
- Initial evaluation for macular degeneration related to central vision loss or has experienced such loss resulting in vision measured at or below 20/70.

4.3.6.8 Serial Tonometry

Serial tonometry is used to determine the pressure of intraocular fluid in the diagnosis of certain conditions, such as glaucoma. Serial tonometry includes a series of pressure checks over the course of a day to measure peaks and acute elevations in intraocular pressure (diurnal curve).

Procedure code 92100 may be reimbursed once per day and twice per calendar year by any provider.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

4.3.6.9 Computerized Ophthalmic Diagnostic Imaging

The following procedure codes are a benefit of Texas Medicaid when medically indicated and may be reimbursed for Computerized Ophthalmic Diagnostic Imaging (CODI):

Procedure Codes									
92132	92133	92134	92137						

Procedure codes 92132, 92133, 92134, and 92137 are limited to one service per day, and two services per calendar year, any provider.

Procedure code 92132 will be denied as part of another service if billed on the same date of service by any provider as procedure code 76513.

Additional services may be requested for procedure codes 92134 and 91237, with prior authorization, for a total of 12 services per calendar year.

Prior authorization requests must be submitted on a SMPA Request Form and must include documentation of medical necessity for the following circumstances:

- Monitoring patients with conditions affecting the optic nerve (e.g., optic neuropathy) or retinal disease (e.g., macular degeneration, diabetic retinopathy) and in the evaluation and treatment of certain macular abnormalities (e.g., macular edema, atrophy associated with degenerative retinal diseases) including:
- Patients being treated with bevacizumab, aflibercept, pegaptanib sodium, dexamethasone, or ranibizumab for either diabetic retinopathy or macular degeneration.
- Patients being treated with chloroquine (CQ) and/or hydroxychloroquine (HCQ) for the development of retinopathy.

4.3.6.10 Ophthalmic Coherence Biometry

Ophthalmic coherence biometry with intraocular lens power calculation will be considered medically necessary when the measurements are used to calculate the intraocular lens power prior to cataract extraction.

Ophthalmic biometry procedure codes 76519 and 92136 are duplicative tests and cannot be performed together. Procedure codes 76519 and 92136 are limited two services per lifetime, any provider, any combination.

Procedure code 76519 is defined as a bilateral service for the technical component and unilateral service for the professional component. The professional component is only billed when a decision to remove the cataract has been made by the patient and surgeon.

- Two services per day are allowed when the professional component is performed on both eyes on the same date.
- One physician may do the technical component and another physician the professional component. Each will need to use the appropriate modifier. The professional component should also have the anatomic modifier (LT or RT) appended.

When the scan is performed with a calculation done on the first eye, the provider must bill the total component for procedure code 76519 with modifier LT or RT to identify the eye on which the service was performed, or bill procedure code 76519 with total component plus procedure code 76519 with professional component and modifier LT or RT.

When the calculation is performed on the second eye, the provider must only bill procedure code 76519 with professional component and modifier LT or RT to identify the eye on which the service was performed.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

If the technical and professional components are performed on both eyes on the same date, the provider must bill procedure code 76519 with the LT or RT modifier and procedure code 76519 with professional component and the corresponding LT or RT modifiers.

Ophthalmic biometry may be repeated after 12 months if the patient decides to have the surgery later or the procedure is performed by a different provider. Requests for a second ophthalmic biometry in less than 12 months will not be payable without documentation of significant change in vision. Documentation must include at least one of the following changes:

- A change of 0.50 diopters or more in any corresponding meridian.
- A cylinder axis change of at least 20 degrees for a cylinder power of 0.50-0.62 diopters.
- A cylinder axis change of at least 15 degrees for a cylinder power of 0.75-0.87 diopters.
- A cylinder axis change of at least 10 degrees for a cylinder power of 1.00-1.87 diopters.
- A cylinder axis change of at least 5 degrees for a cylinder power of 2.00 diopters or greater.

4.3.6.11 Ophthalmoscopy, Extended Ophthalmoscopy, and Fluorescein Angiography

Ophthalmoscopy, extended ophthalmoscopy, and fluorescein angiography may be reimbursed using the following procedure codes:

Procedure Codes									
92201	92202	92227	92228	92229	92230	92235	92240	92242	92250
92260									

Procedure codes 92201, 92202, 92227, 92229, 92230, and 92260 are reimbursed for the total component only.

Routine ophthalmoscopy is part of a general and special ophthalmologic service whenever indicated. It is a non-itemized service and is not reported separately.

