### 3.2.3.9 Therapeutic Services

Medicaid reimbursement is contingent on compliance with the following limitations:

- Documentation requirements  
*Referto:* Subsection 3.3, "Documentation Requirements" in this handbook.
- More than one restoration on a single surface is considered a single restoration.
- Multiple surface restorations must show definite crossing of the plane of each surface listed for each primary and permanent tooth completed.
- A multiple surface restoration cannot be submitted as two or more separate one-surface restorations.
- Restorations and therapeutic care are provided as a Medicaid service based on medical necessity and reimbursed only for therapeutic reasons and not preventive purposes (refer to CDT).

All dental restorations and prosthetic appliances that require lab fabrication may be submitted for reimbursement using the date the final impression was made as the DOS. If the client did not return for final seating of the restoration or appliance, a narrative must be included on the claim form and in the client's chart in lieu of a postoperative radiograph. The 95-day filing deadline is in effect from the date of the final impression. If the client returns to the office after the claim has been filed, the dentist is obligated to attempt to seat the restoration or appliance at no cost to the client or Texas Medicaid. For records retention requirements, refer to subsection 3.3, "Documentation Requirements" in this handbook.

### 3.2.4 Comprehensive Care Program (CCP)

The Omnibus Budget Reconciliation Act (OBRA) of 1989 mandated the expansion of the federal EPSDT program to include any service that is medically necessary and for which federal financial participation (FFP) is available, regardless of the limitations of Texas Medicaid. This expansion is referred to as the Comprehensive Care Program (CCP).

CCP services are provided only for those clients who are birth through 20 years of age who are eligible to receive THSteps services. When the client becomes 21 years of age, all CCP benefits stop. Dental services that are a benefit through CCP are designated in the Limitations column of the tables with the notation "CCP" beginning in subsection 3.2.3.7, "Diagnostic Services" in this handbook.

### 3.2.5 Children's Medicaid Dental Plan Choices

Children's Medicaid dental services benefits are administered by three dental managed care organizations (i.e., dental plans) across the state of Texas.

| Medicaid Managed Care Dental Plan Provider Services |                |
|-----------------------------------------------------|----------------|
| DentaQuest                                          | 1-800-685-9971 |
| MCNA Dental                                         | 1-855-776-6262 |
| United Healthcare Dental                            | 1-800-527-1764 |

**Note:** Services provided to Medicaid managed care clients must be provided by their main dentist.

### 3.2.6 Authorization Transfers for Medicaid Managed Care Dental Orthodontic Services

If a client transitions to a managed care dental plan after their orthodontic services were initially authorized by TMHP, the claims for the orthodontic services will be processed and reimbursed by the managed care dental plan. Providers should check client eligibility to identify the managed care dental plan to which the client transitions.

Claims for orthodontic services remain the responsibility of the dental managed care plan until the authorized services are completed, even if the client loses dental managed care or Medicaid eligibility.

### 3.2.7 ICF-IID Dental Services

ICF-IID dental services are mandated by Medicaid. Reimbursement is provided for treatment of dental problems for Medicaid-eligible residents of ICF-IID facilities who are 21 years of age and older. Residents of ICF-IID facilities who are 20 years of age and younger receive services through the regular THSteps Program. Eligibility for ICF-IID services is determined by HHSC.

Procedure codes that do not have a CCP designation in the "Limitations" column of the dental fee schedule may be submitted in a routine manner for ICF-IID clients. These procedures must be documented as medically necessary and appropriate. ICF-IID clients are not subject to periodicity for preventive care. For procedure codes that have a CCP designation, a provider may request authorization with documentation or provide documentation on the submitted claim.

**Referto:** Subsection 3.2.15, "Medicaid Dental Benefits, Limitations, and Fee Schedule" in this handbook.

#### 3.2.7.1 THSteps and ICF-IID Provision of Dental Services

All THSteps and ICF-IID dental services must be performed by the Medicaid-enrolled dental provider except for permissible work that is delegated to a licensed dental hygienist, dental assistant, or dental technician in a dental laboratory on the premises where the dentist practices, or in a commercial laboratory registered with the TSBDE. The Texas Dental Practice Act and the rules and regulations of

the TSBDE (22 TAC, Part 5) define the scope of work that dental auxiliary personnel may perform. Any deviations from these practice limitations shall be reported to the TSBDE and HHSC, and could result in sanctions or other actions imposed against the provider.

THSteps and ICF-IID clients must receive:

- Dental services specified in the treatment plan that meet the standards of care established by the laws relating to the practice of dentistry and the rules and regulations of the TSBDE.
- Dental services free from abuse or harm from the provider or the provider's staff.
- Only the treatment required to address documented medical necessity that meets professionally recognized standards of health care.

### **3.2.7.2 Children in Foster Care**

Clients in foster care receive services from Superior HealthPlan's dental contractor. Providers may contact DentaQuest at 1-888-308-9345 for more information.

Paper claims and requests for prior authorization must be mailed to:

DentaQuest  
P.O. Box 2906  
Milwaukee, WI 53201-2906  
Fax: 262-834-3589

### **3.2.8 Written Informed Consent and Standards of Care**

As outlined in 22 TAC §108.7, the dental provider must maintain written informed consent signed by the patient, or a parent or legal guardian of the patient if the patient is a minor, or a legal guardian of the patient if the patient has been adjudicated incompetent to manage the patient's personal affairs.

Additionally, as required in 25 TAC §33.6 and §33.20, THSteps providers must obtain legally effective, written informed consent before providing THSteps dental checkups and treatment services. Such consent is required for all oral evaluations; dental diagnostic, preventative, and therapeutic services; and treatment plans. The written informed consent must identify the tooth and surface IDs associated with the proposed treatment and should disclose risks or hazards that could influence a reasonable person in making a decision to give or withhold consent.

THSteps clients or their parents or legal guardians who can give written informed consent must receive information following a dental examination about the dental diagnosis, scope of proposed treatment, including alternatives and risks, anticipated results, and need for and risks of the administration of sedation or anesthesia. Additionally, they must receive a full explanation of the treatment plan and give written informed consent before treatment is initiated. The parent or guardian being present at the time of the dental visit facilitates the provider obtaining written informed consent. Dentists must comply with TSBDE Rule 22 TAC §108.2, "Fair Dealing."

### **3.2.9 First Dental Home**

Based on the American Academy of Pediatric Dentistry's (AAPD) definition, Texas Medicaid defines a dental home as the dental provider who supports an ongoing relationship with the client that includes all aspects of oral health care delivered in a comprehensive, continuously accessible, coordinated, and family-centered way. Establishment of a client's dental home begins no later than 6 months of age and includes referrals to dental specialists when appropriate.

In providing a dental home for a client, the dental provider enhances the ability to assist clients and their parents or legal guardians in obtaining optimum oral health care. The first dental home visit can be initiated as early as 6 months of age and must include, but is not limited to, the following:

- Oral examination
- Caries risk assessment

The following services may be reimbursed separately when provided during an FDH visit:

- Oral evaluation for a client who is 3 years of age or younger (procedure code D0145)
- Dental case management and patient education to improve oral health literacy (procedure code D9994) when providing dental anticipatory guidance
- Dental prophylaxis (procedure code D1120) if appropriate
- Topical fluoride application using fluoride varnish (procedure code D1206) if appropriate

Caries susceptibility tests are considered part of dental evaluation procedures and are not reimbursed separately.

Clients who are from 6 through 35 months of age may be seen for dental checkups by a certified First Dental Home provider.

First Dental Home services are submitted using procedure code D0145. The dental home provider must retain supporting documentation for procedure code D0145 in the client's record. The supporting documentation must include, but is not limited to, the following:

- Oral and physical health history review
- Dental history review
- Primary caregiver's oral health
- Oral evaluation
- Caries risk assessment
- Dental prophylaxis, which may include a toothbrush prophylaxis
- Oral hygiene instruction with parent or caregiver
- Fluoride varnish application
- An appropriate preventive oral health regimen (recall schedule)
- Anticipatory guidance communicated to the client's parent, legal guardian, or primary caregiver to include the following:
  - Oral health and home care
  - Oral health of primary caregiver/other family members
  - Development of mouth and teeth
  - Oral habits
  - Diet, nutrition, and food choices
  - Fluoride needs
  - Injury prevention
  - Medications and oral health
  - Any referrals, including dental specialist's name

Procedure code D0145 is limited to individual dentists certified by the Texas Health Steps dental program to perform this service. Training for certification as a First Dental Home provider is available as a free continuing education course on the THSteps website at [www.txhealthsteps.com](http://www.txhealthsteps.com).

Procedure codes D0120, D0150, D0160, D0170, D0180, D1208, and D8660 are denied if procedure code D0145 is submitted for the same DOS by any provider. A First Dental Home examination is limited to one service per day and ten services per client lifetime with at least 60 days between visits by any provider.

### 3.2.10 Teledentistry Services

Teledentistry services may be reimbursed by Texas Medicaid. When provided as a teledentistry service procedure code D0120 or D0140, must be billed with teledentistry procedure code D9995.

Teledentistry refers to the use of communication technology by a dentist to provide dental care services to a patient at a different physical location than the office setting.

Texas Health Steps dental providers must follow the rules and regulations of the Texas Dental Practice Act and Texas Board of Dental Examiners (TSBDE) in regard to the practice of teledentistry and the permissible work that may be delegated to a licensed dental hygienist or dental assistant.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information on Medicaid services provided through telecommunications.

Dental services delivered using teledentistry must meet the same standard of care as the same dental health service or procedure provided in an in-person setting.

For dental services delivered through a dental maintenance organization (DMO), providers must refer to the individual DMO benefit package for information on teledentistry services.

The service must be delivered using only synchronous real-time audiovisual technologies.

The client or parent/guardian must agree to receiving the teledentistry service.

Services provided through teledentistry outside of the frequency specified in the periodicity schedule may be reimbursed when medically necessary and criteria for procedure code D0120 or D0140 are met.

A periodic oral evaluation (procedure code D0120) may be delivered as a teledentistry service when the following criteria are met:

- The client must be 3 years through 20 years of age.
- The teledentistry platform must be operated at the patient site by a dental hygienist trained in its operation.

A limited problem-focused oral evaluation (procedure code D0140) may be delivered as a teledentistry service when the following criteria are met:

- The client must be birth through 20 years of age.
- The teledentistry platform must be operated at the patient site by a dental assistant or hygienist trained in its operation.

#### Synchronous Teledentistry

Real-time encounter procedure code D9995 must be included on the claim form when procedure code D0120 or D0140 is provided as a teledentistry service. Procedure code D9995 is not separately reimbursable.

When procedure code D0120 or D0140 is provided as a teledentistry service, additional documentation in the client's dental record must indicate that the service was provided using synchronous real-time audiovisual technologies. The documentation must include the following:

- The name and credentials of the dental health care professional
- The location of the dentist at the time of service

### 3.2.11 Dental Referrals by THSteps Primary Care Providers

Dental providers may receive referrals for clients who are 6 months of age and older from THSteps primary care providers. The primary care provider must provide information about the initiation of routine dental services with the recommendation to the client's parent or guardian that an appointment be scheduled with a dental provider in order to establish a dental home. If a THSteps dental checkup

reveals a dental health condition that requires follow-up diagnosis or treatment, the provider performing the dental checkup should assist the client in planning follow-up care within their practice or in making a referral to another qualified dental provider.

**Note:** *For clients who are 20 years of age and younger, the client's guardian may refer the client for dental services or a client of legal age may refer themselves for dental services.*

### 3.2.12 Change of Provider

A provider may refer a client to another dental provider for treatment for any of the following reasons:

- Treatment by a dental specialist such as a pediatric dentist, periodontist, oral surgeon, endodontist, or orthodontist is indicated and is in the best interests of the THSteps client.
- The services needed are outside the skills or scope of practice of the initial provider.

A provider may discontinue treatment if there is documented failure to keep appointments by the client, noncompliance with the treatment plan, or conflicts with the client or other family members. In any such action to discontinue treatment, providers must comply with 22 TAC §108.5, "Patient Abandonment."

The client also may select another provider, if desired. HHSC may refer the client to another provider as a result of adverse information obtained during a utilization review or resolution of a complaint from either provider or client.

#### 3.2.12.1 Interrupted or Incomplete Orthodontic Treatment Plans

Authorizations for orthodontic or extensive restorative treatment plans that have been prior authorized for a provider are not transferable to another provider. If a client's treatment plan is interrupted and the services are not completed, the original or new provider must request a new prior authorization to complete the interrupted, incomplete, and prior authorized treatment plan.

To complete the treatment plan, the client must be eligible for Medicaid. It is the provider's responsibility to verify the client's eligibility through TexMedConnect, the Medicaid Client Portal for Providers, or the TMHP Contact Center.

If the client does not return for the completion of services and there is a documented failure to keep appointments by the client, the dental provider who initiated the services may submit a claim for reimbursement in compliance with the 95-day filing deadline.

**Referto:** "Completion or Premature Termination of Orthodontic Services" in this handbook.

### 3.2.13 Periodicity for THSteps Dental Services

For clients who are 6 months through 20 years of age, dental checkups may occur at 6-month (181-day) intervals. Texas Medicaid has adopted the AAPD's "Guideline on Periodicity of Examination, Preventive Dental Services, Anticipatory Guidance/Counseling, and Oral Treatment for Infants, Children, and Adolescents" to serve as a guide and reference for dentists when scheduling and providing services to THSteps clients.

In November 2004, the ADA, in conjunction with the FDA, established "Guidelines for Prescribing Dental Radiographs." The guidelines include type of encounters relevant to the client's age and dental developmental stage. Texas Medicaid has adopted the ADA guidelines to serve as a guide and reference for dentists who treat THSteps clients.

**Referto:** "Appendix G. American Academy of Pediatric Dentistry Periodicity Guidelines" in this handbook.

THSteps dental providers may provide any medically necessary dental services such as emergency, diagnostic, preventive, therapeutic, and orthodontic services that are within the Texas Medicaid guidelines and limitations specified for each area as long as the client's Medicaid eligibility is current for the date that dental services are being provided.

### 3.2.13.1 Exceptions to Periodicity

If a periodic dental checkup has been conducted within the last six months, the client still may be able to receive another periodic dental checkup in the same six-month period by any provider. For THSteps clients, exceptions to the six-month periodicity schedule for dental checkup services may be approved for one of the following reasons:

- Medically necessary service, based on risk factors and health needs (includes clients who are birth through 6 months of age).
- Required to meet federal or state exam requirements for Head Start, daycare, foster care, preadoption, or to provide a checkup prior to the next periodically-due checkup if the client will not be available when due. This includes clients whose parents are migrant or seasonal workers.
- Clients' choice to request a second opinion or change service providers (not applicable to referrals).
- Subsequent therapeutic services necessary to complete a case for clients who are 5 months of age and younger when initiated as emergency services, for trauma, or early childhood caries.
- Medical checkup prior to a dental procedure requiring general anesthesia.
- A First Dental Home client can be seen up to ten times within the age of 6 through 35 months.

It is the provider's responsibility to verify that the client is eligible for the date that dental services are to be provided. Eligibility may be verified through TexMedConnect, the Medicaid Client Portal for Providers, or the TMHP Contact Center.

When the need for an exception to periodicity is established, a narrative explaining the reason for the exception to periodicity limitations must be documented in the client's file and on the claim submission. For claims filed electronically, check "yes" when prompted. For claims filed on paper, place comments in Block 35.

For ICF-IID clients who are 21 years of age and older, the periodicity schedule for preventive dental procedures (exams, prophylaxis, fluoride, and radiographs) does not apply.

### 3.2.14 Tooth Identification (TID) and Surface Identification (SID) Systems

Claims are denied if the procedure code is not compatible with TID or SID. Use the alpha characters to describe tooth surfaces or any combination of surfaces. For SID designation on anterior teeth, use facial (F) and incisal (I). For SID purposes, use buccal (B) and occlusal (O) designations for posterior teeth.

| SID      | SID | SID | SID   |
|----------|-----|-----|-------|
| Buccal   | DB  | DFI | DLIF  |
| Distal   | DF  | DFL | DOLB  |
| Facial   | DI  | DFM | MIDF  |
| Incisal  | DL  | DIL | MIDL  |
| Lingual  | DO  | DLB | MIDLF |
| Mesial   | IL  | DLM | MIFL  |
| Occlusal | MB  | DOB | MLBD  |
|          | MI  | DOL | MLDF  |
|          | ML  | ILF | MODB  |
|          | MO  | MBD | MODL  |
|          | OB  | MID | MODLB |
|          | OL  | MIF | MOLB  |
|          |     | MLB |       |
|          |     | MLF |       |
|          |     | MLI |       |
|          |     | MOB |       |
|          |     | MOD |       |
|          |     | MOL |       |
|          |     | OBL |       |

### 3.2.14.1 Supernumerary Tooth Identification

Each identified permanent tooth and each identified primary tooth has its own identifiable supernumerary number. This developed system can be found in the Current Dental Terminology (CDT) published by the ADA.

The TID for each identified supernumerary tooth will be used for paper and electronic claims and can only be submitted for payment with the following procedure codes:

- For primary teeth only: D7111.
- For both primary and permanent teeth the following codes can be submitted: D7140, D7210, D7220, D7230, D7240, D7241, D7250, D7285, D7286, and D7510.

| Permanent Teeth Upper Arch |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |
|----------------------------|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|
| Tooth #                    | 1  | 2  | 3  | 4  | 5  | 6  | 7  | 8  | 9  | 10 | 11 | 12 | 13 | 14 | 15 | 16 |
| Super #                    | 51 | 52 | 53 | 54 | 55 | 56 | 57 | 58 | 59 | 60 | 61 | 62 | 63 | 64 | 65 | 66 |

| Permanent Teeth Lower Arch |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |    |
|----------------------------|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|----|

### 3.2.15 Medicaid Dental Benefits, Limitations, and Fee Schedule

For THSteps clients, dental procedure limitations may be waived when all the following have been met. The dental procedure is:

- Medically necessary and FFP is available for it.
- Prior authorized by the TMHP Dental Director.
- Properly documented in the client's record.

**Referto:** Subsection 3.3, "Documentation Requirements" in this handbook.

For ICF-IID clients, services designated as CCP-type are available. In the "Limitations" column of the fee schedule, abbreviations indicate the age range limitations and documentation requirements. The following abbreviations also appear in a table at the bottom of each page of the fee schedule:

| Acronym | Description                                                                                                    |
|---------|----------------------------------------------------------------------------------------------------------------|
| A       | Age range limitations                                                                                          |
| CCP     | Payable under CCP for clients who are 20 years of age and younger when THSteps benefits or limits are exceeded |
| DOS     | Date of service                                                                                                |
| FMX     | Intraoral radiographs—complete series                                                                          |
| MTID    | Missing tooth ID(s)                                                                                            |

| Acronym | Description                                                                                                                                                          |
|---------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| N       | Narrative of medical necessity for the procedure must be retained in the client's record                                                                             |
| NC      | Not reimbursed by Medicaid. Services may not be charged to the client.                                                                                               |
| PATH    | Pathology report must accompany the claim and must be retained in the client's record                                                                                |
| PC      | Periodontal charting must be retained in the client's record                                                                                                         |
| PHO     | Preoperative and postoperative photographs required and must be maintained in the client's medical record                                                            |
| PPXR    | Preoperative and postoperative radiographs are required when the procedure is performed and must be retained in the client's record; do not send with initial claims |
| PXR     | Preoperative radiographs are required when the procedure is performed and must be retained in the client's record; do not send with initial claims                   |

### 3.2.16 Restorative Services

| Procedure Code                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                             |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|
| <b>Amalgam Restorations—Direct (Including Polishing)</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                             |
| Procedure codes D2140, D2150, D2160, and D2161 are benefits for clients who are 21 years of age or older residing in an ICF-IID facility.                                                                                                                                                                                                                                                                                                                                                                                                   |                                             |

| For procedure codes D2510 through D2664, inlay/onlay (permanent teeth only), porcelain is allowed on all teeth. Prior authorization is required for all onlays or permanent crowns. Procedure codes D2542, D2543, D2544, and D2662 through D2664 are payable once per client, per tooth every ten years. Additional onlays may be considered with prior authorization and documentation of medical necessity.                                                                                                                               |                                             |

| A=Age range limitations, N=Narrative required, FMX=Full-mouth radiographs (nonpanoramic), MTID=Missing tooth ID(s), PPXR=Preoperative and postoperative radiographs required, PXR=Preoperative radiographs required, PHO=Preoperative and postoperative photographs required, PC=Periodontal charting required, PATH=Pathology report required and must be retained in the client's record, CCP=Comprehensive Care Program, NC=No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter |                                                                                                                                                                           |

The following dental restoration procedure codes will be limited to once per rolling year, for the same TID, by the same provider:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| D2140           | D2150 | D2160 | D2161 | D2330 | D2331 | D2332 | D2391 | D2392 | D2393 |
| D2394           |       |       |       |       |       |       |       |       |       |

Procedure codes D2335 and D2390 when provided to primary teeth will be limited to once per lifetime, same TID, any provider, and will be denied if any of the following anterior restoration procedure codes have been paid within a rolling year, for the same TID, by the same provider:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| D2140           | D2150 | D2160 | D2161 | D2330 | D2331 | D2332 | D2335 | D2390 | D2930 |
| D2932           | D2933 | D2934 |       |       |       |       |       |       |       |

Total reimbursement for direct restorations on primary teeth cannot exceed the total dollar amount for a prefabricated stainless steel crown on a primary tooth (procedure code D2930) per TID, per date of service.

Total reimbursement for direct restorations on permanent teeth cannot exceed the total dollar amount for a prefabricated stainless steel crown on a permanent tooth (procedure code D2931) per TID, per date of service. This limitation does not apply to procedure code D2335 for primary or permanent teeth.

### 3.2.16.1 Direct Restorations and Other Restorative Services

Direct restoration of a primary tooth with the use of a prefabricated crown will be considered as a once in a lifetime restoration, same TID, any provider. Exceptions may be considered when pre-treatment X-ray images, intra-oral photos, and narrative documentation clearly support the medical necessity for the replacement of the prefabricated crown (procedure codes D2930, D2932, D2933, and D2934) during pre-payment review.

Procedure code D2930 will be denied if the following procedure codes have been billed within a rolling year, for the same TID, by the same provider:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| D2140           | D2150 | D2160 | D2161 | D2330 | D2331 | D2332 | D2335 | D2390 | D2391 |
| D2392           | D2393 | D2394 |       |       |       |       |       |       |       |

Procedure codes D2933 and D2934 will be denied if the following procedure codes have been billed within a rolling year, for the same TID, by the same provider:

| Procedure Codes |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|
| D2140           | D2150 | D2160 | D2161 | D2330 | D2331 | D2332 | D2335 | D2390 |

Procedure codes D2931 and D2932 will be denied if the following procedure codes have been billed within a rolling year, for the same TID, by the same provider:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| D2140           | D2150 | D2160 | D2161 | D2330 | D2331 | D2332 | D2335 | D2390 | D2391 |
| D2392           | D2393 | D2394 | D2931 | D2932 |       |       |       |       |       |

### 3.2.17 Endodontics Services

Therapeutic pulpotomy (procedure code D3220) and apexification and recalcification procedures (procedure codes D3351, D3352, and D3353) are considered part of the root canal (procedure codes D3310, D3320, and D3330) or retreatment of a previous root canal (procedure codes D3346, D3347, and D3348). When therapeutic pulpotomy or apexification and recalcification procedures are submitted with root canal codes, the reimbursement rate is adjusted to ensure that the total amount reimbursed does not exceed the total dollar amount allowed for the root canal procedure.

Reimbursement for a root canal includes all appointments necessary to complete the treatment. Pulpotomy and radiographs performed pre, intra, and postoperatively are included in the root canal reimbursement.

Root canal therapy that has only been initiated, or taken to some degree of completion, but not carried to completion with a final filling, may not be submitted as a root canal therapy code. It must be submitted using code D3999 with a narrative description of what procedures were completed in the root canal therapy.

Documentation supporting medical necessity must be kept in the client's record and include the following: the medical necessity as documented through periapical radiographs of tooth treated showing pre-treatment, during treatment, and post-treatment status; the final size of the file to which the canal was enlarged; and the type of filling material used. Any reason that the root canal may appear radiographically unacceptable must be documented in the client's record.

If the client is pregnant and does not want radiographs, use alternative treatment (temporary) until after delivery.

Direct pulp caps (procedure code D3110) and indirect pulp caps (procedure code D3120) are a benefit for permanent teeth only (TID 1-32).

Direct pulp caps may be reimbursed when billed with the following procedure codes for the same tooth ID on the same date of service by the same provider.

| Procedure Codes |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|
| D2140           | D2150 | D2160 | D2161 | D2330 | D2331 | D2332 | D2335 | D2390 |
| D2391           | D2392 | D2394 | D2510 | D2520 | D2530 | D2542 | D2543 | D2544 |

### 3.2.18 Periodontal Services

Procedure codes D4210 and D4211, when submitted for clients who are 12 years of age and younger, will be initially denied, but may be appealed with documentation of medical necessity. Preoperative and postoperative photographs are required for the following procedure codes: D4210, D4211, D4270, D4273, D4275, D4276, D4277, D4278, D4283, D4285, D4355, and D4910.

Procedure codes D4283 and D4285 are limited to three teeth per site, same day same provider. Procedure code D4283 must be billed along with procedure code D4273 and procedure code D4285 must be billed along with procedure code D4275 on the same claim, for the same date of service, by the same provider.

Preoperative and postoperative photographs are required when medical necessity is not evident on radiographs for the following procedure codes: D4240, D4241, D4245, D4266, and D4267. Documentation is required when medical necessity is not evident on radiographs for the following procedure codes: D4210, D4211, D4240, D4241, D4245, D4266, D4267, D4270, D4273, D4275, D4276, D4277, D4278, D4283, D4285, D4355, and D4910.

Procedure code D4278 must be billed on the same date of service as procedure code D4277 or the service will be denied.

Full mouth debridement (procedure code D4355) will be denied when submitted for the same date of service as the following procedure codes by any provider:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| D4210           | D4211 | D4230 | D4231 | D4240 | D4241 | D4245 | D4249 | D4260 | D4261 |
| D4266           | D4267 | D4270 | D4273 | D4274 | D4275 | D4276 | D4277 | D4278 | D4283 |
| D4285           | D4381 | D4910 | D4920 | D4999 |       |       |       |       |       |

Claims for preventive dental procedure codes D1110, D1120, D1206, D1208, D1351, and D1352 will be denied when submitted for the same DOS as any D4000 series periodontal procedure codes.

Procedure codes D4266 and D4267 may be appealed with documentation of medical necessity. Medical necessity for third molar sites are:

- Medical or dental history documenting need due to inadequate healing of bone following third molar extraction, including the date of third molar extraction.

- Secondary procedure several months postextraction.
- Position of the third molar preoperatively.
- Postextraction probing depth to document continuing bony defect.
- Postextraction radiographs documenting continuing bony defect.
- Bone graft and barrier material used.

Medical necessity for other than third molar sites are:

- Medical or dental history documenting comorbid condition (e.g., juvenile diabetes, cleft palate, avulsed tooth or teeth, traumatic oral injuries).
- Intra- or extra-oral radiographs of treatment site(s).
- If not radiographically evident, intraoral photographs are optional unless requested preoperatively by HHSC or its agent.
- Periodontal probing depths.
- Number of intact walls associated with an angular bony defect.
- Bone graft and barrier material used.

| Procedure Code                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Limitations                                                                                                                                                                                                                     |

| <b>A=Age range limitations, N=Narrative required, FMX=Full-mouth radiographs (nonpanoramic), MTID=Missing tooth ID(s), PPXR=Preoperative and postoperative radiographs required, PXR=Preoperative radiographs required, PHO=Preoperative and postoperative photographs required, PC=Periodontal charting required, PATH=Pathology report required and must be retained in the client's record, CCP=Comprehensive Care Program, NC= No charge to Medicaid and may not bill the client, and *= Services payable to an FQHC for a client encounter</b> |                                                                                |

Any maxillary denture rebase or reline (procedure codes D5710, D5720, D5730, D5740, D5750, and D5760) will be denied when performed within one rolling year of a maxillary full or partial denture (procedure codes D5110, D5130, D5211 and D5213), any provider.

Any mandibular denture rebase or reline (procedure codes D5711, D5721, D5731, D5741, D5751, and D5761) will be denied when performed within one rolling year of a mandibular full or partial denture (procedure codes D5120, D5140, D5212, and D5214), any provider.

For an existing full or partial maxillary denture, only one denture rebase or reline procedure (procedure code D5710, D5720, D5730, D5740, D5750 or D5760) may be reimbursed every three rolling years, same provider.

For an existing full or partial mandibular denture, only one denture rebase or reline procedure (procedure code D5711, D5721, D5731, D5741, D5751 or D5761) may be reimbursed every three rolling years, same provider.

### 3.2.20 Prosthodontic (Fixed) Services

Prosthodontic procedure codes require prior authorization.

**Referto:** Subsection 3.2.29, “Mandatory Prior Authorization” in this handbook for documentation requirements.

Periapical radiographs are required for each tooth involved in the authorization request. The criteria used by the TMHP Dental Director are:

- At least one abutment tooth requires a crown (based on traditional requirements of medical necessity and dental disease).
- The space cannot be filled with a removable partial denture.
- The purpose is to prevent the drifting of teeth in all dimensions (anterior, posterior, lateral, and the opposing arch).
- Each abutment or each pontic constitutes a unit in a bridge.
- Porcelain is allowed on all teeth.

| Procedure Code                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Limitations              |

### 3.2.21 Oral and Maxillofacial Surgery Services

All oral surgery procedures include local anesthesia and visits for routine postoperative care. Suturing is included in oral surgery procedures unrelated to trauma and is not separately reimbursable.

| Procedure Code                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Limitations                                                                                         |

| <p>Procedure code D9630 is not payable for take home fluorides or drugs. Prescriptions should be given to clients to be filled by the pharmacy for these medications as the pharmacy is reimbursed by the Medicaid Vendor Drug Program. Procedure code D9630 is payable for medications (antibiotics, analgesics, etc.) administered to a client in the provider's office. Documentation of dosage and route of administration must be provided in the Remarks section of the claim.</p> <p><i>The Outpatient Drug Services Handbook (Vol. 2, Provider Handbooks).</i></p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

### **3.2.22.1 Benefit Limitations for Adjunctive General Services**

Procedure code D9110 is a benefit for the following:

- Sedative or periodontal dressing
- Starting root canal procedure; i.e., open and drain tooth or re-medication of previously opened tooth
- Smoothing fractured tooth that is cutting lips or cheek
- Debridement or curettage of wound
- Excision of operculum over an erupting tooth
- Limited gingivectomy
- Suture removal by dentist other than the dentist who placed suture(s)
- Placement of a temporary crown by other than the patient's regular dentist and one who is not in the process, has not previously, or does not in the future intend to perform an acrylic, polycarbonate, stainless steel or cast crown on this same tooth
- Tissue conditioning of a full or partial denture
- Removal of spontaneously or post-surgically sequestered bone spicule
- Spot or limited scaling and root planing
- Procedures necessary to treat a dry socket
- Procedures necessary to control bleeding
- Non-surgical reduction of TMJ dislocation
- Procedures necessary to relieve pain associated with pericoronitis, particularly third molars

Procedure code D9110 is not a benefit for the following:

- A written prescription
- Medication given or administered
- Application of topical medication to teeth or gums
- Occlusal adjustments
- Oral hygiene instructions

### **3.2.23 Dental Anesthesia**

Dental providers must have the following information on file with TMHP to be eligible for reimbursement for dental anesthesia:

- A current anesthesia permit level issued by the TSBDE.
- Providers must have a Level 4 permit and an anesthesiology residency recognized by the American Dental Board of Anesthesiology to bill the enhanced rate for procedure codes D9222 and D9223.

All dental providers must comply with the American Academy of Pediatric Dentistry (AAPD) guidelines and TSBDE rules and regulations, including the standards for documentation and record maintenance for dental anesthesia.

### 3.2.23.1 Anesthesia Permit Levels

The following table shows the levels of anesthesia permits that are issued by the TSBDE:

| Permit Level                                       | Description of Level             | Permit Privileges                                                                    |
|----------------------------------------------------|----------------------------------|--------------------------------------------------------------------------------------|
| Nitrous oxide/oxygen inhalation conscious sedation |                                  | Stand-alone permit                                                                   |
| Level 1                                            | Minimal sedation                 | Stand-alone permit                                                                   |
| Level 2                                            | Moderate enteral                 | Automatically qualifies for Level 1 and Level 2 permit privileges                    |
| Level 3                                            | Moderate parenteral              | Automatically qualifies for Level 1, Level 2, and Level 3 permit privileges          |
| Level 4                                            | Deep sedation/general anesthesia | Automatically qualifies for Level 1, Level 2, Level 3, and Level 4 permit privileges |

All providers must have the appropriate anesthesia permit when proceeding with the procedure codes in the table below. The following table indicates the anesthesia procedure codes and the minimum anesthesia permit level to be reimbursed for the procedure codes:

| Procedure Codes | Minimum Anesthesia Permit Level                                                      |
|-----------------|--------------------------------------------------------------------------------------|
| D9211           | Level 3                                                                              |
| D9212           | Level 3                                                                              |
| D9222           | Level 4                                                                              |
| D9223           | Level 4                                                                              |
| D9230           | Stand-alone permit for nitrous oxide/oxygen inhalation conscious sedation or Level 1 |
| D9239           | Level 3                                                                              |
| D9243           | Level 3                                                                              |
| D9248           | Level 2                                                                              |

Local anesthesia in conjunction with operative or surgical services (procedure code D9215) is all inclusive with any other dental service and is not reimbursed separately.

### 3.2.23.2 Method for Counting Minutes for Timed Procedure Codes

All claims for reimbursement of procedure codes paid in 15-minute increments are based on the actual amount of billable time associated with the service. For those services for which the unit of service is 15 minutes (1 unit = 15 minutes), partial units should be rounded up or down to the nearest quarter hour.

Time intervals for 1 through 12 units are as follows:

| Units   | Number of Minutes             |
|---------|-------------------------------|
| 0 units | 0 minutes through 7 minutes   |
| 1 unit  | 8 minutes through 22 minutes  |
| 2 units | 23 minutes through 37 minutes |
| 3 units | 38 minutes through 52 minutes |
| 4 units | 53 minutes through 67 minutes |
| 5 units | 68 minutes through 82 minutes |
| 6 units | 83 minutes through 97 minutes |

| Units    | Number of Minutes               |
|----------|---------------------------------|
| 7 units  | 98 minutes through 112 minutes  |
| 8 units  | 113 minutes through 127 minutes |
| 9 units  | 128 minutes through 142 minutes |
| 10 units | 143 minutes through 157 minutes |
| 11 units | 158 minutes through 172 minutes |
| 12 units | 173 minutes through 187 minutes |

All levels of sedation must have clinical documentation and a narrative in the client's dental record to support the necessity of the service. Documentation must include the sedation record that indicates sedation start and end times in accordance with the American Academy of Pediatric Dentistry (AAPD) guidelines. The client's dental record must be available for review by representatives of HHSC or its designee.

### 3.2.24 Hospitalization and ASC/HASC

Dental services performed in an ASC, HASC, or a hospital (either as an inpatient or an outpatient) may be benefits of THSteps based on the medical or behavioral justification provided, or if one of the following conditions exist:

- The procedures cannot be performed in the dental office.
- The client is severely disabled.

To satisfy the preadmission history and physical examination requirements of the hospital, ASC, or HASC, a THSteps medical checkup for dental rehabilitation or restoration may be performed by the child's primary care provider. Physicians who are not enrolled as THSteps medical providers must submit claims for the examination of a client before the procedure with the appropriate evaluation and management procedure code from the following table:

| Procedure Code | Place of Service (POS)      |
|----------------|-----------------------------|
| 99202          | POS 1 (office)              |
| 99222          | POS 3 (inpatient hospital)  |
| 99282          | POS 5 (outpatient hospital) |

**Referto:** Subsection 3.2.13.1, "Exceptions to Periodicity" in this handbook.

**Note:** *The dental provider must submit claims to TMHP using the ADA Dental Claim Form to be considered for reimbursement through THSteps Dental Services.*

The dental provider is responsible for obtaining prior authorization for the services performed under general anesthesia. Hospitals, ASC's, and anesthesiologists must obtain the prior authorization number from the dental provider.

Contact the individual HMO for precertification requirements related to the hospital procedure. If services are precertified, the provider receives a precertification number effective for 90 days.

In those areas of the state with Medicaid managed care, the provider should contact the managed care plan for specific requirements or limitations. It is the dental provider's responsibility to obtain precertification from the client's HMO or managed care plan for facility and general anesthesia services if precertification is required.

To be reimbursed by the HMO, the provider must use the HMO's contracted facility and anesthesia provider. These services are included in the capitation rates paid to HMOs, and the facility or anesthesiologist risk nonpayment from the HMO without such approval. Coordination of all specialty care is the responsibility of the client's primary care provider. The primary care provider must be notified by the dentist or the HMO of the planned services.

Dentists providing sedation or anesthesia services must have the appropriate current permit from the TSBDE for the level of sedation or anesthesia provided.

The dental provider must be in compliance with the guidelines detailed in General Information.

**Note:** *Post-treatment authorization will not be approved for codes that require mandatory prior authorization.*

### 3.2.25 Orthodontic Services (THSteps)

Orthodontic services are a benefit for THSteps clients who are 13 years of age and older who have either permanent dentition and a severe handicapping malocclusion or one of the following special medical conditions:

- Cleft palate
- Post-head trauma injury involving the oral cavity
- Skeletal anomalies involving the oral cavity

A severe handicapping malocclusion is defined by Texas Medicaid as an occlusion that is severely functionally compromised and is described in detail in levels I, II, and III.

Exception to the age restriction may be considered for clients who are 12 years of age and younger if medical necessity has been verified by the dental director for one of the following:

- Crossbite therapy
- Limited orthodontic treatment and minor treatment to control harmful habits
- Special medical conditions

Dental services that are not covered by THSteps Dental Services but are medically necessary and allowable may be a benefit under CCP according to federal Medicaid guidelines and TAC.

As required by the Texas Human Resources Code, clients who are 14 years of age and younger must be accompanied to Texas Health Steps dental checkups and visits by the client's parent, legal guardian, or another adult who is authorized by the parent or legal guardian. The authorized adult can be the client's relative. The individual accompanying the client must wait for the client while the appointment takes place.

Exempt entities (school health clinics, Head Start program, or childcare facilities) that provide services must as a condition of reimbursement:

- Obtain written, unrevoked consent for the services from the client's parent or legal guardian within a one-year period before the date of service.
- Encourage parental involvement in and management of the health care of the clients who receive services from the clinic, program, or facility.

The following definitions of dentition established by the ADA's Current Dental Terminology (CDT) manual are recognized by Texas Medicaid:

- Primary Dentition: Teeth developed and erupted first in order of time.
- Transitional Dentition: The final phase of the transition from primary to adult teeth, in which the deciduous molars and canines are in the process of shedding and the permanent successors are emerging.

- **Adolescent Dentition:** The dentition that is present after the normal loss of primary teeth and prior to cessation of growth that would affect orthodontic treatment.
- **Adult Dentition:** The dentition that is present after the cessation of growth that would affect orthodontic treatment.

Texas Medicaid recognizes three orthodontic service levels for severe handicapping malocclusion. Each service level requires a different amount of time for treatment.

### **Level I Orthodontic Services**

Level I orthodontic services are dedicated to resolution of early signs of handicapping malocclusion in the early mixed dentition, which may significantly impact the health of the developing dentition, alveolar bone, and symmetrical growth of the skeletal framework.

Mixed dentition is defined by Texas Medicaid as a presence of the maxillary and mandibular permanent molars, and the maxillary and mandibular incisors fully erupted, and deciduous teeth.

Exceptions for cases of mixed dentition may be considered when the treatment plan includes extractions of the remaining primary teeth or in the case of a cleft palate.

Evidence of one of the following conditions should be clearly visible and submitted in the supporting documentation:

- An anterior crossbite that is associated with clinically apparent severe gingival inflammation and/or gingival recession or severe enamel wear
- A posterior crossbite with an associated midline deviation and asymmetric closure pattern
- Dental crossbites other than those described above will not be eligible for treatment in level I. However, special orthodontic appliances are a benefit for minor treatment to control harmful habits.

Procedure codes D8210 and D8220 may be reimbursed for level I orthodontic services.

### **Level II Orthodontic Services**

Level II orthodontic services are dedicated to the resolution of handicapping malocclusion in the transitional dentition, which is the final phase of the transition from primary to adolescent dentition during which the succedaneous permanent teeth are emerging or about to emerge.

Providers must use the appropriate procedure code that is applicable for banding when billing for level II orthodontic services.

Procedure codes D8010, D8020, and D8070 may be reimbursed for level II orthodontic services.

### **Level III Orthodontic Services**

Level III orthodontic services are dedicated to resolution of handicapping malocclusion in the adolescent dentition, which is indicated by the complete eruption of the permanent dentition with the possible exception of the full eruption of the second molars.

Procedure code D8080 may be reimbursed for level III orthodontic services.

### **Completion or Premature Termination of Orthodontic Services**

The completion of orthodontic services includes the construction of both maxillary and mandibular retainers in addition to the removal of all bands, brackets, and appliances.

Premature termination of orthodontic services includes all the following:

- The removal of brackets and arch wires
- The use of other special orthodontic appliances

- The fabrication of special orthodontic appliances
- The delivery of orthodontic retainers

Procedure code D8680 may be reimbursed for the completion or premature termination of orthodontic services.

