## Welcome—Texas Medicaid Provider Procedures Manual

This manual is a comprehensive guide for Texas Medicaid providers. It contains information about Texas Medicaid fee-for-service benefits, policies, and procedures including medical, dental, and children's services benefits.

**Referto:** The *Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks)* for information about the Medicaid Managed Care, which is administered by Texas Health and Human Services Commission (HHSC)-contracted managed care organizations (MCOs), dental managed care organizations, and behavioral health organizations (BHOs) across the state.

The *Texas Medicaid Provider Procedures Manual* is updated monthly on the TMHP website at [www.tmhp.com](http://www.tmhp.com) to include revisions to policies and procedures that went into effect in the prior month. The manual is available in portable document format (PDF) as a complete book and as individual sections and handbooks. A hypertext markup language (HTML) version is also be available.

The current version of the manual always appears prominently on the [Texas Medicaid Provider Procedures Manual](#) web page. All previously published annual editions of the *Texas Medicaid Provider Procedures Manual* have been archived. Users can access the archives through links on the Texas Medicaid Provider Procedures Manual web page.

Providers can determine what has changed each month by following the Release Notes link on the Texas Medicaid Provider Procedures Manual web page. The release notes include the sections and handbooks that have changed for the current month and the nature of the changes. Most changes have been previously announced in news articles on the TMHP website, and, where appropriate, the release notes link to prior website articles.

Publishing the manual monthly has eliminated the need for the *Texas Medicaid Bulletin*, which was discontinued following the publication of the September/October 2012 *Texas Medicaid Bulletin*, No. 243. Special bulletins, such as the annual Healthcare Common Procedure Coding System (HCPCS) bulletin, which is published in January of each year, will continue to be published on an as-needed basis.

The *Texas Medicaid Provider Procedures Manual* is divided into two volumes as follows:

- Volume 1: General Information

Volume 1 applies to all health-care providers who are enrolled in Texas Medicaid and provide services to Texas Medicaid fee-for-service clients. The sections in Volume 1 include general information for enrolling in the program, receiving appropriate reimbursement, prior authorizations, claim submissions and appeals for services rendered.

- Volume 2: Provider Handbooks

Each handbook in Volume 2 covers Medicaid policies, procedures, and claims filing requirements for specific products or services. Volume 2 includes the following handbooks:

- *Ambulance Services Handbook*
- *Behavioral Health, Rehabilitation, and Case Management Services Handbook*
- *Certified Respiratory Care Practitioners (CRCP) Services Handbook*
- *Children's Services Handbook*
- *Clinics and Other Outpatient Facility Services Handbook*
- *Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook*
- *Gynecological, Obstetrics, and Family Planning Title XIX Services*
- *Health and Human Services Commission Family Planning Program Services Handbook*
- *Healthy Texas Women Program Handbook*

- *Home Health Nursing and Private Duty Nursing Services Handbook*
- *Inpatient and Outpatient Hospital Services Handbook*
- *Medicaid Managed Care Handbook*
- *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook*
- *Medical Transportation Program Handbook*
- *Outpatient Drug Services Handbook*
- *Physical Therapy, Occupational Therapy, and Speech Therapy Services Handbook*
- *Radiology and Laboratory Services Handbook*
- *School Health and Related Services Handbook*
- *Telecommunications Services Handbook*
- *Vision and Hearing Services Handbook*

## **Introduction**

### **Texas Medicaid Administration**

The Texas Medical Assistance (Medicaid) Program was implemented on September 1, 1967, under the provisions of Title XIX of the federal *Social Security Act* and Chapter 32 of the *Texas Human Resources Code*.

The state of Texas and the federal government share the cost of funding Texas Medicaid. The Health and Human Services Commission (HHSC), the single state Medicaid agency, is responsible for the Title XIX Program. The administration of the program is accomplished through contracts and agreements with the following:

- Medical providers
- Texas Medicaid & Healthcare Partnership (TMHP), the fee-for-service claims administrator

- MAXIMUS, the enrollment broker
- Various managed care organizations (MCOs) and dental managed care organization (dental plans), that administer Medicaid Managed Care benefits.
- The Institute for Child Health Policy (ICHP), the quality monitor
- State agencies

Texas Medicaid providers are reimbursed for services through contracts with health-insuring contractors, fiscal agents, or direct vendor payments.

By signing an HHSC Medicaid Provider Agreement (through the enrollment process) and submitting Medicaid claims, each enrolled provider agrees to abide by the policies and procedures of Medicaid, published regulations, and the information and instructions in manuals, bulletins, and other instructional material furnished to the provider.

***Referto:*** “Appendix A: State, Federal, and TMHP Contact Information” (*Vol. 1, General Information*) for addresses and telephone numbers of HHSC and Department of State Health Services (DSHS) regional offices.

## 1.1 Provider Enrollment

To be eligible for Texas Medicaid reimbursement, a provider of health-care services (including an out-of-state provider) must:

- Meet all applicable eligibility criteria.
- Be approved by the Texas Health and Human Services Commission (HHSC) for enrollment and enter into a written provider agreement with HHSC.
- Obtain a National Provider Identifier (NPI) from the National Plan and Provider Enumeration System (NPPES).

**Referto:** Subsection 1.1.2, “NPI and Taxonomy Codes” in this section.

- File with the Texas Medicaid & Healthcare Partnership (TMHP) the required Texas Medicaid enrollment application ensuring that the application is correct, complete, and includes all required attachments and additional information.
- Provide any additional information requested by TMHP, HHSC, or the HHSC Office of Inspector General (OIG) in connection with the processing of the application.

Providers can use the online Provider Enrollment and Management System (PEMS) tool to enroll electronically through the TMHP website at [www.tmhp.com](http://www.tmhp.com).

**Referto:** Subsection 1.1.3, “Online Enrollment” in this section.

After receipt of all information necessary to process the application, the entire application process can typically take up to 60 days. This may be extended in special circumstances. Requests for exceptions to the enrollment process, risk category, and provider types that require additional state approval may extend the length of the application process.

All providers must be enrolled in Texas Medicaid before enrollment can be approved for any other service or program, including, but not limited to, Medicaid managed care.

Certain provider types are required to enroll in Medicare as a prerequisite for enrolling in Texas Medicaid. During the Texas Medicaid enrollment process, with HHSC approval, the Claims Administrator may waive the mandatory prerequisite for Medicare enrollment for certain providers whose type of practice will never serve Medicare-eligible individuals (e.g., pediatrics, obstetrician/gynecologist [OB/GYN]).

Providers must maintain a valid, current license or certification to be entitled to Texas Medicaid reimbursement. Providers cannot enroll in Texas Medicaid if their license or certification is due to expire within 30 days of application. A current license or certification must be submitted, if applicable.

**Referto:** Subsection 1.1.9.7, “Copy of License, Temporary License, or Certification” in this section.

Providers will receive an approval email once the application is completed.

**Referto:** Subsection 1.9, “Enrollment Criteria for Out-of-State Providers” in this section for additional criteria that out-of-state providers must meet to enroll in Texas Medicaid.

### 1.1.1 Provider Enrollment Revalidation Requirements

To remain in compliance with Title 42 Code of Federal Regulations §455.414, providers must complete the revalidation process before the end of their enrollment period, which is also called the “revalidation date.” If a provider’s enrollment period ends before TMHP has received the provider’s revalidation application, TMHP automatically disenrolls providers on the date that their enrollment period ends. Providers can view and confirm their revalidation date and enrollment information by logging into PEMS. Most providers have an enrollment period of 5 years. Some providers have shorter enrollment periods, which are based on risk categories and other considerations.

Providers can only submit the revalidation application online through PEMS.

Enrollment revalidation is available up to 180 days before the revalidation due date. Providers should submit their revalidation applications as soon as they are available so that the process can be completed before the enrollment period ends.

If providers do not complete the revalidation process before the end of their enrollment period, they will be disenrolled. Their claims will not be paid, and their prior authorization requests will be denied. They will not be eligible to participate as a network provider in Medicaid MCOs.

### 1.1.2 NPI and Taxonomy Codes

The NPI final rule, Federal Register 45, Code of Federal Regulations (CFR) Part 162, established the NPI as the standard unique identifier for health-care providers and requires covered health-care providers, clearinghouses, and health plans to use this identifier in Health Insurance Portability and Accountability Act (HIPAA)-covered transactions. An NPI is a 10-digit number assigned randomly by the NPPES. An NPI must be obtained before a provider can enroll as a Texas Medicaid provider.

PEMS will display the provider types that are eligible to enroll without an NPI.

The Health Care Provider Taxonomy Code Set is an external, non-medical collection of alphanumeric codes designed to classify health-care providers by provider type and specialty. Providers may have more than one taxonomy code. (Taxonomy codes can be obtained from the Washington Publishing Company website at [www.wpc-edi.com](http://www.wpc-edi.com)).

During the enrollment process, providers must select a primary taxonomy code associated with their provider type. Providers will attest with National Plan and Provider Enumeration System (NPPES) the approved Texas taxonomy codes to choose from that correspond to the services rendered by the type of provider they wish to enroll as. Only the code will be displayed. Due to copyright laws, TMHP is unable to publish the taxonomy description. Therefore, providers must verify the taxonomy code associated with their provider type and specialty before beginning the online attestation process.

### 1.1.3 Online Enrollment

Providers can begin the enrollment process on the [Provider Enrollment](#) page of the TMHP website.

**Note:** *All providers must be enrolled in Texas Medicaid before enrollment can be approved for Medicaid Managed Care.*

Online enrollment has the following advantages:

- NPI-based enrollment
- A single application for all programs
- A single revalidation date, and/or enrollment period
- Flexible application completion
- The effective date aligns with the approval date
- Paperless
- Consolidated provider agreement
- Email and online communication
- Online help features available
- Enhanced data validation
- 165 cumulative business days will be provided to correct all deficiencies
- Providers are able to edit submitted applications to correct identified deficiencies.

Enrolling online promotes accurate submissions, decreases processing time, and enables immediate feedback on the status of the application.

### 1.1.4 Provider Enrollment Identification

PEMS bases each enrollment application on the applying provider's NPI or API. Provider's who would like to enroll in Texas health-care programs must do so under one of two categories, individual or organization, determined by their NPI or API.

Individual providers, performing providers, and sole proprietors will enroll in PEMS with an NPI type of Individual.

Facility and group health-care providers who have a single employee or thousands of employees will enroll in PEMS with an NPI type of Organization.

- *Individual.* This type of enrollment applies to an individual healthcare professional who is licensed or certified in Texas and who is seeking enrollment under the name and social security or tax identification number of the individual. An individual may also enroll as an employee, using the tax identification number of the employer. Certain provider types must enroll as individuals, including:
  - Dietitians
  - Licensed vocational nurses (LVNs)
  - Respiratory care practitioners
  - Registered nurses—Comprehensive Care Program (CCP)
  - Physical and occupational therapists—CCP
  - Speech language pathologists—CCP
- *Performing provider.* This type of enrollment applies to an individual health care professional who is licensed or certified in Texas, and who is seeking enrollment under a group. The enrollment is under the federal tax identification number of the group, and payment is made to the group. If a health-care professional is required to enroll as an individual, as explained above, but the person is an employee and payment is to be made to the employer, the health-care professional does not enroll as a performing provider. Instead, the health-care professional enrolls as an individual provider under the federal tax identification number of their employer. Providers are encouraged to submit performing provider applications through a Group Initiated request.
- *Group.* This type of enrollment applies to healthcare items or services provided under the auspices of a legal entity, such as a partnership, corporation, limited liability company, or professional association, and the individuals providing healthcare items or services are required to be certified or licensed in Texas. The enrollment is under the name and tax identification number of the legal entity.

During the enrollment process, the available taxonomy code list is populated with either taxonomy code 193200000X or 193400000X for a clinic/group practice, depending on which specialty is chosen. Case Management for Children and Pregnant Women (CPW) providers enrolling as a group should use taxonomy code 251B00000X. The taxonomy codes for clinic/group practice providers are accurate and have been approved by HHSC. The most appropriate taxonomy codes should be selected for any performing providers that will be enrolled according to their specific performing provider type and specialty.

- *Facility.* This type of enrollment applies to situations in which licensure or certification applies to the entity. Although individuals working for or with the entity may be licensed or certified in their individual capacity, the enrollment is based on the licensure or certification of the entity. For this reason, facility enrollment does not require enrollment of performing providers. The following facility enrollment types require the disclosure of a Supervising Licensed Practitioner (SLP):
  - Family Planning Enrollment
  - Hearing Aid Enrollment

- Independent Lab Enrollment
- Texas Health Steps Medical (THSteps Medical) Enrollment
- The following provider types must enroll as facilities:
  - Ambulance and air ambulance
  - Ambulatory surgical center (ASC) and hospital-based ambulatory surgical center (HASC)
  - Birthing center
  - Catheterization lab
  - Chemical dependency treatment facility (licensed by the Texas Commission on Alcohol and Drug Abuse)
  - Consumer Directed Services Agency
  - County Indigent Health Care Program
  - Community mental health center
  - Comprehensive health center
  - Comprehensive outpatient rehabilitation facility/outpatient rehabilitation facility
  - Durable medical equipment (DME)
  - Early Childhood Intervention
  - Federally Qualified Health Center (FQHC)
  - Freestanding psychiatric facility
  - Freestanding rehabilitation facility
  - Home and Community Based Services – Adult Mental Health (HCBS-AMH) providers
  - Home Health/Home and community support services agency
  - Hospital/critical access hospital/out-of-state hospital
  - Military hospital
  - Hyperalimentation
  - Independent diagnostic testing facility/physiological lab
  - Indian Health Services
  - Independent laboratory
  - Intellectual or developmental disability (IDD) case management
  - Local health department
  - Maternity services clinic
  - Mental health targeted case management and mental health rehabilitative services
  - Milk bank donor
  - Personal care services
  - Pharmacy
  - Portable X-ray
  - Prescribed Pediatric Extended Care Centers (PPECC)

- Radiation treatment center
- Radiological laboratory
- Renal dialysis facility
- Rural health clinic (RHC)
- School health and related services (SHARS)/non-school SHARS
- Service responsibility option
- Skilled nursing facility
- State Supported Living Center (SSLC)
- Vision medical supplier
- Women, Infant and Children

Providers can submit one request to enroll several different provider types and specialty combinations. A unique provider identifier will not be assigned. Providers are encouraged to submit performing provider applications through a Group Initiated request.

**Referto:** Subsection 1.10, “Medicaid Fraud, Waste, and Abuse Policy” in this section for additional information.

#### **1.1.4.1 Medicare-Only Providers**

The Medicare-only provider type can be used by providers that only render Medicare services not covered by Texas Medicaid (Medicare-only services) or that have a provider type not recognized by Texas Medicaid. Providers that are currently enrolled in Texas Medicaid or providers that render, refer, or prescribe Medicaid services are not eligible to enroll as Medicare-only providers.

#### **1.1.4.2 Ordering- or Referring-Only Providers**

Individual providers who are not currently enrolled in Texas Medicaid and whose only relationship with Texas Medicaid is to order or refer for supplies or services for Texas Medicaid-eligible clients must enroll in Texas Medicaid as participating providers. This requirement is in accordance with provisions of the Affordable Care Act of 2010 (ACA), 42 CFR §455.410(b), which requires all fee-for-service (FFS) and managed care network ordering or referring physicians or other professionals who order or refer for supplies or services under the Medicaid State plan, or under a waiver of the plan, to enroll in Medicaid as participating providers.

Providers who are out of network for Medicaid managed care organizations (MCOs) do not need to enroll as ordering or referring-only providers. The enrollment requirement includes providers who order or refer for supplies or services for dually eligible clients (i.e., clients who are enrolled in both Medicare and Medicaid), as the client’s claims would be considered Medicaid claims. These providers can enroll online using PEMS.

**Important:** *Individual providers who are currently enrolled in Texas Medicaid or the CSHCN Services Program and who currently have an active Texas Medicaid or CSHCN Services Program enrollment can use their current enrollment for ordering or referring services and do not need to obtain a separate ordering and referring enrollment. An acute care billing provider’s practice location will be deactivated if the provider enrolls as an ordering-only or referring-only provider.*

Providers who enroll in Texas Medicaid as ordering or referring-only providers are not required to submit a separate enrollment to order and refer for both Texas Medicaid clients and CSHCN Services Program clients. Although ordering or referring-only providers do not submit claims to TMHP for rendered services, the ordering or referring-only provider’s NPI is required on claims that are submitted by the billing providers that render the services or provide the supplies or services.

**Referto:** Subsection 6.4.2.4, “Ordering or Referring Provider NPI” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for information about filing claims that require an ordering- and referring-only provider NPI.

#### **1.1.4.3 Ordering or Referring-Only Providers Participating in Other State Health-Care Programs**

Providers who order or refer for supplies or services for Children’s Health Insurance Program (CHIP) clients must enroll as a participating providers with TMHP. Providers who are out of network for CHIP MCOs do not need to enroll as ordering or referring-only providers. Providers who order or refer for supplies or services for Healthy Texas Women (HTW) and CSHCN clients must also enroll as participating providers with TMHP.

#### **1.1.4.4 Interns and Medical Residents Who Order, Prescribe, or Refer**

Interns and medical residents with only Physician-In-Training (PIT) permits issued by the Texas Medical Board cannot enroll in Texas Medicaid. An intern or resident’s licensed supervising physician must be reported as the ordering or referring provider on claims that are generated from the order or referral of the intern or resident. The NPI of the supervising physician must be listed on orders or referrals written by the interns or residents they supervise. The licensed supervising physician must be enrolled in Texas Medicaid as a billing provider or as an ordering or referring-only provider.

### **1.1.5 Affordable Care Act of 2010 (ACA) Enrollment Requirements**

Providers are required to fulfill certain requirements for enrollment in order to comply with the provisions of ACA. Providers that are enrolled in Texas Medicaid and have fulfilled the ACA requirements through their Texas Medicaid enrollment are considered ACA-compliant for all programs in which they are enrolled.

**Referto:** TMHP website at [www.tmhp.com](http://www.tmhp.com) for additional information about ACA requirements.

In accordance with Section 6401 of ACA, the following requirements apply:

- Upon initial enrollment, revalidation, and re-enrollment, all participating providers are screened based on their categorical risk level. (complies with 42 CFR §§455.410 and 455.450)
- All providers are required to revalidate at least every three to five years based on provider type.
- Institutional providers who are enrolling, revalidating, or reenrolling are required to pay an application fee if one has not already been paid to Medicare or another state’s Medicaid program or CHIP.
- Ordering and referring-only providers are required to enroll in Texas Medicaid as participating providers.

**Referto:** Subsection 1.1.4.2, “Ordering- or Referring-Only Providers” in this section.

#### **1.1.5.1 Provider Screening Requirement**

In compliance with ACA, all providers must be screened, which includes:

- Providers who submit a provider enrollment application for new enrollment or other type of enrollment or reenrollment.
- Providers who are currently enrolled in Texas Medicaid and are required to revalidate their enrollment in Texas Medicaid.

#### **1.1.5.2 Provider Revalidation**

In compliance with the 42 CFR §455.414, all providers are required to revalidate at least every three to five years:

- DME providers are required to revalidate enrollment information at least once every five years.

- All other provider types must revalidate their enrollment information at least once every five years.

Group administrators may submit enrollment revalidations for performing providers in a group. During revalidation, the provider screening will be repeated.

### 1.1.5.3 Application Fee

Under ACA, institutional providers are subject to an application fee for applications, including initial applications, applications for new practice locations, revalidation, and reenrollment applications. Upon completion of the PEMS online application, providers will be notified whether they are required to pay an application fee. The amount of the application fee is subject to change every calendar year.

Providers can refer to the TMHP website for the list of provider types that are required to pay the application fee.

**Note:** *Providers that are required to pay the application fee but have already paid the fee to Medicare or another state's Medicaid program or CHIP have fulfilled the fee requirement and do not have to submit the fee to Texas Medicaid. Proof of payment must be submitted with the application. Providers who are enrolled in Medicare must provide documentation that specifies whether or not they have completed the ACA rescreening process with Medicare.*

### 1.1.5.4 Ordering- or Referring-Only Providers Search on the Online Provider Lookup (OPL)

Providers can verify that an ordering- or referring-only provider is enrolled in Medicaid by using either the basic or advanced provider search function of the OPL.

### 1.1.6 Surety Bond Enrollment Requirement

All newly enrolling and re-enrolling DME and nongovernment-operated ambulance providers must obtain a surety bond that complies with 1TAC §352.15 as a condition of enrollment and continued participation in Texas Medicaid.

DME providers can refer to subsection 2.1.2, “Surety Bond Requirements” in the *Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook* (Vol. 2, *Provider Handbooks*).

Ambulance providers can refer to subsection 1.1.6.1, “Ambulance Providers” in this handbook.

**Important:** *Surety bonds obtained for the purpose of accreditation in the Medicare program, which lists the Centers for Medicare & Medicaid Services (CMS) as obligee, do not fulfill the surety bond requirement for Texas Medicaid.*

The surety bond submitted to Texas Medicaid must meet the following requirements:

- A bond in an amount of no less than \$50,000 must be provided for each enrolled location.
- The bond must be submitted on the [State of Texas Medicaid Provider Surety Bond Form](#). No other form will be accepted. The use of this form designates HHSC as the sole obligee of the bond. Instructions are included with the form.
- The bond must be issued for a term of 12 months. Bonds for longer or shorter terms are not acceptable.
- The bond must be in effect on the date that the provider enrollment application is submitted to TMHP for consideration. The effective date stated on the bond must be:
  - No later than the date that the provider enrollment application is submitted.
  - No earlier than 12 months before the date that the provider enrollment application is submitted.

- The bond must be a continuous bond. A continuous bond remains in full force and effect from term to term unless the bond is canceled.

**Important:** *An annual bond that specifies effective and expiration dates for the bond is not acceptable.*

At the time of enrollment, revalidation, or reenrollment, providers must submit a copy of the surety bond form with signatures and a copy of the Power of Attorney document from the surety company that issued the bond.

**Note:** *Surety companies may refer to Texas Department of Insurance (TDI) file #9212562912 or TDI link #132456 when filing the bond.*

DME and non-government-operated ambulance providers must maintain a current surety bond to continue participation in Texas Medicaid. To avoid losing Medicaid enrollment status, providers must submit proof of continuation to TMHP Provider Enrollment before the expiration date of the bond currently on file. The completed proof of continuation document must include the bond number, original signatures of the authorized corporate representative of the DME or ambulance provider (principal), the attorney-in-fact of the surety company, date of the original bond, and new “good through” date. Providers may upload a proof of continuation by initiating a Maintenance - Practice Location - Surety Bond Request in PEMS.

**Referto:** The [State of Texas Medicaid Provider Surety Bond Form](#) in the Forms section of the TMHP website at [www.tmhp.com](http://www.tmhp.com).

#### **1.1.6.1 Ambulance Providers**

Ambulance providers that participate in Texas Medicaid fee-for-service, managed care programs, or the CHIP must, as a condition of emergency medical services (EMS) provider license renewal, obtain a surety bond that complies with 1 TAC §352.15 and submit the bond to TMHP according to the requirements listed above. A copy of the bond must be included with their application to the Department of State Health Services (DSHS) to renew their emergency services provider license.

Providers can refer to the DSHS website for additional information.

Ambulance providers that are directly operated by a governmental entity are exempt from the surety bond requirement.

#### **1.1.7 Provider Enrollment Application Determinations**

An application for provider enrollment may be approved with conditions, or denied. The provider applicant is issued a notice of the enrollment determination.

**Referto:** Subsection 1.1.5, “Affordable Care Act of 2010 (ACA) Enrollment Requirements” in this section for additional information about the ACA 3- to 5-year revalidation requirement.

When an application for enrollment is approved with conditions, the applicant has no right of appeal or administrative review of the enrollment determination. The types of conditional enrollment include, among other things:

- An application may be approved for time-limited enrollment, meaning the provider is granted a contract to participate in Medicaid for a specific period of time. In this case, the provider is sent a notice that includes the deactivation date of the contract. It is the provider’s responsibility, if the provider chooses to seek continued Medicaid participation, to file a complete and correct revalidation application before the deactivation date of the provider’s current contract. It is recommended that the provider submit a revalidation application at least 60 days before the current contract deactivation date, to ensure that the application is complete and correct before the deactivation date. This may avoid a lapse between the provider’s current contract and the new contract, if a new contract is granted.

- An application may be approved subject to restricted reimbursement, meaning the provider is eligible to have only certain types of claims paid. This includes, among other things, reimbursement of only Medicare crossover claims (i.e., claims with respect to “dual eligible” recipients who are covered by both Medicare and Medicaid).

An application might be denied. If an application is denied, TMHP will send the provider a denial notice that explains the basis for the denial. The notice also explains the provider’s right to make a request for an informal desk review of the denial decision and the procedures for filing such a request. The administrative rules governing a request for an informal desk review of the denial decision are found in the following TAC rules:

- 1 TAC § 371.1015(b). If the application is denied based upon the OIG’s recommendation, an informal desk review request must be in writing (through PEMS), received within 20 business days of the date on the letter, and filed in accordance with the instructions provided in the denial notice.
- 1 TAC § 352.11(d)(2)(A). If the application is denied for any other reason, an informal desk review request must be in writing (through PEMS), received within 30 calendar days of the date on the letter, and filed in accordance with the instructions provided in the denial notice.

HHSC will conduct the informal desk review and render a final enrollment determination. HHSC’s final determination is not subject to further administrative review or reconsideration.

The enrollment date is the day on which a new NPI was enrolled. This date impacts claims filing deadlines.

**Referto:** Subsection 6.1.4.2, “Claims for Newly Enrolled Providers” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for timely-filing guidelines for newly enrolled providers.

HHSC determines the enrollment effective dates for providers that choose to enroll in Medicaid and Texas State Health-Care Services. Enrollment notification letters that contain the enrollment information for newly enrolling providers are emailed the following day. Revalidation notifications that contain the updated revalidation due date are sent by email and posted to the provider’s MyAccount dashboard.

### 1.1.8 Enrollment in Medicaid Managed Care Programs

To be reimbursed for services rendered to Medicaid managed care clients, providers must be enrolled in Texas Medicaid and then must enroll with the client’s health plan to be eligible for reimbursement for services rendered.

**Referto:** Subsection 2.2, “Provider Enrollment and Responsibilities” in the *Medicaid Managed Care Handbook* (*Vol. 2, Provider Handbooks*).

### 1.1.9 Required Enrollment Forms

To enroll in Texas Medicaid, providers must complete all sections of the Texas Medicaid Enrollment Application through PEMS.

Providers can refer to the TMHP Provider Enrollment and Management System instructional website for information about required forms and other documentation. This website explains, by provider type, the documents and information that must be provided with the application.

**Referto:** <https://www.tmhp.com/topics/provider-enrollment/pems/start-application>

When prompted to enter a tax identification number (tax ID) on the electronic copy of an enrollment application, the applicant should list the entity’s nine-digit federal tax identification number.

Providers can call the TMHP Contact Center at 1-800-925-9126 for help with completing the application.

Providers will be notified of incomplete applications and will have 30 business days to provide the requested missing information. If the information is not provided within 30 business days, TMHP will terminate the enrollment process. If the provider wants to enroll at a later date, a new enrollment application must be submitted. Providers are required to review their enrollment application for correctness and completeness before submitting it to TMHP.

By e-signing the HHSC Medicaid Provider Agreement, a provider is certifying that all information submitted in connection with the application for enrollment is complete and correct. Any false, misleading, or incomplete information submitted in connection with an enrollment application constitutes a Medicaid program violation, and may result in administrative, civil, or criminal liability.

**Referto:** Subsection 1.10, “Medicaid Fraud, Waste, and Abuse Policy” in this section.

#### **1.1.9.1 Application Payment Form**

All providers who are required to pay an application fee to participate in the Medicaid program must fill out the Application Fee page during enrollment. The application cannot be processed if the application fee is required and is not submitted with the application.

**Referto:** Subsection 1.1.5.3, “Application Fee” in this section.

#### **1.1.9.2 HHSC Medicaid Provider Agreement**

The HHSC Medicaid Provider Agreement must be submitted by all providers who enroll in Texas Medicaid and must be signed by the provider who is applying for enrollment. If the applicant is an entity, a principal of the entity who has the authority to bind the entity to the requirements of the HHSC Provider Agreement must sign the agreement. “Principal” is defined in the following section.

If the provider is city- or government-owned, the agreement must be signed by a person who is authorized under the city or government charter. This form is an agreement between HHSC and the provider performing services under the State Plan wherein the provider agrees to certain provisions as a condition of participation.

**Note:** *The person who signs the HHSC Enrollment Agreement is certifying that all of the information in the application packet, including every completed Owner/Creditor/Principal entry, is complete and correct. This includes a certification that every person who is required to complete an Owner/Creditor/Principal entry has done so, and all required Owner/Creditor/Principal entries are included with the application.*

#### **1.1.9.3 Owner/Creditor/Principal Entry**

An Owner/Creditor/Principal entry must be completed by each principal/creditor, subcontractor, and creditor of the provider that is applying for enrollment with the following exceptions:

- Performing providers who are applying to join a group that is already enrolled
- Individuals who enrolled using their own Social Security number and an entity type of Individual/Sole Proprietorship

Principals of the provider include all of the following:

- An owner with a direct or indirect ownership or control interest of 5 percent or more
- Corporate officers and directors
- Managing employees or agents who exercise operational or managerial control, or who directly or indirectly manage the conduct of day-to-day operations
- Limited or nonlimited partners
- Shareholders of a professional corporation, professional association, limited liability company, or other legally designated entity

- Any employee of the provider who exercises operational or managerial control over the entity or who directly or indirectly conducts the day-to-day operations of the entity
- All individuals, companies, firms, corporations, employees, independent contractors, entities, or associations that have been expressly granted the authority to act for or on behalf of the provider
- All individuals who are able to act on behalf of the provider because their authority is apparent
- An individual or entity with a security interest in a debt that is owed by the provider if the creditor's security interest is protected by at least 5 percent of property listed in Section III(c) of the Disclosure of Ownership

A subcontractor of the provider is defined as follows:

- An individual, agency, or organization to which a disclosing entity has contracted or delegated some of its management functions or responsibilities of providing medical care to its patients; or
- An individual, agency, or organization with which a fiscal agent has entered into a contract, agreement, purchase order, or lease (or leases of real property) to obtain space, supplies

**Note:** *This includes the on-site manager, supervising licensed practitioner, or medical director for each physical location of the provider in Texas.*

#### **1.1.9.4 Disclosure of Ownership and Control Interest Statement**

All providers must submit the Disclosure of Ownership and Control Interest Statement as part of the enrollment application, with the following exceptions:

- Performing providers who are applying to join a group that is already enrolled
- ECI, MHMR, MHR, Blind Children's Vocational Discovery & Development Program, YES Waiver, TB Clinic, Military Hospital, State Hospital or SHARS providers

This form also contains questions that must be answered under federal law. Failure to provide complete and accurate information as instructed on this form will constitute an incomplete application, which may result in denial of enrollment. Incomplete or inaccurate information on this form constitutes a violation of the rules of Medicaid and may also result in administrative, civil, or criminal liability. Providers that dually participate in Medicare and Medicaid, are expected to make accurate and consistent disclosures of ownership and managing staff to each program pursuant to federal regulations at §§ 420.202 through 420.206.

**Referto:** Subsection 1.10, "Medicaid Fraud, Waste, and Abuse Policy" in this section.

**Note:** *Providers are required to submit any change in ownership, corporate officers, or directors to TMHP Provider Enrollment within 30 calendar days of the change.*

**Referto:** Subsection 1.7.3, "Maintenance of Provider Information" in this section.

#### **1.1.9.5 Franchise Tax Account Status Page**

When enrolling as a "Corporation" type of entity, providers must submit a Franchise Tax Account Status Page. This information can be obtained from the Texas State Comptroller's Office website at: <https://mycpa.cpa.state.tx.us/coa/>

Providers who have a 501(c)(3) Internal Revenue Exemption are not required to submit the Franchise Tax Account Status Page, but they must submit the IRS exemption letter.

#### **1.1.9.6 Certificate of Formation or Certificate of Filing/Articles or Certificate of Incorporation/Certificate of Fact**

When enrolling as a "Corporation" type of entity, providers must submit the Certificate of Formation or Certificate of Filing form. Obtain the form from the Office of the Secretary of State of Texas. The name on this form must exactly match the legal name shown on the W-9 form.

The following certificates also apply for corporations:

- For corporations formed prior to January 1, 2006, Articles or Certificate of Incorporation/Certificate of Authority/Certificate of Fact
- For corporations formed on or after January 1, 2006, Certificates of Formation or Certificate of Filing
- For corporations registered in a state other than Texas, Certificate of Authority or Certificate of Filing

The Certificate and any required certifications to provide certain services in Texas must be submitted when a corporation is registered in a state other than Texas. The form identifies the legal name of the corporation and is proof that the corporation is registered to do business in Texas.

**Note:** *Out-of-state providers that do not provide services in the state of Texas are exempt from submitting this form.*

#### **1.1.9.7 Copy of License, Temporary License, or Certification**

Providers cannot enroll in Texas Medicaid if their license is due to expire within 30 days. During the enrollment process, TMHP verifies licensure using available resources. If TMHP cannot verify a license at the time of enrollment, it is the providers' responsibility to provide a copy of the active license to TMHP.

TMHP will notify the provider by letter if a copy has not been submitted and the license cannot be verified.

Once a provider is enrolled in Texas Medicaid, the license or certification must be kept current. A reminder email for renewal will be sent to the provider 60 days before the provider's license expires.

TMHP directly obtains licensure information from the following licensing boards:

- Texas Medical Board (TMB) (for physicians only)
- Texas Board of Nursing (BON)
- Texas State Board of Dental Examiners (TSBDE)
- National Board of Certification and Recertification for Nurse Anesthetists (NBCRNA)
- The Executive Council of Physical Therapy and Occupational Therapy Examiners (ECPTOTE) (Physical Therapist only)
- Texas Optometry Board (TOB)

If a license cannot be verified due to a delay in obtaining the board licensing information, providers must request a letter from the licensing board for their individual provider information and submit it to TMHP by the deadline indicated in the reminder letter. The letter must contain the provider's specific identification information, license number, and licensure period.

All other licenses and certifications that are not issued by TMB, BON, or TSBDE must be submitted to TMHP upon renewal.

**Important:** *Providers are also required to submit to TMHP, within 10 days of occurrence, notice that the provider's license or certification has been partially or completely suspended, revoked, or retired. Not abiding by this license and certification update requirement may impact a provider's qualification to continued participation in Texas Medicaid. Providers must upload the document through a PEMS Maintenance request for License Transactions.*

**Referto:** Subsection 1.1.9.9, "Licensure Renewal" in this section.

### 1.1.9.8 Physician's Letter of Agreement

Upon initial enrollment and upon revalidation, Certified Nurse Midwife (CNM) or Licensed Midwife (LM) providers must complete and submit to TMHP with the Medicaid provider enrollment application the Physician's Letter of Agreement affirming the CNM's supervising physician arrangement or the LM's referring or consulting physician arrangement.

- According to HHSC rules, 1 TAC §354.1253(c), and 1 TAC §354.1252(3), CNM providers and LM providers are required to inform HHSC in writing of the identity of a licensed physician or group of physicians with whom the CNM or LM has arranged for referral and consultation in the event of medical complications. For purposes of this rule, "consultation" means discussion of patient status, care, and management.
- A separate agreement must be submitted for each physician with whom an arrangement is made. This agreement must be signed by the CNM or LM and the physician. When changes to an arrangement are made, providers must submit a PEMS Existing Enrollment request to update the agreement.

**Referto:** Subsection 1.4.2, "Provider Status (Individual, Group, Performing Provider, or Facility)" in this section.

### 1.1.9.9 Licensure Renewal

Not abiding by the license and certification update requirement may impact a provider's qualification for continued participation in Texas Medicaid. If a provider's license has expired, a deactivation letter will be sent to the provider, and all claims filed on and after the expiration date will be denied.

To have claims payments resumed, updated information must be sent to the applicable licensing board to renew the license. Payment will be considered for dates of service on or after the date of license renewal. Claims denied due to an inactive license may be appealed, and payment will be considered for dates of service on or after the date of return to active license status. Payment deadline rules for the fiscal agent arrangement must be met.

**Referto:** Subsection 6.1.5, "HHSC Payment Deadline" in "Section 6: Claims Filing" (*Vol. 1, General Information*).

### 1.1.9.10 Medicare Participation

Under federal law, Medicaid is the payor of last resort, so Medicare-covered services must first be billed to and paid by Medicare. Therefore, in order to be eligible to enroll in Texas Medicaid, a provider must be a Medicare participating provider. Provider types not required to meet the Medicare participation requirement include:

- Pediatric providers.
- Family planning providers.
- Case Management for Children and Pregnant Women program providers.
- CCP providers (excluding DME providers).
- Early Childhood Intervention (ECI) providers.
- OB/GYN providers.
- Texas Health Steps medical and dental services providers.

Some provider types may apply for a waiver of the Medicare certification requirement of the application process if they do not serve Medicare-eligible individuals. The following provider types are eligible to apply for this waiver:

- Audiologist
- Dentist (D.D.S. or D.M.D.)

- Licensed clinical social workers (LCSWs)
- Licensed professional counselors (LPCs)
- Licensed marriage and family therapists (LMFTs)
- Nurse practitioner/clinical nurse specialist (NP/CNS)
- Optometrist (OD)
- Orthotists
- Physician (DO)
- Physician (MD)
- Physician assistant (PA)
- Prosthetist

All providers that are required to participate in Medicare must include a valid and current Medicare number and a copy of the provider's notice of Medicare participation as part of the Texas Medicaid Provider Enrollment Application.

Each group and each performing provider of a Medicare group must have a current Medicare number. The group enrollment application must include the current and valid Medicare number for the group and for each performing provider in the group, as well as a copy of the notice of Medicare enrollment for the group and for each performing provider in the group.

Each group enrolling as a Medicaid-only group does not need to submit a current Medicare number for the group. Performing providers added to this Medicaid-only group also do not require a current Medicare number.

#### **1.1.9.11 Group Information Changes**

If additions or changes occur in a group's enrollment information (for example, a performing provider leaves or enters the group, changes the physical address or the accounting/mailing address, or a provider is no longer licensed) after the enrollment process is completed, the provider group must notify Texas Medicaid in writing within 90 calendar days of occurrence of the changes. Failure to provide this information may lead to administrative action by HHSC. Filing claims and receiving payment without having followed this requirement constitutes a program violation and may also result in administrative, civil, or criminal liability.

**Referto:** Subsection 1.10, "Medicaid Fraud, Waste, and Abuse Policy" in this section for additional information.

## **1.2 Payment Information**

Texas Medicaid reimbursements are available to all enrolled providers by check or electronic funds transfer (EFT). Providers are strongly encouraged to utilize EFT, which allows for more rapid reimbursement.

### **1.2.1 Using EFT**

HHSC recommends that all Texas Medicaid providers receive payment by EFT. EFT is a method for directly depositing funds into a designated bank account. EFT does not require special software, and providers can enroll immediately.

### **1.2.2 Advantages of EFT**

Advantages of EFT include:

- Electronically-deposited funds are available more quickly than with paper checks.

- Providers do not have to worry about lost or stolen checks.
- TMHP includes provider and Remittance and Status (R&S) Report numbers with each transaction submitted. If the bank's processing software captures and displays the information, both numbers would appear on the banking statement.

### 1.2.3 EFT Enrollment Procedures

To enroll for EFT, providers must submit a completed Electronic Funds Transfer (EFT) maintenance request to TMHP through PEMS. A voided check or letter on bank letterhead, containing the bank routing and account information, must be attached to the enrollment request.

After the Electronic Funds Transfer (EFT) Authorization Agreement has been processed, TMHP issues a prenotification transaction during the next cycle directly to the provider's bank account. This transaction serves as a checkpoint to verify EFT is working correctly.

If the bank returns the prenotification without errors, the provider will begin receiving EFT transactions with the third cycle following the enrollment form processing. Providers will continue to receive paper checks until they begin to receive EFT transactions.

If the provider changes bank accounts, the provider must submit a new Electronic Funds Transfer (EFT) Authorization Agreement to TMHP Provider Enrollment. To update the EFT information, the provider can submit a PEMS Maintenance - EFT request. The prenotification process is repeated and, once completed, the EFT transaction is deposited to the new bank account.

### 1.2.4 Receiving Paper Checks

Providers must have a current physical and accounting/mailing address and telephone number on file so that they can promptly receive reimbursement checks and other TMHP correspondence. Providers must submit all changes to addresses and telephone numbers electronically using PEMS.

### 1.2.5 Stale-Dated Checks

Stale-dated checks (i.e., checks that are older than 180 days) that have not been cashed are voided and applied to either IRS levies or outstanding accounts receivable. Once a check has been voided, the associated claims may not be payable, and the transaction will be finalized after 24 months. Providers may submit a voided check appeal to TMHP Cash Financial at the following address:

Texas Medicaid & Healthcare Partnership  
Attn: Cash Financial  
12365A Riata Trace Parkway  
Austin, TX 78727

TMHP encourages providers to receive payment via EFT to eliminate stale-dating issues. EFT ensures that providers receive payments through direct deposit in a bank account of their designation.

**Referto:** Subsection 1.2.3, "EFT Enrollment Procedures" in this section.

## 1.3 Provider Disenrollment

Payment denial codes are applied to a billing practice location that has had no claim activity for a period of 24 months or more. The billing practice location will be considered disenrolled and claims will not be reimbursed until the billing practice location is reenrolled.

A courtesy letter will be sent to all providers whose billing practice locations have been identified as not having any claims activity over the previous 18 months. Providers will have six months to submit claims and prevent the billing practice location from being disenrolled. Providers are encouraged to submit claims electronically through TexMedConnect or EDI for timely processing, which will help prevent billing practice locations from being disenrolled. If the provider is enrolled in both Medicaid and the CSHCN Services Program, the billing practice location for both programs will be examined to determine whether claims activity has occurred.

After 24 months without claim activity, providers will be sent a disenrollment letter, and a payment denial code will be applied to their billing practice location. If a provider's Medicaid billing practice location is disenrolled, any enrollments associated with the disenrolled billing practice location with the CSHCN Services Program will also be disenrolled. Claims that are submitted for a disenrolled practice location after the payment denial code has been applied will be denied.

To have the payment denial code applied to a billing practice location end-dated, a reenrollment application must be submitted. Upon successful reenrollment of the billing practice location, the payment denial code will be end-dated; however, the gap in enrollment will remain. Claims for dates of service during the gap in enrollment will be denied.

### **1.3.1 Excluded Entities and Providers**

The United States Health and Human Services (HHS)-OIG and the HHSC-OIG exclude certain individuals and entities from participation in all federal or state health-care programs. The exclusions restrict individuals from receiving any reimbursement for items or services furnished, ordered, or prescribed.

All current providers and providers who are applying to participate in state health-care programs must screen their employees and contractors every month to determine whether they are excluded individuals or entities. These screenings are a condition of the provider's enrollment, revalidation, or re-enrollment into state health-care programs.

Providers can determine whether an individual or entity is excluded by searching the List of Excluded Individuals/Entities (LEIE) website at <https://oig.hhs.gov/exclusions/>. A downloadable version of the database is available but it does not include Social Security Numbers (SSNs) or Employer Identification numbers (EINs). The Texas HHSC-OIG website is found at <https://oig.hhs.texas.gov/exclusions>. If a name matches a name on the exclusion list, it can be verified online with a SSN or EIN.

Providers must search the LEIE website monthly to capture any exclusions or reinstatements that have occurred since the last search. Providers must immediately report to HHS-OIG any exclusion information they discover when searching the LEIE database.

CFR section 1003.102(a)(2), states that civil monetary penalties may be imposed against Medicaid providers and managed care entities (MCEs) that employ or enter into contracts with excluded individuals or entities to provide items or services to Medicaid clients. In addition, no Medicaid payments can be made for any items or services directed or prescribed by an excluded provider or other authorized person when the individual or entity furnishing the services either knew or should have known of the exclusion. This prohibition applies even when the Medicaid payment itself is made to another provider, practitioner, or supplier that is not excluded.

## **1.4 Provider Reenrollment**

Reenrollments are when a provider submits an enrollment application after being disenrolled, terminated, excluded, or otherwise removed. Reenrollments are reviewed by OIG. The new application may be submitted electronically using PEMS. A PEMS existing enrollment application is required when one of the following changes:

### **1.4.1 Medicare Number**

If Medicare has issued a new Medicare number, the provider must complete an Existing Enrollment transaction in PEMS in order to enroll with the new information.

### **1.4.2 Provider Status (Individual, Group, Performing Provider, or Facility)**

Providers leaving group practices must submit a PEMS existing enrollment request to disenroll from the group's practice location. If the provider has joined a new group or wants to enroll to bill for services provided, submit a PEMS existing enrollment application.

### 1.4.3 Physical Address

If a provider moves or has an address change and the new address is within the same Medicare locality, the provider must update their address information within 90 days of the change. Providers should update their address information through a maintenance request using PEMS. A PEMS existing enrollment application must be submitted to add additional practice locations.

### 1.4.4 Change in Principal Information

As defined in Subsection 1.1.9.3, “Owner/Creditor/Principal Entry” in this section, change in principal information includes a change in corporate officers or directors, professional association membership, and managing employees. The change must be reported to TMHP within 30 calendar days of when it occurs.

*Referto:* Subsection 1.7.3.3, “Online Provider Lookup (OPL)” in this section.

Providers can request an Electronic Remittance & Status (ER&S) Report each time a new enrollment or location is added by contacting the Electronic Data Interchange (EDI) help desk directly and completing an Electronic Remittance Advice (ERA) Agreement. This form must be completed and returned to EDI to ensure there is no suspension in the provider’s ability to access their ER&S statement on the secure provider portal through [www.tmhp.com](http://www.tmhp.com).

Providers must also contact any third-party EDI vendors with whom they are contracted to add any new provider locations to their ER&S Report. To obtain a PDF copy of the ER&S Report on the TMHP Home Page, the provider must create an administrator account for each provider location belonging to them.

Providers that have a newly enrolled location must ensure that any prior authorizations affected have been updated to reflect the new provider location.

## 1.5 Change of Ownership Requirements

The new owner must do the following:

- Obtain recertification as a Title XVIII (Medicare) facility under the new ownership
- Submit CMS Acknowledgment of Change of Ownership Letter
- Provide TMHP with a copy of the Contract of Sale (specifically, a signed agreement that includes the identification of previous and current owners in language that specifies who is liable for overpayments that were identified subsequent to the change of ownership, that includes dates of service before the change of ownership)
- Submit any new enrollment application relating to a change of ownership to TMHP Provider Enrollment within 30 calendar days of the change

When the change of ownership has been processed, if there is a new NPI with the change of ownership, when the application is completed, the original NPI used by the provider to bill claims could be deactivated and the provider could lose the ability to download R&S Reports from the TMHP portal, as well as the ability to verify client eligibility online. Claims status inquiries through the TMHP portal will also be unavailable. After an NPI has been deactivated, the provider can call the TMHP Automated Inquiry System (AIS) to check on client eligibility and the status of claims. Paper R&S Reports can be printed by the TMHP Contact Center, and delivered to providers, up to 30 days from the date the NPI is deactivated.

## 1.6 Claims Filing During Enrollment

Providers must adhere to claim filing deadlines throughout the enrollment, re-enrollment, and revalidation processes. Claims submitted by newly enrolled providers must be received within 95 days of the date that enrollment is complete and within 365 days of the date of service.

**Note:** *Claims can be submitted for dates of service on or after the provider's effective date of enrollment. Providers can find the effective date for their enrollment in their Welcome Letter in PEMS.*

Providers that are enrolling in Texas Medicaid for the first time or that are making a change that requires the issuance of a new NPI can submit claims within 95 days of the date that enrollment is complete, as long as claims are submitted within 365 days of the date of service.

Providers that are revalidating an existing enrollment can continue to file claims while they are completing the revalidation process. TMHP must receive claims within 95 days of the date of service.

For clients who have retroactive eligibility, the 95-day deadline is based on the date of service or the date on which the client eligibility information is added to the TMHP eligibility file, whichever is later. For clients who have dual Medicare and Medicaid eligibility, when a service is a benefit of both Medicare and Medicaid, the claim must be filed with Medicare first. In these cases, the 95-day deadline is based on the date of Medicare disposition.

**Referto:** Subsection 6.1.4, "Claims Filing Deadlines" in "Section 6: Claims Filing" (*Vol. 1, General Information*).

## 1.7 Provider Responsibilities

### 1.7.1 Compliance with Texas Family Code

#### 1.7.1.1 Child Support

The Texas Family Code 231.006 places certain restrictions on child support obligors. Texas Family Code §231.006(d) requires a person who applies for, bids on, or contracts for state funds to submit a statement that the person is not delinquent in paying child support. This law applies to an individual whose business is a sole proprietorship, partnership, or corporation in which the individual has an ownership interest of at least 25 percent of the business entity. This law does not apply to contracts/agreements with governmental entities or nonprofit corporations.

The required statement has been incorporated into the HHSC Provider Agreement.

The law also requires that payments be stopped when notified that the contractor/provider is more than 30 days delinquent in paying child support. Medicaid payments are placed on hold when it is discovered that a currently enrolled provider is delinquent in paying child support. A provider application may be denied or terminated if the provider is delinquent in paying child support.

#### 1.7.1.2 Reporting Child Abuse or Neglect

Title 5 Texas Family Code (TFC) §261.101 states: "(a) A person having cause to believe that a child's physical or mental health or welfare has been adversely affected by abuse or neglect by any person shall immediately make a report as provided by this subchapter; (b) If a professional has cause to believe that a child has been abused or neglected, or may be abused or neglected, or that a child is a victim of an offense under section 21.11, Penal Code, and the professional has cause to believe that the child has been abused as defined by section 261.001 or 261.401, the professional shall make a report no later than the 48th hour after the hour the professional first suspects that the child has been, or may be abused or neglected, or is a victim of an offense under section 21.11, Penal Code." A professional may not delegate to or rely on another person to make the report. In this subsection, *professional* means an individual who is licensed or certified by the state or who is an employee of a facility licensed, certified, or operated by the state and who, in the normal course of official duties or duties for which a license or certification is

required, has direct contact with children. The term includes teachers, nurses, doctors, day-care employees, employees of a clinic or health-care facility that provides reproductive services, juvenile probation officers, and juvenile detention or correctional officers.

All Medicaid providers shall comply with the provisions of state law as set forth in Chapter 261 of the Texas Family Code relating to investigations of reports of child abuse and neglect and the provisions of HHSC policy. Reimbursement shall only be made to providers who have demonstrated a good faith effort to comply with child abuse reporting guidelines and requirements in Chapter 261 and HHSC policy. Provider staff shall respond to disclosures or suspicions of abuse or neglect of minors, by reporting to the appropriate agencies as required by law.

All providers shall adopt this policy as their own, report suspected sexual abuse of a child as described in this policy and as required by law, and develop internal policies and procedures that describe how to determine, document, and report instances of sexual or nonsexual abuse.

This information is also available on the HHSC and TMHP websites at [www.hhs.texas.gov/laws-regulations/handbooks/fpp/section-3000-abuse-neglect-reporting](http://www.hhs.texas.gov/laws-regulations/handbooks/fpp/section-3000-abuse-neglect-reporting) and [www.tmhp.com](http://www.tmhp.com).

### **1.7.1.3 Procedures for Reporting Abuse or Neglect**

Professionals as defined in the law are required to report no later than the 48th hour after the hour the professional first has cause to believe the child has been or may be abused or is the victim of the offense of indecency with a child.

Nonprofessionals shall immediately make a report after the nonprofessional has cause to believe that the child's physical or mental health or welfare has been adversely affected by abuse.

A report shall be made regardless of whether the provider staff suspect that a report may have previously been made.

Reports of abuse or indecency with a child must be made to one of the following:

- Department of Family and Protective Services (DFPS) if the alleged or suspected abuse involves a person responsible for the care, custody, or welfare of the child (the DFPS Texas Abuse/Neglect Hotline, at 1-800-252-5400, operated 24 hours a day, 7 days a week)
- Any local or state law enforcement agency
- The state agency that operates, licenses, certifies, or registers the facility in which the alleged abuse or neglect occurred
- The agency designated by the court to be responsible for the protection of children

The law requires the report to include the following information if known:

- The name and address of the minor
- The name and address of the minor's parent or the person responsible for the care, custody, or welfare of the child if not the parent
- Any other pertinent information concerning the alleged or suspected abuse

Reports can be made anonymously.

A provider may not reveal whether the child has been tested or diagnosed with human immunodeficiency virus (HIV) or acquired immunodeficiency syndrome (AIDS).

If the minor's identity is unknown (e.g., the minor is at the provider's office anonymously to receive testing for HIV or a sexually transmitted disease [STD]), no report is required.

#### 1.7.1.4 Procedures for Reporting Suspected Sexual Abuse

All providers shall ensure that their employees, volunteers, or other staff report a victim of abuse who is a minor 14 years of age or younger who has engaged in sexual activity with any individual to whom the minor is not married. Sexual activity would be indicated if the minor is pregnant or has a confirmed STD acquired in a manner other than through perinatal transmission.

Sexual activity may include, but is not limited to, the actions described in Penal Code §21.11(a) relating to indecency with a child; §21.01(2) defining *sexual contact*; §43.01(1) or (3)-(5) defining various sexual activities; §22.011(a)(2) relating to sexual assault of a child; or §22.021(a)(2) relating to aggravated sexual assault of a child.

Providers may voluntarily use the HHSC checklist for monitoring all clients who are 14 years of age or younger, unmarried, and sexually active. The checklist, if used, as well as any report of child abuse, shall be retained as part of the client's record by each provider and made available during any monitoring conducted by HHSC.

**Referto:** [Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

#### 1.7.1.5 Training

All providers must develop training for all staff on the policies and procedures in regard to reporting child abuse. New staff must receive this training as part of their initial training/orientation. Training must be documented. As part of the training, staff must be informed that the staff person who conducts the screening and has cause to suspect abuse has occurred is legally responsible for reporting. A joint report may be made with the supervisor.

#### 1.7.1.6 Reporting Abuse and Neglect of the Elderly or Disabled

Title 2 Human Resources Code (HRC) §48.051 states: “(a) Except as prescribed by Subsection (b), a person having cause to believe that an elderly or disabled person is in the state of abuse, neglect, or exploitation, including a disabled person receiving services as described by Section 48.252, shall report the information required by Subsection (d) immediately to the Department of Health and Human Services and Department of Protective and Regulatory Services. (b) If a person has cause to believe that an elderly or disabled person, other than a disabled person receiving services as described by Section 48.252, has been abused, neglected, or exploited in a facility operated, licensed, certified, or registered by a state agency, the person shall report the information to the state agency that operates, licenses, certifies, or registers the facility for investigation by that agency. (c) The duty imposed by Subsections (a) and (b) applies without exception to a person whose knowledge concerning possible abuse, neglect, or exploitation is obtained during the scope of the person's employment or whose professional communications are generally confidential, including an attorney, clergy member, medical practitioner, social worker, and mental health professional.”

(d) The report may be made orally or in writing. It shall include:

- The name, age, and address of the elderly or disabled person;
- The name and address of any person responsible for the elderly or disabled person's care;
- The nature and extent of the elderly or disabled person's condition;
- The basis of the reporter's knowledge; and
- Any other relevant information.

(e) If a person who makes a report under this section chooses to give self-identifying information, the caseworker who investigates the report shall contact the person if necessary to obtain any additional information required to assist the person who is the subject of the report.”

### 1.7.1.7 Procedures for Reporting Abuse or Neglect of the Elderly or Disabled

Title 2 HRC §48.151 states: “(a) Not later than 24 hours after the department receives a report of an allegation of abuse, neglect, or exploitation under Section 48.051, the Department of Health and Human Services and Department of Protective and Regulatory Services shall initiate a prompt and thorough investigation as needed to evaluate the accuracy of the report and to assess the need for protective services, unless the department determines that the report:

- Is frivolous or patently without a factual basis; or
- Does not concern abuse, neglect, or exploitation, as those terms are defined by rules adopted by the executive commissioner under Section 48.002(c), except that if the executive commissioner has not adopted applicable rules under that section, the statutory definitions of those terms under Section 48.002(a) shall be used.

(b) The Department of Health and Human Services and Department of Protective and Regulatory Services have adopted rules for conducting investigations under this chapter.

(c) The Department of Human Services and Department of Protective and Regulatory Services by rule may assign priorities and prescribe investigative procedures for conducting investigations according to the degree of severity and immediacy of the alleged harm to the individual. Notwithstanding Subsection (a), the department’s priorities and procedures may provide that an investigation is not required to be initiated within 24 hours in all cases.

(d) The Department of Human Services and Department of Protective and Regulatory Services shall prepare and keep on file a report of each investigation conducted by the department.

(e) This section does not apply to investigations conducted under Subchapter F or H.”

### 1.7.2 Texas Medicaid and CHIP Hospital Data Collection and Reporting Requirements

In accordance with Executive Order GA-46 issued by Governor Greg Abbott on August 8, 2024, hospital providers must ask each patient during the hospital intake process whether the patient is (1) a citizen or an alien lawfully present in the United States, or (2) an alien not lawfully present in the United States. Hospital providers must report to HHSC quarterly the number of inpatient discharges of and emergency visits by all patients and patients who are (1) a citizen or an alien lawfully present in the United States, and (2) an alien not lawfully present in the United States.

Hospital providers must also report to HHSC quarterly the costs of care for patients who are not lawfully present in the United States. Hospitals are expected to begin collecting the information by November 1, 2024, and begin reporting to HHSC on March 1, 2025.

When collecting information about a patient’s immigration status, hospital providers must provide notification that, as required by federal law, the response will not affect patient care.

### 1.7.3 Maintenance of Provider Information

Within 90 calendar days of occurrence, providers must report changes in address (physical location or accounting), telephone number, name, federal tax ID, and any other information that pertains to the structure of the provider’s organization (for example, performing providers). Changes in address, office telephone or fax number, and email address should be updated by submitting a maintenance request using PEMS. A W9 is required if the provider is changing the Accounting/Billing address. A copy of the Medicare approval letter listing the additional location or site must be submitted when adding additional practice locations. Failure to provide this information may lead to administrative action by HHSC.

**Referto:** Subsection 1.7.3.3, “Online Provider Lookup (OPL)” in this section.

Subsection 1.4.1, “Medicare Number” in this section.

Providers are notified when they have an invalid address on file with TMHP. To add an additional practice location, providers must submit an existing enrollment using PEMS.

The Check Status Amount Search screen on the provider's secure homepage of the TMHP website will alert providers when payments are pending because of inaccurate or incomplete provider information. R&S Reports that are viewed on the TMHP website also notify the provider of pending payments.

Pending payments are released in the financial cycle of the following week after the address information has been updated. Payments that are pending for more than 180 days will be voided.

Other changes (in name, ownership status, federal tax ID, etc.) must be reporting to TMHP Provider Enrollment by submitting the appropriate PEMS Maintenance request. Failure to notify TMHP of changes affects accurate processing and timely claims payment. In addition, failure to timely report such changes is a violation of the rules of Medicaid, and may result in administrative, civil, or criminal liability.

**Referto:** Subsection 1.10, "Medicaid Fraud, Waste, and Abuse Policy" in this section.

Providers will be prompted to verify their address(es) and make necessary changes at least once a year.

Providers that have a moderate or high risk category cannot render or submit claims for services at a new practice location until it has been approved and added to the enrollment record. Providers are encouraged to check PEMS for verification that the practice location has been approved prior to rendering or submitting claims for services.

**Referto:** The [Affordable Care Act \(ACA\) Screening Requirements](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for more information on risk category screening requirements.

### **1.7.3.1 Contracted Provider Groups**

Contracted provider groups, independent physician groups, and physician management companies that have a hospital-based practice location must ensure that the organization's contact information is listed as the accounting or mailing address rather than the hospital's information. Providers can check this information in PEMS.

### **1.7.3.2 NPI Verification**

TMHP verifies NPIs with NPPES to ensure that the NPI is active. If the NPI is shown by NPPES to be inactive, TMHP will notify the provider by letter.

TMHP will disenroll all practice locations, NPIs, and programs associated with the inactive NPI.

### **1.7.3.3 Online Provider Lookup (OPL)**

The [OPL](#) is available on the public access portion of the TMHP website at [www.tmhp.com](http://www.tmhp.com). Provider information can be viewed by providers, clients, and anyone who accesses the TMHP website.

Providers with certain provider types must verify and update key demographic information every six months in PEMS to ensure their information is correct in the OPL. Affected provider types include, but are not limited to, physicians, nurses, dentists, and durable medical equipment providers.

If more than six months have elapsed since the required demographic information in the OPL was verified, access to the secure provider portal is blocked until the verification takes place. Upon logging into their accounts, users with administrative rights see a list of NPIs that require verification and update. After addressing each NPI listed on the page, administrative providers are able to proceed to their accounts.

If access to the secure portal has been blocked because of needed verification, nonadministrative users are not able to perform work functions on NPIs listed on the Review Required page. Nonadministrative users are advised to notify users with administrative rights so that they can verify demographic information and remove the block.

The *My Account* page has a link to the Provider Demographic Update web page. Current information will be displayed with a button to allow editable fields to be changed. Demographic information may be updated only by authorized administrators. This authorization is controlled through the Permissions Management link, also located on the *My Account* page. Fields that can be updated online include the following:

- Primary physical address:
  - Street address lines 1 and 2
  - City, state, ZIP Code
  - County
- Telephone numbers
- Email address
- Office hours
- Accepting new clients, current clients only, or not accepting new clients
- Additional sites where services are provided
- Languages spoken
- Additional services offered
- Medicaid waiver programs
- Client age or gender limitations
- Counties served
- Does the practice have a website?
- Is the physical practice location accessible to people who have disabilities?

The following enhancements have also been made to the OPL to increase overall functionality:

- Clients are able to search for providers in up to 5 counties in a single search.
- Doing business as (DBA) names appear for providers or provider groups.
- The State of Texas Access Reform (STAR) Health program has been added as a searchable health plan.
- The default ZIP Code radius for provider search has been increased to 10 miles from 5 miles.
- Providers who make address updates may receive a confirmation email from TMHP after the address has been verified and if their email address has been provided.
- Users will be able to search for providers within a ZIP Code that crosses multiple counties.

Each provider specialty and subspecialty listed in the OPL now has a corresponding definition. Users can view the definitions by clicking “more information” on either the basic or advanced search page or by hovering over the specialty on the results page. The definitions have been added to help clients locate the correct type of provider.

Providers are able to self-declare as many as three subspecialties to identify the services they offer. Providers may declare only subspecialties that are within the scope of their practice. Users are able to search for a provider on the OPL using these subspecialties.

Clients using the OPL will use drop-down boxes to select search criteria. An initial list will display all providers that meet the specified search criteria. Clicking on any name in that list will display the provider’s specific information, including a map of the office location.

Links to health maintenance organization (HMO) websites are also provided, enabling clients to search each HMO's network of participating providers. The OPL supports both English and Spanish language users, and search results can be printed.

#### **1.7.3.4 Updating NPI and Taxonomy Codes**

Providers are required to provide their NPI in the enrollment application. During the enrollment process, taxonomy codes are auto-populated and, if an update has been made, the provider can refresh the information in PEMS. Due to copyright restrictions, TMHP is unable to publish the taxonomy descriptions. Providers must verify the taxonomy codes associated with their provider type and specialty before beginning the enrollment process.

**Referto:** Subsection 1.1.2, "NPI and Taxonomy Codes" in this section.

Providers must maintain and update their NPI and/or taxonomy code information with Texas Medicaid. The available taxonomy code selections are auto-populated according to the information on file with NPES. The taxonomy code options may not match the taxonomy code listed in the confirmation letter received from NPES. Providers must contact the TMHP Contact Center at 1-800-925-9126 to validate their provider type and specialty associated with their NPIs.

**Important:** *The taxonomy code that is included in electronic transactions must match a taxonomy code that is included in the attestation record. Secondary taxonomy codes included during the attestation process are used as additional matching criteria for claims and authorization processing.*

#### **1.7.3.5 Updating Provider Specialty**

Providers that have made a change in their specialty must submit their updated specialty information to Texas Medicaid using an Existing Enrollment application in PEMS, as follows:

- Medicare-enrolled providers whose Medicare number has not changed must submit a maintenance request using PEMS. The specialty letter may be uploaded to PEMS.
- Providers that are not enrolled in Medicare or whose Medicare number has changed must submit an Existing Enrollment application.

**Referto:** Subsection 1.4, "Provider Reenrollment" in this section for more information about provider reenrollment in Texas Medicaid.

#### **1.7.4 Retention of Records and Access to Records and Premises**

The provider must maintain and retain all necessary documentation, records, R&S Reports, and claims to fully document the services and supplies provided and delivered to a client with Texas Medicaid coverage, the medical necessity of those services and supplies, costs included in cost reports or other documents used to determine a payment rate or fee, and records or documents necessary to determine whether payment for those items or services was due and was properly made for full disclosure to HHSC and its designee. A copy of the claim or R&S Reports without additional documentation will not meet this requirement.

The documentation includes the following, without limitation:

- Patient clinical health records
- Other records pertaining to the patient
- Any other records of services, items, equipment, or supplies provided to the patient and payments made for those services
- Diagnostic tests
- Documents related to diagnosis

- Charting
- Billing records
- Invoices
- Treatments
- Services
- Laboratory results
- X-rays
- Documentation of delivery of items, equipment, and supplies

Accessible information must include information that is necessary for the agencies specified in this section to perform statutory functions.

**Note:** *The required information may also include, without limitation, business and accounting records with backup support documentation, statistical documentation, computer records and data, and patient sign-in sheets and schedules. Additionally, it includes all requirements and elements described in 1 TAC §§371.1607 and 371.1667 (definition of “failure to grant immediate access”).*

The provider is required to submit original documents, records, and accompanying business records affidavits to representatives of the organizations listed in this section. These records should also be provided to any agents and contractors related to the organizations. At the discretion of the requestor, the provider may be permitted to instead provide copies notarized with the required business records affidavit. Requested records must be provided promptly and at no cost to the state or federal agency. If the provider was originally requested to provide original documents and subsequent requests for copies of these records are made by the provider, any and all costs associated with copying or reproducing any portion of the original records will be at the expense of the provider. This applies to any request for copies made by the provider at any point in the investigative process until such time as the agency deems the investigation to be finalized. A method of payment for the copying charge, approved by the agency, would be used to pay for the copying of the records. If copies of records are requested from the provider initially, the provider must submit copies of such records at no cost to the requestor’s organization.

The provider must provide immediate access to the provider’s premises and records for purposes of reviewing, examining, and securing custody of records, documents, electronic data, equipment, or other requested items, as determined necessary by the requestor to perform statutory functions. Nothing in this section will in any way limit access otherwise authorized under state or federal law. If, in the opinion of the Inspector General or other requestor, the documents may be provided at the time of the request or in less than 24 hours or the Inspector General or other requestor suspects the requested documents or other requested items may be altered or destroyed, the response to the request must be completed by the provider at the time of the request or in less than 24 hours as allowed by the requestor. If, in the opinion of the Inspector General or other requestor, the requested documents and other items requested cannot be completely provided on the day of the request, the Inspector General or requestor may set the deadline for production at 24 hours from the time of the original request.

Failure to supply the requested documents and other items, within the time frame specified, may result in payment hold to the provider’s Medicaid payments, recoupment of payments for all claims related to the missing records, contract cancellation, and/or exclusion from Texas Medicaid.

As directed by the requestor, the provider or person will relinquish custody of the requested documents and other items and the requestor will take custody of the records, removing them from the premises. If the requestor should allow longer than “at the time of the request” to produce the records, the provider will be required to produce all records completed, at the time of the completion or at the end of each day of production, as directed by the requestor who will take custody of the requested items.

If the provider places the required information in another legal entity's records, such as a hospital, the provider is responsible for obtaining a copy of these requested records for use by the requesting state and federal agencies.

These documents and claims must be retained for a minimum period of five years from the date of service or until all audit questions, appeal hearings, investigations, or court cases are resolved. Freestanding RHCs must retain their records for a minimum of six years, and hospital-based RHCs must retain their records for a minimum of ten years. These records must be made available immediately at the time of the request to employees, agents, or contractors of HHSC OIG, the Office of the Attorney General (OAG) Medicaid Fraud Control Unit (MFCU) or Antitrust and Civil Medicaid Fraud Section, TMHP, DFPS, HHSC, DSHS, Texas Workforce Commission (TWC), U.S. Department of Health and Human Services (HHS) representative, any state or federal agency authorized to conduct compliance, regulatory, or program integrity functions on the provider, person, or the services rendered by the provider or person, or any agent, contractor, or consultant of any agency or division delineated above. In addition, the provider must meet all requirements of 1 TAC §371.1667.

The records must be available as requested by each of these entities, during any investigation or study of the appropriateness of the Medicaid claims submitted by the provider.

#### **1.7.4.1 Payment Error Rate Measurement (PERM) Process**

CMS assesses Texas Medicaid using the PERM process to measure improper payments in Texas Medicaid. Providers will be required to provide medical record documentation to support the medical reviews that the federal review contractor will conduct for Texas Medicaid fee-for-service and Primary Care Case Management Medicaid and State Children's Health Insurance Program (SCHIP) claims.

Under the PERM process, if a claim is selected in a sample for a service that a provider rendered to a Medicaid client, the provider will be contacted to submit a copy of the medical records that support the medical review of the claim. All providers should check the TMHP system to ensure their current telephone number and addresses are correct in the system. If the information is incorrect or incomplete, providers must request a change immediately to ensure the PERM medical record request can be delivered. Client authorization for release of this information is not required.

Once a provider receives the request for medical records, the provider must submit the information electronically or in hard copy within 60-calendar days. It is important that providers cooperate by submitting all requested documentation in a timely manner because no response or insufficient documentation will count against the state as an error. This can ultimately negatively impact the amount of federal funding received by Texas for Medicaid.

#### **1.7.5 Medicare Overpayment**

Title 42 CFR §447.30 provides for withholding the federal share of Medicaid payments to recover Medicare overpayments from providers in a coordinated effort with CMS.

#### **1.7.6 Credit Balance and Recovery Vendor**

Trend Health Partners helps Texas Medicaid resolve credit balances and recover overpayments. Trend Health Partners reviews the credit balances of all current accounts with claims that received a primary or secondary payment from both TMHP and a health insurance carrier, but the health insurance carrier was liable for payment before Medicaid.

#### **1.7.7 Release of Confidential Information**

Information regarding the diagnosis, evaluation, or treatment of a client with Texas Medicaid coverage by a person licensed or certified to diagnose, evaluate, or treat any medical, dental, mental/emotional disorder, or drug abuse, is confidential information that the provider may disclose only to authorized persons. Family planning information is sensitive, and confidentiality must be ensured for all clients, especially minors.

Only the client may give written permission for release of any pertinent information before client information can be released, and confidentiality must be maintained in all other respects. If a client's medical records are requested by a licensed Texas health-care provider or a provider licensed by any state, territory, or insular possession of the United States or any state or province of Canada, for purposes of emergency or acute medical care, a provider must furnish such records at no cost to the requesting provider. This includes records received from another physician or health-care provider involved in the care or treatment of the patient. If the records are requested for purposes other than for emergency or acute medical care, the provider may charge the requesting provider a reasonable fee and retain the requested information until payment is received.

The client's signature is not required on the claim form for payment of a claim, but HHSC recommends the provider obtain written authorization from the client before releasing confidential medical information. A release may be obtained by having the client sign the indicated block on the claim form after the client has read the statement of release of information that is printed on the back of the form. The client's authorization for release of such information is not required when the release is requested by and made to HHSC, DSHS, TMHP, DFPS, TWC, HHSC OIG, the MFCU or Antitrust and Civil Fraud Division, or HHS.

### 1.7.8 Compliance with Federal Legislation

HHSC complies with HHS regulations that protect against discrimination. All contractors must agree to comply with the following:

- Title VI of the Civil Rights Act of 1964 (Public Law 88-352), section 504 of the Rehabilitation Act of 1973 (Public Law 93-112), the Americans with Disabilities Act of 1990 (Public Law 101-336), Title 40, Chapter 73, of the TAC, all amendments to each, and all requirements imposed by the regulations issued pursuant to these acts. The laws provide in part that no persons in the United States (U.S.) shall, on the grounds of race, color, national origin, age, sex, disability, political beliefs, or religion, be excluded from participation in or denied any aid, care, service, or other benefits provided by federal and/or state funding, or otherwise be subjected to any discrimination
- Health and Safety Code 85.113 as described in "Model Workplace Guidelines for Businesses, State Agencies, and State Contractors" on page G-2 (relating to workplace and confidentiality guidelines on AIDS and HIV)

**Exception:** *In the case of minors receiving family planning services, only the client may consent to release of health-care information. Providers must comply with the laws and regulations concerning discrimination. Payments for services and supplies are not authorized unless the services and supplies are provided without discrimination on the basis of race, color, sex, national origin, age, or disability. Send written complaints of noncompliance to the following address:*

Executive Commissioner  
1100 West 49th Street  
Austin, TX 78756-3172

**Reminder:** *Each provider must furnish covered Medicaid services to eligible clients in the same manner, to the same extent, and of the same quality as services provided to other patients. Services made available to other patients must be made available to Texas Medicaid clients if the services are benefits of Texas Medicaid.*

### 1.7.9 Tamper-Resistant Prescription Pads

Providers are required by federal law (Public Law 110-28) to use a tamper-resistant prescription pad when writing a prescription for any drug for Medicaid clients.

Providers must take necessary steps to ensure that tamper-resistant pads are used for all written prescriptions provided to Medicaid clients. Providers may also use compliant, non-written alternatives for transmitting prescriptions such as by telephone, fax, or electronic submittal. Pharmacies are required to ensure that all written Medicaid prescriptions submitted for payment to the Vendor Drug Program are written on a compliant tamper-resistant pad.

If a prescription is not submitted on a tamper-resistant prescription form, a pharmacy may fill the prescription and obtain a compliant prescription by fax, electronic prescription, or re-written on tamper-resistant paper within 72 hours after the date the prescription was filled.

Providers may purchase tamper-resistant prescription pads from the vendor of their choice.

Special copy-resistant paper is not a requirement for prescriptions printed from electronic health records (EHRs) or ePrescribing generated prescriptions. These prescriptions may be printed on plain paper and will be fully compliant with all three categories of the tamper-resistant regulations, provided they contain at least one feature from each of the three following categories:

- Prevents unauthorized copying of completed or blank prescription forms.
- Prevents erasure or modification of information written on the prescription form.
- Prevents the use of counterfeit prescription forms.

### **1.7.10 Utilization Control — General Provisions**

Title XIX of the Social Security Act, sections 1902 and 1903, mandates utilization control of all Texas Medicaid services under regulations found at Title 42 CFR, Part 456. Utilization review activities required by Texas Medicaid are completed through a series of monitoring systems developed to ensure the quality of services provided, and that all services are both medically necessary and billed appropriately. Both clients and providers are subject to utilization review monitoring. Utilization control procedures safeguard against the delivery of unnecessary services, monitor quality, and ensure payments are appropriate and according to Texas Medicaid policies, rules, and regulations. All providers identified as a result of utilization control activities are presented to HHSC-OIG to determine any and all subsequent actions.

The primary goal of utilization control activity is to identify providers with practice patterns inconsistent with the federal requirements and Texas Medicaid scope of benefits, policies, and procedures. The use of utilization control monitoring systems allows for identification of providers whose patterns of practice and use of services fall outside of the norm for their peer groups. Providers identified as exceptional are subject to an in-depth review of all Texas Medicaid billings. These review findings are presented to the HHSC-OIG to determine any necessary action. Medical records may be requested from the provider to substantiate the medical necessity and appropriateness of services billed to Texas Medicaid. Inappropriate service utilization may result in recoupment of overpayments and/or sanctions, or other administrative actions deemed appropriate by the HHSC-OIG. There are instances when a training specialist may be directed to communicate with the provider to offer assistance with the technical or administrative aspects of Texas Medicaid.

At the direction of the HHSC-OIG, a provider's claims may be manually reviewed before payment. Parameters are developed for prepayment review based on the specific areas of concern identified in each case. As part of the prepayment review process, providers are required to submit paper claims, rather than electronic claims, along with supporting medical record documentation (e.g., clinical notes, progress notes, diagnostic testing results, other reports, superbills, X-rays, and any related medical record documentation) attached to each claim for all services billed. This documentation is used to ascertain that the services billed were medically necessary, billed appropriately, and according to Texas Medicaid requirements and policies. Services inconsistent with Texas Medicaid requirements and policies are adjudicated accordingly. Claims submitted initially without the supporting medical record documentation will be denied. Additional medical record documentation submitted by the provider for claims denied as a result of the prepayment review process is not considered at a later time. A provider

is removed from prepayment review only when determined appropriate by the HHSC-OIG. Once removed from prepayment review, a follow-up assessment of the provider's subsequent practice patterns is performed to monitor and ensure continued appropriate use of resources. Noncompliant providers are subject to administrative sanctions up to and including exclusion and contract cancellation, as deemed appropriate by the HHSC-OIG as defined in the rules in 1 TAC §§371.1701, 371.1703, 371.1705, 371.1707, 371.1709, 371.1711, 371.1713, and 371.1715. Providers placed on prepayment review must submit all paper claims and supporting medical record documentation to the following address:

Texas Medicaid & Healthcare Partnership  
Attention: Prepayment Review MC-A11 SURS  
PO Box 203638  
Austin, Texas 78720-3638

### 1.7.11 Provider Certification/Assignment

Texas Medicaid service providers are required to certify compliance with or agree to various provisions of state and federal laws and regulations. After submitting a signed claim to TMHP, the provider certifies the following:

- Services were personally rendered by the *billing provider* or under supervision of the billing provider, if allowed for that provider type, or under a substitute arrangement.
- The information on the claim form is true, accurate, and complete.
- All services, supplies, or items billed were medically necessary for the client's diagnosis or treatment. Exception is allowed for special preventive and screening programs (for example, family planning and THSteps).
- Health records document all services billed and the medical necessity of those services.
- All billed charges are usual and customary for the services provided. The charges must not be higher than the fees charged to private-pay patients.
- The provider will not bill Texas Medicaid for services that are provided or offered to non-Medicaid patients, without charge, discounted or reduced in any fashion including, but not limited to, sliding scales or advertised specials. Any reduced, discounted, free, or special fee advertised to the public must also be offered to Texas Medicaid clients.
- Services were provided without regard to race, color, sex, national origin, age, or handicap.
- The provider of health care and services files a claim with Texas Medicaid agreeing to accept the Medicaid reimbursement as payment in full for those services covered under Texas Medicaid. In accordance with 1 TAC §354.1005, the reimbursement for services covers the costs for a covered service, and any function incidental to the provision of a covered service (refer to subsection 1.7.12, "Billing Clients" for more information). The client with Medicaid coverage, or others on their behalf, must not be billed for the amount above that which is paid on allowed services or for services denied or reduced as a result of errors made in claims filing, claims preparation, missed filing deadlines, or failure to follow the appropriate appeal process. However, the client may be billed for noncovered services for which Texas Medicaid does not make any payment. Before providing services, providers should *always* inform clients of their liability for services that are not a benefit of Texas Medicaid, including use of the Client Acknowledgment Statement.
- The provider understands that endorsing or depositing a Texas Medicaid check is accepting money from federal and state funds and that any falsification or concealment of material fact related to payment may be grounds for prosecution under federal and state laws.

Providers must not bill for, and agree not to bill for, any service provided for which the client bears no liability to pay (i.e., free services). The only exceptions to this ban on billing for services that are free to the user are:

- Services offered by or through the Title V agency when the service is a benefit of Texas Medicaid and rendered to an eligible client
- Services included in the Texas Medicaid client's individualized education program (IEP) or individualized family service plan (IFSP) if the services are covered under the Title XIX state plan, even though they are free to the users of the services

**Referto:** Subsection 7.2, “Services, Benefits, Limitations, and Prior Authorization” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

Subsection 1.7.11.1, “Delegation of Signature Authority” in this section.

### **1.7.11.1 Delegation of Signature Authority**

A provider delegating signatory authority to a member of the office staff or to a billing service *remains responsible* for the accuracy of all information on a claim submitted for payment. A provider's employees or a billing service and its employees are equally responsible for any false billings in which they participated or directed.

If the claim is prepared by a billing service or printed by data processing equipment, it is permissible to print “Signature on File” in place of the provider's signature. When claims are prepared by a billing service, the billing service must obtain and keep a letter on file that is signed by the provider authorizing claim submission.

### **1.7.12 Billing Clients**

A provider cannot require a down payment before providing Medicaid-allowable services to eligible clients, bill, nor take recourse against eligible clients for denied or reduced claims for services that are within the amount, duration, and scope of benefits of Texas Medicaid if the action is the result of any of the following provider-attributable errors:

- Failure to submit a claim, including claims not received by TMHP
- Failure to submit a claim to TMHP for initial processing within the 95-day filing deadline (or the initial 365-day deadline, if applicable)
- Submission of an unsigned or otherwise incomplete claim such as omission of the Hysterectomy Acknowledgment Statement or Sterilization Consent Form with claims for these procedures
- Filing an incorrect claim
- Failure to resubmit a corrected claim or rejected electronic media claim within the 120-day resubmittal period
- Failure to appeal a claim within the 120-day appeal period. Errors made in claims preparation, claims submission, or appeal process
- Failure to submit a claim to TMHP within 95 days of a denial by the DSHS Family Planning Program for family planning services
- Failure to submit a claim within 95 days from the disposition date from Medicare or a primary third-party insurance resource
- Failure to obtain prior authorization for services that require prior authorization under Texas Medicaid

Providers must certify that they will accept the reimbursement paid by Texas Medicaid for covered services and will not bill an eligible client for covered services. Federal regulations prohibit providers from charging clients a fee for completing or filing Medicaid claim forms. Providers are not allowed to charge TMHP for filing claims. The cost of claims filing is part of the usual and customary rate for doing business.

Medicaid reimbursement is considered as payment in full for those services covered under Texas Medicaid. In accordance with 1 TAC §354.1005, the reimbursement for services is intended to cover the costs for a covered service, or any function incidental to the provision of a covered service, including, but not limited to:

- Signing, completing, or providing a copy of a health assessment form, such as a physical examination form required for the eligible client's enrollment in school or participation in school or other activities;
- Providing a copy of a medical record requested:
  - By or on behalf of any health care practitioner for purposes of medical care or treatment of the eligible client;
  - As a supplement to a health assessment form or other form provided incidental to a covered service; or
  - By an eligible client, for any reason, for the first time in a one-year period; and
- Providing a copy of any subsequent amendment, supplement, or correction to a medical record requested by or on behalf of the eligible client.
- If the provider has already provided the eligible client a free copy of the medical record within a one-year period, the provider is required to provide only the amended, supplemented, or corrected portion of the record, if requested, without having to copy the entire record.

**Note:** *A provider may bill or otherwise charge a client a reasonable fee for providing a paper copy of a medical record outside of the above scenarios. A reasonable fee for providing a paper copy of the requested records shall be a charge of no more than \$25.00 for the first twenty pages and \$.50 per page for every copy thereafter per 22 TAC §165.2.*

Completion of required forms submitted by a nursing facility to the physician for signature is also considered incidental to a covered service. It is not acceptable for the physician to charge Texas Medicaid clients, their family, or the nursing facility for telephone calls, telephone consultations, or signing forms.

In accordance with current federal policy, Texas Medicaid and Texas Medicaid clients cannot be charged for the client's failure to keep an appointment. Only billings for services provided are considered for payment. Clients may not be billed for the completion of a claim form, even if it is a provider's office policy.

Letters of inquiry about client billing are sometimes sent to providers in lieu of telephone calls from TMHP representatives. In either case, it is mandatory that the questions be answered with the requested pertinent information. Upon receipt, TMHP forwards these letters to HHSC. HHSC uses the information to resolve client billing/liability issues. It is mandatory that these letters be signed, dated, and returned within ten business days.

**Referto:** *The Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for more information about spell-of-illness.

Subsection 4.5, "Medically Needy Program (MNP)" in "Section 4: Client Eligibility" (Vol. 1, *General Information*).

[Private Pay Agreement](http://www.tmhp.com) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

### 1.7.12.1 Client Acknowledgment Statement

Texas Medicaid only reimburses services that are medically necessary or benefits of special preventive and screening programs such as family planning and THSteps. Hospital admissions denied by the Texas Medical Review Program (TMRP) also apply under this policy.

The provider may bill the client only if:

- A specific service or item is provided at the client's request.
- The provider has obtained and kept a written Client Acknowledgment Statement signed by the client that states:
  - "I understand that, in the opinion of (*provider's name*), the services or items that I have requested to be provided to me on (*dates of service*) may not be covered under the Texas Medical Assistance Program as being reasonable and medically necessary for my care. I understand that the HHSC or its health insuring agent determines the medical necessity of the services or items that I request and receive. I also understand that I am responsible for payment of the services or items I request and receive if these services or items are determined not to be reasonable and medically necessary for my care."
  - "Comprendo que, según la opinión del (*nombre del proveedor*), es posible que Medicaid no cubra los servicios o las provisiones que solicité (*fecha del servicio*) por no considerarlos razonables ni médicamente necesarios para mi salud. Comprendo que el Departamento de Salud de Texas o su agente de seguros de salud determina la necesidad médica de los servicios o de las provisiones que el cliente solicite o reciba. También comprendo que tengo la responsabilidad de pagar los servicios o provisiones que solicité y que reciba si después se determina que esos servicios y provisiones no son razonables ni médicamente necesarios para mi salud."

A provider is allowed to bill the following to a client without obtaining a signed Client Acknowledgment Statement:

- Any service that is not a benefit of Texas Medicaid (for example, cellular therapy).
- All services incurred on noncovered days because of eligibility or spell of illness limitation. Total client liability is determined by reviewing the itemized statement and identifying specific charges incurred on the noncovered days. Spell of illness limitations do not apply to medically necessary stays for Medicaid clients who are 20 years of age and younger.
- The reduction in payment that is due to the Medically Needy Program (MNP) is limited to children who are 18 years of age and younger and pregnant women. The client's potential liability would be equal to the amount of total charges applied to the spend down. Charges to clients for services provided on ineligible days must not exceed the charges applied to spend down.
- All services provided as a private pay patient. If the provider accepts the client as a private pay patient, the provider must advise clients that they are accepted as private pay patients at the time the service is provided and responsible for paying for all services received. In this situation, HHSC strongly encourages the provider to ensure that the client signs written notification so there is no question how the client was accepted. Without written, signed documentation that the Texas Medicaid client has been properly notified of the private pay status, the provider cannot seek payment from an eligible Texas Medicaid client.
- The client is accepted as a private pay patient pending Texas Medicaid eligibility determination and does *not* become eligible for Medicaid retroactively. The provider is allowed to bill the client as a private pay patient if retroactive eligibility is not granted. If the client becomes eligible retroactively, the client notifies the provider of the change in status. Ultimately, the provider is responsible for filing timely Texas Medicaid claims. If the client becomes eligible, the provider *must* refund any money paid by the client and file Medicaid claims for all services rendered.

A provider attempting to bill or recover money from a client in violation of the above conditions may be subject to exclusion from Texas Medicaid.

**Important:** *Ancillary services must be coordinated and pertinent eligibility information must be shared. The primary care provider is responsible for sharing eligibility information with others (e.g., emergency room staff, laboratory staff, and pediatricians).*

### 1.7.13 General Medical Record Documentation Requirements

The Administrative Simplification Act of HIPAA mandates the use of national coding and transaction standards. HIPAA requires that the American Medical Association's (AMA) Current Procedural Terminology (CPT) system or the American Dental Association's (ADA) Current Dental Terminology (CDT) system be used to report professional services, including physician and dental services. Correct use of CPT and CDT coding requires using the most specific procedure code that matches the services provided based on the procedure code's description. Providers must pay special attention to the standard CPT descriptions for the evaluation and management services. The medical record must document the specific elements necessary to satisfy the criteria for the level of service as described in CPT. Reimbursement may be recouped when the medical record does not document that the level of service provided accurately matches the level of service claimed. Furthermore, the level of service provided and documented must be medically necessary based on the clinical situation and needs of the patient.

HHSC and TMHP routinely perform retrospective reviews of all providers. HHSC ultimately is responsible for Texas Medicaid utilization review activities. This review includes comparing services billed to the client's clinical record. The following requirements are general requirements for all providers. Any mandatory requirement not present in the client's medical record subjects the associated services to recoupment.

**Note:** *This list is not all-inclusive. Additional and more specific requirements may apply to special services areas.*

**Note:** *Health-care documentation that is maintained by a provider in a client's record can be maintained in a language other than English; however, when TMHP, HHSC, or any other state/federal agency requests a written record or conducts a documentation review, this health-care documentation must be provided in English and in a timely manner.*

- (Mandatory) All entries are legible to individuals other than the author, dated (month, day, and year), and signed by the performing provider.
- (Mandatory) Medicaid-enrolled providers must submit claims with their own NPI except when under the agreement of a substitute provider or *locum tenens*.
- (Mandatory) Each page of the medical record documents the patient's name and Texas Medicaid number.
- (Mandatory) A copy of the actual authorization from HHSC or its designee (e.g., TMHP) is maintained in the medical record for any item or service that requires prior authorization.
- (Mandatory) Allergies and adverse reactions (including immunization reactions) are prominently noted in the record.
- (Mandatory) The selection of evaluation and management codes (levels of service) is supported by the client's clinical record documentation. Providers must follow guidelines established in the Current Procedural Terminology (CPT) Manual for Evaluation and Management Services when selecting the level of service provided.
- (Mandatory) The history and physical documents the presenting complaint with appropriate subjective and objective information.

- (Mandatory) The services provided are clearly documented in the medical record with all pertinent information regarding the patient's condition to substantiate the need and medical necessity for the services.
- (Mandatory) Medically necessary diagnostic lab and X-ray results are included in the medical record and abnormal findings have an explicit notation of follow-up plans.
- (Mandatory) Necessary follow-up visits specify time of return by at least the week or month.
- (Mandatory) Unresolved problems are noted in the record.
- (Desirable) Immunizations are noted in the record as *complete* or *up-to-date*.
- (Desirable) Personal data includes address, employer, home/work telephone numbers, sex, marital status, and emergency contacts.

**Note:** *An unenrolled provider that renders services and attempts to use the NPI of a provider who is enrolled in Medicaid will not be reimbursed for the services. During retrospective review, any services that were rendered by a provider that was not enrolled in Texas Medicaid and were billed using the NPI of a Medicaid-enrolled provider are subject to recoupment.*

### 1.7.14 Informing Pregnant Clients About CHIP Benefits

Section 24, S.B. 1188, 79th Legislature, Regular Session, 2005, requires that Medicaid providers rendering services to a pregnant Medicaid client must inform the client of the health benefits for which the client or the client's child may be eligible under the CHIP.

CHIP is available to children whose families have low to moderate income, who earn too much money to qualify for Texas Medicaid, and who do not have private insurance. Some clients may have to pay an enrollment fee.

To qualify for CHIP, a child must be:

- A Texas resident
- 18 years of age or younger
- A citizen or legal permanent resident of the United States
- Must meet all income and resource guidelines

CHIP benefits include:

- Physician, hospital, X-ray, and lab services
- Well-baby and well-child visits
- Immunizations
- Prescription drugs
- Dental services
- DME
- Prosthetic devices (with a \$20,000 limit per 12-month period)
- Case coordination and enhanced services for children with special health-care needs and children with disabilities
- Physical, speech, and occupational therapy
- Home health services
- Transplants
- Mental health services

- Vision services
- Chiropractic services

Individuals may apply for CHIP by downloading and completing the application found on [www.insure-kidsnow.gov](http://www.insure-kidsnow.gov) website or by calling the toll-free CHIP number at 1-800-647-6558.

### 1.7.15 Home Health Providers

To enroll in Texas Medicaid as a provider of home health services, Home Health Services and Home and Community Support Services Agency (HCSSA) providers must complete the Texas Medicaid Provider Enrollment Application. Medicare certification is required for providers that are licensed as a Licensed and Certified Home Health Agency. Providers that are licensed as a Licensed Home Health Agency are not required to enroll in Medicare as a prerequisite to enrollment with Texas Medicaid.

Licensed and Certified Home Health agencies that are enrolled as Medicaid providers can provide personal care services (PCS) using their existing NPI. PCS for clients who are 20 years of age and younger will be provided by the Texas Health and Human Services Commission (HHSC) under the PCS benefit.

**Referto:** Subsection 2.12, “Personal Care Services (PCS) (CCP)” in the *Children’s Services Handbook* (Vol. 2, *Provider Handbooks*).

To provide CCP services, HCSSA providers must follow the enrollment procedures in subsection 4.2, “Enrollment” in the *Children’s Services Handbook* (Vol. 2, *Provider Handbooks*).

Providers may request prior authorization for home health services by contacting:

Texas Medicaid & Healthcare Partnership  
Home Health Services  
PO Box 202977  
Austin, TX 78720-2977  
1-800-925-8957  
Fax: 1-512-514-4209

#### 1.7.15.1 Home Health Skilled Nursing and Home Health Aide (HHA) Services Provider Responsibilities

Providers must be a licensed and certified home health agency, enrolled in Texas Medicaid, and must comply with all applicable federal, state, and local laws and regulations and Texas Medicaid policies and procedures. All providers must maintain written policies and procedures:

- That meet the standards of the Texas Family Code, Chapter 32 for obtaining consent for the medical treatment of clients in the absence of the primary caregiver.
- For obtaining physician signatures for all telephone orders within 14 calendar days of receipt of the order.

Providers must only accept clients on the basis of a reasonable expectation that the client’s needs can be adequately met in the place of service (POS). The essential elements of safe and effective home health SN or HHA services include a trained parent, guardian, or caregiver, a primary physician, competent providers, and an environment that supports the client’s health and safety needs.

Necessary primary and back-up utility, communication, and fire safety systems must be available.

**Note:** *A parent or guardian, primary caregiver, or alternate caregiver may not provide SN or HHA services to their family member even if he or she is an enrolled provider or employed by an enrolled provider.*

### 1.7.16 Private Duty Nursing (PDN) Providers

Home health agencies may enroll to provide PDN under the Comprehensive Care Program (CCP). RNs and licensed vocational nurses (LVNs) may enroll independently to provide PDN under CCP.

Home health agencies must do all of the following:

- Comply with provider participation requirements for home health agencies that participate in Texas Medicaid
- Comply with mandatory reporting of suspected abuse and neglect of children or adults
- Maintain written policies and procedures for obtaining consent for medical treatment for clients in the absence of the parent or guardian
- Comply with all requirements in this manual

Independently-enrolled RNs and LVNs must be enrolled as providers in CCP and comply with all of the following:

- The terms of the Texas Medicaid Provider Agreement
- All state and federal regulations and rules relating to Texas Medicaid
- The requirements of this manual, all handbooks, standards, and guidelines published by HHSC

Independently enrolled RNs and LVNs must also:

- Provide at least 30 days' written notice to clients of their intent voluntarily to terminate services except in situations of potential threat to the nurse's personal safety.
- Comply with mandatory reporting of suspected abuse and neglect of children.
- Maintain written policies and procedures for obtaining consent for medical treatment for clients in the absence of the parent or guardian.

Independently enrolled RNs must:

- Hold a current license from the Texas Board of Nursing (BON) or another compact state to practice as an RN.
- Agree to provide services in compliance with all applicable federal, state, and local laws and regulations, including the Texas Nursing Practice Act.
- Comply with accepted professional standards and principles of nursing practice.

Independently enrolled LVNs must:

- Hold a current license from the Texas BON to practice as an LVN.
- Agree to provide services in compliance with all applicable federal, state, and local laws and regulations, including the Texas Nursing Practice Act.
- Comply with accepted standards and principles of vocational nursing practice.
- Be supervised by an RN once per month. The supervision must occur when the LVN is present and be documented in the client's medical record.

### **1.7.17 Certified Respiratory Care Practitioner (CRCP) Services**

To enroll in Texas Medicaid, a CRCP must be certified by the Texas Medical Board to practice under the Texas Occupations Code, Chapter 604. For CRCPs, Medicare certification is not a prerequisite for Medicaid enrollment. A provider cannot be enrolled if his license is due to expire within 30 days; a current license must be submitted. CRCPs must enroll as individual providers and comply with all applicable federal, state, and local laws and regulations.

### **1.7.18 Physical, Occupational, and Speech Therapy Providers**

Physical therapists, occupational therapists, and speech-language pathologists must be enrolled in Texas Medicaid according to their specific licensure in order to be reimbursed for services rendered to Texas Medicaid clients.

Occupational therapists, physical therapist, physical therapy assistants, or occupational therapy assistants must be registered and licensed by the Executive Council of Physical Therapy and Occupational Therapy Examiners.

**Note:** *Auxiliary (aide, orderly, student, or technician), a licensed therapy assistant, and a licensed speech-language pathology intern (Clinical Fellow) are not eligible to enroll as therapy providers in Texas Medicaid.*

**Referto:** Subsection 1.1, “Provider Enrollment” in this section for information about enrollment procedures.

Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

### **1.7.18.1 CCP Enrollment for Children’s Services—20 Years of Age and Younger**

Children’s therapy services are provided under the Comprehensive Care Program (CCP). Physical, occupational, and speech therapy providers must meet Medicaid and Health and Human Services Commission (HHSC) participation standards to enroll in CCP. All CCP providers must be enrolled in Texas Medicaid to be reimbursed for services.

The following facilities or organizations may also enroll in Texas Medicaid to provide CCP therapy services:

- Comprehensive Outpatient Rehabilitation Facilities (CORFs) and Outpatient Rehabilitation Facilities (ORFs)
- Home Health Services and Home and Community Support Services Agency (HCSSA) providers
- Early Childhood Intervention (ECI) providers
- School Health and Related Services (SHARS) providers

**Referto:** Subsection 2.1.2, “Enrollment” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for more information about ECI enrollment.

Subsection 2.1.2, “Enrollment” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for more information about SHARS enrollment.

### **1.7.19 Children’s Services Comprehensive Care Program (CCP)**

CCP providers must meet Medicaid and Health and Human Services Commission (HHSC) participation standards to enroll in the program. All CCP providers must be enrolled in Texas Medicaid to be reimbursed for services. Provider enrollment applications can be submitted through PEMS.

Home and community support services agencies (HCSSAs) that want to provide CCP private-duty nursing (PDN), home telemonitoring, occupational therapy, physical therapy, or speech therapy services under the licensed-only home health (LHH) category must first enroll with TMHP. To enroll with TMHP in the LHH category, an HCSSA must:

- Submit a provider enrollment application through PEMS, and select the appropriate provider types based on the LHH category of service.
- Provide its license information, and check the “Only CCP services” box on the form.

### **1.7.20 Nondiscrimination for Vaccine Status**

Medicaid providers are prohibited from refusing to provide health care services to any Medicaid client based solely on the client’s refusal or failure to obtain a vaccine or immunization for a particular infectious or communicable disease unless excepted by Texas Government Code §531.02119.

## 1.8 Computer-Based Training Courses for Providers

TMHP has created a web page to simplify the process of accessing the computer-based training courses that are available on the TMHP Learning Management System (LMS).

The Provider Education and Training web page gives an overview of the different types of education resources, the TMHP YouTube channel, and the LMS. Providers need to create an LMS account to access training materials. Providers can create an LMS account by clicking the Don't Have An Account? Sign Up Here button on the LMS home page.

## 1.9 Enrollment Criteria for Out-of-State Providers

Texas Medicaid covers medical assistance services provided to eligible Texas Medicaid clients while in a state other than Texas, as long as the client does not leave Texas to receive out-of-state healthcare that can be received in Texas. Services provided outside the state are covered to the same extent medical assistance is furnished and covered in Texas.

**Note:** *Border state providers (providers rendering services within 50 miles driving distance of the Texas border) are considered in-state providers.*

The administrative rules governing the enrollment of out-of-state providers are found in 1 TAC §352.17. The rule provides that a Medicaid applicant or re-enrolling provider is considered out-of-state if any of the following criteria are met:

- The physical address where services are or will be rendered is located outside the Texas state border and within the United States.
- The physical address where the services or products originate or will originate is located outside the Texas state border and within the United States when providing services, products, equipment, or supplies to a Medicaid recipient in the state of Texas.
- The physical address where services are or will be rendered is located within the Texas state border, but:
  - The applicant or re-enrolling provider maintains all patient records, billing records, or both, outside the Texas state border and
  - The applicant or re-enrolling provider is unable to produce the originals or exact copies of the patient records or billing records, or both, from the location within the Texas state border where services are rendered.

An applicant or re-enrolling provider that is considered out-of-state is ineligible to participate in Medicaid unless HHSC or its designee approves the enrollment on the basis that the applicant has provided, is providing, or will provide services under one or more of the following criteria:

- The services are medically necessary emergency services to a recipient who is located outside of the state.

**Note:** *An out-of-state provider seeking enrollment under this criterion must include with the enrollment application a copy of the claim that contains the diagnosis that indicates emergency care or medical record documentation. The documentation must demonstrate that emergency care was provided to a Texas Medicaid client. Providers enrolled under this criterion will be given a time limited enrollment not to exceed one year.*

- The services are medically necessary to a recipient who is located outside of the state, and in the expert opinion of the recipient's attending or other provider, the recipient's health would be or would have been endangered if the recipient were required to travel to Texas.

**Note:** *An out-of-state provider seeking enrollment under this criterion must include supporting clinical records, signed by the attending provider, explaining why the client's health would be or would have been endangered if the client had been required to travel to Texas. Providers enrolled under this criterion will be given a time limited enrollment not to exceed one year.*

- The services are medically necessary and more readily available to a recipient in the state where the recipient is located.

**Note:** *An out-of-state provider that seeks enrollment under this criterion must include supporting clinical records, signed by the attending provider, explaining why the services are more readily available in the state where the client is located. Providers that are enrolled under this criterion may be enrolled for a limited period of time.*

- The services are medically necessary to a recipient who is eligible on the basis of participation in an adoption assistance or foster care program administered by the Texas Department of Family and Protective Services under Title IV-E of the Social Security Act.

**Note:** *An out-of-state provider that seeks enrollment under this criterion must include documentation showing that the client is an adopted child or is in a foster care program and/or is receiving adoption subsidies through the programs listed in this criterion. Providers that are enrolled under this criterion may be enrolled for a limited period of time.*

- The services are medically necessary and have been prior authorized by HHSC or its designee, and documented medical justification indicating the reasons the recipient must obtain medical care outside Texas is furnished to HHSC or its designee before providing the services and before payment.

**Note:** *An out-of-state provider that seeks enrollment under this criterion must include documentation showing that the service has been prior authorized by HHSC or its designee (TMHP, or MCO), or supporting clinical documentation (signed by the attending provider) indicating the reasons why the recipient must obtain medical care outside of Texas. Providers that are enrolled under this criterion may be enrolled for a limited period of time.*

- The services are medically necessary and it is the customary or general practice of Medicaid recipients in a particular locality within Texas to obtain services from the out-of-state provider, if the provider is located in the United States and within 50 miles driving distance from the Texas state border, or as otherwise demonstrated on a case-by-case basis.

**Note:** *An out-of-state provider does not meet the criterion in this paragraph merely on the basis of having established business relationships with one or more providers that participate in Medicaid. Attach signed letter from the provider stating why it is customary or general practice of clients in a particular locality within Texas to obtain services from the out-of-state provider. Providers that are enrolled under this criterion may be enrolled for a limited period of time.*

- The services are medically necessary and the nature of the service is such that providers for this service are limited or not readily available within the state of Texas.

**Note:** *An out-of-state provider that seeks enrollment under the criterion must include documentation showing that the services provided by the applicant are medically necessary and are limited or not readily available within the state of Texas.*

- The services are medically necessary services to one or more dually eligible recipients (i.e., recipients who are enrolled in both Medicare and Medicaid) and the out-of-state provider may be considered for reimbursement of co-payments, deductibles, and co-insurance, in which case the enrollment will be restricted to receiving reimbursement only for the Medicaid-covered portion of Medicare crossover claims.

**Note:** *An out-of-state provider that seeks enrollment under this criterion must include documentation for why this criterion applies, Medicare EOB or MRAN, with documented medical justification as well as any additional information requested by HHSC or its designee. Providers that are enrolled under this criterion may be enrolled for a limited period of time.*

- The services are provided by a pharmacy that is a distributor of a drug that is classified by the U.S. Food and Drug Administration (FDA) as a limited distribution drug.

**Note:** *An out-of-state provider that seeks enrollment under this criterion must include with the enrollment application documentation for why this criterion applies with documented medical justification as well as any additional information requested by HHSC or its designee. Attach signed letter from the provider stating that the enrolling pharmacy is a distributor of a drug that is classified by FDA as a limited distribution drug, include a letter from the FDA stating that the aforementioned drug is considered a limited distribution drug. Providers that are enrolled under this criterion may be enrolled for a limited period of time.*

- The services are medically necessary and one or more of the following exceptions for good cause exist and can be documented:
  - Texas Medicaid enrolled providers rely on the services provided by the applicant.
  - Applicant maintains existing agreements as a participating provider through one or more Medicaid managed care organizations (MCO) and enrollment of the applicant leads to more cost-effective delivery of Medicaid services.
- A laboratory may participate as an in-state provider under any program administered by a health and human services agency, including HHSC, that involves laboratory services, regardless of the location where any specific service is performed or where the laboratory's facilities are located if:
  - The laboratory or an entity that is a parent, subsidiary, or other affiliate of the laboratory maintains laboratory operations in Texas;
  - The laboratory and each entity that is a parent, subsidiary, or other affiliate of the laboratory, individually or collectively, employ at least 1,000 persons at places of employment located in this state; and
  - The laboratory is otherwise qualified to provide the services under the program and is not prohibited from participating as a provider under any benefits programs administered by a health and human services agency, including HHSC, based on conduct that constitutes fraud, waste, or abuse.

Out-of-state providers that seek enrollment under one or more of the above criteria must submit an enrollment application and be approved for enrollment.

TMHP must receive claims from out-of-state providers within 365 days from the date of service.

**Referto:** Subsection 10.2.1, "Prior Authorization" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (Vol. 2, Provider Handbooks).

## 1.10 Medicaid Fraud, Waste, and Abuse Policy

The OIG has the responsibility to identify and investigate cases of suspected fraud, waste, and abuse in Medicaid and other health and human services programs. This responsibility, granted through state and federal law, gives the OIG the authority to pursue administrative sanctions and to refer cases to prose-

cutors, licensure and certification boards, and other agencies. Additionally, Texas Medicaid is required to disenroll or exclude any provider who has been disenrolled or excluded from Medicare or any other state health-care program.

Anyone participating in Texas Medicaid must understand the requirements for participation. Available methods both to learn and stay up to date on program requirements include the following:

- *Provider education.* Attendance at educational workshops and training sessions. Regular training opportunities are offered by TMHP.
- *Texas Medicaid publications.* These include the *Texas Medicaid Provider Procedures Manual* and banner messages, which are included in R&S Reports.
- *All adopted agency rules.* These include those related to fraud, waste, and abuse contained in 1 TAC Chapter 371.
- *State and federal law.* Statutes and other law pertinent to Texas Medicaid and fraud, waste, and abuse within Texas Medicaid.

In addition, providers are responsible for the delivery of health-care items and services to Medicaid clients in accordance with all applicable licensure and certification requirements and accepted health care professionals' community standards. Such standards include those related to medical record and claims filing practices, documentation requirements, and records maintenance. The TAC requires providers to follow these standards. For more information, consult 1 TAC §371.1659.

Texas Medicaid providers must follow the coding and billing requirements of the *Texas Medicaid Provider Procedures Manual* (TMPPM). However, if coding and billing requirements for a particular service are not addressed in the TMPPM, and if coding and billing requirements are not otherwise specified in program policy (such as in provider bulletins or banners), then providers must follow the most current coding guidelines. These include:

- CPT as set forth in the American Medical Association's most recently published "CPT books", "CPT Assistant" monthly newsletters, and other publications resulting from the collaborative efforts of American Medical Association with the medical societies.
- Healthcare Common Procedure Coding System (HCPCS) as developed and maintained by the federal government.
- National Correct Coding Initiative (NCCI), as set forth by the CMS and as explained in the NCCI Policy and Medicare Claims Processing Manuals. NCCI consists of procedure code combinations that a provider must not bill together. One of the codes in the pair is considered a part of the primary procedure and not reimbursable to the same provider on the same date of service.

**Exception:** *NCCI outlines use of modifiers some of which are not currently recognized by Texas Medicaid. See the list of modifiers utilized by Texas Medicaid in subsection 6.3.5, "Modifiers" in "Section 6: Claims Filing" (Vol. 1, General Information).*

- *Current Dental Terminology* (CDT) as published by the American Dental Association (ADA).
- Other publications resulting from the collaborative efforts of the ADA with dental societies.
- *International Classification of Diseases*, 10th Revision, Clinical Modification (ICD-10-CM).
- *Diagnostic and Statistical Manual of Mental Disorders* (DSM).

Failure to comply with the guidelines provided in these publications may result in a provider being found to have engaged in one or more program violations listed in 1 TAC §371.1659.

All providers are held responsible for any claims preparation or other activities that may be performed under the provider's authority. For example, providers are held responsible for any omissions and the accuracy of submitted information, even if those actions are performed by office staff, contractors, or

billing services. This, however, does not absolve these other individuals for their participation in any documents provided to the state or designee with false, inaccurate, or misleading information; or pertinent omissions.

HHSC-OIG may impose one or any combination of administrative actions or administrative sanctions on Texas Medicaid providers or other persons when fraud, waste, or abuse is determined. Those who may be sanctioned include:

- Those furnishing services or items directly or indirectly.
- Those billing for services.
- Those violating any of the provisions delineated in this section.
- Affiliates of a provider or person violating any of the provisions delineated in this section.

Administrative sanctions include, without limitation:

- Exclusion from program participation for a specified period of time, permanently, or indefinitely. Anyone excluded from Texas Medicaid is also automatically excluded from all programs under Titles V and XX of the Social Security Act.
- Suspension of Medicaid payments (payment hold) to a provider.
- Recoupment of Medicaid overpayments, including any overpayments determined through statistical sampling and extrapolation.
- Restricted Medicaid reimbursement (specific services will not be reimbursed to an individual provider during the time the provider is on restricted reimbursement; however, reimbursement for other services may continue).
- Cancellation of the Medicaid provider agreement (however, a deactivation in accordance with the agreement itself is not considered a sanction).
- Exclusion or suspension under the authority of the CFR.

Administrative actions include:

- Amending a provider agreement so that it will deactivate on a specific date.
- Granting an agreement or transferring a provider to an agreement with special terms or conditions, including a probationary agreement.
- Required attendance at provider education sessions.
- Prior authorization of selected services.
- Pre-payment review.
- Post-payment review.
- Required attendance at informal or formal provider corrective action meetings.
- Submission of additional documentation or justification that is not normally required to accompany submitted claims. (Failure to submit legible documentation or justification requested will result in denial of the claim.)
- Oral, written, or personal educational contact with the provider.
- Posting of a surety bond or providing a letter of credit.
- Having a subpoena served to compel an appearance for testimony or the production of relevant evidence, as determined by the HHSC-OIG.

Anyone facing an administrative sanction has a right to formal due process. This formal due process may include a hearing before an administrative law judge. Conversely, anyone facing an administrative action is not entitled to formal due process. People who induce, solicit, receive, offer, or pay any remuneration (including, but not limited to, bribes, kickbacks, or rebates) directly or indirectly in relation to referrals, purchases, leases, or arrangements of services covered by Medicare or Texas Medicaid may be in violation of state statutes and guilty of a federal felony offense. State law also allows for the suspension of providers convicted of a criminal offense related to Medicare or Texas Medicaid. The commission of a felony in Medicaid or Medicare programs may include fines or imprisonment ranging from five years to life in prison. Examples of inducements include a service, cash in any amount, entertainment, or any item of value.

As stated in 1 TAC §§371.1651-371.1669, following is a nonexclusive list of grounds or criteria for the Inspector General's administrative enforcement and/or referral for criminal, civil, or licensure or certification investigation and judicial action regarding program violations by any provider or person. Violations result from a provider or person who knew or should have known the following were violations. The headings of each of the following groups are provided solely for organization and convenience and are not elements of any program violation.

1) Claims and Billing.

- a) Submitting or causing to be submitted a false statement or misrepresentation, or omitting pertinent facts when claiming payment under the Texas Medicaid or other HHS program or when supplying information used to determine the right to payment under the Texas Medicaid or other HHS program;
- b) Submitting or causing to be submitted a false statement, information or misrepresentation, or omitting pertinent facts to obtain greater compensation than the provider is legally entitled to;
- c) Submitting or causing to be submitted a false statement, information or misrepresentation, or omitting pertinent facts to meet prior authorization requirements;
- d) Submitting or causing to be submitted under Title XVIII (Medicare) or a state health-care program claims or requests for payment containing unjustified charges or costs for items or services that substantially exceed the person's usual and customary charges or costs for those items or services to the public or the private pay patients unless otherwise authorized by law;
- e) Submitting or causing to be submitted claims with a pattern of inappropriate coding or billing that results in excessive costs to the Texas Medicaid or other HHS program;
- f) Billing or causing claims to be filed for services or merchandise that were not provided to the recipient;
- g) Submitting or causing to be submitted a false statement or misrepresentation that, if used, has the potential of increasing any individual or state provider payment rate or fee;
- h) Submitting or causing to be submitted to the Texas Medicaid or other HHS program a cost report containing costs not associated with Texas Medicaid or other HHS program or not permitted by Texas Medicaid or other HHS program policies;
- i) Presenting or causing to be presented to an operating agency or its agent a claim that contains a statement or representation that the person knows or should have known to be false;
- j) Billing or causing claims to be submitted to the Texas Medicaid or other HHS program for services or items furnished personally by, at the medical direction of, or on the prescription or order of a person who is excluded from Texas Medicaid, other HHS program, or Medicare or has been excluded from and not reinstated within Texas Medicaid, other HHS program, or Medicare;
- k) Billing or causing claims to be submitted to the Texas Medicaid or other HHS program for services or items that are not reimbursable by the Texas Medicaid or other HHS program;

- l) Billing or causing claims to be submitted to the Texas Medicaid or other HHS program for a service or item which requires a prior order or prescription by a licensed health-care practitioner when such order or prescription has not been obtained;
  - m) Billing or causing claims to be submitted to the Texas Medicaid or other HHS program for an item or service substituted without authorization for the item or service ordered, prescribed or otherwise designated by the Texas Medicaid or other HHS program;
  - n) Billing or causing claims to be submitted to the Texas Medicaid or other HHS program by a provider or person who is owned or controlled, directly or indirectly, by an excluded person; *and*
  - o) Billing or causing claims to be submitted to the Texas Medicaid or other HHS program by a provider or person for charges in which the provider discounted the same services for any other type of patient.
- 2) Records and Documentation.
- a) Failing to maintain for the period of time required by the rules relevant to the provider in question records and other documentation that the provider is required by federal or state law or regulation or by contract to maintain in order to participate in the Texas Medicaid or other HHS program or to provide records or documents upon request for any records or documents determined necessary by the Inspector General to complete their statutory functions related to a fraud and abuse investigation. Such records and documentation include, without limitation, those necessary:
    - i) To verify specific deliveries, medical necessity, medical appropriateness, and adequate written documentation of items or services furnished under Title XIX or Title XX;
    - ii) To determine in accordance with established rates appropriate payment for those items or services delivered;
    - iii) To confirm the eligibility of the provider to participate in the Texas Medicaid or other HHS program; e.g., medical records (including, without limitation, X-rays, laboratory and test results, and other documents related to diagnosis), billing and claims records, cost reports, managed care encounter data, financial data necessary to demonstrate solvency of risk-bearing providers, and documentation (including, without limitation, ownership disclosure statements, articles of incorporation, by-laws, and corporate minutes) necessary to demonstrate ownership of corporate entities; *and*
    - iv) To verify the purchase and actual cost of products;
  - b) Failing to disclose fully and accurately or completely information required by the Social Security Act and by 42 CFR Part 455, Subpart B; 42 CFR Part 420, Subpart C; 42 CFR §1001.1101; and 42 CFR Part 431;
  - c) Failing to provide immediate access, upon request by a requesting agency, to the premises or to any records, documents, and other items or equipment the provider is required by federal or state law or regulation or by contract to maintain in order to participate in the Texas Medicaid or other HHS program (see subparagraphs (a) and (b) of this paragraph), or failing to provide records, documents, and other items or equipment upon request that are determined necessary by the Inspector General to complete their statutory functions related to a fraud and abuse investigation, including without limitation all requirements specified in 1 TAC §§371.1701, 371.1703, 371.1705, 371.1707, 371.1709, 371.1711, 371.1713, and 371.1715 of this subchapter. “Immediate access” is deemed to be within 24 hours of receiving a request, unless the requesting agency has reason to suspect fraud or abuse or to believe that requested records, documents, or other items or equipment are about to be altered or destroyed, thereby necessitating access at the actual time the request is presented or, in the opinion of the Inspector General, the request may be completed at the time of the request and/or in less than 24 hours;

- d) Developing false source documents or failing to sign source documents or to retain supporting documentation or to comply with the provisions or requirements of the operating agency or its agents pertaining to electronic claims submittal; *and*
  - e) Failing as a provider, whether individual, group, facility, managed care or other entity, to include within any subcontracts for services or items to be delivered within Texas Medicaid all information that is required by 42 CFR §434.10(b).
- 3) Program-Related Convictions.
- a) Pleading guilty or nolo contendere, agreeing to an order of probation without adjudication of guilt under deferred adjudication, or being a defendant in a court judgment or finding of guilt for a violation relating to performance of a provider agreement or program violation of Medicare, Texas Medicaid, other HHS program, or any other state's Medicaid program;
  - b) Pleading guilty or being convicted of a violation of state or federal statutes relating to dangerous drugs, controlled substances, or any other drug-related offense;
  - c) Pleading guilty of, being convicted of, or engaging in conduct involving moral turpitude;
  - d) Pleading guilty or being convicted of a violation of state or federal statutes relating to fraud, theft, embezzlement, breach of fiduciary responsibility, or other financial misconduct relating to the delivery of a health-care item or service or relating to any act or omission in a program operated or financed by any federal, state, or local government agency;
  - e) Being convicted in connection with the interference with or obstruction of any investigation into any criminal offense that would support mandatory exclusion under 1 TAC §371.1705 of this subchapter or any offense listed within paragraph (3) of this subsection regarding program-related convictions; *and*
  - f) Being convicted of any offense that would support mandatory exclusion under 1 TAC §371.1705 of this subchapter.
- 4) Provider Eligibility.
- a) Failing to meet standards required for licensure, when such licensure is required by state or federal law, administrative rule, provider agreement, or provider manual for participation in the Texas Medicaid or other HHS program;
  - b) Being excluded, suspended or otherwise sanctioned within any federal program involving the provision of health care;
  - c) Being excluded, suspended or otherwise sanctioned under any state health-care program for reasons bearing on the person's professional competence, professional performance or financial integrity;
  - d) Failing to fully and/or correctly complete a Provider Enrollment Agreement, Provider Re-enrollment Agreement or other enrollment form prescribed by the relevant operating agency or its agent for enrollment; *and*
  - e) Loss or forfeiture of corporate charter.
- 5) Program Compliance.
- a) Failing to comply with the terms of the Texas Medicaid or other HHS program contract or provider agreement, assignment agreement, the provider certification on the Texas Medicaid or other HHS program claim form, or rules or regulations published by the Commission or a Medicaid or other HHS operating agency;
  - b) Violating any provision of the Human Resources Code, Chapter 32 or 36, or any rule or regulation issued under the Code;

- c) Submitting a false statement or misrepresentation or omitting pertinent facts on any application or any documents requested as a prerequisite for the Texas Medicaid or other HHS program participation;
- d) Refusing to execute or comply with a provider agreement or amendments when requested;
- e) Failing to correct deficiencies in provider operations after receiving written notice of them from an operating agency, the commission or their authorized agents;
- f) Failing to abide by applicable federal and state law regarding handicapped individuals or civil rights;
- g) Failing to comply with the Texas Medicaid or other HHS program policies, published Texas Medicaid or other HHS program bulletins, policy notification letters, provider policy or procedure manuals, contracts, statutes, rules, regulations, or interpretation previously sent to the provider by an operating agency or the commission regarding any of the authorities listed above, including statutes or standards governing occupations;
- h) Failing to fully and accurately make any disclosure required by the Social Security Act, §1124 or §1126;
- i) Failing to disclose information about the ownership of a subcontractor with whom the person has had business transactions in an amount exceeding \$25,000 during the previous 12 months or about any significant business transactions (as defined by HHS) with any wholly-owned supplier or subcontractor during the previous five years;
- j) Failing, as a hospital, to comply substantially with a corrective action required under the Social Security Act, §1886(f)(2)(B);
- k) Failing to repay or make arrangements that are satisfactory to the commission to repay identified overpayments or other erroneous payments or assessments identified by the commission or any Texas Medicaid or other HHS program operating agency;
- l) Committing an act described as grounds for exclusion in the Social Security Act, §1128A (civil monetary penalties for false claims) or §1128B (criminal liability for health care violations);
- m) Defaulting on repayments of scholarship obligations or items relating to health profession education made or secured, in whole or in part, by HHS or the state when they have taken all reasonable steps available to them to secure repayment;
- n) Soliciting or causing to be solicited, through offers of transportation or otherwise, Texas Medicaid or other HHS program recipients for the purpose of delivering to those recipients health-care items or services;
- o) Marketing, supplying or selling confidential information (e.g., recipient names and other recipient information) for a use that is not expressly authorized by the Texas Medicaid or other HHS program; *and*
- p) Failing to abide by applicable statutes and standards governing providers.

**Important:** *Providers must comply with their applicable licensing agency's laws and regulations, including any related to marketing and advertising, and any applicable state and federal laws and regulations, contractual requirements, and other guidance documents. Providers are encouraged to review the "Provider Marketing Guidelines," which are available on the HHS website at [www.hhs.texas.gov/services/health/medicaid-chip/provider-information/texas-medicaid-chip-communications-resources](http://www.hhs.texas.gov/services/health/medicaid-chip/provider-information/texas-medicaid-chip-communications-resources).*

- 6) Delivery of Health-Care Services.
  - a) Failing to provide health-care services or items to Texas Medicaid or other HHS program recipients in accordance with accepted medical community standards or standards required by statute, regulation, or contract, including statutes and standards that govern occupations;
  - b) Furnishing or ordering health-care services or items for a recipient-patient under Title XVIII or a state health-care program that substantially exceed the recipient's needs, are not medically necessary, are not provided economically or are of a quality that fails to meet professionally recognized standards of health care; *and*
  - c) Engaging in any negligent practice that results in death, injury, or substantial probability of death or injury to the provider's patients.
- 7) Improper Collection and Misuse of Funds.
  - a) Charging recipients for services when payment for the services was recouped by the Texas Medicaid or another HHS program for any reason;
  - b) Misapplying, misusing, embezzling, failing to promptly release upon a valid request, or failing to keep detailed receipts of expenditures relating to any funds or other property in trust for a Texas Medicaid or other HHS program recipient;
  - c) Failing to notify and reimburse the relevant operating agency or the commission or their agents for services paid by the Texas Medicaid or other HHS programs if the provider also receives reimbursement from a liable third party;
  - d) Rebating or accepting a fee or a part of a fee or charge for a Texas Medicaid or other HHS program patient referral;
  - e) Requesting from a recipient in payment for services or items delivered within the Texas Medicaid or other HHS program any amount that exceeds the amount the Texas Medicaid or other HHS program paid for such services or items, with the exception of any cost-sharing authorized by the program; *and*
  - f) Requesting from a third party liable for payment of the services or items provided to a recipient under the Texas Medicaid or other HHS program, any payment other than as authorized at 42 CFR §447.20.
- 8) Licensure Actions.
  - a) Having a voluntary or involuntary action taken by a licensing or certification agency or board that requires the provider or employee to comply with professional practice requirements of the board after the board receives evidence of noncompliance with licensing or certification requirements; *and*
  - b) Having its license to provide health care revoked, suspended, or probated by any state licensing or certification authority, or losing a license or certification, because of action based on assessment of the person's professional competence, professional performance, or financial integrity, non-compliance with Health and Safety Code, statutes governing occupations, or surrendering a license or certification while a formal disciplinary proceeding is pending before licensing or certification authorities when the proceeding concerns the person's professional competence, professional performance, or financial integrity.
- 9) MCOs and Persons Providing Services or Items Through Managed Care.

**Note:** *This paragraph includes those program violations that are unique to managed care; paragraphs (1) through (8) and (11) of this section also apply to managed care.*

- a) Failing, as an MCO, or an association, group or individual health-care provider furnishing services through an MCO, to provide to recipient enrollee a health-care benefit, service or item that the organization is required to provide under its contract with an operating agency;
  - b) Failing, as an MCO or an association, group or individual health-care provider furnishing services through an MCO, to provide to an individual a health-care benefit, service or item that the organization is required to provide by state or federal law, regulation or program rule;
  - c) Engaging, as an MCO, in actions that indicate a pattern of wrongful denial or payment for a health-care benefit, service or item that the organization is required to provide under its contract with an operating agency;
  - d) Engaging, as an MCO, in actions that indicate a pattern of wrongful delay of at least 45 days or a longer period specified in the contract with an operating agency, not to exceed 60 days, in making payment for a health-care benefit, service or item that the organization is required to provide under its contract with an operating agency;
  - e) Engaging, as an MCO or an association, group or individual health-care provider furnishing services through managed care, in a fraudulent activity in connection with the enrollment in the organization's managed care plan of an individual eligible for medical assistance or in connection with marketing the organization's services to an individual eligible for medical assistance;
  - f) Discriminating against enrollees or prospective enrollees on any basis, including, without limitation, age, gender, ethnic origin or health status;
  - g) Failing, as an MCO, to comply with any term within a contract with a Texas Medicaid or other HHS program operating agency to provide healthcare services to Texas Medicaid or HHS program recipients; and
  - h) Failing, as an MCO, reasonably to provide to the relevant operating agency, upon its written request, encounter data and/or other data contractually required to document the services and items delivered by or through the MCO to Texas Medicaid or other HHS program recipients.
- 10) Cost-Report Violations.
- a) Reporting noncovered or nonchargeable services as covered items; e.g., incorrectly apportioning or allocating costs on cost reports; including costs of noncovered services, supplies or equipment in allowable costs; arrangements between providers and employees, related parties, independent contractors, suppliers, and others that appear to be designed primarily to overstate the costs to the program through various devices (such as commissions or fee splitting) to siphon-off or conceal illegal profits;
  - b) Reporting costs not incurred or which were attributable to nonprogram activities, other enterprises or personal expenses;
  - c) Including unallowable cost items on a cost report;
  - d) Manipulating or falsifying statistics that result in overstatement of costs or avoidance of recoupment, such as incorrectly reporting square footage, hours worked, revenues received, or units of service delivered;
  - e) Claiming bad debts without first genuinely attempting to collect payment;
  - f) Depreciating assets that have been fully depreciated or sold or using an incorrect basis for depreciation; *and*
  - g) Reporting costs above the cost to the related party.

## 11) Kickbacks and Referrals.

- a) Violating any of the provisions specified in 1 TAC §371.1655 (30) of this subchapter relating to kickbacks, bribes, rebates, referrals, inducements, or solicitation;
- b) As a physician, referring a Texas Medicaid or other HHS program patient to an entity with which the physician has a financial relationship for the furnishing of designated health services, payment for which would be denied under Title XVIII (Medicare) pursuant to §1877 and §1903(s) of the Social Security Act (Stark I and II). Neither federal financial participation nor this state's expenditures for medical assistance under the state Medicaid plan may be used to pay for services or items delivered within the program and within a relationship that violates Stark I or II. The Commission hereby references and incorporates within these rules the federal regulations promulgated pursuant to Stark I and II, and expressly recognizes all exceptions to the prohibitions on referrals established within those rules;
- c) Failing to disclose documentation of financial relationships necessary to establish compliance with Stark I and II, as set forth in subparagraph (b) of this paragraph; *and*
- d) Offering to pay or agreeing to accept, directly or indirectly, overtly or covertly any remuneration in cash or in kind to or from another for securing or soliciting a patient or patronage for or from a person licensed, certified, or registered or enrolled as a provider or otherwise by a state health-care regulatory or health and human service agency.

Involvement in any of these practices may result in provider exclusion or suspension from Texas Medicaid. Providers are notified in writing of any actions taken as well as procedures for appeal and reinstatement. The written notification will specify the date on which Medicaid program participation may resume. The reinstated person may then apply for a contract or provider agreement.

Providers and individuals who have been excluded from Texas Medicaid may be reinstated only by HHSC-OIG. If HHSC-OIG approves an individual's request for reinstatement, a written notice will be sent to that individual. The provider must first be reinstated into Medicaid and receive written notification specifying the date on which Medicaid program participation may resume. Once the provider has been reinstated into Medicaid, the provider may then apply for a contract or provider agreement.

Full investigation of criminal Medicaid fraud is the MFCU's responsibility and may result in a felony or misdemeanor criminal conviction.

### 1.10.1 Reporting Fraud, Waste, and Abuse

Anyone with knowledge about suspected Medicaid fraud, waste, and abuse of provider services must report the information to the HHSC-OIG. To report fraud, waste, and abuse, visit <https://oig.hhs.texas.gov/report-fraud-waste-or-abuse> and select **IG's Fraud Reporting Form**. Fraud, waste, and abuse may also be reported by calling the OIG hotline at 1-800-436-6184. All reports of fraud, waste, and abuse received through either channel remain confidential.

HHSC-OIG encourages providers to voluntarily investigate and report fraud, waste, abuse, or inappropriate payments of Medicaid funds in their own office. Providers are required to report these activities to HHSC-OIG when identified. HHSC-OIG will work collaboratively with self-reporting providers. More information about provider self-reporting is available on the OIG website at <https://oig.hhs.texas.gov/resources/information-providers>.

### 1.10.2 Suspected Cases of Provider Fraud, Waste, and Abuse

HHSC-OIG is responsible for minimizing fraud, waste, and abuse by Medicaid providers. HHSC-OIG has established and continues to refine criteria for identifying cases of possible fraud, waste, and abuse and recouping provider overpayments. When HHSC-OIG identifies fraud, waste, and abuse, a case may be referred to the MFCU or Antitrust and Civil Medicaid Fraud Section, or result in administrative enforcement.

### 1.10.3 Employee Education on False Claims Recovery

Title 42 United States Code (U.S.C.) §1396a(a)(68) requires any entity that receives or makes annual Medicaid payments of at least \$5,000,000 to establish written policies that provide detailed information about each employee's role in preventing and detecting waste, fraud, and abuse in federal health-care programs. These written policies, which must apply to all employees of the entity (including management) and the employees of any contractor or agent of the entity, must address:

- The federal False Claims Act (31 U.S.C. §§ 3729-3733).
- Administrative remedies for false claims and statements as provided in 31 U.S.C. §3802.
- Texas law relating to civil and criminal penalties for false claims (including Chapter 36 of the Human Resources Code; section 35A.02 of the Penal Code; Title 1, Chapter 371, Subchapter G of the TAC; and other applicable law).
- Whistleblower protections under the above laws (including section 36.115 of the Human Resources Code).