Extended ophthalmoscopy (procedure codes 92201 and 92202) is a method of examining the posterior portion of the eye when the level of examination requires a complete view of the back of the eye and documentation is greater than that required during routine ophthalmoscopy. Extended ophthalmoscopy must add information not available from the standard evaluation services and/or information that will demonstrably affect the treatment plan.

Extended ophthalmoscopy is considered medically necessary for the following conditions:

- Infants (0-24 months) undergoing treatment and/or monitoring of retinopathy of prematurity
- Histoplasmosis
- Choroidal neoplasms
- Glaucoma
- Optic nerve pathology
- Diabetic retinopathy
- Hypertensive retinopathy
- Vascular occlusion
- Retinal neovascularization
- Macular pathology
- Retinal tear, thinning, schisis or detachment
- Hereditary retinal dystrophies

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Other visible retinal disorders requiring detailed imaging for adequate documentation

Extended ophthalmoscopy is not medically necessary under the following situations:

- Routine replacement of standard ophthalmoscopy with extended ophthalmoscopy to document the appearance of healthy retinal anatomy.
- Duplicative documentation of retinal pathology with extended ophthalmoscopy in conjunction with fundus photography, fluorescein angiography, etc., unless the additional diagnostic procedures provide new information to assist in clinical decision-making.
- Repeated performance in the presence of controlled and/or stable disease.

Repeat extended ophthalmoscopy is medically necessary when there is a change in signs, symptoms or specific condition. The frequency for providing extended ophthalmoscopy depends upon the medical necessity in each client which relates to the diagnosis. While most clients will require up to two services per year, in some cases, additional services may be reimbursed up to 12 services per year.

The client's medical record must contain documentation that fully supports the medical necessity for extended ophthalmoscopy. Retinal drawings must meet the following specifications:

- Must be a separate detailed sketch, minimal size of 3-4 inches
- All items must be identified and labeled
- Drawings in four-six standard colors are preferred. However, non-colored drawings are acceptable, if clearly labeled
- All abnormalities should be included in drawing

Procedure codes 92201 and 92202 are limited to one service per day and 12 services per calendar year by any provider.

Remote retinal imaging (procedure codes 92227, 92228, and 92229) is a benefit of Medicaid when the images are obtained by a provider at one facility, and then transmitted electronically, to be reviewed and interpreted at another site by an ophthalmologist or other qualified health care professional under the direction of a retinal specialist.

Procedure codes 92227, 92228, 92229, 92235, 92240, 92242, 92250 and 92260 are limited to one service per day and two services per calendar year by any provider.

Procedure code 92230 must be billed with modifier LT or RT to identify the eye on which the service was performed.

Procedure codes S0620 and S0621 will be denied if billed on the same date of service as procedure codes 92227, 92228, 92229, 92230, 92235, 92240, 92242, 92250 or 92260.

Fundus photography (procedure code 92250) is considered medically necessary when an existing clinical condition is subject to change in extent, appearance or size with potential direct impact on and the management of client care. These conditions include, but are not limited to the following:

- Macular degeneration
- Glaucoma
- Neoplasms of the retina or choroid
- Chorioretinal inflammation, scars, and other disorders of choroid
- Retinal hemorrhages
- Ischemia
- Retinal detachment

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Diabetic retinopathy
- Assessment of recently performed retinal laser surgery
- Lupus erythematosus
- Hypertension
- Multiple sclerosis
- Rheumatoid arthritis
- Sickle-cell anemia

Note: *Fundus photography performed for a routine screen of a normal eye, in the absence of a clinical condition, that is subject to change in extent, appearance or size is not a benefit of Texas Medicaid.*

4.3.6.12 Other Specialized Vision Services

The following procedure codes may be reimbursed by Texas Medicaid when the services are medically necessary:

Procedure Codes									
92265	92270	92273	92274	92285	92286	92287			

Procedure code 92265 is performed to evaluate nerve and muscle function of the eye muscles and considered medically necessary when performed for the diagnosis and evaluation of myasthenia gravis as well as other neuromuscular conditions effecting eye movement.

Procedure code 92273 is an acceptable alternative adjunctive modality useful in establishing loss of retinal function and distinguishing retinal from optic nerve lesions.

Procedure code 92274 is considered medically necessary for detecting chloroquine (Aralen) and hydroxychloroquine (Plaquenil) toxicity.

Procedure code 92285 may be indicated when photo-documentation is required to track the progression or lack of progression of an eye condition, or to document the progression of a particular course of treatment. This procedure should not be used to simply document the existence of a condition in order to enhance the medical record.

Procedure codes 92286 and 92287 are performed to evaluate the integrity of the cornea, iris and other anterior segment structures.