### 3.2.25.1 Non-covered Services

Single arch comprehensive orthodontic treatment is not a benefit of Texas Medicaid.

Orthodontic services that are performed solely for cosmetic purposes are not a benefit of Texas Medicaid. Although aesthetics is an important part of self-esteem, services primarily for self-worth are not within the scope of this Texas Medicaid benefit.

Orthodontic services for a client who initiated orthodontic treatment through a private arrangement while Medicaid-eligible are not a benefit of Texas Medicaid.

An initial orthodontic or pre-orthodontic treatment visit (procedure code D8660) is considered part of the exam in an oral evaluation (procedure codes D0120, D0150, or D0160).

### 3.2.25.2 Comprehensive Orthodontic Treatment

Comprehensive orthodontic services (procedure code D8080) are restricted to clients who are 13 years of age and older or clients who have exfoliated all primary dentition.

ADA CDT procedure codes do not allow for any work-in-progress or partial submission of a claim by separating the three orthodontic components: diagnostic workup, orthodontic appliance (upper), or orthodontic appliance (lower).

### 3.2.25.3 Orthodontic Procedure Codes and Limitations

When submitting claims for orthodontic procedures, use the following procedure codes:

| Procedure Code                                          | Limitations                                                                                                               |
|---------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------|
| <b>Orthodontic Services</b>                             |                                                                                                                           |
| D0330*, D0340*, D0350*, D0470*, and D8660               | Denied when submitted with procedure codes D8070 and D8080.                                                               |
| D7280                                                   | A 1-20                                                                                                                    |
| D7997*                                                  | Not payable to the dentist who placed the appliance. Includes removal of arch bar and premature removal of braces. A 1-20 |
| <b>Limited Orthodontic Treatment</b>                    |                                                                                                                           |
| D8010*                                                  | Replaces D8050. Limited to one per lifetime, any provider.                                                                |
| D8020*                                                  | Replaces D8060. Limited to one per lifetime, any provider.                                                                |
| <b>Comprehensive Orthodontic Treatment</b>              |                                                                                                                           |
| D8070                                                   | Limited to one per lifetime, any provider.                                                                                |
| D8080*                                                  | Limited to one per lifetime, any provider.                                                                                |
| <b>Minor Treatment to Control Harmful Habits</b>        |                                                                                                                           |
| D8210*                                                  | Limited to once per arch, per lifetime, any provider.                                                                     |
| D8220*                                                  | Limited to once per arch, per lifetime, any provider.                                                                     |
| <b>Other Orthodontic Services</b>                       |                                                                                                                           |
| * = Services payable to an FQHC for a client encounter. |                                                                                                                           |

| Procedure Code                                          | Limitations                                                                                                                                                                                                         |
|---------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| D8660*                                                  | Denied when submitted for the same DOS as D0145 by any provider. Denied when submitted for the same DOS as D0120, D0150, or D0160 by the same provider. Denied when submitted with procedure codes D8070 and D8080. |
| D8670*                                                  | Limited to one service per calendar month, same provider.                                                                                                                                                           |
| D8680*                                                  | One retainer per arch per lifetime, any provider. May be replaced once because of loss or breakage (prior authorization is required).                                                                               |
| D8999                                                   |                                                                                                                                                                                                                     |
| * = Services payable to an FQHC for a client encounter. |                                                                                                                                                                                                                     |

The diagnostic workup is considered part of the pre-orthodontic visit (procedure code D8660). Reimbursement for the pre-orthodontic visit (procedure code D8660) may be considered when all bands, brackets, and appliances have been placed and active treatment has been initiated.

The orthodontic diagnostic workup procedures are considered part of the services provided under procedure codes D8210 and D8220 and are not reimbursed separately.

Panoramic radiographic images (procedure code D0330), cephalometric radiographic images (procedure code D0340), oral or facial photographic images obtained intraorally or extraorally (procedure code D0350), and diagnostic models (procedure code D0470) will be denied when billed with procedure code D8210 or D8220.

The orthodontic diagnostic workup procedures are considered part of the services provided under procedure codes D8010 or D8020 and are not reimbursed separately. Panoramic radiographic images (procedure code D0330), cephalometric radiographic images (procedure code D0340), oral or facial photographic images obtained intraorally or extraorally (procedure code D0350), and diagnostic models (procedure code D0470) will be denied when billed with procedure code D8010 or D8020.

Procedure code D0160 will be denied when submitted on the same date of service as procedure code D8080.

Cleft or craniofacial cases are eligible for more than one level of orthodontic services (level II and level III) per lifetime.

Procedure codes D8660 and D8670 may be reimbursed for additional comprehensive orthodontic services.

The length of treatment depends on the level of orthodontic services that the client receives as indicated below:

- Level I allows up to 10 monthly visits that are expected to be completed within 12 months unless an exception is authorized.
- Level II allows up to 22 monthly visits that are expected to be completed within 24 months unless an exception is authorized.
- Level III allows up to 22 monthly visits that are expected to be completed within 36 months unless an exception is authorized.

### 3.2.26 Submitting Local Codes for Orthodontic Procedures

To ensure appropriate claims processing, the local code reflecting the specific service is required on the claim.

For electronic submissions other than TexMedConnect submissions, providers must follow the steps below to ensure the correct local code is accurately applied to the appropriate claim detail:

- 1) Submit the DPC prefix in the first three bytes of NTE02 at the 2400 loop. Submit the DPC prefix only once.

- 2) Submit the remarks code (local code) in bytes 4–8, based on the order of the claim detail. Do not enter any spaces or punctuation between remarks codes unless to designate that the detail is not billed with procedure code D8210 or D8220.

**Example:** For a claim with three details, where details 1 and 3 are submitted with procedure code D8210 and detail 2 is not, enter the following information in the NTE02 at the 2400 loop: DPC1014D 1046D (The space shows that detail 2 needs no local code.)

**Example:** If all three details require a local code, enter DPC and the appropriate local codes in sequence without any spaces between the codes: DPC1024D1055D1056D (The absence of spaces indicates that local codes are needed for all three details.)

To submit using TexMedConnect, enter the local code into the Remarks Code field located under the Details header. The Remarks Code field is the field following the Procedure Code field. TexMedConnect submitters are not required to enter the DPC prefix because it is automatically placed in the appropriate field on the TexMedConnect electronic claim.

For paper claim submissions, providers must enter the local code in the Remarks section of the claim form.

Failure to follow the above steps does not cause the claim to be denied; however, manual intervention is required to process the claim, and a delay of payment may be the result.

Orthodontic procedure codes that were local codes used for prior authorization and reimbursement have been converted to Current Dental Terminology (CDT) (national) procedure codes.

The following procedures are not included in comprehensive treatment:

| CDT Procedure Code                                                       | Remarks Code | Description                           |
|--------------------------------------------------------------------------|--------------|---------------------------------------|
| D8660                                                                    | Z2009        | Initial orthodontic visit             |
| D8670                                                                    | Z2013        | Orthodontic adjustments, per month    |
| D7997*                                                                   | Z2016        | Premature appliance removal, per arch |
| *May only be paid to a provider not billing for comprehensive treatment. |              |                                       |

Procedure code D8080 is a comprehensive code and includes a diagnostic workup as well as all upper and lower orthodontic appliances (braces) necessary to treat the client.

| CDT Procedure Code | Remarks Code | Description                           |
|--------------------|--------------|---------------------------------------|
| D8080              | Z2009        | Diagnostic workup, approved           |
|                    | or           | or                                    |
|                    | Z2011        | Orthodontic appliance, upper (braces) |
|                    | or           | or                                    |
|                    | Z2012        | Orthodontic appliance, lower (braces) |

When a diagnostic workup is not approved, individual components may be considered for separate reimbursement. Use the following procedure codes:

| CDT Procedure Code | Remarks Code | Description                     |
|--------------------|--------------|---------------------------------|
| D0330              | Z2010        | Diagnostic workup, not approved |

| CDT Procedure Code | Remarks Code | Description                     |
|--------------------|--------------|---------------------------------|
| D0340              | Z2010        | Diagnostic workup, not approved |
| D0350              | Z2010        | Diagnostic workup, not approved |
| D0470              | Z2010        | Diagnostic workup, not approved |

Procedure code D8680 includes all retainers necessary to treat the client. Use the following remarks codes according to the services provided:

| Remarks Code | Description                     |
|--------------|---------------------------------|
| 1033D        | Mandibular, fixed, 2x4 retainer |
| 1034D        | Mandibular, fixed, 3x3 retainer |
| 1035D        | Mandibular, fixed, 4x4 retainer |
| Z2014        | Orthodontic retainer, upper     |
| Z2015        | Orthodontic retainer, lower     |

Procedure code D8010 includes a crossbite workup and removable appliance. Use the following remarks codes according to the services provided:

| Remarks Code | Description                            |
|--------------|----------------------------------------|
| 8110D        | Crossbite therapy, removable appliance |
| Z2018        | Crossbite, workup                      |

Procedure code D8020 includes a crossbite workup and the fixed appliance. Use the following remarks codes according to the services provided:

| Remarks Code | Description                        |
|--------------|------------------------------------|
| 8120D        | Crossbite therapy, fixed appliance |
| Z2018        | Crossbite, workup                  |

The orthodontic diagnostic workup procedures are considered inclusive procedures. Procedure codes D0330, D0340, D0350, and D0470 are denied when billed with a diagnostic workup procedure.

The following tables display the special fixed and removable orthodontic appliances. Under the current provisions of the Health Insurance Portability and Accountability Act (HIPAA), all fixed appliances are designated as procedure code D8220, and all removable appliances are designated as procedure code D8210. These are entered as a line item on the paper American Dental Association (ADA) Dental Claim Form with the appropriate fee. However, the remarks codes (former local procedure codes), as appropriate and listed below, also need to be entered on the authorization request form and in the Remarks field of the dental claim form (paper and electronic) to ensure correct authorization, accurate records, and reimbursement. *Failure to bill the correct procedure codes may result in claim processing delays.*

**Note:** *Prior authorization must be requested using both the CDT procedure code and the remarks codes for orthodontia services.*

Use the following remarks codes in the Remarks field for fixed appliances (procedure code D8220):

| Remarks Code | Fixed Appliances Description         |
|--------------|--------------------------------------|
| 1000D        | Appliance for horizontal projections |

| Remarks Code | Fixed Appliances Description                                                                            |
|--------------|---------------------------------------------------------------------------------------------------------|
| 1001D        | Appliance for recurved springs                                                                          |
| 1002D        | Arch wires for crossbite correction, for total treatment                                                |
| 1003D        | Banded maxillary expansion appliance                                                                    |
| 1008D        | Bonded expansion device                                                                                 |
| 1012D        | Crib                                                                                                    |
| 1015D        | Distalizing appliance with springs                                                                      |
| 1016D        | Expansion device                                                                                        |

### 3.2.27 Emergency or Trauma Related Services for All THSteps Clients and Clients Who Are 5 Months of Age and Younger

THSteps clients who are birth through 5 months of age are not eligible for routine dental checkups; however:

- They can be seen for emergency dental services by the dentist at any time for trauma, early childhood caries, or other oral health problems.
- They may be referred to a dentist by their primary care provider when a medical checkup identifies the medical necessity for dental services.

Prior authorization is not required for emergency or trauma-related dental services. Claims for these dental services must be filed separately from nonemergency dental services. Only one emergency or trauma-related dental claim per client, per day, may be considered for reimbursement. Routine therapeutic procedures are not considered emergency or trauma-related procedures.

When submitting a claim for emergency or trauma-related dental services, the provider must:

- Enter the word “Emergency” or “Trauma” in the description field (Block 30) of the claim form (also enter a brief description of the CDT procedure code used). Claims are subject to retrospective review. If no comments are indicated on the claim form, the payment may be recouped.
- If checking the Other Accident box, briefly describe in the Remarks field, Block 35 of the claim form, what caused the emergency or trauma.
- Check the appropriate box in Block 45, Treatment Resulting From, of the claim form (the options to check are Occupational Illness/Injury, Auto Accident, or Other Accident).

Documentation to support the diagnosis and treatment of trauma must be retained in the client’s record.

**Note:** *Indicating Trauma in the description field allows the provider to be reimbursed for treatment on an emergency, continuing, and long-term basis without regard to periodicity, subject to the client’s eligibility and program limitations. An exception to periodicity for THSteps dental services is granted automatically for immediate treatment and any future follow-up treatment, as long as each claim submitted for payment is marked “Trauma” in the Description field, Block 30, and the original date of treatment or incident is referenced in the Remarks field, Block 35.*

**Referto:** Subsection 6.7, “American Dental Association (ADA) Dental Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*).

Subsection 4.1, “General Medicaid Eligibility” in “Section 4: Client Eligibility” (*Vol. 1, General Information*).

Subsection 9.4, “Doctor of Dentistry Practicing as a Limited Physician” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*).

Subsection 3.2.15, “Medicaid Dental Benefits, Limitations, and Fee Schedule” in this handbook.

### **3.2.28 Emergency Services for Medicaid Clients Who Are 21 Years of Age and Older**

Limited dental services are available for clients who are 21 years of age and older (not residing in an ICF-IID facility) whose dental diagnosis is secondary to and causally related to a life-threatening medical condition.

**Referto:** Subsection 9.4, “Doctor of Dentistry Practicing as a Limited Physician” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*) for complete description and details.

#### **3.2.28.1 Long Term Care (LTC) Emergency Dental Services**

HHSC provides a limited range of dental services for Medicaid-eligible residents of LTC facilities. All claims for dental services provided to LTC residents are submitted to HHSC. For information, providers should contact the appropriate LTC facility or HHSC at 1-800-252-9240.

#### **3.2.28.2 Laboratory Requirements**

Dental laboratories must be registered with TSBDE laboratories, and technicians must not be under restrictions imposed by TSBDE or a court.

### **3.2.29 Mandatory Prior Authorization**

Mandatory prior authorization is required for consideration of reimbursement to dental providers who render the following services:

- Orthodontia
- Endodontic endosseous implants
- Fixed prosthetic services
- Removable prosthodontics (procedure codes D5951, D5952, D5953, D5954, D5955, D5958, D5959, and D5960)
- Dental general anesthesia
- All inlays/onlays or permanent crowns
- Procedure code D4276
- Nonsurgical periodontal service (procedure codes D4341 and D4342)
- Procedure code D7272
- Procedure code D7283
- Procedure code D7472

- Limited dental services for clients who are 21 years of age and older (not residing in an ICF-IID facility) whose dental diagnosis is secondary to and causally related to a life-threatening medical condition
- Cone beam imaging

Approved orthodontic treatment plans must be initiated before the client's loss of Medicaid eligibility and before the 21st birthday, and must be completed within 36 months of the authorization date. Authorization for other procedures is valid for up to 90 days.

To obtain prior authorization for crowns, onlays, endodontic endosseous implants, and fixed prosthodontics, a prior authorization form together with documentation supporting medical necessity and appropriateness must be submitted. Required documentation includes, but is not limited to:

- The THSteps Dental Mandatory Prior Authorization Request Form.
- Current, dated, pre-operative periapical radiographs completely showing the apex of the tooth to be treated.
- Current, dated, pre-operative full arch radiographs are required for fixed prosthodontics.
- Documentation supporting that the mouth is free of disease; no untreated periodontal or endodontic disease, or rampant caries.
- Documentation supporting only one virgin abutment tooth; at least one tooth must require a crown unless a Maryland Bridge is being considered.
- Provider documentation supporting the medical necessity and appropriateness of the recommended treatment.
- Tooth Identification (TID) System noting only permanent teeth.
- Documentation supporting that a removable partial is not a viable option to fill the space between the teeth.

Prior authorization will not be given when films show two abutment teeth (virgin teeth do not require a crown, except for Maryland Bridge) or there is untreated periodontal or endodontic disease, or rampant caries which would contraindicate the treatment.

**Referto:** Subsection 9.4, "Doctor of Dentistry Practicing as a Limited Physician" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

Removable prosthodontics (procedure codes D5951, D5952, D5953, D5954, D5955, D5958, D5959, and D5960) for clients with cleft lip or cleft palate requires prior authorization with a completed THSteps Dental Mandatory Prior Authorization Request Form and narrative documenting the medical need for these appliances. Additional information may be requested by the TMHP Dental Director if necessary before making a determination.

The prior authorization number is required on claims for processing. If the client is not eligible for Medicaid on the DOS or the claim is incomplete, it will affect reimbursement. Prior authorization is a condition for reimbursement; it is not a guarantee of payment.

**Note:** *Post-treatment authorization will not be approved for codes that require mandatory prior authorization.*

**Referto:** [THSteps Dental Mandatory Prior Authorization Request Form](https://www.tmhp.com) on the TMHP website at [www.tmhp.com](https://www.tmhp.com).

### 3.2.29.1 Cone Beam Imaging

Prior authorization is required for procedure code D0367.

Cone beam imaging is used to determine the best course of treatment for cleft palate repair, skeletal anomalies, post-trauma care, implanted or fixed prosthodontics, and orthodontic or orthognathic procedures. Cone beam imaging is limited to initial treatment planning, surgery, and postsurgical follow up.

To obtain prior authorization, a THSteps Dental Mandatory Prior Authorization Request Form must be submitted with documentation supporting medical necessity and appropriateness. Required documentation includes, but is not limited to, the following:

- Presenting conditions
- Medical necessity
- Status of the client's treatment

### **3.2.29.2 General Anesthesia for Dental Treatment**

Prior authorization is required for the use of general anesthesia while rendering treatment (to include the dental service fee, the anesthesia fee, and facility fee) regardless of place of service. A client must meet the minimum requirement of 22 total points on the Criteria for Dental Therapy Under General Anesthesia form.

**Referto:** [Criteria for Dental Therapy Under General Anesthesia](http://www.tmhp.com) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

In those areas of the state with Medicaid Managed Care, precertification or approval is required from the client's health maintenance organization (HMO) for anesthesia and facility charges. It is the dental provider's responsibility to obtain precertification from the client's HMO or managed care plan for facility and general anesthesia services. A medical checkup prior to a dental procedure requiring general anesthesia is considered an exception to THSteps periodicity. A referral to the client's primary care physician is not required. Prior authorization is available for exceptions to periodicity. Providers must include all appropriate supporting documentation with the submittal. The criteria for general anesthesia applies only to treatment of clients who are 20 years of age and younger or ICF-IID program clients.

#### **3.2.29.2.1 Dental Therapy Under General Anesthesia**

Providers must comply with TSBDE Rules and Regulations, Title 22 TAC, Part 5, Chapter 110, §§110.6–110.10. Any anesthesia type services are paid only to the provider. The dental provider is responsible for determining whether a client meets the minimum criteria necessary for receiving general anesthesia. A local anesthesia fee is not paid in addition to other restorative, operative, or surgical procedure fees.

For clients who are six years of age or younger, the following will apply:

- All Level 4 sedation/general anesthesia services provided by a dentist (procedure codes D9222 and D9223), and any anesthesia services provided by an anesthesiologist (M.D./D.O.) or certified registered nurse anesthetist (CRNA) to be provided in conjunction with dental therapeutic services (procedure code 00170 with modifier U3) must be prior authorized.
- The dentist performing the therapeutic dental procedure is responsible for obtaining prior authorization from TMHP and is responsible for providing the anesthesia prior authorization information to the anesthesiology provider.
- Prior authorization for both dental services and Level 4 sedation/general anesthesia service is mandatory for the reimbursement of either service.

Dental general anesthesia using procedure code D9222, D9223, or 00170 with modifier U3 is limited to once per six calendar months per client, by any provider. Add-on procedure code D9223 must be billed in conjunction with primary procedure code D9222, same provider.

Each distinct dental procedure code to be performed that requires prior authorization must be listed on the Texas Health Steps Dental Mandatory Prior Authorization Request Form. Repetitive dental procedure codes must be listed to indicate the total quantity to be performed.

Requests for prior authorization must include, but is not limited to, the following client-specific documents and information:

- A completed Criteria for Dental Therapy Under General Anesthesia form
- A completed THSteps Dental Mandatory Prior Authorization Request Form
- The location of where the procedure(s) will be performed (office, inpatient hospital, or outpatient hospital)
- A narrative unique to the client, detailing the reasons for the proposed level of sedation (indicate procedure code D9222, D9223, or 00170). The narrative must include a history of prior treatment, information about failed attempts at other levels of sedation, behavior in the dental chair, proposed restorative treatment (tooth ID and surfaces), urgent need to provide comprehensive dental treatment based on extent of diagnosed dental caries, and any relevant medical condition(s).
- Diagnostic quality radiographs or photographs

**Note:** *When appropriate radiographs or photographs cannot be taken prior to general anesthesia, the narrative must support the reasons for an inability to perform diagnostic services. For special cases that receive authorization, diagnostic quality radiographs or photographs will be required for payment and will be reviewed by the TMHP dental director.*

The current process of scoring 22 points on the Criteria for Dental Therapy Under General Anesthesia form does not guarantee authorization or reimbursement for clients who are six years of age and younger.

**Note:** *In cases of an emergency medical condition, accident, or trauma, prior authorization is not necessary. However, a narrative and appropriate pre- and post-treatment radiographs or photographs must be submitted with the claim, which will be reviewed by the TMHP dental director.*

A copy of the Criteria for Dental Therapy Under General Anesthesia form must be maintained in the client's dental record. The client's dental record must be available for review by representatives of the Health and Human Services Commission (HHSC) or its designee.

Prior authorization is required for medically necessary dental general anesthesia that exceeds once per six months, per client, any provider. The dental provider is responsible for obtaining prior authorization for the services performed under general anesthesia. Hospitals, ASCs, and anesthesiologists must obtain the prior authorization number from the dental provider.

**Referto:** [Criteria for Dental Therapy Under General Anesthesia](https://www.tmhp.com) on the TMHP website at [www.tmhp.com](https://www.tmhp.com). Dental rehabilitation or restoration services requiring general anesthesia may be performed in an office, inpatient, or outpatient facility.

Surgical services related to THSteps dental services requiring general anesthesia must be coded as follows:

- Procedure code 00170 with modifier U3 is for the anesthesiologist or certified registered nurse anesthetist (CRNA) to use on the claim form.
- Procedure code G0330 may be reimbursed for facility services in the outpatient hospital setting to ASCs and Hospital-based Ambulatory Surgical Centers (HASCs) for dental rehabilitation procedure(s) performed on a client who requires monitored anesthesia (e.g., general, intravenous sedation and the use of an operating room).
- An appropriate diagnosis code must be used on the claim form.

- Modifier U3 identifies that the service is associated with THSteps.

The claim forms used are the CMS-1500 or the UB-04 CMS-1450 paper claim forms. The examining physician, anesthesiologist, hospital, ASC, or HASC must submit claims to TMHP separately for the medical and facility components of their services.

**Referto:** [THSteps Dental Mandatory Prior Authorization Request Form](https://www.tmhp.com) on the TMHP website at [www.tmhp.com](https://www.tmhp.com).

The dental provider must include dental procedure codes and modifiers on the Texas Health Steps Dental Mandatory Prior Authorization Request Form for prior authorization to be considered for any Texas Health Steps dental services.

### 3.2.29.3 Orthodontic Services

Prior authorization is required for all levels of orthodontic services. Prior authorization includes the number of monthly visits and expected completion time according to the corresponding treatment level.

Orthodontic services do not include any related services outside those listed in this section (e.g., extractions or surgeries); however, all services must be included in the orthodontic treatment plan.

Approved orthodontic treatment plans must be initiated before clients lose Medicaid eligibility or reach 21 years of age, and all active orthodontic treatments must be completed within 36 months of the authorization date. Services cannot be added or approved after eligibility has expired.

**Note:** *If a client reaches 21 years of age or loses Medicaid eligibility before the authorized orthodontic services are completed, reimbursement is provided to complete the orthodontic treatment plan that was authorized and initiated while the client was 20 years of age or younger and eligible for Texas Medicaid as long as the orthodontic treatment plan is completed within the appropriate time frames.*

Any non-orthodontic service that is included as part of the treatment plan (extractions or surgeries) must be completed before the client loses eligibility or reaches 21 years of age in order to be reimbursed through Texas Medicaid. Services cannot be added or approved after Texas Medicaid eligibility has expired.

Once prior authorization is obtained, the provider is obligated to advise the client that he or she is able to receive the approved orthodontic service (including monthly orthodontic adjustment visits and retainers) even if the client loses eligibility or reaches his or her 21st birthday.

All requests must be reviewed by the TMHP Dental Director or other state dental contractor's board-eligible or board-certified orthodontist employee or consultant who is licensed in Texas.

To avoid unnecessary denials, providers must submit correct and complete information, including documentation for medical necessity for the services requested. Providers must maintain documentation of medical necessity in the client's medical record. Requesting providers may be asked for additional information to clarify or complete a request.

A completed Texas Health Steps (THSteps) Dental Mandatory Prior Authorization Request Form must be signed and dated by the performing dental provider. The completed authorization form must include the procedure codes for all services requested along with a written statement of medical necessity for the proposed orthodontic treatment.

#### Level I Orthodontic Services

The following documentation must be submitted with the prior authorization request for level I orthodontic services (procedure code D8210 or D8220):

- Radiographs (X-rays)
- Photographs
- Treatment plan

- Narrative of medical necessity

The completion of level I orthodontic services does not disqualify future level II or level III orthodontic services.

Level I orthodontic services will not be prior authorized if there is an indication that the client will qualify for level II or level III orthodontic services in the future.

### **Level II Orthodontic Services**

The following documentation must be submitted with the prior authorization request for level II orthodontic services (procedure codes D8010, D8020, and D8070):

- Digital diagnostic models or other type of 3D diagnostic images
- Radiographs (X-rays)
- Cephalometric radiographic image with tracings
- Photographs
- Treatment plan
- Narrative of medical necessity

Evidence of four of the following conditions must be submitted in the supporting documentation:

- Full cusp class II malocclusion with the distal buccal cusp of the maxillary first molar occluding in the mesial buccal groove of the mandibular first molar
- Full cusp class III malocclusion with the maxillary first molar occluding in the embrasure distal to the mandibular first molar or on the distal incline of the mandibular molar distal buccal cusp
- Overbite measurement of more than 5 mm
- Overjet measurement of more than 8 mm
- More than four congenitally absent teeth, including at least one anterior tooth
- Anterior crowding of more than 6 mm in the mandibular arch
- Anterior crossbite of at least two of the four maxillary incisors
- Generalized spacing in both arches of more than 6 mm in each arch
- Early impacted maxillary canine or mandibular canines, supported by radiographs indicating a severe mesial angulation of the erupting canine and the crown of the canine superimposed on and crossing the image of the maxillary lateral incisor

### **Level III Orthodontic Services**

The following documentation must be submitted with the prior authorization request for level III orthodontic services (procedure code D8080):

- Digital diagnostic models or other type of 3D diagnostic images
- Radiographs (X-rays)
- Cephalometric radiographic image with tracings
- Photographs
- Treatment plan
- Narrative of medical necessity

Evidence of four of the following conditions must be submitted in the supporting documentation:

- Full cusp class II malocclusion with the distal buccal cusp of the maxillary first molar occluding in the mesial buccal groove of the mandibular first molar
- Full cusp class III malocclusion with the maxillary first molar occluding in the embrasure distal to the mandibular first molar or on the distal incline of the mandibular molar distal buccal cusp
- Anterior tooth impaction: unerupted with radiographic evidence to support a diagnosis of impaction (lack of eruptive space, angularly malposed, and totally imbedded in the bone) as compared to ectopically erupted anterior teeth that may be malposed but have erupted into the oral cavity and are not a qualifying element
- Anterior crowding of more than 6 mm in the mandibular arch
- Anterior open bite demonstrating that all maxillary and mandibular incisors have no occlusal contact and are separated by a measurement more than 6 mm
- Posterior open bite should demonstrate a vertical separation by a measurement more than 5 mm for several posterior teeth, not to be confused with the delayed natural eruption of a few teeth
- Posterior crossbite with an associated midline deviation and mandibular shift, a Brodie bite with a mandibular arch totally encumbered by an overlapping buccally occluding maxillary arch, or a posterior maxillary arch totally lingually malpositioned to the mandibular arch
- Anterior crossbite should include more than two incisors in crossbite and demonstrate gingival inflammation, gingival recession, or severe enamel wear
- Overbite of more than 5 mm
- Overjet of more than 8 mm

### **Additional Services**

There may be exceptional circumstances that require additional treatment time, including but not limited to cases of craniofacial anomalies and cleft palate. Prior authorization for additional services will be reviewed and evaluated on an individual basis for medical necessity.

Prior authorization requests for additional services (procedure code D8670) must include the following:

- The reason for the additional monthly visits and the number of visits requested
- The name of the additional appliance in the case of a cleft palate treatment plan, if needed
- Recent radiographs (X-rays) showing the progress made to date
- Current photographs
- Current treatment plan

Additional treatment months may be considered for one of the following circumstances:

- The client is a child of a migrant farm worker.
- The client's orthodontic services were delayed because the client was temporarily in state custodial care (foster care).

### **Completion of All Levels of Orthodontic Services**

Prior authorization is required for the completion of treatment (last payment) and must be reviewed for proof of the completion of the case.

A prior authorization request for the completion of level II or level III (procedure code D8680) services must include the following:

- A post-treatment panoramic radiographic image

- Photographs
- A signed statement from the treating provider that the treatment is complete

#### 3.2.29.3.1 Premature Termination of Orthodontic Services

Prior authorization for the premature termination of orthodontic services (procedure code D8680) is required.

The prior authorization must include all of the following for consideration:

- A release form (or a copy) that must be signed by the parent or legal guardian or by the client if they are 18 years of age or older or an emancipated minor.
- Documentation of one of the following:
  - The client is uncooperative or noncompliant.
  - The client requested the removal of orthodontic appliances.
  - The client requested the removal of appliances due to exceptional circumstances, such as incarceration.
  - The client has mental health complications with a recommendation from the treating physician.
  - The client is in a foster care placement.
  - The client is a child of a migrant farm worker and intends to complete treatment later if Medicaid eligibility for orthodontic services continues.

#### 3.2.29.3.2 Transfer of Services

Prior authorization that is issued to a provider for orthodontic services is not transferable to another provider. The new provider must request a new prior authorization to complete the orthodontic treatment that was initiated by the original provider. The original prior authorization will be end-dated when services are transferred to another provider.

The new provider must obtain his or her own records, and the new request for orthodontic services must include the date of service on which the documentation was obtained (the date of service on which the records were produced) and the following supporting documentation:

- All of the documentation that is required for the original request
- The reason the client left the previous provider
- An explanation of the treatment status

The authorization request for clients who are undergoing orthodontic treatment services and subsequently become eligible for Medicaid are subject to the same requirements.

#### 3.2.29.3.3 Orthodontic Cases Initiated Through a Private Arrangement

Authorization may be given for continuation of orthodontic cases for clients who initiated orthodontic treatment through a private arrangement before becoming eligible for Medicaid.

Authorization will not be given for continuation of orthodontic cases for clients who initiated orthodontic treatment through a private arrangement and were eligible for Medicaid at the start of service.

### 3.2.30 THSteps and ICF-IID Dental Prior Authorization

Submit claims, dental correspondence, and THSteps and ICF-IID prior authorization requests to the appropriate address listed in the following table:

| Correspondence                                            | Address                                                                                                                                |
|-----------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|
| ADA dental claim forms                                    | Texas Medicaid & Healthcare Partnership<br>PO Box 200555<br>Austin, TX 78720-0555                                                      |
| All dental correspondence<br>Prior authorization requests | Texas Medicaid & Healthcare Partnership<br>Fee-for-Service and ICF-IID Dental Authorizations<br>PO Box 204206<br>Austin, TX 78720-4206 |

### 3.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including dental services. Dental services are subject to retrospective review and recoupment if documentation does not support the service submitted for payment.

The provider must educate all staff members, including dentists, about the following documentation requirements and charting procedures:

- For THSteps and ICF-IID dental claims, providers are not required to submit preoperative and postoperative radiographs unless these are specifically requested by HHSC, the TMHP Dental Director, or are needed for prior authorization or pre-payment review.
- Documentation of all restorative, operative, crown and bridge, and fixed and removable prosthodontics procedures must support the services that were performed and must demonstrate medical necessity that meets the professional standards of health care that are recognized by TSBDE. Documentation must include appropriate pretreatment, precementation and postcementation radiographs, study models and working casts, laboratory prescriptions, and invoices. Documentation must include the correct DOS. A panoramic radiograph without additional bitewing radiographs is considered inadequate as a diagnostic tool for caries detection. OIG may retrospectively recoup payment if the documentation does not support the services submitted for payment.
- All documentation must be maintained in the client's record for a period of five years to support the medical necessity at the time of any post-payment utilization review. All documentation, including radiographs, must be of diagnostic and appropriate quality.
- In any situation where radiographs are required but cannot be obtained, intraoral photographs must be in the chart.
- Any complications, unusual circumstances encountered, morbidity, and mortality must be entered as a complete narrative in the client's record.
- A provider must maintain a minimum standard of care through appropriate and adequate records, including a current history, limited physical examination, diagnosis, treatment plan, and written informed consent as a reasonable and prudent dentist would maintain. These records, as well as the actual treatment, must be in compliance with all state statutes, the Dental Practice Act, and the TSBDE Rules.
- Documentation for endodontic therapy must include the following: the medical necessity, pretreatment, during treatment, and post-treatment periapical radiographs, the final size of the file to which the canal was enlarged, and the type of filling material used. Any reason that the root canal may appear radiographically unacceptable must be entered in the chart. Endodontic therapy must be in compliance with the American Association of Endodontists quality assurance guidelines.

- Documentation for most periodontal services requires a six-point per tooth depth of pocket charting, a complete mouth series of periapical and bitewing radiographs, and any other narratives or supporting documentation consistent with the nationally accepted standards of care of the specialty of periodontics, and which conform to the minimum standard of care for periodontal treatment required of Texas dentists. A panoramic radiograph without additional bitewing or periapical radiographs is considered inadequate for diagnosis of periodontal problems.
- Documentation for surgical procedures requiring a definitive diagnosis for submitting a claim for a specific CDT code necessitates that a pathology report and a written record of clinical observations be present in the chart, together with any appropriate radiographs, operative reports, and appropriate supporting documentation. All impactions, surgical extractions, and residual tooth root extractions require appropriate preoperative periapical or panoramic radiographs (subject to limitations) be present in the chart.
- Any documentation requirements or limitations not mentioned in this manual that are present in the CDT are applicable. The written documentation requirements or limitations in this manual supercede those in the CDT.

### **3.3.1 General Anesthesia**

When proceeding with Level 4 sedation/general anesthesia the dental provider is required to maintain the following documentation in the client's dental record:

- The medical evaluation justifying the need for anesthesia
- Description of relevant behavior and reference scale
- Other relevant narratives justifying the need for general anesthesia
- client's demographics, including date of birth
- Relevant dental and medical history
- Dental radiographs, intraoral/perioral photography, or diagram of dental pathology
- Proposed dental plan of care
- Consent signed by parent or guardian giving permission for the proposed dental treatment and acknowledging that the reason for the use of IV sedation or general anesthesia for dental care has been explained
- Completed Criteria for Dental Therapy Under General Anesthesia form
- The parent or guardian dated signature on the Criteria for Dental Therapy Under General Anesthesia form attesting that they understand and agree with the dentist's assessment of their child's behavior
- Dentist's attestation statement and signature, which may be put on the bottom of the Criteria for Dental Therapy Under General Anesthesia form or included in the client's dental record as a stand alone form

## **3.4 Utilization Review**

HHSC or a designated entity may conduct utilization reviews through automated analysis of a provider's pattern(s) of practice, including peer group analysis. Such analysis may result in a subsequent on-site utilization review. HHSC or its claims processing contractor may conduct utilization reviews at the direction of the Office of Inspector General (OIG), according to HHSC rules.

DSHS may also conduct dental utilization reviews of randomly selected THSteps dental providers. These reviews compare Medicaid dental services that have been reimbursed to a dental provider to the results of an oral examination of the client as conducted by DSHS regional dentists.

**Referto:** [25 TAC, §33.72](#) for more information about utilization review.

## 3.5 Claims Filing and Reimbursement

### 3.5.1 Reimbursement

The Medicaid rates for dentists are calculated as access-based fees in accordance with 1 TAC §§355.455(b), 355.8085, and 355.8441(11). Providers can refer to the online fee lookup (OFL) or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates](http://www.tmhp.com/resources/rate-and-code-updates).

### 3.5.2 Claim Submission After Loss of Eligibility

The Texas Medicaid 95-day filing deadline applies to all THSteps and ICF-IID dental services. If a client has lost Medicaid eligibility or turned 21 years of age, continue to file claims for services provided on the DOS the client was eligible. Indicate the actual DOS on the claim form, and enter the authorization number in the appropriate block on each claim filed.

**Referto:** Subsection 6.1.4, “Claims Filing Deadlines” in “Section 6: Claims Filing” (*Vol. 1, General Information*).

### 3.5.3 Third Party Liability

**Referto:** “Section 8: Third Party Liability (TPL)” (*Vol. 1, General Information*).

### 3.5.4 Claims Information

Dental services must be submitted to TMHP in an approved electronic format or on the ADA Dental Claim Form. Providers may purchase ADA Dental claim forms from the vendor of their choice. TMHP does not supply the forms. A sample of the ADA Dental Claim form can be found on the ADA website at [www.ada.org/publications/cdt/ada-dental-claim-form](http://www.ada.org/publications/cdt/ada-dental-claim-form).

When completing an ADA Dental claim form, all required information must be included on the claim, as TMHP does not key information from attachments. Superbills or itemized statements are not accepted as claim supplements.

All THSteps and ICF-IID claims must be received by TMHP within 95 days from each DOS and submitted to the following address:

Texas Medicaid & Healthcare Partnership  
PO Box 200555  
Austin, TX 78720-0555

Claims for emergency, orthodontic, or routine dental services must each be filed on separate forms. A claim submitted for either emergency or orthodontic services must be identified as such in Block 35 (Remarks) of the claim form.

A THSteps and ICF-IID dental provider cannot submit claims to Texas Medicaid under his individual NPI for the services provided by one or more associate dentists practicing in his office as employees or independent contractors with specific employer-employee or contractual relationships. All dentists providing services to Medicaid clients must enroll as THSteps dental providers regardless of employer relationships. The individual provider submitting claims may be reimbursed into a single accounting office to maintain these described relationships.

Claims submitted by newly-enrolled providers must be received within 95 days of the date the new NPI is issued, and within 365 days of the DOS.

Providers should submit claims to Texas Medicaid for their usual and customary fees.

Claims for dental services provided to children in foster care must be filed with DentaQuest, the dental claims processor for Superior HealthPlan.

**Referto:** Subsection 3.2.7.2, “Children in Foster Care” in this handbook.

Claims must not be submitted to Texas Medicaid for appointments missed by clients. A client with Medicaid cannot be billed for failure to keep an appointment. Only claims for actual services rendered are considered for payment.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*).

Subsection 1.7.12, “Billing Clients” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

### 3.5.5 Claim Appeals

A claim denied because of age restrictions or other limitations listed in the Medicaid dental fee schedule may be considered for reimbursement on appeal when client medical necessity is provided to the TMHP Dental Director.

All denied claim appeals must be submitted to TMHP with the exception of a request to waive late filing deadlines. TMHP does not have the authority to waive state or federal mandates regarding claim filing deadlines.

If, after all appeal processes at TMHP have been exhausted, the provider remains dissatisfied with TMHP's decision concerning the appeal, the provider may file a complaint with the HHSC Claims Administrator Operations Management Unit.

**Referto:** Subsection 7.1.5, “Paper Appeals” in “Section 7: Appeals” (*Vol. 1, General Information*).

Subsection 7.3.1, “Administrative Claim Appeals” in “Section 7: Appeals” (*Vol. 1, General Information*).

**Note:** Providers must exhaust the appeals process with TMHP before filing a complaint to the HHSC Claims Administrator Operations Management Unit.

Providers may use one of three methods to appeal Medicaid claims to TMHP: telephone (AIS), paper, or electronic.

All appeals of denied claims or requests for adjustments on paid claims must be received by TMHP within 120 days of the date of disposition of the R&S Report on which the claim appears. If the 120-day appeal deadline falls on a weekend or TMHP-recognized holiday, the deadline will be extended to the next business day.

Certain claims must be appealed on paper; they cannot be appealed either electronically or by telephone.

**Referto:** Subsection 7.1.5, “Paper Appeals” in “Section 7: Appeals” (*Vol. 1, General Information*) for information about appeals that may not be appealed electronically and claims that may not be appealed through AIS.

To appeal in writing:

If a claim cannot be appealed electronically or by telephone, appeal the claim on paper by completing the following steps:

- 1) Provide a copy of the R&S Report page where the claim is reported.
- 2) Circle one claim per R&S Report page.
- 3) Identify the information that was incorrectly provided and note the correct information that should be used to appeal the claim. If necessary, specify the reason for appealing the claim.

- 4) Attach radiographs or other necessary supporting documentation.
- 5) If available, attach a copy of the original claim. Claim copies are helpful when the appeal involves dental policy or procedure coding issues.
- 6) Do not copy supporting documentation on the opposite side of the R&S Report.
- 7) It is strongly recommended that providers submitting paper appeals retain a copy of the documentation being sent. It is also recommended that paper documentation be sent by certified mail with a return receipt requested to establish TMHP's receipt of the claim and the date the claim was received. The provider is urged to retain copies of multiple claim submissions if the NPI is pending.