In addition, these written policies must include detailed provisions regarding the entity's policies and procedures for detecting and preventing fraud, waste, and abuse. The entity must also include a specific discussion of the following in all employee handbooks:

- The above laws
- The entity's policies and procedures for detecting and preventing fraud, waste, and abuse
- The rights of employees to be protected as whistleblowers

TMHP sends a yearly letter to each provider that receives over \$5,000,000 in Medicaid payments. This letter requires providers to verify that they have educated their staff on the False Claims Act. Failure to return this letter, signed by the provider, may result in an administrative hold on the provider's Texas Medicaid payments.

### 1.10.4 Managed Care Organization (MCO) Special Investigative Unit (SIU)

All MCOs that contract with HHSC to administer managed care benefits to Texas Medicaid clients are required to establish and maintain an SIU that works in cooperation with HHSC-OIG and the OAG.

**Referto:** Texas Government Code §540.0058, §544.0352, §544.0502, 1 TAC §353.501–353.505, and §370.501–370.505 for additional information.

The MCO and SIU will do the following:

- The MCO must maintain the SIU within the MCO or contract with another entity for any investigation.
- The established SIU will identify and investigate cases of suspected fraud, waste, and abuse in Texas Medicaid in accordance with Title 1, Chapter 353, Subchapter F of the TAC.
- The MCO and SIU (as applicable) must submit the following:
  - An annual plan that has been adopted by the MCO and approved by HHSC-OIG describing how it will prevent and reduce fraud and abuse in accordance with 1 TAC, §§353.501 and 353.502.
  - A monthly open case list to OIG Medicaid Program Integrity and the MFCU.

The MCO will refer a case to both HHSC-OIG and MFCU in the following situations:

- When fraud, waste, and abuse is discovered in the Medicaid or CHIP programs. (The MCO SIU must immediately notify the HHSC-OIG and MFCU and begin payment recovery efforts, unless HHSC-OIG or MFCU notifies the MCO to stop the recovery effort, as provided in Texas Government Code §544.0502.)

- When possible fraud, waste, and abuse is discovered in the Medicaid or CHIP programs. (The MCO SIU must refer the alleged fraud or abuse to HHSC-OIG within 30 working days of completing a review. The SIU report and referral must completely and accurately detail its findings in accordance with 1 TAC §353.502.)
- When there is reason to believe that a delay in the referral may result in:
  - Harm or death to patients
  - Loss, destruction, or alteration of valuable evidence
  - Significant monetary loss that may not be recoverable
  - Hindrance of an investigation or criminal prosecution of the offense

## 1.11 Texas Medicaid Limitations and Exclusions

Medicaid pays for services on behalf of clients to the provider of service according to Texas Medicaid's limitations and procedures. TMHP does not make Medicaid payments directly to clients.

The following services, supplies, procedures, and expenses are not benefits of Texas Medicaid. This list is *not* all inclusive.

- Autopsies
- Care and treatment related to any condition for which benefits are provided or available under Workers' Compensation laws
- Cellular therapy
- Chemolase injection (chymodiactin, chymopapain)
- Dentures or endosteal implants for adults
- Ergonovine provocation test
- Excise tax
- Fabric wrapping of abdominal aneurysms
- Hair analysis
- Heart–lung monitoring during surgery
- Histamine therapy–intravenous
- Hyperthermia
- Hysteroscopy for infertility
- Immunizations or vaccines unless they are otherwise covered by Texas Medicaid (These limitations do not apply to services provided through the THSteps Program.)
- Immunotherapy for malignant diseases
- Infertility
- Inpatient hospital services to a client in an institution for mental disease or a nursing section of public institutions for persons with intellectual disabilities
- Inpatient hospital tests that are not specifically ordered by a provider who is responsible for the diagnosis or treatment of the client's condition
- Intragastric balloon for obesity
- Joint sclerotherapy

- Keratoprosthesis/refractive keratoplasty
- Laetrile
- Mammoplasty for gynecomastia
- More than \$200,000 per client per benefit year (November 1 through October 31) for any health-care and remedial care services provided to a hospital inpatient by the hospital (If the \$200,000 amount is exceeded because of an admission for an approved organ transplant, the allowed amount for that claim is excluded from the computation. This limitation does not apply to clients eligible for CCP or clients with an organ transplant.)
- More than 30 days of inpatient hospital stay per spell of illness (Each spell of illness must be separated by 60 consecutive days during which the client has not been an inpatient in a hospital.)

**Important:** *CCP provides medically necessary, federally allowable treatment for Medicaid/THSteps clients who are 20 years of age and younger. Some health-care services that usually would not be covered under Medicaid may be available to CCP-eligible clients. An additional 30-day spell of illness begins with the date of specified covered organ transplant. No spell-of-illness limitation exists for Medicaid THSteps clients who are 20 years of age and younger.*

- Obsolete diagnostic tests
- Oral medications, except when claims are submitted by a hospital for services that are provided given in the emergency room or the inpatient setting (Hospital take-home drugs or medications given to the client are not a benefit.)

**Important:** *Outpatient prescription medications are covered through the Vendor Drug Program. Refer to Subsection 1.1, "About the Vendor Drug Program" in the Outpatient Drug Services Handbook (Vol. 2, Provider Handbooks) for more information.*

- Orthoptics (except CCP)
- Outpatient and nonemergency inpatient services provided by military hospitals
- Outpatient mental health services provided by a psychiatric assistant, psychological assistant (excluding Master's level LPA), or a licensed chemical dependency counselor
- Oxygen (except CCP and home health)
- Parenting skills
- Payment for eyeglass materials or supplies regardless of cost if they do not meet Texas Medicaid specifications
- Payment to physicians for supplies (All supplies, including anesthetizing agents such as *Xylocaine*, inhalants, surgical trays, or dressings, are included in the surgical payment.)
- Podiatry, optometric, and hearing aid services in long term care facilities, unless ordered by the attending physician
- Prescription medications and surgical procedures used for the purposes of transitioning biological sex, including sex change operations, except when provided to individuals with a medically verifiable genetic disorder of sex development
- Private room facilities except when:
  - A critical or contagious illness exists that results in disturbance to other patients and is documented as such.
  - It is documented that no other rooms are available for an emergency admission.
  - The hospital only has private rooms.

- Procedures and services considered experimental or investigational

**Note:** *Routine patient care costs for individuals enrolled in qualifying clinical trials may be covered as medically necessary when those services are current Texas Medicaid benefits. Refer to subsection 1.12, “Routine Patient Care Costs for Individuals Enrolled in Qualifying Clinical Trials” in this section for further information.*

- Procedures and treatments as defined by Chapter 161, Section 161.702 of the Texas Health and Safety Code
- Procedures, services, supplies, treatments, and prescription medications prohibited by Texas state law
- Prosthetic and orthotic devices (except CCP)
- Prosthetic eye or facial quarter
- Psychiatric services:
  - Outpatient behavioral health services for which no prior authorization has been given

**Referto:** Section 4, “Outpatient Mental Health Services” in the *Behavioral Health and Case Management Services Handbook* (Vol. 2, *Provider Handbooks*).

- Quest test (infertility)
- Recreational therapy
- Review of old X-ray films
- Routine cardiovascular and pulmonary function monitoring during the course of a surgical procedure under anesthesia
- Separate fees for completing or filing a Medicaid claim form (The cost of claims filing is to be incorporated in the provider’s usual and customary charges to all clients.)
- Services and supplies to any resident or inmate in a public institution
- Services or supplies for which benefits are available under any other contract, policy, or insurance, or which would have been available in the absence of Texas Medicaid
- Services or supplies for which claims were not received within the filing deadline
- Services or supplies that are not reasonable and necessary for diagnosis or treatment
- Services or supplies that are not specifically provided by Texas Medicaid
- Services or supplies provided in connection with cosmetic surgery except:
  - As required for the prompt repair of accidental injury
  - For improvement of the functioning of a malformed body member
  - When prior authorized for specific purposes by TMHP (including removal of keloid scars)
- Services or supplies provided outside of the U.S., except for deductible or coinsurance portions of Medicare benefits as provided for in this manual
- Services or supplies provided to a client after a finding has been made under utilization review procedures that these services or supplies are not medically necessary
- Services or supplies provided to a Texas Medicaid client before the effective date of his or her designation as a client, or after the effective date of his or her denial of eligibility
- Services that are payable by any health, accident, other insurance coverage, or any private or other governmental benefit system, or any legally liable third party

- Services that are provided by an interpreter (except sign language interpreting services requested by a physician)
- Services that are provided by ineligible, suspended, or excluded providers
- Services that are provided by the client's immediate relative or household member
- Services that are provided by Veterans Administration facilities or U.S. Public Health Service Hospitals
- Sex change operations
- Silicone injections
- Social and educational counseling except for certain health and disability related and counseling services
- Sterilization reversal
- Sterilizations (including vasectomies) unless the client has given informed consent 30 days before surgery, is mentally competent, and is 21 years of age or older at the time of consent (This policy complies with 42 CFR §441.250, Subpart F.)
- Take-home and self-administered drugs except as provided under the Vendor Drug Program or family planning pharmacy services or for clients being treated for a substance use disorder
- Tattooing (commercial or decorative only)
- Telephone calls with clients or pharmacies (except as allowed for case management)
- Thermogram
- Treatment of flatfoot conditions for solely cosmetic purposes, the prescription of supportive devices (including special shoes), and the treatment of subluxations of the foot

Refer to the applicable handbooks in Volume 2 of this manual for additional information.

## **1.12 Routine Patient Care Costs for Individuals Enrolled in Qualifying Clinical Trials**

Medicaid may cover medically necessary services for individuals enrolled in a qualifying clinical trial. Routine patient costs include:

- Items or services provided during a clinical trial that would be covered otherwise, including administration charges associated with the investigational item or service. Examples include physician services, medical imaging or laboratory services to monitor, treat, prevent, or diagnose complications that arise during participation in the clinical trial when they would otherwise be covered outside of participation in the qualifying clinical trial.
- Items or services must be billed by an enrolled Texas Medicaid provider.

Services that are not covered benefits of Texas Medicaid include:

- Investigational items or services that are the subject of the qualifying clinical trial and services that would not be covered outside of the trial.
- Items or services delivered to satisfy data reporting for the study.
- Items or services that would be covered outside of the clinical trial but are already a service or benefit covered within the clinical trial.
- Items or services that are not approved by the state plan.

Providers should use the “Medicaid Attestation Form on the Appropriateness of the Qualified Clinical Trial Form” and maintain it as part of the patient’s medical record. Providers must make the form available upon request. Providers are not required to submit this form with the claim.

**Note:** *The Medicaid Attestation Form on the Appropriateness of the Qualified Clinic Trial Form can be found in the Coverage of Routine Patient Cost in Qualifying Clinical Trials - Consolidated Appropriations Act section of the [Medicaid SPA Processing Tools for States website](#).*

Providers must check eligibility and coverage prior to billing. Providers can obtain coverage and fee information using the Online Fee Lookup (OFL) functionality on the TMHP website.

**Referto:** Subsection 4.1.10, “Eligibility Verification” in “Section 4: Client Eligibility” (Vol. 1, General Information) for ways to verify client eligibility.

“Section 5: Fee-for-Service Prior Authorizations” (Vol. 1, General Information) for general information about prior authorization.

**Note:** *Providers can obtain client eligibility information for a client who is enrolled in a Medicaid managed care organization (MCO) from the MCO’s web page. Providers can also check the MCO’s web page for submission of electronic claims, prior authorization requests, claim appeals and reconsiderations, exchange of clinical data, and other documentation necessary for prior authorization and claim processing.*

## 2.1 Payment Information

Texas Medicaid reimbursements are available to all enrolled providers by check or electronic funds transfer (EFT).

**Referto:** Subsection 1.2, “Payment Information” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

## 2.2 Fee-for-Service Reimbursement Methodology

Texas Medicaid reimburses providers using several different reimbursement methodologies, including fee schedules, reasonable cost with interim rates, hospital reimbursement methodology, provider-specific encounter rates, reasonable charge payment methodology, and manual pricing. Each Texas Medicaid service describes the appropriate reimbursement for each service area.

**Note:** *If a client is covered by a Medicaid managed care organizations (MCO) or dental plan, providers must contact the client’s MCO or dental plan for reimbursement information. The MCOs and dental plans are not required to follow the Texas Medicaid fee schedules, so there may be some differences in reimbursement based on decisions made by the individual health and dental plans.*

### 2.2.1 Online Fee Lookup (OFL) and Static Fee Schedules

Texas Medicaid reimburses certain providers based on rates published in the OFL and static fee schedules. These rates are uniform statewide and by provider type. According to this type of reimbursement methodology, the provider is paid the lower of the billed charges or the Medicaid rate published in the applicable static fee schedule or OFL.

Providers can obtain fee information using the OFL functionality on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

The online OFL can be used to:

- Retrieve real-time fee information.
- Search for procedure code reimbursement rates individually, in a list, or in a range.
- Search and review contracted rates for a specific provider (provider must login).
- Retrieve up to 24 months of history for a procedure code by searching for specific dates of service within that 2-year period.
- Search for benefit limitations for dental and durable medical equipment (DME) procedure codes.

Providers can obtain the static fee schedules as *Microsoft Excel®* spreadsheets or portable document format (PDF) files from the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Type of service (TOS) codes payable for each procedure code are available on the OFL and the static fee schedules.

The following provider types and services are reimbursed based on rates published with the rates calculated in accordance with the referenced reimbursement methodology as published in the Texas Administrative Code (TAC), Part 1 Administration, Part 15 Texas Health and Human Services Commission (HHSC), and Chapter 355 Reimbursement Rates.

- *Ambulance.* The Medicaid rates for ambulance services are calculated in accordance with 1 TAC §355.8600.
- *Ambulatory Surgical Center (ASC).* The Medicaid rates for ASCs are calculated in accordance with 1 TAC §355.8121.
- *Case Management for Children and Pregnant Women.* The Medicaid rates for this service are calculated in accordance with 1 TAC §355.8401.

- *Targeted Case Management for Early Childhood Intervention (ECI)*. The Medicaid rate for this service is reimbursed in accordance with 1 TAC §§355.8421.
- *Specialized Skills Training for ECI*. The Medicaid rate for this service is reimbursed in accordance with 1 TAC § 355.8422
- *Certified Nurse-Midwife (CNM)*. The Medicaid rates for CNMs are calculated in accordance with 1 TAC §355.8161.
- *Certified Registered Nurse Anesthetist (CRNA)*. According to 1 TAC §355.8221, the Medicaid rate for CRNAs is 92 percent of the rate reimbursed to a physician anesthesiologist for the same service.
- *Certified Respiratory Care Practitioner (CRCP) Services*. The Medicaid rate per daily visit for 99503 is calculated in accordance with 1 TAC §355.8089.
- *Chemical Dependency Treatment Facility (CDTF)*. The Medicaid rates for CDTF services are calculated in accordance with 1 TAC §355.8241.
- *Chiropractic Services*. The Medicaid rates for chiropractic services are calculated in accordance with 1 TAC §355.8085.
- *Dental*. The Medicaid rates for dentists are calculated as access-based fees in accordance with 1 TAC §355.8085, 1 TAC §355.8441(11), and 1 TAC §355.455(b).
- *Durable Medical Equipment, Prostheses, Orthoses and Supplies (DMEPOS)*. DMEPOS items provided by home health agencies and providers/suppliers of DMEPOS are reimbursed in accordance with 1 TAC §355.8023. DMEPOS items provided by the Comprehensive Care Program (CCP) are reimbursed in the same manner, in accordance with 1 TAC §355.8441.
- *Family Planning Services*. The Medicaid rates for family planning services are calculated in accordance with 1 TAC §355.8581.
- *Genetic Services*. The procedure codes and Medicaid rates for genetic services are listed in the OFL or the Physician - Genetics fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).
- *Hearing Aid and Audiometric Evaluations*. Hearing screening services for newborns are provided at the birthing facility before discharge and reimbursed in accordance with the reimbursement methodology for the specific type of birthing facility. Outpatient hearing screening and diagnostic testing services for children are provided by physicians and are reimbursed in accordance with the reimbursement methodology for physician services at 1 TAC §355.8085, 1 TAC §355.8141, and 1 TAC §355.8441.
- *Texas Medicaid (Title XIX) Home Health Services*. The reimbursement methodology for home health nursing and aide services delivered by home health agencies are statewide visit rates calculated in accordance with 1 TAC §355.8021.
- *Independent Laboratory*. The Medicaid rates for independent laboratories are calculated in accordance with 1 TAC §355.8610, and the Deficit Reduction Act (DEFRA) of 1984. By federal law, Medicaid payments for a clinical laboratory service cannot exceed the Medicare payment for that service. Early Periodic Screening, Diagnosis, and Treatment (EPSDT)/Texas Health Steps medical and newborn screening laboratory services provided by the Department of State Health Services (DSHS) Laboratory are reimbursed based on the Medicare payment for that service.
- *Indian Health Services*. The reimbursement methodology for services provided in Indian Health Services Facilities operating under the authority of Public Law 93-638 is located at 1 TAC §355.8620.
- *In-Home Total Parenteral Nutrition (TPN) Supplier*. The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8087.

- *Licensed Clinical Social Worker (LCSW)*. According to 1 TAC §355.8091, the Medicaid rate for LCSWs is 70 percent of the rate paid to a psychiatrist or psychologist for a similar service per 1 TAC §355.8085.
- *Licensed Marriage and Family Therapist (LMFT)*. According to 1 TAC §355.8091, the Medicaid rate for LMFTs is 70 percent of the rate paid to a psychiatrist or psychologist for a similar service per 1 TAC §355.8085.
- *Licensed Midwife (LM)*. According to 1 TAC §355.8161, covered professional services provided by an LM and billed under the LM's own provider number are reimbursed the lesser of the LM's billed charges or 70 percent of the reimbursement for the same professional service paid to a physician (M.D. or D.O.).
- *Licensed Professional Counselor (LPC)*. According to 1 TAC §355.8091, the Medicaid rate for LPCs is 70 percent of the rate paid to a psychiatrist or psychologist for a similar service per 1 TAC §355.8085.
- *Maternity Service Clinic (MSC)*. The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8085.
- *Nurse Practitioner (NP) and Clinical Nurse Specialist (CNS)*. According to Title 1 TAC §355.8281, the Medicaid rate for NPs and CNSs is 92 percent of the rate paid to a physician (doctor of medicine [MD] or doctor of osteopathy [DO]) for the same service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections.
- *Physical (PT), Occupational (OT), and Speech (ST) Therapy Services*. Covered therapy services provided by home health agencies, comprehensive outpatient rehabilitation facilities or outpatient rehabilitation facilities, independent therapists (including Early Childhood Intervention) and physicians and other practitioners are reimbursed according to 1 TAC §355.8097.
- *Physical Therapists/Independent Practitioners*. The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8085.
- *Physician*. The Medicaid rates for physicians and other practitioners are calculated in accordance with 1 TAC §355.8085.
- *Physician Assistant (PA)*. According to 1 TAC §355.8093, the Medicaid rate for PAs is 92 percent of the rate paid to a physician (MD or DO) for the same service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections.
- *Psychologist*. The Medicaid rates for psychologists are calculated in accordance with 1 TAC §355.8085.
- *Radiological and Physiological Laboratory and Portable X-Ray Supplier*. The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8085.
- *Renal Dialysis Facility*. The Medicaid rates for these providers are composite rates based on calculations specified by the Centers for Medicare & Medicaid Services (CMS).
- *School Health and Related Services (SHARS)*. The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8443.
- *Texas Health Steps* reimburses by provider type in accordance with 1 TAC §355.8441. Approved providers enrolled in Texas Medicaid are reimbursed for THSteps services in the same manner as they are reimbursed for other Medicaid services. THSteps CCP reimburses for DME and expendable supplies in accordance with 1 TAC §355.8441(2).
- *Telemedicine, telehealth, and home telemonitoring services* are reimbursed in accordance with 1 TAC §355.7001.

- *Tuberculosis (TB) Clinics*. The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8085.
- *Vision Care (Optometrists, Opticians)*. The Medicaid rates for these providers are calculated in accordance with 1 TAC §355.8001 and §355.8085.

### **2.2.1.1 Non-emergent and Non-urgent Evaluation and Management (E/M) Emergency Department Visits**

Section 104 of the Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982 requires that Medicare and Medicaid limit reimbursement for those physician services furnished in outpatient hospital settings (e.g., clinics and emergency situations) that are ordinarily furnished in physician offices. The limit is 60 percent of the Medicaid rate for the non-emergency service furnished in physician offices.

Reimbursement for non-emergent and non-urgent services that are rendered by the facility during the emergency room visit will be limited to 125 percent of the adult, physician office visit fee for procedure code 99202. Reimbursement will not be reduced for those services that were rendered to address conditions that meet any of the following criteria:

- Problems of high-severity
- Problems that require urgent evaluation by a physician
- Problems that pose immediate and significant threats to physical or mental function
- Critically ill or critically injured

Non-emergent and non-urgent services that are rendered by rural hospitals will be reimbursed at 55 percent of the allowed rates.

Non-rural hospitals will receive a flat rate which is limited to 125 percent of the adult, physician office visit fee for procedure code 99202.

Diagnostic services, such as laboratory and radiology, will not be reduced by 40 percent.

**Referto:** Subsection 9.2.60.4.5, “Physician Services Provided in the Emergency Department” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information about non-emergent and non-urgent services rendered in the emergency department.

Subsection 4.2.2.1, “Emergency Department Payment Reductions” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for more information about non-emergent and non-urgent services rendered in the emergency department.

These procedures are designated with note code “1” in the current fee schedule or OFL on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

The following services are excluded from the 60-percent limitation:

- Services furnished in rural health clinics (RHCs)
- Surgical services that are covered ASC/hospital-based ambulatory surgical center (HASC) services
- Anesthesiology and radiology services
- Prenatal services when billed with modifier TH and the appropriate E/M procedure code to the highest level of specificity
- Emergency services provided in a hospital emergency room after the sudden onset of a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain), such that the absence of immediate medical attention could reasonably be expected to result in one of the following:
  - Serious jeopardy to the client’s health

- Serious impairment to bodily functions
- Serious dysfunction of any bodily organ or part

### 2.2.1.2 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission

According to the three-day and one-day payment window reimbursement guidelines, most professional and outpatient diagnostic and nondiagnostic services that are rendered within the designated timeframe of an inpatient hospital stay and are related to the inpatient hospital admission will not be reimbursed separately from the inpatient hospital stay if the services are rendered by the hospital or an entity that is wholly owned or operated by the hospital.

These reimbursement guidelines do not apply in the following circumstances:

- The professional services are rendered in the inpatient hospital setting.
- The hospital and the physician office or other entity are both owned by a third party, such as a health system.
- The hospital is not the sole or 100-percent owner of the entity.

**Referto:** Subsection 3.7.4.17, “Payment Window Reimbursement Guidelines” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for additional information about the payment window reimbursement guidelines.

### 2.2.1.3 Drugs and Biologicals

Physician-administered drugs and biologicals are reimbursed under Texas Medicaid as access-based fees under the physician fee schedule in accordance with 1 TAC §355.8085. Physicians and other practitioners are reimbursed for physician-administered drugs and biologicals at the lesser of their usual and customary or billed charges and the Medicaid fee established by the HHSC. The Medicaid fee is an estimate of the provider’s acquisition cost for the specific drug and biological. An invoice must be submitted when it is in the provider’s possession. Submission of an invoice will document that the provider is billing the lesser of the usual and customary charge or the access-based fee.

HHSC reserves the option to use other data sources to determine Medicaid fees for drugs and biologicals when AWP or ASP calculations are determined to be unreasonable or insufficient.

Prescriptions are covered under the Texas Vendor Drug Program (VDP). The reimbursement methodology for pharmacy services is located at 1 TAC §§355.8541–355.8551.

**Important:** *Outpatient prescription medications are covered through the Medicaid Vendor Drug Program. Refer to Subsection 1.1, “About the Vendor Drug Program” in the Outpatient Drug Services Handbook (Vol. 2, Provider Handbooks) for more information.*

### 2.2.2 Cost Reimbursement

Medicaid providers who are cost reimbursed are subject to cost reporting, cost reconciliation, and cost settlement processes, including time study requirements.

The following providers are cost reimbursed in accordance with the noted TAC rules:

- 1 TAC §355.743—Mental health (MH) case management
- 1 TAC §355.746—Mental retardation (MR) service coordination
- 1 TAC §355.781—MH rehabilitative services
- 1 TAC §355.8443—School Health and Related Services (SHARS)
- 1 TAC §355.8061—Outpatient Hospital Reimbursement
- 1 TAC §355.8056—State-Owned Teaching Hospital Reimbursement Methodology

### 2.2.3 Reasonable Cost and Interim Rates

Outpatient hospital services are reimbursed in accordance with 1 TAC §355.8061. The reimbursement methodology is based on reasonable costs, and providers are reimbursed at an interim rate based on the provider's most recent Medicaid cost report settlement. To determine the provider's payable amount, the interim rate is applied to the claim details allowed amount.

### 2.2.4 Hospitals

Inpatient and outpatient hospital services are reimbursed as follows:

- 1 TAC §355.8052—Inpatient Hospital Reimbursement
- 1 TAC §355.8056—State-Owned Teaching Hospital Reimbursement Methodology
- 1 TAC §355.8058—Inpatient Direct Graduate Medical Education (GME) Reimbursement
- 1 TAC §355.8060—Reimbursement Methodology for Freestanding Psychiatric Facilities
- 1 TAC §355.8061—Outpatient Hospital Reimbursement
- 1 TAC §355.8065—Disproportionate Share Hospital (DSH) Reimbursement Methodology
- 1 TAC §355.8066—Hospital-Specific Limit Methodology

### 2.2.5 Provider-Specific Visit Rates

Medicaid provider-specific prospective payment system (PPS) visit rates for RHCs are calculated in accordance with 1 TAC §355.8101, and those for federally qualified health centers (FQHCs) are calculated in accordance with 1 TAC §355.8261.

**Referto:** Section 4, “Federally Qualified Health Center (FQHC)” in the *Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks)*

Section 8, “Rural Health Clinic” in the *Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks)*.

### 2.2.6 Manual Pricing

When services or products do not have an established reimbursement amount, the detail or claim is manually reviewed to determine an appropriate reimbursement. The manual pricing methodology for DME and expendable supplies is included with the reimbursement methodology for these products. DME and medical supplies, other than nutritional products, that have no established fee are subject to manual pricing at the documented MSRP less 18 percent or the provider's documented invoice cost.

## 2.3 Reimbursement Reductions

Texas Medicaid implemented mandated rate reductions for certain services. The Online Fee Lookup (OFL) and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates/rate-changes](http://www.tmhp.com/resources/rate-and-code-updates/rate-changes).

## 2.4 Using Payouts to Satisfy Accounts Receivables Across Programs and Alternate Legacy Identifiers (IDs)

The TMHP accounts receivable process identifies funds that a provider owes to TMHP and subtracts these funds from payments to the provider. TMHP satisfies outstanding accounts receivables using all available funds from the providers' Medicaid payouts, as well as managed care payouts, until the accounts receivables have been recovered. Outstanding balances are recovered as follows:

- For outstanding fee-for-service accounts receivables, TMHP first recovers funds from any available *fee-for-service* payments. If there is still an accounts receivable balance for that week's financial cycle, TMHP recovers funds from any available *managed care* payments.

- For outstanding managed care accounts receivables, TMHP first recovers funds from any available *managed care* payments. If there is still an accounts receivable balance for that week's financial cycle, TMHP will recover funds from any available *fee-for-service* payments

### 1099 Reports

Providers receive one 1099 report for each legacy ID. The 1099 report has combined information for both fee-for-service and managed care programs.

### Paper Remittance and Status (R&S) Report

The summary page of the R&S report has combined information from the fee-for-service and managed care programs.

The Financial Transactions Sub-Owner Recoupment page has accounts receivable for both programs. A column on the page identifies the program (Medicaid [fee-for-service] or Managed Care) from which the funds were recouped.

The Financial Transactions Accounts Receivable page has the accounts receivable for both programs. A column identifies the program (Medicaid [fee-for-service] or Managed Care) from which the funds were recouped.

The Original Date in the Accounts Receivable section of the R&S Report reflects the date on which the accounts receivable first appeared on the R&S Report.

### ER&S Report

The Pending and Non-Pending ER&S Reports have combined information for both programs.

### 2.4.1 HHSC Recoupment of Accounts Receivables from Legacy Identifiers (IDs)

HHSC recoups the outstanding accounts receivable balances of all existing Medicaid and managed care legacy IDs from alternate legacy IDs that use the same Tax ID or National Provider Identifier (NPI).

If a Medicaid or managed care provider has a legacy ID that is no longer active or has been terminated and that legacy ID has an outstanding accounts receivable balance, the balance is recouped from future payments made to any and all legacy IDs that have the same Tax ID or NPI. Recoupments are reflected on future R&S Reports.

**Note:** *This process affects only managed care claims that are submitted to TMHP.*

**Referto:** Subsection 2.2.5, "Accounts Receivable" in the *Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks)* for additional information about managed care claims and outstanding accounts receivables.

Subsection 2.2.5, "Accounts Receivable" in the *Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks)* for additional information about managed care claims and outstanding accounts receivables.

### 2.4.2 Medicaid Funds May Be Used to Satisfy Children with Special Health Care Needs (CSHCN) Services Program Accounts Receivables

A service that is rendered to a CSHCN Services Program client who receives retroactive Medicaid eligibility may be reimbursed by the CSHCN Services Program or by Medicaid, but not by both.

The CSHCN Services Program is the payer of last resort. The CSHCN Services Program does not supplement a client's Medicaid benefits. However, services that are not a benefit of Medicaid may be covered by the CSHCN Services Program. If dual Medicaid and CSHCN Services Program eligibility is determined, claims that have already been paid by the CSHCN Services Program will be reprocessed under the appropriate program.

An accounts receivable is created for each CSHCN Services Program claim that is reprocessed and subsequently reimbursed under Medicaid so that the amount the CSHCN Services Program originally reimbursed can be returned to the CSHCN Services Program.

If the CSHCN Services Program payout during the week's financial cycle in which the claim was reprocessed is not sufficient to satisfy the accounts receivable, the provider's Medicaid claim payouts are used to satisfy the CSHCN Services Program accounts receivable.

**Note:** *The deduction from Medicaid claim payouts does not exceed the amount Medicaid reimbursed the provider when the CSHCN Services Program claim was reprocessed.*

## 2.5 Additional Payments to High-Volume Providers

High volume provider payments are made to outpatient hospitals per 1 TAC §355.8061 and ASCs/HASCs per 1 TAC §355.8121.

Outpatient hospital services are those services provided by outpatient hospitals and ASCs/HASCs. The definition of a high-volume outpatient hospital provider is one that was paid a minimum of \$200,000 during the qualifying period.

The reimbursement rate for non-high-volume hospitals is as follows with the application of the hospital specific interim rate:

| Non-High-Volume Provider       | Current Allowable Rate                 |
|--------------------------------|----------------------------------------|
| Children's hospitals           | 72.27 percent of the allowable charges |
| Rural hospitals                | 100 percent of the allowable charges   |
| State-owned teaching hospitals | 72.27 percent of the allowable charges |
| Other hospitals                | 68.44 percent of the allowable charges |

The reimbursement rate for high-volume hospitals is as follows with the application of the hospital specific interim rate:

| High-Volume Provider                             | Current Allowable Rate                           |
|--------------------------------------------------|--------------------------------------------------|
| Children's hospitals                             | 76.03 percent of the allowable charges           |
| Rural hospitals                                  | 100 percent of the allowable charges             |
| State-owned teaching hospitals                   | 76.03 percent of the allowable charges           |
| Other hospitals                                  | 72 percent of the allowable charges              |
| ASCs/HASCs that qualify as high-volume providers | Additional 5.2 percent increase in payment rates |

## 2.6 Out-of-State Medicaid Providers

Texas Medicaid covers medical assistance services provided to eligible Texas Medicaid clients while in a state other than Texas, as long as the client does not leave Texas to receive out-of-state medical care that can be received in Texas. Services provided outside the state are covered to the same extent medical assistance is furnished and covered in Texas when the service meets one or more requirements of 1 TAC §354.1440 (a). TMHP must receive claims from out-of-state providers within 365 days from the date of service.

**Note:** *Border state providers (i.e., providers rendering services within 50 miles of the Texas border) are considered in-state providers for Texas Medicaid.*

**Referto:** Subsection 1.9, "Enrollment Criteria for Out-of-State Providers" in "Section 1: Provider Enrollment and Responsibilities" (Vol. 1, General Information).

## 2.7 Medicare Crossover Claim Reimbursement

### 2.7.1 Medicare-Only Crossover Claims

Per Title 42 Code of Federal Regulations (CFR) 455.410(d), Medicare-only providers can enroll in Texas Medicaid and submit Medicare crossover claims to HHSC for proof of Medicaid nonpayment in a Remittance and Status (R&S) Report. With this proof of nonpayment, Medicare-only providers may pursue Medicare reimbursement for these claims.

### 2.7.2 Part A

Providers must accept Medicare assignment to receive Medicaid payment for any portion of the coinsurance and deductible amounts for services rendered to Qualified Medicare Beneficiary (QMB) and Medicaid Qualified Medicare Beneficiary (MQMB) clients. If a provider has accepted a Medicare assignment, the provider may receive, on behalf of the QMB or MQMB client, payment for deductible or coinsurance according to current payment guidelines.

Any payments made by Medicare and Medicaid must be considered payment in full. Providers that accept Medicare or Medicaid assignment cannot legally require the client to pay the Medicare coinsurance or deductible amounts or any remaining amount after Medicaid payment has been made.

The payment of the Medicare Part A coinsurance and deductibles for Medicaid clients who are Medicare beneficiaries is based on the following:

- If the Medicare payment amount equals or exceeds the Medicaid payment rate, Medicaid does not pay the Medicare Part A coinsurance/deductible on a Medicare crossover claim.
- If the Medicare payment amount is less than the Medicaid payment rate, Medicaid pays the Medicare Part A coinsurance/deductible, but the amount of the payment is limited to the lesser of the coinsurance/deductible or the amount remaining after the Medicare payment amount is subtracted from the Medicaid payment rate.

### 2.7.3 Part B

Texas Medicaid reimburses coinsurance liability for MQMB clients on valid, assigned Medicare claims that are within the amount, duration, and scope of the Medicaid program and, if Medicare did not exist, would be covered by Medicaid.

For Medicare crossover claims, Texas Medicaid reimburses the lesser of the following:

- The coinsurance and deductible payment
- The amount remaining after the Medicare payment amount is subtracted from the allowed Medicaid fee or encounter rate for the service (If this amount is less than the deductible, then the full deductible is reimbursed instead.)

If the Medicare payment is equal to or exceeds the Medicaid allowed amount or encounter payment for the service, Texas Medicaid does not make a payment for coinsurance.

**Important:** *Medicaid payment of a client's coinsurance/deductible liabilities satisfies the Medicaid obligation to provide coverage for services that Medicaid would have paid in the absence of Medicare coverage. The client has no liability for any balance or Medicare coinsurance and deductible related to Medicaid-covered services.*

## 2.7.4 Part C: Medicare Advantage Plans (MAPs)

### 2.7.4.1 Contracted MAPs

HHSC makes a per-client-per-month payment to MAPs that contract with HHSC. The payment to the MAP includes all costs associated with the Medicare coinsurance and deductible for a client who is dually eligible for Medicare and Medicaid. TMHP does not reimburse the coinsurance or deductible amounts for these claims. These costs must be billed to the MAP and must not be billed to TMHP or the Medicaid client.

**Referto:** A list of MAPs that are contracted with HHSC is available on the TMHP website at [www.tmhp.com/topics/edi/map-contractors](http://www.tmhp.com/topics/edi/map-contractors). The list is updated as additional plans receive approved contracts.

### 2.7.4.2 Noncontracted MAPs

Texas Medicaid reimburses professional and outpatient facility crossover claims the lesser of the following:

- The coinsurance and deductible amounts
- The amount remaining after the Medicare payment amount is subtracted from the allowed Medicaid fee or encounter rate for the service

For Medicare Part B cost sharing obligations, all deductible obligations will be reimbursed at 100 percent of the deductible amount owed, even if the cost sharing comparison results in a lower payment. For all other cost sharing obligations (including Medicare Part A and Part B coinsurance, and C), the cost sharing comparison is performed according to current guidelines.

**Exception:** *Texas Medicaid will reimburse coinsurance liability for MQMB clients on valid, assigned Medicare claims that are within the amount, duration, and scope of the Medicaid program, and would be covered by Medicaid when the services are provided, if Medicare did not exist.*

If the Medicare payment is equal to or exceeds the allowed Medicaid fee or encounter rate for the service, Texas Medicaid will not make a payment for coinsurance and deductible.

**Important:** *Medicaid payment of a client's coinsurance/deductible liabilities satisfies the Medicaid obligation to provide coverage for services that Medicaid would have paid in the absence of Medicare coverage. The client has no liability for any balance or Medicare coinsurance and deductible related to Medicaid-covered services.*

## 2.7.5 Exceptions

### 2.7.5.1 Full Amount of Part B and Part C Coinsurance and Deductible Reimbursed

Texas Medicaid reimburses the full amount of the Medicare Part B and Part C (noncontracted MAPs only) coinsurance and deductible for the following services:

- All ambulance services
- Services rendered by psychiatrists, psychologists, licensed clinical social workers, licensed marriage and family therapists, and licensed professional counselors
- Procedure codes R0070 and R0075 for services rendered by physicians

### 2.7.5.2 Nephrology (Hemodialysis, Renal Dialysis) and Renal Dialysis Facility Providers

Texas Medicaid pays the Medicare coinsurance less 5 percent and full Medicare deductible for Medicare crossover claims that are submitted by nephrology (hemodialysis, renal dialysis) and renal dialysis facility providers.

## 2.8 Home Health Agency Reimbursement

Home health service claims should not be submitted for payment until Medicaid certification is received and a prior authorization number is assigned.

Home Health Agency providers should note the following:

- The client's primary physician must request professional, SN, and HHA services through a home health agency, and sign and date the POC.
- Claims are approved or denied according to eligibility, prior authorization status, and medical appropriateness.
- Claims must represent a numerical quantity of one-month for medical supplies according to the billing requirements.
- SN, HHA, OT, and PT services must be provided through a Medicaid-enrolled home health agency. These services must be billed using the home health agency's legacy ID. File these services on a UB-04 CMS-1450 claim form.
- OT and PT are always billed as POS 2 (home) and may be prior authorized to be provided in the home of the client or the home of the caregiver/guardian.

**Note:** *Medical social services and speech-language pathology services are available to clients who are 20 years of age and younger and are not a home health services benefit. These services may be considered a benefit for clients who qualify for CCP.*

Texas Medicaid does not reimburse separately for associated DME charges, including but not limited to battery disposal fees or state taxes. Reimbursement for any associated charges is included in the reimbursement for a specific piece of equipment.

**Referto:** Subsection 2.2, "Fee-for-Service Reimbursement Methodology" in this section.

### 2.8.1 Pending Agency Certification

Home health agencies submitting claims before the enrollment process is complete or without prior authorization for services issued by the TMHP Home Health Services Prior Authorization Department will not be reimbursed. The effective date of enrollment is when all Texas Medicaid provider enrollment forms are received and approved by TMHP.

Upon the receipt of notice of Texas Medicaid enrollment, the agency must contact the TMHP Home Health Services Prior Authorization Department before serving a Texas Medicaid client for services that require a prior authorization number. Prior authorization cannot be issued before Texas Medicaid enrollment is complete. Regular prior authorization procedures are followed at that time.

Home health agencies that provide laboratory services must comply with the rules and regulations of the Clinical Laboratory Improvement Amendments (CLIA). Providers who do not comply with CLIA will not be reimbursed for laboratory services.

**Referto:** Subsection 2.1.1, "Clinical Laboratory Improvement Amendments (CLIA)" in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

### 2.8.2 Prohibition of Medicaid Payment to Home Health Agencies Based on Ownership

Medicaid denies Home Health Services claims when TMHP records indicate that the physician ordering treatment has a significant ownership interest in, or a significant financial or contractual relationship with, the nongovernmental home health agency billing for the services. Federal regulation Title 42 CFR §424.22 (d) states that "a physician who has a significant financial or contractual relationship with, or a significant ownership in a nongovernmental home health agency may not certify or recertify the need for Home Health Services care services and may not establish or review a plan of treatment."

A physician is considered to have a significant ownership interest in a home health agency if either of the following conditions apply:

- The physician has a direct or indirect ownership of five percent or more in the capital, stock, or profits of the home health agency.
- The physician has an ownership of five percent or more of any mortgage, deed of trust, or other obligation that is secured by the agency, if that interest equals five percent or more of the agency's assets.

A physician is considered to have a significant financial or contractual relationship with a home health agency if any of the following conditions apply:

- The physician receives any compensation as an officer or director of the home health agency.
- The physician has indirect business transactions, such as contracts, agreements, purchase orders, or leases to obtain services, medical supplies, DME, space, and salaried employment with the home health agency.
- The physician has direct or indirect business transactions with the home health agency that, in any fiscal year, amount to more than \$25,000 or five percent of the agency's total operating expenses, whichever is less.

Providers must submit claims for CCP services and general home health services on two separate UB-04 CMS-1450 paper claim forms with the appropriate prior authorization number. Claims that are denied because of an ownership conflict will continue to be denied until the home health agency submits documentation that indicates that the ordering physician no longer has a significant ownership interest in, or a significant financial or contractual relationship with, the home health agency that is providing the services. Providers should send documentation to TMHP Provider Enrollment at the address indicated in "Appendix A: State, Federal, and TMHP Contact Information" (*Vol. 1, General Information*).

## **2.9 Federal Medical Assistance Percentage (FMAP)**

The Federal Medical Assistance Percentages (FMAPs) are used in determining the amount of Federal matching funds for State expenditures for assistance payments for certain social services and State medical and medical insurance expenditures. The Social Security Act requires the Secretary of Health and Human Services to calculate and publish the FMAPs each year.

The "Federal Medical Assistance Percentages" are for Medicaid. Section 1905(b) of the Act specifies the formula for calculating Federal Medical Assistance Percentages.

"Enhanced Federal Medical Assistance Percentages" are for the State Children's Health Insurance Program (SCHIP) under Title XXI of the Social Security Act. Section 2105(b) of the Act specifies the formula for calculating Enhanced Federal Medical Assistance Percentages. The FMAPs are subject to change.

## 3.1 TMHP EDI Overview

The Texas Health and Human Services Commission (HHSC) and the Texas Medicaid & Healthcare Partnership (TMHP) encourage providers to submit claims using electronic methods. Providers can participate in the most efficient and effective method of submitting requests to TMHP by submitting through the TMHP EDI Gateway. TMHP uses the Health Insurance Portability and Accountability Act (HIPAA)-compliant American National Standards Institute (ANSI) ASC X12 5010 file format through secure socket layer (SSL) and virtual private networking (VPN) connections for maximum security. Providers can access TMHP's electronic services through the TMHP website at [www.tmhp.com](http://www.tmhp.com), TexMedConnect, vendor software, and third party billing agents. Providers may also submit claims using paper forms.

### 3.1.1 Advantages of Electronic Services

- *It's fast.* No more waiting by the mailbox or telephone inquiries; know what's happening to claims in less than 24 hours and receive reimbursement for approved claims within a week. TexMedConnect users can submit individual requests interactively and receive a response immediately.
- *It's free.* All electronic services offered by TMHP are free, including TexMedConnect and its technical support and training.
- *It's easy.* TMHP offers computer-based training (CBT) for TexMedConnect, Medicaid billing, and many other topics, including those for the Children with Special Health Care Needs (CSHCN) Services Program, and Long Term Care, as well as a large library of reference materials and manuals on [www.tmhp.com](http://www.tmhp.com).
- *It's safe.* TMHP EDI services use VPN and SSL connections, just like the United States government, banks, and other financial institutions, for maximum security.
- *It's accurate.* TexMedConnect and most vendor software programs have features that let providers know when they've made a mistake, which means fewer rejected and denied claims. Rejected claims are returned with messages that explain what's wrong, so the claim can be corrected and resubmitted right away. Denied claims appear on the provider's Remittance and Status (R&S) Report along with paid and pending claims.
- *It's there when it's needed.* Electronic services are available day and night; from home, the office, or anywhere in the world.
- *It makes record keeping and research easy.* Not only can TexMedConnect be used to send and receive claims, it can check client eligibility, retrieve Electronic Remittance and Status (ER&S) Reports, perform claim status inquiries, and archive claims. TexMedConnect can generate and print reports on everything it sends, receives, and archives.

### 3.1.2 Electronic Services Available

- Eligibility verification
- Claims submission
- Claim status inquiry (CSI)
- ER&S Reports
- Appeals (also known as correction and resubmission)

### 3.1.3 Paper Remittance and Status (R&S) Reports No Longer Available

TMHP no longer produces or distributes paper R&S Reports. This initiative saves the state of Texas the cost of printing and mailing Paper R&S Reports.

All R&S Reports are now available online through the secure portion of the TMHP website at [www.tmhp.com](http://www.tmhp.com). Providers who receive an ER&S Report with third party software are not affected by this change.

Online R&S Reports are available as a portable document format (PDF) file every Monday morning—four days earlier than paper R&S Reports were available. Providers must have a provider administrator account on the TMHP website to receive R&S Reports. Providers who do not have a provider administrator account should create one to avoid delays or interruptions to business processes.

Providers can follow the instructions in the [TMHP Portal Security Training Guide](#) to setup a provider administrator account.

## **3.2 Electronic Billing**

Providers who want to transition from paper billing to electronic billing must decide how they will submit their claims to TMHP. Providers can use TexMedConnect on the TMHP website at [www.tmhp.com](http://www.tmhp.com), vendor software that submits files directly to TMHP, or they may use a third party billing agent (e.g., billing companies and clearinghouses) who submit files on the provider's behalf.

### **3.2.1 TexMedConnect**

TexMedConnect is a free, web-based, claims submission application provided by TMHP. Technical support and training for TexMedConnect are also available free from TMHP. Providers can submit claims, eligibility requests, claim status inquiries, appeals, and download ER&S Reports (in either PDF or ANSI 835 formats) using TexMedConnect. TexMedConnect can interactively submit individual claims that are processed in seconds. To use TexMedConnect, providers must have:

- An internet service provider (ISP)
- Microsoft® Edge®
- Google Chrome®
- Mozilla Firefox®

A broadband connection is recommended but not required. Providers that use TexMedConnect can find the online TexMedConnect manuals for Acute Care and Long Term Care on the TexMedConnect Info web page in the EDI section of the TMHP website at [www.tmhp.com/resources/texmedconnect](http://www.tmhp.com/resources/texmedconnect).

### **3.2.2 Vendor Software**

Providers that do not use TexMedConnect must use vendor software to create, submit, and retrieve data files. Providers can use software from any vendor listed on the EDI Vendor Testing List, which is located in the EDI section of the TMHP website at [www.tmhp.com](http://www.tmhp.com). There are hundreds of software vendors that have a wide assortment of services and that have been approved to submit electronic files to TMHP. Providers that plan to access TMHP's electronic services with vendor software should contact the vendor for details on software requirements. TMHP does not make vendor recommendations or provide any assistance for vendor software. Not all vendor software offers the same features or levels of support. Providers are encouraged to research their software thoroughly to make certain that it meets their needs and that it has completed testing and has been certified with TMHP.

### **3.2.3 Third Party Billing Agents**

Billing agents are companies or individuals who submit electronic files to TMHP on behalf of the provider. Generally, this means that the provider uses a product that sends billing or other information to the billing agent who processes it and transmits it to TMHP and other institutions. A complete list of billing agents who have completed the testing process and been certified by TMHP can be found on the EDI Vendor Testing List, which is located in the EDI section of the TMHP website at [www.tmhp.com](http://www.tmhp.com).

TMHP does not make billing agent recommendations or provide any assistance for billing agents' software or services. TMHP has no information on the software or other requirements of billing agents. Providers should contact the billing agent to obtain information about their products and processes.

### 3.3 Gaining Access

Providers must setup their software or billing agent services to access the TMHP EDI Gateway. Providers who use billing agents or software vendors should contact those organizations for information about installation, settings, maintenance, and their processes and procedures for exchanging electronic data.

Providers that download the ANSI 835 file through TexMedConnect and providers that use vendor software must request a submitter ID. A submitter ID is necessary for vendor software to access TMHP's electronic services. It serves as an electronic mailbox for the provider and TMHP to exchange data files. To order a submitter ID, providers must call the EDI Help Desk at 1-888-863-3638, Option 3. Providers that use a billing agent do not need a submitter ID.

Providers may receive an ER&S Report by completing the Electronic Remittance and Status (ER&S) Agreement and submitting it to the EDI Help Desk after setting up access to the TMHP EDI Gateway.

**Referto:** [Electronic Remittance Advice \(ERA\) Agreement](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

### 3.4 Training

Providers should contact the TMHP Contact Center at 1-800-925-9126 for billing and training questions. Information about training opportunities is available in the [Provider Education section](#) of the TMHP website at [www.tmhp.com](http://www.tmhp.com). Providers may also use the many reference materials and workbooks available on the website. The TMHP EDI Help Desk provides technical assistance and does not provide training.

### 3.5 Electronic Transmission Reports

Providers are required to retain all claim and electronic file transmission records. Providers must verify that all claims submitted to TMHP are received and accepted. Providers must also track claims submissions against their claims payments to detect and correct all claim errors.

**Referto:** Subsection 1.7.4, "Retention of Records and Access to Records and Premises" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*) for more information about provider responsibility and electronic submissions.

If an electronic file transmission record is missing, providers can request that the transmission report file be reset by contacting the TMHP EDI Help Desk at 1-888-863-3638, Option 3. The TMHP EDI Help Desk will then reset the files for the production submitter ID provided. Requests for transmission reports produced in the previous 30 days will be provided at no cost to providers. Requests for transmission reports produced more than 30 days before the request will result in a charge of \$500 plus 8.25 percent sales tax of \$41.25 for a total charge of \$541.25. Providers that hold a tax-exempt certificate will not be assessed the sales tax. This cost is per transmission report.

### 3.6 Provider Check Amounts Available Online

Acute care providers can search, view, and print on the TMHP website at [www.tmhp.com](http://www.tmhp.com) all payment amounts issued during the previous year.

The features of the online check amount include:

- The ability to search information up to one year before the date of the search.
- All results are displayed on a single screen.

- All results can be printed on a single report.
- The 52 weeks of reimbursement payment information includes the:
  - Payment date
  - Payee name
  - Payment amount
  - Program for which payment was issued
  - Hold amount
  - Payment status

Providers must have or must create an administrative account to view their payment amounts online. Providers can then grant “View Payment Amounts” security permission to the office staff of their choice. Providers can access their check amounts by logging into their accounts from the TMHP website and then pressing **View Payment Amounts**.

Provider check amounts are also available through the automated inquiry system (AIS) telephone line and ER&S Reports.

### 3.7 Third Party Vendor Implementation

TMHP requires all software vendors and billing agents to complete EDI testing before access to the production server is allowed. Vendors that wish to begin testing may either call the EDI Help Desk at 1-888-863-3638, Option 3, or visit the Edifecs testing site at [editesting.tmhp.com](https://editesting.tmhp.com) and use the *TMHP Support* link. An Edifecs account will be created for the vendor to begin testing EDI formats once they have enrolled for testing. After the successful completion of Edifecs testing and the submission of a Trading Partner Agreement, vendors must then complete end-to-end testing on the TMHP test server. Software vendors and billing agents must be partnered with at least one Texas provider before a test submitter ID can be issued. When end-to-end testing has been completed, the software vendor or billing agent will be added to the EDI Submitter List. Providers and billing agents may then order production submitter IDs for use with the vendor’s software. Companion guides and vendor specifications are available on the EDI page of the TMHP website at [www.tmhp.com](https://www.tmhp.com).

#### 3.7.1 Automated Maintenance Process for All Electronic Submitters

All submitter folders have a maximum limit of 7500 files, and no files can be more than 30 days old. Files that exceed these limits will be purged by TMHP on a daily basis. Providers should review, retrieve, and backup their electronic response files within 30 days. Files not retrieved within the 30-day time period or files that exceed a maximum file count of 7500 will be purged by TMHP. All electronic submitters are responsible for the maintenance of their submitter folders. Files that are submitted using EDI version 5010 are limited to a maximum of 5,000 transactions per file. Files that have more than 5,000 transactions will be rejected.

Requests for transmission reports produced after the 30-day period, or resulting from a purge of over 7500 files will require fees, as outlined in Subsection 3.5, “Electronic Transmission Reports” in this section.

3.7.2 Supported File Types

TMHP EDI supports the following electronic HIPAA-compliant ANSI ASC X12 5010 transaction types:

| Electronic Transaction Types |                               |
|------------------------------|-------------------------------|
| 270                          | Eligibility request           |
| 271                          | Eligibility response          |
| 276                          | Claim status inquiry          |
| 277                          | Claim status inquiry response |
| 835                          | ER&S Report                   |
| 837D                         | Dental claims                 |
| 837I                         | Institutional claims          |
| 837P                         | Professional claims           |

**Note:** Dental providers who submit American National Standards Institute, Accredited Standards Committee X12 (ANSI ASC X12N) 837D transactions through the TMHP Electronic Data Interchange (EDI) are required to include the header date of service (HDOS) to comply with International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM) claims processing guidelines.

3.8 Forms

The following linked forms can also be found on the [Forms](#) page of the Provider section of the TMHP website at [www.tmhp.com](http://www.tmhp.com):

| Forms                                                        |

## 4.1 General Medicaid Eligibility

A person may be eligible for medical assistance through Medicaid if the following conditions are met:

- The applicant must be eligible for medical assistance at the time the service is provided. It is not mandatory that the process of determining eligibility be completed at the time service is provided; the client can receive retroactive eligibility. Services or supplies *cannot* be paid under Texas Medicaid if they are provided to a client before the effective date of eligibility for Medicaid or after the effective date of denial of eligibility. Having an application in process for Medicaid eligibility does *not* guarantee the applicant will be eligible.
- The service must be a benefit and determined medically necessary (except for preventive family planning, annual physical exams, and Texas Health Steps [THSteps] medical or dental checkup services) by Texas Medicaid and must be performed by an approved provider of the service.
- Applicants for medical assistance potentially are eligible for Medicaid coverage up to three calendar months before their application for assistance, if they have unpaid or reimbursable Medicaid-covered medical bills and have met all other eligibility criteria during the time the service was provided. The provision also includes deceased individuals when a bona fide agent requests application for services. An application for retroactive eligibility must be filed with the Health and Human Services Commission (HHSC); it is not granted automatically. The applicant must request the prior coverage from an HHSC representative and complete the section of the application about medical bills.

Clients who are not eligible for Medicaid but meet certain income guidelines may receive family planning services through other family planning funding sources. Clients not eligible for Medicaid are referred to a family planning provider. Clients seeking other services may be eligible for state health-care programs, some of which are described in this section.

**Referto:** HHSC website at [www.healthytexaswomen.org](http://www.healthytexaswomen.org) for information about family planning and the locations of family planning clinics that receive HHSC Family Planning Program funding.

### 4.1.1 Your Texas Benefits Medicaid Card

Clients receive a Your Texas Benefits Medicaid card that can be used to verify the client eligibility for various state-funded programs, including Medicaid.

The front of the card includes the client's name, member ID, the ID of the agency that issued the card, and the date on which the card was sent.

The back of the card provides:

- An eligibility verification contact number. The number can be used to determine:
  - Program eligibility dates.
  - Retroactive eligibility (when applicable).
  - Eligible services (when applicable).
  - Medicaid managed care eligibility.
- An eligibility website address for clients and non-pharmacy providers.
- A non-managed care pharmacy claims assistance contact number.
- The Medicaid Client Transfer Line at 1-800-252-8263.

Client TPR and other insurance information can also be verified using the benefit card.

**Referto:** Subsection 4.1.10, “Eligibility Verification” in this section for additional ways to verify client eligibility.

[Your Texas Benefits Medicaid card \(English and Spanish\)](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

#### **4.1.2 Retroactive Eligibility**

Medicaid coverage may be assigned retroactively for a client. For claims for an individual who has been approved for Medicaid coverage but has not been assigned a Medicaid client number, the 95-day filing deadline does not begin until the date the notification of eligibility is received from HHSC and added to the TMHP eligibility file.

The date on which the client’s eligibility is added to the TMHP eligibility file is the add date. To ensure 95-day filing deadlines are met and to check current and retroactive client eligibility, providers can log in to My Account and use one of the following resources:

- The TMHP electronic data interchange (EDI)
- The Medicaid Client Portal for Providers

Additionally, providers can call the Automated Inquiry System (AIS) at 1-800-925-9126 to verify a client eligibility.

If a person is not eligible for medical services under Texas Medicaid on the date of service, reimbursement for all care and services provided must be resolved between the provider and the client receiving the services. Providers are not required to accept Medicaid for services provided during the client’s retroactive eligibility period and may continue to bill the client for those services. This guideline does not apply to nursing facilities certified by the Texas Health and Human Services Commission (HHSC).

If it is the provider’s practice not to accept Medicaid for services provided during the client’s retroactive eligibility period, the provider must apply the policy consistently for all clients who receive retroactive eligibility. Providers must inform the client about their policy before rendering services. If providers accept Medicaid assignment for the services provided during the client’s retroactive eligibility period and want to submit a claim for Medicaid-covered services, providers must refund payments received from the client before billing Medicaid for the services.

Examples of Medicaid identification forms are found at the end of this section. Actual Medicaid forms can be identified by a watermark.

**Referto:** [Your Texas Benefits Medicaid card \(English and Spanish\)](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

#### **4.1.3 Expedited Eligibility (Applies to Medicaid-eligible Pregnant Women Throughout the State)**

HHSC processes Medicaid applications for pregnant women within 15 business days of receipt. Once eligibility has been certified, a Your Texas Benefits Medicaid card will be issued to verify eligibility and to facilitate provider reimbursement.

#### **4.1.4 Medicaid Buy-In Program for Employed Individuals with Disabilities**

The Medicaid Buy-In (MBI) Program allows employed individuals with disabilities to receive Medicaid services by paying a monthly premium. Some MBI participants, based on income requirements, may be determined to have a \$0 premium amount and therefore are not required to make a premium payment. Individuals with earnings of less than 250 percent of the federal poverty limits (FPL) may be eligible to participate in the program. Applications for the program are accepted through HHSC’s regular Medicaid application process.

Participants will receive the Your Texas Benefits Medicaid card. MBI participants in urban service areas will be served through Texas Medicaid fee-for-service.

#### 4.1.5 Newborn Eligibility

A newborn child may be eligible for Medicaid for up to 1 year if:

- The child's mother received Medicaid at the time of the child's birth.
- The child's mother is eligible for Medicaid or would be eligible if pregnant.
- The child resides in Texas.

If the newborn is eligible for Medicaid coverage, providers must not require a deposit for newborn care from the guardian. The hospital or birthing center must report the birth to HHSC Eligibility Services at the time of the child's birth.

After the child has been added to the HHSC eligibility file, a Your Texas Benefits Medicaid card will be issued. Newborn clients will receive the Your Texas Benefits Medicaid card within 7 business days of being certified. A temporary Medicaid Eligibility Verification (Form H1027) may be issued by request through a local office or can be downloaded from [YourTexasBenefits.com](https://www.yourtexasbenefits.com). Form H1027 includes the client's Medicaid identification number and effective date of coverage.

Providers can verify the client's add date and retroactive eligibility by:

- Accessing the Medicaid Client Portal for Providers.
- Using TexMedConnect.
- Calling AIS at 1-800-925-9126.

After the newborn becomes a Medicaid client, the website will verify that the client is eligible, even if the card has not been produced yet.

**Note:** *Claims submitted for services provided to a newborn eligible for Medicaid must be filed using the newborn client's Medicaid number. Claims filed with the mother's Medicaid number cause a delay in reimbursement.*

The Medicaid number on the Medicaid Eligibility Verification (Form H1027) may be used to identify newborns eligible for Medicaid.

**Referto:** [Your Texas Benefits Medicaid card \(English and Spanish\)](#) on the TMHP website at [www.tmhp.com](https://www.tmhp.com).

#### 4.1.6 Potential Supplemental Security Income (SSI)/Medicaid Eligibility for Premature Infants

The Supplemental Security Income (SSI) program includes financial and Medicaid benefits for people who are disabled. When determining eligibility for SSI, the Social Security Administration (SSA) must establish that the person meets financial and disability criteria. When determining financial eligibility for a newborn child, SSA does not consider the income and resources of the child's parents until the month following the month the child leaves the hospital and begins living with the parents. Determinations of disability are made by the state's Disability Determination Services and may take several months. Federal regulations state that infants with birth weights less than 1,200 grams are considered to meet the SSI disability criteria.

The SSA issued a policy to local SSA offices to make presumptive SSI disability decisions and payments for these children, making it possible for a child to receive SSI and Medicaid benefits while waiting for a final disability determination to be made by Disability Determination Services. The child's parent or legal guardian must file an SSI application with the SSA. It is in the child's best interest that the application with the SSA be filed as soon as possible after birth. The SSA accepts a birth certificate with the child's birth weight or a hospital medical summary as evidence for the presumptive disability decision.

Providers should not change their current newborn referral procedures to HHSC for children who are born to mothers who are eligible for Medicaid as described in this section. However, providers are encouraged to refer parents and guardians of low birth weight newborns to the local SSA office for an SSI application.

#### 4.1.7 Foster Care

Most children in the state of Texas foster care program are automatically eligible for Medicaid.

Extended health-care coverage is also available for some former foster care youth clients enrolled in an institution of higher education through the Former Foster Care in Higher Education (FFCHE) program.

To ensure that these children have access to the necessary health-care services for which they are eligible, providers can accept the Medicaid Eligibility Verification (Form H1027) as evidence of Medicaid eligibility. Although this form may not list the client's Medicaid identification number, it is an official state document that establishes Medicaid eligibility.

Providers should honor the Medicaid Eligibility Verification (Form H1027) as proof of Medicaid eligibility and must bill Texas Medicaid as soon as a Medicaid ID number is assigned. Medicaid ID numbers will be assigned approximately one month from the issue date of the Medicaid Eligibility Verification (Form H1027). The form includes a Department of Family and Protective Services (DFPS) client number that provides an additional means of identification and tracking for children in foster care.

**Note:** *The DFPS client number is accepted by Medicaid Vendor Drug Program (VDP)-enrolled pharmacies to obtain outpatient prescribed drug benefits. VDP pharmacies must submit subsequent pharmacy claims with the Medicaid ID number after it has been assigned.*

**Reminder:** *Adoption agencies/foster parents are not considered third party resources (TPRs). Medicaid is primary in these circumstances.*

#### 4.1.8 Former Foster Care

HHSC provides Medicaid health-care coverage to former foster care youth who:

- Are 18 through 25 years of age.
- Were in Texas foster care on their 18th birthday or older and were receiving Medicaid when they aged out of Texas foster care.
- Are U.S. citizens or have a qualified alien status (i.e., green card).

#### 4.1.9 Medicaid Managed Care Eligibility

All clients who are determined to be eligible for Texas Medicaid are first enrolled as fee-for-service clients. Specific client groups within the Texas Medicaid population are eligible for managed care based on criteria such as age, location, and need. A client who is determined to be eligible for Medicaid managed care is enrolled in the appropriate managed care organization (MCO) or dental plan with a separate eligibility date. In most cases, Medicaid managed care enrollment is not retroactive.

**Referto:** *The Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks) for more information about managed care eligibility and enrollment.*

#### 4.1.10 Eligibility Verification

To verify a client's Texas Medicaid eligibility, use the following options:

- Verify electronically through TMHP EDI, TexMedConnect, or the Medicaid Client Portal for Providers. Providers must submit one of the following for each client:
  - Medicaid or Children with Special Health Care Needs (CSHCN) Services Program identification number.

- One of the following combinations: Social Security number and last name; Social Security number and date of birth; or last name, first name, and date of birth. Providers can narrow the search by entering the client's county code or sex.
- Verify the client's Medicaid eligibility using the Medicaid Eligibility Verification (Form H1027).
- Contact the TMHP AIS at 1-800-925-9126 or 1-512-335-5986.

**Note:** Providers can obtain client eligibility information for a client who is enrolled in a Medicaid managed care organization (MCO) from the MCO's web page. Providers can also check the MCO's web page for submission of electronic claims, prior authorization requests, claim appeals and reconsiderations, exchange of clinical data, and other documentation necessary for prior authorization and claim processing.

#### **4.1.11 Advantages of Electronic Eligibility Verification**

Verifying eligibility using TexMedConnect or EDI has the following advantages:

- They are available 24-hours a day 7 days a week.
- Providers can submit up to 5000 verification requests per EDI transmission.
- Providers can create client eligibility lists for verification in TexMedConnect. Each client group can contain up to 250 clients. Providers can create up to 100 groups for each National Provider Identifier (NPI).

The eligibility search function through the Medicaid Client Portal for Providers have the following advantages:

- It displays the client's:
  - Name, Patient Control Number (PCN), and status.
  - Texas Health Steps information (when applicable).
  - Medicaid health plans and their contact information.
  - Main doctor and the doctor's contact information.
  - Main dental home.
  - Main dental provider.
  - Medicaid benefits.
- It allows providers to search for details about a client's eligibility by month and year.
- It allows providers to view and print the client's:
  - Current and previous Medicaid eligibility information.
  - CHIP, CSHCN Services Program, Medicare, and other insurance plans.
  - Medical, dental, vision, and pharmacy benefits and limitations.
  - Medicaid Cards

Electronic eligibility responses contain:

- Eligibility restrictions, such as lock-in, emergency, or women's health.
- Medicare Part A, B, and C eligibility and effective dates
- Other insurance information, including name and address, and effective dates. EDI transactions also indicate the patient relationship to policy holder.

#### 4.1.12 Contract with Outside Parties

The *State Medicaid Manual*, Chapter 2, “State Organization,” (Section 2080.18) allows states to contract with outside agents to confirm for providers the eligibility of a Medicaid client. Medicaid providers may contract with these agents for eligibility verification with a cost to the provider. The provider remains responsible for adhering to the claims filing instructions in this manual. The provider, not the agent, is responsible for meeting the 95-day filing deadline and other claims submission criteria.

### 4.2 Medicaid Identification and Verification

Providers are responsible for requesting and verifying current eligibility information by using the methods listed in subsection 4.1.10, “Eligibility Verification” in this handbook or by asking clients for their Your Texas Benefits Medicaid card (electronic or paper copies) or Medicaid Eligibility Verification form (H1027).

Providers can verify client eligibility electronically by:

- Using TexMedConnect.
- Accessing the Medicaid Client Portal for Providers.
- Calling AIS at 1-800-925-9126.

Providers must accept Your Texas Benefits Medicaid cards and Medicaid Eligibility Verification forms (H1027) as valid proof of eligibility. Providers should retain a copy for their records to ensure the client is eligible for Medicaid when the services are provided. Clients should share eligibility information with their providers.

Providers should request additional identification if they are unsure whether the person presenting the form is the person identified on the form.

Providers should check the Eligibility Date to see whether the client has possible retroactive eligibility for previous bills.

Only those clients listed on the Medicaid Eligibility Verification form or the Your Texas Benefits Medicaid card are eligible for Medicaid. If a person insists he or she is eligible for Medicaid but cannot produce a current Your Texas Benefits Medicaid card or Medicaid Eligibility Verification (Form H1027), providers can verify eligibility through the methods listed in subsection 4.1.10, “Eligibility Verification” or by calling the TMHP AIS at 1-800-925-9126. Providers must document this verification in their records and treat these clients as if they had presented a Your Texas Benefits Medicaid card (electronic or printed copy of the card) or Medicaid Eligibility Verification (Form H1027).

When a client’s Your Texas Benefits Medicaid card has been lost or stolen, HHSC issues a temporary Medicaid verification Form H1027. Clients can also request a replacement card by visiting YourTexas-Benefits.com’s Medicaid Client Portal or by calling the Texas Medicaid Call Transfer line at 1-800-252-8263. The following is a sample of forms:

- *Form H1027-A*. Medicaid eligibility verification is used to indicate eligibility for clients who receive regular Medicaid coverage.
- *Form H1027-B*. Medicaid Qualified Medicare Beneficiary (MQMB) is issued to clients eligible for MQMB coverage.
- *Form H1027-C*. Qualified Medicare Beneficiary (QMB) is issued to clients who are eligible for QMB coverage only.
- *Form H1027-F*. Temporary Medicaid identification for clients receiving Former Foster Care in Higher Education (FFCHE) health care.

**Referto:** Subsection 4.9.1, “QMB/MQMB Identification” in this section.

The Medicaid Eligibility Verification (Form H1027) is acceptable as evidence of eligibility during the eligibility period specified unless the form contains limitations that affect the eligibility for the intended service. Providers must accept any of the documents listed above as valid proof of eligibility. If the client is not eligible for medical assistance or certain benefits, the client is treated as a private-pay patient.

**Referto:** Subsection 4.1.10, “Eligibility Verification” in this section.

Providers can determine whether a client’s eligibility has limitations by:

- Checking TMHP EDI.
- Accessing the Medicaid Client Portal for Providers.
- Using TexMedConnect.
- Calling AIS at 1-800-925-9126.

Clients may be required to use a designated primary care provider or pharmacy. QMB clients will be limited to Medicaid coverage of the Medicare Part A premiums, if any, Medicare Part B premiums, and Medicare coinsurance or deductible according to current payment guidelines.

If the client is identified as eligible and no other limitations of eligibility affect the intended service, proceed with the service. Eligibility during a previous month does not guarantee eligibility for the current month. The Medicaid Eligibility Verification (Form H1027) and the Your Texas Benefits Medicaid card (electronic or paper) are the only documents that are honored as verification of Medicaid eligibility.

**Referto:** “Section 8: Third Party Liability (TPL)” (*Vol. 1, General Information*) for TPL information.

In accordance with current federal policy, Texas Medicaid and Texas Medicaid clients cannot be charged for the client’s failure to keep an appointment. Only claims for services provided are considered for payment. Clients may not be billed for the completion of a claim form, even if it is a provider’s office policy.

## 4.3 Restricted Medicaid Coverage

The following sections are about limitations that may appear on the Your Texas Benefits Medicaid card, indicating that the client’s eligibility is restricted to specific services. Unless “LIMITED” appears on the form, the client is not locked into a single provider.

### 4.3.1 Emergency Only

The word “EMERGENCY” on the form indicates the client is restricted to coverage for an emergency medical condition. “Emergency medical condition” is defined in subsection 4.3.2.2, “Exceptions to Lock-in Status” in this section.

Certification for emergency Medicaid occurs after the services have been provided. The coverage is retroactive and limited to the specific dates that the client was treated for the emergency medical condition.

Clients limited to emergency medical care are not eligible for family planning, THSteps, Comprehensive Care Program (CCP) benefits, or outlier payments for hospital claims. Only services directly related to the emergency or life-threatening situations are covered.

Undocumented aliens and aliens with a nonqualifying entry status are identified for emergency Medicaid eligibility by the classification of type programs (TPs) 30, 31, 32, 33, 34, 35, and 36. Under Texas Medicaid, undocumented aliens are only eligible for emergency medical services, including emergency labor and delivery.

Any service provided after the emergency medical condition is stabilized is not a benefit.

If a client is not eligible for Medicaid and is seeking family planning services, providers may refer the client to one of the clinics listed on the HHSC website at [www.healthytexaswomen.org](http://www.healthytexaswomen.org).

### **4.3.2 Client Lock-in Program**

Texas Medicaid fee-for-service clients can be required to use a designated primary care provider and/or a primary care pharmacy.

The client is assigned to a designated provider for access to medical benefits and services when one of the following conditions exists:

- The client received duplicative, excessive, contraindicated, or conflicting health-care services, including drugs.
- A review indicates abuse, misuse, or fraudulent actions related to Medicaid benefits and services.

After analysis through the neural network component of the Medicaid Fraud and Abuse Detection System (MFADS), qualified medical personnel validate the initial identification and determine candidates for lock-in status. The validation process includes consideration of medical necessity. For the lock-in status designation, medical necessity is defined as the need for medical services to the amount and frequency established by accepted standards of medical practice for the preservation of health, life, and the prevention of more impairments.

Except for specialist consultations, services rendered to a client by more than one provider for the same or similar condition during the same time frame may not be considered medically necessary.

#### **4.3.2.1 Lock-in Medicaid Identification**

Clients with lock-in status receive the Your Texas Benefits Medicaid card with “Lock-in” printed on the card. The designated provider and pharmacy names are printed on the card under the word “Lock-in.”

When a Texas Medicaid fee-for-service client in the Lock-in Program attempts to obtain nonemergency services from someone other than their designated lock-in primary care provider, the provider must do one of the following:

- Verify the lock-in status by:
  - Accessing the Medicaid Client Portal for Providers.
  - Calling AIS at 1-800-925-9126.
- Attempt to contact the client’s designated lock-in primary care provider for a referral. If the provider is unable to obtain a referral, the provider must inform clients that they are financially responsible for the services.

#### **4.3.2.2 Exceptions to Lock-in Status**

Lock-in clients may go to any provider for the following services or items:

- Ambulance services
- Anesthesia
- Annual well-woman checkup
- Assistant surgery
- Case management services
- Chiropractic services
- Counseling services provided by a chemical dependency treatment facility
- Eye exams for refractive errors
- Eyeglasses

- Family planning services (regardless of place of service [POS])
- Genetic services
- Hearing aids
- Home health services
- Laboratory services (including interpretations)
- Licensed clinical social worker (LCSW) services
- Licensed professional counselor (LPC) services
- Mental health rehabilitation services
- Intellectual disability/related condition assessment performed by an intellectual or developmental disability (IDD) provider
- Nursing facility services
- Primary home care
- Psychiatric services
- Radiology services (including interpretations)
- School Health and Related Services (SHARS)
- Comprehensive Care Program (CCP)
- THSteps medical and dental services

For referrals or questions, contact:

HHSC  
Office of Inspector General  
Lock-in Program - MC 1323  
PO Box 85200  
Austin, TX 78708  
[LockIn\\_Program@hhs.texas.gov](mailto:LockIn_Program@hhs.texas.gov)

If an emergency medical condition occurs, the lock-in restriction does not apply. The term emergency medical condition is defined as a medical condition manifesting itself by acute symptoms of sufficient severity (including severe pain), such that the absence of immediate medical attention could reasonably be expected to result in:

- Placing the client's health (or, with respect to a pregnant woman, the health of the woman or her unborn child) in serious jeopardy.
- Serious impairment to bodily functions.
- Serious dysfunction of any bodily organ or part.

**Important:** *A provider who sends in an appeal because a claim was denied with explanation of benefits (EOB) 00066 must include the performing provider NPI, not just a name or group NPI. Appeals without a performing provider NPI are denied. The NPI of the designated provider must be entered in the appropriate paper or equivalent electronic field for nonemergency inpatient and outpatient claims to be considered for reimbursement.*

**Note:** *Only when the designated provider or designated provider representative has given permission for the client to receive nonemergency inpatient and/or outpatient services, including those provided in an emergency room, can the facility use the designated provider's NPI for billing.*

#### **4.3.2.3 Selection of Designated Provider and Pharmacy**

Texas Medicaid fee-for-service clients identified for lock-in status can participate in the selection of one primary care provider, primary care pharmacy, or both from a list of participating Medicaid providers. Eligible providers cannot be under administrative action, sanction, or investigation. In general, the designated primary care provider's specialty is general practice, family practice, or internal medicine. Other specialty providers may be selected on a case-by-case basis. Primary care providers can include, but are not limited to the following:

- A physician
- Physician assistant
- Physician group
- Advanced practice nurse
- Outpatient clinic
- Rural health clinic (RHC)
- Federally qualified health center (FQHC)

If the client does not select a primary care provider or primary care pharmacy, HHSC selects one for the client.

When a candidate for the designated provider is determined, HHSC contacts the provider by letter. The designated provider receives a confirmation letter from HHSC that verifies the name of the client confirming the name of the client, primary care provider or primary care pharmacy, and the effective date of the lock-in arrangement.

#### **4.3.2.4 Pharmacy services**

The primary care pharmacy helps the Lock-in Program ensure that prescriptions that are filled for clients with lock-in status are written either by the primary care provider or other health-care providers to whom the primary care provider has referred the client. HHSC has identified by therapeutic class those medications that require additional monitoring. When a medication that requires additional monitoring is prescribed by an emergency room provider, the primary care pharmacy may be reimbursed for dispensing up to 72 hours or three business days of the prescribed dosage, which allows for holidays and weekends. The primary care pharmacy may dispense the remainder of the medication after receiving approval by the primary care provider or the other providers that HHSC deems to be appropriate.

Some circumstances allow a client to be approved to receive medications from a pharmacy other than the primary care pharmacy. A pharmacy override occurs when the Lock-in Program approves an individual client's request to obtain medication at an alternate pharmacy other than the lock-in pharmacy. The Lock-in Program is notified when the client or pharmacist contacts the Lock-In Program at [LockIn\\_Program@hhs.texas.gov](mailto:LockIn_Program@hhs.texas.gov) to request a pharmacy override.

The Lock-in Program staff refers the client to the notification letter titled "What You Need to Know About the Lock-in Program," which was sent at initial lock-in. This letter explains the pharmacy override process. The client is instructed to have the alternate pharmacy call the Lock-in Program to request the override.

The following are allowable circumstances for pharmacy override approval:

- The recipient moved out of the geographical area (more than 15 miles from the lock-in pharmacy).
- The lock-in pharmacy does not have the prescribed medication, and the medication will remain unavailable for more than two to three days.
- The lock-in pharmacy is closed for the day, and the recipient needs the medication urgently.

- The lock-in pharmacy does not carry the medication and is either unable to order it or unwilling to stock it.
- The lock-in pharmacy no longer wants to be the designated pharmacy for a particular lock-in client.
- The client has valid complaints against the lock-in pharmacy or its staff.

For questions about pharmacy services for clients that are locked into a primary care pharmacy, contact the Lock-in Program by emailing [LockIn\\_Program@hhs.texas.gov](mailto:LockIn_Program@hhs.texas.gov).

#### **4.3.2.5 Duration of Lock-in Status**

The Lock-in Program duration of lock-in status is the following:

- Initial lock-in status period—minimum of 36 months.
- Second lock-in status period—additional 60 months.
- Third lock-in status period—will be for the duration of eligibility and all subsequent periods of eligibility.
- Clients who have been arrested for, indicted for, convicted of, or admitted to a crime that is related to Medicaid fraud will be assigned lock-in status for the duration of eligibility and subsequent periods of eligibility.

HHSC uses the same time frames for clients with a lock-in status as noted by the word “LIMITED” on the Your Texas Benefits Medicaid card.

Clients are removed from lock-in status at the end of the specified limitation period if their use of medical services no longer meets the criteria for lock-in status. A medical review also may be initiated at the client’s or provider’s request. Clients or providers can reach the Lock-in Program by emailing [LockIn\\_Program@hhs.texas.gov](mailto:LockIn_Program@hhs.texas.gov) to request this review.

Providers may request to no longer serve as a client’s designated provider at any time during the lock-in period by emailing [LockIn\\_Program@hhs.texas.gov](mailto:LockIn_Program@hhs.texas.gov). Providers are asked to serve or refer the client until another arrangement is made. New arrangements are made as quickly as possible.

#### **4.3.2.6 Referral to Other Providers**

Texas Medicaid fee-for-service clients with a lock-in status may be referred by their designated provider to other providers. For the referred provider to be paid, the NPI of the referring designated provider must be in the referring provider field of the claim form. Claims submitted electronically must have the NPI of the referring designated provider in the Referring Provider Field. Providers must consult with their vendor for the location of this field in the electronic claims format.

**Referto:** Subsection 6.2, “TMHP Electronic Claims Submission” in “Section 6: Claims Filing” (*Vol. 1, General Information*)

#### **4.3.2.7 Hospital Services**

An inpatient hospital claim for a lock-in Medicaid fee-for-service client is considered for reimbursement if the client meets Medicaid eligibility and admission criteria. Hospital admission personnel should check the name of the client’s designated provider using TexMedConnect or the Medicaid Client Portal for Providers and share the designated provider’s name with the admitting physician if the two are different.

Provider claims for nonemergency inpatient services for lock-in Texas Medicaid fee-for-service clients are considered for payment *only* when the designated NPI appears on the claim form as the billing, performing, or referring physician.

Providers can get information about claim reimbursement for lock-in clients by calling the TMHP AIS at 1-800-925-9126.

#### **4.3.2.8 Lock-in Status Claims Payment**

Payment for services to a lock-in Medicaid client is made to the designated provider only, unless the services result from a designated provider referral or emergency. An automated review process determines if the claim includes the lock-in primary care provider's NPI as the billing, performing, or referring provider. If the lock-in primary care provider's NPI is not indicated on the claim, the claim is not paid. Exceptions to this rule include emergency care and services that are included in subsection 4.3.2.2, "Exceptions to Lock-in Status" in this section. Appeals for denied claims are submitted to TMHP and must include the designated NPI for reimbursement consideration.

Claims for provider services for Texas Medicaid fee-for-service clients must include the NPI and taxonomy code for the designated primary care provider as the billing or performing provider or a referral number in the prior authorization number (PAN) field.

#### **4.3.3 Hospice Program**

HHSC manages the Hospice Program through provider enrollment contracts with hospice agencies. These agencies must be licensed by the state and Medicare-certified as hospice agencies. Coverage of services follows the amount, duration, and scope of services specified in the Medicare Hospice Program. Hospice pays for services related to the treatment of the client's terminal illness and for certain physician services (not the treatments).

Medicaid Hospice provides palliative care to all Medicaid-eligible clients (no age restriction) who sign statements electing hospice services and are certified by physicians to have six months or less to live if their terminal illnesses run their normal courses. Hospice care includes medical and support services designed to keep clients comfortable and without pain during the last weeks and months before death.

Texas Medicaid clients who are 21 years of age and older and who elect hospice coverage waive their rights to all other Medicaid services related to their terminal illness. They do not waive their rights to Medicaid services that are unrelated to their terminal illness.

Texas Medicaid clients who are 20 years of age and younger and who elect hospice care are not required to waive their rights to concurrent hospice care and treatment of the terminal illness. They do not waive their rights to Medicaid services that are unrelated to their terminal illness.

Medicare and Medicaid clients must elect both the Medicare and Medicaid Hospice programs.

Concurrent hospice care and treatment services include:

- Services related or unrelated to the client's terminal illness
- Hospice care (palliative care and medical and support services related to the terminal illness).

Direct policy questions about the hospice program to HHSC at 1-512-438-3161. Direct all other general questions related to the hospice program, such as billing, claims, rate key issues, and authorizations to HHSC at 1-512-438-2200.

HHSC pays the provider for a variety of services under a per diem rate for any particular hospice day in one of the following categories:

- Routine home care
- Continuous home care
- Respite care
- Inpatient care

#### **4.3.3.1 Hospice Medicaid Identification**

Individuals who elect hospice care are issued a Your Texas Benefits Medicaid card. Hospice status can be verified by using TexMedConnect or the Medicaid Client Portal for Providers. Clients can cancel their election at any time.

#### 4.3.3.2 Physician Oversight Services

*Physician oversight* is defined as “physician supervision of clients under the care of home health agencies or hospices that require complex or multidisciplinary care modalities.” These modalities involve regular physician client status review of related laboratory and other studies, communication with other health professionals involved in patient care, integration of new information into medical treatment plans, and adjustment of medical therapy. Medicaid hospice does not reimburse for physician oversight services.

#### 4.3.3.3 Medicaid Services Unrelated to the Terminal Illness

When services are unrelated to the Medicaid Hospice client’s terminal illness, Medicaid (TMHP) pays its providers directly. Providers of services that are unrelated to the terminal illness are required to follow Medicaid prior authorization and claims filing deadlines.

**Referto:** “Section 5: Fee-for-Service Prior Authorizations” (*Vol. 1, General Information*) for more information about prior authorizations for Medicaid hospice clients.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for more information about filing claims for Medicaid Hospice Clients.

#### 4.3.4 Presumptive Eligibility

Presumptive eligibility allows qualified hospitals and entities to determine whether an individual can get short-term Medicaid. Clients who have PE receive immediate, short-term Medicaid eligibility while their regular Medicaid application is processed. PE eligibility categories receive full coverage with the exception of pregnant women who receive ambulatory care services only.

##### 4.3.4.1 PE Medicaid Identification

“PE” on a Your Texas Benefits Medicaid card indicates that a client has presumptive eligibility. PE clients may be identified using TexMedConnect or the Medicaid Client Portal for Providers. An individual who is certified for presumptive eligibility receives the regular Your Texas Benefits Medicaid card.

##### 4.3.4.2 Services

Presumptive eligibility (PE) provides full coverage for all PE types of assistance with the exception of pregnant women. Pregnant women only receive ambulatory care services. Labor, delivery, inpatient services, and THSteps medical are not covered during the PE period for pregnant women. If the woman is determined to be eligible for regular Medicaid for the same period of time, regular Medicaid coverage overlays the PE period and provides a full range of services. Client eligibility for PE coverage must be determined by a qualified hospital or qualified entity. Once eligibility has been determined, services may be obtained from any enrolled Medicaid provider. The claims filing procedures for clients who have PE are the same as those for all other Medicaid clients.

There are five client types of assistance (TA) and one client type program (TP) that provide full Medicaid coverage through presumptive eligibility. Services reimbursed under the presumptive eligibility process are fee-for-service only.

The following are eligible for presumptive eligibility:

- TA74—Children under 1 year of age presumptive
- TA75—Children 1–5 years of age presumptive
- TA76—Children 6–18 years of age presumptive
- TA83—Former Foster Care Children presumptive
- TA86—Parents and caretaker relatives presumptive
- TP42—Pregnant women presumptive

The length of coverage depends on several factors:

- If the individual submits an application for regular Medicaid, the PE Medicaid coverage ends the date the state makes a determination for regular Medicaid.
- If the individual does not submit an application for regular Medicaid, the PE coverage ends the last day of the month following the PE determination.

#### **4.3.4.3 Qualified Provider Enrollment**

To make PE determinations, the provider must be a qualified hospital or qualified entity. A qualified hospital:

- Is a Medicaid provider.
- Notifies HHSC of its intent to make presumptive eligibility determinations.
- Agrees to make presumptive eligibility determinations according to HHSC policies and procedures.
- Can make presumptive eligibility determinations for pregnant women, children, former foster care children, and parents and other caretakers.
- Helps individuals complete and submit online applications for regular Medicaid.
- Helps individuals understand which documents to send to the state to determine whether they qualify for regular Medicaid.
- Has not been disqualified.

A qualified entity meets the same criteria as a qualified hospital, except that a qualified entity:

- Can be a hospital, clinic, school, or other entity.
- May only make presumptive eligibility determinations for pregnant women.

For more information on how to become a qualified hospital or entity, visit [www.TexasPresumptiveEligibility.com](http://www.TexasPresumptiveEligibility.com).

#### **4.3.4.4 Process**

Qualified hospital or entity staff determine eligibility for PE coverage based on the client's statement of residency, income, household composition, citizenship or immigration status, and pregnancy (for Pregnant Women Presumptive). The client is certified for PE if their statement indicates that they meet Medicaid eligibility criteria.

If the client chooses to apply for regular Medicaid, qualified hospital or entity staff assist the client in completing the application. The application is then forwarded to HHSC to determine the client's eligibility for regular Medicaid.

The period of PE begins on the date the qualified hospital or entity makes the determination and ends when HHSC makes the final Medicaid determination.

### **4.4 CHIP Perinatal Program**

The Children's Health Insurance Program (CHIP) Perinatal Program provides CHIP perinatal benefits for 12 months to the unborn children of non-Medicaid-eligible women. This program allows pregnant women who are ineligible for Medicaid because of income or immigration status to receive prenatal care and provides CHIP benefits to the child upon delivery for the duration of the coverage period.

Continuous Medicaid coverage for 12 months is provided from birth to CHIP Perinatal newborns whose mothers received Emergency Medicaid for the labor and delivery. The 12 months of continuous Medicaid coverage for the newborn is available only if the mother received Medicaid for labor and delivery.

#### 4.4.1 Program Benefits

CHIP Perinatal benefits are provided by select CHIP health plans throughout the state. Benefits for the unborn child include:

- Up to 20 prenatal visits:
  - First 28 weeks of pregnancy—one visit every four weeks.
  - From 28 to 36 weeks of pregnancy—one visit every two to three weeks.
  - From 36 weeks to delivery—one visit per week.
  - Additional prenatal visits are allowed if they are medically necessary.
- Pharmacy services, limited laboratory testing, assessments, planning services, education, and counseling.
- Prescription drug coverage based on the current CHIP formulary.
- Hospital facility charges and professional services charges related to the delivery. Preterm labor that does not result in a birth and false labor are not covered benefits.

Program benefits after the child is born include:

- Two postpartum visits for the mother.
- Medicaid benefits for the newborn.

#### 4.4.2 Claims

Providers who serve CHIP Perinatal clients must follow the claims filing guidelines in subsection 6.19.1, “CHIP Perinatal Newborn Transfer Hospital Claims” in “Section 6: Claims Filing” (*Vol. 1, General Information*).

#### 4.4.3 Client Eligibility Verification

The *State Medicaid Manual*, Chapter 2, “State Organization,” (Section 2080.18) allows states to contract with outside agents to confirm for providers the eligibility of a Medicaid client. Medicaid providers may contract with these agents for eligibility verification with a cost to the provider. The provider remains responsible for adhering to the claims filing instructions in this manual. The provider, not the agent, is responsible for meeting the 95-day filing deadline and other claims submission criteria.

A number is issued for the baby based on the submission of the Emergency Medical Services Certification Form H3038 or CHIP Perinatal - Emergency Medical Services Certification, Form H3038P for the mother’s labor with delivery.

Establishing Medicaid for the newborn requires the submission of the Emergency Medical Services Certification Form H3038 or CHIP Perinatal - Emergency Medical Services Certification, Form H3038P for the mother’s labor with delivery. If Form H3038 or H3038P is not submitted, Medicaid cannot be established for the newborn from the date of birth for 12 continuous months of Medicaid coverage. Once enrolled, clients are identified as type program (TP) 36 for the mother and TP 45 for the newborn.

Establishing Medicaid (and issuance of a Medicaid number) can take up to 45 days after Form H3038 or H3038P is submitted. Medicaid eligibility for the mother and infant can be verified by:

- Using TexMedConnect.
- Accessing the Medicaid Client Portal for Providers.
- Calling AIS at 1-800-925-9126.

For clients enrolled in the CHIP Program, the CHIP health plan assigns a client ID to be used for billing. Providers should contact the CHIP health plan for billing information.

Newborns whose mother received Medicaid including emergency Medicaid are eligible to receive Medicaid benefits beginning at the date of birth and will not be assigned a client ID from the CHIP health plan.

HHSC requires the expectant mother's provider to fill out the Emergency Medical Services Certification (Form H3038 or H3038P).

The expectant mother will receive this form from HHSC before her due date, along with a letter reminding her to send information about the birth of her child after delivery. The letter will instruct the expectant mother to take the form to her provider, have the provider fill out the form, then mail the form back to HHSC in a preaddressed, postage-paid envelope. In many cases this activity will occur after delivery when the mother is being discharged from the hospital.

Once HHSC receives the completed Emergency Medical Services Certification (Form H3038 or H3038P), Emergency Medicaid coverage will be added for the mother for the period of time identified by the health care provider. The Emergency Medical Services Certification (Form H3038 or H3038P) is the same form currently required to complete Emergency Medicaid certification.

The CHIP perinatal mother whose income is at or below pregnant women's Medicaid FPL will not be required to fill out a new application or provide new supporting documentation to apply for Emergency Medicaid. HHSC will determine the woman's eligibility for Emergency Medicaid by using income and other information the mother-to-be provided when she was determined to be eligible for CHIP perinatal coverage, as well as information included on the Emergency Medical Services Certification (Form H3038 or H3038P).

If a woman fails to return the completed Emergency Medical Services Certification (Form H3038 or H3038P) within a month after her due date, HHSC will send her another Emergency Medical Services Certification Form H3038 or H3038P with a postage-paid envelope. If the woman fails to submit Emergency Medical Services Certification (Form H3038 or H3038P), and the hospital cannot locate a Type Program 36 for her in the TMHP online provider lookup tool, then the hospital can bill her for facility fees incurred during her stay.

#### **4.4.3.1 Confirming Receipt of Form H3038 or H3038P**

Providers who would like to confirm receipt of form H3038 or H3038P can contact MAXIMUS at 1-877-KIDS-NOW (1-877-543-7669), prompt #6 (for reporting changes) after 48 hours from fax submission. If the submission is by regular mail, providers should allow five business days before contacting MAXIMUS. When calling this number, providers should be prepared to provide the following information:

- National Provider Identifier (NPI)
- Provider name
- Name of person calling
- CHIP perinatal case number (Without the case number, MAXIMUS cannot provide confirmation of receipt. Confirmation of receipt cannot be provided based on client name or address.)

Each form H3038 or H3038P should be faxed one at a time, rather than in a batch. It is important that the form be filled out completely and accurately. If the form is not filled out accurately, it will delay processing and MAXIMUS may not be able to confirm receipt after 48 hours from fax submission.

#### **4.4.3.2 Eligibility Verification for Clients Without a Medicaid ID**

Providers should first attempt to verify if a Medicaid number has been issued by calling TMHP at 1-800-925-9126 and using the prompt for AIS or speaking to a representative. Providers can verify eligibility using TexMedConnect or the Medicaid Client Portal for Providers. If a provider is unable to locate a Medicaid number for the mother or infant 45 days after form H3038 or H3038P was faxed, the provider can contact the HHSC Central Processing Center (CPC) in one of the following ways:

- By email at [CPC@hhsc.state.tx.us](mailto:CPC@hhsc.state.tx.us)
- By telephone at 1-866-291-1258

CPC needs the following information to respond to requests or inquiries. Providers should submit the information only once. All submissions must be sent in a secure manner. If there are multiple inquiries that are over 45 days, providers can submit them together.

Required information includes the following:

- CHIP perinatal case number
- Mother's name as it appears on her CHIP Perinatal card
- Dates of service
- Date Form H3038 or H3038P was faxed to MAXIMUS
- Baby's first and last name
- Baby's date of birth
- Name and telephone number of the person completing the request

CPC will research inquiries and respond to the provider within 10 business days. This time frame is an approximation and may only apply if all information, including complete contact information, is provided and fewer than 25 names were submitted.

#### **4.4.3.3 Mother's eligibility**

For mothers who currently receive CHIP perinatal, have an income at or below the pregnant women's Medicaid FPL, and receive emergency Medicaid coverage, providers can check eligibility by:

- Accessing the Medicaid Client Portal for Providers.
- Calling AIS at 1-800-925-9126.

#### **4.4.3.4 Newborn's eligibility**

For CHIP Perinatal newborns who have a family income at or below pregnant women's Medicaid limits FPL, providers can obtain eligibility information and the newborn's PCN by performing an eligibility verification using the following sources:

- Accessing the Medicaid Client Portal for Providers.
- Calling AIS at 1-800-925-9126.

TMHP cannot provide CHIP Perinatal Program eligibility information for the newborn or mother, regardless of the client's income level. For CHIP Perinatal Program eligibility information, contact the CHIP health plan.

A report of birth remains an important step to ensure timely Medicaid eligibility for the newborn. A birth must be reported to the state through the typical birth registry process (e.g., use of Texas Electronic Registration system [TER]). In TER, the screen containing the Medicaid/CHIP number should continue to be populated with the mother's alpha-numeric CHIP Perinatal Program number (e.g., J12345678). In addition, a mother can report the birth by calling 1-877-KIDS-NOW (1-877-543-7669).

#### 4.4.4 Submission of Birth Information to Texas Vital Statistics Unit

Hospital providers must submit birth registry information to the DSHS Vital Statistics Unit in a timely manner. Once received by the Vital Statistics Unit, birth information is transmitted to the state's eligibility systems, so a PCN (Medicaid number) can be issued for newborns whose mothers were at or below the pregnant women's FPL. Hospitals should use the CHIP Perinatal health plan ID to enter the mother's CHIP perinatal coverage ID number in the Medicaid/CHIP number field on the Texas Electronic Registration (TER) screen. This number will appear as an alpha-numeric combination, starting with a letter followed by eight digits. For example, G12345678.

For more information, go to the HHSC website at <https://www.dshs.texas.gov/vital-statistics> or call Texas Vital Statistics at 1-800-452-9115.

### 4.5 Medically Needy Program (MNP)

The MNP with spend down is limited to children 18 years of age and younger and pregnant women.

The MNP provides Medicaid benefits to children (18 years of age and younger) and pregnant women whose income exceeds the eligibility limits under one of the Medical Assistance Only (MAO) programs but is not enough to meet their medical expenses. Coverage is available for services within the amount, duration, and scope of Texas Medicaid. Individuals are considered adults beginning the month following their 19th birthday.

Medicaid benefits, including family planning and THSteps preventive services through the MNP, are available to:

- Pregnant women.
- Children 18 years of age and younger.

MNP provides access to Medicaid benefits. Applications are made through HHSC. HHSC determines eligibility for the appropriate Medicaid program.

If spend down is applicable, HHSC issues a Medical Bills Transmittal (Form H1120) to the MNP applicant that indicates the spend down amount, months of potential coverage (limited to the month of application and any of the three months before the application month that the applicant has unpaid medical bills), and HHSC contact information.

The applicant is responsible for paying the spend down portion of the medical bills. The TMHP Medically Needy Clearinghouse (MNC) determines which bills may be applied to the applicant's spend down according to state and federal guidelines. No Medicaid coverage may be granted until the spend down is met.

Newborns of mothers who met spend down and received Medically Needy with Spend Down (TP 56) or Medically Needy with Spend Down-Emergency (TP 32) to cover the newborns birth, are eligible for coverage from the date of birth until the month the child turns one. Hospitals and other providers that complete newborn reporting forms should continue to follow the procedures in subsection 3.2.4, "Newborn Care" in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for these newborns.

#### 4.5.1 Spend Down Processing

Applicants are instructed to submit their medical bills or completed claim forms for application toward their spend down to TMHP MNC along with the Medical Bills Transmittal/Insurance Information Form H1120. Charges from the bills or completed claim forms are applied in date of service order to the spend down amount, which is met when the accumulated charges equal the spend down amount.

Providers can assist medically needy clients with their applications by giving them current, itemized statements or completed claim forms to submit to MNC. MNC holds manually completed claim forms used to meet spend down for ten calendar days preceding the completion of the spend down case, then forwards them to claims processing. The prohibition against billing clients does not apply until Medicaid coverage is provided.

Current itemized statements or completed claim forms must include the following:

- Statement date
- Provider name
- Client name
- Date of service
- All services provided and charges
- Current amount due
- Any insurance or client payments with date of payment (the date and amount of any insurance or payments)

**Important:** *Amounts used for spend down are deducted from the total billed amount by the provider. Using older bills may provide earlier eligibility for the client.*

Bills for past accounts must be current, itemized statements (dated within the last 60 days) that are from the provider and that verify the outstanding status of the account and the current balance due. Accounts that have had payments made by an insurance carrier, including Medicare, must be accompanied by the carrier's EOB or Remittance Advice and show the specific services covered and amounts paid.

Unpaid bills incurred before the month of potential eligibility (the month with spend down) may be used to meet spend down. Itemized statements must be dated within 60 days of the date they are received at TMHP MNC.

The unpaid balance on currently due accounts may be applied toward the spend down regardless of the date of service. All bills or completed claim forms must be itemized showing the provider's name, client's name, dates of service, statement date, services provided, charge for each service, total charges, amounts and dates of payments, and total due.

Clients have 30 days to submit their bills or completed claim forms. Thirty-day extensions are available to the client as necessary to gather all needed information. The provider can assist by furnishing the additional information to the applicant.

All communication about submission of billing information is carried out between MNC and the applicant; however, providers can assist clients by:

- Providing clients with current itemized statements or completed claim forms.
- Encouraging clients to submit *all* of their medical bills or completed claim forms incurred from *all* providers at the same time.
- Submitting manual claim forms directly to MNC or to applicants for the MNP, that can be used to meet spend down.

Bills or claim forms submitted to MNC are for application toward the spend down only. Submitting a bill or claim forms for spend down is *not* a claim for reimbursement. *No* claims reimbursement is made from such submittals unless the claim form is complete. The provider must file a Medicaid claim after eligibility has been established to have reimbursement considered by Texas Medicaid. If the provider assisted the client with submission of a claim form, the MNC retains all claim forms for ten calendar days preceding the completion of the spend down case. The MNC then forwards all claim forms directly to claims processing to have reimbursement considered by Texas Medicaid.

MNC informs the applicant and HHSC when the spend down is met. HHSC certifies the applicant for Medicaid and sends the Medicaid Identification form to the applicant when Medicaid eligibility is established. The TMHP MNC mails notification letters to providers when clients have met spend down. The notification letter states that an invoice was submitted for the spend down and that the provider should submit claims for any bills that fall within the indicated spend down month. Clients are encouraged to inform medical providers of their Medicaid eligibility and make arrangements to pay the charges used to meet the spend down amount. When notified of Medicaid eligibility, the provider asks if the client has retroactive eligibility for previous periods.

Providers may inquire about status, months of potential eligibility, Medicaid or case number, and general case information by calling the TMHP Contact Center at 1-800-925-9126.

Medically needy applicants who have a case pending or have not met their spend down are considered private-pay clients and may receive bills and billing information from providers. No claims are filed to Medicaid. A claim that is inadvertently filed is denied because of client ineligibility.

#### 4.5.2 Closing an MNP Case

Medically needy cases are closed by MNC for the following reasons:

- Bills were not received within the designated time frame (usually 30 days from the date on which the case is established by the HHSC worker).
- The client failed to provide requested additional case/billing information within 30 days of the MNC request date.
- Insufficient charges were submitted to meet spend down, and the client did not respond to a request for additional charges to be submitted within 30 days of the notification letter.

Charges submitted after the spend down has been met will not reopen the case automatically. The client must call the Client Hotline at 1-800-335-8957.

**Note:** For information regarding the Medically Needy Program for CSHCN Services Program clients refer to the CSHCN Services Program Provider Manual.

#### 4.6 Medicaid Buy-in for Children (MBIC) Program

The MBIC program is mandated by S.B. 187, 81st Legislature, Regular Session, 2009, to provide acute care Medicaid coverage for children who are 18 years of age and younger and have disabilities. This program creates a state option for children who are ineligible for Supplemental Security Income (SSI) for reasons other than disability.

Children with disabilities must meet the following requirements to be eligible for MBIC:

- Be 18 years of age or younger.
- Have a family income that is no more than 300 percent of FPL before allowable deductions.
- Meet citizenship, immigration, and residency requirements.
- Be unmarried.
- Not reside in a public institution.

**Exception:** Clients who are enrolled in the MBIC program before they enter a nursing facility or Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF-IID) will continue to receive MBIC benefits until eligibility for the appropriate institutional Medicaid program is determined.

MBIC clients will be enrolled as Medicaid fee-for-service. MBIC clients have access to the same benefits as Medicaid clients who have disabilities. Claims and prior authorization requests for MBIC clients may be submitted according to current guidelines for Medicaid fee-for-service as indicated in this manual.

MBIC benefits are available to enrolled clients through the end of the month that contains their nineteenth birthday. Clients whose birthday falls on the last day of February of a leap year (e.g., February 29, 2004) will be eligible for benefits through the end of March following their nineteenth year.

## 4.7 Healthy Texas Women (HTW) Program

The goal of the HTW program is to expand access to women's health and family planning services to reduce unintended pregnancies, positively affect the outcome of future pregnancies, and positively impact the health and wellbeing of women and their families in the eligible population.

HTW provides family planning services, related preventive health services that are beneficial to reproductive health and other preventive health services that positively affect maternal health and future pregnancies for women who:

- Are 15 through 44 years of age

**Note:** *Women who are 15 through 17 years of age must have a parent or legal guardian apply on their behalf.*
- Are a United States citizen or eligible immigrant
- Are a resident of Texas
- Do not currently receive benefits through a Medicaid program (including Medicaid for Pregnant Women), Children's Health Insurance Program (CHIP), or Medicare Part A or B.
- Have a household income at or below 204.2 percent of the federal poverty level
- Are not pregnant
- Do not have other insurance that covers the services HTW provides

**Exception:** *A client who has other private health insurance may be eligible to receive HTW services if a spouse, parent, or other person would cause physical, emotional, or other harm to the client because the client filed a claim on the health insurance.*

**Referto:** Subsection 2.1, "Guidelines for HTW Providers" in the *Healthy Texas Women Program Handbook* (Vol. 2, *Provider Handbooks*).

## 4.8 Medicaid for Breast and Cervical Cancer (MBCC)

The MBCC program provides full Medicaid benefits to women who meet the program's eligibility requirements. The goal of the program is to improve timely access to breast and cervical cancer treatment for uninsured women who are screened and identified by the National Breast and Cervical Cancer Early Detection Program (NBCCEDP) of the Centers for Disease Control and Prevention (CDC). Additionally, the Texas State Legislature provided funding in 2007 to expand the pool of providers who provide screening and diagnostic services to women so that any provider can diagnose a woman for breast or cervical cancer and she may become eligible for Medicaid through MBCC.

DSHS receives funds from the CDC and awards the funds to providers across the state to perform breast and cervical cancer screenings and diagnostic services under the Breast and Cervical Cancer Services (BCCS) program.

### 4.8.1 Initial MBCC Program Enrollment

The woman must be diagnosed and in need of treatment for one of the following biopsy-confirmed breast or cervical cancer diagnoses:

- Grade 3 cervical intraepithelial neoplasia (CIN III)
- Severe cervical dysplasia

- Cervical carcinoma in situ
- Primary cervical cancer
- Ductal carcinoma in situ
- Primary breast cancer

A woman may also be eligible for MBCC if she has a diagnosis of metastatic or recurrent breast or cervical cancer and a need for treatment.

Eligibility is determined by a BCCS contractor, DSHS, and HHSC as follows:

- The BCCS contractor screens the client for eligibility if she has a qualifying diagnosis and, if applicable, helps the woman to complete Form H1034, Medicaid for Breast and Cervical Cancer application. The BCCS contractor reviews and collects all of the required eligibility documentation. The woman cannot apply for MBCC at a local HHSC eligibility office.
- DSHS verifies the client's qualifying diagnosis and submits Form 1034 to HHSC eligibility staff.
- HHSC Centralized Benefits Services staff makes the final Medicaid eligibility determination.

**Referto:** The [Breast and Cervical Cancer Treatment Information](#) page of the DSHS website for more information about the enrollment process.

#### **4.8.2 MBCC Program Eligibility**

To be eligible for MBCC, a woman must be:

- 64 years of age or younger and have been screened for breast or cervical cancer and found to need treatment for either breast or cervical cancer.
- A U.S. citizen or eligible immigrant.
- Uninsured or otherwise not eligible for Medicaid.
- A resident of Texas.

A woman who is eligible to receive Texas Medicaid under MBCC receives full Medicaid benefits beginning the day after she received a qualifying diagnosis and for the duration of her cancer treatment. Services are not limited to the treatment of breast and cervical cancer.

#### **4.8.3 Continued MBCC Program Eligibility**

After a woman is enrolled in the MBCC program, eligibility may continue if she meets one of the following criteria:

- She is being treated for active disease as defined above,
- She has completed active treatment while in MBCC and is currently receiving hormonal treatment,
- She has completed active treatment while in MBCC and is currently receiving active disease surveillance for TNRBC.

A woman may continue to receive Medicaid benefits as long as she meets the eligibility criteria and provides proof that she is receiving active treatment for breast or cervical cancer. Women who are no longer in MBCC may reapply if they are diagnosed with a new breast or cervical cancer or a metastatic or recurrent breast or cervical cancer.

**Note:** *Active disease surveillance (for the purposes of determining eligibility for MBCC) is periodically monitoring disease progression in order to quickly treat cancerous and precancerous conditions that arise from the presence of a previously diagnosed TNRBC.*

If the client's cancer is in remission and the physician determines that the client requires only routine health screening for a breast or cervical condition (e.g. annual breast examinations, mammograms, and Pap tests as recommended by the American Cancer Society and the U.S. Preventative Services Task Force), the client is not considered to be receiving treatment; and MBCC coverage will not be renewed. A client who is subsequently diagnosed with a new, metastatic, or recurrent breast or cervical cancer may reapply for MBCC benefits.

## 4.9 Medicare and Medicaid Dual Eligibility

Medicaid clients who are also eligible for Medicare Part A (inpatient coverage), Part B (medical coverage), or Part C (noncontracted Medicare Advantage Plans [MAPs]), may be covered by Texas Medicaid as follows:

- QMB clients are eligible for coinsurance and deductible payments according to the current payment guidelines.
- MQMB clients are eligible for coinsurance and deductible payments according to the current payment guidelines, and receive Medicaid benefits for services that are not a benefit of Medicare or exceed Medicare benefit limitations.

### Medicare Part A and Part C (Noncontracted MAPs Only)

For QMB and MQMB clients who are eligible for Medicare Part A, including clients enrolled in MAPs, claims may be reimbursed to providers for the client's Medicare coinsurance and deductible up to the Medicaid allowed amount for the service less the amount paid by Medicare.

For Medicare Part C, the coinsurance and deductible payment guidelines apply for noncontracted MAPs only.

### Medicare Part B

For QMB and MQMB clients who are eligible for Medicare Part B, Texas Medicaid reimburses the lesser of the following to providers:

- The coinsurance and deductible payment.
- The amount remaining after the Medicare payment amount is subtracted from the allowed Medicaid fee or encounter rate for the service (If this amount is less than the deductible, then the full deductible is reimbursed instead.)

If the Medicare payment is equal to, or exceeds the Medicaid allowed amount or encounter payment for the service, Texas Medicaid does not make a payment for coinsurance.

**Note:** *If the Medicare payment is equal to or exceeds the Medicaid allowed amount or encounter payment for the service, no additional payment is made for coinsurance and deductible.*

QMB clients are not eligible for Medicaid coverage for benefits that are not covered by Medicare, and QMB clients are not eligible for THSteps or CCP Medicaid benefits.

QMB and MQMB coverage guidelines do not impact clients who are living in nursing facilities and who receive a vendor rate for client care through HHSC.

Claims for Medicare copayments can also be submitted to TMHP.

**Referto:** Subsection 2.7.5, “Exceptions” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for information about exceptions for Medicare Part B and Part C (noncontracted MAPs).

Subsection 6.12.1.2, “Medicare Copayments” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for information about HMO copayments.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for more information about filing claims for MQMBs and QMBs.

#### **4.9.1 QMB/MQMB Identification**

The term “QMB” or “MQMB” on TexMedConnect indicates the client is a Qualified Medicare Beneficiary or a Medicaid Qualified Medicare Beneficiary. The Medicare Catastrophic Coverage Act of 1988 requires Medicare premiums, deductibles, and coinsurance payments to be paid for individuals determined to be QMBs or MQMBs who are enrolled in Medicare Part A and meet certain eligibility criteria (see 1 TAC §§358.201 and 358.202).

**Referto:** [Your Texas Benefits Medicaid card \(English and Spanish\)](https://www.tmhp.com) on the TMHP website at [www.tmhp.com](https://www.tmhp.com).

#### **4.9.2 Medicare Part B Crossovers**

The following qualify as Medicare Part B crossover claims: QMB, MQMB, and client TPs 13 or 14, with base plan 10, and category R.

If the provider has not accepted Medicare assignment, the provider may receive payment of the Medicare deductible or coinsurance according to current guidelines on behalf of the QMB, MQMB, client TPs 13 or 14, base plan 10, and category R client. If the provider has collected money from the client and also received reimbursement from TMHP, the provider is required to refund the client’s money.

The Social Security Act requires that Medicaid payment for physician services under Medicare Part B be made on an assignment-related basis.

If Medicaid does not reimburse all or a part of the deductible or coinsurance, the provider is not allowed to bill the client.

**Referto:** Subsection 2.7, “Medicare Crossover Claim Reimbursement” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*).

#### **4.9.3 Clients Without QMB or MQMB Status**

Medicare is primary to Medicaid, and providers must bill Medicare first for their claims. Medicaid’s responsibility for coinsurance and deductibles is determined in accordance with the Medicaid benefits and limitations including the 30-day spell of illness. TMHP denies claims if the client’s coverage reflects Medicare Part A coverage and Medicare has not been billed first.

Providers must check the client’s Medicare card for Part A coverage before billing Texas Medicaid.

**Referto:** Subsection 2.7, “Medicare Crossover Claim Reimbursement” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*).

#### **4.9.4 Medicare Part C**

Providers can verify a client’s Medicare Part C eligibility by:

- Checking TMHP EDI.
- Accessing the Medicaid Client Portal for Providers.
- Using TexMedConnect.

In response to an eligibility inquiry, providers receive the client's Medicare Part C eligibility effective date, end date, and add date.

HHSC contracts with some Medicare Advantage Plans (MAPs) and offers a per-client-per-month payment. The payment to the MAP includes all costs associated with the Medicaid cost sharing for dual-eligible clients. MAPs that contract with HHSC will reimburse providers directly for the cost sharing obligations that are attributable to dual-eligible clients enrolled in the MAP. These payments are included in the capitated rate paid to the HMO and must not be billed to TMHP or a Medicaid client.

TMHP now processes certain claims for clients enrolled in a Medicare Advantage Plan (Part C).

**Referto:** Subsection 6.12, "Filing Medicare Primary Claims" in "Section 6: Claims Filing" (*Vol. 1, General Information*).

A list of MAPs that have contracted with HHSC is available in the "EDI" section of the TMHP website at [www.tmhp.com](http://www.tmhp.com). The list will be updated as additional plans initiate contracts.

#### **4.9.5 Medicare Part D**

Providers can verify a client's Medicare Part D eligibility by accessing the Medicaid Client Portal for Providers.

### **4.10 Health Insurance Premium Payment (HIPP) Program**

The HIPP Program reimburses for the cost of medical insurance premiums. A Medicaid client is eligible for the HIPP Program when Medicaid finds it more cost effective to reimburse a Medicaid client's group health insurance premiums than to reimburse his or her medical bills directly through Medicaid.

By ensuring access to employer sponsored health insurance, individuals who are eligible for the HIPP Program may receive services that are not normally covered through Medicaid. Also, members of the family who are not eligible for Medicaid may be eligible for the HIPP Program.

Providers can benefit from this program by helping the uninsured population, saving money for the state of Texas, and receiving a higher payment from the group health insurance carrier. Providers can increase HIPP Program enrollment by displaying brochures to educate their Medicaid clients about the program.

For more information, call the TMHP-HIPP Program at 1-800-440-0493 or visit [www.hhs.texas.gov/services/financial/health-insurance-premium-payment-hipp-program](http://www.hhs.texas.gov/services/financial/health-insurance-premium-payment-hipp-program).

### **4.11 Long-Term Care Providers**

A nursing facility, home health services provider, or any other similar long-term care services provider that is Medicare-certified must:

- Seek reimbursement from Medicare before billing Texas Medicaid for services provided to an individual who is eligible to receive similar services under the Medicare program.
- Appeal Medicare claim denials for payment, as directed by the department.

A nursing facility, home health services provider, or any other similar long-term care services provider that is Medicare-certified is not required to seek reimbursement from Medicare before billing Texas Medicaid for a person who is Medicare-eligible and has been determined to not be homebound.

### **4.12 State Supported Living Centers**

Inpatient hospital care for individuals who are eligible for Supplemental Security Income (SSI) Medicaid and reside in a State Supported Living Center (SSLC) must be billed to TMHP. Medicaid providers who render off-campus acute care services to Medicaid-eligible SSLC residents are also required to submit claims directly to Medicaid. This is applicable only to residents of the SSLCs operated by HHSC.

Claims and prior authorization requests for acute care services that are rendered to these clients must be submitted directly to Medicaid.

Providers may contact HHSC for assistance or information about billing procedures for state school services.

**4.13 Forms**

The following linked forms can also be found on the [Forms](#) page of the Provider section of the TMHP website at [www.tmhp.com](http://www.tmhp.com):

| Forms                                                                         |

## 5.1 General Information About Prior Authorization

Some fee-for-service Medicaid services require prior authorization as a condition for reimbursement. Information about whether a service requires prior authorization, as well as prior authorization criteria, guidelines, and timelines for the service, is contained in the handbook within Volume 2 that contains the service.

Prior authorization is not a guarantee of payment. Even if a procedure has been prior authorized, reimbursement can be affected for a variety of reasons, e.g., the client is ineligible on the date of service (DOS) or the claim is incomplete. Providers must verify client eligibility status before providing services.

In most instances prior authorization must be approved before the service is provided. Prior Authorization for urgent and emergency services that are provided after business hours, on a weekend, or on a holiday may be requested on the next business day. TMHP considers providers' business hours as Monday through Friday, from 8 a.m. to 5 p.m., Central Time. Prior authorization requests that do not meet these deadlines may be denied.

To avoid unnecessary denials, the request for prior authorization must contain correct and complete information, including documentation of medical necessity. The documentation of medical necessity must be maintained in the client's medical record. The requesting provider may be asked for additional information to clarify or complete a request for prior authorization.

Prior authorization requests may be submitted to the TMHP Prior Authorization Department by mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

**Referto:** Subsection 6.1.4, "Claims Filing Deadlines" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for the TMHP-approved holidays.

**Note:** *Authorization requests for services administered by a client's managed care organization (MCO) or dental plan must be submitted to the client's MCO or dental plan according to the guidelines that are specific to the plan under which the client is covered.*

**Referto:** The *Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks)* for additional information about managed care prior authorizations.

### 5.1.1 Prior Authorization Requests for Clients with Retroactive Eligibility

Retroactive eligibility occurs when the effective date of a client's Medicaid coverage is before the date the client's Medicaid eligibility is added to TMHP's eligibility file, which is called the "add date."

For clients with retroactive eligibility, prior authorization requests must be submitted after the client's add date and before a claim is submitted to TMHP.

When an authorization request is submitted for a client who has received retroactive Texas Medicaid eligibility, providers should notify TMHP to avoid potential delays. Providers can notify TMHP of the retroactive client eligibility in one of the following ways:

- Add a comment in the additional comments field for authorization requests that are submitted online on the TMHP website at [www.tmhp.com](http://www.tmhp.com).
- Add a comment on the cover sheet or the authorization request form for authorizations that are faxed to TMHP.

If the authorization request is made by telephone, the caller can indicate to the representative at TMHP that the client has retroactive Texas Medicaid eligibility.

For services provided to fee-for-service Medicaid clients during the client's retroactive eligibility period, i.e., the period from the effective date to the add date, prior authorization must be obtained within 95 days from the client's add date and before a claim for those services is submitted to TMHP. For services provided on or after the client's add date, the provider must obtain prior authorization within 3 business days of the date of service.

The provider is responsible for verifying the client's eligibility. Providers are strongly encouraged to verify the client's eligibility frequently. Providers can verify eligibility by:

- Accessing the Medicaid Client Portal for Providers.
- Using TexMedConnect.
- Calling the Automated Inquiry System (AIS) at 1-800-925-9126.

If services are discontinued before the client's add date, the provider must still obtain prior authorization within 95 days of the add date to be able to submit claims.

**Referto:** "Section 4: Client Eligibility" (Vol. 1, General Information).

### 5.1.2 Prior Authorization Requests for Newly Enrolled Providers

TMHP cannot issue a prior authorization before Medicaid enrollment is complete. Upon notice of Medicaid enrollment, the provider must contact the appropriate TMHP Authorization Department to request prior approval before providing services that require prior authorization. Regular prior authorization procedures are followed after the TMHP Prior Authorization Department has been contacted.

Retroactive authorizations are not issued unless the regular authorization procedures for the requested services allow for authorizations to be obtained after services are provided. Providers should refer to specific handbook sections for details about authorization requirements, claims filing, and timeframe guidelines for authorization request submissions. Retroactive authorizations may be granted according to the timeframe guidelines for the specific service requested, and do not exceed those timeframes.

**Note:** *All claims must adhere to the claims filing deadlines as outlined in this manual. Retroactive authorizations cannot exceed the claims filing deadline, and are not issued if the date of services is more than 95 days from the date of enrollment as identified by the add date.*

**Referto:** "Section 1: Provider Enrollment and Responsibilities" (Vol. 1, General Information).

### 5.1.3 Prior Authorization for Services Rendered Out-of-State

Texas Medicaid covers medical assistance services that are provided to eligible Texas Medicaid clients while they are in a state other than Texas; however, clients are not covered if they leave Texas to receive out-of-state medical care that can be received in Texas. Services that are provided outside of the state are covered by Texas Medicaid to the same extent that medical assistance is furnished and covered in Texas when the service meets one or more requirements of Texas Administrative Code (TAC) Title 1 §352.17.

**Note:** *Border state providers (providers that render services within 50 miles of the Texas border) are considered in-state providers for Texas Medicaid.*

Services that are rendered outside of the state must be prior authorized by Texas Medicaid, and TMHP must receive claims from out-of-state providers within 365 days of the date of service. Out-of-state providers that seek reimbursement for services that are rendered outside of the state must submit a Texas Medicaid Provider Enrollment application and be approved for enrollment in Texas Medicaid.

Transplant services that are provided out-of-state but available in Texas will not be reimbursed by Texas Medicaid. When requesting an out-of-state prior authorization for a pre-transplant evaluation, the provider must submit a copy of the transplant evaluation performed by a Texas facility to support the need for an out-of-state pre-transplant evaluation.

Medical assistance and transplant services that are provided to eligible Texas Medicaid clients must meet the criteria included in subsection 1.9, “Enrollment Criteria for Out-of-State Providers” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*). If services are rendered to eligible Texas Medicaid clients that do not meet the criteria, the services are not a benefit of Texas Medicaid and will not be considered for reimbursement.

**Referto:** Subsection 1.9, “Enrollment Criteria for Out-of-State Providers” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

Subsection 2.6, “Out-of-State Medicaid Providers” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*).

#### **5.1.4 Prior Authorization Requests for Clients with Private Insurance**

If a client’s primary coverage is private insurance and Medicaid is secondary but prior authorization is required for Medicaid reimbursement, providers must follow the guidelines and requirements listed in the handbook for that service.

#### **5.1.5 Prior Authorization Requests for Clients with Medicare/Medicaid**

If a client’s primary coverage is Medicare, providers must always confirm with Medicare whether a service is a Medicare benefit for the client.

If a service that requires prior authorization from Medicaid is a Medicare benefit and Medicare approves the service, prior authorization from TMHP is not required for reimbursement of the coinsurance or deductible. If Medicare denies the service, then prior authorization is required. TMHP must receive a prior authorization request within 30 days of the date of Medicare’s final disposition. The Medicare Remittance Advice and Notification (MRAN) that contains Medicare’s final disposition must accompany the prior authorization request.

If a service requires prior authorization through Medicaid and the service is not a benefit of Medicare, providers may request prior authorization from TMHP before receiving the denial from Medicare.

**Note:** Refer to the appropriate handbooks in this manual for additional prior authorization guidelines for clients with dual eligibility.

#### **5.1.6 Prior Authorizations for Personal Care Services (PCS)**

Before sending a prior authorization request for personal care services to TMHP, the Texas Department of State Health Services (DSHS) will fax the communication tool to the provider. The provider must verify that the information listed on the tool is accurate. If any information on the communication tool is inaccurate, the provider must call the DSHS case manager listed on the tool within three business days of receipt to explain the inaccuracy. The DSHS case manager will correct the communication tool and will fax the updated tool to the provider. The provider must review the updated communication tool and call the DSHS case manager if any inaccuracies remain.

If the provider does not contact the DSHS case manager within three business days of receipt of the communication tool, the case manager will send a prior authorization request to TMHP to have the authorization issued with the information provided on the communication tool.

**Important:** If a provider fails to notify the DSHS case manager of inaccurate information within three business days of receipt of the communication tool, HHSC will not consider making changes to authorizations for past dates of service.

It is the PCS provider's responsibility to know the prior authorization period for each client who has an open authorization and to ensure that, before the authorization expires, a DSHS case manager has conducted a reassessment and extended the authorization through TMHP. If a provider has not received an updated provider notification letter from TMHP within 30 days of the authorization's expiration date, the provider should do one of the following:

- Call the TMHP PCS Prior Authorization Inquiry Line at 1-888-648-1517 and ask whether an authorization is in process.
- Call the TMHP PCS Client Line at 1-888-276-0702, Option 2, and ask for a referral to have DSHS conduct a reassessment.
- Call the DSHS regional office, and notify the DSHS case manager that a new authorization has not been received.

Clients can experience a gap in service if an authorization is not updated before it expires. Providers will not be reimbursed for services provided after an authorization has expired and before a new authorization has been issued.

Providers must retain current client information on file.

#### **5.1.6.1 Authorizations for Multiple PCS Clients Within the Same Household**

DSHS case managers synchronize PCS authorizations within households that have multiple clients who are receiving PCS.

Synchronization of authorizations within households are made as PCS reassessments come due. When clients are due for reassessment, the DSHS case manager assess all eligible clients in the home and submit authorizations for all eligible clients in the household for the same 52-week authorization period. Some authorizations within a household may be shortened or closed and then reinstated to be in alignment with other clients in the same household. DSHS case managers communicate with the provider about the actions that are being taken using the existing Communication Tool.

***Note:** There should be no lapse in services to the client.*

#### **5.1.6.2 Verifying the National Provider Identifier (NPI) on PCS Authorizations**

When an authorization notification letter is received by a PCS provider, the provider should verify that the correct NPI was used on the prior authorization for the PCS client. Providers must verify that the NPI on the prior authorization is correct for the location at which the client is receiving services.

Providers who provide services through the Agency option or the Consumer Directed Services (CDS) option must ensure that the NPI on the prior authorization is accurate for the option the client is using. If a provider discovers that the NPI used on the prior authorization is incorrect, the provider should contact the DSHS case manager and ask for the correct NPI to be submitted to TMHP.

#### **5.1.7 Prior Authorization for Outpatient Self-Administered Prescription Drugs**

***Referto:** Subsection 1.1, "About the Vendor Drug Program" in the *Outpatient Drug Services Handbook* (Vol. 2, *Provider Handbooks*) for information about this program.*

#### **5.1.8 Prior Authorization for Nonemergency Ambulance Transport**

According to 1 TAC §354.1111, nonemergency transport is defined as ambulance transport provided for a Medicaid client to or from a scheduled medical appointment, to or from a licensed facility for treatment, or to the client's home after discharge from a hospital when the client has a medical condition such that the use of an ambulance is the only appropriate means of transportation (i.e., alternate means of transportation are medically contraindicated).

***Referto:** The *Ambulance Services Handbook* (Vol. 2, *Provider Handbooks*) for more information about ambulance services.*

According to Human Resource Code (HRC) §32.024 (t), a Medicaid-enrolled physician, nursing facility, health-care provider, or other responsible party is required to obtain authorization before an ambulance is used to transport a client in circumstances not involving an emergency.

HRC states that a provider of nonemergency ambulance transport is entitled to payment from the nursing facility, health-care provider, or other responsible party that requested the service if payment under the Medical Assistance Program is denied because of lack of prior authorization and the ambulance provider submits a copy of the claim for which payment was denied.

**Referto:** Subsection 5.1.8.1, “Appealing Non-Emergent Ambulance Claims Denied for Missing Prior Authorization Number” in this section for more information about appeals.

The *Medical Transportation Program Handbook (Vol. 2, Provider Handbooks)* for more information about the Medical Transportation Program.

TMHP responds to nonemergency transport prior authorization requests within 2 business days of receipt of requests for 60 days or less. Providers should submit all requests for a prior authorization number (PAN) in sufficient time to allow TMHP to issue the PAN before the date of the intended transport.

If the client’s medical condition is not appropriate for transport by ambulance, nonemergency ambulance services are not a benefit. Prior authorization is a condition for reimbursement but is not a guarantee of payment. The client and provider must meet all of the Medicaid requirements, such as client eligibility and claim filing deadlines.

Medicaid providers who participate in one of the Medicaid Managed Care health maintenance organization (HMO) plans must follow the HMO’s prior authorization requirements.

The TMHP Ambulance Unit reviews the prior authorization request to determine whether the client’s medical condition is appropriate for transport by ambulance. Incomplete information may cause the request to be suspended for additional medical information or be denied.

The following information helps TMHP determine the appropriateness of the transport:

- An explanation of the client’s physical condition that establishes the medical necessity for transport. The explanation must clearly state the client’s condition requiring transport by ambulance.
- The necessary equipment, treatment, or personnel to be used during the transport.
- The origination and destination points of the client’s transport.

Prior authorization is required when an extra attendant is needed for any nonemergency transport.

When a client’s condition changes, such as a need for oxygen or additional monitoring during transport, the prior authorization request must be updated.

**Referto:** Subsection 2.4.9, “Extra Attendant” in the *Ambulance Services Handbook (Vol. 2, Provider Handbooks)*.

#### **5.1.8.1      Appealing Non-Emergent Ambulance Claims Denied for Missing Prior Authorization Number**

Medicaid fee-for-service ambulance providers can appeal claims that have been denied for a missing prior authorization number that was not provided by the requesting physician, facility, or hospital for nonemergent transport. The ambulance provider must include proper documentation with the appeal.

An ambulance provider is required to maintain documentation that represents the client’s medical condition and other clinical information to substantiate medical necessity, the level of service, and the mode of transportation requested. This supporting documentation is limited to documents developed or maintained by the ambulance provider.

## The Appeals Process

The ambulance provider must submit the appeal as soon as it is realized that the requesting provider did not obtain the prior authorization. The appeal must be submitted according to all filing deadlines.

**Referto:** “Section 7: Appeals” (*Vol. 1, General Information*) for information about filing deadlines.

The following documentation must be included with the appeal to support the need for transport:

- Documentation representing the client’s medical condition.
- Other clinical information to support medical necessity.
- Level of service given.
- Mode of transportation requested.
- A copy of the run sheet, which must be signed by the emergency medical technician (EMT) in attendance, and which must also include the name and telephone number of the employee requesting the service for the physician, facility, or hospital.

### 5.1.8.2 Prior Authorization Types, Definitions

#### One-Time, Nonrepeating

One-time, nonrepeating requests are reserved for those clients who require a one-time transport. The request must be signed and dated by a physician, physician assistant (PA), nurse practitioner (NP), clinical nurse specialist (CNS), registered nurse (RN), or discharge planner with knowledge of the client’s condition. Without a signature and date, the form is considered incomplete.

#### Recurring

Recurring requests, up to 60 days, are reserved for those clients whose transportation needs are not anticipated to last longer than 60 days. The request must be signed and dated by a physician, PA, NP, or CNS. Without a signature and date, the form is considered incomplete. The request must include the approximate number of visits needed for the repetitive transport (e.g., dialysis, radiation therapy).

**Referto:** [Non-emergency Ambulance Prior Authorization Request](http://www.tmhp.com) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

### 5.1.8.3 Nonemergency Prior Authorization Process

To obtain prior authorization, providers must submit a completed Nonemergency Ambulance Prior Authorization Request Texas Medicaid and CSHCN Services Program form by fax to the TMHP Ambulance Unit at 512-514-4205. Prior authorization can also be requested through the TMHP website at [www.tmhp.com](http://www.tmhp.com).