Texas Medicaid considers procedure code 92286 medically necessary for patients who meet one or more of the following criteria:

- Slit lamp evidence of endothelial dystrophy
- Slit lamp evidence of corneal edema
- Are about to undergo a secondary intraocular lens implantation
- Previous intraocular surgery requiring cataract surgery
- Are about to undergo a surgical procedure associated with a higher risk to corneal endothelium, i.e., phacoemulsification or refractive surgery
- Evidence of posterior polymorphous dystrophy of the cornea or iridocorneal-endothelium syndrome
- Will be fitted with extended wear contact lenses after intraocular surgery

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Procedure codes 92265, 92270, 92273, 92274, 92285, 92286, and 92287 may each be reimbursed once per day and twice per calendar year by any provider.

Procedure codes S0620 and S0621 will be denied if billed on the same date of service as procedure codes 92265, 92270, 92273, 92274, 92285, 92286, or 92287.

For other professional services, fitting services are included in the reimbursement for prosthetic eyeglasses or contact lenses.

Microfluidic analysis of tear osmolarity is a CLIA-waived lab test and may be performed by optometrists in the office setting.

Refer to: Subsection 2.2.13, "Urinalysis and Chemistry" in the *Radiology and Laboratory Services Handbook* (*Vol. 2, Provider Handbooks*) for information about microfluidic analysis (procedure code 83861).

4.3.7 Eyeglasses

Eyeglasses are a benefit of Texas Medicaid when the following criteria are met:

- Medically necessary
- Prescribed by a doctor of medicine, optometry, or osteopathy
- Prescribed to significantly improve vision or correct a medical condition
- In compliance with eyeglass program specifications for frames and lenses as stated in 1 Texas Administrative Code (TAC) §354.1017 and §363.503, Specifications for Eyewear

Eyeglasses may be provided to clients of any age when there is no other option available to correct or ameliorate a visual defect.

Eyeglasses are limited to once every 24 months. Additional services within the 24-month period may be considered when documentation in the client's medical record supports medical necessity for a diopter change of 0.5 or more in the sphere, cylinder, prism measurement(s), or axis changes. A new 24-month benefit period for eyewear begins with the placement of the new eyewear.

The prescription for eyeglasses must be given to the client upon request. A provider may not withhold a prescription for eyeglasses from a client even if Medicaid reimbursement for the eye examination has not been received.

The fitting of eyeglasses is considered part of the dispensing procedure and is not separately reimbursed.

4.3.7.1 Frames

The following procedure codes may be reimbursed for eyeglass frames:

Procedure Codes									
V2020	V2025								

Frames are limited to one per 24 calendar months by any provider.

4.3.7.2 Eyeglass Lenses

The following eyeglass lens procedure codes may be reimbursed for single vision lenses:

Procedure Codes									
V2100	V2101	V2102	V2103	V2104	V2105	V2106	V2107	V2108	V2109
V2110	V2111	V2112	V2113	V2114	V2115	V2118	V2121		

The following eyeglass lens procedure codes may be reimbursed for bifocal lens:

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Procedure Codes									
V2200	V2201	V2202	V2203	V2204	V2205	V2206	V2207	V2208	V2209
V2210	V2211	V2212	V2213	V2214	V2215	V2218	V2219	V2220	V2221

The following eyeglass lens procedure codes may be reimbursed for trifocal lenses:

Procedure Codes									
V2300	V2301	V2302	V2303	V2304	V2305	V2306	V2307	V2308	V2309
V2310	V2311	V2312	V2313	V2314	V2315	V2318	V2319	V2320	V2321

The following eyeglass lens procedure codes may be reimbursed for variable asphericity lenses:

Procedure Codes	
V2410	V2430

Eyeglass lenses are limited to one pair per 24 calendar months, any provider.

Providers must bill a quantity of two when billing for bilateral lenses with the same prescription.

4.3.7.3 Add-On Lenses

The following procedure codes may be reimbursed for add-on services:

Procedure Codes									
V2700	V2710	V2715	V2718	V2730	V2755	V2770	V2780		

Add-on procedure codes will not be reimbursed unless they are billed with the appropriate lens procedure code by the same provider for the same date of service.

Procedure code V2755 may be reimbursed for ultraviolet (U-V) protection when billed with one of the following diagnosis codes:

Diagnosis Codes							
H2701	H2702	H2703	H27111	H27112	H27113	H27121	H27122
H27123	H27131	H27132	H27133	Q123	Z961		

Procedure code V2755 will be denied when billed for the same date of service by the same provider as procedure code V2784.