**Note:** *Claims submitted by newly-enrolled providers must be received within 95 days of the date the new NPI is issued, and within 365 days of the DOS.*

- 8) Submit the paper appeal with supporting documentation and any radiographs and adjustment requests to the following address:

Texas Medicaid & Healthcare Partnership  
Inquiry Control Unit  
12365-A Riata Trace Parkway  
Austin, TX 78727-6418

To appeal by telephone:

- 1) Contact the Dental Line at 1-800-568-2460.
- 2) For each claim in question, have the R&S Report listing the claim and any supporting documents readily available.
- 3) Identify the claim submitted for appeal. The internal control number (ICN) will be requested.
- 4) Supply the information necessary to correct the claim, such as the missing tooth number or letter, the corrected procedure code, surface ID, or Medicaid number.

The appeal will appear as finalized or pending on the following week's R&S Report.

Providers may also appeal electronically.

Electronic appeal submission is a method of submitting Texas Medicaid appeals using a personal computer. The electronic appeals feature can be accessed directly through the TMHP EDI Gateway or by using TexMedConnect. For additional information, contact the TMHP EDI Help Desk at 1-888-863-3638.

Electronic appeals can increase accuracy of claims processing, resulting in a more efficient case flow to the provider:

- Download and printout capabilities help maintain audit trails for the provider.
- Appeal submission windows can be automatically filled in with electronic R&S Report information, thereby reducing data entry time.

### 3.5.6 Frequently Asked Questions About Dental Claims

**Q** *Why is routine dental treatment not a benefit when performed at the same visit as an emergency visit?*

**A** *The following are reasons routine dental treatment is not a benefit when performed at the same visit as an emergency visit:*

- The purpose of an emergency claim is to allow the provider to treat a true emergency without the concern that routine dental procedures may be denied.
- Medicaid program policy guidelines do not allow payment for both emergency and routine services to the same provider at the same visit. True emergency claims process through the audit system correctly when "emergency" is checked on either the paper or electronic claim and the Remarks or Narrative section of the claim form describes the nature of the emergency.

*Q Why are some claims for oral exams and emergency exams on the same date for the same client denied?*

A Medicaid program policy does not allow claims for an initial oral exam and an emergency exam to be submitted for the same DOS for the same client. An emergency exam performed by the same provider in the same six-month time period as an initial exam may be considered for reimbursement only when the claim for the emergency exam indicates it is an emergency *and the emergency block is marked and the Remarks or Narrative section is completed*. If the claim is not marked as an emergency, the claim will be denied.

*Q Why could an appeal of a denied claim take a long time?*

A An appeal can take a long time if TMHP is required to research the denied claim and determine the reason the claim did not go through the system. For faster results, providers should submit appeals as soon as possible and not use the entire 120 days allowed to submit the appeal.

The following are guidelines on filing claims efficiently:

- Use R&S Report dates to track filed claims.
- File claims electronically through TMHP EDI. Electronic claims submission does not allow a claim with an incorrect date to be accepted and processed, which saves time for the provider submitting claims and TMHP in processing claims. Call 1-888-863-3638, for more information about TMHP EDI.
- File claims with the correct information included. Most denied claims result from the omission of dates, signature, or narrative, or incorrect ID numbers such as client Medicaid numbers or NPIs.

*Q Why are only ten appeals allowed per call?*

A There is a limit on appeals per call to allow all providers equal access.

*Q Why do reimbursement checks sometimes take a long time to arrive?*

A Reimbursement may be delayed if a provider fails to submit claims in a timely manner.

*Q Does electronic claims submission result in delayed payment?*

A No. Providers who submit claims electronically report faster results than when submitting claims on paper. Providers are encouraged to use TMHP EDI for claims submission.

The following are helpful hints to a more efficiently processed claim:

- Ensure the NPI is on all claims.
- Include the performing provider's signature on all paper claims.
- Verify client eligibility for procedures.
- Verify if the procedure code requires a narrative on the claim; the narrative is for medical necessity.
- Include the required client information, including name, birth date, and client number.
- Dental auxiliary staff (i.e., the hygienist or the chairside assistant) cannot enroll in Texas Medicaid; therefore, they cannot submit claims to Texas Medicaid. Any procedure performed by the auxiliary must be submitted by the supervising dentist, using the dentist's NPI.

#### **Claim Submission Reminders:**

- Procedure code D8660 is allowed at different age levels, per provider. If a claim for procedure code D8660 is submitted within six months of procedure code D8080, procedure code D8080 will be reduced by the amount that was paid for procedure code D8660.
- Prior authorization is required with documentation of medical necessity when replacing lost or broken orthodontic retainers (procedure code D8680). Clients may not be billed for covered services.

- Prior authorization of orthodontic services is nontransferable. If a client changes an orthodontic provider for any reason, or a provider ceases to be a Medicaid provider, the new orthodontic services provider must submit a separate request for prior authorization. The provider requesting and receiving authorization for the service also must perform the service and submit the claim. Codes listed on the authorization letters are the only codes considered for payment. All other codes submitted for payment are denied. Providing the authorization number on the submitted claim results in more efficient claims processing.
- Prior authorization is required for clients who are 7 through 20 years of age that are in need of general anesthesia and do not meet the Criteria for Dental Therapy Under General Anesthesia requirements (22 point threshold). Prior authorization is required for medically necessary dental general anesthesia that exceeds once per six months, per client, any provider. The dentist providing therapeutic services under general anesthesia is responsible for obtaining prior authorization for both services.
- General anesthesia (provided in the dentist office, ambulatory service clinic, and inpatient/outpatient hospital settings) does not require prior authorization for clients who are 7 through 20 years of age, unless the client does not meet the minimum required points for general anesthesia in [Criteria for Dental Therapy Under General Anesthesia](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com). All THSteps dental charts for dental general anesthesia are subject to retrospective, random review for compliance with the Criteria for Dental Therapy Under General Anesthesia and requirements for chart documentation.
- Providers must not bill a client unless a formal denial for the requested item or service has been issued by TMHP stating the service is not a benefit of Texas Medicaid and the client has signed the Client Acknowledgment Statement in advance of the service being provided for that specific item or service. A provider must not bill Medicaid clients if the provided service is a benefit of Texas Medicaid.

**Referto:** Subsection 1.7.12.1, “Client Acknowledgment Statement” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

THSteps clients must receive:

- Dental services specified in the treatment plan that meet the standards of care established by the laws relating to the practice of dentistry and the rules and regulations of the TSBDE.
- Dental services that are free from abuse or harm from the provider or the provider's staff.
- Only the treatment required to address documented medical necessity that meets professionally recognized standards of health care.

## 4 THSteps Medical

### 4.1 THSteps Medical and Dental Administrative Information

#### 4.1.1 Overview

This section describes the administrative requirements for THSteps, including provider requirements, client eligibility requirements, and billing and claims processing information. Providers that need additional information may call 1-800-757-5691 or refer to “Appendix F. Texas Health Steps Quick Reference Guide” in this handbook for a more specific list of resources and telephone numbers. Providers may also contact the Texas Department of State Health Services (DSHS) THSteps Provider Relations staff located in DSHS regional offices by calling the appropriate regional office as listed in “Appendix A: State, Federal, and TMHP Contact Information” (*Vol. 1, General Information*). THSteps Provider Relations contact information is also available on the DSHS website at [www.dshs.texas.gov/contact-us](http://www.dshs.texas.gov/contact-us).

In addition, THSteps has developed online educational modules to provide additional information about the program, components of the medical checkup, and other information. These modules provide free continuing education hours for a variety of providers. Providers do not have to be enrolled in THSteps. These courses may be accessed at [www.txhealthsteps.com](http://www.txhealthsteps.com).

The Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) service is Medicaid's comprehensive preventive child health service for clients who are birth through 20 years of age. In Texas, EPSDT is known as THSteps and includes periodic screening, vision, hearing, and dental preventive and treatment services. EPSDT was created by the 1967 amendments to the federal Social Security Act and defined by the Omnibus Budget Reconciliation Act (OBRA) of 1989. The periodic screening for a checkup consists of five federally required components as noted on the THSteps Periodicity Schedule. In addition, Section 1905(r)(5) of the Social Security Act (SSA) requires that any medically necessary health-care service listed in the Act be provided to EPSDT clients even if the service is not available under the state's Medicaid plan to the rest of the Medicaid population. A service is medically necessary when it corrects or ameliorates the client's disability, physical or mental illness, or chronic condition. These additional services are available through CCP. For questions about coverage, providers can call CCP at 1-800-846-7470.

#### 4.1.2 Statutory Requirements

Several specific legislative requirements affect THSteps and the providers participating in the program. These include, but are not limited to, the following:

- Newborn Screening, Health and Safety Code, Chapter 33, Section §33.011 Newborn Screening Test Requirement.
- Subsection D.5, "Parental Accompaniment" in this handbook.
- Requirements for Reporting Abuse or Neglect, as outlined in subsection 1.7.1, "Compliance with Texas Family Code" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*).
- Early Childhood Intervention (ECI), 34 Code of Federal Regulations (CFR) Part 303; Chapter 73, Texas Human Resources Code, and Title 40 TAC, Chapter 108.
- Newborn Hearing Screening, Health and Safety Code, Chapter 47.
- Teen Confidentiality Issues. There are many state statutes that may affect consent to medical care for a minor, depending on the facts of the situation. Among the relevant statutes are Chapters 32, 33, 153, and 266 of the Texas Family Code. Providers may want to consult an attorney, their licensing board, or professional organization if guidance is needed or questions arise on matters of medical consent.

**Referto:** "Appendix D. Texas Health Steps Statutory State Requirements" in this handbook for more information.

#### 4.1.3 Referrals for Medicaid-Covered Services

When a provider performing a checkup determines that a referral for diagnosis or treatment is necessary for a condition found during the medical checkup, that information must be discussed with the parents or guardians. A referral must be made to a provider who is qualified to perform the necessary diagnosis or treatment services. If the performing provider is competent to treat the condition found, a referral elsewhere is not necessary, unless it is to the primary care provider to assure continuity of care.

Providers that need assistance finding a specialist who accepts clients with Medicaid coverage can call the THSteps toll-free helpline at 1-877-847-8377, or they can find one using the [Online Provider Lookup](http://www.tmhp.com) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Continuity of care is an important aspect of providing services and follow-up. Efforts should be made to determine that the appointment was kept and that the provider who received the referral has provided a diagnosis and recommendations for further care to the referring provider.

In addition to referrals for conditions discovered during a checkup or for specialized care, the following referrals may be used:

- *Case Management for Children and Pregnant Women.* Case Management for Children and Pregnant Women provides health-related case management services to eligible children and pregnant women. Case Management for Children and Pregnant Women services include assessing the needs of eligible clients, formulating a service plan, making referrals, problem-solving, advocacy, and follow-up regarding family and client needs. For more information about eligibility and client referral, see subsection 3.1.1, “Eligibility” in the *Behavioral Health and Case Management Services Handbook (Vol. 2, Provider Handbooks)* or subsection 3.1.2, “Referral Process” in the *Behavioral Health and Case Management Services Handbook (Vol. 2, Provider Handbooks)*.
- *Hearing Services referrals.* If the hearing screening returns abnormal results, clients who are birth through 20 years of age must be referred to a Texas Medicaid provider who is an audiologist or physician who is experienced with the pediatric population and who offers auditory services.
- *Routine Dental Referrals.* The provider must refer clients to establish a dental home beginning at 6 months of age or earlier if trauma or early childhood caries are identified. For established clients after the 6-month medical checkup, the provider must confirm if a dental home has been established and is ongoing; if not, additional referrals must be made at subsequent medical checkups until the parent or caregiver confirms that a dental home has been established for the client. Clients who are birth through 5 months of age are not eligible for routine dental checkups but should be referred to a dentist if any dental issues are identified during a THSteps medical checkup or acute care visit. When possible, clients should be referred to a provider who has completed the required benefit education and is certified by Texas Health Steps to perform First Dental Home services. The First Dental Home provider may be located through the advanced search function in the Online Provider Look Up or by calling 1-877-847-8377.
- *Referrals for Dental Treatment.* If a THSteps medical provider identifies the medical necessity of dental services, the provider must refer the client to a THSteps dental provider. The THSteps medical provider can accomplish this by providing the parent or guardian a listing of THSteps dentists from the Online Provider Lookup. The parent or guardian can receive assistance in locating a THSteps dentist and assistance with scheduling of dental appointments by contacting the THSteps toll-free helpline at 1-877-847-8377. Clients who are birth through 5 months of age also can be seen for emergency dental services by the dentist at any time for trauma, early childhood caries, or other oral health problems. Clients who are birth through 20 years of age may self-refer for dental care.
- *Emergency Dental Referrals.* If a medical checkup provider identifies an emergency need for dental services, such as bleeding, infection, or excessive pain, the client may be referred directly to a participating dental provider. Emergency dental services are covered at any time for all Medicaid clients who are birth through 20 years of age.
 

**Note:** Assistance in coordinating dental referrals can be obtained from the THSteps toll-free helpline at 1-877-847-8377 or the DSHS Regional THSteps Coordinator for the respective region (lists are provided in “Appendix A: State, Federal, and TMHP Contact Information” (Vol. 1, General Information). In cases of both emergency and nonemergency dental services, clients are able to make a choice when selecting a dental provider who is participating in the THSteps Dental Program.
- *Family Planning and Genetic Services Referrals.* For clients eligible for Medicaid who need genetic services or family planning services, a referral should be made. Information about Medicaid-covered genetic services is available in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* and information about family planning services

is available in Section 2, “Medicaid Title XIX Family Planning Services”. If a THSteps medical provider also provides family planning, the provider may inform clients that these services are available.

- *ECI Referrals.* Federal and state law requires providers to refer children as soon as possible, but no longer than 7 days after identification of a suspected developmental delay or disability to the local ECI program for children who are birth through 35 months of age regardless if a referral was made to another qualified provider. The provider may call the local ECI program or the Health and Human Services Office of the Ombudsman at 1-877-787-8999 to make referrals. Children who are 3 years of age and older with a suspected developmental delay or disability should be referred to the local school district.
- *WIC Referrals.* Clients who are birth through 5 years of age or who are pregnant are eligible for WIC and should be referred to WIC for nutrition education and counseling, and food benefits.

#### 4.1.4 THSteps Medical Checkup Facilities

All THSteps medical checkup policies apply to checkups completed in a physician's office, a health department, clinic setting, or in a mobile/satellite unit. Enrollment of a mobile/satellite unit must be under a physician or clinic name. Mobile units can be a van or any area away from the primary office and are considered extensions of that office and are not separate entities.

The physical setting must be appropriate so that all elements of the checkup can be completed.

**Referto:** Subsection 4.3.11, “THSteps Medical Checkups Periodicity Schedule” in this handbook on the THSteps Periodicity Schedule.

Subsection 4.3.12, “Mandated Components” in this handbook for additional information on checkup components.

#### 4.1.5 THSteps Dental Services

Access to THSteps dental services is mandated by Texas Medicaid and provides reimbursement for the early detection and treatment of dental health problems, including oral health preventive services, for Medicaid clients who are birth through 20 years of age. THSteps dental service standards are designed to meet federal regulations and to incorporate the recommendations of representatives of national and state dental professional groups.

OBRA 1989 mandated the expansion of the federal EPSDT program to include any service that is medically necessary and for which FFP is available, regardless of the limitations of Texas Medicaid. This expansion is referred to as CCP.

**Referto:** Section 2, “Medicaid Children's Services Comprehensive Care Program (CCP)” in this handbook for more information.

THSteps-designated staff (HHSC, DSHS, or its designee), through outreach and education, encourage the parents or caregivers of eligible clients to use THSteps dental checkups and preventive care when clients first become eligible for Medicaid and each time clients are due for their next periodic dental checkup.

Upon request, THSteps-designated staff (HHSC, DSHS, or its designee) assist the parents or caregivers of eligible clients with scheduling appointments and transportation. Medicaid clients have freedom of choice of providers and are given names of enrolled providers. Call the THSteps toll-free helpline at 1-877-847-8377 for a list of THSteps dental providers in a specific area.

For additional information about dental health, providers can refer to the THSteps online educational modules “Oral Health For Primary Care Providers” and “Oral Health Examinations for Dental Professionals” at [www.txhealthsteps.com](http://www.txhealthsteps.com).

## 4.2 Enrollment

### 4.2.1 THSteps Medical Provider Enrollment

Providers cannot be enrolled if their professional license is due to expire within 30 days of application. Facility providers must submit a current copy of the supervising practitioner's license. To provide Medicaid services, each NP or CNS must be licensed as an RN and be recognized as an APRN by Texas BON.

**Referto:** Subsection 1.1, "Provider Enrollment" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*) for information about enrollment procedures.

The following provider types may provide THSteps preventive services within his or her scope of practice, must be enrolled in Texas Medicaid, but do not have to be enrolled as a THSteps provider:

- A federal qualified health center (FQHC)
- A rural health clinic (RHC)

The following provider types may provide THSteps preventive services within his or her scope of practice and must be enrolled in Texas Medicaid as a THSteps provider:

- A physician (doctor of medicine [M.D.] or doctor of osteopathy [D.O.]) or physician group
- A physician assistant (PA)
- A clinical nurse specialist (CNS)
- A nurse practitioner (NP)
- A certified nurse midwife (CNM)
- A health-care provider or facility with physician supervision including, but not limited to:
  - Community-based hospital and clinic
  - Family planning clinic
  - Home health agency
  - Local or regional health department
  - Maternity clinic
  - Migrant health center
  - School-based health center

#### Medical Residents

Medical residents may provide medical checkups in a teaching facility under the guidance of the attending staff as long as the facility's medical staff by-laws and requirements of the Graduate Medical Education (GME) Program are met, and the attending physician has determined the intern or resident to be competent to perform checkups. THSteps does not require the supervising physician to examine the client as long as these conditions are met.

#### Clinics

In a clinic, a physician is not required to be present at all times during the hours of operation unless otherwise required by federal regulations. A physician must assume responsibility for the clinic's operation.

#### 4.2.1.1 Requirements for Registered Nurses Who Provide Medical Checkups

RNs without a CNS, NP, or CNM recognition as an APRN by the Texas BON may provide medical checkups only under direct physician supervision, meaning the physician is either on site during the checkup or immediately available to furnish assistance and direction to the RN during the checkup.

Required online education modules developed by THSteps must be completed prior to providing checkup services. All modules are approved for continuing education units (CEUs) for RN's as well as other medical disciplines. Required THSteps online education modules are available on the [RN Information page](#) of the THSteps website. The RN or the RN's employer must maintain documentation that the required modules were completed.

Online modules are updated regularly to include new content. RNs that have completed the required modules previously are encouraged, but not required to retake online modules.

Before a physician delegates a THSteps checkup to an RN, the physician must establish the RN's competency to perform the service as required by the physician's scope of practice. The delegating physician is responsible for supervising the RN who performs the services. The delegating physician remains responsible for any service provided to a client.

**Referto:** Subsection 4.2.1, "THSteps Medical Provider Enrollment" in this handbook for more information about enrollment procedures.

### 4.3 Services, Benefits, Limitations, and Prior Authorization

#### 4.3.1 Eligibility for THSteps Services and Checkup Due Dates

Through outreach, THSteps staff (DSHS, HHSC, or contractors) encourage clients to use THSteps preventive medical checkup services when they first become eligible for Medicaid and each time thereafter when they are periodically due for their next medical checkup. THSteps will send clients a letter when they are due for a medical checkup.

A client is eligible for THSteps services, including medical checkups, from birth through 20 years of age.

Although the Medicaid Eligibility Verification Letter (Form H1027) identifies eligible clients when the client's Your Texas Benefits Medicaid card is lost or has not yet been issued, Form H1027 does not indicate whether the client is due for medical checkup services. Providers can verify the client's eligibility through TexMedConnect, the Medicaid Client Portal for Providers, or the TMHP Contact Center.

A client is due for a THSteps medical checkup based on his or her date of birth and the ages indicated on the periodicity schedule. Children younger than three years of age are due at frequent intervals. Children and youth three years of age and older are considered due for a checkup on their birthday and are encouraged to have a yearly checkup as soon as practical. In addition, for children enrolled in Medicaid managed care, a new member is due for a THSteps medical checkup as soon as practicable, but in no case later than 14 days of enrollment for newborns, and no later than 90 days of enrollment for all other eligible child members.

Providers should schedule checkups based on the ages in the periodicity schedule, but circumstances may support the need for a checkup prior to the client's birthday (for example, a 4-year checkup could be performed prior to the child's 4th birthday if the child is a member of a migrant family that is leaving the area). THSteps fee-for-service policy creates this flexibility by allowing a total number of checkups at each age range.

**Referto:** "Subsection 4.3.6, "THSteps Medical Checkups" in this handbook for additional details.

Providers are encouraged to notify the client when they are due for the next checkup according to the THSteps periodicity schedule.

A checkup that is necessary more frequently than indicated on the periodicity schedule is considered an exception-to-periodicity.

**Referto:** Subsection 4.3.7, “Exception-to-Periodicity Checkups” in this handbook for additional details about billing for a checkup performed as an exception-to-periodicity checkup.

### 4.3.2 Prior Authorization

Prior authorization is not required for preventive care medical checkups.

### 4.3.3 Additional Consent Requirements

Additional parental or guardian consent may be required if online or web-based screening tools are used that could result in client data being stored electronically in an outside database other than the provider's electronic medical record system, or if the data is used for purposes other than THSteps screening. The provider should seek legal advice regarding the need for this consent.

### 4.3.4 Verification of Medical Checkups

The first source of verification that a THSteps medical checkup has occurred is a paid claim or encounter. THSteps encourages providers to file a claim either electronically or on a CMS-1500 paper claim form as soon as possible after the date of service, as the paid claim updates client information. The provider may contact TMHP through the TMHP website at [www.tmhp.com](http://www.tmhp.com) or AIS at 1-800-925-9126 to verify that the client is due for a checkup.

A second source of acceptable verification is a physician's written statement that the checkup occurred. If the provider chooses to give the client written verification, it must include the client's name, Medicaid ID number, date of the medical checkup, and a notation that a complete THSteps medical checkup was performed.

**Note:** *Verification of medical checkups must not be sent to THSteps but must be maintained by the client to be provided as needed by an HHSC eligibility caseworker.*

If neither the first nor the secondary source of verification is available, a THSteps outreach worker may contact the provider's office for verification.

### 4.3.5 Medical Home

HHSC and DSHS encourage the provision of the THSteps medical checkup as part of a medical home. Texas Medicaid defines a medical home as a model of delivering care that is accessible, continuous, comprehensive, family-centered, and coordinated. In providing a medical home for the client, the primary care clinician directs care coordination together with the client or youth and/or family.

Medical checkup providers with mobile units should encourage the families to establish a medical home for their child(ren) and obtain future checkups from their primary care provider.

When a checkup is provided in the home setting, mobile unit, or clinic other than the medical home, it should be in coordination with the medical home and the results must be provided to the medical home as soon as possible.

A mobile unit is an extension of the provider's office and must be able to provide a complete checkup.

For additional information on the medical home, providers can refer to the “Introduction to the Medical Home” module provided by THSteps at [www.txhealthsteps.com](http://www.txhealthsteps.com).

### 4.3.6 THSteps Medical Checkups

THSteps medical checkups reflect the federal and state requirements for a preventive checkup. Preventive care medical checkups are a benefit of the THSteps program if they are provided by enrolled THSteps providers and all of the required components are completed. An incomplete preventive medical checkup is not a benefit. The THSteps periodicity schedule specifies screening procedures required at each stage of the client's life to ensure that health screenings occur at age-appropriate points in a client's life.

Components of a medical checkup that have an available CPT code are not reimbursed separately on the same day as a medical checkup, with the exception of initial point-of-care blood lead testing, mental health screening for adolescents, postpartum depression screening, tuberculin skin test (TST), developmental and autism screening, vaccine administration, and oral evaluation and fluoride varnish (OEFV).

**Note:** *Initial blood lead testing, other than point-of-care, must be sent to the DSHS Laboratory for testing.*

**Reminder:** *Incomplete medical checkups are subject to recoupment unless there is documentation supporting why a component was not completed.*

**Referto:** Subsection 4.3.12.1.3, "Mental Health Screening" in this handbook for more information about required mental health screenings.

Sports physical examinations are not a benefit of Texas Medicaid. If the client is due for a THSteps medical checkup and a comprehensive medical checkup is completed, a THSteps medical checkup may be reimbursed and the provider may complete the documentation for the sports physical.

THSteps preventive medical checkups are not a benefit under telemedicine or telehealth.

**Referto:** The THSteps Medical Checkups Periodicity Schedule which may be found at [www.hhs.texas.gov/doing-business-hhs/provider-portals/health-services-providers/texas-health-steps/medical-providers](http://www.hhs.texas.gov/doing-business-hhs/provider-portals/health-services-providers/texas-health-steps/medical-providers).

Checkups should be scheduled, to the extent possible, based on the ages on the periodicity schedule to accommodate the need for flexibility when scheduling checkup appointments.

The following table lists the number of visits allowed at each age range:

| Age Range                                                   | Number of Visits |
|-------------------------------------------------------------|------------------|
| Birth through 11 months (does not include 12 month checkup) | 6                |
| 1 through 4 years                                           | 7                |
| 5 through 11 years                                          | 7                |
| 12 through 17 years                                         | 6                |
| 18 through 20 years                                         | 3                |

All of the checkups listed on the periodicity schedule were developed according to the recommendations of the AAP and in consultation with recognized authorities in pediatric preventive health. In Texas, the THSteps periodicity schedule may differ from the AAP periodicity schedule based on the scheduling of laboratory or other tests in federal EPSDT or state regulations.

For more information about conducting a THSteps checkup, providers can refer to the THSteps online educational modules at [www.txhealthsteps.com](http://www.txhealthsteps.com).

The following table includes the procedure codes, required condition indicators, and the resulting referral status for medical checkups. Condition indicators must be used in addition to a provider type modifier at each THSteps checkup. A condition indicator must be submitted on the claim with the periodic medical checkup procedure code. Condition indicators are required whether a referral was made or not. If a referral is made, then providers must use the Y referral status. If no referral is made, then providers must use the N referral status.

| Procedure Codes                                                                                                                                                                                                                                    | Condition Indicators                                 | Referral Status                                           |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------|-----------------------------------------------------------|
| 99381, 99382, 99383, 99384, and 99385 (new client preventive visit)<br>-or-<br>99391, 99392, 99393, 99394, and 99395 (Established client preventive visit)                                                                                         | NU (not used)                                        | N (no referral given)                                     |
| 99381, 99382, 99383, 99384, and 99385 (new client preventive visit)<br>-or-<br>99391, 99392, 99393, 99394, and 99395 (established client preventive visit)                                                                                         | S2 (under treatment) or ST* (new services requested) | Y (yes THSteps or EPSDT referral was given to the client) |
| * The ST condition indicator should only be used when a referral is made to another provider or the client must be rescheduled for another appointment with the same provider. It does not include treatment initiated at the time of the checkup. |                                                      |                                                           |

THSteps preventive care medical checkups for clients who are 18 through 20 years of age must be submitted with procedure codes 99385 or 99395 and diagnosis code Z0000 or Z0001.

Claims for procedure codes 99381, 99382, 99383, 99384, 99391, 99392, 99393, and 99394 must be submitted with the appropriate age related diagnosis code listed in the following table:

| Client Age               | Diagnosis Code |
|--------------------------|----------------|
| Birth through 7 days     | Z00110         |
| 8 through 28 days        | Z00111         |
| 29 days through 17 years | Z00121, Z00129 |
| 18 through 20 years      | Z0000, Z0001   |

The age-appropriate diagnosis code for a preventive care medical checkup must be submitted on the claim. If an immunization is administered as part of the preventive care medical checkup, diagnosis code Z23 may also be included on the claim, in addition to the age-appropriate diagnosis.

If an immunization is the only service provided during an office visit, providers may submit only diagnosis code Z23 on the claim.

**Note:** *Note: A THSteps preventive care medical checkup will not be reimbursed if the office visit is only for immunization.*

Modifier AM, SA, TD, or U7 must be submitted with the THSteps medical checkups procedure code to indicate the practitioner who performed the unclothed physical examination during the medical checkup.

| Modifier | Practitioner                                                           |
|----------|------------------------------------------------------------------------|
| AM       | Physician, team member service                                         |
| SA       | Nurse practitioner rendering service in collaboration with a physician |
| TD       | Registered nurse                                                       |
| U7       | Physician assistant                                                    |

THSteps medical checkups performed in an FQHC or RHC setting are paid an all-inclusive rate per encounter, which includes immunizations, developmental screening, autism screening, mental health screening for adolescents, postpartum depression screening, TST, blood lead test, and OEFV. When

submitting claims for THSteps checkups and services, RHC providers must use the national POS code 72, and FQHC providers must use modifier EP in addition to the modifiers used to identify who performed the medical checkup. In accordance with the federal rules for RHCs and FQHCs, an RN in an RHC or FQHC may not perform THSteps checkups independently of a physician's interactions with the client.

**Referto:** Section 4, "Federally Qualified Health Center (FQHC)" for information related to billing.

Section 8, "Rural Health Clinic" for information related to billing.

Checkups, exception-to-periodicity checkups, and follow-up visits are limited to once per day any provider.

A checkup and the associated follow-up visit may not be reimbursed on the same date of service. The follow-up visit will be denied.

An incomplete checkup is subject to recoupment unless there is documentation to support why the component was not completed as part of the checkup.

A new patient is one who has not received any professional services within the preceding three years from the provider or from another provider of the same specialty who belongs to the same group practice. As an exception, a new preventive care medical checkup (procedure code 99381, 99382, 99383, 99384, or 99385) may be billed when no prior checkups have been billed by the same provider or provider group, even if an acute care new patient E/M service was previously performed by the same provider.

An additional new checkup is allowed only when the client has not received any professional services in the preceding three years from the same provider or another provider who belongs to the same group practice, because subsequent acute care visits to the new patient THSteps checkup continues the established relationship with the provider.

If the provider that performs the medical checkup provides treatment for an identified condition on the same day, the provider may submit a separate claim for an acute care established-client office visit. The separate claim must include the established-client procedure code that is appropriate for the diagnosis and treatment of the identified problem. Treatment of minor illnesses or conditions (e.g., follow-up of a mild upper respiratory infection) during the THSteps medical checkup may not warrant additional billing.

### **Acute Care Visits**

When a new patient checkup is billed for the same date of service as a new patient acute care visit, both new patient services may be reimbursed when billed by the same provider or provider group if no other acute care visits or preventive care medical checkups have been billed in the past three years.

Providers must use modifier 25 to describe circumstances in which an acute care E/M visit was provided at the same time as a checkup. Providers must submit modifier 25 with the E/M procedure code when the rendered services are distinct and provided for a different diagnosis. Providers must bill an appropriate level E/M procedure code with the diagnosis that supports the acute care visit. The medical record must contain documentation that supports the medical necessity and the level of service of the E/M procedure code that is submitted for reimbursement.

An acute care E/M visit for an insignificant or trivial problem or abnormality billed on the same date of service as a checkup or exception-to-periodicity checkup is subject to recoupment.

Providers must bill an acute care visit with their NPI on a separate claim without benefit code EP1.

**Referto:** [Acute Care Visit on the Same Day as a THSteps Preventive Visit Checkup](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for a claim form example.

[THSteps Preventive Visit Checkup with Immunization and Vaccine Administration](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for a claim form example.

### 4.3.7 Exception-to-Periodicity Checkups

Exception-to-periodicity checkups are complete medical checkups completed outside the timeframes listed in the THSteps Periodicity Schedule due to extenuating circumstances.

Exception-to-periodicity checkups are complete medical checkups, which are medically necessary and might cause the total number of checkups to exceed the number allowed for the client's age range if the client were to have all regular scheduled checkups. An exception-to-periodicity checkup is allowed when:

- Medically necessary, for example, for a client with developmental delay, suspected abuse, or other medical concerns or a client in a high-risk environment, such as living with a sibling with elevated blood lead.
- Required to meet state or federal exam requirements for Head Start, day care, foster care, or preadoption.
- When needed before a dental procedure requiring general anesthesia.

As noted in the Periodic Checkup Age Range table, the number of checkups is set for each age range. This may avoid an exception-to-periodicity checkup and allow flexibility for the provider and family to schedule a checkup including before the child's birthday.

If a client is due for a medical checkup, a checkup outside of the regular THSteps schedule must be billed as a regular checkup rather than an exception to periodicity.

The checkup is considered complete when all the required components are documented in the client's medical record or supporting documentation, which details the reason a component(s) was not completed. A plan to complete the component(s) if not due to reasons of conscious or parental concerns must be included in the documentation.

**Note:** *A sports physical is not a reason for an exception-to-periodicity checkup.*

When billing for an exception-to-periodicity visit, provider must also include the most appropriate exception-to-periodicity modifiers. Claims for periodic THSteps medical checkups exceeding periodicity that do not include one for these modifiers will be denied as exceeding periodicity.

| Modifier | Description                                                                                                                                                                                                                                                                                    |
|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| SC       | Medically necessary service or supply                                                                                                                                                                                                                                                          |
| 23       | Unusual Anesthesia: Occasionally, a procedure that usually requires either no anesthesia or local anesthesia must be done under general anesthesia because of unusual circumstances. This circumstance may be reported by adding the modifier "23" to the procedure code of the basic service. |
| 32       | Mandated Services: Services related to mandated consultation or related services (e.g., PRO, third party payer, governmental, legislative, or regulatory requirement) may be identified by adding the modifier "32" to the basic procedure.                                                    |

THSteps medical exception-to-periodicity services must be billed with the same procedure codes, provider type, modifier, and condition indicators as a medical checkup. Additionally, providers must use modifiers 23, 32, and SC to indicate the exception.

### 4.3.8 Medical Checkups During a Declaration of State Disaster

During a Declaration of State Disaster, Health and Human Services Commission (HHSC) may issue direction to providers regarding the use of telemedicine or telehealth services to include the use of synchronous telephone (audio-only) platform to provide coverage of services outside of the allowances

described herein. A Declaration of State of Disaster is when an executive order or proclamation by the governor declaring a state of disaster in accordance with Section 418.014 of the Texas Government Code.

The following limitations apply to all THSteps preventive medical checkups and exception-to-periodicity checkups during a Declaration of State Disaster when HHSC issues direction regarding the use of synchronous audiovisual and synchronous telephone (audio-only) technologies:

- Clients who are 2 years through 20 years of age may receive a THSteps medical checkup or exception-to-periodicity checkup using synchronous audiovisual or synchronous telephone (audio-only) technologies.
- Clients from birth through 2 years of age may not receive a THSteps checkup or exception-to-periodicity checkup using synchronous audiovisual or synchronous telephone (audio-only) technologies.
- Clients from birth through 24 months of age must receive in-person checkups.

A medical checkup provided using synchronous audiovisual or synchronous telephone (audio-only) technologies must be completed according to the age-specific checkup requirements listed on the THSteps Periodicity Schedule.

Synchronous audiovisual delivery for medical checkups is preferred over synchronous telephone (audio-only) delivery.

An in-person THSteps follow-up visit must be completed within six months of the synchronous audiovisual or synchronous telephone (audio-only) checkup in order for the checkup to be considered a complete THSteps checkup.

When HHSC issues direction, the following THSteps medical checkup services are authorized for delivery using synchronous audiovisual or synchronous telephone (audio-only) technologies during a Declaration of State Disaster:

| Procedure Codes                                                                                                    |       |       |       |        |       |       |       |  |  |
|--------------------------------------------------------------------------------------------------------------------|-------|-------|-------|--------|-------|-------|-------|--|--|
| 99382*                                                                                                             | 99383 | 99384 | 99385 | 99392* | 99393 | 99394 | 99395 |  |  |
| * Limited to checkups for clients who are over 24 months of age and who received their 24-month checkup in-person. |       |       |       |        |       |       |       |  |  |

Medical checkups and exception-to-periodicity checkups provided using synchronous audiovisual or synchronous telephone (audio-only) technologies are limited to checkups for clients who are over 24 months of age for the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |       |  |  |
|-----------------|-------|-------|-------|-------|-------|-------|-------|--|--|
| 99382           | 99383 | 99384 | 99385 | 99392 | 99393 | 99394 | 99395 |  |  |

Medical checkups for clients who are 2 years of age or younger must be completed in-person and may not be completed using synchronous audiovisual or synchronous telephone (audio-only) technologies (procedure codes 99381, 99382, 99391 and 99392).

THSteps providers should use their clinical judgement regarding which checkup components may be appropriate for completion using synchronous audiovisual or synchronous telephone (audio-only) technologies.

THSteps providers are encouraged to ensure that clients receiving a medical checkup using synchronous audiovisual or synchronous telephone (audio-only) technologies receive age-appropriate vaccines and laboratory screenings in a timely manner.

Medical checkup services using synchronous audiovisual or synchronous telephone (audio-only) technologies should only be provided if agreed to by the client or parent/guardian.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information on restrictions for services delivered by synchronous telephone (audio-only) technologies.

#### **4.3.8.1 THSteps Required Follow-up Visit**

An in-person follow-up visit (procedure code 99211) is required for all clients who receive an initial synchronous audiovisual or synchronous telephone (audio-only) checkup.

The in-person follow-up visit (procedure code 99211) is required within six months of the synchronous audiovisual or synchronous telephone (audio-only) checkup.

All age-appropriate checkup components noted on the THSteps Periodicity Schedule that are not completed during the synchronous audiovisual or synchronous telephone (audio-only) checkup must be completed at the in-person follow-up visit (procedure code 99211).

#### **4.3.8.2 Documentation Requirements**

Documentation in the client's medical record for synchronous audiovisual or synchronous telephone (audio-only) checkups must meet all documentation requirements for an in-person checkup and include all the following:

- Whether the checkup was completed using synchronous audiovisual or synchronous telephone (audio-only) technology
- All checkup components that were not completed at the time of the synchronous audiovisual or synchronous telephone (audio-only) checkup, the reason that the component(s) were not completed and a plan to complete the components
- For the required in-person THSteps follow-up visit: documentation must indicate that the visit is related to a previously provided synchronous audiovisual or synchronous telephone (audio-only) checkup or exception-to-periodicity checkup
- For the required in-person THSteps follow-up visit: documentation should include all age-appropriate checkup components completed during the follow-up visit
- All anticipatory guidance and information on the next scheduled medical checkup or follow-up visit

#### **4.3.8.3 Reimbursement**

THSteps checkups billed as a synchronous audiovisual or synchronous telephone (audio-only) checkup (procedure codes 99381, 99391, 99382, or 99392) for children who are 24 months of age or younger will be denied.

THSteps checkups and exception-to-periodicity checkups delivered using synchronous audiovisual technology must be billed with modifier 95.

THSteps checkups and exception-to-periodicity checkups delivered using synchronous telephone (audio-only) technology must be billed with modifier 93.

Checkups billed as exception-to-periodicity checkups must also include the appropriate exception-to-periodicity checkup modifier (23, 32, or SC).

Records are subject to retrospective review, and incomplete checkups are subject to recoupment.

### 4.3.9 Medical Checkup Follow-up Visit

Use procedure code 99211 with the NPI and THSteps benefit code when billing for a follow-up visit.

**Note:** *Reimbursement for the follow-up visit includes all elements of the visit. Reimbursement may not be allowed for the follow-up visit when submitted with certain procedure codes. For example: In accordance with CMS NCCI requirements, modifier 25 guidelines do not apply for procedure code 99211 when billed with other procedure codes that are included in the visit as related elements, including, but not limited to, administration of immunizations.*

**Referto:** Subsection 6.4.1, “National Correct Coding Initiative (NCCI) Guidelines” in “Section 6: Claims Filing” (Vol. 1, *General Information*) for additional information.

[Medical Checkup Follow-up Visit with Immunization Administration](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for a claim form example.

[Medical Checkup Follow-up Visit with TB Skin Test](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for a claim form example.

A follow-up visit may be required to complete necessary procedures related to a checkup or exception-to-periodicity checkup, such as:

- Reading the TST.
- Administering immunizations in cases where the client's immunizations were not up-to-date, medically contraindicated, or unable to be given during the checkup.
- Collection of specimens for laboratory testing that were not obtained during the checkup or the original specimen could not be processed.
- Completion of sensory or developmental screening that was not completed at the time of the checkup due to the client's condition.

A return visit to follow up on treatment initiated during a checkup or to make a referral is not a follow-up visit, but is considered an acute care visit under an appropriate E/M procedure code for an established client.

**Referto:** Subsection 9.2.60.1.1, “New and Established Patient Services” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (Vol. 2, *Provider Handbooks*) for information about established patient E/M services.

If the parent or guardian did not give consent for a component during the initial checkup, and supporting documentation is provided, no follow-up visit is necessary.

### 4.3.10 Newborn Examination

Providers do not have to be enrolled as THSteps providers to bill newborn examination procedure codes 99460, 99461, or 99463.

Newborn examinations that are billed with procedure code 99460, 99461, or 99463 may qualify as a THSteps medical checkup when all required components are completed according to the THSteps Periodicity Schedule and documented in the medical record.

Providers must use their NPI without benefit code EP1 when billing newborn examination services.

**Note:** *In Texas, the mandated newborn hearing screening and newborn screening test is included as part of the in-hospital newborn exam.*

A newborn hearing screening is included in the reimbursement to the hospital for the newborn hospital stay and is not reimbursed separately. The screening is covered as part of the newborn delivery. A newborn hearing screening must be offered to each newborn by the facility where the birth occurs,

through a program mandated by the Texas Legislature and certified by the Department of State Health Services (DSHS). If a facility is not required by legislative mandate to perform newborn hearing screenings, a referral must be made to a facility that offers the screening.