The Nonemergency Ambulance Prior Authorization Form must not be modified. If the form is altered in any way, the request may be denied. The form must be filled out by the facility or the physician’s staff that is most familiar with the client’s condition. For nonemergency ambulance transportation services rendered to a client, ambulance providers may coordinate the nonemergency ambulance prior authorization request between the requesting provider, which may include a physician, nursing facility, healthcare provider, or other responsible party. Ambulance providers may assist in providing necessary information such as their National Provider Identifier (NPI) number, fax number, and business address to the requesting provider. However, the Non-emergency Ambulance Prior Authorization Request form must be signed, dated, and submitted by the Medicaid-enrolled requesting provider, not the ambulance provider.

**Referto:** [Non-emergency Ambulance Prior Authorization Request](http://www.tmhp.com) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Medicaid providers may request prior authorization using one of the following methods:

- The client's physician, nursing facility, Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF-IID), health-care provider, or other responsible party completes the online prior authorization request on the TMHP website at [www. tmhp.com](http://www.tmhp.com).
- Hospitals may call TMHP at 1-800-540-0694 to request prior authorization Monday through Friday, 7 a.m. to 7 p.m., Central Time. A request may be submitted up to 60 days before the date on which the nonemergency transport will occur.

A request for a one-day transport may be submitted on the next business day following the transport in some circumstances; however, every attempt should be made to obtain prior authorization before the transport takes place. Authorization requests for one day transports submitted beyond the next business day will be denied.

A request for a recurring transport must be submitted before the client is transported by ambulance.

After a prior authorization request has been approved, if the client's condition deteriorates or the need for equipment changes so that additional procedure codes must be submitted for the transport, the requesting provider must submit a new Nonemergency Ambulance Prior Authorization Request form.

Clients who require a hospital-to-hospital or hospital-to-outpatient medical facility transport are issued a PAN for that transport only.

**Referto:** Subsection 4.2.1, "Prior Authorization Requirements" in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for more information on nonemergency prior authorization for hospitals.

TMHP reviews all of the documentation it receives. An online prior authorization request submitted through the TMHP website is responded to with an online approval or denial. Alternately, a letter of approval or denial is faxed to the requesting provider. The client is notified by mail if the authorization request is denied or downgraded. Reasons for denial include documentation that does not meet the criteria of a medical condition that is appropriate for transport by ambulance, or the client is not Medicaid-eligible for the dates of services requested. Clients may appeal prior authorization request denials by contacting TMHP Client Notification at 1-800-414-3406. Providers may not appeal prior authorization request denials.

The requesting provider must contact the transporting ambulance provider with the PAN and the dates of service that were approved.

**Referto:** Subsection 5.5.1, "Prior Authorization Requests Through the TMHP Website" in this section for additional information, including mandatory documentation requirements and retention.

Providers are not required to fax medical documentation to TMHP; however, in certain circumstances, TMHP may request that the hospital fax the supporting documentation. Incomplete online or faxed request forms are not considered a valid authorization request and are denied.

A nonemergency transport will be denied when a claim is submitted with a Nonemergency Ambulance Prior Authorization Request Texas Medicaid and CSHCN Services Program form that is completed and signed after the service is rendered. In addition, a Nonemergency Ambulance Prior Authorization Request Texas Medicaid and CSHCN Services Program form that is completed and signed after the service is rendered will not be accepted on appeal of the denial.

The hospital must maintain documentation of medical necessity, including a copy of the authorization from TMHP in the client's medical record for any item or service that requires prior authorization. The services provided must be clearly documented in the medical record with all pertinent information regarding the client's condition to substantiate the need and medical necessity for the services.

**Referto:** Subsection 4.2.1, “Prior Authorization Requirements” in the *Inpatient and Outpatient Hospital Services Handbook* (Vol. 2, *Provider Handbooks*).

#### **5.1.8.4 Nonemergency Ambulance Exception Request**

Clients whose physician has documented a debilitating condition and who require recurring trips that will extend longer than 60 days may qualify for an exception to the 60-day prior authorization request.

To request an exception, providers must submit all of the following documentation:

- A completed Nonemergency Ambulance Exception form that is signed and dated by a physician. Without a physician’s signature and date, the form is considered incomplete.
- Medical records that support the client’s debilitating condition, which may include, but is not limited to:
  - Discharge information.
  - Diagnostic images (e.g., MRI, CT, X-rays)
  - Care plan.

**Note:** *Documentation submitted with statements similar to “client has a debilitating condition” are insufficient.*

#### **5.1.8.5 Documentation of Medical Necessity and Run Sheets**

##### **5.1.8.5.1 Documentation of Medical Necessity**

Retrospective review may be performed to ensure documentation supports the medical necessity of the transport.

Documentation to support medical necessity must include one of the following:

- The client is bed-confined before, during and after the trip and alternate means of transport is medically contraindicated and would endanger the client’s health (i.e., injury, surgery, or the use of respiratory equipment). The functional, physical, and mental limitations that have rendered the client bed-confined must be documented.

**Note:** *Bed-confined is defined as a client who is unable to stand, ambulate, and sit in a chair or wheelchair.*
- The client’s medical or mental health condition is such that alternate means of the transport is medically contraindicated and would endanger the client’s health (e.g., injury, surgery, or the use of respiratory equipment).
- The client is a direct threat to himself or herself or others, which requires the use of restraints (chemical or physical) or trained medical personnel during transport for client and staff safety (e.g., suicidal).

When physical restraints are needed, documentation must include, but is not limited to, the following:

- Type of restraint
- Time frame of the use of the restraint
- Client’s condition

**Note:** *The standard straps used in an ambulance transport are not considered a restraint.*

##### **5.1.8.5.2 Run Sheets**

The run sheet is used as a medical record for ambulance services and may serve as a legal document to verify the care that was provided, if necessary. The ambulance provider does not have to submit the run sheet with the claim.

The ambulance provider must have documentation to support the claim. Without documentation that would establish the medical necessity of a nonemergency ambulance transport, the transport may not be covered by Texas Medicaid.

The ambulance provider may decline the transport if the client's medical or mental health condition does not meet the medical necessity requirements.

It is the responsibility of the ambulance provider to maintain (and furnish to Texas Medicaid upon request) concise and accurate documentation. The run sheet must include the client's physical assessment that explains why the client requires ambulance transportation and cannot be safely transported by an alternate means of transport.

Coverage will not be allowed if the trip record does not contain a sufficient description of the client's condition at the time of the transfer for Texas Medicaid to reasonably determine that other means of transportation are contraindicated. Coverage will not be allowed if the description of the client's condition is limited to statements or opinions such as the following:

- "Patient is nonambulatory."
- "Patient moved by drawsheet."
- "Patient could only be moved by stretcher."
- "Patient is bed-confined."
- "Patient is unable to sit, stand or walk."

The run sheet should "paint a picture" of the client's condition and must be consistent with documentation found in other supporting medical record documentation (including the nonemergency prior authorization request.)

#### **5.1.8.6 Nonemergency Prior Authorization and Retroactive Eligibility**

Retroactive eligibility occurs when the effective date of a client's Medicaid coverage is before the eligibility "add date," which is the date the client's Medicaid eligibility is added to TMHP's eligibility file.

For clients with retroactive eligibility, prior authorization requests must be submitted after the client's add date and before a claim is submitted to TMHP.

For services that are provided to fee-for-service Medicaid clients during a client's retroactive eligibility period (i.e., the period from the effective date to the add date), providers must obtain prior authorization within 95 days of the client's add date and before submitting a claim for those services to TMHP.

For services provided on or after the client's add date, the provider must obtain prior authorization within three business days of the date of service.

The provider is responsible for verifying the client's eligibility. Providers are strongly encouraged to verify the client's eligibility frequently. Providers can verify eligibility by:

- Checking the TMHP electronic data interchange (EDI).
- Accessing the Texas Medicaid Client Portal for Providers.
- Using TexMedConnect.
- Calling the Automated Inquiry System (AIS) at 1-800-925-9126.

If services are discontinued before the client's add date, the provider must still obtain prior authorization within 95 days of the add date to be able to submit claims.

If a client's Medicaid eligibility is pending, a PAN must be requested before a nonemergency transport. Initially this request will be denied for Medicaid eligibility. When Medicaid eligibility is established, the requestor has 95 days from the date on which the eligibility was added to TMHP's files to contact the TMHP Ambulance Unit and request that authorization be considered.

To inquire about Medicaid eligibility, providers can contact AIS at 1-800-925-9126.

**5.1.9 Nonemergency Transport Authorization for Medicare and Medicaid Clients**

Providers should simultaneously request prior authorization for the nonemergency transport from TMHP for an Medicaid Qualified Medicare Beneficiary (MQMB) client in the event the service requested is denied by Medicare as a non-covered service.

***Note:** Qualified Medicare Beneficiary (QMB) clients are not eligible for Medicaid benefits. Providers can contact Medicare for the Medicare prior authorization guidelines.*

**5.2 Authorization Requirements for Unlisted Procedure Codes**

Providers have the option to obtain prior authorization before rendering the service if all of the required information is available. When requesting a fee-for-service prior authorization for an unlisted procedure code, providers must submit the following information with the prior authorization request:

- Client’s diagnosis.
- Medical records that show the prior treatment for this diagnosis and the medical necessity of the requested procedure.
- A clear, concise description of the procedure to be performed.
- Reason for recommending this particular procedure
- A procedure code that is comparable to the procedure being requested.
- Documentation that this procedure is not investigational or experimental.
- Place of service in which the procedure is to be performed.
- The physician’s intended fee for this procedure including the manufacturer’s suggested retail price (MSRP) or other payment documentation.

If any of this information is unavailable at the time the prior authorization is requested, the request will be returned as incomplete; however, this is not a denial of reimbursement. If the required information becomes available before the service is performed, the prior authorization request can be resubmitted, or the required medical necessity and payment documentation can be submitted with the claim after the service is provided to be considered for reimbursement.

The prior authorization number must appear on the claim when it is submitted to TMHP. Claims submitted without the appropriate prior authorization will be denied.

**5.3 Benefit Code**

A benefit code is an additional data element that identifies a state program.

Providers that participate in the following programs must use the associated benefit code when they submit prior authorizations:

| Program                                                                                   | Benefit Code |
|-------------------------------------------------------------------------------------------|--------------|
| Comprehensive Care Program (CCP)                                                          | CCP          |
| Texas Health Steps (THSteps) Medical                                                      | EP1          |
| THSteps Dental                                                                            | DE1          |
| Family Planning Agencies*                                                                 | FP3          |
| Hearing Aid Dispensers                                                                    | HA1          |
| *Agencies only—Benefit codes should not be used for individual family planning providers. |              |

| Program                                                                                          | Benefit Code |
|--------------------------------------------------------------------------------------------------|--------------|
| Maternity                                                                                        | MA1          |
| County Indigent Health Care Program                                                              | CA1          |
| Early Childhood Intervention (ECI) providers                                                     | EC1          |
| Tuberculosis (TB) Clinics                                                                        | TB1          |
| Intellectual or Developmental Disability (IDD) case management providers                         | MH2          |
| <b>*Agencies only—Benefit codes should not be used for individual family planning providers.</b> |              |

## 5.4 Submitting Prior Authorization Forms

A physician or health care provider may submit a medical prior authorization recertification request up to 60 days before the expiration of the current authorization of services. Once submitted, the recertification request will be reviewed and a determination will be issued before the existing authorization ends.

For some services, a prior authorization recertification for a course of treatment cannot be issued 60 days before the end of the current authorization period. For example, physical therapy, occupational therapy, speech therapy, and private duty nursing prior authorizations cannot be recertified 60 days before the end of the current authorization period because of requirements for timely documentation. This limitation applies to both fee-for-service and managed care clients.

When a recertification request cannot be reviewed 60 days before the current prior authorization ends, the provider will receive a response from TMHP explaining that the request has been submitted too early, and the provider will need to resubmit at a later time. For managed care clients, providers should contact the client's specific MCO for details.

Providers must complete all essential fields on prior authorization forms submitted to TMHP to initiate the prior authorization process.

If any essential field on a prior authorization request has missing, incorrect, or illegible information, TMHP returns the original request to the provider with the following message:

“TMHP Prior Authorization could not process this request because the request form submitted has missing, incorrect, or illegible information in one or more essential fields. Please resubmit the request with all essential fields completed with accurate information for processing by TMHP within 14 business days of the request receipt date.”

TMHP uses the date that the complete and accurate request form is received to determine the start date for services. Previous submission dates of incomplete forms returned are not considered when determining the start date of service.

Providers that need to update information on a prior authorization request form must strike through the incorrect information with a single line. The original content must remain legible, and the change must be initialed and dated by the original signatory or ordering physician when applicable. Changes that have been made using correction fluid (e.g., Wite-Out) will not be accepted.

Providers must respond to an incomplete prior authorization request within 14 business days of the request receipt date. Incomplete prior authorization requests are requests that are received by TMHP with missing, incomplete, or illegible information.

Prior to denying an incomplete request, TMHP's Prior Authorization department will attempt to get the correct information from the requesting provider. The Prior Authorization department will make a minimum of three attempts to contact the requesting provider before sending a letter to the client about the status of the request and the need for additional information.

If the information that is necessary to make a prior authorization determination is not received within 14 business days of the request receipt date, the request will be denied as “incomplete.” To ensure timely processing, providers should respond to requests for missing or incomplete information as quickly as possible.

For fee-for-service (FFS) Medicaid requests that require a physician review before a final determination can be made, TMHP’s Physician Reviewer will complete the review within three business days of receipt of the completed prior authorization request. An additional three business days will be allowed for requests that require a peer-to-peer review with the client’s prescribing physician.

For Children with Special Health Care Needs (CSHCN) Services Program requests that do not appear to meet CSHCN medical policy, the TMHP prior authorization nurse will refer those requests to the CSHCN Services Program for review and determination. The CSHCN Services Program will complete the review within three business days of receipt of the completed prior authorization request.

**Note:** *Providers may resubmit a new, complete request after receiving a denial for an incomplete request; however, the timeliness submission requirements will apply.*

Essential fields contain information needed to process a prior authorization request and include the following:

- Client name
- Client Medicaid number (patient control number [PCN])
- Client date of birth
- Provider name
- National Provider Identifier (NPI)
- *Current Procedural Terminology (CPT) or Healthcare Common Procedure Coding System (HCPCS) procedure code*
- Quantity of service units requested based on the CPT or HCPCS code requested

#### **5.4.1 Recreating TMHP Prior Authorization and Authorization Forms to Fill Out Electronically**

Providers are allowed to recreate a Texas Medicaid or CSHCN Services Program prior authorization or authorization form in order to transfer it to an electronic format only if there are no alterations in the form’s content or placement of information (field location).

To ensure that the most current version of the form is utilized, all forms submitted to the prior authorization department for processing must include the form number, effective date and revision date, if applicable, as it appears on the original TMHP form that is published on the TMHP Forms web page.

**Important:** *Prior authorization and authorization forms recreated and filled out electronically on the provider’s computer must continue to be printed and faxed or submitted by mail. To submit prior authorization and authorization requests electronically, providers must use the prior authorization tool available on the TMHP website.*

### **5.5 Prior Authorization Submission Methods**

Prior authorization requests can be submitted by fax, mail, telephone, and online through the TMHP website at [www.tmhp.com](http://www.tmhp.com). The methods to use to request the prior authorization depends on the service being requested.

### 5.5.1 Prior Authorization Requests Through the TMHP Website

Online prior authorization requests for some services in the following areas can be submitted through the TMHP website at [www.tmhp.com](http://www.tmhp.com):

- Home Health
- Home Telemonitoring
- Special Medical Prior Authorization (SMPA)
- CCP
- Ambulance
- Substance Use Disorder (SUD) services

The benefits of submitting prior authorization requests through the TMHP website include:

- Online editing to ensure that the required information is being submitted correctly.
- The prior authorization number is issued within seconds of submission and confirms that the prior authorization request was accepted. Before providing services, providers must confirm that the prior authorization was approved.
- Notification of approvals and denials are available more quickly.
- Extension requests and status checks can be performed online for prior authorization requests that were submitted online.

Providers can access online prior authorization requests from the [Prior Authorization](#) page located under the Topics tab on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Instructions for submitting prior authorization requests on the TMHP website are located in the Help section at the bottom of the Prior Authorization page.

Prior authorizations that are submitted online will be processed using the same guidelines as prior authorizations submitted by other methods.

Before providers can submit online prior authorization requests, providers must register on the TMHP website and assign an administrator for each National Provider Identifier (NPI), if one is not already assigned. Users who are configured with administrator rights automatically have permission to submit prior authorization requests.

The NPI administrator can assign submission privileges for nonadministrator accounts. Billing services and clearinghouses must obtain access to protected health-care information through the appropriate administrator of each NPI provider number for which they are contracted to provide services.

#### 5.5.1.1 Duplicate Validation Check

Prior authorizations submitted to TMHP electronically on the TMHP website are subject to a duplicate validation check. Prior authorizations that are duplicates of a previously submitted authorization return an immediate response with an associated duplicate submission error message.

The error message instructs providers to either update or remove details of the prior authorization submission.

If there is a modifier needed for authorization or claims processing, providers should indicate the primary modifier in the field labeled “Modifier 1.”

The appropriate modifier that identifies the type of therapy being requested needs to be used when providers submit requests for physical, occupational, and speech therapy.

### 5.5.1.2 Document Requirements and Retention

If information provided in the online request is insufficient to support medical necessity, TMHP Prior Authorization staff may ask the provider to submit additional paper documentation to support the medical necessity for the service being requested.

Submission of prior authorization requests on the secure pages of the TMHP website does not replace adherence to and completion of the paper forms/documentation requirements outlined in this manual and other publications.

Documentation requirements include, but are not limited to, the following:

- Documentation that supports the medical necessity for the service requested.
- Completion and retention in the client's medical record of all required prior authorization forms
- Adherence to signature and date requirements for prior authorization forms and other required forms that are kept in the client record, including the following:
  - All prior authorization forms completed and signed before the online prior authorization request is made
  - Original handwritten or electronic signatures (Stamped signatures and images of wet signatures are not accepted by Texas Medicaid.)
- A printed copy of the Online Request Form, which must be retained in the client's medical record

Any provider, client, or client's responsible adult who is required to sign a prior authorization form or any supporting documentation may do so using a wet or electronic signature. Any electronic signature technologies that are used must comply with all federal and state statutes and administrative rules.

Any required documentation that is missing from the client's medical record subjects the associated payments for services to be recouped.

#### 5.5.1.2.1 Acknowledgment Statement

Before submitting each prior authorization request, providers (and submitters on behalf of providers) must affirm that they have read, understood, and agree to the certification and terms and conditions of the prior authorization request.

Providers and submitters are separately held accountable for their declarations after they have acknowledged their agreement and consent by checking the "We Agree" checkbox after reviewing the certification statement and terms and conditions.

#### 5.5.1.2.2 Certification Statement

"The Provider and Authorization Request Submitter certify that the information supplied on the prior authorization form and any attachments or accompanying information constitute true, correct, and complete information. The Provider and Authorization Request Submitter understand that payment of claims related to this prior authorization will be from federal and state funds, and that falsifying entries, concealment of a material fact, or pertinent omissions may constitute fraud and may be prosecuted under applicable federal and/or state law. Fraud is a felony, which can result in fines or imprisonment.

"By checking 'We Agree' you agree and consent to the Certification above and to the TMHP 'Terms and Conditions.'"

#### 5.5.1.2.3 Terms and Conditions

"I hereby agree to keep such records as are necessary to disclose fully the extent of services provided to individuals under the state's Title XIX plan and to furnish information regarding any payments claimed for providing such services as the State Agency or U.S. Dept. of Health and Human Services may request. I further agree to accept, as payment in full, the amount paid by Medicaid for those claims submitted for payment under that program, with the exception of authorized deductible, coinsurance, copayment or

similar cost-sharing charge. I certify that the services listed above are/were medically indicated and necessary to the health of this patient and were personally furnished by me or my employee under my personal direction.

“Notice: This is to certify that the foregoing information is true, accurate and complete. I understand that payment and satisfaction of this claim, based on information provided on the Prior Authorization form, will be from federal and state funds, and that any false claims, statements or documents, or concealment of a material fact, may be prosecuted under applicable federal or state law.”

Omission of information or failure to provide true and accurate information or notice of changes to the information previously provided may result in termination of the provider’s Medicaid enrollment and/or personal exclusion from Texas Medicaid.

### **5.5.2 Prior Authorization Requests to TMHP by Fax, Telephone, or Mail**

When submitting prior authorization requests through fax or mail, providers must submit the requests on the approved form. If necessary, providers may submit attachments with the form. Providers must follow the guidelines and requirements listed in the handbook for the service. Providers can refer to the provider handbooks for the guidelines and requirements listed for a specific service.

Prior authorization requests must be signed and dated by a physician or dentist who is familiar with the client’s medical condition before the request is submitted to TMHP. When allowed, prior authorizations must be signed and dated by an advanced practice registered nurse (APRN) or PA who is familiar with the client’s medical condition before the request is submitted to TMHP. Prior authorization requests for services that may be signed by a licensed health-care provider other than a physician, dentist, or when allowed by an APRN and PA, do not require handwritten signatures and dates. Electronic signatures from an RN or therapist are acceptable when submitting therapy requests for CCP.

All signatures must be electronic, digital or handwritten. An electronic or digital signature must be derived using software that creates a digital signature logo with a system-generated date and time stamp or includes the logo of the digital software used. Photocopy or ink stamp of a handwritten signature or a typed signature without a digital stamp are not permitted. TMHP will not authorize any dates of services on the request earlier than the date of the provider’s signature. The prior authorization request that contains the original signature must be kept in the client’s medical record for future access and possible retrospective review. These documentation requirements also apply to telephone authorizations. To avoid delays, providers are encouraged to have all clinical documentation at the time of the initial telephone authorization request.

**Note:** *Obstetric (OB) services providers are no longer allowed to initiate prior authorization requests or ultrasound extension requests over the telephone.*

To initiate a new prior authorization request or to request an extension of an existing prior authorization, OB services providers are required to submit the request online using the TMHP secure provider portal or on paper by faxing or mailing the applicable prior authorization form to TMHP.

Providers can continue to use the Prior Authorization telephone line to inquire about the status of the prior authorization requests that have been submitted to TMHP online, by fax, or mail.

#### **5.5.2.1 Prior Authorization Calls**

Initial prior authorization calls are handled by the TMHP Contact Center. If the contact center representative determines that a prior authorization inquiry can be better handled by the TMHP Prior Authorization department, the TMHP Contact Center representative will transfer the call to a Prior Authorization Clinician.

**Note:** *This does not impact the timeframes for the resolution of more complex issues.*

### 5.5.2.2 TMHP Prior Authorization Requests by Fax

Providers who fax new prior authorization requests, resubmitted requests, or additional information to complete a request must include:

- A working fax number on the prior authorization form, so that they can receive faxed responses and correspondence from TMHP.
- The last four digits of the client's Medicaid identification number on the fax coversheet.

**Note:** Prior authorization cover sheets must not contain any protected health information (PHI) per HIPAA. The faxed cover sheet is not meant to replace the appropriate prior authorization form. Providers cannot include information on a cover sheet that is needed to complete the review of a request.

If a provider is faxing prior authorization requests for more than one client, each client request must be faxed individually with a separate cover sheet. Requests received with multiple clients will be returned to the provider for resubmission to ensure Health Insurance Portability and Accountability Act (HIPAA) compliance.

### 5.5.3 Home Health Services Prior Authorizations

Home health services providers cannot initiate new prior authorization requests or request extensions over the telephone. The following home health services are affected:

- Skilled nursing and home health aide visits
- Physical and occupational therapy
- Durable medical equipment (DME)
- Expendable medical supplies

Home health services providers must initiate new prior authorization requests or request extension of existing prior authorizations online using the TMHP secure provider portal or on paper by faxing or mailing TMHP the appropriate paper prior authorization form.

Home health services providers can use telephone number 1-800-925-8957 for follow-up and status inquiry of prior authorizations.

### 5.5.4 Radiology Prior Authorizations

TMHP performs radiology prior authorization services.

**Referto:** Subsection 4.2.6, “Authorization Requirements for Cardiac Nuclear Imaging Services, CT, CTA, fMRI, MRA, MRE, MRI, and PET” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* to determine which radiology services require a prior authorization.

#### 5.5.4.1 Retroactive Authorization Requests

Retroactive authorization requests for outpatient diagnostic computed tomography (CT), magnetic resonance (MR), positron emission tomography (PET), and cardiac nuclear imaging services for Texas Medicaid fee-for-service clients must be submitted to TMHP. The retroactive authorizations requests must be submitted to TMHP no later than 14 calendar days after the day on which the study was completed, regardless of the method of submission. If the retroactive authorization request is submitted after the allotted time, the authorization request will not be processed.

## 5.6 Verifying Prior Authorization Status

Prior authorizations are processed based on the date the request is received. Requests with all required information can take up to three business days after the date of receipt for TMHP to complete the authorization process.

Providers can check the status of prior authorizations requested online through the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Providers may also check status of prior authorizations that are issued by TMHP by using the following numbers.

| Contact                                                       | Telephone Number |
|---------------------------------------------------------------|------------------|
| Personal Care Services (PCS) Prior Authorization Inquiry Line | 1-888-648-1517   |
| CCP and Home Health Status Line                               | 1-800-846-7470   |
| All other authorization requests                              | 1-800-925-9126   |

## 5.7 Prior Authorization Notifications

TMHP sends a notification to the provider when the prior authorization is approved, denied, or modified. If TMHP receives prior authorization requests with incomplete or insufficient information, TMHP will ask the requesting provider to furnish the additional documentation needed before TMHP can make a decision on the request. If the requesting provider does not respond to the request for additional information, the prior authorization request will be denied. It is the requesting provider's responsibility to contact the appropriate provider, when necessary, to obtain the additional documentation.

## 5.8 Prior Authorization Denials Appeals Process

Prior authorizations that are denied by TMHP can be resubmitted to the TMHP Prior Authorization Department with new or additional information for reconsideration.

If the request is denied a second time, or if the provider has no new or additional information, the provider may file an Administrative Appeal to HHSC. Providers must include a copy of the denial letter.

It is strongly recommended that providers maintain a list that details the prior authorizations, including:

- Client's name
- Client's Medicaid number
- Date of service
- NPI
- Items submitted

This information will be required if a provider needs to file an administrative review.

## 5.9 Closing a Prior Authorization

When a client decides to change providers or elects to discontinue prior-authorized services before the authorization ends, that prior authorization is updated to reflect the early closure date and the reason for closure.

If a client with an active prior authorization changes providers, TMHP must receive a change of provider letter with the request for a new prior authorization in accordance with submission guidelines for the service. The client must sign and date the letter, which must include the name of the previous provider, the current provider, and the effective date for the change.

The client is responsible for notifying the previous provider that the client is discontinuing services and the effective date of the change. TMHP also notifies the previous provider by mail when a prior authorization has been closed early. The letter includes the beginning date of service, the revised ending date of the authorization, and the reason for the early closure.

If a provider submits a Change of Provider letter in the middle of an existing authorization period, the current authorization will be end-dated and the original provider will be notified. TMHP will send the new provider an authorization that begins on the next business day after the end date and lasts through the remainder of the authorization period.

5.10 Submitting Claims for Services That Require Prior Authorization

Claims submitted for services that require prior authorization must indicate the authorization number, NPI, procedure codes, dates of service, required modifiers, number of units, and the amount for manually priced procedure codes as detailed on the authorization letter. If the prior authorization letter shows itemized details and the provider rendered all services listed, the details on the claim must match the details on the prior authorization letter.

**Important:** *Claims processing and payment may be delayed if the detailed information on the authorization letter and the claim details do not match exactly.*

Claims for prior authorized services must contain only one prior authorization number per claim. Prior authorization numbers must be indicated on the applicable electronic fields or in the following blocks for paper claim forms:

| Paper Claim Form                             | Block for Prior Authorization Number |
|----------------------------------------------|--------------------------------------|
| CMS-1500 (professional) claim form           | Block 23                             |
| UB-04 CMS-1450 (institutional) claim form    | Block 63                             |
| American Dental Association (ADA) claim form | Block 2                              |
| 2017 claim form                              | Block 30                             |

**Referto:** Subsection 6.1.3, “TMHP Paper Claims Submission” in “Section 6: Claims Filing” (*Vol. 1, General Information*).

5.10.1 Authorization and Manually Priced Claims

If prior authorization has been obtained for services that use manually priced procedure codes, providers must submit claims for them using the MSRP that was submitted with the authorization request and the following information that is listed on the authorization letter:

- Authorization number
- NPI
- Procedure codes
- Dates of service
- Types of service
- Required modifiers

If the authorization letter shows itemized details, the claim must include all rendered services as they are itemized on the authorization letter and the MSRP rate for each of those services. The procedure codes and MSRP rates that are detailed on the claim must match the procedure codes that are detailed in the authorization letter and the MSRP rates that were submitted with the authorization request. Claims processing and payment may be delayed if there is not an exact match between the detailed information on the authorization letter, the approved authorization, and the information that was submitted on the claim.

**Important:** *For appropriate processing and payment, the Pay Price that is indicated on the authorization letter should not be billed on the claim.*

Prior authorization is a condition of reimbursement; it is not a guarantee of payment.

### **5.11 Guidelines for Procedures Awaiting Rate Hearing**

For procedure codes that require prior authorization but are awaiting a rate hearing, providers must follow the established prior authorization process as defined in the applicable provider handbook. Providers must obtain a timely prior authorization for services provided. Providers must not wait until the rate hearing process for the procedure codes is completed to request prior authorization. In this situation, retroactive prior authorization requests are not granted; the requests are denied as late submissions. Providers are also responsible for meeting the initial 95-day filing deadline and for ensuring that the prior authorization number is on the claim the first time it is submitted to TMHP for consideration of reimbursement.

Claims for procedure codes awaiting a rate hearing are denied. TMHP automatically reprocesses affected claims; providers are not required to appeal the claims unless they are denied for additional reasons after the claims reprocessing is complete. If the required prior authorization number is not on the claim at the time of reprocessing, the claim is denied for lack of prior authorization.

## 6.1 Claims Information

Providers that render services to Texas Medicaid fee-for-service and managed care clients must file the assigned claims. Texas Medicaid does not make payments to clients. Federal regulations prohibit providers from charging clients a fee for completing or filing Medicaid claim forms. Providers are not allowed to charge TMHP for filing claims. The cost of claims filing is part of the usual and customary rate for doing business. Providers cannot bill Texas Medicaid or Medicaid clients for missed appointments or failure to keep an appointment. Only claims for services rendered are considered for payment.

Medicaid providers are also required to complete and sign authorized medical transportation forms (e.g., Form H3017, Individual Transportation Participant [ITP] Service Record, or Form 3111, Verification of Travel to Healthcare Services by Mass Transit) or provide an equivalent (e.g., provider statement on official letterhead) to attest that services were provided to a client on a specific date. The client presents these forms to the provider.

Providers are not allowed to bill clients or Texas Medicaid for completing these forms.

All claims for Electronic Visit Verification (EVV) services, including fee-for-service and managed care claims, must be submitted electronically to TMHP using the appropriate electronic claims submission method. Paper claims for EVV services will not be accepted. The EVV aggregator will perform EVV claims matching and TMHP will forward the EVV claim with the EVV match code to the applicable payer for claims processing.

### 6.1.1 TMHP Processing Procedures

TMHP processes claims for services rendered to Texas Medicaid fee-for-service clients and carve-out services rendered to Medicaid managed care clients.

**Note:** *Claims for services rendered to a Medicaid managed care client must be submitted to the managed care organization (MCO) or dental plan that administers the client's managed care benefits. Only claims for those services that are carved-out of managed care can be submitted to TMHP.*

Claims for EVV services (Acute Care and Long Term Care Fee-For-Service and Long Term Support Services [LTSS] [managed care]) must be submitted to TMHP to perform the EVV claims matching process and forwarded to the applicable payer for adjudication.

**Referto:** The *Medicaid Managed Care Handbook* (Vol. 2, *Provider Handbooks*) for more information about carve-out services.

Medicaid claims are subject to the following procedures:

- TMHP verifies all required information is present.
- Claims filed under the same National Provider Identifier (NPI) and program and ready for disposition at the end of each week are paid to the provider with an explanation of each payment or denial. The explanation is called the Remittance and Status (R&S) Report, which may be received as a downloadable portable document format (PDF) version or on paper. A Health Insurance Portability and Accountability Act (HIPAA)-compliant 835 transaction file is also available for those providers who wish to import claim dispositions into a financial system.

An R&S Report is generated for providers that have weekly claim or financial activity with or without payment. The report identifies pending, paid, denied, and adjusted claims. If no claim activity or outstanding account receivables exist during the time period, an R&S Report is not generated for the week.

- For services that are billed on a claim and have any benefit limitations for providers, the date of service determines which provider's claims are paid, denied, or recouped. Claims that have been submitted and paid may be recouped if a new claim with an earlier date of service is submitted, depending on the benefit limitations for the services rendered.

Services that have been authorized for an extension of the benefit limitation will not be recouped. Providers can submit an appeal with medical documentation if the claim has been denied.

#### **6.1.1.1 Fiscal Agent**

TMHP acts as the state's Medicaid fiscal agent. A fiscal agent arrangement is one of two methods allowed under federal law and is used by all other states that contract with outside entities for Medicaid claims payment. Under the fiscal agent arrangement, TMHP is responsible for paying claims, and the state is responsible for covering the cost of claims.

**Note:** *The fiscal agent arrangement does not affect Long Term Care (LTC) and Health and Human Services Commission (HHSC) Family Planning providers.*

#### **Provider Designations**

The fiscal agent arrangement requires that providers be designated as either public or nonpublic. By definition, public providers are those that are owned or operated by a city, state, county, or other government agency or instrumentality, according to the Code of Federal Regulations. In addition, any provider or agency that performs intergovernmental transfers to the state would be considered a public provider. This includes those agencies that can certify and provide state matching funds, (i.e., other state agencies). New providers self-designate (public or private) on the provider enrollment application.

The fiscal agent:

- Rejects all claims not payable under Texas Medicaid rules and regulations.
- Suspends payments to providers according to procedures approved by HHSC.
- Notifies providers of reduction in claim amount or rejection of claim and the reason for doing so.
- Collects payments made in error, affects a current record credit to the department, and provides the department with required data relating to such error corrections.
- Prepares checks or drafts to providers, except for cases in which the department agrees that a basis exists for further review, suspension, or other irregularity within a period not to exceed 30 days of receipt and determination of proper evidence establishing the validity of claims, invoices, and statements.
- Makes provisions for payments to providers who have furnished eligible client benefits.
- Withholds payment of claim when the eligible client has another source of payment.
- Employs and assigns a physician, or physicians, and other professionals as necessary, to establish suitable standards for the audit of claims for services delivered and payment to eligible providers.
- Requires eligible providers to submit information on claim forms.

#### **6.1.1.2 Payment Error Rate Measurement (PERM)**

The Improper Payments Information Act (IPIA) of 2002 directs federal agency heads, in accordance with the Office of Management and Budget (OMB) guidance, to annually review agency programs that are susceptible to significant erroneous payments and to report the improper payment estimates to the U.S. Congress.

Every three years the CMS will assess Texas Medicaid using the PERM process to measure improper payments in Texas Medicaid and the Children's Health Insurance Program (CHIP).

CMS uses PERM to measure the accuracy of Medicaid and CHIP payments made by states for services rendered to clients. Under the PERM program, CMS will use three national contractors to measure improper payments in Medicaid and CHIP:

- The statistical contractor will provide support to the program by identifying the claims to be reviewed and by calculating each state's error rate.

- The data documentation contractor will collect medical policies from the State and medical records from providers.
- The review contractor will perform medical and data processing reviews of the selected claims in order to identify any improper payments.

Providers are required to provide medical record documentation to support the medical reviews that the federal review contractor will conduct for Texas Medicaid fee-for-service and CHIP claims.

**Note:** *The federal review contractor will also conduct reviews for Primary Care Case Management (PCCM) claims that were submitted to TMHP with dates of service on or before February 29, 2012.*

Past studies have shown that the largest cause of error in medical reviews is lack of documentation or insufficient documentation. It is important that information be sent in a timely and complete manner, since a provider's failure to timely submit complete records in support of the claims filed can result in a higher payment error rate for Texas, which in turn can negatively impact the amount of federal funding received by Texas for Medicaid and CHIP.

Providers must submit the requested medical records to the data documentation contractor and HHSC within 60 calendar days of the receipt of the written notice of request. If providers have not responded within 15 days, the data documentation contractor and possibly state officials will initiate reminder calls and letters to providers. The data documentation contractor and possibly state officials will also initiate reminder calls and letters to providers after 35 days. If providers have not responded in 60 days, the data documentation contractor will submit a letter to the provider and the state PERM director indicating a "no documentation error." After the provider's submittal of requested information, the data documentation contractor may request additional information to determine proper payment. In this instance, the provider is given 15 days to provide additional documentation.

If medical records are not received within 60 calendar days, the data documentation contractor will identify the claim as a PERM error and classify all dollars associated with the claim as an overpayment. Providers will be required to reimburse the overpayment in accordance with state and federal requirements.

A provider's failure to maintain complete and correct documentation in support of claims filed or failure to provide such documentation upon request can result in the provider being sanctioned under Title 1, Texas Administrative Code (TAC) Part 15, Chapter 371. Sanction actions may include, but are not limited to, a finding of overpayment for the claims that are not sufficiently supported by the required documentation. Sanctions may include, but are not limited to, a finding of overpayment for the claims that are not sufficiently supported by the required documentation.

## 6.1.2 Claims Filing Instructions

This manual references paper claims when explaining filing instructions. HHSC and TMHP encourage providers to submit claims electronically. TMHP offers specifications for electronic claim formats. These specifications are available from the TMHP website and include a cross-reference of the paper claim filing requirements to the electronic format.

Providers can participate in the most efficient and effective method of submitting claims to TMHP by submitting claims through the TMHP Electronic Data Interchange (EDI) claims processing system using TexMedConnect or a third party vendor. The proceeding claim filing instructions in this manual apply to paper and electronic submitters. Although the examples of claims filing instructions refer to their inclusion on the paper claim form, claim data requirements apply to all claim submissions, regardless of the media. Claims must contain the provider's complete name, physical address including the ZIP+4 code, NPI, taxonomy code, and benefit code (if applicable) to avoid unnecessary delays in processing and payment.

**Referto:** "Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on accessing the TMHP website.

### 6.1.2.1 Wrong Surgery Notification

Providers are required to notify TMHP when a wrong surgery or other invasive procedure is performed on a Texas Medicaid client. Notification is mandated by Senate Bill (SB) 203, Section 3, Regular Session, 81st Texas Legislature, which covers preventable adverse events (PAE) and reimbursement for services associated with PAE.

Professional, inpatient, and outpatient hospital claims that are submitted for the wrong surgery or invasive procedure will be denied. Any corresponding procedures that are rendered to the same client, on the same dates of service (for professional and outpatient hospital claims), or the same date of surgery (for inpatient hospital claims) will be denied. Claims that have already been reimbursed will be recouped.

The law requires providers that are submitting claims for services rendered to Texas Medicaid clients to indicate whether any of the following situations apply to the claim:

- The incorrect operation or invasive procedure was performed on the correct client.
- The operation or invasive procedure was performed on the incorrect client.
- The incorrect operation or invasive procedure was performed on the incorrect body part.

Providers must notify Texas Medicaid of a wrong surgery or invasive procedure by submitting one of the following nonspecific injury, poisoning and other consequences of external causes diagnosis codes or modifiers with the procedure code for the rendered service:

| Code                                                                        | Description                                                               | Type of Claim                       |
|-----------------------------------------------------------------------------|---------------------------------------------------------------------------|-------------------------------------|
| Injury, Poisoning and Other Consequences of External causes Diagnosis Codes |                                                                           |                                     |
| Y6551                                                                       | Performance of wrong procedure (operation) on correct patient             | Inpatient hospital                  |
| Y6552                                                                       | Performance of procedure (operation) on patient not scheduled for surgery |                                     |
| Y6553                                                                       | Performance of correct procedure (operation) on wrong side or body part   |                                     |
| Modifiers                                                                   |                                                                           |                                     |
| PA                                                                          | Surgical or other invasive procedure on wrong body part                   | Professional or outpatient hospital |
| PB                                                                          | Surgical or other invasive procedure on wrong patient                     |                                     |
| PC                                                                          | Wrong surgery or other invasive procedure on patient                      |                                     |

Professional or outpatient hospital claims must include a valid diagnosis with up to seven-digit specificity, the procedure code that identifies the service rendered, and the PA, PB, or PC modifier that describes the type of “wrong surgery” performed.

Inpatient hospital claims must be submitted with type of bill (TOB) 110 as an inpatient hospital-nonpayment claim when a “wrong surgery” is reported. If other services or procedures that are unrelated to the “wrong surgery” are provided during the same stay as the “wrong surgery,” the inpatient hospital must submit a claim for the “wrong surgery” and a separate claim or claims for the unrelated services rendered during the same stay as the “wrong surgery.”

The “wrong surgery” claim must include TOB 110, the appropriate diagnosis code, the surgical procedure code for the surgical service rendered, and the date of surgery. The “wrong surgery” claim will be denied.

The unrelated services rendered during the same stay as the “wrong surgery” must include TOB 111, 112, 113, 114, or 115 on a claim separate from the “wrong surgery” claim. The unrelated services that are benefits of Texas Medicaid may be reimbursed by Texas Medicaid.

A claim that is denied for wrong surgery will have one of the following EOB codes:

| EOB Code                                                                                        | Message                                                                                  |
|-------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------|
| 01167                                                                                           | Claim detail denied due to wrong surgery performed on client                             |
| 01168                                                                                           | Claim denied due to wrong surgery performed on client                                    |
| 01185                                                                                           | Claim denied due to wrong surgery claim found in history for the same PCN and DOS        |
| 01186                                                                                           | Claim detail denied due to wrong surgery claim found in history for the same PCN and DOS |
| PCN = Patient Control Number (also known as the client's Medicaid number) DOS = Date of service |                                                                                          |

### 6.1.2.2 Maximum Number of Units allowed per Claim Detail

The total number of units per claim detail can not exceed 9,999. Providers who submit a claim with more than 9,999 units must bill 9,999 units on the first detail of the claim and any additional units on separate details.

### 6.1.2.3 Tips on Expediting Paper Claims

Use the following guidelines to enhance the accuracy and timeliness of paper claims processing.

#### General requirements

- Use original claim forms. Do not use copies of claim forms.
- Detach claims at perforated lines before mailing.
- Use 10 x 13 inch envelopes to mail claims. Do not fold claim forms, appeals, or correspondence.
- Do not use labels, stickers, or stamps on the claim form.
- Do not send duplicate copies of information.
- Use 8 ½ x 11 inch paper. Do not use paper smaller or larger than 8 ½ x 11 inches.
- Do not mail claims with correspondence for other departments.

#### Data Fields

- Print claim data within defined boxes on the claim form.
- Use black ink, but not a black marker. Do not use red ink or highlighters.
- Use all capital letters.
- Print using 10-pitch (12-point) Courier font. Do not use fonts smaller or larger than 12 points. Do not use proportional fonts, such as Arial or Times Roman.
- Use a laser printer for best results. Do not use a dot matrix printer, if possible.
- Do not use dashes or slashes in date fields.

#### Attachments

- Use paper clips on claims or appeals if they include attachments. Do not use glue, tape, or staples.
- Place the claim form on top when sending new claims, followed by any medical records or other attachments.
- Number the pages when sending attachments or multiple claims for the same client (e.g., 1 of 2, 2 of 2).
- Do not total the billed amount on each claim form when submitting multi-page claims for the same client.

- Use the CMS-approved Medicare Remittance Advice Notice (MRAN) printed from Medicare Remit Easy Print (MREP) (professional services) or PC-Print (institutional services) when sending a Remittance Advice from Medicare or the paper MRAN received from Medicare or a Medicare intermediary. You may also download the TMHP Standardized Medicare Advantage Plan (MAP) Remittance Advice Notice Template from the TMHP website at [www.tmhp.com](http://www.tmhp.com).
- Submit claim forms with MRANs and R&S Reports.

### 6.1.3 TMHP Paper Claims Submission

All paper claims must be submitted with an NPI and taxonomy code for the billing and performing provider. All other provider fields on the claim forms require an NPI only. If an NPI and taxonomy code are not included in the billing and performing provider fields, or if an NPI is not included on all other provider identifier fields, the claim will be denied. In addition to the NPI and taxonomy code for the billing provider, claim submissions will need to include the provider benefit code (if applicable) and complete physical address with ZIP + 4 code.

**Referto:** Subsection 6.4, “Claims Filing Instructions” in this section for more information.

### 6.1.4 Claims Filing Deadlines

For claims payment to be considered, providers must adhere to the time limits described in this section. Claims received after the following claims filing deadlines are not payable because Texas Medicaid does not provide coverage for late claims.

**Exception:** *Unless otherwise stated, claims must be received by TMHP within 95 days of each DOS. Appeals must be received by TMHP within 120 days of the disposition date on the R&S Report on which the claim appears. A 95-day or 120-day appeal filing deadline that falls on a weekend or a holiday is extended to the next business day following the weekend or holiday.*

Only the following holidays extend the deadlines in 2025:

| Date                                                                                                                                                            | Holiday                     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------|
| January 1, 2025                                                                                                                                                 | New Year's Day              |
| January 20, 2025                                                                                                                                                | Martin Luther King, Jr. Day |
| February 17, 2025                                                                                                                                               | Presidents' Day             |
| May 26, 2025                                                                                                                                                    | Memorial Day                |
| June 19, 2025                                                                                                                                                   | Emancipation Day            |
| July 4, 2025                                                                                                                                                    | Independence Day            |
| September 1, 2025                                                                                                                                               | Labor Day                   |
| October 13, 2025*                                                                                                                                               | Columbus Day                |
| November 11, 2025                                                                                                                                               | Veterans Day                |
| November 27, 2025                                                                                                                                               | Thanksgiving Day            |
| November 28, 2025                                                                                                                                               | Day after Thanksgiving      |
| December 24, 2025                                                                                                                                               | Christmas Eve Day           |
| December 25, 2025                                                                                                                                               | Christmas Day               |
| December 26, 2025                                                                                                                                               | Day after Christmas         |
| *Federal holiday, but not a state holiday. The claims filing deadline will be extended for providers because the Post Office will not be operating on this day. |                             |

The following are time limits for submitting claims:

- Inpatient claims that are filed by the hospital must be received by TMHP within 95 days of the discharge date or last DOS on the claim.

- Hospitals that are reimbursed according to diagnosis-related group (DRG) payment methodology may submit an interim claim because the client has been in the facility 30 consecutive days or longer. A total stay claim is needed after discharge to ensure accurate calculation for potential outlier payments for clients who are 20 years of age and younger.
- Hospitals that are reimbursed according to Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982 methodology may submit interim claims before discharge and must submit an interim claim if the client remains in the hospital past the hospital's fiscal year end.
- When medical services are rendered to a Medicaid client in Texas, TMHP must receive claims within 95 days of the DOS on the claim.
- Re-enrolling providers who are assigned their previous enrollment information must submit claims so that they are received by TMHP within 95 days of the date of service.
- Providers that are enrolling in Texas Medicaid for the first time or are making a change that requires the issuance of a new taxonomy and benefit code can submit claims within 95 days from the date their taxonomy and benefit code is issued as long as claims are submitted within 365 days of the date of service.
- Providers who are revalidating an existing enrollment can continue to file claims while they are completing the revalidation process. TMHP must receive claims within 95 days of the date of service.
- TMHP must receive claims from out-of-state providers within 365 days from the DOS. The DOS is the date the service is provided or performed.
- TMHP must receive claims on behalf of an individual who has applied for Medicaid coverage but has not been assigned a Medicaid number on the DOS within 95 days from the date the eligibility was added to the TMHP eligibility file (add date) and within 365 days of the date of service or from the discharge date for inpatient claims.
- Providers should verify eligibility and add date by contacting TMHP (Automated Inquiry System [AIS], TMHP EDI's electronic eligibility verification, or TMHP Contact Center) when the number is received. Not all applicants become eligible clients. Providers that submit claims electronically within the 365-day federal filing deadline for services rendered to individuals who do not currently have a Texas Medicaid identification number will receive an electronic rejection. Providers can use the TMHP rejection report as proof of meeting the 365-day federal filing deadline and submit an administrative appeal.

**Important:** *Providers should keep documentation of all Texas Medicaid client eligibility verification. Documentation of client eligibility is required for the appeal process.*

- If a client becomes retroactively eligible or loses Medicaid eligibility and is later determined to be eligible, the 95-day filing deadline begins on the date that the eligibility start date was added to TMHP files (the add date). However, the 365-day federal filing deadline must still be met.
- When a service is a benefit of Medicare and Medicaid, and the client is covered by both programs, the claim must be filed with Medicare first. TMHP *must* receive Medicaid claims within 95 days of the date of Medicare disposition.

Providers must submit a paper MRAN received from Medicare or a Medicare intermediary, the computer-generated MRANs from the CMS-approved software application MREP for professional services or PC-Print for institutional services, or the TMHP Standardized Medicare Advantage Plan (MAP) Remittance Advice Notice Template with a completed claim form to TMHP.

- When a client is eligible for Medicare Part B only, the inpatient hospital claim for services covered as Medicaid only is sent directly to TMHP and is subject to the 95-day filing deadline (from date of discharge).

**Note:** *It is strongly recommended that providers who submit paper claims keep a copy of the documentation they send. It is also recommended that paper claims be sent by certified mail with a return receipt requested. This documentation, along with a detailed listing of the claims enclosed, provides proof that the claims were received by TMHP, which is particularly important if it is necessary to prove that the 95-day claims filing deadline has been met. TMHP will accept certification receipts as proof of the 95-day or 120-day filing deadline. If a certified receipt is provided as proof, the certified receipt number must be indicated on the detailed listing along with the Medicaid number, billed amount, DOS, and a signed claim copy. The provider needs to keep such proof of multiple claims submissions if the provider's enrollment with TMHP is pending.*

- If the provider is attempting to obtain prior authorization for services performed or will be performed, TMHP must receive the claim according to the usual 95-day filing deadline.
- The provider bills TMHP directly within 95 days from the DOS. However, if a non-third party resource (TPR) is billed first, TMHP must receive the claim within 95 days of the claim disposition by the other entity.

**Note:** *The provider submits a copy of the disposition with the claim. A non-TPR is secondary to Texas Medicaid and may only pay benefits after Texas Medicaid.*

**Referto:** Subsection 8.4, "Non-TPR Sources" in "Section 8: Third Party Liability (TPL)" (*Vol. 1, General Information*) for examples of non-TPRs.

- When a service is billed to another insurance resource, the filing deadline is 95 days from the date of disposition by the other resource.
- When a service is billed to a third party and no response has been received, Medicaid providers must allow 110 days to elapse before submitting a claim to TMHP. However, the 365-day federal filing deadline requirement must still be met.
- A Compass21 (C21) process allows an HHSC Family Planning claim to be paid by Title XIX (Medicaid) if the client is eligible for Title XIX when those services are provided and billed under the HHSC Family Planning Program. In this instance, the Medicaid 95-day filing deadline is in effect and must be met or the claim will be denied.
- For claims re-submitted to TMHP with additional detail changes (i.e., quantity billed), the additional details are subject to the 95-day filing deadline.

**Note:** *In accordance with federal regulations, all claims must be initially filed with TMHP within 365 days of the DOS, regardless of provider enrollment status or retroactive eligibility.*

Subsection 1.1, "Provider Enrollment" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*) for information on the provider enrollment process.

Subsection 7.1, "Appeal Methods" in "Section 7: Appeals" (*Vol. 1, General Information*) for information on the process for submitting appeals.

Subsection 6.1.4.3, "Exceptions to the 95-Day Filing Deadline" in this section.

Subsection A.12.3, "Automated Inquiry System (AIS)" in "Appendix A: State, Federal, and TMHP Contact Information" (*Vol. 1, General Information*) to learn how to retrieve client eligibility information by telephone.

**Referto:** “Section 8: Third Party Liability (TPL)” (*Vol. 1, General Information*).

Subsection 4.1.10, “Eligibility Verification” in “Section 4: Client Eligibility” (*Vol. 1, General Information*).

Subsection 6.11.6, “Provider Inquiries—Status of Claims” in this section.

#### **6.1.4.1 Claims for Clients with Retroactive Eligibility**

Claims for clients who receive retroactive eligibility must be submitted within 95 days of the date that the client’s eligibility was added to the TMHP eligibility file (add date) and within 365 days of the DOS.

Title 42 of the Code of Federal Regulations (42 CFR), at 447.45 (d) (1), states “The Medicaid agency must require providers to submit all claims no later than 12 months from the date of service.” The 12-month filing deadline applies to all claims. Claims not submitted within 365 days (12 months) from the date of service cannot be considered for payment.

Retroactive eligibility does not constitute an exception to the federal filing deadline. Even if the patient’s Medicaid eligibility determination is delayed, the provider must still submit the claim within 365 days of the date of service. A claim that is not submitted within 365 days of the date of service will not be considered for payment.

If a client is not yet eligible for Medicaid, providers must submit the claim using either 999999999 or 000000000 as the recipient identification number. Although TMHP will deny the claim, providers should retain the denial or electronic rejection report for proof of timely filing, especially if the eligibility determination occurs more than 365 days after the date of service. Claims denied for recipient ineligibility may be resubmitted when the patient becomes eligible for the retroactive date(s) of service. Texas Medicaid may then consider the claim for payment because the initial claim was submitted within the 365-day federal filing deadline and the denial was not the result of an error by the provider.

If the 365-day federal filing deadline requirement has passed, providers must submit the following to TMHP within 95 days from the add date:

- A completed claim form.
- One of the following dated within 365 days from the date of service:
  - A page from an R&S Report documenting a denial of the claim.
  - An electronic rejection report of the claim that includes the Medicaid recipient’s name and date of service.

Providers that have submitted their claims electronically can provide proof of timely filing by submitting a copy of an electronic claims report that includes the following information:

- Client name or Medicaid identification number (PCN)
- DOS
- Total charges
- Batch identification number (Batch ID) (in correct format)

**Note:** *Only reports that were accepted or rejected by TMHP will be honored. The claim filed (client name or PCN, DOS and total charges) should match the information on the batch report.*

#### 6.1.4.2 Claims for Newly Enrolled Providers

Claims submitted by newly enrolled providers must be received within 95 days of the date that enrollment is complete and within 365 days of the date of service. Providers with a pending application should submit any claims that are nearing the 365-day deadline from the date of service. Claims will be rejected by TMHP until enrollment is complete. Providers can use the TMHP rejection report as proof of meeting the 365-day deadline and submit an appeal.

**Note:** *Claims can be submitted for dates of service on or after the provider's effective date of enrollment. Providers can find the effective date for their enrollment in their Welcome Letter in PEMS.*

**Referto:** Subsection 1.1.9.7, "Copy of License, Temporary License, or Certification" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*).

All claims for services rendered to Texas Medicaid clients who do not have Medicare benefits are subject to a filing deadline from the date of service of:

- 95 days for in-state providers.
- 365 days for out-of-state providers.

TMHP cannot issue a prior authorization before Medicaid enrollment is complete. Upon notice of Medicaid enrollment, the provider must contact the appropriate TMHP Authorization Department before providing services that require a prior authorization number to Medicaid clients. Regular prior authorization procedures are followed after the TMHP Prior Authorization Department has been contacted.

Retroactive authorizations will not be issued unless the regular authorization procedures for the requested services allow for authorizations to be obtained after services are provided. For these services, providers have 95 days from the add date of the client's retroactive eligibility in TMHP's system to obtain authorization for services that have already been performed. Providers should refer to the specific manual section for details on authorization requirements, claims filing, and timeframe guidelines for authorization request submissions.

Providers who have not completed enrollment and have general claim submission questions may refer to this section for assistance with claim submission. If additional general information is needed, providers may call the TMHP Contact Center at 800-925-9126 to obtain information. Due to HIPAA privacy guidelines, specific client and claim information cannot be provided.

Providers who have completed enrollment and have questions about submitting claims may call the same number and select the option to speak with a TMHP Contact Center representative.

#### 6.1.4.3 Exceptions to the 95-Day Filing Deadline

TMHP is not responsible for appeals about exceptions to the 95-day filing deadline. These appeals must be submitted to the HHSC Claims Administrator Operations Management. TAC allows HHSC to consider exceptions to the 95-day filing deadline under special circumstances.

#### 6.1.4.4 Appeal Time Limits

All appeals of denied claims and requests for adjustments on paid claims must be received by TMHP within 120 days from the date of disposition, the date of the R&S Report on which that claim appears. If the 120-day appeal deadline falls on a weekend or holiday, the deadline will be extended to the next business day.

**Referto:** Subsection 6.1.2, "Claims Filing Instructions" in this section.

Hospitals appealing final technical denials, admission denials, DRG changes, continued-stay denials, or cost/day outlier denials refer to "Section 7: Appeals" (*Vol. 1, General Information*) for complete appeal information.

#### 6.1.4.5 Claims with Incomplete Information and Zero Paid Claims

Claims listed on the R&S Report with \$0 allowed and \$0 paid may be resubmitted as electronic appeals. Previously, these claims were only accepted as paper claims and were not accepted as electronic appeals. Appeals may be submitted through a third party biller or through TexMedConnect.

Zero-paid claims that are still within the 95-day filing deadline should be submitted as new day claims, which are processed faster than appeals. Electronic appeal for these claims must be submitted within the 120-day appeal deadline. Electronic claims can be resubmitted past the 95-day deadline as new day claims if the following fields have not changed:

- NPIs
- Client Medicaid number
- Dates of service
- Total billed amount

Claims that are past the 95-day filing deadline and require changes to the fields listed above must be appealed on paper, with a copy of the R&S report. All other appeal guidelines remain unchanged.

**Important:** *Initial zero-paid claims and appeal submissions must meet the 95-day deadline and 120-day appeal deadline outlined in subsection 6.1.4, “Claims Filing Deadlines” in this section.*

#### 6.1.4.6 Claims Filing Reminders

After filing a claim to TMHP, providers should review the weekly R&S Report. If within 30 days the claim does not appear in the Claims In Process section, or if it does not appear as a paid, denied, or incomplete claim, the provider should resubmit it to TMHP within 95 days of the DOS.

The provider should allow TMHP 45 days to receive a Medicare-paid claim automatically transmitted for payment of deductible or coinsurance.

Electronic billers should notify TMHP about missing claims when:

- An accepted claim does not appear on the R&S Report within ten workdays of the file submittal.
- A claim or file does not appear on a TMHP Electronic Claims Submission Report within ten days of the file submission.

Certain claims, including those that were submitted for newborn services or that might be covered under Medicare, are suspended for review so that other state agencies can verify information. This review may take longer than 60 days.

These suspended claims will appear on the provider’s R&S Report under “The following claims are being processed” with a message indicating that the client’s eligibility is being investigated. Providers must wait until the claim is finalized and appears under “Paid or Denied” or “Adjustment to Claims” on the R&S Report before appealing the claim. If the claim does not appear on the R&S Report, providers must resubmit the claim to TMHP to ensure compliance with filing and appeal deadlines.

#### 6.1.5 HHSC Payment Deadline

Payment deadline rules, as defined by HHSC, affect all providers with the exception of LTC and the HHSC Family Planning Program. The HHSC payment deadline rules for the fiscal agent arrangement ensure that state and federal financial requirements are met.

TMHP is required to finalize and pay claims within 24 months of:

- Each date of service on a claim.
- Discharge date for inpatient claims.

Texas Medicaid and Children with Special Health Care Needs (CSHCN) Service Program payments, excluding crossovers, cannot be made after 24 months. Claims and appeals that are submitted after the designated payment deadlines are denied.

**Note:** Providers may appeal HHSC Office of Inspector General (OIG) initiated claims adjustments (recoupments) after the 24-month deadline but must do so within 120 days from the date of the recoupment. Refer to subsection 7.1.5, “Paper Appeals” in “Section 7: Appeals” (Vol. 1, General Information) for instructions. All appeals of OIG recoupments must be submitted by paper, no electronic or telephone appeals will be accepted.

### 6.1.6 Filing Deadline Calendars

The most current filing deadline calendars are available on the TMHP website at [www.tmhp.com](http://www.tmhp.com):

- [Filing Deadline Calendar for 2024](#)
- [Filing Deadline Calendar for 2025](#)

## 6.2 TMHP Electronic Claims Submission

TMHP uses the HIPAA-compliant American National Standards Institute (ANSI) ASC X12 5010 file format through secure socket layer (SSL) and virtual private networking (VPN) connections for maximum security.

Claims may be submitted electronically to TMHP through TexMedConnect on the TMHP website at [www.tmhp.com](http://www.tmhp.com) or through billing agents who interface directly with the TMHP EDI Gateway.

Providers must retain all claim and file transmission records. They may be required to submit them for pending research on missing claims or appeals.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (Vol. 1, General Information).

### 6.2.1 Benefit and Taxonomy Codes

Providers must submit the Benefit Code field (when applicable), Address field, and Taxonomy Code Field and all other required fields. These fields must be completed before submitting electronic claims.

Taxonomy codes do not affect pricing or the level of pricing, but rather are used to crosswalk the NPI to the billing provider. It is critical that the taxonomy code selected as the primary or secondary taxonomy code during a provider’s enrollment with TMHP is included on all electronic transactions.

Billing providers that are not associated with a group are required to submit a taxonomy code on all electronic claims. Claims submitted without a taxonomy code may be rejected.

Medicare does not require a taxonomy code for Part B claims. Therefore, some claims submitted to TMHP from Medicare for payment of deductible or coinsurance may not include the taxonomy code needed for accurate processing by TMHP.

### 6.2.2 Electronic Claim Acceptance

Providers should verify that their electronic claims were accepted by Texas Medicaid for payment consideration by referring to their Claim Response report, which is in the 27S batch response file (e.g., file name E085LDS1.27S). Providers should also check their Accepted and Rejected reports in the rej and acc batch response files (e.g., E085LDS1.REJ and E085LDS1.ACC) for additional information. Only claims that have been accepted on the Claim Response report (27S file) will be considered for payment and made available for claim status inquiry. Claims that are rejected must be corrected and resubmitted for payment consideration.

**Referto:** Subsection 3.2, “Electronic Billing” in “Section 3: TMHP Electronic Data Interchange (EDI)” (Vol. 1, General Information), visit [www.tmhp.com](http://www.tmhp.com), or call the EDI Help Desk at 888-863-3638 for more information about electronic claims submissions.

### 6.2.3 Electronic Rejections

The most common reasons for electronic professional claim rejections are:

- *Client information does not match.* Client information does not match the PCN on the TMHP eligibility file. The name, date of birth, sex, and nine-digit Medicaid identification number must be an exact match with the client's identification number on TMHP's eligibility record. If using TexMedConnect, send an interactive eligibility request to obtain an exact match with TMHP's record. If not using TexMedConnect, verify through the TMHP website or call AIS at 800-925-9126 to verify client information. A lack of complete client eligibility information causes a rejection and possibly delayed payment. To prevent delays when submitting claims electronically:
  - Always include the first and last name of the client on the claim in the appropriate fields.
  - Always enter the client's complete, valid nine-digit Medicaid number. Valid Medicaid numbers begin with 1, 2, 3, 4, 5, 6 or 7. CSHCN Services Program client numbers begin with a 9.
  - When submitting claims for newborns, use the guidelines in the following section.
- *Referring/Ordering Physician field blank or invalid.* The referring physician's NPI must be present when billing for consultations, laboratory, or radiology. Consult the software vendor for this field's location on the electronic claims entry form.
- *Performing Physician ID field blank or invalid.* When the billing NPI is a *group* practice, the performing NPI for the physician who performed the service must be entered. Consult the software vendor for this field's location on the electronic claim form.
- *Facility Provider field blank or invalid.* When place of service (POS) is anywhere other than home or office, the facility's NPI must be present. If the NPI is not known, enter the name and address of the facility. Consult the software vendor for this field's location on the electronic claims entry form.
- *Invalid Type of Service or Invalid Type of Service/Procedure code combination.* In certain cases some procedure codes will require a modifier to denote the procedure's type of service (TOS).

**Note:** *The C21 claims processing system can accept only 40 characters (including spaces) in the Comments section of electronic submissions for ambulance and dental claims. If providers include more than 40 characters in that field, C21 will accept only the first 40 characters; the other characters will not be imported into C21. Providers must ensure that all of the information that is required for the claim to process appropriately is included in the first 40 characters.*

**Referto:** Subsection 6.2.5, "Modifier Requirements for TOS Assignment" in this section for TMHP EDI modifier information.

#### 6.2.3.1 Newborn Claim Hints

The following are to be used for newborns:

- If the mother's name is "Jane Jones," use "Boy Jane Jones" for a male child and "Girl Jane Jones" for a female child.
- Enter "Boy Jane" or "Girl Jane" in first name field and "Jones" in last name field. *Always* use "boy" or "girl" first and then the mother's full name. An exact match must be submitted for the claim to process.
- Do not use "NBM" for newborn male or "NBF" for newborn female.

The following are the most common reasons for electronic hospital UB-04 CMS-1450 claim rejections:

- *Admit hour outside allowable range* (such as 24 hours).
- *Billed amount blank.*

- *Health coverage ID blank or invalid.* This number *must* be the valid nine-digit Medicaid client number. *Incorrect data* includes: a number less than nine digits; PENDING; 999999999; and Unknown.
- *Referring physician information on outpatient claim is blank* when laboratory/radiology services are ordered or a surgical procedure is performed. The referring physician's NPI is required in Fields 78–79. Consult the software vendor for the location of this field on the electronic claims entry form.

## 6.2.4 TMHP EDI Batch Numbers, Julian Dates

All electronic transactions are assigned an eight-character Batch ID immediately upon receipt by the TMHP EDI Gateway. The batch ID format allows electronic submitters to determine the exact day and year that a batch was received. The batch ID format is JJYSSSS, where each character is defined as follows:

- *JJJ – Julian date.* The three J characters represent the Julian date that the file was received by the TMHP EDI Gateway. The first character (J) is displayed as a letter, where I = 0, J = 1, K = 2, and L = 3. The last two characters (JJ) are displayed as numbers. All three characters (JJJ) together represent the Julian date. For example, a Julian date of 143 would be J43.
- *Y – Year.* The Y character represents the last digit of the calendar year when the TMHP EDI Gateway receives the file. For example, a “2” in this position indicates the year 2012.
- *SSSS =* The unique 4-character sequence number assigned by EDI to the batch filed.

## 6.2.5 Modifier Requirements for TOS Assignment

Modifiers for TOS assignment are not required for Texas Health Steps (THSteps) Dental claims (claim type 021) and Inpatient Hospital claims (claim type 040). Additionally, procedures submitted by specific provider types such as genetics, eyeglass, and THSteps medical checkup are assigned the appropriate TOS based on the provider type or specific procedure code, and will not require modifiers.

Most procedure codes do not require a modifier for TOS assignment, but modifiers are required for some services submitted on professional claims (claim type 020) and outpatient hospital claims (claim type 023). Services that require a modifier for TOS assignment are listed in the following sections.

### 6.2.5.1 Assistant Surgery

For assistant surgical procedures, use one of the following modifiers: 80, 81, 82, and AS. Using these modifiers results in TOS 8 being assigned to the procedure.

### 6.2.5.2 Anesthesia

For anesthesia procedures, use one of the following modifiers: AA, AD, QK, QS, QX, QY, and QZ. Using these modifiers results in TOS 7 being assigned to the procedure.

### 6.2.5.3 Interpretations

For interpretations or professional components of laboratory, radiology, or radiation therapy procedures, use modifier 26. Using modifier 26 results in TOS I being assigned to the procedure.

**Note:** *Procedure codes that only have a TOS I are not required to use modifier 26.*

### 6.2.5.4 Technical Components

For technical components of laboratory, radiology, or radiation therapy procedures, use modifier TC. Using this modifier results in TOS T being assigned to the procedure.

**Exception:** *Outpatient hospitals do not include the TC modifier when they provide technical components of lab and radiology services. These services automatically have TOS 4 or 5 assigned and are subject to the facility's interim reimbursement rate or the clinical lab rate.*

### 6.2.6 Electronic Visit Verification (EVV)

All claims for Electronic Visit Verification (EVV) services, including fee-for-service and managed care claims, must be submitted electronically to TMHP using the appropriate electronic claims submission method. Paper claims for EVV services will not be accepted. The EVV aggregator will perform EVV claims matching and TMHP will forward the EVV claim with the EVV match code to the applicable payer for claims processing.

## 6.3 Coding

Electronic billers must code all claims. TMHP encourages all providers to code their paper claims. Claims are processed fast and accurately if providers furnish appropriate information. By coding claims, providers ensure precise and concise representation of the services provided and are assured reimbursement based on the correct code. If providers code claims, a narrative description is not required and does not need to be included unless the code is a not an otherwise classified code.

**Important:** *Claims for anesthesia must have the CPT anesthesia procedure code narrative descriptions or CPT surgical codes; if these codes are not included, the claim will be denied.*

The carrier for the Texas Medicare Program has coding manuals available for physicians and suppliers with codes not available in CPT. To order a CPT Coding Manual, write to the following address:

American Medical Association  
Book and Pamphlet Fulfillment  
PO Box 2964  
Milwaukee, WI 53201

### 6.3.1 Diagnosis Coding

Texas Medicaid requires providers to provide *International Classification of Diseases, Tenth Revision, Clinical Modification* (ICD-10-CM) diagnosis codes on their claims. The *only* diagnosis coding structure accepted by Texas Medicaid is the ICD-10-CM. Diagnosis codes must be to the highest level of specificity available. In most cases a written description of the diagnosis is not required.

All diagnosis codes that are submitted on a claim must be appropriate for the age of the client as identified in the ICD-10-CM description of the diagnosis code. Claims that are denied because one or more of the diagnosis codes submitted on the claim are not appropriate for the age of the client may be appealed with the correct diagnosis code or documentation of medical necessity to justify the use of the diagnosis code.

Diagnosis codes in the following categories are not valid as primary or referenced diagnosis:

- Nonspecific injury, poisoning and other consequences of external causes
- Diagnosis in the International Classification of Diseases for Oncology, 3rd Edition (ICD-O-3)
- Factors influencing health status and contact with health services, unless otherwise directed in this manual.
- External causes of morbidity

#### 6.3.1.1 Place of Service (POS) Coding

The POS identifies where services are performed. Indicate the POS by using the appropriate code for each service identified on the claim.

**Important:** *Attention ambulance providers: POS 41 and 42 are accepted by Texas Medicaid for ambulance claims processing. The two-digit origin and destination codes are still required for claims processing.*

Use the following codes for POS identification where services are performed:

| POS                                                                                                                          | 2-Digit Numeric Codes                                      | 1-Digit Numeric Codes                  |
|------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------|----------------------------------------|
| Office                                                                                                                       | 02, 10, 11, 15, 17, 20, 49, 50, 60, 65, 71, 72             | 1                                      |
| Home                                                                                                                         | 12, 27                                                     | 2                                      |
| Inpatient hospital                                                                                                           | 21, 51, 52, 56, 61                                         | 3                                      |
| Outpatient hospital                                                                                                          | 19, 22, 23, 24, 55, 57, 58, 62                             | 5                                      |
| Birthing center                                                                                                              | 25                                                         | 7                                      |
| Other location                                                                                                               | 01, 03, 04, 05, 06, 07, 08, 16, 18, 26, 34, 41, 42, 53, 99 | 9                                      |
| Skilled nursing facility or intermediate care facility for individuals with an intellectual disability or related conditions | 13, 31, 32, 54                                             | 4                                      |
| Extended care facility (rest home, domiciliary or custodial care, nursing facility boarding home)                            | 14, 33                                                     | 8                                      |
| Independent lab                                                                                                              | 81                                                         | 6                                      |
| Destination of ambulance                                                                                                     | Indicate destination using above codes                     | Indicate destination using above codes |

**Note:** Family planning and THSteps medical services performed in a rural health clinic (RHC) are billed using national POS code 72.

### 6.3.2 Type of Service (TOS)

The TOS identifies the specific field or specialty of services provided.

To determine the TOS payable for each procedure code, providers may refer to the [online fee lookup](#) (OFL) or the static fee schedules, both are available on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

**Referto:** Subsection 6.2.5, “Modifier Requirements for TOS Assignment” in this section for TMHP EDI modifier information.

#### 6.3.2.1 TOS Table

**Important:** TOS codes are not used for claim submissions, but they do appear on R&S Reports.

| TOS | Description                         |
|-----|-------------------------------------|
| 0   | Blood                               |
| 1   | Medical Services                    |
| 2   | Surgery                             |
| 3   | Consultations                       |
| 4   | Radiology (total component)         |
| 5   | Laboratory (total component)        |
| 6   | Radiation Therapy (total component) |
| 7   | Anesthesia                          |
| 8   | Assistant surgery                   |

| TOS | Description                                                                       |
|-----|-----------------------------------------------------------------------------------|

### 6.3.3 Procedure Coding

Texas Medicaid uses the Healthcare Common Procedure Coding System (HCPCS). HCPCS provides health-care providers and third-party payers a common coding structure that uses codes designed around a five-character numeric or alphanumeric base. The procedure codes are updated annually and quarterly.

HCPCS consists of two levels of codes:

- Level I—Current Procedural Terminology (CPT®) Professional Edition
  - Numeric, five digits
  - Makes up 80 percent of HCPCS
  - Maintained by AMA, which updates it annually
  - Updates by the AMA are coordinated with CMS before modifications are distributed to third-party payers
  - Anesthesia codes from CPT
- Level II—HCPCS
  - Approved and released by CMS
  - Codes for both physician and non-physician services not contained in CPT (for example, ambulance, DME, prosthetics, and some medical codes)
  - Maintained and updated by the CMS Maintenance Task Force
  - Alphanumeric, a single alpha character (A through V) followed by four digits
  - The single alpha character represents one of the following:

| Alpha | Description                                        |
|-------|----------------------------------------------------|
| A     | Supplies, ambulance, administrative, miscellaneous |
| B     | Enteral and parenteral therapy                     |
| E     | DME and oxygen                                     |

| Alpha | Description                                         |
|-------|-----------------------------------------------------|
| G     | Procedures/professional (temporary)                 |
| H     | Rehab and behavioral health services                |
| J     | Drugs (administered other than orally)              |
| K     | Durable Medical Equipment Regional Carriers (DMERC) |
| L     | Orthotic and prosthetic procedures                  |
| M     | Medical                                             |
| P     | Laboratory                                          |
| Q     | Temporary procedures                                |
| R     | Radiology                                           |
| S     | Private payer                                       |
| T     | State Medicaid agency                               |
| V     | Vision and hearing services                         |

### 6.3.3.1 HCPCS Updates

TMHP updates HCPCS codes on both an annual and quarterly basis. Major updates are made annually and minor updates are made quarterly.

Most of the procedure codes that do not replace a discontinued procedure code must go through the rate hearing process. HHSC conducts public rate hearings to provide an opportunity for the provider community to comment on the Medicaid proposed payment rate, as required by Chapter 32 of the Human Resources Code, §32.0282, and Title 1 of the Texas Administrative Code, §355.201.

#### 6.3.3.1.1 Annual HCPCS

Annual HCPCS updates apply additions, changes, and deletions that include the program and coding changes related to the annual HCPCS, Current Dental Terminology (CDT), and CPT updates. These updates ensure that the coding structure is up-to-date by using the latest edition of the CPT and the nationally established HCPCS codes that are released by CMS.

#### 6.3.3.1.2 Quarterly HCPCS

Quarterly HCPCS updates apply HCPCS additions, changes, and deletions that are released by CMS.

#### 6.3.3.1.3 Rate Hearings for New HCPCS Codes

HHSC holds rate hearings for new HCPCS codes on a regular basis. Rate hearings are announced on the HHSC website at [www.hhs.texas.gov/services/health/medicaid-chip/provider-information/texas-medicaid-chip-rate-analysis](http://www.hhs.texas.gov/services/health/medicaid-chip/provider-information/texas-medicaid-chip-rate-analysis).

Claims for services that are provided before the rates are adopted through the rate hearing process are denied as pending a rate hearing (EOB 02008) until the applicable reimbursement rate is adopted. The client cannot be billed for these services.

Providers are responsible for meeting the initial 95-day filing deadline. Providers must submit the procedure codes that are most appropriate for the services provided, even if the procedure codes have not yet completed the rate hearing process and are denied by Texas Medicaid as pending a rate hearing.

Once the reimbursement rates are established in the rate hearing and applied, TMHP automatically reprocesses affected claims. Providers are not required to appeal the claims unless they are denied for other reasons after the claims reprocessing is complete.

**Referto:** Subsection 5.11, “Guidelines for Procedures Awaiting Rate Hearing” in “Section 5: Fee-for-Service Prior Authorizations” (*Vol. 1, General Information*) for more information about the authorization guidelines for procedure codes that are awaiting a rate hearing.

6.3.4 National Drug Code (NDC)

The NDC is an 11-digit number on the package or container from which the medication is administered. All Texas Medicaid fee-for-service and Family Planning providers must submit an NDC for professional or outpatient claims submitted with physician-administered prescription drug procedure.

N4 must be entered before the NDC on claims.

National Drug Unit of Measure: The submitted unit of measure should reflect the volume measurement administered. Refer to the NDC Package Measure column on the Texas NDC-to-HCPCS Crosswalk.

The valid units of measurement codes are:

- F2—International unit
- GR—Gram
- ME—Milligram
- ML—Milliliter
- UN—Unit

*Note: Unit quantities are required.*

### National Drug Unit

Claims will be edited for the value submitted in the NDC quantity field. In order to convert the HCPCS units submitted into the NDC quantity; use the Texas NDC-to-HCPCS Crosswalk to review the “HCPCS Description” and the “NDC Label” description to identify the quantity.

The Texas NDC-to-HCPCS Crosswalk identifies relationships between HCPCS codes and National Drug Codes (NDC). The Texas file is published at least quarterly. The Texas NDC-to-HCPCS Crosswalk can be found at [www.txvendordrug.com/formulary/clinician-administered-drugs](http://www.txvendordrug.com/formulary/clinician-administered-drugs). Clinician-administered drugs that do not have an appropriate NDC to HCPCS combination for the procedure code that is submitted are not payable.

#### 6.3.4.2 NDC Requirements for Dual Eligible Clients

The 11-digit NDC, NDC quantity, and NDC Unit of measure information is required on all professional and outpatient clinician-administered drug claims for dual-eligible clients. These drug claims are submitted to Medicare, which will cross over to Medicaid for consideration of coinsurance and deductible liabilities.

**Important:** Claims which cross over without this required information may be denied due to missing, incomplete, or invalid NDC information. This information applies to all Medicaid providers who serve Medicare-Medicaid dual-eligible clients.

Providers may refer to subsection 6.3.4, “National Drug Code (NDC)” in this section for more information on NDC requirements. The [Texas NDC-to-HCPCS Crosswalk](http://www.txvendordrug.com/formulary/clinician-administered-drugs) identifies relationships between HCPCS codes.

6.3.4.3 Drug Rebate Program

Texas Medicaid will reimburse providers only for clinician-administered drugs and biologicals whose manufacturers participate in the Centers for Medicare & Medicaid Services (CMS) Drug Rebate Program and that show as active on the CMS list for the date of service the drug is administered.

CMS maintains a list of participating manufacturers and their rebate-eligible drug products, which is updated quarterly on the [CMS website](#). TMHP will republish this list quarterly in a more accessible format.

When providers submit claims for clinician-administered drug procedure codes, they must include the National Drug Code (NDC) of the administered drug as indicated on the drug packaging. While 340B purchased claims are not eligible for drug rebates, NDCs are required to receive federal funding to pay the claim.

TMHP will deny claims for drug procedure codes under the following circumstances:

- The NDC submitted with the drug procedure code is not on the CMS drug rebate list that was current on the date of service.
- The NDC submitted with the drug procedure code has been terminated.
- The drug procedure code is submitted with a missing or invalid NDC.

To avoid claim denials, providers must speak with the pharmacy or wholesaler with whom they work to ensure the product purchased is on the current CMS list of participating manufacturers and their drugs.

***Note:** Texas Medicaid managed care organizations (MCOs) have their own policies and procedures regarding clinician-administered drugs. Providers must contact the client’s MCO for benefit and limitation information.*

Providers can find a complete, downloadable list of procedure codes and the corresponding descriptions on the Vendor Drug Program website at [www.txvendordrug.com](http://www.txvendordrug.com).

Vitamins and minerals procedure codes will be listed on a separate tab of the supplemental file.

6.3.5 Modifiers

Modifiers describe and qualify the services provided by Texas Medicaid. A modifier is placed after the five-digit procedure code. Up to two modifiers may apply per service. Examples of frequently used modifiers are listed in the following table. Refer to the service-specific sections for additional modifier requirements.

| Modifier                                               | Special Instructions/Notes (if applicable)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| <b>Telemedicine/Telehealth</b>                         |                                                                                                                                                                                                                                                                                                                                                         |
| 95                                                     | Use with appropriate evaluation and management codes.                                                                                                                                                                                                                                                                                                   |
| + Modifier is required for accurate claims processing. |                                                                                                                                                                                                                                                                                                                                                         |
| * Description is defined by the state.                 |                                                                                                                                                                                                                                                                                                                                                         |

| Other Common Modifiers |    |    |    |    |    |    |    |    |    |
|------------------------|----|----|----|----|----|----|----|----|----|
| AE                     | AF | AG | AK | AR | CB | CD | CE | CF | CG |
| KC                     | KD | KF | LT | M2 | RD | RT | SW | SY | TL |
| U1                     | U2 | U3 | UN | UP | UQ | UR | US |    |    |

The following modifiers may appear on R&S Reports (they are not entered by the provider):

- *PT*. The DRG payment was calculated on a per diem basis for an inpatient stay because of patient transfer.
- *PS*. The DRG payment was calculated on a per diem basis because the patient exhausted the 30-day inpatient benefit limitation during the stay.
- *PE*. The DRG payment was calculated on a per diem basis because the patient was ineligible for Medicaid during part of the stay. Also used to adjudicate claims with adjustments to outlier payments.

### 6.3.6 Benefit Code

A benefit code is an additional data element used to identify state programs.

Providers that participate in the following programs must use the associated benefit code when submitting claims and authorizations:

| Program                                                                                   | Benefit Code |
|-------------------------------------------------------------------------------------------|--------------|
| Comprehensive Care Program (CCP)                                                          | CCP          |
| THSteps Medical                                                                           | EP1          |
| THSteps Dental                                                                            | DE1          |
| Family Planning Agencies*                                                                 | FP3          |
| Hearing Aid Dispensers                                                                    | HA1          |
| Maternity                                                                                 | MA1          |
| County Indigent Health Care Program                                                       | CA1          |
| Early Childhood Intervention (ECI) Providers                                              | EC1          |
| Tuberculosis (TB) Clinics                                                                 | TB1          |
| IDD case management providers                                                             | MH2          |
| *Agencies only—Benefit codes should not be used for individual family planning providers. |              |

## 6.4 Claims Filing Instructions

This section contains instructions for completion of Medicaid-required claim forms. When filing a claim, providers should review the instructions *carefully* and complete *all* requested information. A correctly completed claim form is processed faster.

This section provides a sample claim form and its corresponding instruction table for each acceptable Texas Medicaid claim form.

All providers, except those on prepayment review, should submit paper claims to TMHP to the following address:

Texas Medicaid & Healthcare Partnership  
Claims  
PO Box 200555  
Austin, TX 78720-0555

Providers on prepayment review must submit all paper claims and supporting medical record documentation to the following address:

Texas Medicaid & Healthcare Partnership  
Attention: Prepayment Review MC-A11 SURS  
PO Box 203638  
Austin, TX 78720-3638

#### 6.4.1 National Correct Coding Initiative (NCCI) Guidelines

The Patient Protection and Affordable Care Act (PPACA) mandates that all claims that are submitted to TMHP be filed in accordance with the NCCI guidelines, including claims for services that have been prior authorized or authorized with medical necessity documentation.

The following NCCI MUE limitations have been deactivated as approved by CMS:

| Procedure Codes               | Description                                              | Deactivated Limitation<br>(per date of service) | Approved Limitations               |
|-------------------------------|----------------------------------------------------------|-------------------------------------------------|------------------------------------|
| A4281, A4282, A4284,<br>A4286 | Breast pump<br>replacement parts                         | 1                                               | 2 of each part per rolling<br>year |
| H0005                         | Group therapy for<br>substance use disorder<br>treatment | 1                                               | 135 units per calendar<br>year     |

The CMS NCCI and MUE guidelines can be found on the CMS website at [www.cms.gov](http://www.cms.gov).

The NCCI guidelines consist of HCPCS or CPT procedure code pairs that must not be reported together and MUEs that determine whether procedure codes are submitted in quantities that are unlikely to be correct.

The NCCI and MUE spreadsheets are published and updated by CMS and are available on the CMS Medicaid NCCI Coding web page under “NCCI and MUE Edits” as follows:

- NCCI edit spreadsheets. The website contains the Medicaid NCCI edit spreadsheet for hospital services and the Medicaid NCCI edit spreadsheet for practitioner services. The spreadsheets list the procedure code pairs that will not be reimbursed separately if they are billed by the same provider with the same date of service. Column 1 procedure codes may be reimbursed and Column 2 procedure codes will be denied. The spreadsheets also contain a column that indicates whether or not a modifier is allowed for services that may be reimbursed separately.
- MUE edit spreadsheets. The website contains the Medicaid MUE edit spreadsheets for hospital services, practitioner services, and supplier services. The spreadsheets list procedure codes and the number of units that may be reimbursed for each procedure code. Units that are submitted beyond these limitations will be denied.

**Note:** Providers are required to comply with NCCI and MUE guidelines as well as the guidelines that are published in the Texas Medicaid Provider Procedures Manual, all currently published website articles, fee schedules, and all other application information published on the TMHP website at [www.tmhp.com](http://www.tmhp.com). In instances when Texas Medicaid medical policy is more restrictive than NCCI or MUE guidance, Texas Medicaid medical policy prevails.

HHSC continue to implement and enforce correct coding initiatives. Providers may see additional claim denials related to NCCI and MUE edits including those services that were prior authorized or authorized with medical necessity documentation.

If a rendered service does not comply with a guideline as defined by NCCI, medical necessity documentation may be submitted with the claim for the service to be considered for reimbursement; however, medical necessity documentation does not guarantee payment for the service.

**Important:** *Prior authorization and authorization based on documentation of medical necessity is a condition for reimbursement; it is not a guarantee of payment.*

Claims that were submitted with dates of service from October 1, 2010, through June 30, 2013, will not be reprocessed in accordance with the NCCI guidelines; however, any claims with dates of service on or after October 1, 2010, that are appealed or reprocessed for reasons other than NCCI auditing will be subject to NCCI auditing guidelines.

#### 6.4.1.1 NCCI Processing Categories

The following coding rule categories are applied to claims that are submitted with dates of service on or after October 1, 2010:

| Coding Rule Category | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Maximum units        | <p>CMS has assigned to all procedure codes a maximum number of units that may be submitted for a client per day, regardless of the provider. The maximum number of units for each procedure code is based on the following criteria:</p> <ul style="list-style-type: none"> <li>• Procedure code description</li> <li>• Anatomical site</li> <li>• CMS sources</li> <li>• Clinical guidelines</li> </ul> <p><b>Important:</b> <i>If the maximum number of units has been exceeded on a particular line item, the line item will be denied. The line item will not be cut back to the allowable quantity. The line item may be appealed with the appropriate quantity for consideration.</i></p>                                                                                                                                                                                                                                                                                                               |
| NCCI                 | <p>NCCI is a collection of bundling edits created and sponsored by CMS that are separated into two major categories: Column I and Column II procedure code edits (previously referred to as “Comprehensive” and “Component”) and Mutually Exclusive procedure code edits.</p> <p>NCCI edits are applied to services that are performed by the same provider on the same date of service only and do not apply to services that are performed within the global surgical period. Each NCCI code pair edit is associated with a policy as defined in the <i>National Correct Coding Initiative Policy Manual</i>. Effective dates apply to code pairs in NCCI and represent the date when CMS added the code pair combination to the NCCI edits. Code combinations are processed based on this effective date. Termination dates also apply to code pairs in NCCI. This date represents the date when CMS removed the code pair combination from the NCCI edits. Code combinations are refreshed quarterly.</p> |

#### 6.4.1.2 CPT and HCPCS Claims Auditing Guidelines

Claims with dates of service on or after October 1, 2010, must be filed in accordance with *Current Procedural Terminology* (CPT) and Healthcare Common Procedure Coding System (HCPCS) guidelines as defined in the American Medical Association (AMA) and Centers for Medicare & Medicaid Services (CMS) coding manuals. Claims that are not filed in accordance with CPT and HCPCS guidelines may be denied, including claims for services that were prior authorized or authorized based on documentation of medical necessity.

If a rendered service does not comply with CPT or HCPCS guidelines, medical necessity documentation may be submitted with the claim for the service to be considered for reimbursement; however, medical necessity documentation does not guarantee payment for the service.

**Important:** *Prior authorization and authorization based on documentation of medical necessity is a condition for reimbursement; it is not a guarantee of payment.*

The following coding rule categories apply to claims submissions:

| Coding Rule Category | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|----------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Add-on codes         | Certain services are commonly carried out in addition to the rendering of the primary procedure and are associated with the primary procedures. These additional or supplemental procedures are referred to as “add-on” procedures. Add-on codes are identified in the CPT Manual with a plus mark (“+”) symbol and are also listed in Appendix D of the CPT Manual. Add-on codes are always performed in addition to a primary procedure, and should never be reported as a stand-alone service. When an add-on code is submitted and the primary procedure has not been identified on either the same or different claim, then the add-on code will be denied as an inappropriately-coded procedure. If the primary procedure is denied for any reason, then the add-on code will be denied also. |
| Deleted HCPCS codes  | Procedure codes undergo revision by the AMA and CMS on a regular basis. Revisions typically include adding new procedure codes, deleting procedure codes, and redefining the description of existing procedure codes. These revisions are normally made on an annual basis by the governing entities with occasional quarterly updates. Claims that are received with deleted procedure codes will be validated against the date of service. If the procedure code is valid for the date of service, the claim will continue processing. If the procedure code is invalid for the date of service, the invalid procedure code will be denied.                                                                                                                                                       |
| Diagnosis validity   | ICD-10-CM diagnosis codes undergo revision by the Centers for Disease Control and Prevention (CDC) and CMS on a regular basis. Revisions typically include adding new diagnosis codes, deleting diagnosis codes, and redefining the description of existing diagnosis codes. These revisions are normally made on an annual basis.<br><br>Claims that are received with invalid diagnosis codes will be validated against the date of service. If the diagnosis code is valid for the date of service, the claim will continue processing. If the diagnosis code is invalid for the date of service, the procedure that is referenced to the invalid diagnosis code will be denied.                                                                                                                 |
| Diagnosis-age        | Certain diagnosis codes are age-specific. If a diagnosis code that is billed does not match the age of the client on that date of service, all services associated with that diagnosis code will be denied.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Diagnosis-gender     | Certain diagnosis codes are gender-specific. If the diagnosis code that is billed does not match the gender of the client, all services associated with that diagnosis code will be denied.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Duplicate claim      | A duplicate claim is defined as a claim or procedure code detail that exactly matches a claim or procedure code detail that has been reimbursed to the same provider for the same client. Duplicate claims or details include the same date of service, procedure code, modifier, and number of units. Duplicate claims or procedure code details will be denied.<br><br><b>Note:</b> <i>Modifiers may be used to identify separate services.</i>                                                                                                                                                                                                                                                                                                                                                   |

| Coding Rule Category                                       | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Evaluation and Management (E/M) services                   | <p>The AMA defines new and established patients as follows:</p> <ul style="list-style-type: none"> <li>A new patient is “one who has not received any professional services from the physician or another physician of the same specialty who belongs to the same group practice within the past three years.”</li> <li>An established patient is “one who has received a professional service from the physician or another physician of the same specialty who belongs to the same group practice within the past three years.”</li> </ul> <p>Only one E/M procedure code may be reimbursed for a single date of service by the same provider group and specialty, regardless of place of service.</p> <p>Providers may refer to subsection 9.2.60, “Physician Evaluation and Management (E/M) Services” in the <i>Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)</i> for additional information about physician E/M services.</p>                                      |
| Procedure code definition                                  | The CPT manual assigns each procedure code a specific description or definition to describe the service that is rendered. In order to support correct coding, the procedure code definition rules will deny procedure codes based on the appropriateness of the code selection as directed by the definition and nature of the procedure code.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| Procedure code guideline                                   | The CPT manual includes specific reporting guidelines that are located throughout the manual and at the beginning of each section. In order to ensure correct coding, these guidelines provide reporting guidance and must be followed when submitting specific procedure codes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| Procedure-age                                              | Certain procedure codes, by definition or nature of the procedure, are limited to the treatment of a specific age or age group. For example, procedure code 99382 is limited to clients who are 1 through 4 years of age.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Procedure-gender                                           | Certain procedure codes, by definition or nature of the procedure, are limited to the treatment of one gender. For example, hysterectomy procedure code 58150 is limited to female clients.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Total, professional interpretation, and technical services | <p>Diagnostic tests and radiology services are procedure codes that include two components: professional interpretation and technical. The professional interpretation component describes the physician’s interpretation and report services and is billed with modifier 26. The technical component describes the technical portion of a procedure, such as the use of equipment and staff needed to perform the service, and is billed with modifier TC.</p> <p>If the professional interpretation and technical components are rendered by the same provider, the total component may be billed using the appropriate procedure code without modifiers 26 and TC. Reimbursement of diagnostic tests and radiology services is limited to no more than the amount for the total component.</p> <p>Providers must refer to the appropriate Texas Medicaid fee schedules to determine payable components for diagnostic and radiology services. Procedure codes that are submitted with an inappropriate modifier will be denied.</p> |

## 6.4.2 Claim Form Requirements

### 6.4.2.1 Provider Signature on Claims

Every paper CMS-1500, American Dental Association (ADA) Dental Claim Form, and 2017 Claim Form must be submitted with the provider’s or an authorized representative’s handwritten signature (or signature stamp) in the appropriate block of the claim form. Signatory supervision of the authorized

representative is required. Providers delegating signature authority to a member of the office staff or to a billing service remain responsible for the accuracy of all information on a claim submitted for payment. Initials are only acceptable for first and middle names. The last name must be spelled out. An acceptable example is J.A. Smith for John Adam Smith. An unacceptable example is J.A.S. for John Adam Smith. Typewritten names must be accompanied by a handwritten signature; in other words, a typewritten name with signed initials is not acceptable. The signature must be contained within the appropriate block of the claim form. Claims prepared by computer billing services or office-based computers may have “Signature on File” printed in the signature block, but it must be in the same font that is used in the rest of the form. For claims prepared by a billing service, the billing service must retain a letter on file from the provider authorizing the service.

*Printing the provider’s name instead of “Signature on File” is unacceptable.* Because space is limited in the signature block, providers should not type their names in the block. Claims not meeting these specifications appear in the “Paid or Denied Claims” sections of the R&S Reports.

#### **6.4.2.2 Group Providers**

Providers billing as a group must give the performing provider NPI on their claims as well as the group provider NPI. This requirement excludes THSteps medical providers.

#### **6.4.2.3 Supervising Physician Provider Number Required on Some Claims**

The supervising physician provider number is required on claims for services that are ordered or referred by one provider at the direction of or under the supervision of another provider, and the referral or order is based on the supervised provider’s evaluation of the client.

If a referral or order for services to a Texas Medicaid client is based on a client evaluation that was performed by the supervised provider, the billing provider’s claim must include the names and NPIs of both the ordering provider and the supervising provider. The billing provider must obtain all of the required information from the ordering or referring provider before submitting the claim to TMHP.

Providers who submit TexMedConnect electronic claims for professional, ambulance, or vision services can provide the claim information in the designated field for the supervising provider of the referring or ordering provider.

Providers can refer to TexMedConnect instructions on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for details about the “Referring/Other Supervising Provider” field for professional, ambulance, and vision electronic claims.

**Note:** *Pharmacy claims are currently excluded from this requirement.*

#### **6.4.2.4 Ordering or Referring Provider NPI**

All Texas Medicaid claims for services that require a physician order or referral must include the ordering or referring provider’s NPI:

- If the ordering or referring provider is enrolled in Texas Medicaid as a billing or performing provider, the billing or performing provider NPI must be used on the claim as the ordering or referring provider.
- If the ordering or referring provider is not currently enrolled in Texas Medicaid as a billing or performing provider, the provider must enroll to receive an ordering or referring-only taxonomy and benefit code. After the ordering or referring provider is enrolled, the ordering or referring provider’s NPI must be used on the claim as the ordering or referring provider.

**Important:** *The billing provider is responsible for confirming that the ordering or referring provider is enrolled as an ordering or referring-only provider.*

Claims that are submitted without the ordering or referring provider's NPI and claims submitted with an NPI for a provider who is not enrolled in Texas Medicaid may be subject to retrospective review and denial for a missing or invalid NPI.

**Note:** *Providers who enroll in Texas Medicaid as ordering- and referring-only providers can use their NPI for orders and referrals for Texas Medicaid clients and CSHCN Services Program clients.*

#### **6.4.2.5 Attending Provider NPI Requirements**

The attending provider is the individual who would normally be expected to certify and re-certify the medical necessity of the number of services rendered or who has primary responsibility for the patient's medical care and treatment.

**Note:** *Outpatient claim providers may be instructed to submit the ordering provider name and NPI number in the attending provider field.*

#### **6.4.2.6 Prior Authorization Numbers on Claims**

Claims filed to TMHP must contain only one prior authorization number per claim. Prior authorization numbers must be indicated on the appropriate electronic field or on the paper claim forms in the indicated block:

- CMS-1500—Block 23
- UB-04 CMS-1450—Block 63
- ADA—Block 2
- Family Planning—Block 30

#### **6.4.2.7 Newborn Clients Without Medicaid Numbers**

If a Medicaid eligible newborn has not been assigned a Medicaid number on the DOS, the provider must wait until a Medicaid client number is assigned to file the claim. The provider writes the number instead of "Pending." The 95-day filing period begins on the "add date," which is the date the eligibility is received and added to the TMHP eligibility file. Providers verify eligibility and add date through TexMedConnect or by calling AIS or the TMHP Contact Center at 800-925-9126 after the number is received.

Providers must check Medicaid eligibility regularly to file claims within the required 95-day filing deadline.

**Referto:** "Section 4: Client Eligibility" (Vol. 1, General Information).

#### **6.4.2.8 Multipage Claim Forms**

##### **6.4.2.8.1 Professional Claims**

The approved electronic claims format is designed to list 50 line items. The total number of details allowed for a professional claim by the TMHP claims processing system (C21) is 28. If the services provided exceed 28 line items on an approved electronic claims format or 28 line items on paper claims, the provider must submit another claim for the additional line items.

The CMS-1500 paper claim form is designed to list six line items in Block 24. If more than six line items are billed on a paper claim, a provider may attach additional forms (pages) totaling no more than 28 line items. The first page of a multipage claim must contain all the required billing information. On subsequent pages of the multipage claim, the provider should identify the client's name, diagnosis,

information required for services in Block 24, and the page number of the attachment (for example, page 2 of 3) in the top right-hand corner of the form and indicate “continued” in Block 28. The combined total charges for all pages should be listed on the last page in Block 28.

**Note:** Providers who submit professional claims for inpatient services are required to include only the facility’s NPI on the CMS-1500 paper claim form or electronic equivalent.

#### 6.4.2.8.2 Institutional Claims

The total number of details allowed for an institutional claim by the TMHP claims processing system (C21) is 28. C21 merges like revenue codes together for inpatient claims to reduce the lines to 28 or less. If the C21 merge function is unable to reduce the lines to 28 or less, the claim will be denied, and the provider will need to reduce the number of details and resubmit the claim.

An EDI approved electronic format of the UB-04 CMS-1450 is designed to list 71 lines. C21 merges like revenue codes together to reduce the lines to 28 or less.

Providers submitting electronic claims using TexMedConnect may not submit more than 28 lines. If the services exceed the 28 lines, the provider may submit another claim for the additional lines or merge codes.

The paper UB-04 CMS-1450 is designed to list 23 lines in Block 43. If services exceed the 23-line limitation, the provider may attach additional pages. The first page of a multipage claim must contain all required billing information. On subsequent pages, the provider identifies the client’s name, diagnosis, all information required in Block 43, and the page number of the attachment (e.g., page 2 of 3) in the top right-hand corner of the form and indicate “continued” on Line 23 of Block 47. The combined total charges for all pages should be listed on the last page on Line 23 of Block 47.

When splitting a claim, all pages must contain the required information. Usually, there are logical breaks to a claim. For example, the provider may submit the surgery charges in one claim and the subsequent recovery days in the next claim.

TEFRA hospitals are required to submit all charges.

#### 6.4.2.8.3 Inpatient Hospital Claims

Medicaid present-on-admission (POA) reporting is required for all inpatient hospital claims that are paid under prospective payment basis methodology. No hospitals are exempt from this POA requirement.

Medicare crossover hospital claims must also comply with the Medicaid requirement to include the POA values. Claims submitted without the POA indicators are denied. POA values are:

| POA Value | Description                                         | Payment                                                                                     |
|-----------|-----------------------------------------------------|---------------------------------------------------------------------------------------------|
| Y         | Diagnosis was present at the time of admission.     | Payment will be made by Texas Medicaid when a hospital acquired condition (HAC) is present. |
| N         | Diagnosis was not present at the time of admission. | No payment will be made by Texas Medicaid when an HAC is present.                           |
| U         | Documentation was insufficient.                     | No payment will be made by Texas Medicaid when an HAC is present.                           |
| W         | Clinically undetermined.                            | Payment will be made by Texas Medicaid when an HAC is present.                              |
| Blank     | Exempt from POA Reporting                           | Exempt from POA Reporting                                                                   |

**Note:** Texas Medicaid follows Medicare guidelines for payments referenced in the above table.

Depending on the POA indicator value, the DRG may be recalculated, which could result in a lower payment to the hospital facility provider. If the number of days on an authorization is higher than the number of days allowed as a result of a POA DRG recalculation, the lesser of the number of days is reimbursed.

**Referto:** [Federal Register, Vol. 76, No. 108](#) (for CMS).

#### 6.4.2.9 Attachments to Claims

To expedite claims processing, providers must supply all information on the claim form itself and limit attachments to those required by TMHP or necessary to supply information to properly adjudicate the claim. The following claim form attachments are required when appropriate:

- All claims for services associated with an elective sterilization must have a valid Sterilization Consent Form attached or on file at TMHP.
- Nonemergency ambulance transfers must have documentation of medical necessity including out-of-locality transfers.
- For fee-for-service clients, providers filing to TMHP for Medicaid payment of Medicare coinsurance and deductible according to current payment guidelines must attach the paper MRAN received from Medicare or a Medicare intermediary or the computer generated MRANs from the CMS-approved software applications MREP for professional services or PC-Print for institutional services. Providers that submit paper crossover claims must submit only one of the approved MRAN formats.
- For MAP clients, providers filing to TMHP for Medicaid payment of Medicare coinsurance and deductible according to current payment guidelines must submit with the paper claim the TMHP Standardized Medicare Advantage Plan (MAP) Remittance Advice Notice Template with the MAP EOB. If the template and MAP EOB contain conflicting information, the claim will not be processed and will be returned to the provider.
- Medically necessary abortions performed (on the basis of a physician's professional judgement, the life of the mother is endangered if the fetus were carried to term), or abortions provided for pregnancy related to rape or incest must have a signed and dated physician certification statement. Elective abortions are *not* benefits of Texas Medicaid.
- Hysterectomies must have a Hysterectomy Acknowledgment Statement attached or on file at TMHP.

**Referto:** [Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

- Claims for services that were paid by an MCO and then recouped must contain the recoupment EOB from the MCO for consideration of payment. The claims must meet the 95-day deadline from the recoupment disposition date.

**Note:** *Letter requests for refunds will not be accepted. A recoupment EOB with a disposition date is required.*

#### 6.4.2.10 Clients with a Designated or Primary Care Provider

Claims for clients with a primary care provider or designated provider (i.e., Texas Medicaid fee-for-service clients enrolled as Limited Program clients) must indicate the primary care provider or designated provider NPIs in the billing or performing provider fields.

When clients receive services from a different provider, such as a specialist, the primary care provider or designated provider's information must be included in the referring provider fields on the claim.

## 6.5 CMS-1500 Paper Claim Filing Instructions

The following providers bill for services using the ANSI ASC X12 837P 5010 electronic specifications or the CMS-1500 paper claim form:

| Providers                                                                                                                                                                    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Ambulance                                                                                                                                                                    |
| ASC (freestanding)                                                                                                                                                           |
| Case Management for Blind and Visually Impaired Children (BVIC), Case Management for Early Childhood Intervention (ECI), and Case Management for Children and Pregnant Women |
| Certified nurse-midwife (CNM)                                                                                                                                                |
| Certified registered nurse anesthetist (CRNA)                                                                                                                                |
| Certified respiratory care practitioner (CRCP)                                                                                                                               |
| Chemical dependency treatment facilities                                                                                                                                     |
| Chiropractor                                                                                                                                                                 |
| Clinical nurse specialist (CNS)                                                                                                                                              |
| Dentist (doctor of dentistry practicing as a limited physician)                                                                                                              |
| DME                                                                                                                                                                          |
| Family planning agency that does not also receive funds from the HHSC Family Planning Program                                                                                |
| FQHC                                                                                                                                                                         |
| Genetic service agency                                                                                                                                                       |
| Hearing aid                                                                                                                                                                  |
| IDD case management                                                                                                                                                          |
| In-home total parenteral nutrition (TPN) supplier                                                                                                                            |
| Laboratory                                                                                                                                                                   |
| Licensed dietitian (CCP only)                                                                                                                                                |
| Licensed clinical social worker (LCSW)                                                                                                                                       |
| Licensed professional counselor (LPC)                                                                                                                                        |
| Maternity service clinic (MSC)                                                                                                                                               |
| Mental health (MH) targeted case management                                                                                                                                  |
| Mental health (MH) rehabilitative services                                                                                                                                   |
| Nurse practitioner (NP)                                                                                                                                                      |
| Occupational therapist (CCP only)                                                                                                                                            |
| Optician/optometrist/ophthalmologist                                                                                                                                         |
| Orthotic and prosthetic supplier (CCP only)                                                                                                                                  |
| Pharmacy                                                                                                                                                                     |
| Physical therapist                                                                                                                                                           |
| Physician (group and individual)                                                                                                                                             |
| Physician assistant (PA)                                                                                                                                                     |
| Podiatrist                                                                                                                                                                   |
| Private duty nurse (PDN) (CCP only)                                                                                                                                          |
| Psychologist                                                                                                                                                                 |
| Radiology                                                                                                                                                                    |

| Providers                                                  |
|------------------------------------------------------------|
| Rural Health Clinics rendering services to THSteps clients |
| School Health and Related Services (SHARS)                 |
| Speech language pathologist (CCP only)                     |
| THSteps medical                                            |
| Tuberculosis clinic                                        |

Providers obtain copies of the CMS-1500 paper claim form from a vendor of their choice; TMHP does not supply them.

### 6.5.1 CMS-1500 Electronic Billing

Electronic billers must submit CMS-1500 paper claim forms with TexMedConnect or approved vendor software that uses the ANSI ASC X12 837P 5010 format. Specifications are available to providers developing in-house systems, software developers, and vendors on the TMHP website at [www.tmhp.com/topics/edi](http://www.tmhp.com/topics/edi). Because each software developer is different, location of fields may vary. Contact the software developer or vendor for this information. Direct questions and development requirements to the TMHP EDI Help Desk at 888-863-3638.

**Referto:** Subsection 3.2, “Electronic Billing” in “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information about electronic billing.

### 6.5.2 CMS-1500 Claim Form (Paper) Billing

Claims must contain the billing provider’s complete name, physical address with ZIP +4 code, taxonomy, and benefit code (if applicable). Claims without this information cannot be processed. Each claim form must have the appropriate signatory evidence in the signature certification block.

**Referto:** The [Professional Paper Claim Form \(CMS-1500\)](http://www.cms.gov) page of the CMS website at [www.cms.gov](http://www.cms.gov) for more information about the CMS-1500 paper claim form. Providers can purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms. Providers can find examples of completed claim forms on the [Claim Form Examples](http://www.tmhp.com) page of the TMHP website at [www.tmhp.com](http://www.tmhp.com).

**Important:** *When completing a CMS-1500 paper claim form, all required information must be included on the claim in the appropriate block. Information is not keyed from attachments. Superbills or itemized statements are not accepted as claim supplements.*

### 6.5.3 CMS- 1500 Provider Definitions

The following definitions apply to the provider terms used on the CMS-1500 paper claim form:

#### Referring Provider

The referring provider is the individual who directed the patient for care to the provider that rendered the services being submitted on the claim form.

Examples include, but are not limited to the following:

- A primary care provider referring to a specialist
- An orthodontist referring to an oral and maxillofacial surgeon
- A physician referring to a physical therapist
- A provider referring to a home health agency

**Ordering Provider**

The ordering provider is the individual who requested the services or items listed in Block D of the CMS-1500 paper claim form.

Examples include, but are not limited to, a provider ordering diagnostic tests, medical equipment, or supplies.

**Rendering Provider**

The rendering provider is the individual who provided the care to the client. In the case where a substitute provider was used, that individual is considered the rendering provider.

An individual such as a lab technician or radiology technician who performs services in a support role is not considered a rendering provider.

**Supervising Provider**

The supervising provider is the individual who provided oversight of the rendering provider and the services listed on the CMS-1500 paper claim form.

An example would be the supervision of a resident physician.

**Purchased Service Provider**

A purchased service provider is an individual or entity that performs a service on a contractual or reassignment basis.

Examples of services include the following:

- Processing a laboratory specimen
- Grinding eyeglass lenses to the specifications of the referring provider
- Performing diagnostic testing services (excluding clinical laboratory testing) subject to Medicare’s antimarkup rule

In the case where a substitute provider is used, that individual is not considered a purchased service provider.

**6.5.4 CMS-1500 Instruction Table**

The instructions describe what information must be entered in each of the block numbers of the CMS-1500 paper claim form. Block numbers *not* referenced in the table may be left blank. They are *not* required for claim processing by TMHP.

| Block No. | Description                                                       | Guidelines                                                                                                                                                                                                                        |
|-----------|-------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1a        | Insured’s ID No. (for program checked above, include all letters) | Enter the client’s nine-digit patient number from the Medicaid identification form.<br><br>For other property & casualty claims: Enter the Federal Tax ID or SSN of the insured person or entity.                                 |
| 2         | Patient’s name                                                    | Enter the client’s last name, first name, and middle initial as printed on the Medicaid identification form.<br><br>If the insured uses a last name suffix (e.g., Jr, Sr) enter it after the last name and before the first name. |
| 3         | Patient’s date of birth<br>Patient’s sex                          | Enter numerically the month, day, and year (MM/DD/YYYY) the client was born. Indicate the client’s gender by checking the appropriate box.<br><br>Only one box can be marked.                                                     |
| 5         | Patient’s address                                                 | Enter the client’s complete address as described (street, city, state, and ZIP code).                                                                                                                                             |

| Block No.         | Description                                                                                                           | Guidelines                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| Block No. | Description                           | Guidelines                                                                                                                                                                                                                                                                                                                                                                                  |
|-----------|---------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 31        | Signature of physician or supplier    | The physician, supplier, or an authorized representative must sign and date the claim.<br><br>Billing services may print “Signature on File” in place of the provider’s signature if the billing service obtains and retains on file a letter signed by the provider authorizing this practice.<br><br><b>Refer to:</b> Subsection 6.4.2.1, “Provider Signature on Claims” in this section. |
| 32        | Service facility location information | If services were provided in a place other than the client’s home or the provider’s facility, enter name, address, and ZIP+4 code of the facility where the service was provided. This is a required field for services provided in a facility. The facility provider number, name, and address are not optional.                                                                           |
| 32A       | NPI                                   | Enter the NPI of the service facility location.                                                                                                                                                                                                                                                                                                                                             |
| 33        | Billing provider info & PH #          | Enter the billing provider’s name, physical address, city, state, ZIP+4 code, and telephone number.                                                                                                                                                                                                                                                                                         |
| 33A       | NPI                                   | Enter the NPI of the billing provider.                                                                                                                                                                                                                                                                                                                                                      |
| 33B       | Other ID #                            | Enter the taxonomy code of the billing provider.                                                                                                                                                                                                                                                                                                                                            |

## 6.6 UB-04 CMS-1450 Paper Claim Filing Instructions

The following provider types may bill electronically or use the UB-04 CMS-1450 paper claim form when requesting payment:

| Provider Types                                                                                                                                              |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ASCs (hospital-based)                                                                                                                                       |
| Comprehensive outpatient rehabilitation facilities (CORFs) (CCP only)                                                                                       |
| FQHCs<br><b>Note:</b> Must use CMS-1500 when billing THSteps.                                                                                               |
| Home health agencies                                                                                                                                        |
| Hospitals <ul style="list-style-type: none"> <li>Inpatient (acute care, rehabilitation, military, and psychiatric hospitals)</li> <li>Outpatient</li> </ul> |
| Indian Health                                                                                                                                               |
| Renal dialysis center                                                                                                                                       |
| Personal Care Services (PCS)                                                                                                                                |
| RHCs (freestanding and hospital-based)<br><b>Note:</b> Must use CMS-1500 when billing THSteps.                                                              |

If a service is rendered in the facility setting but the facility’s medical record does not clearly support the information submitted on the facility claim, the facility may request additional information from the physician before submitting the claim to ensure the facility medical record supports the filed claim.

**Note:** In the case of an audit, facility providers will not be allowed to submit an addendum to the original medical records for finalized claims.

### 6.6.1 UB-04 CMS-1450 Electronic Billing

Electronic billers must submit UB-04 CMS-1450 claims with TexMedConnect or approved vendor software that uses the ANSI ASC X12 837I 5010 format. Specifications are available to providers developing in-house systems and software developers and vendors. Because each software package is different, field locations may vary. Contact the software developer or vendor for this information. Direct questions and development requirements to the TMHP EDI Help Desk at 888-863-3638.

**Referto:** Subsection 3.2, “Electronic Billing” in “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for more information about electronic billing.

**Note:** *The maximum number of electronic claim details that will be accepted electronically is 71. Only 28 details will be processed.*

### 6.6.2 UB-04 CMS-1450 Claim Form (Paper) Billing

Providers obtain the UB-04 CMS-1450 paper claim forms from a vendor of their choice.

**Note:** *To avoid claim denial, only the provider’s NPI should be placed in form locators 76-79 of the UB-04 CMS-1450 paper claim form or in the referring provider field on the electronic claim unless the client is a limited client.*

Completed UB-04 CMS-1450 claims must contain the billing provider’s full name, physical address, including the ZIP+4 Code, NPI, taxonomy and benefit code (if applicable). Claims *without* this information in the appropriate fields *cannot* be processed.

**Referto:** The [Institutional paper claim form \(CMS-1450\)](#) CMS website at [www.cms.gov](http://www.cms.gov) for more information about the CMS-1450 paper claim form. Providers can purchase CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply the forms. Providers can find examples of completed claim forms on the [Claim Form Examples](#) page of the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Subsection 6.6.3, “UB-04 CMS-1450 Instruction Table” in this section.

### 6.6.3 UB-04 CMS-1450 Instruction Table

The instructions describe what information must be entered in each of the block numbers of the UB-04 CMS-1450 paper claim form. Block numbers not referenced in the table may be left blank. They are not required for claim processing by TMHP.

| Block No. | Description            | Guidelines                                                                                                                                                                                                                                             |
|-----------|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1         | Unlabeled              | Enter the hospital name, street, city, state, ZIP+4 Code, and benefit code (if applicable).                                                                                                                                                            |
| 3a        | Patient control number | <b>Optional:</b> Any alphanumeric character (limit 16) entered in this block is referenced on the R&S Report.                                                                                                                                          |
| 3b        | Medical record number  | Enter the patient’s medical record number (limited to ten digits) assigned by the hospital.                                                                                                                                                            |

Required when another operating physician is involved.</p> <p>Rendering provider—The health-care professional who performed, delivered, or completed a particular medical service or nonsurgical procedure.</p> <p><b>Important:</b> <i>Qualifier 82 is required to identify the rendering provider for acute care inpatient and outpatient institutional services.</i></p> <p><b>Note:</b> <i>If the referring physician is a resident, Blocks 76 through 79 must identify the physician who is supervising the resident.</i></p>                                                                                                                                                                                                                                                                                                                                                                                           |
| 80        | Remarks                          | <p>This block is used to explain special situations such as the following:</p> <ul style="list-style-type: none"> <li>• The home health agency must document in writing the number of Medicare visits used in the nursing plan of care and also in this block.</li> <li>• If a patient stays beyond dismissal time, indicate the medical reason if additional charge is made.</li> <li>• If billing for a private room, the medical necessity must be indicated, signed, and dated by the physician.</li> <li>• If services are the result of an accident, the cause and location of the accident must be entered in this block. The time must be entered in Block 39.</li> <li>• If laboratory work is sent out, the name and address or the provider identifier of the facility where the work was forwarded must be entered in this block.</li> <li>• If the services resulted from a family planning provider's referral, write "family planning referral."</li> <li>• If services were provided at another facility, indicate the name and address of the facility where the services were rendered.</li> <li>• Request for 110-day rule for a third party insurance.</li> </ul> |
| 81A-81D   | Other identification (ID) number | Enter the taxonomy code (non-NPI number) of the billing provider.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

### 6.6.4 Filing Tips for Outpatient Claims

The following are outpatient claim filing tips:

- Use HCPCS codes in Block 44 when available and give a narrative description in Block 43 for all services and supplies provided.

**Important:** *Services and supplies that exceed the 28 items per claim limitation must be submitted on an additional UB-04 CMS-1450 paper claim form and will be assigned a different claim number by TMHP.*

- Combine central supplies and bill as one item. IV supplies may be combined and billed as one item. Include appropriate quantities and total charges for each combined procedure code used. Using combination procedure codes conserves space on the claim form.
- The 28-item limitation per claim: a UB-04 CMS-1450 paper claim form submitted with 28 or fewer items is given an internal control number (ICN) by TMHP. Multipage claim forms are processed as one claim for that client *if all* pages contain 28 or fewer items.
- Itemized Statements: Itemized statements are not used for assignment of procedure codes. HCPCS codes or narrative descriptions of procedures *must* be reflected on the face of the UB-04 CMS-1450 paper claim form. Attachments will only be used for clarification purposes.

**Referto:** Subsection 6.3.3, “Procedure Coding” in this section.

## 6.7 American Dental Association (ADA) Dental Claim Filing Instructions

Providers billing for dental services and Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF-IID) dental services may bill electronically or use the ADA claim form.

**Note:** TMHP is responsible for reimbursing all THSteps dental services provided by dentists.

### 6.7.1 ADA Dental Claim Electronic Billing

Electronic billers must submit THSteps dental claims using TexMedConnect or an approved vendor software that uses the ANSI ASC X12 837D 5010 format. Specifications are available to providers developing in-house systems and software developers and vendors. Because each software package is different, block locations may vary. Contact the software developer or vendor for this information. Direct questions and development requirements to the TMHP EDI Help Desk at 888-863-3638.

**Note:** Dental providers who submit American National Standards Institute, Accredited Standards Committee X12 (ANSI ASC X12N) 837D transactions through the TMHP Electronic Data Interchange (EDI) are required to include the header date of service (HDOS) to comply with International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM) claims processing guidelines.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (Vol. 1, General Information) for more information about electronic filing.

### 6.7.2 ADA Dental Claim Form (Paper) Billing

All participating THSteps dental providers are required to submit a ADA Dental claim form for paper claim submissions to Texas Medicaid. These forms may be obtained by contacting the ADA at 800-947-4746.

Claims must contain the billing provider’s complete name, physical address, NPI, and taxonomy code. Claims without a provider name, physical address, NPI, and taxonomy code cannot be processed.

### 6.7.3 ADA Dental Claim Form

Samples of the ADA Dental Claim form can be found on the ADA website at [www.ada.org](http://www.ada.org).

### 6.7.4 ADA Dental Claim Form Instruction Table

The following table is an itemized description of the questions appearing on the form. Thoroughly complete the ADA Dental claim form according to the instructions in the table to facilitate prompt and accurate reimbursement and reduce follow-up inquiries.

| ADA Block No. | ADA Description                                                                                    | Instructions                                                                                                                                                                                                                                                                                                                                                        |
|---------------|----------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1             | Type of Transaction                                                                                | For Texas Medicaid, check the Statement of Actual Services Box. The other two boxes are not applicable. Do not use the ADA Dental Claim Form as a Texas Medicaid Prior Authorization form.<br><br><b>Referto:</b> <a href="#">THSteps Dental Mandatory Prior Authorization Request Form</a> on the TMHP website at <a href="http://www.tmhp.com">www.tmhp.com</a> . |

## 6.8 Family Planning Claim Filing Instructions

The following providers bill for services using the ANSI ASC X12 837P 5010 electronic specifications or the CMS-1500 paper claim form:

| Providers                                           |
|-----------------------------------------------------|
| Clinical nurse specialist (CNS)                     |
| Family Planning title agencies contracted with HHSC |
| Federally Qualified Health Center (FQHC)            |
| Nurse practitioner (NP)                             |
| Physician                                           |
| Physician assistant (PA)                            |

### 6.8.1 Family Planning Electronic Billing

Electronic billers must submit family planning claims with TexMedConnect or approved vendor software that uses the ANSI ASC X12 837P 5010 format. Specifications are available to providers developing in-house systems, software developers, and vendors on the TMHP website at [www.tmhp.com/topics/edi](http://www.tmhp.com/topics/edi). Because each software developer is different, location of fields may vary. Contact the software developer or vendor for this information. Direct questions and development requirements to the TMHP EDI Help Desk at 888-863-3638.

**Referto:** Subsection 3.2, “Electronic Billing” in “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information about electronic billing.

## 6.9 Family Planning Claim Form (Paper Billing)

Claims must contain the billing providers complete name, physical address, NPI, and taxonomy code. Claims without a provider name, physical address, NPI, and taxonomy code cannot be processed.

### 6.9.1 2017 Claim Form

A copy of a blank 2017 Claim Form and copies of example completed claim forms are available on the [Claim Form Examples](https://www.tmhp.com) page of the TMHP website at [www.tmhp.com](https://www.tmhp.com).

### 6.9.2 2017 Claim Form Instruction Table

The instructions describe what information must be entered in each of the block numbers of the 2017 Claim Form.

| Block No. | Description                                            | Guidelines                                                                                                                                                                                                                                                                                                                                                                                              | Required (Paper) |
|-----------|--------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------|
| 1         | Program                                                | Check the box for the specific program to which these services are billed: <ul style="list-style-type: none"> <li>Family Planning Program: XIX (Check this box for Title XIX family planning services and for Healthy Texas Women (HTW) program services)</li> <li>DSHS Family Planning Program (DFPP)</li> </ul>                                                                                       | XIX, DFPP (All)  |
| 2a        | Billing provider NPI                                   | Enter the billing provider's ten-digit NPI.                                                                                                                                                                                                                                                                                                                                                             | All              |
| 2b        | Billing provider taxonomy code                         | Enter the billing provider's taxonomy code.                                                                                                                                                                                                                                                                                                                                                             | All              |
| 3         | Provider name                                          | Enter the provider's name as enrolled with TMHP.                                                                                                                                                                                                                                                                                                                                                        | All              |
| 4         | Eligibility date (DFPP)                                | Enter the date (MM/DD/CCYY) this client was designated eligible for DFPP services.<br>For DFPP, the eligibility date can be found on the following forms: <ul style="list-style-type: none"> <li>INDIVIDUAL Eligibility Form (EF05-14215)</li> <li>HOUSEHOLD Eligibility Form (EF05-14214)</li> <li>HOUSEHOLD Eligibility Worksheet (EF05-13227)</li> <li>An approved DSHS substitute</li> </ul>        | DFPP             |
| 5         | DSHS Client no. (Medicaid PCN if XIX)                  | If previous DFPP, claims or encounters have been submitted to TMHP, enter the client's nine-digit DSHS client number, which begins with "F."<br>If the client has Title XIX Medicaid, enter the client's nine-digit client number from the Medicaid Identification form.<br>If this is a new client, without Medicaid, leave this block blank and TMHP will assign a DSHS client number for the client. | XIX              |
| 6         | Patient's name (last name, first name, middle initial) | Enter the client's last name, first name, and middle initial as printed on the Medicaid Identification Form, if Title XIX, or as printed in the provider's records, if DFPP.                                                                                                                                                                                                                            | All              |
| 7         | Address (street, city, state)                          | Enter the client's complete home address as described by the client (street, city, and state). This reflects the location where the client lives.                                                                                                                                                                                                                                                       | All              |
| 7a        | ZIP Code                                               | Enter the client's ZIP Code.                                                                                                                                                                                                                                                                                                                                                                            | All              |
| 8         | County of residence                                    | Enter the county code that corresponds to the client's address. Please use the HHSC county codes.                                                                                                                                                                                                                                                                                                       | All              |

| Block No. | Description                      | Guidelines                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Required (Paper) |

## 6.10 Vision Claim Form

All vision services must be billed on a CMS-1500 paper claim form or the appropriate electronic formats. Vision claims submitted on other forms are denied with EOB 01145, "Claim form not allowed for this program."

For eyewear claims beyond program benefits, (e.g., replacing lost or destroyed eye wear), providers must have the patient sign the "Patient Certification Form" and retain in their records. Do not submit form to TMHP.

**Referto:** [Medicaid Vision Eyewear Client Certification Form](https://www.tmhp.com) on the TMHP website at [www.tmhp.com](https://www.tmhp.com).

The following table shows the blocks required for vision claims on a CMS-1500 paper claim form.

| Block No.   | Description                                                                                                                              |
|-------------|------------------------------------------------------------------------------------------------------------------------------------------|
| 1a          | Enter the patient's nine-digit client number from the Your Texas Benefits Medicaid card.                                                 |
| 2           | Enter the patient's last name, first name, and middle initial as printed on the Your Texas Benefits Medicaid card.                       |
| 3           | Enter numerically the month, day, and year (MM/DD/YYYY) the client was born. Indicate the patient's sex by checking the appropriate box. |
| 5           | Enter the patient's complete address as described (street, city, state, and ZIP Code).                                                   |
| 9 and 9a-9d | Other insurance or government benefits                                                                                                   |

| Block No.                                                                | Description                                                                                       |
|--------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|
| 10                                                                       | Was condition related to:<br>a. Patient's employment<br>b. Auto accident<br>c. Other accident     |
| 11                                                                       | Medicare number                                                                                   |
| 12                                                                       | Patient's or authorized person's signature                                                        |
| 13*                                                                      | Insured or authorized person's signature                                                          |
| 17 Name of referring physician or other source<br>17b NPI                | Name, provider identifiers, and address of prescribing medical doctor or doctor of optometry      |
| 21                                                                       | Diagnosis or nature of illness or injury                                                          |
| 24A                                                                      | DOS                                                                                               |
| 24B                                                                      | POS                                                                                               |

| 28                                                                       | Total charges                                                                                     |
| 29                                                                       | Amount paid by other insurance                                                                    |
| 31                                                                       | Signature of physician or supplier                                                                |
| 32                                                                       | Name and address of facility where services were rendered if other than home or office            |
| 33                                                                       | Telephone number                                                                                  |
| 33                                                                       | Physician's or supplier's name, physical address, city, state, and ZIP code                       |
| No longer used                                                           | Referral from screening program (THSteps)                                                         |

## 6.11 Remittance and Status (R&S) Report

The R&S Report provides information on pending, paid, denied, and adjusted claims. TMHP provides weekly R&S Reports to give providers detailed information about the status of claims submitted to TMHP. The R&S Report also identifies accounts receivables established as a result of inappropriate payment. These receivables are recouped from claim submissions. All claims for the same NPI and program processed for payment are paid at the end of the week, either by a single check or with

Electronic Funds Transfer (EFT). If no claim activity or outstanding account receivables exist during the cycle week, the provider does not receive an R&S Report. Providers are responsible for reconciling their records to the R&S to determine payments and denials received.

**Note:** *Providers receive a single R&S Report that details Texas Medicaid activities and provides individual program summaries. Combined provider payments are made based on the provider's settings for Texas Medicaid fee-for-service.*

Providers must retain copies of all R&S Reports for a minimum of five years. Providers must not use R&S Report originals for appeal purposes, but must submit copies of the R&S Reports with appeal documentation.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

### 6.11.1 R&S Report Delivery Options

TMHP offers two options for the delivery of the R&S Report:

- A PDF version that is available on the TMHP website through the secure provider portal.
- An Electronic Remittance and Status (ER&S) Report that is available through EDI.

The PDF version of the R&S Report is available through TexMedConnect, and can be downloaded by registered users of the TMHP website at [www.tmhp.com](http://www.tmhp.com). The report is available each Monday morning, immediately following the weekly claims cycle. Payments associated with the R&S Report are released the next Friday following the weekly claims cycle. Newly-enrolled providers are initially set up to receive the PDF version of the R&S Report.

The EDI delivery method is also available. Using HIPAA-compliant EDI standards, the (ER&S 835 file) can be downloaded through the TMHP EDI Gateway using third party software. The ER&S Report is available on Thursday the week the provider payments are released.

**Note:** *In rare instances, payments and R&S delivery may be delayed due to a system outage or holiday.*

In addition to the PDF R&S Report, an optional R&S Report delivery method is also available. Using HIPAA-compliant EDI standards, the ER&S Report can be downloaded through the TMHP EDI Gateway using TexMedConnect or third party software. The ER&S Report is also available each Monday after the completion of the claims processing cycle.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for more information about EDI formats and enrollment for the ER&S Report.

### 6.11.2 Banner Pages

Banner pages serve two purposes:

- They identify the provider's name and address.
- They are used to inform providers of new policies and procedures.