4.3.7.4 * Polycarbonate Lenses

Polycarbonate lenses (procedure code V2784) may be reimbursed when billed with one of the diagnosis codes in the following table:

[Revised] Diagnosis Codes							
D8984	E083521	E083522	E083523	E083531	E083532	E083533	E083541

In addition to the diagnoses listed in the table, polycarbonate lenses also may be reimbursed when the client meets the following criteria:

- Lens power in at least one meridian of -5.25/+4.00 diopters or more and the eyeglasses are not functional in regular standard glass or plastic lens materials due to weight, thickness, or aberration
- Monocular vision with functional vision in one eye
- Retinal detachment or risk for retinal detachment (e.g., lattice degeneration, history of retinal detachment in the family, posterior vitreous detachment)

Polycarbonate lens claims must include a lens procedure code with lens power in one meridian of -5.25/+4.00d or more.

If the eyeglass lenses are not functional in regular standard glass or plastic due to weight, thickness, or aberration or for diagnosis not listed, providers must submit documentation of medical necessity. If documentation is not submitted with the claim, the polycarbonate lenses will be denied.

Procedure code V2755 will be denied when billed for the same date of service by the same provider as polycarbonate lenses.

4.3.7.5 Dispensing of Eyeglasses

Dispensing of eyeglasses includes the design, verification, fitting, adjustment, sale, and delivery to the client of (1) fabricated and finished spectacle lenses, (2) frames, or (3) other ophthalmic devices, prescribed by and dispensed in accordance with a prescription from a licensed physician or optometrist.

Providers must be able to dispense standard size frames at no cost to the eligible client.

Providers must offer each client the following frame options:

- 20 years of age or younger: a choice of six styles in three colors for each type of frame.
- 21 years of age or older: a choice of three styles in three colors for each type of frameA cylinder axis change of at least 15 degrees for a cylinder power of 0.75-0.87 diopters.

The type of frame choices that are a benefit are:

- Metal
- Zylonite

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

- Combination of metal and zylonite

When a client chooses eyeglass options beyond the program limitations, the client must be informed their choice is not a benefit of Texas Medicaid and acknowledge his or her liability for the cost difference by signing the Medicaid Vision Eyewear Client Certification form.

4.3.7.6 Repair of Eyeglasses

The eyeglass supplier is required to perform minor repairs on request (without charge) on eyeglasses that they have dispensed regardless of the client's age.

A repair costing $2.00 or less is considered a minor repair and is included in the eyeglass reimbursement.

Repair of eyeglasses is not a benefit for clients 21 years of age and older.

Repair of prosthetic eyeglasses, when the actual cost of materials exceeds $2.00 is a benefit for all ages.

Eyeglass repair costing $2.00 or more may be reimbursed using procedure code V2799 and requires the following:

- The cost of repair supplies cannot exceed the cost of replacement eyeglasses.
- All eyeglass repair materials must be new and at least equivalent to the original item.
- The provider must maintain the following in the client's medical record:
  - An itemized list of repairs
  - The replacement cost to determine whether criteria are met for repair

4.3.7.7 Replacement of Eyeglasses

Replacement of lost or destroyed eyeglasses is a benefit of Texas Medicaid for clients from birth through 20 years of age. If the eyeglasses are lost, stolen, or damaged beyond repair, the provider must have the client sign the Medicaid Vision Eyewear Client Certification Form and the signed form must be maintained in the client's medical record.

Claims for replacement lenses must be submitted with the RB modifier to ensure accurate processing. Prior authorization is not required for the replacement of eyeglasses.

Replacement of eyeglasses within the 24-month period is a benefit only when medically necessary due to a significant change in visual acuity. A new prescription must document at least one of the following changes:

- A change of 0.50 diopters or more in any corresponding meridian.
- A cylinder axis change of at least 20 degrees for a cylinder power of 0.50-0.62 diopters.
- A cylinder axis change of at least 15 degrees for a cylinder power of 0.75-0.87 diopters.
- A cylinder axis change of at least 10 degrees for a cylinder power of 1.00-1.87 diopters.
- A cylinder axis change of at least 5 degrees for a cylinder power of 2.00 diopters or greater.

4.3.7.8 Undeliverable Eyeglasses

If a client cancels an order for eyeglasses prior to their completion and delivery or if the eyeglasses become unusable because the client dies or his prescription changes prior to completion and delivery of the eyeglasses, the provider is still entitled to reimbursement based on the services furnished and the materials used, up to the time the provider learned of the cancellation of the eyeglasses or the fact that the eyeglasses would not be usable. This applies to lenses only, not to the frames.