If an infant is not born in a birthing facility and is not admitted to a birthing facility, the infant must be referred to a facility that provides newborn hearing screening.

State-mandated newborn screening for critical congenital heart disease (CCHD) is offered by and performed in the birth facility in accordance with Health and Safety Code (HSC) § 33.011 and 25 TAC §§37.75–37.79.

Providers billing these newborn codes are not required to be THSteps providers, but they must be enrolled as Medicaid providers. TMHP encourages THSteps enrollment for all providers that offer a medical home for clients and provide them with medical checkups and immunizations. Physicians and hospital staff are encouraged to inform parents eligible for Medicaid that the next THSteps checkup on the periodicity schedule should be scheduled from discharge to five days of age and that regular checkups should be scheduled during the first year and after.

**Referto:** Subsection 9.2.47, “Newborn Services” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (Vol. 2, *Provider Handbooks*) for additional information on inpatient newborn services.

The THSteps online education module “Newborn Hearing Screening” on the THSteps website at [www.txhealthsteps.com](http://www.txhealthsteps.com) for additional information about conducting a newborn hearing screen.

#### **4.3.11 THSteps Medical Checkups Periodicity Schedule**

The client is periodically eligible for medical checkup services based on the THSteps Medical Checkups Periodicity Schedule. All the checkups listed on the periodicity schedule have been developed based on recommendations of the AAP and recognized authorities in pediatric preventive health. In Texas, THSteps has modified the AAP periodicity schedule based on the scheduling of a laboratory or other test in federal EPSDT or state regulations.

The THSteps Medical Checkups Periodicity Schedule is available on the HHSC website at [www.hhs.texas.gov/doing-business-hhs/provider-portals/health-services-providers/texas-health-steps/medical-providers](http://www.hhs.texas.gov/doing-business-hhs/provider-portals/health-services-providers/texas-health-steps/medical-providers).

#### **4.3.12 Mandated Components**

THSteps medical checkups must include regularly scheduled examinations and screenings of the general physical and mental health, growth, development, and nutritional status of infants, children, and youth.

The following federal and state mandated components must be documented in the client's medical record for the checkup to be considered complete:

- Comprehensive health and developmental history, including physical and mental health development
- Comprehensive unclothed physical examination
- Immunizations appropriate for age and health history
- Laboratory test appropriate to age and risk, including lead toxicity at specific federally-mandated ages
- Health education including anticipatory guidance
- Dental referral

The client's medical record must include documentation to support the rationale a component was not completed, and a plan to complete the component(s) if not due to parent or caregiver concern or reasons of conscience, including religious beliefs. THSteps provides optional clinical records to assist the provider in the documentation of the required components. These forms may be found at [www.hhs.texas.gov/doing-business-hhs/provider-portals/health-services-providers/texas-health-steps/forms](http://www.hhs.texas.gov/doing-business-hhs/provider-portals/health-services-providers/texas-health-steps/forms).

The provider must offer checkups in accordance with the Texas Health Steps Medical Checkup Periodicity Schedule (periodicity schedule), found at [www.onlineordersff.com/images/pdfs/26027.pdf](http://www.onlineordersff.com/images/pdfs/26027.pdf), to ensure the preventive health screenings occur at age appropriate points in the client's life. The periodicity schedule specifies screening procedures that are required at each stage of development. There are 11 checkups before 3 years of age (excluding the newborn exam) and then annual checkups from 3 through 20 years of age.

If the client has a condition that has been previously diagnosed and is currently receiving treatment, the associated standardized screening may be omitted with proper documentation.

Documented test or screening results obtained within the preceding 30 days for clients who are two years of age and younger, and the preceding 90 days for clients who are three years of age and older may be used to meet the testing or screening requirements. Results must include the dates of service and one of the following:

- A clear reference to the previous visit by the same provider
- Results obtained from another provider

#### **4.3.12.1 Comprehensive Health and Developmental History**

##### **4.3.12.1.1 Nutritional Screening**

Dietary practices must be evaluated at each checkup to identify and address nutritional issues or concerns.

##### **4.3.12.1.2 Developmental Surveillance or Screening**

Developmental surveillance or screening is a required component of every checkup for clients who are birth through 6 years of age. Autism screening is required at 18 months of age and again at 24 months of age. If not completed at 24 months of age, or if there is a particular concern it should be completed at 30 months of age.

As THSteps medical services, developmental screening (procedure code 96110) and autism screening (procedure code 96110 with modifier U6) are limited to once per day, per client, by the same provider or provider group. This service will be denied unless a checkup, exception-to-periodicity checkup, or follow-up visit was reimbursed for the same date of service by the same provider.

Standardized developmental screening is required at the ages listed in the "Required Screening Ages and Recommended Tools" table. Providers must use one of the validated, standardized tools listed in the table when performing a developmental or autism screening. A standardized screen is not required at other checkups up to and including the 6-year checkup; however, developmental surveillance is required at these checkups and includes a review of milestones (gross and fine motor skills, communication skills, speech-language development, self-help/care skills, and social, emotional, and cognitive development) and mental health and is not considered a separate service.

Providers may be reimbursed separately when using one of the required screening tools listed in the following table in addition to the checkup visit at specific age visits. THSteps requires one of the following required standardized tools at the following ages for a checkup to be considered complete:

| Required Screening Ages and Recommended Tools |                                                                                                                                        |                                                                                                  |
|-----------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| Screening Ages                                | Developmental Screening Tools                                                                                                          | Autism Screening Tools                                                                           |
| 9 months                                      | Ages and Stages Questionnaire (ASQ), Parents' Evaluation of Development Status (PEDS) or Survey of Well-being of Young Children (SWYC) | N/A                                                                                              |
| 18 months                                     | ASQ, PEDS or SWYC                                                                                                                      | Modified Checklist for Autism in Toddlers (M-CHAT) or M-CHAT Revised with Follow-Up (M-CHAT R/F) |
| 24 months                                     | ASQ, PEDS or SWYC                                                                                                                      | M-CHAT or M-CHAT R/F                                                                             |
| 3 years                                       | ASQ, Ages and Stages Questionnaire: Social-Emotional (ASQ:SE), PEDS or SWYC                                                            | N/A                                                                                              |
| 4 years                                       | ASQ, ASQ:SE, PEDS or SWYC                                                                                                              | N/A                                                                                              |

If a developmental screening that is required in the Required Screening Ages and Recommended Tools table is not completed during a checkup or if the client is being seen for the first time, standardized developmental screening must be completed through 6 years of age.

If a provider administers a standardized and validated developmental screening at additional checkups other than those listed in the Required Screening Ages and Recommended Tools table, the provider must document the rationale for the additional screening, which may be due to provider or parental concerns.

Developmental screening that is completed without the use of one of the required standardized screening tools is not a separately payable benefit, and the checkup will be considered incomplete.

Standardized developmental screening as part of a medical checkup and for ages other than required on the periodicity schedule is not covered when completed for the sole purpose of meeting day care, Head Start, or school program requirements.

Standardized developmental screening may be performed outside a THSteps medical checkup as part of development and neurological assessment testing.

**Referto:** Subsection 9.2.25, "Developmental Screening and Testing and Aphasia Assessment" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information related to developmental screening testing outside a THSteps medical checkup.

Referral for an in-depth developmental evaluation is determined by the criteria of the specific tool or at the provider's discretion. Referral for in-depth evaluation of development should be provided when parents express concern about their child's development, regardless of scoring on a standardized development screening tool. A medical diagnosis or a confirmed developmental delay is not required for referrals.

The ECI program serves clients who are birth through 35 months of age with disabilities or developmental delays. Under federal and state regulations, all health-care professionals are required to refer children to the Texas HHS ECI program as soon as possible, but no longer than 7 days after identifying a disability or a suspected delay in development, even if referred to an appropriate provider for further testing. If the client is 3 years of age or older, referral should be made to the local school district's special education program.

#### 4.3.12.1.3 Mental Health Screening

Mental health screening for behavioral, social, and emotional development is required at each THSteps checkup. Comparable to the American Academy of Pediatrics (AAP) Recommendations for Preventive Health Care guidelines, THSteps allows clients who are 12 through 18 years of age to receive a mental health screening using one of THSteps recognized mental health screening tools.

The following validated, standardized mental health screening tools are recognized by THSteps for mental health screening in adolescents who are 12 through 18 years of age:

- Pediatric Symptom Checklist (PSC-17)
- Pediatric Symptom Checklist (PSC-35)
- Pediatric Symptom Checklist for Youth (Y-PSC)
- Patient Health Questionnaire (PHQ-9)
- Patient Health Questionnaire (PHQ-9) Modified for Adolescents (PHQ-A [depression screen])
- Car, Relax, Alone, Forget, Family, and Trouble Checklist (CRAFTT)
- Patient Health Questionnaire (PHQ-A [anxiety, eating problems, mood problems and substance use])
- Rapid Assessment for Adolescent Preventive Services (RAAPS)

A mental health screening must be submitted with procedure code 96160 for a screening tool completed by the adolescent, or procedure code 96161 for a screening tool completed by the parent or caregiver on behalf of the adolescent. When claims with procedure code 96160 or 96161 are submitted for mental health screenings, one of the validated, standardized mental health screening tools recognized by THSteps must be used.

Only one procedure code (96160 or 96161) may be reimbursed for the mental health screening per client per calendar year based on the description of the procedure code and the service rendered. Procedure codes 96160 and 96161 will not be reimbursed for the same client for any date of service.

Procedure code 96160 or 96161 must be submitted on the same date of service by the same provider as procedure code 99384, 99385, 99394, or 99395, and reimbursement is limited to once per calendar year, any provider.

The client's medical record must include documentation identifying the tool that was used, the screening results, and any referrals that are made.

When the clinician conducting the mental health screen has the appropriate training and credentials to conduct the mental health evaluation and provide treatment, the clinician may choose to provide the mental health services or refer the client to an appropriate clinician. Clinicians who do not have these qualifications must refer clients to a qualified Medicaid-enrolled mental health specialist for such care.

For additional information about conducting a mental health screen, providers can refer to the THSteps online educational module "Mental Health Screening" at [www.txhealthsteps.com](http://www.txhealthsteps.com).

#### 4.3.12.1.4 Postpartum Depression Screening

Postpartum depression screening is a benefit of Texas Medicaid. Procedure codes G8431 and G8510 may be reimbursed when billing for postpartum depression screening in the office setting.

THSteps medical providers may receive separate reimbursement for postpartum depression screening, in addition to the infant's Texas Health Steps medical checkup or follow-up visit. The reimbursement amount for procedure codes G8431 and G8510 covers all postpartum depression screenings provided during the infant's medical checkup or follow-up visit.

Postpartum depression screening must be submitted under the infant's Medicaid client number and will be restricted to clients who are 12 months of age and younger.

Procedure codes G8431 and G8510 must be submitted on the same claim, for the same date of service, by the same provider as one of the following THSteps medical checkup or follow-up visit procedure codes:

| Procedure Codes |       |       |       |       |
|-----------------|-------|-------|-------|-------|
| 99211           | 99381 | 99382 | 99391 | 99392 |

Only one procedure code, either G8431 or G8510, may be reimbursed per provider in the 12 months following the infant’s birth.

**Postpartum Depression Screening and Referral Services**

The American Academy of Pediatrics (AAP) recommends the infant’s provider screen mothers for postpartum depression. Postpartum depression is the most common form of postpartum mood disturbance. Screening mothers for postpartum depression is appropriate for the general postpartum population and is recommended within the first few months following birth, up to the infant’s first birthday.

Postpartum depression meets the same clinical criteria as major depressive disorder, with the main difference being onset during pregnancy or after delivery.

While postpartum depression is the most common form of postpartum mood disturbance, providers should be aware that other mood disorders that may arise during the postpartum period include anxiety and panic disorders, obsessive-compulsive disorder, and postpartum psychosis.

Postpartum psychosis is a much more severe form of postpartum depression accompanied by psychotic features. Postpartum psychosis is rare, typically develops in the first few days to weeks after delivery, and is a psychiatric emergency requiring immediate medical attention.

In addition to postpartum psychosis, immediate or emergent medical attention may be necessary when the risk of imminent harm or danger is present.

**Screening Guidelines**

Screening using a validated tool is required. At a minimum, screening should occur at least once during the postpartum period. Validated tools may include the following:

- Edinburgh Postnatal Depression Scale
- Postpartum Depression Screening Scale
- Patient Health Questionnaire 9

Screening alone is inadequate for improving clinical outcomes. A positive screening for postpartum depression requires the THSteps provider to develop a referral plan with the mother.

**Positive Screenings: Referrals and Follow-Up**

THSteps providers must discuss the screening results with the mother, discuss the possibility of depression, and the impact depression may have on the mother, family, and health of the infant.

The THSteps provider and mother should discuss the mother’s options so the provider can refer her to an appropriate provider. Screening and referral is not contingent upon the mother’s Medicaid eligibility. When needed, referrals should be made regardless of the funding source, including referral to local mental health authorities and local behavioral health authorities.

THSteps providers should refer the mother to a provider who can perform further evaluation and determine an appropriate course of treatment. Appropriate providers include, but are not limited to:

- Mental health clinicians
- The mother’s primary care provider

- Obstetricians and gynecologists
- Family physicians
- Community resources such as Local Mental Health Authorities (LMHAs)

**Note:** *Referral to an emergency center may be necessary when the risk for imminent harm or danger is present, such as mothers who report suicidal thoughts or thoughts of harming herself or the baby.*

Resources should be provided for support in the interim until the mother is able to access care.

Scheduling a return visit for the infant sooner than the next scheduled visit may be appropriate in some cases.

### **Prior Authorization Requirements**

Screening for postpartum mood disorders at the checkup or follow up visit does not require prior authorization.

**Note:** *While recommended, screening for postpartum depression at the THSteps visit is not a compulsory requirement of the infant visit.*

### **Documentation Requirements**

Documentation in the infant's record must include the name of the screening tool used and date the screening was completed.

If the mother screens positive for depression, at a minimum, the provider must note that a referral plan was discussed with the mother and a referral to a provider was made.

Providers may give the mother a copy of the completed screening tool to take with her to referral appointments.

Documentation should also include any health education or anticipatory guidance provided, along with the time period recommended for the infant's next appointment.

#### **4.3.12.1.5 Tuberculosis (TB) Screening**

Administer the TB risk screening tool annually beginning at 12 months of age and thereafter at other medical checkups.

The TB risk screening tool is available on the HHSC website at [www.hhs.texas.gov/sites/default/files/documents/doing-business-with-hhs/provider-portal/health-services-providers/thsteps/thb-questionnaire.pdf](http://www.hhs.texas.gov/sites/default/files/documents/doing-business-with-hhs/provider-portal/health-services-providers/thsteps/thb-questionnaire.pdf).

A TST is to be administered when the screening tool indicates a risk for possible exposure. Providers must use procedure code 86580 when a TST is administered.

A TST may be reimbursed separately when performed as part of a THSteps medical checkup. TB screenings are part of the encounter rates for FQHCs and RHCs and are not reimbursed separately.

A follow-up visit (procedure code 99211) is required to read all TSTs. The provider may bill the follow-up visit with an NPI and THSteps benefit code.

If further evaluation is required to diagnose either latent TB infection or active TB disease, the provider may bill the appropriate E/M office visit code. Diagnosis and treatment are provided as a medical office visit. Providers can also call the TB program at 1-512-533-3000 for additional clinical information.

**Referto:** "TB Policies and Procedures" at [www.dshs.texas.gov/idcu/disease/tb/](http://www.dshs.texas.gov/idcu/disease/tb/) for guidance on skin testing children in various settings. Click TB Control Standards, and then look under "Texas TB Policies and Procedures."

#### 4.3.12.2 Comprehensive Unclothed Physical Examination

An age-appropriate unclothed physical examination is required at each checkup.

Recording of measurements and percentiles as appropriate to age to document growth and development including:

- Length or height and weight.
- The World Health Organization (WHO) [growth charts](#), which are recommended for clients from birth to 2 years of age.
- The Centers for Disease Control and Prevention (CDC) [growth charts](#), which are recommended for clients from 2 years of age and older.
- Fronto-occipital circumference (FOC) through the first 24 months of age.
- Body mass index (BMI) calculated beginning at 2 years of age.
- Blood pressure beginning at 3 years of age.

##### 4.3.12.2.1 Oral Health Screening

Oral health screening is a part of the medical checkup physical examination.

##### 4.3.12.2.2 Sensory Screening

Documentation of test results from a school vision or hearing screening program may replace the required audiometric or visual acuity screening if conducted within 12 months prior to the checkup.

Clients who are birth through 35 months of age with suspected or confirmed hearing or visual impairment must be referred to ECI as soon as possible, but no longer than 7 days after identification.

##### 4.3.12.2.3 Hearing Screening

State-mandated newborn hearing screening is offered by and performed in the birth facility in accordance with Health and Safety Code (HSC), Chapter 47, §§ 47.001–47.009 and 25 TAC §§ 37.501–37.507.

A newborn hearing screening must be completed at the birthing facility. Automated auditory brainstem response (AABR) or transient evoke or distortion product otoacoustic emissions (OAE) may be performed.

#### Screening Results

Birthing facilities must report all newborn hearing screening results to DSHS within five business days using the web-based Texas Early Hearing Detection and Intervention (TEHDI) Management Information System (MIS) if written parental consent is obtained. Documented written consent must be maintained in the infant's medical record.

Birthing facilities must provide written newborn hearing screening results to the parent or caregiver as well as the newborn's primary care provider or medical home.

Primary care providers and medical homes (Texas Health Steps [THSteps] providers) must obtain a copy of the newborn hearing screening results within the TEHDI MIS if not provided by the birthing facility. The primary care provider or medical home must review all newborn hearing screening results with the parent or caregiver at the first checkup and determine if any additional follow-up is necessary.

**Note:** *The primary care provider or medical home is responsible for managing and coordinating care for the child. Refer to the American Academy of Pediatrics Position Statement at <https://publications.aap.org/pediatrics/article/129/5/996/73753/Home-Care-of-Children-and-Youth-With-Complex>. Additional information related to TEHDI and Early Hearing Detection & Intervention Action Center (EHDI) can also be found at <https://publications.aap.org/pediatrics/article/120/4/898/71218/Year-2007-Position-Statement-Principles>.*

Newborns who pass the newborn hearing screening must have their hearing monitored per the THSteps periodicity schedule. The primary care provider or medical home may opt to use the following tools to monitor developmental milestone benchmarks in newborns that pass their newborn hearing screening:

- TEHDI: A Roadmap for Families (English)
- Hearing Checklist for Parents (English)
- Hearing Checklist for Parents (Spanish)

Newborns who do not pass the initial screen must be rescreened a second time in the birthing facility before discharge.

### **Outpatient Rescreening**

Newborns who do not pass the second screen in the birthing facility must be referred to a Medicaid-enrolled provider for an outpatient follow-up rescreen. The rescreen provider must have access to AABR or OAE screening and must be experienced with the pediatric population under age three.

Newborns who do not receive a referral from the birthing facility, after not passing the second screen in the birthing facility, must be referred by their primary care provider or medical home to a Medicaid-enrolled provider for an outpatient follow-up rescreen, unless their primary care provider or medical home is adequately equipped to provide the service. The optimal time frame for the outpatient follow-up rescreen is when the infant is between 10 and 30 days old.

Outpatient follow-up rescreens must be completed by AABR or OAE screening. Results must be reported as soon as possible to the DSHS TEHDI MIS, as well as the infant's primary care provider or medical home.

Newborns who pass the outpatient rescreen must have their hearing monitored by their primary care provider or medical home per the THSteps periodicity schedule.

### **Diagnostic Audiological Evaluation**

Newborns who do not pass the outpatient rescreen must be referred to a Medicaid-enrolled audiologist for a diagnostic audiological evaluation using the Texas Pediatric Protocol for Evaluation. Referrals should be made upon consultation with the primary care provider or medical home.

**Note:** Additional information about the Texas Pediatric Protocol for Evaluation is available at [www.dshs.texas.gov/texas-early-hearing-detection-intervention-tehdi](http://www.dshs.texas.gov/texas-early-hearing-detection-intervention-tehdi)

Unless the newborn or infant has been hospitalized since birth, the diagnostic audiological evaluation must be completed no later than the third month after birth, or upon referral by the primary care provider or medical home.

Diagnostic audiological evaluations completed by audiologists using the Texas Pediatric Protocol for Evaluation must include a diagnostic auditory brainstem response (ABR) and, if not previously done, a diagnostic OAE to determine cochlear involvement.

Audiologists will use equipment norms for newborns, preferably ones they have collected on their equipment.

Protocols include air and bone conduction testing using tone burst ABR, as well as click ABR, so the amplification may be appropriate to fit the individual.

**Note:** Additional information about technologies that have been evaluated by an independent investigator and DSHS, and have been found to meet the requirements for conducting newborn hearing screening is available at [www.dshs.texas.gov/texas-early-hearing-detection-intervention-tehdi](http://www.dshs.texas.gov/texas-early-hearing-detection-intervention-tehdi).

**Evaluation Results**

Audiologists must report all diagnostic results to DSHS TEHDI MIS and provide written hearing screening results to the primary care provider or medical home.

The newborn or infant will be fitted for hearing aids by the audiologist when appropriate and should receive continued audiological assessments and monitoring as needed.

**ECI Referrals**

Newborns or infants not passing the outpatient rescreen must also be referred by the primary care provider or medical home to ECI for provision of services. The referral should be made within the TEHDI MIS.

Newborns or infants, as required by federal law under the Individuals with Disabilities in Education Act (IDEA), may be referred to ECI twice under the following circumstances:

- Upon suspicion that the child is deaf or hard of hearing, for service coordination and possible confirmation of eligibility for ECI services
- Upon confirmation that the child is deaf or hard of hearing, for a referral to other Local Education Agency for auditory impairment services

**Late Onset Hearing Loss**

When one or more risk factors for late onset hearing loss has been identified and the newborn or infant passed their hearing screen, the outcome will not be “normal hearing” but will be “in process.” Noting the infant as “in process” allows all health-care providers in the care of the infant to be aware of the presence of risk factors to determine the frequency of risk monitoring to identify audiological issues as soon as possible. This determination depends on the type and number of the following risks identified:

- Craniofacial anomalies
- Exchange transfusion for elevated bilirubin
- Family history of deafness
- NICU > 5 days
- Apgar 0-4 at 1 minute
- Apgar 0-6 at 5 minutes
- Bacterial meningitis
- Birth weight < 1500g
- Congenital infection
- Head injury
- Neurodegenerative disorder
- Other postnatal infection
- Otitis media > 3 months (middle ear infection)
- Ototoxic medications administered
- Parental concern regarding hearing status
- Persistent pulmonary hypertension of the newborn associated with mechanical ventilation

- Syndrome

**Note:** Information about risk factors for late onset hearing loss and a risk monitoring periodicity schedule is available in [Chapter 3, “Tracking, Reporting, & Follow-Up,”](#) in *The NCHAM E-Book on the National Center for Hearing Assessment and Management (NCHAM) website* at <http://infanthearing.org>.

Hearing screening must be performed at each checkup for clients who are birth through 20 years of age. Audiometric screening must be performed at specific ages indicated on the periodicity schedule. Subjective screening through provider observation or informant report is required at the other checkups.

Clients at high risk or with abnormal screening results must be referred to an appropriate Medicaid-enrolled provider who specializes in pediatric audiology services. Clients who are birth through 20 years of age enrolled with Texas Medicaid for the date(s) of service are eligible for Texas Medicaid hearing services benefits.

#### 4.3.12.2.4 Vision Screening

Vision screening must be performed at each checkup. A visual acuity test must be performed at ages indicated on the periodicity schedule. Subjective screening through provider observation or informant report is done at the other checkups.

All clients must be screened for eye abnormalities by history, observation, and physical exam and referred to a Medicaid-enrolled optometrist or ophthalmologist experienced with the pediatric population if at high risk.

Clients with abnormal visual acuity screening results must be referred to a Medicaid-enrolled optometrist or ophthalmologist experienced with the pediatric population.

### 4.3.12.3 Immunizations

The TVFC program provides vaccines at no cost to the provider. The vaccines are recommended according to the Recommended Childhood and Adolescent Immunization Schedule (Advisory Committee on Immunization Practices [ACIP], AAP, and the American Academy of Family Physicians [AAFP]). Medicaid does not reimburse for vaccines/toxoids that are available from TVFC. THSteps providers are strongly encouraged to enroll in TVFC at DSHS and must do so in order to obtain free vaccines for clients who are birth through 18 years of age. Local and public health departments that are not otherwise enrolled as a provider that is authorized to receive reimbursement for vaccine administration fees should enroll as a Comprehensive Care Program (CCP) provider. Providers may not charge Texas Medicaid for the cost of the vaccines obtained from TVFC; however the administration fee, not to exceed \$13.75, is considered for reimbursement.

For additional information about immunizations, providers can refer to the THSteps online educational module “Immunization” at [www.txhealthsteps.com](http://www.txhealthsteps.com).

**Referto:** Section 4.5, “Vaccine Services” in this handbook.

“Immunizations” in this handbook.

Providers must assess the immunization status at every medical checkup to ensure all age requirements have been met. The necessary vaccines and toxoids must be administered at the time of the checkup unless medically contraindicated or because of parent’s or caregiver’s reasons of conscience including religious beliefs. If an indicated vaccine or toxoid was not administered, the reason must be documented in the client’s medical record.

Vaccines and toxoids must be administered according to the current ACIP “Recommended Childhood and Adolescent Immunization Schedule - United States.” Providers must not refer clients to the local health department or other entity for immunization administration.

THSteps providers are strongly encouraged to obtain vaccines from TVFC for clients who are birth through 18 years of age. Vaccines that are identified as being distributed through TVFC are not reimbursed separately.

Vaccines and toxoids may be reimbursed through Texas Medicaid at a fee determined by HHSC when the vaccine is medically necessary for THSteps clients who are 19 through 20 years of age.

The specific diagnosis necessitating the vaccine and toxoid is required when billing with the following administration procedure codes in combination with an appropriate vaccine/toxoid procedure code:

| Procedure Codes |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|
| 90460           | 90461 | 90471 | 90472 | 90473 | 90474 |

The age-appropriate diagnosis code for a preventive care medical checkup must be submitted on the claim. If an immunization is administered as part of a preventive care medical checkup, diagnosis code Z23 may also be included on the claim, in addition to the age-appropriate diagnosis.

Vaccine and toxoid administration must be billed with the following age appropriate diagnosis codes:

| Client Age               | Diagnosis Code |
|--------------------------|----------------|
| Birth through 7 days     | Z00110         |
| Eight through 28 days    | Z00111         |
| 29 days through 17 years | Z00121, Z00129 |
| 18 years or older        | Z0000, Z0001   |

**Referto:** “Immunizations” in this handbook.

The DSHS website for TVFC provider enrollment information at [www.dshs.texas.gov/immunizations/providers/overview](http://www.dshs.texas.gov/immunizations/providers/overview).

The THSteps online education module “Immunizations,” located on the THSteps website at [txhealth-steps.com](http://txhealth-steps.com), for more information about immunizations.

#### 4.3.12.4 Health Education and Anticipatory Guidance

Anticipatory guidance is a federally mandated component of the THSteps medical checkup and includes health education and counseling. Health education and counseling with parents or guardians and clients are required to assist parents in understanding what to expect in terms of the client’s development and to provide information about the benefits of healthy lifestyles and practices, as well as accident and disease prevention. Written material may also be given but does not replace counseling. The optional THSteps clinical records include age-appropriate topics on the back of each form. These forms can be found at [www.hhs.texas.gov/doing-business-hhs/provider-portals/health-services-providers/texas-health-steps/forms](http://www.hhs.texas.gov/doing-business-hhs/provider-portals/health-services-providers/texas-health-steps/forms).

#### 4.3.12.5 Dental Referral

Based on the AAPD definition of a dental home, Texas Medicaid defines a dental home as the dental provider who supports an ongoing relationship with the client that is inclusive of all aspects of oral health care delivered in a comprehensive, continuously accessible, coordinated, and family-centered way. In Texas, establishment of a client’s dental home should begin at 6 months of age but no later than 12 months of age and includes referral to dental specialists when appropriate.

The physician must refer clients to establish a dental home beginning at 6 months of age or earlier if trauma or early childhood caries are identified. For established clients after the six-month medical checkup, the provider must confirm if a dental home has been established and is on-going; if not,

additional referrals must be made at subsequent medical checkup visits until the parent or caregiver confirms that a dental home has been established for the client. The parent or caregiver of the client may self-refer for dental care at any age, including 12 months of age or younger.

#### 4.3.12.6 Laboratory Test

Age-appropriate and risk-based laboratory testing as noted on the periodicity schedule is considered part of the medical checkup. The DSHS Laboratory provides supplies for specimen collection and mailing and shipping; and reporting of test results to enrolled THSteps medical providers that submit specimens to the DSHS Laboratory. These services and supplies are limited to THSteps medical checkup laboratory services provided in the course of a medical checkup to THSteps clients. Unauthorized use of services and supplies is a violation of federal regulations.

DSHS Laboratory services are available at no cost to all enrolled THSteps medical providers for THSteps medical checkups only.

**Example:** *If a provider needs immediate results for the anemia screening, the specimen may be processed in the office/clinic, but will not be separately reimbursed. The test results must be documented in the client's medical record.*

**Exception:** *For tests related to screening for type 2 diabetes, dyslipidemia, HIV, and syphilis, the client or specimen may be sent to the laboratory of the provider's choice. Point-of-care testing that is performed in the provider's office to obtain the initial blood lead specimen may be reimbursed separately.*

The date of service for the laboratory testing is to be the date the specimen was obtained as part of the medical checkup, follow-up, or exception-to-periodicity checkup.

The procedure codes for any laboratory testing services other than screening for type 2 diabetes, dyslipidemia, HIV, and syphilis are informational when obtained on the same day a checkup is completed, even if an acute care visit is performed on the same date of service.

If the laboratory testing as identified on the THSteps Medical Checkup Periodicity Schedule is obtained as part of an E/M visit on a different date of service than a checkup, the services may be considered as separate services and may be sent to the laboratory of the provider's choice.

Laboratory specimens obtained for diagnostic evaluation, rather than for screening purposes and performed on the same day as a checkup, may be considered as separate services unless the test is required as part of a checkup. If the test is required as part of the checkup, the laboratory specimens, with the exception of screening tests for dyslipidemia, type 2 diabetes, HIV, and syphilis must be submitted to the DSHS Laboratory for testing. Diagnostic specimens that are not part of the checkup can be sent to the laboratory of the provider's choice.

Laboratory services that are related to a THSteps medical checkup are available from the DSHS Laboratory and may not be billed separately with an office visit or consultation on the same day as a THSteps medical checkup.

All of the laboratory tests that are listed on the THSteps Periodicity Schedule may be submitted to the DSHS Laboratory if the specimen submission requirements can be met. Tests that are listed in the "Laboratory Test Procedure Codes" table must be submitted to the DSHS Laboratory. Tests that must be sent to the DSHS laboratory but that are processed elsewhere are not reimbursed; however, the documentation results may be used to meet the requirements for a checkup.

The following procedure codes may not be billed separately with an office visit or consultation on the same day as a THSteps medical checkup either by a provider or laboratory. Claims for the following procedure codes submitted by a provider or a commercial laboratory for the same DOS as a THSteps medical checkup are denied and are subject to retrospective review:

| Laboratory Test Procedure Codes                                                                                               |        |        |        |  |  |  |  |  |  |
|-------------------------------------------------------------------------------------------------------------------------------|--------|--------|--------|--|--|--|--|--|--|
| 83655*                                                                                                                        | 85018^ | 87491^ | 87591^ |  |  |  |  |  |  |
| * Unless performed using point-of-care testing, the initial lead specimen must be sent to the DSHS Laboratory<br>^QW Modifier |        |        |        |  |  |  |  |  |  |

For specimens sent to the DSHS Laboratory, the complete medical checkup includes the specimen collection and supplies, mailing and shipping supplies, and the review of the test results from the DSHS Laboratory.

For specimens sent to a laboratory of the provider's choice, the checkup includes the specimen collection or ordering of the test and the review of the test results from the laboratory.

#### 4.3.12.6.1 Laboratory Supplies

The DSHS Laboratory verifies enrollment of THSteps medical providers before sending laboratory supplies and the informational packet to the medical providers. Newly enrolled providers should contact the DSHS Laboratory to request laboratory supplies. Upon request, the DSHS Laboratory provides THSteps medical providers with laboratory supplies associated with specimen collection, submission, and mailing and shipping of required laboratory tests related to medical checkups. Requests for specimen submission forms are routed to the DSHS Laboratory reporting staff and mailed separately to the providers. The Child Health Laboratory Supplies Order Form lists the laboratory supplies that the DSHS Laboratory provides to THSteps medical providers.

To obtain a THSteps Child Health Laboratory Supplies Order Form, providers can call 1-512-776-7661 or 1-888-963-7111, ext. 7661, or download the form online at [www.dshs.texas.gov/lab/MRS\\_forms.shtm](http://www.dshs.texas.gov/lab/MRS_forms.shtm).

#### 4.3.12.6.2 Newborn Screening Supplies

Providers that perform newborn screening (NBS) can order supplies by submitting a Newborn Screening Supplies Order Form to the DSHS Laboratory. The Newborn Screening Supplies Order Form lists the NBS supplies that the DSHS Laboratory provides to medical providers.

**Note:** For newborn screening, only the specimen collection form (NBS 3), mailing envelope and provider address labels are provided. Lancets, mailing, and shipping costs are the responsibility of the submitter.

To obtain a Newborn Screening Supplies Order Form, medical providers can call 1-512-776-7661 or 1-888-963-7111, ext. 7661, or download the form online at [www.dshs.texas.gov/lab/MRS\\_forms.shtm](http://www.dshs.texas.gov/lab/MRS_forms.shtm).

Contact information for requesting laboratory supplies:

Container Preparation  
Laboratory Services Section, MC 1947  
Department of State Health Services  
PO Box 149347  
Austin, TX 78714-9347  
1-512-776-7661 or 1-888-963-7111, Ext. 7661  
Fax: 1-512-776-7672

#### 4.3.12.6.3 Laboratory Submission

All required laboratory testing for THSteps clients must be performed by the Department of State Health Services (DSHS) Laboratory in Austin, TX, with the following exceptions:

- Specimens collected for type 2 diabetes, dyslipidemia, HIV, and syphilis screening may be sent to the laboratory of a provider's choice or to the DSHS Laboratory in Austin if submission requirements can be met.
- Initial blood lead testing using point-of-care testing.

THSteps medical checkup laboratory specimens submitted to the DSHS Laboratory must be accompanied with the DSHS Laboratory Specimen Submission Form (Newborn Screening NBS 3 or G-THSTEPS as appropriate) for test(s) requested. All forms must include the client's name and Medicaid number as they appear on the Your Texas Benefits Medicaid card. If a number is not currently available but is pending (i.e., a newborn or a newly certified client verified by a Medicaid Eligibility Verification [Form H1027] as eligible for Medicaid), providers must write "pending" in the Medicaid number space, which is located in the payor source section of the laboratory specimen submission form.

Laboratory specimens received at the DSHS Laboratory without a Medicaid number or the word "pending" written on the accompanying specimen submission form will be analyzed, and the provider will be billed.

Specimens submitted to the laboratory must also meet specific acceptance criteria. For additional information on specimen submission, providers can refer to the DSHS Laboratory web page at:

[www.dshs.texas.gov/lab/MRS\\_specimens.shtm](http://www.dshs.texas.gov/lab/MRS_specimens.shtm).

**Note:** *If an extreme health problem exists and telephone results are needed quickly, providers should make a request on the laboratory form. With the exception of weekends and holidays, routine specimens are analyzed and reported within three business days after receipt by the DSHS Laboratory. Critical abnormal test results (e.g., hemoglobin equal to or below 7g/dL or blood lead levels greater than or equal to 40 mcg/dL) are identified in the laboratory within 36 hours after receipt of specimens and are reported to the submitter by telephone within one hour of confirmation.*

The THSteps laboratory specimens that can be mailed at ambient temperature can be sent to the DSHS Laboratory Services Section through the U.S. Postal Service at no cost using the provided business reply labels:

DSHS Laboratory Services Section  
Walter Douglass  
PO Box 149163  
Austin, TX 78714-9803  
1-512-776-7318 or 1-888-963-7111 Ext. 7318

THSteps laboratory specimens that require overnight shipping on cold packs through a courier service must be sent to the DSHS Laboratory Services Section at:

DSHS Laboratory Services Section, MC-1947  
1100 West 49th Street  
Austin, TX 78756-3199

Newborn Screening specimens can be sent through the U.S. Postal Service to:

Texas Department of State Health Services  
Laboratory Services Section  
PO Box 149341  
Austin, TX 78714-9341

Gonorrhea and Chlamydia specimens for regular delivery are sent to:

Department of State Health Services  
Laboratory - MC 1947  
Walter Douglass, 1-512-776-7569  
PO Box 149163  
Austin, TX 78714-9803

Gonorrhea and Chlamydia specimens that are shipped cold overnight by courier are sent to:

Department of State Health Services  
Laboratory - MC 1947  
Walter Douglass, 1-512-776-7569  
1100 W. 49th Street  
Austin, TX 78756-3199

Collectors are available from the DSHS Austin Laboratory. To order collectors, providers must complete the Order Form for Gonorrhea/Chlamydia (GC/CT) Laboratory Supplies (G-6C) that is posted on the DSHS website at [www.dshs.texas.gov/lab/MRS\\_forms.shtm](http://www.dshs.texas.gov/lab/MRS_forms.shtm) and fax the completed form to 1-512-776-7672.

Providers can call 1-512-776-6030 or toll-free 1-888-963-7111, ext. 6030, for questions about submission requirements such as collection, supplies, and mailing of specimens for THSteps gonorrhea and chlamydia adolescent screening.

#### 4.3.12.6.4 Send Comments

Providers with comments or feedback about THSteps specimen collection supplies should contact the DSHS Laboratory. Supplies are evaluated continually, and feedback from supply users is useful. Documented comments may support, justify, or initiate a change in a provided item. Providers can send a brief letter or fax to the following address:

Quality Assurance Unit  
Laboratory Services Section, MC 1947  
Department of State Health Services  
PO Box 149347  
Austin, TX 78714-9347  
Fax: 1-512-776-7294

#### 4.3.12.6.5 Laboratory Reporting

A computer-generated result report is mailed or faxed to the submitting THSteps medical checkup provider. A monthly statistical report card is only available online for providers documenting their total number of Total Hemoglobin and Blood Lead submissions by diagnosis and adequacy. The DSHS Laboratory has web-based services (remote order or result reporting) available for THSteps and Newborn Screening laboratory services. For more information, providers can visit the DSHS website at [www.dshs.texas.gov/lab/remoteData.shtm](http://www.dshs.texas.gov/lab/remoteData.shtm) or call 1-888-963-7111, Ext. 6030.

#### 4.3.12.6.6 Required Laboratory Tests Related to Medical Checkups

The following laboratory screening procedures are required components of the THSteps medical checkup and are to be performed in accordance with the age and frequency specified on the THSteps medical checkup periodicity schedule. Due to changes in specimen collection, handling, and submission criteria, providers should contact the DSHS Laboratory for the most current specimen requirements by calling 1-888-963-7111, Ext. 6236, 6237, or 2628, email [ClinicalChemistry@dshs.texas.gov](mailto:ClinicalChemistry@dshs.texas.gov), or visiting the DSHS website at [www.dshs.texas.gov/lab/mrs\\_labtests\\_toc.shtm](http://www.dshs.texas.gov/lab/mrs_labtests_toc.shtm).

## Anemia Screening

Anemia screening by hemoglobin or hematocrit levels is required at ages as noted on the THSteps Periodicity Schedule and the specimen must be sent to the DSHS Laboratory. If there is an urgent need for test results, these tests may be completed in a provider's office or clinic, but they will not be reimbursed separately. These test results must be documented in the client's medical record.

## Lead Screening and Testing

In accordance with current federal regulations, THSteps requires blood lead screening at ages notated on the THSteps Periodicity Schedule and must be performed during the medical checkup.

Environmental lead risk assessments, as part of anticipatory guidance, should be completed at all checkups through age 6 when testing is not mandated, and may be performed using the Lead Risk Questionnaire, Form Pb-110, which is provided in both English and Spanish at [www.dshs.texas.gov/blood-lead-surveillance-group/for-providers#environment](http://www.dshs.texas.gov/blood-lead-surveillance-group/for-providers#environment). Providers may also opt to use an equivalent form of their choice.

The initial lead testing may be performed using a venous or capillary specimen, and must either be sent to the DSHS Laboratory or performed in the provider's office using point-of-care testing. If the client has an elevated blood lead level of 3.5 mcg/dL or greater, the provider must perform a confirmatory test using a venous specimen. The confirmatory specimen may be sent to the DSHS Laboratory, or the client or specimen may be sent to a laboratory of the provider's choice.

All blood lead levels in clients who are 14 years of age or younger must be reported to DSHS Texas Childhood Lead Poisoning Prevention Program (TXCLPPP). Reports should include all information as required on the Child Blood Lead Reporting, Form F09-11709 or the Point-of-Care Blood Lead Testing report Form Pb-111, which can be found at [www.dshs.texas.gov/lead/providers.shtm](http://www.dshs.texas.gov/lead/providers.shtm) or by calling 1-800-588-1248.