The title pages include the following information:

- TMHP address for submitting paper appeals
- Provider's name, address, and telephone number
- Unique R&S Report number specific to each report
- Provider identifier (NPI, and atypical provider identifier [API])
- Report sequence number (indicates the week number of the year)
- Date of the week being reported on the R&S Report

- Tax Identification Number
- Page number (R&S Report begins with page 1)
- AIS telephone number
- Taxonomy code

### 6.11.3 R&S Report Field Explanation

- *Patient name.* Lists the client's last name and first name, as indicated on the eligibility file.
- *Claim number.* The 24-digit Medicaid ICN for a specific claim. The format for the TMHP claim number is expanded to PPP/CCC/MMM/CCYY/JJJ/BBBBB/SSS.

| Acronym | Description                                   |
|---------|-----------------------------------------------|
| PPP     | Program                                       |
| CCC     | Claim type                                    |
| MMM     | Media source (region)                         |
| CCYY    | Year in which the claim was received          |
| JJJ     | Julian date on which the claim was received   |
| BBBBB   | TMHP internal batch number                    |
| SSS     | TMHP internal claim sequence within the batch |

#### Program Type

| PPP | Program                                                                                                               |
|-----|-----------------------------------------------------------------------------------------------------------------------|
| 001 | Long Term Care                                                                                                        |
| 100 | Medicaid                                                                                                              |
| 200 | Managed Care (for carve-out services administered by TMHP and PCCM claims with dates of service before March 1, 2012) |
| 300 | Family Planning (DSHS Family Planning Program)                                                                        |
| 400 | CSHCN Services Program                                                                                                |
| 999 | Default/summary for all media regions                                                                                 |

#### Claim Type

| Claim Type | Description                                                                                                 |
|------------|-------------------------------------------------------------------------------------------------------------|
| 020        | Physician/supplier (Medicaid only) (genetics agencies, THSteps [medical only], FQHC, optometrist, optician) |
| 021        | THSteps (dental)                                                                                            |
| 023        | Outpatient hospital, home health, RHC, FQHC                                                                 |
| 030        | Physician crossovers                                                                                        |
| 031        | Hospital outpatient crossovers, home health crossovers, RHC crossovers                                      |
| 040        | Inpatient hospital                                                                                          |
| 050        | Inpatient crossover                                                                                         |
| 056        | DSHS Family Planning Program                                                                                |
| 058        | Family Planning Title XIX                                                                                   |

**Media Source (MMM)**

| Region | Description                                     |
|--------|-------------------------------------------------|
| 010    | Paper                                           |
| 011    | Paper adjustment                                |
| 030    | Electronic (including TexMedConnect)            |
| 031    | Electronic adjustment (including TexMedConnect) |
| 041    | AIS adjustment                                  |
| 051    | Mass adjustment                                 |
| 061    | Crossover adjustment                            |
| 071    | Retroactive eligibility adjustment              |
| 080    | State Action Request                            |
| 081    | State Action Request adjustment                 |
| 090    | Telephone                                       |
| 100    | Fax                                             |
| 110    | Mail                                            |
| 120    | Encounter                                       |
| 121    | Encounter Adjustment                            |

- *Medicaid #.* The client's Medicaid number.
- *Patient Account #.* If a patient account number is used on the provider's claim, it appears here.
- *Medical Record #.* If a medical record number is used on the provider's claim, it appears here.
- *Medicare #.* If the claim is a result of an automatic crossover from Medicare, the last ten digits of the Medicare claim number appears directly under the TMHP claim number.
- *Diagnosis.* Primary diagnosis listed on the provider's claim.
- *Service Dates.* Format MMDDYYYY (month, day, year) in "From" and "To" dates of service.
- *TOS/Proc.* Indicates by code the specific service provided to the client. The one-digit TOS appears first followed by a HCPCS procedure code. A three-digit code represents a hospital accommodation or ancillary revenue code. For claims paid under prospective payment methodology, it is the code of the DRG.
- *Billed Quantity.* Indicates the quantity billed per claim detail.
- *Billed Charge.* Indicates the charge billed per claim detail.
- *Allowed Quantity.* Indicates the quantity TMHP has allowed per claim detail.
- *Allowed Charge.* Indicates the charges TMHP has allowed per claim detail. For inpatient hospital claims, the allowed amount for the DRG appears.
- *POS Column.* The R&S Report includes the POS to the left of the Paid Amount. A one-digit numeric code identifying the POS is indicated in this column. Refer to subsection 6.3.1.1, "Place of Service (POS) Coding" in this section for the appropriate cross-reference among the two-digit numeric POS codes (Medicare), and one-digit numeric code on the R&S Report. Providers using electronic claims submission should continue using the same POS codes.
- *Paid Amt.* The final amount allowed for payment per claim detail. The total paid amount for the claim appears on the claim total line.

- *EOB Codes and Explanation of Pending Status (EOPS) Codes.* These codes explain the payment or denial of the provider's claim. The EOB codes are printed next to or directly below the claim. The EOPS codes appear only in "The Following Claims Are Being Processed" section of the R&S Report. The codes explain the status of pending claims and are not an actual denial or final disposition. An explanation of all EOB and EOPS codes appearing on the R&S Report are printed in the Appendix at the end of the R&S Report. Up to five EOB codes are displayed.
- *Total TEFRA Billed and Allowed Charges.* Indicates claim details that have been denied or reduced.
- *Benefit.* Indicates the three digit benefit code associated with the claim.
- *Modifier.* Modifiers have been developed to describe and qualify services provided. For THSteps dental services two modifiers are printed. The first modifier is the TID and the second is the SID.

## 6.11.4 R&S Report Section Explanation

### 6.11.4.1 Claims – Paid or Denied

The heading "Claims – Paid or Denied Claims" is centered on the top of each page in this section. Claims in this section finalized the week before the preparation of the R&S Report. The claims are sorted by claim status, claim type, and by order of client names. The reported status of each claim will not change unless further action is initiated by the provider, HHSC, or TMHP.

The following information is provided on a separate line for all inpatient hospital claims processed according to prospective payment methodology:

- *Age.* Client's age according to TMHP records
- *Sex.* Client's sex according to TMHP records: M = Male, F = Female, U = Unknown
- *Pat-Stat.* Indicates the client's status at the time of discharge or the last DOS on the claim (refer to instructions for UB-04 CMS-1450 paper claim form, Block 17)
- *Proc.* ICD-10-PCS code indicates the primary surgical procedure used in determining the DRG

**Important:** *Only paper claims appear in this section of the R&S Report. Claims filed electronically without required information are rejected. Users are required to retrieve the response file to determine reasons for rejections.*

TMHP cannot process incomplete claims. Incomplete claims may be submitted as original claims only if the resubmission is received by TMHP within the original filing deadline.

**Referto:** Subsection 6.1, "Claims Information" in this section for a description of different claim types.

### 6.11.4.2 Adjustments to Claims

*Adjustments – Paid or Denied* is centered at the top of each page in this section. Adjustments are sorted by claim type and then patient name and Medicaid number. Media types 011, 021, 031, 041, 051, 061, 071, and 081 appear in this section. An adjustment prints in the same format as a paid or denied claim.

The adjusted claim is listed first on the R&S Report. EOB 00123, "This is an adjustment to previous claim XXXXXXXXXXXXXXXXXXXXXXXX which appears on R&S Report dated XX/XX/XX" follows this claim. Immediately below is the claim as originally processed. An accounts receivable is created for the original claim total as noted by EOB 00601, "A receivable has been established in the amount of the original payment: \$XXX,XXX,XXX.XX. Future payments will be reduced or withheld until such amount is paid in full." prints below the claim indicating the amount to be recouped. This amount appears under the heading, "Financial Transactions Accounts Receivable." EOB 06065, "Account Receivable is due to the adjusted claim listed. For details, refer to your R&S Report for the date listed within the original date field."

Claims adjusted as a result of a rate change will be listed on the R&S Report with EOB 01154 “This adjustment is a result of a rate change.”

**Referto:** Subsection 6.2.5, “Modifier Requirements for TOS Assignment” in this section for a list of the most commonly used modifiers.

#### **6.11.4.3 Financial Transactions**

All claim refunds, reissues, voids/stops, recoupments, backup withholdings, levies, and payouts appear in this section of the R&S Report. The Financial Transactions section does not use the R&S Report form headings. Additional subheadings are printed to identify the financial transactions. The following descriptions are types of financial items.

##### **6.11.4.3.1 Accounts Receivable**

This label identifies money subtracted from the provider’s current payment owed to TMHP. Specific claim data are not given on the R&S Report unless the accounts receivable control number is provided which should be referenced when corresponding with TMHP. Accounts receivable appear on the R&S Report in the following format:

- *Control Number.* A number to reference when corresponding with TMHP.
- *Recoupment Rate.* The percentage of the provider’s payment that is withheld each week unless the provider elects to have a specific amount withheld each week.
- *Maximum Periodic Recoupment Amount.* The amount to be withheld each week. This area is blank if the provider elects to have a percentage withheld each week.
- *Original Date.* The date the financial transaction was processed originally.
- *Original Amount.* The total amount owed TMHP.
- *Prior Date.* The date the last transaction on the accounts receivable occurred.
- *Medical Record Number.* A number assigned by the provider, if available. This area is blank for purged claims.
- *Prior Balance.* The amount owed from a previous R&S Report.
- *Applied Amount.* The amount subtracted from the current R&S Report.
- *Balance.* Indicates the total outstanding accounts receivable (AR) balance that remains due to TMHP.
- *FYE.* The fiscal year end (FYE) for cost reports.
- *EOB.* The EOB code that corresponds to the reason code for the accounts receivable.
- *Patient Name.* The name of the patient on the claim, if the accounts receivable are claim-specific.
- *Claim Number.* The ICN of the original claim, if the accounts receivable are claim-specific.
- *Backup Withholding Penalty Information.* A penalty assessed by the Internal Revenue Service (IRS) for noncompliance due to a B-Notice. Although the current payment amount is lowered by the amount of the backup withholding, the provider’s 1099 earnings are not lowered.
- *Control Number.* TMHP control number to reference when corresponding with TMHP.
- *Original Date.* The date the backup withholding was set up originally.
- *Withheld Amount.* Amount withheld (31 percent) of the provider’s checkwrite.

#### 6.11.4.3.2 IRS Levies

The payments withheld from a provider's checkwrite as a result of a notice from the IRS of a levy against the provider appear in the "IRS Levy Information" section of the R&S Report. Payments are withheld until the levy is satisfied or released. Although the current payment amount is lowered by the amount of the levy payment, the provider's 1099 earnings are not lowered. IRS levies are reported in the following format:

- *Control Number.* TMHP control number to reference when corresponding with TMHP.
- *Maximum Recoupment Rate.* The percentage of the provider's payment that is withheld each week, unless the provider elects to have a specific amount withheld each week.
- *Maximum Recoupment Amount.* The amount to be withheld periodically.
- *Original Date.* The date the levy was set up originally.
- *Original Amount.* The total amount owed to the IRS.
- *Prior Balance.* The amount owed from a previous R&S Report.
- *Prior Date.* The date the last transaction on the levy occurred.
- *Current Amount.* The amount subtracted from the current R&S Report and paid to the IRS.
- *Remaining Balance.* The amount still owed on the levy. (This amount becomes the "previous balance" on the next R&S Report.)

#### 6.11.4.3.3 Refunds

Refunds are identified by EOB 00124, "Thank you for your refund; your 1099 liability has been credited." This statement is verification that dollars refunded to TMHP for incorrect payments have been received and posted. The provider's check number and the date of the check are printed on the R&S Report. Claim refunds appear on the R&S Report in the following format:

- Claim Specific:
  - *ICN.* The claim number of the claim to which the refund was applied this cycle.
  - *Patient Name.* The first name, middle initial, and last name of the patient on the applicable claim.
  - *Medicaid Number.* The patient's Medicaid or CSHCN Services Program number.
  - *Date of Service.* The format MMDDCCYY (month, day, and year) in "From" DOS.
  - *Total Billed.* The total amount billed for the claim being refunded.
  - *Amount Applied This Cycle.* The refund amount applied to the claim.
  - *EOB.* Corresponds to the reason code assigned.
- Nonclaim Specific:
  - *Control Number.* A control number to reference when corresponding with TMHP.
  - *FYE.* The fiscal year for which this refund is applicable.
  - *EOB.* Corresponds to the reason code assigned.

#### 6.11.4.3.4 Payouts

Payouts are dollars TMHP owes to the provider. TMHP processes two types of payouts: system payouts that increase the weekly check amount and manual payouts that result in a separate check being sent to the provider. Specific claim data are not given on the R&S Report for payouts. A control number is given, which should be referenced when corresponding with TMHP. System and manual payouts appear on the R&S Report in the following format:

- *Payout Control Number.* A control number to reference when corresponding with TMHP.
- *Payout Amount.* The amount of the payout.
- *FYE.* The fiscal year for which the payout is applicable.
- *EOB.* Corresponds to the reason code assigned.
- *Patient Name.* Name of the patient (if available).
- *PCN.* Medicaid number of the patient (if available).
- *DOS.* Date of service (if available).

#### 6.11.4.3.5 Reissues

The provider's 1099 earnings are not affected by reissues. A messages states, "Your payment has been increased by the amount indicated below":

- *Check Number.* The number of the original check.
- *Check Amount.* The amount of the original check.
- *R&S Number.* The number of the original R&S Report.
- *R&S Date.* The date of the original R&S Report.

#### 6.11.4.3.6 Voids and Stops

The provider's 1099 earnings are credited by the amount of the voided/stopped payment.

- *Check Number.* The number of the voided/stopped payment.
- *Check Amount.* The amount of the voided/stopped payment.
- *R&S Number.* The number of the voided/stopped payment.
- *R&S Date.* The date of the voided/stopped payment.

### 6.11.4.4 Claims Payment Summary

This section summarizes all payments, adjustments, and financial transactions listed on the R&S Report. The section has two categories: one for amounts "Affecting Payment This Cycle" and one for "Amount Affecting 1099 Earnings."

If the provider is receiving a check on this particular R&S Report, the following information is given: "Payment summary for check XXXXXXXXXX in the amount of XXX,XXX,XXX.XX." If the payment is EFT: "Payment summary for direct deposit by EFT XXXXXXXXXX in the amount of XXX,XXX,XXX.XX." The check number also is printed on the check that accompanies the R&S Report.

#### Headings for the Payment Summary for "Affecting Payment This Cycle" and "Amount Affecting 1099 Earnings"

- *Claims Paid.* Indicates the number of claims processed for the week and the year-to-date total.
- *System Payouts.* The total amount of system payouts made to the provider by TMHP.
- *Manual Payouts (Remitted by separate check or EFT).* The total amount of manual payouts made to the provider by TMHP.

- *Amount Paid to IRS for Levies.* The amount remitted to IRS and withheld from the provider's payment due to an IRS levy.
- *Amount Paid to IRS for Backup Withholding.* The amount paid to the IRS for backup withholding.
- *Accounts Receivable Recoupments.* The total amount withheld from the provider's payment due to accounts receivable.
- *Miscellaneous Levies.* The amount withheld from the provider's payment and remitted to HHSC for a SHARS Admin Fee levy.
- *Amounts Stopped/Voided.* The total amount of the payment that was voided or stopped with no reissuance of payment.
- *System Reissues.* The amount of the reissued payment.
- *Claim Related Refunds.* The total amount of claim-related refunds applied during the weekly cycle.
- *Nonclaim Related Refunds.* The total amount of nonclaim-related refunds applied during the weekly cycle.
- *Approved to Pay/Deny Amount.* The total amount of claim payments that were approved to pay/deny within the week. (This column will not be used at this time.)
- *Pending Claims.* The total amount billed for claims in process as of the cutoff date for the report.

#### **6.11.4.5 The Following Claims are Being Processed**

In the "Following Claims are Being Processed" section, the R&S Report may list up to five EOPS codes per claim. The claims listed in this section are in process and *cannot be appealed for any reason* until they appear in either the "Claims Paid or Denied," or "Adjustments Paid and Denied" sections of the R&S Report. TMHP is listing the pending status of these claims for informational purposes only. *The pending messages should not be interpreted as a final claim disposition.* Weekly, all claims and appeals on claims TMHP has "in process" from the provider are listed on the R&S Report. The Following Claims are Being Processed claim prints in the same format as a paid or denied claim.

#### **6.11.4.6 Explanation of Benefit Codes Messages**

This section lists the descriptions of all EOBs that appeared on the R&S Report. EOBs appear in numerical order.

EDI ANSI X12 5010 835 files display the appropriate Claims Adjustment Reason Code (CARC), Claims Adjustment Group Code (CAGC), and Remittance Advice Remarks Code (RARC) explanation codes that are associated with EOB denials.

The 835 file includes the CARC, CAGC, and RARC explanation codes that are associated with the highest priority detail EOB to provide a clearer explanation for the denial.

#### **6.11.4.7 Explanation of Pending Status Codes Appendix**

This section lists the description of all EOPS codes that appeared on the R&S Report. EOPS appear in numerical order.

EOB and EOPS codes may appear on the same pending claim because some details may have already finalized while others may have questions and are pending.

#### **6.11.5 R&S Report Examples**

Examples of R&S Reports are available on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

##### **R&S Report Examples**

##### [Accounts Receivables R&S Report](#)

(For purposes of example, accounts receivables, void, and stop pay appear together.)

### 6.11.6 Provider Inquiries—Status of Claims

TMHP provides several effective mechanisms for researching the status of a claim. Weekly, TMHP provides the R&S Report reflecting all claims with a paid, denied, or pending status. Providers verify claim status using the provider's log of pending claims.

Electronic billers allow ten business days for a claim to appear on their R&S Reports. If the claim does not appear on an R&S Report as paid, pending, or denied, a transmission failure, file rejection, or claims rejection may exist. Providers check records for transmission reports correspondence from the TMHP EDI Help Desk.

The provider allows at least 30 days for a Medicaid paper claim to appear on an R&S Report after the claim has been submitted to TMHP. If a claim has not been received by TMHP and must be submitted a second time, the second claim must also meet the 95-day filing deadline.

The provider allows TMHP 45 days to receive a Medicare-paid claim automatically transmitted for payment of coinsurance or deductible according to current payment guidelines. Claims that fail to cross over from Medicare may be filed to TMHP by submitting a paper MRAN received from Medicare or a Medicare intermediary, the computer generated MRANs from the CMS-approved software applications MREP for professional services or PC-Print for institutional services or, for MAP clients, TMHP Standardized Medicare Advantage Plan (MAP) Remittance Advice Notice Template with the completed claim form.

If the claim does not appear on an R&S Report as paid, pending, or denied, providers can use any of the following procedures to inquire about the status of the claim:

- The provider can use the claim status inquiry function of TexMedConnect on the TMHP website at [www.tmhp.com](http://www.tmhp.com).
- The provider can call AIS at 800-925-9126 to determine if the claim is pending, paid, denied, or if TMHP has no record of the claim.
- If any of the three options above indicates that TMHP has no record of the claim, the provider can call the TMHP Contact Center at 800-925-9126 and speak to a TMHP contact center representative.

- If the TMHP Contact Center has no record of a claim that was submitted within the original filing deadline, the provider can submit a copy of the original claim to TMHP for processing. Electronic billers may refile the claim electronically. For claims submitted by a hospital for inpatient services, the filing deadline is 95 days from the discharge date or the last DOS on the claim. For all other types of providers, the filing deadline is 95 days from each DOS on the claim.
- If the 95-day filing deadline has passed and the claim is still within 120 days of the date of the rejection report or the R&S Report, the provider can submit a signed copy of the claim and all of the documentation that supports the original claim submission, including any electronic rejection reports, to:

Texas Medicaid & Healthcare Partnership  
Inquiry Control Unit  
12365-A Riata Trace Parkway, Suite 100  
Austin, TX 78727

Providers must retain copies of all R&S Reports for a minimum of five years. Providers must not send original R&S Reports back with appeals. Providers must submit one copy of the R&S Report to TMHP per appeal.

**Referto:** Subsection A.12.3, “Automated Inquiry System (AIS)” in “Appendix A: State, Federal, and TMHP Contact Information” (*Vol. 1, General Information*).

## 6.12 Filing Medicare Primary Claims

When a service is a benefit of both Medicare and Medicaid, the claim must be filed to Medicare first.

Providers should not file a claim with Medicaid until Medicare has dispositioned the claim unless the service is a Medicaid-only service.

All Medicare providers and suppliers who offer services and supplies to Qualified Medicaid Beneficiaries (QMB) or Medicaid Qualified Medicare Beneficiaries (MQMB) must not bill dual eligible clients for Medicare cost-sharing. This includes deductible, coinsurance, and copayments for any Medicaid covered items and services.

Medicaid claims for Qualified Medicare Beneficiary (QMB) and Medicaid Qualified Medicare Beneficiary (MQMB) clients can be filed to Medicaid for consideration of coinsurance and deductible payment as follows:

- Medicare primary claims filed to Medicare Administrative Contractors (MACs) may be transferred electronically to TMHP through a Benefit Coordination and Recovery Center (BCRC).
- Providers can submit crossover claims directly to TMHP using a paper claim form only for the specific circumstances indicated in the following section.
- MAP providers can submit crossover claims directly to TMHP using EDI.

**Note:** *These guidelines do not apply to services that are rendered to clients who are living in a nursing facility.*

**Referto:** Subsection 2.7, “Medicare Crossover Claim Reimbursement” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for information about reimbursement for QMBs and MQMBs.

Subsection 4.9, “Medicare and Medicaid Dual Eligibility” in “Section 4: Client Eligibility” (*Vol. 1, General Information*) for information about MQMBs and QMBs eligibility.

### 6.12.1 Electronic Crossover Claims

Medicare primary claims filed to MACs may be transferred electronically to TMHP through a BCRC for claims that are processed as assigned. Providers should contact their MAC for more information.

This electronic crossover process allows providers to receive disposition from both carriers while only filing the claim once. Providers must allow 60 days from the date of Medicare's disposition for a claim to appear on the Medicaid R&S Report.

If all services on the claim are denied by Medicare, the claim is not automatically transferred to TMHP by the MAC through the BCRC. Providers must submit the denied crossover claims to TMHP on paper.

Claims that are submitted to Medicare must include the facility's NPI. Medicare crossover claims must comply with the Medicaid requirement to include a facility NPI. If a Medicare crossover claim includes a service for which Medicaid requires a facility NPI but the claim does not include the facility's NPI number, the claim will be denied by Texas Medicaid. TMHP accepts electronic Medicare Advantage Plan (MAP) crossover claims electronically using EDI.

**Important:** *TMHP accepts only electronic crossover claims that are automatically transferred to TMHP by the MAC through the BCRC, or through the provider as New Day electronic Medicare Advantage Plans (MAPs) Part C claims. All other New Day crossover claims and all appeals, including Medicare Advantage Plan Part Cs, must be submitted as paper claims. TMHP accepts only paper appeals.*

#### 6.12.1.1 Type of Bills Values for Medicare Crossover Claims

Type of bills (TOB) values in the 12x series may be billed to Medicare for Medicare Inpatient Part B services as appropriate, but TOB values in the 12x series are not valid for Medicaid claims.

**Reminder:** *Texas Medicaid only allows interim billing and late changes to be submitted on inpatient claims*

#### 6.12.1.2 Medicare Copayments

Claims for Medicare copayments can also be submitted to TMHP. TMHP processes and pays Medicare HMO and Medicare PPO copayments for dual-eligible clients according to Medicaid guidelines.

TMHP may reimburse the copayment in addition to a service the HMO or PPO has denied if the client is eligible for Texas Medicaid and the procedure is reimbursed under Medicaid guidelines. Providers are not allowed to hold the client liable for the copayment.

An office or emergency room (ER) visit (the ER physician is paid only when the ER is not staffed by the hospital) is reimbursed a maximum copayment of \$10 per visit. The hospital ER visit is reimbursed at a maximum of \$50 to the facility. TMHP pays up to four copayments per day, per client. ER visits are limited to one per day, per client, and are considered one of the four copayments allowed per day.

**Referto:** Subsection 2.7.5.2, "Nephrology (Hemodialysis, Renal Dialysis) and Renal Dialysis Facility Providers" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for information about claims for nephrology (hemodialysis, renal dialysis) and renal dialysis facility providers for Medicare crossover Claims.

Subsection 2.7.5, "Exceptions" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for information about exceptions for Medicare Part A, Part B, and Part C (noncontracted MAPs) reimbursement.

#### 6.12.1.3 Requirement for Group Billing Providers – Professional Claims

The performing provider NPI must be included on the professional electronic claim if the billing provider is a group. Claims are processed using the performing provider NPI that is submitted on the Medicare claim.

**Important:** *The performing provider who is identified on the claim must be a member of the billing provider's group. If the performing provider is not a member of the billing provider group, the detail line item will be denied.*

A claim is denied if the performing provider NPI is missing, invalid, or is not a member of the billing provider's group. Denied claims may be appealed on paper with the appropriate performing provider information.

### 6.12.2 Paper Crossovers Claims

TMHP accepts only paper crossover claims or appeals from providers and other entities.

**Note:** *Electronic crossover claims will only be accepted for Medicare Part C New Day claims.*

The following paper crossover claims may be submitted to TMHP:

- For QMB and MQMB clients, if a crossover claim is not transferred to TMHP electronically through the BCRC, the provider can submit a paper claim to TMHP for coinsurance and deductible reimbursement consideration.
- For MQMB clients, if a claim is denied by Medicare because the services are not a benefit of Medicare or because Medicare benefits have been exhausted, the provider can submit a paper claim to TMHP for coinsurance and deductible reimbursement consideration, and reimbursement consideration for the Medicaid-only services that were denied by Medicare. The Medicare EOB that contains the relevant claim denial must be submitted to TMHP with the completed claim from within 95 days from the Medicare disposition date and 365 days from the date of service. The denied services are processed as Medicaid-only services.

Claims that are submitted to Medicare must include the facility's NPI. Medicare crossover claims must comply with the Medicaid requirement to include a facility NPI. If a Medicare crossover claim includes a service for which Medicaid requires a facility NPI but the claim does not include the facility's NPI number, the claim will be denied by Texas Medicaid.

**Important:** *Claims that are denied by Medicare for administrative reasons must be appealed to Medicare before they are submitted to Texas Medicaid.*

The paper submission must include all of the following:

- The Medicare Remittance Advice (RA) or Remittance Notice (RN), using the CMS-approved software MREP, for professional services, or PC-Print or a paper MRAN from Medicare.
- The appropriate, completed paper CMS-1500 or UB-04 CMS-1450 paper claim form.  
**Note:** *Although it is not required, it is strongly recommended that providers send claim forms with their Medicare appeals in case one is needed for further processing.*
- The appropriate TMHP Standardized Medicare Advantage Plan (MAP) Remittance Advice Notice Template for Medicare Advantage Plan only. The template must be submitted with the claims form and the MAP EOB.

Providers that receive Remittance Advice Notices from a Medicare intermediary may submit these in place of the MRAN to TMHP which must contain the following required information:

- Client name
- Medicare number
- NPI
- Dates of service
- Procedure code (Professional and Outpatient claims)
- Billed amount
- Medicare allowed amount or non-covered amount
- Deductible amount

- Co-insurance amount
- Medicare paid amount
- Medicare ICN
- Quantity billed

#### **6.12.2.1 Deductible or Coinsurance Amount Balancing**

The Texas Medicaid claims processing system validates that the total Medicare deductible and coinsurance amounts on the claim header match the sum of the detail Medicare deductible and coinsurance amounts.

For paper crossover claims, providers must submit the same information to Texas Medicaid that was received from Medicare.

Texas Medicaid will reimburse Medicare crossover claims up to the Texas Medicaid allowed amount for Medicaid-covered services. System enhancements have been identified to ensure appropriate age restrictions are enforced applicable to the services rendered.

**Example:** *For a Medicare service provided to an adult client, if that service is only payable to Medicaid for clients who are 20 years of age and younger, the age restriction will be applied and the Medicaid allowed amount will be zero. Since the Medicare payment exceeds the Medicaid allowed amount or encounter payment for the service, Texas Medicaid will not make a payment for coinsurance liabilities.*

Because Medicare reimbursed more than Medicaid allowed, the client has no liability for any balance or Medicare coinsurance related to the rendered services.

#### **6.12.2.2 TMHP Standardized Medicare Advantage Plan (MAP) Remittance Advice Notice Template**

The TMHP Standardized Medicare Advantage Plan (MAP) Remittance Advice Notice Template must be submitted for paper MAP claims only. The template must be submitted with the claim form and the MAP EOB.

**Note:** *Providers must not submit the template for traditional Medicare crossover claims.*

The following guidelines apply for the submission of the TMHP Standardized Medicare Advantage Plan (MAP) Remittance Advice Notice Templates:

- The Medicare ICN must be included on the form. Claims are denied if the Medicare ICN is omitted.
- For the TMHP Crossover Professional Claim Type 30 form, the performing provider NPI and taxonomy code must be submitted on each detail line item. A detail line item is denied if the performing provider NPI or taxonomy code is omitted, or if the performing provider is not a member of the group billing provider.
- For the TMHP Crossover Outpatient Facility Claim Type 31 form, the detail line items are required. Claims are denied if the details are omitted.
- The TMHP Standardized Medicare Advantage Plan (MAP) Remittance Advice Notice Template must be submitted with a completed claim form and MAP EOB, must be legible, and must identify only one client per page. Providers must not submit handwritten MAP templates.

Claims that do not meet these standards are not processed and are returned to the provider.

By submitting the TMHP Standardized Medicare Advantage Plan (MAP) Remittance Advice Notice Templates to TMHP, the provider attests that the information included in the template matches the EOB that was received from the MAP. If the information on the template does not exactly match the information on the RA or RN, the claim may be denied.

**Referto:** Subsection 6.20, “Forms” in this section for the TMHP Standardized Medicare Advantage Plan (MAP) Remittance Advice Notice Templates and instructions.

Subsection 2.7, “Medicare Crossover Claim Reimbursement” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*).

### 6.12.2.3 Crossover Paper Claims Filing Deadlines

The paper crossover claim with all required, EOBs, templates, and forms must be received by TMHP within 95 days of the Medicare date of disposition and 365 days from the date of service in order to be considered for processing.

### 6.12.3 Filing Medicare-Adjusted Claims

TMHP accepts crossover appeals only on paper.

Providers may submit Medicare-adjusted claims by submitting the adjusted Medicare RA/RNs (paper or electronic) and the appropriate TMHP Standardized Medicare Advantage Plan (MAP) Remittance Advice Notice Template. The information on the Medicare RA/RN must exactly match the information submitted on the TMHP Standardized Medicare Advantage Plan (MAP) Remittance Advice Notice Template.

**Referto:** Subsection 3.7.1, “Medicaid Relationship to Medicare” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for additional information on hospital Medicare claims filing requirements.

**Important:** *TMHP does not accept electronic crossover appeals.*

## 6.13 Medically Needy Claims Filing

TMHP must receive claims for unpaid bills not applied toward spend down within 95 days from the date eligibility was added to the TMHP client eligibility file (add date). These bills must be on the appropriate claim form (for example, CMS-1500 or UB-04 CMS-1450). Providers are allowed to submit completed CMS claim forms directly to the Medically Needy Clearinghouse (MNC) or to applicants for the Medically Needy Program (MNP) to be used to meet spend down. The completed CMS claim forms used to meet spend down are held for ten calendar days by the MNC, then forwarded to TMHP claims processing. Claims for services provided after the spend down is met must be received within 95 days from the date eligibility is added. Inpatient hospital facility claims must be received within 95 days from the date of discharge or last DOS on the claim. This applies when eligibility is not retroactive.

The client’s payment responsibilities are as follows:

- If the entire bill was used to meet spend down, the client is responsible for payment of the entire bill.
- If a portion of one of the bills was used to meet the spend down, the client is responsible for paying the portion applied toward the spend down, unless it exceeds the Medicaid allowable amount.
- The claim must show the *total* billed amount for the services provided. Charges for ineligible days or spend down amounts should *not* be deducted or noncovered on the claim.
- A client’s payment toward spend down is *not* reflected on the claim submitted to TMHP.
- A client is not required to pay the spend down amount before a claim is filed to Medicaid.
- Payments made by the client for services not used in the spend down but were incurred during an eligible period must be reimbursed to the client before the provider files a claim to TMHP.
- Services that require prior authorization and are provided before the client becomes eligible for Medicaid by meeting spend down are not reimbursable by Texas Medicaid.
- If a bill or a completed CMS claim form was not used to meet spend down and the dates of service are within the client’s eligible period, submit the total bill to TMHP.

When eligibility has been established, a type program (TP) 56 with spend down client can receive the same care and services available to all other Medicaid clients. If eligibility is established through TP 32 with spend down, the client's Medicaid eligibility is restricted to coverage for an emergency medical condition only. Emergency medical condition is defined under subsection 4.3.2.2, "Exceptions to Lock-in Status" in "Section 4: Client Eligibility" (*Vol. 1, General Information*).

## 6.14 Claims Filing for Consumer-Directed Services (CDS)

Clients who participate in the CDS option for both PCS and a waiver program, through HHSC are required to choose one Financial Management Services Agency (FMSA) to provide services through both programs. FMSAs are permitted to file only the financial management services (FMS) fee, also known as the monthly administrative fee, through one program. The FMSA should file the FMS claim through the program with the highest reimbursement rate. Currently, the waiver programs have a higher reimbursement rate for the FMS fee than the Texas Medicaid PCS benefit, so a FMSA should file claims for the monthly FMS fee through the waiver programs.

The U8 modifier, which is used when submitting claims for the monthly PCS administrative fee, must be prior authorized. The DSHS case managers have two options when sending a prior authorization request for PCS to TMHP:

- If a client is only using the CDS option for Texas Medicaid PCS, a case manager will submit a prior authorization request to TMHP that approves the U8 modifier and either the U7 or UB modifier. In this case, the provider authorization notification letter will include the U8 modifier and the U7 or UB modifier.
- If a client is using the CDS option for both Texas Medicaid PCS and a waiver program, a case manager will submit a prior authorization request to TMHP that approves either the U7 or UB modifier. The U8 modifier will not be prior authorized in this situation.

When a provider authorization notification letter is received by a FMSA, the provider should verify that the correct modifiers have been prior authorized for each PCS client. Providers who think that the approved modifiers are incorrect should contact the DSHS case manager and ask for the correct modifiers to be submitted to TMHP for prior authorization.

## 6.15 Claims Filing for Home Health Agency Services

Providers must use only type of bill (TOB) 321 in Form Locator (FL) 4 of the UB-04 CMS-1450. Other TOBs are invalid and will result in a claim denial. Home Health Services must be submitted to TMHP in an approved electronic format or on a CMS-1500 or a UB-04 CMS-1450 paper claim form. Submit home health DME and medical supplies to TMHP in an approved electronic format, or on a CMS-1500 or on a UB-04 CMS-1450 paper claim form. Providers may purchase CMS-1500 or UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply them.

When completing a CMS-1500 or a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as TMHP does not key information from attachments.

**Referto:** "Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information about electronic claims submissions.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in this section for instructions on how to complete paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Subsection 6.6, "UB-04 CMS-1450 Paper Claim Filing Instructions" in this section.

Outpatient claims must have the appropriate revenue code and, if appropriate, the corresponding Healthcare Common Procedure Coding System (HCPCS) code or narrative description. The prior authorization number must appear on the CMS-1500 paper claim form in Block 23 and in Block 63 of

the UB-04 CMS-1450 paper claim form. The certification dates or the revised request date on the POC must coincide with the DOS on the claim. Prior authorization does not waive the 95-day filing deadline requirement.

## **6.16 Claims for Medicaid Hospice Clients Not Related to the Terminal Illness**

When the services are unrelated to the terminal illness, providers must submit a claim for Medicaid services to TMHP. The claim must include a statement and documentation from the hospice that the services billed are not related to the client's terminal illness.

If TMHP denies the claim, the following information must be submitted with the providers appeal.

- A copy of the R&S Report, with the client or claim number in question circled
- Clinical records, which may be obtained from the hospice provider
- Supporting documentation giving reasons the services billed are not related to the terminal illness

**Referto:** Subsection 4.3.3, "Hospice Program" in "Section 4: Client Eligibility" (*Vol. 1, General Information*) for more information related to Medicaid hospice client benefits and eligibility.

### **6.16.1 Medical Services When Client is Discharged From Hospice**

Submit claims to TMHP for Medicaid services with a statement that the services billed were provided after the client was discharged from the Hospice Program. The provider must obtain a copy of Form 3071, Medicaid Hospice Cancellation, from the Hospice Program to support the discharge.

If TMHP denies the claim, the provider may appeal the decision with the following information:

- A copy of the R&S Report, with the client or claim number in question circled
- Supporting documentation stating that the client was not in hospice at the time

### **6.16.2 Claims Address for Medicaid Hospice Clients Not Related to the Terminal Illness**

Mail paper claims to the following address:

Texas Medicaid & Healthcare Partnership  
PO Box 200105  
Austin, TX 78720-0105

Appeal claims by writing to the following address:

Texas Medicaid & Healthcare Partnership  
PO Box 200645  
Austin, TX 78720-0645

### **6.16.3 Lab and X-Ray**

Submit claims for services unrelated to the terminal illness to TMHP. Submit claims for services related to the terminal illness to the hospice provider.

## **6.17 Claims for Texas Medicaid and CSHCN Services Program Eligible Clients**

The CSHCN Services Program is the payer of last resort when clients have other insurance, including Texas Medicaid and private carriers. The CSHCN Services Program does not supplement a client's Texas Medicaid benefits; however, services that are not a benefit of Texas Medicaid, such as hospice and medical foods, may be covered by the CSHCN Services Program.

### 6.17.1 New Claim Submissions

New claims that are submitted for clients who are eligible for both Texas Medicaid and CSHCN Services Program benefits during the same eligibility period will be processed through the appropriate program and may result in a separate claim for each program. The Medicaid claim number and disposition will be listed under the “Claims – Paid or Denied” section of the Medicaid/Managed Care R&S Report. If the claim includes services that are not benefits of Texas Medicaid but are benefits of the CSHCN Services Program, a claim will be created with a unique claim number that will be listed under the “Claims – Paid or Denied” section of the CSHCN Services Program R&S Report.

**Note:** *If all of the services that are submitted on the claim are Texas Medicaid benefits, a CSHCN Services Program claim will not be created. Only a Texas Medicaid claim will be created, and the claim number will appear on the provider’s Medicaid/Managed Care R&S Report.*

### 6.17.2 CSHCN Services Program Claims Reprocessing for Retroactive Texas Medicaid Eligibility

Claims that have already been paid by the CSHCN Services Program for clients who received retroactive Texas Medicaid eligibility for dates of service covered on the paid claims will be reprocessed to pay under the appropriate program. The reprocessed CSHCN Services Program claim number will appear under the “Adjustments – Paid or Denied” section of the CSHCN Services Program R&S Report. An accounts receivable will be created for services covered by Texas Medicaid that will be reflected on the “Financial Transactions” page under the “Accounts Receivable” section of the CSHCN Services Program R&S Report. The claim will be reprocessed to Texas Medicaid and given a new claim number. The new Texas Medicaid claim number and disposition will appear under the “Claims – Paid or Denied” section of the Medicaid/Managed Care R&S Report.

TMHP will contact providers when it reprocesses claims for services that require a Texas Medicaid prior authorization. Providers will be informed that a Texas Medicaid prior authorization must be submitted within a specified time frame for the claim to be considered for processing through Texas Medicaid.

## 6.18 Claims for State Supported Living Center Residents (SSLC)

Medicaid providers who render off-campus acute care services to Medicaid-eligible State Supported Living Center (SSLC) residents must submit claims directly to Medicaid. This is applicable only to residents of the SSLCs operated by HHSC.

Claims and prior authorization requests for acute care services rendered to these individuals must be submitted to Medicaid. These requests must be submitted according to guidelines for acute care services as indicated in this manual.

**Referto:** “Section 5: Fee-for-Service Prior Authorizations” (*Vol. 1, General Information*) for more information on prior authorizations.

## 6.19 Children’s Health Insurance Program (CHIP) Perinatal Claims

Claims for services provided to CHIP Perinatal Program clients are submitted to and considered for reimbursement as follows:

- For women with income at or below 198 percent FPL:
  - Hospital facility charges are paid through Emergency Medicaid and processed by TMHP.
  - Professional service charges are paid through the CHIP Perinatal Program and processed through CHIP.

**Note:** *Delivery-related professional services claims denied by the CHIP Perinatal health plan will be considered for reimbursement through Emergency Medicaid and will require the CHIP Perinatal health plan denial notice. These claims should be submitted through the existing*

*Medicaid appeals process within 95 days from the date of the CHIP Perinatal Health plan denial notice. The provider must provide a copy of the complete explanation of benefits that includes the complete description of the reason for denial.*

- For newborns with a family income at or below 198 percent FPL:
  - Hospital facility charges are paid through Medicaid and processed by TMHP.
  - Professional service charges are paid through Medicaid and processed by TMHP.

Inpatient services (limited to labor with delivery) for unborn children and women with income at or below 202 of FPL will be covered under CHIP Perinatal, and these claims will be paid by the CHIP Perinatal health plan.

**6.19.1 CHIP Perinatal Newborn Transfer Hospital Claims**

TMHP processes CHIP Perinatal newborn transfer hospital claims even if the claim from the initial hospital stay has not been received.

The hospital transfer must have occurred within 24 hours of the discharge date from the initial delivery hospital stay. This change applies only to CHIP Perinatal newborns with a family income at or below 198 percent of the FPL.

Transfer claims must be filed with TMHP on an electronic institutional claim or the UB-04 CMS-1450 paper claim form using admission type 1, 2, 3, or 5 in block 14, source of admission code 4 or 6 in block 15, and the actual date and time the client was admitted in block 12 of the UB-04 CMS-1450 paper claim form.

**6.20 Forms**

The following linked forms can also be found on the [Forms](#) page of the Provider section of the TMHP website at [www.tmhp.com](http://www.tmhp.com):

## 7.1 Appeal Methods

An appeal is a request for reconsideration of a previously dispositioned claim.

Providers may use three methods to appeal Medicaid fee-for-service and carve-out service claims to Texas Medicaid & Healthcare Partnership (TMHP): electronic, Automated Inquiry System (AIS), or paper.

TMHP must receive all appeals of denied claims and requests for adjustments on paid claims within 120 days from the date of disposition of the Remittance and Status (R&S) Report on which that claim appears. If the 120-day appeal deadline falls on a weekend or holiday, the deadline is extended to the next business day.

Standard administrative requests and medical appeals must be sent first to TMHP or the claims processing entity as a first-level appeal. After the provider has exhausted all aspects of the appeals process for the entire claim, the provider may submit a second-level appeal to HHSC.

- 1) A first-level appeal is a provider's initial standard administrative or medical appeal of a claim that has been denied or adjusted by TMHP. This appeal is submitted by the provider directly to TMHP for adjudication and must contain all required information to be considered.
- 2) A second-level appeal is a provider's final medical or standard administrative appeal to HHSC of a claim that meets all of the following requirements:
  - It has been denied or adjusted by TMHP.
  - It has been appealed as a first-level appeal to TMHP.
  - It has been denied again for the same reason(s) by TMHP.

This appeal is submitted by the provider to HHSC, which may subsequently require TMHP to gather information related to the original claim and the first-level appeal. HHSC is the sole adjudicator of this final appeal.

All providers must submit second-level administrative appeals and exceptions to the 95-day filing deadline appeals to the following address:

Texas Health and Human Services Commission  
HHSC Claims Administrator Operations Management  
Mail Code 91X  
PO BOX 204077  
Austin, Texas 78720-4077

TMHP is not responsible for managing appeals resulting from utilization review (UR) decisions by the HHSC Office of Inspector General (OIG) UR Unit. These must be submitted to HHSC Medical and UR Appeals.

**Note:** *Appeals for managed care claims must be submitted to the managed care organization (MCO) or dental plan that administers the client's managed care benefits. The only managed care appeals administered by TMHP are those for carve-out services.*

**Referto:** Subsection 7.3.3, "Utilization Review Appeals" in this section.

The *Medicaid Managed Care Handbook* (Vol. 2, *Provider Handbooks*) for additional information about managed care appeals.

### 7.1.1 Electronic Appeal Submission

Electronic appeal submission is a method of submitting appeals using a personal computer. The electronic appeals feature can be accessed by a business organization (e.g., billing agents) interfacing directly with the TMHP Electronic Data Interchange (EDI) Gateway or through TexMedConnect, the free web-based application available from TMHP.

The Health Insurance Portability and Accountability Act (HIPAA) standard American National Standards Institute (ANSI) ASC X12 837 format is accepted by TMHP EDI.

For other information, contact the TMHP EDI Help Desk at 888-863-3638.

#### **7.1.1.1 Advantages of Electronic Appeal Submission**

Using electronic appeal submission provides the following advantages to the users:

- Increased accuracy of appeals filed to potentially improve cash flow.
- Maintained audit trails through print and download capabilities.
- Appeal submission windows can be automatically filled in with electronic R&S (ER&S) Report information, thereby reducing data entry time.

#### **7.1.1.2 Disallowed Electronic Appeals**

The following claims may not be appealed electronically:

- Claims that require supporting documentation (e.g., operative report, medical records, home health, hearing aid, and dental X-rays).
- Diagnosis-related group (DRG) assignment.
- Medicare crossovers.
- Claims listed as *pending* or *in process* with explanation of pending status (EOPS) messages.
- Claims denied as *past filing deadline* except when retroactive eligibility deadlines apply.
- Claims denied as *past the payment deadline*.
- Claims with quantity billed changes in the claims details.
- Claims that are the result of a mass adjustment.

**Exception:** *Inpatient hospital claims denied for lack of a Hysterectomy Acknowledgment Statement or a Sterilization Consent Form may be appealed electronically if the requested form has been faxed according to the instructions in the [Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).*

#### **7.1.2 Resubmission of TMHP Electronic Data Interchange (EDI) Rejections**

TMHP EDI transactions that fail HIPAA edits will be rejected, and the submitter will receive a 277CA claim response file. The 277CA claims response file lists activity by submitter, provider, and payer.

The 277CA claims response file includes member identifier, patient last name and first initial, patient control number (PCN), type of bill or place of service, charge, transaction from and to dates, receipt date, rejection code, and rejection description.

Providers must send the batch ID, PCN, date of service, transaction from and to dates, receipt date, and rejection codes from the 277CA claims response file to TMHP when appealing denied claims.

The batch ID is located in the file name of the returned 277CA claims response, and not within the file. Providers must include the batch ID in all electronic response files submitted to TMHP for appeals to denied claims. Handwritten batch IDs are not acceptable for submission to TMHP. Providers who cannot identify or retrieve the batch ID from the 277CA claims response file name should contact the clearinghouse or vendor to have the filename included in the response document. If not, the provider must request a copy of the response file that contains the filename from the clearinghouse.

Providers who receive a rejection on the 277CA claims response file may resubmit an electronic claim within 95 days of the date of service.

A paper appeal may also be submitted with a copy of the response document within 120 days of the 277CA claims response file rejection to meet the filing deadline. A copy of the electronic response file rejection to include the batch ID must accompany each corrected claim that is submitted on paper.

### 7.1.3 Automated Inquiry System (AIS) Appeals

The following appeals may be submitted using AIS:

- *Client eligibility.* The client's correct Medicaid number, name, and date of birth are required.
- *Provider information (excluding Medicare crossovers).* The correct NPI is required for the billing provider, performing provider, referring provider, and limited provider. The name and address of the provider are required for the facility and outside laboratory.
- *Claim corrections.* Providers may correct the:
  - Patient control number (PCN).
  - Date of birth.
  - Date of onset.
  - X-ray date.
  - Place of service (POS).
  - Quantity billed.
  - Prior authorization number (PAN).
  - Beginning date of service (DOS), as long as the new date is within the filing deadline for the claim.
  - Ending date of service, as long as the new date is within the filing deadline for the claim.

The following appeals may not be appealed through AIS:

- Claims listed on the R&S Report as Incomplete Claims
- Claims listed on the R&S Report with \$0 allowed and \$0 paid
- Claims requiring supporting documentation (for example, operative report, medical records, home health, hearing aid, and dental X-rays)
- DRG assignment
- Procedure code, modifier, or diagnosis code
- Medicare crossovers
- Claims listed as *pending* or *in process* with EOPS messages
- Claims denied as *past filing deadline* except when retroactive eligibility deadlines apply
- Claims denied as *past the payment deadline*
- Inpatient hospital claims that require supporting documentation
- Third party liability (TPL)/other insurance

Providers may appeal these denials either electronically or on paper.

**Referto:** Subsection 7.1.1.2, “Disallowed Electronic Appeals” in this section to determine whether these appeals can be billed electronically. If these appeals cannot be billed electronically, a paper claim must be submitted.

**Exception:** *Inpatient hospital claims denied for lack of a Hysterectomy Acknowledgment Statement or a Sterilization Consent Form may be appealed if the requested form has been faxed according to the instructions in subsection 6.13, “Hysterectomy Services” in the Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks).*

#### 7.1.4 Automated Inquiry System Automated Appeals Guide

To access the AIS automated appeals guide, providers can call 800-925-9126. Providers may submit up to three fields per claim and 15 appeals per call. If during any step invalid information is entered three times, the call transfers to the TMHP Contact Center for assistance.

#### 7.1.5 Paper Appeals

Claim appeal requests that cannot be appealed electronically or by using AIS may be appealed on paper. Completed claim forms are not required to be submitted with paper appeals. Providers who submit paper appeals must clearly document on the attached R&S Report the information that is being appealed and identify the claim being appealed.

If a provider determines that a claim cannot be appealed electronically or through AIS, the claim may be appealed on paper by completing the following:

- 1) Submit a copy of the R&S Report page on which the claim is paid or denied. A copy of other official notification from TMHP may also be submitted.
- 2) Submit one copy of the R&S Report for each claim appealed.
- 3) Circle only one claim per R&S Report page.
- 4) Identify the reason for the appeal.
- 5) If applicable, indicate the incorrect information and provide the corrected information that should be used to appeal the claim.
- 6) Attach a copy of any supporting medical documentation that is required or has been requested by TMHP. Supporting documentation must be on a separate page and not copied on the opposite side of the R&S Report.

**Note:** *It is strongly recommended that providers submitting paper appeals retain a copy of the documentation being sent. It also is recommended that paper documentation be sent by certified mail with a return receipt requested. This documentation, along with a detailed listing of the claims enclosed, provides proof that the claims were received by TMHP, which is particularly important if it is necessary to prove that the 120-day appeals deadline has been met. If a certified receipt is provided as proof, the certified receipt number must be indicated on the detailed listing along with the Medicaid number, billed amount, date of service (DOS), and a signed claim copy. The provider may need to keep such proof regarding multiple claims submissions if the provider enrollment is pending.*

Medicare crossovers and inpatient hospital appeals related to medical necessity denials or DRG assignment/adjustment must be submitted on paper with the appropriate documentation.

Submit correspondence, adjustments, and appeals (including routine inpatient hospital claims) to the following address:

Texas Medicaid & Healthcare Partnership  
Appeals/Adjustments  
PO Box 200645  
Austin, TX 78720-0645

**Exception:** *Hospitals appealing HHSC OIG UR Unit final technical denials, admission denials, DRG revisions, continued-stay denials for Tax Equity and Fiscal Responsibility Act (of 1982) (TEFRA) Hospitals, or cost/day outliers must appeal to HHSC at the following address:*

Texas Health and Human Services Commission  
Medical and UR Appeals, H-230  
4601 W Guadalupe ST  
Austin, TX 78751

All other provider fields on the claim forms (referring, facility, admitting, operating, and other) require only an NPI.

Providers that choose to appeal the claim with NPI information must continue submitting an NPI until the claim is finalized.

#### **7.1.5.1 Texas Medicaid Fee-for-Service DRG Adjustment Appeal**

Texas Medicaid fee-for-service hospital providers who are appealing a DRG adjustment (higher weight DRG) must provide the original and revised UB-04 CMS-1450 paper claim form, the complete medical record, and a statement defining the reason for the requested change. Hospitals have 120 days from the date of the R&S Report to request an addition of a diagnosis or procedure resulting in a DRG adjustment. Providers appealing a DRG that has not been revised by the OIG Utilization Review Unit should appeal to TMHP.

**Referto:** Subsection 7.3.3, “Utilization Review Appeals” in this section.

#### **7.1.5.2 Medical Necessity Denial Appeals**

Appeals of denials relating to medical necessity decisions made for all medical services with the exception of HHSC Inpatient UR cases may be submitted for further review if providers find denials are inappropriate. All necessary documentation must accompany the request for review. Incomplete appeals and adjustment requests are denied by TMHP with an explanation of benefits (EOB) code requesting additional information.

TMHP reviews each appeal (DRG adjustment and medical necessity) and forwards written notice of final action in the form of a letter or an adjustment transaction on the R&S Report.

#### **7.1.5.3 Other Insurance Appeals**

To appeal a claim denial due to other insurance coverage, the provider must submit complete other insurance information including the disposition date. The disposition date indicates when the other insurance company processed the payment or denial. An appeal submitted without this information will be denied.

If submitting a paper appeal the provider must submit EOBs containing disposition dates. If the disposition date appears only on the first page of an EOB that has multiple pages and the claim that is being appealed is on a subsequent page, the provider must also include the first page of the EOB that shows the disposition date.

#### **7.1.6 Appeals Submitted Incorrectly**

If an incomplete appeal is received, it is returned to the sender with further appeal instructions and a request for more information. Documentation (either by letter or facsimile) that does not clearly indicate the reason for submission is returned to the sender for clarification.

If an appeal is received that may be more appropriately addressed in another department, the appeal is forwarded to the appropriate department for research and response.

If the TMHP Medical Director or designee identifies a pattern of ineffective use of the appeals process, the provider may be referred to a provider relations representative for assistance.

## 7.2 Refunds to TMHP

The TMHP Cash Reimbursement Unit is responsible for processing financial adjustments when any of the following occur: overpayment, duplicate payment, payment to incorrect providers, and overlapping payments by Medicaid and a third party resource (TPR).

Providers have the option of refunding payments by issuing a check to TMHP or requesting a recoupment through the paper appeal process. The paper appeal process does not require a provider to issue a check because the refund amount is reduced on the R&S Report. To accurately process claim refunds, the TMHP Cash Reimbursement Unit requests that the refund check be accompanied by [Texas Medicaid Refund Information Form](#), with the following information:

- Refunding provider's name and NPI.
- Client's name and Medicaid ID number.
- Date of service.
- A copy of the R&S Report showing the claim to which the refund is being applied.
- The specific reason for the refund.
- Name and address of the attorney or casualty insurance company (including the policy and claim number).
- TPR subscriber information.
- Amount of insurance payment.

**Referto:** "Section 8: Third Party Liability (TPL)" (*Vol. 1, General Information*) for additional TPL information.

## 7.3 Appeals to HHSC Texas Medicaid Fee-for-Service

### 7.3.1 Administrative Claim Appeals

An administrative appeal is a request for review of (not a hearing on) claims that are denied by TMHP or claims processing entity for technical and nonmedical reasons. There are two types of administrative appeals:

- *Exception requests to the 95-day filing deadline or 120-day appeal deadline.* A provider's formal written request for review of (not a hearing on) a claim that is denied or adjusted by TMHP for failure to meet the 95-day filing deadline or 120-day appeal deadline. Exception requests to the 95-day filing deadline should meet one of the five exceptions in subsection 7.3.1.2, "Exceptions to the 95-Day Filing Deadline" in this section. Exceptions to the 120-day appeal deadline should meet one of the situations in subsection 7.3.1.3, "Exceptions to the 120-day Appeal Deadline" in this section.
- *Standard Administrative Appeal.* A provider's formal written request for review of (not a hearing on) a claim or prior-authorization that is denied by TMHP for technical or non-medical reasons.

An administrative claims appeal is a request for a review as defined in Title 1 TAC §354.2201(2).

An administrative appeal must be:

- Submitted in writing to HHSC Claims Administrator Operations Management by the provider delivering the service or claiming reimbursement for the service.

- Received by HHSC Claims Administrator Operations Management after the appeals process with TMHP or the claims processing entity has been exhausted, and must contain evidence of appeal dispositions from TMHP or the claims processing entity:
  - All correspondence and documentation from the provider to TMHP or the claims processing entity including copies of supporting documentation submitted during the appeal process.
  - All correspondence from TMHP or the claims processing entity to the provider including TMHP's final decision letter or such from the claims processing entity.
- Complete and contain all of the information necessary for consideration and determination by HHSC Claims Administrator Operations Management to include the following:
  - A written explanation specifying the reason/request for appealing the claim.
  - Supporting documentation for the request.
  - All R&S Reports identifying the claims/services in question.
  - Identification of the incorrect information and the corrected information that is to be used to appeal the claim.
  - A copy of the original claim, if available. Claim copies are helpful when the appeal involves medical policy or procedure coding issues. Also provide a corrected signed claim.
  - A copy of supporting medical documentation that is necessary or requested by TMHP.
  - Provider's internal notes and logs or ticket numbers from the TMHP Contact Center when pertinent (cannot be used as proof of timely filing).
  - Memos from HHSC, TMHP, or claims processing entity indicating any problems, policy changes, or claims processing discrepancies that may be relevant to the appeal.
  - Other documents, such as receipts (i.e., certified mail along with a detailed listing of the claims enclosed), in-service notes, minutes from meetings, if relevant to the appeals. Receipts can be helpful when the issue is late filing.
- Received by HHSC Claims Administrator Operations Management within 120 days from the date of disposition by TMHP or the claims processing entity as evidenced by the weekly R&S Report.

Administrative appeals can be submitted electronically through the My Account page on the TMHP portal. Once an appeal has been submitted, providers can login to My Account to view the following information:

- The status of administrative appeals that were submitted electronically or on paper
- Communications from TMHP and Texas HHSC

Providers who have submitted their claims electronically must identify the batch submission ID with the date on the electronic claims report. This report must indicate the TMHP assigned batch ID. In addition, this report must include the individual claim that is being appealed. The claim information on the batch report, including date of service and billed amount, must match the information on the claim that is being appealed. This required information constitutes proof of timely filing.

**Note:** *Only reports accepted or rejected from TMHP or the claims processing entity to the vendor will be honored unless the provider is a direct submitter (TexMedConnect). Office notes indicating claims were submitted on time or personal screen prints of claim submissions are not considered proof of timely filing.*

HHSC Claims Administrator Operations Management only reviews appeals that are received within 18 months from the DOS. All claims must be paid within 24 months from the DOS as outlined in 1 TAC §354.1003.

Providers must adhere to all filing and appeal deadlines for an appeal to be reviewed by HHSC Claims Administrator Operations Management. The filing and appeal deadlines are described in 1 TAC §354.1003.

Additional information requested by HHSC Claims Administrator Operations Management must be returned to HHSC Claims Administrator Operations Management within 21 calendar days from the date of the letter from HHSC Claims Administrator Operations Management. If the information is not received within 21 calendar days, the case is closed.

A determination made by HHSC Claims Administrator Operations Management is the final decision for claim appeals. No additional consideration is available. Therefore, ensure that all documents pertinent to the appeal are submitted. New evidence is required for an additional appeal to HHSC Claims Administrator Operations Management.

Mail appeal requests to the following address:

Texas Health and Human Services Commission  
HHSC Claims Administrator Operations Management  
Mail Code-91X  
PO Box 204077  
Austin, Texas 78720-4077

Providers may request the status of an administrative appeal by sending an email to HHSC at [MCD\\_Administrative\\_Appeals@hhsc.state.tx.us](mailto:MCD_Administrative_Appeals@hhsc.state.tx.us). The email must include the NPI number, client name, Medicaid number, date of service, and, if available, the case review number.

### **7.3.1.1 Requirements for Exception Requests**

HHSC Claims Administrator Operations Management makes the final decision on whether claims fall within one of the exceptions to the 95-day or 120-day filing deadlines.

Providers must submit the following documentation for all exception requests:

- Exception requests must be in writing and mailed directly to HHSC.
- Adequate back-up documentation must accompany the exception request. Failure to provide adequate documentation results in the case being closed. Providers are notified of the reason for denial.
- All claims that are to be considered for an exception must accompany the request. HHSC will consider only the claims that are attached to the request.
- Additional claims cannot be added to an exception request after the exception request has been completed by HHSC. Additional claims must be submitted as a separate request and must include all required documentation. Information from a previous request will not be linked by HHSC to process additional claims.
- All exception requests must include an affidavit or statement from the provider stating the details of the cause for the delay, the exception being requested, and verification that the delay was not caused by neglect, indifference, or lack of diligence of the provider or the provider's employee or agent. This affidavit or statement must be made by the person with personal knowledge of the facts.
- Multiple requests submitted simultaneously must be sorted by NPI first, and then alphabetically by client name. The orderly submission of exception requests facilitates the review process. Exception requests are returned to the provider if not submitted in the required format.

HHSC may request additional information which must be received within 21 calendar days from the date of the letter from HHSC. If the information is not received within 21 calendar days, the case will remain closed.

HHSC notifies providers about the outcome of the case upon completion of an exception request review.

### 7.3.1.2 Exceptions to the 95-Day Filing Deadline

HHSC Claims Administrator Operations Management is responsible for reviewing requests for exceptions to the 95-day filing deadline for Texas Medicaid fee-for-service. Only providers can submit exception requests. Requests from billing companies, vendors, or clearinghouses are not accepted unless accompanied by a signed authorization from the provider (with each appeal). Without provider authorization, these requests are returned without further action.

HHSC will only consider exceptions to the 95-day filing deadline for claims that are submitted within the 365-day federal filing deadline from the date of service as outlined in 1 TAC §354.1003.

Exceptions to the filing deadline are considered when one of the following situations exists:

- Catastrophic event that substantially interferes with normal business operations of the provider, or damage or destruction of the provider's business office or records by a natural disaster, including, but not limited to, fire, flood, or earthquake; or damage or destruction of the provider's business office or records by circumstances that are clearly beyond the control of the provider, including, but not limited to, criminal activity. The damage or destruction of business records or criminal activity exception does not apply to any negligent or intentional act of an employee or agent of the provider because these persons are presumed to be within the control of the provider. The presumption can only be rebutted when the intentional acts of the employee or agent lead to termination of employment and filing of criminal charges against the employee or agent.

Providers requesting an exception for catastrophic events must include independent evidence of insurable loss; medical, accident, or death records; or police or fire report substantiating the exception of damage, destruction, or criminal activity.

- Delay or error in the eligibility determination of a client, or delay due to erroneous written information from HHSC, its designee, or another state agency.

Providers requesting an exception for the delay or error in the eligibility determination of a client or delay due to erroneous written information from HHSC, its designee, or another state agency must include the written document from HHSC or its designee that contains the erroneous information or explanation of the delayed information.

- Delay due to electronic claim or system implementation problems experienced by HHSC, its designee, or Texas Medicaid providers.

Providers requesting an exception for the delay due to electronic claim or system implementation problems experienced by HHSC, its designee, or Texas Medicaid providers must include the written repair statement, invoice, computer or modem generated error report (indicating attempts to transmit the data failed for reasons outside the control of the provider), or the explanation for the system implementation problems.

The documentation must include a detailed explanation made by the person making the repairs or installing the system, specifically indicating the relationship and impact of the computer problem or system implementation to claims submission, and a detailed statement explaining why alternative billing procedures were not initiated after the delay in repairs or system implementation was known.

If the provider is requesting an exception based upon an electronic claim or system implementation problem experienced by HHSC or its designee, the provider must submit a written statement outlining the details of the electronic claim or system implementation problems experienced by HHSC or its designee that caused the delay in the submission of claims by the provider, any steps taken to notify the state or its designee of the problem, and a verification that the delay was not caused by the neglect, indifference, or lack of diligence on the part of the provider or its employees or agents.

- Submission of claims occurred within the 365-day federal filing deadline, but the claim was not filed within 95 days from the date of service because the service was determined to be a benefit of the Medicaid program, and an effective date for the new benefit was applied retroactively.

Providers requesting an exception for claims that were submitted within the 365-day federal filing deadline, but were not filed within the 95-days of the date of service because the service was determined to be a benefit of Texas Medicaid and an effective date for the new benefit was applied retroactively, must include a written, detailed explanation of the facts and documentation to demonstrate the 365-day federal filing deadline for the benefit was met.

- Client eligibility is determined retroactively and the provider is not notified of retroactive coverage.

Providers requesting an exception for client eligibility determined retroactively and the provider is not notified of retroactive coverage must include a written, detailed explanation of the facts and activities illustrating the provider's efforts in requesting eligibility information for the client. The explanation must contain dates, contact information, and any responses from the client.

### **7.3.1.3 Exceptions to the 120-day Appeal Deadline**

HHSC must receive a written exception request within 120 days of TMHP's final action. HHSC shall consider exceptions to the 120-day appeal deadline for the following listed situations. This is a one-time exception request; therefore, all claims that are to be considered within the request for an exception must accompany the request. Claims submitted after HHSC's determination has been made for the exception will be denied consideration because they were not included in the original request.

- An exception request must be received by HHSC within 18 months from the date of service to be considered. This requirement will be waived for the exceptions listed in the following bullets (b) and (c), as well as the situation listed under "Exceptions to the 24-month deadline."
- The following exceptions to the 120-day appeal deadline are considered if the criteria in the previous bullet is met and there is evidence to support one of the following bullets:
  - (a) Errors made by a third party payor that were outside the control of the provider. The provider must submit a statement outlining the details of the cause for the error, the exception being requested, and verification that the error was not caused by neglect, indifference, or lack of diligence of the provider, the provider's employee, or agent. This affidavit or statement should be made by the person with personal knowledge of the facts. In lieu of the above affidavit or statement from the provider, the provider may obtain an affidavit or statement from the third party payor including the same information, and provide this to HHSC as part of the request for appeal.
  - (b) Errors made by the reimbursement entity that were outside the control of the provider. The provider must submit a statement from the original payor outlining the details of the cause of the error, the exception being requested, and verification that the error was not caused by neglect, indifference, or lack of diligence on the part of the provider, the provider's employee, or agent. In lieu of the above reimbursement entity's statement, the provider may submit a statement including the same information and provide this to HHSC as part of the request for appeal.
  - (c) Claims were adjudicated, but an error in the claim's processing was identified after the 120-day appeal deadline. The error is not the fault of the provider. An error occurred in the claims processing system that is identified after the 120-day appeal deadline has passed.

### **7.3.1.4 Exceptions to the 24-Month Payment Deadline**

HHSC shall consider exceptions to the 24-month claims payment deadline for the following listed situations. The final decision about whether a claim falls within one of the following exceptions will be made by HHSC.

- **Refugee Eligible Status:** The payable period for all Refugee Medicaid eligible recipient claims is the federal fiscal year in which each date of service occurs plus one additional Federal Fiscal year. The date of service for inpatient claims is the discharge date.
- **Medicare/Medicaid Eligible Status:** The payable period for Medicaid/Medicare eligible recipient claims filed electronically is 24 months from the date the file is received from Medicare by the claims administrator for Medicaid. The payable period for Medicaid/Medicare eligible recipient claims filed on paper is 24 months from the date listed on the Medicare Remittance Advice.
- **Retroactive Supplemental Security Income Eligible:** The payable period for Supplemental Security Income (SSI) Medicaid eligible recipients when the Medicaid eligibility is determined retroactively is 24 months from the date the Medicaid eligibility is added to the eligibility file. This date is referred to as the “add date.”
- **Other HHSC approved situations:** To the extent permitted by state and federal laws, rules, and regulations, HHSC may, at its sole discretion, consider other situations as exceptions to the provider 24-month time limit if the provider shows good cause.

Mail exception requests to HHSC at the following address:

Texas Health and Human Services Commission  
HHSC Claims Administrator Operations Management  
Mail Code 91X  
PO Box 204077  
Austin, TX 78720-4077

### 7.3.2 Medical Necessity Appeals

Medical necessity appeals are defined as disputes regarding medical necessity of services. Providers must appeal to TMHP and exhaust the appeal/grievance process before submitting an appeal to HHSC.

Medical necessity appeals related to UR decisions made by the HHSC OIG UR Unit must be appealed to HHSC not TMHP.

When filing appeals to HHSC, providers must submit copies of all supporting documentation, including information sent to TMHP.

**Referto:** Subsection 7.1.5.1, “Texas Medicaid Fee-for-Service DRG Adjustment Appeal” in this section.

### 7.3.3 Utilization Review Appeals

Hospitals may appeal adverse UR decisions made by the HHSC OIG UR Unit to the HHSC Medical and UR Appeals Unit. The written appeal request, with complete medical record and approved [Business Records Affidavit Form](#) must be received by the Medical and UR Appeals Unit within 120 days of the date of the original HHSC OIG UR decision letter. If the appeal request with all required documentation is not received within 120 days, the appeal is not conducted, and the HHSC OIG UR decision is considered final. Any claim the facility may have to the Medicaid funds at issue are barred. Extensions of time are not granted for filing the written appeal request and submitting all of the required documentation. The procedures and specific requirements for appealing these decisions can be found in the sections that follow.

Hospitals may appeal adverse HHSC OIG UR Unit determinations to the following address:

HHSC Medical and UR Appeals  
Mail Code H-230  
4601 W Guadalupe ST  
Austin, TX 78751

### 7.3.3.1 Admission Denials, Continued Stay Denials for TEFRA Hospitals, DRG Revisions, and Cost/Day Outlier Denials

If a hospital is dissatisfied with the original retrospective review conducted by the HHSC OIG UR Unit, it may submit a written request for an appeal to the HHSC Medical and Utilization Review Appeals Unit.

The request for an appeal must include a copy of the complete medical record, a letter explaining the reasons why the HHSC OIG UR decision is incorrect, a copy of the HHSC OIG UR decision letter, and an original, properly completed, and notarized affidavit in the format approved by HHSC. The affidavit allows the hospital to certify the record as a business and legal document.

**Referto:** [Business Records Affidavit Form](#).

Complete medical records must be provided to HHSC at no charge. A complete medical record must include, but is not limited to, a discharge summary, history and physical, emergency room record, operative report, pathology report, anesthesia record, consultation reports, physician progress notes, physician orders, laboratory reports, X-ray reports, special diagnostic reports, nurses' notes, and medication records.

Any additional information requested by the HHSC Medical and UR Appeals Unit must be returned to the HHSC Medical and UR Appeals Unit within 21 calendar days of the request. If the requested documentation is not received within this time frame, the case is closed without an opportunity for further review and the original HHSC OIG UR decision is considered the final decision.

If a hospital is notified that it failed to submit any required documentation with the initial appeal request, the required information must be returned to the HHSC Medical and UR Appeals Unit within 21 calendar days of the date of notification, or within 120 days of the date of the original HHSC OIG UR decision letter, whichever is sooner. If the required documentation is not received within the time frames, the case is closed without an opportunity for further review and the original HHSC OIG UR decision is considered the final decision. Extensions of time are not granted for filing the written appeal request and submitting all required documentation.

The HHSC Medical and UR Appeals Unit is responsible for conducting an independent review in response to a provider's appeal. The professional staff uses only the documentation submitted in the medical record to determine whether an inpatient admission was appropriate and whether the diagnoses and procedures were correct. The HHSC UR and Medical Appeals physician or designee performs a complete review for the medical necessity of inpatient admission, DRG validation, quality of care, continued stay medical necessity, and ancillary charges (TEFRA cases) using the medical record documentation submitted on appeal. After completion of the review, the physician or designee renders a final decision on the case. The final decision may include determinations regarding multiple aspects of the admission. The hospital is notified in writing of the final decision. Inpatient admission denials cannot be rebilled as outpatient claims except as noted in subsection 4.2.4, "Outpatient Observation Room Services" in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)*.

The HHSC Medical and Utilization Review Unit recognizes that hospital staff may use guidelines, such as the American Hospital Association's Coding Clinic, to assist them in identifying diagnoses or procedures for statistical and billing purposes. However, the HHSC Medical and Utilization Review Appeals Unit determines the appropriate diagnoses or procedures for reimbursement purposes using the documentation in the medical record (submitted on appeal) and the following guidelines:

- *Principal diagnosis assignment.* The diagnosis (condition) established after study to be chiefly responsible for causing the admission of the client to the hospital for care. The principal diagnosis must be treated or evaluated during the admission to the hospital.
- *Secondary diagnosis assignment.* Conditions that affect patient care in terms of requiring clinical evaluation, therapeutic treatment, diagnostic procedures, extended length of hospital stay, or increased nursing care or monitoring, or, in the case of a newborn (birth through 28 days of age),

which the physician deems to have clinically significant implications for future health care needs. Normal newborn conditions or routine procedures should not be considered as complications or comorbidities for DRG assignment.

If the principal diagnosis, secondary diagnoses, or procedures are not substantiated in the medical record, not sequenced correctly, or have been omitted, the codes may be changed, added, or deleted by the HHSC Medical and UR Appeals physician or designee. When it is determined the diagnoses or procedures are substantiated and sequenced correctly, a final DRG assignment is made.

If the hospital is displeased with the appeals decision, the attending physician or medical director of the hospital may request an educational conference with the HHSC Medical and UR Appeals physician or designee. The educational conference is held by telephone between the physician or designee and the hospital medical director or attending physician. This is an opportunity for the physicians to discuss the deciding factors in the case and any hospital billing processes that may have affected the adjudication of the case. The educational conference will not alter the previous appeal decision.

### **7.3.3.2 Final Technical Denials**

Hospitals may submit a request for a written appeal to HHSC Medical and UR Appeals only if the hospital has evidence that the HHSC OIG UR Unit issued a final technical denial in error, or did not provide proper notification of the preliminary technical denial. The request must include a letter explaining the reasons why the HHSC OIG UR decision is incorrect and a copy of the HHSC OIG UR decision letter.

The written appeal request must be received by HHSC Medical and UR Appeals within 120 days of the date of the original HHSC OIG UR decision letter. If the request is not received within the 120 days, the appeal is not conducted and the HHSC OIG UR decision is considered final. Any claim the facility may have to the Medicaid funds at issue are barred. Extensions of time are not granted for filing the written appeal request.

If the appeal time frame is met, the HHSC Medical and UR Appeals Unit reviews all the documentation and renders a final decision on the case. If it is determined the technical denial was issued correctly by the HHSC OIG UR Unit, HHSC's decision is upheld. The hospital is notified in writing of the decision. This decision is the final decision.

If it is determined that the final technical denial decision should be overturned, the HHSC Medical and UR Appeals Unit will request a copy of the complete medical record and an original, properly completed, notarized affidavit in the format approved by HHSC. The affidavit allows the hospital to certify the record as a business and legal document. The HHSC Medical and UR Appeals physician or designee performs a complete review for the medical necessity of the admission, DRG validation, quality of care or continued stay, and ancillary charges (for TEFRA Hospitals) using only the medical record documentation. After completion of the review, the physician or designee renders a final decision on the case. The hospital is notified in writing of the final decision.

If the requested documentation is not received within the required 21-day time frame, the case is closed without further opportunity for review and the original HHSC OIG UR decision is considered final.

### **7.3.4 Provider Complaints**

TMHP provides for due process for resolving all provider complaints. A *complaint* is defined as any dissatisfaction expressed by telephone or in writing by the provider, or on behalf of that provider, concerning Texas Medicaid. The definition of *complaint* does not include a misunderstanding or a problem of misinformation that is resolved promptly by clearing up the misunderstanding or supplying the appropriate information to the provider's satisfaction. The definition also does not include a provider's oral or written dissatisfaction with an adverse determination or appeals regarding claim payments and denials.

Procedures governing the provider complaints process are designed to identify and resolve provider complaints in a timely and satisfactory manner. Most complaints are resolved within 30 calendar days. Complaints to TMHP may be submitted using the following methods:

- By using the Email Us button on the TMHP Contact web page
- By telephone at 800-925-9126
- In writing to:

TMHP  
Complaints Resolution Department  
PO Box 204270  
Austin, TX 78720-4270

Questions regarding the complaint process or the status of a complaint should be directed to the TMHP Contact Center at 800-925-9126.

#### **7.3.4.1 Provider Complaint Policy**

TMHP takes seriously and acts on each provider complaint. Depending on the level and nature of the complaint, TMHP works with the provider to resolve the issue or directs the complaint to the appropriate department.

The Medical Affairs Division handles complaints that relate to utilization of services (including ER use), denial of continued stay, and all clinical and access issues. This includes provider's appeal of an adverse authorization decision.

If the complaint relates to a medical issue, the Medical Affairs Division staff may assist in resolving the complaint. The provider complaints process applies only to the resolution of disputes within the control of Texas Medicaid, such as administrative or medical issues. The provider complaint process does not apply to allegations of negligence against third parties, including other Texas Medicaid providers. These complaints are referred to HHSC for review and evaluation and are resolved by HHSC.

#### **7.3.4.2 Provider Complaint Process**

The TMHP Complaints Resolution Department handles all provider complaints. The processing of a provider's complaint is described as follows:

- Providers must submit their complaint by telephone or in writing (mail or fax).
- Providers will receive a written acknowledgement letter from TMHP within five business days of receipt of the complaint.
- Referrals to other departments, such as Provider Relations or Medical Affairs, are made when appropriate.
- If the complaint cannot be resolved within 30 calendar days, the provider is notified in writing of the status of the complaint.
- If the Email Us option on the TMHP contact page is used, providers can select to receive communication by text, email, or both.

Providers who believe they did not receive due process regarding their complaint from TMHP may file a complaint with HHSC. Providers are encouraged to utilize the appeals and grievance process with TMHP before filing a complaint with HHSC.

### 7.3.4.3 Complaints to HHSC—Texas Medicaid Fee-for-Service

Texas Medicaid fee-for-service providers may file complaints to the HHSC Claims Administrator Operations Management if they find they did not receive full due process from TMHP in the management of their appeal. Texas Medicaid fee-for-service providers must exhaust the appeals and grievance process with TMHP before filing a complaint with the HHSC Claims Administrator Operations Management.

**Referto:** Subsection 7.3, “Appeals to HHSC Texas Medicaid Fee-for-Service” in this section for information about submission of an appeal to HHSC.

A *complaint* is defined as any dissatisfaction expressed in writing by the provider, or on behalf of that provider, concerning Texas Medicaid. The term *complaint* does not include the following:

- A misunderstanding or a problem of misinformation that is resolved promptly by clearing up the misunderstanding or supplying the appropriate information to the provider’s satisfaction.
- A provider’s oral or written dissatisfaction with an adverse determination.

Under the complaint process, the HHSC Claims Administrator Operations Management works with TMHP and providers to verify the validity of the complaint, determine if the established due process was followed in resolving appeals and grievances, and addresses other program and contract issues, as applicable.

Complaints must be in writing and received by the HHSC Claims Administrator Operations Management within 60 calendar days from TMHP’s written notification of the final appeal decision.

When filing a complaint, providers must submit a letter explaining the specific reasons they believe the final appeal decision by TMHP is incorrect and copies of the following documentation:

- All correspondence and documentation from the provider to TMHP, including copies of supporting documentation submitted during the appeal process.
- All correspondence from TMHP to the provider, including TMHP’s final decision letter.
- All R&S Reports of the claims and services in question, if applicable.
- Provider’s original claim or billing record, electronic or manual, if applicable.
- Provider’s internal notes and logs when pertinent.
- Memos from HHSC or TMHP indicating any problems, policy changes, or claims’ processing discrepancies that may be relevant to the complaint.
- Other documents, such as certified mail receipts, original date-stamped envelopes, in-service notes, or minutes from meetings if relevant to the complaint. Receipts can be helpful when the issue is late filing.

Complaint requests may be mailed to the following address:

Texas Health and Human Services Commission  
HHSC Claims Administrator Operations Management  
Mail Code 91X  
PO Box 204077  
Austin, TX 78720-4077

## 7.4 Cost Report Settlement Appeal Process

A provider who is dissatisfied with the determination contained in the Notice of Program Reimbursement (NPR) from TMHP Medicaid Audit may request an appeal as follows:

- The request for appeal must be in writing.
- The request for appeal must be filed within 180 calendar days from the date of receipt of the NPR.

- If the amount in controversy is at least \$1,000, the request for the appeal must be filed with TMHP Medicaid Audit.
- If the NPR shows that the provider is indebted to Texas Medicaid, TMHP must take the necessary action to recover the overpayment, including a suspension of interim payments. This process will take place even if an appeal has been requested.

#### **7.4.1 Appeals to TMHP Medicaid Audit**

A provider's request to appeal his or her NPR must include the following:

- Identify specific individual items in TMHP Medicaid Audit's determination with which the provider disagrees.
- Give the reasons the provider believes these are incorrect.
- Identify the amount in controversy for each item and provide a calculation of that amount.

The appeal may include any materials the provider believes will support its position.

TMHP Medicaid Audit completes a desk review of the appeal within six months of the date of receipt of complete documentation supporting the appeal. TMHP does the following:

- Reviews the materials submitted by the provider.
- Informs the provider if it appears that the request for an appeal was not timely or the amount of controversy is not at least \$1,000.
- Reviews the record that formed the basis for the determination of the total payment due to the provider.
- Attempts to resolve as many points in controversy as possible with the provider and inform him or her in writing the issues that have been resolved and those that the provider may appeal to HHSC.
- Ensures all available documentation in support of the provider or TMHP Medicaid Audit is part of the record.

To appeal to TMHP Medicaid Audit, send the written notice within 120 days of receipt of the NPR letter to the following address:

Texas Medicaid & Healthcare Partnership  
Medicaid Audit Operations Director  
PO Box 200345  
Austin, TX 78720-0345

## **7.5 Forms**

The following linked forms can be found on the [Forms](#) page of the Provider section of the TMHP website at [www.tmhp.com](http://www.tmhp.com):

## 8.1 Third Party Liability (TPL)

Texas Medicaid Third Party Liability program recovers payments from third parties that are responsible for paying towards a medical claim for services rendered to a Texas Medicaid client. A third party resource (TPR) is the entity, individual, or other source (other than Medicaid, Medicaid managed care organizations (MCOs), Medicaid managed care dental plans, the client, non-TPR sources, or Medicare) that is legally responsible for paying the medical claims of Texas Medicaid clients. The Third Party Liability program helps reduce Medicaid costs by shifting claims expenses to third party payers.

As a condition of eligibility, Medicaid clients assign their rights (and the rights of any other eligible individuals on whose behalf he or she has legal authority under state law to assign such rights) to medical support and payment for medical care from any third party to Medicaid.

Federal and state laws require the use of Medicaid funds for the payment of most medical services only after all reasonable measures have been made to use a client's TPR or other insurance. To the extent allowed by federal law, a health-care service provider must seek reimbursement from available third party insurance that the provider knows about or should know about before billing Texas Medicaid. Medicaid pays only after the third party has met its legal obligation to pay (i.e., Medicaid is the payer of last resort). All claims submitted for Texas Medicaid payment for clients with other insurance coverage must reference the information, regardless of whether a copy of the explanation of benefits (EOB) from the insurance company is submitted with the claim.

**Referto:** Subsection 7.2, "Refunds to TMHP" in "Section 7: Appeals" (*Vol. 1, General Information*) for information regarding refunds to TMHP resulting from other insurance payments and conditions surrounding provider billing of third party insurers.

Eligible clients enrolled in private health maintenance organizations (HMOs) must not be charged the co-payment amount because the provider has accepted Medicaid assignment.

## 8.2 Verifying a Client's TPR

Providers can verify a client's TPR and other insurance information by:

- Using TexMedConnect.
- Accessing the Medicaid Client Portal for Providers.

To ensure receipt of TPR disposition of payment or denial, providers must obtain an assignment of insurance benefits from the client at the time of service. Providers are asked not to provide claim copies or statements to the client.

Providers that are aware that a client has other health insurance that is not indicated on TexMedConnect or the Medicaid Client Portal for Providers must notify TMHP of the details concerning the type of policy and scope of benefits.

Providers can notify TMHP by calling TPR at 1-800-846-7307, sending a fax to 1-512-514-4225, or mailing the Other Insurance Form to the following address:

Texas Medicaid & Healthcare Partnership  
Third Party Resources Unit  
PO Box 202948  
Austin, TX 78720-2948

Any indemnity insurance policy that pays cash to the insured for wages lost or for days of hospitalization rather than for specific medical services is considered a TPR if the policy is assignable to someone else. The Health and Human Services Commission (HHSC) has assignment to any Medicaid applicant's or client's right of recovery from a third party health insurer, to the extent of the cost of medical care services paid by Medicaid. Texas Medicaid requires a provider take all reasonable measures to use a client's TPR before billing Medicaid.

Medicaid-eligible clients may not be held responsible for billed charges that are in excess of the TPR payment for services covered by Texas Medicaid. If the TPR pays less than the Medicaid-allowable amount for covered services, the provider should submit a claim to TMHP for any additional allowable amount.

### 8.3 TPR Sources

A provider who furnishes services and participates in Texas Medicaid may not refuse to furnish services to an eligible client because of a third party's potential liability for payment of the services.

TPR includes payments from any of the following sources:

- Other health insurance including assignable indemnity contract
- Health maintenance organization (HMO)
- Public health programs available to clients with Medicaid such as Medicare and Tricare
- Profit and nonprofit health plan
- Employment-related health insurance
- Self-insured plans
- Casualty coverage resulting from an accidental injury such as automobile or property insurance (including no-fault insurance); No-fault automobile insurance such as personal injury protection (PIP) and automobile medical insurance
- Liability insurance
- Life insurance policies, trust funds, cancer policies, or other supplemental policies
- Workers' Compensation
- Medical support from absent parents
- Court judgments or settlements from a liability insurer
- First party probate-estate recoveries
- Other federal programs unless excluded by statute
- Other liable third parties

Claims for family planning services (including Title XIX and the Department of State Health Services [DSHS] Family Planning Program) must be submitted to TMHP before billing a client's TPR. Federal regulations protect the client's confidential choice of birth control and family planning services. Confidentiality is jeopardized when seeking information from TPRs.

School Health and Related Services (SHARS) providers are not required to file claims with private insurance before billing Medicaid.

Early Childhood Intervention (ECI) providers are not required to file claims with private insurance before billing Medicaid for Targeted Case Management services and Specialized Skills Training (SST).

Case Management for Children and Pregnant Women providers are not required to file claims with other health insurance before filing with Medicaid.

THSteps medical and dental providers are not required to bill other insurance before billing Medicaid. If the provider is aware of other insurance, however, the provider must choose whether or not to bill the other insurance. The provider has the following options:

- If the provider chooses to bill the other insurance, the provider must submit the claim to the client's other insurance before submitting the claim to Medicaid.

- If the provider chooses to bill Medicaid and not the client's other insurance, the provider is indicating acceptance of the Medicaid payment as payment in full. Medicaid then has the right to recovery from the other insurance. The provider does not have the right to recovery and cannot seek reimbursement from the other insurance after Medicaid has made payment.
- If the provider learns of other insurance coverage after Medicaid has paid, and the provider chooses to bill the other insurance, the provider must refund Medicaid before billing the other insurance.

### 8.3.1 Exceptions

Certain funding sources are an exception to TPR. Adoption agencies or foster parents are not considered a TPR. Medicaid is primary in the STAR Health program (except when court-ordered to provide health insurance). This is an exception to the rule that Medicaid is payer of last resort. Providers must not bill other health insurance unless there is a court order that places this responsibility elsewhere. For Texas Health Steps (THSteps), providers must refer to the MCO, or dental plan that administers the client's managed care benefits for additional information.

**Referto:** Subsection 1.1, "About the Vendor Drug Program" in the *Outpatient Drug Services Handbook* (Vol. 2, *Provider Handbooks*) for information about this program.

Non-TPR sources are secondary to Texas Medicaid and may only pay benefits after Texas Medicaid. The following are the most common non-TPR sources:

- Texas Workforce Solutions–Vocational Rehabilitation Services
- Texas Kidney Health Care Program
- Crime Victims' Compensation Program
- Muscular Dystrophy Association
- Children with Special Health Care Needs (CSHCN) Services Program
- Texas Band of Kickapoo Equity Health Program
- Maternal and Child Health
- DSHS Family Planning Program
- State Legalization Impact Assistance Grant (SLIAG)
- Adoption Agencies
- Home and Community-based Waivers Programs through HHSC
- Blind and Visually Impaired Services
- Healthy Texas Women

If providers have questions about others not listed, they may contact a provider relations representative.

**Note:** *Claims for clients who are seeking disability determination must be submitted to HHSC for consideration of reimbursement. Refer to the HHS website at [www.hhs.texas.gov/](http://www.hhs.texas.gov/) for additional information about disability determinations and claims filing.*

Denied claims or services that are not a benefit of Medicaid may be submitted to non-TPR sources.

If a claim is submitted inadvertently to a non-TPR source listed above before submission to TMHP, the claim may be submitted to TMHP within the filing deadlines.

**Referto:** Subsection 6.1.4, "Claims Filing Deadlines" in "Section 6: Claims Filing" (Vol. 1, *General Information*).

If a non-TPR source erroneously makes a payment for a dual-eligible client for services also covered by Medicaid, the payment is refunded to the non-TPR source.

### 8.3.1.1 Adoption Cases

Texas Medicaid, not the adoption agency, should be billed for all medical services that are a benefit of Texas Medicaid. If a claim is inadvertently sent to the adoption agency before it is sent to TMHP, TMHP must receive the claim within 95 days of the date of disposition from the adoption agency denial, payment, requests for refund or recoupment, to be considered for payment.

If the adoption agency inadvertently makes a payment for services that are covered by Medicaid, the provider must refund the payment to the agency.

**Referto:** Subsection 6.1.4, “Claims Filing Deadlines” in “Section 6: Claims Filing” (*Vol. 1, General Information*).

A copy of the non-TPR disposition must be submitted with the claim and received at TMHP within 95 days of the date of the disposition (denial, payment, request for refund, or recoupment of payment by the non-TPR source).

## 8.4 Non-TPR Sources

A non-TPR is secondary to Texas Medicaid and may only pay benefits after Texas Medicaid. Non-TPR sources include, but are not limited to, accident-only policies, managed care plans, Indigent Health Care, and Medicaid/Children’s Health Insurance Program (CHIP).

The provider bills TMHP directly within 95 days from the date of service. However, if a non-TPR is billed first, TMHP must receive the claim within 95 days of the claim disposition by the other entity.

**Note:** *The provider must submit a copy of the disposition with the claim.*

## 8.5 TPL for Hospitals

Inpatient and outpatient hospitals and providers enrolled in Texas Medicaid are required to inform TMHP about circumstances that may result in third party liability for health-care claims. After receiving this information, TMHP pursues reimbursement from responsible third parties.

Hospitals and providers must fax the Other Insurance Form for Health Insurance or the Tort Response Form for accidents to 1-512-514-4225 or mail it to the following address:

Texas Medicaid & Healthcare Partnership  
TPL Correspondence  
Third Party Liability Unit  
PO Box 202948  
Austin, TX 78720-2948

## 8.6 TPL for Managed Care

Medicaid MCO and dental plan claims payments for services rendered to Texas Medicaid managed care clients are subject to the federal and state requirement for other insurance payments. As directed by HHSC, Texas Medicaid will recover payments based on claims data processed by the Medicaid MCO or dental plan.

TPR includes payments from any of the following sources:

- Other health insurance, including assignable indemnity contracts
- Commercial MCOs (other insurance available through a source other than Texas Medicaid or Medicare)

A provider who furnishes services and participates in Texas Medicaid may not refuse to furnish services to an eligible client because of a third party’s potential liability for the payment of the services.

## 8.7 Tort

HHSC contracts with TMHP to administer third party liability cases. To ensure that Texas Medicaid is the payer of last resort, TMHP performs postpayment investigations of potential casualty and liability cases. TMHP also identifies and recovers Medicaid expenditures in casualty cases involving Medicaid clients.

The Human Resources Code, chapter 32, section 32.033 establishes automatic assignment of a Medicaid client's right of recovery from personal insurance as a condition of Medicaid eligibility.

Investigations are a result of referrals from many sources, including attorneys, insurance companies, health-care providers, Medicaid clients, and state agencies. Referrals should be faxed to 1-512-514-4225 or mailed to:

TMHP TPL/Tort Department  
PO Box 202948  
Austin, TX, 78720-2948

Referrals must be submitted on the English or Spanish version of the Use and Release of Health Information Authorization on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

TMHP releases Medicaid claims information when an HHSC Use and Release of Health Information Authorization form is submitted. The form must be signed by the Medicaid client. Referrals are processed within ten business days.

**Referto:** Use and Release of Health Information Authorization form on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

An attorney or other person who represents a Medicaid client in a third party claim or action for damages for personal injuries must send written notice of representation. The written notice must be submitted within 45 days of the date on which the attorney or representative undertakes representation of the Medicaid client, or from the date on which a potential third party is identified. The following information must be included:

- The Medicaid client's name, address, and identifying information.
- The name and address of any third party or third party health insurer against whom a third party claim is or may be asserted for injuries to the Medicaid client.
- The name and address of any health-care provider that has asserted a claim for payment for medical services provided to the Medicaid client for which a third party may be liable for payment, whether or not the claim was submitted to or paid by TMHP.

If any of the information described above is unknown at the time the initial notice is filed, it should be indicated on the notice and revised if and when the information becomes known.

An authorization to release information about the Medicaid client directly to the attorney or representative may be included as a part of the notice and must be signed by the Medicaid client. The HHSC Use and Release of Health Information Authorization form must be used.

HHSC must approve all trusts before any proceeds from a third party are placed into a trust.

Providers may direct third party liability questions to the TMHP TPL/Tort Contact Center at 1-800-846-7307 with the option for accident, injury, and informational claims.

### 8.7.1 Accident-Related Claims

TMHP monitors all accident claims to determine whether another resource may be liable for the medical expenses of clients with Medicaid coverage. Providers are requested to ask clients whether medical services are necessary because of accident-related injuries. If the claim is the result of an accident, providers enter the appropriate code and date in Block 10 of the CMS-1500 paper claim form, and Blocks 31-34 on the UB-04 CMS-1450 paper claim form.

If payment is immediately available from a known third party such as Workers' Compensation or Personal Injury Protection (PIP) automobile insurance, that responsible party must be billed before Medicaid, and the insurance disposition information must be filed with the Medicaid claim. If the third party payment is substantially delayed because of contested liability or unresolved legal action, a claim may be submitted to TMHP for consideration of payment.

TMHP processes the liability-related claim and pursues reimbursement directly from the potentially liable party on a postpayment basis. Include the following information on these claims:

- Name and address of the liable third party
- Policy and claim number
- Description of the accident including location, date, time, and alleged cause
- Reason for delayed payment by the liable third party

#### **8.7.1.1 Accident Resources, Refunds**

Acting on behalf of HHSC, TMHP has specific rights of recovery from any settlement, court judgment, or other resources awarded to a client with Medicaid coverage (Texas Human Resources Code, Chapter 32.033). In most cases, TMHP works directly with the attorneys, courts, and insurance companies to seek reimbursement for Medicaid payments. If a provider receives a portion of a settlement for services also paid by Medicaid, the provider must make a refund to TMHP. Any provider filing a lien for the entire billed amount must contact the TPL/Tort Department at TMHP for Medicaid postpayment activities to be coordinated. A provider may not file a lien for the difference between the billed charges and the Medicaid payment. A lien may be filed for services not covered by Medicaid. A lien is the liability of the client with Medicaid coverage.

Providers should contact the TPL/Tort Department at TMHP after submitting an itemized statement and/or claim copies for any accident-related services billed to Medicaid if they received a request from an attorney, a casualty insurance company, or a client.

The provider must submit the following information to TMHP:

- Client's name
- Medicaid ID number
- Dates of service involved
- Name and address of the attorney or casualty insurance company (including the policy and claim number)

This information enables TMHP to pursue reimbursement from any settlement. Providers must use the Tort Response Form to report accident information to TMHP. When the form is completed, providers must remit it to the TMHP TPL/Tort Department (the address and fax number are on the form).

Providers may contact the TMHP TPL/Tort Department by calling 1-800-846-7307, Option 3, sending a fax to 1-512-514-4225, or mailing to the following address:

Texas Medicaid & Healthcare Partnership  
TPL/Tort Department  
PO Box 202948  
Austin, TX 78720-2948

#### **8.7.1.2 Workers' Compensation**

Payment of covered services under Workers' Compensation is considered reimbursement in full. The client must not be billed. Services not covered by Workers' Compensation must be billed to TMHP.

### 8.7.2 Providers Filing Liens for Third Party Reimbursement

Any provider filing a lien for the entire billed amount must contact the TMHP TPL/Tort Department for Medicaid postpayment activities to be coordinated.

A provider may file a lien for the entire billed amount only after meeting the criteria in Title 1 Texas Administrative Code (TAC) §354.2322. Providers who identify a third party, within 12 months of the date of service, and wish to submit a bill or other written demand for payment or collection of debt to a third party after a claim for payment has been submitted and paid by Medicaid must refund any amounts paid before submitting a bill or other written demand for payment or collection of debt to the third party for payment, and they must comply with the provisions set forth in 1 TAC §354.2322, which states:

Providers may retain a payment from a third party in excess of the amount Medicaid would otherwise have paid only if the following requirements are met:

- The provider submits an informational claim to TMHP within the claims filing deadline. (Refer to subsection 8.7.3, “Informational Claims” in this section.)
- The provider gives notice to the client or the attorney or representative of the client that the provider may not or will not submit a claim for payment to Medicaid and the provider may or will pursue a third party, if one is identified, for payment of the claim. The notice must contain a prominent disclosure that the provider is prohibited from billing the client or a representative of the client for any Medicaid-covered services, regardless of whether there is an eventual recovery or lack of recovery from the third party or Medicaid.
- The provider establishes the right to payment separate of any amounts claimed and established by the client.
- The provider obtains a settlement or award in its own name separate from a settlement obtained by or on behalf of the client or award obtained by or on behalf of the client, or there is an agreement between the client or attorney or representative of the client and the provider, that specifies the amount that will be paid to the provider after a settlement or award is obtained by the client.

### 8.7.3 Informational Claims

If providers determine that a third party may be liable for a Medicaid client’s accident-related claim, they can submit an informational claim to the TMHP Tort Department to indicate that a third party is being pursued for payment. This allows providers to secure the 95-day claims filing deadline in the event that the payment is not received from the third party.

TMHP processes informational claims for all claims administered by TMHP, including fee-for-service claims and carve-out services. TMHP does not process informational claims for managed care claims that are administered by the client’s MCO or dental plan.

### 8.7.4 Submission of Informational Claims

Providers must submit informational claims to TMHP:

- On a CMS-1450 UB-04 or CMS-1500 paper claim form. Informational claims cannot be submitted to TMHP electronically or by fax.
- On an Informational Claims Submission Form. Providers should complete only one form per client, regardless of how many separate informational claims are being submitted with the form.
- By certified mail.
- Within the 95-day claims filing deadline. Informational claims will not be accepted after the 95-day claims filing deadline.

**Referto:** Informational Claims Submission Form on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Providers must complete either the Insurance Information field (liable third party) or the Attorney Information field on the Informational Claims Submission Form.

Providers must send the informational claims and the Informational Claims Submission Form by certified mail to TMHP at:

TMHP TPL/Tort Department  
PO Box 202948  
Austin, TX 78720-2948

TMHP will send providers a letter to confirm that the informational claim was received. The letter will provide the date on which TMHP must receive a request from the provider to convert the informational claim to a claim for payment. If TMHP receives an informational claim that cannot be processed, TMHP will notify the provider of the reason.

Providers can inquire about the status of an informational claim by calling the TMHP TPL/Tort Department at 1-800-846-7307. If a provider has not received confirmation that TMHP has received the informational claim within 30 days, the provider should contact the TMHP TPL/Tort Department at 1-800-846-7307 to validate the status of the request.

### **8.7.5 Informational Claim Converting to Claims for Payment**

If providers have submitted an informational claim to TMHP but have not received payment from the liable third party, they must make one of the following determinations and notify TMHP within 18 months of the date of service:

- Providers can continue to pursue a claim for payment against the third party and forego the right to convert an informational claim to a claim for payment by Texas Medicaid.
- Providers can submit a request to convert the informational claim to a claim for payment consideration from Texas Medicaid.

Providers that decide to convert an informational claim to a claim for payment consideration must submit a request to TMHP. The request must be submitted:

- On provider letterhead.
- With the client's name and Medicaid ID, the date of service, and total billed amount that was originally submitted on the UB-04 CMS-1450 or CMS-1500 paper claim form.
- By fax 1-512-514-4225 or by mail to:

TMHP/Tort Department  
PO Box 202948  
Austin, TX 78720-2948

TMHP will not accept any conversion request that is submitted more than 18 months after the date of service, regardless of whether an informational claim was submitted timely to TMHP. All payment deadlines are enforced regardless of whether the provider decides to pursue a third party claim. The conversion of informational claims to actual claims is not a guarantee of payment by TMHP.

## **8.8 Other Insurance Claims Filing**

The following information must be provided in the "Other Insurance" field on the paper claim and in the appropriate field of electronic claims. On the CMS-1500 paper claim form, Blocks 9 or 11, and 29 must contain the appropriate information:

- Name of the other insurance resource
- Address of the other insurance resource
- Policy number and group number

- Policyholder
- Effective date if available
- Date of disposition by other insurance resource (used to calculate filing deadline)
- Payment or specific denial information

**Important:** *By accepting assignment on a claim for which the client has Medicaid coverage, providers agree to accept payment made by insurance carriers and Texas Medicaid when appropriate as payment in full. The client cannot be held liable for any balance or copays related to Medicaid-covered services.*

### **8.8.1 Unbundled Services That Are Prior Authorized and Manually Priced Procedure Codes**

Providers that submit prior authorization requests and claims to TMHP must:

- Unbundle any bundled procedure codes that have been submitted to the client's other insurance company.
- Itemize the rates.

If prior authorization has been obtained for services that use manually priced procedure codes, providers must submit claims for the services using the manufacturer's suggested retail price (MSRP) that was submitted with the authorization request and the following information that is listed on the authorization letter:

- The authorization number
- The NPI
- The procedure codes
- The dates of service
- The types of service
- The required modifiers

If the authorization letter shows itemized details, the claim must include all rendered services as they are itemized on the authorization letter and the MSRP rate for each of those services. The procedure codes and MSRP rates that are detailed on the claim must match the procedure codes that are detailed in the authorization letter and the MSRP rates that were submitted with the authorization request. Claims processing and payment may be delayed if there is not an exact match between the detailed information on the authorization letter, the approved authorization, and the information that was submitted on the claim.

**Important:** *For appropriate processing and payment, the Pay Price that is indicated on the authorization letter should not be submitted on the claim.*

Prior authorization is a condition of reimbursement; it is not a guarantee of payment.

### **8.8.2 Other Insurance Credits**

Providing other insurance payment information, even when no additional payment is expected from TMHP, provides benefit to all parties involved in Texas Medicaid. When a TPR issues a payment or partial payment to a provider, the other insurance credit must be indicated on the claim form submitted to TMHP.

This procedure benefits both providers and TMHP even if the TPR payment exceeds the Medicaid allowed amount. Although additional payment may not be issued by TMHP, informing TMHP of the other insurance credit allows TMHP to track the appropriate use of TPRs. Informing TMHP of a TPR

credit provides hospitals with a more accurate standard dollar amount (SDA) rate setting and assists the program in tracking recoveries and reducing Medicaid medical expenditures by informing TMHP of liable third parties.

Providers must report TPR payments correctly in the appropriate electronic field or the paper claim form block as follows:

| Claim Form     | Reference                                 |
|----------------|-------------------------------------------|
| CMS-1500       | Block 29, CMS-1500 Blank Claim Form       |
| UB-04 CMS-1450 | Block 54, UB-04 CMS-1450 Blank Claim Form |
| THSteps Dental | Block 31, ADA Dental Claim Form           |

**Referto:** “Section 6: Claims Filing” (*Vol. 1, General Information*) for claim filing instructions.

### 8.8.2.1 Deductibles

TMHP will consider deductibles for reimbursement when the original third party payor applied the payment amount directly to the client’s deductible. The explanation of benefit reflecting the application of the payment by the other insurance (third party payor) and a completed signed claim copy must be submitted to TMHP for consideration.

### 8.8.2.2 HMO Copayments

TMHP processes and pays HMO copayments for private and Medicare HMOs as well as private and Medicare preferred provider organization (PPO) copayments for clients who are eligible for reimbursement under Medicaid guidelines.

TMHP pays the copayment in addition to the service the HMO or PPO has denied, if the client is eligible for Texas Medicaid and the procedure is reimbursed under Medicaid guidelines. Providers are not allowed to hold the client liable for the copayment.

An office or emergency room (ER) visit (the ER physician is paid only when the ER is not staffed by the hospital) is reimbursed a maximum copayment of \$10 per visit. The hospital ER visit is reimbursed at a maximum of \$50 to the facility. TMHP pays up to four copayments per day, per client. ER visits are limited to one per day, per client, and are considered one of the four copayments allowed per day.

**Important:** *By accepting assignment on a claim for which the client has Medicaid coverage, providers agree to accept payment made by insurance carriers and Texas Medicaid when appropriate as payment in full. The client cannot be held liable for any balance related to Medicaid-covered services.*

The following Medicaid codes have been created for copayments, which are considered an atypical service:

| POS 1 - Office | Description                        |
|----------------|------------------------------------|
| CP001          | Private HMO copayment-professional |
| CP002          | Private PPO copayment-professional |

| POS 5 - Outpatient | Description                      |
|--------------------|----------------------------------|
| CP005              | Private HMO copayment-outpatient |
| CP006              | Private PPO copayment-outpatient |

**Important:** *Providers must submit a new claim when filing for procedure codes CP001 and CP002. No explanation of benefits (EOB) or any other accompanying documentation is required to be attached to the claim form when filing for these services.*

### **8.8.2.3 PPO Discounts**

PPO discounts are not considered a part of other insurance payments. Electronic submitters must supply the PPO discount amount when submitting other insurance information; however, this information is not included in the total other insurance payment during claims processing. Paper submitters are not required to add the PPO discount to the other insurance payment.

### **8.8.2.4 Verbal Denial**

Providers may call the other insurance resource and receive a verbal denial. The other insurance record can either be updated when the provider files the claim or calls the TPL/Tort Customer Service line at 1-800-846-7307. When calling the TPL/Tort Customer Service line and when filing claims to TMHP, the provider must have the following information before any updates are made.

Verbal denial requirements:

- Date of the telephone call to the other insurance resource
- Insurance company's name and telephone number
- Name of the individual contacted at the insurance company
- Policyholder and group information for the client
- Specific reason for the denial, including the client's type of coverage to enhance the accuracy of future claims processing (for example, a policy that covers inpatient services or physician services only)

Providers that update a client's insurance records through the TMHP TPL/Tort Customer Service line must follow the current appeal process once the other insurance information has been updated on the client's file.

### **8.8.2.5 110-Day Rule**

When a service is billed to a third party and no response has been received, Medicaid providers must allow 110 days to elapse before submitting a claim to TMHP. If a TPR has not responded or delays payment or denial of a provider's claim for more than 110 days after the date the claim was billed, Medicaid considers the claim for reimbursement. However, the 365-day federal filing deadline requirement must still be met. The following information is required:

- Name and address of the TPR
- Date the TPR was billed
- Statement signed and dated by the provider that no disposition has been received from the TPR within 110 days of the date the claim was billed

When TMHP denies a claim because of the client's other coverage, information that identifies the other insurance appears on the provider's Remittance and Status (R&S) Report. The claim is not to be refiled with TMHP until disposition from the TPR has been received or until 110 days have lapsed since the billing of the claim with no disposition from the TPR. A statement from the client or family member which indicates that they no longer have this resource is not sufficient documentation to reprocess the claim.

When a provider is advised by a TPR that benefits have been paid to the client, the information must be included on the claim with the date and amount of payment made to the client if available. If a denial was sent to the client, refer to the verbal denial guidelines above for required information. This enables TMHP to consider the claim for reimbursement.

### 8.8.2.6 Filing Deadlines

In accordance with federal regulations, all claims must initially be filed with TMHP within 365 days of the date of service (DOS). Claims that involve filing to a TPR have the following deadlines:

- Claims with a valid disposition (payment or denial) must be received by TMHP within 95 days of the date of disposition by the TPR and within 365 days of the DOS. Appealed claims that were originally denied with EOB 00260, which indicates that the provider files with a TPR, must be received within 95 days of the date of disposition by the TPR or within 120 days of the date on which TMHP denied the claim.
- The provider must appeal the claim to TMHP with complete other insurance information, which includes all EOBs and disposition dates. The disposition date is the date on which the other insurance company processed the payment or denial.
- If a provider submits other insurance EOBs without disposition dates, the appeal will be denied. If the other insurance disposition date appears only on the first page of an EOB that has multiple pages and the claim that is being submitted to TMHP is on a subsequent page or pages, the provider must submit the first page that shows the disposition date and all of the pages that show the claim that is being submitted to TMHP.
- If more than 110 days have passed from the date a claim was filed to the TPR without a response, the claim is submitted to TMHP for consideration of payment.

**Referto:** Subsection 6.12.2.3, “Crossover Paper Claims Filing Deadlines” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for information about filing deadlines for clients with other insurance.

## 8.9 Other Insurance Appeals

To appeal a claim denial due to other insurance coverage, the provider must submit complete other insurance information including the disposition date. The disposition date indicates when the other insurance company processed the payment or denial. An appeal submitted without this information will be denied.

If submitting a paper appeal the provider must submit EOBs containing disposition dates. If the disposition date appears only on the first page of an EOB that has multiple pages and the claim that is being appealed is on a subsequent page, the provider must also include the first page of the EOB that shows the disposition date.

**Note:** *Claims denied for TPL/other insurance cannot be appealed through the TMHP Automated Inquiry System (AIS).*

## 8.10 Refunds Resulting from Other Insurance Payments

The TMHP Cash Reimbursement Unit is responsible for processing financial adjustments when overlapping payments by Medicaid and a TPR occur.

Providers can use the Texas Medicaid Refund Information Form to:

- Refund the overpayment by issuing a check to TMHP. Providers must submit the refund check to TMHP along with the Texas Medicaid Refund Information Form and all required information requested on the form.
- Request that the claim be reprocessed and the money recouped. The overpayment will be reduced from next weekly payment made after claims are processed.

**Referto:** The [Texas Medicaid Refund Information Form](#), which is available in the Forms section of the TMHP website at [www.tmhp.com](http://www.tmhp.com).

If the amount paid by the other insurance carrier is less than Medicaid's allowed amount, providers may bill TMHP for the difference. All claims must meet all timely filing deadlines.

Providers are prohibited from receiving payment from Medicaid and billing a TPR without refunding the Medicaid payment.

If within 12 months of the date of service a provider identifies that the client has other insurance and wants to submit a claim for payment to the other insurance company, the provider must refund any amounts previously paid by TMHP before submitting the claim to the other insurance.

If other insurance paid for the services submitted on the claim, the provider must submit the following to TMHP:

- The exact amount paid.
- The insurance company's name and address.
- The client's policy number and group number.

Providers are limited to the Medicaid allowed amount for the services. Providers are required to accept the TMHP paid amount as payment in full. If the provider fails to refund a payment to TMHP before submitting a claim to the other insurance, TMHP will recoup the entire other insurance payment.

In accordance with 1 TAC §§354.2321 [g] and 354.2322 [i], providers that do not follow TPR rules "may be referred for investigation and prosecution for violations of state or federal Medicaid or false claims laws." Providers should refer to the full text of these rules for a full description of payment requirements.

## 8.11 Contact Information

### TPL/Tort Telephone and Fax Communication

| Contact                     | General Inquiry Telephone number | Fax Number     |
|-----------------------------|----------------------------------|----------------|

## A.11 Written Communication With TMHP

All CMS-1500 forms (excluding ambulance, radiology/laboratory, immunization services, rural health, and mental health rehabilitation) sent to TMHP for the first time, as well as claims being resubmitted because they were initially denied as incomplete claims, must be sent to the following address:

Texas Medicaid & Healthcare Partnership  
Claims  
PO Box 200555  
Austin, TX 78720-0555

The post office box addresses must be used for the specific items listed in the following table:

| Correspondence                                                                                                                                                                                                              | Address                                                                                                               |

## A.12 Other TMHP Information

### A.12.1 TMHP Website

The TMHP website at [www.tmhp.com](http://www.tmhp.com) is a valuable resource that provides:

- Provider education information and training.
- Publications, such as bulletins, banner messages, and provider manuals.
- A TMHP News section with announcements of program changes and other important information.
- Real-time and static fee schedules.
- Online provider enrollment.
- Complete instructions for setting up a Provider Administrator account and the use of online claims status inquiries (CSI), eligibility verification, and Electronic Remittance and Status (ER&S) Reports.
- A chatbot for frequently asked questions and a live chat to speak with an agent.

Additional advanced features are available for those providers who create an account. All enrolled providers are eligible for this free account. Once an account is activated, providers will have access to:

- Texas Medicaid enrollment information.
- CSIs.
- Eligibility verification.
- ER&S Report download option.
- Claims submission.
- Claims appeals.
- Online provider lookup.
- Online fee lookup (OFL) to obtain real-time fee information for an individual or a range of procedure codes. Benefits and limitations for certain services and history up to 2-years is also available.
- Payment amounts search, view, and print capabilities.
- Notification of an invalid address on file for a provider's National Provider Identifier (NPI).
- Notification of pending payments because of inaccurate or incomplete provider information.

- Manage hospital admission and discharge information on clients residing in an institution for mental diseases (IMD)

**Important:** *Natural disasters, such as floods or hurricanes, can impact the delivery of health care to Texas Medicaid clients. When disaster strikes, providers should monitor the TMHP website for special instructions.*

New services are always being added to the website. Please visit [www.tmhp.com](http://www.tmhp.com) for the latest information on TMHP online services.

### **A.12.2 TMHP Contact Center**

The TMHP Contact Center is available from 7 a.m. to 7 p.m., Central Time, Monday through Friday.

The TMHP Contact Center assists with questions such as:

- Provider enrollment procedures
- Claims filing procedures
- Policy information

The TMHP Contact Center is available to assist providers and clients. Please review the telephone and fax communication guides in this section for a list of contact telephone and fax numbers.

Provider calls, including those that were previously made to the Provider Relations territory representatives, are now handled first by the Contact Center. The Contact Center is well equipped to handle most inquiries about benefits and claims.

If the Contact Center representative determines that an inquiry can best be handled by the TMHP Provider Relations department, the inquiry will be forwarded to Provider Relations. For example, providers who want to talk to their Provider Relations representative about a visit, in-service, or training, can call the Contact Center, and the Contact Center will forward the request to Provider Relations.

Resolution of more complex issues that are referred to Provider Relations for further analysis can take up to 30 days from the date of the referral. For these issues, Provider Relations will contact the provider by telephone or e-mail when the issue has been resolved.

For questions or information about Medicaid eligibility, clients are referred to their caseworker or the local HHSC office.

### **A.12.3 Automated Inquiry System (AIS)**

AIS provides the following information and services through the use of a touch-tone telephone:

- Claim status
- Patient eligibility
- Benefit limitations

Eligibility and claim status information is available on AIS 23 hours a day, 7 days a week, with scheduled down time between 3 a.m. and 4 a.m., Central Time. All other AIS information is available from 7 a.m. until 7 p.m., Central Time, Monday through Friday. AIS offers 15 transactions per call.

### **A.12.4 TMHP Provider Relations**

The TMHP Provider Relations Department comprises a staff of Austin- and field-based provider relations representatives whose goal is to serve the health-care community by furnishing a variety of services and activities designed to inform and educate health-care providers about Texas Medicaid activities and claim submission procedures.

Provider Relations activities include the following:

- *Provider education through planned events.* Provider Relations representatives conduct a planned program of educational workshops, in-services, webinars, computer-based training (CBT), and other training sessions designed to keep all actively-enrolled providers informed of the latest policies, claim processing procedures, and federal and state regulations affecting Texas Medicaid. Details of all available provider training can be found in the [Provider Education section](#) of the TMHP website at [www.tmhp.com](http://www.tmhp.com).
- *Problem identification and resolution.* A staff of research coordinators is available to assist providers with clarification of Medicaid policies and assist with in-depth problem claim submission issues after initial inquiries are made with the TMHP Contact Center. Coordinators work closely with field-based regional representatives to coordinate the educational needs of the community.
- *Relationship with professional health-care organizations.* To ensure that Texas associations that represent health-care professions have up-to-date information about the requirements for participation in Texas Medicaid, the Provider Relations Department maintains a work relationship with these organizations. Also, the Provider Relations Department participates in several events sponsored by Texas health-care associations, such as conventions and conferences.

Call the TMHP Contact Center at 1-800-925-9126 for assistance.

### **A.12.5 Reporting a Complaint to TMHP**

Providers can report complaints by calling the TMHP Contact Center at 1-800-925-9126 or by submitting a written complaint to:

TMHP  
Complaints Resolution Department  
PO Box 2014270  
Austin, TX 778720-4270

A complaint is defined as any dissatisfaction concerning any aspect of Texas Medicaid. The term “complaint” does not include a misunderstanding or a problem with misinformation that is resolved promptly by clearing up the misunderstanding or supplying the appropriate information to the provider’s satisfaction.

Providers should submit the following information when reporting the complaint:

- Point of contact name and phone number or email address
- Provider name
- Provider NPI, if available
- Description of the complaint situation
- Client name
- Client PCN
- Date of service

### **A.12.6 TMHP Electronic Data Interchange (EDI) Help Desk**

The TMHP EDI Help Desk assists Medicaid providers with EDI transactions. The TMHP EDI Help Desk is available at 1-888-863-3638 from 7 a.m. to 7 p.m., Central Time, Monday through Friday.

TMHP EDI Help Desk activities and responsibilities include, but are not limited to, the following:

- Enrolling providers for electronic billing
- Qualifying vendors for TMHP EDI production through testing

- Diagnosing claim transmission problems through research
- Consulting with provider billing personnel, billing services, and software vendors regarding TMHP EDI

TMHP EDI Help Desk staff assists with questions about TMHP EDI, TexMedConnect, and electronic transmissions at 1-888-863-3638.

Providers who employ hardware or software vendors should contact those vendors for the resolution of technical problems.

## B.1 CDC Revised Recommendations for HIV Testing of Adults, Adolescents, and Pregnant Women in Health-Care Settings

The revised Centers for Disease Control and Prevention (CDC) recommendations advocate routine voluntary human immunodeficiency virus (HIV) screening as a normal part of medical practice, similar to screening for other treatable conditions. Screening is a basic public health tool used to identify unrecognized health conditions so treatment can be offered before symptoms develop and, for communicable diseases, so interventions can be implemented to reduce the likelihood of continued transmission. HIV screening should be offered as an opt-out test in accordance with CDC testing guidelines, which may be viewed at [www.cdc.gov/mmwr/preview/mmwrhtml/rr5514a1.htm](http://www.cdc.gov/mmwr/preview/mmwrhtml/rr5514a1.htm).

### B.1.1 Routine HIV Testing Procedure Codes

The following table lists the procedure codes for routine HIV testing and the corresponding modifiers that must be submitted for rapid testing. Routine HIV testing is covered as a preventative or screening benefit. Medical necessity is not required.

| Procedure Code | Rapid Test Modifier |
|----------------|---------------------|
| 86689          |                     |
| 86701          | 92                  |
| 86702          | 92                  |
| 86703          | 92                  |
| 87389          | 92                  |
| 87390          |                     |
| 87534          |                     |
| 87535          |                     |
| 87536          |                     |
| 99211          |                     |
| 99212          |                     |
| 99213          |                     |

| 99215          |                     |
| 99385          |                     |
| 99386          |                     |
| 99395          |                     |
| 99396          |                     |

## B.2 Model Workplace Guidelines for Businesses, State Agencies, and State Contractors

### B.2.1 Purpose

The purpose of this policy is to protect the employment rights and privileges of individuals infected with HIV and acquired immunodeficiency syndrome (AIDS) through compliance with federal, state, and local laws. This policy will provide Texas employers, especially state agencies, with a uniform approach to developing policies and education programs that address HIV/AIDS in the workplace. The Department of State Health Services (DSHS) encourages all employers to establish workplace policies

concerning persons with HIV/AIDS. Employers can adapt this model to fit the particular needs of their organization, work force, and clients; however, the content and intent must remain consistent with this document and the Health and Safety Code (HSC).

### **B.2.2 Authority**

Governance for this policy is found in Vernon's Texas Codes Annotated, HSC §85.010, "Educational Course for Employees and Clients of Health Care Facilities"; §85.111, "Education of State Employees"; §85.112, "Workplace Guidelines"; and §85.113, "Workplace Guidelines for State Contractors."

The model workplace guidelines, developed by the DSHS HIV/Sexually Transmitted Disease (STD) Comprehensive Services Branch, as required by HSC §85.012, "Model Workplace Guidelines," and adopted as HIV/STD Policy No. 090.021, are considered the minimum standards for the development of guidelines for state agencies. This policy also serves as the minimum standard for contractors of certain designated state agencies and organizations funded by those state agencies (HSC §85.113).

*Referto:* Subsection B.2.7, "State Agencies Listed Under Health and Safety Code (HSC) §85.113" in this section.

These guidelines are also the standard for health-care facilities licensed by DSHS and the Texas Health and Human Services Commission (HHSC) as stated in HSC §85.010, "Educational Course for Employees and Clients of Health Care Facilities."

### **B.2.3 Who Must Use Workplace Guidelines**

#### **B.2.3.1 State Agencies**

State law requires that each state agency adopt and carry out workplace guidelines. The agency's workplace guidelines should incorporate, at a minimum, the DSHS model workplace guidelines in this policy.

#### **B.2.3.2 State Contractors**

A program that involves direct client contact and that contracts with or is funded by any of the state agencies listed in subsection B.2.7, "State Agencies Listed Under Health and Safety Code (HSC) §85.113" in this section will adopt and carry out workplace guidelines as stated in HSC §85.113.

### **B.2.4 Why Have Guidelines**

Employers should develop and carry out policies and education programs concerning potentially limiting medical conditions before a crisis arises. Such policies and education programs help reduce employees' fears and misconceptions about HIV/AIDS and help to:

- Provide current and accurate scientific evidence that people with HIV infection do not pose a risk of transmitting the virus to coworkers through ordinary workplace contact.
- Provide workers with current information about HIV risk reduction for employees and their families.
- Avoid conflict between the infected employee and the employer regarding discrimination or other employment issues.
- Prevent work disruption and rejection of the infected employee by coworkers.
- Inform employees that they have rights regarding work continuation, confidentiality of medical and insurance records, and general health and safety.
- Provide specific and ongoing education and equipment to employees in health-care settings who are at risk of exposure to HIV, and to assure that appropriate infection-control procedures are used.
- Reduce the financial impact, legal implications, and other possible effects of HIV/AIDS in the workplace.

### B.2.5 Development of Workplace Policy Content

Individuals infected with HIV have the same rights and opportunities as other individuals. While some employers prefer a policy specific to HIV/AIDS and its unique issues, others prefer a general policy concerning illnesses and disabilities. A general policy should address HIV/AIDS in the same way as other major illnesses. Use of the following statements in agency policy is encouraged:

- Use of a person's HIV status to decide employment status, service delivery, or to deny services to HIV-infected individuals is not acceptable. Employees who believe that they have been discriminated against because of HIV or AIDS should contact the personnel office to discuss the matter, or initiate action through the agency's grievance procedure. Other legal options may also be available.
- This policy is consistent with current information from public health authorities, such as the CDC of the U.S. Public Health Service, and with state and federal laws and regulations.

While the approach and resolution of each employee's situation may vary, similar issues may arise. A workplace policy should address the following issues about HIV/AIDS and other life-threatening illnesses or disabilities:

- *Discrimination.* The Americans with Disabilities Act of 1990 prohibits discrimination against people with disabilities, which includes HIV and AIDS, in employment, public accommodations, public transportation, and other situations.  
A specific policy statement that no one will be denied employment or employment opportunities because of a disability, satisfies the employer and employee's need to address discrimination. Such a statement might be, "This agency complies with the Americans with Disabilities Act protections of all people with disabilities against discrimination in job application procedures, hiring, promotions, discharge, compensation, job training, and other terms or conditions of employment." Managers may want to define ways in which they will deal with discriminatory actions.
- *Desire and Ability to Work.* A workplace policy should address the infected employee's desire and need to work and the infected employee's value to the workplace. Such a statement reassures employees that the employer supports them.  
The health status of someone with HIV may vary from healthy to critically ill. In the work setting, the ultimate concern is whether or not the employee can satisfy job expectations. A policy statement may say, for example, "Procedures may be adapted to provide reasonable accommodation so that people with disabilities may remain employed and productive for as long as possible. All employees, however, are expected to perform the essential functions of their job with or without reasonable accommodation."
- *Performance Standards.* The Americans with Disabilities Act provides protections for disabled persons *qualified* to perform their jobs. And although an employer may be expected to provide reasonable accommodation to a disabled employee or applicant; employers may terminate employees and refuse to hire individuals who cannot perform the essential functions of the job, with or without the reasonable accommodation.  
One suggested statement is, "While the Americans with Disabilities Act does protect disabled employees from employment discrimination, all employees, those with and without disabilities, have the same performance and conduct standards regarding hiring, promotion, transfer, and dismissal."
- *Reasonable Accommodation.* The Americans with Disabilities Act requires employers to provide reasonable accommodations for employees with disabilities. Employers do not have an obligation to provide any accommodation that imposes an undue hardship on the employer. Specific questions about the issue of reasonable accommodation and undue hardship should be directed to staff responsible for coordinating the requirements of the Americans with Disabilities Act.  
Such a policy statement might read, "The following options may be considered for people with HIV/AIDS: possible assignment or reassignment of job duties, working at home, leaves of absence, and flexible work schedules."

- *Confidentiality and Privacy.* Organizations that receive funds from a state agency for residential or direct client services or programs shall develop and use confidentiality guidelines to protect their clients' HIV/AIDS-related medical information (HSC §85.115, "Confidentiality Guidelines"). Organizations that fail to adopt and use confidentiality guidelines are ineligible to receive state funds.

Employees are not required to reveal their HIV status to employers. All medical information that an HIV-infected employee provides to medical or management personnel is confidential and private. Employers may not reveal this information without the employee's knowledge and written consent, except as provided by law (HSC §81.103, "Confidentiality; Criminal Penalty").

A suggested policy statement might be, "This agency will protect the confidentiality of employee medical records and information. Written consent of the employee must be obtained to share any confidential information with other staff. Those with access to confidential information must maintain strict confidentiality and privacy, separating this information from employees' personnel records. Individuals who fail to protect these employee rights commit a serious offense, which may be cause for litigation resulting in both civil and criminal penalties, and may result in dismissal."

- *Coworker Concerns.* Employers need to be aware of the concerns that coworkers may have about an HIV-infected coworker. A policy statement that acknowledges employee concerns and offers HIV/AIDS education helps to increase awareness and decrease fear. Equally important is a policy statement that clarifies the limits of an employer's response to coworker concerns, e.g., "Employees do not have the right to refuse to work with someone who has any disability."
- *Employee Education.* Any health-care facility licensed by DSHS or HHSC must require its employees to complete an educational course about HIV infection (HSC §85.010). A suggested policy statement may be: "All employees will receive education about methods of transmission and prevention of HIV infection and related conditions." In response to HSC, §85.004, "Educational Programs," DSHS developed model education program guidelines. These are available from DSHS, HIV/STD Comprehensive Services Branch, 1100 W. 49th St., Austin, TX. 78756-3199, 1-512-533-3000. Employers may also find the CDC's educational kit, *Business Responds to AIDS*, useful in developing educational courses. HIV/AIDS education should address employee concerns about HIV communicability to themselves, their families, and coworkers. Experience shows that educated coworkers usually respond to persons with HIV/AIDS with support, rather than with fear and ostracism due to misconceptions.  
Education programs must stress that agency employees who provide direct client services may face occupational exposure to a client's blood, semen, vaginal secretions, or other body fluids that are considered to be high-risk for transmission of blood born pathogens, including HIV/AIDS. All individuals receiving direct services are clients and include individuals who are physically or mentally impaired and individuals confined to correctional or residential facilities. All state agencies should have, as part of their employee education program, comprehensive policies and protocols based on universal precautions, body substance isolation, and barrier methods. These precautions prevent the spread of infection in clinical settings. The employer's careful planning will reflect a commitment to the health and well-being of the work force and the community being served.
- *Assistance.* Some employers have designated benefits programs available to employees and family members with HIV infection. Such programs may:
  - Make referrals for testing, counseling, medical, and psychosocial services.
  - Provide HIV/AIDS workplace training for managerial staff.
  - Serve as a liaison between management and the employer's clinical and occupational health programs.
  - Provide counseling for employees who irrationally fear coworkers or clients.

Employers who have no employee assistance program may consider working with other organizations that provide assistance. Some of these groups include local health departments, AIDS services organizations, American Red Cross chapters, community support groups, clinical treatment and counseling services, and the religious community.

A suggested policy statement might be: “An employee who wants assistance concerning a disability or a life-threatening illness should contact the Personnel Office. This agency offers the following resources to help employees and managers deal with these issues: education and information concerning HIV/AIDS; confidential referral to supportive services for employees and dependents affected by life-threatening illnesses; and benefits consultation to help employees effectively manage health, leave, and other benefits.”

### **B.2.6 Where to Go for Help**

Employees may call 2-1-1 for HIV/STD testing locations in Texas. For questions related to issues such as transmission, signs and symptoms, or other concerns about HIV or other sexually transmitted infections, employees may call 1-800-CDC-INFO (English/Español) or 1-888-232-6348 (TTY).

### **B.2.7 State Agencies Listed Under Health and Safety Code (HSC) §85.113**

HSC §85.113, “Workplace Guidelines for State Contractors” states “An entity that contracts with or is funded by... to operate a program involving direct client contact shall adopt and implement workplace guidelines similar to the guidelines adopted by the agency that funds or contracts with the entity.”

H.B. 2292, 78th Leg., abolished 10 of the 12 existing health and human services agencies and transferred their powers and duties to three new state agencies and to HHSC, which rendered the state agency list found in HSC §85.113 obsolete. The following list reflects the state agency consolidation brought about by H.B. 2292 and identifies the state agencies to which HSC §85.113 applies.

- DSHS
- HHSC
- Texas Department of Criminal Justice
- Texas Juvenile Probation Commission
- Texas Youth Commission

## 1 General Information

The information in this handbook is intended for Texas Medicaid ambulance providers. The handbook provides information about Texas Medicaid's benefits, policies, and procedures applicable to emergency and nonemergency ambulance transports.

**Important:** *All providers are required to read and comply with “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, General Information). In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

**Referto:** “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, General Information) for more information about enrollment procedures.

*The Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks).*

Subsection 5.1.8, “Prior Authorization for Nonemergency Ambulance Transport” in “Section 5: Fee-for-Service Prior Authorizations” (Vol. 1, General Information) for more information about nonemergency ambulance transport.

## 2 Ambulance Services

### 2.1 Enrollment

To enroll in Texas Medicaid, ambulance providers must operate according to the laws, regulations, and guidelines governing ambulance services under Medicare Part B; equip and operate under the appropriate rules, licensing, and regulations of the state in which they operate; acquire a license from the Texas Department of State Health Services (DSHS) approving equipment and training levels of the crew; and enroll in Medicare.

A hospital-operated ambulance provider must be enrolled as an ambulance provider and submit claims using the ambulance NPI and taxonomy code, not the hospital NPI and taxonomy code.

**Referto:** Subsection 2.4.3, “Medicare and Medicaid Coverage” in this handbook.

**Note:** *Air ambulance providers are not required to enroll in Medicare.*

**Reminder:** *When ambulance providers enroll in Texas Medicaid, they accept Medicaid payment as payment in full. They cannot bill clients for Texas Medicaid-covered benefits.*

#### 2.1.1 Subscription Plans

The Texas Insurance Code does not apply to ambulance providers who finance, in part or in whole, an ambulance service by subscription plan. DSHS's license requirements do not permit providers of membership or subscription programs to enroll Medicaid clients. Emergency Medical Services (EMS) Subscription Programs are regulated by the DSHS-EMS Compliance Group. An EMS provider must have specific approval to operate a subscription program.

For more information, providers should contact the DSHS Office of EMS/Trauma Systems Coordination at 1-512-834-6700. A list of EMS office and contact information is available at <http://dshs.texas.gov/emstraumasystems/contact.shtm>.

## 2.2 Services, Benefits, Limitations, and Prior Authorization

Emergency and nonemergency ambulance transport services are a benefit of Texas Medicaid when the client meets the definition of emergency medical condition or meets the requirements for nonemergency transport.

Cardiopulmonary resuscitation (CPR) is included in ambulance transport when needed and is not a separately billable service. Claims for CPR during transport will be denied. If CPR is performed during a nonemergency transport, the advanced life support (ALS) procedure code must be billed.