4.3.8 Contact Lenses

Contact lenses may be considered for clients of any age if there is no other option available to correct or ameliorate a visual defect.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Contact lenses are limited to once every 24 months. Additional services within the 24-month period may be considered when documentation in the client's medical record supports medical necessity for a diopter change of 0.5 or more in the sphere, cylinder, prism measurement(s), or axis changes. A new 24-month benefit period for eyewear begins with the placement of the new non-prosthetic eyewear.

Prior authorization is required for all contact lenses unless provided in a medical emergency. Prior authorization decisions are based on the provider's written documentation supporting the need for contact lenses as the only means of correcting the vision defect.

The following procedure codes may be reimbursed for contact lenses:

Procedure Codes							
V2500	V2501	V2502	V2510	V2511	V2512	V2513	V2520
V2521	V2522	V2523	V2530	V2531	V2599		

Therapeutic soft (hydrophilic) contact lenses (procedure codes V2520, V2521, V2522, V2523) or gas-permeable fluid ventilated scleral lenses (procedure codes V2530 and V2531) are considered medically necessary prosthetics when used as moist corneal bandages for the treatment of severe ocular surface diseases.

4.3.8.1 Dispensing of Contact Lenses

Dispensing of contact lenses include the fabrication, ordering, adjustment, dispensing, sale, and delivery to the client of the contact lens(es) prescribed by and dispensed in accordance with a prescription from a licensed physician or optometrist.

When a client chooses contact lens options beyond the program limitations, the client must be informed their choice is not a benefit of Texas Medicaid and acknowledge his or her liability for the cost difference by signing the Medicaid Vision Eyewear Client Certification Form.

4.3.8.2 Contact Lens Fitting and Modification

The following procedure codes may be reimbursed for the fitting and modification of a contact lens:

Procedure Codes							
92310	92311	92312	92313	92314	92315	92316	92317
92325	92326						

Procedure codes 92310, 92325, and 92326 are limited to one service per day, any provider.

4.3.8.3 Contact Fitting for Corneal Bandage Lens

A contact lens fitting for placement of a corneal bandage lens may be medically necessary for eye protection and pain control due to a disease or injury.

The following procedure codes may be reimbursed for corneal bandage fitting:

Procedure Codes							
92071	92072						

The emergency condition necessitating a corneal bandage must be documented on the claim.

Procedure code 92071 is limited to one service per eye, per day, by any provider.

Modifier LT or RT must be included on the claim to identify the eye on which the service was performed. When procedure code 92071 is performed on both eyes on the same date of service, one procedure may be reimbursed at the full rate and the second procedure may be reimbursed at half rate.

Procedure code 92072 is limited to one service per lifetime by the same provider.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Procedure code 92072 will be denied if billed on the same date of service by the same provider as procedure code 92071.

Procedure codes 92071 or 92072 must be billed on the same date of service as one of the following procedure codes V2511, V2512, V2513, V2520, V2521, V2522, and V2523.

4.3.8.4 Prior Authorization Requirements

Prior authorization for contact lenses must be submitted on a SMPA Request Form, signed and dated by the prescribing physician or optometrist and must include the following documentation:

- Diagnosis causing the refractive error (such as keratoconus)
- Current and new prescriptions supporting a diopter change of 0.5 or more in the sphere, cylinder, prism measurement(s), or axis changes
- Which eye(s) need to be treated
- The procedure code(s) requested
- A brief statement addressing the medical necessity for vision correction by contact lens(es) and specifying why eyeglasses are inappropriate or contraindicated for this client

Note: *Additional contact lenses may be considered more frequently than the limitations previously outlined in this handbook, when documentation in the client's medical record supports medical necessity for a diopter change of 0.5 or more in the sphere, cylinder, prism measurement(s), or axis changes.*

Note: *Non-prosthetic contact lenses for emergency placement do not require prior authorization. The emergency condition necessitating a corneal bandage must be documented on the claim.*

Authorization for contact lenses may be considered for 60 days.

Temporary contact lenses after cataract surgery may be prior authorized for diagnosis code Z961 when medically necessary.

4.3.8.5 Replacement of Contact Lenses

Replacement of lost or destroyed contact lenses is a benefit of Texas Medicaid for clients from birth through 20 years of age. If the contact lenses are lost, stolen, or damaged beyond repair, the provider must have the client sign the Medicaid Vision Eyewear Client Certification Form and the signed form must be maintained in the client's medical record.