Information related to blood lead screening and reporting for clients who are 15 years of age or older is available on the DSHS Blood Lead Surveillance Branch's website at [www.dshs.texas.gov/lead/providers.shtm](http://www.dshs.texas.gov/lead/providers.shtm).

Initial blood lead testing using point-of-care testing (procedure code 83655 with modifier QW) may be reimbursed to THSteps medical providers when performed in the provider's office. Providers must have a *Clinical Laboratory Improvement Amendments of 1988 (CLIA)* certificate of waiver. For waived tests, providers must use modifier QW as indicated on the CMS website.

Blood lead testing is part of the encounter rates for FQHCs and RHCs and is not reimbursed separately.

Providers may obtain more information about the medical and environmental management of lead-poisoned children from the DSHS Childhood Lead Poisoning Prevention Program by calling 1-800-588-1248 or visiting the web page at [www.dshs.texas.gov/lead](http://www.dshs.texas.gov/lead).

**Referto:** "Appendix C. Lead Screening" in this handbook for more information on lead screening procedures and follow-up.

## Dyslipidemia

Screening for dyslipidemia is required once for clients who are 9 through 11 years of age and once again for clients who are 18 through 20 years of age, regardless of risk. These are in addition to the current risk-based screening for clients who are 24 months through 20 years of age. Clients or specimens may be sent to the laboratory of the provider's choice, including the DSHS Laboratory. THSteps does not provide a formal risk assessment tool. Providers may refer to the AAP policy statement on cholesterol screening for more information.

## Diabetes

Screening for type 2 diabetes is based on risk assessment. THSteps does not provide a formal risk assessment tool. Clients and specimens may be sent to the laboratory of the provider's choice, including the DSHS Laboratory.

## Newborn Screening

Each newborn delivered in Texas must be subjected to two screens to test for a number of genetic and heritable disorders. Each newborn screen is indicated on the THSteps Periodicity Schedule. A current list of screened disorders is available at [www.dshs.texas.gov/newborn/screened\\_disorders.shtm](http://www.dshs.texas.gov/newborn/screened_disorders.shtm).

Additional information about newborn screening, is available on the Newborn Screening Program website at [www.dshs.texas.gov/newborn/default.shtm](http://www.dshs.texas.gov/newborn/default.shtm).

The initial newborn screen specimen must be obtained between 24 and 48 hours after birth. Newborns discharged from a hospital or birthing facility before this time criteria is met must have a newborn screen blood specimen obtained immediately prior to discharge. When the newborn is an inpatient in the hospital, the hospital shall ensure that the appropriate screens are done. When the newborn is not in the hospital, the physician or health-care practitioner who attends the newborn outside of the hospital shall be responsible for causing the appropriate screens to be done. TAC Title 25, Part 1, Chapter 37, Subchapter D, Rule §37.55.

A second screen is to be obtained between one and two weeks of age by the newborn's physician or health-care practitioner, and is a required component of the THSteps medical checkup. Clients may not be referred to the local health department or other providers for this service. If there is any doubt that a client younger than 12 months of age was properly tested, the provider should submit a screen on DSHS Form NBS 3 to the Texas Department of State Health Services, Laboratory Services Section, Austin, Texas.

Newborn screening tests may be performed in special circumstances, such as adoption, if there is not record of previous test results. Newborn screen results are mailed or faxed to the address that the provider indicated on DSHS Form NBS 3. Providers may sign up to receive results online through the DSHS Laboratory web-based services. For more information visit the DSHS website at [www.dshs.texas.gov/lab/newbornscreening.shtm](http://www.dshs.texas.gov/lab/newbornscreening.shtm) or call 1-888-963-7111, Ext. 6030.

**Note:** *Recommendations for necessary follow-up procedures are included with the newborn screen results. Newborn Screening (NBS) Clinical Care Coordination staff will contact providers when there are significant out of range newborn screening laboratory results.*

### 4.3.12.6.7 Additional Required Laboratory Tests Related to Medical Checkups for Adolescents

The following is a list of required and risk-based laboratory tests related to medical checkups for adolescents and guidelines for testing for sexually transmitted diseases (STDs).

## Testing for Sexually Transmitted Diseases

### Syphilis Testing

Syphilis testing should be performed on adolescents that are at high risk for infection. Clients and specimens may be sent to the laboratory of the provider's choice, including the DSHS Laboratory.

### Gonorrhea and Chlamydia Infection Testing

Testing for gonorrhea and Chlamydia should be performed on adolescents that are at high risk for infection. Specimens must be sent to the DSHS Laboratory in Austin.

### HIV Testing

Clients should be informed that the HIV test is routinely available, confidential, and completely anonymous. It is critical to maintain confidentiality when caring for clients, as well as their specimens. Testing should be performed only after informed consent is obtained from the adolescent. Informed consent does not have to be written as long as there is documentation in the medical record that the test has been explained and consent has been obtained.

Screening for HIV is required once for clients who are 16 through 18 years of age, regardless of risk. Clients or specimens may be sent to the laboratory of the providers' choice including the DSHS Laboratory.

Screening for HIV is also based on risk assessment for clients who are 11 through 20 years of age based on risk assessment. Clients or specimens may be sent to the laboratory of the providers' choice, including the DSHS Laboratory.

THSteps does not provide a formal HIV risk assessment tool. Providers may refer to the AAP policy statement on HIV screening and CDC guidelines on HIV screening for more information.

HIV testing may be performed for adolescents without requirement of parental consent. Adolescents at risk for HIV infection should be offered confidential HIV screening. If the client refuses the HIV test, the provider may not perform the test and must explain the option of anonymous testing and refer the client to a testing facility that offers anonymous testing. A notation must be made in the medical record that notification of the HIV test and the right to refuse was given. Providers may call the HIV/STD InfoLine for referrals to HIV/AIDS testing sites; prevention, case management, and treatment providers; STD clinics; and other related service organizations. The HIV/STD InfoLine is 1-800-299-2437. This toll-free HIV/AIDS and STD information and referral service is available for English- and Spanish-speaking callers and for those who are hearing-impaired.

### **Communicable Disease Reporting**

Diagnoses of STDs, including HIV, are reportable conditions under 25 TAC, Chapter 97. Providers must report confirmed diagnoses of STDs as required by 25 TAC §97.132.

#### **4.3.12.6.8 Zika Virus Testing**

**Referto:** Subsection 2.2.11.1, "Zika Virus Testing" in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* for information about Zika virus testing.

### **4.3.13 Non-mandated Components**

#### **4.3.13.1 Oral Evaluation and Fluoride Varnish (OEFV) in the Medical Home**

An OEFV (procedure code 99429) is aimed at improving oral health outcomes for clients who are 6 through 35 months of age by initiating a limited set of preventive dental services (not a dental checkup) in the medical home.

The OEFV must be billed on the same date of service as a medical checkup (procedure codes 99381, 99382, 99391, and 99392) and is limited to six services per lifetime by any provider. Procedure code 99429 must be billed with modifier U5 and diagnosis code Z00121 or Z00129 for an intermediate oral evaluation with fluoride varnish application.

An OEFV is not a required component of a THSteps medical checkup, but providers are encouraged to participate in this preventive intervention. OEFV is limited to THSteps medical checkup providers who have completed the required benefit education and are certified by the Texas Health Steps Dental Program to perform OEFV services.

Training for certification is available as a free continuing education course on the THSteps website at [www.txhealthsteps.com](http://www.txhealthsteps.com).

The OEFV add-on includes the following components:

- Intermediate oral evaluation

- Inspection of teeth for signs of early childhood caries, and other caries
- Inspection of the oral soft tissues for any abnormalities
- Inspection for bleeding, swelling, or infection
- Indications of lack of cleaning of the mouth

The intermediate oral evaluation components that may be performed by a trained staff member are:

- Fluoride varnish application
- Dental anticipatory guidance to include:
  - The need for thorough daily oral hygiene practices
  - Education in potential gingival manifestations for clients with diabetes and clients under long-term medication therapy
  - THSteps eligibility qualifies the client for dental services
  - Diet, nutrition, and food choices
  - Fluoride needs
  - Injury prevention
  - Antimicrobials, medications, and oral health

If the client has no erupted teeth, additional dental anticipatory guidance is expected.

**Note:** *The primary care provider must complete the intermediate oral evaluation but can delegate all other components.*

## 4.4 Documentation Requirements

All THSteps services require documentation to support the medical necessity of the services rendered including THSteps medical services. THSteps services are subject to retrospective review and recoupment if documentation does not support the services billed.

The following federal and state mandated components must be documented in the client's medical record for the checkup to be considered complete:

- Comprehensive health and developmental history, including physical and mental health development
- Comprehensive unclothed physical examination
- Immunizations appropriate for age and health history
- Laboratory test appropriate to age and risk, including lead toxicity at specific federally mandated ages
- Health education including anticipatory guidance
- Dental referral

The client's medical record must include documentation to support the rationale a component was not completed, and a plan to complete the component(s) if not due to parent or caregiver concern or reasons of conscience, including religious beliefs.

### 4.4.1 Separate Identifiable Acute Care Evaluation and Management Visit

If an acute or chronic condition that requires E/M beyond the required components for a medical checkup is discovered, a separate E/M procedure code may be considered for reimbursement for the same date of service as a checkup or the client can be referred for further diagnosis and treatment.

- The client's medical record must contain documentation that the separate identifiable service(s) were medically necessary and include a diagnosis in addition to Z0000, Z0001, Z00110, Z00111, Z00121 or Z00129 and treatment. Documentation must be made available to Texas Medicaid upon request.
- An insignificant or trivial problem or abnormality that is encountered in the process of performing a checkup and does not require additional work and performance of the key components of a problem-oriented E/M service cannot be considered a separate established patient E/M acute care visit.
- Modifier 25 must be used to identify a significant, separately identifiable E/M service rendered by the same provider on the same day of the procedure or other service. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client's medical record and made available to Texas Medicaid upon request.

**Referto:** [Acute Care Visit on the Same Day as a THSteps Preventive Visit Checkup](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for a claim form example.

[THSteps Preventive Visit Checkup with Immunization and Vaccine Administration](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for a claim form example.

## 4.5 Vaccine Services

Vaccines and vaccine administration as recommended by the Advisory Committee on Immunization Practices (ACIP) are benefits of Texas Medicaid.

Immunization is the process by which a client becomes immune or resistant to an infectious disease, typically by vaccination.

Vaccination is the action of introducing a vaccine into the body.

A vaccine stimulates a client's immune system to produce immunity to a disease, thereby providing protection from that disease.

Vaccines may be administered orally, nasally, or via subcutaneous or intramuscular injection.

The following are categories of vaccines:

- Live, attenuated
- Inactivated
- Toxoid
- Subunit
- Conjugate
- Messenger RNA (mRNA)

Providers must follow current ACIP general usage recommendations and adhere to the National Vaccine Advisory Committee's (NVAC) Standards for Adult Immunization Practice and Standards for Pediatric Immunization Practice; however, in the event of conflict, providers are required to follow more specific Texas Vaccines for Children (TVFC) guidelines.

Providers must provide the current vaccine information statements (VISs) produced by the Centers for Disease Control and Prevention (CDC) to clients. VISs explain the benefits and risks of the vaccine(s) administered.

### 4.5.1 Texas Vaccines for Children (TVFC) Program

The TVFC program provides vaccines at no cost to the provider. The vaccines are recommended according to the Recommended Childhood and Adolescent Immunization Schedule (Advisory Committee on Immunization Practices [ACIP], AAP, and the American Academy of Family Physicians [AAFP]). Medicaid does not reimburse for vaccines/toxoids that are available from TVFC. THSteps providers are strongly encouraged to enroll in TVFC at DSHS and must do so in order to obtain free vaccines for clients who are birth through 18 years of age. Local and public health departments that are not otherwise enrolled as a provider that is authorized to receive reimbursement for vaccine administration fees should enroll as a Comprehensive Care Program (CCP) provider. Providers may not charge Texas Medicaid for the cost of the vaccines obtained from TVFC; however the administration fee, not to exceed \$13.75, is considered for reimbursement.

For additional information about immunizations, providers can refer to the THSteps online educational module “Immunization” at [www.txhealthsteps.com](http://www.txhealthsteps.com).

*Referto:* “Appendix B. Immunizations” in this handbook.

#### 4.5.1.1 TVFC Distributed Vaccines

When single antigen vaccine(s)/toxoid(s) or comparable antigen vaccine(s)/toxoid(s) are available for distribution through TVFC, but the provider chooses to use an ACIP-recommended product that is not distributed through TVFC, the vaccine/toxoid will not be covered; however, the administration fee will be considered.

### 4.5.2 Vaccine Adverse Event Reporting System (VAERS)

The National Childhood Vaccine Injury Act (NCVIA) requires health-care providers to report to VAERS:

- Any adverse event reaction listed by the vaccine manufacturer as a contraindication to subsequent doses of the vaccine.
- Any reaction listed in the VAERS Table of Reportable Events that occurs within the specified time period after vaccination.

VAERS encourages providers to report vaccine administration errors and any adverse event that occurs after the administration of any vaccine licensed in the United States even if it is clear whether a vaccine caused the adverse event.

NCVIA requires health-care providers to report certain adverse events that occur following vaccination. As a result, VAERS was established by CDC and FDA in 1990. VAERS provides a mechanism for the collection and analysis of adverse events (side effects) associated with vaccines currently licensed in the United States. Adverse events are defined as health effects that occur after immunization that may or may not be related to the vaccine. VAERS data are monitored continually to detect unknown adverse events or increases in known side effects.

A copy of the Reportable Events Table can be obtained by calling VAERS at 1-800-822-7967 or by downloading it from [vaers.hhs.gov/reportevent.html](http://vaers.hhs.gov/reportevent.html).

For additional information about NCVIA, providers can refer to [www.dshs.texas.gov/immunizations/data/vaccine-adverse-event-reporting](http://www.dshs.texas.gov/immunizations/data/vaccine-adverse-event-reporting).

#### 4.5.2.1 Vaccine Reporting to Department of State Health Services (DSHS)

Administered vaccines must be reported to DSHS. DSHS submits all vaccines reported with consent to a centralized repository of immunization histories. This lifespan registry is known in Texas as ImmTrac2.

#### 4.5.2.2 Rabies Vaccine Availability and Animal Bite Reporting

Providers that determine a client requires the rabies vaccination series may obtain the biologicals directly from the manufacturer or through one of the Texas Department of State Health Services (DSHS) depots around the state.

Animal bites to people must be reported as soon as possible to the designated Local Rabies Control Authority (LRCA).

**Referto:** Subsection 9.2.38, “Rabies Prophylaxis” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (Vol. 2, *Provider Handbooks*) for additional information about rabies vaccination.

#### 4.5.3 Documentation Requirements

Providers must document the following information for every vaccine administered to a client in the client's medical record:

- Vaccine given
- Date the vaccine was administered (day, month, year format)
- Name of the vaccine manufacturer
- Vaccine lot number
- Signature and title of the person administering the vaccine
- Organization name and address
- Publication date of the VIS issues to the client, parent, or guardian

If a vaccine is given outside of ACIP's recommended routine immunization schedules for children or adults, the reason for the vaccination must be included in the client's medical record. Reasons for vaccinating outside the routine schedule may include but are not limited to:

- Pregnancy
- An impaired immune system
- Suspected exposure to a disease
- Occupation
- Travel

These records are subject to retrospective review to determine appropriate utilization and reimbursement for this service.

#### 4.5.4 Vaccine Reimbursement

Vaccines and vaccine administration are reimbursed at a fee determined by HHSC.

Each vaccine and its administration must be submitted on the same claim in the following sequence: the vaccine procedure code immediately followed by the applicable vaccine administration procedure code(s).

All of the vaccine administration procedure codes that correspond to a single vaccine procedure code must be submitted on the same claim as the vaccine procedure code.

Vaccines for clients who are birth through 18 years of age are available through TVFC and administered at a site that is eligible for TVFC enrollment will not be reimbursed through Texas Medicaid.

Providers may not bill clients who are birth through 18 years of age for vaccines available through TVFC.

### Preventive Health Visits

If a vaccine is administered as part of a preventive health visit, including but not limited to a THSteps preventive care medical checkup, then the age-appropriate diagnosis code for the preventive health visit must be submitted on the claim. Diagnosis code Z23 may also be included on the claim as secondary.

For a vaccine administration at a visit for which the administration is the only purpose of a visit (i.e. the vaccine administration is not part of a preventive health visit), provider should submit the appropriate vaccine diagnosis code Z23.

Vaccine administration must be billed with the following age-appropriate diagnosis codes:

| Client Age               | Diagnosis Code |
|--------------------------|----------------|
| Birth through 7 days     | Z00110         |
| Eight through 28 days    | Z00111         |
| 29 days through 17 years | Z00121, Z00129 |
| 18 years or older        | Z0000, Z0001   |

Vaccines should be obtained through TVFC for clients who are birth through 18 years of age. Provider purchased vaccines are not reimbursed separately unless they meet the definition of “not available” as defined in this section. A vaccine may be defined as “not available” in one or more of the following situations:

- TVFC, based on their federal resolution (distribution guidelines), does not distribute a Texas Health and Human Services Commission (HHSC)-approved vaccine that has an ACIP-recommended use.
- ACIP approves a new vaccine with established guidelines, but the vaccine has not yet been negotiated or added to a TVFC contract.
- TVFC has not established funding for a new vaccine.
- TVFC reports to HHSC that there is an insufficient supply of a vaccine due to national supply or distribution issues.

Vaccines that meet the definition of “not available” as defined in this section may be reimbursed through the Comprehensive Care Program (CCP).

Providers may use the state-defined modifier U1 in addition to the associated administered vaccine procedure code for clients who are birth through 18 years of age and the vaccine was unavailable through TVFC.

| Modifier | Description                                                                                                          |
|----------|----------------------------------------------------------------------------------------------------------------------|
| U1       | State-defined modifier: Vaccine(s)/toxoid(s) privately purchased by provider when TVFC vaccine/toxoid is unavailable |

The state will notify providers if a vaccine meets the definition of “not available” and when the provider’s privately purchased vaccine can be billed with the modifier U1.

Modifier U1 may not be used for failure to enroll in TVFC, maintain sufficient TVFC vaccine inventory, or clients who are 19 through 20 years of age.

Vaccines for clients who are 19 years through 20 years of age may be reimbursed through THSteps when provided as part of a THSteps preventive care medical checkup, or CCP when provided as part of an acute medical visit outside of a THSteps preventive care medical checkup. Providers must bill acute care services under their existing NPI.

Vaccines for clients who are 21 years of age or older may be reimbursed through traditional Texas Medicaid when the vaccine is medically necessary.

Reimbursement for each vaccine is limited to one per client per day, by any provider.

The following vaccine procedure codes are a benefit of Texas Medicaid and distributed by TVFC (Does not include COVID-19 and influenza vaccines):

| Procedure Codes | Age Range                        | Number of Recognized Components |
|-----------------|----------------------------------|---------------------------------|
| 90619           | 2 years of age or older          | 1                               |
| 90620           | 10 years of age or older         | 1                               |
| 90621           | 10 years of age or older         | 1                               |
| 90623           | 10 years through 23 years of age | 1                               |
| 90632           | 18 years of age or older         | 1                               |
| 90633           | Birth through 18 years of age    | 2                               |
| 90636           | 19 years of age or older         | 2                               |
| 90647           | 6 weeks through 18 years of age  | 1                               |
| 90648           | 6 weeks of age or older          | 1                               |
| 90651           | 9 years through 45 years of age  | 1                               |
| 90670           | 2 months of age or older         | 1                               |
| 90671           | 6 weeks of age or older          | 1                               |
| 90677           | 2 months of age or older         | 1                               |
| 90678           | 10 years of age or older         | 1                               |
| 90680           | Birth through 8 months of age    | 1                               |
| 90681           | Birth through 8 months of age    | 1                               |
| 90696           | 4 years through 6 years of age   | 4                               |
| 90697           | Birth through 4 years of age     | 6                               |
| 90698           | Birth through 5 years of age     | 5                               |
| 90700           | Birth through 6 years of age     | 3                               |
| 90702           | Birth through 6 years of age     | 2                               |
| 90707           | 1 year of age or older           | 3                               |
| 90710           | 1 year through 12 years of age   | 4                               |
| 90713           | 2 months of age or older         | 1                               |
| 90714           | 7 years of age or older          | 2                               |
| 90715           | 7 years of age or older          | 3                               |
| 90716           | 1 year of age or older           | 1                               |
| 90723           | 6 weeks through 6 years of age   | 5                               |
| 90732           | 2 years of age or older          | 1                               |
| 90734           | 2 months through 55 years of age | 1                               |
| 90743           | 11 years through 17 years of age | 1                               |
| 90744           | Birth through 17 years of age    | 1                               |
| 90746           | 18 years of age or older         | 1                               |

**Note:** A component refers to all antigens in a vaccine that prevent disease(s) caused by one organism. Combination vaccines are those that contain multiple vaccine components.

## COVID-19 Vaccines

The following vaccine procedure codes are a benefit of Texas Medicaid for COVID-19:

| Procedure Codes | Age Range                |
|-----------------|--------------------------|
| 91320           | 12 years of age or older |
| 91322           | 12 years of age or older |

Because the ACIP frequently reviews the composition of COVID-19 vaccines and makes updates to their recommendations, providers should refer to the CDC website for current recommendations.

Providers should refer to the TVFC website for the most up-to-date list of COVID-19 vaccines that TVFC is distributing for clients who are birth through 18 years of age.

Procedure code 90480 must be used in conjunction with one of the vaccine procedure codes listed above for reimbursement of COVID-19 vaccine administration.

COVID-19 vaccine counseling (procedure code G0315) may be reimbursed for clients who are birth through 20 years of age.

Procedure code G0315 will be denied if billed on the same day by the same provider as procedure code 90480.

Procedure code G0315 is limited to once per day, by the same provider, and three per rolling year by any provider.

## Influenza Vaccines

The following vaccine procedure codes are a benefit of Texas Medicaid for influenza:

| Procedure Codes | Age Range                         |
|-----------------|-----------------------------------|
| 90655           | 6 months through 35 months of age |
| 90656           | 6 months of age or older          |
| 90657           | 6 months through 35 months of age |
| 90658           | 6 months of age or older          |
| 90660           | 2 years through 49 years of age   |
| 90661           | 6 months of age or older          |
| 90672           | 2 years through 49 years of age   |
| 90673           | 18 years of age or older          |
| 90674           | 6 months of age or older          |
| 90682           | 18 years of age or older          |
| 90685           | 6 months through 35 months of age |
| 90686           | 6 months of age or older          |
| 90687           | 6 months through 35 months of age |
| 90688           | 6 months of age or older          |
| 90756           | 6 months of age or older          |

Because the ACIP reviews the composition of influenza vaccines annually and frequently makes updates to their recommendations, providers should refer to the CDC website for current recommendations.

Providers should refer to the TVFC website for the most up-to-date list of the influenza vaccines that TVFC is distributing for clients who are birth through 18 years of age for the current flu season.

Peak influenza activity generally occurs from October of one year through February of the next year, although activity can last through May. This time period is commonly referred to as “flu season.”

The first time a client who is 6 months of age through 8 years of age receives the influenza vaccine, he/she should receive a second dose of the vaccine during the same flu season at least 4 weeks after the first dose. If the client turns 9 years old between the first and second doses, he/she should still receive the second dose.

Excepting the scenario described in the previous line, clients who are 9 years of age or older should only receive one dose of the influenza vaccine per flu season, even if it is their first time receiving the influenza vaccine.

The following vaccine procedure codes are a benefit of Texas Medicaid and are not distributed by TVFC:

| Procedure Codes | Age Range                        | Number of Recognized Components |
|-----------------|----------------------------------|---------------------------------|
| 90476           | 19 years through 50 years of age | 1                               |
| 90477           | 19 years through 50 years of age | 1                               |
| 90581           | 19 years through 65 years of age | 1                               |
| 90585           | All ages                         | 1                               |
| 90586           | All ages                         | 1                               |
| 90589           | 19 years of age or older         | 1                               |
| 90611           | 18 years of age or older         | 1                               |
| 90625           | 19 years through 64 years of age | 1                               |
| 90626           | 19 years of age or older         | 1                               |
| 90627           | 19 years of age or older         | 1                               |
| 90675           | All ages                         | 1                               |
| 90684           | 19 years of age or older         | 1                               |
| 90690           | 19 years of age or older         | 1                               |
| 90691           | 19 years of age or older         | 1                               |
| 90717           | 19 years of age or older         | 1                               |
| 90738           | 19 years of age or older         | 1                               |
| 90739           | 18 years of age or older         | 1                               |
| 90740           | 20 years of age or older         | 1                               |
| 90747           | 20 years of age or older         | 1                               |
| 90758           | 18 years of age or older         | 2                               |
| 90759           | 18 years of age or older         | 1                               |
| J9030           | All ages                         | 1                               |

### Vaccine Administration

Vaccine administration for clients who are birth through 20 years of age may be reimbursed through THSteps when provided as part of a THSteps preventive care medical checkup or CCP when provided as part of an acute medical visit outside of a THSteps preventive care medical checkup. Providers must bill acute care services under their existing NPI.

Vaccine administration for clients who are 21 years of age or older may be reimbursed through traditional Texas Medicaid when the vaccine is medically necessary.

The specific diagnosis necessitating the vaccine and toxoid is required when billing with the following administration procedure codes in combination with an appropriate vaccine procedure code:

| Procedure Codes |       |       |       |       |       |       |       |  |  |
|-----------------|-------|-------|-------|-------|-------|-------|-------|--|--|
| 90460           | 90461 | 90471 | 90472 | 90473 | 90474 | 90480 | M0201 |  |  |

Procedure codes 90460 and 90461 are benefits for services rendered to clients who are birth through 18 years of age when counseling is provided for the immunization administered.

Procedure codes 90471, 90472, 90473 and 90474 are benefits for services rendered to clients of any age when counseling is not provided for the immunization administered.

Each vaccine and its administration must be submitted on the claim in the following sequence: the vaccine procedure code immediately followed by the applicable vaccine administration procedure code(s). All of the vaccine administration procedure codes that correspond to a single vaccine procedure code must be submitted on the same claim as the vaccine procedure code.

Each vaccine procedure code must be submitted with the appropriate “administration with counseling” procedure code(s) (procedure codes 90460 and 90461) or the most appropriate “administration without counseling” procedure code (procedure code 90471, 90472, 90473, or 90474). If an “administration with counseling” procedure code is submitted with an “administration without counseling” procedure code for the same vaccine, the second administration of the vaccine will be denied.

Procedure code 90480 is a benefit for clients who are 6 months of age or older. Procedure code 90480 includes counseling and may only be reported with a COVID-19 vaccine procedure code.

Procedure code M0201 is a benefit for clients of any age. Procedure code M0201 may be reported, in addition to the vaccine and vaccine administration procedure codes when a pneumococcal, influenza, hepatitis B, and/or COVID-19 vaccine is administered inside a client’s home.

### Administration With Counseling

Providers must submit claims for immunization administration procedure codes 90460 or 90461 based on the number of components per vaccine. Providers must specify the number of components per vaccine by billing procedure codes 90460 and 90461 as defined by the procedure code descriptions:

- Procedure code 90460 is submitted for the administration of the 1st component.
- Procedure code 90461 is submitted for the administration of each additional component identified in the vaccine.

The necessary counseling that is conducted by a physician or other qualified health-care professional must be documented in the client’s medical record.

Procedure code 90461 may not be billed by TVFC providers when administering TVFC-eligible vaccines under the TVFC program.

### Administration Without Counseling

Procedure codes 90471, 90472, 90473, and 90474 may be reimbursed per vaccine based on the route of administration.

## 4.5.5 Respiratory Syncytial Virus (RSV)

RSV monoclonal antibodies (nirsevimab, procedure codes 90380 and 90381) may be administered to clients who are birth through 19 months of age.

Administration of nirsevimab (procedure codes 96380 and 96381) are limited to two per lifetime.

The administration of palivizumab may be denied if billed after the administration of nirsevimab.

### 4.5.6 Exclusions

Vaccines that are not approved by the U.S. Food and Drug Administration, and are not recommended by the ACIP are not benefits of Texas Medicaid.

### 4.5.7 Vaccine Administration and Preventive E/M Visits

For claims that are submitted with an immunization administration procedure code and a preventive E/M visit, providers may append modifier 25 to the preventive E/M visit procedure code to identify a significant, separately identifiable E/M service that was rendered by the same provider on the same day as the immunization administration. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client's medical record and made available to Texas Medicaid upon request.

[THSteps Preventive Visit Checkup with Immunization and Vaccine Administration](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for a claim form example.

### 4.5.8 Vaccine Information Statement (VIS)

A VIS is required by federal mandate to inform parents and vaccine recipients of the risks and benefits of the vaccine they are about to receive. Not only is it important to explain the risks and benefits before a vaccine is administered, it is also important that providers use the most current forms available. For more about immunizations, vaccine-preventable diseases, or literature and forms, providers can call the DSHS Immunization Branch at 1-800-252-9152 or review information at [www.dshs.texas.gov/immunize](http://www.dshs.texas.gov/immunize).

**Referto:** "Appendix B. Immunizations" in this handbook.

The THSteps online education module "Immunizations," located on the THSteps website at <https://www.txhealthsteps.com/>, for more information about immunizations.

## 4.6 Claims Filing and Reimbursement

Providers may refer to Volume 1 for general information about claims filing and reimbursement.

**Referto:** "Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on electronic claims submissions.

"Section 6: Claims Filing" (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.6, "UB-04 CMS-1450 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for instructions on completing paper claims.

"Section 6: Claims Filing" (*Vol. 1, General Information*) for paper claims completion instructions.

"Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for more information about reimbursement.

Subsection 2.2, "Fee-for-Service Reimbursement Methodology" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for more information.

### 4.6.1 Claims Information

THSteps Medical providers are not required to bill other insurance before billing Medicaid. If a provider is aware of other insurance, the provider must choose whether or not to bill the other insurance. The provider has the following options:

- If the provider chooses to bill the other insurance, the provider must submit the claim to the client's other insurance before submitting the claim to Medicaid.
- If the provider chooses to bill Medicaid and not the client's other insurance, the provider is indicating that he or she accepts the Medicaid payment as payment in full. Medicaid then has the right to recovery from the other insurance. The provider does not have the right to recovery and cannot seek reimbursement from the other insurance after Medicaid has made payment.
- If the provider learns that a client has other insurance coverage after Medicaid has paid a claim, and the provider chooses to bill the other insurance, the provider must refund the payment to Medicaid before billing the other insurance.

Providers should bill their usual and customary fee except for vaccines obtained from TVFC. Providers may not charge Medicaid or clients for the vaccine received from TVFC. Providers may charge a usual and customary fee not to exceed \$13.75 for vaccine administration when providing immunizations to a client eligible for TVFC. Providers are reimbursed the lesser of the billed amount or the maximum allowable fee.

THSteps medical checkups may be billed electronically or on a CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms. Providers may request information about electronic billing or the paper claim form by contacting the TMHP THSteps Contact Center at 1-800-757-5691.

All procedures, including the informational-only procedures, must have a billed amount associated with each procedure listed on the claim. Informational-only procedure codes must be billed in the amount of at least \$.01.

Providers must record the following on the CMS-1500 claim form to receive reimbursement for a medical checkup, exception to periodicity checkup, or follow-up visit:

- The NPI and benefit code EP1 (exception: FQHC providers do not use benefit code EP1)
- The appropriate Texas Health Steps medical checkup procedure code (all ages) with diagnosis code Z0000, Z0001, Z00110, Z00111, Z00121, or Z00129. Diagnosis code Z23 may also be included.
  - The condition indicator codes, which must be placed in 24C (ST, S2, or NU only to identify a checkup resulting in a referral)
  - The provider type modifiers
  - The exception-to-periodicity modifier, when applicable

**Referto:** Subsection 4.3.6, "THSteps Medical Checkups" in this handbook for a listing of modifiers.

- The immunization administration and vaccine procedure codes if any were administered (all ages)
- The place of service must be 72 for RHCs
- The EP modifier must be used for FQHCs

Immunizations performed outside of a THSteps medical checkup must be billed without the benefit code EP1.

### 4.6.2 Reimbursement

As with all Medicaid services, providers acknowledge compliance with all Texas Medicaid requirements when they submit a claim for reimbursement. THSteps-enrolled providers are reimbursed for THSteps medical checkups and administration of immunizations in accordance with 1 TAC §355.8441.

**Note:** *NP, CNS, and PA providers who are enrolled in Texas Medicaid as THSteps providers may receive 92 percent of the rate paid to a physician for THSteps services.*

FQHCs are reimbursed using visit rates calculated in accordance with 1 TAC §355.8261.

RHCs are reimbursed using visit rates calculated in accordance with 1 TAC §355.8101.

Providers may refer to the OFL or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

## 5 Claims Resources

Refer to the following sections or forms when filing claims:

| Resource                                           | Location                                                                                                                                                     |
|----------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Acronym Dictionary                                 | "Appendix C: Acronym Dictionary" ( <i>Vol. 1, General Information</i> )                                                                                      |
| Automated Inquiry System (AIS)                     | Subsection A.10, "TMHP Telephone and Fax Communication" in "Appendix A: State, Federal, and TMHP Contact Information" ( <i>Vol. 1, General Information</i> ) |
| CMS-1500 Paper Claim Filing Instructions           | Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" ( <i>Vol. 1, General Information</i> )                              |
| State, federal, and TMHP contact information       | "Appendix A: State, Federal, and TMHP Contact Information" ( <i>Vol. 1, General Information</i> )                                                            |
| TMHP electronic claims submission information      | Subsection 6.2, "TMHP Electronic Claims Submission" in "Section 6: Claims Filing" ( <i>Vol. 1, General Information</i> )                                     |
| TMHP Electronic Data Interchange (EDI) information | "Section 3: TMHP Electronic Data Interchange (EDI)" ( <i>Vol. 1, General Information</i> )                                                                   |

## 6 Contact TMHP

For a complete list of TMHP communications, refer to subsection A.10, "TMHP Telephone and Fax Communication" in "Appendix A: State, Federal, and TMHP Contact Information" (*Vol. 1, General Information*).

### 6.1 Automated Inquiry System (AIS)

AIS (1-800-925-9126, Option 1) is available 7 days a week, 23 hours a day, with scheduled downtime between 3 a.m. and 4 a.m., and is the main point of contact for client eligibility information. AIS requires the use of a touch-tone telephone in order to access the system.

### 6.2 TMHP Website

Additional information about Medicaid enrollment, general customer service, and provider education/training is available on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

## 6.3 Dental Information and Assistance

For assistance with claims, dental providers may contact a TMHP Contact Center representative on the Dental Inquiry Line (1-800-568-2460).

### 6.3.1 Dental Inquiry Line

The Dental Inquiry Line (1-800-568-2460) is available Monday through Friday, 7 a.m. to 7 p.m., Central Time, and is the main point of contact for information about dental services and appeals.

Any dental service claim denial may be appealed by telephone if it was not denied as an incomplete claim and does not require one of the following items or conditions:

- Narratives
- Radiographs
- Models
- Other tangible documentation
- Review by the TMHP Dental Director

## 6.4 THSteps Information and Assistance

Providers with questions, concerns, or problems about claims should contact the TMHP Contact Center (1-800-925-9126). For contact information for their regional TMHP Provider Representative, providers can refer to the TMHP website at [www.tmhp.com](http://www.tmhp.com).

### 6.4.1 THSteps Inquiry Line

The THSteps Medical Inquiry Line at 1-800-757-5691 is available Monday through Friday, 7 a.m. to 7 p.m., Central Time, and is the main point of contact for information about THSteps medical services.

## 6.5 Assistance with Program

Providers with questions, concerns, or problems with program rules, policies, or procedures should contact DSHS regional program staff. THSteps staff contact numbers can be found in “Appendix A: State, Federal, and TMHP Contact Information” (*Vol. 1, General Information*), on the THSteps website at [www.hhs.texas.gov/doing-business-hhs/provider-portals/health-services-providers/texas-health-steps](http://www.hhs.texas.gov/doing-business-hhs/provider-portals/health-services-providers/texas-health-steps) or by calling THSteps at 1-512-776-7745.

THSteps regional staff make routine contact with providers to educate and assist them with THSteps policies and procedures.

Clients who are eligible for Medicaid and have questions about THSteps, need to locate medical or dental providers, or need assistance with arranging transportation to appointments should call the THSteps toll-free helpline (1-877-847-8377). Clients with questions about their Medicaid eligibility for THSteps should be directed to their caseworker at the local HHSC office or site.

## 7 Forms

The following linked forms can also be found on the [Forms](#) page of the Provider section of the TMHP website at [www.tmhp.com](http://www.tmhp.com):

| Forms                                                                                                              |
|--------------------------------------------------------------------------------------------------------------------|
| <a href="#">CCP Prior Authorization Request Form Instructions</a>                                                  |
| <a href="#">CCP Prior Authorization Request for Non-Face-to-Face Clinician-Directed Care Coordination Services</a> |

| Forms                                                                                                                                                                       |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">CCP Prior Authorization Request Form</a>                                                                                                                        |
| <a href="#">CCP Prior Authorization Private Duty Nursing 6-Month Authorization</a>                                                                                          |
| <a href="#">Criteria for Dental Therapy Under General Anesthesia</a>                                                                                                        |
| <a href="#">DME Certification and Receipt Form</a>                                                                                                                          |
| <a href="#">Home Health Plan of Care (POC)</a>                                                                                                                              |
| <a href="#">Home Health Plan of Care (POC) Instructions</a>                                                                                                                 |
| <a href="#">Nursing Addendum to Plan of Care for Private Duty Nursing and/or Prescribed Pediatric Extended Care Center</a>                                                  |
| <a href="#">THSteps Dental Mandatory Prior Authorization Request Form</a>                                                                                                   |
| <a href="#">THSteps Referral Form Instructions</a>                                                                                                                          |
| <a href="#">THSteps Referral Form</a>                                                                                                                                       |

## APPENDIX A. THSteps FORMS

### A.1 Claim Forms

Providers must order CMS-1500 and American Dental Association (ADA) Dental Claims Forms from the vendor of their choice. Copies cannot be used. Claims filing instructions and examples of the claim forms are located in "Section 6: Claims Filing" (*Vol. 1, General Information*).

**Referto:** Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*).

Subsection 6.5.2, "CMS-1500 Claim Form (Paper) Billing" in "Section 6: Claims Filing" (*Vol. 1, General Information*).

Subsection 6.7, "American Dental Association (ADA) Dental Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*).

### A.2 THSteps Medical Checkup Forms

The use of the child health clinical records is optional. These forms were developed to help providers document all components of the medical checkup. Unless required to be submitted to another program, one of the following forms of documentation must be included in the client's medical record: The completed screening tools with results, the completed questions to the tools within a provider-created medical record, and the results of the completed screening tools. Providers may be asked to provide the screening tool used to complete the screening. Texas Health Steps (THSteps) requires the following forms: Tuberculosis (TB) Questionnaire and the Texas Department of State Health Services (DSHS) State Laboratory forms. These forms can be downloaded from the THSteps website at [www.hhs.texas.gov/doing-business-hhs/provider-portals/health-services-providers/texas-health-steps/forms](http://www.hhs.texas.gov/doing-business-hhs/provider-portals/health-services-providers/texas-health-steps/forms). The Parent Hearing Checklist and Lead Risk Questionnaire are optional forms. Lead poisoning screening questionnaires can be downloaded from the Texas Childhood Lead Poisoning Prevention Program (TX CLPPP) website at [www.dshs.texas.gov/lead/providers.shtm](http://www.dshs.texas.gov/lead/providers.shtm).

Links to growth charts may be found on the THSteps website at [www.hhs.texas.gov/doing-business-hhs/provider-portals/health-services-providers/texas-health-steps/forms](http://www.hhs.texas.gov/doing-business-hhs/provider-portals/health-services-providers/texas-health-steps/forms).

| Form Number   | Form Name                                    |
|---------------|----------------------------------------------|
| ECH-1         | Child Health History Form                    |
| ECHR-5 Day    | Discharge to 5 day Visit Child Health Record |
| ECHR-2 Week   | 2 Week Visit Child Health Record             |
| ECHR-2 Month  | 2 Month Visit Child Health Record            |
| ECHR-4 Month  | 4 Month Visit Child Health Record            |
| ECHR-6 Month  | 6 Month Visit Child Health Record            |
| ECHR-9 Month  | 9 Month Visit Child Health Record            |
| ECHR-12 Month | 12 Month Visit Child Health Record           |
| ECHR-15 Month | 15 Month Visit Child Health Record           |
| ECHR-18 Month | 18 Month Visit Child Health Record           |
| ECHR-24 Month | 24 Month Visit Child Health Record           |
| ECHR-30 Month | 30 Month Visit Child Health Record           |
| ECHR-3 Year   | 3 Year Visit Child Health Record             |
| ECHR-4 Year   | 4 Year Visit Child Health Record             |
| ECHR-5 Year   | 5 Year Visit Child Health Record             |

| Form Number     | Form Name                              |
|-----------------|----------------------------------------|
| ECHR-6 Year     | 6 Year Visit Child Health Record       |
| ECHR-7 Year     | 7 Year Visit Child Health Record       |
| ECHR-8 Year     | 8 Year Visit Child Health Record       |
| ECHR-9 Year     | 9 Year Visit Child Health Record       |
| ECHR-10 Year    | 10 Year Visit Child Health Record      |
| ECHR-11 Year    | 11 Year Visit Child Health Record      |
| ECHR-12 Year    | 12 Year Visit Child Health Record      |
| ECHR-13 Year    | 13 Year Visit Child Health Record      |
| ECHR-14 Year    | 14 Year Visit Child Health Record      |
| ECHR-15 Year    | 15 Year Visit Child Health Record      |
| ECHR-16 Year    | 16 Year Visit Child Health Record      |
| ECHR-17 Year    | 17 Year Visit Child Health Record      |
| ECHR-18 Year    | 18 Year Visit Child Health Record      |
| ECHR-19 Year    | 19 Year Visit Child Health Record      |
| ECHR-20 Year    | 20 Year Visit Child Health Record      |
| ECHR-19-20 Year | 19 & 20 Year Visit Child Health Record |
|                 | Form Pb-110, Lead Risk Questionnaire   |
|                 | TB Questionnaire                       |

Providers should refer to sources such as *Bright Futures: Guidelines for Health Supervision of Infants, Children, and Adolescents* (4th edition), located at [www.brightfutures.org](http://www.brightfutures.org) or the Guidelines for Adolescent Preventive Services (GAP) Implementation Materials located at [brightfutures.aap.org/materials-and-tools/pages/default.aspx](http://brightfutures.aap.org/materials-and-tools/pages/default.aspx). For nutritional screening for all ages, refer to Bright Futures.