Reimbursement for disposable supplies is separate from the established global fee for ambulance transports and is limited to one billable code per trip.

Providers must calculate the number of miles traveled by using the ambulance vehicle odometer reading or an Internet mapping tool. Mileage reported on the claim must be the actual number of miles traveled.

Procedure codes for ground ambulance transports (A0426, A0428, A0433, A0434, and A0999) must be submitted with mileage procedure code A0425. Emergency ground ambulance transports (procedure codes A0427 and A0429) may be billed without mileage code A0425 for Emergency Triage, Treat, and Transport (ET3) and Treatment in Place (TIP) services. Ambulance providers must include TIP destination modifier W in the destination position of the origin/destination modifier combination.

Medical necessity and coverage of ambulance services are not based solely on the presence of a specific diagnosis. Medicaid payment for ambulance transportation may be made only for those clients whose condition at the time of transport is such that ambulance transportation is medically necessary. For example, it is insufficient that a client merely has a diagnosis such as pneumonia, stroke, or fracture to justify ambulance transportation. In each of those instances, the condition of the client must be such that transportation by any other means is medically contraindicated. In the case of ambulance transportation, the condition necessitating transportation is often an accident or injury that has occurred giving rise to a clinical suspicion that a specific condition exists (for instance, fractures may be strongly suspected based on clinical examination and history of a specific injury).

It is the requesting provider's responsibility to supply the contractor with information describing the condition of the client that necessitated ambulance transportation. Medicaid recognizes the limitations of ambulance personnel in establishing a diagnosis, and recognizes therefore, that diagnosis coding of a client's condition using *International Classification of Diseases*, Tenth Revision, Clinical Modification (ICD-10-CM) codes when reporting ambulance services may be less specific than those reported by other professional providers. Providers who submit diagnosis codes must choose the code that best describes the client's condition at the time of transport. As a reminder to providers of ambulance services, "rule out" or "suspected" diagnoses must not be reported using specific ICD-10-CM codes. In such instances where a diagnosis is not confirmed, it is correct to use a symptom, finding, or injury code.

The ambulance provider may be sanctioned, including nonparticipation in the Medicaid Title XIX programs, for completing or signing a claim form that includes false or misleading representations of the client's condition or the medical necessity of the transport.

The inpatient hospital stay benefit includes medically necessary emergency and nonemergency ambulance transportation of the client during an inpatient hospital stay.

Ambulance transport during a client's inpatient stay will not be reimbursed to the ambulance provider. One-time ambulance transports that occur immediately after the client's discharge may be considered for reimbursement.

### **2.2.1 Emergency Ambulance Transport Services**

Emergency ambulance transport is covered in emergent situations in which specially equipped ambulance transportation is required to safely manage the client's medical condition. Emergency transportation may be initiated by an emergency response system 9-1-1 call, fire, police, or other locally established system for medical emergency calls. At the time of the call, emergency teams are required to respond; however, upon arrival on the scene, the services required at that time (based on field evaluation by the emergency team) may be determined to be:

- Emergent, or
- Non-emergent but medically necessary.

An emergency ambulance transport service is a benefit when the client has an emergency medical condition. An emergency medical condition is defined, according to 1 TAC §354.1111, as a medical condition (including emergency labor and delivery) manifesting itself by acute symptoms of sufficient severity (including severe pain, psychiatric disturbances, or symptoms of substance use) such that a prudent layperson with an average knowledge of health and medicine, could reasonably expect the absence of immediate medical attention to result in one of the following:

- Placing the client's health (or, with respect to a pregnant woman, the health of the woman or her unborn child) in serious jeopardy.
- Serious impairment to bodily functions.
- Serious dysfunction of any bodily organ or part.

An emergency behavioral health condition is defined as any condition that, in the opinion of a prudent layperson with an average knowledge of health and medicine, requires immediate intervention or medical attention regardless of the nature, without which the client would present an immediate danger to himself, or herself or others, or that renders the client incapable of controlling, knowing, or understanding the consequences of his or her actions.

Emergency transports are to be to the nearest medical facility that is equipped to provide medical care for the illness or injury of the client. An appropriate facility includes the equipment, personnel, and capability to provide the services necessary to support the required medical care.

Facility-to-facility transports may be considered an emergency if emergency treatment is not available at the first facility and the client still requires emergency care. When an emergency transport is made to a facility other than the nearest appropriate facility and the type of transport is medically necessary, reimbursement for mileage is limited to the amount that would be reimbursed to transport to an appropriate facility.

All other facility-to-facility transport is considered nonemergent and will require prior authorization.

Transports to out-of-locality providers (one-way transfers of 50 or more miles from the point of pickup to the point of destination) are covered if a local facility is not adequately equipped to treat the condition. Transports may be cut back to the closest appropriate facility.

When there are two responders to an emergency, the company that transports the client will be reimbursed for their services.

#### **2.2.1.1 Prior Authorization for Emergency Out-of-State Transport**

All emergency out-of-state (air, ground, and water) transports require authorization before the transport is considered for payment.

Prior authorization for emergency transport is required for out-of-state providers with the exception of those providers located within 200 miles of the Texas border.

**Referto:** Subsection 2.6, “Out-of-State Medicaid Providers” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for additional information on providers who are not considered out-of-state providers.

To initiate the prior authorization process, providers must call 1-800-540-0694.

Texas Medicaid & Healthcare Partnership (TMHP) is responsible for processing prior authorization requests for all Medicaid clients.

## **2.2.2 Emergency Triage, Treat, and Transport (ET3)**

Emergency Triage, Treat, and Transport (ET3) services are designed to allow greater flexibility for Medicaid-enrolled ambulance providers to address clients’ health-care needs following a 9-1-1 call, fire, police, or other locally established system for emergency calls. ET3 permits emergency transportation (ground ambulance) providers to:

- Transport a client to an alternative destination, other than an emergency department; or
- Initiate and facilitate appropriate treatment in place (TIP) at the scene; or
- Initiate and facilitate appropriate TIP through telemedicine or telehealth.

### **2.2.2.1 Transport to an Alternative Destination**

An ambulance provider may transport a client to an alternative destination (such as an urgent care clinic, mental health center, FQHC, etc.) when upon evaluation the following requirements apply:

- The client’s condition is determined to be non-emergent but requires medical attention.
- An alternative destination will meet the client’s level of care more appropriately than an emergency department.
- There is no other appropriate transportation available.

The alternative destination must be within or near the responding emergency transportation provider’s service area.

Prior to initiating ET3 transport to an alternative destination, the provider must have pre-established arrangements with alternative destination partners within their region, and have knowledge of the alternative destination’s:

- Hours of operation.
- Clinical staff available.
- Services provided.

HHSC expects ambulance providers to use best practices and exercise their normal standard of care to determine the nearest, most appropriate alternative destination for a client.

### **2.2.2.2 Treatment in Place (TIP)**

Upon the emergency response team’s arrival to the scene and their evaluation of the client, if the services required at that time are determined to be medically necessary but not emergent, ambulance staff may provide treatment to the client under the supervision of a physician, such as the medical director of the ambulance company, or under the supervision of a qualified health care professional, such as a physician assistant or advanced practice registered nurse contracted by the ambulance company. Ambulance staff must provide TIP in accordance with their emergency transport service’s medical direction and established protocols.

Treatment on scene may also be performed, when medically necessary, through a telemedicine or telehealth visit performed in accordance with telemedicine and telehealth services requirements outlined in the *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)*.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for telehealth and telemedicine services requirements.

### 2.2.3 Nonemergency Ambulance Transport Services

According to 1 TAC §354.1111, nonemergency transport is defined as a transport provided by an ambulance provider for a Medicaid recipient to or from a scheduled medical appointment, to or from another licensed facility for treatment, or to the recipient's home after discharge from a hospital. Non-emergency transport is appropriate when the Medicaid recipient's medical condition is such that the use of an ambulance is medically required, e.g., bed confinement, and alternate means of transport are medically contraindicated.

**Note:** *In this circumstance, contraindicated means that the client cannot be transported by any other means from the origin to the destination without endangering the individual's health.*

According to Human Resource Code (HRC) §32.024 (t), a Medicaid-enrolled physician, nursing facility, health-care provider, or other responsible party is required to obtain authorization before an ambulance is used to transport a client in circumstances not involving an emergency.

Providers requesting prior authorization must document whether the client is currently an inpatient in a hospital when requesting prior authorization. Prior authorization will not be approved if the provider indicates the client is currently an inpatient in a hospital, except for one-time transports immediately after the client's discharge from the hospital.

Prior authorization requests may be submitted to the TMHP Prior Authorization Department by mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

Medical necessity must be established through prior authorization for all nonemergency ambulance transports. Retrospective reviews may be performed to ensure that documentation supports the medical necessity of the transport.

Clients who do not meet medical necessity requirements for nonemergency ambulance transport may be able to receive transport through the Medical Transportation Program (MTP).

Transports must be limited to those situations where the transportation of the client is less costly than bringing the service to the client.

For nonemergency ambulance transportation services rendered to a client, ambulance providers may coordinate the nonemergency ambulance prior authorization request between the requesting provider, which may include a physician, nursing facility, healthcare provider, or other responsible party. Ambulance providers may assist in providing necessary information such as their National Provider Identifier (NPI) number, fax number, and business address to the requesting provider. However, the Non-emergency Ambulance Prior Authorization Request form must be signed, dated, and submitted by the Medicaid-enrolled requesting provider, not the ambulance provider.

**Referto:** Subsection 5.1.8, "Prior Authorization for Nonemergency Ambulance Transport" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*) for more information about nonemergency ambulance transport prior authorization requests and appeals.

The *Medical Transportation Program Handbook (Vol. 2, Provider Handbooks)* for more information about the Medical Transportation Program.

### 2.2.4 Levels of Service

Levels of services as defined by Texas Medicaid:

- Basic Life Support (BLS) is emergency care that uses noninvasive medical acts and, if allowed by licensing jurisdiction, may include the establishment of a peripheral intravenous (IV) line.

- Advanced Life Support (ALS) is emergency care that uses invasive medical acts. For Medicaid purposes only, ALS services are divided into two categories, Level 1 and Level 2.
  - Level 1 ALS includes an ALS assessment or at least an ALS intervention.
  - Level 2 ALS includes either of the following:
    - At least three separate administrations of one or more medications by intravenous push/bolus or by continuous infusion (excluding crystalloid fluids); or
    - At least one of the ALS 2 procedures: manual defibrillation/cardioversion; endotracheal intubation; central venous line; cardiac pacing; chest decompression; surgical airway; or intra-osseous line.

## **2.2.5 Oxygen**

Reimbursement for oxygen (procedure code A0422) is limited to one billable code per transport.

## **2.2.6 Types of Transport**

### **2.2.6.1 Multiple Client Transports**

Multiple client transports occur when more than one client with Medicaid coverage is transported simultaneously in the same vehicle. A claim for each client must be billed with the transport procedure code and the mileage procedure code with the GM modifier that indicates multiple client transport. Claims must include the names and Medicaid numbers of other Texas Medicaid clients who shared the transfer, or indicate “Not a Medicaid client” in Block 19 of the CMS 1500 paper form. Providers must enter charges on a separate claim for each client. TMHP adjusts the payment to 80 percent of the allowable base rate for each claim and divides mileage equally among the clients who share the ambulance.

**Referto:** Subsection 6.4, “Claims Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*).

### **2.2.6.2 Air or Water Specialized Emergency Medical Services Vehicle Transports**

Air ambulance transport services, by means of either fixed or rotary wing aircraft, and other specialized emergency medical services vehicles may be covered only if one of the following conditions exists:

- The client’s medical condition requires immediate and rapid ambulance transportation that could not have been provided by standard automotive ground ambulance.
- The point of client pick up is inaccessible by standard automotive ground vehicle.
- Great distances or other obstacles are involved in transporting the client to the nearest appropriate facility.

Claims for air ambulance transports procedure codes A0430 and A0431 must be submitted with the corresponding air mileage procedure code A0435 or A0436. Specialized emergency medical services vehicles (i.e., boat or airboat) must be billed using unlisted ambulance service (procedure code A0999).

### **2.2.6.3 Specialty Care Transport (SCT)**

SCT (procedure code A0434) is the interfacility transport of a critically injured or ill client by a ground ambulance vehicle, including the provision of medically necessary supplies and services, at a level of service beyond the scope of the emergency medical technician (EMT) or paramedic. SCT is necessary when a client’s condition requires ongoing care that must be furnished by one or more health professionals in an appropriate specialty area, for example, emergency or critical-care nursing, emergency medicine, respiratory care, cardiovascular care, or a paramedic with additional training.

#### **2.2.6.4 Transports for Pregnancies**

Transporting a pregnant woman may be covered as an emergency transfer if the client's condition is documented as an emergency situation at the time of transfer.

Claims documenting an emergency home delivery or delivery en route are considered emergency transfers. Premature labor and early onset of delivery (less than 37 weeks gestation) may also be considered an emergency. Active labor without more documentation of an emergency situation is not payable as an emergency transport.

If the pregnant client is transported in an ambulance for a nonemergency situation, all criteria for nonemergency prior authorization must be met.

#### **2.2.6.5 Transports to or from Prescribed Pediatric Extended Care Centers (PPECC)**

Nonemergency ambulance transports between a client's home and a PPECC are not covered.

#### **2.2.6.6 Transports to or from State Institutions**

Ambulance transports to or from a state-funded hospital for admission or following discharge are covered when nonemergency transfer criteria are met. Ambulance transfers of clients while they are inpatients of the institution are not covered. The institution is responsible for routine nonemergency transportation.

#### **2.2.6.7 Not Medically Necessary Transports**

Providers must use the GY modifier to submit claims for instances when the provider is aware no medical necessity existed. When billing for this type of transportation, ambulance providers must maintain a signed Client Acknowledgment Statement indicating that the client was aware, prior to service rendered, that the transport was not medically necessary. The Client Acknowledgment Statement is subject to retrospective review.

Claims submitted with a GY modifier indicating no medical necessity existed for transport will automatically deny and will not be suspended for additional documentation. The ambulance provider must maintain a waiver, signed by the client, indicating that the client was instructed prior to the transport that there was no medical necessity for the transport and that the client agreed to provide reimbursement for the services if reimbursement for the transport is denied by Texas Medicaid. A signed waiver from the client is subject to retrospective review.

**Referto:** Subsection 1.7.12.1, "Client Acknowledgment Statement" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*).

#### **2.2.6.8 Transports for Nursing Facility Residents**

Nursing facilities are responsible for providing or arranging transportation for their residents. Arranging transportation for Medicaid clients includes obtaining prior authorizations for nonemergency ambulance transports. The Non-emergency Ambulance Prior Authorization Request form must be filled out and submitted to TMHP by the facility or the physician's staff that is most familiar with the client's condition. The ambulance provider must not assist in completing or submitting any portion of this form.

Transports from a nursing facility to a hospital are covered if the client's condition meets emergency criteria.

A return trip to a nursing facility following an emergency transport is not considered routine; therefore, transport back to the facility must be requested by the discharging hospital. Nonemergency transport for the purpose of required diagnostic or treatment procedures that are not available in the nursing facility (such as dialysis treatments at a freestanding facility) is allowable only for clients whose medical condition is such that the use of an ambulance is the only appropriate means of transport (e.g., alternate means of transport are medically contraindicated).

The cost of routine nonemergency transportation is included in the nursing facility vendor rate. This nonemergency transport requires the nursing facility to request and obtain a Prior Authorization Number (PAN) from the TMHP Ambulance Unit before contacting the ambulance company for the transport.

Transports of nursing facility residents to outpatient departments or to physicians' offices for recertification or examinations for rehabilitative treatment (i.e., physical therapy) are not reimbursable ambulance services. The cost of such transportation is included in the nursing facility vendor rate.

Claims for services to nursing facility residents must indicate the medical diagnosis or problem requiring treatment, the medical necessity for use of an ambulance for the transport, and the type of treatment rendered at the destination (e.g., admission or X-ray).

If a client is returned by ambulance to a nursing facility following inpatient hospitalization, the acute condition requiring hospitalization must be noted on the ambulance claim form. This transport is considered for payment only if the client's medical condition is appropriate for transport by ambulance. This nonemergency transport requires the nursing facility to request and obtain a PAN from the TMHP Ambulance Unit before contacting the ambulance company for the transport.

Ambulance providers may bill a nursing facility or client for a nonemergency ambulance transport only under the following circumstances:

- *Providers may bill the nursing facility* when the nursing facility requests the nonemergency ambulance transport without a PAN.
- *Providers may bill the client* only when the client requests transport that is not an emergency and the client does not have a medical condition such that the use of an ambulance is the only appropriate means of transport (i.e., alternate means of transport are medically contraindicated). The provider must advise the client of acceptance as a private pay patient at the time the service is provided, and the client is responsible for payment of all services. Providers are encouraged to have the client sign the Private Pay Agreement.

Providers may refer questions about a nursing facility's responsibility for payment of a transport to the TMHP Contact Center at 1-800-925-9126 or TMHP provider relations representatives.

### 2.2.6.9 Emergency Transports Involving a Hospital

Hospital-to-hospital transports that meet the definition of an emergency transport do not require prior authorization.

Providers must use modifier ET and one of the facility-to-facility transfer modifiers (HH, HI, or IH) on each procedure code listed on the claim.

| Modifier | Transport Type                    |
|----------|-----------------------------------|
| HH       | From hospital to hospital         |
| HI       | From hospital to site of transfer |
| IH       | From site of transfer to hospital |

### 2.2.6.10 No Transport

Texas Medicaid reimburses ambulance providers for ground emergency transports (procedure codes A0427 and A0429) that do not result in a transport to a facility only as part of ET3 services when the destination modifier is W, indicating TIP is included on the claim. For all other transports, if a client contacts an ambulance provider, but the call does not result in a transport, the provider should have the client sign an acknowledgment statement and may bill the client for services rendered.

Texas Medicaid will not reimburse for the return trip of an empty ambulance. Texas Medicaid will not reimburse air or ground mileage when the client is not on board the ambulance.

## 2.3 Documentation Requirements

The requesting provider, which may include a physician, nursing facility, health-care provider, or other responsible party, is required to maintain the supporting documentation, physician's orders, the Non-emergency Ambulance Prior Authorization Request form and if applicable, the Non-emergency Ambulance Exception form.

The requesting provider (i.e., physician, nursing facility, healthcare provider, or other responsible party) must contact the transporting ambulance provider with the PAN and the dates of service that were approved. The transporting ambulance provider will submit claims for the nonemergency ambulance transportation services, using the approved PAN provided by the requesting provider.

An ambulance provider is required to maintain documentation that represents the client's medical condition and other clinical information to substantiate medical necessity, the level of service, and the mode of transportation requested. This supporting documentation is limited to documents developed or maintained by the ambulance provider.

When physical restraints are needed, documentation must include, but is not limited to, the following:

- Type of restraint
- Time frame of the use of the restraint
- Client's condition

**Note:** *The standard straps used in an ambulance transport are not considered a restraint.*

Physicians, nursing facilities, health-care providers, or other responsible parties are required to maintain physician orders related to requests for prior authorization of nonemergency and out-of-state ambulance services. These providers must also maintain documentation of medical necessity for the ambulance transport.

In hospital-to-hospital transports or hospital-to-outpatient medical facility transports, the TMHP Ambulance Unit considers information by telephone from the transferring hospital. Providers are not required to fax medical documentation to TMHP; however, in certain circumstances, TMHP may request that the transferring hospital fax the supporting documentation. Hospitals are allowed to release a client's protected health information (PHI) to a transporting emergency medical services provider for treatment, payment, and health-care operations.

Providers must document whether the client is currently an inpatient in a hospital when requesting prior authorization. Prior authorization will not be approved if the provider indicates the client is currently an inpatient in a hospital, except for one-time transports immediately after the client's discharge from the hospital.

The hospital must maintain documentation of medical necessity, including a copy of the authorization from TMHP in the client's medical record for any item or service that requires prior authorization. The services provided must be clearly documented in the medical record with all pertinent information regarding the client's condition to substantiate the need and medical necessity for the services.

### 2.3.1 Medicaid Surety Bond Requirements

Ambulance providers attempting to renew their Emergency Medical Services (EMS) license must submit a surety bond to TMHP for each license they are attempting to renew. A copy of the surety bond must also be attached to an application for renewal of an EMS license when submitted to DSHS.

**Referto:** Subsection 1.1.6, "Surety Bond Enrollment Requirement" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*) for more information.

## 2.4 Claims Filing and Reimbursement

### 2.4.1 Claims Information

Emergency and nonemergency claims may be billed electronically. For electronic billers, the hospital's NPI must be entered in the Facility ID field. Providers should consult their software vendor for the location of this field on the electronic claim form.

The Healthcare Common Procedure Coding System (HCPCS)/Current Procedural Terminology (CPT) codes included in policy are subject to National Correct Coding Initiative (NCCI) relationships. Exceptions to NCCI code relationships that may be noted in the Texas Medicaid medical policy are no longer valid.

The CMS NCCI and MUE guidelines can be found in the [NCCI web page](#), which are available on the CMS website. Providers should refer to the CMS NCCI web page for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid medical policy quantity limitations are more restrictive than NCCI Medically Unlikely Edits (MUE) guidance, medical policy prevails.

### 2.4.2 Reimbursement

Ground and air ambulance providers are reimbursed based on the lesser of a provider's billed charges or the maximum fee established by the Texas Health and Human Services Commission (HHSC) in accordance with 1 TAC §355.8600. Providers can refer to the [Online Fee Lookup \(OFL\)](#) or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

**Referto:** Subsection 2.2, "Fee-for-Service Reimbursement Methodology" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for more information about reimbursement methodologies.

Subsection 1.11, "Texas Medicaid Limitations and Exclusions" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*) for information on Medicaid exclusions.

#### 2.4.2.1 Ambulance Disposable Supplies

Ambulance disposable supplies are included in the global fee for specialty care transport and must not be billed separately.

Reimbursement for BLS or ALS disposable supplies (procedure codes A0382 and A0398 respectively) is separate from the established fee for ALS and BLS ambulance transports and is limited to one billable procedure code per transport.

Claims submitted for BLS supplies (procedure code A0382) will be denied unless a corresponding BLS transport is billed on the same claim.

Claims for ALS supplies (procedure code A0398) will be denied unless a corresponding ALS transport is billed on the same claim.

Equipment and nondisposable supplies are included in the base rate. These items are not separately reimbursable and are considered part of another procedure. Therefore, equipment and supplies cannot be billed to the client.

#### 2.4.2.2 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission

The three-day and one-day payment window reimbursement guidelines do not apply for ambulance services.

**Referto:** Subsection 3.7.4.17, “Payment Window Reimbursement Guidelines” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for additional information about the payment window reimbursement guidelines.

### 2.4.3 Medicare and Medicaid Coverage

All ambulance claims are exempt from Medicare equalization, which pays the lesser of the coinsurance and deductible or the remainder of the amount that Medicaid would have paid for the same service minus what Medicare has already paid on Medicare crossover claims.

Ambulance providers can include copayment amounts as coinsurance for non-contracted Medicare Part C clients on dual eligible claims submitted to TMHP. Providers do not have to bill Medicare copay procedure codes to TMHP for ambulance services.

All claims for ambulance services provided to dual-eligible clients are reimbursed the full amount of the Medicare coinsurance and deductible for Part B claims and Part C claims from non-contracted Medicare Advantage Plans.

Medicaid prior authorization is not required for ambulance services for Qualified Medicare Beneficiary (QMB) clients because QMB clients are not eligible for Medicaid benefits. Providers can contact Medicare for the Medicare prior authorization guidelines.

Medicaid Qualified Medicare Beneficiary (MQMB) clients are eligible for all Medicaid benefits; therefore, the provider should simultaneously request prior authorization for the nonemergency transport from TMHP for the MQMB client in the event the service requested is denied by Medicare as a non-covered service.

**Referto:** Subsection 4.9, “Medicare and Medicaid Dual Eligibility” in “Section 4: Client Eligibility” (*Vol. 1, General Information*).

Subsection 2.7, “Medicare Crossover Claim Reimbursement” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for additional information about Medicare coinsurance and deductible payments and exceptions.

#### 2.4.3.1 Medicare Services Paid

Assigned claims filed with and paid by Medicare should automatically transfer to TMHP for payment of the deductible and coinsurance liability. According to current guidelines, providers must submit Medicare-paid claims that do not cross over to TMHP for the coinsurance and deductible. Providers must send the Medicare Remittance Advice Notice (MRAN) with the client information circled in black ink.

#### 2.4.3.2 Medicare Services Denied

A Medicare ambulance claim that has been denied must go through the appropriate Medicare claim appeals process with a decision by the administrative law judge before TMHP will process the ambulance claim. MQMB ambulance claims that have exhausted the Medicare third level of appeal by the administrative law judge (ALJ) must be submitted to TMHP with the disposition letter from the ALJ along with all other required documents for an appeal.

An assigned claim that was denied by Medicare because the client has no Part B benefits or because the transport destination is not allowed can be submitted to TMHP for consideration. Providers must send claims to TMHP on a CMS-1500 paper claim form with the ambulance NPI and taxonomy code, unless they are a hospital-based provider. Hospital-based ambulance providers must send Medicare denied claims to TMHP on a CMS-1500 paper claim form with the ambulance NPI and taxonomy code and a copy of the MRAN.

**Note:** All claims for STAR+PLUS clients with Medicare and Medicaid must follow the same requirements used for obtaining prior authorization for Medicaid-only services from TMHP. The STAR+PLUS HMO is not responsible for reimbursement of these services.

## 2.4.4 Ambulance Claims Coding

Providers must submit claims for emergency and ET3 transports with the ET modifier on each procedure code submitted. Any procedure code submitted on the claim for emergency and ET3 transports without the ET modifier will be subject to prior authorization requirements.

### 2.4.4.1 Place of Service Codes

The place of service (POS) for all ambulance transports is considered the destination.

POS codes 41 and 42 (other) are national POS codes that are accepted by Texas Medicaid only for electronic claims. POS code 9 is accepted by Texas Medicaid for ambulance claims submitted on paper.

### 2.4.4.2 Origin and Destination Codes

All claims submitted on paper or electronically must include the two-character origin and destination codes for every claim line. The origin is the first character, and the destination is the second character.

The following are the origin and destination codes accepted by Texas Medicaid:

| Origin and Destination Code | Description                                                                                             |
|-----------------------------|---------------------------------------------------------------------------------------------------------|
| D                           | Diagnostic or therapeutic site/freestanding facility (e.g., radiation therapy center) other than P or H |
| E                           | Residential/domiciliary/custodial facility (e.g., nonskilled facility)                                  |
| G                           | Hospital-based dialysis facility (hospital or hospital-related)                                         |
| H                           | Hospital (e.g., inpatient or outpatient)                                                                |
| I                           | Site of transfer (e.g., airport or helicopter pad) between modes of ambulance transport                 |
| J                           | Non-hospital-based dialysis facility                                                                    |
| N                           | Skilled Nursing Facility (SNF) (swingbed is considered an SNF)                                          |
| P                           | Physician's office                                                                                      |
| R                           | Residence (client's home or any residence)                                                              |
| S                           | Scene of accident or acute event                                                                        |
| X                           | Intermediate stop at physician's office in route to the hospital (destination code only)                |

The following are the ET3 Alternative Destinations and Treatment in Place Codes codes accepted by Texas Medicaid:

| Destination | Description                                                              |
|-------------|--------------------------------------------------------------------------|
| C           | Community Mental Health Center (including Substance Use Disorder Center) |
| F           | Federally Qualified Health Center                                        |
| O           | Physician's office                                                       |
| U           | Urgent care facility                                                     |
| W           | Treatment in Place (in person or via telehealth)                         |

Nonemergency claims filed electronically must include the PAN in the appropriate field. For nonemergency hospital-to-hospital transfers, indicate the services required from the second facility and unavailable at the first facility in Block 19 of the CMS-1500 paper claim form. If the destination is a hospital, enter the name and address and the NPI of the facility in Block 32.

For nonemergency transports, ambulance providers must enter the ICD-10-CM diagnosis code to the highest level of specificity available for each diagnosis observed in Block 21 of the claim form.

**Reminder:** Providers must submit multiple transports for the same client on the same date of service through one claim submission. Additional claims information can be found within individual topics in this section.

Providers should consult their software vendor for the location of the field on the electronic claim form. Providers must submit ambulance services to TMHP on a CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from a vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as TMHP does not key information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (Vol. 1, General Information) for information on electronic claims submissions.

“Section 6: Claims Filing” (Vol. 1, General Information) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (Vol. 1, General Information). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

## 2.4.5 Air or Specialized Vehicle Transports

Procedure codes A0430 and A0435, or A0431 and A0436 are used to bill air transport. Procedure code A0999 is used to bill for specialized vehicle transports (i.e., boat and airboat). Transport claims may be submitted electronically with a short description of the client’s physical condition in the comment field. If the client’s condition cannot be documented, providers must file a paper claim with supporting documentation.

**Referto:** Subsection 2.2.6.2, “Air or Water Specialized Emergency Medical Services Vehicle Transports” in this handbook for more information about how to meet the specific criteria for reimbursement consideration for air or specialized transport claims.

## 2.4.6 Emergency Transport Billing

Emergency transport is a benefit when billed with the ET modifier and the most appropriate emergency medical condition codes. The ET modifier is required for every detail on an emergency transport claim, but is not required to be listed in the first position on the claim line.

The following procedure codes are for emergency transport:

| Procedure Codes                                                                        |       |       |       |        |       |       |       |       |       |
|----------------------------------------------------------------------------------------|-------|-------|-------|--------|-------|-------|-------|-------|-------|
| A0382                                                                                  | A0398 | A0422 | A0424 | A0425* | A0427 | A0429 | A0430 | A0431 | A0433 |
| A0434                                                                                  | A0435 | A0436 | A0999 | G2022  | Q3014 |       |       |       |       |
| *A0425 is denied if it is billed without procedure code A0427, A0429, A0433, or A0434. |       |       |       |        |       |       |       |       |       |

One of the following emergency medical condition code is required on all emergency ambulance claims and must be listed in Box 21 of the CMS-1500 claim form:

| Emergency Medical Condition Codes |        |        |       |       |       |       |      |
|-----------------------------------|--------|--------|-------|-------|-------|-------|------|
| B9689                             | B999   | D75A   | D8130 | D8131 | D8132 | D8139 | E869 |
| F068                              | F10929 | F19939 | F29   | G4489 | G8929 | H579  | H814 |
| I2693                             | I2694  | I4811  | I4819 | I4820 | I4821 | I469  | I499 |

| Emergency Medical Condition Codes |         |         |         |         |         |         |         |
|-----------------------------------|---------|---------|---------|---------|---------|---------|---------|
| I80241                            | I80242  | I80243  | I80249  | I80251  | I80252  | I80253  | I80259  |
| I82451                            | I82452  | I82453  | I82459  | I82461  | I82462  | I82463  | I82469  |
| J9600                             | J984    | M549    | O2690   | Q7960   | Q7961   | Q7962   | Q7963   |
| Q7969                             | R002    | R0602   | R0603   | R0689   | R079    | R092    | R0989   |
| R100                              | R109    | R238    | R4182   | R4189   | R4589   | R509    | R52     |
| R55                               | R569    | R58     | R6889   | R7309   | S02121A | S02121B | S02121S |

| Y35319A                           | Y35319S | Y35399A | Y35399S | Y35409A | Y35409S | Y35419A | Y35419S |
| Y35499A                           | Y35499S | Y35819A | Y35819S | Y35831A | Y35831S | Y35832A | Y35832S |
| Y35833A                           | Y35833S | Y35839A | Y35839S | Y3599XA | Y3599XS | Y710    | Y828    |
| Z209                              | Z7401   | Z779    | Z9181   | Z9981   | Z9989   |         |         |

While ICD-10-CM codes are not precluded from use on ambulance claims, they are currently not required (per the Health Insurance Portability and Accountability Act [HIPAA] of 1996) on most ambulance claims and the use of these codes generally does not trigger a payment or a denial of a claim.

Claims for emergency transports that are denied for not meeting the emergency criteria will be considered on appeal with additional documentation to support the emergency nature of the transport. Claims that have denied for not meeting emergency transport criteria cannot be appealed for reimbursement as a nonemergency claim.

**Referto:** Subsection 2.2.1, “Emergency Ambulance Transport Services” in this handbook.

## 2.4.7 Emergency Triage Services Billing

To bill for ET3 services, a provider must:

- Be enrolled in Texas-Medicaid as an ambulance provider.
- Be responding to a call initiated by an emergency response system (9-1-1 call, fire, police, or other locally established system for medical emergency calls).
- Upon arrival at the scene, the emergency team’s field evaluation determines the client’s needs are non-emergent but require medical attention.
- Follow all requirements as outlined in section 2.2, Services, Benefits, Limitations, and Prior Authorization.

### 2.4.7.1 Transport to an Alternative Destination Billing

For transport to an alternative destination reimbursement, providers must bill using the most clinically appropriate emergency transport code (A0427 or A0429), the ET modifier, and the appropriate destination modifier. Providers may also include the mileage code (A0425) in the claim as appropriate.

**Note:** *If an emergency transportation provider transports a client to an alternative destination and determines at the time that the site is either closed, or unable to provide the needed level of care, then the emergency transportation provider shall transport the client to the nearest emergency department. In these cases, the provider may not bill for two transports.*

### 2.4.7.2 Treatment in Place Billing

Treatment in place (TIP) is classified as an emergency transportation service and must be billed using the most clinically appropriate emergency transport code (A0427 or A0429), the ET modifier, and the W destination modifier to indicate TIP.

Claims must include TIP destination modifier W in the destination position of the origin/destination modifier combination. TIP claims without modifier W in the emergency indicator field will be denied.

The medical services provided under the supervision of a physician, such as the medical director of the ambulance company or a health care professional, must be billed separately with the appropriate codes by the physician or health care professional who provides supervision of care on the scene. Ambulance providers may only bill for initiating or facilitating TIP using the corresponding emergency ground transport code (A0427 or A0429).

Supplies (procedure codes A0382 and A0398) and oxygen (procedure code A0422) are payable, but mileage (procedure code A0425) and other ambulance transportation services are not payable for TIP services. Claims billed with non-payable ambulance TIP services will be denied.

The following are valid Treatment in Place Ambulance Claim Origin/Destination Modifiers:

| Codes | Origination Site                                                                                            | Destination |
|-------|-------------------------------------------------------------------------------------------------------------|-------------|
| DW    | Diagnostic or therapeutic site, or freestanding facility (e.g., radiation therapy center) other than H or P | TIP         |
| EW    | Residential, domiciliary, or custodial facility (unskilled facility)                                        | TIP         |
| JW    | Nonhospital-based dialysis facility                                                                         | TIP         |
| PW    | Physician's office                                                                                          | TIP         |
| RW    | Residence (client's home or any residence)                                                                  | TIP         |
| SW    | Scene of accident or acute event                                                                            | TIP         |

If a client being treated in place has a real-time deterioration in the clinical condition necessitating immediate transport to an emergency department, the ambulance provider must not bill for both treatment in place ambulance service and the transport to the emergency room. In this case, the ambulance provider must bill only for the emergency department transport.

For informational purposes, ambulance providers may include procedure code G2022 on ambulance transportation claims to an emergency department that met ET3 requirements, but the client refused TIP or transportation to an alternative destination.

When billing for TIP via telemedicine or telehealth, providers must bill using the most clinically appropriate emergency transport code (A0427 or A0429), the ET modifier, the W destination modifier to indicate TIP, and procedure code Q3014. Procedure code Q3014 will be informational only and used by Medicaid to identify TIP through telemedicine or telehealth services.

Multiple TIP and transport claims rendered on the same date of service for the same client will suspend for review.

### 2.4.8 Nonemergency Transport Billing

The following procedure codes are used when billing for nonemergency ambulance services:

| Procedure Codes |       |       |       |       |        |       |       |       |       |
|-----------------|-------|-------|-------|-------|--------|-------|-------|-------|-------|
| A0382           | A0398 | A0420 | A0422 | A0424 | A0425* | A0426 | A0428 | A0430 | A0431 |
| A0433           | A0434 | A0435 | A0436 |       |        |       |       |       |       |

\*A0425 is denied if it is billed without procedure code A0426, A0428, A0433, or A0434.

### 2.4.9 Extra Attendant

The use of additional attendants (procedure code A0424) must be related to extraordinary circumstances when the basic crew is unable to transport the client safely.

An extra attendant must be certified by DSHS to provide emergency medical services.

Situations when an extra attendant may be required beyond the basic crew include, but are not limited to:

- Necessity of additional special medical equipment or treatment en route to destination (describe what special treatment and equipment is required and why it requires an attendant).
- Client behavior that may be a danger to self or ambulance crew or that requires, or may require, restraints.
- Extreme obesity of client (provide weight and client's functional limitations).
- The use of an extra attendant for air transport is not a benefit of Texas Medicaid. Claims submitted with procedure code A0424 will be denied if billed with air transports (procedure code A0430 or A0431).

#### 2.4.9.1 Emergency Transports

Emergency transports that use an extra attendant do not require prior authorization. Modifier ET must be billed with the extra attendant procedure code A0424.

The billing provider's medical documentation must clearly indicate the services the attendant performed along with rationale for the services to indicate the medical necessity of having the attendant. The billing provider must keep the information that supports medical necessity in the client's medical record, which will be subject to retrospective review.

When more than one client is transported at the same time in the same vehicle, the use of an extra attendant may be required when each client who is being transported requires medical attention or close monitoring.

#### 2.4.9.2 Nonemergency Transports

Prior authorization is required when an extra attendant is needed for any nonemergency transport. When a client's condition changes, such as a need for oxygen or an extra attendant for transport, the prior authorization request must be updated.

To receive prior authorization, the requesting provider must prove medical necessity and identify attendant services that could not be provided by the basic crew. The information supporting medical necessity must be kept in the requesting provider's medical record and is subject to retrospective review.

Texas Medicaid does not reimburse for an extra attendant based only on an ambulance provider's internal policy. Reimbursement for an extra attendant will be based on prior authorization requirements.

### 2.4.10 Night Call

Texas Medicaid does not reimburse an extra charge for a night call.

### 2.4.11 Waiting Time

Procedure code A0420 may be billed when it is the general billing practice of local ambulance companies to charge for unusual waiting time (longer than 30 minutes). Providers must use the following procedures:

- Separate charges must be billed for all clients, Medicaid and non-Medicaid, for unusual waiting time.
- The circumstances requiring waiting time and the exact time involved must be documented in Block 24 of the CMS-1500 paper claim form.
- The amount charged for waiting time must not exceed the charge for a one-way transfer.

**Important:** *Waiting time is reimbursed up to one hour.*

### 2.4.12 Appeals

Only a denial of prior authorization may be appealed. Clients may appeal prior authorization request denials by contacting TMHP Client Notification at 1-800-414-3406. The Non-emergency Ambulance Prior Authorization Request form is not considered to be documentation after the service has been rendered.

Claims denied due to an inappropriate emergency medical condition code may be resubmitted with the appropriate emergency medical condition code.

On appeal, supporting documentation is critical for determining the client's condition at the time of transport. Ambulance providers who file paper claims must include all information that supports the reason for the transport and attach a copy of the run sheet to the claim. The EMT who transported the client must sign the documentation.

**Referto:** Subsection 2.3, "Documentation Requirements" in this handbook.

Medicaid clients have the right to request a Fair Hearing within 90 days of the date of the denial action.

### 2.4.13 Relation of Service to Time of Death

Medicaid benefits cease at the time of the client's death. However, if the client dies in the ambulance while in route to the destination, Texas Medicaid covers the transport. If a physician pronounces a client dead after the ambulance is called, Texas Medicaid covers the ambulance service (base rate plus mileage) to the point of pick up. Providers must indicate the date and time the client died in Block 19 of the CMS-1500 paper claim form. If a physician or coroner pronounces the client dead before the ambulance is called, the service is not covered.

## 2.5 Claims Resources

Providers may refer to the following sections or forms when filing claims:

| Resource                                 | Location                                                                                                                                                     |
|------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Acronym Dictionary                       | "Appendix C: Acronym Dictionary" ( <i>Vol. 1, General Information</i> )                                                                                      |
| Automated Inquiry System (AIS)           | Subsection A.10, "TMHP Telephone and Fax Communication" in "Appendix A: State, Federal, and TMHP Contact Information" ( <i>Vol. 1, General Information</i> ) |
| CMS-1500 Paper Claim Filing Instructions | Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" ( <i>Vol. 1, General Information</i> )                              |

| Resource                                           | Location                                                                                          |
|----------------------------------------------------|---------------------------------------------------------------------------------------------------|
| State, federal, and TMHP contact information       | “Appendix A: State, Federal, and TMHP Contact Information” ( <i>Vol. 1, General Information</i> ) |
| TMHP Electronic Data Interchange (EDI) information | “Section 3: TMHP Electronic Data Interchange (EDI)” ( <i>Vol. 1, General Information</i> )        |

## 2.6 Contact TMHP

The TMHP Contact Center at 1-800-925-9126 is available Monday through Friday from 7 a.m. to 7 p.m., Central Time.

## 3 Forms

# 1 General Information

The information in this handbook is intended for the Case Management for the Blind Children's Vocational Discovery and Development Program (BCVDDP), Case Management for Children and Pregnant Women, and services provided by a licensed clinical social worker (LCSW), licensed marriage and family therapist (LMFT), licensed professional counselor (LPC), psychologist, physician, advanced practice registered nurse (APRN), physician assistant (PA), or providers of intellectual and developmental disability (IDD) case management, mental health targeted case management, and mental health rehabilitative services.

All providers are required to report suspected child abuse or neglect as outlined in subsection 1.7.1.2, "Reporting Child Abuse or Neglect" in "Section 1: Provider Enrollment and Responsibilities" (Vol. 1, General Information) and subsection 1.7.1.5, "Training" in "Section 1: Provider Enrollment and Responsibilities" (Vol. 1, General Information).

**Important:** All providers are required to read and comply with "Section 1: Provider Enrollment and Responsibilities" (Vol. 1, General Information). In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid eligible persons in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure to deliver, at all times, health-care items and services to Medicaid eligible persons in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.

**Referto:** "Section 1: Provider Enrollment and Responsibilities" (Vol. 1, General Information).

Section 1.1, "About the Vendor Drug Program" in the *Outpatient Drug Services Handbook* (Vol. 2, Provider Handbooks) for information about this program.

## 1.1 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission

According to the three-day and one-day payment window reimbursement guidelines, most professional and outpatient diagnostic and nondiagnostic services that are rendered within the designated timeframe of an inpatient hospital stay and are related to the inpatient hospital admission will not be reimbursed separately from the inpatient hospital stay if the services are rendered by the hospital or an entity that is wholly owned or operated by the hospital.

These reimbursement guidelines do not apply in the following circumstances:

- The professional services are rendered in the inpatient hospital setting.
- The hospital and the physician office or other entity are both owned by a third party, such as a health system.
- The hospital is not the sole or 100-percent owner of the entity.

**Referto:** Subsection 3.7.4.17, "Payment Window Reimbursement Guidelines" in the *Inpatient and Outpatient Hospital Services Handbook* (Vol. 2, Provider Handbooks) for additional information about the payment window reimbursement guidelines.

## 2 Blind Children's Vocational Discovery and Development Program (BCVDDP)

### 2.1 Overview

BCVDDP services are provided to help children who are blind and visually impaired to develop their individual potential. This program offers a wide range of services that are tailored to each child and their family's needs and circumstances. By working directly with the entire family, this program can help children develop the concepts and skills needed to realize their full potential.

BCVDDP services include the following:

- Assisting the child in developing the confidence and competence needed to be an active part of their community
- Providing support and training to children in understanding their rights and responsibilities throughout the educational process
- Assisting family and children in the vocational discovery and development process
- Providing training in areas like food preparation, money management, recreational activities, and grooming
- Supplying information to families about additional resources

### 2.2 Enrollment

Texas Health and Human Services Commission (HHSC) Blind Children's Vocational Discovery and Development Program (BCVDDP) is the Medicaid provider of case management for persons who are 22 years of age and younger and blind or visually impaired. Providers must meet educational and work experience requirements that are commensurate with their job responsibilities and must be trained in BCVDDP case management activities.

**Referto:** Subsection 1.1, "Provider Enrollment" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*) for more information about procedures for enrolling as a Medicaid provider.

### 2.3 Services, Benefits, Limitations, and Prior Authorization

Services eligible for reimbursement are limited to one contact per month, per person, regardless of the number of contacts that are made during the month. HHSC BCVDDP providers should bill procedure code G9012.

A contact is defined as "an activity performed by a case manager with the person or organization on behalf of the person to locate, coordinate, and monitor necessary services."

**Referto:** Subsection A.8, "Texas Health and Human Services Commission Blind Children's Vocational Discovery and Development Program (BCVDDP)" in "Appendix A: State, Federal, and TMHP Contact Information" (*Vol. 1, General Information*).

#### 2.3.1 Prior Authorization

Prior authorization is not required for BCVDDP case management services.

### 2.4 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including BCVDDP services.

BCVDDP services are subject to retrospective review and recoupment if documentation does not support the service billed.

## 2.5 Claims Filing and Reimbursement

BCVDDP case management services must be submitted to the Texas Medicaid & Healthcare Partnership (TMHP) in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills or itemized statements are not accepted as claim supplements. Providers must not submit a claim when or after the person turns 21 years of age.

Claims may be submitted up to 365 days from the date of service in accordance with 1 TAC §354.1003.

Any child who has a suspected or diagnosed visual impairment may be referred to BCVDDP. HHSC BCVDDP assesses the impact the visual impairment has on the child's development and provides blindness-specific services to increase the child's skill level in the areas of independent living, communication, mobility, social, recreational, and vocational discovery and development. For more information, visit the HHS website at [www.hhs.texas.gov/](http://www.hhs.texas.gov/).

Providers can refer to the [Online Fee Lookup \(OFL\)](#) or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied.

Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates/rate-changes](http://www.tmhp.com/resources/rate-and-code-updates/rate-changes).

**Referto:** "Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information about electronic claims submissions.

Subsection 6.1, "Claims Information" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*).

Subsection 2.9, "Federal Medical Assistance Percentage (FMAP)" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for federal matching percentage.

## 3 Case Management for Children and Pregnant Women

### 3.1 Overview

Case management services are provided to help Medicaid eligible persons gain access to necessary medical, social, educational, and other services. Case managers assess a person's need for these services and then develop a service plan to address those needs. Case Management for Children and Pregnant Women (CPW) services are outlined in the Texas Administrative Code (TAC).

#### 3.1.1 Eligibility

CPW services are a benefit for children birth through 20 years of age who:

- Are Medicaid eligible in Texas.

- Have, or are at risk for, a health condition illness, injury, or disability that results in limitation of function, activities, or social roles in comparison with healthy peers of the same age in the general areas of physical, cognitive, emotional, or social growth and development.
- Are in need of Case Management for Children and Pregnant Women services.
- Choose such services.

CPW services are a benefit for pregnant women of any age who:

- Are Medicaid eligible in Texas.
- Are pregnant and have a medical and/or psychosocial condition(s) that places them and their fetus(es) at a greater than average risk for complications, either during pregnancy, delivery, or following birth.
- Are in need of Case Management for Children and Pregnant Women services.
- Choose such services.

Clients that are Medicaid-eligible, but not yet enrolled may have Medicaid coverage assigned retroactively.

Verbal or written consent must be obtained from the client, parent, or legal guardian prior to the initiation of any CPW services. If the client receiving CPW services is a minor, all CPW services and visits must be completed with a parent or legal guardian present.

### 3.1.2 Referral Process

To refer a Medicaid eligible person for Case Management for Children and Pregnant Women services, providers may do one of the following:

- Visit [www.hhs.texas.gov/providers/health-services-providers/case-management-providers-children-pregnant-women](http://www.hhs.texas.gov/providers/health-services-providers/case-management-providers-children-pregnant-women) to obtain a referral form.
- Call THSteps toll free at 877-847-8377 from 8 a.m. to 6 p.m., Central Time, Monday through Friday.
- Contact a Case Management for Children and Pregnant Women provider directly at [www.hhs.texas.gov/providers/health-services-providers/case-management-providers-children-pregnant-women](http://www.hhs.texas.gov/providers/health-services-providers/case-management-providers-children-pregnant-women). A case management provider will contact the client to offer a choice of providers and obtain information necessary to determine eligibility for case management services.

A referral for Case Management for Children and Pregnant Women services can be received from any source.

## 3.2 Enrollment

Providers must be at least 18 years of age, enrolled in Medicaid, and approved by the Health and Human Services Commission (HHSC) to provide CPW services.

A provider shall not be approved as a provider of CPW services unless they meet one of the following qualifications:

- APRN who holds a license under Texas Occupations Code Chapter 301; or
- Registered nurse (RN) who holds a license under Texas Occupations Code Chapter 301 and has a baccalaureate degree in nursing, or
- RN who holds a license under Texas Occupations Code Chapter 301 and has an associate degree in nursing with:
  - At least 2 years cumulative paid full-time work experience; or two years of supervised, full-time educational internship/practicum experience in the past ten years with children, up to age 21, and/or pregnant women; or

- Social worker who holds a license, other than a provisional or temporary license, under Texas Occupations Code Chapter 505, appropriate for the individual's practice, including the practice of independent social work in the State of Texas; or
- Community health worker as defined by Section 48.001, Health and Safety Code, who is certified by the Department of State Health Services; or
- Doula who is certified in alignment with nationally recognized standards, and as determined by HHSC, must have:
  - Five years of experience within the last seven years as a doula; and
  - Attendance in three births in the last seven years; and
  - Three written professional letters of recommendation.
- Doula who is certified in alignment with nationally recognized standards, and as determined by HHSC, who is without five years of experience as a doula must have:
  - Attendance in three births; and
  - Three written professional letters of recommendation; and
  - Training in core competencies is required and must include:
    - Childbirth education
    - Lactation support (or proof of being a certified lactation counselor (CLC) or International Board-Certified Lactation Counselor (IBCLC)
    - Nonmedical comfort measures, prenatal support, and labor support techniques
    - Chronic and acute health conditions during the perinatal period
    - Cultural competency training

A Federally Qualified Health Center (FQHC) that has obtained HHSC approval may be eligible to provide CPW case management services. FQHCs must:

- Use the FQHC provider type, specialty code, and taxonomy code to deliver CPW services.
- Use their own individual National Provider Identifier (NPI) to deliver services.

Enrollment for Case Management for Children and Pregnant Women providers is a four-step process. Providers must complete all of the following:

- A pre-planning process with HHSC.
- The HHSC standardized case management training provided by HHSC.
- The Health Insurance Portability and Accountability Act (HIPAA) training.

**Note:** CPW Authorization to Disclose Protected Health Information forms in English or Spanish located on the [HHSC CPW website](#) must be completed as necessary to help the client access services.

- Providers must receive an approval letter from HHSC to enroll as a state Medicaid provider of CPW services.

Providers may be a group, an individual, or perform services under guidance of a FQHC.

Upon approval by HHSC, potential providers must enroll as a Medicaid provider for Case Management for Children and Pregnant Women and submit a copy of their HHSC approval letter. Facility providers must enroll as a Case Management for Children and Pregnant Women group, and each eligible case manager must enroll as a performing provider for the group. Federally Qualified Health Center (FQHC)

facilities that provide Case Management for Children and Pregnant Women services will use their FQHC number and should not apply for an additional provider number for Case Management for Children and Pregnant Women.

**Referto:** Subsection 1.1, “Provider Enrollment” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information about the procedures for enrolling as a Medicaid provider.

### 3.3 Services, Benefits, Limitations, and Prior Authorization

Case Management for Children and Pregnant Women services are limited to one contact per day per person. Additional provider contacts on the same day are denied as part of another service rendered on the same day. Prior authorization is not required for case management services.

Procedure code G9012, with required modifiers, may be reimbursed for Case Management for Children and Pregnant Women (CPW) services. Modifiers are used to identify which service component is provided.

| Procedure Code | Procedure Description                         | Additional Information                            |
|----------------|-----------------------------------------------|---------------------------------------------------|
| G9012          | Comprehensive visit (in-person)               | Combination Modifier U2 and U5 (both required)    |
| G9012          | Comprehensive visit (synchronous audiovisual) | Combination Modifier U2, U5 and 95(all required)  |
| G9012          | Follow-up visit (in-person)                   | Combination Modifier U5 and TS (both required)    |
| G9012          | Follow-up visit (synchronous audiovisual)     | Combination Modifier U5, TS and 95 (all required) |
| G9012          | Follow-up visit telephone (audio only)        | Combination Modifier TS and 93 (both required)    |

| Modifier | Description                                                                                                                 |
|----------|-----------------------------------------------------------------------------------------------------------------------------|
| 93       | Synchronous Telemedicine Service Rendered Via Telephone or Other Real-Time Interactive Audio-Only Telecommunications System |
| 95       | Synchronous Telemedicine Service Rendered Via a Real-Time Interactive Audio and Video Telecommunications System             |
| TS       | Follow-up service                                                                                                           |
| U2       | Comprehensive visit                                                                                                         |
| U5       | Face to face visit                                                                                                          |

Comprehensive visits are limited to one service per client, per provider in 12 consecutive months from the intake date.

CPW services may be provided using synchronous audiovisual technologies if clinically appropriate and safe, as determined by the provider, and agreed to by the client receiving services. Whenever possible, HHSC encourages face-to-face interaction, such as an in-person visit.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for information on policy restrictions for services delivered by synchronous telephone (audio- only) technologies. Services delivered using audio-only technologies must be billed using the 93 modifier.

Comprehensive visits completed in-person must be billed with procedure code G9012 and modifiers U2 and U5.

Comprehensive visits completed using synchronous audiovisual technology must be billed with procedure code G9012 and modifiers U2, U5 and 95.

Comprehensive visits may not be completed or billed using synchronous telephone (audio-only) technology.

Follow-up visits completed in-person must be billed with procedure code G9012 and modifiers U5 and TS.

Follow-up visits completed using synchronous audiovisual technology must be billed with procedure code G9012 and modifiers U5, TS and 95.

Follow-up visits completed using synchronous telephone (audio-only) technology must be billed with procedure code G9012 and modifiers TS and 93.

Procedure code G9012 is limited to once per day, any service, any provider.

FQHC's will bill for services using procedure code G9012 with the corresponding modifiers.

Providers must adhere to Case Management for Children and Pregnant Women program rules, policies, and procedures.

**Note:** *Case Management for Children and Pregnant Women providers are not required to file claims with other health insurance before filing with Medicaid.*

**Reminder:** *Billable services are defined in program rule 25 TAC §27.11.*

Case Management for Children and Pregnant Women services are not billable when a person is an inpatient at a hospital or other treatment facility.

Reimbursement will be denied for services rendered by providers who have not been approved by HHSC.

**Note:** *For CPW services delivered through a managed care organization (MCO), providers must refer to the MCO for information about benefits, limitations, prior authorization, reimbursement, and specific claim processing procedures.*

Providers and their case managers must operate in accordance with the laws, rules, regulations, and standards of care relating to the practice of their respective license(s) or certifications.

Providers must provide services according to policies and procedures as published.

Providers must cease providing services and notify HHSC if the professional license or certification of a provider is suspended or revoked.

Providers must assure that case managers attend required trainings provided by HHSC.

Providers must provide services convenient to clients, either in their home, an office setting, or other place of the client's preference.

Providers must have knowledge of, and coordinate services with, providers of health and health-related services, non-covered services, and other active community resources.

Providers must develop and maintain a quality management system for the provision of services.

Providers may be disenrolled by HHSC for failure to comply with provisions of the TMHP Provider Agreement or any applicable law, rule, or policy of the program.

Providers must submit claims for rendered case management services. If no claims are submitted for 24 months, the provider will be disenrolled.

Providers may be disenrolled for not providing services for 12 months or longer.

During a Declaration of State Disaster, HHSC may issue direction to providers regarding the use of a telemedicine or telehealth service to include the use of synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein to the extent permitted by Texas law. A Declaration of State of Disaster is when an executive order or proclamation is issued by the governor declaring a state of disaster in accordance with Section 418.014 of the Texas Government Code.

Providers are to disseminate accurate information regarding case management services to health, education, and human service professionals, community organizations, and potential clients to generate referrals. Some examples may include:

- Participate in community outreach events such as health fairs.
- Network with community agencies that serve children and pregnant women.
- Participate in community coalition meetings.
- Distribute brochures to medical/mental health professionals, dental providers, community resources, and schools.
- Conduct presentations.
- Develop community resource documents to include:
  - Local resources supporting nonmedical needs.
  - Providers accepting Medicaid clients.
  - Any other information about resources available specific to the provider's population served.

Providers must ensure that outreach activities do not impede a client's freedom to choose a provider.

Providers must refer and adhere to CPW outreach guidance available on the HHSC CPW website when producing outreach materials.

Providers must comply with the requirements outlined in TAC Title 1, Part 15, Chapter 371, Rule §371.1669, concerning Self-Dealing.

### **3.3.1 Initial Intake**

CPW providers must complete an initial intake with the client, parent, or legal guardian to determine the client's eligibility. The following information must be obtained during the initial intake and must be documented on the CPW Intake and Referral Form located on the HHSC CPW website:

- The health condition(s), health risk, or high-risk condition of the client who would receive case management services
- The health-related non-medical conditions of the eligible client who would receive case management services.
- How the health condition, health risk, or high-risk condition impacts the client's level of functioning
- Detailed information about the client's current need(s) related to the health condition, health risk, high-risk, or non-medical condition
- How the CPW provider will assist the client with their current need(s)

If the client to receive services is a minor, then the initial intake must be completed with the person's parent or legal guardian present.

The CPW initial intake service is not billable for reimbursement but is a required function of case management services. Providers who are unable to accept a referral, based on approved limitations, must re-direct the referral to the Texas Health Steps Hotline (1-877-THSteps or 1-877-847-8377). The approved limitations are:

- The client resides outside the provider service area.
- The provider is not contracted with the managed care organization (MCO) that is responsible for delivering services to the client.
- The provider has disenrolled as a CPW provider from TMHP.
- The provider cannot serve the individual's needs.

Referrals received for clients in STAR Kids must receive an intake to determine if there are needs for coordinating school services. All other services are to be provided by the client's MCO.

If the CPW initial intake indicates the client is eligible for services and a need for CPW services is identified, then the provider must complete a comprehensive visit within 30 business days of the intake date in which eligibility was determined.

If the CPW initial intake indicates the client is eligible for services and a need for CPW services is identified, but the client is not yet enrolled in Medicaid, then the case manager must complete a comprehensive visit within thirty (30) business days after the client's enrollment period is established.

### **3.3.2 Comprehensive Visits**

The comprehensive visit (procedure code G9012 with the appropriate modifier combination) is a reimbursable service.

The comprehensive visit must include the completion of all the following:

- Family Needs Assessment
- Service Plan
- Service Plan Consent

The comprehensive visit must be completed within 30 business days of the intake date on which eligibility was determined or retroactive eligibility is established. If the client receiving CPW services is a minor, the comprehensive visit must be completed with the person's parent or legal guardian present. The comprehensive visit may be completed in-person or through the use of synchronous audiovisual technology. Comprehensive visits using synchronous audiovisual technology should only be provided if agreed to by the client, parent or legal guardian.

The FNA is completed to determine the need for any medical, educational, social, or other services required to address the client's short- and long-term health and the overall well-being of the client. The FNA must include the following documentation using the FNA form located on the HHSC CPW website:

- Completing a personal and family medical, mental health, and medication history.
- Identifying the client's needs, including any non medical health-related needs.
- Assessing and providing a referral for personal and family issues that impact the client's health condition, health risk, high-risk condition, or non-medical needs and completing related documentation.
- Gathering information from other sources, such as family members, medical providers, social workers, and educators (if necessary), to form a complete assessment of the client.

The Service Plan (SP) is part of the comprehensive visit and must be completed and documented during the comprehensive visit using the Service Plan form on the HHSC CPW website. The Service Plan Consent is completed to authorize the provider to share information as necessary for referrals and for services to be provided. The Service Plan Consent form is located on the HHSC CPW website.

The SP is completed to determine a planned course of action. The service plan must include:

- Activities and goals that are developed in consultation with the client, parent, or legal guardian, involve the participation of the client, and address the medical, social, educational, and other services that are needed by the client receiving CPW services.
- Identify a course of action to respond to the assessed needs of the client, including identifying the individual responsible for contacting the appropriate service providers, and designating the time frame within which the client should access services.

The Service Plan may also include:

- Referral and related activities to help the client obtain needed services, including activities that help link the client with third parties such as medical, social, and educational providers.
- Case management may include collateral contacts with non-eligible individuals that are directly related to identifying the needs and supports for helping the client access services and managing the client's care.
- Participating in meetings.
- Providing resource information.
- Problem solving and advocating for the client.

The service plan must be translated or interpreted in the client's preferred language.

The Service Plan and Service Plan Consent forms must have verbal or written consent by the client, parent, or legal guardian and kept in the client's record, to be made available upon request.

### 3.3.3 Follow-up Visits

Follow-up visits (procedure code G9012 with the appropriate modifier combination) are reimbursable services, and may only be completed after the comprehensive visit has been completed. The follow-up visit and comprehensive visit cannot occur on the same day.

Follow-up visits by a case manager are necessary to ensure the Service Plan is implemented and adequately addresses the client's needs.

Follow-up visits shall be conducted as frequently as necessary. At least one annual follow-up is required for clients who are eligible for case management lasting longer than 12 consecutive months. For reimbursement, follow-up visits must be documented and must include the following:

- The current service plan to include the client's needs and status
- Services are being furnished in accordance with the client's service plan
- How services are addressing the client's needs as outlined in the Service Plan
- Service is maintained and modified when the client's needs or status changes

If the client receiving CPW services is a minor, the follow-up visit must be completed with the client's parent or legal guardian present.

**Note:** Follow-up visit forms are available on the HHSC CPW website at: [www.hhs.texas.gov/providers/health-services-providers/case-management-providers-children-pregnant-women](http://www.hhs.texas.gov/providers/health-services-providers/case-management-providers-children-pregnant-women).

Follow-up visits are completed to ensure the service plan is implemented and adequately addresses the person's needs. A follow-up visit must include but is not limited to:

- Ensuring services are being furnished in accordance with the person's service plan.
- Ensuring services in the service plan are adequate.
- Ensuring the service plan is modified when the person's need(s) changes.

Activities during the follow-up visit must be documented on the Follow-up form found on the HHSC CPW website and must include:

- Reviewing all outstanding needs documented on the Service Plan.
- Problem solving with the client, parent, or legal guardian.
- Problem solving when the client, parent, or legal guardian has not followed through with identified Service Plan action steps.
- Assessing for new needs.
- Determining the next course of action to address outstanding needs.

A follow-up visit may be completed in-person or through the use of synchronous audiovisual technology, or synchronous telephone (audio-only) technology. Follow-up visits completed using synchronous audiovisual technology or synchronous telephone (audio-only) technology should only be provided if agreed to by the client, parent, or legal guardian.

CPW activities that occur between follow-up visits are necessary components of case management for children and pregnant women services, but are not billable. These activities may include:

- Phone calls to the client, parent, or legal guardian between billable follow-up visits.
- Gathering information from other sources, such as family members, medical providers, social workers, and educators on behalf of the client, parent, or legal guardian.

Follow-up visits by the case manager for clients who are pregnant with a high-risk condition or non-medical needs shall occur as needed during the 12-month postpartum period. When all needs related to the health condition, health risk, high-risk pregnancy, or non-medical needs have been addressed, then CPW services must no longer be provided.

The client status is to be documented on the Case Closure Form available on the HHSC CPW website, to identify the outcome of the case when the following apply:

- All eligible needs have been addressed or resolved.
- The client is no longer eligible for case management due to an improvement in their health condition, health risk, or high-risk condition.
- The child reaches 21 years of age and does not meet other eligibility requirements for CPW services.
- The client is no longer eligible for Medicaid and does not anticipate obtaining Medicaid in the near future.
- The client no longer chooses to receive services.
- The client is denied additional visits because documentation does not support continued eligibility.
- The client is lost to follow-up when provider has made three attempts on different dates to contact client, parent, or legal guardian.
- The client relocates or transfers to a new provider.

- The provider is unable to render services due to the disruptive, unruly, threatening, or uncooperative behavior of the client, parent, or legal guardian.

**Note:** Providers may choose to close a case if the client, parent, or legal guardian is disruptive, unruly, threatening, or uncooperative to the extent the client, parent, or legal guardian seriously impairs the provider's ability to render services or if the client, parent, or legal guardian's behavior jeopardizes the client's own safety, or the providers. The provider should also contact the appropriate authority when necessary.

### 3.3.4 Case Transfers

Prior authorization is not required for CPW case management services.

Case transfers must be documented on the Case Transfer form available on the HHSC CPW website. The Case Transfer form is completed if the client continues to meet eligibility criteria, but the case needs to be transferred. Transfers may occur for the following reasons:

- The client requests a transfer.
- The client relocates.
- The provider's service area changes.
- The provider disenrolls as an active CPW provider.
- There is a need to change to another case manager.

The provider must assist a client with a transfer to case management services to another area of Texas.

A client must give approval to a provider to transfer the case management record to the new provider.

Providers must appropriately link clients of a family member that is a migrant worker to resources in the geographic areas in which they live and to which they migrate. This case transfer process is to be documented on the Migrant Information Form available on the HHSC CPW website. Providers are to:

- Determine the family members that migrate.
- Identify the source(s) of payment for medical care if family migrates outside of Texas.
- Determine the location and timeframe for each migrating location.
- Document each new location address, contact persons, medical providers, and school attendance, if needed.

## 3.4 Technical Assistance

Providers may contact HHSC program staff as needed for assistance with program concerns. Providers should contact TMHP provider relations staff as needed for assistance with claims problems or concerns. Regional DSHS staff make routine contact with providers to ensure providers are delivering services as required.

### 3.4.1 Assistance with Program Concerns

Providers who have questions, concerns, or problems with program rule, policy, or procedure may contact HHSC program staff at [askcm@hhs.texas.gov](mailto:askcm@hhs.texas.gov).

## 3.5 Documentation Requirements

All CPW services require documentation to describe and support the medical necessity of the service rendered.

Providers must maintain accurate demographic information on their provider record with TMHP. Changing significant provider information must be updated on the Provider Enrollment Management System (PEMS) within seven calendar days of the change including:

- Group Name or Doing Business As (DBA)
- Location Address
- Telephone Number
- Fax Number
- Email Address

Documentation in the client's record must include that verbal or written consent was obtained from the client, parent, or legal guardian prior to the initiation of any CPW services.

CPW forms including the Family Needs Assessment, Service Plan, Follow-Up form, follow-up documentation, and progress notes must be completed and maintained in the client's record. The documentation maintained must meet the requirements as outlined in this handbook. CPW documentation forms are available on the HHSC CPW website at [hhs.texas.gov/providers/health-services-providers/case-management-providers-children-pregnant-women](https://hhs.texas.gov/providers/health-services-providers/case-management-providers-children-pregnant-women).

Signatures, or documentation confirming verbal consent was received, must be included on all forms and documents that require signatures. All forms and documents completed in relation to CPW services must be maintained in the client's record.

All contacts with or on behalf of the client, parent, or legal guardian must be documented and maintained in the client's record. Documentation of activities, not otherwise documented on CPW required forms, must be recorded on the Progress Notes form available on the HHSC CPW website. Progress notes may include the following information:

- Phone calls to the client, parent, or legal guardian between billable follow-up visits
- Gathering information from other sources, such as family members, medical providers, social workers, and educators on behalf of the client, parent, or legal guardian

Documentation in the client's record must include the reason(s) a CPW service was not provided or completed. This can be documented on the Referral and Intake form during the initial eligibility determination or on the Case Closure form available on the HHSC CPW website.

Records are subject to review by HHSC or its designee.

## **3.6 Claims Filing and Reimbursement**

### **3.6.1 Claims Information**

CPW services are subject to retrospective review and recoupment if documentation does not support the service billed.

The comprehensive visit must not be billed until the FNA and SP are completed, and the SP Consent form is signed or verbal consent is given by the client, parent, or legal guardian. The CPW initial intake service is not billable.

Activities that occur between follow-up visits are necessary components of case management but are not billable. These activities must be documented on a progress note. These activities may include:

- Phone calls to the client, parent, or legal guardian between billable follow-up visits.
- Collateral contacts on behalf of a client, parent, or legal guardian.

Claims for a client who receives retroactive eligibility must be submitted within 95 days of the date that the client's eligibility was added to the TMHP eligibility file (add date) and within 365 days of the date of service (DOS).

Claims for a client who has been approved for Medicaid coverage but has not been assigned a Medicaid client number, the 95-day filing deadline does not begin until the date the eligibility is added to the TMHP eligibility file.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied.

Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates/rate-changes](http://www.tmhp.com/resources/rate-and-code-updates/rate-changes).

**Referto:** "Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on electronic claims submissions.

Subsection 6.1, "Claims Information" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*).

Subsection 2.2, "Fee-for-Service Reimbursement Methodology" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for more information about reimbursement.

### **3.6.1.1 Exclusions**

CPW services are not billable for clients who have already received another case management service on the same day from any billing provider.

CPW services are not billable when a client is in an inpatient at a hospital or other treatment facility.

CPW services are not billable when the exact services are duplicated within the client's managed care organization.

### **3.6.2 Managed Care Clients**

Case Management for Children and Pregnant Women services are carved in to Medicaid managed care and must be billed to the client's managed care organization (MCO).

## **4 Outpatient Mental Health Services**

Outpatient mental health services are used for the treatment of mental illness and emotional disturbances in which the clinician establishes a professional contract with the person and, utilizing therapeutic interventions, attempts to alleviate the symptoms of mental illness or emotional disturbance, and reverse, change, or ameliorate maladaptive patterns of behavior.

Outpatient mental health services include psychiatric diagnostic evaluation, psychotherapy (including individual, family, or group), psychological, neurobehavioral, or neuropsychological testing, pharmacological management, and electroconvulsive therapy (ECT).

Outpatient mental health services are benefits when provided in the office, home, skilled nursing or intermediate care facility (SNF/ICF), outpatient hospital, extended care facility (ECF), or in other locations.

Outpatient mental health services are benefits of Texas Medicaid when provided to persons who are experiencing a mental health condition that is causing distress, dysfunction, or maladaptive functioning as a result of a confirmed or suspected psychiatric condition as defined in the current edition of the American Psychiatric Association's Diagnostic and Statistical Manual of Mental Disorders (DSM).

**Note:** Claims will require the corresponding diagnosis code(s) from the current edition of the International Classification of Diseases (ICD).

## 4.1 Provider Enrollment

Mental health service providers include physicians, PAs, APRNs, LCSWs, LMFTs, LPCs, psychologists, licensed psychological associates (LPAs), provisionally licensed psychologists (PLPs), post-doctoral fellows, and pre-doctoral psychology interns.

**Referto:** Subsection 1.1, "Provider Enrollment" in "Section 1: Provider Enrollment and Responsibilities" (Vol. 1, General Information) for more information about procedures for enrolling as a Medicaid provider.

### 4.1.1 Physicians

To enroll in Texas Medicaid to provide medical services, physicians (doctor of medicine [MD] or doctor of osteopathy [DO]) and doctors (doctor of dental medicine [DMD], doctor of dental surgery [DDS], doctor of optometry [OD], and doctor of podiatric medicine) must be authorized by the licensing authority of their profession to practice in the state where the services are performed at the time they are provided.

Providers cannot be enrolled in Texas Medicaid if their licenses are due to expire within 30 days. A current Texas license must be submitted.

All physicians except gynecologists, pediatricians, pediatric subspecialists, pediatric psychiatrists, and providers performing only THSteps medical or dental checkups must be enrolled in Medicare before enrolling in Medicaid. TMHP may waive the Medicare enrollment prerequisite for pediatricians or physicians whose type of practice and service may never be billed to Medicare.

### 4.1.2 Physician Assistants (PAs)

To enroll in Texas Medicaid, a PA must be licensed as a PA and be recognized as a PA by the Texas Physician Assistant Board. All PAs are enrolled within the categories of practice as determined by the Texas Medicaid Board. PAs can enroll as an individual, group, or as a performing provider into a clinic/group practice. If enrolling into a Medicare-enrolled clinic/group practice, Medicare enrollment is required.

### 4.1.3 Advanced Practice Registered Nurses (APRNs)

To enroll in Texas Medicaid, whether as an individual or as part of a group, a nurse practitioner (NP) or clinical nurse specialist (CNS) recognized as an APRN must be licensed by the Texas Board of Nursing (BON). NP/CNSs must also be enrolled in Medicare or obtain a pediatric practice exemption from TMHP Provider Enrollment. If a pediatric-based NP/CNSs is enrolling as part of a Medicare-enrolled group, then the NP/CNSs must also be enrolled in Medicare.

Providers that hold a temporary license are not eligible to enroll in Medicaid. NP/CNSs cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

### 4.1.4 Licensed Clinical Social Workers (LCSWs)

To enroll in Texas Medicaid, whether as an individual or as part of a group, an LCSW must be licensed by the Texas State Board of Social Worker Examiners. LCSWs must also be enrolled in Medicare or obtain a pediatric practice exemption from TMHP Provider Enrollment. If a pediatric-based LCSW is enrolling as part of a Medicare-enrolled group, then the LCSW must also be enrolled in Medicare.

Providers that hold a temporary license are not eligible to enroll in Medicaid. LCSWs cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

#### **4.1.5 Licensed Marriage and Family Therapists (LMFTs)**

To enroll in Texas Medicaid, whether as an individual or as part of a group, an LMFT must be licensed by the Texas State Board of Examiners of Licensed Marriage and Family Therapists. LMFTs must also be enrolled in Medicare or obtain a pediatric practice exemption from TMHP Provider Enrollment. If a pediatric-based LMFT is enrolling as part of a Medicare-enrolled group, then the LMFT must also be enrolled in Medicare. Providers that hold a temporary license are not eligible to enroll in Medicaid. LMFTs cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

#### **4.1.6 Licensed Professional Counselors (LPCs)**

To enroll in Texas Medicaid, whether as an individual or as part of a group, an LPC must be licensed by the Texas Board of Examiners of Professional Counselors. LPCs must also be enrolled in Medicare or obtain a pediatric practice exemption from TMHP Provider Enrollment. If a pediatric-based LPC is enrolling as part of a Medicare-enrolled group, then the LPC must also be enrolled in Medicare. Providers that hold a temporary license are not eligible to enroll in Medicaid. LPCs cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

#### **4.1.7 Psychologists**

To enroll in Texas Medicaid, whether as an individual or as part of a group, a psychologist must be licensed by the Texas State Board of Examiners of Psychologists (TSBEP). Psychologists must also be enrolled in Medicare or obtain a pediatric practice exemption from TMHP Provider Enrollment. If a pediatric-based psychologist is enrolling as part of a Medicare-enrolled group, then the psychologist must also be enrolled in Medicare. Psychologists cannot be enrolled if they have a license that is due to expire within 30 days. A current license must be submitted. Texas Medicaid accepts temporary licenses for psychologists.

#### **4.1.8 Licensed Psychological Associates (LPAs)**

LPAs must be licensed by TSBEP. LPAs are expected to abide by their scope and standards of practice.

Services performed by an LPA are a Medicaid-covered benefit when the following conditions are met:

- The services must be performed under the required supervision of a licensed, Medicaid-enrolled psychologist.
- The supervising psychologist must be in the same office, building, or facility when the service is provided and must be immediately available to furnish assistance and direction.
- The LPA performing the service must be an employee of either the licensed psychologist or the legal entity that employs the licensed psychologist.

Psychological services provided by an LPA must be billed under the supervising psychologist's National Provider Identifier (NPI) or the NPI of the legal entity employing the supervising psychologist.

#### **4.1.9 Provisionally Licensed Psychologists (PLPs)**

PLPs must be licensed by TSBEP. A PLP may perform all of the services that are benefits of Texas Medicaid when the services are performed by a psychologist.

PLPs are expected to abide by their scope and standards of practice. Services performed by a PLP are a Medicaid-covered benefit when the following conditions are met:

- The services must be performed under the required supervision of a licensed psychologist in accordance with the TSBEP guidelines.

- The supervising psychologist must be in the same office, building, or facility when the service is provided and must be immediately available to furnish assistance and direction.
- The PLP who is performing the service must be an employee of either the licensed psychologist or the legal entity that employs the licensed psychologist.

The TSBEP requires a PLP to work under the required supervision of a licensed psychologist and does not allow a PLP to engage in independent practice. Therefore, a PLP will not be independently enrolled in the Medicaid program and must provide services under the delegating psychologist’s NPI.

Psychological services provided by a PLP must be billed under the supervising psychologist’s NPI or the NPI of the legal entity employing the supervising psychologist.

**4.1.10 Post-Doctoral Fellows**

Post-doctoral psychology fellows who satisfy the provisional licensure examination requirements but have not yet been awarded the PLP designation are eligible to perform delegated psychological services within their scope of practice and under the required supervision of a licensed psychologist.

Psychology interns are not independently enrolled in the Medicaid program and must provide services under the delegating psychologist’s NPI.

Psychological services provided by an intern must be billed under the supervising psychologist’s NPI or the NPI of the legal entity employing the supervising psychologist.

**4.1.11 Pre-doctoral Psychology Interns**

Pre-doctoral psychology interns who are participating in a pre-doctoral psychology internship at a site that is a member of the Association of Psychology Postdoctoral and Internship Centers (APPIC) are eligible to perform delegated psychological services within their scope of practice and under the required supervision of a licensed psychologist.

Psychology interns are not independently enrolled in the Medicaid program and must provide services under the delegating psychologist’s NPI.

**4.2 Services, Benefits, Limitations**

The following procedure codes may be reimbursed for outpatient mental health services:

| Procedure Codes                                                          |       |       |       |        |       |        |       |        |       |
|--------------------------------------------------------------------------|-------|-------|-------|--------|-------|--------|-------|--------|-------|
| 90791                                                                    | 90792 | 90832 | 90833 | 90834  | 90836 | 90837  | 90838 | 90846  | 90847 |
| 90853                                                                    | 90870 | 90899 | 96116 | 96121+ | 96130 | 96131+ | 96132 | 96133+ | 96136 |
| 96137+                                                                   |       |       |       |        |       |        |       |        |       |
| + Add-on procedure code must be billed with the appropriate primary code |       |       |       |        |       |        |       |        |       |

The following psychotherapy procedure codes are limited to 30 visits per calendar year. Additional services require prior authorization:

| Procedure Codes                                                          |        |       |        |       |        |       |       |       |  |
|--------------------------------------------------------------------------|--------|-------|--------|-------|--------|-------|-------|-------|--|
| 90832                                                                    | 90833+ | 90834 | 90836+ | 90837 | 90838+ | 90846 | 90847 | 90853 |  |
| + Add-on procedure code must be billed with the appropriate primary code |        |       |        |       |        |       |       |       |  |

Procedure codes 90791, 90792, 90832, 90833, 90834, 90836, 90837, 90838, 90846, 90847, and 90853 are limited to the following diagnosis codes:

| Diagnosis Codes |        |        |       |       |       |       |        |
|-----------------|--------|--------|-------|-------|-------|-------|--------|
| F0390           | F03911 | F03918 | F0392 | F0393 | F0394 | F03A0 | F03A11 |

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| F03A18          | F03A2  | F03A3  | F03A4  | F03B0  | F03B11 | F03B18 | F03B2  |
| F03B3           | F03B4  | F03C0  | F03C11 | F03C18 | F03C2  | F03C3  | F03C4  |

### **4.2.1 Telemedicine and Telehealth Services**

Providers must defer to the needs of the person receiving services, allowing the mode of service delivery to be accessible, person- and family-centered, and primarily driven by the person's choice and not provider convenience.

Providers must provide outpatient mental health services to Medicaid eligible persons in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. In addition, providers must deliver, to include delivery by telemedicine or telehealth, outpatient mental health services in full accordance with all applicable licensure and certification requirements.

During a Declaration of State of Disaster, the Health and Human Services Commission (HHSC) may issue direction to providers regarding the use of a telemedicine or telehealth services to include the use of a synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein to the extent permitted by Texas law. A Declaration of State of Disaster is when an executive order or proclamation is issued by the governor declaring a state of disaster in accordance with Section 418.014 of the Texas Government Code.

#### **4.2.1.1 Synchronous Audiovisual Technology**

The following outpatient mental health services may be provided by synchronous audiovisual technology if clinically appropriate and safe, as determined by the billing provider, and agreed to by the person receiving services. Outpatient mental health services provided by synchronous audiovisual technology must be billed using modifier 95.

- Psychiatric diagnostic evaluation services with and without medical services (procedure codes 90791 and 90792)
- Psychotherapy (individual, family, or group) services (procedure codes 90832, 90833, 90834, 90836, 90837, 90838, 90846, 90847, and 90853)
- Pharmacological management services (most appropriate E/M code with modifier UD) for psychiatric care only
- Neurobehavioral services (procedure codes 96116 and 96121).
- Neuropsychological and psychological testing services (procedure codes 96130, 96131, 96132, 96133, 96136 and 96137) if the following conditions are met:
  - The psychometric test must be available in an online format, except for tests that are administered and responded to orally;
  - The provider, or test administrator, must observe the person, in real-time, for the duration of the test; and
  - The provider delivers the psychometric test in accordance with their licensing board and professional guidelines.

#### **4.2.1.2 Synchronous Telephone (audio-only) Technology**

The following outpatient mental health services may be provided by synchronous telephone (audio-only) technology to persons with whom the billing provider has an existing clinical relationship and, if clinically appropriate and safe, as determined by the billing provider, and agreed to by the person receiving services. Whenever possible, HHSC encourages face-to-face interaction, such as an in-person visit, as well as, the use of synchronous audiovisual technology over synchronous telephone (audio-only) technology of telemedicine and telehealth services. Therefore, providers of outpatient mental health services must document in the person's medical record the reason(s) for why services were delivered by synchronous telephone (audio-only) technology.

Outpatient mental health services provided by synchronous telephone (audio-only) technology must be billed using modifier FQ.

- Psychiatric diagnostic evaluation services with and without medical services (procedure codes 90791 and 90792)
- Psychotherapy (individual, family, or group) services (procedure codes 90832, 90833, 90834, 90836, 90837, 90838, 90846, 90847, and 90853)
- Pharmacological management services (most appropriate E/M code with modifier UD) for psychiatric care only

An existing clinical relationship occurs when a person has received at least one in-person or synchronous audiovisual outpatient mental health service (psychiatric diagnostic evaluation, psychotherapy [individual, family, or group], pharmacological management, testing [neurobehavioral, psychological, or neuropsychological], or ECT) from the same billing provider within the six months prior to the initial service delivered by synchronous telephone (audio-only) technology. The six-month requirement for at least one in-person or synchronous audiovisual outpatient mental health service by the same billing provider prior to the initial synchronous telephone (audio-only) service may not be waived.

**Note:** “Same billing provider” refers to providers that are within the same entity or organization, as identified by the entity’s or organization’s NPI number or numbers, if the entity or organization has multiple locations (e.g., a clinic/group practice, federally qualified health center or rural health clinic, and can include providers within the same community mental health center).

**Note:** The required in-person or synchronous audiovisual-delivered outpatient mental health service (psychiatric diagnostic evaluation, psychotherapy [individual, family, or group], pharmacological management, testing [neurobehavioral, psychological, or neuropsychological], or ECT) may be delivered by another authorized professional or paraprofessional of the same billing provider as the professional or paraprofessional who delivers the service by synchronous telephone (audio-only) technology.

The billing provider is required to conduct at least one in-person or synchronous audiovisual outpatient mental health service (psychiatric diagnostic evaluation, psychotherapy [individual, family, or group], pharmacological management, testing [neurobehavioral, psychological, or neuropsychological] or ECT) every rolling 12 months from the date of the initial service delivered by synchronous telephone (audio-only) technology unless the person receiving services and the billing provider agree that an in-person or synchronous audiovisual service is clinically contraindicated, or the risks or burdens of an in-person or synchronous audiovisual service outweigh the benefits. The decision to waive the 12-month requirement applies to that particular rolling 12-month period and the basis for the decision must be documented in the person’s medical record. Examples of when a synchronous telephone (audio-only) service may be more clinically appropriate or beneficial than an in-person or synchronous audiovisual service include, but are not limited to, the following:

- The person receiving services is located at a qualifying originating site in an eligible geographic area, e.g., a practitioner office in a rural Health Professional Shortage Area
- An in-person or synchronous audiovisual service is likely to cause disruption in service delivery or has the potential to worsen the person’s condition(s)

| Modifiers for Telemedicine and Telehealth | Description                                                |
|-------------------------------------------|------------------------------------------------------------|
| 95                                        | Delivered by synchronous audiovisual technology            |
| FQ                                        | Delivered by synchronous telephone (audio-only) technology |

**Note:** The required in-person or synchronous audiovisual-delivered outpatient mental health service (psychiatric diagnostic evaluation, psychotherapy [individual, family, or group], pharmacological management, testing [neurobehavioral, psychological, or neuropsychological], or ECT) may be delivered by another authorized professional or paraprofessional of the same billing provider (see note above for the definition of same billing provider) as the professional, or paraprofessional, who delivers the service by synchronous telephone (audio-only) technology.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telemedicine and telehealth requirements to include informed consent and privacy and security requirements.

## 4.2.2 Psychotherapy Services

Individual psychotherapy is defined as therapy that focuses on a single person.

Group psychotherapy is defined as a type of psychotherapy that involves one or more therapists working with several persons at the same time.

Family psychotherapy is defined as therapy that focuses on the dynamics of the family unit where the goal is to strengthen the family's problem solving and communication skills.

Providers must bill a modifier to identify a separate and distinct service when performing individual psychotherapy (procedure code 90832, 90834, or 90837) and family psychotherapy (procedure code 90846 or 90847) on the same day for the same person. When billing for these services, providers must submit the family psychotherapy procedure code with the modifier on the claim to indicate that the procedure or service was distinct or independent from other services performed on the same day for the same person. Documentation that supports the provision of distinct or independent services must be maintained in the person's medical record and made available to Texas Medicaid upon request.

**Note:** The add-on codes may only be billed by physician, APRN, or PA providers.

**Referto:** Subsection 9.2.60.6, "Prolonged Physician Services" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information about prolonged physician services.

Psychotherapy (individual, family, or group) is limited to 4 hours per person, per day.

Psychotherapy is limited to 30 individual, group, or family psychotherapy visits per person, per calendar year. Additional psychotherapy services must be prior authorized. Prior authorization requests in increments of up to 10 additional visits may be considered. The request must be submitted on an Outpatient Mental Health Services Request Form and include the following information:

- Identifying information for the person receiving services
- Provider name and NPI
- Current DSM diagnosis(es)
- Current psychotropic medications
- Current symptoms requiring additional psychotherapy
- Treatment plan, including measurable short-term goals, specific therapeutic interventions utilized, and measurable expected outcomes of therapy

- Number and type of services requested and anticipated dates that the services will be provided
- Indication of court-ordered or Department of Family and Protective Services (DFPS)-directed services

Providers with an established relationship with a person receiving services must request prior authorization when they determine the person is approaching 30 psychotherapy visits for the calendar year. If the person changes providers during the year and the new provider is unable to obtain complete information on the person's previous treatment history, providers are encouraged to obtain prior authorization before rendering services. Requests submitted on the same day as the initial session with a new provider will be considered based on medical necessity criteria.

Providers must bill the preponderance of each half hour of psychotherapy and indicate the number of units on the claim form.

LMFTs must bill with modifier U8 to differentiate from LPCs.

Supporting documentation for individual, family, or group psychotherapy services must include:

- Start and end time of session
- Modality or modalities utilized
- Frequency of psychotherapy sessions
- Clinical notes for each visit must include diagnosis, symptoms, functional status, focused mental status examination (if indicated), treatment plan (goals and objectives addressed), prognosis, and progress, and the name, signature, and credentials of the individual performing the services.

#### **4.2.2.1 Family Psychotherapy**

Family psychotherapy may be provided to Medicaid eligible persons 20 years of age and younger using procedure code 90846 or persons of any age using procedure code 90847.

Family psychotherapy is only reimbursable for one Medicaid eligible person per session regardless of the number of family members present per session.

Family psychotherapy for Medicaid eligible persons 20 years of age and younger may be provided to the child's parent(s), foster parent(s), or legal guardian without the child present, as clinically appropriate, using procedure code 90846. Parent- or guardian-only sessions may be indicated when addressing sensitive topics such as parenting challenges or related stressors that would be inappropriate to discuss with the child present at the session.

Only the following specific relatives may participate in family psychotherapy services:

- Biological parent, foster parent, or legal guardian
- Child
- Grandfather or grandmother
- Sibling (biological, foster, or kinship)
- Uncle, aunt, nephew, or niece
- First cousin or first cousin once removed
- Stepfather, stepmother, stepbrother, or stepsister

#### **4.2.2.2 Treatment for Alzheimer's Disease and Dementia**

Psychotherapy for persons with Alzheimer's disease or dementia is a benefit of Texas Medicaid for persons with very mild or mild cognitive decline.

Documentation to support the treatment for Alzheimer’s disease or dementia must be maintained in the person’s medical record and may be subject to retrospective review. Psychotherapy services must not be continued if no longer beneficial to the person due to diminished cognitive functioning.

4.2.3 Delegated Services

Services provided by a psychologist, LPA, PLP, psychology intern, or post-doctoral fellow must be billed with a modifier on each detail. Psychological services provided by an LPA, PLP psychology intern, or post-doctoral fellow must be billed under the supervising psychologist’s NPI or the NPI of the legal entity employing the supervising psychologist.

Services performed by a LPA or PLP will be reimbursed at 70 percent of the psychologist rate. Services performed by the psychology intern or post-doctoral fellow will be reimbursed at 50 percent of the psychologist rate.

The following modifiers are to be used with procedure codes for licensed psychologist and delegated services:

| Modifier | Description                                                                                        |
|----------|----------------------------------------------------------------------------------------------------|
| AH       | Identifies service provided by a clinical psychologist                                             |
| UB       | Identifies service provided by a pre-doctoral psychology intern or post-doctoral psychology fellow |
| UC       | Identifies service provided by an LPA                                                              |
| U9       | Identifies service provided by a PLP                                                               |

Claims submitted without a modifier or with two of these modifiers on the same detail will be denied. Only the LCSW, LMFT, LPC, APRN, or PA performing the mental health service may bill Texas Medicaid. The LCSW, LMFT, LPC, APRN, or PA must not bill for services performed by people under his or her supervision.

4.2.4 Pharmacological Management Services

Pharmacological management is the in-depth management of psychopharmacological agents to treat a person’s mental health symptoms.

Pharmacological management is a physician service and cannot be provided by a non-physician or “incident to” a physician service, except for APRNs and PAs whose scope of license in this state permits them to prescribe.

Pharmacological management is limited to one service per day, per person, by any provider in any setting.

The treating provider should use the most appropriate E/M code for the pharmacological management visit depending on the place of service and complexity of the person’s condition, along with modifier UD to designate the visit as primarily focused on pharmacological management.

Supporting documentation for pharmacological management services must include:

- Complete diagnosis utilizing diagnostic criteria from the current edition of the DSM
- Current list of medications
- Current psychiatric symptoms and problems, including presenting mental status
- Problems, reactions, and side effects, if any, to medications
- Any medication modifications made during a visit and the reasons for medication adjustments, changes, or discontinuation

- Desired therapeutic drug levels, if applicable, for medications requiring blood level monitoring, e.g. Lithium
- Current laboratory values, if applicable, for medications requiring monitoring for potential side effects, e.g. hyperglycemia caused by anti-psychotic medications
- Treatment goals

#### **4.2.5 Electroconvulsive Therapy**

Electroconvulsive therapy (ECT) is the induction of convulsions by the passage of an electric current through the brain used in the treatment of certain psychiatric disorders.

Psychological, neurobehavioral, or neuropsychological testing billed in addition to ECT on the same day, by any provider will be denied as part of another procedure on the same day.

#### **4.2.6 Psychiatric Diagnostic Evaluation Services**

Psychiatric diagnostic evaluation is an integrated biopsychosocial assessment, including history, mental status, and recommendations. Psychiatric diagnostic evaluation with medical services also includes a medical assessment, other physical examination elements as indicated, and may also include prescription of medications, and laboratory or other diagnostic studies.

A psychiatric diagnostic evaluation without medical services (procedure code 90791) may be reimbursed to physicians, psychologists, APRNs, PAs, LCSWs, LPCs, LMFTs, PLPs, psychology interns, and post-doctoral fellows.

A psychiatric diagnostic evaluation with medical services (procedure code 90792) may be reimbursed to physicians, APRNs, and PAs.

Psychiatric diagnostic evaluations with and without medical services (procedure codes 90791 and 90792) are limited to once per person, per rolling year, same provider in the office, home, outpatient hospital, or other settings, regardless of the number of professionals involved in the interview. Additional psychiatric diagnostic evaluations may be considered for prior authorization on a case-by-case basis when submitted on an Outpatient Mental Health Services Request Form with supporting documentation, including but not limited to:

- A court order or a DFPS directive
- If a major change of status occurs

Supporting documentation for psychiatric diagnostic evaluation services must include:

- Reason for referral or presenting problem
- Prior diagnoses and any prior treatment
- Other pertinent medical, social, and family history
- Clinical observations and results of mental status examination
- Complete diagnosis utilizing diagnostic criteria from the current edition of the DSM
- Recommendations, including expected long- and short-term goals

#### **4.2.7 Psychological, Neurobehavioral, and Neuropsychological Testing Services**

Psychological, neurobehavioral, and neuropsychological testing involves the use of formal tests and other assessment tools to measure and assess a person's emotional, and cognitive functioning in order to arrive at a diagnosis and guide treatment.

Psychological testing (procedure codes 96130, 96131, 96136, and 96137) and neuropsychological testing (procedure codes 96132, 96133, 96136, and 96137) are limited to eight hours per person, per calendar year. Additional hours require prior authorization when medically necessary. The request must be submitted on an Outpatient Mental Health Services Request Form and include the following information:

- Identifying information for the person receiving services
- Provider name and NPI
- Current DSM diagnoses
- Indication of court-ordered or DFPS-directed services
- Type of testing requested (psychological, neurobehavioral, or neuropsychological) including specific procedure codes
- Rationale for requested testing, to include the current symptoms of the person receiving services
- Previous history and testing results

Psychological, neurobehavioral, and neuropsychological testing will not be reimbursed to an APRN or a PA. The most appropriate office visit procedure code must be billed. Mental health screening may be performed during an assessment by an APRN or a PA, but will not be reimbursed separately.

Psychological testing (procedure codes 96130, 96131, 96136, and 96137) or neuropsychological testing (procedure codes 96132, 96133, 96136, and 96137) may be reimbursed on the same date of service as an initial psychiatric diagnostic evaluation (procedure code 90791 or 90792).

Neurobehavioral testing (procedure code 96116) may not be reimbursed on the same date of service as an initial psychiatric diagnostic evaluation (procedure code 90791 or 90792) to the same provider.

Neurobehavioral testing (procedures codes 96116 and 96121) will not be paid for the same date of service to the same provider as psychological testing (procedure codes 96130, 96131, 96136 and 96137) or neuropsychological testing (procedure codes 96132, 96133, 96136, and 96137). All documentation must be maintained by the provider in the person's medical record.

The reimbursement for procedure codes 96116, 96121, 96130, 96131, 96132, 96133, 96136, and 96137 includes the face-to-face testing and the scoring and interpretation of the results. The number of units of testing on the claim for procedure codes 96116, 96121, 96130, 96131, 96132, 96133, 96136, and 96137 must be in accordance with the allowable activities outlined in each code description.

**Note:** *Add-on procedure codes indicated with asterisk must be billed with the appropriate primary procedure code.*

Assessment, treatment planning, and documentation time, including time to document test results in the person's medical record, is not reimbursed separately. Reimbursement is included in the covered procedure codes.

#### **4.2.7.1 Testing in Facilities**

Psychological testing, neurobehavioral testing, or neuropsychological testing may be reimbursed when provided in a skilled nursing facility (SNF), intermediate care facility (ICF), or extended care facility (ECF) as clinically indicated. Testing may be indicated, for example, when a person has experienced significant change in mental status requiring specialized testing, or to evaluate a person's competency to return to a community-based setting. Persons with well-established mental or cognitive issues do not require additional testing.

Psychological, neurobehavioral, or neuropsychological testing will not be reimbursed in a SNF, ICF, or ECF when conducted prior to the performance of initial intake assessments such as the Minimum Data Set or Preadmission Screening and Resident Review (PASRR) (a completed Level I Screening and a Level II Evaluation, as applicable).

Supporting documentation for psychological, neurobehavioral, or neuropsychological testing services must include:

- Reason for referral or presenting problem
- The name of the tests (e.g., WAIS-R, Rorschach, MMPI) performed
- The scoring of the test
- Location where the testing is performed
- The name and credentials of each provider involved in administering, interpreting, and preparing the report
- Test interpretations, including narrative descriptions of the test findings
- Length of time spent by each provider, as applicable, in administration, interpretation, integrating the test interpretation, and documenting the comprehensive report based on the integrated data
- Recommended treatment, including how test results affect the prescribed treatment
- Recommendations for further testing, including an explanation to substantiate the necessity for retesting, if applicable
- Rationale or extenuating circumstances that impact the ability to complete the testing, such as, but not limited to, the person's condition requires testing over two days and the person does not return, or the person's condition precludes completion of the testing.

Original testing material must be maintained by the provider and must be readily available for retrospective review by HHSC.

When psychological, neurobehavioral, or neuropsychological testing is performed in a SNF, ICF, or ECF, a copy of the test and the resulting report must also be maintained in the person's medical record at the facility.

## 4.3 Prior Authorization

Prior authorization requests must be submitted to the TMHP Prior Authorization Department via mail, fax, or the electronic portal. Performing providers may sign prior authorization forms and supporting documentation using electronic or wet signatures.

**Referto:** Subsection 5.5.1.2, "Document Requirements and Retention" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*) for additional information about electronic signatures.

All providers must adhere to prior authorization requirements.

### 4.3.1 Services Requiring Prior Authorization

Prior Authorization is required for the following services:

- Psychiatric diagnostic evaluation (procedure code 90791 or 90792) after the one evaluation per person, per provider, per rolling year limitation has been met
- Individual, family, or group psychotherapy (procedure codes 90832, 90833, 90834, 90836, 90837, 90838, 90846, 90847, and 90853) after the 30 visit per calendar year limitation has been met
- Neurobehavioral testing (procedure codes 96116 and 96121) after the 4 hour per day limitations have been met
- Psychological testing (procedure code 96130, 96131, 96136, or 96137) or neuropsychological testing (procedure code 96132, 96133, 96136, or 96137) after the 8 hour per calendar year limitations have been met

- Unlisted psychiatric service or procedure (procedure code 90899)

Requests for prior authorization for procedure code 90899 must be submitted by the provider to the Special Medical Prior Authorization (SMPA) department using the Special Medical Prior Authorization (SMPA) Request Form with documentation supporting medical necessity including:

- Diagnosis(es)
- Prior treatment for this diagnosis and the medical necessity of the requested procedure
- A clear, concise description of the evidence-based service or procedure to be performed, and the intended fee for the service or procedure
- The reason for recommending this particular service or procedure
- A procedure code that is comparable to the service or procedure being requested
- Documentation that this service or procedure is not investigational or experimental

### 4.3.2 Prior Authorization Not Required

Prior authorization is not required for the following services:

- One psychiatric diagnostic evaluation (procedure codes 90791 and 90792) per person, per rolling year, per provider (same provider)
- 30 individual, family, or group psychotherapy (procedure codes 90832, 90833, 90834, 90836, 90837, 90838, 90846, 90847, and 90853) visits per person per calendar year
- 4 hours of psychotherapy services per person per day
- 4 hours of neuropsychological testing (procedure codes 96116 and 96121) per person per day
- 8 hours of psychological, neurobehavioral, or neuropsychological testing (procedure codes 96130, 96131, 96132, 96133, 96136, or 96137) per person, per calendar year
- ECT (procedure code 90870)

## 4.4 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including mental health services. The documentation must support the medical necessity of the treatment for its entire duration.

Mental health services outlined in this handbook are subject to retrospective review to ensure that the documentation in the person's medical record supports the medical necessity of the services provided. Documentation requirements for a telemedicine or telehealth service are the same as for an in-person visit and must accurately reflect the services rendered. Documentation must identify the means of delivery when provided by telemedicine or telehealth.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telemedicine and telehealth documentation requirements including requirements for informed consent.

## 4.5 Twelve Hour System Limitation

The following provider types are limited to a maximum combined total of 12 hours per provider, per day, regardless of the number of persons seen for outpatient mental health services:

- Psychologist
- APRN
- PA

- LCSW
- LMFT
- LPC

The following table lists the procedure codes for mental health services included in the system limitation, along with the time increments the system will apply based on the billed procedure code. The time increments applied will be used to calculate the 12-hour per day system limitation.

| Procedure Code                                                                      | Time Applied |
|-------------------------------------------------------------------------------------|--------------|
| 90791                                                                               | 60 minutes   |
| 90792                                                                               | 60 minutes   |
| 90832                                                                               | 30 minutes   |
| 90833+                                                                              | 30 minutes   |
| 90834                                                                               | 45 minutes   |
| 90836+                                                                              | 45 minutes   |
| 90837                                                                               | 60 minutes   |
| 90838+                                                                              | 60 minutes   |
| 90846                                                                               | 50 minutes   |
| 90847                                                                               | 50 minutes   |
| 96116                                                                               | 60 minutes   |
| 96121+                                                                              | 60 minutes   |
| 96130                                                                               | 60 minutes   |
| 96131+                                                                              | 60 minutes   |
| 96132                                                                               | 60 minutes   |
| 96133+                                                                              | 60 minutes   |
| 96136                                                                               | 30 minutes   |
| 96137+                                                                              | 30 minutes   |
| + Add-on procedure codes to be billed with the most appropriate E/M procedure code. |              |

Court-ordered and DFPS directed services are not subject to the 12-hour per provider, per day system limitation when billed with modifier H9.

Physicians are not subject to the 12-hour system limitation since they can delegate and may submit claims in excess of 12 hours per day.

Psychologists can delegate to multiple LPAs, PLPs, interns, or post-doctoral fellows and therefore delegated services are not subject to the 12-hour system limitation since they may submit claims for delegated services in excess of 12 hours per day.

## 4.6 Court-Ordered Services

The court-ordered services listed below for persons who are age 20 years of age and younger or 65 years of age and older are not subject to utilization management reviews, including prior authorization, concurrent reviews, or retrospective reviews that have the effect of denying, reducing, or controverting the court-ordered service. In these situations, the court order is considered the determination of medical necessity.

When billed with modifier H9, court-ordered services are not subject to the 12-hour system limitation per provider, per day.

Federal law prohibits the use of federal Medicaid funding for medical care provided to persons who are considered incarcerated. A person is considered incarcerated when a criminal justice facility has custody of the person. Examples include:

- A person who is currently residing in a criminal justice facility and receiving treatment through a program at the criminal justice facility.
- A person who is committed under Title 1 Texas Code of Criminal Procedure §46(B), which addresses persons ages 18 and older who have been ordered to receive competency restoration.
- A person who is committed under Title 3 Texas Family Code §§55.01-55.45. These sections refer to persons committed to inpatient psychiatric care because they are deemed unfit to proceed.

The following court-ordered services are required to be provided to Medicaid eligible persons who are not considered incarcerated:

- Emergency detention ordered by a judge or magistrate under Title 7 Texas Health and Safety Code §§573.011-573.026.
- Mental health services ordered under Title 7 Texas Health and Safety Code §§574.01-574.110. Mental health services may include:
  - A mental health examination.
  - Inpatient or outpatient treatment.
  - Detention under protective custody and temporary mental health services.
- Treatment of persons who are found not guilty based on lack of responsibility under Title 3 Texas Family Code §55.
- Treatment that is a condition of probation.
- Treatment of persons with chemical dependencies ordered under Title 6 Texas Health and Safety Code §462.042.

For authorization of court-ordered services, the provider must submit documentation that includes:

- The court-order.
- Information about the statute under which the court is ordering the services.
- Verification of the person's incarceration status.

For court-ordered inpatient admissions, providers must submit documentation that includes:

- A copy of the doctor's certificate.
- All court-ordered commitment papers signed by the judge.

For persons with fee-for-service benefits, this supporting documentation must be submitted with the Psychiatric Inpatient Extended Stay Request Form.

Requested services beyond those that are court-ordered are subject to medical necessity review.

## 4.7 Exclusions

The following services are not benefits of Texas Medicaid:

- Psychoanalysis
- Multiple family group psychotherapy
- Marriage or couples counseling
- Narcosynthesis

- Biofeedback training as part of psychophysiological therapy
- Psychiatric day treatment programs
- Services provided by a psychiatric assistant, psychological assistant (excluding master's level LPA), or a licensed chemical dependency counselor

## 4.8 Claims Filing and Reimbursement

Providers must bill Medicare before Medicaid when a person is eligible for services under both programs. Medicaid's responsibility for the coinsurance or deductible is determined in accordance with Medicaid benefits and limitations. Providers must check the person's Medicare card for Part B coverage before billing Medicaid. When Medicare is primary, it is inappropriate to bill Medicaid without first billing Medicare.

**Note:** *Texas Medicaid may reimburse the full amount of the Medicare coinsurance and deductible for services rendered by psychiatrists, psychologists, LCSW, LMFT, and LPC providers.*

**Referto:** Subsection 2.7.3, "Part B" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*).

Subsection 4.9.2, "Medicare Part B Crossovers" in "Section 4: Client Eligibility" (*Vol. 1, General Information*) for information about how coinsurance and deductibles may be reimbursed by Texas Medicaid.

LCSW, LMFT, and LPC services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a CMS-1500 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

**Referto:** "Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on electronic claims submissions.

Subsection 6.1, "Claims Information" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

According to 1 TAC §355.8091, the Texas Medicaid rate for LCSWs, LMFTs, and LPCs is 70 percent of the rate paid to a psychiatrist or psychologist for a similar service per 1 TAC §355.8085. Providers can refer to the OFL or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com). Under 1 TAC §355.8261, an FQHC is reimbursed according to its specific prospective payment system (PPS) rate per visit for LCSW services.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied.

Additional information about rate changes is available on the [Reimbursement Rate Changes](http://www.tmhp.com) page of the TMHP website at [www.tmhp.com](http://www.tmhp.com).

**Note:** *Texas Medicaid may reimburse the full amount of the Medicare coinsurance and deductible for services rendered by psychiatrists, psychologists, LCSW, LMFT, and LPC providers.*

**Referto:** Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

Subsection 4.5, “Twelve Hour System Limitation” in this handbook for details about the 12-hours-per-day behavioral health services limitation.

## 4.9 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the Texas Medicaid Provider Procedures Manual are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manual. The CMS NCCI and MUE guidelines can be found in the NCCI Policy and Medicaid Claims Processing manuals, which are available on the CMS website. Providers should refer to the CMS NCCI web page for correct coding guidelines and specific applicable code combinations.

Whenever Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

## 5 Intellectual Disability Service Coordination, Mental Health Targeted Case Management, and Mental Health Rehabilitative Services

### 5.1 Enrollment

#### 5.1.1 Local Intellectual and Developmental Disability Authority (LIDDA) Providers

A LIDDA provider who is authorized by HHSC to provide service coordination must be enrolled as a Long Term Care provider, and must submit claims through the Long Term Care system.

LIDDAs are the only entities that provide case management (service coordination) services to persons who have an intellectual disability.

**Referto:** The TMHP website at [www.tmhp.com](http://www.tmhp.com) for additional information about Long Term Care enrollment and billing requirements.

#### 5.1.2 Local Mental Health Authority (LMHA) Providers

LMHA providers are authorized by the HHSC to provide targeted case management services and mental health rehabilitative services. To enroll in Texas Medicaid, LMHA providers must contact HHSC at [performance.contracts@hhsc.state.tx.us](mailto:performance.contracts@hhsc.state.tx.us) to be approved.

#### 5.1.3 Non-Local Mental Health Authority (Non-LMHA) Providers

Non-LMHAs are private providers of both mental health (MH) case management and MH rehabilitative services, but they are not LMHAs. They must comply with all applicable federal and local laws and all of the regulations that are related to the services they provide. After receiving approval for enrollment in Texas Medicaid, the Non-LMHA provider must be credentialed by a Texas Medicaid managed care organization (MCO) to provide services to Texas Medicaid eligible persons.

Non-LMHA providers also must register to use the DSHS Clinical Management for Behavioral Health Services (CMBHS) clinical record-keeping system before providing services to Texas Medicaid eligible persons.

### **5.1.4 Provider Credentials for Facilities Delivering MHTCM and Mental Health Rehabilitative Services**

Community Services Specialist (CSSP), Qualified Mental Health Professional - Community Services (QMHP-CS), family partners, and peer providers are eligible to deliver some or all of the mental health rehabilitative services and mental health targeted case management services. The credentialing requirements and services each provider may deliver are listed in the following sections.

Staff administering the assessment instruments must have documentation of current certification in the CANS or ANSA. Certification must be updated annually through an approved entity.

#### **5.1.4.1 Community Services Specialist (CSSP)**

CSSP providers are eligible to deliver Mental Health Targeted Case Management (MHTCM) and Mental Health (MH) Rehabilitative services and must meet the following minimum credentialing requirements:

- High school diploma or high school equivalency;
- Three continuous years of documented full-time experience in the provision of MH rehabilitative services prior to August 30, 2004; and
- Demonstrated competency in the provision and documentation of MHTCM and MH rehabilitative services.

A CSSP performing MHTCM and MH rehabilitative services must:

- Be an employee of the provider where MHTCM services are delivered.
- Be clinically supervised by at least a QMHP-CS.

#### **5.1.4.2 Qualified Mental Health Professional - Community Services (QMHP-CS)**

QMHP-CS providers are eligible to deliver MHTCM and MH rehabilitative services and must meet the following minimum credentialing requirements:

- Completed a standardized training curriculum
- Demonstrated competency in the work to be performed
- Obtained one of the following:
  - A bachelor's degree from an accredited college or university with a minimum number of hours that are equivalent to a major in psychology, social work, medicine, nursing, rehabilitation, counseling, sociology, human growth and development, physician assistant, gerontology, special education, educational psychology, early childhood education, or early childhood intervention
  - A license as a registered nurse (RN)

Staff administering the functional assessment instruments must have documentation of current certification in either the Child and Adolescent Needs and Strengths Assessment (CANS) or the Adult Needs and Strengths Assessment (ANSA). Certification in either the CANS or ANSA must be updated annually through an approved entity.

An individual who possesses any of the following licenses is considered a Licensed Practitioner of the Healing Arts (LPHA) and is automatically certified as a QMHP-CS:

- Physician
- Physician Assistant
- Advanced Practice Registered Nurse
- Psychologist
- Licensed Clinical Social Worker (LCSW)

- Licensed Marriage and Family Therapist (LMFT)
- Licensed Professional Counselor (LPC)

A QMHP-CS must be clinically supervised by another QMHP-CS. If a QMHP-CS is clinically supervised by another QMHP-CS, the supervising QMHP-CS must be clinically supervised by an LPHA.

#### 5.1.4.3 Peer Provider

Peer providers must have a high school diploma or high school equivalency, one cumulative year of receiving mental health services, and be clinically supervised by an LPHA. The supervising LPHA must conduct at least monthly documented meetings with the peer provider and conduct an additional monthly documented observation of the peer providing services.

A peer provider must satisfy all staff credentialing, competency, training, and clinical supervision requirements.

Services provided by a peer provider must be included in the treatment plan.

#### 5.1.4.4 Family Partner

A certified family partner (CFP) must have a high school diploma or high school equivalency and one cumulative year of participating in mental health services as the parent or legally authorized representative (LAR) of a child receiving mental health services.

A CFP must be supervised by at least a QMHP-CS and must satisfy all staff credentialing, competency, training, and clinical supervision requirements.

Services provided by a CFP must be included in the treatment plan.

Family partners must be credentialed as a CFP within one year of their hire date.

The family partner service is provided to parents or LARs for the benefit of the Medicaid eligible child.

#### 5.1.4.5 Certifications for Mental Health Rehabilitative Services

The following provider certifications are required for mental health rehabilitative services:

| Service                                                                | Provider Types |      |               |                            |                |    |
|------------------------------------------------------------------------|----------------|------|---------------|----------------------------|----------------|----|
|                                                                        | QMHP-CS        | CSSP | Peer Provider | Licensed Medical Personnel | Family Partner | RN |

## 5.2 Services, Benefits, Limitations, and Prior Authorization

### 5.2.1 Intellectual and Developmental Disabilities Service Coordination

Texas Medicaid provides the following:

- Service coordination for persons who have an intellectual disability or a related condition (adult or child). Persons who have a related condition are eligible if they are being enrolled into the home and community based waiver (HCS); the Texas Home Living Waiver; or an Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF-IID).
- Service coordination for persons who have an intellectual disability or a related condition who are enrolled in HCS or Texas Home Living waiver programs.

Service coordination funded by Medicaid as TCM is reimbursed by encounter.

There are two types of encounters:

- *Comprehensive encounter (Type A):* A face-to-face contact with a person to provide service coordination. The comprehensive encounter is limited to one billable encounter per person per calendar month. HHSC will not authorize payment for a comprehensive encounter that exceeds the cap of one encounter per person per calendar month.
- *Supportive encounter (Type B):* A face-to-face, telephone, or telemedicine contact with a person or with a collateral on the person's behalf to provide service coordination.

A LIDDA is allowed up to three Type B encounters per calendar month for each Type A encounter that has occurred within the calendar month.

The Type B encounters are not limited to three per person. Rather, the allowed Type B encounters may be delivered to any person who needs a Type B encounter. These Type B encounters are allowable as long as the person who received the Type B encounter also received a Type A encounter that same month.

For example, Sam and Mary receive a Type A encounter in June. It is allowable for the LIDDA to bill for one Type B encounter for Sam in June and five Type B encounters for Mary in June.

Payment for a person's Type B encounter is contingent on that the person having a Type A encounter within the same calendar month.

Within the calendar month, the Type A encounter does not have to occur on a date before any of the Type B encounters occur.

Prior authorization is not required for IDD coordination services.

### 5.2.2 Mental Health Targeted Case Management (MHTCM)

Mental health targeted case management (MHTCM) services are case management services to persons within targeted groups. The target population that may receive MHTCM as part of the Texas Medicaid Program are persons, regardless of age, with a diagnosis or diagnoses of mental illness or serious emotional disturbance (SED) as defined in the latest edition of the American Psychiatric Association's DSM, and who have been determined via a uniform assessment process to need MHTCM services. Persons of any age with a single diagnosis of intellectual and developmental disabilities (IDD) and related conditions, or a single diagnosis of substance use disorder (SUD) are not eligible for MHTCM services.

MHTCM services are furnished to assist persons in gaining access to needed medical, social, behavioral, educational, and other services and supports. MHTCM activities and services include:

- A comprehensive initial assessment and periodic reassessment, as medically necessary, of the person's needs to determine the need for any medical, educational, social, behavioral, or other services.
- The development, and periodic revision, as medically necessary, of a trauma-informed and person-centered plan of care that:
  - Is based on the information collected through the uniform assessment;
  - Specifies the goals and actions to address the medical, social, behavioral, educational, and other services and supports needed by the person;
  - Includes activities, such as ensuring the active participation of the eligible person and working with the person, or the person's authorized health care decision maker, and others to develop these goals; and
  - Identifies a course of action to respond to the assessed needs of the eligible person.
- Making referrals and performing other related activities, such as scheduling an appointment on behalf of the person, to help an eligible person obtain needed services and supports, including activities that help link a person with:
  - Medical, social, behavioral, and educational providers; and
  - Other programs and services that can provide needed services to address identified needs and achieve goals in the plan of care.
- Monitoring and performing the necessary follow-up that is necessary to ensure the plan of care is implemented and adequately addresses the needs of the person.

MHTCM activities may be with the person, family members, LAR, providers, or other entities or individuals and conducted as frequently as necessary, and at least once annually, to determine whether the following conditions are met:

- Services are being furnished in accordance with the person's plan of care;
- Services in the plan of care are adequate in amount, scope, and duration to meet the needs of the person; and
- The plan of care and service arrangements are modified when the needs or status of the person changes.

MHTCM is a benefit for persons transitioning to a community setting for up to 180 consecutive days prior to leaving a nursing facility; however, MHTCM services are coordinated with, and do not duplicate activities provided, as part of nursing facility services and discharge planning activities.

MHTCM consists of intensive case management and routine case management. Intensive case management services are predominantly community-based case management activities provided to the child or youth or to the LAR on behalf of the child or youth (who may or may not be present) to assist a child or youth and caregiver or LAR in obtaining and coordinating access to necessary care and services appropriate to the child or youth's needs. Routine case management services are primarily office-based case management activities that assist a person, caregiver, or LAR in obtaining and coordinating access to necessary care and services appropriate to the child's or youth's needs.

Intensive case management and routine case management are benefits for persons who are 20 years of age and younger. Intensive case management and routine case management are not payable on the same day.

Routine case management is a benefit for persons who are 21 years of age and older.

Providers must use procedure code T1017 and the appropriate modifier for MHTCM:

| Modifier | Description                                                |
|----------|------------------------------------------------------------|
| 95       | Delivered by synchronous audiovisual technology            |
| FQ       | Delivered by synchronous telephone (audio-only technology) |
| HA       | Child/Adolescent Program                                   |
| HZ       | Funded by criminal justice agency                          |
| TF       | Routine Case Management                                    |
| TG       | Intensive Case Management                                  |

Procedure code T1017 is limited to the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| F060            | F061   | F062   | F0630  | F0631  | F0632  | F0633  | F0634  |
| F064            | F068   | F070   | F0789  | F09    | F200   | F201   | F202   |
| F203            | F205   | F2081  | F2089  | F209   | F21    | F22    | F23    |
| F24             | F250   | F251   | F258   | F259   | F28    | F29    | F3010  |
| F3011           | F3012  | F3013  | F302   | F303   | F304   | F309   | F310   |
| F3110           | F3111  | F3112  | F3113  | F312   | F3130  | F3131  | F3132  |
| F314            | F315   | F3160  | F3161  | F3162  | F3163  | F3164  | F3170  |
| F3171           | F3172  | F3173  | F3174  | F3175  | F3176  | F3177  | F3178  |
| F3181           | F3189  | F319   | F320   | F321   | F322   | F323   | F324   |
| F325            | F3281  | F3289  | F329   | F32A   | F330   | F331   | F332   |
| F333            | F3340  | F3341  | F3342  | F338   | F339   | F340   | F341   |
| F3481           | F348   | F349   | F39    | F4000  | F4001  | F4002  | F4010  |
| F4011           | F40210 | F40218 | F40220 | F40228 | F40230 | F40231 | F40232 |

| T7652XS         | T7662XA | T7662XD | T7662XS |         |         |         |         |

An MHTCM reimbursable session is the provision of a case management activity by an authorized case manager during a meeting with a person who is authorized to receive that specific type of case management. A billable unit of MHTCM is 15 continuous minutes of contact.

MHTCM is not payable when delivered on the same day as psychosocial rehabilitative services.

The following activities are included in the MHTCM rate and will not be reimbursed separately:

- Documenting the provision of MHTCM services to include developing and revising the plan of care and interventions that are appropriate to a person's needs.
- On-going administration of the uniform assessment to determine amount, duration, and type of MHTCM.
- Travel time required to provide MHTCM services at a location not owned, operated, or under arrangement with the provider.

Texas Medicaid must not be billed for MHTCM services provided before the establishment of a diagnosis of mental illness and the authorization of services.

**Note:** MHTCM claims submitted by non-LMHAs for dual-eligible persons will be processed by TMHP in the same manner that dual-eligible LMHA/Local Behavioral Health Authority (LBHA) claims are processed to pay cost-sharing. These claims will be carved-out of managed care and will not be sent to the person's MCO. MHTCM claims submitted by non-LMHAs for persons with Medicaid-only (all persons who are not dual-eligible) will be carved-in for managed care, meaning that FFS will pay the claims until the person chooses an MCO, and then the claims will be forwarded to the person's MCO for processing and reimbursement.

### 5.2.2.1 Telemedicine and Telehealth

Providers of MHTCM services must defer to the needs of the person receiving the services, allowing the mode of service delivery to be accessible, person- and family-centered and primarily driven by the person's choice and not provider convenience.

Providers must provide MHTCM services to Medicaid eligible persons in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. In addition, providers must deliver, to include delivery by telemedicine or telehealth, MHTCM services in full accordance with all applicable licensure and certification

During a Declaration of State of Disaster, the Health and Human Services Commission (HHSC) may issue direction to providers regarding the use of a telemedicine or telehealth service to include the use of a synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein to the extent permitted by Texas law. A Declaration of State of Disaster is when an executive order or proclamation is issued by the governor declaring a state of disaster in accordance with Section 418.014 of the Texas Government Code.

#### 5.2.2.1.1 Synchronous Audiovisual Technology

MHTCM services may be provided by synchronous audiovisual technology if clinically appropriate and safe, as determined by the billing provider, and agreed to by the person receiving services or LAR. In addition, approval to deliver the services by synchronous audiovisual technology must be documented in the plan of care of the person receiving services. MHTCM services provided by synchronous audiovisual technology must be billed using modifier 95.

#### 5.2.2.1.2 Synchronous Telephone (Audio-Only Technology)

MHTCM services may be provided by synchronous telephone (audio-only) technology to persons with whom the billing provider has an existing clinical relationship and, if clinically appropriate and safe, as determined by the billing provider, and agreed to by the person receiving services or LAR. In addition, approval to deliver the services by synchronous telephone (audio-only) technology must be documented in the plan of care of the person receiving services. Whenever possible, HHSC encourages face-to-face interaction, such as an in-person visit, as well as the use of synchronous audiovisual technology over synchronous telephone (audio-only) technology of telemedicine and telehealth services. Therefore, providers of MHTCM services must document in the person's medical record the reason(s) for why services were delivered by synchronous telephone (audio-only) technology. MHTCM services provided by synchronous telephone (audio-only) technology must be billed using modifier FQ.

An existing clinical relationship occurs when a person has received at least one in-person or synchronous audiovisual MHTCM, mental health rehabilitation (MHR), or peer specialist service from the same billing provider within the six months prior to the initial service delivered by synchronous telephone (audio-only) technology. The six-month requirement for at least one in-person or synchronous audiovisual MHTCM, MHR, or peer specialist service by the same billing provider prior to the initial synchronous telephone (audio-only) service may not be waived.

**Note:** “Same billing provider” refers to providers that are within the same entity, as identified by the entity's NPI number or numbers, if the entity has multiple locations (i.e., the same LMHA/LBHA or same non-LMHA/private provider).

**Note:** The required in-person or synchronous audiovisual-delivered MHTCM, MHR, or peer specialist service may be delivered by another authorized professional or paraprofessional of the same LMHA/LBHA or the same non-LMHA as the professional or paraprofessional who delivers the service by synchronous telephone (audio-only) technology.

The billing provider is required to conduct at least one in-person or synchronous audiovisual MHTCM, MHR, or peer specialist service every rolling 12 months from the date of the initial service delivered by synchronous telephone (audio-only) technology unless the person receiving services and the billing provider agree that an in-person or synchronous audiovisual service is clinically contraindicated, or the risks or burdens of an in-person or synchronous audiovisual service outweigh the benefits. The decision to waive the 12-month requirement applies to that particular rolling 12-month period and the basis for

the decision must be documented in the person's medical record. Examples of when a synchronous telephone (audio-only) service may be more clinically appropriate or beneficial than an in-person or synchronous audiovisual service include, but are not limited to, the following:

- The person receiving services is located at a qualifying originating site in an eligible geographic area, e.g., a practitioner office in a rural Health Professional Shortage Area.
- An in-person or synchronous audiovisual service is likely to cause disruption in service delivery or has the potential to worsen the person's condition(s).

**Note:** *The required in-person or synchronous audiovisual-delivered MHTCM, MHR, or peer specialist service may be delivered by another authorized professional or paraprofessional of the same LMHA/LBHA or the same non-LMHA as the professional or paraprofessional who delivers the service by synchronous telephone (audio-only) technology.*

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telemedicine and telehealth requirements to include informed consent and privacy and security requirements.

### 5.2.2.2 Collateral Contacts

MHTCM may include contacts with non-eligible individuals who are directly related to identifying the eligible person's needs and care for the purposes of helping the eligible person access services, identifying needs and supports to assist the eligible person in obtaining services, providing case managers with useful feedback, and alerting case managers to changes in the eligible person's needs.

MHTCM services involving collateral contacts are only payable when the person or LAR is also present during the case management session.

### 5.2.2.3 Intensive Case Management for Persons 20 Years of Age and Younger

Intensive case management services incorporate a wraparound approach to care planning and treatment plan implementation. The wraparound process is a strengths-based course of action involving a child or youth and their family, including any additional people identified by the child or youth, LAR, primary caregiver, and family, that results in a unique set of community services and natural supports that are individualized for the child or youth to achieve a positive set of identified outcomes.

Intensive case management services are primarily community-based, meaning that services are provided in whatever setting is clinically appropriate and person-centered, to include telehealth delivery.

A case manager assigned to a child or youth who is authorized to receive intensive case management services must have completed training in the National Wraparound Implementation Center's Wraparound Practice model and must incorporate wraparound process planning or other approved models in developing a plan of care that addresses the unmet needs of the child or youth across life domains.

The case manager must develop an intensive case management plan of care that is trauma-informed and person-centered and is based on the needs of the child or youth, which may include information across life domains from relevant sources.

The case manager must meet with the child or youth and the LAR or primary caregiver:

- Within seven days after the case manager is assigned to the child or youth; or
- Within seven days after discharge from an inpatient psychiatric setting, whichever is later; or
- Document the reasons the meeting did not occur and meet at the soonest available opportunity.

The case manager must identify the child's or youth's strengths, service needs, and assistance that will be required to address the identified needs in the plan of care.

The case manager must take steps that are necessary to assist the child or youth in gaining access to the needed services and service providers, including:

- Making referrals to potential service providers.
- Initiating contact with potential service providers.
- Arranging, and if necessary to facilitate linkage, accompanying the child or youth to initial meetings and non-routine appointments.
- Arranging transportation to ensure the child or youth attendance.
- Advocating with service providers.
- Providing relevant information to service providers.
- Monitoring the child's or youth's progress toward the goals set forth in the plan.

#### 5.2.2.3.1 Prior Authorization Requirements

##### **Initial Authorization Requirements**

Providers of MHTCM services must not bill Texas Medicaid for services prior to the establishment of a diagnosis of mental illness and the authorization or reauthorization of services.

Eligibility and continued eligibility determinations occur at the facility (provider) that is providing MHTCM services using the Clinical Management of Behavioral Health Services (CMBHS) software system. Criteria used to make these service determinations are from the recommended Level of Care (LOC) of the person generated by the CMBHS software system, as derived from the uniform assessment, the needs of the person, and the Texas Resilience and Recovery (TRR) Utilization Management Guidelines. Providers of MHTCM services must ensure the following:

- A Qualified Mental Health Professional-Community Services (QMHP-CS) or Licensed Practitioner of the Healing Arts (LPHA) performs a screening for eligibility using the uniform assessment;
- An LPHA determines the diagnosis, which must include an interview with the person conducted either in-person or by telemedicine or telehealth;
- The clinical needs of the person are evaluated to determine if the amount of MHTCM services associated with the recommended LOC, described in the TRR Utilization Management Guidelines, is sufficient to meet those needs; and
- An LPHA reviews the recommended LOC and verifies whether the services are medically necessary.

If the provider determines the type of MHTCM services associated with the recommended LOC generated by the CMBHS software system is sufficient to meet the needs of the person, the provider must submit a request for prior authorization according to the recommended LOC. If the provider determines that a LOC, other than the recommended LOC, is more appropriate for the person then the provider must submit a prior authorization deviation request that includes the following:

- The word 'Deviation' with a note that the request is for prior authorization of a LOC that is higher or lower than initially recommended; and
- The clinical justification for the request to include the specific reason(s) for why the person requires interventions higher or lower than the recommended LOC (refusal of recommended LOC by the person receiving services may be noted as part of the justification).

For persons enrolled in managed care, LMHAs/LBHAs and non-LMHAs (also referred to as private providers) contracted with MCOs must submit prior authorization requests to the MCO with whom the person is enrolled. MCOs must follow the requirements set forth in the Uniform Managed Care Manual regarding utilization management for MHTCM services. MCOs may choose to waive prior authorization submission requirements.

For persons in fee-for-service (FFS) Medicaid, LMHAs/LBHAs must obtain prior authorization from their internal utilization management department using the CMBHS software system. Non-LMHAs must obtain prior authorization from the TMHP Prior Authorization Department using the Special Medical Prior Authorization (SMPA) request form and the information obtained from the CMBHS software system. When completing the SMPA form for prior authorization, non-LMHAs must complete the following sections of the form as follows:

- Section A – Client information
  - Complete as indicated in the form.
- Section B – Requested procedure or service information
  - The type of request is ‘Other’
  - The expected dates of service are the start and end dates provided by CMBHS
  - The procedure related CPT code is the code for MHTCM and the appropriate modifier(s)
  - The comments text box must indicate if the prior authorization request is an ‘initial assessment’ or ‘reassessment’
- Section C – To be completed by requesting physician or requesting provider
  - The diagnosis(es) is/are the ICD-10 primary diagnosis and related ICD-10 diagnosis code(s)
  - The statement of medical necessity section must indicate the recommended LOC generated by CMBHS software system. If the request is a deviation from the recommended LOC, then the provider must include the following:
    - The word ‘Deviation’ with a note that the request is for prior authorization of a LOC that is higher or lower than the recommended LOC;
    - The clinical justification for the request to include the specific reason(s) for why the person requires interventions outside the recommended LOC (refusal of recommended LOC by the person receiving services may be noted as part of the justification); and
    - If requested by the TMHP Prior Authorization Department, a copy of the CANS or ANSA functional assessment.
  - Complete provider information as indicated in the form
    - The SMPA form must be signed and dated within 30 calendar days of the expected start date of services.

All plans of care are subject to retrospective review by the state.

### Reauthorization Requirements

At a minimum, providers must ensure that a QMHP-CS administers the uniform assessment and obtains a recommended LOC from the CMBHS software system for the person receiving MHTCM services:

- Every 90 calendar days for persons 20 years of age and younger; or
- Every 180 calendar days for persons 21 years of age and older.

**Note:** *Providers must follow the same process that is used for initial authorization for reauthorization of services at the specified intervals indicated above (i.e., every 90 or 180 calendar days, as applicable).*

#### **5.2.2.4 Eligibility and Service Determinations for Persons Who are 20 Years of Age and Younger**

MHTCM is a benefit for persons who are 20 years of age and younger (child or youth) with a diagnosis or diagnoses of mental illness, or SED, as defined in the latest edition of the APA's DSM (excluding a single diagnosis of IDD and related disorders, or a single diagnosis of SUD) and who:

- Have been determined via the uniform assessment process to have a serious functional impairment and to need MTHCM services; or
- Are at risk of disruption of a preferred living or child-care environment due to psychiatric symptoms; or
- Are enrolled in a school system's special education program because of SED.

The initial assessment is the clinical process of obtaining and evaluating historical, social, behavioral, functional, psychiatric, developmental, or other information from the person seeking services to determine specific treatment and support needs.