Replacement of contacts within the 24-month period is a benefit only when medically necessary due to a significant change in visual acuity. A new prescription must document at least one of the following changes:

- A change of 0.50 diopters or more in any corresponding meridian.
- A cylinder axis change of at least 20 degrees for a cylinder power of 0.50-0.62 diopters.
- A cylinder axis change of at least 15 degrees for a cylinder power of 0.75-0.87 diopters.
- A cylinder axis change of at least 10 degrees for a cylinder power of 1.00-1.87 diopters.
- A cylinder axis change of at least 5 degrees for a cylinder power of 2.00 diopters or greater.

Prior authorization is required for replacement of contact lenses.

The appropriate eyeglass and frame or contact lens procedure codes must be billed with modifier RB to indicate replacement.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

4.3.9 Eyeglasses and Contact Lenses

4.3.9.1 Medicare Coverage for Eyewear

Eye examinations for the purpose of prescribing, fitting, or changing eyeglasses or contact lenses because of refractive errors are not a benefit of Medicare. These services must be filed directly to Texas Medicaid when performed for a Medicaid Qualified Medicare Beneficiary (MQMB) client. Medicare coverage is limited to eye examinations for treatment of eye disease or injury and for a diagnosis of aphakia. When performing an eye examination with refraction for an MQMB client diagnosed with aphakia or disease or injury to the eye, the following procedures must be followed:

- Procedure code 92015 must be used to bill Texas Medicaid for the refractive portion of the examination and is payable with a diagnosis of aphakia or ocular disease only.
- The medical portion of the eye examination (procedure code 92002, 92004, 92012, or 92014) is covered by Medicare and must be billed to Medicare first. Medicare forwards this portion of the examination automatically to TMHP for deductible and coinsurance payment consideration according to current guidelines.

Refer to: Section 2.7, "Medicare Crossover Claim Reimbursement" in the *Section 2: Texas Medicaid Fee-for-Service Reimbursement* (*Vol. 2, Provider Handbooks*) for more information about current coinsurance and deductible payment guidelines.

Important: *Providers performing eye exams for refractive errors on Medicaid Qualified Medicare Beneficiary (MQMB) clients must bill TMHP. Do not send the refraction (procedure code 92015) to Medicare first. Texas Medicaid will not waive the 95-day filing deadline if the claim is billed to Medicare in error, nor will Medicare transfer the refraction to Texas Medicaid for payment.*

Medicare allows payment of one pair of conventional eyewear (contact lens or glasses) for clients who have had cataract surgery with insertion of an intraocular lens (IOL). Medicare considers the IOL the prosthetic device. Texas Medicaid providers must bill Medicare for the conventional (nonprosthetic) eyewear provided following an IOL insertion and bill Texas Medicaid for any replacements of the conventional (nonprosthetic) eyewear using the procedure codes in Section 4.3.7, "Eyeglasses" in the *Vision and Hearing Services Handbook* (*Vol. 2, Provider Handbooks*)and Section 4.3.8, "Contact Lenses" in the *Vision and Hearing Services Handbook* (*Vol. 2, Provider Handbooks*).

4.3.9.2 Prosthetic Eyeglasses or Contact Lenses

Prosthetic eyeglasses or contact lenses are lenses that replace the eye's organic lens when it is absent due to congenital or acquired aphakia. Aphakia may be the result of a congenital abnormality or defect, or an acquired condition as a result of trauma, or cataract removal without IOL insertion.

Prosthetic eyeglasses or contact lenses may be provided based on medical necessity. Prosthetic contact lenses may be provided, with prior authorization, for clients of any age with congenital or acquired aphakia. Eye examinations for aphakia (including congenital aphakia) and disease or injury to the eye may be reimbursed as often as is medically necessary.

Note: *Fitting services are included in the reimbursement for prosthetic eyeglasses.*

One pair of prosthetic eyeglasses or contact lens(es) is a benefit during a client's lifetime.

The following aphakia diagnosis codes must be used when billing for prosthetic eyeglasses:

Diagnosis Codes							
H2701	H2702	H2703	Q123				

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

Replacement of prosthetic eyeglasses or contact lens(es) is a benefit of Texas Medicaid regardless of age under the following circumstances:

- Loss or destruction
- Significant change in visual acuity with a diopter change of 0.5 or more in the sphere, cylinder, prism measurement(s), or axis changes

The provider must maintain documentation in the client's medical record supporting the medical necessity for the replacement eyeglasses or contact lens(es).

If the prosthetic eyewear is lost, stolen, or damaged beyond repair, the provider must have the client sign the Medicaid Vision Eyewear Client Certification Form and the signed form must be maintained in the client's medical record.