### A.3 Laboratory Forms

For information on procedures for submission of laboratory forms, refer to the DSHS Laboratory Services Section's web page at [www.dshs.texas.gov/lab/MRS\\_forms.shtm](http://www.dshs.texas.gov/lab/MRS_forms.shtm).

### A.4 Guidelines for Tuberculosis Skin Testing

For information on procedures for tuberculosis skin testing, refer to the DSHS tuberculosis web page at [www.dshs.texas.gov/idcu/disease/tb/](http://www.dshs.texas.gov/idcu/disease/tb/).

### A.5 Tuberculosis Screening and Guidelines

The screening tool for tuberculosis (TB) exposure risk is to be used annually to determine the need for tuberculin skin testing.

The questions in the screening tool are intended as a minimum screen. Follow-up questions may be necessary to clarify hesitant or ambiguous responses. Questions specific to TB exposure risks in the client's community may need to be added.

The following applies for tuberculin screening and skin testing:

- If all the answers are unqualified negatives, the client is considered at low risk for exposure to TB and will not need tuberculin skin testing.
- If the answer to any question is "Yes" or "I don't know," the client should be tuberculin skin tested.

- In the case of the client for whom an answer in the past of “Yes” or “I don’t know” prompted a skin test, which was negative, the skin test *may* not have to be repeated annually.
- The decision to administer a skin test must be made by the medical provider based upon an assessment of the possibility of exposure. A negative tuberculin skin test never excludes tuberculosis infection or active disease.
- Bacillus of Calmette and Guérin (BCG) vaccinated clients should also have the screening tool administered annually. Previous BCG vaccination is not a contraindication to tuberculin skin testing. Positive tuberculin skin tests in BCG vaccinated children are interpreted using the same guidelines used for non-BCG vaccinated children.
- Clients who have had a positive TB skin test in the past (whether treated or not), should be re-evaluated at least annually by a physician for signs and symptoms of TB.

Care of clients who are newly discovered to be tuberculin skin test positive includes:

- An evaluation for signs and symptoms of TB.
- A chest X-ray to rule out active disease.
- Oral medications to prevent progression to active disease or multi-drug therapy if active disease is present.
- Referral for consultation by a pediatric TB specialist is recommended if active disease is present.
- A report to the local health authority for investigation to find the source of the infection.

**Referto:** The TB screening tool on the THSteps website at [www.hhs.texas.gov/doing-business-hhs/provider-portals/health-services-providers/texas-health-steps/forms](http://www.hhs.texas.gov/doing-business-hhs/provider-portals/health-services-providers/texas-health-steps/forms).

“Frequently Asked Questions About TB” on the DSHS website at [www.dshs.texas.gov/idcu/disease/tb/faqs](http://www.dshs.texas.gov/idcu/disease/tb/faqs) for information about assessing a child’s risk of TB exposure, providers can refer to

The TVFC Provider Manual, Forms, & Resources web page on the DSHS website at [www.dshs.texas.gov/immunize/tvfc/ProviderResources.shtm#forms](http://www.dshs.texas.gov/immunize/tvfc/ProviderResources.shtm#forms) for the Patient Eligibility Screening Record (Bilingual), Questions & Answers about TVFC, and additional information.

## APPENDIX B. IMMUNIZATIONS

### B.1 Immunizations Overview

Clients who are 17 years of age and younger must be immunized according to the Recommended Childhood Immunization Schedule for the United States. If the immunizations are due as part of a Texas Health Steps (THSteps) medical checkup, the medical checkup provider is responsible for the administration of immunizations for clients who are birth through 20 years of age and may not refer clients to local health departments. The Department of State Health Services (DSHS) requires that immunizations be administered during the THSteps medical checkup, unless they are medically contraindicated or excluded from immunization for reasons of conscience, including a religious belief.

Providers, in both public and private sectors, are required by federal mandate to provide a Vaccine Information Statement (VIS) to the responsible adult accompanying a client for an immunization. These statements are specific to each vaccine and inform the responsible adult about the risks and benefits. It is important that providers use the most current VIS.

Providers interested in obtaining copies of current VISs and other immunization forms or literature may call the DSHS Immunization Branch at 1-512-458-7284. VISs may also be downloaded from the DSHS Immunization Branch website at [www.dshs.texas.gov/immunizations/public/vis](http://www.dshs.texas.gov/immunizations/public/vis).

#### B.1.1 Vaccine Adverse Event Reporting System (VAERS)

The National Childhood Vaccine Injury Act (NCVIA) requires health-care providers to report to VAERS:

- Any adverse event listed by the vaccine manufacturer as a contraindication to subsequent doses of the vaccine.
- Any reaction listed in the VAERS Table of Reportable Events that occurs within the specified time period after vaccination.

VAERS encourages providers to report vaccine administration errors and any adverse event that occurs after the administration of any vaccine licensed in the United States even if it is clear whether a vaccine caused the adverse event.

A copy of the Reportable Events Table can be obtained by calling VAERS at 1-800-822-7967 or by downloading it from [vaers.hhs.gov/resources/infoproviders.html](http://vaers.hhs.gov/resources/infoproviders.html).

#### B.1.2 TVFC Versus Non-TVFC Vaccines/Toxoids

When single antigen vaccines/toxoids or comparable antigen vaccines/toxoids are available for distribution through the Texas Vaccines for Children (TVFC) Program, but the provider chooses to use a different Advisory Committee on Immunization Practices (ACIP)-recommended product, the vaccine/toxoid will not be reimbursed; however, the administration fee will be considered.

**Note:** *All administered vaccines/toxoids must be reported to DSHS. DSHS submits all vaccines/toxoids reported with consent to a centralized immunization registry, known as ImmTrac2.*

**Referto:** Subsection B.3.6, “How to Report Immunization Records to ImmTrac2, the Texas Immunization Registry” in this handbook.

#### B.1.3 Exemption from Immunization for School and Child-Care Facilities

Parents may obtain an exemption from immunization requirements for school and childcare entry for reasons of conscience or religious beliefs. An exemption is also available for clients who are medically contraindicated from receiving a vaccine. For more information on exemptions call 1-512-458-7284, or visit [www.dshs.texas.gov/immunizations](http://www.dshs.texas.gov/immunizations).

**Referto:** Section 4, “THSteps Medical” in this handbook.

## B.2 Recommended Childhood Immunization Schedule

The Recommended Childhood Immunization Schedule indicates the recommended age for routine administration of currently licensed childhood vaccines. This schedule was developed and approved by ACIP, the American Academy of Pediatrics (AAP), and the American Academy of Family Physicians (AAFP).

Some combination vaccines are available and may be used whenever any component of the combination is indicated and its other components are not contraindicated. Providers should consult the manufacturer's package insert for detailed recommendations.

Vaccines should be administered at the recommended ages. Any dose not given at the recommended age should be given as a catch-up immunization on any subsequent visit when indicated and feasible.

A current copy of the Recommended Childhood Immunization Schedule can be accessed at [www.cdc.gov/vaccines/hcp/imz-schedules/child-schedule-vaccines.html](http://www.cdc.gov/vaccines/hcp/imz-schedules/child-schedule-vaccines.html).

**Referto:** Recommended Childhood and Adolescent Immunization Schedule on the THSteps page of the TMHP website at [www.tmhp.com](http://www.tmhp.com).

## B.3 General Recommendations

For information about vaccine administration, dosing, and contraindications, immunization providers should consult vaccine package inserts and the January 28, 2011, issue of the Center for Disease Control and Prevention *Morbidity and Mortality Weekly Report* (MMWR). For copies of the MMWR, contact the Immunization Branch at 1-512-458-7284.

### B.3.1 How to Obtain Vaccines at No Cost to the Provider

TVFC provides routinely recommended ACIP vaccines for immunization of THSteps and other Medicaid- and TVFC-eligible clients free of charge to providers who are enrolled in TVFC. The local health department/district or DSHS regional office provides information on how to order, account for, and inventory vaccines. Local and public health departments that are not otherwise enrolled as a provider that is authorized to receive reimbursement for vaccine administration fees should enroll as a Comprehensive Care Program (CCP) provider. Monthly reports are required in order to receive state-purchased vaccines. Physicians who request and accept state-supplied vaccines must complete and sign the provider enrollment and profile forms annually. The provider may not charge Medicaid or the client for vaccines obtained from TVFC.

Additional information is available at [www.dshs.texas.gov/immunizations](http://www.dshs.texas.gov/immunizations).

### B.3.2 Administrations and Immunizations

#### B.3.2.1 Administrations

The following administration procedure codes must be submitted in combination with an appropriate vaccine/toxoid procedure code:

| Administration Procedure Code |       |       |       |       |       |       |       |
|-------------------------------|-------|-------|-------|-------|-------|-------|-------|
| 90460                         | 90461 | 90471 | 90472 | 90473 | 90474 | 90480 | M0201 |

Procedure codes 90460 and 90461 are benefits for services rendered to clients who are birth through 18 years of age when counseling is provided for the immunization administered. Documentation of counseling by the physician or other qualified health-care professional must be noted in the client's medical record.

Procedure codes 90471, 90472, 90473, and 90474 are benefits for services rendered to clients of any age when counseling is not provided for the immunization administered.

Procedure code 90480 is a benefit for clients who are 6 months of age or older. Procedure code 90480 includes counseling and may only be reported with a COVID-19 vaccine procedure code.

Procedure code M0201 is a benefit for clients of any age. Procedure code M0201 may be reported, in addition to the vaccine and vaccine administration procedure codes when a pneumococcal, influenza, hepatitis B, and/or COVID-19 vaccine is administered inside a client's home.

**Referto:** Subsection 4.3.12.3, "Immunizations" in this handbook for appropriate diagnosis codes for immunization administration.

### B.3.3 Immunizations (Vaccine/Toxoids)

The following vaccine procedure codes are a benefit of Texas Medicaid and distributed by TVFC (Does not include COVID-19 and influenza vaccines):

| Procedure Codes | Age Range                        | Number of Recognized Components |
|-----------------|----------------------------------|---------------------------------|
| 90619           | 2 years of age or older          | 1                               |
| 90620           | 10 years of age or older         | 1                               |
| 90621           | 10 years of age or older         | 1                               |
| 90623           | 10 years through 23 years of age | 1                               |
| 90632           | 18 years of age or older         | 1                               |
| 90633           | Birth through 18 years of age    | 2                               |
| 90636           | 19 years of age or older         | 2                               |
| 90647           | 6 weeks through 18 years of age  | 1                               |
| 90648           | 6 weeks of age or older          | 1                               |
| 90651           | 9 years through 45 years of age  | 1                               |
| 90670           | 2 months of age or older         | 1                               |
| 90671           | 6 weeks of age or older          | 1                               |
| 90677           | 2 months of age or older         | 1                               |
| 90678           | 10 years of age or older         | 1                               |
| 90680           | Birth through 8 months of age    | 1                               |
| 90681           | Birth through 8 months of age    | 1                               |
| 90696           | 4 years through 6 years of age   | 4                               |
| 90697           | Birth through 4 years of age     | 6                               |
| 90698           | Birth through 5 years of age     | 5                               |
| 90700           | Birth through 6 years of age     | 3                               |
| 90702           | Birth through 6 years of age     | 2                               |
| 90707           | 1 year of age or older           | 3                               |
| 90710           | 1 year through 12 years of age   | 4                               |
| 90713           | 2 months of age or older         | 1                               |
| 90714           | 7 years of age or older          | 2                               |
| 90715           | 7 years of age or older          | 3                               |
| 90716           | 1 year of age or older           | 1                               |
| 90723           | 6 weeks through 6 years of age   | 5                               |
| 90732           | 2 years of age or older          | 1                               |
| 90734           | 2 months through 55 years of age | 1                               |

| Procedure Codes | Age Range                        | Number of Recognized Components |
|-----------------|----------------------------------|---------------------------------|
| 90743           | 11 years through 17 years of age | 1                               |
| 90744           | Birth through 17 years of age    | 1                               |
| 90746           | 18 years of age or older         | 1                               |

**Note:** A component refers to all antigens in a vaccine that prevent disease(s) caused by one organism. Combination vaccines are those that contain multiple vaccine components.

### COVID-19 Vaccines

The following vaccine procedure codes are a benefit of Texas Medicaid for COVID-19:

| Procedure Codes | Age Range                |
|-----------------|--------------------------|
| 91320           | 12 years of age or older |
| 91322           | 12 years of age or older |

Because the ACIP frequently reviews the composition of COVID-19 vaccines and makes updates to their recommendations, providers should refer to the CDC website for current recommendations.

Providers should refer to the TVFC website for the most up-to-date list of COVID-19 vaccines that TVFC is distributing for clients who are birth through 18 years of age.

Procedure code 90480 must be used in conjunction with one of the vaccine procedure codes listed above for reimbursement of COVID-19 vaccine administration.

COVID-19 vaccine counseling (procedure code G0315) may be reimbursed for clients who are birth through 20 years of age.

Procedure code G0315 will be denied if billed on the same day by the same provider as procedure code 90480.

Procedure code G0315 is limited to once per day, by the same provider, and three per rolling year by any provider.

### Influenza Vaccines

The following vaccine procedure codes are a benefit of Texas Medicaid for influenza:

| Procedure Codes | Age Range                         |
|-----------------|-----------------------------------|
| 90655           | 6 months through 35 months of age |
| 90656           | 6 months of age or older          |
| 90657           | 6 months through 35 months of age |
| 90658           | 6 months of age or older          |
| 90660           | 2 years through 49 years of age   |
| 90661           | 6 months of age or older          |
| 90672           | 2 years through 49 years of age   |
| 90673           | 18 years of age or older          |
| 90674           | 6 months of age or older          |
| 90682           | 18 years of age or older          |
| 90685           | 6 months through 35 months of age |
| 90686           | 6 months of age or older          |

| Procedure Codes | Age Range                         |
|-----------------|-----------------------------------|
| 90687           | 6 months through 35 months of age |
| 90688           | 6 months of age or older          |
| 90756           | 6 months of age or older          |

**Referto:** Subsection 4.5.4, “Vaccine Reimbursement” in this handbook for additional information about influenza.

The following vaccine procedure codes are a benefit of Texas Medicaid and are not distributed by TVFC:

| Procedure Codes | Age Range                        | Number of Recognized Components |
|-----------------|----------------------------------|---------------------------------|
| 90476           | 19 years through 50 years of age | 1                               |
| 90477           | 19 years through 50 years of age | 1                               |
| 90581           | 19 years through 65 years of age | 1                               |
| 90585           | All ages                         | 1                               |
| 90586           | All ages                         | 1                               |
| 90589           | 19 years of age or older         | 1                               |
| 90611           | 18 years of age or older         | 1                               |
| 90625           | 19 years through 64 years of age | 1                               |
| 90626           | 19 years of age or older         | 1                               |
| 90627           | 19 years of age or older         | 1                               |
| 90675           | All ages                         | 1                               |
| 90684           | 19 years of age or older         | 1                               |
| 90690           | 19 years of age or older         | 1                               |
| 90691           | 19 years of age or older         | 1                               |
| 90717           | 19 years of age or older         | 1                               |
| 90738           | 19 years of age or older         | 1                               |
| 90739           | 18 years of age or older         | 1                               |
| 90740           | 20 years of age or older         | 1                               |
| 90747           | 20 years of age or older         | 1                               |
| 90758           | 18 years of age or older         | 2                               |
| 90759           | 18 years of age or older         | 1                               |
| J9030           | All ages                         | 1                               |

Providers may use the state-defined modifier U1 in addition to the associated administered vaccine procedure code for clients who are birth through 18 years of age and the vaccine was unavailable through TVFC.

| Modifier | Description                                                                                                      |
|----------|------------------------------------------------------------------------------------------------------------------|
| U1       | State-defined modifier: Vaccines/toxoids privately purchased by provider when TVFC vaccine/toxoid is unavailable |

**Note:** “Unavailable” is defined as a new vaccine approved by ACIP that has not been negotiated or added to a TVFC contract, funding for new vaccine that has not been established by TVFC, or national supply or distribution issues. Providers will be informed if a vaccine meets the definition of ‘not available’ from TVFC and when the provider’s privately purchased vaccine may be billed with modifier U1.

Modifier U1 may not be used for failure to enroll in TVFC, maintain sufficient TVFC vaccine inventory, or for clients who are 19 through 20 years of age.

### B.3.4 Respiratory Syncytial Virus (RSV)

Respiratory syncytial virus (RSV) monoclonal antibodies and their administration may be submitted with the following procedure codes:

| Monoclonal Antibody Procedure Codes | Administration Procedure Codes | Age Range                      |
|-------------------------------------|--------------------------------|--------------------------------|
| 90380                               | 96380                          | Birth through 19 months of age |
| 90381                               | 96381                          | Birth through 19 months of age |

### B.3.5 Requirements for TVFC Providers

By enrolling, public and private providers agree to:

- Screen patients for TVFC eligibility at all immunization encounters, and administer TVFC-purchased vaccines only to clients who are 18 years of age and younger who meet one or more of the following criteria:
  - Is an American Indian or Alaska Native.
  - Is enrolled in Medicaid.
  - Has no health insurance.
  - Is underinsured: clients who have other health insurance but the coverage does not include vaccines, clients whose insurance covers only selected vaccines (TVFC-eligible for noncovered vaccines only), clients whose insurance capitates vaccine coverage at a certain amount (once that coverage amount is reached, these clients are categorized as underinsured).
  - Is a client who receives benefits from the Children’s Health Insurance Program (CHIP) and the provider bills CHIP for the administration fee.
- Maintain all records related to the TVFC program, including parent, guardian, or authorized representative’s responses to screening for patient’s eligibility for at least five years. If requested, the provider will make such records available to DSHS, the local health department authority, or the U.S. Department of Health and Human Services (HHS).
- Comply with the appropriate vaccination schedule, dosage, and contraindications, as established by ACIP, unless (a) in making a medical judgment in accordance with accepted medical practice, the provider deems such compliance to be medically inappropriate, or (b) the particular requirement is not in compliance with Texas law, including laws relating to religious and medical exemptions.
- Provide VISs to the responsible adult, parent, or guardian, and maintain records in accordance with the NCVIA which include reporting clinically significant adverse events to VAERS. Signatures are required for informed consent. (The Texas Addendum portion of the VIS may be used to document informed consent.)

- Not charge for vaccines supplied by DSHS and administered to a client who is eligible for TVFC.
- Charge a vaccine administration fee to Texas Medicaid but not impose a charge for the administration of the vaccine in any amount higher than the maximum administration fee established by DSHS (providers may charge a vaccine administration fee to Medicaid, but not a fee for the vaccine). Medicaid clients cannot be charged any out-of-pocket expense for the vaccine or the administration of the vaccine.
- Not deny administration of a TVFC vaccine to a client because of the inability of the client's parent or guardian/individual of record to pay an administration fee.
- Comply with the state's requirements for ordering vaccines and other requirements as described by DSHS, and operate within the TVFC program in a manner intended to avoid fraud and abuse.
- Allow DSHS (or its contractors) to conduct scheduled and unannounced storage and handling visits.

The provider or the state may terminate the agreement at any time for failure to comply with the requirements listed above. If the agreement is terminated for any reason, the provider agrees to properly return any unused vaccine.

### **B.3.6 How to Report Immunization Records to ImmTrac2, the Texas Immunization Registry**

Texas law requires all medical providers and payors to report *all immunizations* administered to clients who are 17 years of age and younger, to ImmTrac2, the Texas immunization registry operated by DSHS (Texas Health and Safety Code §§161.007-161.009). Providers must report all immunization information within 30 days of administration of the vaccine, and payors must report within 30 days of receipt of data elements from a provider. Prior to reporting immunizations to ImmTrac2, providers must first register for registry participation and access.

ImmTrac2 is a centralized repository of immunization histories for clients of all ages and is a free service and benefit available to all Texans. Registry information is confidential, and by law, may be released only to:

- The client or client's parent, legal guardian, or managing conservator.
- The client's physician, school, or licensed child-care facility in which the client is enrolled.
- Public health districts or local health departments.
- The insurance company, health maintenance organization, or other organization that pays for the provision of the client's health-care benefits.
- A health-care provider authorized to administer a vaccine.
- A state agency that has legal custody of the client.

ImmTrac2 offers two methods for reporting immunizations to DSHS: direct internet entry into ImmTrac2's internet application and electronic data transfer (import).

#### **B.3.6.1 Direct Internet Entry**

This method allows providers to access and review clients' immunization histories prior to administering vaccines. Providers then update their client's immunization record directly into the ImmTrac2 web application after administering vaccines to the patient.

#### **B.3.6.2 Electronic Data Transfer (Import)**

This method allows providers to report immunizations from an electronic medical record (EMR) software application by extract file for import into ImmTrac2. Providers may still have access to the ImmTrac2 web application to access and review their clients' immunization histories before administering any vaccines.

Regardless of reporting option selected, all providers must first register for ImmTrac2 access and receive login credentials from ImmTrac2 Customer Support. To register for ImmTrac2 access, providers may obtain and complete an ImmTrac2 Registration Packet (for providers and schools) from [immtrac.dshs.texas.gov/TXPRD/enrollProviderEntry.do?action=newOrg](https://immtrac.dshs.texas.gov/TXPRD/enrollProviderEntry.do?action=newOrg) or request it from ImmTrac2 Customer Support at 1-800-348-9158.

### **B.3.6.3 Obtaining Parental Consent for Registry Participation**

Before including a client's immunization information in ImmTrac2, DSHS must verify that written consent for registry participation has been granted by the client's parent, legal guardian, or managing conservator. Most parents grant consent for ImmTrac2 participation during the birth certificate registration process. Written parental consent for ImmTrac2 participation applies to all past, present, and future immunizations. Texas law also permits a parent, managing conservator, or guardian to withdraw consent for ImmTrac2 participation at any time.

Providers may offer parents the opportunity to grant consent for their child's participation in ImmTrac2 using the pre-filled, ImmTrac2-generated Immunization Registry (ImmTrac2) Consent Form or the manual version (#C-7) of this form, also available from the ImmTrac2 application. Providers should retain the consent form and affirm parental consent through ImmTrac2 to establish the client's ImmTrac2 record and report all immunizations administered and add any historical immunization information to the client's record. Entering administered immunizations and historical immunization information to the client's record constitutes "reporting" to ImmTrac2 as required by current Texas law.

## **B.4 Texas Vaccines for Children Program Packet**

*Referto:* The DSHS website for TVFC information at [www.dshs.texas.gov/immunizations/what-we-do/programs](https://www.dshs.texas.gov/immunizations/what-we-do/programs).

## APPENDIX C. LEAD SCREENING

### C.1 Blood Lead Screening Procedures and Follow-up Testing

For all children enrolled in Texas Health Steps (THSteps) blood lead testing is mandatory when they are 12 months of age and 24 months of age, or whenever they receive their first checkup after these ages if blood testing was not completed (up to and including the 6-year checkup). Lead-risk assessment should be done at all other checkups through age 6, and may be performed using Form PB 110, Lead Risk Questionnaire. A “yes” or “don’t know” answer to any question on the questionnaire indicates that a blood lead test should be administered. All blood lead levels in clients who are birth through 14 years of age must be reported to the Department of State Health Services (DSHS). Reports should include all information as required on the Texas Child Blood Lead Level Report Form F09-11709, which is available at <https://www.dshs.texas.gov/blood-lead-surveillance-group/for-providers> or by calling 1-800-588-1248. Information related to blood lead screening and reporting for clients who are 15 years of age or older is available on the DSHS Blood Lead Surveillance Branch’s website at [www.dshs.texas.gov/lead](http://www.dshs.texas.gov/lead).

### C.2 Symptoms of Lead Poisoning

Children who have EBLs in the range of 3.5–45µg/dL may be asymptomatic, although impairment of neurodevelopment may become evident as they get older. Very high lead levels may cause colic, constipation, anorexia, or vomiting. Children with venous blood lead levels (BLLs) over 44µg/dL are eligible for medical intervention. However, it is important not to equate the absence of symptoms with the absence of toxicity.

### C.3 Measuring Blood Lead Levels

A blood lead test is the only definitive method to detect exposure. BLLs are measured as micrograms of lead per deciliter of whole blood (µg/dL). In Texas, a BLL requires medical case management and follow-up testing if the level is greater than or equal to 3.5 µg/dL.

Blood lead tests, in order of occurrence:

- Screening test—A blood lead test that indicates whether a client may have an EBL. This test must be sent to the DSHS lab, or may be done using point-of-care technology in the provider’s office.
- Diagnostic test—A venous blood lead test that is performed within recommended guidelines to determine the status of a client who has previously had an EBL on a screening test (See subsection C.5, “Lead Poisoning Prevention Educational Materials and Forms” in this handbook for a link to form Pb-109 and recommended guidelines).
- Follow-up test—A venous blood lead test to monitor the status of a client with a previously elevated diagnostic test for lead.

**Note:** A follow-up test is not related to the THSteps follow-up visit. A visit to monitor a child with EBL would be submitted as an acute care evaluation and management (E/M) visit.

Providers are responsible for conducting a diagnostic test when a screening test finds a lead level of 3.5 µg/dL or greater. Blood for a screening test may be drawn from a venous or capillary site. A venous blood draw is strongly recommended and preferred. To order venous sample supplies from the DSHS Laboratory, call 1-888-963-7111, Ext. 7661.

**Note:** The capillary lead screen analysis is subject to a false positive result from skin lead contamination during collection. A soap and water wash of the patient’s hands or feet and the collector’s hands (or the wearing of gloves) must be performed to minimize the chance of contamination. Alcohol cleansing alone is not sufficient.

If the screening test is 3.5 µg/dL or above, recalling a client for a diagnostic sample may be billed as a THSteps follow-up visit. If the screening test was rejected due to clotting, insufficient quantities, or perceived contamination, the provider must repeat the sample as a diagnostic test. Again, the provider may bill the visit and analysis as an E/M visit. Providers can submit the specimen to the DSHS Clinical Chemistry Laboratory using the appropriate DSHS Laboratory Specimen Submission form (the same way as for all other THSteps laboratory blood specimens). If the initial blood lead test is collected as part of a THSteps medical checkup, it must either be sent to the DSHS lab or performed in the provider’s office using point-of-care. The diagnostic and follow-up test for the same client may be sent to a private laboratory.

**Referto:** [Pb-109: Reference for Blood Lead Retesting and Medical Case Management](#) on the DSHS website for interpretation of laboratory test results and guidelines for follow-up for clients with elevated blood lead levels.

Subsection 4.3.12.6.6, “Required Laboratory Tests Related to Medical Checkups” in this handbook.

Subsection 4.3.10, “Newborn Examination” in this handbook.

Providers can find more information about the medical and environmental management of lead-poisoned children on the DSHS Texas Childhood Lead Poisoning Prevention Program (TX CLPPP) website at [www.dshs.texas.gov/lead](http://www.dshs.texas.gov/lead) or by calling 1-800-588-1248.

C.4 Environmental Lead Investigation Services

C.4.1 Enrollment

State and local health departments that employ or contract certified lead risk assessors must be enrolled with Texas Medicaid as a THSteps provider to perform environmental lead investigation (ELI) services.

- State and local health departments that are currently enrolled in Texas Medicaid must complete the THSteps Provider Enrollment Application.
- State and local health departments that are not currently enrolled in Texas Medicaid must complete the Texas Medicaid Provider Enrollment Application and the THSteps Provider Enrollment Application.

C.4.1.1 Services, Benefits, Limitations, and Prior Authorization

ELI services must be billed with procedure code T1029, which is restricted to the following diagnosis codes:

| Diagnosis Codes |         |         |         |         |         |         |         |
|-----------------|---------|---------|---------|---------|---------|---------|---------|
| T560X1A         | T560X1D | T560X1S | T560X2A | T560X2D | T560X2S | T560X3A | T560X3D |
| T560X3S         | T560X4A | T560X4D | T560X4S | Z77011  |         |         |         |

Texas Medicaid may only reimburse a state or local health department for the certified lead risk assessor’s time and activities during an onsite investigation of a client’s home or primary residence. Laboratory analysis of environmental substances (e.g., water, paint, or soil) is not a benefit of Texas Medicaid.

Children who have confirmed and persistent EBLs may require an ELI to determine the source of the lead exposure. An ELI is completed in a client’s home or primary residence by a certified lead risk assessor to determine whether a lead hazard exists and, if so, whether the lead source could be the cause of the EBL.

### C.4.1.2 Requesting an Environmental Lead Investigation

For the purpose of requesting an ELI, a health-care provider is a physician, nurse practitioner (NP), clinical nurse specialist (CNS), or physician assistant (PA) who conducts blood lead tests for a THSteps client. Health-care providers may submit a request for an ELI after a blood lead test has been conducted and there is evidence of persistent and confirmed EBLs for the client. An EBL is defined as a BLL of 10µg/dL or higher.

An ELI may be considered medically necessary if the results of the most recent blood lead test indicate any of the following:

- A venous BLL result of 10µg/dL to 19µg/dL from two separate specimens conducted at least 12 weeks apart
- A venous BLL result of 20µg/dL or greater from one specimen

**Note:** *The ELI must be requested as soon as possible and no later than 30 days after obtaining the most recent BLL that indicates medical necessity. The health-care provider must maintain in the client's medical record the ELI request and the documentation of the BLL that indicates medical necessity.*

The health-care provider can request an ELI by completing Form Pb-101 "Environmental Lead Investigation Request" and submitting it to the TX CLPPP. TX CLPPP will review the request and determine whether the criteria for an ELI have been met. If an ELI request meets the TX CLPPP criteria, TX CLPPP sends a referral for an ELI to a state or local health department that is enrolled as a THSteps provider so that it can be assigned to a certified lead risk assessor. A certified lead risk assessor conducts an ELI using a completed Pb-103 Texas Elevated Blood Lead Level Investigation Questionnaire (all pages).

An ELI can be performed under one of the following circumstances:

- No previous investigation of the current home or primary residence has been performed.
- There is a change in the client's current home or primary residence.

If a previous investigation of the current home or primary residence has been performed and there has been a change in the client's residential environment, TX CLPPP will determine whether the criteria have been met for an additional ELI.

### C.4.1.3 Prior Authorization

Prior Authorization is not required for ELI services.

## C.4.2 Documentation Requirements

The state or local health department that is responsible for conducting the investigation must maintain the following documentation in the client's medical record:

- The TX CLPPP fax transmittal cover sheet that refers the ELI request to the local health department. The cover sheet must include:
  - The site to be assessed.
  - A statement that identifies the site as the client's primary place of residence.
- A completed Form Pb-101: Environmental Lead Investigation Request (two pages) that includes the:
  - Name of the referring health-care provider.
  - BLLs that indicate medical necessity.
  - Client's diagnosis.
- A completed Form Pb-103: Elevated Blood Lead Level Investigation Questionnaire (all pages) that includes the:

- Date and location of the investigation.
- Name of the client who received the investigation.
- Identifying information and signature of the certified lead risk assessor who conducted the investigation. The person listed as the assessor must be the same person who signs the report.

**Note:** Forms Pb-101 and Pb-103 are located on the TX CLPPP website at <https://www.dshs.texas.gov/blood-lead-surveillance-group/for-providers/forms>.

### **C.4.3 Claims Filing and Reimbursement**

#### **C.4.3.1 Claims Filing**

ELI services must be submitted to Texas Medicaid & Healthcare Partnership (TMHP) in an approved electronic format or on the CMS-1500 paper claim form. Providers can purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

The following documentation must be submitted with the claim:

- The TX CLPPP fax transmittal cover sheet that refers the ELI request to the state or local health department. The cover sheet must include:
  - The site to be assessed.
  - A statement that identifies the site as the client's primary place of residence.
- A completed Form Pb-101: Environmental Lead Investigation Request.
- The first and last page of Form Pb-103: Elevated Blood Lead Level Investigation Questionnaire, which has been completed by the lead risk assessor.

An ELI is subject to retrospective review and may be recouped if the documentation maintained by the health-care and ELI providers does not support medical necessity.

**Referto:** "Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information about electronic claims submissions.

"Section 6: Claims Filing" (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for instructions on completing paper claims.

#### **C.4.3.2 Managed Care Clients**

ELI services are carved-out of the Medicaid Managed Care Program and must be billed to TMHP for payment consideration. Carved-out services are those that are rendered to Medicaid Managed Care clients but are administered by TMHP and not the client's managed care organization (MCO).

#### **C.4.3.3 Reimbursement**

Providers can refer to the [online fee lookup \(OFL\)](#) or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

### **C.5 Lead Poisoning Prevention Educational Materials and Forms**

Providers may download lead poisoning prevention education materials and forms from the Texas CLPPP website at [www.dshs.texas.gov/lead](http://www.dshs.texas.gov/lead).

The following table lists materials available to providers for download:

| Lead Poisoning Prevention Materials |                                                                                                   |
|-------------------------------------|---------------------------------------------------------------------------------------------------|
| 1-26                                | Protect Your Children From Lead Poisoning ( <a href="#">English</a> and <a href="#">Spanish</a> ) |
| 1-307                               | Keep Lead at Bay ( <a href="#">English</a> and <a href="#">Spanish</a> )                          |
| 1-308                               | Consuming Lead-Free ( <a href="#">English</a> and <a href="#">Spanish</a> )                       |
| 1-311                               | How Lead Affects Your Child's Health ( <a href="#">English</a> and <a href="#">Spanish</a> )      |
| 1-313                               | <a href="#">Getting a Good Specimen (Poster)</a>                                                  |
| 1-315                               | A Guide for Cleaning Lead-Safe ( <a href="#">English</a> and <a href="#">Spanish</a> )            |
| 09-13410                            | Pica and Pregnancy ( <a href="#">English</a> and <a href="#">Spanish</a> )                        |
| Pb-101                              | <a href="#">Request for Environmental Investigation</a>                                           |
| Pb-102                              | <a href="#">Follow-up of Initial Elevated Blood Lead Level</a>                                    |
| Pb-103                              | <a href="#">Elevated Blood Lead Level Investigation Questionnaire</a>                             |
| Pb-104                              | <a href="#">Physician Checklist for Parent Education Topics</a>                                   |
| Pb-109                              | <a href="#">Reference for Blood Lead Retesting and Medical Case Management</a>                    |
| Pb-110                              | Lead Risk Questionnaire ( <a href="#">English</a> and <a href="#">Spanish</a> )                   |

## **APPENDIX D. TEXAS HEALTH STEPS STATUTORY STATE REQUIREMENTS**

### **D.1 Legislative Requirements**

Several specific legislative requirements affect Texas Health Steps (THSteps) and the provider's participation in Texas Medicaid. The legislation includes, but is not limited to, those included in this Appendix.

### **D.2 Texas Health Steps (THSteps) Program**

The Early and Periodic Screening, Diagnosis, and Treatment (EPSDT) Program is mandated by Title XIX of the Social Security Act. EPSDT is a program of prevention, diagnosis, and treatment for Medicaid-eligible clients who are birth through 20 years of age.

In Texas, EPSDT is known as THSteps. The Texas Department of State Health Services (DSHS), by authorization of Texas Department of Health and Human Services (HHSC), operates and administers the outreach and informing, medical and dental checkup, dental treatment utilization components of this program. State authority is found in Title 25 Texas Administrative Code (TAC), Part 1, Chapter 33, Subchapter A, Rule §33.1.

### **D.3 Communicable Disease Reporting**

Diagnosis of sexually transmitted diseases (STDs), including human immunodeficiency virus (HIV), are reportable conditions under 25 TAC, Chapter 97, Subchapter F. Providers must report confirmed diagnosis of STDs as required by 25 TAC §§97.132-134.

### **D.4 Early Childhood Intervention (ECI) Referrals**

All health-care professionals are required by federal and state regulations to refer children who are birth through 35 months of age to the Texas HHS ECI program as soon as possible, but no longer than 7 days after identifying a disability or suspected delay in development.

Referrals can be based on professional judgment or a family's concern. A medical diagnosis or a confirmed developmental delay is not required for referrals.

To refer families for services, providers should use the ECI referral form available on the HHS ECI website at <https://www.hhs.texas.gov/sites/default/files/documents/services/disability/eci/eci-referral-form-icd-10.pdf>. Providers may also refer families for services by calling their local ECI program or the Health and Human Services Office of the Ombudsman at 1-877-787-8999, select a language, and then select Option 3. The Ombudsman staff will ask for your ZIP code, county, or city and provide the name and number of the local ECI program. Callers that are deaf or hard of hearing may use the relay option of their choice or dial 7-1-1 to connect with Relay Texas.

To facilitate referrals for ECI services an optional form is available on the HHS ECI website at <https://www.hhs.texas.gov/services/disability/early-childhood-intervention-services/make-a-referral-eci>.

For additional ECI information, providers can visit the HHS ECI website at [www.hhs.texas.gov/services/disability/early-childhood-intervention-services](https://www.hhs.texas.gov/services/disability/early-childhood-intervention-services). Persons who are deaf or hard of hearing may use the relay option of their choice or dial 7-1-1 to connect with Relay Texas.

### **D.5 Parental Accompaniment**

Texas Human Resource Code (HRC) §§32.024(s)-(2) requires that, as a condition for provider reimbursement, a client who is 14 years of age or younger be accompanied by the client's parent, legal guardian, or other authorized adult during medical and dental checkups and dental treatment. The authorized adult can be the client's relative. DSHS implemented this requirement through rules found in 25 TAC §33.2 (Definitions) and 25 TAC §33.6 (THSteps Provider Responsibilities).

The DSHS rules require that the parent, legal guardian, or authorized adult accompany the client to the checkup, and that the parent, legal guardian, or authorized adult must wait for the client while the checkup, treatment, or service takes place.

Providers will not be required to submit documentation to TMHP to verify compliance with this policy in order for TMHP to process claims. By submitting the claim for reimbursement, the provider acknowledges compliance with all Medicaid requirements. Additional assurances are not necessary.

**Exception:** *School health clinics, Head Start programs, and childcare facilities are exempt from this policy if the clinic, program, or facility encourages parental involvement in the health care of the client and obtains written consent for the services. The consent from the client's parent or guardian must have been received within the one-year period before the date on which the services are provided and must not have been revoked.*

**Referto:** HRC §§32.024(s)-(s-1) and 25 TAC §33.2 and §33.6.

## D.6 Newborn Blood Screening

The Health and Safety Code (HSC), Chapter 33, Section §33.011, implemented by the rules found at 25 TAC, Part 1, Chapter 37, Subchapter D, requires testing of all newborns. A current list of disorders can be found at [www.dshs.texas.gov/newborn/screened\\_disorders.shtml](http://www.dshs.texas.gov/newborn/screened_disorders.shtml).

This testing is the responsibility of the physician who is attending a newborn client (defined as up to 30 days of age by rule in 25 TAC, Chapter 37, Subchapter D, §37.52) or the person who is attending the delivery of a newborn client who is not attended by a physician to screen for the disorders within 24 to 48 hours of birth.

All infants must be tested a second time at 1 to 2 weeks of age. If there is any doubt that a client who is 12 months of age or younger was properly tested, the provider should submit a blood sample with the appropriate DSHS Form NBS3 to the DSHS Newborn Screening Laboratory.

## D.7 Abuse and Neglect

### D.7.1 Requirements for Reporting Abuse or Neglect

Providers are required to report abuse or neglect as outlined in subsection 1.7, "Provider Responsibilities" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*).

Additionally, the General Appropriations Act, Article II, Rider 23 under DSHS, and Rider 13 under HHSC, of S.B. 1, 79th Legislative Regular Session, 2007, require that DSHS and HHSC distribute or provide appropriated funds only to recipients who show good faith efforts to comply with all child abuse and reporting requirements set forth in the Texas Family Code (TFC), Chapter 261, relating to investigations of reports of child abuse and neglect.

### D.7.2 Procedures for Reporting Abuse or Neglect

Professionals, as defined in TFC §261.101 (b), are required to report abuse or neglect no later than the 48th hour after the hour in which the professional first has cause to believe the client has been or may be abused or is the victim of the offense of indecency with a child.

Nonprofessionals shall immediately make a report when the nonprofessional has cause to believe that the client's physical or mental health or welfare has been adversely affected by abuse.

A report must be made regardless of whether the provider staff suspects that a report may have previously been made. Reports of abuse or indecency with a child should be made to one of the following:

- Texas Department of Family and Protective Services (DFPS), if the alleged or suspected abuse involves a person responsible for the care, custody, or welfare of the child (DFPS Texas Abuse Hotline, 1-800-252-5400, 24 hours a day, 7 days a week).