Functioning is assessed using one of the following tools:

- The Child and Adolescent Needs and Strengths Assessment (CANS) for persons who are 17 years of age and younger
- The Adult Needs and Strengths Assessment (ANSA) and any necessary supplemental assessments for persons who are 18 to 20 years of age

Services and supports to be provided to the child or youth are determined jointly by the child or youth, family, and the provider.

Children and youth MHTCM services authorized for care by the provider through a clinical override are eligible for the duration of the authorization.

Continued eligibility for children and youth for MHTCM services is based on a reassessment every 90 calendar days and reauthorization of services by the provider of MHTCM services using the CMBHS software system. Assignment of diagnosis in the CMBHS software system is required at any time the APA DSM diagnosis changes and at least annually from the last diagnosis entered in the CMBHS software system.

#### **5.2.2.5 Eligibility and Service Determinations for Persons who are 21 Years of Age and Older**

MHTCM is a benefit for persons who are 21 years of age and older (adults) and who have serious mental illness (SMI), such as schizophrenia, major depression, bipolar disorder, post-traumatic stress disorder, or other severely disabling mental disorders (excluding a single diagnosis of IDD and related disorders or a single diagnosis of SUD) that require crisis resolution or ongoing and long-term support and treatment.

Adults with a diagnosis of schizophrenia or bipolar disorder are automatically eligible for services. Adults with any other mental health diagnosis require evidence of significant difficulty functioning across one or more domains, such as work or school, to be eligible for services.

The initial assessment is the clinical process of obtaining and evaluating historical, social, behavioral, functional, psychiatric, developmental, or other information from the person seeking services to determine specific treatment and support needs.

Functioning is assessed using the ANSA standardized assessment tool. Continued eligibility for adults for MHTCM services is based on a reassessment every 180 calendar days and reauthorization of services by the provider of MHTCM services using the CMBHS software system. Assignment of diagnosis in the CMBHS software system is required at any time the DSM diagnosis changes and at least annually from the last diagnosis entered into CMBHS software system.

Adults with a diagnosis of schizophrenia or bipolar disorder are automatically eligible for continued services. Adults with a diagnosis of major depressive disorder whose level of functioning qualified them initially are also automatically eligible for continued services, regardless of whether their level of functioning improved.

Adults with any other mental health diagnoses are eligible for continued services if their level of functioning continues to be significantly impaired, as evidenced by the results of the ANSA standardized assessment tool.

### **5.2.2.6 Documentation Requirements**

A comprehensive diagnosis must be included in the person's medical record, including documentation of applicable diagnostic criteria according to the latest edition of the APA's DSM, as well as the specific justification of need for services.

MHTCM services, including attempts to provide MHTCM services, must be documented in the person's medical record.

For routine case management, the case manager must document the person's strengths, service needs, and assistance required to address the service needs as well as the steps that are necessary to accomplish the goals required to meet the person's service needs.

For intensive case management, the assigned case manager must include the intensive case management plan of care in the child's or youth's medical record and document steps taken to meet the child's or youth's goals and needs in the child's or youth's progress notes.

As a result of the assessments and reassessments conducted, the case manager must document the person's identified strengths, service needs, and assistance given to address the identified need, and specific goals and actions to be accomplished.

The case manager must document the following for all services provided:

- The event or behavior that occurs while providing the MHTCM service or the reason for the specific case management encounter
- The person, persons, or entity, including other case managers, with whom the encounter or contact occurred
- Collateral contacts such as contacts with non-eligible individuals that are directly related to identifying the needs and supports for helping the person access services and managing the person's care, including coordination with other case managers
- The recovery plan goal(s) that was the focus of the service, including the progress or lack of progress in achieving recovery plan goal(s)
- The timeline for obtaining the needed services
- The specific intervention that is being provided
- The date the MHTCM service was provided
- The start and end time of the MHTCM service
- The mode of delivery used to provide the MHTCM service
- The name of the provider agency and the signature of the employee providing the MHTCM service, including their credentials
- The timeline for reevaluating the needed service

If the person refuses MHTCM services, the case manager must document the reason for the refusal in the most appropriate area of the person's medical record and request that the person sign a waiver of MHTCM services that is filed in the person's medical record.

The provider must retain documentation in compliance with applicable records retention requirements in federal and state laws, rules, and regulations. Documentation requirements for a telemedicine or telehealth service are the same as for an in-person visit and must accurately reflect the services rendered. Documentation must identify the means of delivery when provided by telemedicine or telehealth.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telemedicine and telehealth documentation requirements including requirements for informed consent.

#### **5.2.2.7 Exclusions**

The following services are not covered by MHTCM:

- Case management activities that are an integral component of another covered Medicaid service
- The provision of a medical, educational, social, behavioral, or other service to which a person has been referred, including for foster care programs, services such as, but not limited to, the following:
  - Research gathering and completion of documentation required by the foster care program
  - Assessing adoption placements
  - Recruiting or interviewing potential foster care parents
  - Serving legal papers
  - Home investigations
  - Providing transportation, including transporting the person to his/her LAR/primary caregiver
  - Administering foster care subsidies
  - Making placement arrangements
- Performing an activity that does not directly assist a person in gaining or coordinating access to needed services
- Providing medical or nursing services
- Performing preadmission or intake activities
- Monitoring the person's general health status
- Performing outreach activities
- Performing quality oversight of a service provider
- Conducting utilization review or utilization management activities
- Conducting quality assurance activities
- Authorizing services or authorizing the provision of services
- Services to inmates of public institutions

#### **5.2.3 Mental Health Rehabilitative Services**

Mental health rehabilitative services are defined as providing assistance in maintaining or improving functioning and may be considered rehabilitative when necessary to help a person achieve a rehabilitation goal as defined in their plan of care.

Mental health rehabilitative services are provided to a person with a serious mental illness (SMI), as defined in the latest edition of the American Psychiatric Association's (APA's) Diagnostic and Statistical Manual of Mental Disorders (DSM).

Mental health rehabilitative services are age-appropriate, individualized, and designed to ameliorate functional impairments that negatively affect any of the following:

- Community integration
- Community tenure
- Behaviors resulting from SMI or severe emotional disturbance (SED) that interfere with a person's ability to remain in the community as a fully integrated and functioning member of that community

Mental health rehabilitative services may include:

- Medication training and support services
- Psychosocial rehabilitative services
- Skills training and development
- Crisis intervention services
- Day programs for acute needs

Mental health rehabilitative services may only be provided by a member of the person's therapeutic team. The therapeutic team must include enough staff to adequately address the rehabilitative needs of persons assigned to the team.

Team members must be appropriately credentialed and have completed required trainings to provide the full array of component services, have regularly scheduled team meetings either in person or by teleconference, and every member of the team must be knowledgeable of the needs and the services available to the specific persons assigned to the team.

Mental health rehabilitative services may be a benefit for persons residing in a nursing facility (NF) when medically necessary as determined by a uniform assessment protocol and determined through preadmission screening and resident review (PASRR) to require specialized services.

The following procedure codes are a benefit for mental health rehabilitation:

| Service Category                     | Procedure Codes | Modifiers                                                                                                                              |
|--------------------------------------|-----------------|----------------------------------------------------------------------------------------------------------------------------------------|
| Day Program for Acute Needs          | H2012           |                                                                                                                                        |

|-------------------------------------------------|------------------------------------------------------------|
| 95                                              | Delivered by synchronous audiovisual technology            |
| ET                                              | Emergent treatment                                         |
| FQ                                              | Delivered by synchronous telephone (audio-only) technology |
| HA                                              | Child/adolescent program                                   |

| Mental Health Rehabilitative Services Modifiers Description |                                   |
|-------------------------------------------------------------|-----------------------------------|
| HQ                                                          | Group setting                     |
| HZ                                                          | Funded by criminal justice agency |
| TD                                                          | Services provided by an RN        |

Psychosocial rehabilitation is not reimbursable on the same day as MHTCM services or skills training and development.

Reimbursement for procedure codes H0034, H2012, H2014, and H2017 are limited to the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| F060            | F061   | F062   | F0630  | F0631  | F0632  | F0633  | F0634  |

| T7412XA         | T7412XD | T7412XS | T7422XA | T7422XD | T7422XS | T7452XA | T7452XD |
| T7452XS         | T7462XA | T7462XD | T7462XS | T7602XA | T7602XD | T7602XS | T7612XA |
| T7612XD         | T7612XS | T7622XA | T7622XD | T7622XS | T7652XD | T7652XS | T7662XA |
| T7662XD         | T7662XS |         |         |         |         |         |         |

No diagnosis is required for crisis intervention services (procedure code H2011); however, all CMS 1500 claim forms require a diagnosis.

A Medicaid provider may only bill for medically necessary mental health rehabilitative services that are provided face-to-face to:

- A Medicaid-eligible person;
- The LAR of a Medicaid-eligible person who is 21 years of age and older (on behalf of the person); or
- The LAR or primary caregiver of a Medicaid-eligible person who is 20 years of age and younger (on behalf of the person).

Rehabilitative services delivered via group modality are limited to an 8-person maximum for adults and a 6-person maximum for children or adolescents (not including LARs or caregivers).

**Note:** *MHR claims submitted by non-LMHAs for dual-eligible persons will be processed by TMHP in the same manner that dual-eligible LMHA/LBHA claims are processed to pay cost-sharing. These claims will be carved-out of managed care and will not be sent to the person's MCO. MHR claims submitted by non-LMHAs for persons with Medicaid-only (all persons who are not dual-eligible) will be carved-in for managed care, meaning that FFS will pay the claims until the person chooses an MCO, and then the claims will be forwarded to the person's MCO for processing and reimbursement.*

### 5.2.3.1 Telemedicine and Telehealth

Providers of MHR services must defer to the needs of the person receiving the services, allowing the mode of service delivery to be accessible, person- and family-centered and primarily driven by the person's choice and not provider convenience.

Providers must provide MHR services to Medicaid eligible persons in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. In addition, providers must deliver, to include delivery by telemedicine or telehealth, MHR services in full accordance with all applicable licensure and certification requirements.

During a Declaration of State of Disaster, the Health and Human Services Commission (HHSC) may issue direction to providers regarding the use of a telemedicine or telehealth service to include the use of a synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein to the extent permitted by Texas law. A Declaration of State of Disaster is when an executive order or proclamation is issued by the governor declaring a state of disaster in accordance with Section 418.014 of the Texas Government Code.

#### 5.2.3.1.1 Synchronous Audiovisual Technology

The following MHR services may be provided by synchronous audiovisual technology if clinically appropriate and safe, as determined by the billing provider, and agreed to by the person receiving services or LAR. In addition, except for crisis intervention services, approval to deliver the services by synchronous audiovisual technology must be documented in the plan of care of the person receiving services. MHR services provided by synchronous audiovisual technology must be billed using modifier 95.

- Medication training and support (procedure code H0034).
- Skills training and development (procedure code H2014).
- Psychosocial rehabilitation services (procedure code H2017).
- Crisis intervention services (procedure code H2011).
- Documented approval of the mode of delivery in the plan of care is not required prior to the delivery of crisis intervention services by synchronous audiovisual technology.

#### 5.2.3.1.2 Synchronous Telephone (Audio-Only) Technology

The following MHR services may be provided by synchronous telephone (audio-only) technology to persons with whom the billing provider has an existing clinical relationship and if clinically appropriate and safe, as determined by the billing provider, and agreed to by the person receiving services or LAR. In addition, except for crisis intervention services, approval to deliver the services by synchronous telephone (audio-only) technology must be documented in the plan of care of the person receiving services. Whenever possible, HHSC encourages face-to-face interaction, such as an in-person visit, as well as the use of synchronous audiovisual technology over synchronous telephone (audio-only) technology of telemedicine and telehealth services. Therefore, providers of MHR services must document in the person's medical record the reason(s) for why services were delivered by synchronous telephone (audio-only) technology. MHR services provided by synchronous telephone (audio-only) technology must be billed using modifier FQ.

- Medication training and support (procedure code H0034)
- Skills training and development (procedure code H2014)
- Psychosocial rehabilitation services (procedure code H2017)
- Crisis intervention services (procedure code H2011)
- Synchronous telephone (audio-only) technology may only be used for crisis intervention services as a back-up mode of delivery only, meaning if the person who is in crisis, not the billing provider, is unwilling or has limited technological capabilities that prevent them from using a synchronous audiovisual platform at the time the crisis intervention services are delivered. Also, the existing clinical relationship requirement is waived.
- Documented approval of the use of synchronous telephone (audio-only) technology in the plan of care is not required prior to the delivery of crisis intervention services. However, providers must document the justification for using synchronous telephone (audio-only) technology to deliver crisis intervention services in the medical record.

An existing clinical relationship occurs when a person has received at least one in-person or synchronous audiovisual MHR, MHTCM, or peer specialist service from the same billing provider within the six months prior to the initial service delivered by synchronous telephone (audio-only)

technology. The six-month requirement for at least one in-person or synchronous MHR, MHTCM, or peer specialist audiovisual service by the same billing provider prior to the initial synchronous telephone (audio-only) service may not be waived.

**Note:** “Same billing provider” refers to providers that are within the same entity, as identified by the entity’s NPI number or numbers, if the entity has multiple locations (i.e., the same LMHA/LBHA or same non-LMHA/private provider).

**Note:** The required in-person or synchronous audiovisual-delivered MHTCM, MHR, or peer specialist service may be delivered by another authorized professional or paraprofessional of the same LMHA/LBHA or the same non-LMHA as the professional or paraprofessional who delivers the service by synchronous telephone (audio-only) technology.

The billing provider is required to conduct at least one in-person or synchronous audiovisual MHR, MHTCM, or peer specialist service every rolling 12 months from the date of the initial service delivered by synchronous telephone (audio-only) technology unless the person receiving services and the billing provider agree that an in-person or synchronous audiovisual service is clinically contraindicated, or the risks or burdens of an in-person or synchronous audiovisual service outweigh the benefits. The decision to waive the 12-month requirement applies to that particular rolling 12-month period and the basis for the decision must be documented in the person’s medical record. Examples of when a synchronous telephone (audio-only) service may be more clinically appropriate or beneficial than an in-person or synchronous audiovisual service include, but are not limited to, the following:

- The person receiving services is located at a qualifying originating site in an eligible geographic area, e.g., a practitioner office in a rural Health Professional Shortage Area.
- An in-person or synchronous audiovisual service is likely to cause disruption in service delivery or has the potential to worsen the person’s condition(s).

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telemedicine and telehealth requirements to include informed consent and privacy and security requirements.

**Note:** The required in-person or synchronous audiovisual-delivered MHTCM, MHR, or peer specialist service may be delivered by another authorized professional or paraprofessional of the same LMHA/LBHA or the same non-LMHA as the professional or paraprofessional who delivers the service by synchronous telephone (audio-only) technology.

### **5.2.3.2 Eligibility and Service Determinations for Persons Who are 20 Years of Age and Younger**

Certain mental health rehabilitative services (crisis intervention services, medication training and support, and skills training and development) are available to persons who are 20 years of age and younger with a diagnosis of mental illness or SED, as defined in the latest edition of APA’s DSM and who:

- Have been determined via the uniform assessment process to have a serious functional impairment;
- Are at risk of disruption of a preferred living or child-care environment due to psychiatric symptoms; or
- Are enrolled in a school system’s special education program because of a SED.

Functioning is assessed using the Child and Adolescent Needs and Strengths Assessment (CANS) standardized assessment tool for persons who are 17 years of age and younger and the Adult Needs and Strengths Assessment (ANSA) for persons who are 18 to 20 years of age, as well as any supplemental assessments, as needed.

Continued eligibility for mental health rehabilitative services for persons who are 17 years of age and younger is based on a reassessment at least every 90 calendar days, or more frequently if clinically indicated by the provider, and reauthorization of services by the provider using the CMBHS software

system. Persons who are 18 years of age and older are reassessed every 180 calendar days, or more frequently if clinically indicated by the provider, and reauthorization of services by the provider using the CMBHS software system.

Assignment of diagnosis in the CMBHS software system is required at any time the APA DSM diagnosis changes and at least annually from the last diagnosis entered in the CMBHS software system.

The LPHA determination of diagnosis must include an interview with the child or youth conducted either in person or by telemedicine or telehealth.

To complete a comprehensive diagnosis for a child or youth, documentation of the required diagnostic criteria according to the latest version of the APA's DSM, as well as the specific level of functioning, must be included in the child's or youth's record. This information must be included as part of the required assessment information.

### **5.2.3.3 Eligibility and Service Determinations for Persons Who Are 21 Years of Age and Older**

Persons who are 21 years of age and older with SMI, determined to be medically necessary by a uniform assessment protocol, are eligible for mental health rehabilitative services if the adult is:

- A resident of the state of Texas;
- Determined by a uniform assessment and clinician observation to require mental health rehabilitative services; and
- An LPHA has determined that such services are medically necessary.

Mental health rehabilitative services are available to persons who are 21 years of age and older who have an SMI and significant functional impairments which require crisis resolution or ongoing treatment. Functioning is assessed using the ANSA standardized assessment tool.

Continued eligibility for adults for mental health rehabilitation services is based on a reassessment at least every 180 calendar days, or more frequently if clinically indicated by the provider, and reauthorization of services by the provider of mental health rehabilitation services using the CMBHS software system.

Assignment of diagnosis in the CMBHS software system is required at any time the APA DSM diagnosis changes and at least annually from the last diagnosis entered in the CMBHS software system.

The LPHA determination of diagnosis must include an interview with the adult conducted either in person or by telemedicine or telehealth.

To complete a comprehensive diagnosis for an adult, documentation of the required diagnostic criteria according to the latest version of the APA's DSM, as well as the specific level of functioning, must be included in the adult's record. This information must be included as part of the required assessment information.

Adults with a diagnosis of schizophrenia or bipolar disorder are automatically eligible for continued services. Adults with a diagnosis of major depressive disorder whose level of functioning qualified them initially are also automatically eligible for continued services, regardless of whether their level of functioning improved. Adults with any other mental health diagnosis are eligible should their level of functioning continue to be significantly impaired, as evidenced by the results of a standardized assessment tool called the ANSA.

### **5.2.3.4 Treatment Planning**

Mental health rehabilitative services are part of a person's plan of care and are intended to:

- Reduce a person's functional impairments resulting from SMI for adults.
- Reduce SED in children or youth.

- Restore a person to their optimal functioning level in the community.

The treatment planning process for mental health rehabilitative services requires the active participation of the Medicaid eligible person or LAR when necessary due to the person's age or legal status. Plans of care are based on a comprehensive assessment and must address the person's strengths, areas of need, the person's preferences, and descriptions of the person's treatment goals.

### **5.2.3.5 Medication Training and Support**

Medication training and support services consist of education and guidance about medications and their possible side effects. It is curriculum-based training and guidance that serves as an initial orientation for the person in understanding the nature of their mental illnesses or emotional disturbances and the role of medications in ensuring symptom reduction and increased tenure in the community.

Medication training and support includes:

- Assisting the person to manage symptomology and maximize functioning;
- Understanding the concepts of recovery and resilience within the context of the SMI or SED;
- Developing an understanding of the relationship between mental illness and the medications prescribed to treat the illness;
- The interaction of medication with other medications, diet, and mood altering substances;
- Understanding the overdose precautions of the person's medication;
- The identification and management of potential side effects;
- Learning self-administration of the person's medication and;
- Necessity of taking medications prescribed and following the physician's or other qualified health care professional's orders.

Medication training and support is available to eligible children, youth, and adults. The LAR or primary caregiver may receive medication training and support services on behalf of an eligible adult, child or youth.

### **5.2.3.6 Psychosocial Rehabilitative Services**

Psychosocial rehabilitative services are social, behavioral, and cognitive interventions provided by members of a person's therapeutic team that build on strengths and focus on restoring the person's ability to develop and maintain social relationships, occupational or educational achievement, and other independent living skills that are affected by or the result of an SMI in persons who are 18 years of age and older.

Psychosocial rehabilitative services include independent living services, coordination services, and employment, housing, and medication-related services. Psychosocial rehabilitative services may also address the impact of co-occurring disorders upon the person's ability to reduce symptomology and increase daily functioning.

If psychosocial rehabilitative services are in the treatment plan, the treatment plan cannot simultaneously include skills training and development or targeted case management services.

Psychosocial rehabilitative services may not be provided to a person who is currently admitted to a crisis stabilization unit.

#### **5.2.3.6.1 Independent Living Services**

Independent living services assist a person in acquiring the most immediate, fundamental functional skills needed to enable the person to reside in the community and avoid more restrictive levels of treatment or reducing behaviors or symptoms that prevent successful functioning in the person's environment of choice.

Independent living services include skills training and/or supportive interventions that focus on the improvement of communication skills, appropriate interpersonal behaviors, and other skills necessary for independent living or, when age appropriate, functioning effectively with family, peers, and teachers.

Training for independent living includes skills related to:

- Personal hygiene.
- Transportation utilization.
- Money management.
- The development of natural supports.
- Access to needed services in the community (e.g., medical care, substance use services, legal services, living accommodations).
- Social skills (e.g., communicating one's needs to strangers and making appropriate choices for the use of leisure time).

#### 5.2.3.6.2 Coordination Services

Coordination services are training activities that assist a person in improving his or her ability to gain and coordinate access to necessary care and services appropriate to the needs of the person.

Training for coordination skills includes instruction and guidance in such areas as:

- Identifying areas of need across all life domains.
- Prioritizing needs and setting goals.
- Identifying potential service providers and support systems.
- Initiating contact with providers and support systems.
- Participating in the development and subsequent revisions of their plan of care.
- Coordinating their services and supports.
- Advocating for necessary changes and improvements to ensure that they obtain maximum benefit from their services and supports.

#### 5.2.3.6.3 Employment-Related Services

Employment-related services provide supports and skills training that are not job-specific and focus on developing skills to reduce or manage the symptoms of SMI that interfere with a person's ability to make vocational choices or obtain or retain employment.

Included in employment-related services are activities such as:

- Skills training related to task focus, task completion, planning and managing activities to achieve outcomes, personal hygiene, grooming and communication, and skills training related to securing appropriate clothing, developing natural supports, and arranging transportation.
- Establishing supportive contacts related to the school or work-site situation to reduce or manage behaviors or symptoms related to the person's mental illness or emotional disturbance that interfere with job performance or progress towards the development of skills that would enable the person to obtain or retain employment.

#### 5.2.3.6.4 Housing-Related Services

Housing-related services develop a person's strengths and abilities to manage the symptoms of the person's SMI that interfere with the person's capacity to obtain or maintain tenure in independent integrated housing.

Included in housing-related services are activities such as:

- Skills training related to home maintenance and cleanliness.
- Problem solving with landlord and other residents.
- Maintaining appropriate interpersonal boundaries.
- Establishing supportive contacts related to the housing situation to reduce or manage behaviors or symptoms related to the person's mental illness or emotional disturbance that interfere with maintaining independent integrated housing.

#### 5.2.3.6.5 Medication-Related Services

Medication-related services provide individualized training regarding the person's medication adherence and is different from medication-training and support.

Services consist of training and supportive interventions that focus on person-specific needs and goals regarding the administration of medication, monitoring efficacy and side effects of medication, and other nursing services that enable the person to attain or maintain an optimal level of functioning.

Medication-related services do not include services or activities that are incidental to services performed by a physician (or other qualified health care professional) during an evaluation and management services visit.

#### 5.2.3.7 Skills Training and Development

Skills training and development is training provided to an eligible person, the LAR, or primary caregiver on behalf of an eligible adult, child, or youth.

The training addresses:

- SMI or SED and symptom-related problems that interfere with the person's functioning and living, working, and learning environment.
- Provides opportunities for the person to acquire and improve skills needed to function as appropriately and independently as possible in the community.
- The person's community integration and increases his or her community tenure.

Skills training and supportive interventions focus on the improvement of communication skills, appropriate interpersonal behaviors, and other skills necessary for independent living or, when age appropriate, functioning effectively with family, peers, and teachers.

Skills training and development may include:

- Skills related to personal hygiene.
- Pro-social skills.
- Assertiveness skills.
- Anger management skills.
- Stress reduction techniques.
- Communication skills.
- Transportation utilization.
- Money management.
- The development of natural supports.
- Access to needed services in the community, e.g., medical care, substance use services, legal services, living accommodations.

- Social skills (e.g., communicating one's needs to strangers and making appropriate choices for the use of leisure time).

Skills training and development services consist of increasing the LAR's or primary caregiver's understanding of and ability to respond to the person's needs identified in the uniform assessment or documented in the treatment plan.

Persons receiving skills training and development are not eligible to simultaneously receive psychosocial rehabilitative services and both services should not be simultaneously listed in the person's treatment plan.

#### **5.2.3.8 Crisis Intervention**

Crisis intervention services are intensive community-based one-to-one services provided to persons who require services to control acute symptoms that place the person at immediate risk of hospitalization, incarceration, or placement in a more restrictive treatment setting.

This service includes assessment, behavioral skills training, problem-solving, and reality orientation to help a person identify and manage their symptoms of mental illness, and cope with stressors.

Crisis intervention services may be provided in extended observation or crisis residential units. Crisis intervention services may not be provided to a person who is currently admitted to a crisis stabilization unit.

Crisis intervention services consist of the following interventions:

- An assessment of dangerousness of the person to self or others
- The provision of emergency care services that include crisis screening and response, telephone access, emergency case services, urgent care services, routine care services, and access to emergency medical/crisis services
- Behavior skills training to assist the person in reducing distress and managing symptoms
- Problem-solving
- Reality orientation to help the person identify and manage his or her symptoms of SMI or SED
- Providing instruction, structure, and emotional support to the person in adapting to and coping with immediate stressors

Crisis intervention services are available to eligible children youth and adults.

#### **5.2.3.9 Day Programs for Acute Needs**

Day programs for acute needs provide short term, intensive treatment to an eligible persons who is 18 years of age or older and who requires multidisciplinary treatment to stabilize acute psychiatric symptoms or prevent admission to a more restrictive setting. Day program services are a site-based treatment provided in a group modality.

Day programs for acute needs are provided in a highly structured and safe environment with constant supervision and ensure an opportunity for frequent interaction between the adult and staff members.

Day programs for acute needs must at all times have sufficient staff to ensure safety and program adequacy according to an established staffing ratio and staff response times. This service focuses on intensive, medically-oriented, multidisciplinary interventions such as behavior skills training, crisis management, and nursing services that are designed to stabilize acute psychiatric symptoms.

These services may be provided in a residential facility; however, none of the residential facilities can contain greater than 16 beds.

Day programs for acute needs include:

- Psychiatric nursing services.

- Pharmacological instruction that addresses medication issues related to the crisis precipitating the need for provision of day programs for acute needs.
- Symptom management training.
- Functional skills training.

Day programs for acute needs must, at all times, have a sufficient number of staff members to ensure safety and program adequacy, and, at a minimum, include:

- One RN for every 16 persons at the day program's location,
- One physician to be available by phone, with a response time not to exceed 15 minutes,
- Two staff members who are QMHP-CSs, CSSPs, or peer providers at the day program's location,
- One additional QMHP-CS who is not assigned full-time to another day program to be physically available, with a response time not to exceed 30 minutes,
- Additional QMHP-CSs, CSSPs, or peer providers at the day program's location sufficient to maintain a ratio of one staff member to every four persons receiving care.

### **5.2.3.10 Prior Authorization Requirements**

#### **5.2.3.10.1 Initial Authorization**

Except for crisis intervention services, providers of mental health rehabilitation services must not bill Texas Medicaid prior to the authorization or reauthorization of services.

Eligibility and continued eligibility determinations occur at the facility (provider) that is providing mental health rehabilitative services using the CMBHS software system.

Criteria used to make these service determinations are from the recommended LOC of the person generated by the CMBHS software system as derived from the uniform assessment, the needs of the person, and the Texas Resilience and Recovery (TRR) Utilization Management Guidelines.

Providers of mental health rehabilitative services must ensure the following:

- A QMHP-CS or LPHA performs a screening for eligibility using the uniform assessment;
- An LPHA determines the diagnosis which must include an interview with the person conducted either in-person or by telemedicine or telehealth;
- The clinical needs of the person are evaluated to determine if the amount of mental health rehabilitation services associated with the recommended LOC, described in the TRR Utilization Management Guidelines, is sufficient to meet those needs; and
- An LPHA reviews the recommended LOC and verifies whether the services are medically necessary.

If the provider determines that an LOC other than the recommended LOC is more appropriate for the person, then the provider must submit a prior authorization 'deviation' request that includes:

- The word 'Deviation' with a note that the request is for prior authorization of an LOC that is higher or lower than initially recommended and;
- The clinical justification for the request.

The clinical justification must include the specific reason(s) why the person requires interventions higher or lower than the recommended LOC. Refusal of recommended LOC by the person receiving services may be noted as part of the justification.

For persons enrolled in managed care, LMHAs/LBHAs and non-LMHAs (also referred to as private providers) contracted with MCOs must submit prior authorization requests to the MCO with whom the person is enrolled. MCOs must follow the requirements set forth in the Uniform Managed Care Manual regarding utilization management for mental health rehabilitation services. MCOs may choose to waive prior authorization submission requirements.

For persons in fee-for-service (FFS) Medicaid, LMHAs/LBHAs must obtain prior authorization from their internal utilization management department using the CMBHS software system. Non-LMHAs must obtain prior authorization from the TMHP Prior Authorization Department using the Special Medical Prior Authorization (SMPA) request form and the information obtained from the CMBHS software system. When completing the SMPA form for prior authorization, non-LMHAs must complete the following sections of the form as follows:

- Section A – Client information
  - Complete as indicated in the form
- Section B - Requested procedure or service information
  - The type of request is ‘Other’
  - The expected dates of service are the start and end dates provided by CMBHS
  - The procedure related CPT code is the code for the type of mental health rehabilitation service (e.g., medication training and support, psychosocial rehabilitation, and skills training and development) and the appropriate modifier(s)
  - The comments text box must indicate if the prior authorization request is an initial assessment or reassessment
- Section C – To be completed by requesting physician or requesting provider
  - The diagnosis(es) is/are the ICD-10 primary diagnosis and related ICD-10 diagnosis code(s)
  - The statement of medical necessity section must indicate the recommended LOC generated by CMBHS software system. If the request is a deviation from the recommended LOC, then the provider must include the following:
    - The word ‘Deviation’ with a note that the request is for prior authorization of a LOC that is higher or lower than recommended LOC;
    - The clinical justification for the request to include the specific reason(s) for why the person requires interventions outside the recommended LOC (refusal of recommended LOC by the person receiving services may be noted as part of the justification); and
    - If requested by the TMHP Prior Authorization Department, a copy of the CANS or ANSA functional assessment.
  - Complete provider information as indicated in the form
    - The SMPA form must be signed and dated within 30 calendar days of the expected start date of services.

Changes to the treatment plan regarding type, amount, or duration of services must be approved by an LPHA practicing within the scope of their licensure.

All plans of care are subject to retrospective review by the state.

### 5.2.3.10.2 Reauthorization Requirements

To determine the type, amount, and duration of mental health rehabilitation services, providers must ensure that, at a minimum, a QMHP-CS administers the uniform assessment and obtains a recommended LOC from the CMBHS software system for the person receiving mental health rehabilitation services:

- Every 90 calendar days for persons 20 years of age and younger; or
- Every 180 calendar days for persons 21 years of age and older.

**Note:** *Providers must follow the same process that is used for initial authorization for reauthorization of services at the specified intervals indicated above (i.e., every 90 or 180 calendar days, as applicable).*

Prior to the expiration of the authorization period or depletion of the amount of services authorized, providers must make a determination of whether the person continues to need mental health rehabilitative services. An LPHA must also determine whether the continuing need for mental health rehabilitative services meets the definition of medical necessity.

If the determination is that the person continues to need mental health rehabilitative services and that such services are medically necessary, the provider must:

- Request another authorization for the same type and amount of mental health rehabilitative service previously authorized; or
- Submit a request, with documented clinical reasons for such request, to change the type or amount of mental health rehabilitative services previously authorized if:
  - The provider determines the type or amount of mental health rehabilitative services previously authorized is inappropriate to address the person's needs.
  - The criteria described in the TRR Utilization Management Guidelines for changing the type or amount of mental health rehabilitative services has been met.

### 5.2.3.11 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered. An LPHA must document in the person's medical record that mental health rehabilitative services are medically necessary when the services are authorized and reauthorized.

Persons determined to need mental health rehabilitative services must have a treatment plan developed by the Medicaid enrolled provider of mental health rehabilitative services that describes in writing the type, amount, and duration of mental health rehabilitative services determined to be medically necessary to meet the needs of the person.

A rehabilitative services provider must document the following for all mental health rehabilitative services:

- The name of the person to whom the service was provided
- The type of service provided
- The specific goal or objective addressed, and the modality and method used to provide the service
- The date the service was provided
- The start and end time of the service
- The location where the service was provided
- The signature of the staff member providing the service and a notation of their credentials
- Any pertinent event or behavior relating to the person's treatment which occurs during the provision of the service

- The outcome or progress in achieving treatment plan goals

In addition to the general requirements described above, when providing crisis services, a provider must document the following information:

- Risk of suicide or homicide
- Substance use
- Trauma, abuse, or neglect
- The outcome of the crisis (e.g., person in hospital, person with friend and scheduled to see doctor at 9:00 a.m. the following day)
- All actions (including rehabilitative interventions and referrals to other agencies) used by the provider to address the problems presented
- The response of the person, and if appropriate, the response of the LAR and family members
- Any pertinent event or behavior relating to the person's treatment that occurs during the provision of the service
- Follow up activities that may include referral to another provider

Documentation for day programs for acute needs must be made daily. Documentation must be made after each face-to-face contact occurs to provide the mental health rehabilitative service for all other services.

An LPHA must, within two business days after crisis intervention services are provided, determine whether the crisis intervention services met the definition of medical necessity. If medical necessity is met then the LPHA must document the medical necessity.

Services are subject to retrospective review and recoupment if documentation does not support the service billed.

A provider must retain documentation in compliance with applicable federal and state laws, rules, and regulations.

Documentation requirements for a telemedicine or telehealth service are the same as for an in-person visit and must accurately reflect the services rendered. Documentation must identify the means of delivery when provided by telemedicine or telehealth.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telemedicine and telehealth documentation requirements including requirements for informed consent.

### 5.2.3.12 Exclusions

Persons receiving psychosocial rehabilitation services are not eligible to simultaneously receive skills training and development or MHTCM services.

Mental health rehabilitative services do not include any of the following services that must be billed to Texas Medicaid:

- Rehabilitative services provided:
  - Before the establishment of a diagnosis of mental illness and authorization of services
  - To persons who reside in an institution for mental diseases
  - To general acute care hospital inpatients
- Services to residents of institutions that furnish food, shelter, and treatment to four or more unrelated persons

- Services to nursing facility residents who have not been identified through the PASSR process as needing specialized mental health services
- Services to inmates of public institutions
- Job task-specific vocational services
- Educational services
- Room and board residential costs
- Services that are an integral and inseparable part of another Medicaid-reimbursable service, including MHTCM services, residential rehabilitative behavioral health services, institutional and waiver services
- Services that are covered elsewhere in the state Medicaid plan
- Services to persons with a single diagnosis of intellectual or developmental disability or substance use disorder who do not have a co-occurring diagnosis of mental illness in adults or SED in children
- Inpatient hospital services
- Respite services
- Family support services

### **5.2.3.13 Non-reimbursable Activities**

A Medicaid provider will not be reimbursed for a mental health rehabilitative service:

- That is not included in the person's treatment plan (except for crisis intervention services and psychosocial rehabilitative services provided in a crisis situation).
- That is not authorized, except for crisis intervention services.
- Provided in excess of the amount authorized.
- Provided outside of the duration authorized.
- Provided to a person receiving MHTCM services.
- That is not documented.
- Provided to a person who does not meet the eligibility criteria.
- Provided to a person who does not have a current uniform assessment (except for crisis intervention services).
- Provided to a person who is not present, awake, and participating during such service.

A Medicaid provider will not be reimbursed for a crisis service provided to a person who does not have an SMI.

The cost of the following activities is included in the Medicaid mental health rehabilitative services reimbursement rate(s) and may not be directly billed by the Medicaid provider:

- Developing and revising the treatment plan and interventions that are appropriate to a person's needs.
- Staffing and team meetings to discuss the provision of mental health rehabilitative services to a specific person.
- Monitoring and evaluating outcomes of interventions, including contacts with a person other than the person receiving services.
- Documenting the provision of mental health rehabilitative services.
- A staff member's travel time to and from a location to provide mental health rehabilitative services.

- All services provided within a day program for acute needs that are delivered by a staff member, including services delivered in response to a crisis or an episode of acute psychiatric symptoms.
- Administering the uniform assessment to persons who are receiving mental health rehabilitative services.

### 5.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including MH and IDD services.

MH and IDD services are subject to retrospective review and recoupment if documentation does not support the service billed.

### 5.4 Claims Filing and Reimbursement

IDD service coordination, MHTCM, and mental health rehabilitative services must be submitted to TMHP in an approved electronic claims format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply them.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

Services are cost reimbursed in accordance with 1 TAC §§355.743, 355.746, and 355.781. Providers can refer to the [OFL](#) or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

#### 5.4.1 Managed Care Clients

Claims for persons in managed care must be submitted to the client's MCO. Mental health targeted case management and mental health rehabilitative services that are funded by a criminal justice agency (submitted with modifier HZ) are carved out and must be submitted to TMHP.

#### 5.4.2 Reimbursement Reductions

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied.

Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates/rate-changes](http://www.tmhp.com/resources/rate-and-code-updates/rate-changes).

**Referto:** "Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on electronic claims submissions.

Subsection 6.1, "Claims Information" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

## 6 Peer Specialist Services

### 6.1 Services, Benefits, Limitations, and Prior Authorization

Peer specialist services (procedure code H0038) for a mental health or substance use condition, or both, are a benefit of Texas Medicaid for persons who are 21 years of age and older, and who have peer specialist services included as a component of their person-centered recovery plan.

Peer specialist services are recovery-oriented, person-centered, relationship-focused, voluntary, and trauma-informed.

Peer specialist services include the following:

- Recovery and wellness support services, which include providing information and support for recovery planning.
- Mentoring, which includes serving as a role model and helping to find needed community resources and services.
- Advocacy, which includes providing support during stressful or urgent situations and helping to ensure that the person's rights are respected. Advocacy may also include encouraging the person to advocate for him or herself to obtain services.

Peer specialist services are based on a mutual relationship between the peer specialist and the Medicaid eligible person. A peer specialist uses his or her lived experience to support the person with the following:

- Achieving the goals and objectives of the person's individualized recovery plan
- Skill development
- Problem solving strategies
- Coping mechanisms for stressors and barriers encountered when recovering from a mental health condition or a substance use disorder

Peer specialist services can be delivered individually or in a group setting.

#### 6.1.1 Telehealth Service

Providers of peer specialist services must defer to the needs of the person receiving the services, allowing the mode of service delivery to be accessible, person- and family-centered, and primarily driven by the person's choice and not provider convenience.

Providers must provide peer specialist services to Medicaid eligible persons in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. In addition, providers must deliver, to include delivery by telemedicine or telehealth, peer specialist services in full accordance with all applicable licensure and certification requirements.

During a Declaration of State of Disaster, the Health and Human Services Commission (HHSC) may issue direction to providers regarding the use of a telemedicine or telehealth service to include the use of a synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein to the extent permitted by Texas law. A Declaration of State of Disaster is when an executive order or proclamation is issued by the governor declaring a state of disaster in accordance with Section 418.014 of the Texas Government Code.

### 6.1.1.1 Synchronous Audiovisual Technology

Peer specialist services may be provided by synchronous audiovisual technology if clinically appropriate and safe, as determined by the billing provider, and agreed to by the person receiving services. In addition, approval to deliver the services by synchronous audiovisual technology must be documented in the person-centered recovery plan of the person receiving services. Peer specialist services provided by synchronous audiovisual technology must be billed using modifier 95.

### 6.1.1.2 Synchronous Telephone (Audio-Only) Technology

Peer specialist services may be provided by synchronous telephone (audio-only) technology to persons with whom the billing provider has an existing clinical relationship and if clinically appropriate and safe, as determined by the billing provider, and agreed to by the person receiving services. In addition, approval to deliver the services by synchronous telephone (audio-only) technology must be documented in the person-centered recovery plan of the person receiving services.

Whenever possible, HHSC encourages face-to-face interaction, such as an in-person visit, as well as the use of synchronous audiovisual technology over synchronous telephone (audio-only) technology of telemedicine and telehealth services. Therefore, providers of peer specialist services must document in the person's medical record the reason(s) for why services were delivered by synchronous telephone (audio-only) technology. Peer specialist services provided by synchronous telephone (audio-only) technology must be billed using modifier FQ.

An existing clinical relationship occurs when a person has received at least one in-person or synchronous audiovisual peer specialist, MHTCM, or MHR service from the same billing provider within the six months prior to the initial service delivered by synchronous telephone (audio-only) technology. The six-month requirement for at least one in-person or synchronous audiovisual peer specialist, MHTCM, or MHR service from the same billing provider prior to the initial synchronous telephone (audio-only) service may not be waived.

**Note:** “Same billing provider” refers to providers that are within the same entity or organization, as identified by the entity's or organization's NPI number or numbers, if the entity or organization has multiple locations (i.e., the same LMHA/LBHA, comprehensive provider agency of mental health targeted case management or rehabilitative services, clinic/group practice, FQHC, rural health clinic, or chemical dependency treatment facility, or opioid treatment provider) presuming all other applicable state and federal laws and regulations are followed.

**Note:** The required in-person or synchronous audiovisual delivered peer specialist, MHTCM, or MHR service may be delivered by another authorized professional or paraprofessional of the same billing provider as the professional or paraprofessional who delivers the service by synchronous telephone (audio-only) technology.

The billing provider is required to conduct at least one in-person or synchronous audiovisual peer specialist, MHTCM, or MHR service every rolling 12 months from the date of the initial service delivered by synchronous telephone (audio-only) technology unless the person receiving services and the billing provider agree that an in-person or synchronous audiovisual service is clinically contraindicated, or the risks or burdens of an in-person or synchronous audiovisual service outweigh the benefits. The decision to waive the 12-month requirement applies to that particular rolling 12-month period and the basis for the decision must be documented in the person's medical record. Examples of when a synchronous telephone (audio-only) service may be more clinically appropriate or beneficial than an in-person or synchronous audiovisual service include, but are not limited to, the following:

- The person receiving services is located at a qualifying originating site in an eligible geographic area, e.g., a practitioner office in a rural Health Professional Shortage Area.

- An in-person or synchronous audiovisual service is likely to cause disruption in service delivery or has the potential to worsen the person's condition.

**Note:** *The required in-person or synchronous audiovisual delivered peer specialist, MHTCM, or MHR service may be delivered by another authorized professional or paraprofessional of the same billing provider as the professional or paraprofessional who delivers the service by synchronous telephone (audio-only) technology.*

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telemedicine and telehealth requirements to include informed consent and privacy and security requirements.

## 6.2 Peer Specialist Requirements

Peer specialist services may be delivered as part of a coordinated, comprehensive, and individualized approach to treating a person's mental health or substance use condition, or both, if the peer specialist is employed by one of the following Medicaid-enrolled provider types:

- Clinic/group practices that treat behavioral health conditions
- Physicians (M.D.s), osteopaths (D.O.s), and nurse practitioners (NPs), clinical nurse specialists (CNSs), and physician assistants (PAs) that treat behavioral health conditions
- Psychologists, licensed clinical social workers, licensed marriage and family therapists, and licensed professional counselors
- Comprehensive provider agencies of targeted case management and mental health rehabilitative services
- Local mental and behavioral health authorities
- Chemical dependency treatment facilities
- Federally qualified health centers (FQHCs)
- Rural health clinics (RHCs)
- Opioid Treatment Providers (OTPs)

Only clinic/group practices or behavioral health care individual providers (M.D., D.O., NP, CNS, and PA) with a behavioral health focus may be reimbursed for peer specialist services.

Peer specialists coordinate with all behavioral health service providers involved in the person's care and utilize a person-centered, recovery-oriented approach to treatment planning and service delivery.

Non-Medicaid enrolled providers that employ peer specialists can contract with one of the listed Medicaid-enrolled provider types to furnish peer specialist services as part of a continuum of comprehensive treatment services. Subcontracted peer specialist services must also be part of the coordinated, comprehensive, and individualized person-centered recovery plan.

A peer specialist must meet all of the following criteria:

- Be at least 18 years of age.
- Have lived experience with a mental health or substance use condition, or both.
- Have a high school diploma or General Equivalency Diploma (GED).
- Be willing to appropriately share his or her own recovery story with the person receiving services.
- Demonstrate current self-directed recovery.
- Pass criminal history and registry checks as described in 1 TAC §354.3201.

A peer specialist must not:

- Practice psychotherapy.
- Make clinical or diagnostic assessments.
- Dispense expert opinions.
- Engage in any service that requires a license.
- Falsify any documentation related to application, training, testing, certification, or services provided.

### **6.2.1 Certification**

A peer specialist must complete all required training and certification before providing services. To be certified as a peer specialist as specified in 1 TAC §354.3155, a candidate must complete the following training:

- Required orientation
- Self-assessment activities
- Core training delivered by a certified training entity
- Supplemental training in one of two specialty areas:
  - Mental health peer specialist
  - Recovery support peer specialist

The candidate can apply for initial certification after successful completion of core and one supplemental training and a knowledge assessment.

A peer specialist who is initially certified may begin to deliver Medicaid billable services, if participating in a supervised internship at their place of employment. The internship consists of 250 hours of supervised work experience to be completed within a 6-month period. An extension may be granted by the certification entity should a peer be unable to complete the required hours within the 6-month time frame.

Independent study, such as reading or watching instructional videos, does not count toward the required supervised work experience hours. Time spent receiving supervision, other than the observation of the peer specialist providing services, does not count toward the required hours.

After completing the required internship hours, certified peer specialists can apply for renewed certification through the approved certification entity. Peer specialists must renew their certification every two years, which requires continuing education hours.

Certified peer specialists should only deliver services in their specialty area.

### **6.2.2 Supervision**

As defined in 1 TAC §354.3003, providers may be reimbursed for peer specialist services rendered under the supervision of one of the following:

- Qualified credentialed counselor (QCC)
- Licensed practitioner of the healing arts (LPHA)
- Qualified mental health professional (QMHP), with a QCC or LPHA supervising the QMHP
- Qualified peer supervisor (QPS), with a QCC or LPHA supervising the QPS

Supervision must focus on a peer specialist's provision of services, including:

- Review of cases and activities

- Skill building
- Problem resolution
- Professional growth

Supervision may also include aspects specific to the organization, such as following organizational policy or other administrative matters.

Peer specialist supervision may be provided as follows:

- Individually
- In a group setting
- Face-to-face
- By teleconference
- Through observation of the peer specialist providing services

Supervision must occur at least once weekly for a peer specialist with an initial certification, at least once monthly for a peer specialist with a two-year certification, or more frequently at the request of the peer specialist.

A QCC or LPHA who supervises a QMHP or QPS must provide individual or group supervision at least once monthly and conduct an observation of the QMHP or QPS supervising the peer specialist at a self-determined frequency based on the QMHP's or QPS's skill level.

A supervisor must successfully complete supervisory training for peer specialist services and the recovery model from a certified training entity before supervising a peer specialist. Supervisor training must include instruction about:

- The distinction between peer support and therapy.
- The role of peer support in building and sustaining recovery goals.
- Advocacy for peer specialists and peer specialist services.
- Job performance review, including strengths-based, timely, and respectful feedback.
- Supervisory skills, such as how to work with a variety of personality types and communication styles.

After completing training, each candidate must successfully complete a knowledge assessment before receiving approval to supervise a peer specialist from a certified training entity. Peer specialist supervisor certification must be renewed every two years, which requires continuing education hours.

### **6.3 Prior Authorization Requirements**

Prior authorization is not required for the first 104 units of peer specialist services in a rolling 6-month period. Prior authorization is required once a person exceeds 104 units of individual or group peer specialist services in a rolling 6-month period.

Prior authorization requests for procedure code H0038 must be submitted to TMHP using the Special Medical Prior Authorization (SMPA) Request Form. Providers must retain a copy of the signed and dated prior authorization form in the person's medical record. Requests for continued services must demonstrate all of the following:

- The person continues to meet eligibility criteria as outlined in the statement of benefits above, including current DSM diagnoses
- The current person-centered recovery plan and goals
- The progress made relative to the goals outlined in the person-centered recovery plan

- The need for continued services

Requests must indicate how many additional units of service are being requested (up to 30 units are allowed per request) and the type (individual or group), as well as the expected time frame when services will be delivered.

**Note:** *The requesting provider may be asked for additional information to clarify or complete a request.*

Retrospective review may be performed to ensure that the documentation supports the medical necessity of the requested service.

**Referto:** “Section 5: Fee-for-Service Prior Authorizations” (*Vol. 1, General Information*) for more information on submitting prior authorization methods.

## 6.4 Documentation Requirements

The Medicaid-enrolled provider must ensure proper documentation of all peer specialist services that are rendered. Documentation of peer specialist services must:

- Indicate the date, time, and place of service.
- Summarize the purpose and content of the services.
- Include the specific strategies and activities utilized as related to the goals of the person’s plan of care.

Peer specialist supervisors must document all supervisory sessions and maintain the records in the peer specialist’s employee personnel file. Documentation requirements for a telemedicine or telehealth service are the same as for an in-person visit and must accurately reflect the services rendered.

Documentation must identify the means of delivery when provided by telemedicine or telehealth.

**Referto:** *The Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telemedicine and telehealth documentation requirements including requirements for informed consent.

### 6.4.1 Reimbursement

Reimbursement for procedure code H0038 is limited to substance use disorders and mental health conditions, including, but not limited to:

- Schizophrenia spectrum and other psychotic disorders.
- Bipolar and related disorders.
- Depressive disorders.
- Anxiety disorders.
- Obsessive-compulsive and related disorders.
- Trauma and stressor related disorders.
- Feeding and eating disorders.

Procedure code H0038 is limited to 104 units in a rolling six-month period. This limitation may be exceeded with documentation of medical necessity for the additional services.

Peer specialist services will also be limited as follows:

- Must not be delivered simultaneously with other behavioral health services that are delivered to the person or group of persons receiving services
- Must be delivered in person and not through advanced telecommunications technology

- Limited to 12 total persons per group session

#### 6.4.2 Claim Filing

Procedure code H0038 must be submitted with one of the following specialty modifiers:

- Modifier HE-mental health
- Modifier HF-substance use

If services are provided in a group setting, procedure code H0038 must also be submitted with modifier HQ.

Mental health rehabilitative services must be billed separately from peer specialist services.

FQHCs and RHCs should submit claims using procedure code H0038 for informational purposes only.

| Modifier | Description                                                |
|----------|------------------------------------------------------------|
| 95       | Delivered by synchronous audiovisual technology            |
| FQ       | Delivered by synchronous telephone (audio-only) technology |
| HE       | Mental health program                                      |
| HF       | Substance abuse program                                    |
| HQ       | Group setting                                              |

#### 6.5 Exclusions

The following services are not a benefit of Texas Medicaid:

- Record keeping or documentation activities
- Services that are not provided directly to the person receiving services

### 7 Certified Family Partners

#### 7.1 Services, Benefits, Limitations, and Prior Authorization

Certified family partner (CFP) services, also referred to as family partner support services or family peer support services, are benefits of Texas Medicaid for parents (birth, adoptive, and foster), legally authorized representatives (LARs), or primary caregivers of a Medicaid eligible child or youth (20 years of age and younger) who is diagnosed with a serious emotional disturbance (SED) or a mental health or substance use condition, as defined in the current edition of the American Psychiatric Association's (APA's) *Diagnostic and Statistical Manual of Mental Disorders (DSM)*, and who has CFP services included as a component in their person-centered and trauma-informed recovery plan (henceforth, referred to as the plan of care).

CFPs provide services directly to the parents, LARs, or primary caregivers, not to the Medicaid eligible child or youth.

CFP services are an array of formal and informal services and supports that include:

- Introducing parents, LARs, or primary caregivers to the mental health and substance use system
- Modeling advocacy skills
- Providing education and information
- Making referrals
- Providing skills training

- Assisting in identifying supports
- Conducting support groups
- Helping with navigating systems, e.g., juvenile justice, child protective services, independent school districts

CFP services may be provided in an office, home, outpatient hospital, other locations, and by telehealth if certain conditions are met.

**Referto:** Section 7.1.4, “Telehealth” in the *Behavioral Health and Case Management Services Handbook* (Vol. 2, *Provider Handbooks*) for more information.

CFP services may be delivered as part of a coordinated, comprehensive, and individualized approach to treating a Medicaid eligible child’s or youth’s SED or mental health or substance use condition. CFPs may not bill Medicaid directly for family partner support services. CFPs must be employed by one of the following Medicaid enrolled provider types that may submit claims for CFP services rendered:

- Clinic and group practices treating behavioral health conditions
- Physicians, APRNs, and PAs treating behavioral health conditions
- Licensed psychologists, licensed clinical social workers, licensed marriage and family therapists, and licensed professional counselors
- Comprehensive provider agencies of mental health targeted case management and mental health rehabilitative services
- LMHAs/LBHAs
- Chemical dependency treatment facilities
- FQHCs
- RHCs
- Opioid treatment providers

Providers of CFP services must coordinate with all behavioral health service providers involved in the care of the Medicaid eligible child or youth, and utilize a person and family-centered, recovery-oriented approach to recovery planning and service delivery.

Non-Medicaid enrolled providers who employ CFPs may choose to contract with one of the above Medicaid enrolled providers to furnish the services as part of a continuum of comprehensive treatment services. Subcontracted CFP services must also be part of the coordinated, comprehensive, and individualized plan of care of the Medicaid eligible child or youth.

### **7.1.1 Certification Requirements**

A CFP is a parent (birth, adoptive, or foster), LAR, or primary caregiver with lived experience parenting or raising a child or youth with a SED or mental or substance use condition and who has received specialized training and passed a certification exam to provide CFP services.

A CFP must:

- Be 18 years of age or older.
- Have a high school diploma or high school equivalency certificate issued in accordance with the law of the issuing state.
- Have lived experience navigating a child-service system, such as a mental health, juvenile justice, social security, or special education system, as a parent, LAR, or primary caregiver of a child or youth with a SED or mental health or substance use condition.
- Be willing to appropriately share their own recovery story with recipients of CFP services.

- Have successfully completed and passed the Texas Health and Human Services (HHSC) approved certification process.

A CFP must also:

- Satisfy and complete all staff credentialing, competency, training, and supervision requirements, prior to delivering CFP services, as required by the HHSC approved designated certifying entity in Texas.
- Pass criminal history and registry checks, as described in 1 TAC §354.3201.

A CFP certification is issued for a period of two years. A CFP must renew their certification every two years through the HHSC-approved designated certifying entity in Texas. Recertification requires a minimum number of continuing education hours, as required by the HHSC-approved designated certifying entity in Texas

A CFP may not:

- Deliver family partner support services to a child or youth of whom they are a parent (birth, adoptive, and foster), LAR, or primary caregiver.
- Practice psychotherapy.
- Make clinical or diagnostic assessments or dispense expert opinions.
- Engage in any service that requires a license.
- Falsify any documentation related to application, training, testing, certification, or services provided.

### **7.1.2 Supervision Requirements**

Providers may be reimbursed for CFP services that are rendered under the supervision of one of the following, as defined in 1 TAC §354.3003:

- Qualified Credential Counselor (QCC)
- Licensed Practitioner of the Healing Arts (LPHA)
- Qualified Mental Health Professional-Community Services (QMHP-CS) with a QCC or LPHA supervising the QMHP
- Qualified Peer Supervisor (QPS) with a QCC or LPHA supervising the QPS

Supervision must occur at least once weekly for a CFP with an initial certification, at least once monthly for a CFP with a two-year certification, or more frequently at the request of the CFP.

A QCC or LPHA who supervises a QMHP-CS or QPS must provide individual or group supervision at least once monthly and conduct an observation of the QMHP-CS or QPS supervising the CFP at a self-determined frequency based on the skill level of the QMHP-CS or QPS.

A supervisor must successfully complete and pass the HHSC-approved certification process for supervision of CFP services and the recovery model from a certified training entity before supervising a CFP. Supervisor training must include instruction about:

- The distinction between CFP services and therapy.
- The role of CFP services in building and sustaining recovery goals.
- Advocacy for CFPs and CFP services.
- Job performance review, including strengths-based, timely, and respectful feedback.
- Supervisory skills, such as how to work with a variety of personality types and communication styles.

After completing training, each candidate must successfully complete a knowledge assessment before receiving approval to supervise a CFP from the designated certifying entity in Texas.

Supervision of CFPs must focus on the provision of services to include:

- Review of cases and activities.
- Skill building.
- Problem resolution.
- Professional growth.

Supervision of CFPs may be delivered:

- Individually.
- In a group setting.
- Face-to-face.
- By teleconference.
- Through observation of the CFP providing services.

Supervision of CFPs may also include aspects specific to the organization, such as following organizational policy or other administrative matters.

### 7.1.3 Reimbursement

CFP services must be included in the plan of care of the Medical eligible child or youth to be reimbursed. A billable unit of CFP services is 15 minutes of continuous contact.

Procedure code S9482 may be reimbursed for CFP services. The following modifiers may be submitted with procedure code S9482 for CFP services as appropriate:

| Modifier | Description                                     |
|----------|-------------------------------------------------|
| 95       | Delivered by synchronous audiovisual technology |
| FQ       | Delivered by synchronous audio-only technology  |
| HE       | Mental health program                           |
| HF       | Substance use program                           |
| HQ       | Group-delivered services                        |

Claims for CFP services using procedure code S9482 must be submitted with modifier HE or HF, as appropriate.

Claims for CFP services delivered in a group setting must also be submitted with modifier HQ. CFP services delivered in a group setting are limited to 12 persons per group session.

CFP services are limited to 104 units in a rolling 6-month period. This limit may be exceeded with prior authorization.

CFP services may not be delivered simultaneous to other behavioral health services being delivered to a person or group of persons receiving services.

Mental health rehabilitative services delivered by family partners must be billed separately from CFP services.

FQHCs and RHCs should submit claims for CFP services using procedure code S9482 for informational purposes only.

Only clinic and group practices or individual health care providers (e.g., physicians, APRNs, and PAs) with a behavioral health focus are eligible for reimbursement of CFP services.

### 7.1.4 Telehealth

Providers of CFP services must defer to the needs of the parent(s), LAR(s), or primary caregiver(s) receiving the services, allowing the mode of service delivery to be accessible and family-centered, and primarily driven by the parent', LARs', or primary caregivers' choice and not provider convenience.

Providers must provide CFP services to the parent(s), LAR(s), or primary caregiver(s) of the Medicaid eligible child or youth in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 TAC §371.1659. In addition, providers must deliver, to include delivery by telemedicine or telehealth, CFP services in full accordance with all applicable licensure and certification requirements.

During a Declaration of State of Disaster, HHSC may issue direction to providers regarding the use of a telemedicine or telehealth service to include the use of a synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein to the extent permitted by Texas law. A Declaration of State of Disaster is when an executive order or proclamation is issued by the governor declaring a state of disaster in accordance with Section 418.014 of the Texas Government Code.

#### 7.1.4.1 Synchronous Audiovisual Technology

CFP services may be provided by synchronous audiovisual technology if clinically appropriate and safe, as determined by the billing provider, and agreed to by the parent(s), LAR(s), or primary caregiver(s) receiving services. In addition, approval to deliver the services by synchronous audiovisual technology must be documented in the plan of care of the Medicaid eligible child or youth receiving services. CFP services provided by synchronous audiovisual technology must be billed using modifier 95.

#### 7.1.4.2 Synchronous Telephone (Audio-Only) Technology

CFP services may be provided by synchronous telephone (audio-only) technology to the parent(s), LAR(s), or primary caregiver(s) of the Medicaid eligible child or youth with whom the billing provider has an 'existing clinical relationship' and if clinically appropriate and safe, as determined by the billing provider, and agreed to by the parent(s), LAR(s), or primary caregiver(s) receiving services. In addition, approval to deliver the services by synchronous telephone (audio-only) technology must be documented in the plan of care of the Medicaid eligible child or youth whose parent(s), LAR(s), or primary caregiver(s) are receiving CFP services. Whenever possible, HHSC encourages face-to-face interaction, such as an in-person visit, as well as the use of synchronous audiovisual technology over synchronous telephone (audio-only) technology of telemedicine and telehealth services. Therefore, providers of CFP services must document in the medical record of the Medicaid eligible child or youth the reason(s) for why the services were delivered by synchronous telephone (audio-only) technology. CFP services provided by synchronous telephone (audio-only) technology must be billed using modifier FQ.

An 'existing clinical relationship' occurs when the parent(s), LAR(s), or primary caregiver(s) have received at least one in-person or synchronous audiovisual CFP service or, on behalf of the Medicaid eligible child or youth, has received a mental health targeted case management (MHTCM) or mental health rehabilitative (MHR) service from the same billing provider within the six months prior to the initial CFP service delivered by synchronous telephone (audio-only) technology. The six-month requirement for at least one in-person or synchronous audiovisual CFP, MHTCM, or MHR service from the same billing provider prior to the initial synchronous telephone (audio-only) service may not be waived.

**Note:** 'Same billing provider' refers to providers within the same entity (i.e., same National Provider Identification (NPI) number), e.g., same LMHA/LBHA, comprehensive provider agency of MHTCM or MHR services, clinic, or group practice, FQHC, RHC, chemical dependency treatment facility, or opioid treatment provider presuming all other applicable state and federal laws and regulations are followed. The required in-person or synchronous audiovisual

*delivered CFP service may be delivered by another authorized professional or paraprofessional of the same billing provider as the professional or paraprofessional who delivers the service by synchronous telephone (audio-only) technology.*

The billing provider is required to conduct at least one in-person or synchronous audiovisual CFP service or, on behalf of the Medicaid eligible child or youth, MHTCM or MHR service every rolling 12 months from the date of the initial service delivered by synchronous telephone (audio-only) technology unless the parent(s), LAR(s), or caregiver(s) receiving services and the billing provider agree that an in-person or synchronous audiovisual service is clinically contraindicated, or the risks or burdens of an in-person or synchronous audiovisual service outweigh the benefits. The decision to waive the 12-month requirement applies to that particular rolling 12-month period and the basis for the decision must be documented in the medical record of the Medicaid eligible child or youth. Examples of when a synchronous telephone (audio-only) service may be more clinically appropriate or beneficial than an in-person or synchronous audiovisual service include, but are not limited to, the following:

- The parent(s), LAR(s), or caregiver(s) receiving services are located at a qualifying originating site in an eligible geographic area (e.g., a practitioner office in a rural health professional shortage area).
- An in-person or synchronous audiovisual service is likely to cause disruption in service delivery or has the potential to worsen the condition of the Medicaid eligible child or youth or the family unit.

**Note:** *The required in-person or synchronous audiovisual delivered CFP service or, on behalf of the Medicaid eligible child or youth, MHTCM or MHR service may be delivered by another authorized professional or paraprofessional of the same billing provider as the professional or paraprofessional who delivers the service by synchronous telephone (audio-only) technology.*

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telemedicine and telehealth requirements, including informed consent and privacy and security requirements.

### 7.1.5 Prior Authorization

Prior authorization is not required for the first 104 units (26 hours) of CFP services in a rolling six-month period. A billable unit of CFP services is 15 minutes of continuous contact. Prior authorization is required once the 104 units (26 hours) of CFP services (individual or group) in a rolling six-month period is exceeded. A billable unit of CFP services is 15 minutes of continuous contact.

**Note:** *Prior authorization is a condition of reimbursement, not a guarantee of payment.*

Prior authorization requests are considered on a case-by-case basis with documentation supporting medical necessity for additional units of CFP services.

Prior authorization requests must include the following documentation:

- The Medicaid-eligible child or youth continues to meet eligibility criteria, as outlined in the Benefits section of this handbook, including current APA DSM diagnosis or diagnoses.
- The current plan of care to include goal(s) and objective(s) for the Medicaid-eligible child or youth.
- The progress made to date relative to the goal(s) and objective(s) outlined in the plan of care of the Medicaid-eligible child or youth.
- The need for continued services.

Prior authorization requests must be submitted to the TMHP Authorization Department using the Special Medical Prior Authorization (SMPA) Request Form. The form must include the following information:

- Section A - Client Information:
  - Identifying information for the Medicaid eligible child or youth (i.e., name, date of birth, and Medicaid number).

- Section B - Requested Procedure or Service Information:
  - Type of request is 'Other.'
  - Expected dates of service.
  - Procedure code (S9482) and description (CFP services).
  - Identifying information (full name) for the parent(s), LAR(s), or primary caregiver(s) receiving CFP services in the comments text box.
- Section C - Requesting Provider Information:
  - ICD-10 primary diagnosis and related ICD-10 diagnosis code(s) of the Medicaid eligible child or youth.
  - Medical necessity information to include:
    - The number of additional units being requested (up to 30 units allowed per request) and the type of units requested (i.e., individual, group, or both).
    - The need for continued CFP services.
    - Progress made to the goal(s) and objective(s) that are outlined in the plan of care of the Medicaid eligible child or youth.
  - Information about the requesting physician or provider, as indicated on the form (e.g., name, physical address, telephone, etc.).
  - Signature of the requesting physician or provider, and the signature date of the request.

**Note:** *The form must be signed, dated, and submitted within 30 calendar days prior to the expected start date of additional CFP services.*

The requesting physician or provider may be asked for additional information to clarify or complete a request. Retrospective review may be performed to ensure documentation supports the medical necessity of the requested service.

Prior authorization requests must be submitted to the TMHP Prior Authorization Department via mail, fax, or the electronic portal. The electronic signature technology must meet all applicable federal and state statutes and administrative rules. Electronically signed documents must have an electronic date on the same page as the signature. Electronic signatures that are generated through an electronic medical record (EMR) or electronic health record (EHR) system that complies with applicable federal and state statutes and rules are acceptable.

All electronically signed transactions and electronically signed documents must be kept in the client's medical record. Prescribing and dispensing providers that utilize electronic signatures must provide a certification that the electronic signature technology that they use complies with all applicable federal and state statutes and administrative rules.

Providers who submit a prior authorization request must also attest that electronic signatures included in the request are true and correct to the best of their knowledge. A hard copy of electronic transactions and signed documents must be available upon request. Stamped signatures and images of wet signatures will not be accepted.

To complete the prior authorization process by paper, the provider must fax or mail the completed SMPA Request Form to the TMHP Prior Authorization Department and retain a copy of the signed and dated SMPA Request Form in the medical record of the Medicaid eligible child or youth.

To complete the prior authorization process electronically, the provider must complete the prior authorization requirements through any approved electronic methods and retain a copy of the signed and dated SMPA Request Form in the medical record of the Medicaid eligible child or youth.

To facilitate determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including documentation for medical necessity for the services requested. The physician must maintain documentation of medical necessity in the medical record of the Medicaid eligible child or youth.

The requesting provider may be asked for additional information to clarify or complete a request.

## 7.2 Documentation Requirements

In addition to prior authorization documentation requirements outlined in this handbook, the following requirements apply:

- All services outlined in the Benefits section of this handbook are subject to retrospective review to ensure that the documentation in the medical record of the Medicaid-eligible child or youth supports the medical necessity of the services provided.
- The enrolled provider shall ensure proper documentation of all CFP services delivered.
- Documentation of CFP services must indicate the date, time, and place of service, and must summarize the purpose and content of the services, along with specific strategies and activities utilized, as related to the goal(s) and objective(s) in the plan of care of the Medicaid-eligible child or youth.
- CFP supervisors must document all supervisory sessions and maintain records in the employee personnel file of the CFP.

Documentation requirements for telemedicine or telehealth service are the same as for an in-person visit and must accurately reflect the services rendered. Documentation must identify the means of delivery when provided by telemedicine or telehealth.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telemedicine and telehealth documentation requirements, including requirements for informed consent.

## 7.3 Exclusions

The following services are not benefits of the Texas Medicaid program:

- Record-keeping or documentation activities
- Services that are not provided directly to the person receiving services
- Children or youth with a single diagnosis of an intellectual and developmental disability

## 8 Inpatient Psychiatric Services

Admissions to acute care hospitals for inpatient psychiatric services are a benefit of Texas Medicaid for persons of all ages in fee-for-service Medicaid or managed care.

Admissions to psychiatric facilities, i.e. Institutions for Mental Disease (IMD), for inpatient psychiatric services are a benefit of Texas Medicaid for:

- Persons 20 years of age and younger and 65 years of age and older in fee-for-service Medicaid.
- Persons 21 through 64 years of age enrolled in managed care as an in lieu of service if the MCO and the person receiving services agree to an IMD as the setting for inpatient psychiatric services. The benefit is for a maximum of 15 calendar days per month, not per stay.

**Note:** *In lieu of services are services substituted for Medicaid State Plan services or settings, as allowed by 42 CFR §438.3(e).*

**Referto:** Section 3.4, “Services, Benefits, Limitations, and Prior Authorization - Inpatient Psychiatric Services” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for more information.

## 9 Screening, Brief Intervention, and Referral to Treatment (SBIRT)

SBIRT is a comprehensive, public health approach to the delivery of early intervention and treatment services for persons who are 10 years of age and older and who have alcohol or substance use disorders or are at risk of developing such disorders. SBIRT is used for intervention directed to a person and not for group intervention.

SBIRT services can be provided by physicians, registered nurses, advanced practice nurses, physician assistants, psychologists, licensed clinical social workers, licensed professional counselors, certified nurse midwives, outpatient hospitals, federally qualified health centers (FQHCs), and rural health clinics (RHCs). Non-licensed providers may deliver SBIRT under the supervision of a licensed provider if such supervision is within the scope of practice for that licensed provider. The same SBIRT training requirements apply to non-licensed providers.

A person may have a maximum of two screening only sessions per rolling year, and up to four combined screening and brief intervention sessions per rolling year. Providers must refer the person to treatment if the screening results reveal severe risk of alcohol or substance use.

**Referto:** Section 10, “Substance Use Disorder (SUD) Services” in this handbook for additional information on SUD treatment.

### 9.1 SBIRT Training

Providers that perform SBIRT services must be trained in the correct practice of this method and will be required to complete at least four hours of training. Proof of completion of SBIRT training must be maintained in an accessible manner at the provider’s place of service.

Information regarding available trainings and standardized screening tools can be found through the [Substance Abuse and Mental Health Services Administration](#).

### 9.2 Screening

Screening persons for problems related to alcohol or substance use identifies the person’s level of risk and determines the appropriate level of intervention indicated for the person. Providers must explain the screening results to the person, and if the results are positive, be prepared to subsequently deliver, or delegate to another provider, brief intervention services. Screening must be conducted using a standardized screening tool. Standardized tools that may be used include, but are not limited to, the following:

- Alcohol, Smoking, and Substance Involvement Screening Test (ASSIST)
- Drug Abuse Screening Test (DAST)
- Alcohol Use Disorders Identification Test (AUDIT)
- Cut-down, annoyed, guilty, eye-opener (CAGE) questionnaire
- Car, relax, alone, forget, family or friends, trouble (CRAFFT) questionnaire
- Binge drinking questionnaire

Results obtained through blood alcohol content (BAC) or through toxicology screening may also be used to screen for alcohol or substance use risk.

### 9.3 Brief Intervention

Brief intervention is performed following a positive screen or a finding of at least a mild to moderate risk for alcohol or substance use. During the session, brief intervention involves motivational interviewing techniques (such as the Brief Negotiated Interview) that is focused on raising the person's awareness of his or her alcohol or substance use and its consequences. The session is also focused on motivating the person toward behavioral change.

Subsequent screening and brief intervention sessions within the allowable annual limitations may be indicated to assess for behavior change and further explore a person's readiness to make behavioral changes related to their alcohol or substance use.

**Note:** *Providers may choose to schedule multiple screening and brief intervention sessions in a rolling year in order to provide ongoing support to a person at risk for substance use who is receptive to behavior change.*

### 9.4 Referral to Treatment

If the provider determines that the person is in need of more extensive treatment or has a severe risk for alcohol or substance use, the person must be referred to an appropriate substance use treatment provider.

Referral to more extensive treatment is a proactive process that facilitates access to care for persons who require a more extensive level of service than SBIRT provides. Referral is an essential component of the SBIRT intervention because it ensures that all persons who are screened have access to the appropriate level of care.

**Note:** *If the person is currently under the care of a behavioral health provider, the person must be referred to that provider.*

### 9.5 Telemedicine and Telehealth Services

Providers must defer to the needs of the person receiving services, allowing the mode of service delivery to be accessible, person- and family-centered, and primarily driven by the person's choice and not provider convenience.

Providers must provide SBIRT services to Medicaid eligible persons in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. In addition, providers must deliver, to include delivery by telemedicine or telehealth, SBIRT services in full accordance with all applicable licensure and certification requirements.

During a Declaration of State of Disaster, the Health and Human Services Commission (HHSC) may issue direction to providers regarding the use of a telemedicine or telehealth service to include the use of a synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein to the extent permitted by Texas law. A Declaration of State of Disaster is when an executive order or proclamation is issued by the governor declaring a state of disaster in accordance with Section 418.014 of the Texas Government Code.

#### 9.5.1 Synchronous Audiovisual Technology

SBIRT services may be provided by synchronous audiovisual technology if clinically appropriate and safe, as determined by the provider, and agreed to by the person receiving services. SBIRT services provided by synchronous audiovisual technology must be billed using modifier 95.

#### 9.5.2 Synchronous Telephone (Audio-only Technology)

SBIRT services may be provided by synchronous telephone (audio-only) technology if clinically appropriate and safe, as determined by the provider, and agreed to by the person receiving services. Whenever possible, HHSC encourages face-to-face interaction, such as an in-person visit, as well as the use of

synchronous audiovisual technology over synchronous telephone (audio-only) technology of telemedicine and telehealth services. Therefore, providers must document in the person's medical record the reason(s) for why services were delivered by synchronous telephone (audio-only) technology. SBIRT services provided by synchronous telephone (audio-only) technology must be billed using modifier FQ.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telemedicine and telehealth requirements to include informed consent and privacy and security requirements.

| Modifier | Description                                                |
|----------|------------------------------------------------------------|
| 95       | Delivered by synchronous audiovisual technology            |
| FQ       | Delivered by synchronous telephone (audio-only) technology |

## 9.6 Reimbursement and Limitations

SBIRT services are limited to persons who are 10 years of age and older.

SBIRT services are limited to up to two screening sessions per rolling year. A screening that results in a negative result does not require a brief intervention. In these instances procedure code H0049 should be used. A provider may re-screen a person within the same rolling year to determine whether their substance use behavior has changed.

Procedure code 99408 or G2011 should be used when a brief intervention follows an SBIRT screening. Procedure code 99408 is limited to once per day. SBIRT services are limited to four sessions per rolling year when it constitutes a screening followed by a brief intervention.

If a person requires more than four combined screening and brief intervention sessions per rolling year, the person must be referred for substance use disorder treatment.

SBIRT services are not reimbursable to providers (whether licensed or non-licensed) who have not completed the required number of training hours in SBIRT methodology.

Procedure codes 99408, G2011, and H0049 will be denied if billed for the same date of service as any of the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 90791           | 90792 | 90832 | 90833 | 90834 | 90836 | 90837 | 90838 | 90847 | 90853 |
| 90865           | 90870 | 96130 | 96131 | 96132 | 96133 | 96136 | 96137 |       |       |

Procedure codes 99408 and H0049 cannot both be billed on the same date.

Physicians and other qualified health care professionals that bill an Evaluation and Management (E/M) code for a visit where SBIRT occurred must use modifier 25 to identify a significant, separately identifiable E/M service rendered by the same provider on the same date of service.

**Note:** FQHCs and RHCs should submit claims using SBIRT procedure codes for informational purposes only.

## 9.7 Documentation Requirements

A person's record documentation must support medical necessity for the SBIRT services provided and must be maintained by the SBIRT provider and made readily available for review when requested by the Health and Human Services Commission (HHSC) or its designee. SBIRT documentation for screening must include the following:

- The provider who performed the SBIRT screening; and

- Screening results from a standardized screening tool or laboratory results such as BAC, toxicology screen, or other measures showing risk for alcohol or substance use and the specific screening tool used.

Documentation for SBIRT brief intervention sessions must include a person-centered plan for the delivery of medically necessary services that supports the use of procedure code 99408. The plan must include the following:

- The provider who performed the SBIRT brief intervention, if different from the provider who screened the person
- Start and stop time of the session, or the total time spent providing SBIRT services to the person
- Goals established
- Specific strategies to achieve the goals
- The person's support system such as family members, a legal guardian, or friends.

**Note:** *If subsequent sessions are indicated, the provider who performed the SBIRT session must document that a follow up SBIRT appointment was made and with whom, or document another mechanism established to reassess progress*

- The name, address, and phone number of the provider that the person has been referred to for substance use disorder treatment

Services are subject to retrospective review to ensure that the documentation in the person's medical record supports the medical necessity of the services provided.

Documentation requirements for a telemedicine or telehealth service are the same as for an in-person visit and must accurately reflect the services rendered. Documentation must identify the means of delivery when provided by telemedicine or telehealth.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telemedicine and telehealth documentation requirements including requirements for informed consent.

## 9.8 Claims Filing and Reimbursement

SBIRT services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a CMS-1500 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

**Referto:** "Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on electronic claims submissions.

Subsection 6.1, "Claims Information" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*).

Texas Medicaid rates for Hospitals are calculated according to 1 TAC §355.8061.

According to 1 TAC §355.8091, the Medicaid rate for LCSWs, LMFTs, and LPCs is 70 percent of the rate paid to a psychiatrist or psychologist for a similar service per 1 TAC §355.8085.

The Medicaid rates for psychologists are calculated in accordance with 1 TAC §355.8085.

Texas Medicaid rates for physicians and certain other practitioners are calculated in accordance with TAC §355.8085.

Texas Medicaid rates for Nurse Practitioners and Clinical Nurse Specialists are calculated in accordance with TAC §355.8281.

According to 1 TAC §355.8093, the Medicaid rate for PAs is 92 percent of the rate paid to a physician (MD or DO) for the same professional service and 100 percent of the rate paid to physicians for laboratory services, X-ray services, and injections. Services performed by a PA and billed under a physician's or RHC's NPI are reimbursed according to the Texas Medicaid Reimbursement Methodology (TMRM) for physician services.

**Note:** For more information about Texas Medicaid rates for the provider types above, refer to the [OFL](#) or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied.

Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates/rate-changes](http://www.tmhp.com/resources/rate-and-code-updates/rate-changes).

**Note:** Certain rate reductions including, but not limited to, reductions by place of service, client type program, or provider specialty may not be reflected in the Adjusted Fee column.

## 10 Substance Use Disorder (SUD) Services

### 10.1 Overview

SUDs are chronic, relapsing medical illnesses that require an array of best practice medical and psychosocial interventions of sufficient intensity and duration to achieve and maintain remission and support progress toward recovery. SUD may include problematic use of alcohol, prescription drugs, illegal drugs (e.g., cannabis, opioids, stimulants, inhalants, hallucinogens, "club" drugs, other synthetic euphorants), and other substances that may be identified in the future.

Treatment for SUD is a benefit of Texas Medicaid for persons who meet the criteria for a substance-related disorder, as outlined in the current edition of the American Psychiatric Association's (APA's) Diagnostic Statistical Manual of Mental Disorders (DSM).

SUD treatment services are individualized, age-appropriate medical and psychosocial interventions designed to treat a person's problematic use of alcohol or other drugs, including prescription medication.

SUD services include:

- Withdrawal management services.
- Individual and group SUD counseling in an outpatient setting.
- Residential treatment services.
- Medication assisted treatment.
- Evaluation and treatment (or referral for treatment) for co-occurring physical and behavioral health conditions.

Level of care (e.g., outpatient, residential, inpatient hospital) and specific services provided must adhere to current evidence-based industry standards and guidelines for SUD treatment, such as those outlined in the current edition of the American Society of Addiction Medicine's Treatment Criteria for Addictive Substance-Related and Co-Occurring Conditions, as well as the licensure requirements outlined in 25 TAC §448 pertaining to standards of care.

SUD outpatient or residential treatment services may only be delivered in a licensed chemical dependency treatment facility (CDTF). Medication assisted treatment (MAT) may also be delivered in the office setting by appropriately trained physicians, physician assistants (PAs), and advanced practice registered nurses (APRNs) who are recognized by the Texas Board of Nursing as either nurse practitioners (NPs), clinical nurse specialists (CNSs), nurse anesthetists (CRNAs), or nurse midwives (CNMs), provided that the APRN is a qualifying practitioner and possesses the Drug Addiction Treatment Act (DATA) waiver.

SUD withdrawal management in an inpatient hospital setting may be provided for persons who meet hospital level of care requirements as a result of the severity of their withdrawal syndrome or the severity of their co-occurring conditions. These services may be reimbursed as general hospital inpatient services.

The treatment setting and the intensity or level of services will vary depending on the severity of the person's SUD and what is clinically appropriate. The intensity or level of services refers to the number of hours of services per week, as well as the types of services the person receives. Early Intervention services are part of the spectrum of SUD treatment and are a benefit in Texas Medicaid. Early intervention services target persons who are at risk of developing a substance related problem but may not have a diagnosed SUD.

**Referto:** Subsection 9, "Screening, Brief Intervention, and Referral to Treatment (SBIRT)" in this handbook for further information on early intervention services.

Upon admission into a treatment setting, a multi-dimensional assessment (procedure code H0001) must be conducted by a qualified credentialed counselor (QCC) or intern as defined in Department of State Health Services (DSHS) TAC §441.101 to determine a course of treatment that is medically necessary and clinically appropriate. The assessment must be signed off by a QCC.

## 10.2 Evaluation, Treatment, or Referral for Co-Occurring Conditions

CDTFs shall facilitate access to physical health, mental health, and ancillary services if those services are not available through the program and are necessary to meet treatment goals or needs of the person receiving services.

Persons in residential CDTFs commonly require medications unrelated to their SUD treatment for which costs are not covered in the reimbursement for SUD or MAT services. These medications, if included in the Medicaid formulary, may be obtained and reimbursed through the person's Medicaid pharmacy benefit.

Persons in residential CDTFs also commonly require other services that are benefits of Texas Medicaid, but not included in the CDTF rate. Claims for these services can be submitted by the appropriate providers.

CDTFs should screen each person for risk for contracting tuberculosis, Hepatitis B and C, HIV antibody, and sexually transmitted infections, and if appropriate, provide access to testing and follow up. Testing may be performed on site and billed by the ordering provider if appropriate testing facilities are available that are compliant with the rules and regulations for the Clinical Laboratory Improvement Amendments (CLIA). Providers that do not comply with CLIA are not reimbursed for laboratory services.

## 10.3 Withdrawal Management Services

Withdrawal management, formerly known as detoxification, is the medical and behavioral treatment of persons experiencing or potentially experiencing withdrawal symptoms as a result of ceasing or reducing substance use.

Withdrawal management involving opioids, alcohol, sedatives, hypnotics, or anxiolytics will vary depending on the severity of the withdrawal symptoms experienced but will typically involve medications to treat symptoms in addition to supportive care, observation, and monitoring. Withdrawal management involving stimulants, inhalants, and cannabis typically involves supportive care, observation and monitoring, and medications to treat withdrawal symptoms as required.

Withdrawal management may be performed in an outpatient setting for persons experiencing mild to moderate withdrawal symptoms that can be successfully, as well as safely, managed outside of a residential setting or an inpatient hospital. Withdrawal management in a residential setting may be required for persons whose multidimensional assessment indicates one or more of the following circumstances that would make outpatient withdrawal management unsafe or unsuccessful:

- A level of severity of withdrawal, medical, or mental health complication
- Sufficient challenges with readiness to change, ability to stop using, or social support

Withdrawal management in an inpatient hospital setting may be required for persons whose severity of medical withdrawal (e.g., impending delirium tremens, severe withdrawal seizures), comorbid medical conditions (e.g., severe liver impairment, acute pneumonia, endocarditis, dementia), or comorbid psychiatric conditions (e.g., severe suicidality, acute and unstable psychosis or mania) requires a hospital level of care.

## 10.4 Individual and Group SUD Counseling Services in an Outpatient Setting

Counseling for SUDs is designed to assist persons in developing a better understanding of their SUD, help to establish treatment goals and plans for achieving those goals, and provide interventions to assist persons in accordance with the plan. The overall intent of the service is to assist persons in understanding their SUD and developing the skills and supports needed to address their SUD over time. Counseling may be done individually or in a group setting with multiple members. Group counseling sessions are limited to a total of 16 persons per session.

Outpatient counseling services are appropriate for the following:

- Persons with less severe disorders
- Persons who are in the early stages of change
- As a step down from more intensive services
- Persons who are stable but for whom ongoing monitoring is appropriate

**Note:** *For persons unable or unwilling to access SUD treatment services at a CDTF, psychotherapy delivered by a licensed practitioner of the healing arts (LPHA) may be an alternative treatment option to address a person's SUD.*

Outpatient services may be appropriate at the start of treatment, throughout treatment, or after an episode of residential or inpatient treatment, depending on the person's acuity, severity, comorbidity, needs, or preferences. Outpatient services can address active symptoms as well as provide ongoing treatment for persons in partial or full remission who need continuing help to maintain progress.

Abstinence should not necessarily be a requirement for participation in outpatient services.

## 10.5 Residential Treatment Services

Residential treatment programs provide a structured therapeutic environment where persons reside with staff support and deliver comprehensive SUD treatment with attention to co-occurring conditions as appropriate. The frequency and duration of services should be based on meeting the person's needs and achieving the person's treatment goals.

Residential services are appropriate for persons who require a structured therapeutic environment to stabilize SUD and develop coping and recovery skills. Residential treatment programs may specialize in the unique needs of a specific population such as adolescents, or pregnant or parenting women with children.

Episodes of residential treatment may be required for persons with more severe SUD, more significant medical or psychiatric comorbidities, more significant challenges with sustaining motivation, maintaining control in an outpatient setting, or a living environment that jeopardizes their current ability to be successful in outpatient treatment.

Residential SUD treatment services may only be provided by a licensed CDTF.

## 10.6 Outpatient Treatment Services

Outpatient treatment services must be billed with procedure codes H0004 or H0005.

Procedure codes H0004 and H0005 are limited to the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| F1010           | F1011  | F10120 | F10121 | F10129 | F10130 | F10131 | F10132 |
| F10139          | F1014  | F10150 | F10151 | F10159 | F10180 | F10181 | F10182 |
| F10188          | F1019  | F1020  | F1021  | F10220 | F10221 | F10229 | F10230 |
| F10231          | F10232 | F10239 | F1024  | F10250 | F10251 | F10259 | F1026  |
| F1027           | F10280 | F10281 | F10282 | F10288 | F1029  | F1090  | F1091  |
| F10920          | F10921 | F10929 | F10930 | F10931 | F10932 | F10939 | F1094  |
| F10950          | F10951 | F10959 | F1096  | F1097  | F10980 | F10981 | F10982 |
| F10988          | F1099  | F1110  | F1111  | F11120 | F11121 | F11122 | F11129 |
| F1113           | F1114  | F11150 | F11151 | F11159 | F11181 | F11182 | F11188 |
| F1119           | F1120  | F1121  | F11220 | F11221 | F11222 | F11229 | F1123  |
| F1124           | F11250 | F11251 | F11259 | F11281 | F11282 | F11288 | F1129  |
| F1190           | F1191  | F11920 | F11921 | F11922 | F11929 | F1193  | F1194  |
| F11950          | F11951 | F11959 | F11981 | F11982 | F11988 | F1199  | F1210  |
| F1211           | F12120 | F12121 | F12122 | F12129 | F1213  | F12150 | F12151 |
| F12159          | F12180 | F12188 | F1219  | F1220  | F1221  | F12220 | F12221 |
| F12222          | F12229 | F1223  | F12250 | F12251 | F12259 | F12280 | F12288 |
| F1229           | F1290  | F1291  | F1293  | F12920 | F12921 | F12922 | F12929 |
| F12950          | F12951 | F12959 | F12980 | F12988 | F1299  | F1310  | F1311  |
| F13120          | F13121 | F13129 | F13130 | F13131 | F13132 | F13139 | F1314  |
| F13150          | F13151 | F13159 | F13180 | F13181 | F13182 | F13188 | F1319  |
| F1320           | F1321  | F13220 | F13221 | F13229 | F13230 | F13231 | F13232 |
| F13239          | F1324  | F13250 | F13251 | F13259 | F1326  | F1327  | F13280 |
| F13281          | F13282 | F13288 | F1329  | F1390  | F1391  | F13920 | F13921 |
| F13929          | F13930 | F13931 | F13932 | F13939 | F1394  | F13950 | F13951 |
| F13959          | F1396  | F1397  | F13980 | F13981 | F13982 | F13988 | F1399  |
| F1410           | F1411  | F14120 | F14121 | F14122 | F14129 | F1413  | F1414  |
| F14150          | F14151 | F14159 | F14180 | F14181 | F14182 | F14188 | F1419  |
| F1420           | F1421  | F14220 | F14221 | F14222 | F14229 | F1423  | F1424  |

| Diagnosis Codes |        |        |        |        |        |        |         |

## 10.7 Medication Assisted Treatment Services

MAT is the use of FDA-approved medications in combination with psychosocial treatment to treat SUDs, particularly alcohol and opioid use disorders (OUD).

MAT is a recognized best practice for alcohol use disorder (AUD) and OUD. All persons with AUD and OUD should be educated about the availability of MAT and the evidence supporting MAT, and have the opportunity to receive MAT regardless of where they are receiving SUD services. This could be accomplished on site or through a written agreement with a collaborating opioid treatment program (OTP) or office-based opioid treatment (OBOT) program.

Initiation or induction of MAT can appropriately occur in lieu of withdrawal management for OUDs, may begin early in withdrawal management for either AUD or OUD, and can be initiated as appropriate at any point in time during the course of treatment. Duration of MAT is determined on an person basis, depending on the person's unique needs and treatment goals.

Determination of which MAT medication to use is also an individualized treatment decision based on provider assessment and the person's needs and treatment goals. Providers are encouraged to offer as many treatment options as possible (within the parameters of their licensing and scope of practice) to maximize the person's choice and access to care.

MAT may be utilized as appropriate, as part of the service array delivered by outpatient providers or residential treatment services programs at CDTFs.

Opioid treatment programs (also referred to as narcotic treatment programs) are the only settings permitted by law to provide methadone for OUD and must comply with additional federal and state requirements, rules on licensure and scope of practice, including physician delegation, supervision, and prescriptive authority. Opioid treatment programs can also provide or administer other forms of MAT.

CDTFs, physicians, NPs, and PAs may prescribe and provide for the administration of long-acting injectable naltrexone (Vivitrol) to treat cravings associated with either OUD or AUD.

Physicians, PAs, and APRNs who are recognized by the Texas Board of Nursing as either NPs, CNSs, APRNs, or CNMs who have received a federal waiver to dispense buprenorphine may choose to incorporate this form of MAT into their medical practice while also providing or referring for other types of treatment services (also referred to as OBOT).

Certain MAT medications to treat alcohol and opioid use disorders (such as buprenorphine, disulfiram, acamprosate, and naltrexone), are available as a pharmacy benefit and may be prescribed to a person by their physician or other qualified health care professional. Providers may refer to the Vendor Drug Program Formulary for additional information on covered medications.

A prescription for an opioid antagonist (e.g., naloxone) should be given to all persons receiving treatment for OUD, and instruction should be provided on how to administer if needed.

Claims for urinalysis drug screens ordered by a physician, NP, or CNS to monitor compliance with MAT may be submitted by the individually-enrolled physician or APRN.

The following MAT procedure codes may be separately reimbursed from withdrawal management and treatment services in the outpatient or residential setting:

| Procedure Codes |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|
| H0020           | H0033 | J0577 | J0578 | J2315 | Q9991 |
| Q9992           |       |       |       |       |       |

### 10.7.1 Opioid Treatment Providers

Substance Abuse and Mental Health Services Administration certified (SAMHSA-certified) opioid treatment providers (OTPs) that are also licensed as narcotic treatment programs in Texas are required to enroll in Medicare before enrolling with Texas Medicaid as OTPs. Providers billing claims for persons who have dual eligibility for Medicaid and Medicare must first submit their claims to Medicare.

The following procedure codes may be reimbursed to Opioid Treatment Providers:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| H0001           | H0004 | H0005 | H0020 | H0033 | J0577 | J0578 | J2315 | Q9991 | Q9992 |

**Important:** CDTFs cannot bill for OTP services through Medicare, as CDTFs are not Substance Abuse and Mental Health Services Administration certified (SAMHSA-certified) OTPs.

A comprehensive assessment (procedure code H0001) is limited to once per day, any provider. An assessment is also limited to once per episode of care and should be performed at the start of each new episode of care.

## 10.8 Telemedicine and Telehealth Services

Providers of SUD services must defer to the needs of the person receiving the services, allowing the mode of service delivery to be accessible, person- and family-centered and primarily driven by the person's choice and not provider convenience.

Providers must provide SUD services to Medicaid eligible persons in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. In addition, providers must deliver, to include delivery by telemedicine or telehealth, SUD services in full accordance with all applicable licensure and certification requirements.

During a Declaration of State of Disaster, the Health and Human Services Commission (HHSC) may issue direction to providers regarding the use of a telemedicine or telehealth service to include the use of a synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein to the extent permitted by Texas law. A Declaration of State of Disaster is when an executive order or proclamation is issued by the governor declaring a state of disaster in accordance with Section 418.014 of the Texas Government Code.

### 10.8.1 Synchronous Audiovisual Technology

The following SUD services may be provided by synchronous audiovisual technology if clinically appropriate and safe, as determined by the billing provider, and agreed to by the person receiving services. SUD services provided by synchronous audiovisual technology must be billed using modifier 95.

- Comprehensive assessment (procedure code H0001)
- Individual and group counseling (procedure codes H0004 and H0005)
- MAT services - Prescribing of certain MAT medications may be done via telemedicine presuming all other applicable state and federal laws and regulations are followed.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about prescriptions generated from a telemedicine medical service.

### 10.8.2 Synchronous Telephone (Audio-only) Technology

The following SUD services may be provided by synchronous telephone (audio-only) technology to persons with whom the billing provider has an existing clinical relationship and if clinically appropriate and safe, as determined by the billing provider, and agreed to by the person receiving services. Whenever possible, HHSC encourages face-to-face interaction, such as an in-person visit, as well as the use of synchronous audiovisual technology over synchronous telephone (audio-only) technology of telemedicine and telehealth services. Therefore, providers of SUD services must document in the person's medical record the reason(s) for why services were delivered by synchronous telephone (audio-only) technology. SUD services provided by synchronous telephone (audio-only) technology must be billed using modifier FQ.

- Comprehensive assessment (procedure code H0001) - Only during certain public health emergencies or natural disasters; to the extent allowed by federal law (assessments for withdrawal management services are excluded); and the existing clinical relationship requirement is waived.
- Individual and group counseling (procedure codes H0004 and H0005)

An existing clinical relationship occurs when a person has received at least one in-person or synchronous audiovisual SUD service (comprehensive assessment, individual or group counseling, MAT, outpatient or residential withdrawal management, or residential treatment services) from the same provider within the six months prior to the initial service delivered by synchronous telephone

(audio-only) technology. The six-month requirement for at least one in-person or synchronous audiovisual service by the same billing provider prior to the initial synchronous telephone (audio-only) service may not be waived.

- Note:** “Same billing provider” refers to providers within the same entity or organization, as identified by the entity’s or organization’s NPI number or numbers, if the entity or organization has multiple locations (i.e., CDTF, OTP or clinic, or group practice).
- Note:** The required in-person or synchronous audiovisual-delivered SUD service (comprehensive assessment, individual or group counseling, MAT, outpatient or residential withdrawal management, or residential treatment services) may be delivered by another authorized professional or paraprofessional of the same billing provider as the professional or paraprofessional who delivers the service by synchronous telephone (audio-only) technology, presuming all other applicable state and federal laws and regulations are followed.

The billing provider is required to conduct at least 1 in-person or synchronous audiovisual SUD service (comprehensive assessment, individual or group counseling, MAT, outpatient or residential withdrawal management, or residential treatment services) every rolling 12 months from the date of the initial service delivered by synchronous telephone (audio-only) technology unless the person receiving services and the billing provider agree that an in-person or synchronous audiovisual service is clinically contraindicated, or the risks or burdens of an in-person or synchronous audiovisual service outweigh the benefits. The decision to waive the 12-month requirement applies to that particular rolling 12-month period and the basis for the decision must be documented in the person’s medical record. Examples of when a synchronous telephone (audio-only) service may be more clinically appropriate or beneficial than an in-person or synchronous audiovisual service include, but are not limited to, the following:

- The person receiving services is located at a qualifying originating site in an eligible geographic area, e.g., a practitioner office in a rural Health Professional Shortage Area.
- An in-person or synchronous audiovisual service is likely to cause disruption in service delivery or has the potential to worsen the person’s condition(s).

**Note:** The required in-person or synchronous audiovisual-delivered SUD service (comprehensive assessment, individual or group counseling, MAT, outpatient or residential withdrawal management, or residential treatment services) may be delivered by another authorized professional, or paraprofessional, of the same billing provider as the professional, or paraprofessional, who delivers the service by synchronous telephone (audio-only) technology, presuming all other applicable state and federal laws and regulations are followed.

**Referto:** The Telecommunication Services Handbook (Vol. 2, Provider Handbooks) for more information about telemedicine and telehealth requirements to include informed consent and privacy and security requirements.

| Modifier | Description                                                |
|----------|------------------------------------------------------------|
| 95       | Delivered by synchronous audiovisual technology            |
| FQ       | Delivered by synchronous telephone (audio-only) technology |

10.9 Exclusions

SUD treatment services for tobacco use disorder as the primary diagnosis are not a covered benefit, although a comprehensive SUD treatment approach should address tobacco use if reducing or eliminating this substance is part of the person’s treatment goal.

## 10.10 Prior Authorization

The following services do not require prior authorization:

- Assessment
- Outpatient treatment services
- MAT

**Exception:** *Outpatient treatment services require prior authorization if the calendar year hours/units are exceeded. Those limits are 135 units of group services and 26 hours of individual services per calendar year.*

The following services require prior authorization:

- Outpatient withdrawal management services
- Outpatient treatment for persons who exceed the benefit limitation
- Residential withdrawal management services
- Residential treatment services

Providers must submit the appropriate prior authorization request form for the initial or continuation of outpatient or residential withdrawal management treatment and residential treatment services. A QCC (as defined by the DSHS licensure standard) must complete and sign the prior authorization request forms.

Providers must submit one of the following forms to obtain prior authorization:

- Outpatient Withdrawal Management Authorization Request Form
- Outpatient Substance Use Disorder Counseling Extension Request Form
- Residential Withdrawal Management Authorization Request Form
- Residential Substance Use Disorder Treatment Request Form

Prior authorization will be considered for the least restrictive environment appropriate to the person's medical need as determined in the person's plan of care (POC), based on national standards.

Prior authorization requests for services beyond the limitations outlined in this section, may be considered with documentation supporting the medical necessity for continuation of the treatment.

### 10.10.1 Prior Authorization to Persons with Fee-For-Service Benefits

Prior authorization requests for persons with fee-for-service benefits may be submitted to the TMHP Prior Authorization Unit online at [www.tmhp.com](http://www.tmhp.com), by fax at 512-514-4211, or by mail to:

Texas Medicaid & Healthcare Partnership  
TMHP Prior Authorization Department  
12365-A Riata Trace Parkway, Suite 100  
Austin, TX 78727

To complete the prior authorization process electronically, the provider must complete the prior authorization requirements through any approved electronic methods. Providers must retain a copy of the signed and dated prior authorization form in the person's medical record.

Providers may contact the TMHP Prior Authorization Unit by telephone at 800-213-8877, Option 2, to obtain information about substance use disorder benefits, the prior authorization process, or the status of a prior authorization request. Prior authorization for substance use disorder services cannot be obtained through this line.

Prior authorization for outpatient withdrawal management, residential treatment, or residential withdrawal management services will be considered when requested within three business days after the date of admission.

Prior authorization may be considered for persons who are enrolled in a Medicaid MCO when they are admitted to SUD services and whose eligibility changes to fee-for-service during treatment. Requests must be submitted within three business days of the date on which the fee-for-service eligibility started.

### **10.10.2 Prior Authorization for Outpatient Withdrawal Management Treatment Services**

Outpatient withdrawal management services may be prior authorized for up to 21 days. The level of service and number of days that are prior authorized will be based on the substances that are used, level of intoxication and withdrawal potential, and the person's medical needs. Providers may submit requests for services using the Outpatient Withdrawal Management Authorization Request Form.

#### **10.10.2.1 Admission Criteria for Outpatient Withdrawal Management Treatment Services**

The admission criteria for outpatient withdrawal management treatment services follow the existing Texas Department of Insurance licensure requirements and standards that are specified in 28 TAC §3.8001–§3.8030.

To be considered eligible for treatment for outpatient withdrawal management services, the person must meet the following conditions:

- **Chemical Substance Withdrawal**—The person must meet all of the following criteria with regard to chemical substance withdrawal:
  - The person is expected to have a stable withdrawal from alcohol or drugs.
  - The diagnosis must meet the criteria for the definition of SUD or the most current revision of the APA's DSM accompanied by evidence that some of the symptoms have persisted for at least one month or have occurred repeatedly over a longer period of time.
- **Medical Functioning**—The person must meet all of the following criteria with regard to medical functioning:
  - No history of recent seizures or past history of seizures during withdrawal.
  - No clinical evidence of altered mental state as manifested by disorientation to self, alcoholic hallucinations, toxic psychosis, or altered level of consciousness (clinically significant obtundation, stupor, or coma).
  - The symptoms are due to withdrawal and not due to a general medical condition. Absence of any presumed new asymmetric or focal findings (i.e., limb weakness, clonus, spasticity, unequal pupils, facial asymmetry, eye ocular movement paresis, papilledema, or localized cerebellar dysfunction, as reflected in asymmetrical limb coordination).
  - Stable vital signs as interpreted by a physician. The person must also be without a previous history of complications from acute chemical substance withdrawal and judged to be free of a health risk as determined by a physician.
  - No evidence of a coexisting serious injury or systemic illness either newly discovered or progressive in nature.
  - Absence of serious disulfiram-alcohol (Antabuse) reaction with hypothermia, chest pains, arrhythmia, or hypotension.
  - Clinical condition that allows for a comprehensive and satisfactory assessment.

- **Family, Social, or Academic Dysfunction**—The person must meet at least one of the following criteria with regard to family, social, or academic dysfunction:
  - The person's social system and significant others are supportive of recovery to the extent that the person can adhere to a treatment plan and treatment service schedules without substantial risk of reactivating the person's SUD.
  - The person's family or significant others are willing to participate in the outpatient withdrawal management treatment program.
  - The person may or may not have a primary or social support system to assist with immediate recovery, but the person has the social skills to obtain such a support system or to become involved in a self-help fellowship.
  - The person does not live in an environment where licit or illicit mood-altering substances are being used. A person living in an environment where licit or illicit mood-altering substances are being used may not be a candidate for this level of care.
- **Emotional and Behavioral Status**—The person must meet all of the following criteria with regard to emotional and behavioral status:
  - The person is coherent, rational, and oriented for treatment.
  - The mental state of the person does not preclude the person's ability to comprehend and understand the materials presented, and the person is able to participate in the outpatient withdrawal management treatment process.
  - Documentation exists in the medical record that the person expresses an interest to work toward outpatient withdrawal management treatment goals.
  - The person has no neuropsychiatric condition that places the person at imminent risk of harming self or others (e.g. pathological intoxication or alcohol idiosyncratic intoxication).
  - The person has no neurological, psychological, or uncontrolled behavior that places the person at imminent risk of harming self or others (depression, anguish, mood fluctuations, overreactions to stress, lower stress tolerance, impaired ability to concentrate, limited attention span, high level of distractibility, negative emotions, or anxiety).
  - The person has no documented DSM condition or disorder that, in combination with alcohol or drug use, compounds a pre-existing or concurrent emotional or behavioral disorder and presents a major risk to the person.
  - The person has no mental confusion or fluctuating orientation.
- **Chemical Substance Use**—The person must meet the criteria in at least one of the following conditions with regard to recent chemical substance use:
  - The person's chemical substance use is excessive, and the person has attempted to reduce or control it but has been unable to do so (as long as chemical substances are available).
  - The person is motivated to stop using alcohol or drugs and is in need of a supportive, structured treatment program to facilitate withdrawal from chemical substances.

#### **10.10.2.2 Continued Stay Criteria for Outpatient Withdrawal Management Treatment Services**

A person is considered eligible for continued stay in the outpatient withdrawal management treatment service when the person meets at least one of the conditions for either chemical substance withdrawal or psychiatric or medical complications. Requests for extension of services must be received on or before the last date authorized or denied. The prior authorization unit will notify the provider by fax or electronic portal. If the date of the prior authorization unit determination letter is on or after the last date

authorized or denied or if the last date falls on a holiday or weekend, the request for extension of services is due by 5 p.m. of the next business day. Documentation in the person's medical record must support either Chemical Substance Withdrawal or Psychiatric or Medical Complications.

### **Chemical Substance Withdrawal**

The person must meet at least one of the following conditions with regard to chemical substance withdrawal complications:

- The person, while physically abstinent from chemical substance use, is exhibiting incomplete stable withdrawal from alcohol or drugs, as evidenced by psychological and physical cravings.
- The person, while physically abstinent from chemical substance use, is exhibiting incomplete stable withdrawal from alcohol or drugs, as evidenced by significant drug levels.

### **Psychiatric or Medical Complications**

The person must meet both of the following psychiatric or medical complication conditions:

- The intervening medical or psychiatric event was serious enough to interrupt the outpatient withdrawal management treatment.
- Evidence that the person is progressing in treatment again.

## **10.10.3 Prior Authorization for Residential Withdrawal Management Treatment Services**

Withdrawal management services may be prior authorized for up to 21 days. The level of service and number of prior authorized days will be based on the substances that are used, level of intoxication and withdrawal potential, and the person's medical needs. Providers may submit requests for services using the Residential Withdrawal Management Authorization Request form.

Requests for withdrawal management services for persons who need more than 21 days of residential withdrawal management require review of documentation of medical necessity from a provider who is familiar with the person.

### **10.10.3.1 Admission Criteria for Residential Withdrawal Management Treatment Services**

The admission criteria for residential withdrawal management treatment services follow the existing Texas Department of Insurance licensure requirements and standards that are specified in 28 TAC §3.8001–§3.8030.

A person is eligible for admission to a residential withdrawal management service when they have failed two previous individual treatment episodes of outpatient withdrawal management or when they have a diagnosis that meets the criteria for the definition of SUD in the most current revision of the APA's DSM.

The person must also meet at least one of the following criteria for admission to residential withdrawal management treatment:

- Chemical Substance Withdrawal—The person must have impaired neurological functions as evidenced by:
  - Extreme depression (e.g., suicidal).
  - Altered mental state with or without delirium as manifested by disorientation to self; alcoholic hallucinosis, toxic psychosis, altered level of consciousness, as manifested by clinically significant obtundation, stupor, or coma.
  - History of recent seizures or past history of seizures on withdrawal.

- The presence of any presumed new asymmetric or focal findings (i.e., limb weakness, clonus, spasticity, unequal pupils, facial asymmetry, eye ocular movement paresis, papilledema, or localized cerebellar dysfunction, as reflected in asymmetrical limb incoordination).
- Unstable vital signs combined with a history of past acute withdrawal syndromes that are interpreted by a physician to be indication of acute alcohol or drug withdrawal.
- Evidence of coexisting serious injury or systemic illness, newly discovered or progressive.
- Clinical condition (e.g., agitation, intoxication, or confusion) that prevents satisfactory assessment of the above conditions and indicates placement in residential withdrawal management service may be justified.
- Neuropsychiatric changes of such severity and nature that they put the person at imminent risk of harming self or others (e.g., pathological intoxication or alcohol idiosyncratic intoxication).
- Serious disulfiram-alcohol (Antabuse) reaction with hypothermia, chest pains, arrhythmia, or hypotension.
- Major Medical Complications—The person must present a documented condition or disorder that, in combination with alcohol or drug use, presents a determined health risk (e.g., gastrointestinal bleeding, gastritis, severe anemia, uncontrolled diabetes mellitus, hepatitis, malnutrition, cardiac disease, hypertension).
- Major Psychiatric Illness—The person must meet at least one of the following conditions with regard to major psychiatric illness:
  - Documented APA DSM condition or disorder that, in combination with alcohol or drug use, compounds a pre-existing or concurrent emotional or behavioral disorder and presents a major risk to the person.
  - Severe neurological and psychological symptoms: (e.g., anguish, mood fluctuations, overreactions to stress, lowered stress tolerance, impaired ability to concentrate, limited attention span, high level of distractibility, extreme negative emotions, or extreme anxiety).
  - Danger to others or homicidal.
  - Uncontrolled behavior that endangers self or others, or documented neuropsychiatric changes of a severity and nature that place the person at imminent risk of harming self or others.
  - Mental confusion or fluctuating orientation.

### **10.10.3.2 Continued Stay Criteria for Residential Withdrawal Management Treatment Services**

Eligibility for continued stay for residential withdrawal management services is based on the person meeting at least one of the criteria for chemical substance withdrawal, major medical complications, or major psychiatric complications.

#### **Chemical Substance Withdrawal**

The person must exhibit one of the following conditions with regard to chemical substance withdrawal complications:

- Incomplete medically stable withdrawal from alcohol or drugs, as evidenced by documentation of at least one of the following conditions:
  - Unstable vital signs
  - Continued disorientation
  - Abnormal laboratory findings related to chemical dependency

- Continued cognitive deficit related to withdrawal so that the person is unable to recognize alcohol or drug use as a problem
- Laboratory finding that, based on the judgment of a physician, indicates that a drug has not sufficiently cleared the person's system

### **Major Medical Complications**

For major medical complications, the person must have documentation in the medical record that indicates that a medical condition or disorder (e.g., uncontrolled diabetes mellitus) continues to present a health risk and is being actively treated.

### **Major Psychiatric Complications**

The person must meet at least one of the following with regard to major psychiatric complications:

- Documentation in the medical record that a psychiatric condition or disorder that, in combination with alcohol or drug use, continues to present a major health risk, is actively being treated.
- Documentation in the medical record that severe neurological or psychological symptoms have not been satisfactorily reduced but are actively being treated.

## **10.10.4 Prior Authorization for Residential Treatment Services**

Residential treatment may be prior authorized for up to 35 days per episode of care, with a maximum of two episodes of care per rolling six-month period and four episodes of care per rolling year.

Providers can use the Residential Substance Use Disorder Treatment Request form to submit authorization requests for persons who require additional episodes within the 6- or 12-month time frame.

### **10.10.4.1 Admission Criteria for Residential Treatment Services**

The admission criteria for residential treatment services follow the existing Texas Department of Insurance licensure requirements and standards that are specified in 28 TAC §3.8001-§3.8030.

The diagnosis must meet the criteria for the definition of an SUD in the most current version of the APA's DSM.

All persons must meet the following conditions to receive treatment in a residential treatment service program:

- Medical Functioning—The following must be present with regard to medical functioning:
  - Documented medical assessment following admission (except in instances where the person is being referred from an inpatient service) indicates that the person is medically stable and not in acute withdrawal.
  - The person is not bed-confined and has no medical complications that would hamper participation in the residential service.
- Family, Social, or Academic Dysfunction and Logistic Impairments—At least one of the following must be present with regard to family, social, or academic dysfunction and logistic impairments:
  - The person manifests severe social isolation or withdrawal from social contacts.
  - The person lives in an environment (social and interpersonal network) in which treatment is unlikely to succeed (e.g., a chaotic family dominated by interpersonal conflict, which undermines person's efforts to change).
  - The person's family or significant others are opposed to the person's treatment efforts and are not willing to participate in the treatment process.
  - Family members or significant others living with the person manifest current SUDs and are likely to undermine treatment.

- Logistic impairments (e.g., distance from treatment facility or mobility limitations) preclude participation in an outpatient treatment setting.
- Emotional and Behavioral Status—The person must meet all three of the following criteria with regard to emotional and behavioral status:
  - The person is coherent, rational, and oriented for treatment.
  - Mental state of the person does not preclude the person's ability to comprehend and understand the materials presented and participate in rehabilitation or the treatment process.
  - The medical record contains documentation that with continued treatment the person will be able to improve or internalize the person's motivation toward recovery within the recommended length of stay time frames (e.g., becoming less defensive, verbalizing, and working on alcohol or drug related issues). Interventions, treatment goals, or contracts are in place to help the person deal with or confront the blocks to treatment (e.g., family intervention or employee counseling confrontation).
- Chemical Substance Use—The person must meet at least one of the following criteria with regard to chemical substance use:
  - The person's chemical substance use is excessive, and the person has attempted to reduce or control it but has been unable to do so (as long as chemical substances are available).
  - Virtually all of the person's daily activities revolve around obtaining, using, or recuperating from the effects of chemical substances, and the person requires a secured environment to control the person's access to chemical substances.

#### **10.10.4.2 Residential Treatment Services for Adolescents**

Adolescents who are 13 through 17 years of age must meet all above conditions and the following conditions to receive treatment in an adolescent residential treatment service program:

- At the maturation level, the adolescent must meet both of the following criteria:
  - The adolescent is assessed as manifesting physical maturation at least in middle adolescent range (i.e., post-pubescent).
  - The history of the adolescent reflects cognitive development of at least 11 years of age.
- The adolescent must display at least one of the following with regard to developmental status:
  - Documented history of inability to function within the expected age norms despite normal cognitive and physical maturation (e.g., refusal to interact with family members, overt prostitution, felony, or other criminal charges).
  - A recent history of moderate to severe conduct disorder, as defined in the APA's DSM, or impulsive disregard for social norms and rights of others.
  - Documented difficulty in meeting developmental expectations in a major area of functioning (e.g., social, academic, or psychosexual) to an extent that interferes with the capacity to remain behaviorally stable.

#### **10.10.4.3 Continued Stay Criteria for Residential Treatment Services**

At least one of the following conditions must be present for continued stay in a residential treatment program:

- Chemical Dependency Rehabilitation or Treatment Complications:
  - The person recognizes or identifies with the severity of the alcohol or drug problem but demonstrates minimal insight into the person's defeating the use of alcohol or drugs. However, documentation in the medical record indicates that the person is progressing in treatment.

- The person identifies with the severity of the alcohol or drug problem and manifests insight into the person's personal relationship with mood-altering chemicals, yet does not demonstrate behaviors that indicate the development of problem-solving skills that are necessary to cope with the problem.
- The person would predictably relapse if moved to a lesser level of care.
- Psychiatric or Medical Complications:
  - Documentation in the medical record indicates an intervening medical or psychiatric event that was serious enough to interrupt rehabilitation or treatment, but the person is again progressing in treatment.
  - Documentation in the medical record indicates that the person is being held pending an immediate transfer to a psychiatric, acute medical service, or inpatient withdrawal management alcohol or drug service.

### 10.10.5 Prior Authorization for Outpatient Treatment Services

Prior authorization for outpatient treatment services beyond the annual limitation of 135 units of group services and 26 hours of individual services per calendar year, may be considered with documentation supporting medical necessity for continued treatment services. Providers may submit requests requiring additional services using the Outpatient Substance Use Disorder Counseling Extension request form.

Requests must be submitted before providing the extended services. The documentation must include the following information:

- The person is meeting treatment goals.
- The person demonstrates insight and understanding into relationship with mood-altering chemicals, but continues to present with issues addressing the life functions of work, social, or primary relationships without the use of mood-altering chemicals.
- The person is physically abstinent from chemical substance use, but remains mentally preoccupied with such use to the extent that the person is unable to adequately address primary relationships, or social or work tasks, but there are indications that, with continued treatment, the person will effectively address these issues.
- Although other psychiatric or medical complications exist that affect the person's treatment, there is documentation to support the person continues to show treatment progress and there is evidence to support the benefits of continued treatment.

## 10.11 Documentation Requirements

To facilitate determination of medical necessity and avoid unnecessary denials, the provider must provide correct and complete information, including documentation for medical necessity for the services requested. The provider must maintain documentation of medical necessity in the person's medical record.

The requesting provider may be asked for additional information to clarify or complete a request.

Retrospective review may be performed to ensure documentation supports the medical necessity of the requested services.

Documentation requirements for a telemedicine or telehealth service are the same as for an in-person visit and must accurately reflect the services rendered. Documentation must identify the means of delivery when provided by telemedicine or telehealth.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telemedicine and telehealth documentation requirements including requirements for informed consent.

## 10.12 Reimbursement and Limitations

### 10.12.1 Withdrawal Management Services

Inpatient hospital-based withdrawal management is reimbursed by the reimbursement methodology specific to the inpatient hospital. Separate reimbursement may be provided for physician services performed during an inpatient stay.

Residential withdrawal management and treatment services are considered outpatient services for the purposes of reimbursement and should be billed accordingly.

Residential withdrawal management services (procedure codes H0012, H0031, S9445, and T1007) are limited to once per day, any provider.

Residential withdrawal management services (procedure codes H0031, H0047, S9445, or T1007) will be denied if billed without lead procedure code H0012 on the same day, same provider.

Room and board for residential withdrawal management and treatment (procedure code H0047) is limited to once per date of service, any provider. Procedure code H0047 is reimbursed for persons who are 21 years of age and older as an access-based fee and as an informational detail for persons who are 20 years of age and younger.

Outpatient withdrawal management (procedure codes H0016, H0050, and S9445) is limited to once per day, any provider and may be reimbursed on the same date of service as outpatient SUD treatment by the same or different provider when medically necessary and identified in the person's treatment plan.

Outpatient withdrawal management (procedure codes H0050 and S9445) will be denied if billed without lead procedure code H0016 on the same day, same provider.

Separate reimbursement may be provided for physician services during a residential stay.

#### 10.12.1.1 Treatment Services

Outpatient treatment services are limited to 135 units of group counseling and 26 hours of individual counseling per calendar year when provided by a CDTF. Providers may submit requests requiring additional services using the Outpatient Substance Use Disorder Counseling Extension request form.

Residential treatment services (procedure code H2035) are limited to one per day and are allowed up to a maximum of 35 days.

Outpatient treatment (procedure codes H0004 and H0005) will be denied if billed on the same date of service as residential withdrawal management (procedure codes H0012, H0031, H0047, S9445, and T1007) or residential treatment (procedure code H2035).

Procedure code H0047 will be denied if billed without lead procedure code H2035 or H0012 on the same day, same provider.

**Referto:** Subsection 6.4.1, "National Correct Coding Initiative (NCCI) Guidelines" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for information about NCCI MUE guidelines.

### 10.12.2 MAT Services

Claims billed for MAT must include the person's substance use disorder diagnosis. MAT billing may include billing for induction as well as maintenance.

Methadone administration (procedure code H0020) for opioid disorder must be submitted with the following modifiers:

- When methadone is administered with supervision in a facility the provider must submit claims using the UA modifier to indicate the facility administered doses
- When methadone is dispensed without supervision as a take home dose the provider must submit claims using the U1 modifier to indicate take home doses

Methadone provided in an outpatient setting (procedure code H0020) is limited to once per date of service, by any provider and is reimbursed at a fixed daily rate. Reimbursement for procedure code H0020 with modifier U1 is limited to a quantity of 30 per 30 days, any provider.

Providers that allow take-home doses must submit procedure code H0020 with modifier U1 for each date of service for which a take-home dose is dispensed. Methadone that is dispensed for unsupervised take-home use should be dispensed in alignment with the federal opioid treatment standards in Title 42 Code of Federal Regulations (CFR) §8.12.

Methadone administration (procedure code H0020) submitted without a modifier will be denied.

Non-methadone (e.g., buprenorphine) administration (procedure code H0033) for opioid disorder must be submitted with the following modifiers:

- When non-methadone is administered with supervision in a facility the provider must submit claims using the modifier UA to indicate opioid disorder treatment facility doses or claims will be denied
- When non-methadone is dispensed without supervision as a take home dose the provider must submit claims using the modifier U1 to indicate opioid disorder take home doses or claims will be denied

Non-methadone provided in an outpatient setting (procedure code H0033) is limited to once per date of service, by any provider. Reimbursement for procedure code H0033 with modifier U1 is limited to a quantity of 30 per 30 days, any provider.

Providers that allow take-home doses must submit procedure code H0033 with modifier U1 for each date of service for which a take-home dose is dispensed. Non-methadone that is dispensed for unsupervised take-home use should be dispensed in alignment with the federal opioid treatment standards in Title 42 Code of Federal Regulations (CFR) §8.12.

When non-methadone is administered in a facility for a non-opioid treatment, providers must use procedure code H0033 to indicate non-opioid treatment in a facility.

Non-methadone administration (procedure code H0033) submitted without a modifier will be denied. Physician and physician extenders may be reimbursed separately using the appropriate evaluation and management procedure codes.

Injectable administration is considered part of MAT and is not reimbursed separately. Procedure code 96372 will be denied when billed for the same date of service by any provider as procedure code H0020 or H0033.

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied.

Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates/rate-changes](http://www.tmhp.com/resources/rate-and-code-updates/rate-changes).

**Note:** *Certain rate reductions including, but not limited to, reductions by place of service, client type program, or provider specialty may not be reflected in the Adjusted Fee column.*

## 10.13 Claims Filing

Claims for SUD services must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a CMS-1500 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information about electronic claims submissions.

Subsection 6.1, “Claims Information” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*).

11 Collaborative Care Model (CoCM)

The Collaborative Care Model (CoCM) is a systematic approach to the treatment of behavioral health conditions (mental health or substance use) in primary care settings. The model integrates the services of behavioral health care managers (BHCMS) and psychiatric consultants with primary care provider oversight to proactively manage behavioral health conditions as chronic diseases, rather than treating acute symptoms.

CoCM services are benefits of Texas Medicaid for persons of all ages who have a mental health or substance use condition to include a pre-existing or suspected mental health or substance use condition, when provided by a physician, physician assistant, nurse practitioner, or clinic/group practice, federally qualified health center (FQHC), or rural health clinic (RHC) (henceforth referred to as the primary care provider).

Prior to delivering CoCM services, the primary care provider must attest in the Provider Enrollment and Management System (PEMS) that their practice location has an established CoCM program, as described in this handbook. To ensure continued adherence to the CoCM core principles and the specific functional requirements of the model, the primary care provider must also re-attest in PEMS at the time of enrollment revalidation.

CoCM services must be provided under the direction of the primary care provider and are benefits when provided in an office, outpatient hospital, inpatient hospital, skilled nursing facility or intermediate care facility, extended care facility, or other locations.

**Referto:** Subsection 9.3, “Collaborative Care Model (CoCM)” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information.

12 Claims Resources

Refer to the following sections or forms when filing claims:

| Resource                                     | Location                                                                                                                                                     |

## 1 General Information

This handbook contains information about Texas Medicaid fee-for-service benefits. For information about managed care benefits, refer to the Medicaid Managed Care Handbook.

Managed care carve-out services are administered as fee-for-service benefits. A list of all carve-out services is available in Section 8, “Carve-Out Services” in the *Medicaid Managed Care Handbook* (Vol. 2, *Provider Handbooks*).

The information in this handbook is intended for CRCP services and provides information about Texas Medicaid’s benefits, policies, and procedures applicable to these therapies.

**Important:** *All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

**Referto:** “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, *General Information*) for more information about enrollment procedures.

## 2 Enrollment

**Referto:** Subsection 1.7.17, “Certified Respiratory Care Practitioner (CRCP) Services” in “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, *General Information*) for additional information about enrollment.

## 3 CRCP Services

### 3.1 Services, Benefits, Limitations, and Prior Authorization

Certified respiratory care practitioner services are a benefit of Texas Medicaid when provided in the home setting for ventilator-dependent clients by providers enrolled in Texas Medicaid as respiratory therapists.

Subject to the following specifications, conditions, and limitations, in-home certified respiratory care practitioner services are available to eligible clients who:

- Are ventilator-dependent for life support at least six hours per day.
- Have been ventilator-dependent for at least 30 consecutive days as an inpatient in one or more hospitals, skilled nursing facilities (SNF), or intermediate care facilities (ICF).
- But for the availability of these respiratory care services at home, would require respiratory care as an inpatient in a hospital, SNF, or ICF.
- Would be eligible to have reimbursement made for such inpatient care under the state Medicaid plan.
- Have adequate social support services to be cared for at home.

- Wish to be cared for at home.
- Require professional respiratory therapy services in addition to those respiratory therapy services that are provided through the Home Health durable medical equipment (DME) lease of a ventilator.

**Note:** *For clients who are birth through 20 years of age who do not meet the criteria above, services to be performed by a certified respiratory care practitioner may be considered through the Comprehensive Care Program (CCP).*

Benefits include:

- Respiratory therapy services and treatments prescribed by a physician or allowed practitioner who is familiar with the client's medical history and care, and who has medically determined that in-home care is safe and feasible for the client.
- Education of the client, the appropriate family members, or support persons regarding the in-home respiratory care. Education must include the use and maintenance of required supplies, equipment, and techniques appropriate to the situation.

**Note:** *An allowed practitioner is an individual licensed in Texas as a physician assistant (PA), a certified nurse practitioner (CNP), or clinical nurse specialist (CNS).*

Providers must use procedure code 99504 for in-home respiratory services.

Providers of respiratory therapy services must meet the following requirements:

- Be certified by the Texas Medical Board to practice under Chapter 604 of the Texas Occupations Code.
- Be enrolled and approved for participation in the Texas Medical Assistance Program.
- Bill for benefit services in the manner and format prescribed by HHSC or its designee.
- Comply with all applicable federal, state, and local laws and regulations.

The professional service may be billed by the certified respiratory care practitioner for services provided in the client's home (procedure code 99504). The professional service will be allowed once per day up to a limit of 24 visits per year. The recommended schedule includes 7 visits during the first week, a total of 6 visits during the second through fourth week, and 11 monthly visits for the second through the 12th month.

Providers will not be reimbursed for procedure codes 99503 and 99504 on the same date of service, any provider.

Disposable respiratory supplies are a benefit through Texas Medicaid Title XIX Home Health Services and are not reimbursed to the certified respiratory therapist.

### 3.1.1 Authorization Requirements

Prior authorization requests may be submitted to the TMHP Prior Authorization Department via mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

**Referto:** Subsection 5.5.1.2, "Document Requirements and Retention" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*) for additional information about electronic signatures.

Prior authorization is required for in-home certified respiratory care practitioner services (procedure code 99504).

A completed Special Medical Prior Authorization (SMPA) Request Form prescribing the service must be signed and dated by a physician or allowed practitioner familiar with the client before requesting prior authorization for respiratory care services. The completed SMPA Request Form must include the procedure codes and quantities for services requested. Without this information, requests will be considered incomplete.

The completed SMPA Request Form with the original dated signature must be maintained by the prescribing physician or allowed practitioner in the client's medical record. A copy of the completed, signed, and dated form must be maintained by the certified respiratory care practitioner in the client's medical record.

**Referto:** [Special Medical Prior Authorization \(SMPA\) Request Form](https://www.tmhp.com) on the TMHP website at [www.tmhp.com](https://www.tmhp.com).

To complete the prior authorization process by paper, the requesting provider must fax or mail the completed form to the Special Medical Prior Authorization (SMPA) Department. To complete the prior authorization process electronically, the requesting provider must submit the prior authorization requirements through any approved electronic methods.

To facilitate the determination of medical necessity and avoid unnecessary denials, the physician or allowed practitioner must provide correct and complete information, including documentation of medical necessity for the service requested and is subject to retrospective review. The physician or allowed practitioner must maintain documentation of medical necessity in the client's medical record. The requesting provider may be asked for additional information to clarify or complete a request for the service.

The SMPA Request Form must be submitted with the following documentation supporting medical necessity for the requested procedure:

- The client is on a ventilator at least six hours per day.
- The client has been ventilator dependent for 30 consecutive days or more as an inpatient in one or more hospitals, SNF, or ICF.
- The respiratory therapy services are in lieu of respiratory services requiring the client to remain in an inpatient care setting.
- Identification of the adequate support services in place that allow the client to be cared for at home.
- The respiratory services and goals for the services that will be provided by the certified respiratory care practitioner.
- The frequency and number of home visits requested by the certified respiratory care practitioner.
- The client's wish to be cared for at home.
- Documentation supporting why the respiratory therapy visits included in the Home Health DME rental of a ventilator would not meet the client's medical needs.

The request may be authorized for up to a 12-month period. Requests for more than 24 visits in a 12-month period will be referred for the medical director to review and a determination will be based on the individual client's medical needs.

Retrospective review may be performed to ensure documentation supports the medical necessity of the service when billing the claim for the procedure codes listed within the policy.

## 4 CRCP-CCP Services

### 4.1 Services, Benefits, Limitations, and Prior Authorization

In-home respiratory services by a licensed certified respiratory care practitioner are a benefit of the Texas Medicaid Comprehensive Care Program (CCP) for non-ventilator dependent clients who are birth through 20 years of age when rendered by providers who are enrolled with Texas Medicaid as follows:

- Respiratory Therapist
- Physicians
- Home Health Agency

CRCP services are a benefit when provided in the home setting for a client with a chronic underlying respiratory illness, or a newly diagnosed long-term respiratory condition that is currently resulting in a suboptimal respiratory status.

The services provided through this policy are designed to maximize the client or caregiver's ability to self-manage the client's disease when the physician or allowed practitioner deems the client or caregiver will benefit from the expertise of a respiratory care practitioner for the provision of respiratory care or education. Respiratory therapy care services that do not require the specialty of a certified respiratory care practitioner are not a benefit. The certified respiratory care practitioner's services allow for the performance of pulmonary care, when required, and the education of the client or caregivers in:

- Disease management.
- Prevention of infections and/or complications.
- Proper use of medications and respiratory equipment which the client is using.

**Note:** An allowed practitioner is an individual licensed in Texas as a physician assistant (PA), a certified nurse practitioner (CNP), or clinical nurse specialist (CNS).

**Referto:** Section 3, "CRCP Services" in this handbook for respiratory care practitioner services for clients who are ventilator-dependent.

Providers must use the following procedure codes for in-home respiratory services:

| Procedure Codes |       |       |
|-----------------|-------|-------|
| S9441           | 98960 | 99503 |

A certified respiratory care practitioner must hold a certificate or temporary permit in compliance with the *Texas Occupations Code* §604.105a.

A certified respiratory care practitioner must meet the following requirements:

- Be enrolled and approved for participation with Texas Medicaid as an independent practitioner or be employed by a physician, physicians group, or home health agency.
- Submit claims for covered services in the manner and format prescribed by HHSC or its designee
- Comply with all applicable federal, state, and local laws and regulations

Procedure codes S9441, 98960, and 99503 are each limited to once per day, by any provider, and twice per lifetime. Additional visits may be reimbursed when additional prior authorization criteria have been met.

Providers will not be reimbursed for procedure codes S9441, 98960, 99503, or 99504, in any combination, if submitted on the same date of service, by any provider.

Disposable respiratory supplies are a benefit through Texas Medicaid Title XIX Home Health Services and are not reimbursed to the certified respiratory therapist. Retrospective review may be performed to ensure documentation supports the medical necessity of the service when claims are submitted for the procedure codes listed within this handbook.