The appropriate eyeglass and frame or contact lens procedure codes must be billed with modifier RB to indicate replacement.

Refer to: Section 4.3.7, "Eyeglasses" in the *Vision and Hearing Services Handbook* (*Vol. 2, Provider Handbooks*) and Section 4.3.8, "Contact Lenses" in the *Vision and Hearing Services Handbook* (*Vol. 2, Provider Handbooks*)for the eyeglass lens, frame, contact lens procedure codes and dispensing requirements that apply to eyewear.

4.3.9.3 Eyeglasses or Contact Lenses following Cataract Surgery

4.3.9.3.1 Temporary Eyewear

Temporary eyeglasses or contact lenses after cataract surgery may be reimbursed when they are billed with the appropriate lens and frame procedure codes and diagnosis code Z961.

Temporary eyeglasses or contact lens(es) for these clients may be considered up to four months after surgery until the client is ready for permanent eyeglasses or contact lens(es) when medically necessary. The date of surgery is used to determine the convalescence period for temporary eyeglasses or contact lens(es). There are no limitations on the number of temporary contact lens(es) during the postsurgical convalescence period. Temporary eyeglasses or contact lens(es) will be denied if dispensed more than four months after the date of surgery.

4.3.9.3.2 Permanent Eyewear

Permanent eyeglasses or contact lens(es) following cataract surgery may be provided based on medical necessity for clients of any age. Permanent contact lenses require prior authorization.

Note: *Fitting services are included in the reimbursement for permanent eyeglasses.*

One pair of permanent eyeglasses or contact lens(es) is a benefit during a client's lifetime.

Providers must use diagnosis code Z961 to indicate the presence of an IOL when billing for permanent eyewear following cataract surgery.

Replacement of permanent eyeglasses or contact lens(es) is a benefit of Texas Medicaid regardless of age under the following circumstances:

- Loss or destruction
- Significant change in visual acuity with a diopter change of 0.5 or more in the sphere, cylinder, prism measurement(s), or axis changes

The provider must maintain documentation in the client's medical record supporting the medical necessity for the replacement eyeglasses or contact lens(es).

If the permanent eyewear is lost, stolen, or damaged beyond repair, the provider must have the client sign the Medicaid Vision Eyewear Client Certification Form and the signed form must be maintained in the client's medical record.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

The date of cataract surgery is not required on the claim for:

- Permanent contact lens(es) or eyeglasses after surgery
- Prosthetic contact lens(es) or eyeglasses after cataract surgery without IOL insertion

Providers must include diagnosis code Z961 to indicate the presence of an IOL on the claim.

4.3.9.4 Intraocular Lens (IOL) and Additional Eyewear

Intraocular lenses are benefits of Texas Medicaid. If conventional eyewear is medically necessary in addition to the IOL, the IOL is considered the prosthetic device, and the eyewear and any replacements are considered nonprosthetic.

Refer to: Section 9.2.49.4, "Intraocular Lens (IOL)" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*) for more information about IOL benefits.

Section 4.3.7, "Eyeglasses" in the *Vision and Hearing Services Handbook* (*Vol. 2, Provider Handbooks*)and Section 4.3.8, "Contact Lenses" in the *Vision and Hearing Services Handbook* (*Vol. 2, Provider Handbooks*) for more information about nonprosthetic eyewear

4.3.9.5 Artificial Eyes

For clients who are birth through 20 years of age, artificial eyes may be considered under CCP.

4.3.10 Surgical Vision Services

Refer to: Subsection 6.55, "Fluocinolone Acetonide (Retisert)" in the *Outpatient Drug Services Handbook* (*Vol. 2, Provider Handbooks*) for more information about fluocinolone acetonide benefits.

Subsection 9.2.49, "Ophthalmology" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*) for more information about surgical vision services.

4.3.11 Prior Authorization

Prior authorization is required for:

- Unlisted ultrasound procedures.
- Computerized ophthalmic diagnostic imaging, posterior segment, with interpretation and report, unilateral or bilateral; retina, beyond the maximum limits outlined in this handbook.
- All contact lenses, except corneal bandage lens(es) for emergency placement.
- All services requested through THSteps-CCP.

Requests for prior authorization must be received and approvals must be obtained before services are rendered. Requests received after the service date will be denied.