- Call the DFPS Texas Abuse Hotline if:
  - You believe your situation requires action in less than 24 hours.
  - You prefer to remain anonymous.
  - You have insufficient data to complete the required information on the report.
  - You do not want an email to confirm your report.

**Note:** Providers can also report nonemergency abuse online at [www.txabusehotline.org](http://www.txabusehotline.org).

- Any local or state law enforcement agency or the state agency that operates, licenses, certifies, or registers the facility in which the alleged abuse or neglect occurred.
- The agency designated by the court to be responsible for the protection of children.

The law requires that the report include the following:

- Name and address of the minor, if known.
- Name and address of the minor's parent or the person responsible for the care, custody, or welfare of the child if not the parent, if known.
- Any other pertinent information concerning the alleged or suspected abuse, if known.

A provider may not reveal whether the client has been tested or diagnosed with HIV or acquired immunodeficiency syndrome (AIDS). If the minor's identity is unknown (e.g., the minor is at the provider's office to receive testing for HIV or an STD anonymously), no report is required.

#### **D.7.2.1 Staff Training on Reporting Abuse and Neglect**

All providers shall develop training for all staff on the policies and procedures in regard to reporting child abuse, including sexual abuse and neglect. New staff shall receive this training as part of their initial training or orientation.

Training shall be documented. As part of the training, staff shall be informed that the staff person who conducts the screening and has cause to suspect abuse has occurred is legally responsible for reporting. A joint report may be made with the supervisor.

Several specific legislative requirements affect THSteps and the provider's participation in Texas Medicaid. The legislation includes, but is not limited to those included in this appendix.

## APPENDIX E. HEARING SCREENING INFORMATION

### E.1 Texas Early Hearing Detection and Intervention (TEHDI) Process

The following processes for early hearing detection and intervention are addressed in this section:

- Birth screen
- Outpatient rescreen
- Evaluation using Texas Pediatric Protocol for Audiology
- Referral to an Early Childhood Intervention (ECI) program
- Periodic monitoring by the physician or medical home

**Referto:** The [1-3-6 Month Practitioner's Guide](#) on the DSHS website.

#### E.1.1 Birth Screen

The hearing screen at birth will be either screening auditory brainstem response (ABR) or transient or distortion product otoacoustic emissions (OAE). The following items apply:

- A newborn's hearing is screened at the birth facility. If a newborn does not pass the screen, hearing is rescreened before discharge.
- The birth facility reports results to the Department of State Health Services (DSHS) using the web-based eScreener Plus (eSP™) system.
- The newborn's family and physician/medical home receive a written report of the hearing screen outcome.
- If a newborn passes the screen, the physician monitors hearing as part of well child checkups.
- If a newborn does not pass the second screen, a referral is made to a local resource who is experienced with the pediatric population for outpatient rescreen.

#### E.1.2 Outpatient Rescreen

If an outpatient rescreen is necessary, either ABR or OAE will be used. The following items apply:

- The physician/medical home receives the written report of results from the birth facility.
- The screener/physician reports results to the DSHS contractor, OZ Systems, using the web-based eSP™ system, by calling 1-866-427-5768 or faxing 1-817-385-3939.
- If the newborn passes the outpatient rescreen, the physician monitors hearing as part of well child checkups.
- If a newborn does not pass the outpatient rescreen, a referral is made to an audiologist for evaluation using the Texas Pediatric Protocol for Evaluation. Visit [www.dshs.texas.gov/tehdi](http://www.dshs.texas.gov/tehdi) for more information.
- Hearing services for clients who are birth through 20 years of age are administered through the Texas Medicaid hearing services benefit. Clients may use the Online Provider Lookup (OPL) to locate a Texas Medicaid provider who provides hearing services for children (clients who are birth through 20 years of age).

### E.1.3 Evaluation using Texas Pediatric Protocol for Audiology

These evaluations will include a diagnostic ABR and, if not previously done, a diagnostic OAE will be performed to determine cochlear involvement. The following items apply:

- Audiologists use equipment norms for newborns, preferably ones that they have collected on their equipment.
- Protocols include air and bone conduction testing using tone burst ABR, as well as click ABR, so the amplification may be appropriately fit.
- The physician/medical home receives results and makes the referral to ECI using the web-based eSP™ system or by using the ECI program search web page at [citysearch.hhsc.state.tx.us](http://citysearch.hhsc.state.tx.us).
- The physician/medical home monitors the child. See the *Journal of Early Hearing Detection and Intervention 2019 Position Statement* at “[Year 2019 JCIH Position Statement](http://Year2019JCIHPositionStatement.usu.edu)” ([usu.edu](http://usu.edu)).
- The audiologist reports results to the DSHS contractor as noted above and makes the referral to ECI.
- Fitting of hearing aids by an audiologist when appropriate.
- Continued audiological assessment and monitoring as needed (usually monitor each three months for the first year of hearing aid use).

### E.1.4 Referral to an ECI Program

The client will be referred to an ECI program by an audiologist or physician as soon as possible, but no longer than 7 days of identification of hearing loss as required by law. The following items apply:

- Service coordination provided by ECI.
- ECI will refer to the Local Education Agency (LEA) for auditory impairment (AI) services as outlined in the *Memorandum of Understanding between TEA and HHS ECI*.
- An evaluation and Individual Family Service Plan (IFSP) will occur within 45 days of referral to ECI.
- ECI services are available to clients birth through 35 months of age when determined by an IFSP.
- ECI and LEA will coordinate transition services upon the child's third birthday.

### E.1.5 Periodic Monitoring by the Physician or Medical Home

The physician/medical home will continue to monitor the client periodically and may consult or use the following:

- Providers may refer to the Joint Committee on Infant Hearing (JCIH) 2007 Position Statement for suggested monitoring protocols at [publications.aap.org/pediatrics/article/120/4/898/71218/Year-2007-Position-Statement-Principles-and?autologincheck=redirected](http://publications.aap.org/pediatrics/article/120/4/898/71218/Year-2007-Position-Statement-Principles-and?autologincheck=redirected).
- Deaf education and other special education services available from birth through 20 years of age when determined by an individualized education program.

## E.2 JCIH 2007 Position Statement

The JCIH 2007 Position Statement is available on the JCIH website at [www.jcih.org/posstatemts.htm](http://www.jcih.org/posstatemts.htm). The 2007 Position Statement lists the indicators that are associated with permanent congenital, delayed-onset or progressive hearing loss in childhood.

## **APPENDIX F. TEXAS HEALTH STEPS QUICK REFERENCE GUIDE**

The [Texas Health Steps Quick Reference Guide](#) (THSteps-QRG) is available on the TMHP website.

## **APPENDIX G. AMERICAN ACADEMY OF PEDIATRIC DENTISTRY PERIODICITY GUIDELINES**

The American Academy of Pediatric Dentistry (AAPD) periodicity guidelines are available on the AAPD website at [www.aapd.org](http://www.aapd.org).

- 13 Claim Form Examples .....41**

## 1 General Information

This information is intended for Federally Qualified Health Centers (FQHCs) renal dialysis facilities, Rural Health Clinics (RHCs) and tuberculosis (TB) clinics. This handbook provides information about Texas Medicaid's benefits, policies, and procedures applicable to these providers. This handbook contains information about Texas Medicaid fee-for-service benefits. For information about managed care benefits, refer to the *Texas Medicaid Managed Care Handbook*. Managed care carve-out services are administered as fee-for-service benefits. A list of all carve-out services is available in Subsection 17, "Carve-Out Services" in the *Texas Medicaid Managed Care Handbook*.

**Important:** *All providers are required to read and comply with "Section 1: Provider Enrollment and Responsibilities" (Vol. 1, General Information). In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

### 1.1 National Drug Codes (NDC)

**Referto:** Subsection 6.3.4, "National Drug Code (NDC)" in "Section 6: Claims Filing" (Vol. 1, General Information).

### 1.2 Revenue Codes for UB-04 Submissions

Claims that are submitted on the CMS-1450 UB-04 paper claim form or electronic equivalent by non-hospital facility or other non-hospital providers must be submitted with a revenue code for correct processing.

If the non-hospital provider is required to submit a procedure code for reimbursement, the provider must include the procedure code and an appropriate corresponding revenue code on the same detail, even if the chosen revenue code does not require a procedure code for claims processing.

**Referto:** Subsection 4.5.5, "Outpatient Hospital Revenue Codes" in the *Inpatient and Outpatient Hospital Services Handbook* (Vol. 2, Provider Handbooks) for a list of revenue codes that do and do not require procedure codes.

### 1.3 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission

According to the three-day and one-day payment window reimbursement guidelines, most professional and outpatient diagnostic and nondiagnostic services that are rendered within the designated timeframe of an inpatient hospital stay and are related to the inpatient hospital admission will not be reimbursed separately from the inpatient hospital stay if the services are rendered by the hospital or an entity that is wholly owned or operated by the hospital.

These reimbursement guidelines do not apply in the following circumstances:

- The services were FQHC, RHC, THSteps, or some renal dialysis services.
- The hospital and the physician office or other entity are both owned by a third party, such as a health system.

- The hospital is not the sole or 100-percent owner of the entity.

**Referto:** Subsection 3.7.4.17, “Payment Window Reimbursement Guidelines” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for additional information about the payment window reimbursement guidelines.

## 2 Birthing Center

### 2.1 Provider Enrollment

A birthing center is a place, facility, or institution where a woman is scheduled to give birth following a normal, uncomplicated (low-risk) pregnancy. This term does not include a hospital, an ambulatory surgical center, or the residence of the woman giving birth.

A birthing center must be licensed as a birthing center by the Department of State Health Services (DSHS) and meet the minimum standards as required by the Texas Health and Safety Code, Chapter 244.010. To enroll in Texas Medicaid, a birthing center must be licensed to provide a level of service commensurate with the professional services of a doctor of medicine (MD), doctor of osteopathy (DO), certified nurse-midwife (CNM), or licensed midwife (LM) who acts as birth attendant. Texas Medicaid may reimburse birthing center providers only for those services that the attending physician or CNM determines to be reasonable and necessary for the care of the mother or newborn child.

Providers cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

Birthing centers are encouraged to refer clients for Texas Health Steps (THSteps) services.

**Referto:** “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information about enrollment procedures.

Section 2, “Medicaid Title XIX Family Planning Services” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)* for information on setting up referral procedures for family planning services.

The HHSC website a [www.healthytexaswomen.org](http://www.healthytexaswomen.org) for information about family planning and the locations of family planning clinics receiving HHSC Family Planning Program funding from HHSC.

Subsection 7.2.1.3, “Laboratory Tests” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about required human immunodeficiency virus (HIV) testing for pregnant women.

### 2.2 Services, Benefits, Limitations, and Prior Authorization

Birthing centers may only be reimbursed by Texas Medicaid for their facility labor and delivery services using the following procedure codes:

| Service    | Procedure Code |
|------------|----------------|
| Delivery   | 59409          |
| Labor only | S4005          |

**Note:** Deliveries at a facility licensed as a birthing center by DSHS must be billed with procedure code 59409.

If the client is discharged prior to delivery, procedure code S4005 may be billed by the facility for labor services only.

**Referto:** Subsection 9.2.35, “Immunization Guidelines and Administration” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for additional information about immunization administration.

### 2.2.1 Newborn Hearing Screening

The Texas Health and Safety Code, Chapter 47, requires birthing centers to offer all newborns a hearing screening as a part of the obstetrical care at delivery.

**Referto:** Subsection 4.3.10, “Newborn Examination” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for more information about the newborn hearing screening.

Subsection 2.2.2.3, “Abnormal Hearing Screening Results” in the *Vision and Hearing Services Handbook (Vol. 2, Provider Handbooks)* for more information about abnormal hearing screens.

### 2.2.2 Newborn Eligibility Process

If the mother of the newborn is eligible for Medicaid, the newborn may be assigned his or her own Medicaid number. The birthing center must complete form GN.4, “Birthing Center Report (Newborn Child or Children) (Form 7484)” to provide information about each child born to a mother who is eligible for Medicaid.

**Referto:** [Hospital Report \(Newborn Child or Children\) \(Form 7484\)](https://www.tmhp.com/Hospital-Report-Newborn-Child-or-Children-Form-7484) on the TMHP website at [www.tmhp.com](https://www.tmhp.com).

If the newborn’s name is known, the name must be on the form. The use of “Baby Boy” or “Baby Girl” delays the assignment of a number.

The form must be completed by the birthing center no later than five days after the child’s birth. Birthing centers that submit the birth certificate information using the HHSC, Vital Statistics Unit (VSU) Texas Electronic Registrar for Birth software and the HHSC Form 7484 receive a rapid and efficient assignment of a newborn Medicaid identification number. This process expedites reimbursement to hospitals and other providers that are involved in the care of the newborn.

Additional information about obtaining a newborn Medicaid identification number can be found on the agency website at [www.hhs.texas.gov/services/health/medicaid-chip/provider-information/chip-perinatal-coverage/chip-perinatal-faqs](https://www.hhs.texas.gov/services/health/medicaid-chip/provider-information/chip-perinatal-coverage/chip-perinatal-faqs). Providers may also call 1-888-963-7111, Ext. 7368 or 1-512-458-7368 for additional information or comments about this process.

Upon receipt of a completed 7484 form, DSHS verifies the mother’s eligibility and, within ten days of the receipt, sends notification letters to the hospital or birthing center, attending physician (if identified), mother, and caseworker. The notice includes the child’s Medicaid identification number and the effective date of coverage. After the child has been added to the eligibility file, HHSC issues a Medicaid Identification card (Your Texas Benefits Medicaid card) to the client.

The attending physician’s notification letter is sent to the address on file (by license number) at the Texas Medical Board. This address must be kept current to ensure timely notification. Physicians must submit address changes to the following address:

Texas Medical Board  
Customer Information, MC-240  
PO Box 2018  
Austin, TX 78767-2018

### 2.2.3 Prior Authorization

Prior authorization is not required for services rendered in birthing centers.

## 2.2.4 Services Rendered in the Birthing Center Setting

Maternity clinic, physician, CNM, LM, nurse practitioner (NP), clinical nurse specialist (CNS), and physician assistant (PA) providers who render prenatal or family planning services in the birthing center setting must submit separate claims.

**Referto:** Section 4, “Obstetric Services” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)* for information about birthing center providers.

## 2.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered.

Birthing center services are subject to retrospective review and recoupment if documentation does not support the service billed.

## 2.4 Claims Filing and Reimbursement

### 2.4.1 Claims Information

Claims for birthing center services must be submitted to Texas Medicaid & Healthcare Partnership (TMHP) in an approved electronic format or on the CMS-1500 paper claim form. Providers may purchase CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a CMS-1500 paper claim form, providers must include all required information on the claim, as TMHP does not key any information from attachments. Superbills or itemized statements are not accepted as claim supplements.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

### 2.4.2 Reimbursement

Birthing centers are reimbursed in accordance with 1 TAC §355.8181. See the [applicable fee schedule](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com). Texas Medicaid implemented mandated rate reductions for certain services.

Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates/rate-changes](http://www.tmhp.com/resources/rate-and-code-updates/rate-changes).

#### 2.4.2.1 National Correct Coding Initiative (NCCI) and Medically Unlikely Edit (MUE) Guidelines

The Healthcare Common Procedure Coding System (HCPCS) and Current Procedural Terminology (CPT) codes included in the *Texas Medicaid Provider Procedures Manual* are subject to National Correct Coding Initiative (NCCI) relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals. The Centers for Medicare & Medicaid Services (CMS) NCCI and medically unlikely edits (MUE) guidelines can be found in the NCCI Policy and Medicaid Claims Processing manuals, which are available on the CMS NCCI web page. Providers should refer to the CMS NCCI web page for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

### 3 Comprehensive Health Center (CHC)

CHCs or physician-operated clinics are funded by federal grants. To apply for participation in Texas Medicaid, they must be certified and participate as health centers under Medicare (Title XVIII).

CHC claims are paid according to each center's encounter rates as established by CMS. Medicaid payments to CHCs are limited to Medicare deductible or coinsurance according to current guidelines. CHC providers that supply laboratory services in an office setting must comply with the rules and regulations for the Clinical Laboratory Improvement Amendments (CLIA). Providers that do not comply with CLIA are not reimbursed for laboratory services.

**Referto:** Subsection 2.1.1, "Clinical Laboratory Improvement Amendments (CLIA)" in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

Subsection 2.7, "Medicare Crossover Claim Reimbursement" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*).

"Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*).

Section 4, "Federally Qualified Health Center (FQHC)" in this handbook.

Section 8, "Rural Health Clinic" in this handbook.

### 4 Federally Qualified Health Center (FQHC)

#### 4.1 Enrollment

To enroll in Texas Medicaid, an FQHC must be receiving a grant under Section 329, 330, or 340 of the Public Health Service Act or designated by the U.S. Department of Health and Human Services (HHS) to have met the requirements to receive this grant. FQHCs and their satellites are required to enroll in Medicare to be eligible for Medicaid enrollment. The CMS has granted a waiver for the Medicare prerequisite at the time of initial enrollment of FQHC parents and satellites. FQHC look-alikes are *not* required to enroll in Medicare but may elect to do so to receive reimbursement for crossovers.

**Referto:** Subsection 4.3.2.1, "Medicare Crossover Claims Pricing" in this handbook.

A copy of the Public Health Service's Notice of Grant Award reflecting the project period and the current budget period must be submitted with the enrollment application. A current notice of grant award must be submitted to TMHP Provider Enrollment annually.

FQHCs are required to notify TMHP of all satellite centers that are affiliated with the parent FQHC and their actual physical addresses. All FQHC satellite centers billing Texas Medicaid for FQHC services must also be approved by the United States Department of Health and Human Services Health Resources and Services Administration (HRSA). For accounting purposes, centers may elect to enroll the HRSA-approved satellites using a Federally Qualified Satellite (FQS) provider identifier that ties back to the parent FQHC National Provider Identifier (NPI) and tax ID number (TIN). This procedure allows for the parent FQHC to have one provider agreement and one cost report that combines all costs from all approved satellites and the parent FQHC. If an approved satellite chooses to submit claims to Texas Medicaid directly, the center must have a separate NPI from the parent FQHC and will be required to file a separate cost report.

All providers are required to read and comply with "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*). In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care

services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in 1 TAC §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.

FQHC providers do not need to apply for a separate physician or agency number to provide family planning services.

**Referto:** Subsection 1.1, “Provider Enrollment” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information about enrollment procedures.

FQHCs must identify and attest to all contractual agreements for those medical services in which the FQHC is receiving Prospective Payment System (PPS) reimbursement. This is a mandate from the 2012 to 2013 General Appropriations Act, H.B. 1, 82nd Legislature, Regular Session, 2011 (Article II, Health and Human Services Commission, Rider 78).

The attestation shall be made using the Federally Qualified Health Center Affiliation Affidavit, which is available on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

4.1.1 Initial Cost Reporting

New FQHCs must file a projected cost report within 90 days of their designation as an FQHC to establish an initial payment rate. The cost report will contain the FQHC’s reasonable costs anticipated to be incurred during the FQHC’s initial fiscal year. The FQHC must file a cost report within five months of the end of the FQHC’s initial fiscal year. The cost settlement must be completed within 11 months of the receipt of a cost report. The cost per visit rate established by the cost settlement process will be the base rate. Any subsequent increases will be calculated as provided herein.

FQHC providers are required to submit a copy of their Medicare-audited cost report for the provider’s fiscal year within 30 days of receipt from Medicare to:

Texas Medicaid & Healthcare Partnership  
Medicaid Audit  
PO Box 200345  
Austin, TX 78720-0345

A new FQHC location established by an existing FQHC participating in Texas Medicaid will receive the same effective rate as the FQHC establishing the new location. An FQHC establishing a new location may request an adjustment to its effective rate as provided herein if its costs have increased as a result of establishing a new location.

**Referto:** Subsection 1.1, “Provider Enrollment” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information about enrollment procedures.

4.1.2 Services, Benefits, Limitations, and Prior Authorization

The services listed in the following tables may be reimbursed using the FQHC’s NPI. Any additional physician services must be submitted for reimbursement using the physician’s NPI. Hospital services are not considered for reimbursement to FQHC providers, and cannot be billed using the facility provider number assigned to the FQHC.

| General Medical Services                                                                                                     |  |  |  |  |  |  |  |  |  |
|------------------------------------------------------------------------------------------------------------------------------|--|--|--|--|--|--|--|--|--|
| T1015                                                                                                                        |  |  |  |  |  |  |  |  |  |
| General medical services must be submitted using one of the appropriate modifiers AH, AJ, AM, SA, TD, TE, TH, U1, U2, or U7. |  |  |  |  |  |  |  |  |  |

**FQHC Encounter Services**

|       |       |       |       |       |  |  |  |
|-------|-------|-------|-------|-------|--|--|--|
| G0466 | G0467 | G0468 | G0469 | G0470 |  |  |  |

The *Health and Human Services Commission Family Planning Program Services Handbook* (Vol. 2, *Provider Handbooks*).

Medicaid coverage is limited to FQHC services that are covered by Texas Medicaid and are reasonable and medically necessary. When furnished to a client of the FQHC, medically necessary services include the following:

- CNM services
- Clinical psychologist services
- Licensed clinical social worker (LCSW), licensed marriage and family therapist (LMFT), licensed professional counselor (LPC), and other mental health services

- Dental services
- NP services
- Other ambulatory services included in Medicaid such as family planning, THSteps, and maternity service clinic (MSC)
- PA services
- Physician services
- Services and supplies necessary for services that would be covered otherwise, if furnished by a physician or a physician service
- Vision care services
- Visiting nurse services to a homebound individual, in the case of those FQHCs located in areas with a shortage of home health agencies

Types of FQHC visits are defined in 1 TAC §355.8261. A visit is a face-to-face encounter between an FQHC client and a physician, PA, NP, CNM, visiting nurse, qualified clinical psychologist, LCSW, LMFT, LPC, other health-care professional for mental health services, dentist, dental hygienist, or optometrist. Encounters that take place on the same day at a single location with more than one health-care professional or multiple encounters with the same health-care professional constitute a single visit, except where one of the following conditions exists:

- After the first encounter, the client suffers illness or injury requiring additional diagnosis or treatment.
- The FQHC client has a medical visit and an other health visit such as a qualified clinical psychologist, LCSW, LMFT, LPC, other health professional for mental health services, a dentist, a dental hygienist, an optometrist, or a THSteps medical checkup.

All services provided that are incidental to the encounter, including developmental screening, must be included in the total charge for the encounter. They are not billable as a separate encounter.

Registered nurses may not be the sole provider of a medical checkup in an FQHC. If immunizations are given outside of a THSteps medical checkup, procedure codes given in the THSteps section of this manual should be used. These procedure codes are informational only, and are not payable.

To be reimbursed for Case Management for Children and Pregnant Women, an FQHC must be approved as a case management services provider by the DSHS Case Management Branch.

An annual family planning examination is allowed once per state fiscal year (September 1 through August 31), per client, per provider. An FQHC may be reimbursed for up to three family planning encounters per client, per year, regardless of the reason for the encounter. The three encounters may include any combination of general family planning encounters, an annual family planning examination, or intrauterine devices.

Family planning services must be submitted with the most appropriate evaluation and management (E/M) procedure code and one of the following family planning diagnosis codes:

| Family Planning Diagnosis Codes |        |        |        |        |        |       |       |
|---------------------------------|--------|--------|--------|--------|--------|-------|-------|
| Z30011                          | Z30013 | Z30014 | Z30018 | Z3002  | Z3009  | Z302  | Z3040 |
| Z3041                           | Z3042  | Z30430 | Z30431 | Z30432 | Z30433 | Z3049 | Z308  |
| Z309                            | Z9851  | Z9852  |        |        |        |       |       |

Procedure code 58300 must be submitted on the same claim as J7296, J7297, J7298, J7300, and J7301. Procedure code 58300 will process as informational only. Only the annual family planning examination requires modifier FP. All other family planning visits do not require the FP modifier. Claims filed incorrectly may be denied.

Laboratory and radiology services or the services of a licensed vocational nurse (LVN), registered nurse (RN), nutritionist, or dietitian are *not* considered an encounter, because they are incidental to an encounter with one of the previously-mentioned payable health-care professionals. Providers should continue to include the cost associated with these services on their cost report (they are allowable but do not constitute an encounter).

Per federal regulations, the provider cannot submit claims to Medicaid or bill the client for vaccines obtained from the Texas Vaccine for Children (TVFC) Program.

**Referto:** Section 4, “THSteps Medical” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)*.

### **4.1.3 After-Hours Care**

After-hours care for FQHCs is defined as care provided on weekends, on federal holidays, or before 8 a.m. and after 5 p.m., Monday through Friday. After-hours care provided by FQHCs does not require a referral.

### **4.1.4 Prior Authorization**

Prior authorization or authorization may be required for FQHC services. Refer to the individual sections referenced in subsection 4.1.2, “Services, Benefits, Limitations, and Prior Authorization” in this handbook.

### **4.1.5 Referral Requirements**

Texas Medicaid fee-for-service limited clients, are allowed to choose any enrolled family planning provider.

## **4.2 Documentation Requirements**

All services require documentation to support the medical necessity of the service rendered. All services provided are subject to retrospective review and recoupment if documentation does not support the service that was submitted for reimbursement.

## **4.3 Claims Filing and Reimbursement**

### **4.3.1 Claims Information**

All services (except for family planning, THSteps medical, THSteps dental, copayments, vision, mental health services, and case management for high-risk pregnant women and infants) provided during an encounter must be submitted for reimbursement using procedure code T1015. All services provided that are incidental to the encounter must be included in the total charge for the encounter and are not billable as a separate encounter. For example, if an office visit was provided at a charge of \$30 and a lab test for \$15, the center would submit a claim to TMHP for procedure code T1015 for \$45 and would be reimbursed at the center’s encounter rate.

All providers of laboratory services must comply with the rules and regulations of CLIA. Providers who do not comply with CLIA are not reimbursed for laboratory services.

**Referto:** Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

To obtain the encounter rate when submitting claims for family planning services that are provided under Title XIX or HTW, FQHCs must use the most appropriate E/M procedure code, or procedure code J7296, J7297, J7298, J7300, and J7301, or J7307 with a family planning diagnosis code. Providers must use procedure code J7296, J7297, J7298, J7300, J7301, or J7307 if the visit is for the insertion of an intrauterine device (IUD) or implantable contraceptive capsule. These procedure codes must be submitted in conjunction with the most appropriate informational procedure codes for services that were rendered. Procedure codes J7296, J7297, J7298, J7300, J7301, and J7307 may be reimbursed in addition to the FQHC encounter payment. When seeking reimbursement for an IUD or implantable contraceptive capsule, providers must submit on the same claim the procedure code for the family planning service provided and the procedure code for the contraceptive device. The contraceptive device is not subject to FQHC limitations. Providers must use modifier U8 when submitting claims for a contraceptive device purchased through the 340B Drug Pricing Program. Providers must use modifier FP only to submit claims for the annual family planning examination.

If an employed physician of an FQHC provides a service in the hospital (e.g., a delivery), the service may be billed using the physician provider number if the terms of the FQHC and physician agreement indicate this occurrence. Physicians must be enrolled in Medicaid separately from the FQHC facility. Physicians are not allowed to bill through their FQHC group number for hospital services. The services will be reimbursed at the physician fee-for-service (FFS) fee schedule rate. The costs that are associated with these physician services must be excluded from the FQHC's cost report and will not be considered during the FQHC cost settlement or encounter rate setting process.

Services rendered in the (inpatient or outpatient) hospital setting are not considered a reimbursable FQHC encounter and are not payable to the FQHC. FQHC services for clients who have only Medicaid must be submitted to TMHP in approved electronic format or on a UB-04 CMS-1450, CMS-1500, or 2017 paper claim form. Providers may purchase UB-04 CMS-1450 or CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a UB-04 CMS-1450 or CMS-1500 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

The ADA Dental Claim Form can be downloaded at [www.ada.org](http://www.ada.org).

The 2017 Claim Form can be found in the Forms section of this manual.

**Referto:** [2017 Claim Form](http://www.tmhp.com) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

“Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Section 12, “Forms” in this handbook.

Claims must be filed as follows:

| Services                                                                     | Claim Form                                                                |
|------------------------------------------------------------------------------|---------------------------------------------------------------------------|
| THSteps medical services                                                     | UB-04 CMS-1450 or CMS-1500 paper claim form or approved electronic format |
| Family planning claims filed by FQHC providers who have contracted with HHSC | 2017 Claim Form or approved electronic format                             |
| Family planning claims filed by FQHC providers not contracted with HHSC      | UB-04 CMS-1450 or 2017 paper claim form or approved electronic format     |

| Services                                                 | Claim Form                                                                        |
|----------------------------------------------------------|-----------------------------------------------------------------------------------|
| THSteps dental services                                  | American Dental Association (ADA) Dental Claim Form or approved electronic format |
| Case Management for Children and Pregnant Women services | UB-04 CMS-1450 or CMS-1500 paper claim form or approved electronic format         |

When filing for a client who has Medicare and Medicaid coverage, providers must file on the same claim form that was filed with Medicare.

Services provided by a health-care professional require one of the following modifiers with procedure code T1015, to designate the health-care professional providing the services: AH, AJ, AM, SA, TD, TE, U1, U2, or U7.

- If more than one health-care professional is seen during the encounter, the modifier must indicate the primary contact. The primary contact is defined as the health-care professional who spends the greatest amount of time with the client during that encounter.
- If the encounter is for antepartum care or postpartum care, the modifier TH must be indicated on the claim in addition to any other appropriate modifier.
- If the antepartum or postpartum care is provided by a CNM, the modifier SA must be indicated on the claim in addition to any other appropriate modifiers.

Use modifier TD or TE for home health services provided in areas with a shortage of home health agencies.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

The *Healthy Texas Women Program Handbook* (*Vol. 2, Provider Handbooks*).

### 4.3.2 Reimbursement

FQHCs are reimbursed provider-specific prospective payment system encounter rates in accordance with 1 TAC §355.8261.

FQHCs are exempt from the mandated rate reductions except for HHSC Family Planning services.

Texas Medicaid implemented mandated rate reductions for certain services. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates/rate-changes](http://www.tmhp.com/resources/rate-and-code-updates/rate-changes).

**Referto:** Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

Subsection 2.3, “Reimbursement Reductions” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

#### 4.3.2.1 Medicare Crossover Claims Pricing

For Medicare Part B cost sharing obligations, all deductible obligations will be reimbursed at 100 percent of the deductible amount owed, even if the cost sharing comparison results in a lower payment. For all other cost sharing obligations (including Medicare Part A, B, and C), the cost sharing comparison is performed according to current guidelines.

For FQHC Medicare crossover claims, Texas Medicaid will reimburse the lesser of the following:

- The coinsurance and full deductible payment.
- The amount remaining after the Medicare payment amount is subtracted from the allowed Medicaid fee or encounter rate for the service. If this amount is less than the deductible, then the full deductible is reimbursed instead.

If the Medicare payment is equal to, or exceeds the Medicaid allowed amount or encounter payment for the service, Texas Medicaid will not make a payment for coinsurance.

The client has no liability for any balance or Medicare coinsurance and deductible related to Medicaid-covered services.

**Referto:** Subsection 2.7, “Medicare Crossover Claim Reimbursement” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*).

#### 4.3.2.2 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals. Providers should refer to the [CMS NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

## 5 Local Health Department

Local Health Department (LHD) providers may be reimbursed for Medicaid services within their scope of practice.

The types of services LHD providers may render include, but are not limited to, the following:

- Dental
- Family planning
- Immunizations
- Laboratory
- Radiology
- Screening and treatment for sexually transmitted infections and infectious diseases
- Vaccines

LHD providers can refer to the applicable static [Fee Schedules](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for a complete list of services that may be reimbursed to LHD providers.

6     **Maternity Service Clinic (MSC)**

MSCs are limited provider clinics that are unrelated to a hospital and that only provide maternity services. An MSC will be reimbursed for antepartum care and/or postpartum care visits only. Hemoglobin, hematocrit and urinalysis procedures are included in the charge for antepartum care and not separately reimbursed. Services other than antepartum and postpartum care visits will be denied.

**Referto:** Section 7, “Maternity Service Clinics (MSC)” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (Vol. 2, *Provider Handbooks*).

7     **Renal Dialysis Facility**

7.1     **Enrollment**

To enroll in Texas Medicaid, a renal dialysis facility must be Medicare-certified in the state where it is located. Facilities must also adhere to the appropriate rules, licensing, and regulations of the state where they operate.

**Referto:** Subsection 1.1, “Provider Enrollment” in “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, *General Information*) for more information.

7.2     **Services, Benefits, Limitations, and Prior Authorization**

Renal dialysis is a benefit of Texas Medicaid for the following acute kidney injury (AKI) or end stage renal disease (ESRD) diagnosis codes:

| Diagnosis Codes |         |      |      |      |      |      |         |
|-----------------|---------|------|------|------|------|------|---------|
| N170            | N171    | N172 | N178 | N179 | N181 | N182 | N1830   |
| N1831           | N1832   | N184 | N185 | N186 | N189 | N990 | T795XXA |
| T795XXD         | T795XXS |      |      |      |      |      |         |

All of the services, except for ultrafiltration (revenue code B-881), are diagnosis-restricted to the diagnoses in the above table.

**Referto:** Subsection 9.2.51, “Organ/Tissue Transplants” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (Vol. 2, *Provider Handbooks*).

Subsection 3.2.5, “Organ and Tissue Transplant Services” in the *Inpatient and Outpatient Hospital Services Handbook* (Vol. 2, *Provider Handbooks*) for information on organ transplant and facility services.

Dialysis treatments are a benefit for clients in an inpatient or outpatient hospital or a renal dialysis facility according to the guidelines for outpatient maintenance dialysis approved through CMS. Dialysis treatments may also be a benefit in the client’s home. Outpatient dialysis includes:

- Staff-assisted dialysis performed by the staff of the center or facility.
- Self-dialysis performed by a client with or without professional assistance (the client must have completed an appropriate course of training).
- Home dialysis performed by an appropriately trained client (and the client’s caregiver) at home.
- Dialysis furnished in a facility on an outpatient basis at an approved renal dialysis facility.

7.2.1 Physician Supervision

Physician reimbursement for supervision of ESRD clients on dialysis is based on a monthly capitation payment (MCP) that is calculated by Medicare. The MCP is a comprehensive payment that covers all of the physician services that are associated with the continuing medical management of a maintenance dialysis client for treatments received in the facility. An original onset date of dialysis treatment must be included on claims for all renal dialysis procedures in all places of service except inpatient hospital.

Physician supervision of outpatient ESRD dialysis includes services that are rendered by the attending physician during the course of an office visit which any of the following occur:

- Routine monitoring of dialysis
- Treatment or follow-up of complications of dialysis, including:
  - Evaluation of related diagnostic tests and procedures
  - Services that are involved in the prescription of therapy for illnesses that are unrelated to renal disease, if the treatment occurs without increasing the number of physician-client contacts

The following physician services are a benefit for physician supervision of outpatient ESRD dialysis services:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 90951           | 90952 | 90953 | 90954 | 90955 | 90956 | 90957 | 90958 | 90959 | 90960 |
| 90961           | 90962 | 90963 | 90964 | 90965 | 90966 | 90967 | 90968 | 90969 | 90970 |

Physician services (procedure codes 90935, 90937, 90945, and 90947) are a benefit for hemodialysis or other dialysis procedures and are restricted to diagnosis codes T795XXA, T795XXD, and T795XXS.

Procedure codes 90935, 90937, 90945, and 90947 are a benefit for:

- ESRD or non-ESRD services in the inpatient setting when the physician is present during dialysis treatment. The physician must be physically present and involved during the course of dialysis procedure. These codes are not payable for a cursory visit by the physician. Hospital visit procedure codes must be used for a cursory visit.
- Non-ESRD services when provided by a physician, nurse practitioner, clinical nurse specialist, or physician assistant in an office or outpatient setting.

Only one of the following procedure codes 90935, 90937, 90945, or 90947 may be reimbursed per day by any provider.

If the physician sees the client only when the client is not dialyzing, the physician must submit the appropriate hospital visit procedure code. The inpatient dialysis procedure code must not be submitted for payment.

Providers must use one of the following procedure codes to submit claims for services when the client:

- Is not on home dialysis.
- Has had a complete assessment visit during the calendar month.
- Has received a full month of ESRD related services

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 90951           | 90952 | 90953 | 90954 | 90955 | 90956 | 90957 | 90958 | 90959 | 90960 |
| 90961           | 90962 |       |       |       |       |       |       |       |       |

When a full calendar month of ESRD-related services are submitted for clients on home dialysis, providers must use procedure code 90963, 90964, 90965, or 90966.

Providers must submit claims with procedure code 90967, 90968, 90969, or 90970 if ESRD-related services are provided for less than a full month, per day, under the following conditions:

- Partial month during which a client who is not on home dialysis received one or more face-to-face visits but did not receive a complete assessment.
- A client who is on home dialysis received less than a full month of services.
- Transient client.
- Client was hospitalized during a month of services before a complete assessment could be performed.
- Dialysis was stopped due to recovery or death of a client.
- Client received a kidney transplant.

Procedure codes 90967, 90968, 90969, and 90970 are limited to one per day by any provider. When submitting claims for these procedure codes, providers must indicate the dates of service on which supervision was provided.

Procedure codes 90967, 90968, 90969, and 90970 will be denied if they are submitted with dates of service in the same calendar month by any provider as the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 90951           | 90952 | 90953 | 90954 | 90955 | 90956 | 90957 | 90958 | 90959 | 90960 |
| 90961           | 90962 | 90963 | 90964 | 90965 | 90966 |       |       |       |       |

Only one of the procedure codes in the previous table will be reimbursed per calendar month by any provider.

The following services may be provided in conjunction with physician supervision of outpatient ESRD dialysis but are considered nonroutine and may be submitted for reimbursement separately.

- Declotting of shunts when performed by the physician.
- Physician services to inpatients.

If one of the following occurs:

- A client is hospitalized during a calendar month of ESRD-related services before a complete assessment is performed.
- The client receives one or more face-to-face assessments, but the timing of inpatient admission prevents the client from receiving a complete assessment.

Then the physician must submit both of the following:

- Procedure code 90967, 90968, 90969, or 90970 for each date of outpatient supervision.
- The appropriate hospital evaluation and management code for individual services provided on the days during which the client was hospitalized.

If a client has a complete assessment in the month during which the client is hospitalized, one of the following procedure codes must be submitted for the month of supervision:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 90951           | 90952 | 90953 | 90954 | 90955 | 90956 | 90957 | 90958 | 90959 | 90960 |
| 90961           | 90962 |       |       |       |       |       |       |       |       |

The appropriate inpatient evaluation and management codes must be reported for procedures provided during the hospitalization.

- Dialysis at an outpatient facility other than the usual dialysis setting for a client of a physician who bills the MCP. The physician must submit procedure code 90967, 90968, 90969, or 90970 for each date on which supervision is provided. The physician may not submit claims for days that the client dialyzed elsewhere.
- Physician services beyond those that are related to the treatment of the client's renal condition that cause the number of physician-client contacts to increase. Physicians may submit claims on a fee-for-service basis if they supply documentation on the claim that the illness is not related to the renal condition and that additional visits are required.

Inpatient services that are provided to a hospitalized client for whom the physician has agreed to submit monthly claims, may be reimbursed in one of the following ways:

- The physician may elect to continue monthly billing, in which case the physician may not bill for individual services that were provided to the hospitalized client.
- The physician may reduce the monthly amount submitted by 1/30th for each day of hospitalization and may charge fees for individual services that were provided on the hospitalized days.
- The physician may submit a claim for inpatient dialysis services using the inpatient dialysis procedure codes. The physician must be present and involved with the client during the course of the dialysis.

Clients may receive dialysis at an outpatient facility other than the client's usual dialysis setting, even if their physician bills for monthly dialysis coordination. The physician must reduce the monthly amount submitted for reimbursement by 1/30th for each day the client is dialyzed elsewhere.

Physician services beyond those related to the treatment of the client's renal condition may be reimbursed on a fee-for-service basis. The physician must provide medical documentation with the claim that identifies how the illness is not related to the renal condition and added visits are required.

Payment is made for physician training services in addition to the MCP for physician supervision rendered to maintenance facility clients.

#### **7.2.1.1      Unscheduled or Emergency Dialysis in a Non-Certified ESRD Facility**

For some medical situations in which ESRD clients cannot obtain their regularly scheduled dialysis treatment at a certified ESRD facility, Texas Medicaid will allow for non-routine dialysis treatments furnished in the outpatient department of a hospital that does not have a certified dialysis facility.

Unscheduled dialysis for clients may be a benefit for one of the following reasons:

- Dialysis was performed following, or in connection with, a vascular access procedure.
- Dialysis was performed following treatment for an unrelated medical emergency (e.g., a client goes to the emergency room and, as a result, misses a regularly scheduled dialysis treatment that cannot be rescheduled).
- Emergency dialysis was performed for clients who would otherwise have to be admitted as inpatient in order for the hospital to receive payment.

Providers must submit claims using procedure code G0257 with revenue code 880 in order to receive payment for unscheduled outpatient dialysis.

Procedure code G0257 will be limited to once per week, same procedure, any provider. Procedure code G0527 will be denied if not submitted with revenue code 880, same day, same claim, same provider.

Procedure code G0257 is limited to diagnosis codes N185 and N186.

Texas Medicaid will provide a single payment to reimburse unscheduled or emergency dialysis treatments furnished to ESRD clients in the outpatient department of a hospital that does not have a certified ESRD facility.