#### 4.1.1 Authorization Requirements

Prior authorization requests may be submitted to the TMHP Prior Authorization Department via mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

**Referto:** Subsection 5.5.1.2, "Document Requirements and Retention" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*) for additional information about electronic signatures.

Prior authorization is required for in-home certified respiratory care practitioner's services.

A completed CRCP Prior Authorization Request Form requesting respiratory care services must be signed and dated by a physician or allowed practitioner familiar with the client, before requesting prior authorization for respiratory care services. The completed CRCP Prior Authorization Request Form must include the procedure codes and quantities for services requested.

The completed CRCP Prior Authorization Request Form with the original dated signature must be maintained by the prescribing physician or allowed practitioner in the client's medical record. A copy of the completed, signed, and dated form must be maintained by the certified respiratory care practitioner in the client's medical record.

**Referto:** [CRCP Prior Authorization Request Form](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

To complete the prior authorization process by paper, the requesting provider must fax or mail the completed form to the CCP prior authorization unit. To complete the prior authorization process electronically, the requesting provider must submit the prior authorization requirements through any approved electronic methods.

To facilitate the determination of medical necessity and avoid unnecessary denials, the physician or allowed practitioner must provide correct and complete information, including documentation of medical necessity for the services requested and is subject to retrospective review. The physician or allowed practitioner must maintain documentation of medical necessity in the client's medical record. The requesting provider may be asked for additional information to clarify or complete a request for the service.

The following documentation must be submitted to the CCP Prior Authorization Unit for prior authorization:

- A physician or allowed practitioner's order
- Client's primary diagnosis with details of current suboptimal respiratory status and history of more than one emergency room or acute care clinic visits within the last three months
- The services the certified respiratory care practitioner will provide
- Reason this service or education needs to be provided in the home setting and cannot be provided in the office or facility setting. These may include, but are not limited to:
  - Testing of home equipment.
  - Evaluation of the patient or caregiver's technique with home respiratory care equipment.
  - Evaluation of caregiver's ability to assess the client's respiratory status and intervene appropriately if necessary.

- Home environment assessment.
- The goals of the services to be provided in the home and the estimated length of time to attain these goals

Prior authorization is required for procedure code S9441, and services must be performed by a certified respiratory care practitioner who has been certified by the National Asthma Educator Certification Board (NAECB) as a certified asthma educator. Certification documentation must be provided with the CRCP Prior Authorization Request Form in order to be considered for prior authorization.

Asthma conditions may include, but are not limited to:

- Extrinsic asthma
- Intrinsic asthma
- Chronic obstructive asthma
- Exercise-induced asthma

Prior authorization is required for procedure codes 98960 and 99503. Respiratory conditions may include, but are not limited to:

- Cystic fibrosis
- Obstructive sleep apnea (use of CPAP or BiPAP)
- Chronic respiratory insufficiency

Prior authorization will not be considered for certified respiratory care practitioners to perform routine respiratory treatment or services in the home.

Prior authorization requests for conditions or quantities beyond those limits established in this policy (two per lifetime) will be considered on a case-by-case basis upon review by the Texas Medicaid & Healthcare Partnership (TMHP) Medical Director. The following additional information must be provided:

- Documentation of how the objectives of prior visits have not been achieved to support the need for additional visits beyond those limits established in this policy.
- Reason these additional services need to be provided in the home setting.
- The goals of these services and the estimated length of time to attain these goals.
- The frequency and number of home visits requested by the certified respiratory care practitioner.

## 5 Documentation Requirements

All supporting documentation must be included with the request for prior authorization. Providers can submit requests to TMHP as follows:

- TMHP Prior Authorization on the Portal: [www.tmhp.com/topics/prior-authorization](http://www.tmhp.com/topics/prior-authorization)

**Note:** The above link is to the TMHP Prior Authorization web page. From the TMHP Prior Authorization web page, click “PA On the Portal” to access the TMHP PA on the Portal application.

- CCP requests, Fax to: 1-512-514-4212
- Non-CCP requests, Fax to: 1-512-514-4213

## 6 Prescribed Pediatric Extended Care Center (PPECC) Services

CRCP services may be reimbursed when provided in a PPECC setting. When services are rendered in a PPECC setting, the PPECC's name and NPI number must appear on the professional claim, in addition to the certified respiratory care provider's NPI. The certified respiratory care practitioner must also indicate outpatient hospital as the place of service when rendering services in a PPECC, or the claim will be denied.

When certified respiratory care services are rendered in a PPECC, the certified respiratory care provider must document coordination with the PPECC.

The PPECC and the certified respiratory care practitioner must have a written agreement for each client related to the provision of respiratory care practitioner services provided at the PPECC. The written agreement must address responsibilities of both parties, and how the parties will coordinate related to the client's plan of care. The written agreement must be maintained in the client's medical record.

## 7 Claims Filing and Reimbursement

### 7.1 Claims Information

CRCP services must be submitted to the Texas Medicaid & Healthcare Partnership (TMHP) in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

**Referto:** "Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on electronic claims submissions.

"Section 6: Claims Filing" (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*). Blocks that are not referenced are not required for processing by TMHP and may be left blank.

Electronic billers must submit the prior authorization number (PAN) on the electronic claim form.

Providers should consult the software vendor for the location of this field in the software.

### 7.2 Reimbursement

Respiratory therapy services provided by a participating CRCP are reimbursed the lesser of the provider's billed charges or the rate calculated in accordance with 1 TAC §355.8089.

Providers can refer to the Online Fee Lookup (OFL) or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates/rate-changes](http://www.tmhp.com/resources/rate-and-code-updates/rate-changes).

**Referto:** Subsection 2.2, "Fee-for-Service Reimbursement Methodology" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for more information about reimbursement.

Providers will not be reimbursed for procedure codes 99503 and 99504 on the same date of service, any provider.

The professional service may be billed by the CRCP for services provided in the client's home (procedure code 99504). The professional service will be allowed once per day up to a limit of 24 visits per year. The recommended frequency for CRCP services is as follows: 7 visits during the first week, a total of 6 visits during the second through fourth weeks, and 11 monthly visits for the second through the 12th month.

Disposable respiratory supplies and respiratory equipment rental or purchase are a home health services benefit and are not reimbursed to the certified respiratory therapist.

**Referto:** Subsection 2.2, "Services, Benefits, Limitations and Prior Authorization" in the *Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks)* for more information about DME or medical supplies prior authorization information.

Retrospective review may be performed to ensure documentation supports the medical necessity of the service when claims are submitted for the procedure codes listed within this handbook.

The *Healthcare Common Procedure Coding System (HCPCS)/Current Procedural Terminology (CPT)* codes included in this policy are subject to National Correct Coding Initiative (NCCI) relationships. Any exceptions to NCCI code relationships are specifically noted in the policy. Providers should refer to NCCI for correct coding guidelines and specific applicable code combinations.

| <b>Appendix G. American Academy of Pediatric Dentistry Periodicity Guidelines</b>            | <b>243</b> |

# 1 General Information

The information in this handbook is intended for dentists, school districts, physicians, physician assistants (PAs), rural health clinics (RHCs), federally qualified health centers (FQHCs), advanced practice registered nurses (APRNs), home health agencies (HHAs), durable medical equipment (DME) suppliers, hospitals, and clinics. The handbook provides information about Texas Medicaid's benefits, policies, and procedures applicable to these providers.

**Important:** *All providers are required to read and comply with "Section 1: Provider Enrollment and Responsibilities" (Vol. 1, General Information). In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

All providers are required to report suspected child abuse or neglect as outlined in subsection 1.7, "Provider Responsibilities" in "Section 1: Provider Enrollment and Responsibilities" (Vol. 1, General Information).

## 1.1 Medical Transportation Program

The Medical Transportation Program (MTP) is funded with federal and state dollars to arrange nonemergency transportation to medical or dental appointments for eligible clients and their attendants.

The Health and Human Services Commission (HHSC) administrative rules govern parental accompaniment of children who receive Medicaid screenings, treatments, and MTP services.

Titles 1 Texas Administrative Code (TAC), Part 15, §380.207 allows parents or guardians to authorize one adult and one alternate adult to accompany their children on MTP rides when the parent or guardian is unable to do so. The parent or guardian is required to designate the other adult on a form prescribed by HHSC in accordance with section §380.207(4).

An adult who is authorized by a parent or guardian may not be a provider or an employee or affiliate of a provider that submits claims for services.

**Referto:** The *Medical Transportation Program Handbook* (Vol. 2, *Provider Handbooks*) for more information.

## 1.2 Rates Reduction

Texas Medicaid implemented mandated rate reductions for certain services. The Online Fee Lookup (OFL) and static fee schedules include a column titled "Adjusted Fee" to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the Texas Medicaid & Healthcare Partnership (TMHP) website at [www.tmhp.com/resources/rate-and-code-updates/rate-changes](http://www.tmhp.com/resources/rate-and-code-updates/rate-changes).

### 1.3 NP, CNS, PA, and CNM Claims Submitted by a Physician

Physicians will be reimbursed 92 percent of the established reimbursement rate for services provided by an NP, CNS, PA, or CNM if the physician does not make a decision regarding the client's care or treatment on the same date of service as the billable medical visit. Physicians who submit a claim using the physician's own National Provider Identifier (NPI) for the services that were provided by the NP, CNS, PA, or CNM must submit one of the following modifiers on each claim detail:

- SA—Services were provided by an NP or CNS
- U7—Services were provided by a PA
- SB—Services were provided by a CNM

**Exception:** *The 92 percent reimbursement rate does not apply to laboratory services, radiology services, or injections provided by an NP, CNS, PA, or CNM.*

### 1.4 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission

According to the three-day and one-day payment window reimbursement guidelines, most professional and outpatient diagnostic and nondiagnostic services that are rendered within the designated time frame of an inpatient hospital stay and are related to the inpatient hospital admission will not be reimbursed separately from the inpatient hospital stay if the services are rendered by the hospital or an entity that is wholly owned or operated by the hospital.

These reimbursement guidelines do not apply in the following circumstances:

- Services are rendered at a federally qualified health center (FQHC) or rural health clinic (RHC).
- Services are for a THSteps medical checkup.
- Professional services are rendered in the inpatient hospital setting.
- The hospital and the physician office or other entity are both owned by a third party, such as a health system.
- The hospital is not the sole or 100-percent owner of the entity.

These reimbursement guidelines do not apply for FQHC, RHC, THSteps, and professional services that are rendered in the inpatient hospital setting.

**Referto:** Subsection 3.7.4.17, "Payment Window Reimbursement Guidelines" in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for additional information about the payment window reimbursement guidelines.

## 2 Medicaid Children's Services Comprehensive Care Program (CCP)

### 2.1 CCP Overview

CCP is an expansion of the Early Periodic Screening, Diagnosis, and Treatment (EPSDT) service as mandated by the Omnibus Budget Reconciliation Act (OBRA) of 1989, which requires all states to provide all medically necessary treatment for correction of physical or mental problems to Texas Health Steps (THSteps)-eligible clients when federal financial participation (FFP) is available, even if the services are not covered under the state's Medicaid plan.

Under the Early Periodic Screening, Diagnostic, and Treatment (EPSDT) regulation, known in Texas as Texas Health Steps (THSteps), Section 1905(r) of the Social Security Act mandates that all Medicaid-eligible beneficiaries who are birth through 20 years of age receive medically necessary services to treat, correct and ameliorate illnesses and conditions identified if the service is covered in the state's Medicaid

plan or is an optional Medicaid service. It is the responsibility of the state to determine medical necessity on a case specific basis. No arbitrary limitations on services are allowed (e.g., one pair of eyeglasses or 10 therapy sessions per year) if determined to be medically necessary.

Services not covered under this section include:

- Experimental or investigational treatment.
- Services or items not generally accepted as effective and/or not within the normal course and duration of treatment.
- Services for the caregiver or provider convenience.

All EPSDT requirements must be adhered to for beneficiaries who receive services under managed care arrangements.

The following CCP provider sections describe the specific requirements of each area of responsibility:

- Subsection 2.6, “Clinician-Directed Care Coordination Services (CCP)” in this handbook.
- Subsection 2.11, “Medical Nutrition Counseling Services (CCP)” in this handbook.
- Subsection 2.9, “Early Childhood Intervention (ECI) Services” in this handbook.
- Subsection 2.12, “Personal Care Services (PCS) (CCP)” in this handbook.
- Subsection 2.17, “Inpatient Psychiatric Hospital or Facility (Freestanding) (CCP)” in this handbook.
- Subsection 2.18, “Inpatient Rehabilitation Facility (Freestanding) (CCP)” in this handbook.

**Referto:** The *Physical Therapy, Occupational Therapy, and Speech Therapy Services Handbook (Vol. 2, Provider Handbooks)* for information about comprehensive outpatient rehabilitation facilities (CORFs) and outpatient rehabilitation facilities (ORFs).

The *Home Health Nursing and Private Duty Nursing Services Handbook (Vol. 2, Provider Handbooks)* for more information about private duty nursing (PDN) services.

The *Physical Therapy, Occupational Therapy, and Speech Therapy Services Handbook (Vol. 2, Provider Handbooks)* for more information about CCP therapy services.

The *Certified Respiratory Care Practitioner (CRCP) Services Handbook (Vol. 2, Provider Handbooks)* for more information about CRCP CCP services.

### 2.1.1 Client Eligibility

The client must be birth through 20 years of age and eligible for THSteps on the date of service. If the client's Your Texas Benefits Medicaid card states “Emergency,” “PE,” or “QMB,” the client is not eligible for CCP benefits.

Clients are ineligible for CCP services beginning the day of their 21st birthday.

### 2.1.2 Enrollment

**Referto:** Subsection 1.7.19, “Children's Services Comprehensive Care Program (CCP)” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for enrollment information.

### 2.1.3 Services, Benefits, and Limitations

Payment is considered for any health-care service that is medically necessary and for which FFP is available. CCP benefits are allowable services not currently covered under Texas Medicaid (e.g., speech-language pathology [SLP] services for nonacute conditions, PDN, prosthetics, orthotics, apnea monitors and some DME, some specific medical nutritional products, medical nutrition services, inpatient

rehabilitation, travel strollers, and special needs car seats). CCP benefits also include expanded coverage of current Texas Medicaid services where services are subject to limitations (e.g., diagnosis restrictions for total parenteral nutrition [TPN] or diagnosis restrictions for attendant care services).

Requests for services that require a prior authorization must be submitted to TMHP. Prior authorization is a condition for reimbursement, not a guarantee of payment. For information about specific benefits, providers can refer to provider-specific sections of this manual.

Payment cannot be made for any service, supply, or equipment for which FFP is not available. The following are some examples:

- Vehicle modification, mechanical, or structural (such as wheelchair lifts).
- Structural changes to homes, domiciles, or other living arrangements.
- Environmental equipment, supplies, or services, such as room dehumidifiers, air conditioners, filters, space heaters, fans, water purification systems, vacuum cleaners, and treatments for dust mites, rodents, and insects.
- Ancillary power sources and other types of standby equipment (except for technology-dependent clients such as those who are ventilator-dependent for more than six hours per day).
- Educational programs, supplies, or equipment (such as a personal computer or software).
- Equine or hippotherapy.
- Exercise equipment, home spas or gyms, toys, therapeutic balls, or tricycles.
- Tennis shoes.
- Respite care (relief to caregivers).
- Aids for daily living (toothbrushes, spoons, reachers, and foot stools).
- Take-home drugs from hospitals (Eligible hospitals may enroll in and bill Vendor Drug Program (VDP). Pharmacies that want to enroll should call 512-491-1429.
- Therapy involving any breed of animal.

#### **2.1.4 Prior Authorization and Documentation Requirements**

Prior authorization is a condition for reimbursement; it is not a guarantee of payment. A prior authorization number (PAN) is a TMHP-assigned number establishing that a service or supply has been determined to be medically necessary and for which FFP is available. It is each provider's responsibility to verify the client's eligibility at the time each service is provided. Any service provided while the client is not eligible cannot be reimbursed by TMHP. The responsibility for payment of services is determined by private arrangements made between the provider and client.

Prior authorization of CCP services may be requested in writing by completing the appropriate request form, attaching any necessary supportive documentation, and submitting them by mail, fax, or the electronic portal to the TMHP-CCP department. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

Providers who fax new prior authorization requests, resubmitted requests, or additional information to complete a request must include:

- A working fax number on the prior authorization form, so that they can receive faxed responses and correspondence from TMHP.
- The last four digits of the client's Medicaid identification number on the fax coversheet.

Prior authorization may also be requested through the TMHP website. (Providers can refer to Subsection 5.5.1, "Prior Authorization Requests Through the TMHP Website" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*) for additional information to include mandatory documentation and retention requirements). All requested information on the form must be completed, or the request is returned to the provider. Incomplete forms are not accepted. If prior authorization is granted, the potential service provider (such as the DME supplier, pharmacy, registered nurse (RN), or physical therapist) receives a letter that includes the PAN, the procedures prior authorized, and the length of the authorization. Providers are notified in writing when additional information is needed to process the request for services.

Providers must submit a CCP Prior Authorization Request Form and documentation to support medical necessity to the CCP department before providing services. Providers must submit the CCP Prior Authorization Request Form when requesting a medically necessary service if the service is not addressed in the *Texas Medicaid Provider Procedures Manual* and the client is 20 years of age or younger.

**Important:** *Documentation to support medical necessity of the service, equipment, or supply (such as a prescription, letter, or medical records) must be current, signed, and dated by a physician (M.D. or D.O.) before services are performed. Providers must keep the information on file.*

**Referto:** CCP provider-specific sections for prior authorization requirements of specific services, including the appropriate prior authorization request forms.

#### **2.1.4.1 Incomplete Prior Authorization Requests**

Providers must respond to an incomplete prior authorization request within 14 business days of the request receipt date. Incomplete prior authorization requests are requests that are received by TMHP with missing, incomplete, or illegible information.

Prior to denying an incomplete request, TMHP's Prior Authorization department will attempt to get the correct information from the requesting provider. The Prior Authorization department will make a minimum of three attempts to contact the requesting provider before sending a letter to the client about the status of the request and the need for additional information.

If the necessary information to make a prior authorization determination is not received within 14 business days of the request receipt date, the request will be denied as "incomplete." To ensure timely processing, providers should respond to requests for missing or incomplete information as quickly as possible.

For fee-for-service (FFS) Medicaid requests that require a physician review before a final determination can be made, TMHP's Physician Reviewer will complete the review within three business days of receipt of the completed prior authorization request. An additional three business days will be allowed for requests that require a peer-to-peer review with the client's prescribing physician.

#### **2.1.4.2 Diagnosis Coding**

All providers must obtain the client's medical diagnosis from the physician. This information must be reflected on each claim submitted to TMHP.

#### **2.1.4.3 Drug and Medical Device Approval**

Manufacturers may request to have drug or medical device products added as a CCP benefit by sending the information in writing to the following address:

HHSC  
1100 West 49th Street  
Austin, TX 78756-3179

HHSC reviews the information. Requests for consideration must *not* be sent to TMHP.

#### 2.1.4.4 Physician Signature

The dated signature of the physician (M.D. or D.O.) on a prescription or CCP Authorization Request Form must be current to the service date(s) of the request, i.e., the signature must always be on or before the service start date and no older than three months before the current date(s) of service requested. Physician signatures dated after the service start date on initial requests cannot be accepted as documentation supporting medical necessity for dates of service prior to the signature date. A request for prior authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply. If services begin as a result of a verbal order before the physician's dated signature, proof of the verbal order must be submitted with the request.

Stamped signatures and dates are not accepted on CCP Authorization Request Forms or prescriptions for CCP prior authorized services, supplies, or equipment. Verbal orders must be cosigned and dated by a physician (M.D. or D.O.) within two weeks, per provider policy. Signatures of chiropractors or doctors of philosophy (PhDs) are not accepted on CCP Authorization Request Forms or prescriptions for CCP prior authorized services.

Certified nurse midwife (CNM), clinical nurse specialist (CNS), nurse practitioner (NP), and PA providers may sign on behalf of the physician for private duty nursing, physical, occupational and speech therapy services when the physician delegates this authority.

Physician prescriptions must be specific to the type of service requested.

## 2.2 Managed Care Organization (MCO) Clients Who Transition to Medicaid Fee-For-Service (FFS)

When clients transition from an MCO to FFS, providers can request that previously approved authorizations for Comprehensive Care Program (CCP) services, occupational therapy (OT), physical therapy (PT), private duty nursing (PDN), and speech therapy (ST) be transferred from the MCO to FFS.

### 2.2.1 Submission Guidelines

TMHP will consider the reimbursement of claims for services that were rendered on or after the MCO's disenrollment date only when the provider submits a request to TMHP to transfer the previously approved authorization for CCP services.

The request to TMHP must be received on or before the end date of the previously approved MCO authorization. Any requests submitted after the MCO's authorization end date will have to meet the regular submission guidelines for the specific service type.

### 2.2.2 Documentation Requirements

All of the requests to transfer the authorizations from the MCO to FFS must include:

- A copy of the previously approved authorization letter.
- All of the documentation that was sent in the original authorization request, including any physician orders that were used to determine the start of care. TMHP will accept the physician orders as the required documentation for the requested services.
- The completed CCP Prior Authorization Request form, Special Medical Prior Authorization (SMPA) form, Home Health Plan of Care, or Texas Medicaid Physical, Occupational, or Speech Therapy (PT, OT, ST) Prior Authorization Form, whichever is applicable for the requested service. The form must include the dates of service and quantities that are being requested from TMHP, which must match the dates of service and quantities that were approved in the original authorization.

**Note:** *It is not necessary to obtain signatures or dates on the forms listed above when submitted to TMHP for the purpose of transferring an authorization from an MCO to FFS Medicaid.*

Authorizations for services transferred from an MCO to FFS Medicaid are subject to retrospective review.

TMHP will verify the client's eligibility, the dates of service, and the quantities requested.

TMHP will process reimbursement claims as follows:

- Claims for services that were rendered before the date on which the transfer request was received will be denied as a late submission, and the provider will be notified of their administrative appeal rights through the Health and Human Services Commission (HHSC).
- Claims for services that were rendered on or after the date of receipt use the required information from the transferred authorization and will be processed as if the request was received in a timely manner.
- Claims for services that were paid by an MCO and then recouped must contain the recoupment EOB from the MCO for consideration of payment. The claims must meet the 95-day deadline from the recoupment disposition date.

**Note:** *Letter requests for refunds will not be accepted. A recoupment EOB with a disposition date is required.*

If a request to transfer an MCO authorization is submitted after the end date of the MCO authorization or the provider does not have an authorization letter from the MCO, TMHP will process the request to transfer the authorization based on established TMHP authorization submission guidelines for CCP services, PDN, OT, PT, and ST.

All new requests for rendered services must meet the documentation requirements.

### **2.2.3 New Services and Extension of Services**

For new services that occur after the client's MCO disenrollment change date, the provider is responsible for submitting all TMHP required paperwork and meeting all established submission guidelines for prior authorization.

Requests for the extension of services that occur after the MCO disenrollment change date must include all of the paperwork that is required by TMHP and meet all established submission guidelines for prior authorization.

### **2.2.4 Loss of Eligibility**

If an MCO disenrolled a client and the client also loses Medicaid eligibility, providers must anticipate, if and when Medicaid eligibility is restored, that the client will initially be considered a Medicaid FFS client and will have a retroactive eligibility period.

All requests for services that require prior authorization and that occur during the client's retroactive eligibility period, must be submitted to TMHP following the process that is outlined in subsection 5.1.1, "Prior Authorization Requests for Clients with Retroactive Eligibility" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*).

If a client is retroactively disenrolled by an MCO, all of the services that are rendered by the provider during this retroactive disenrollment period (specifically from the date on which the client was eligible for FFS to the date of the client's MCO eligibility change) will be denied by TMHP, and the provider will be notified of their administrative appeal rights.

TMHP may consider services for the MCO transition beginning on the date of the client's MCO eligibility change date and going forward. TMHP uses the MCO transition process for the submission of paperwork and the processing of provider requests.

## 2.3 Autism Services

Autism services are a benefit of the Texas Health Steps-Comprehensive Care Program (THSteps-CCP) for Medicaid children or youth who are 20 years of age or younger and meet the criteria outlined in this section.

### 2.3.1 Autism Spectrum Disorder (ASD)

Autism spectrum disorder (ASD) is a condition characterized by restricted, repetitive patterns of behavior, interests, or activities and deficits in social communication and social interaction, with onset of symptoms occurring in early childhood.

Texas Medicaid acknowledges that research and clinical practices in interventions for ASD are an evolving and dynamic field. As such, documentation to support the medical need for ASD services, including applied behavior analysis (ABA) services, may include intervention techniques with a sound basis in discipline-specific peer-reviewed literature when available, interventions with specific applicability to the person's clinical and functional profile (including comorbid conditions), and an individualized, person-centered treatment plan that aligns with the values and preferences of the person with ASD and their family.

### 2.3.2 Comprehensive Diagnostic Evaluation

A comprehensive diagnostic evaluation is required to diagnose ASD. A comprehensive diagnostic evaluation is the entire process of gathering information to determine a diagnosis, which must include a reliable, valid, standardized diagnostic assessment tool(s). Each element must be conducted by appropriately trained, specialized or certified providers. Diagnosis of ASD may be made by any one of the following providers or utilizing an interdisciplinary diagnostic team approach:

- A developmental pediatrician
- A neurologist
- A psychiatrist
- A licensed psychologist
- Interdisciplinary Diagnostic Team
  - Members of an interdisciplinary diagnostic team administer the elements required for the diagnosis of ASD. Each provider must be qualified by licensure to use the reliable, valid, standardized diagnostic assessment tool(s).
  - An interdisciplinary diagnostic team may be composed of a physician or allowed diagnosing provider who may coordinate with providers specializing in autism for consultation as listed under the Interdisciplinary Diagnostic Team. Providers of the interdisciplinary diagnostic team must be qualified child specialists and have expertise in autism. The prescribing provider may use the documented results of a reliable, valid, standardized diagnostic assessment tool or combination of tools from the following disciplines:
    - Any provider listed above
    - Licensed clinical social worker
    - Licensed professional counselor
    - Licensed psychological associate
    - Licensed specialist in school psychology
    - Occupational therapist (OT)

- Speech-language pathologist (SLP)

**Note:** *An allowed practitioner is an individual licensed in Texas as a physician assistant (PA), a certified nurse practitioner (NP), or clinical nurse specialist (CNS).*

The comprehensive diagnostic evaluation must include all of the following to support a diagnosis of ASD:

- Diagnostic criteria and symptom severity level according to the most current edition of the Diagnostic and Statistical Manual of Mental Disorders (DSM).
- A reliable, valid, standardized diagnostic assessment tool or combination of tools, using the most current editions or versions of the tools, as age and clinically appropriate, such as the Autism Diagnostic Observation Schedule, the Autism Diagnostic Interview-Revised (ADI-R), the Childhood Autism Rating Scale, or another validated diagnostic assessment tool, as clinically appropriate. The diagnostic assessment tool must be indicated for diagnostic purposes by the publisher.
- Screening tools such as the Screening Tool for Autism in Toddlers and Young Children (STAT) or the Modified Checklist for Autism in Toddlers (M-CHAT-R) or M-CHAT Revised with Follow-Up (M-CHAT-R/F) may not replace the use of validated diagnostic assessment tools.
- Documentation of diagnosis must include:
  - Age of the child or youth
  - Date of the initial ASD diagnosis
  - Documentation of any known comorbid behavioral or physical health disorders
  - Documentation of trauma history

To be eligible for the ABA services outlined in this section, a diagnosis of ASD complete with diagnostic criteria and symptom severity level from the current DSM must be made or reconfirmed within 3 years of initiation or recertification of ABA services.

To be eligible for ABA services outlined in this section more than 3 years after initial ASD comprehensive diagnosis, a comprehensive re-evaluation of ASD symptom severity levels per DSM criteria must be made by qualifying diagnostic providers, as listed above. A re-evaluation consists of the same components as an initial comprehensive diagnostic evaluation.

### 2.3.3 Comprehensive Service Array

Texas Medicaid offers an array of medically necessary services to support individualized treatment plans for children or youth who are 20 years of age or younger with ASD.

These services may be covered benefits when matched with an individualized treatment plan tailored to the specific needs of the child or youth who are 20 years of age or younger and their caregivers and documented as medically necessary and effective. Not all services may be clinically appropriate for all people, families, or situations.

Services must be evidence-based, person-centered, delivered by personnel of appropriate training and credentialing, and oriented to functional, attainable, and measurable goals.

These services may include one or more of the following but are not limited to:

- Applied behavior analysis (ABA)
- Case management/service coordination (with parent permission)
- Early Childhood Intervention (ECI)
- Nutrition, when provided by a licensed dietitian
- Occupational therapy (OT)

- Outpatient behavioral health services
- Physician services, including medication management
- Physical therapy (PT)
- Speech-language pathology (SLP); also called speech therapy (ST)

Nonphysician qualified health-care professionals who are enrolled in Texas Medicaid may be reimbursed up to 2 times per rolling year for participation in interdisciplinary team meetings (procedure code 99366) for the coordination of care for children or youth who are 20 years of age or younger with ASD and have a prior authorization for ABA evaluation or treatment services. The Licensed Behavior Analyst (LBA) is required to participate in interdisciplinary treatment team meetings. Interdisciplinary team meetings are not required for a child or youth for access to any service but are highly encouraged for a collaborative approach to treatment, which is considered the gold standard for care of people with ASD.

Interdisciplinary team meetings must include the LBA and at least 2 other licensed professionals meeting simultaneously with the parent or caregiver. The child or youth may optionally attend the meeting.

Additional members may attend, such as assistants, paraprofessionals, or others the family chooses, but these participants may not seek Medicaid reimbursement or count toward the required members of the interdisciplinary team meeting.

Non-Medicaid enrolled licensed professionals who work directly with the child or youth and would otherwise be eligible for reimbursement for interdisciplinary team meetings except that they are not Medicaid-enrolled may not receive Medicaid reimbursement for participation in team meetings. However, they may be considered as a participating team member for the purpose of meeting the minimum number of licensed provider participants.

Regardless of Medicaid enrollment, licensed assistants, nonclinical social workers, case managers, and paraprofessionals may not count toward the minimum number of licensed professionals present at the interdisciplinary team meeting.

Team members may include licensed Medicaid-enrolled practitioners of the following disciplines:

- Licensed clinical social worker (LCSW)
- Licensed behavior analyst (required team member)
- Licensed dietitian (LD)
- Licensed professional counselor (LPC)
- Licensed psychologist (LP)
- Occupational therapist (OT)
- Physical therapist (PT)
- Physician, physician assistant, or nurse practitioner
- Speech-language pathologist (SLP)

**Note:** *The physician, physician assistant, or nurse practitioner may bill a standard evaluation and management code (i.e., established patient visit) based on the counseling and coordination of care time spent in the team conference.*

To be reimbursed for the interdisciplinary team meeting (procedure code 99366), each participating licensed team member must have individually evaluated or provided direct services to the child or youth within the previous 180 days.

For a change of provider, the new provider must follow requirements in the Change of Provider section to begin services prior to attendance at the interdisciplinary team meeting.

Team members, including the child or youth, their family, or their caregiver, may participate via remote technology, which meets standards of care for telehealth.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telehealth and technology requirements.

Medicaid-enrolled providers must designate remote delivery with modifier 95 on the claim.

Team members may include representatives from the child or youth's school, but school districts are not eligible for direct reimbursement for the interdisciplinary team meeting.

No more than one individual from the same specialty may receive Medicaid reimbursement for the team meeting.

School personnel of the same discipline as Medicaid-enrolled providers who are participating to coordinate care are not considered duplicates of the same specialty and may count toward the 3-participant licensed professional minimum.

### **2.3.4 Applied Behavior Analysis (ABA)**

Behavior analysis is the scientific study of the principles of learning and behavior, specifically about how behavior affects, and is affected by, past and current environmental events in conjunction with biological variables.

ABA refers to the application of current, evidence-based specialized principles of the applied behavior analysis discipline by a provider, such as a licensed and certified behavior analyst (LBA), trained in this intervention.

The intent of ABA therapy is to effect meaningful changes, which are durable and generalizable, in socially significant behaviors in everyday settings. ABA focuses on treating behavior difficulties and shaping behavior patterns through environmental adaptations and consistent reinforcement and consequences across settings and situations.

Intensive behavioral intervention (IBI) is a high-intensity application of ABA therapy.

ABA services must be medically necessary to treat, correct, or ameliorate the individual's condition. A diagnosis alone is not sufficient documentation to support the medical necessity of ABA.

Physical restraint is not appropriate during any service provided to Medicaid children or youth under the Autism Services benefit except in emergency instances of threat of physical harm to the child or youth or others around them.

Physical restraint may only be implemented by a person trained in the type of restraint being implemented.

Restraint must be limited to the use of such reasonable force as is necessary to address the emergency.

Restraint must be discontinued at the point at which the emergency no longer exists.

Restraint must be implemented in such a way as to protect the health and safety of the child or youth and others.

Restraint must not deprive the child or youth of basic human necessities.

Documentation must be kept of the up-to-date training for all staff members involved and of each incident that resulted in restraint.

Use of ABA in no way precludes other medically necessary treatment interventions for ASD, such as ST, OT, and other forms of behavioral therapy, family therapy, parent-implemented models that use a developmental relationship-based approach, or medication management.

Texas Medicaid strongly encourages, and in some circumstances requires, interdisciplinary collaboration of care.

### **2.3.5 Parent or Caregiver Involvement**

For fidelity to the ABA treatment model for children or youth who meet eligibility requirements, an effective course of ABA typically requires active parent or caregiver participation and involvement to increase the potential for behavior changes in the specific behaviors identified as causing limitations or deficits in functional skills expected for the child or youth.

Parent or caregiver training is considered a separate component of the individualized treatment plan from the direct services provided to the child or youth, and documentation of parent progress on goals is required.

Parent or caregivers ideally must be able to participate in ABA therapy and implement ABA techniques in the home and community environment as instructed by the LBA or licensed assistant behavior analyst (LaBA) for behavior changes to prove to be durable and generalizable. Individual family circumstances are necessary criteria when designing the individualized treatment plan.

Participation by the parents or caregivers are expected, and continued authorization for ABA services will take consideration of their involvement and ability to reinforce behavior changes over time and across settings.

Exceptions to this general expectation may be considered on a case-by-case basis. For example: for children or youth in residential placement through the Department of Family and Protective Services conservatorship who have a treatment plan designed to address this limitation. In these cases, persons involved in the child or youth's care are encouraged to be involved in implementation of the therapeutic interventions in the home and community.

ABA services will not be denied solely on the basis of lack of parent or caregiver involvement; however, parent or caregiver involvement may affect the effectiveness, durability, and generalizability to natural settings of the treatment and may be considered when making determinations regarding effectiveness of the treatment requested.

#### **2.3.5.1 Treatment Planning**

Treatment planning requires that the LBA collaborate with and obtain documentation of determinations from the prescribing provider or other appropriate providers for elements of the treatment plan that are not within the LBA scope of practice.

ABA treatment plans, including group treatment, require goals that relate to the child or youth's individual functional contexts.

Functional context refers to everyday environments for behaviors or skills that allow the child or youth to achieve an outcome relevant to their health, safety, or independence.

Goals to address behaviors that result in deficits in social communication and social interaction relating to the child or youth's health, safety, or independence in functional contexts may be considered medically necessary.

Treatment plan goals (to include parent or caregiver training) may target a specific behavior interfering with activities of daily living (ADLs) use the principles of ABA (i.e., backward chaining, schedules of reinforcement, etc.) to teach parents or caregivers on supporting ADLs.

- General goals addressing ADL skill acquisition are excluded.

Functional goals must be specific to the child or youth, objectively measurable within a specified time frame, attainable in relation to the child or youth's prognosis and developmental status, both important to and relevant to the child or youth and their family, and directly related to the core symptoms of ASD as defined by the current version of DSM.

The treatment plan may also include goals to specifically address challenging behaviors, such as aggression, in the creation of a Behavior Support Plan (BSP).

BSPs may not include the use of aversive interventions, including but not limited to the use of pain, discomfort, social humiliation, seclusion, or restraints.

The treatment plan must include separate goals specific to parent or caregiver training.

The child or youth must be able to participate in sessions as outlined in the individualized treatment plan.

This section addresses ABA services provided by Texas LBAs as well as by an LaBA or behavior technician (BT) working under the supervision of an LBA in office, home, clinic, and community settings.

All LBAs and their supervisees must provide services in a way that is consistent with the physician's orders, commonly accepted practice standards, licensing requirements, and within their scope of practice.

Services must be provided in compliance with the Texas Health Step-Comprehensive Care Program, medical standards for telehealth, and these Medicaid Autism Services requirements, which may be more restrictive than general ABA practice.

The LBA must determine whether services are clinically appropriate, effective, and not contraindicated for the child or youth, their family, or particular situation.

**Note:** *Remote delivery as specified for this service will supersede that of the Telecommunication Services Handbook.*

ABA therapy addresses the behaviors associated with the core symptoms of ASD that impact attainment of individualized functional goals. It is out of scope for an ABA provider to attempt to remediate underlying or associated medical conditions that may impact progress toward individualized functional goals or to formulate a treatment plan without appropriate collaboration with other health-care disciplines, as appropriate.

LBAs and the staff they supervise are expected to have training and knowledge of typical development for children or youth who are 20 years of age or younger in order to provide medically necessary services.

When evaluating and treating children and youth with suspected or diagnosed comorbid genetic, physical, or behavioral health conditions or trauma history, the LBA is expected to coordinate with the appropriate skilled and licensed professionals. Co-occurring conditions may mimic or exacerbate ASD symptoms.

Diagnosis and treatment of physical health conditions, including developmental delays in children, would require collaboration with additional professionals.

- For example, a child or youth with a co-morbid diagnosis of a motor disorder who has treatment plan goals addressing speech or motor skill development would require coordination with an SLP, OT, or PT, as appropriate.
- For example, a child or youth with a diagnosis of a seizure disorder would require close coordination with the physician treating the condition.
- A child with a co-morbid diagnosis of a feeding disorder who has treatment plan goals addressing feeding would require coordination with the appropriate medical provider, including but not limited to a physician, dietitian, OT, or SLP, as appropriate.
- LBAs are not permitted as the sole provider of a feeding treatment plan.

Diagnosis and treatment of co-occurring behavioral health conditions require the input of and coordination with behavioral health professionals specifically trained and educated in this scope of practice.

- For example, a child or youth with a co-morbid diagnosis of anxiety would require coordination with the appropriate behavioral health provider.

It is out of scope for an LBA to dictate the provision of other medically necessary treatments, including requiring a child or youth and their family to drop other services in order to access ABA.

The following ABA services may be authorized for eligible children or youth who have been diagnosed with ASD according to guidelines:

- An initial ABA evaluation (procedure code 97151) to include development of an individualized treatment plan and a BSP, as appropriate
- An initial 90-day course of ABA treatment with medical necessity documentation from the ABA evaluation. Treatment may include the following with documented medical necessity:
  - Provision of one-on-one ABA services delivered directly by the LBA or delivered by the supervised LaBA, BT, or both (procedure codes 97153, 97155)
  - Provision of group ABA services delivered directly by the LBA or delivered by the supervised LaBA, BT, or both (procedure codes 97154, 97158)
  - One-on-one services delivered directly to the child or youth with ASD by a BT or LaBA must be delivered in person. Use of telehealth in one-on-one, direct service delivery with the child or youth by a BT or LaBA is prohibited.
  - Providing training to family members or caregivers by the LBA or delegated supervised LaBA in accordance with the child or youth's individualized treatment plan (procedure code 97156). The child or youth with ASD is not required to be present for this family or caregiver training.
- A 90-day extension of medically necessary ABA treatment with supportive documentation of the extension from submission of an attendance log that also includes a calculation of the percentage of planned sessions completed for the child or youth and their parent or caregiver, and a progress summary
- An ABA re-evaluation (procedure code 97151), to include an attendance log that also includes a calculation of the percentage of planned sessions completed for the child or youth and their parent or caregiver
- A 180-day recertification of ABA treatment with medical necessity documentation from the ABA re-evaluation and related documents

All ABA treatment and evaluation services require a signed and dated referral from the child or youth's prescribing provider.

## **2.3.6 ABA Provider Requirements**

### **2.3.6.1 Licensed Behavior Analysts (LBA)**

Licensed behavior analysts (LBA) must meet all of the following requirements:

- Have a current, unrestricted state-issued license and meet all applicable Texas licensure requirements.
- If applicable, employ directly or contract with LaBAs or BTs or both.
- Have training and knowledge of typical development for children or youth who are 20 years of age or younger.

LBAs serve as direct supervisors of the LaBAs and BTs and must ensure that the quality of the ABA services provided by LaBAs and BTs meets the minimum standards promulgated by the applicable certifying body's recommendations, rules, and regulations as well as Medicaid requirements.

LBAs are ultimately responsible for the delivery of ABA care including the treatment plan.

Direct supervision must be provided in accordance with Texas state licensure.

Only direct supervision, where the LBA directly observes the LaBA or the BT providing services with the child or youth, or the child or youth's parents or caregivers, will be reimbursed by Texas Medicaid (procedure code 97155). Indirect supervision, including but not limited to a review and discussion of case load, data collection procedures, and professional development, is not reimbursable under Texas Medicaid. See the Reimbursement and Billing Guidelines section.

ABA treatment will ideally be delivered in the primary language used at home or the primary language of the child or youth with ASD.

Translation or interpretation services, when and as required for effective service delivery, must be offered if providers are not able to deliver the treatment in the child or youth's primary language.

The LBA is responsible for provision of services within Medicaid requirements.

### **2.3.6.2 Licensed Assistant Behavior Analysts (LaBA)**

LaBAs must have a current, unrestricted state-issued license and meet all applicable Texas licensure requirements.

A supervised LaBA working within the scope of their training, practice, and competence may assist the LBA in various roles and responsibilities as determined appropriate by the LBA and delegated to the LaBA, consistent with the Texas state licensure requirements and Medicaid requirements.

LaBAs must have training and knowledge of typical development for children or youth who are 20 years of age or younger.

LaBAs may not enroll in Texas Medicaid.

### **2.3.6.3 Behavior Technicians (BT)**

A BT refers to a high school graduate-level paraprofessional who delivers ABA services under the supervision of an LBA or an LBA and an LaBA.

All BTs must have certification as one of the following:

- Registered Behavior Technician (RBT®)
- Board Certified Autism Technician (BCAT)
- Applied Behavior Analysis Technician (ABAT®)

Behavior technicians may not enroll in Texas Medicaid.

Behavior technicians may not use the term "therapist" or be referred to as a "therapist" in their job title when interacting with Medicaid-enrolled children or youth families, or caregivers or with professionals who also serve the child or youth, such as school staff or physicians.

BTs may not amend the treatment plan or interpret the treatment plan to family, caregivers, or professionals who also serve the child or youth, such as school staff or physicians.

A BT may not conduct the ABA assessment or establish a child or youth's ABA treatment plan.

## 2.3.7 Documentation Requirements

### 2.3.7.1 Submission Documentation

All of the following elements must be submitted with the authorization request.

**Note:** “Days” refers to calendar days unless otherwise specified.

### 2.3.7.2 Documentation Required for Authorization of an ABA Initial Evaluation

The referral for ABA services must be submitted with the authorization request and must contain documentation from the diagnosing or prescribing provider of the following:

- Age of the child or youth and year of the initial ASD diagnosis
- Any co-morbid behavioral health or physical conditions, including trauma history
- Level of symptom severity as per DSM criteria under ASD
- Diagnosis of ASD or re-evaluation of ASD diagnosis must have been made within the past 3 years, including the diagnostic criteria and symptom severity level per DSM criteria. A reliable, valid, standardized diagnostic tool or combination of tools must have been a part of the initial evaluation or re-evaluation.
- A signed and dated referral from the prescribing provider for an evaluation for ABA services
  - This referral may originate from the primary care provider.
  - The referral may originate from the diagnosing provider who is a physician, or allowed practitioner.

**Note:** An allowed practitioner is an individual licensed in Texas as a physician assistant (PA), a certified nurse practitioner (NP), or clinical nurse specialist (CNS).

### 2.3.7.3 Documentation Required for Authorization of Initiation of Treatment with ABA

All of the following elements must be submitted with the authorization request:

- A signed and dated referral from a physician or allowed practitioner outlining the frequency and duration of treatment based on recommendations made in the ABA evaluation as well as the prescribing provider’s own clinical judgement.
- The LBA must coordinate with the prescribing or other appropriate physician to document elements for initiation of ABA treatment that are not within the LBA’s scope of practice.

To document medical necessity for ABA, the following elements are required in the ABA assessment documentation:

- A complete developmental history, including:
    - Relevant co-morbid conditions, including trauma history.
    - Vision and hearing or audiologic screening, as age and clinically appropriate.
- Note:** If age and clinically appropriate, Texas Health Steps required screenings are acceptable. Results of further evaluations may be required if those screenings indicated deficits.
- One-on-one observations of the child or youth, including at least one natural setting.
  - Documentation of interviews with parents or caregivers to further identify and define lack of adaptive behaviors and presence of maladaptive behaviors, to include any linguistic or cultural factors that may impact treatment.
  - Family history.
  - Primary language used by the child or youth with ASD and their family.

- Document whether the child or youth has a previous history of ABA. When prior history exists, include how long the child or youth has been receiving ABA services (include any gaps in treatment) and their responses to previous interventions.
- Prognosis based on evidence from the evaluation regarding the individual's capacity to make behavioral gains.
- Validated assessments of cognitive abilities and adaptive behaviors, such as the Vineland Adaptive Behavior Scales.
  - An estimate of the child or youth's cognitive abilities may be provided when a validated assessment of cognitive abilities is not possible due to the child or youth's level of ASD or behaviors or both.
  - Limited cognitive ability or other co-occurring disability does not preclude the child or youth from consideration for medically necessary ABA evaluation and treatment services provided the treatment plan is realistic for the child or youth.
- A functional behavior assessment, related to specific behaviors of concern, to be addressed in a BSP, as clinically indicated.

Individualized ABA treatment plans must include:

- Identification of specific targeted behaviors/skills related to the child or youth's health, safety, or independence that will be addressed in treatment.
- Treatment goals must directly relate to the core symptoms of ASD as defined by the DSM.
- Goals and protocols must be selected by the LBA in collaboration with the parents or caregivers, consistent with person-centered and family-centered practice.
- Functional goals must be specific to the child or youth, objectively measurable within a specified time frame, attainable in relation to the child or youth's prognosis and developmental status, both important to and relevant to the child or youth and their family, and directly related to the core symptoms of ASD as defined by the DSM.
- Baseline data for all behaviors and skills identified for intervention across settings (e.g., home, school, community) where treatment will occur.
- A BSP, if appropriate.
  - BSPs must include an operational, behavioral definition of the target behavior excesses and deficits, prevention and intervention strategies, schedules of reinforcement, and functional alternative responses.
- The planned frequency (intensity) and duration of treatment across all settings to reflect the severity of the impairments, goals of treatment, expected response to treatment, and specific individual variables, including availability of appropriately trained and certified ABA staff, that may affect the recommended treatment dosage.

**Referto:** Frequency and Duration Guidelines for ABA services section for guidelines to determine medical necessity.

- Measurable parent or caregiver goals pertaining to learning the basic behavioral principles of ABA and applicability of these behavioral interventions in the home and community.
- The planned frequency and duration of parent or caregiver training. Participation by the parents or caregivers are expected, and continued authorization for ABA services will take consideration of their participation in at least 85% of planned sessions.
  - Parent or caregiver training must be conducted by an LBA or LaBA.

- The formal design of treatment plan must be followed by all ABA service providers, including the supervised LaBAs and/or BTs.
- If group treatment is planned, the treatment plan must include clearly defined, measurable goals for the group therapy that are specific to the individual and their targeted behaviors/skills.
- A plan to ensure maintenance and generalization of skills.
- Clearly defined, measurable, realistic discharge criteria and a transition plan across all treatment environments.
- A clear plan to coordinate care with other providers and with school services.
  - This is contingent upon a signed release of information from parent or guardian. Documentation of parent or guardian refusal to sign consent should be documented in these situations but should not preclude access to treatment.

ABA Assessments and treatment plans completed by the LBA must include:

- The child or youth's name
- Date of birth
- Date the initial ABA evaluation and treatment plan was completed
- Name of the referring prescribing provider
- Signature with date by the LBA
- Signature with date by the parent or caregiver

Initial requests for ABA will be authorized for 90 days and may be extended for an additional 90 days contingent upon submission of an attendance log and progress summary that support an extension of treatment.

#### **2.3.7.4 Documentation Required for Authorization of 90-day Extension of Initial ABA Authorization**

All of the following elements must be submitted with the authorization request:

- Attendance log for the child or youth
- Attendance log for the parent or caregiver
- Progress summary

#### **2.3.7.5 Attendance Log and Progress Summary**

Attendance logs that include a calculation of the percentage of scheduled sessions successfully completed must be maintained for the child or youth receiving treatment and for responsible parent or caregiver participation. If attendance falls below 85% of approved hours per authorization period as outlined in the individualized treatment plan and parent or caregiver education plan, additional documentation must be submitted by the LBA to substantiate need for continued ABA services at the previously approved level. All documentation must be submitted to the child or youth's health plan.

- Attendance logs will record all scheduled and completed sessions and the percent of scheduled sessions attended by child or youth and the parent or caregiver for their scheduled respective sessions.
- Attendance logs must be submitted after the first 90 days of initiating ABA treatment.
- Attendance logs must be submitted with each request for extension or recertification.

- Children or youth and parents or caregivers are expected to have attended a minimum of 85% of their respective sessions agreed upon within the approved treatment plan to substantiate the need for continuing at the previously approved frequency and duration of ABA services.
- In cases where either the child or youth or the parent or caregiver has not met the 85% attendance expectation, the ABA provider must submit justification to continue services at the previously approved frequency to the health plan for physician review.

#### **2.3.7.6 Progress Summary**

A progress summary is made in the format of a treatment note and must be:

- Submitted after the first 90 days of initiating ABA treatment.
- Billed as procedure code 97155.
- Signed and dated by the LBA.
- Signed and dated by the parent or caregiver.

#### **2.3.7.7 Documentation Required for Recertification for Treatment with ABA**

Subsequent requests after the initial total 180-day authorization may be approved for an additional 180-day period.

Requests for recertification of ABA treatment must include:

- Documentation of the comprehensive ASD diagnosis within the 3 years prior to the date of the ABA re-evaluation.
- Attendance log that includes a calculation of the percentage of scheduled sessions that were completed.
  - For recertifications, children or youth and parents or caregivers are expected to have attended a minimum of 85% of their respective sessions agreed upon within the approved treatment plan in order to continue at the previously approved frequency and duration of ABA services. Recertification requests not meeting this requirement will require submission of additional documentation and must be sent for physician review.
- ABA re-evaluation.

#### **2.3.7.8 ABA Re-evaluation**

Re-evaluation may be performed no earlier than within the last 60 days of an authorization period.

A re-evaluation includes all of the following:

- All components of an initial evaluation that are within the scope of practice of an LBA.
- The LBA shall maintain documentation of all elements of the initial ABA assessment that have been conducted by or coordinated with another provider.
- An updated BSP for the child or youth, if applicable.
- Baseline, current, and interim data for all behaviors and skills identified for intervention to demonstrate degree of progress toward mastering the functional treatment goals.
- Documentation to allow reviewers to assess whether the child or youth's behavior and skills have improved to a clinically meaningful extent in at least two settings (e.g., home, community, or with different family members or peers) and to demonstrate that the LBA appropriately recorded and tracked progress and made protocol modifications as needed for effective service delivery.
- Individual considerations should be given on a case-by-case basis for those with unusual or complex circumstances that may impact functional goal achievement (e.g., children or youth in residential placement through the Department of Family and Protective Services conservatorship).

- The child or youth's treatment plan updated and modification of the treatment protocol, as appropriate, to include clearly defined, measurable, functional goals for addressing behaviors and ensuring maintenance and generalization of acquired skills.
- Documentation of the child or youth's status using a reliable, valid standardized assessment tool.
- Discharge plan, to include fading and generalization plan.
- For children or youth with additional diagnoses/co-morbid conditions, LBAs must address the impact of those conditions on ABA progress and collaborate with other disciplines as appropriate.
- Date and time the re-evaluation and treatment plan update was completed.
- LBA signature and date.

The LBA must submit documentation attesting that:

- The family, caregiver, or responsible adult has agreed to the treatment plan, including:
  - The frequency specified on the treatment plan.
  - All places of service specified on the treatment plan.
  - That the specific goals and prioritization of the identified goals on the treatment plan align with the child or youth and their family values and preferences.
  - That the provider has access to sufficient staff to deliver the treatment plan frequency, duration, and in all places of service specified to allow accurate assessment of attendance in scheduled sessions.

### **2.3.7.9 Client Record Documentation**

In addition to documentation requirements outlined in the Submission Documentation section, all services outlined in this section are subject to retrospective review to ensure that the documentation in the child or youth's medical record supports the medical necessity of the services provided as well as adherence to Medicaid requirements.

This documentation does not need to be submitted for the purposes of prior authorization.

### **2.3.7.10 Comprehensive Diagnostic Evaluation**

All required elements of the comprehensive evaluation must be retained by the diagnosing provider in the child or youth's medical record.

### **2.3.7.11 Interdisciplinary Team Meeting**

For procedure code 99366, each rendering provider must document the following:

- Start and stop time of team meeting (minimum 30 minutes)
- Date of most recent evaluation or re-evaluation
- Names, disciplines, and organizational affiliation of other attendees
- Brief narrative of reports to parents or guardians and the child or youth with ASD
- Summary of decisions made
- Action items
- Signature and date of the provider

Licensed assistants, nonclinical social workers, or paraprofessionals may not represent their supervisors at interdisciplinary team meetings.

### **2.3.7.12 Consent**

Formal documentation of signed consent to ABA treatment signed by the child or youth's legally authorized representative must be kept in the child or youth's file.

### **2.3.7.13 Treatment Note**

For procedure codes 97153 (individual treatment) and 97154 (group treatment), the following documentation must be kept on file by the treating provider and be available when requested:

- Child or youth's name.
- Date of service.
- Start and stop time of each treatment session.
- Treatment plan goals addressed, and progress noted, if applicable.
- A summary of the covered ABA services attempted during the session to include the activities or interventions delivered during the session and time allotted for them.
  - This summary should include direct observation measures that record data during every treatment session to allow the LBA to graph data across time for analysis.
- Rendering ABA providers must sign each entry with full signature and credentials.
  - Additional supervisory signatures must be made in accordance with state licensure requirements and professional standards of care for the delivery of medically necessary services.

For procedure codes 97155 (individual treatment with protocol modification) and 97158 (group treatment with protocol modification) the documentation should include all required treatment note elements listed for procedure codes 97153 and 97154 as well as:

- Description of protocol modification decision points (may include supervision of BT or LaBA for procedure code 97155).
- Assessments of child or youth's progress or lack of progress.
- Treatment plan, such as updated goals.

For procedure code 97156 (parent or caregiver training and guidance, with or without the child or youth present), the following documentation in the treatment note must be kept on file by the treating provider and be available when requested:

- Child or youth's name
- Date of service
- Start and stop time of each parent or caregiver education session
- Treatment plan goals addressed, and progress noted, if applicable
- A summary of the covered parent or caregiver training during the session
- Rendering ABA providers must sign each entry with a full signature and credentials

### **2.3.7.14 Frequency and Duration Guidelines for ABA services**

Frequency must always be commensurate with the child or youth's clinical needs and level of disability, as well as evidence-based standards of practice; it is not for the convenience of the responsible parents or caregivers or the provider.

LBA recommendations for frequency and duration on the ABA treatment plan are expected to reflect the LBA's skilled analysis of the optimal dose-response relationship for the child or youth and their family. Therefore, the child or youth and family attendance at the recommended frequency and duration levels is critical in following evidence-based treatment recommendations. Poor or sporadic attendance may impact the effectiveness, durability, or generalizability of the treatments that are delivered.

An effective course of ABA typically requires active parent or caregiver involvement to increase the potential for durable and generalizable behavior changes in the specific behaviors identified as causing limitations or deficits in functional skills expected for the child or youth based on personal and environmental factors unique to that individual. Exceptions to this are made only as determined on a case-by-case basis.

ABA treatment (not inclusive of procedure code 97156) may be delivered at the following frequency and duration levels without requiring additional submission of documentation or review by a physician for medical necessity. Medical necessity is related to symptom severity as defined by the current version of the DSM in addition to guidelines in this section. All levels of intensity of ABA treatment services may be considered depending upon individual case consideration. The following are guidelines. The objectives of ABA therapy will vary per child or youth, and frequency and duration should be based upon the functional goals of treatment, specific needs of the child or youth, response to treatment, and availability of appropriately trained and certified ABA staff. Treatment plans in which the requested frequency exceeds the following service level guidelines will be sent for physician review to determine medical necessity.

- High frequency IBI (greater than 20 hours/week) may be considered when documentation shows two or more of the following:
  - 6 years of age or younger
  - Autism Severity Level 2 or 3 (per DSM-V criteria)
  - Goals related to elopement, aggression, or self-injury that are severely impairing
  - Within the first 2 years of initiating ABA
- Moderate frequency (6 to 20 hours/week) may be considered when documentation shows two or more of the following:
  - 12 years of age or younger
  - Autism Severity Level 2 or 3 (per DSM-V criteria)
  - Goals related to elopement, aggression, or self-injury that are moderately impairing
  - Within the first 4 years of initiating ABA therapy
- Targeted/focused frequency (5 hours or less/week or 20 hours or less/month in some other increment) may be considered when documentation shows two or more of the following:
  - 20 years of age or younger
  - Autism Severity Level 1, 2, or 3 (per DSM-V criteria)
  - Focused on specific targeted clinical issues or goals related to specific targeted skills
- Maintenance/consultative level (2-4 hours per week or less) may be considered when documentation shows all of the following:
  - Ages 1 through 20 years of age
  - Autism Severity Level 1, 2, or 3 (per DSM-V criteria)
  - Goals related to integration of specific skills into daily functioning

- Documentation substantiates the risk for regression after completion of more intense ABA intervention

### **2.3.7.15 Discharge or Discontinuation Criteria**

The ABA provider may discharge the child or youth from treatment, or ABA prior authorizations may be discontinued, when documentation submitted indicates one or more of the following:

- The child or youth has met ABA treatment plan goals and is no longer in need of ABA services.
- The child or youth has not made clinically significant progress toward meeting goals identified on the ABA treatment plan after successive progress review periods and repeated modifications to the treatment plan.
- Health-care services that do not demonstrate effectiveness as consistent with Medicaid autism service requirements must be modified or discontinued.
- ABA treatment plan gains are not generalizable or durable over time and do not transfer to the larger community setting after successive progress review periods and repeated modifications to the treatment plan.
- The child or youth can no longer participate in ABA services because of medical factors, family factors, or other factors that prohibit participation.
- Parent or caregiver opts to discontinue.
- Attendance falls below 85% of scheduled sessions without documentation supporting the medical necessity of continued treatment.
- The ABA providers do not appropriately collect, track, or review progress or outcomes data, or do not make appropriate treatment plan modifications for effective service delivery.

### **2.3.8 Exclusions**

The following services are not a benefit of Texas Medicaid:

- ABA addressing academic goals
- ABA addressing goals only related to performative social norms that do not significantly impact health, safety, or independence
- Treatment other than at the maintenance or consultative level not expected to result in improvements in the child or youth's level of functioning
- Services that do not require the supervision of or specific skills and judgment of a LBA to perform
- Services that do not meet accepted standards of practice for specific and effective treatment of ASD
- Services delivered by a BT in the school setting as a shadow, or an aide, or to provide general support to the child or youth
- Equipment and supplies used during ABA services are not reimbursed separately; they are considered part of the services provided
- ABA evaluation or intervention services provided by a clinic or agency owned or partially owned by the child or youth's responsible adult (e.g., biological, adoptive, or foster parents, guardians, court-appointed managing conservators, other family members by birth or marriage)
- ABA evaluation or intervention services provided directly by the child or youth's responsible adult (e.g., biological, adoptive, or foster parents, guardians, court-appointed managing conservators, other family members by birth or marriage)
- Experimental or investigational treatment

- Services or items not generally accepted as effective or not within the normal course and duration of treatment
- Services for the caregiver or provider convenience (e.g., as respite care or limiting treatment to a setting chosen by provider for convenience)

### **2.3.9 Change of Provider**

If a provider or client discontinues therapy during an existing prior authorized period, and the client requests services through a new provider outside the current group, the new provider must start a new request for authorization and submit all documentation required for an initial evaluation, including the following:

- A change-of-therapy provider letter, signed by the responsible adult.
- The letter must document the date that the client ended therapy (effective date of change) with the previous provider, or the last date of service.
- The name of the new provider and previous provider.

When a client transfers to a new performing provider within the same group, the new provider must use the same evaluation and plan of care.

The authorization period will not change when the provider changes in this situation.

### **2.3.10 Prior Authorization/Authorization Requirements**

Prior authorization is required for an ABA evaluation (procedure code 97151), an initial course of ABA treatment, and for subsequent recertifications for treatment (procedure codes 97153, 97154, 97155, 97156, 97158). Re-evaluations (procedure code 97151) for recertification of treatment require authorization.

Essential elements for prior authorization are listed in the Submission Documentation section.

Prior authorization/authorization requests may be submitted to the TMHP Prior Authorization Department through mail, fax, or the electronic portal. The electronic signature technology must meet all applicable federal and state statutes and administrative rules. Electronically-signed documents must have an electronic date on the same page as the signature, and electronic signatures that are generated through an electronic medical record (EMR) or electronic health record (EHR) system that complies with applicable federal and state statutes and rules are acceptable. All electronically-signed transactions and electronically-signed documents must be kept in the client's medical record. Prescribing and dispensing providers that use electronic signatures must provide a certification that the electronic signature technology that they use complies with all applicable federal and state statutes and administrative rules. Providers who submit a prior authorization/authorization request must also attest that electronic signatures included in the request are true and correct to the best of their knowledge. A hard copy of electronic transactions and signed documents must be available upon request. Stamped signatures and images of wet signatures will not be accepted. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization/authorization forms and supporting documentation using electronic or wet signatures.

To complete the prior authorization/authorization process by paper, the provider must fax or mail the completed CCP Prior Authorization Request Form to the TMHP prior authorization unit and retain a copy of the signed and dated prior authorization form in the client's medical record.

To complete the prior authorization/authorization process electronically, the provider must complete the prior authorization/authorization requirements through any approved electronic methods and retain a copy of the signed and dated prior authorization/authorization form in the client's medical record.

To facilitate determination of medical necessity and avoid unnecessary denials, the prescribing provider and the LBA must provide correct and complete information, including documentation for medical necessity for the equipment or supplies requested. The physician must maintain documentation of medical necessity in the client's medical record.

The prescribing provider or the LBA may be asked for additional information to clarify or complete a request.

Retrospective review may be performed to ensure that documentation supports the medical necessity of the requested services, equipment, or supplies, as well as to determine compliance with all Medicaid requirements.

### **2.3.11 Submission Guidelines**

#### **2.3.11.1 Timelines and Required Items**

The completed CCP Prior Authorization Request Form and submitter certification statement are required with every submission for authorization or prior authorization.

TMHP will accept the prescribing provider's signature on the CCP Prior Authorization Request Form as a statement that the client's Texas Health Steps (THSteps) screenings are current unless otherwise stated by the provider.

#### **2.3.11.2 ABA Initial Evaluation**

To request prior authorization for an ABA initial evaluation, LBAs or prescribing providers must submit the following:

- Documentation of comprehensive diagnostic evaluation or re-evaluation of diagnosis for ASD signed and dated by the diagnosing physician and dated within 3 years prior to the date that the PA request for ABA initial evaluation is received.
- A completed CCP Prior Authorization Request Form, signed and dated by a prescribing provider within 60 calendar days prior to or on the anticipated evaluation date requested.
  - The authorization for the initial ABA evaluation (procedure code 97151) is valid for 60 days from the requested evaluation date.
  - When the request for prior authorization is signed and dated after the requested evaluation date, dates of service prior to the prescribing provider's signature date will be denied.

A request for prior authorization for an ABA initial evaluation must be submitted within 60 days prior to or on the requested evaluation date.

When the request for prior authorization is submitted after the requested evaluation date, dates of service prior to the receive date will be denied.

#### **2.3.11.3 Initial 90-day ABA Treatment**

To request prior authorization for an initial 90-day ABA treatment, providers must submit the following:

- Completed ABA evaluation and treatment plan signed and dated by the LBA
  - An ABA evaluation is considered current when it is performed within 60 days prior to the start of care date on the prior authorization request form.
- A completed CCP Prior Authorization Request Form, signed and dated by a prescribing provider within 60 calendar days prior to the requested ABA treatment start date, including the requested procedure codes and maximum units requested

Providers may be authorized for units of procedure codes 97153, 97154, 97155, 97156, or 97158 for up to 90 days from the start date of service requested on the CCP Prior Authorization Request Form.

Providers must obtain authorization within 3 business days of the start of care (SOC) date for services that have not been prior authorized. During the authorization process, providers are required to deliver the requested services from the SOC date. Requests received after the 3-business day period will be denied for services prior to the date that the request was received.

Late submissions: Requests for initial 90-day ABA treatment submitted 60 days after the completed ABA evaluation date and within 180 days after the evaluation date will require a progress summary signed and dated by the LBA.

For late submissions submitted after 180 days from the evaluation date, a re-evaluation must be completed.

#### **2.3.11.4 ABA 90-day Treatment Extension**

To request prior authorization for an ABA 90-day treatment extension, providers must submit the following:

- Attendance log that also includes a calculation of the percentage of scheduled sessions attended by the:
  - Child or youth and
  - Parent or caregiver for family education
- Progress summary signed by LBA and parent or caregiver.
- A completed CCP Prior Authorization Request Form (prescribing provider signature not necessary).

**Note:** *The initial treatment plan must be signed and dated by a prescribing provider for the full 180 days. The 90-day treatment extension is to continue the same treatment frequency or submit new goals if needed.*

- A 90-day recertification request is considered timely when it is submitted within 30 days prior to the end of the current authorization period. Providers may be authorized for units of procedure codes 97153, 97154, 97155, 97156, or 97158 for up to 90 days from the initiation of services.
- A request for prior authorization that is submitted after the current authorization end date is denied for all dates of service prior to the date the request is received.

#### **2.3.11.5 ABA Re-evaluation**

To request authorization for an ABA re-evaluation, providers must submit the following:

- Completed ABA re-evaluation and treatment plan signed and dated by the LBA.
- Re-evaluations do not require prior authorization (procedure code 97151). Re-evaluation will be reviewed for authorization upon submission.
- Providers must have a signed referral from the prescribing provider for an ABA re-evaluation in the client's file.
  - A re-evaluation may occur as early as 60 days prior to the end of the current authorization period.
  - An ABA re-evaluation is considered current when it is performed within 60 days before the end of the current authorization period.

Procedure code 97151 should be listed on the CCP Prior Authorization Request Form with date span to include dates the re-evaluation was performed.

### 2.3.11.6 ABA 180-day Recertification

Prior authorization for documented medically necessary recertification requests may be considered for increments up to 180 days for each request following the initial total of 180-day (two 90-day) authorization periods.

To request prior authorization for an ABA 180-day recertification, providers must submit the following:

- Attendance log that also includes a calculation of the percentage of scheduled sessions attended by the:
  - Child or youth
  - Parent or caregiver for family education
- ABA re-evaluation and treatment plan signed by LBA
  - An ABA re-evaluation is considered current when it is performed within 60 days before the current prior authorization end date.
- A completed CCP Prior Authorization Request Form, signed and dated by a prescribing provider within 60 calendar days prior to the requested ABA treatment recertification start date, including the requested procedure codes and maximum number of units.

Providers may be authorized for units of procedure codes 97153, 97154, 97155, 97156, or 97158 for up to 180 days from the start date of service requested on the CCP Prior Authorization Request Form.

Late submissions: Requests submitted 60 days after the completed ABA evaluation date and within 180 days after the evaluation will require a review of current progress summary signed and dated by the LBA.

For requests submitted more than 180 days after the re-evaluation date, a new re-evaluation must be completed.

A request for prior authorization for recertification of treatment that is submitted after the current authorization end date is denied for all dates of service after that end date and prior to the date the request is received.

A complete request must be received no earlier than 60 days before the current authorization period expires.

A gap in service is defined as not receiving ABA treatment or re-evaluation for 180 days or more. When a gap in service is identified, the provider must submit the request as an initial request and all documentation related with an initial request is required.

### 2.3.12 Reimbursement and Billing Guidelines

If services billed exceed the limitations outlined in this section, the claim will be denied, and may be appealed.

Autism services are reimbursed in accordance with Title 1 Texas Administrative Code § 355.

Direct treatment for the child or youth is limited to a total of 8 hours per day, inclusive of procedure codes 97153, 97154, 97155, and 97158.

The following modifiers may be required for ABA services:

| Modifier | Description                           |
|----------|---------------------------------------|
| HO       | Licensed behavior analyst             |
| HN       | Licensed assistant behavioral analyst |
| HM       | Behavior technician                   |
| 95       | Telehealth                            |

For clients who are 20 years of age or younger, the limitations listed below may be exceeded with evidence of medical necessity.

The following procedure codes will be authorized for a 30-day authorization period for ABA evaluation or re-evaluation:

| ABA Initial Evaluation |                               |                  |
|------------------------|-------------------------------|------------------|
| Procedure Code         | Limitations                   | Modifier Options |
| 97151                  | Limited to 6 hours (24 units) | HO only          |

| ABA Re-evaluation |                               |                  |
|-------------------|-------------------------------|------------------|
| Procedure Code    | Limitations                   | Modifier Options |
| 97151             | Limited to 6 hours (24 units) | HO only          |

The following procedure codes may be reimbursed for ABA individual treatment:

| ABA Services   |                      |
|----------------|----------------------|
| Procedure Code | Modifier Options     |
| 97153          | No modifier required |
| 97155          | HO<br>HN             |

The following procedure codes may be reimbursed for ABA group treatment services:

| ABA Services   |                      |
|----------------|----------------------|
| Procedure Code | Modifier Options     |
| 97154          | No modifier required |
| 97158          | HO<br>HN             |

The following procedure codes may be reimbursed for ABA parent or caregiver, family education, and training services:

| ABA Services   |                  |
|----------------|------------------|
| Procedure Code | Modifier Options |
| 97156          | HO<br>HN         |

The following procedure codes may be reimbursed for interdisciplinary team meetings attended by qualified nonphysician health-care providers:

| Interdisciplinary Team Meeting |                      |
|--------------------------------|----------------------|
| Procedure Code                 | Modifier Options     |
| 99366                          | No modifier required |

Each claim submitted with procedure code 97151 requires the following modifier:

| Evaluation and Re-evaluation |             |
|------------------------------|-------------|
| Modifier                     | Description |

| Evaluation and Re-evaluation |                           |
|------------------------------|---------------------------|
| HO                           | Licensed behavior analyst |

Each claim submitted with procedure codes 97155, 97156, and 97158 requires one of the following modifiers:

| ABA Services |                                     |
|--------------|-------------------------------------|
| Modifier     | Description                         |
| HO           | Licensed behavior analyst           |
| HN           | Licensed assistant behavior analyst |

Claims submitted with procedure codes 97153 and 97154 may include the following modifiers for information purposes:

| Behavior Technician Level Services |                                     |
|------------------------------------|-------------------------------------|
| Modifier                           | Description                         |
| HO                                 | Licensed behavior analyst           |
| HN                                 | Licensed assistant behavior analyst |
| HM                                 | Behavior technician                 |

Reimbursement for procedure code 99366 is limited to autism diagnosis code F84 and is contingent upon prior authorization of ABA evaluation, re-evaluation, or treatment services.

Texas Medicaid will not reimburse multiple ABA providers during one ABA session with a child or youth when more than one ABA provider is present (concurrent billing).

Concurrent billing is excluded except when the family and the child or youth with ASD are receiving separate services and the child or youth is not present in the family session.

Texas Medicaid will not reimburse for ABA treatment services when the child or youth or family is not present and engaged in a therapeutic relationship.

Reimbursement for covered ABA procedure codes are for the direct service time. Pre- and post-work for the session are not reimbursed separately. Separate reimbursement for treatment planning, note documentation, report writing, or updating of charts and data sheet is prohibited (other than what is allowable under procedure code 97151).

### 2.3.12.1 Telehealth Service Delivery

Some service delivery to children or youth and to the parents or caregivers may be delivered remotely. It is the LBA's responsibility to ensure that remotely delivered telehealth services are within scope of practice, are not contraindicated for the child or youth, family, or particular situation, are clinically appropriate and effective, and are in compliance with Texas licensure and standards for telehealth as well as follow all Medicaid, Texas Health Steps-CCP and the Medicaid Autism Services requirements.

ABA evaluation and treatment services may only be delivered via telehealth using synchronous audio-visual technology.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telehealth and technology requirements.

The following procedure codes may be delivered via telehealth:

| Procedure Codes | Required Modifier to Designate Remote Delivery |
|-----------------|------------------------------------------------|
| 97151           | 95                                             |

| Procedure Codes | Required Modifier to Designate Remote Delivery |
|-----------------|------------------------------------------------|
| 97155           | 95                                             |
| 97156           | 95                                             |
| 97158           | 95                                             |
| 99366           | 95                                             |

LaBAs and RBTs may not deliver any service remotely.

Reimbursable remote delivery services must include synchronous audiovisual interaction between the distant site provider and the child or youth or parent or caregiver in another location.

### **2.3.12.2 ABA Services**

Procedure code 97151 is intended for conducting and reporting initial evaluations and treatment plans as well as re-evaluations by the LBA once every 180 days.

Procedure code 97151 is reimbursed per authorized units provided by an LBA.

Procedure code 97151 will be authorized for up to 24 units (six hours) for the initial request of ABA services to complete an initial ABA evaluation and develop a treatment plan, including data analysis and report writing.

Procedure code 97151 must be used within 30 calendar days of the first date of service for procedure code 97151 and is not reimbursable unless evaluation was submitted for authorization of payment.

Procedure code 97151 is eligible for reimbursement upon submission and approval of completed evaluation or re-evaluation.

After the initial evaluation, procedure code 97151 will be authorized for up to 24 units (six hours) for re-evaluations for every subsequent authorization.

Procedure code 97153 is intended to be used for direct one-on-one ABA services delivered per ABA treatment plan protocol to the child or youth.

Procedure code 97153 designates a service of the complexity level appropriate for the delivery by a BT.

Procedure code 97155 is used by the LBA (or as delegated to an LaBA) for direct one-on-one time with one child or youth to develop a new or modified protocol.

Procedure code 97155 may also be used to demonstrate a new or modified protocol to a BT, LaBA, and parents or caregivers with the child or youth with ASD present. The focus of this code is the skilled determination to make an addition or change to the protocol.

Procedure code 97155 may be used when directly supervising the BT or LaBA while working directly with the child or youth.

Either procedure code 97153 or 97155 may be used to request total hours of direct individual ABA treatment for the authorization period. Providers may then bill the code that reflects the treatment delivered.

Procedure code 97154 is intended to be used for direct group ABA services delivered per ABA treatment plan protocol to the child or youth.

Procedure code 97154 designates a service of the complexity level appropriate for the delivery by a BT.

A group includes at least 2 children or youth but no more than 8.

Procedure code 97158 is used by the LBA (or as delegated to an LaBA) for direct group time to develop a new or modified group treatment protocol.

Either procedure code 97154 or 97158 may be used to request total hours of direct group ABA treatment for the authorization period. Providers may then bill the code that reflects the treatment delivered.

Procedure code 97156 is used by the LBA (or as delegated to an LaBA) for guiding the parents or caregivers (with or without the child or youth with ASD present) to use the ABA treatment plan protocols to reinforce adaptive behaviors for durability and generalizability. LBAs may delegate parent or caregiver teaching to LaBAs working under their supervision. LaBAs may not deliver services remotely via telehealth.

**2.3.12.3 Method for Counting Minutes for Timed Procedure Codes in 15-Minute Units**

All claims for reimbursement of procedure codes paid in 15-minute increments are based on the actual amount of billable time associated with the service. For those services for which the unit of service is 15 minutes (1 unit = 15 minutes), partial units should be rounded up or down to the nearest quarter hour.

To calculate billing units, count the total number of billable minutes for the calendar day for the client, and divide by 15 to convert to billable units of service. If the total billable minutes are not divisible by 15, the minutes are converted to one unit of service if they are greater than seven and converted to zero units of service if they are seven or fewer minutes.

For example: 68 total billable minutes/15 = 4 units + 8 minutes. Because the 8 minutes are more than 7 minutes, those 8 minutes are converted to one unit. Therefore, 68 total billable minutes = 5 units of service.

When providers are counting minutes for timed procedure codes, the time intervals for 1 through 8 units are as follows:

| Units   | Number of Minutes               |
|---------|---------------------------------|
| 0 units | 0 minutes through 7 minutes     |
| 1 unit  | 8 minutes through 22 minutes    |
| 2 units | 23 minutes through 37 minutes   |
| 3 units | 38 minutes through 52 minutes   |
| 4 units | 53 minutes through 67 minutes   |
| 5 units | 68 minutes through 82 minutes   |
| 6 units | 83 minutes through 97 minutes   |
| 7 units | 98 minutes through 112 minutes  |
| 8 units | 113 minutes through 127 minutes |

**2.4 Breastfeeding Support Services**

**Referto:** Section 3, “Breastfeeding Support Services” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)* for information about breastfeeding support services.

**2.5 Certified Respiratory Care Practitioner Services (CCP)**

**Referto:** The *Certified Respiratory Care Practitioner (CRCP) Services Handbook (Vol. 2, Provider Handbooks)* for information about CRCP (CCP) services.

## 2.6 Clinician-Directed Care Coordination Services (CCP)

### 2.6.1 Services, Benefits, and Limitations

Clinician-directed (physician, NP, CNS, and PA) care coordination services are a benefit of CCP for eligible clients who are birth through 20 years of age and have special health needs. These services are payable only to the clinician (primary care, specialist, or sub-specialist) who provides the medical home for the client.

To provide a medical home for the client, the primary care clinician directs care coordination together with the client and family. Care coordination consists of managing services and resources for clients with special health needs and their families to maximize the clients' potential and provide them with optimal health care.

Clinician-directed care coordination services (face-to-face and non-face-to-face) must include the following components:

- A written care plan (either a formal document or documentation contained in the client's progress notes) developed and revised by the medical home clinician, in partnership with the client, family, and other agreed-upon contributors. This plan is shared with other providers, agencies, and organizations involved with the care of the client, including educational and other community organizations with permission of the client or family. The care plan must be maintained by the medical home clinician and reviewed every six months or more frequently as necessary for the client's needs.
- Care among multiple providers that are coordinated through the clinician.
- A central record or database maintained by the medical home clinician containing all pertinent medical information, including hospitalizations and specialty care.
- Assistance for the client or family in communicating clinical issues when a client is referred for a consultation or additional care, such as evaluation, interpretation, implementation, and management of the consultant recommendations for the client or family in partnership and collaboration with other providers, the client, or family.

Clinician-directed care coordination services must also include the supervision of the development and revision of the client's emergency medical plan in partnership with the client, the family, and other providers for use by emergency medical services (EMS) personnel, utility service companies, schools, other community agencies, and caregivers.

Face-to-face care coordination services are encompassed within the various levels of evaluation and management (E/M) encounters and prolonged services.

Non-face-to-face clinician-directed care coordination services include:

- Prolonged services (procedure codes 99358 and 99359).
- Medical team conference (procedure code 99367).
- Care plan oversight and supervision, including telephone consultations with a specialist or subspecialist (procedure codes 99374, 99375, 99377, 99378, 99379, and 99380).
- Specialist or subspecialist telephone consultations (procedure code 99499 with modifier U9).

Non-face-to-face clinician-directed care coordination services are not considered case management by Texas Medicaid.

Specifically, non-face-to-face medical home clinician oversight and supervision of the development or revision of a client's care plan may include the following activities, which do not have to be contiguous:

- Review of charts, reports, treatment plans, and lab or study results, except for the initial interpretation or review of lab or study results ordered during, or associated with, a face-to-face encounter.

- Telephone calls with other Medicaid-enrolled health-care professionals (not employed in the same practice) involved in the care of the client.
- Telephone or face-to-face discussions with a pharmacist about pharmacological therapies (not just ordering a prescription).
- Medical decision-making.
- Activities to coordinate services, if the coordination activities require the skill of a clinician.
- Documenting the services provided, which includes writing a note in the client's chart describing the services provided, decision-making performed, and the amount of time spent performing the countable services, including the start and stop times and time spent by the physician working on the care plan after the nurse has conveyed pertinent information from agencies and facilities to the physician.

The following activities are not covered as non-face-to-face clinician supervision of the development or revision of the client's care plan (care plan oversight services):

- Time that the staff spends getting or filing charts, calling home health agencies or clients, and similar administrative actions.
- Clinician telephone calls to client or family, except when necessary to discuss changes in client's care plan.
- Clinician time spent telephoning prescriptions to a pharmacist (does not require clinician work and does not require a clinician to perform).
- Clinician time getting or filing the chart, dialing the telephone, or time on hold (does not require clinician work and does not meaningfully contribute to the treatment of the illness or injury).
- Travel time.
- Time spent preparing claims and for claims processing.
- Initial interpretation or review of lab or study results that were ordered during, or associated with, a face-to-face encounter.
- Services included as part of other E/M services.
- Consultations with health professionals not involved in the client's case.

### **2.6.1.1 Non-Face-to-Face Services**

#### **2.6.1.1.1 Non-Face-to-Face Medical Conferences**

Procedure code 99367 must be used when billing for medical team conferences.

#### **2.6.1.1.2 Non-Face-to-Face Clinician Supervision of a Home Health Client**

Procedure code 99374 or 99375 must be used when billing for services requiring interaction with a home health agency.

#### **2.6.1.1.3 Non-Face-to-Face Clinician Supervision of a Hospice Client**

Procedure code 99377 or 99378 must be used when billing for services requiring interaction with a hospice.

#### **2.6.1.1.4 Non-Face-to-Face Clinician Supervision of a Nursing Facility Client**

Procedure code 99379 or 99380 must be used when billing for services requiring interaction with a nursing facility.

2.6.1.1.5 Non-Face-to-Face Prolonged Services

Procedure code 99358 or 99359 must be used when billing for prolonged services without face-to-face contact. This service is to be reported in addition to other clinician services, including E/M services at any level, or health-care professionals outside of a home health agency, hospice, or nursing facility.

Non-face-to-face prolonged services are limited to a maximum of 90 minutes once per client by the same provider unless one of the following significant changes in the client’s clinical condition occurs:

- The client will soon be, or has recently been, discharged from a prolonged and complicated hospitalization that required coordination of complex care with multiple providers in order for the client to be adequately cared for in the home.
- The client has experienced recent trauma resulting in new medical complications that require complex interdisciplinary care.
- The client has a new diagnosis of a medically complex condition requiring additional interdisciplinary care with additional specialists.

Procedure code 99359 must be billed on the same date of service as procedure code 99358. Additional prolonged non-face-to-face services may be authorized if the provider submits supporting documentation for authorization.

Procedure code 99358 must be used to report non-face-to-face prolonged services of at least 30 minutes total duration. Prolonged services of less than 30 minutes are considered part of the physician’s E/M service being provided.

Procedure codes 99358 and 99359 will be denied if billed on the same date of service as any of the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 99202           | 99203 | 99204 | 99205 | 99212 | 99213 | 99214 | 99215 | 99221 | 99222 |
| 99223           | 99231 | 99232 | 99233 | 99234 | 99235 | 99236 | 99242 | 99243 | 99244 |
| 99245           | 99252 | 99253 | 99254 | 99255 | 99281 | 99282 | 99283 | 99284 | 99285 |
| 99304           | 99305 | 99306 | 99307 | 99308 | 99309 | 99310 | 99341 | 99342 | 99344 |
| 99345           | 99347 | 99348 | 99349 | 99350 | 99417 | 99418 |       |       |       |

Procedure code 99359 is used to report an additional 15 to 30 minutes of prolonged non-face-to-face services beyond the first hour. Prolonged services of less than 15 minutes beyond the first hour are considered part of the first hour.

Non-face-to-face prolonged services procedure codes 99358 and 99359 may be used when billing for completion of paperwork required by a judge to determine guardianship of a client. Required paperwork may include a certified medical examination form for clients who are birth through 20 years of age that are eligible for the Texas Health Steps program on the date of service.

2.6.1.1.6 Non-Face-to-Face Specialist or Subspecialist Telephone Consultation

Telephone consultations are limited to two every six months to the same provider and will not be reimbursed to the clinician providing the medical home.

The clinician providing the medical home must have an authorization on file for one of the following procedure codes before the specialist or subspecialist can be reimbursed:

| Procedure Codes |       |       |       |       |       |       |  |  |  |
|-----------------|-------|-------|-------|-------|-------|-------|--|--|--|
| 99358           | 99374 | 99375 | 99377 | 99378 | 99379 | 99380 |  |  |  |

Because the specialist or sub-specialists cannot be reimbursed without the medical home clinician's current prior authorization information, the clinician providing the medical home should provide their information to the specialist or subspecialist.

The specialist or subspecialist will not be separately reimbursed for the telephone consultation if he or she is the medical home clinician because care plan oversight by the medical home provider includes telephone consultations. The referring provider's NPI and prior authorization number must be submitted on the claim.

#### **2.6.1.1.7 General Requirements for Non-Face-to-Face Clinician-Directed Care Coordination Services**

These services may be reimbursed for the medical home clinician time involved in this coordination. The clinician billing the services must personally perform the services. Care coordination services delegated to, or performed by others, do not count towards care coordination reimbursement. Care coordination provided during post-surgical care is a benefit if the care is unrelated to the surgery.

#### **2.6.1.1.8 Non-Face-to-Face Care Plan Oversight**

The medical home clinician who bills for the care plan oversight must be the clinician who signed the plan of care (POC) in the home health agency (procedure codes 99374 and 99375), hospice (procedure codes 99377 and 99378), or nursing facility (procedure codes 99379 and 99380).

Procedure code 99374 is denied when billed on the same date of service by the same provider as procedure code 99375.

Procedure code 99377 is denied when billed on the same date of service by the same provider as procedure code 99378.

Procedure code 99379 is denied when billed on the same date of service by the same provider as procedure code 99380.

Care plan oversight services may be reimbursed for the clinician time involved in this coordination. The clinician billing the services must personally perform the services. Care coordination services delegated to or performed by others do not count towards care coordination reimbursement.

Reimbursement for procedure codes 99374 or 99375, 99377 or 99378, and 99379 or 99380 are limited to one per client, per calendar month for any provider. Providers should bill the code that most appropriately reflects the total time spent in a calendar month performing care plan oversight.

The medical home clinician may not have a significant financial or contractual relationship with the home health agency as defined in 42 Code of Federal Regulations (CFR) §424.

The medical home clinician may not be the medical director or employee of the hospice and may not furnish services under arrangements with the hospice, including volunteering.

#### **2.6.1.1.9 Medical Team Conference**

One medical team conference (procedure code 99367) may be reimbursed once every six months when the medical home coordinating clinician attests that they are providing the medical home for the client. The coordinating clinician may be the client's primary care provider or a specialist.

Additional medical team conferences may be considered with documentation of a change in the client's medical home.

The medical team conference time must be documented in the client's record.

2.6.1.2 Face-to-Face Services

2.6.1.2.1 General Requirements for Face-to-Face Clinician-Directed Care Coordination Services

Providers must use the most appropriate face-to-face E/M procedure codes to bill for care coordination services.

- When counseling or care coordination requires more than 50 percent of the client or family encounter (face-to-face time in the office or other outpatient setting, or floor/unit time in the hospital), then time may be considered the key or controlling factor to qualifying for a particular level of E/M service.
- Counseling is a discussion with the client or family concerning diagnostic studies or results, prognosis, risks and benefits, management options, importance of adhering to the treatment regimen, and client and family education.

Modifiers must be used as appropriate for billing.

Any face-to-face inpatient or outpatient E/M procedure code that is a benefit of Texas Medicaid may be billed on the same day as the following non-face-to-face clinician-directed care coordination procedure codes when the procedure requires significant, separately-identifiable E/M services by the same physician on the same day.

| Procedure Codes |       |       |       |       |       |       |  |  |  |
|-----------------|-------|-------|-------|-------|-------|-------|--|--|--|
| 99367           | 99374 | 99375 | 99377 | 99378 | 99379 | 99380 |  |  |  |

2.6.2 Prior Authorization and Documentation Requirements

Non-face-to-face clinician-directed care coordination services provided by the medical home require prior authorization. Providers must submit a request for prior authorization within seven business days of the date of service. Prior authorization is limited to a maximum of six months. Prior authorization is required to recertify the client for additional six-month periods and requires submission of a new request with documentation supporting medical necessity for ongoing services.

Prior authorization for initial non-face-to-face clinician-directed care coordination requires documentation of at least one covered face-to-face inpatient or outpatient E/M visit by the medical home clinician directing the care coordination during the six months preceding the provision of the first non-face-to-face care coordination service.

Prior authorization for subsequent non-face-to-face clinician-directed care coordination services requires at least one covered face-to-face inpatient or outpatient E/M visit by the medical home clinician directing the care coordination during the previous 12 months or more frequently as indicated by the client’s condition.

Prior authorization of CCP services may be requested in writing by completing a CCP Prior Authorization Request Form, attaching the necessary supportive documentation as detailed below, and mailing or faxing it to the TMHP-CCP department:

Texas Medicaid & Healthcare Partnership  
Comprehensive Care Program  
PO Box 200735  
Austin, TX 78720-0735  
Fax: 1-512-514-4212

For prior authorization to be considered, clients must require complex and multidisciplinary care modalities involving regular clinician development or revision of care plans, review of subsequent reports of client status, and review of related laboratory and other studies:

- *Medically complex.* The health care needed by a Medicaid client achieves the designation of medically complex when the approved POC necessitates a clinical professional practicing within the scope of his or her license and in the context of a medical home to coordinate ongoing treatment to ensure its safe and effective delivery. The diagnosis must be covered under Texas Medicaid and be characterized by one of the following:
  - Significant and interrelated disease processes that involve more than one organ system (including behavioral health diagnoses) and require the services of two or more licensed clinical professionals, specialists, or subspecialists.
  - Significant physical or functional limitations that require the services of two or more therapeutic or ancillary disciplines, including, but not limited to, nursing, nutrition, OT, PT, ST, orthotics, and prosthetics.
  - Significant physical, developmental, or behavioral impairment that requires the integration of two or more medical or community-based providers, including, but not limited to, educational, social, and developmental professionals, that impact the care of the client.
- *Multidisciplinary Care.* Care is multidisciplinary when the medically necessary covered services of an approved POC include the need to coordinate the assessment, treatment, or services of a Medicaid-enrolled clinical provider with two or more additional medical, educational, social, developmental, or other professionals impacting the health care of the client.

Prior authorization is effective for care coordination services provided over a period of six months. Medical home clinicians must submit a revised care plan for subsequent periods of prior authorization.

Documentation of the following components must be submitted with the prior authorization form to obtain an initial authorization or renewal:

- A current medical summary, encompassing all disciplines and all aspects of the client's care, and containing key information about the client's health, including conditions, complexity, medications, allergies, past surgical procedures, and so on.
- A current list of the main concerns, issues, and problems as well as key strengths and assets and the related current clinical information including a list of all diagnosis codes.
- Planned action steps and interventions to address the concerns and to sustain and build strengths, with the expected outcomes.
- Disciplines involved with the client's care and how the multiple disciplines will work or are working together to meet the client's need. Providers must explain how the multidisciplinary approach will or do benefit the client's needs.
- Short-term and long-term goals with timeframes.

The supporting documentation can be any of the following:

- A formal written care plan
- Progress note detailing the care coordination planning
- A letter of medical necessity detailing the care plan oversight and care coordination

Clinician-directed care coordination services must be documented in the client's medical record. Documentation must support the services being billed and must include a record of the medical home clinician's time spent performing specific care coordination activities, including start and stop times.

The documentation must also include a formal care plan and an emergency services plan. The supporting documentation maintained in the client's medical records must be dated and include the following components and requirements:

- Problem list
- Interventions
- Short-term and long-term goals
- Responsible parties

Client medical records are subject to retrospective review.

Documentation for care coordination provided during post-surgical care must clearly indicate the care coordination is unrelated to the surgery.

#### **2.6.2.1 Documentation Requirements for the Medical Home Clinician for a Telephone Consult with a Specialist**

The clinician providing the medical home must maintain the following documentation in the client's medical record:

- Start and stop times showing that the consultation was at least 15 minutes
- The reason for the call
- The specialist's or subspecialist's medical opinion
- The recommended treatment or laboratory services
- The name of the specialist or subspecialist

#### **2.6.2.2 Documentation Requirements for the Specialist or Subspecialist for a Telephone Consult with the Medical Home Clinician**

Specialists or subspecialists must complete and retain the Specialist or Subspecialist Telephone Consultation Form for Non-Face-to-Face Clinician Directed Care Coordination Services-CCP. These records are subject to retrospective review. The supporting documentation must include, but is not limited to the following:

- The client's name, date of birth, and Medicaid identification number
- Start and stop times indicating the consultation lasted at least 15 minutes
- The reason for the call
- The specialist's or subspecialist's medical opinion
- The recommended treatment or laboratory services
- The name and telephone number of the clinician providing the medical home
- NPI for the specialist or subspecialist and the clinician providing the medical home

#### **2.6.3 Claims Information**

Claims for clinician-care coordination services must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims.

## **2.6.4 Reimbursement**

Clinician-directed care coordination services are reimbursed in accordance with 1 TAC §355.8441.

## **2.7 Comprehensive Outpatient Rehabilitation Facilities (CORFs) and Outpatient Rehabilitation Facilities (ORFs)**

**Referto:** *The Physical Therapy, Occupational Therapy, and Speech Therapy Services Handbook (Vol. 2, Provider Handbooks)* for more information about CCP therapy services.

## **2.8 Durable Medical Equipment (DME) Supplier (CCP)**

### **2.8.1 Enrollment**

To be eligible to participate in CCP, providers of DME (including customized or non-basic medical equipment) and expendable medical supplies must be enrolled in Medicare.

Home health agencies that provide DME and supplies should refer to subsection 2.1, “Enrollment” in the *Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks)*.

#### **2.8.1.1 Pharmacies (CCP)**

Pharmacy providers are eligible to participate in CCP. To be enrolled in CCP, the pharmacy must also be enrolled in VDP.

This enrollment allows pharmacy providers to bill for those medications and supplies payable by Medicaid for clients who are birth through 20 years of age but *not* covered by VDP (e.g., some over-the-counter drugs, some nutritional products, diapers, and disposable or expendable medical supplies). Pharmacy providers must continue to bill HHSC for drugs covered under VDP.

To locate a pharmacy CCP provider, use the Online Provider Lookup (OPL) at [opl.tmhp.com](http://opl.tmhp.com).

**Referto:** Subsection 2.1.2, “Enrollment” in this handbook for more information about CCP enrollment procedures.

Section 1.1, “About the Vendor Drug Program” in the *Outpatient Drug Services Handbook (Vol. 2, Provider Handbooks)* for information about this program.

Section 2, “Texas Medicaid (Title XIX) Home Health Services” for details about coverage through Texas Medicaid (Title XIX) Home Health Services.

### **2.8.2 Services, Benefits, and Limitations**

DME is defined as medical equipment that is manufactured to withstand repeated use, ordered by a physician for use in the home, and required to correct or ameliorate the client’s disability, condition, or illness.

Because there is no single authority (such as a federal agency) that confers the official status of “DME” on any device or product, HHSC retains the right to make such determinations with regard to DME covered by Texas Medicaid. DME covered by Texas Medicaid must either have a well-established history of efficacy or, in the case of novel or unique equipment, valid peer-reviewed evidence that the equipment serves a medical purpose, can withstand repeated use, and is appropriate and safe for use in the home.

Requested DME may be a benefit of Texas Medicaid when it meets the Medicaid definition of DME.

The majority of DME and expendable medical supplies are covered through Texas Medicaid (Title XIX) Home Health Services.

If a service cannot be provided through Texas Medicaid (Title XIX) Home Health Services, the service may be covered through CCP if it is determined to be medically necessary for the client and if FFP is available.

If a DME provider is unable to deliver a piece of equipment, the provider must allow the client the option of obtaining the DME or expendable medical supplies from another provider.

Periodic rental payments are made only for the lesser of the following:

- The period of time the equipment is medically necessary
- The total monthly rental payments equal the reasonable purchase cost for the DME

DME will be purchased when a purchase is determined to be medically necessary and more cost effective than leasing the device with supplies. Only new, unused equipment will be purchased. When a provider is replacing a piece of rental DME with purchased DME, the provider must supply a new piece of DME to the client.

Purchase is justified when the estimated duration of need multiplied by the rental payments would exceed the reasonable purchase cost of the equipment or it is otherwise more practical to purchase the equipment.

DME repair will be considered based on the age of the item and cost to repair it. A request for repair of DME must include an itemized estimated cost list from the vendor or DME provider who will make the repairs.

Rental equipment may be provided to replace purchased medical equipment for the period of time it will take to make necessary repairs to purchased medical equipment.

All adjustments and modifications to a wheeled mobility system that are made within the first six months after delivery are considered part of the purchase price. However, DME that has been delivered to the client's home and then found to be inappropriate for the client's condition will not be eligible for an upgrade within the first six months following purchase unless there had been a significant change in the client's condition, as documented by the physician familiar with the client.

Rental reimbursement to the same provider cannot exceed the purchase price, except as addressed in specific policies.

All DME purchased for a client becomes the Medicaid client's property upon receipt of the item. Delivered equipment will become the Medicaid client's property in the following instances even though it will not be prior authorized or reimbursed:

- Equipment delivered to the client before the physician signature date on the CCP Prior Authorization Request Form or prescription.
- Equipment delivered more than three business days before obtaining prior authorization from TMHP that meets the criteria for purchase.

As long as the client is eligible for CCP services on the date the custom equipment is ordered from the manufacturer, the provider must use the order date as the date of service since custom equipment is client specific and cannot be used for another client.

To establish medical necessity of the equipment for the client, the provider must have on file in the client's records current documentation that is signed by a physician (e.g., a signed and dated prescription) showing the following:

- A diagnosis relative to each item requested.

- The specific type of supply needed.
- The length of time needed.

### **2.8.2.1 Purchase Versus Equipment Rental**

When providing equipment not prior authorized under Texas Medicaid (Title XIX) Home Health Services for CCP clients with long-term or chronic conditions, it is more cost-effective, in many cases, to purchase the equipment rather than rent it. The client's condition and length of time the equipment will be used must be carefully assessed before prior authorization for rental or purchase is requested. CCP nurses determine whether the equipment will be rented, purchased, repaired, or modified based on the client's needs, the duration of use, and the age of the equipment.

CCP does not pay for the purchase of certain types of equipment; consequently, long-term rental may be considered. Most other equipment is rented for only four months initially. During this time, the provider must assess whether the equipment should be purchased before the rental lapses. Rentals and purchases must be prior authorized.

After prior authorization is obtained for purchase, new equipment must be provided and the rental discontinued. CCP does not purchase used equipment.

Providers of customized or nonbasic medical equipment also must be enrolled as Medicare DME providers.

### **2.8.3 Prior Authorization and Documentation Requirements**

Providers can request prior authorization for most DME through the TMHP website. Providers that make written requests for prior authorization must complete the [CCP Prior Authorization Request Form](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com), and they must attach the documentation necessary to support the request. The documentation must include a current prescription that has been signed and dated by a physician (M.D. or D.O.), and it must be mailed or faxed to TMHP with the prior authorization request. For specific policy information not contained in this manual related to the purchase of DME, providers can call TMHP-CCP Customer Service at 1-800-846-7470.

A completed CCP Prior Authorization Request Form prescribing the DME or medical supplies must be signed and dated by the prescribing physician familiar with the client before requesting prior authorization. The completed CCP Prior Authorization Request Form must be maintained by the requesting provider and the prescribing physician. The original signature copy must be kept in the physician's medical record for the client.

To complete the prior authorization process by paper, the DME provider must fax or mail the completed CCP Prior Authorization Request Form to the CCP prior authorization unit and retain a copy of the signed and dated CCP form in the client's medical record at the provider's place of business.

To complete the prior authorization process electronically, the DME provider must complete the prior authorization requirements through any approved electronic methods and retain a copy of the signed and dated CCP Prior Authorization Request form in the client's medical record at the provider's place of business.

To avoid unnecessary denials, the physician must provide correct and complete information, including accurate documentation of the medical necessity for the equipment and services requested. The physician must maintain documentation of medical necessity in the client's medical record. The requesting provider may be asked for additional information to clarify or complete a request.

Retrospective review may be performed to ensure documentation supports the medical necessity of the requested equipment or supplies.

A determination as to whether the equipment will be rented, purchased, repaired, or modified will be made by HHSC or its designee based on the client's needs, duration of use, and age of the equipment.

Equipment that has been purchased may be considered for replacement when loss or irreparable damage has occurred outside the warranty terms, conditions, and limitations. A copy of the police or fire report, when appropriate, and the measures to be taken to prevent reoccurrence must be submitted with the prior authorization request.

A request for prior authorization must include documentation from the provider to support the medical necessity of the service, equipment, or expendable medical supply. Physician prescriptions must be specific to the item requested. For example, if the provider is requesting a customized wheelchair, the prescription must request a customized wheelchair, not just a wheelchair. Providers must submit a CCP Prior Authorization Request Form and documentation to support medical necessity to the CCP department *before* providing services. Providers must obtain prior authorization within three business days of the requested date of service.

**Referto:** Section 2.2.30, "Procedure Codes That Do Not Require Prior Authorization" for details about specific procedure codes that do not require prior authorization through Texas Medicaid (Title XIX) Home Health Services.

### **2.8.3.1 Equipment Accessories**

CCP may consider prior authorization of equipment accessories, such as ventilator and oxygen trays and positioning inserts, when supporting documentation takes into account all the client's needs, capabilities, and physical or mental status.

### **2.8.3.2 Equipment Modifications**

A modification is the replacement of a component due to changes in the client's condition, not the replacement of a component that is no longer functioning.

DME that has been delivered to the client's home and then found to be inappropriate for the client's condition will not be eligible for an upgrade within the first six months following purchase. All modifications to a wheeled mobility system that are made within the first six months after delivery are considered part of the purchase price.

However, CCP may consider prior authorization of modifications to custom equipment if a change occurs in the client's needs, capabilities, or physical or mental status that cannot be anticipated. Documentation must include:

- All projected changes in the client's needs.
- The age of the current equipment, and the cost of purchasing new equipment versus modifying current equipment.

### **2.8.3.3 Equipment Adjustments**

Adjustments do not require supplies.

Labor for adjustments within the first six months after delivery are not prior authorized because these are considered part of the purchase price.

Up to one hour of labor for adjustments may be considered for reimbursement with prior authorization through CCP as needed after the first six months. Providers must use procedure code K0739 for adjustments.

### **2.8.3.4 Repair to Client-Owned Equipment**

Repairs to a wheeled mobility system within the first six months after delivery are considered part of the purchase price. Repairs to client-owned equipment may be prior authorized as needed with documentation of medical necessity. Technician fees are considered part of the cost of the repair.

HHSC or its designee reserves the right to request additional documentation about the need for repairs when there is evidence of abuse or neglect to equipment by the client, client's family, or caregiver. When there is documented proof of abuse or neglect, requests for repairs will not be prior authorized.

Providers are responsible for maintaining documentation in the client's medical record that specifies the repairs and supporting medical necessity.

Documentation must include all of the following:

- The date of purchase
- The serial number of the current equipment (as applicable)
- The cause of the damage or need for repairs
- What steps the client or caregiver will take to prevent further damage if repairs are due to an accident
- When requested, the cost of purchasing new equipment as opposed to repairing current equipment

Temporary replacement of client-owned respiratory equipment during the repair may be considered for prior authorization for one month using procedure code K0462.

Labor for repair of client-owned respiratory equipment may be considered for prior authorization using procedure code K0739 up to a maximum of two hours per day (maximum quantity of eight units).

Routine maintenance of rental equipment is the provider's responsibility.

### **2.8.3.5 DME Certification and Receipt Form**

The DME Certification and Receipt Form is required and must be completed before reimbursement can be made for any DME delivered to a client. The certification form must include the name of the item, the date the client received the DME, and the signatures of the provider and the client or primary caregiver.

The DME provider must maintain the signed and dated form in the client's medical record.

DME claims and appeals that meet or exceed a billed amount of \$2,500 for the same date of service will suspend for verification of client receipt of the DME item(s). The DME Certification and Receipt Form must be faxed to 1-512-506-6615. If the claim is submitted without the form or if receipt of the DME item(s) cannot be verified, the DME item(s) on the claim will be denied. TMHP may contact the client that received the product for verification of services rendered.

**Referto:** [DME Certification and Receipt Form](https://www.tmhp.com) on the TMHP website at [www.tmhp.com](https://www.tmhp.com).

### **2.8.3.6 Documentation of Supply Delivery**

Providers must retain individual delivery slips or corresponding invoices for each date of service to document the date of delivery for all supplies provided to a client. Providers must disclose this documentation to HHSC or its designee upon request. These records and claims must be retained for a minimum of five years from the date of service (DOS) or until all audit questions, appeals, hearings, investigations, or court cases are resolved. The DOS is the date on which supplies are delivered to the client or shipped by a carrier to the client as evidenced by the dated tracking document attached to the corresponding invoice for that date.

Documentation of delivery must include one of the following:

- Delivery slip or invoice signed and dated by the client or caregiver.
- A dated carrier tracking document with the shipping date and delivery date as confirmation that the supplies were shipped and delivered. The dated carrier tracking document must be attached to the delivery slip or corresponding invoice, or
- If using a third-party distributor, the delivery confirmation from the third-party distributor and corresponding tracking number from the third-party distributor's carrier must be attached.

The dated delivery slip or invoice must include the client's full name and address to where supplies were delivered, and an itemized list of goods that includes the descriptions and numerical quantities of the supplies delivered to the client, and the corresponding tracking number from the carrier. This document could also include prices, shipping weights, shipping charges, and any other description.

All claims submitted for DME supplies must include the same quantities or units that are documented on the delivery slip or corresponding invoice and on the CCP Prior Authorization Request form. They must reflect the number of units by which each product is measured. For example, diapers are measured as individual units. If one package of 300 diapers is delivered, the delivery slip or invoice and the claim must reflect that 300 diapers were delivered and not that one package was delivered. Diaper wipes are measured as boxes or packages. If one box of 200 wipes is delivered, the delivery slip or invoice and the claim must reflect that one box was delivered and not that 200 individual wipes were delivered. There must be one dated delivery slip or invoice for each claim submitted for each patient. All claims submitted for DME supplies must reflect either one business day before or one business day after the date of service as documented on the delivery slip or corresponding invoice and the same timeframe covered by the CCP Prior Authorization Request form. The DME Certification and Receipt Form is still required for all equipment delivered.

### **2.8.3.7 Specific CCP Policies**

Most DME and expendable medical supplies are available under Texas Medicaid (Title XIX) Home Health Services. If the service is not available under Texas Medicaid (Title XIX) Home Health Services, CCP may cover the requested service, if the client is CCP-eligible and the service is medically necessary, requested by a physician, and for which FFP is available.

**Referto:** [DME Certification and Receipt Form](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

*The Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks) for DME services.*

## **2.9 Early Childhood Intervention (ECI) Services**

The Texas Health and Human Services (HHS) ECI program is available statewide to all children who have been determined to be eligible for ECI services by ECI contractors. To be eligible for ECI services, children must be 35 months of age and younger (i.e., before their third birthday) and have disabilities or developmental delays as defined by ECI criteria. Texas Medicaid covers the ECI claims for children who are Medicaid clients.

All health-care professionals are required by federal and state regulations to refer children who are 35 months of age and younger (i.e., before their third birthday) to the Texas HHS ECI program as soon as possible, but no longer than 7 days after identifying a disability or suspected delay in development. Referrals can be based on professional judgment or a family's concern. A medical diagnosis or a confirmed developmental delay is not required for referrals.

To refer families for services, providers can call their local ECI program, or they can call the HHS Inquiry Line at 1-877-787-8999. For additional ECI information, providers can visit the [Early Childhood Intervention Services page](#) of the HHS website at [www.hhs.texas.gov](http://www.hhs.texas.gov). Persons who are deaf or hard of hearing may use the relay option of their choice or dial 7-1-1 to connect with Relay Texas.

### **2.9.1 Enrollment**

The Texas HHS ECI program contracts with local non-profit entities to take referrals, determine clients' eligibility, and provide services to ECI-eligible children and their families. The non-profit entities must contract with the Texas HHS ECI program and must comply with all of the applicable federal and state laws and regulations that govern the Texas HHS ECI program.

ECI contractors are eligible to enroll as Texas Medicaid ECI providers to render services to eligible Medicaid clients. After providers meet the criteria of the Texas HHS ECI program, they must complete a Medicaid application.

To participate in Texas Medicaid, an ECI contractor must submit a copy of the current contract award from the Texas HHS ECI program.

**Referto:** Subsection 1.1, "Provider Enrollment" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*) for more information about the procedures for enrolling as a Medicaid provider.

## **2.9.2 Services, Benefits, and Limitations**

Prior authorization is not required for evaluations, re-evaluations, seating assessments, therapy services, specialized skills training (SST), and targeted case management (TCM). The IFSP Services Pages identify the amount, duration, and scope for the provision of specialized rehabilitative services (SRS) treatment services and serves as the prior authorization for ECI services. The IFSP is retained in the client's record and is subject to retrospective review.

ECI services include TCM and SRS, which includes occupational therapy (OT), physical therapy (PT), speech therapy (ST), and SST.

ECI SRS services may be provided in the following places of service (POS): office/facility (POS 1), home (POS 2), outpatient (POS 5 applicable only to ECI services rendered in a Prescribed Pediatric Extended Care Center [PPECC]), and other locations (POS 9). In addition to these places of service, TCM may be provided in inpatient hospital (POS 3) and outpatient hospital (POS 5).

ECI services of OT, PT, ST, SST and TCM are provided to Medicaid-eligible clients who are birth through 35 months of age and have a documented developmental delay or a medically diagnosed condition as established by HHSC (26 TAC, Part 1, Chapter 350), or an auditory or visual impairment as defined by the Texas Education Agency (19 TAC §89.1040).

To the maximum extent appropriate, ECI services are delivered in the client's natural environment, as defined in 26 TAC, Part 1, Chapter 350, and are family-centered.

The interdisciplinary team must document ECI eligibility decisions in accordance with 26 TAC, Part 1, Chapter 350. The eligibility statement must be in the child's record and updated when eligibility changes or is re-determined.

All documentation of ECI services, including the plan of care specified in the Individualized Family Service Plan (IFSP) must be retained in the client's record and available upon request. The IFSP is a written plan of care for providing early childhood intervention services and other medical, health, and social services to an eligible child and the child's family when necessary to enhance the child's development.

ECI service providers are employees and subcontractors of non-profit entities that have contracts with the State of Texas for the provision of Individuals with Disabilities Education Act (IDEA) Part C Early Childhood Intervention services.

Medically necessary services may be provided by other Medicaid-enrolled providers in addition to the services provided by the ECI contractor. For example, the family may choose to receive speech therapy from the ECI contractor and physical therapy from a home health provider. Or, outpatient clinic personnel may have expertise that will enhance the services of the ECI provider resulting in ECI providers and other Medicaid-enrolled providers providing services within the same discipline.

Only the services provided to ECI enrolled children by ECI contracted entities must comply with the Medicaid medical guidelines for ECI services.

Services provided by other Medicaid-enrolled providers, including other providers of physical, occupational, and speech therapy, must comply with Medicaid medical guidelines that apply to those provider types (e.g., outpatient rehabilitation facility, home health agency).

### **2.9.2.1 Physical, Occupational, and Speech Therapies and Specialized Skills Training (PT, OT, ST, and SST)**

ECI services use techniques by which the ECI service provider engages the family or caregiver in activities to meet the developmental needs of the child.

ECI services are performed in accordance with 26 TAC, Part 1, Chapter 350.

To the maximum extent possible, ECI services are provided in the client's natural environment, as defined in 34 CFR Part 303, unless the IFSP team determines the identified outcomes cannot be achieved in a natural environment. Natural environments are defined as settings that are natural or typical for the same-aged infant or toddler without a disability, and may include the home and community settings such as daycare, playgrounds, stores, and restaurants.

Justification for providing services in other settings (e.g., office, clinic, Prescribed Pediatric Extended Care Center (PPECC)) must be documented in the client's record.

PT, OT, ST, and SST are benefits for clients with an acute or a chronic condition when documented on the IFSP. Documentation on the IFSP is evidence that services are developed and recommended by the child's interdisciplinary team, including the parents and a licensed practitioner of the healing arts (as defined in 26 TAC, Part 1, Chapter 350).

PT, OT, ST, and SST must be performed and delivered as identified in the IFSP.

Missed visits may be rescheduled within the authorization period as long as the total number of visits or units provided does not exceed the amount authorized in the client's IFSP. The ECI contractor must document the reason for visits outside of the weekly or monthly frequency in the client's record.

A single identified need and treatment goal (outcome on the IFSP) may be addressed by more than one discipline.

More than one discipline can evaluate a child at the same time to facilitate compliance with the federal requirement for multidisciplinary evaluation (34 CFR, Part 303).

A client may receive a combination of PT, OT, ST, or SST with any other IFSP service when the IFSP indicates necessity for co-visits or co-treatment (i.e., two or more services to be provided at the same time).

PT, OT, ST, and SST may be delivered to a client individually or in a group setting according to 26 TAC, Part 1, Chapter 350 and when documented in the IFSP.

Documentation of each PT, OT, ST, and SST contact must be entered into the child's record in accordance with 26 TAC, Part 1, Chapter 350.

### **2.9.2.2 Telehealth Synchronous Audiovisual Services**

Telehealth services may be provided using synchronous audiovisual technologies if clinically appropriate and safe, as determined by the provider, and agreed to by the client receiving services.

Whenever possible, HHSC encourages face-to-face interaction, such as an in-person visit, as well as the use of synchronous audiovisual technology over synchronous telephone (audio-only) technology of telehealth services.

Providers must defer to the needs of the client receiving services, allowing the mode of service delivery to be accessible, person- and family-centered, and primarily driven by the client in service's choice and not provider convenience.

Services delivered by synchronous audiovisual technology will require participation of a parent or caregiver to assist with the treatment.

Therapy assistants may deliver services and receive supervision using synchronous audiovisual technology in accordance with each discipline's rules. Providers should refer to state practice rules and national guidelines regarding supervision requirements for each discipline.

**Note:** *Telehealth services must adhere to documentation, privacy, informed consent, and security requirements as outlined in the Telecommunication Services Handbook (Vol. 2, provider handbooks).*

The following procedure codes may be provided through telehealth delivery using synchronous audiovisual technology:

| Services                                                | Procedure Codes                          |
|---------------------------------------------------------|------------------------------------------|
| Specialized skills training (SST)                       | T1027                                    |
| Targeted case management (TCM)                          | T1017                                    |
| Physical therapy (PT) evaluations and reevaluations     | 97161, 97162, 97163, 97164               |
| Occupational therapy (OT) evaluations and reevaluations | 97165, 97166, 97167, 97168               |
| PT and OT treatments                                    | 97110, 97112, 97150, 97530, 97535        |
| Speech therapy (ST) evaluations and reevaluations       | 92521, 92522, 92523, 92524, 92610, S9152 |
| ST treatments                                           | 92507, 92508, 92526                      |

Providers must use modifier 95 to indicate remote delivery. Providers are reminded to use the required modifiers GP, GO, and GN on all claims except evaluation and re-evaluation procedures for physical, occupational, or speech therapy treatment.

#### 2.9.2.2.1 Telehealth Exclusions

The following procedure codes are in-person only and will not be reimbursed if provided through telehealth delivery:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 97012           | 97014 | 97016 | 97018 | 97022 | 97024 | 97026 | 97028 | 97032 | 97033 |
| 97034           | 97035 | 97036 | 97113 | 97124 | 97140 | 97542 | 97760 | 97761 | 97763 |

Any PT, OT, ST, and SST services delivered through synchronous telephone (audio-only) technology is not a benefit.

During a Declaration of State of Disaster, HHSC may issue direction to providers regarding the use of a telehealth service to include the use of a synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein to the extent permitted by Texas law. A Declaration of State of Disaster is when an executive order or proclamation is issued by the governor declaring a state of disaster in accordance with Section 418.014 of the Texas Government Code.

#### 2.9.2.3 Physical, Occupational, and Speech Therapy (PT, OT, and ST)

Physical and occupational therapy treatment services require orders from a referring provider once a year.

Speech therapy treatment services do not require an order from a referring provider.

Therapy goals for acute or chronic conditions include, but are not limited to the following:

- Improving function
- Maintaining function

- Slowing the deterioration of function

#### 2.9.2.3.1 Physical Therapy (PT)

PT includes services that address the promotion of sensory and motor function through enhancement of musculoskeletal status, neurobehavioral organization, perceptual and motor development, cardiopulmonary status, and effective environmental adaptation.

All services must be performed in accordance with 42 CFR 440.110.

A PT evaluation, re-evaluation, or seating assessment may be performed without an order from a referring provider as allowed by 22 TAC Part 16, Chapter 322, §322.1(a)(2)(A).

PT services must be provided by one of the following:

- A licensed physical therapist who meets the requirements of 42 CFR 440.110(a)
- A licensed physical therapy assistant (PTA) when the assistant is acting under the direction of a licensed physical therapist in accordance with 42 CFR 440.110 and all other applicable state and federal law

#### 2.9.2.3.2 Occupational Therapy (OT)

OT includes services that address the functional needs of a child related to adaptive development, adaptive behavior and play, and sensory, motor, and postural development. These services are designed to improve the client's functional ability to perform tasks in the home and community settings.

All services must be performed in accordance with 42 CFR 440.110.

An OT evaluation, re-evaluation, or seating assessment may be performed without an order from a referring provider as allowed by §454.213 of the Texas Occupations Code.

OT services must be provided by one of the following:

- A licensed occupational therapist who meets the requirements of 42 CFR 440.110(b)
- A licensed or licensed and certified occupational therapist assistant (OTA) when the assistant is acting under the direction of a licensed occupational therapist in accordance with 42 CFR 440.110 and all other applicable state and federal law

#### 2.9.2.3.3 Speech Therapy (ST)

Speech and language therapy includes services designed to promote rehabilitation and remediation of delays or disabilities in language-related symbolic behaviors, communication, language, speech, emergent literacy, or feeding and swallowing behavior.

All services must be delivered in accordance with 42 CFR 440.110 and §401.001(6) of the Texas Occupations Code.

A ST evaluation, re-evaluation, and treatment service may be performed without a physician order as allowed by Chapter 401 of the Texas Occupations Code.

ST services must be provided by one of the following:

- A licensed speech-language pathologist (SLP) who meets the requirements of 42 CFR 440.110(c) and all other applicable state and federal law
- A licensed assistant in SLP when the assistant is acting under the direction of a licensed SLP in accordance with 42 CFR 440.110
- A licensed intern when the intern is acting under the direction of a licensed SLP in accordance with 42 CFR 440.110 and all other applicable state and federal law

### 2.9.2.4 Physical Therapy, Occupational Therapy, and Speech Therapy Procedure Codes

Clients who are eligible for ongoing PT, OT, and ST through the ECI program may request additional therapy under the Early & Periodic Screening, Diagnosis, & Treatment (EPSDT) benefit of Medicaid (also known as Texas Health Steps) when medically necessary.

**Referto:** Section 5, “Children’s Therapy Services Clients birth through 20 years of age” in the *Physical Therapy, Occupational Therapy, and Speech Therapy Services Handbook (Vol. 2, Provider Handbooks)* for information about physical, occupational, and speech therapy procedure codes outside of the ECI benefit that are not defined in this section.

#### 2.9.2.4.1 Evaluation and Re-evaluation Procedure Codes

The following encounter-based evaluation and re-evaluation procedure codes for PT, OT, and ST are benefits of Texas Medicaid:

| Procedure Codes               | Description                       |
|-------------------------------|-----------------------------------|
| 97165, 97166, or 97167        | OT Evaluation                     |
| 97168                         | OT Re-evaluation                  |
| 97161, 97162, or 97163        | PT Evaluation                     |
| 97164                         | PT Re-Evaluation                  |
| 92521, 92522, 92523, or 92524 | ST Evaluation                     |
| S9152                         | ST Re-Evaluation                  |
| 92610                         | ST Evaluation swallowing function |

#### 2.9.2.4.2 Time-Based Procedure Codes

The following time-based PT and OT treatment procedure codes may be a benefit of Texas Medicaid and must be billed in 15-minute increments (units).

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 97032           | 97033 | 97034 | 97035 | 97036 | 97110 | 97112 | 97113 | 97116 | 97124 |
| 97140           | 97530 | 97535 | 97542 | 97750 | 97760 | 97761 | 97763 |       |       |

#### 2.9.2.4.3 Untimed PT and OT Procedure Codes

The following untimed PT and OT treatment procedure codes representing supervised modalities are limited to one encounter each, per date of service per discipline, must be delivered on the same day as one or more time-based codes listed above, and are subject to the CMS NCCI relationships.

| Procedure Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| 97012           | 97014 | 97016 | 97018 | 97022 | 97024 | 97026 | 97028 |

The following PT and OT group therapy code may be reimbursed as an untimed procedure code, payable per encounter, and reimbursed once per date of service per discipline.

| Procedure Codes |
|-----------------|
| 97150           |

#### 2.9.2.4.4 Encounter-Based Speech Therapy Procedure Codes

The following speech therapy individual treatment codes must be billed per encounter and are limited to once per day per provider. Only one ST treatment procedure code 92507 or 92526 may be reimbursed per date of service.

| Procedure Codes |       |
|-----------------|-------|
| 92507           | 92526 |

The following ST group treatment code may be reimbursed as an untimed procedure code, payable per encounter, and reimbursed once per date of service.

| Procedure Codes |
|-----------------|
| 92508           |

#### 2.9.2.4.5 Modifier Requirements for PT, OT, or ST Services

The following modifiers must be submitted for PT, OT, and ST treatment services. Services delivered using synchronous audiovisual technology must also be billed with modifier 95 to indicate remote delivery:

| Modifier | Description                                                                         |
|----------|-------------------------------------------------------------------------------------|
| GO       | Services delivered under an outpatient occupational therapy plan of care            |
| GP       | Services delivered under an outpatient physical therapy plan of care                |
| GN       | Services delivered under an outpatient speech therapy plan of care                  |
| UB       | Services delivered by a therapy assistant under supervision of a licensed therapist |
| U5       | Services delivered by a licensed therapist or a physician                           |

Modifier UB or U5 is required on all claims for therapy treatment procedure codes to designate whether treatment was provided by a licensed therapist or a licensed assistant.

Modifier U3 is not used by an ECI contractor for co-visits or co-treatment services.

| Modifier | Description                   |
|----------|-------------------------------|
| U3       | Not used by an ECI contractor |

#### 2.9.2.4.6 Seating Assessments

Seating assessments are reimbursed in 15-minute increments (units) and must be billed with the following procedure code:

| Procedure Codes |
|-----------------|
| 97542           |

The PT completing the assessment must submit procedure code 97542 with modifiers GP and UC in order to bill for the seating assessment.

| Modifier | Description                                                          |
|----------|----------------------------------------------------------------------|
| GP       | Services delivered under an outpatient physical therapy plan of care |
| UC       | Assessment performed by an OT or PT                                  |

The OT completing the assessment must submit procedure code 97542 with modifiers GO and UC in order to bill for the seating assessment:

| Modifier | Description                                                              |
|----------|--------------------------------------------------------------------------|
| GO       | Services delivered under an outpatient occupational therapy plan of care |
| UC       | Assessment performed by an OT or PT                                      |

#### 2.9.2.4.7 Specialized Skills Training (SST) Services

SST services are rehabilitative services to promote age-appropriate development by providing skills training to correct deficits and teach compensatory skills for deficits that directly result from medical, developmental, or other health-related conditions.

Services must include all the following:

- Be designed to create learning environments and activities that promote the client's acquisition of skills in one or more of the following developmental areas: physical or motor, communication, adaptive, cognitive, and social or emotional.
- Skills training and anticipatory guidance for family members, or other significant caregivers, to ensure effective treatment and to enhance the client's development.

SST services do not require an order from a referring provider. The ECI contractor ensures that SST services are provided by a certified early intervention specialist. SST services must be provided by an early intervention specialist who meets the criteria established in 26 TAC Part 1, Chapter 350.

SST services must be submitted with the following procedure codes and modifiers, and they must be billed in 15-minute increments:

| Procedure Code | Description        | Modifier |
|----------------|--------------------|----------|
| T1027          | Individual setting | U1       |
| T1027          | Group setting      |          |

SST services delivered using synchronous audiovisual technology must also be billed using modifier 95 to indicate remote delivery.

#### 2.9.2.4.8 Reimbursement Guidelines for PT, OT, ST, and SST

Claims may be submitted to Medicaid when the interaction is directly with the client and the client's parent(s) as defined in 20 U.S.C. §1401, or the client and the routine caregiver(s) as defined in 26 TAC, Part 1, Chapter 350.

ECI services must be billed under the ECI contractor's NPI and benefit code of EC1 as the insured's policy group when submitting claims.

**Referto:** "Section 6: Claims Filing" (*Vol. 1, General Information*) for more information about benefit codes.

Physical therapy, occupational therapy, and speech-language pathology evaluations are performed for the purposes of initial determination of need for rehabilitative services and annually to verify the child's ongoing need for rehabilitative services. To ensure there are no gaps in rehabilitative services, the annual evaluation should occur prior to the child's annual IFSP meeting.

Physical, occupational, and speech therapy evaluation and re-evaluation services are benefits through the ECI Medicaid benefit and do not require an order from a referring provider.

Physical therapy, occupational therapy, and speech-language pathology re-evaluations may be performed periodically during the child's annual enrollment in ECI services, and without a physician's order, to determine if changes to the IFSP are necessary.

Evaluations, re-evaluations, and seating assessments are not required to be listed on the IFSP Service Pages. A physical or occupational therapist may provide a seating assessment that is required to order a wheeled mobility system. A seating assessment does not require an order from a referring provider.

**Referto:** Subsection 2.2.17, "Mobility Aids" in the *Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook* (*Vol. 2, Provider Handbooks*) for information about mobility aids.

Reimbursement is available to two or more of the ECI contractor’s service providers when the client receives a combination of any Medicaid-covered service identified on the IFSP and the IFSP indicates necessity for co-visits or co-treatments (i.e., two or more services to be provided at the same time). For example, the child may receive both PT and ST at the same time. Another example, the child may receive counseling and SST at the same time.

Reimbursement is available to two or more of the ECI contractor’s service providers when they are conducting an evaluation at the same time.

When an evaluation and treatment service within the same discipline occur on the same day, only the evaluation will pay.

When a re-evaluation and treatment service within the same discipline occur the same day, only the treatment will pay.

PT, OT, and ST equipment and supplies used during therapy visits are not reimbursed separately.

Reimbursement under Medicaid benefit guidelines applies to only the services provided to ECI enrolled children by ECI contracted entities.

Reimbursement for services provided to ECI enrolled children by other Medicaid-enrolled providers (e.g., home health, CORF) is available under the Medicaid medical policies that apply to those provider types.

**2.9.2.5 Targeted Case Management (TCM)**

TCM services are provided to assist an eligible client and his or her family in gaining access to the rights and procedural safeguards under Part C of IDEA, and to needed medical, social, educational, developmental, and other appropriate services.

TCM services are performed in accordance with the ECI Medicaid benefit guidelines and 26 TAC, Part 1, Chapter 350.

TCM services do not require an order from a referring provider, but must be delivered by a qualified ECI contractor. The ECI contractor ensures that TCM services are provided by the assigned Service Coordinator who meets the criteria established in 26 TAC Part 1, Chapter 350.

TCM is provided in the natural environment (including office, home, daycare, and other community locations), outpatient, PPECC, and inpatient hospital setting.

The documentation for each TCM contact must be in accordance with 26 TAC, Part 1, Chapter 350. The place of service is the location of the service coordinator at the time of service delivery.

TCM services must be submitted with the following procedure codes and modifiers, and they must be billed in 15-minute increments:

| Procedure Code | Description              | Modifier |
|----------------|--------------------------|----------|
| T1017          | Face-to-face interaction | U1       |
| T1017          | Telephone interaction    |          |

TCM services may be delivered face-to-face or by telephone.

TCM services (procedure code T1017) may also be delivered using a synchronous telephone (audio-only) platform. TCM services delivered using a synchronous telephone (audio-only) platform are subject to the restrictions outlined in the *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)*.

TCM services delivered using synchronous audiovisual technology must also be billed using modifier 95 to indicate remote delivery.

TCM services delivered using synchronous audio-only (including telephone) technology must also be billed with modifier 93.

2.9.2.5.1 Guidelines for TCM Services

Claims may be submitted to Texas Medicaid when the interaction is directly with the client or the client’s parent(s) as defined in 20 United States Code (U.S.C.) §1401), or other routine caregiver(s) as defined in 26 TAC, Part 1, Chapter 350.

Contacts may be made with other individuals when directly related to identifying the eligible client’s needs, helping the eligible client access services, identifying needs and support to assist the eligible client in obtaining services, providing the service coordinator with useful feedback, and alerting the service coordinator to changes in the eligible client’s needs. These contacts must be documented in the client’s record, but are not submitted as claims to Medicaid if they took place outside of the presence of the client or the client’s parent or routine caregivers.

2.9.2.6 Guidelines for ECI Services Performed in a Prescribed Pediatric Extended Care Center (PPECC)

When ECI services are rendered in a PPECC, the place of service will be outpatient hospital (used for a PPECC). The PPECC’s NPI must appear on the claim, in addition to the ECI contractor’s NPI. The ECI contractor and PPECC must have a written agreement for the provision of ECI services at the PPECC. The written agreement must address responsibilities of both parties, and how the parties will coordinate related to the client’s IFSP or plan of care, which includes documentation of coordination with the PPECC. The written agreement must be maintained in the client’s record.

2.9.3 Claims Filing and Reimbursement

2.9.3.1 Claims Information

Claims for SST and TCM services that have been rendered by an ECI contractor must be submitted to TMHP in an approved electronic format or on the CMS-1500 paper claim form. Contractors may purchase CMS-1500 paper claim forms from the vendor of their choice; TMHP does not supply the forms. When completing a CMS-1500 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills or itemized statements are not accepted as claim supplements.

- Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.
- Subsection 6.1, “Claims Information” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.
- Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*) to find the instructions for completing paper claims.
- Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

2.9.3.1.1 Billing Units Based on 15 Minutes

All claims for reimbursement are based on the actual amount of billable time associated with the service. For those services for which the unit of service is 15 minutes (1 unit = 15 minutes), partial units should be rounded to the nearest quarter hour.