Prior authorization requests may be submitted to the TMHP Special Medical Prior Authorization Department via mail, fax, or the electronic portal. The electronic signature technology must meet all applicable federal and state statutes and administrative rules. Electronically-signed documents must have an electronic date on the same page as the signature, Electronic signatures that are generated through an electronic medical record (EMR) or electronic health record (EHR) system that complies with applicable federal and state statutes and rules are acceptable. All electronically-signed transactions and electronically-signed documents must be kept in the client's medical record. Prescribing and dispensing providers that utilize electronic signatures must provide a certification that the electronic signature technology that they use complies with all applicable federal and state statutes and administrative rules. Providers who submit a prior authorization request must also attest that electronic

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

signatures included in the request are true and correct to the best of their knowledge. A hard copy of electronic transactions and signed documents must be available upon request. Stamped signatures and images of wet signatures will not be accepted. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

To complete the prior authorization process by paper, the provider must fax or mail the completed Special Medical Prior Authorization (SMPA) Request Form to the TMHP-SMPA department and retain a copy of the signed and dated prior authorization form in the client's medical record.

To complete the prior authorization process electronically, the provider must complete the prior authorization requirements through any approved electronic methods and retain a copy of the signed and dated prior authorization form in the client's medical record.

The SMPA form must be signed and dated within 60 days before the date of service. Services will not be authorized prior to the ordering provider's signature date.

To facilitate determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including documentation for medical necessity for the equipment or supplies requested. The physician must maintain documentation of medical necessity in the client's medical record.

The requesting provider may be asked for additional information to clarify or complete a request.

Retrospective review may be performed to ensure documentation supports the medical necessity of the requested equipment or supplies.

4.4 Documentation Requirements

In addition to documentation requirements outlined in the prior authorization sections of this handbook, all services require documentation to support the medical necessity of the service rendered. Vision services are subject to retrospective review and recoupment if documentation does not support the service billed.

The client must sign and date the Medicaid Vision Eyewear Client Certification Form, and the provider must retain it in the provider's records.

When a client chooses an eyeglasses or contact lens option beyond the program limitations, eyeglasses or contact lenses are replaced because of loss or destruction the client must acknowledge their choice and liability for the cost difference by signing the Medicaid Vision Eyewear Client Certification Form and retain it in the provider's records.

The current and previous prescriptions must be documented in the client's medical record.

The provider must make the client's medical record available for review upon request by the following:

- HHSC
- Office of the Attorney General
- TMHP

4.5 Claims Filing and Reimbursement

4.5.1 Claims Filing

Vision care service claims must be submitted to TMHP in an approved electronic format or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a CMS-1500 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

CPT ONLY - COPYRIGHT 2025 AMERICAN MEDICAL ASSOCIATION. ALL RIGHTS RESERVED.

When submitting the client's old and new prescriptions to show an axis change or a diopter change of.5 or more, enter the new prescription in Block 24D, line 5, and the old prescription in Block 24D, line 6 of the CMS-1500 paper claim form.

Claims for eye examination services require a diagnosis. Claims for eye examinations that lack a diagnosis are listed as an incomplete claim on the Remittance and Status (R&S) report and must be resubmitted for payment consideration. Electronic claims that lack a diagnosis will be rejected. A letter with the reason for rejection and instructions for resubmission will be mailed the following business day.

When the eye exam limitation is exceeded for clients who are 20 years of age and younger, identify one of the following situations in Block 19 of the CMS-1500 paper claim form:

- A school nurse, teacher, or parent requests the eye examination.
- The eye examination is medically necessary.

4.5.2 Reimbursement

Providers must reflect the highest level of specificity for vision related diagnoses on claims or other documentation. Professional services by an optometrist for contact lenses and prosthetic eyewear are reimbursed in accordance with 1 TAC §355.8001 and §355.8085.

Procedure codes described as bilateral are inclusive codes, and right and left studies billed on the same day will be reimbursed at a quantity of one.

Procedure codes described as "unilateral or bilateral" will be reimbursed for the same amount whether one or both sides are tested.

FQHCs are paid an all-inclusive rate per visit for payable services in accordance with 1 TAC, §355.8261.

Suppliers of lenses and frames are reimbursed the lesser of their billed amount or of the established maximum allowable fee in accordance with 1 TAC, §355.8001. See the OFL or the applicable fee schedule on the TMHP website at www.tmhp.com.

Refer to: Subsection 2.2, "Fee-for-Service Reimbursement Methodology" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for more information about reimbursement.

Vision Services on the TMHP website at www.tmhp.com for a claim form example.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at www.tmhp.com/resources/rate-and-code-updates/rate-changes.

4.5.2.1 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals. Providers should refer to the CMS NCCI web page for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

If applicable and consistent with CMS billing guidelines, procedure codes must be billed with modifier LT (left side) or RT (right side) to identify the eye on which the service was performed.