The following table shows the time intervals for 1 through 8 units:

| Units   | Number of Minutes           |
|---------|-----------------------------|
| 0 units | 0 minutes through 7 minutes |

| Units   | Number of Minutes               |
|---------|---------------------------------|
| 1 unit  | 8 minutes through 22 minutes    |
| 2 units | 23 minutes through 37 minutes   |
| 3 units | 38 minutes through 52 minutes   |
| 4 units | 53 minutes through 67 minutes   |
| 5 units | 68 minutes through 82 minutes   |
| 6 units | 83 minutes through 97 minutes   |
| 7 units | 98 minutes through 112 minutes  |
| 8 units | 113 minutes through 127 minutes |

#### 2.9.3.1.2 Managed Care Clients

If the child is enrolled in a Medicaid managed care organization (MCO), claims for PT, OT, and ST are submitted to the MCO.

TCM services are carved-out of Medicaid managed care and must be billed to TMHP for payment consideration.

SST services are carved-out of Medicaid managed care and claims must be billed to TMHP for payment consideration.

#### 2.9.3.2 Reimbursement

ECI therapy, SST, and TCM services are reimbursed according to a maximum allowable fee established by HHSC. See the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

- ECI therapy services are reimbursed in accordance with 1 TAC §355.8441.
- SST services are reimbursed in accordance with 1 TAC §355.8422.
- TCM services are reimbursed in accordance with 1 TAC §355.8421.

## 2.10 Health and Behavior Assessment and Intervention

### 2.10.1 Services, Benefits, and Limitations

Health and Behavior Assessment and Intervention (HBAI) services are a benefit of Texas Medicaid for persons who are 20 years of age and younger when the services are provided by a licensed practitioner of the healing arts (LPHA) who is co-located in the same office or building complex as the physician, PA, NP, or CNS who is treating the person receiving services. Co-location is defined as the provision of services in the same office or building complex in which the client's physician, PA, or APRN has their practice.

In many cases, the treating physician, PA, NP, or CNS will be the person's primary care provider; however, a specialist seeing a person regularly may function in a similar role to a primary care provider and may also make HBAI referrals to a co-located LPHA.

HBAI services are designed to identify the psychological, behavioral, emotional, cognitive and social factors important to prevention, treatment or management of physical health symptoms.

HBAI services are a benefit when the person receiving services meets the following criteria:

- The person has an underlying physical illness or injury.
- There are indications that biopsychosocial factors may be significantly affecting the treatment or medical management of an illness or an injury.
- The person is alert, oriented, and, depending on the person's age, has the capacity to understand and to respond meaningfully during the evaluation.

- The person has a documented need for psychological evaluation or intervention to successfully manage his or her physical illness, and activities of daily living.
- The assessment is not duplicative of other provider assessments.

HBAI services that include the family of the person receiving services are a benefit when the family member directly participates in the overall care of the person receiving services.

Family is defined as a responsible adult. This adult individual has agreed to accept the responsibility for providing food, shelter, clothing, education, nurturing, and supervision for the person receiving services. Responsible adults include, but are not limited to, biological parents, adoptive parents, foster parents, guardians, court-appointed managing conservators, and other family members by birth or marriage.

HBAI services may be reimbursed when billed with the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|
| 96156           | 96158 | 96159 | 96164 | 96165 | 96167 | 96168 |

These services may be rendered by physician, nurse practitioner (NP), clinical nurse specialist (CNS), physician assistant (PA), licensed professional counselor (LPC), licensed clinical social worker (LCSW), licensed marriage family therapist (LMFT), Comprehensive Care Program (CCP) LCSW, or psychologist provider in the office or outpatient setting.

LMFTs must bill with state defined modifier U8 to identify services billed.

For services that are rendered by physician, NP, CNS, or PA providers, claims must be submitted with the appropriate evaluation and management (E/M) procedure codes (99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, or 99215). The physician, NP, CNS, or PA may bill the HBAI procedure codes for an LPHA that is in the medical practice.

**Referto:** Section 9.2.60, "Physician Evaluation and Management (E/M) Services" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information.

Section 4, "Outpatient Mental Health Services" in the *Behavioral Health and Case Management Services Handbook (Vol. 2, Provider Handbooks)* for more information about delegated psychological services and the appropriate use of modifiers by psychologists and LMFTs.

HBAI services are limited to a total of three units per day, by any provider, as follows:

- The initial 30 minutes of health behavior intervention (procedure codes 96158, 96164, and 96167) is limited to one unit per day.
- Each additional 15 minutes of health behavior intervention (procedure codes 96159, 96165, and 96168) is limited to two units per day.

Procedure codes 96167 and 96168 which include the family of the person receiving services, are a benefit when the family member directly participates in the overall care of the person receiving services.

An in-person evaluation is defined as a patient evaluation conducted by a provider who is at the same physical location as the person receiving services. These services are considered acute per rolling 180 days from the initiation of services and are limited as shown in the following table:

| Procedure Codes     | Limitations                                                              |
|---------------------|--------------------------------------------------------------------------|
| 96156               | Limited to a maximum of 2 per client, per rolling 180 days, any provider |
| 96158, 96164, 96167 | Limited to a maximum of 8 per client, per rolling 180 days, any provider |

| Procedure Codes     | Limitations                                                               |
|---------------------|---------------------------------------------------------------------------|
| 96159, 96165, 96168 | Limited to a maximum of 14 per client, per rolling 180 days, any provider |

Rural Health Clinics and Federally Qualified Health Centers may be reimbursed for in-person evaluation visits based on encounter rates.

Documentation must be maintained in the person's medical record that details the change in the mental or medical status warranting reassessment of the person's capacity to understand and cooperate with the medical interventions that are necessary to the client's health and well-being.

Persons receiving services must be referred for psychiatric evaluation or psychotherapy as soon as the need is identified. Providers cannot use all 16 units if the need for psychiatric or psychological intervention is identified earlier.

After the initial HBAI assessment, if the person is receiving behavioral health services from another health-care provider, the HBAI provider should coordinate with the external behavioral health provider and establish the most appropriate course of treatment for the person.

**Referto:** Section 4, "Outpatient Mental Health Services" for more information about behavioral health services beyond the acute care limitations outlined in this section.

Subsection 3.4, "Services, Benefits, Limitations, and Prior Authorization - Inpatient Psychiatric Services" in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)*.

The initial clinical interview, reassessment, psychophysiological monitoring, observation, and intervention do not include the following:

- Conversations about educating the family or caregivers outside of the in-person evaluation sessions
- Psychotherapy

After the initial 180 days of HBAI services, the person receiving services may receive another episode of HBAI services with the same medical diagnosis if there is a newly identified behavioral health issue. The person may have two episodes of HBAI services per rolling year.

HBAI services are adjunct to other services and are to be used as a non-intensive means to identify specific needs. As appropriate, the person receiving services should be referred for those additional services that would meet the person's biopsychosocial needs.

## 2.10.2 Telemedicine and Telehealth

Providers must defer to the needs of the person receiving services, allowing the mode of service delivery to be accessible, person- and family-centered, and primarily driven by the person's choice and not provider convenience.

Providers must provide HBAI services to Medicaid eligible persons in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. In addition, providers must deliver, to include delivery by telemedicine or telehealth, HBAI services in full accordance with all applicable licensure and certification requirements.

During a Declaration of State of Disaster, the Health and Human Services Commission (HHSC) may issue direction to providers regarding the use of a telemedicine or telehealth service to include the use of a synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein to the extent permitted by Texas law. A Declaration of State of Disaster is when an executive order or proclamation is issued by the governor declaring a state of disaster in accordance with Section 418.014 of the Texas Government Code.

**Synchronous Audiovisual Technology**

HBAI services may be provided by synchronous audiovisual technology if clinically appropriate and safe, as determined by the provider, and agreed to by the person receiving services. HBAI services provided by synchronous audiovisual technology must be billed using modifier 95.

The following HBAI services may be provided by synchronous audiovisual technology:

| Procedure Codes |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|
| 96156           | 96158 | 96159 | 96164 | 96165 | 96167 | 96168 |

**Synchronous Telephone (Audio-Only) Technology**

HBAI services may be provided by synchronous telephone (audio-only) technology if clinically appropriate and safe, as determined by the provider, and agreed to by the person receiving services. Whenever possible, HHSC encourages face-to-face interaction, such as an in-person visit, as well as the use of synchronous audiovisual technology over synchronous telephone (audio-only) technology of telemedicine and telehealth services. Therefore, providers must document in the person’s medical record the reason(s) for why services were delivered by synchronous telephone (audio-only) technology. HBAI services provided by synchronous telephone (audio-only) technology must be billed using modifier FQ.

The following HBAI services may be provided by synchronous telephone (audio-only) technology:

| Procedure Codes |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|
| 96156           | 96158 | 96159 | 96164 | 96165 | 96167 | 96168 |

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telemedicine and telehealth to include informed consent, and privacy and security requirements.

**2.10.3 Documentation Requirements for Telemedicine and Telehealth**

Documentation requirements for a telemedicine or telehealth service are the same as for an in-person visit and must accurately reflect the services rendered. Documentation must identify the means of delivery when provided by telemedicine or telehealth.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telemedicine and telehealth documentation requirements including requirements for informed consent.

**2.10.4 Prior Authorization and Documentation Requirements**

Prior authorization is not required for HBAI services.

Documentation is required for HBAI services to support the medical necessity of the initial assessment, reassessment, and intervention.

For the initial assessment, documentation must support the medical necessity of the assessment and must include the following information:

- The date of initial diagnosis of physical illness
- A clear rationale for assessment
- Outcome of assessment, which includes mental status and the client’s or caregiver’s ability to understand and respond meaningfully
- Goals and expected duration of specifically recommended psychological intervention(s)

For reassessment, documentation must support the reassessment is necessary and include the following information:

- The date of change in mental or physical status
- Rationale for re-assessment with a clear indication of precipitating events.

For the intervention, documentation must support the necessity of the intervention and include the following information:

- Evidence that the person receiving services or caregiver has the capacity to understand and respond meaningfully,
- Clear outline of planned psychological intervention
- Goals of the psychological intervention identifying expected improvement in compliance with the medical treatment plan
- The client's response to the intervention
- Rationale for frequency and duration of acute care services

All documentation must include the amount of time spent in the assessment or intervention and must be documented in the client's medical record.

All services are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the services provided.

### **2.10.5 Claims Information**

Claims for HBAI services must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

**Referto:** "Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on electronic claims submissions.

"Section 6: Claims Filing" (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for instructions on completing paper claims.

### **2.10.6 Reimbursement**

Providers may refer to the OFL or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for reimbursement rates.

## **2.11 Medical Nutrition Counseling Services (CCP)**

### **2.11.1 Enrollment**

Independently practicing licensed dietitians may enroll in Texas Medicaid to provide services to CCP-eligible clients. Dietitians who provide nutrition assessments and counseling must be currently licensed by the Texas Department of Licensing and Regulation (TDLR) in accordance with the Licensed Dietitians Act, Chapter 701, Texas Occupations Code.

**Referto:** Subsection 2.1.2, "Enrollment" in this handbook for more information about CCP enrollment procedures.

### 2.11.2 Services, Benefits, and Limitations

Medical nutrition therapy (assessment, re-assessment, and intervention) and medical nutrition counseling may be beneficial for treating, preventing, or minimizing the effects of illness, injuries, or other impairments. A case manager, school counselor, or school nurse may refer a client for medical nutrition counseling services.

Medical nutrition counseling services are a benefit when all of the following criteria are met:

- The client is 20 years of age or younger
- The client is eligible for CCP
- The services are prescribed by a physician
- The services are performed by a Medicaid-enrolled licensed dietitian
- Clinical documentation supports medical necessity and medical appropriateness
- FFP is available

Medical nutrition therapy and nutrition counseling may be considered beneficial for disease states for which dietary adjustment has a therapeutic role. Such disease states include, but are not limited to, the following conditions:

- Abnormal weight gain
- Cardiovascular disease
- Diabetes or alterations in blood glucose
- Eating disorders
- Gastrointestinal disorders
- Gastrostomy or other artificial opening of gastrointestinal tract
- Hypertension
- Inherited metabolic disorders
- Kidney disease
- Lack of normal weight gain
- Multiple food allergies
- Nutritional deficiencies

Nutrition intervention for the following conditions is considered experimental and investigational and is not a benefit:

- Attention-deficit hyperactivity disorder
- Chemical sensitivities
- Chronic fatigue syndrome
- Idiopathic environmental intolerance

Medical nutrition counseling services for the diagnosis of obesity without a comorbid condition is not a benefit.

Medical nutrition therapy (procedure code 97802) is a more comprehensive service than medical nutrition counseling and is provided to individual clients for assessment and intervention. Procedure code 97802 is limited to one session per day and four units per rolling year.

Medical nutrition therapy (procedure code 97803) is provided to individual clients for a reassessment and intervention, after the initial assessment and intervention. Procedure code 97803 may be used for direct therapy sessions with clients. These sessions are limited to 1 session per day and 12 units per rolling year.

Nutrition assessments and re-assessments are in-depth evaluations of both objective and subjective data related to an individual's food and nutrient intake, lifestyle, and medical history. Nutrition assessments and re-assessments are performed as part of medical nutrition therapy. Nutrition assessments and re-assessments may be required as a result of a medical diagnosis and may be performed in conjunction with other therapies for treatment or as a goal to help clients make and maintain dietary changes. Documentation must include the following:

- Objective and subjective data obtained
- Height, weight, body mass index (BMI), and correlating percentiles on the growth curves
- Estimated caloric needs
- Nutritional diagnosis
- Intervention and plan
- Evaluation

Medical nutrition counseling (procedure code S9470) is provided to individual clients after an initial assessment and is less comprehensive than medical nutrition therapy. Nutritional counseling may be used to discuss the plan of care or intervention and to determine whether modifications are needed. Procedure code S9470 is limited to one visit per day and four visits per rolling year.

Medical nutrition group therapy (procedure code 97804) is not a benefit in the home setting, and does not include an individual nutrition assessment. Medical nutrition group therapy is limited to eight units per rolling year.

Medical nutrition group therapy may be provided to a group of clients with the same condition. While medical nutrition group therapy must be led by a Medicaid-enrolled dietitian licensed by the TDLR, other health-care providers may participate in the group sessions. The focus of the therapy is on nutrition and health for chronic conditions such as the following:

- Acquired acanthosis nigricans
- Diabetes
- Dysmetabolic syndrome X
- Eating disorder
- Hyperlipidemia
- Other specified hypoglycemia
- Pure hypercholesterolemia
- Pure hyperglyceridemia

Medical nutrition group therapy sessions must last at least 30 minutes, have a minimum of two clients and a maximum of ten clients, and must include the following:

- An age-appropriate presentation on nutrition issues related to the chronic condition. (The presentation may include information about prevention of disease exacerbation or complications and living with chronic illness. The presentation may also offer suggestions for making healthy food choices or changing ideas about food.)
- A question-and-answer period.

Client participation in medical nutrition group therapy is optional. Providers must obtain an informed consent from a client's parent or guardian before rendering services. The medical documentation maintained in a client's medical record must include the following:

- Physician prescription
- Referral, if applicable
- Location where the services were provided
- Services that were provided during medical nutrition group therapy
- Goals or objectives for the group therapy
- Client participation
- Beginning and ending time of the group therapy session

In the following table, the procedure codes in Column A will be denied as part of another service if they are submitted by any provider for the same date of service as the corresponding procedure codes in Column B:

| Column A: Procedure Codes Denied When Submitted With... | Column B: Procedure Codes |
|---------------------------------------------------------|---------------------------|
| S9470                                                   | 97802, 97803, or 97804    |

Claims for medical nutrition therapy and counseling services should be submitted as follows:

| Procedure Code              | Time Unit  | Limitation                                 |
|-----------------------------|------------|--------------------------------------------|
| 97802<br>Initial assessment | 15 minutes | 4 units per rolling year                   |
| 97803<br>Reassessment       | 15 minutes | 12 units per rolling year                  |
| 97804<br>Group              | 30 minutes | 8 units per rolling year                   |
| S9470<br>Dietitian visit    | Per visit  | 1 visit per day/ 4 visits per rolling year |

### 2.11.3 Prior Authorization and Documentation Requirements

Prior authorization is required for services that exceed the limitations for medical nutrition therapy (assessment, re-assessment, and intervention), medical nutrition group therapy, and nutrition counseling visits.

Prior authorization is also required for consideration of other health conditions that are not addressed.

The following documentation must be submitted to the CCP Prior Authorization Unit for prior authorization:

- Completed CCP Prior Authorization Request Form
- Treatment plan
- Diagnosis of a condition for which there is medical necessity for the service
- Obstacles for not meeting goals
- Interventions planned to meet goals

The prescribing physician and provider must maintain documentation of medical necessity, including the completed CCP Prior Authorization Request Form, in a client’s medical record. The physician must maintain the original signed copy of the CCP Prior Authorization Request Form. The completed CCP Prior Authorization Request Form is valid for a period of up to six months from the date of the physician’s signature.

2.11.4     **Telehealth Services**

Certain telehealth services may be provided for medical nutrition therapy and nutrition counseling services clients if clinically appropriate and safe, as determined by the provider, and agreed to by the person receiving services. Whenever possible, HHSC encourages face-to-face interactions, such as an in-person visit, as well as the use of synchronous audiovisual technology over synchronous telephone (audio-only) technology of telehealth services. Therefore, providers must document in the person’s medical record the reason(s) that services were delivered by synchronous telephone (audio-only) technology.

The following medical nutrition therapy services are authorized for telehealth delivery using synchronous audiovisual and synchronous telephone (audio-only) technologies, when noted:

| Procedure Codes |       |       |  |  |  |  |
|-----------------|-------|-------|--|--|--|--|
| 97802           | 97803 | 97804 |  |  |  |  |

The procedure codes in the table above may be delivered by synchronous telephone (audio-only) technology only during certain PHE or natural disasters.

Medical nutrition counseling services (procedure code S9470) are authorized for telehealth delivery using synchronous audiovisual and synchronous telephone (audio-only) technologies, when noted.

Medical nutrition counseling services (procedure code S9470) may be delivered by synchronous telephone (audio-only) technology only during certain PHE or natural disasters.

Services provided by synchronous audio-visual technology must be billed using modifier 95.

Services delivered using audio-only technologies must be billed using modifier 93.

Documentation requirements for a telehealth service are the same as for an in-person visit and must accurately reflect the services rendered. Documentation must identify the means of delivery when provided.

During a Declaration of State of Disaster, the Texas Health and Human Services Commission (HHSC) may issue direction to providers regarding the use of telehealth services to include the use of a synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein to the extent permitted by Texas law. A Declaration of State of Disaster is when an executive order or proclamation is issued by the governor declaring a state of disaster in accordance with Section 418.014 of the Texas Government Code.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for information on restrictions for services delivered by synchronous telephone (audio-only) technologies.

2.11.5     **Claims Information**

Providers must submit services provided by licensed dietitians in an approved electronic claims format or on a CMS-1500 paper claim form from the vendor of their choice. TMHP does not supply the forms.

Claims for services that have been prior authorized must reflect the PAN in Block 23 of the CMS-1500 paper claim form or its equivalent.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims.

[Medical Nutrition Counseling \(CCP Only\)](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for a claim form example.

### **2.11.6 Reimbursement**

Dietitian services are reimbursed in accordance with 1 TAC §355.8441.

## **2.12 Personal Care Services (PCS) (CCP)**

### **2.12.1 Enrollment**

CCP providers that want to participate in the delivery of PCS to Medicaid clients must be enrolled with TMHP and have the appropriate HHSC licensure or certification. All PCS providers must have an NPI.

Providers that are currently contracted with HHSC to administer consumer-directed services (CDS) or provide PCS through the service responsibility option (SRO), including providers currently enrolled in Texas Medicaid, are required to enroll or re-enroll separately as a CDS or SRO provider. Texas Medicaid enrolls only new providers that are currently contracted with HHSC to provide PCS through CDS and SRO.

Providers (other than those discussed above) that want to provide PCS to Medicaid clients must enroll through TMHP. Texas Medicaid enrollment rules for PCS participation require providers to have one of the following categories of HHSC licensure prior to enrollment:

- Personal Assistance Services (PAS)
- Licensed Home Health Services (LHHS)
- Licensed and Certified Home Health Services (LCHHS)

LCHH and LHH agencies that are currently enrolled through TMHP do not need to enroll as CCP-PCS providers to provide PCS. Providers must have an NPI in one of the following enrollment categories: LHHS agency, LCHHS agency, or PCS provider.

Providers that are enrolled as any entity other than an LHHS agency or LCHHS agency are required to meet the provider enrollment rules in order to participate in the delivery of PCS through Texas Medicaid.

**Referto:** Subsection 2.1.2, “Enrollment” in this handbook for more information about CCP enrollment procedures.

### **2.12.2 Services, Benefits, and Limitations**

PCS is a benefit of CCP for Texas Medicaid clients who are birth through 20 years of age. PCS may not be authorized in hospitals, nursing facilities, or intermediate care facilities for individuals with intellectual or developmental disabilities (ICF-IID). PCS will be denied when billed on the same date of service as an inpatient stay service. The provider may appeal the denied claim with documentation supporting that PCS was performed while the client was not in a hospital setting. PCS are support services provided to clients who meet the definition of medical necessity and require assistance with the performance of ADLs, instrumental activities of daily living (IADLs), and health maintenance activities

(HMAs) due to a physical, cognitive, or behavioral limitation related to a client's disability or chronic health condition. PCS are provided by someone other than the responsible adult of the client who is a minor child or the legal spouse of the client.

A responsible adult is an individual, 18 years of age or older, who has agreed to accept the responsibility for providing food, shelter, clothing, education, nurturing, and supervision for the client. Responsible adults include, but are not limited to, biological parents, adoptive parents, step parents, foster parents, legal guardians, court-appointed managing conservators, and the primary adult who is acting in the role of parent.

PCS are those services that assist eligible clients in performing ADLs, IADLs, and HMAs. The scope of ADLs, IADLs, and HMAs includes a range of activities that healthy, nondisabled adults can perform for themselves. Typically, developing children gradually and sequentially acquire the ability to perform these ADLs, IADLs, and HMAs for themselves. If a typically developing child of the same chronological age could not safely and independently perform an ADL, IADL, or HMAs without adult supervision, then the client's responsible adult ensures that the client's needs for the ADLs, IADLs, and HMAs are met.

PCS include direct intervention (assisting the client in performing a task) or indirect intervention (cueing or redirecting the client to perform a task). ADLs, IADLs, and HMAs include, but are not limited to, the following:

| ADLs                                                                                                                                                                                                                                                                                                                 | IADLs                                             |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------|
| Bathing                                                                                                                                                                                                                                                                                                              | Escort or Assistance with Transportation Services |
| Dressing                                                                                                                                                                                                                                                                                                             | Grocery or Household Shopping                     |
| Eating                                                                                                                                                                                                                                                                                                               | Laundry                                           |
| Locomotion or Mobility                                                                                                                                                                                                                                                                                               | Light housework                                   |
| Personal Hygiene                                                                                                                                                                                                                                                                                                     | Meal preparation                                  |
| Positioning                                                                                                                                                                                                                                                                                                          | Medication Assistance                             |
| Toileting                                                                                                                                                                                                                                                                                                            | Money management                                  |
| Transferring                                                                                                                                                                                                                                                                                                         | Telephone Use or Other Communication              |
| * Escort or Assistance with Transportation Services includes the coordination of transportation to medical appointments and accompaniment to appointments to assist with needed ADLs. PCS does not include the payment for transportation or transportation vehicles since these services are available through MTP. |                                                   |

**Note:** Health maintenance activities (HMAs) and nurse-delegated tasks that fall within the scope of the task listed above are allowable in PCS.

**Note:** Exercise and range of motion are not available through PCS, but are services that could be provided through PT, PDN, or home health SN.

PCS does not include the following:

- ADLs, IADLs, or HMAs that a typically developing child of the same chronological age could not safely and independently perform without adult supervision
- Services that provide direct intervention when the client has the physical, behavioral, and cognitive abilities to perform an ADL, IADL, or health-related function without adult supervision
- Services used for or intended to provide respite care, child care, or restraint of a client
- Stand-by supervision related to safety
- Potty training
- Grocery shopping for members of the client's family or household

- Cleaning for members of the client's family or household (exception: light housework is approved if the client shares a room with a person)
- Cleaning the entire house (exception: a need for clean environment is approved if related to the client's diagnosis or condition [e.g., asthma, allergies, or autoimmune deficiencies])

**Note:** *Cleaning an area or equipment that is used to complete a task may be included in the light housework IADL, as appropriate.*

- Laundry services for members of the client's family or household (exception: laundry is approved when related to the client's diagnosis or condition that results in soiled bedding or clothing for the client beyond the norm [e.g., incontinence, feeding tube, trachea, an ostomy, diapers, or skin condition])
- Waiting time for the laundry machine to complete a cycle in the home setting (exception: the time an attendant is at a laundromat completing the laundry task for the client is covered for PCS)
- Meal preparation for members of the client's family or household
- Time of a PCS attendant while acting as the responsible adult for the receipt of medical care or providing medical transportation

An escort is approved if it is related to the client's diagnosis or condition, such as using the toilet at the appointment or assistance carrying equipment (e.g., feeding pump, oxygen tank).

An escort is approved if it is related to the client's diagnosis or condition and the responsible adult is occupied during the transport. For example, a child's condition might include behaviors that create an unsafe situation for the child during transport, such as removing a seatbelt, attempting to open the car door while the car is in motion, or elopement.

PCS does cover the entire time that an attendant is away from the home performing this task.

PCS is considered for reimbursement when providers use procedure code T1019 in conjunction with the appropriate modifier listed in the following table. PCS provided by a home health agency or PCS-only provider, including PCS being provided under the SRO defined in 40 TAC Part 1, Chapter 41, must be billed in 15-minute increments. PCS provided by a financial management services agency (FMSA) under the CDS option defined in 40 TAC Part 1, Chapter 41, must submit the attendant fee in 15-minute increments. FMSAs must bill the administration fee once per calendar month per client for any month in which the client receives PCS under the CDS option and regardless of the number of PCS units of service the client receives under the CDS option during the month. PCS claims are considered for reimbursement only when TMHP has issued a valid PAN to a PCS provider.

| PCS Procedure Codes              |                                                   |
|----------------------------------|---------------------------------------------------|
| All PCS Providers* (except FMSA) |                                                   |
| Procedure Code                   | T1019                                             |
| Modifier                         | U6 (PCS each 15 minutes)                          |
|                                  | UA (Behavioral health condition, each 15 minutes) |
| FMSA Under CDS Option*           |                                                   |
| Procedure Code                   | T1019                                             |
| Modifier                         | U7 (Attendant fee each 15 minutes)                |
|                                  | U8 (Administration fee once a month)              |
|                                  | UB (Behavior health condition, each 15 minutes)   |
| * 40 TAC Part 1, Chapter 41      |                                                   |

Home health agencies and Personal Care Services (PCS) providers that provide PCS and Community First Choice (CFC) Services in the home setting may be reimbursed for nurse evaluation and supervision using procedure code G0162.

The following limitations apply for procedure code G0162:

- For a registered nurse (RN) assessment, procedure code G0162 (without modifier) is limited to three hours per day (12 to 15 minute increments) and two occurrences per rolling year for any provider.
- For training and supervision of the attendant, procedure code G0162 must be billed with modifier U1 and is limited to three hours (12 to 15 minute increments) per 30 days for any provider.

**Note:** *Training and supervision and an RN assessment may be billed on the same day.*

Prior authorization is not required for procedure code G0162.

### **2.12.2.1 Place of Service**

PCS may be provided in the following settings if medically necessary:

- The client's home
- The client's school
- The client's daycare facility
- Other community setting in which the client is located

**Note:** *For claims filing purposes, the PCS provider must bill POS 2 (home) when submitting claims to TMHP.*

Texas Medicaid does not reimburse providers for PCS that duplicate services that are the legal responsibility of school districts. The school district, through the School Health and Related Services (SHARS) program, is required to meet the client's personal care needs while the client is at school. If those needs cannot be met by SHARS or the school district, the school district must submit documentation to the Texas Department of State Health Services (DSHS) case manager indicating the school district is unable to provide all medically necessary services. When clients are receiving both PCS and PDN services from an individual person over the same span of time, the combined total number of hours for PCS and PDN are reimbursed according to the maximum allowable rate.

### **2.12.2.2 Client Eligibility**

The PCS benefit is available to Texas Medicaid clients who:

- Are birth through 20 years of age.
- Are enrolled with Texas Medicaid.
- Are eligible for CCP.
- Have physical, cognitive, or behavioral limitations related to a disability or chronic health condition that inhibits the client's ability to accomplish ADLs, IADLs, or HMAs.

Whether the client has a physical, cognitive, or behavioral limitation related to a disability or chronic health condition that inhibits the client's ability to accomplish ADLs, IADLs, or HMAs, the following needs and conditions of the responsible adult will be considered:

- The responsible adult's need to sleep, work, attend school, and meet their own medical obligations
- The responsible adult's legal obligation to care for, support, and meet the medical, educational, and psychosocial needs of other dependents
- Whether requiring the responsible adult to perform the PCS will put the client's health or safety in jeopardy

- The time periods during which the PCS tasks are required by the client, as they occur over the course of a 24-hour day and a seven-day week.
- Whether or not the need to help the family perform PCS on behalf of the client is related to a medical, cognitive, or behavioral condition that results in a level of functional ability that is below that expected of a typically developing child of the same chronological age
- Whether services are needed based on:
  - The Practitioner Statement of Need (PSON)
  - The client's personal care assessment form (PCAF)

Clients who are enrolled in a HHSC waiver program may also receive PCS if they are eligible for it, as long as the services that are provided through the waiver program and PCS are not duplicated. Clients who are enrolled in the following HHSC waiver programs may access the PCS benefits if they meet the PCS eligibility requirements:

- Community Living Assistance and Support Services (CLASS)
- Deaf/Blind Multiple Disabilities (DBMD)
- Community-Based Alternatives (CBA)
- Consolidated Waiver Program (CWP)
- Medically Dependent Children Program (MDCP)
- Texas Home Living Waiver (TxHmL)
- Home and Community Services (HCS)

**Note:** *Clients who receive HCS Residential Support Services, Supervised Living Services, or Foster/Companion Care Services are not eligible to receive attendant care services through PCS.*

Clients must choose the program through which they receive attendant care, if they meet the eligibility requirements of both programs. Clients will be given the following options for the delivery of attendant care services:

- A client can receive all attendant care services through PCS.
- A client can decline PCS and receive all attendant care service through a waiver program, if the waiver program offers attendant care.

Clients who participate in the CDS option for PCS and for a waiver program are required to choose one FMSA to provide services through both programs. FMSAs will only be permitted to file the financial management services (FMS) fee, also known as the monthly administrative fee, through one program. The FMSA must file the FMS claim through the program that provides the highest reimbursement rate.

#### 2.12.2.2.1 Accessing the PCS Benefit

Clients must be referred to DSHS before receiving the PCS benefit. A referral can be made by any person who recognizes a client may have a need for PCS, including, but not limited to, the following:

- The client, a parent, a guardian, or a responsible adult
- A primary practitioner, primary care provider, or medical home
- A licensed health professional who has a therapeutic relationship with the client and ongoing clinical knowledge of the client
- A family member
- Home health, personal assistance, or FMSA providers

Referrals to DSHS can be made to the appropriate DSHS Health Service Region, based on the client's place of residence in the state. Clients, parents, or guardians may also call the TMHP PCS Client Line at 1-888-276-0702 for more information on PCS. PCS providers must provide contact information for the client or responsible adult to DSHS or the TMHP PCS Client Contact Line when making a referral.

Upon receiving a referral, DSHS assigns the client a case manager, who then conducts an assessment in the client's home with the input and assistance of the client or responsible adult. Based on the assessment, the case manager identifies whether the client has a need for PCS. If the case manager identifies a need for PCS, the client or responsible adult is asked to select a Medicaid-enrolled PCS provider in their area.

Once a provider is selected, the DSHS case manager prior authorizes a quantity of PCS based on the assessment and requests TMHP to issue a PAN to the selected PCS provider. The PCS provider uses the PAN to submit claims to TMHP for the services provided.

#### 2.12.2.2.2 The Primary Practitioner's Role in the PCS Benefit

A client who is assessed for the PCS benefit must have a primary practitioner (a licensed physician, APRN, or PA) or a primary care provider who has personally examined the client within the last 12 months and reviewed all of the appropriate medical records. The primary practitioner or primary care provider must have established a diagnosis for the client and must provide continuing care and medical supervision of the client. Prior to authorizing PCS, HHSC requires the completion of an HHSC-approved Practitioner Statement of Need (PSON) by a primary practitioner. The PSON must be on file with HHSC prior to the initiation of PCS and will only accept the PSON from an individual who is a physician, APRN, or PA.

The PSON certifies that the client is 20 years of age or younger and has a physical, cognitive, or behavioral limitation related to a disability or chronic health condition. The primary practitioner or primary care provider must mail or fax the completed PSON to the appropriate DSHS Health Services Region. DSHS keeps the signed and dated PSON and the client's PCAF in the client's case management record for the duration of the client's participation in the benefit.

When a behavioral health condition exists, the primary practitioner may be a behavioral health provider.

If the client's medical record does not include the primary practitioner's documentation and a PSON that certifies that the client has a physical, cognitive or behavioral health condition that impacts the client's ability to perform an ADL or IADL, then PCS payments may be recouped.

**Note:** *If a client is entering or is already in the conservatorship of the state, PCS may be provisionally initiated for up to 60 days once eligibility has been established through the assessment.*

HHSC requires the reassessment of the client's need for PCS every 12 months or when requested due to a change in the client's health or living condition. A new PSON will be required at each annual reassessment and when there is a change in the client's medical condition that may increase the need for services.

#### 2.12.2.3 PCS Provided in Group Settings

PCS may be provided in a provider to client ratio other than one-to-one. Settings in which providers can provide PCS in a provider to client ratio other than one-to-one include homes with more than one client needing PCS, foster homes, and independent living arrangements.

A PCS provider may provide PCS to more than one client over the span of the day as long as:

- Each client's care is based on an individualized service plan.
- Each client's needs and service plan do not overlap with another client's needs and service plan.

**Example:** *If the prior authorized PCS hours for Client A is four hours, Client B is six hours, and the actual time spent with both clients is eight hours, the provider must bill for the actual one-on-one time spent with each client, not to exceed the client's prior authorized hours*

*or total hours worked. It would be acceptable to bill four hours for Client A and four hours for Client B, or three hours for Client A and five hours for Client B. It would not be acceptable to bill five hours for Client A and three hours for Client B. It would be acceptable to bill ten hours if the individual person actually spent ten hours onsite providing prior authorized PCS split as four hours for Client A and six hours for Client B. A total of ten hours cannot be billed if the individual person worked only eight hours.*

- PCS may be delivered in a client-to-provider ratio other than one-on-one as long as each client's care is based on an individualized POC and each client's needs are being met. Only the time spent on authorized PCS tasks for each client is eligible for reimbursement. Total PCS billed for all clients cannot exceed an individual attendant's total number of hours at the place of service.

When there is more than one client within the same household receiving PCS, the DSHS case manager will synchronize authorizations within the households for all eligible clients. The DSHS case manager will assess all eligible clients in the home and submit authorizations for all eligible clients in the household for the same authorization period. DSHS case managers will communicate with the provider the actions that are being taken using the existing Communication Tool.

**Note:** *There should be no lapse in services to the client.*

### **2.12.3 Prior Authorization and Documentation Requirements**

Prior authorization is required before services are provided. All PCS must be prior authorized by a DSHS case manager based upon client need, as determined by the client assessment. DSHS prior authorizes PCS for eligible clients. The DSHS case manager notifies TMHP of the authorized quantity of PCS. TMHP sends a notification letter with the PAN to the client or responsible adult and the selected PCS provider if PCS is approved or modified. Only the client or responsible adult receives a notification letter with an explanation of denied services. PCS is prior authorized for periods of up to twelve months. PCS providers must provide services from the start of care date agreed to by the client or responsible adult, the case manager, and the PCS provider.

PCS may be authorized in the same day as PPECC, if medically necessary. However, they must be rendered in a home setting, before or after PPECC services.

A PCS provider may obtain prior authorization to provide enhanced PCS to clients with a behavioral health condition when the following criteria are met:

- The DSHS case manager completes the Personal Care Assessment Form (PCAF) and identifies the behavioral health condition.
- The PCAF indicates that the identified behavioral health condition impacts the client's ability to perform an ADL or IADL.
- The PCAF indicates which ADL(s) or IADL(s) cannot be performed by the client without assistance.
- The DSHS case manager submits the appropriate modifier on the authorization request.

When a client experiences a change in condition, the client or responsible adult must notify the DSHS Health Service Office in the client's region. A new assessment is required when a client's physician orders services in a PPECC. A DSHS case manager must perform a new assessment and prior authorize any revisions in the quantity of PCS based on the new assessment. TMHP issues a revised authorization and notifications are sent to the client or responsible adult and the selected PCS provider. If the change is made during a current prior authorization period, the new prior authorization will maintain the same end date as the original prior authorization period. The revised authorization period will begin on the SOC date stated in the new assessment.

For continuing and ongoing PCS needs beyond the initial prior authorization period of up to twelve months, a DSHS case manager must conduct a new assessment and submit a new authorization request to TMHP. TMHP sends a notification letter updating the prior authorization to the client, responsible adults, and the selected PCS provider.

HHSC or its designee may suspend an authorization for PCS when either:

- The client or the client's family creates an unsafe environment for the attendant's health and safety.
- The provider requests suspension for the reasons outlined in 40 TAC Part 1, Chapter 41.

Providers can call a toll-free PCS Provider Inquiry Line at 1-888-648-1517 for assistance with inquiries about the status of a PCS prior authorization. Providers should direct inquiries about other Medicaid services to the TMHP Contact Center at 1-800-925-9126. PCS providers should encourage the client or responsible adult to contact the appropriate DSHS Health Service Region with inquiries or concerns about the PCS assessment.

**Note:** *Any organization that employs attendants who provide PCS, and any organization serving as an FMSA, must comply with all documentation requirements as specified by the PCS program.*

### **2.12.3.1 PCS Provider Responsibilities**

PCS providers must comply with all applicable federal, state, and local laws and regulations.

All PCS providers must maintain written policies and procedures for obtaining consent for medical treatment in the absence of the responsible adult. The procedure and policy must meet the standards of the Texas Family Code, Chapter 32.

Providers must accept clients only when there is a reasonable expectation and evidence that the client's needs can be adequately met in the POS. The POS must be able to support the client's health and safety needs and adequately support the use, maintenance, and cleaning of all required medical devices, equipment, and supplies. Necessary primary and backup utility, communication, and fire safety systems must be available in the POS.

The PCS provider is responsible for the supervision of the PCS attendant as required by the PCS provider's licensure requirements.

### **2.12.3.2 Documentation of Services Provided and Retrospective Review**

Documentation elements are routinely assessed for compliance in retrospective review of client records, including the following:

- All entries are legible to people other than the author, dated (month, day, year, time), and signed by the author.
- Each page of the record documents the client's name and Medicaid identification number.
- All attendants' arrival and departure times are documented with signature and time.
- Documentation of services correlates with, and reflects medical necessity for, the services provided on any given day.
- Client's arrival or departure from the home setting is documented with the time of arrival, departure, mode of transportation, and who accompanied the client.

### **2.12.4 Coordination with PPECC Provider**

When a DSHS case manager is notified by the client, client's responsible adult, or client's physician that PPECC services have been initiated, revised, or recertified, the DSHS case manager must conduct a PCS reassessment, and submit all documentation required for a revision, modification, or denial of the

original PCS authorization request, including a Physician's Statement of Need if there is a change in client condition. The new authorization request must be submitted within ten (10) business days of notification.

DSHS case managers must provide documentation to support medical necessity if PCS service hours do not decrease when PPECC services are initiated.

DSHS case managers must also document coordination with the PPECC provider, maintaining documentation that the client or the client's responsible adult has participated in the development of the plan of care.

When a client receives both PCS and PPECC in a single day, and decides to receive fewer hours of service in a PPECC (i.e., shifts more services to the home setting), or terminates PPECC services, the PCS case manager must conduct a reassessment, and submit all documentation required for a revision, modification, or denial of the original PCS authorization request, including a Physician's Statement of Need if there is a change in condition within ten (10) business days of notification by the client, client's responsible adult, or client's physician.

Similarly, if the client decides to receive fewer hours of PCS services in the home, and increase PPECC hours, the DSHS case manager must conduct a reassessment, and submit all documentation required for an modification of the authorization request, within ten (10) business days of notification by the client, client's responsible adult, or client's physician.

**Note:** *Coordination requirements may be different in a Medicaid managed care environment.*

PCS services rendered in a client's home may be billed before or after PPECC services on the same day, but not at the same time as PPECC services. PCS services required while a client is in a PPECC are considered part of the PPECC billable rate.

## **2.12.5 Claims Information**

TMHP processes PCS claims. PCS providers must submit claims for services in an approved electronic claims format or on the appropriate claim form based on their provider type. PCS providers, other than home health agencies, that are enrolled as PAS-only providers, FMSAs, or SRO providers must file PCS claims using a CMS-1500 paper claim form. Home health agencies, including those enrolled as an FMSA, or an SRO provider, must file PCS claims using the UB-04 CMS-1450 paper claim form. TMHP does not supply the forms.

Home health agencies and consumer-directed agencies that bill for PCS using procedure code T1019 must include the prior authorization number on claims submitted for reimbursement. Additionally, providers utilizing paper, TexMedConnect, or billing through EDI must include the prior authorization number with all claims submissions.

### **2.12.5.1 Managed Care Clients**

PCS services are carved-out of the Medicaid Managed Care Program for State of Texas Access Reform (STAR) clients and must be billed to TMHP for payment consideration. Carved-out services are those that are rendered to Medicaid Managed Care clients but are administered by TMHP and not the client's MCO. Claims for STAR Health, STAR Kids, and STAR+PLUS are not carved out and must be submitted to the client's MCO for payment consideration.

### **2.12.5.2 PCS for STAR Health Clients**

PCS for eligible STAR Health clients are authorized and processed by Superior HealthPlan.

Medicaid providers that want to provide PCS services to clients in the STAR Health program should contact Superior HealthPlan for information regarding the contracting and credentialing process at:

Superior HealthPlan - Network Development  
Telephone: 1-866-615-9399 Ext. 22534  
Email: shp-networkdevelopment@centene.com

### 2.12.6 Reimbursement

Providers of PCS are reimbursed in accordance with 1 TAC §355.8441.

## 2.13 Community First Choice (CFC) Services

### 2.13.1 Enrollment

CFC providers, including providers offering the Service Responsibility Option (SRO), must be licensed and enrolled in Texas Medicaid and comply with all applicable federal, state, and local laws and regulations. When CFC is provided through the Consumer Directed Services (CDS) option by a Financial Management Services Agency (FMSA), the FMSA must be certified and enrolled in Texas Medicaid as a FMSA and must comply with all applicable federal, state, and local laws and regulations.

**Note:** CDS, FMSA, and SRO are defined in the Title 40 Texas Administrative Code (TAC), Part 1, Chapter 41. Licensure requirements for FMSA and SRO providers are defined in the Title 40 TAC, Part 1, Chapter 49.

**Note:** Any organization that employs attendants who provide CFC, and any organization serving as an FMSA, must comply with all documentation requirements as specified in CFC program policy.

All CFC providers must maintain written policies and procedures for obtaining consent for medical treatment for clients in the absence of a responsible adult that meet the standards of the Texas Family Code, Chapter 32.

Providers must only accept clients when there is a reasonable expectation and evidence that the client's CFC needs can be adequately met in the place of service.

The CFC provider is responsible for supervising the CFC attendant in accordance with the provider's licensure requirements.

**Note:** For CFC services delivered through a HHSC 1915(c) waiver or through a managed care organization (MCO), providers must refer to HHSC or the MCO for information about benefits, limitations, prior authorization, reimbursement, and specific claim processing procedures.

### 2.13.2 Services, Benefits, and Limitations

CFC services may be rendered by a Home Health Agency, PCS-only provider, Financial Management Services Agency (FMSA) under the CDS option, or by a Service Responsibility Option (SRO) Provider.

CFC is a benefit for Texas Medicaid fee-for-service clients who are birth through 20 years of age and who are:

- Eligible for medical assistance under the state plan
- Need help with activities of daily living; and
- Need an institutional level of care (to include hospital, nursing facility, intermediate care facility for clients with intellectual disabilities or institution of mental disease)

Services included are CFC personal assistance services, CFC habilitation, and CFC support management. CFC personal assistance services is the assistance with activities of daily living (ADLs) and instrumental activities of daily living (IADLs) through hands-on assistance, supervision, and/or cueing. CFC habilitation services are the acquisition, maintenance, and enhancement of skills necessary for the client to accomplish ADLs, IADLs, and health maintenance activities (HMAs). CFC support management is voluntary training on how to select, manage, and dismiss attendants.

CFC includes assistance with ADLs, IADLs and HMAs through hands-on assistance, supervision, or cueing. CFC also includes training on the acquisition, maintenance, and enhancement of skills necessary for the client to accomplish ADLs, IADLs, and HMAs.

ADLs are activities that include:

- Bathing—Assisting the client with any or all parts of bathing; selecting appropriate water temperature and flow speed, turning water on and off; laying out and putting away supplies; transferring in and out of bathtub or shower; washing and drying hair and body; clean up after task is completed.
- Dressing—Assisting the client with any or all parts of getting dressed; putting on, fastening, and taking off all items of clothing; donning and removing shoes or prostheses; choosing and laying out weather-appropriate clothing.
- Eating—Assisting the client with some or all parts of eating and drinking; feeding the client; assistance with utensils or special or adaptive eating devices; clean up after task is completed.
- Personal hygiene: Assisting the client with some or all parts of personal hygiene; routine hair care; oral care; ear care; shaving; applying makeup; managing feminine hygiene; washing and drying face, hands, perineum; basic nail care; applying deodorant; routine skin care; clean up after task is completed.
- Toileting—Assisting the client with some or all parts of toileting; using commode, bedpan, urinal, toilet chair; transferring on and off; cleansing; changing diapers, pad, incontinence supplies; adjusting clothing; clean up after task is completed.
- Locomotion or mobility—Assisting the client with moving between locations; assisting the client with walking or using wheelchair, walker, or other mobility equipment.
- Positioning—Assisting the client with positioning their body while in a chair, bed, or other piece of furniture or equipment; changing and adjusting positions; moving to or from a sitting position; turning side-to-side; assisting the client to sit upright.
- Transferring—Assisting the client with moving from one surface to another with or without a sliding board; moving from bed, chair, wheelchair, or vehicle to a new surface; moving to or from a standing or sitting position; moving the client with lift devices.

IADLs are activities that include:

- Telephone use or other communication—Assisting the client in making or receiving telephone calls; managing and setting up communication devices; making and receiving the call for the client.
- Grocery or household shopping—Shopping for or assisting clients in shopping for grocery and household items; preparing a shopping list; putting food and household items away; picking up medication and supplies.
- Light housework—Performing or assisting the client in performing light housework such as: Cleaning and putting away dishes; wiping countertops; dusting; sweeping, vacuuming or mopping; changing linens and making bed; cleaning bathroom; taking out trash.
- Laundry—Assisting the client with doing laundry; gathering, sorting, washing, drying, folding, and putting away personal laundry, bedding, and towels; removing bedding to be washed and remaking the bed; using a laundry facility.
- Meal preparation—Assisting clients in preparing meals and snacks; cooking; assembling ingredients; cutting, chopping, grinding, or pureeing food; setting out food and utensils; serving food; preparing and pouring a predetermined amount of liquid nutrition; cleaning the feeding tube; cleaning area after meal; washing dishes.
- Money management—Assisting the client with managing their day-to-day finances; paying bills; balancing checkbook; making deposits or withdrawals; assisting in preparing and adhering to a budget.

- Medication assistance or administration—Assisting the client with oral medications that are normally self-administered, including administration through a permanently placed feeding tube with irrigation.
- Escort or assistance with transportation services—Assisting the client in making transportation arrangements for medical and other appointments; accompanying the client to a health care appointment to assist with needed ADLs.

HMA's include tasks that may be exempt from delegation based on the Registered Nurse (RN) assessment that enables the client to remain in an independent living environment and go beyond ADLs because of the higher skill level in which they are required to perform. HMA's will be limited to those within the scope of CFC that include:

- Administering oral medications that are normally self-administered, including administration through a permanently placed feeding tube with irrigation.
- Topically applied medications.
- Insulin or other injectable medications prescribed in the treatment of diabetes mellitus administered subcutaneously, nasally, or via an insulin pump.
- Unit dose medication administration by way of metered dose inhaler (MDIs) including medications administered as nebulizer treatments for prophylaxis or maintenance.
- Routine administration of a prescribed dose of oxygen.
- Noninvasive ventilation (NIV) such as continuous positive airway pressure (CPAP) and bi-level positive airway pressure (BiPAP) therapy.
- The administering of a bowel and bladder program, including suppositories, enemas, manual evacuation, intermittent catheterization, digital stimulation associated with a bowel program, tasks related to external stoma care including but not limited to pouch changes, measuring intake and output, and skin care surrounding the stoma area.
- Routine preventive skin care and care of Stage 1 pressure ulcers.
- Feeding and irrigation through a permanently placed feeding tube inserted in a surgically created orifice or stoma.
- Those tasks that an RN may reasonably conclude as safe to exempt from delegation based on an assessment consistent with 22 Texas Administrative Code (TAC) §225.6 of this title (relating to the RN Assessment of the client).
- Reporting as to the client's condition, including changes to the client's condition or needs and completing appropriate record.
- Skin care: Maintenance of the hygienic state of the client's skin under optimal conditions of cleanliness and comfort.
- Use of durable medical equipment (DME).
- Such other tasks as the Board of Nursing may designate.

Whether the client has a physical, cognitive, or behavioral limitation related to a disability or chronic health condition that inhibits the client's ability to accomplish ADLs, IADLs, or HMA's, the following needs and conditions of the responsible adult will be considered in the determination of hours for CFC personal assistance services:

- The responsible adult's need to sleep, work, attend school, and meet their own medical obligations
- The responsible adult's legal obligation to care for, support, and meet the medical, educational, and psychosocial needs of other dependents

- Whether requiring the responsible adult to perform the CFC personal assistance services will put the client's health or safety in jeopardy
- The time periods during which the CFC personal assistance services tasks are required by the client, as they occur over the course of a 24-hour day and a seven-day week.
- Whether or not the need to help the family perform CFC personal assistance services on behalf of the client is related to a medical, cognitive, or behavioral condition that results in a level of functional ability that is below that expected of a typically developing child of the same chronological age

CFC also includes training on the acquisition, maintenance, and enhancement of the following additional habilitation needs:

- Community integration—Client may need assistance finding, participating in and accessing community activities or community services such as free meal programs, churches, parks or self-advocacy training or events.
- Use of adaptive equipment—Client may need assistance operating, learning to use, or accessing adaptive equipment.
- Personal decision-making—Client may need assistance making decisions for him or herself, including assistance in assessing what is important to that client, pros and cons, as well as consequences.
- Reduce challenging behaviors to allow clients to accomplish ADLs, IADLs, and HMAs—Client may need assistance in increasing positive social encounters and engagement in preferred activities. Client may have challenging behaviors that can be reduced through behavior support plans, prompting, rewards, or redirection among others.
- Socialization/relationship development—Client may need assistance with development and maintenance of relationships or appropriate social behaviors.
- Accessing leisure and recreational activities—Client may need assistance identifying, finding, or accessing activities they would like to participate in during leisure time.

CFC does not include the following:

- Direct intervention to perform a task the client has the physical, behavioral, and cognitive abilities to perform;
- Skilled nursing services, or the supervision of delegated nursing tasks as described in the Texas Nurse Practice Act, the Act's implementing regulations, the Texas Medicaid Provider Procedures Manual sections for Private Duty Nursing (PDN) Services - THSteps - Comprehensive Care Program (CCP) and Home Health Skilled Nursing and Home Health Aide Services;
- Costs associated with purchasing products for ADLs or IADLs;
- Services used for or intended to provide respite care, child care, or restraint of a client;
- Duplication of services provided by another program;
- Tasks that a typically developing child of the same chronological age could not safely and independently perform without adult supervision;
- Services provided in an institutional setting including hospitals, nursing facilities, psychiatric hospitals, or intermediate care facilities for clients with intellectual or developmental disabilities.

CFC is considered for reimbursement when billed with procedure code T1019 in conjunction with the appropriate modifier listed in the following table. CFC provided by a home health agency or PCS-only provider, including CFC being provided under the SRO defined in 40 TAC Part 1, Chapter 41, must be billed in 15-minute increments. CFC provided by a FMSA under the CDS option defined in 40 TAC Part 1, Chapter 41, must submit the attendant fee in 15-minute increments.

| CFC Procedure Codes             |                                                                                                                                                                   |
|---------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| All CFC Providers (except FMSA) |                                                                                                                                                                   |
| Procedure Code                  | T1019                                                                                                                                                             |
| Modifier                        | UD (CFC —client needs attendant care only, each 15 minutes)                                                                                                       |
|                                 | U9 (CFC—client needs habilitation only, or attendant and habilitation, each 15 minutes)                                                                           |
| Procedure Code                  | T1019                                                                                                                                                             |
| Modifier                        | U3 (CFC attendant care for PCS - CDS Option, each 15 minutes)<br><b>Note:</b> This modifier will be used for individuals receiving attendant care only.           |
|                                 | U4 (CFC Habilitation for PCS - CDS Option, each 15 minutes)<br><b>Note:</b> This modifier will be used for individuals receiving attendant care and habilitation. |
|                                 | U5 (CFC CDS, per month)<br><b>Note:</b> This modifier is used for the administrative fee for CFC provider under the CDS option.                                   |

FMSAs must bill the administration fee once per calendar month per client for any month in which the client receives CFC under the CDS option and regardless of the number of CFC units of service the client receives under the CDS option during the month. CFC claims are considered for reimbursement only when TMHP has issued a valid PAN to a CFC provider.

Home health agencies and Personal Care Services (PCS) providers that provide PCS and Community First Choice (CFC) Services in the home setting may be reimbursed for nurse evaluation and supervision using procedure code G0162.

The following limitations apply for procedure code G0162:

- For a registered nurse (RN) assessment, procedure code G0162 (without modifier) is limited to three hours per day (12 to 15 minute increments) and two occurrences per rolling year for any provider.
- For training and supervision of the attendant, procedure code G0162 must be billed with modifier U1 and is limited to three hours (12 to 15 minute increments) per 30 days for any provider.

**Note:** Training and supervision and an RN assessment may be billed on the same day.

Prior authorization is not required for procedure code G0162.

### 2.13.2.1 Place of Service

CFC may be provided in the following settings:

- Client's home;
- Client's school;

- Client's daycare facility; or
- Other community setting in which the client is located.

**Note:** For claims filing purposes, the CFC provider must bill POS 2 (home) when submitting claims to TMHP.

Texas Medicaid does not reimburse providers for CFC services that duplicate services that are the legal responsibility of school districts. The school district, through the School Health and Related Services (SHARS) program, is required to meet the client's personal care needs while the client is at school. If those needs cannot be met by SHARS or the school district, the school district must submit documentation to the DSHS case manager indicating the school district is unable to provide all medically necessary services.

### 2.13.3 CFC Attendant and Habilitation Services in Group Settings

CFC may be provided in a provider to client ratio other than one-to-one. Settings in which providers can provide CFC in a provider to client ratio other than one-to-one include homes with more than one client needing CFC, foster homes, and independent living arrangements. A CFC provider may provide CFC to more than one client over the span of the day as long as:

- Each client's care is based on an individualized service plan.
- Each client's needs and service plan do not overlap with another client's needs and service plan.
- Only the time spent on authorized CFC tasks for each client is eligible for reimbursement. Total CFC billed for all clients cannot exceed an individual attendant's total number of hours at the place of service.

When there is more than one client within the same household receiving CFC, the Department of State Health Services (DSHS) case manager will synchronize authorizations within the households for all eligible clients. The DSHS case manager will assess all eligible clients in the home and submit authorizations for all eligible clients in the household for the same authorization period. DSHS case managers will communicate with the provider the actions that are being taken using the existing Communication Tool.

### 2.13.4 Prior Authorization

Prior authorization is required before services are provided. All CFC must be prior authorized by a DSHS case manager based upon client need, as determined by the client assessment. DSHS prior authorizes CFC for eligible clients. The DSHS case manager notifies TMHP of the authorized quantity of CFC. TMHP sends a notification letter with the prior authorization number (PAN) to the client or responsible adult and the selected CFC provider if CFC is approved or modified. Only the client or responsible adult receives a notification letter with an explanation of denied services. CFC is prior authorized for periods of up to twelve months. CFC providers must provide services from the start of care date agreed to by the client or responsible adult, the case manager, and the CFC provider.

When DSHS has approved CFC services, DSHS will send the client's selected CFC provider: A CFC Communication tool, specifying the approved hours and CFC tasks and a copy of the Personal Care Assessment Form (PCAF) CFC Addendum, which documents that client's goals and preferences for the delivery of CFC services. The CFC provider may receive a Practitioner's Statement of Need (PSON) for the client, but this form is not required documentation for CFC and is intended merely for informational purposes.

When a client experiences a change in condition, the client or responsible adult must notify the DSHS Health Service Office in the client's region. A DSHS case manager must perform a new assessment and prior authorize any revisions in the quantity of CFC based on the new assessment. TMHP issues a revised authorization and notifications are sent to the client or responsible adult and the selected CFC provider. If the change is made during a current prior authorization period, the new prior authorization will maintain the same end date as the original prior authorization period. The revised authorization period will begin on the start of care date stated in the new assessment.

For ongoing CFC needs beyond the initial prior authorization period of up to twelve months, a DSHS case manager must conduct a new assessment and submit a new authorization request to TMHP. A new in-home assessment must be conducted every twelve months with the client. TMHP will send a notification letter updating the prior authorization to the client, responsible adults, and the selected CFC provider. HHSC or its designee may suspend an authorization for CFC when either:

- The client or the client's family creates an unsafe environment for the attendant's health and safety; or
- The provider requests suspension for the reasons outlined in 40 TAC Part 1, Chapter 41.

Providers can call a toll-free Provider Inquiry Line at 1-888-648-1517 for assistance with inquiries about the status of a CFC prior authorization. Providers should direct inquiries about other Medicaid services to the TMHP Contact Center at 1-800-925-9126. CFC providers should encourage the client or responsible adult to contact the appropriate DSHS Health Service Region with inquiries or concerns about the CFC assessment.

#### **2.13.4.1 CFC Provider Responsibilities**

CFC providers must comply with all applicable federal, state, and local laws and regulations. All CFC providers must maintain written policies and procedures for obtaining consent for medical treatment in the absence of the responsible adult. The procedure and policy must meet the standards of the Texas Family Code, Chapter 32. Providers must accept clients only when there is a reasonable expectation and evidence that the client's needs may be adequately met in the place of service (POS). The POS must be able to support the client's health and safety needs and adequately support the use, maintenance, and cleaning of all required medical devices, equipment, and supplies. Necessary primary and backup utility, communication, and fire safety systems must be available in the POS. The CFC provider is responsible for the supervision of the CFC attendant as required by the CFC provider's licensure requirements.

#### **2.13.4.2 Documentation Requirements**

Documentation elements are routinely assessed for compliance in retrospective review of client records, including the following:

- All entries are legible to people other than the author, dated (month, day, year, time), and signed by the author.
- Each page of the record documents the client's name and Medicaid identification number.
- All attendants' arrival and departure times are documented with signature and time.
- Documentation of services correlates with, and reflects medical necessity for, the services provided on any given day.
- Client's arrival or departure from the home setting is documented with the time of arrival, departure, mode of transportation, and who accompanied the client.

#### **2.13.5 Claims Information**

TMHP processes CFC claims. CFC providers must submit claims for services in an approved electronic claims format or on the appropriate claim form based on their provider type. CFC providers, other than home health agencies, that are enrolled as PAS-only providers, FMSAs, or SRO providers must file CFC claims using a CMS-1500 paper claim form. Home health agencies, including those enrolled as an FMSA, or an SRO provider, must file PCS claims using the UB-04 CMS-1450 paper claim form.

TMHP does not supply the forms. Home health agencies and consumer-directed agencies that bill for CFC using procedure code T1019 must include the prior authorization number on claims submitted for reimbursement. Additionally, providers utilizing paper, TexMedConnect, or billing through EDI must include the prior authorization number with all claims submissions.

### 2.13.5.1 Managed Care Clients

CFC services are carved-out of the Medicaid Managed Care Program for State of Texas Access Reform (STAR) clients and must be billed to TMHP for payment consideration. Carved-out services are those that are rendered to Medicaid Managed Care clients but are administered by TMHP and not the client's MCO. Claims for STAR Health and STAR+PLUS are not carved out and must be submitted to the client's MCO for payment consideration.

## 2.14 Private Duty Nursing (PDN)(CCP)

**Referto:** *The Home Health Nursing and Private Duty Nursing Services Handbook (Vol. 2, Provider Handbooks)* for information about private duty nursing (PDN) (CCP) services.

## 2.15 Prescribed Pediatric Extended Care Centers (PPECC) (CCP)

PPECC services may be a benefit of the Texas Health Steps (THSteps) Comprehensive Care Program (CCP) for Medicaid clients who are:

- 20 years of age and younger;
- THSteps - CCP eligible;
- Medically or technologically dependent;

**Note:** *The term “medically dependent or technologically dependent client” does not include a minor or occasional medical condition that does not require continuous nursing care, including asthma or diabetes, or a condition that requires an epinephrine injection.*

- Have an acute or chronic condition;
- Require ongoing skilled nursing care beyond the level of skilled nursing visits normally authorized under Texas Medicaid Home Health Skilled Nursing (HHSN) and Home Health Aide (HHA) services;
- Meet the medical necessity criteria for admission to a PPECC detailed in the “Prior Authorization and Documentation Requirements” section, and have a physician's order prescribing PPECC services; and
- Have chosen to receive PPECC services.

A PPECC does not provide emergency services. PPECCs must follow the safety provisions in state PPECC licensure requirements, including the adoption and enforcement of policies and procedures for a client's medical emergency. PPECCs must call for emergency transport to the nearest hospital when emergency services are needed by a PPECC client.

### 2.15.1 Services, Benefits, and Limitations

PPECC services are provided in a non-residential facility licensed by HHSC. PPECCs serve four or more medically dependent or technologically dependent clients who are 20 years of age or younger and who require ongoing skilled nursing prescribed by the client's physician to avert death or further disability or require the routine use of a medical device to compensate for a deficit in life-sustaining body function.

Services must be included in a PPECC plan of care (POC) and are limited to no more than 12 hours in a 24-hour period. PPECC services may not be provided overnight. PPECC services are intended as an alternative to private duty nursing (PDN). Clients who are eligible to receive PDN services may also receive PPECC services. A client may choose to receive all authorized PPECC and PDN service hours through PPECC services only, PDN services only, or a combination of both PPECC and PDN services. If a client chooses to receive both PPECC and PDN services, the client must not receive service hours in addition to what was initially authorized for PPECC and PDN unless additional hours are medically necessary.

PPECCs must comply with:

- Medicaid program rules, as well as PPECC licensing statute and rules;
- Mandatory reporting of suspected abuse and neglect of children;
- Texas Medicaid provider participation requirements; and
- The requirements of the TMPPM.

Clients who receive PPECC services through THSteps-CCP require ongoing medical supervision by the ordering physician who has a therapeutic relationship with and ongoing clinical knowledge of the client. An in-person evaluation must be performed each year by the ordering physician for each client. A physician order is required for each authorization period including initial, revisions, and recertification. A physician in a relationship with a PPECC (employed by or contracted with a PPECC) cannot provide the physician's order, unless the physician is the client's treating physician and has examined the client outside of the PPECC setting.

The following services may be rendered at a PPECC, but are not considered part of the PPECC services covered by Texas Medicaid, and must be billed separately by Medicaid-enrolled service providers:

- Speech, physical, and occupational therapies
- Certified respiratory care practitioner services
- Early intervention services provided through the Early Childhood Intervention (ECI) program, which are subject to ECI policies.

When the client's POC indicates that therapy services are required while the client is at the PPECC, clients must be provided a choice in speech, occupational, and physical therapy providers, as well as certified respiratory care providers. PPECC providers must coordinate care with the therapy providers to ensure the client receives therapy services as required in the PPECC setting.

Clients from birth through 36 months of age must be given the option of receiving ECI services in addition to their PPECC services. The PPECC providers must coordinate care with the client's ECI service coordinator.

ECI services rendered in a PPECC are provided by entities that are contracted with the state to provide early intervention services.

When therapy services (occupational, speech, and/or physical therapy), or certified respiratory care services are rendered in a PPECC, they may be provided by:

- Medicaid-enrolled providers contracted with or employed by the PPECC or Medicaid-enrolled providers not employed by or contracted with the PPECC.
- Independent therapists
- Home health therapists
- Certified respiratory care providers

**Referto:** The *Physical Therapy, Occupational Therapy, and Speech Therapy Services Handbook* (Vol. 2, *Provider Handbooks*) for additional information about CCP therapy services.

The *Certified Respiratory Care Practitioner (CRCP) Services Handbook* (Vol. 2, *Provider Handbooks*) for information about CRCP (CCP) services.

An admission authorized under this section is not intended to supplant the right of a client to access PDN, personal care services (PCS), HHSN, HHA, and therapies (physical, occupational, and speech), as well as certified respiratory care practitioner services and ECI services rendered in the client's residence when medically necessary.

PPECC providers must collaborate and coordinate care with the client's existing service providers, including physicians, therapists, certified respiratory care practitioners, and home health agencies rendering services such as PDN and/or HHSN, HHA services, PCS, hospice, and other providers who render medically necessary services. The PPECC must ensure the provision of the following basic services:

- The development, implementation, and monitoring of a comprehensive POC in collaboration with the client or the client's responsible adult that addresses the client's medical, nursing, psychosocial, therapeutic, and developmental services, including the following prescribed services:
  - Skilled nursing
  - PCS to assist with activities of daily living or instrumental activities of daily living while in the PPECC
  - Functional developmental services
  - Nutritional and dietary services, including nutritional counseling

**Note:** *Nutritional services must comply with standards in HHSC licensure rules related to nutritional counseling and dietary services.*

- Occupational, physical and speech therapy
- Respiratory care
- Psychosocial services
- Physician's oversight of services
- The POC must also include the following, as applicable:
  - Training for the client's responsible adult associated with caring for a medically or technologically dependent client.
  - Specification whether the client is stable to receive transportation services provided by the PPECC as determined by the client's ordering physician.
  - If the client's ordering physician determines the client is stable, the client's ordering physician, in collaboration with the PPECC, must specify the type of provider—registered nurse (RN), licensed vocational nurse (LVN) or direct care staff—who must be on board the PPECC transport vehicle to assist the client during transportation to and from the PPECC.
    - Transportation must be provided by a PPECC when the client's ordering physician has determined that the client is stable, and the client or the client's responsible adult wants the client to receive transportation services to and from the PPECC.
    - When a PPECC provides transportation to a PPECC client, an RN, LVN, or direct care staff employed by the PPECC must be on board the transport vehicle as determined by the client's ordering physician, in collaboration with the PPECC.
    - The client does not need to be accompanied by the client's responsible adult when a PPECC provides transportation.
    - When a client's ordering physician has determined a client is stable to receive PPECC transportation and the client or the client's responsible adult wants the client to receive transportation services, the client must be able to utilize transportation services offered by the PPECC with the assistance of a PPECC nurse or direct care staff to and from the PPECC, rather than a non-emergency ambulance.

- A non-emergency ambulance may not be utilized for transport to and from a PPECC.

**Note:** *A client or a client's responsible adult may decline a PPECC's transportation services entirely, on a specific date or for part of a day, and choose to be transported by other means, including their responsible adult. A client or a client's responsible adult's decision to utilize or not utilize PPECC transportation services does not preclude a PPECC from being eligible for reimbursement of non-transportation services.*

- Direct care staff, defined in licensure regulations, works under the supervision of an RN and provides direct care to a client
- PPECC services must be:
  - Individualized, specific, and consistent with symptoms or confirmed diagnosis of the condition, illness or injury under treatment, not in excess of the client's needs;
  - Consistent with generally accepted professional medical standards as determined by the Medicaid program and may not be experimental or investigational;
  - Reflective of the level of service that can be safely and effectively furnished;
  - Furnished in a manner not primarily intended for the convenience of the client, the client's responsible adult, or the provider.

**Note:** *The fact that a client's ordering physician has prescribed, recommended, or approved medical care, goods or services does not, in itself, make such care or services medically necessary or a covered service.*

### 2.15.1.1 Prior Authorization and Documentation Requirements

Prior authorization is required for PPECC services, excluding PPECC transportation. All requests for PPECC services must be based on the client's current medical needs. Texas Medicaid defines medically necessary THSteps services as health care, diagnostic services, treatments, and other measures necessary to correct or ameliorate any disability, physical or mental illness, or chronic conditions.

Documentation of medical necessity is required for PPECC services. PPECC services are considered medically necessary when a client meets all of the following admission criteria:

- Eligible for THSteps-CCP;
- 20 years of age or younger;
- Requires ongoing skilled nursing care and supervision beyond the level of skilled nursing visits normally authorized under Texas Medicaid HHSN and HHA services, skillful observations, judgments, and therapeutic interventions all or part of the day to correct or ameliorate health status;
- Considered to be a medically dependent or technologically dependent client in accordance with Texas Health and Safety Code chapter 248A;
- Stable for outpatient medical services, and does not present significant risk to other clients or personnel at the PPECC;
- Requires ongoing and frequent skilled interventions to maintain or ameliorate health status, and delayed skilled intervention is expected to result in:
  - Deterioration of a chronic condition;
  - Loss of function;
  - Imminent risk to health status due to medical fragility; or
  - Risk of death.

- Has a physician's order prescribing PPECC services signed and dated by an ordering physician who has personally examined the client in person within 30 calendar days prior to admission and reviewed all appropriate medical records;
- The physician may waive the examination when:
  - A diagnosis has already been established by the physician;
  - The client is under the continuing care and medical supervision of the physician; and
  - The physician has stated in writing that an examination of the client 30 calendar days prior to admission is not medically necessary.
- If a physician waives an examination, the physician must examine the client in person within 365 calendar days after the date of the client's last examination and the physician and PPECC must maintain documentation of the waived examination in the client's medical record
- Has consent for the client's admission to the PPECC signed and dated by the client or the client's responsible adult. Admission must be voluntary and based on the preference for PPECC services in place of PDN by the client or client's responsible adult in both managed care and non-managed care service delivery systems.
- Resides with the responsible adult and does not reside in any 24-hour inpatient facility, including the following:
  - General acute hospital
  - Skilled nursing facility
  - Intermediate care facility
  - Special care facility, including sub-acute units or facilities for the treatment of AIDS.

The PPECC will hold interdisciplinary conferences when PPECC services are initiated, recertified, or revised, and at least every 90 calendar days. Interdisciplinary conferences should include the client's responsible adult and the following, as applicable:

- The client's Department of Family and Protective Services case worker
- The client's therapy provider(s)
- Hospice provider

**Note:** *For clients who receive their PPECC services through a Medicaid managed care organization (MCO), the MCO service coordinator and/or service manager should be included in interdisciplinary conferences.*

When the sole purpose of PPECC services is to train and educate the client's responsible adult or the client (e.g., how to administer total parenteral nutrition (TPN) or how to manage a chronic condition), PPECC services will not be approved.

Training in a home setting for certain services such as how to administer TPN may be considered through intermittent HHSN visits.

**Referto:** *The Home Health Nursing and Private Duty Nursing Services Handbook (Vol. 2, Provider Handbooks)* for more details on training and education for the client or the client's responsible adult on TPN administration in a home setting.

### 2.15.1.1.1 Initial Authorization Requests

Initial requests may be prior authorized for a maximum of 90 calendar days. Requests for the prior authorization, including all required documentation, must be submitted to the claims administrator by electronic portal, fax, or mail no later than 3 business days following the start of care (SOC). Requests received after the 3 business day period allowed will be denied for dates of service (DOS) that occurred before the date the request is received.

When PPECC services are authorized, the authorized period begins on the day of the week that prior authorization starts. For example, if service hours are authorized on a weekly basis, the period would begin from the day of the week the prior authorization period begins and continue for 7 calendar days. PPECC services may be authorized based on the client's individual needs. Services may be authorized as hours per day, hours per week or days per week.

Consistent with PPECC licensure requirements, an initial comprehensive nursing assessment must be completed, signed, and dated by the PPECC RN no earlier than 3 business days before the SOC at the PPECC and no later than the day the client is admitted to the center. The initial comprehensive nursing assessment must be performed by a PPECC RN and cannot be delegated. The initial comprehensive nursing assessment is used to establish the POC and must support medical necessity for the client to receive ongoing skilled nursing care. The comprehensive nursing assessment must include the elements outlined in the "Documentation Requirements" section.

**Note:** *The PPECC provider may be asked to submit additional documentation to support medical necessity as defined in this section.*

A written order prescribing PPECC services signed and dated by the client's ordering physician must be in place by the SOC. The physician order as detailed in the "Documentation Requirements" section must be maintained in the client's medical record.

Initial prior authorization requests for PPECC services must include all the following documentation:

- A completed CCP Prior Authorization Request form signed and dated by the ordering physician.
- A completed Prescribed Pediatric Extended Care Center (PPECC) Plan of Care form signed and dated by the ordering physician, and the PPECC RN completing the POC. A PPECC may also submit the POC on their own form, but the POC must contain all required elements listed in the "Documentation Requirements" section. A written or verbal physician approval of the POC from the ordering physician must be in place by the SOC. If the PPECC has a verbal approval of the POC at the time the prior authorization request is submitted, the dated documentation of this POC verbal approval must be submitted with the POC, followed by the physician-signed and dated POC within 14 calendar days from the receipt of the authorization request by the claims administrator.

**Note:** *For authorization purposes only, a physician signature on the PPECC POC serves as the physician order. However, the physician order as detailed in the "Documentation Requirements" section must be maintained in the client's medical record.*

- A completed Nursing Addendum to Plan of Care for Private Duty Nursing and/or Prescribed Pediatric Extended Care Centers form, as detailed in the "Documentation Requirements" section, signed, and dated by the ordering physician, RN completing the comprehensive nursing assessment, and client or client's responsible adult.
- Signed and dated consent of the client or client's responsible adult documenting their choice for PPECC services. The signed consent must include an acknowledgment by the client or the client's responsible adult that they have been informed that their PDN service hours might be reduced as a result of accepting PPECC services. Signed and dated consent to share the client's personal health information with the client's other providers to ensure coordination of care must also be obtained.

**Note:** *A client or client's responsible adult signature on the Nursing Addendum to Plan of Care for Private Duty Nursing and/or Prescribed Pediatric Extended Care Centers form meets the client consent requirements.*

The ordering physician, PPECC RN, and client or client responsible adult signatures on the initial prior authorization request forms must be current. Current is defined as signed and dated within the 30 calendar day period before the SOC. Prior authorization request forms received with signatures dated after the SOC will be denied for DOS prior to the latest signed and dated documentation.

**Note:** *The client or client's responsible adult signature is not required on the CCP Prior Authorization Request form or the PPECC Plan of Care form.*

When initial prior authorization requests are submitted with a verbal approval of the POC, to be current, the ordering physician's dated signature on the POC must be within the fourteen (14) calendar day period following the receipt of the authorization request by the claims administrator. If the POC is not received with a dated physician signature within fourteen (14) calendar days of the receipt of the authorization request by the claims administrator, the prior authorization will be considered incomplete and will be denied.

When initial prior authorization requests are submitted with a verbal approval of the POC, all other required documentation forms must still be signed and dated within the 30 calendar day period before the SOC. If the other required documentation forms are received with dated signatures after the SOC, DOS prior to the latest signed and dated documentation will be denied.

Requests for authorizations of PPECC services should always be commensurate with the client's medical needs.

The length of the authorization is determined on an individual basis and is based on the goals and timelines identified by the physician, provider, and client or client's responsible adult. PPECC services will not be authorized for more than 90 calendar days from the SOC for an initial authorization.

**Note:** *Clients enrolled in a Medicaid managed care health plan may receive services from a PPECC. Authorization must be received from the health plan.*

#### 2.15.1.1.2 Recertification

A recertification is a new authorization period that may be approved for up to a maximum of 180 calendar days when the client meets medical necessity criteria. Recertification requests may be submitted by electronic portal, fax, or mail. The client or the client's responsible adult, physician, and PPECC provider must agree in writing that the recertification is appropriate each certification period.

An updated comprehensive nursing assessment as outlined in the "Documentation Requirements" section must be performed by the PPECC RN no more than 30 calendar days before the current authorization period expires. If there is no change in the client's condition, the POC must document medical necessity to support continued PPECC services.

A recertification request must be submitted to the claims administrator no more than 30 calendar days before a current authorization period will expire. Requests received after the current authorization period expires will be denied for DOS that occurred before the date the request is received.

A written order prescribing PPECC services signed and dated by the client's ordering physician must be in place by the recertification SOC. The physician order as detailed in the "Documentation Requirements" section must be maintained in the client's medical record.

Recertification prior authorization requests for PPECC services must include all the following documentation:

- A completed CCP Prior Authorization Request form signed and dated by the ordering physician within 30 calendar days prior to the recertification SOC date.

- A completed Prescribed Pediatric Extended Care Center (PPECC) Plan of Care form signed and dated by the ordering physician and the PPECC RN who completed the POC within 30 calendar days prior to the recertification SOC date. A PPECC may also submit the POC on their own form, but the POC must contain all required elements listed in the “Documentation Requirements” section.
- The PPECC provider is responsible for ensuring that the ordering physician reviews and signs the POC within 30 calendar days prior to the expiration of the authorization period and this documentation must be maintained in the client’s record.

**Note:** *For authorization purposes only, a physician signature on the PPECC POC serves as the physician order. However, the physician order as detailed in the “Documentation Requirements” section must be maintained in the client’s record.*

- A completed Nursing Addendum to Plan of Care for Private Duty Nursing and/or Prescribed Pediatric Extended Care Centers form, as detailed in the “Documentation Requirements” section, signed and dated by the ordering physician, RN who completed the comprehensive nursing assessment, and client or client’s responsible adult within 30 calendar days prior to the recertification SOC date.
- Signed and dated consent of the client or client’s responsible adult documenting their choice for PPECC services. The signed consent must include an acknowledgment by the client or the client’s responsible adult that they have been informed that their PDN service hours might be reduced as a result of accepting PPECC services. Signed and dated consent to share the client’s personal health information with the client’s other providers to ensure coordination of care must also be obtained.

**Note:** *A client or client’s responsible adult signature on the Nursing Addendum to Plan of Care for Private Duty Nursing and/or Prescribed Pediatric Extended Care Centers form meets the client consent requirements.*

The PPECC provider may request a revision of a recertification at any time during the recertification period. Revisions must follow the instructions outlined in “Revisions to the Plan of Care” in this section. The PPECC provider must notify the claims administrator and the client’s ordering physician at any time during a recertification period if the client’s condition changes, the authorized services are not commensurate with the client’s medical needs, and the client requires additional hours of ongoing skilled nursing services. The submission of a revision authorization request with physician signatures on required documentation meets the notification requirement.

### 2.15.1.1.3 Revisions to the Plan of Care

The PPECC provider may request a revision to the POC at any time during an authorization period. Requests for changes in the service hours during a current authorization period should be submitted if there is a change in the client’s condition, or the authorized services are not commensurate with the client’s medical needs and additional authorized hours are medically necessary.

Revisions during a current authorization period must fall within that authorization period. If the revision is requested beyond the existing authorization period, the provider must request a recertification authorization and submit all required documentation for a recertification.

**Note:** *Schedule changes that do not affect overall authorized ongoing skilled nursing hours do not require a revision authorization request, but must be documented in the client’s medical record.*

Requests for revisions must be submitted to the claims administrator as soon as the PPECC identifies the need for a revision. Revision requests may be submitted by electronic portal, fax, or mail.

Requests for revisions must be submitted within 3 business days of the revised SOC date. Requests received after the 3 business days will be denied for DOS that occurred before the request is received.

When a client's condition changes during the course of the authorization period that impacts the amount or duration of services, an updated comprehensive nursing assessment, as outlined in the "Documentation Requirements" section, performed by a PPECC RN is required. An updated comprehensive nursing assessment is not necessary if there is not a change in the client's condition.

The PPECC provider must notify the claims administrator and the client's ordering physician at any time during an authorization period if the client's condition changes, the authorized services are not commensurate with the client's medical needs, and the client requires additional hours of ongoing skilled nursing services. Submission of a revision authorization request, with physician signatures on required documentation, meets the notification requirement.

A written or verbal order prescribing PPECC services from the ordering physician must be in place by the revised SOC. If the PPECC obtains a verbal order from the ordering physician, the PPECC must maintain dated documentation of this verbal order in the client's medical record, and the PPECC must obtain a written, signed, and dated order within the fourteen (14) calendar day period following the receipt of the verbal order. The physician order as detailed in the "Documentation Requirements" section must be maintained in the client's medical record.

Revision prior authorization requests for PPECC services must include all the following documentation:

- A completed CCP Prior Authorization Request form signed and dated by the ordering physician.
- An updated Prescribed Pediatric Extended Care Center (PPECC) Plan of Care form signed and dated by the ordering physician and the PPECC RN who completed the POC. A PPECC may also submit the POC on their own form, but the POC must contain all required elements listed in the "Documentation Requirements" section. A written or verbal physician approval of the POC from the ordering physician must be in place by the revised SOC. If the PPECC has a verbal approval of the POC at the time the prior authorization request is submitted, the dated documentation of this POC verbal approval must be submitted with the POC, followed by the physician signed and dated POC within 14 calendar days from the receipt of the authorization request by the claims administrator.

**Note:** *For authorization purposes only, a physician signature on the PPECC POC serves as the physician order. However, the physician order as detailed in the "Documentation Requirements" section must be maintained in the client's medical record.*

- An updated Nursing Addendum to Plan of Care for Private Duty Nursing and/or Prescribed Pediatric Extended Care Centers form, as detailed in the "Documentation Requirements" section, signed and dated by the ordering physician, RN who completed the comprehensive nursing assessment, and client or client's responsible adult.
- Signed and dated consent of the client or client's responsible adult documenting their choice for PPECC services. The signed consent must include an acknowledgment by the client or the client's responsible adult that they have been informed that their PDN service hours might be reduced as a result of accepting PPECC services. Signed and dated consent to share the client's personal health information with the client's other providers to ensure coordination of care must also be obtained.

**Note:** *A client or client's responsible adult signature on the Nursing Addendum to Plan of Care for Private Duty Nursing and/or Prescribed Pediatric Extended Care Centers form meets the client consent requirements.*

- The ordering physician, PPECC RN, and client or client responsible adult signatures on the revision prior authorization request forms must be current. Current is defined as signed and dated within the 30 calendar day period before the revised SOC. Revision prior authorization request forms received with signatures dated after the revised SOC will be denied for DOS prior to the latest signed and dated documentation.

- When revision prior authorization requests are submitted with a verbal approval of the POC, to be current, the ordering physician's dated signature on the POC must be within the fourteen (14) calendar day period following the receipt of the authorization request by the claims administrator. If the POC is not received with a dated physician signature within fourteen (14) calendar days of the receipt of the authorization request by the claims administrator, the prior authorization will be considered incomplete and will be denied.
- When revision prior authorization requests are submitted with a verbal approval of the POC, all other required documentation forms must still be signed and dated within the 30 calendar day period before the revised SOC. If the other required documentation forms are received with dated signatures after the revised SOC, DOS prior to the latest signed and dated documentation will be denied.

#### 2.15.1.1.4 Coordination with Private Duty Nursing (PDN)

When a client or client's physician notifies the PPECC that the client also receives PDN from a Medicaid-enrolled PDN provider, the PPECC must coordinate services with the PDN provider. Both PDN and PPECC services are considered ongoing skilled nursing. A client has a choice of PDN, PPECC, or a combination of both PDN and PPECC for ongoing skilled nursing where PPECC services are available. Skilled nursing services are authorized for a set number of hours based on the client's medical necessity at the time of the prior authorization request. Skilled nursing hours are not expected to increase when the client utilizes a combination of both PPECC and PDN services, unless there is a documented change in medical condition, or the authorized hours are not commensurate to the client's medical needs and additional hours are medically necessary.

PPECC and PDN providers must collaborate in developing their respective 24-hour flow charts found in the Nursing Addendum to Plan of Care for Private Duty Nursing and/or Prescribed Pediatric Extended Care Centers each time a client's authorization for ongoing skilled nursing is initiated, recertified, and revised.

Both providers must maintain documentation that the client or the client's responsible adult has participated in the development of the POC (e.g., the completed PPECC POC and Nursing Addendum to Plan of Care for Private Duty Nursing and/or Prescribed Pediatric Extended Care Centers, with the client's or client's responsible adult's signature on the Nursing Addendum to Plan of Care for Private Duty Nursing and/or Prescribed Pediatric Extended Care Centers.)

Both providers must discuss with the client or the client's responsible adult how care will be coordinated between the two providers.

When a new service is initiated for ongoing skilled nursing services, and the client wants to receive both PDN and PPECC services, the claims administrator will compare the Nursing Addendum's 24-hour daily care flow sheets and medical necessity documentation (e.g., authorization requests). Upon subsequent approval of PDN or PPECC services, the provider who submitted the initial prior authorization request that established the number of authorized skilled nursing hours will have their authorized hours reduced to prevent duplication. (E.g., if the client currently has PDN, and then adds PPECC services, the PDN hours will be reduced.)

When hours are reduced, the PDN or PPECC provider affected by the reduction will be notified by the claims administrator when the reduction is effective, and the revised amount of authorized hours. A revision request from the provider affected by the reduction, with documentation of medical necessity is required only if there is a change in the client's medical condition or the client's medical needs are not commensurate with authorized hours and additional ongoing skilled nursing hours are medically necessary. No action is required from the provider affected by the reduction if additional hours are not medically necessary.

#### 2.15.1.1.5 Client Receives both PPECC and PDN Services and Shifts Services from One to the Other

A client receiving both PPECC and PDN services may choose to shift approved hours from one ongoing skilled nursing provider to another.

The receiving provider (PPECC or PDN provider who will gain hours in the shift) must submit all required documentation for a revision.

The sending provider (PPECC or PDN provider who will lose hours in the shift) will receive a notice from the claims administrator with revised (decreased) hours and the effective date of the reduction. The sending provider does not need to take any action unless there is a change in the client's medical condition, or the authorized hours are not commensurate with the client's medical needs, and additional ongoing skilled nursing hours are medically necessary. If there is a medical need for additional ongoing skilled nursing hours, the sending provider may submit a revision request.

The total combined hours between PPECC and PDN services are not expected to increase without client medical necessity for additional hours (e.g., change in client condition or authorized hours are not commensurate with the client's medical needs).

#### 2.15.1.1.6 PPECC Provider Change During an Existing Authorization Period

If a provider or client discontinues PPECC services during an existing prior authorized period and the client requests services through a new PPECC provider, the new PPECC provider must follow all of the processes and submit documentation required for an initial request, as well as the following:

A change of provider letter signed and dated by the client or the client's responsible adult documenting the date the client ended PPECC services (effective date of the change) with the previous provider, the names of the previous and new providers, and an explanation of why providers were changed.

When the new provider submits an authorization request, including all required documentation for an initial request, it will be authorized for no more than 90 calendar days regardless of the number of provider changes a client chooses to make.

#### 2.15.1.1.7 Termination of Authorizations

Authorization for PPECC services will be terminated when:

- The client is no longer eligible for THSteps-CCP.
- The client no longer meets the medical necessity criteria for PPECC services.
- The place of service cannot ensure the health and safety of the client.
- The client or the client's responsible adult refuses to comply with the service plan and compliance is necessary to assure the health and safety of the client.
- The client changes providers, and the change of notification is submitted to the claims administrator in writing with a prior authorization request from the new provider.
- After receiving PPECC services, the client opts to decline PPECC services and receive their services at home. The home health agency or independent provider offering ongoing skilled nursing (e.g., PDN) must submit or update all required authorization documentation to the claims administrator.

#### 2.15.1.1.8 Appeal of Authorization Decisions

Providers may appeal denials or modifications of requested PPECC services with documentation to support the medical necessity of the requested PPECC services.

Appeals must be submitted to the claims administrator's CCP department with complete documentation and any additional information within two weeks of the date on the decision letter. If changes are made to the authorization based on this documentation, CCP claims administrators will go back no more than three (3) business days for initial, or revision requests; and no more than 7 calendar days for recertification requests.

The client or the client's responsible adult will be notified of any denial or modification of requested services and will be given information about how to appeal the claims administrator's decision or request a fair hearing.

PPECC services may be denied when:

- The client does not meet medical necessity criteria for admission.
- The client does not have an ordering physician.
- The client is 21 years of age or older.
- The client's needs are not beyond the scope of services available through Texas Medicaid HHSN and/or HHA services because the needs can be met on a part-time or intermittent basis through a visiting nurse.
- The services are primarily intended to provide respite care or child care.
- The services are provided for the sole purpose of responsible adult training.
- The prior authorization request is submitted with documentation of a verbal physician approval of the POC, and the physician signed and dated POC is not received by the claims administrator within 14 calendar days of the receipt of the authorization request by the claims administrator.
- The prior authorization request is submitted late.
- The request is incomplete.
- The information in the request is inconsistent.
- The requested services are not ongoing skilled nursing services.
- There is a duplication of services.

Appeals to prior authorization requests must be submitted for processing to the Claims Administrator Prior Authorization Department (fee-for-service clients).

**Note:** *Clients enrolled in a Medicaid managed care health plan may receive services from a PPECC. Prior authorization requests for these clients must be submitted solely to the client's MCO.*

#### 2.15.1.1.9 Documentation Requirements

In addition to the requirements outlined in the "Prior Authorization and Documentation Requirements" section, the following documentation requirements apply. Services not supported by documentation are subject to recoupment.

All services and documentation outlined in this section are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

PPECCs must maintain documentation in the client's medical record, including but not limited to the following:

- Written orders from the ordering physician that prescribe PPECC services. If the PPECC obtains a verbal order for a revision request from the ordering physician, dated documentation of this verbal order must also be maintained in the client's medical record. The physician's order must include the following:

- Client's name, date of birth, gender, and Medicaid number
  - Provider name, NPI, address, and phone number
  - Date the client was last seen by the physician
  - Description of current medical diagnosis or condition
  - Nursing services
  - Medication administration, if applicable
  - Dietary needs, if applicable
  - Permitted activities, if applicable
  - Therapies, if applicable
  - Determination of whether the client is stable enough to receive PPECC transportation services and, if the client is determined to be stable, the provider type that must be on board: RN, LVN, or direct care staff, if applicable.
  - Other services, if applicable
  - Approval of the client's admission to the PPECC
  - A completed CCP Prior Authorization Request form signed and dated by the ordering physician.
  - A completed PPECC Plan of Care form must be signed and dated by the ordering physician and the PPECC RN completing the POC. If the PPECC obtains verbal approval of the POC from the ordering physician, the PPECC must maintain dated documentation of this verbal approval of the POC in the client's medical record. The POC using either the PPECC POC form or a PPECC-developed form, must include the following components:
    - The client's name, date of birth, and Medicaid number
    - The PPECC's name, National Provider Identifier (NPI), taxonomy, address, hours of operation, phone number, and fax number
    - The ordering physician's name, NPI and phone number
    - The PDN provider's name, NPI, address, phone number and fax number, if applicable
    - Date the client was last seen by the ordering physician
    - Date the PPECC comprehensive nursing assessment was completed and the name, title, and credentials of the RN who completed the comprehensive nursing assessment
    - The requested SOC date and requested end date for PPECC services
    - The client's scheduled days and hours of attendance for PPECC services
    - List of services the client receives in the home and school settings. [e.g., ECI, therapies, School Health and Related Services (SHARS), PCS, PDN, therapies, HHSN, HHA, case management services, hospice, and Medicaid waiver programs such as Medically Dependent Children's Program (MDCP), Home and Community-Based Services (HCS), Deaf-Blind Multiples Disabilities (DBMD), Texas Home Living (TxHL), and Community Living Assistance and Support Services (CLASS)]
- Note:** *Services provided under these programs will not prevent a client from obtaining medically necessary services.*
- All pertinent diagnoses and known allergies
  - Nursing services to be provided, including amount, duration, and frequency
  - The client's prognosis

- The client's mental status
- Rehabilitation potential
- The equipment and/or supplies required
- Therapies (occupational, physical, speech, and respiratory care), including how those therapies are accessed, amount, duration, and frequency. Therapies provided in the PPECC, as well as outside the PPECC (e.g., school based), must be documented.
- Nutritional requirements, including type, method of administration, and frequency
- Medications, including the dose, route, and frequency and any medication-related allergies if known
- Treatments, including amount and frequency
- Wound care orders and measurements
- Safety measures to protect against injury
- Prior and current functional or medical limitations
- Permitted activities
- Functional developmental services and psychosocial services, including amount, duration, and frequency
- Other prescribed services, including amount, duration, and frequency
- The determination from the client's ordering physician whether the client is stable to receive PPECC transportation. The description of the type of provider-RN, LVN, or direct care staff who must be present on board the PPECC vehicle to assist the client if the client is determined stable.
- Responsible adult training needs
- Name and phone number of the responsible adult when the client is a minor
- Client's emergency contact name and phone number
- Confirmation that a signed contingency plan is in place in circumstances when PPECC services are not available (e.g., fire, flood, windstorm, or electrical malfunctions) and for emergencies that occur while the client is in the care of the PPECC
- Confirmation of a discharge plan, including instructions for timely discharge or referral
- RN who completed the POC signature and date of signature
- Ordering physician signature and date of signature
- The PPECC comprehensive nursing assessment. The comprehensive nursing assessment must be performed by a PPECC RN and cannot be delegated. The comprehensive nursing assessment must include:
  - Complexity and intensity of the client's care
  - Stability and predictability of the client's condition
  - Frequency of the client's need for skilled nursing services
  - Identified medical, nursing, psychosocial, therapeutic, nutritional, dietary, functional, educational, and developmental needs and goals, and any training needs for the client or the client's responsible adult
  - Description of wounds, if present

- The client's equipment needs and whether the setting can support the health and safety needs of the client and is adequate to accommodate the use, maintenance, and cleaning of all medical devices, equipment, and supplies required by the client
- The comprehension level of the client's responsible adult; and
- Receptivity to training and ability level of the responsible adult
- The completed Nursing Addendum to Plan of Care for Private Duty Nursing and/or Prescribed Pediatric Extended Care Centers form signed and dated by the ordering physician, RN who completed the comprehensive nursing assessment, and the client or client's responsible adult. The Nursing Addendum form must include the following components:
  - The client's name and Medicaid number
  - The requested SOC date and requested end date for PPECC services
  - A nursing care plan summary, including a current problem list
  - A current summary and rationale page
  - A 24-hour daily care flow sheet
  - An acknowledgments page that includes the signed and dated signature of the client or the client's responsible adult, the RN who completed the POC, and the ordering physician

**Note:** For further details on completing PPECC prior authorization forms, refer to the *Instructions for Completing Prescribed Pediatric Extended Care Center Prior Authorization Forms*.

- The signed and dated consent of the client or the client's responsible adult documenting:
  - The client or client's responsible adult choice for PPECC services.
  - Acknowledgment that the client or client's responsible adult have been informed that their PDN service hours might be reduced as a result of accepting PPECC services.
  - Consent to share the client's personal health information with the client's other providers to ensure coordination of care.
  - The client or the client's responsible adult has been informed about how care will be coordinated between the client's providers.
  - The client or the client's responsible adult has been involved in the development of the POC.

**Note:** A client or client's responsible adult signature on the Nursing Addendum to Plan of Care for Private Duty Nursing and/or Prescribed Pediatric Extended Care Centers meets the client consent requirements.

- Confirmation of PDN provider notification, including the date the notification was provided when a client is receiving PDN services.
- Notes from interdisciplinary team meetings.
- Documentation of all discrepancies between the weekly service hours scheduled and the service hours provided. Examples include but are not limited to, doctor's appointments; the PPECC was closed one day for unforeseen reasons; the client was hospitalized; or the client's responsible adult was ill and could not provide services that they would normally provide.
- For each day that PPECC services are provided, the PPECC must maintain the following documentation:
  - A daily attendance log that includes:
    - The date of attendance.
    - The name of the client.

- The signature of the responsible adult and the time when the PPECC assumes responsibility for the care of the client, which is the time the client boards the PPECC transport vehicle or the time the client is brought to the PPECC by a responsible adult.
  - The signature of the responsible adult and the time when the responsible adult assumes responsibility for the care of the client, which is the time the client is taken off the PPECC transport vehicle at their return destination or the time the client is picked up from the PPECC by a responsible adult.
  - The name of the PPECC staff member riding in the PPECC transport vehicle when PPECC transportation services are used and whether the staff member is an RN, LVN, or direct care staff.
  - The name of the specific person or persons (e.g., nursing, direct care staff, therapist) providing services,
  - Date of service,
  - Type of services performed, and
  - The start and end times of services performed.
- When a PPECC provides transportation for a PPECC client, an RN, LVN, or direct care staff, as determined by the client's ordering physician in collaboration with the PPECC, must be on board the PPECC transport vehicle to assist the client during transportation. The PPECC must ensure that the driver and the RN, LVN, or direct care staff member on board the PPECC transport vehicle maintain a daily transportation log that must include:
    - The driver's name.
    - The name of the PPECC staff member and whether the staff member is an RN, LVN, or direct care staff member.
    - The date of service.
    - The name of the client.
    - The time that the client is put on the transport vehicle to deliver the client to the PPECC.
    - The time that the client arrives at the PPECC.
    - The time that the client is put on the transport vehicle to return to their responsible adult or authorized adult.
    - The time that the client arrives at their return destination and the name of the person to whom the client was released.
    - The reason that the transport time was longer than one hour for a client who is in transport longer than one hour traveling to the PPECC or longer than one hour traveling to their return destination.

To complete a prior authorization process by paper, the provider must complete and submit the prior authorization documentation through fax or mail and must maintain a copy of the prior authorization request and all submitted documentation in the client's medical record at the PPECC's place of business.

To complete a prior authorization process electronically, the provider must complete and submit the prior authorization documentation through any approved electronic method, and must maintain a copy of the prior authorization request and all submitted documentation in the client's medical record at the PPECC's place of business.

The PPECC provider may use any reliable method to record times, dates, and signatures provided that it is accurate and allows for an auditable review of the records, including electronic census, time-stamp, scanning, and signature records.

The PPECC provider must keep these records in case of an audit or monitoring.

The PPECC must coordinate the following with the client or the client's responsible adult:

- The client's transportation schedule
- The pick-up and drop-off locations (such as home or school)
- The authorized persons to whom the client may be released

A responsible adult must be provided daily a written, one-page summary of services provided to the client for each day that the client is in the PPECC's care.

The PPECC must maintain documentation in the client's medical record of the notification provided to the client or the client's responsible adult of an intent to transfer or discharge the client as follows:

- A copy of the written notification provided
- Personal contact with the client or the client's responsible adult
- Notification to the provider of the date of transfer or discharge.

PPECC service providers must provide written notice to clients of their intent to voluntarily terminate PPECC services at least fifteen (15) calendar days prior to terminating services, except in situations of a potential threat to the provider's personal safety.

The PPECC and the therapy provider must have a written agreement regarding the provision of therapy services when therapy services (occupational, speech, physical, and respiratory care) are provided at the PPECC. The written agreement must address the responsibilities of both parties and how the parties will coordinate related to the client's POC.

The PPECC and hospice provider must have a written agreement for each client regarding the provision of hospice services when hospice is provided at the PPECC. The written agreement must address the responsibilities of both parties and how the parties will coordinate related to the client's POC. The written agreement must be kept in the client's medical record.

The ordering physician must also maintain a copy of the signed and dated physician order and signed and dated POC in the client's medical record.

#### 2.15.1.1.10 Exclusions

The services that are not covered by the PPECC benefit include the following:

- Baby food or formula.
- PPECC services to clients related to the PPECC owner by blood, marriage or adoption.
- Services that are intended to provide mainly respite care or child care and do not directly relate to the client's medical needs or disability.
- PPECC services rendered to a client who does not meet the definition of a medically or technologically dependent minor.
- Services covered separately by Texas Medicaid, such as:
- Speech, occupational, physical, respiratory therapy services, and ECI services.
- Durable medical equipment (DME), medical supplies, nutritional products provided to the client by Medicaid's DME and medical supply service providers.
- PDN, HHSN, and HHA services provided in the home setting when medically needed in addition to the PPECC services authorized.
- Services that are the legal responsibility of a local school district.
- Individualized comprehensive case management beyond required service coordination.

### 2.15.1.1.11 Claims Filing and Reimbursement

PPECC services may be reimbursed when billed with procedure codes T1025, T1026, or T2002.

Services begin when the PPECC assumes responsibility for the care of the client (i.e., the point the client boards the PPECC transportation, or when the client is brought to the PPECC by a responsible adult) and ends when the care is relinquished to the client's responsible adult.

Providers must use appropriate procedure codes for the PPECC services performed. Procedure codes T1025 and T2002 are limited to once per day.

The PPECC per diem procedure code (T1025) and hourly procedure code (T1026) may not be billed on the same day.

Procedure code T1026 is allowed on an hourly basis, up to four hours. Services beyond four hours must be billed using procedure code T1025. At a minimum, four hours and fifteen minutes of services must be provided before procedure code T1025 may be billed.

For procedure code T1026, a minimum of 15 minutes of service is required to round up to a full hour after the first hour.

Procedure code T2002 is not allowed without a PPECC service on the same day, same provider.

PPECC per diem procedure code T1025 and hourly procedure code T1026 may be billed without nonemergency transportation procedure code T2002 on the same date of service.

Therapy services are billed separately by Medicaid-enrolled licensed therapists, including ECI providers, and are subject to prior authorization and policies governing Physical, Occupational, and Speech Therapy - Children (Acute and Chronic), or ECI services, as applicable.

If hospice services are rendered in a PPECC setting, they must be billed separately by Medicaid-enrolled hospice providers, and are subject to prior authorization and policies governing hospice reimbursement.

The following services may be billed on the same day as PPECC services, but they may not be billed simultaneously with PPECC services. These services may be billed before or after PPECC services:

- Private Duty Nursing
- Home Health Skilled Nursing
- Home Health Aide services
- Personal Care Services

PCS services provided in a PPECC are considered part of the PPECC billable rate.

PPECC services may be reimbursed only to a licensed PPECC.

**Note:** *Texas Medicaid will not reimburse PPECC services that duplicate services that are the legal responsibility of the school districts. The school district, through the SHARS program, is required to meet the client's skilled nursing needs while the client is at school. However, if those needs cannot be met by SHARS or the school district, documentation supporting medical necessity may be submitted to the claims administrator.*

Parental accompaniment is not required for PPECC reimbursement.

Non-emergency ambulance service providers will not be reimbursed for transportation to and from a PPECC.

PPECC services are subject to retrospective review and possible recoupment when the medical record does not document the provision of PPECC services is medically necessary based on the client's medical needs at the time PPECC services were rendered. The PPECC provider must explain all discrepancies between the service hours approved and the service hours provided. For example: The parents withdrew

their client from a PPECC and released the provider from all responsibility for the service hours; the PPECC was closed one day for unforeseen reasons; the client was hospitalized; or the responsible adult was ill and could not provide services that he or she would normally provide.

Payment will not be rendered for services that are not prior authorized.

## 2.16 Therapy Services (CCP)

**Referto:** Section 5, “Children’s Therapy Services Clients birth through 20 years of age” for information about CCP therapy services.

## 2.17 Inpatient Psychiatric Hospital or Facility (Freestanding) (CCP)

Inpatient psychiatric treatment in a nationally accredited freestanding psychiatric facility or a nationally accredited state psychiatric hospital is a benefit of Texas Medicaid for clients who are birth through 20 years of age at the time of the service request and service delivery, if the client meets certain conditions.

**Referto:** Subsection 3.4, “Services, Benefits, Limitations, and Prior Authorization - Inpatient Psychiatric Services” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)*.

## 2.18 Inpatient Rehabilitation Facility (Freestanding) (CCP)

### 2.18.1 Enrollment

**Note:** *Rehabilitation provided at an acute care facility is covered through Texas Medicaid fee-for-service.*

To be eligible to participate in CCP, a freestanding inpatient rehabilitation facility must be certified by Medicare, have a valid provider agreement with HHSC, and have completed the TMHP enrollment process. Texas Medicaid enrolls and reimburses freestanding inpatient rehabilitation facilities for CCP services and Medicare deductibles or coinsurance according to current payment guidelines. The information in this section is applicable to CCP services only.

**Referto:** Subsection 2.1.2, “Enrollment” in this handbook for more information about CCP enrollment procedures.

#### 2.18.1.1 Continuity of Hospital Eligibility Through Change of Ownership

Under procedures set forth by the CMS and HHSC, a change in ownership of a hospital does not terminate Medicare eligibility; therefore, Medicaid participation may be continued subject to the following requirements:

- The provider must obtain recertification as a Title XVIII (Medicare) hospital.
- The hospital under new ownership must submit a new signed and dated HHSC Medicaid Provider Agreement between the hospital and HHSC.

Providers can access the HHSC Medicaid Provider Agreement through the Provider Enrollment and Management System (PEMS).

#### 2.18.2 Services, Benefits, and Limitations

Inpatient rehabilitation services include medically necessary items and services ordinarily furnished by a Medicaid hospital or by an approved out-of-state hospital under the direction of a physician for the care and treatment of inpatient clients. Inpatient rehabilitation services will be considered for an acute problem or an acute exacerbation of a chronic problem resulting in a significant decrease in functional ability that will benefit from inpatient rehabilitation services. A condition is considered to be acute or an acute exacerbation of a chronic condition only during the six months from the onset date of the acute condition or the acute exacerbation of the chronic condition.

When a client is admitted to an inpatient facility for acute care physical, occupational, or speech therapy services, the therapy services are reimbursed as part of the inpatient hospital reimbursement methodology (Diagnosis-Related Group [DRG] or Tax Equity and Fiscal Responsibility Act [TEFRA]) and not reimbursed separately to the individual therapist. The hospital must include the physician's written treatment plan that supports the medical necessity of the hospitalization and services.

### **2.18.2.1 Comprehensive Treatment**

The intensity of necessary rehabilitative service cannot be provided in the outpatient setting.

Comprehensive rehabilitation treatment must be under the leadership of a physician. Comprehensive rehabilitation treatment must be an active interdisciplinary team, defined as at least two types of therapies.

Comprehensive treatment must consist of at least two appropriate physical modalities designed to resolve or improve the client's condition (OT, PT, and ST), and must be provided for a minimum of three hours per day for five days per week.

### **2.18.3 Prior Authorization and Documentation Requirements**

All inpatient rehabilitation services provided to clients who are birth through 20 years of age in a freestanding inpatient rehabilitation facility require prior authorization.

Prior authorization will be considered when the client has met all of the following criteria:

- The client has an acute problem or an acute exacerbation of a chronic problem resulting in a significant decrease in functional ability that will benefit from inpatient rehabilitation services.
- The intensity of necessary rehabilitative service cannot be provided in the outpatient setting.
- The client requires and will receive multidisciplinary team care defined as at least two therapies (OT, PT, or ST).
- This therapy will be provided for a minimum of three hours per day, five days per week.

The physician and the provider must maintain all documentation in the client's medical record.

Inpatient rehabilitation may be prior authorized for up to two months when the attending physician submits documentation of medical necessity. The treatment plan must indicate that the client is expected to improve within a 60-day period and be restored to a more functional lifestyle for an acute condition or the previous level of function for an acute exacerbation of a chronic condition.

Requests for subsequent services for increments up to 60 days may be prior authorized based on medical necessity. Requests for prior authorization of subsequent services must be received before the end-date of the preceding prior authorization.

A prior authorization request for an additional 60 days of therapy will be considered with documentation supporting medical necessity.

Supporting documentation for an initial request must include the following:

- The request for inpatient rehabilitation and the treatment plan must be signed and dated by the physician. The physician's signature is valid for no more than 60 days prior to the requested start of care date.
- A CCP Prior Authorization Request Form signed and dated by the physician.
- A current therapy evaluation with the documented age of the client at the time of evaluation.
- Therapy goals related to the client's individual needs; goals may include improving or maintaining function, or slowing of deterioration of function.
- An updated written comprehensive treatment plan established by the attending physician or by the therapist to be followed during the inpatient rehabilitation admission that:

- Is under the leadership of a physician and includes a description of the specific therapy being prescribed, diagnosis, treatment goals related to the client's individual needs, and duration and frequency of therapy.
- Includes the date of onset of the illness or injury requiring the freestanding inpatient rehabilitation facility admission.
- Includes the requested dates of service.
- Incorporates an active interdisciplinary team.
- Consists of at least two appropriate physical modalities (OT, PT, and ST) designed to resolve or improve the client's condition.
- Includes a minimum of three hours of team interaction with the client every day, five days per week.
- In addition to the documentation for an initial request, supporting documentation for a request for subsequent services must include the following:
  - A brief synopsis of the outcomes of the previous treatment relative to the debilitating condition.
  - The expected results to be achieved by an extension of the active treatment plan, and the time interval at which this extension outcome should be achieved.
  - Discussion why the initial two months of inpatient rehabilitation has not met the client's needs and why the client cannot be treated in an outpatient setting.

After receiving the documentation establishing the medical necessity and plan of medical care by the treating physician, prior authorization is considered by CCP for the initial service and an extension of service as applicable. A request for prior authorization must include documentation from the provider to support the medical necessity of the service.

#### 2.18.4 Claims Information

Providers must submit inpatient rehabilitation services to TMHP in an approved electronic claims format or on a UB-04 CMS-1450 paper claim form. Providers must purchase the UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

For OT, PT, and ST services, freestanding inpatient rehabilitation facilities and acute care hospitals can use revenue codes 128, 420, 424, 430, 434, 440, and 444.

TMHP must receive claims for payment consideration according to filing deadlines for inpatient claims. Claims for services that have been prior authorized must reflect the PAN in Block 63 of the UB-04 CMS-1450 paper claim form or its electronic equivalent.

**Referto:** "Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on electronic claims submissions.

"Section 6: Claims Filing" (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.6, "UB-04 CMS-1450 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for paper claims completion instructions.

[Inpatient Rehabilitation Facility \(Freestanding\) \(CCP Only\)](http://www.tmhp.com) on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for a claim form example.

#### 2.18.5 Reimbursement

Reimbursement for care provided in the freestanding inpatient rehabilitation facility is made under the Texas Diagnosis-Related Group (DRG) Payment System.

**Referto:** Subsection 3.7.4.4.1, “Day Outliers” in the *Inpatient and Outpatient Hospital Services Handbook* (Vol. 2, *Provider Handbooks*) for reimbursement information.

### 2.18.5.1 Client Transfers

When more than one hospital provides care for the same case, the hospital furnishing the most significant amount of care receives consideration for a full DRG payment.

The other hospital(s) is/are paid a per diem rate based on the lesser of the mean length of stay for the DRG or eligible days in the facility. The DRG modifier PT on the R&S Report indicates per diem pricing related to a client transfer.

Client transfers within the same facility are considered one continuous stay and receive only one DRG payment. The facility must bill only one claim.

After all hospital claims have been submitted, HHSC performs a post-payment review to determine whether the hospital furnishing the most significant amount of care received the full DRG. If the review reveals that the hospital furnishing the most significant amount of care did not receive the full DRG, an adjustment is initiated.

## 3 Texas Health Steps (THSteps) Dental

Medicaid dental services rules are described under Title 25 Texas Administrative Code (TAC) Part 1, Chapter 33. The online version of TAC is available at the Secretary of State's website at [www.sos.state.tx.us/tac/index.shtml](http://www.sos.state.tx.us/tac/index.shtml). All dental providers must comply with the rules and regulations of the Texas State Board of Dental Examiners (TSBDE), including standards for documentation and record maintenance as stated in 22 TAC §108.7, *Minimum Standard of Care, General*, and §108.8, *Records of the Dentist*.

**Note:** *Exceptions to a board-eligible or board-certified orthodontist may be considered for clients in a rural or frontier area or where access to care is an issue.*

All dental providers must refer to the Current Dental Terminology (CDT) book for recording services provided and when reporting procedures on a paper or electronic claim submission form.

**Note:** *THSteps dental benefits are administered as Children's Medicaid Dental Services by dental managed care organizations for most Medicaid fee-for-service and managed care clients who are 20 years of age and younger.*

**Referto:** The *Medicaid Managed Care Handbook* (Vol. 2, *Provider Handbooks*) or to the HHSC website at [www.hhs.texas.gov/services/health/medicaid-chip](http://www.hhs.texas.gov/services/health/medicaid-chip), for additional information about children's Medicaid dental Services.

Under the Early Periodic Screening Diagnostic, and Treatment (EPSDT) regulation, known in Texas as Texas Health Steps (THSteps), Section 1905(r) of the Social Security Act mandates that all Medicaid eligible beneficiaries who are birth through 20 years of age receive medically necessary services to treat, correct, and ameliorate illnesses and conditions identified if the service is covered in the state's Medicaid plan or is an optional Medicaid service. It is the responsibility of the state to determine medical necessity on a case-specific basis. No arbitrary limitations on services are allowed (e.g., one pair of eyeglasses or 10 therapy sessions per year) if determined to be medically necessary.

Services not covered under this section include:

- Experimental or investigational treatment.
- Services or items not generally accepted as effective and/or not within the normal course and duration of treatment.
- Services for the caregiver or provider convenience.

All EPSDT requirements must be adhered to for beneficiaries who receive services under managed care arrangements.

### 3.1 Enrollment

To become a provider of THSteps or intermediate care facility for persons with intellectual disability (ICF-IID) dental services, a dentist must:

- Practice within the scope of the provider's professional licensure.
- Complete the Dental Provider Enrollment Application through the Provider Enrollment and Management System (PEMS).

Dental providers are required to maintain an active license status with the TSBDE. TMHP receives a monthly automated board feed from TSBDE to update licensure information. If licensure cannot be verified with the automated board feed, it is the providers' responsibility to provide a copy of the active TSBDE license to TMHP. If TSBDE has a delay in processing license applications and renewals, the provider must request a letter from TSBDE for their individual provider information and send the letter of verification of current licensure to TMHP. The letter must contain the provider's specific identification information, license number, and licensure period.

If TMHP cannot verify a valid license at the time of enrollment, it is the providers' responsibility to provide a copy of the active TSBDE license to TMHP.

A dental provider cannot be enrolled if his or her dental license is due to expire within 30 days; a current license must be submitted. Dental licensure for owners of a dental practice is a requirement of the Occupations Code, Vernon's Texas Codes Annotated (VTCA), Subtitle D, Chapters 251-267 (the Texas Dental Practice Act).

All owners of a dental practice must maintain an active license status with the TSBDE to receive reimbursement from Texas Medicaid. Any change in ownership or licensure status for any enrolled dentist must be immediately reported in writing to TMHP Provider Enrollment and will affect reimbursement by Texas Medicaid.

The application form includes a written agreement with HHSC.

Dental providers may enroll in the THSteps Dental program and ICF-IID Dental Programs or as a Doctor of Dentistry Practicing as a Limited Physician, or both. The enrollment requirements are different with respect to the category of enrollment.

All dental providers must declare one or more of the following categories:

- General practice
- Pediatric dentist
- Periodontist
- Endodontist
- Oral and maxillofacial surgeon
- Orthodontist
- Other (prosthodontist, public health, and others)

Dentists (D.D.S., D.M.D.) who want to provide the three levels of orthodontic services must be enrolled as a dentist or orthodontist provider for THSteps and must have at least one of the following qualifications listed below for the relevant level of service.

THSteps dental providers may perform and be reimbursed for level I or level II orthodontic services if they have attested to at least one of the following requirements:

- Completion of a dental pediatric specialty residency or
- Completion of a minimum of 200 hours of continuing education in orthodontics within the last 10 years (8 hours can be online or self instruction) (Proof of the completion of continuing education hours is not required to be submitted with a request for prior authorization of orthodontic services; however, documentation must be produced by the dentist during retrospective review.)

Orthodontist providers may perform and be reimbursed for level I, level II, or level III orthodontic services and must be in compliance with the TSBDE rules and regulations. This designation can only be associated with dentists who are board-eligible or board-certified by an American Dental Association (ADA)-recognized orthodontic specialty board.

**Referto:** “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

Dental residents may provide dental services in a teaching facility under the guidance of the attending staff/faculty member(s) as long as the facility's dental staff by-laws and standards by the Commission on Dental Accreditation (CODA) are met, and the attending dentist/faculty member has determined the resident to be competent to perform the dental services. THSteps does not require the supervising dentist to examine the client as long as these conditions are met.

In a clinic, an attending dentist/faculty member must be present in the dental clinic for consultation, supervision, and active teaching when residents are treating patients in scheduled clinic sessions. This does not preclude occasional situations where a faculty member cannot be available. A dentist must assume responsibility for the clinic's operation.

### **3.1.1 THSteps Dental Eligibility**

The client must be Medicaid- and THSteps-eligible (birth through 20 years of age) at the time of the service request and service delivery. However, Medicaid-approved orthodontic services already in progress may be continued even after the client loses Medicaid eligibility if the orthodontic treatment:

- Began before the loss of Medicaid eligibility.
- Began before the day of the client's 21st birthday.
- Was completed within 36 months of the beginning date.

The client is not eligible for a THSteps medical checkup or THSteps dental benefits if the client's Your Texas Benefits Medicaid card or Medicaid Eligibility Verification Form (Forms H1027 and H1027-A-C) states any of the following:

- Emergency
- Presumptive eligibility (PE)
- Qualified Medicare beneficiary (QMB)
- Healthy Texas Women (HTW) program

### **3.1.2 THSteps Dental and ICF-IID Dental Services**

A provider may enroll as an individual dentist, a group practice, or both. Regardless of the category of practice designation under THSteps Dental, providers can only submit claims for THSteps and ICF-IID Dental Services.

**Referto:** Subsection 3.2, “Services, Benefits, Limitations, and Prior Authorization” in this handbook.

### 3.1.3 THSteps Dental Checkup and Treatment Facilities

All THSteps dental checkup and treatment policies apply to examinations and treatment completed in a dentist's office, a health department, clinic setting, hospital operating room, or in a mobile/satellite unit. Enrollment of a mobile/satellite unit must be under a dentist or clinic name. Mobile units can be a van or any temporary site away from the primary office and are considered extensions of that office and are not separate entities. The physical setting must be appropriate so that all elements of the checkup or treatment can be completed. The checkup must meet the requirements detailed in subsection D.5, "Parental Accompaniment" in this handbook. The provider with a mobile unit or who uses portable dental equipment must obtain a permit for the mobile unit from the TSBDE.

### 3.1.4 Doctor of Dentistry Practicing as a Limited Physician

Dentists who serve clients and submit claims using medical (CPT) procedure codes, such as oral-maxillofacial surgeons, may enroll as a doctor of dentistry practicing as a limited physician. Providers may enroll as an individual dentist or as a dental group. To enroll as a doctor of dentistry practicing as a limited physician, a dentist must:

- Be currently licensed by the TSBDE or currently licensed in the state where the service was performed.
- Have a Medicare provider identification number before applying for Medicaid.
- Enroll as a limited physician.

### 3.1.5 Client Rights

Dental providers enrolled in Texas Medicaid enter into a written contract with HHSC to uphold the following rights of the Medicaid client:

- To receive dental services that meet or exceed the standards of care established by the laws relating to the practice of dentistry and the rules and regulations of the TSBDE.
- To receive information following a dental examination about the dental diagnosis; scope of proposed treatment, including alternatives and risks; anticipated results; and the need and risks for administration of sedation or anesthesia.
- To have full participation in the development of the treatment plan and the process of giving informed consent.
- To have freedom from physical, mental, emotional, sexual, or verbal abuse, or harm from the provider or staff.
- To have freedom from overly aggressive treatment in excess of that required to address documented medical necessity.

A provider's failure to ensure any of the client rights may result in termination of the provider agreement or contract and other civil or criminal remedies.

### 3.1.6 Complaints and Resolution

Complaints about dental services are typically received through the TMHP Contact Center, although a complaint is accepted from any source. A complaint is researched by TMHP and resolved or escalated as appropriate. Examples of complaints from clients about providers include:

- The provider did not consult with the client, explain what services were necessary, or obtain parent or guardian informed consent.
- The treating provider refused to make the child's record available to the new provider.
- The provider did not give the child the appropriate local anesthesia or pain medication.
- The provider did not use sterile procedures; the facility or equipment were not clean.

- The provider or his staff were verbally abusive.
- The client did not receive a service, but the provider submitted a claim to Texas Medicaid.
- The provider charged a Medicaid client for benefits covered by Medicaid.

## **3.2 Services, Benefits, Limitations, and Prior Authorization**

### **3.2.1 THSteps Dental Services**

THSteps is the Texas version of the Medicaid program known as Early and Periodic Screening, Diagnosis, and Treatment (EPSDT).

THSteps dental services are mandated by Medicaid to provide for the early detection and treatment of dental health problems for Medicaid-eligible clients who are birth through 20 years of age. THSteps dental service standards are designed to meet federal regulations and incorporate the recommendations of representatives of national and state dental professional organizations.

THSteps' designated staff (DSHS, HHSC, or contractor), through outreach and informing, encourage eligible children to use THSteps dental checkups and services when children first become eligible for Medicaid, and each time children are periodically due for their next dental checkup.

Children within Medicaid have free choice of Medicaid-enrolled providers and are given names of enrolled providers. A list of THSteps dental providers in a specific area can be obtained using the [Online Provider Lookup](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com), or by calling 1-877-847-8377.

Upon a provider's request, DSHS (or its contractor) will assist eligible children with the scheduling of free transportation to their dental appointment or clients can call the Medical Transportation Program at 1-877-633-8747.

**Referto:** The *Medical Transportation Program Handbook (Vol. 2, Provider Handbooks)* for information about transportation arrangements.

#### **3.2.1.1 Eligibility for THSteps Dental Services**

A client is eligible for THSteps dental services from birth through 20 years of age. The eligibility period is determined by the client's age on the first of the month. If a client's birthday is not on the first of a month, the new eligibility period begins on the first day of the following month. When the client turns 21 years of age during a month, the client is eligible for THSteps dental non-CCP services through the end of that month.

A client is eligible for Comprehensive Care Program (CCP) dental services until their 21st birthday. The eligibility period ends on their 21st birthday and does not continue through the end of the month in which the birthday falls.

#### **3.2.1.2 Parental Accompaniment**

Clients who are 14 years of age and younger must be accompanied to Texas Health Steps dental checkups and visits by the client's parent, legal guardian, or another adult who is authorized by the parent or legal guardian. The authorized adult can be the client's relative. The individual accompanying the client must wait for the client while the appointment takes place. For additional information and exceptions, see "D.5 Parental Accompaniment" in this handbook.

### **3.2.2 Substitute Dentist**

In accordance with TAC §§354.1121 and 354.1221, related to Medicaid billing for the services of substitute dentists, dentists who are temporarily absent from their practice are allowed to submit claims for reimbursement of Medicaid services rendered to their Medicaid clients by a substitute dentist.

Dentists may bill for the services of a substitute dentist pursuant to 42 CFR §447.10.

The following are conditions for reimbursement of services rendered by a substitute dentist:

- Dentists who take a leave of absence for no more than 90 days may bill for the services of a substitute dentist who renders services on an occasional basis when the primary dentist is unavailable to provide services. Services must be rendered at the practice location of the dentist who has taken the leave of absence. A locum tenens arrangement is not allowed for dentists.
- This arrangement is limited to no more than 90 consecutive days. Under this temporary basis, the primary dentist (who is the billing agent dentist) may not submit a claim for services furnished by a substitute dentist to address long-term vacancies in a dental practice. The billing agent dentist may submit claims for the services of a substitute dentist for longer than 90 consecutive days if the dentist has been called or ordered to active duty as a member of a reserve component of the Armed Forces. Medicaid and CSHCN accepts claims from the billing agent dentist for services provided by the substitute dentist for the duration of the billing agent dentist's active duty as a member of a reserve component of the Armed Forces.
- Providers billing for services provided by a substitute dentist must bill with modifier U5 in Block 19 of the American Dental Association (ADA) claim form.
- The billing agent dentist may recover no more than the actual administrative cost of submitting the claim on behalf of the substitute dentist. This cost is not reimbursable by Medicaid or CSHCN.
- The billing agent dentist must bill substitute dentist services on a different claim form from his or her own services. The billing agent dentist services cannot be billed on the same claim form as substitute dentist services.
- The substitute dentist must be licensed to practice in the state of Texas, must be enrolled in Texas Medicaid, and must not be on the Texas Medicaid provider exclusion list.
- The dentist who is temporarily absent from the practice must be indicated on the claim as the billing agent dentist, and his or her name, address, and NPI must appear in Blocks 53, 54, and 56 of the ADA claim form.
- The substitute dentist's NPI number must be documented in Block 35 of the ADA claim form. Electronic submissions do not require a provider signature.

Dentists must familiarize themselves with these requirements and document accordingly. Those services not supported by the required documentation, as detailed above, will be subject to recoupment.

### **3.2.3 Texas Health Steps Dental Checkups**

Texas Health Steps dental checkups include an oral evaluation, prophylaxis, topical fluoride, and appropriate radiographs.

The Texas Health Steps dental periodicity schedule for preventative and diagnostic procedures does not apply to clients living in an intermediate care facility for individuals with intellectual or developmental disabilities (ICF-IID) who are 21 years of age and older.

#### **3.2.3.1 Exception-to-Periodicity Oral Evaluation, Dental Checkup, and Emergency or Trauma Related Services**

Oral evaluations and dental checkups allow for the early diagnosis and treatment of dental problems. Oral evaluations and dental checkups might be needed at more frequent intervals than noted in the periodicity schedule.

If needed, a dental checkup or oral evaluation can still be reimbursed when the service falls outside the periodicity schedule. The rules for such exceptions are outlined below.

#### **3.2.3.2 Exception-to-Periodicity Oral Evaluation**

A Texas Health Steps exception-to-periodicity oral evaluation is limited to dental procedure code D0120.

An exception-to-periodicity oral evaluation is allowed when the service is:

- Medically necessary and based on risk factors and health needs for clients birth through 6 months of age.
- Mandated service required to meet federal or state exam requirements for Head Start, daycare, foster care or preadoption.

Providers must include all appropriate procedure codes on the dental claim submission form. Additionally, dental providers must include modifier SC or 32 to identify the reason for the exception.

### 3.2.3.3 Exception-to-Periodicity Dental Checkup

A Texas Health Steps exception-to-periodicity dental checkup is allowed when the client will not be available for the next periodically due dental checkup. This includes clients whose parents are migrant or seasonal workers.

Providers must include all appropriate procedure codes on the dental claim submission form. Additionally, dental providers must include modifier SC to identify the reason for the exception.

### 3.2.3.4 Exception-to-Periodicity Emergency or Trauma Related Oral Evaluation

A Texas Health Steps exception-to-periodicity emergency or trauma related oral evaluation is limited to dental procedure code D0140.

A Texas Health Steps exception-to-periodicity emergency or trauma related dental service is allowed when the service is:

- Required for immediate treatment and any follow-up treatment.
- Required for therapeutic services needed to complete a case for clients who are 5 months of age and younger, when initiated as emergency services, trauma, or early childhood caries.

When submitting a claim for emergency or trauma related dental services, the provider must include:

- "Trauma" or "Emergency" in Block 30 "Description" field.
- The original date of treatment or incident in Block 35, "Remark" field.
- Completion of Block 45, "Treatment Resulting from" field, if applicable.

Providers must include all appropriate procedure codes on the dental claim submission form. Additionally, dental providers must include modifier ET to identify the reason for the exception.

**Referto:** Subsection 6.7, "American Dental Association (ADA) Dental Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*).

### 3.2.3.5 Documentation

The client's dental medical record must include documentation for the exception-to-periodicity Texas Health Steps oral evaluation, dental checkup or exception-to periodicity emergency or trauma related service for medical necessity.

Dental services are subject to retrospective review and recoupment if documentation does not support the services submitted for payment.

### 3.2.3.6 Reimbursement

Providers must include the appropriate procedure code and one of the modifiers to identify the reason for the exception must be included on the ADA dental claim submission form. Procedure codes must be included in Block 29. Modifiers must be included in Block 19:

| Procedure Code | Modifier to Identify Exemption | Modifier Description |
|----------------|--------------------------------|----------------------|
| D0120          | 32                             | Mandated Service     |

| Procedure Code | Modifier to Identify Exemption | Modifier Description                |
|----------------|--------------------------------|-------------------------------------|
| D0120          | SC                             | Medically Necessary Service         |
| D0140, D9110   | ET                             | Emergency - Trauma Related Services |

### 3.2.3.7 Diagnostic Services

Diagnostic services should be performed for all clients, starting within the first six months of the eruption of the first primary tooth, but no later than one year of age.

| Procedure Code                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Limitations                                                                                                                                                                                                                                                                                                                                          |

The provider must document medical necessity and the specific tooth or area of the mouth on the claim for procedure codes D0140, D0160, and D0170.

Documentation supporting medical necessity for procedure codes D0140, D0160, and D0170 must also be maintained by the provider in the client's medical record and must include the following:

- The client's complaint supporting medical necessity for the examination
- The specific area of the mouth that was examined or the tooth involved
- A description of what was done during the visit
- Supporting documentation of medical necessity which may include, but is not limited to, radiographs or photographs

Documentation supporting medical necessity for procedure code D0180 must be maintained by the provider in the client's medical record and must include the following:

- The client's complaint supporting medical necessity for the examination
- A description of what was done during the treatment
- Supporting documentation of medical necessity which may include, but is not limited to, radiographs or photographs

A caries risk assessment procedure code (D0601, D0602, or D0603) is required on the same claim when dental examination procedure code D0120, D0145, or D0150 are submitted for reimbursement on the same claim, for the same date of service, by the same provider.

Procedure codes D0601, D0602, and D0603 are informational only, and are not payable. Information-only procedure codes must be billed in the amount of at least \$0.01 in the cost column on the claim form.

The client's dental condition(s) that justifies the risk assessment classification submitted with the claim must be maintained by the provider in the client's medical record, and it must be clearly documented using a caries risk assessment tool or in narrative charting. The client's medical record is subject to retrospective review.

Professionally developed caries risk assessment tools are available at:

- American Dental Association (ADA)
- American Academy of Pediatric Dentistry (AAPD)
- Texas Health Steps (THSteps)

| <b>Radiographs/Diagnostic Imaging (Including Interpretation)</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                            |
| Number of films required is dependent on the age of the client. A minimum of eight films is required to be considered a full-mouth series. Adults and children who are 12 years of age and older require 12–20 films, as is appropriate. The panoramic radiographic image (D0330) with four bitewing radiographic images (D0274) may be considered equivalent to the complete or full-mouth series of radiographic images (D0210), and the submitted amount for either combination is equivalent to the maximum fee.                        |                                                                                                                            |
| D0210                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Limited to one service every three years by the same provider. Will be denied when submitted on an emergency claim. A 2–20 |

Procedure code D0350 must be used to submit claims for photographs, and will be accepted only when diagnostic-quality radiographs cannot be taken. Supporting documentation and photographs must be maintained in the client's medical record when medical necessity is not evident on radiographs for dental caries or the following procedure codes. Medical necessity must be documented on the electronic or paper claim.