Reimbursement for procedure code G0257 is limited to the same services included in consolidated billing. Providers will not be reimbursed for individual services related to dialysis.

Repeated billing of this service by the same provider for the same clients may indicate routine dialysis treatments are being performed and providers will be subject to recoupment upon medical record review.

Other outpatient hospital services are only reimbursed if they are not related to the dialysis services and are determined to be medically necessary with supporting documentation.

## 7.2.2 Renal Dialysis Facilities - Consolidated Billing

The composite rate includes all necessary equipment, supplies, and services for the client receiving dialysis whether in the home or in a facility. The facility's charge must not include the charge for the physician's routine supervision.

One of the following revenue codes must be billed for the dialysis facility to receive the composite rate payment:

| Revenue Code – Renal Dialysis Composite | Limitations                             |
|-----------------------------------------|-----------------------------------------|
| 821                                     | 3 per week                              |
| 831                                     | 3 per week                              |
| 841                                     | Hemodialysis (HD) – equivalent sessions |
| 851                                     | HD – equivalent sessions                |

The composite rate includes all of the following necessary equipment, supplies, and services for the client receiving dialysis whether in the home or in the facility:

| Procedure Codes – Durable Medical Equipment ESRD Supply |       |       |       |       |       |       |       |
|---------------------------------------------------------|-------|-------|-------|-------|-------|-------|-------|
| 36000                                                   | 36430 | 36591 | 36593 | 49421 | 71045 | 71046 | 71047 |
| 71048                                                   | 93005 | 93040 | 93041 | A4215 | A4216 | A4217 | A4218 |
| A4244                                                   | A4245 | A4246 | A4247 | A4248 | A4450 | A4452 | A4651 |
| A4652                                                   | A4653 | A4657 | A4660 | A4663 | A4670 | A4671 | A4672 |
| A4673                                                   | A4674 | A4680 | A4690 | A4706 | A4707 | A4708 | A4709 |
| A4714                                                   | A4719 | A4720 | A4721 | A4722 | A4723 | A4724 | A4725 |
| A4726                                                   | A4728 | A4730 | A4736 | A4737 | A4740 | A4750 | A4755 |
| A4760                                                   | A4765 | A4766 | A4770 | A4771 | A4772 | A4773 | A4774 |
| A4802                                                   | A4860 | A4870 | A4890 | A4911 | A4913 | A4918 | A4927 |
| A4928                                                   | A4929 | A4930 | A4931 | A4932 | A6204 | A6215 | A6216 |
| A6250                                                   | A6260 | A6402 | E0210 | E0424 | E0431 | E0434 | E0439 |
| E0441                                                   | E0442 | E0443 | E0444 | E0447 | E1500 | E1510 | E1520 |
| E1530                                                   | E1540 | E1550 | 1560  | E1570 | E1575 | E1580 | E1590 |
| E1592                                                   | E1594 | E1600 | E1610 | E1615 | E1620 | E1625 | E1630 |
| E1632                                                   | E1634 | E1635 | E1636 | E1637 | E1639 | E1699 |       |

DME ESRD supply (procedure code E1629) for necessary equipment, supplies, and services for the client receiving dialysis in the home are excluded from the composite rate and will be paid separately.

Laboratory testing may be obtained and processed in the renal dialysis facility or by an outside laboratory. Charges for the following routine laboratory tests are included in the facility's composite rate billed to Medicaid regardless of where tests were processed. Routine laboratory testing processed by an outside laboratory are billed to the facility and billed by the renal dialysis facility unless they are an inclusive test.

| Procedure Codes – Labs Subject to ESRD Consolidated Billing |        |        |        |        |        |        |        |
|-------------------------------------------------------------|--------|--------|--------|--------|--------|--------|--------|
| 80047^                                                      | 80048^ | 80051^ | 80053^ | 80069^ | 80076  | 82040^ | 82108  |
| 82306                                                       | 82310^ | 82330^ | 82374^ | 82379  | 82435^ | 82565^ | 82570^ |
| 82575                                                       | 82607  | 82610  | 82652  | 82668  | 82728  | 82746  | 83540  |
| 83550                                                       | 83735  | 83970  | 84075^ | 84100  | 84132^ | 84134  | 84155^ |
| 84157                                                       | 84295^ | 84466  | 84520^ | 84540  | 84545  | 85014^ | 85018^ |
| 85025^                                                      | 85027  | 85041  | 85044  | 85045  | 85046  | 85048  | 86704  |
| 86705                                                       | 86706  | 87040  | 87070  | 87071  | 87073  | 87075  | 87076  |
| 87077                                                       | 87081  | 87340  | 87341  | 87467  | G0306  | G0307  | G0499  |
| QW^ Modifier                                                |        |        |        |        |        |        |        |

All drugs and biologicals used for the treatment of ESRD or AKI (unless specified otherwise) are included in the composite rate payment and are not paid separately, the following drugs are included:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| A4216           | A4217 | A4802 | J0360 | J0604 | J0606 | J0612 | J0613 | J0616 | J0618 |
| J0620           | J0630 | J0636 | J0670 | J0878 | J0884 | J0887 | J0892 | J0895 | J0899 |
| J0945           | J1160 | J1200 | J1205 | J1240 | J1265 | J1270 | J1443 | J1444 | J1445 |
| J1642           | J1643 | J1644 | J1720 | J1740 | J1750 | J1800 | J1938 | J1945 | J1955 |
| J2150           | J2360 | J2430 | J2501 | J2720 | J2795 | J2993 | J2997 | J3265 | J3364 |
| J3365           | J3373 | J3410 | J3420 | J3480 | J3489 | J7030 | J7040 | J7042 | J7050 |
| J7060           | J7070 | J7120 | J7131 | Q0163 |       |       |       |       |       |

The following drugs used for the treatment of ESRD are excluded from the composite rate and will be paid separately:

| Procedure Codes – Drugs Not Subject to ESRD Consolidated Billing |       |       |       |       |       |       |  |  |  |
|------------------------------------------------------------------|-------|-------|-------|-------|-------|-------|--|--|--|
| J0879                                                            | J0882 | J1439 | J1756 | J2916 | Q4081 | Q5105 |  |  |  |

In addition to the diagnosis codes listed in the table of section 6.2, "Services, Benefits, Limitations, and Prior Authorization," procedure code J0879 is restricted to diagnosis code L2989, and procedure code Q5105 is restricted to diagnosis code D631.

Other drugs and biologicals furnished by an ESRD facility that are not used for the treatment of ESRD may be billed separately.

The ordering physician must maintain documentation in the client's medical record to support medical necessity.

### Maintenance for Hemodialysis, IPD, CAPD, and CCPD

End Stage Renal Disease facilities furnishing dialysis treatments in-facility are paid for up to three treatments per week. ESRD facilities treating patients at home, regardless of modality, receive payment for three hemodialysis equivalent treatments per week.

Maintenance intermittent peritoneal dialysis (IPD) is usually performed in sessions of 10 to 12 hours duration, three times per week. However, it is sometimes performed in fewer sessions of longer duration. If more than three sessions occur in one week, the provider must supply documentation of medical necessity with the claim.

For clients undergoing CAPD or CCPD in the home, the number of days of peritoneal dialysis, regardless of dialysate exchanges performed each day, is converted to hemodialysis-equivalent sessions. This is accomplished by dividing the number of days of peritoneal dialysis by 7 and multiplying the result by 3.

For clients undergoing CAPD or CCPD in the home, the number of days of peritoneal dialysis regardless of dialysate exchange performed each day will be 14 per 31 days.

A combination of HD, IPD, CAPD, and CCPD dialysis treatments are limited to 14 sessions within 31 days for any provider. If more than 14 sessions are needed, the provider must supply documentation of medical necessity with the claim. Documentation can include but is not limited to medical records, physicians' notes, and lab results. Records must clearly show why extra sessions are medically required.

The ordering physician must maintain documentation supporting medical necessity in the client's medical record.

### 7.2.3 Ultrafiltration

A separate ultrafiltration treatment to remove the excess fluid may be covered.

Ultrafiltration is performed on a day other than the day of a dialysis treatment. The dialysis facility must document in the medical record why the ultrafiltration could not have been performed at the time of dialysis treatment. Ultrafiltration performed on the same day as the dialysis treatment, is not separately reimbursed.

Ultrafiltration may be reimbursed using revenue code 881 up to a maximum of 3 times per week.

### 7.2.4 Home Dialysis Items and Services

Texas Medicaid utilizes Medicare's composite rate reimbursement system, consolidated billing. Under this reimbursement system, the dialysis facility must assume responsibility for providing all home dialysis equipment, supplies, and home support services.

One of the following revenue codes must be billed for the dialysis facility to receive the composite rate payment for clients that are treated in the home:

| Revenue Code | Limitations                             |
|--------------|-----------------------------------------|
| 821          | 3 per week                              |
| 831          | 3 per week                              |
| 841          | Hemodialysis (HD) – equivalent sessions |
| 851          | HD – equivalent sessions                |

Support services are included in the composite rate. Support services specifically applicable to home clients include, but are not limited to:

- Periodic monitoring of a client's adaptation to home dialysis and performance of dialysis, including provisions for visits to the home or the facility.
- Visits by trained personnel for the client with a qualified social worker and a qualified dietitian, made in accordance with a plan prepared and periodically reviewed by a professional team, which includes the physician.
- Individual unscheduled visits to a facility made on an as-needed basis; (e.g., assistance with difficult access situations).

- ESRD-related laboratory tests covered under the composite rate.
- Providing, installing, repairing, testing, and maintaining home dialysis equipment, including appropriate water testing and treatment.
- Ordering of supplies on an ongoing basis.
- A record keeping system that assures continuity of care.
- Support services specifically applicable to chronic ambulatory peritoneal dialysis (CAPD) also include, but are not limited to:
  - Changing the connecting tube and administration set.
  - Monitoring the client's performance of CAPD, assuring that it is done correctly, and reviewing proper techniques with the client or informing the client of modifications to apparatus or technique.
  - Documenting whether the client has or has had peritonitis that requires physician intervention or hospitalization (unless there is evidence of peritonitis, a culture for peritonitis is not necessary).
  - Inspecting the catheter site.

Routine laboratory services listed in the table of section 6.2.2, Renal Dialysis - Consolidated Billing are included in the composite rate and are not reimbursed separately.

Equipment and supplies are listed in the table of section 6.2.2, Renal Dialysis - Consolidated Billing are included in the composite rate and are not reimbursed separately.

Installation and repair of home hemodialysis machines are not a benefit of Texas Medicaid. Home modifications for use of medical equipment are not a benefit of Texas Medicaid.

Clients may have a one month reserve of supplies available for use. Renal dialysis services beyond these limitations may be considered for clients who are 20 years of age and younger through the Comprehensive Care Program (CCP) with prior authorization.

### 7.2.5 Facility Revenue Codes

Under consolidated billing, the following services are a benefit for renal dialysis centers:

| Service       | Revenue Code | Description                                                   |
|---------------|--------------|---------------------------------------------------------------|
| Maintenance   | 821          | Hemodialysis (outpatient/home)–composite or other rate        |
|               | 831          | Peritoneal Dialysis (outpatient/home)–composite or other rate |
|               | 841          | CAPD (outpatient/home)–composite or other rate                |
|               | 851          | CCPD (outpatient/home)–composite or other rate                |
| Training      | 829          | Hemodialysis (outpatient/home)–other                          |
|               | 839          | Peritoneal Dialysis (outpatient/home)–other                   |
|               | 849          | CAPD (outpatient/home)–other                                  |
|               | 859          | CCPD (outpatient/home)–other                                  |
| Miscellaneous | 881          | Miscellaneous dialysis–ultrafiltration                        |

Renal dialysis facilities should not use a HCPCS/CPT code when submitting a claim with a revenue code.

The facility charge must not include the charge for the physician's routine supervision.

**7.2.6 Training for Hemodialysis, Intermittent Peritoneal Dialysis (IPD), Continuous Cycle Peritoneal Dialysis (CCPD), and Chronic Ambulatory Peritoneal Dialysis (CAPD)**

Most self-dialysis training for hemodialysis, IPD, CCPD, and CAPD is provided in an outpatient setting. Dialysis training provided in an inpatient setting will be reimbursed at the same rate as the facility’s outpatient training rate.

Reimbursement for hemodialysis, IPD, CCPD, and CAPD training services and supplies provided by the dialysis facility includes personnel services, parenteral items routinely used in dialysis, training manuals and materials, and routine dialysis laboratory tests.

It may be necessary to supplement the patient’s dialysis during CAPD training with intermittent peritoneal dialysis or hemodialysis because the client has not mastered the CAPD technique.

Training is limited to once per day. The composite rate will be denied as part of dialysis training when submitted for the same date of service.

The following revenue codes may be reimbursed for dialysis training:

| Revenue Code | Limitations              |
|--------------|--------------------------|
| 829          | 18 sessions per lifetime |
| 839          | 18 sessions per lifetime |
| 849          | 18 sessions per lifetime |
| 859          | 18 sessions per lifetime |

Revenue codes 829, 839, 849, and 859 are limited to one per day, any procedure, any provider.

**7.2.7 Laboratory and Radiology Services**

All providers of laboratory services must comply with the rules and regulations of CLIA. Providers who do not comply with CLIA will not be reimbursed for laboratory services.

**Referto:** Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

Laboratory and radiology testing may be obtained and processed in the renal dialysis facility or by an outside laboratory. Charges for routine laboratory and radiology tests in tables of section 6.2.2 Renal Dialysis - Consolidated Billing are included in the facility’s composite rate submitted to Texas Medicaid regardless of where tests were processed.

**7.2.7.1 Hematopoietic Injections**

Medicaid reimbursement is allowed for hematopoietic injections that are administered to clients who have anemia that is associated with chronic renal failure.

Providers must submit the client’s most recent dated hemoglobin or hematocrit levels in the comments section of the claim form when billing with procedure code Q4081. Frequency and quantity limitations apply.

**Referto:** The *Outpatient Drug Services Handbook (Vol. 2, Provider Handbooks)* for more information about benefit and limitation criteria.

**7.2.7.2 Blood Transfusions**

Whole blood (procedure codes P9010 and P9011) for transfusions may be reimbursed separately to dialysis facilities when medically indicated for a Medicaid eligible client.

### 7.2.8 Telemedicine and Telehealth Services

Certain telemedicine and telehealth services may be provided for ESRD clients if clinically appropriate and safe, as determined by the provider, and agreed to by the person receiving services. Whenever possible, HHSC encourages face-to-face interactions, such as an in-person visit.

Documentation requirements for a telehealth service are the same as for an in-person visit and must accurately reflect the services rendered. Documentation must identify the means of delivery when provided.

The following ESRD dialysis services are authorized for telemedicine and telehealth delivery using synchronous audiovisual technology:

| Procedure Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| 90951           | 90952 | 90954 | 90955 | 90957 | 90958 | 90960 | 90961 |

Services provided by synchronous audio-visual technology must be billed using modifier 95.

During a Declaration of State of Disaster, the Texas Health and Human Services Commission (HHSC) may issue direction to providers regarding the use of a telemedicine or telehealth services to include the use of a synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein to the extent permitted by Texas law. A Declaration of State of Disaster is when an executive order or proclamation is issued by the governor declaring a state of disaster in accordance with Section 418.014 of the Texas Government Code.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telemedicine and telehealth documentation requirements including requirements for informed consent.

### 7.2.9 Vaccine Services for Renal Dialysis Facilities

The following procedure codes may be reimbursed to renal dialysis facility providers:

| Category                                                    | Procedure Codes                                                                                         |
|-------------------------------------------------------------|---------------------------------------------------------------------------------------------------------|
| COVID-19 vaccine                                            | 91320, 91322                                                                                            |

### 7.2.10 Prior Authorization

Prior authorization is not required for renal dialysis services. Prior authorization must be obtained for transplant-related services provided to clients who are not eligible for Medicare and are eligible only for Medicaid.

## 7.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including renal dialysis services. Renal dialysis services are subject to retrospective review and recoupment if documentation does not support the service submitted for reimbursement. All physicians', renal dialysis centers', and medical suppliers' supporting documentation is subject to retrospective review.

## 7.4 Claims Filing and Reimbursement

### 7.4.1 Claims Information

Renal dialysis facility services must be submitted to TMHP in an approved electronic claims format or on a UB-04 CMS-1450 paper claim form. Providers may purchase UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply them.

When completing a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.6, “UB-04 CMS-1450 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

**Reminder:** *The original onset date must be included on the claim form to prevent claim denial. The original onset date must be the same date entered on Form CMS-2728 sent to the Social Security office.*

### 7.4.2 Reimbursement

Renal dialysis facilities are reimbursed according to composite rates, which are based on the CMS-specified calculations and the Texas Medicaid Reimbursement Methodology (TMRM). Texas Medicaid may reimburse for dialysis services by consolidated billing as defined by CMS.

All required items and services included under the composite rate must be made available by the facility, either directly or under arrangements, for each client.

Texas Medicaid implemented mandated rate reductions for certain services. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates/rate-changes](http://www.tmhp.com/resources/rate-and-code-updates/rate-changes).

**Referto:** Section 2.2, “Fee-for-Service Reimbursement Methodology” for more information about reimbursement.

#### 7.4.2.1 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals. Providers should refer to the [CMS NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

## 7.5 Medicare and Medicaid

Medicaid coverage of a renal dialysis client who may be eligible for Medicare coverage begins with the original onset date of the dialysis treatments and may continue for a period of three months. During this period, Medicare eligibility is reviewed through the Health and Human Services Commission (HHSC). If HHSC determines that the client is Medicare-eligible, Medicaid coverage begins with the original onset date and continues until Medicare coverage begins.

If HHSC determines that the client is not eligible for Medicare, Medicaid coverage of eligible clients begins with the original onset date and continues as long as the dialysis treatments are medically necessary and the client is eligible for Medicaid. The date of onset is the date of the first dialysis treatment and does not change even if the client sees another provider.

Medicare eligibility usually begins after a three-month waiting period has been served. Medicare eligibility begins before the waiting period has expired if the individual receives a transplant or participates in a self-dialysis training program during the waiting period.

### 7.5.1 Facility Providers

Texas Medicaid pays the Medicare coinsurance less 5 percent and full Medicare deductible for Medicare crossover claims that are submitted by nephrology (hemodialysis, renal dialysis) and renal dialysis facility providers.

Texas Medicaid processes ESRD Medicare claims using the Part B Immunosuppressive Drug (Part B-ID) benefit for the reimbursement of immunosuppressive drugs for ESRD Medicare clients who have lost Part A and Part B Medicare coverage.

### 7.5.2 Physician Providers

The five percent reduction does not apply to physician-billed services. Nephrologists that are enrolled in Texas Medicaid as physician providers may be reimbursed according to the current payment guidelines.

**Referto:** Subsection 2.7, “Medicare Crossover Claim Reimbursement” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for additional information about Medicare coinsurance and deductible reimbursement for professional and outpatient services.

## 8 Rural Health Clinic

### 8.1 Enrollment

To enroll in Texas Medicaid and qualify for participation as a Title XIX RHC, RHCs must be enrolled in Medicare. An NPI is issued to the RHC after a certification letter from Medicare is received, stating that the clinic qualifies for Medicaid participation. An RHC can also apply for enrollment as a family planning agency.

All providers of laboratory services must comply with the rules and regulations of CLIA. Providers who do not comply with CLIA are not reimbursed for laboratory services.

#### 8.1.1 Initial Cost Reporting

New RHCs must file a projected cost report within 90 days of their designation as an RHC to establish an initial payment rate. The cost report will contain the RHC’s reasonable costs anticipated to be incurred during the RHC’s first full fiscal year. The projected cost report must contain a minimum of six months of information. The RHC must file a cost report within five months of the end of the RHC’s initial fiscal year. The cost settlement must be completed within six months of the receipt of a cost report. The cost per visit rate established by the cost settlement process shall be the base rate. Any subsequent increases or decreases shall be calculated as provided herein. A new RHC location established by an

existing RHC participating in Texas Medicaid will receive the same effective rate as the RHC establishing the new location. An RHC establishing a new location may request an adjustment to its effective rate as provided herein if its costs have increased as a result of establishing a new location.

Providers must submit initial cost reports to the following address:

Texas Medicaid & Healthcare Partnership  
Medicaid Audit  
PO Box 200345  
Austin, TX 78720-0345

Providers can refer to 1 TAC §355.8101 for more information about reimbursement.

**Referto:** Subsection 1.1, “Provider Enrollment” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information.

Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

## 8.2 Services, Benefits, Limitations, and Prior Authorization

### 8.2.1 Services Rendered by the RHC Facility Provider

General services and copayments are billed using the RHC’s NPI. All other services billed using the RHC’s NPI are processed as informational only.

**Important:** *If an RHC facility provider submits a claim for THSteps and Family Planning services, the services will process as informational only and will not be reimbursed.*

The following services are benefits of Texas Medicaid when provided in an RHC:

- Physician services
- Services and supplies furnished as incidental to physician services
- Services provided by an NP, CNM, LCSW, LMFT, LPC, or a PA’s services
- Services and supplies furnished as incidental to the NP’s or PA’s services
- Visiting nurse services on a part-time or intermittent basis to homebound clients in areas determined to have a shortage of home health agencies (A homebound client is someone who is permanently or temporarily confined to his place of residence, not including a hospital or skilled nursing facility (SNF), because of a medical condition.)

When an RHC bills for visiting nurse services, the written plan of treatment to be used for the visiting nurse must be developed by the RHC supervising physician. It must be approved and ordered by the client’s treating physician if different from the supervising physician. The plan of treatment must be reviewed and approved by the supervising physician of the clinic at least every 60 days.

A *visit* is a face-to-face encounter between an RHC client and a physician, PA, NP, CNM, visiting nurse, or clinical NP. Encounters with more than one health professional and multiple encounters with the same health professional that take place on the same day and at a single location constitute a single visit, except where one or the other of the following conditions exists:

- After the first encounter, the client suffers illness or injury requiring additional diagnosis or treatment.
- The RHC client has a medical visit and an *other* health visit.

An *other* health visit includes, but is not limited to, a face-to-face encounter between an RHC client and an LCSW, LMFT, or LPC.

For freestanding RHCs, all laboratory services provided in the RHC's laboratory are included in the encounter. This includes the basic laboratory tests as well as any other laboratory tests provided in the RHC laboratory. Consequently, there is no separate billing for laboratory services. However, if the RHC laboratory becomes a certified Medicare laboratory with its own supplier number, and enrolls in Medicaid as an independent laboratory, all laboratory tests (except the basic laboratory tests) performed for RHC and non-RHC clients can be billed to Medicaid. The claim must be filed under their independent laboratory NPI and using the appropriate HCPCS codes.

**Referto:** The Medicare website at [www.cms.gov](http://www.cms.gov) for more information about Medicare RHC laboratory requirements.

### 8.2.1.1 Encounter Rates

An encounter rate may be reimbursed to the RHC facility only for the following services:

| General Medical Services (encounter may be reimbursed to the RHC facility only)                                                                                                                                       |  |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| T1015                                                                                                                                                                                                                 |  |
| General medical services must be submitted using one of the appropriate modifiers AJ, AM, SA, TD, TE, U1, U2, or U7. Adult preventative care must be submitted with diagnosis codes Z0000, Z0001, Z01411, and Z01419. |  |

**Note:** If the encounter is for antepartum or postpartum care, use modifier TH in addition to the modifier required to clarify the service that was performed.

### 8.2.1.2 Medicaid Fee-for-Service Reimbursement Rates

The following copayments may be reimbursed to RHC providers billing under their own NPI, and are reimbursed at the Medicaid fee-for-service rate.

| Copayments |       |       |       |  |  |  |  |  |  |
|------------|-------|-------|-------|--|--|--|--|--|--|
| CP001      | CP002 | CP005 | CP006 |  |  |  |  |  |  |

### 8.2.1.3 Freestanding Rural Health Clinic Services

The following services cannot be reimbursed to freestanding RHCs using only the RHC NPI. Use of the RHC NPI for billing these services causes claims to be processed as informational only. Services in any of these categories must be billed using the professional (non-RHC) NPI and the appropriate benefit code:

- THSteps medical checkups, which includes immunizations
- Family planning services (including implantable contraceptive capsules provision, insertion, or removal)

These services must be billed with an AM, SA, or U7 modifier.

Physician supplies are not a benefit of Texas Medicaid. Costs of supplies are included in the reimbursement for office visits. Outpatient hospital services (including emergency room services) and inpatient hospital services provided outside the RHC setting are to be billed using the individual or group physician NPI.

**Exception:** If later in the same day the client suffers an additional illness or injury requiring diagnosis or treatment, the clinic may submit a claim for a second visit.

Freestanding RHCs submit an all-inclusive encounter for services provided. All services provided that are incidental to the encounter, including developmental screening, must be included in the total charge for the encounter. A claim for these services may not be submitted as a separate encounter.

If immunizations are given outside of a THSteps medical checkup, procedure codes given in the THSteps section of this manual should be identified on the claim. These procedure codes are informational only, and are not payable.

All services provided during a freestanding RHC encounter must be submitted using procedure code T1015. The total submitted amount should be the combined charges for all services provided during that encounter.

One of the following modifiers must be reported with procedure code T1015 to designate the health-care professional providing the services: AH, AJ, AM, SA, TD, TE, U1, U2, or U7. If the encounter is for antepartum or postpartum care, use modifier TH in addition to the modifier required to designate the health-care professional providing the service.

**Reminder:** *The primary initial contact is defined as “the health-care professional who spends the greatest amount of time with the client during that encounter.”*

If more than one health-care professional is seen during the encounter, the modifier (if appropriate) must indicate the primary contact. For example, if an NP or a PA performs an antepartum exam, modifiers SA or U7, and TH, must be entered. A maximum of two modifiers may be reported with each encounter.

Providers who render services in an RHC setting for THSteps Medical services or Family Planning services may be reimbursed an encounter rate.

### THSteps Medical Services

RHC facility providers may be reimbursed for THSteps medical services using their RHC NPI with the appropriate benefit code.

If the appropriate benefit code is not included, the service will process as informational only and will not be reimbursed.

| THSteps Medical Services                                                                     |       |       |       |       |       |       |       |       |       |
|----------------------------------------------------------------------------------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 99381                                                                                        | 99382 | 99383 | 99384 | 99385 | 99391 | 99392 | 99393 | 99394 | 99395 |
| THSteps medical services must be billed using one of the following modifiers: AM, SA, or U7. |       |       |       |       |       |       |       |       |       |

### 8.2.1.4 Family Planning Services

RHC facility providers may be reimbursed for family planning services using their RHC NPI with the appropriate benefit code.

If the appropriate benefit code is not included, the service will process as informational only and will not be reimbursed.

Family planning services must be submitted with the most appropriate evaluation and management (E/M) procedure code and the most appropriate family planning diagnosis code:

| Family Planning Services*                                                                                            |       |       |       |       |       |       |       |       |       |
|----------------------------------------------------------------------------------------------------------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 99202                                                                                                                | 99203 | 99204 | 99205 | 99211 | 99212 | 99213 | 99214 | 99215 | J7296 |
| J7297                                                                                                                | J7298 | J7300 | J7301 | J7307 |       |       |       |       |       |
| * Family planning services performed in the RHC setting must be billed with the appropriate modifier: AM, SA, or U7. |       |       |       |       |       |       |       |       |       |

RHC providers may receive an encounter rate when submitting claims with procedure code T1015, in addition to a flat “add on” fee for the Long-Acting Reversible Contraception (LARC) procedure codes listed above.

**Referto:** Subsection 4.1.2, “Services, Benefits, Limitations, and Prior Authorization” in this handbook for the list of family planning diagnosis codes.

Subsection 6.3.5, “Modifiers” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for a definition of modifiers.

Section 9, “Physician” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*).

Section 4, “THSteps Medical” in the *Children’s Services Handbook* (*Vol. 2, Provider Handbooks*).

Section 2, “Medicaid Title XIX Family Planning Services” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook* (*Vol. 2, Provider Handbooks*).

Subsection 8.8.2.2, “HMO Copayments” in “Section 8: Third Party Liability (TPL)” (*Vol. 1, General Information*) for information about HMO copayments.

Subsection 9.2.60.4.2, “Preventive Care Visits” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (*Vol. 2, Provider Handbooks*).

## 8.2.2 Services Rendered by Non-RHC Providers In An RHC Setting

Non-RHC providers (i.e., physicians and non-physician practitioners) submitting claims for THSteps and Family Planning services in the RHC setting must use their own NPI and the appropriate benefit code.

The following services, when rendered in an RHC setting by a non-RHC provider, will process as an encounter and will be reimbursed to the non-RHC provider as an encounter rate equivalent to the host facility:

- THSteps medical services
- Family planning services

Non-RHC providers rendering services in an RHC setting must use the appropriate national place of service (72) in order for claims to process as encounters.

## 8.2.3 Hospital-Based Rural Health Clinic Services

Hospital-based RHCs must use the encounter code T1015. A hospital-based RHC is paid based on an all-inclusive encounter rate. One of the following modifiers must be submitted for general medical services: AH, AJ, AM, SA, TD, TE, U1, U2, or U7.

The following services must be submitted using the National Provider Identifier (NPI) and the appropriate benefit code:

- THSteps medical checkups
- Family planning services (including implantable contraceptive capsules provision, insertion, or removal)
- Immunizations provided in hospital-based RHCs

**Note:** Refer to the tables in the above sections for procedure codes.

These services must be submitted with an AM, SA, or U7 modifier if performed in an RHC setting. Claims are paid under the PPS reimbursement methodology.

Outpatient hospital services (including emergency room services) and inpatient hospital services provided outside the RHC setting are to be submitted using the individual or group physician NPI. Hospital-based RHCs must submit claims for pneumococcal and influenza vaccines as non-RHC services, under their hospital NPI.

### **8.2.3.1 After-Hours Care**

After-hours care for RHCs is defined as care provided on weekends, federal holidays, or before 8 a.m. and after 5 p.m., Monday through Friday.

## **8.3 Prior Authorization**

Prior authorization or authorization is not required for RHC services.

## **8.4 Documentation Requirements**

All services require documentation to support the medical necessity of the service rendered, including RHC services. RHC services are subject to retrospective review and recoupment if documentation does not support the service billed.

### **8.4.1 Record Retention**

Freestanding RHCs must retain their records for a minimum of six years. Hospital-based RHCs must retain their records for a minimum of ten years.

## **8.5 Claims Filing and Reimbursement**

### **8.5.1 Claims Information**

General services and copayments are billed using the RHC's NPI. For all other services, providers must submit claims using their NPI and the appropriate benefit code.

*Referto:* Subsection 9.2, "Services, Benefits, Limitations, and Prior Authorization" in this handbook.

Place of service 72 must be used on all claims when billing for services other than general medical. Benefit code EP1 must be used on claims for THSteps medical services.

Freestanding and hospital-based RHC services must be submitted to TMHP in an approved electronic format or on a UB-04 CMS-1450 paper claim form. Providers may purchase UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply the forms.

When completing a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.

### **8.5.2 Reimbursement**

Freestanding and hospital-based RHCs are reimbursed provider-specific per visit rates calculated in accordance with 1 TAC §355.8101. Texas Medicaid implemented mandated rate reductions for certain services. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates/rate-changes](http://www.tmhp.com/resources/rate-and-code-updates/rate-changes).

#### **8.5.2.1 Medicare Crossover Claims Pricing**

For Medicare Part B cost sharing obligations, all deductible obligations will be reimbursed at 100 percent of the deductible amount owed, even if the cost sharing comparison results in a lower payment. For all other cost sharing obligations (including Medicare Part A, B, and C), the cost sharing comparison is performed according to current guidelines.

For RHC Medicare crossover claims, Texas Medicaid will reimburse the lesser of the following:

- The coinsurance and full deductible payment.
- The amount remaining after the Medicare payment amount is subtracted from the allowed Medicaid fee or encounter rate for the service. If this amount is less than the deductible, then the full deductible is reimbursed instead.

If the Medicare payment is equal to, or exceeds the Medicaid allowed amount or encounter payment for the service, Texas Medicaid will not make a payment for coinsurance.

The client has no liability for any balance or Medicare coinsurance and deductible related to Medicaid-covered services.

**Referto:** Subsection 2.7, “Medicare Crossover Claim Reimbursement” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*).

### 8.5.2.2 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals. Providers should refer to the [CMS NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

## 9 Tuberculosis Services

TB clinics must be enrolled in Texas Medicaid and provide services in accordance with 1 TAC, §354.1371.

### 9.1 Enrollment

To enroll in Texas Medicaid, a TB clinic must be either:

- A public entity operating under an HHSC tax identification number (TB regional clinic)
- A public entity operating under a non-HHSC tax identification number (city/county/local clinic)
- A non-hospital-based entity for private providers
- Approved by the DSHS Infectious Disease Control Unit Tuberculosis Program

Providers of TB-related clinic services must complete a provider application from the TB Services Branch within DSHS. Per Texas DSHS policy, TB clinics must develop and operate under a set of written policies and procedures that specify the criteria for licensed and non-licensed staff to provide services. The policies and procedures must include the following:

- The personnel file requirements for staff who provide directly observed therapy (DOT).
- The training and supervision that are required for outreach workers to be considered qualified to perform the assigned services.
- The written delegation protocol for services that are not performed by a physician, advanced practice registered nurse (APRN), or PA.
- The documentation that is required for all client encounters.

Once approved by DSHS, providers of TB-related clinic services are eligible to enroll using the Provider Enrollment and Management System (PEMS).

Providers must obtain a group or individual NPI through the National Plan and Provider Enumeration System (NPPES). Providers that list additional (satellite) clinics in the TB Services Branch provider application will receive a different NPI for each location from NPPES. TB off-site clinics operating under the jurisdiction of the applying provider must use the assigned group NPI and their performing NPI.

Enrollment as a Medicaid provider is not complete until enrollment has been finalized through PEMS.

The effective date for participation is the date an approved provider application with the TB Services Branch is established.

To receive a TB Services Branch provider application form or provider supplement, send a request to the following address:

Texas Department of State Health Services  
TB/HIV/STD/Viral Hepatitis Unit  
Tuberculosis Services Branch  
Mail Code 1939  
1100 West 49th Street  
PO Box 149347  
Austin, TX 78714-9347

**Referto:** Subsection 1.1, “Provider Enrollment” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information about enrollment procedures related to the TMHP Medicaid enrollment applications.

**9.1.1 Managed Care Program Enrollment**

TB clinics do not need to enroll with the Medicaid managed care health plans. All services provided by TB clinics are submitted to TMHP for all Medicaid clients, including Medicaid managed care clients.

**9.2 Services, Benefits, Limitations, and Prior Authorization**

The level of service provided varies depending on whether the services are delivered by a nonphysician or physician and if medications are prescribed.

**9.2.1 TB-Related Clinic Services**

The following services may be performed by a physician, APRN, or PA in the TB clinic:

| Procedure Codes |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|
| 99202           | 99203 | 99204 | 99205 | 99211 | 99212 | 99213 | 99214 | 99215 |

A physician’s presence is not required to perform procedure code 99211; however, the physician must provide direct supervision by being present in the clinic and immediately available to furnish assistance and direction at the time service is provided.

Before TB treatment can be initiated, an initial screening (procedure code T1023) by an RN, LPN, or LVN, or a new patient physician E/M visit (procedure code 99202, 99203, 99204, or 99205) must be performed. If the treatment is initiated by a nursing screening, a new patient physician E/M visit must be completed within 90 days, or subsequent reimbursement for DOT (procedure code H0033) will be denied.

Following the initial new patient physician E/M visit, an established patient physician E/M visit (procedure code 99212, 99213, 99214, or 99215) must be billed every 90 days throughout the course of treatment, or subsequent reimbursement for DOT (procedure code H0033) will be denied.

Clients with latent TB infection, including those in a high-risk group (children who are 4 years of age and younger, those who are immunocompromised, and clients who are HIV-positive), and those with active TB disease, must be seen by a physician every 90 days throughout the course of treatment.

A physician must evaluate each client with active TB disease or LTBI prior to discharge from TB treatment.

Procedure codes H0033, T1002, T1003, and T1023 may be provided under established clinic protocols.

The initial TB screening (procedure code T1023), performed by an RN, LPN, or LVN includes, but is not limited to the following:

- Brief mental and physical assessment
- Exposure history
- Referral for lab or X-ray per protocol
- Referral for social or other medical services
- Other assessment

Procedure code T1023 may be reimbursed prior to the client being seen by a physician, and no more often than once per 12 months. One RN or LVN/LPN (procedure codes T1023, T1002, and T1003) service may be reimbursed per day, per client, when physician services are not performed.

Subsequent nursing services (Procedure code T1002 and T1003) may be a benefit when not provided the same day as a physician E/M visit.

Reimbursement for DOT services (procedure code H0033) provided in the clinic or other places of service, excluding inpatient hospitals, SNFs, intermediate care facilities (ICFs), outpatient hospitals, independent laboratories, birthing centers, and extended care facilities will be limited to one per day, and a maximum of five per week, per client, throughout the course of treatment.

Procedure codes T1002 and T1003 are limited to a maximum of eight 15-minute units per day, per client.

- Minutes of nursing services cannot be accumulated over multiple days. Minutes of nursing services can only be billed per calendar day.
- If the total number of minutes of nursing services per procedure code is less than 8 minutes for a calendar day, then no unit of service can be billed for that day. The minutes cannot be added to minutes of nursing services from any previous or subsequent days for billing purposes.
- If more than 1 unit of service is billed, every unit except the last must be for the complete 15 minutes, with the last unit being no less than 8 minutes of nursing service.
- Time spent in contact investigations in not reimbursable.

Reimbursement for new client examinations (procedure code 99202, 99203, 99204, and 99205) are limited to new clients who have not received services in the same clinic for a period of three years.

One established E/M service may be reimbursed per day, per client, same provider.

**Referto:** Subsection 9.2.60.1.1, “New and Established Patient Services” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about established patient E/M services.

9.2.2 Ancillary Services

The following ancillary TB services are a benefit of Texas Medicaid:

| Procedure Codes                                                                            |       |         |       |        |       |        |       |       |         |
|--------------------------------------------------------------------------------------------|-------|---------|-------|--------|-------|--------|-------|-------|---------|
| 71045                                                                                      | 71046 | 71047   | 71048 | 81025* | 86580 | 86701^ | 86703 | 89220 | 96365   |
| 96366                                                                                      | 96367 | 96368   | 96374 | 96375  | 99000 | 99001  | J0278 | J1956 | J2020** |
| J2280**                                                                                    | J2804 | J3000** |       |        |       |        |       |       |         |
| * CLIA waived test                                                                         |       |         |       |        |       |        |       |       |         |
| ^ Must be billed with QW modifier                                                          |       |         |       |        |       |        |       |       |         |
| ** Must be billed with KX modifier when oral formulation is not appropriate for the client |       |         |       |        |       |        |       |       |         |

Procedure code 99000 is limited to specimens transported from the office setting.

Procedure code 99001 is limited to specimens transported from any setting except the office.

Certain injectable TB medications (procedure codes J2020, J2280, J2804, and J3000), which also have an oral formulation, must be billed with modifier KX to indicate that the oral formulation is not appropriate for the client.

All drugs for which Medicaid is billed must have been purchased by the TB clinic. In the event that the clinic received the drug at no cost through DSHS or another source, it cannot be billed to Texas Medicaid. All medication claims are subject to retrospective review.

Lab-handling charges (procedure codes 99000 and 99001) is limited to one per day for each client unless specimens are sent to two or more different laboratories. If specimens are sent to two or more different laboratories, the information must be documented on the claim.

Handling or conveyance of a specimen from the patient in the clinic to a laboratory (procedure code 99000) will be reimbursed only when submitted with one of the following professional or nursing services performed on the same date of service. Prior authorization is not required for procedure code 99000 or 99001.

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 99202           | 99203 | 99204 | 99205 | 99211 | 99212 | 99213 | 99214 | 99215 | T1002 |
| T1003*          | T1023 |       |       |       |       |       |       |       |       |

\* Reimbursed for individual or group TB clinics for services rendered in the home or other setting.

Texas Medicaid follows the Medicare categorization of tests for CLIA certificate holders.

**Referto:** The CMS website at [www.cms.gov/CLIA/10\\_Categorization\\_of\\_Tests.asp](https://www.cms.gov/CLIA/10_Categorization_of_Tests.asp) for information about procedure code and modifier QW requirements.

For waived tests, providers must use modifier QW as indicated on the CMS website.

### 9.2.3 Prior Authorization

Prior authorization is not required for TB-related services.

## 9.3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including TB services. TB services are subject to retrospective review and recoupment if documentation does not support the service billed.

## 9.4 Provider Responsibilities

If approved to submit claims as a TB clinic under Texas Medicaid, the provider must adhere to the following requirements:

- Be a facility that is not an administrative, organizational, or financial part of a hospital, but is organized and operated to provide medical care to outpatients.
- Comply with all applicable federal, state, and local laws and regulations.
- Employ or have a contract or formal arrangement with a licensed physician (M.D. or D.O.) who is responsible for providing medical direction and supervision over all services provided to the clinic's clients. To meet this requirement, a physician must see the client at least once every 90 days to prescribe the type of care provided and, if the services are not limited by the prescription, periodically review the need for continued care.

- Adhere to the guidelines issued by HHSC, under the authority of the Texas Health and Safety Code, and ensure that services are consistent with the recommendations of the American Thoracic Society and the Centers for Disease Control and Prevention (CDC). For more information, visit the website at [www.cdc.gov/tb/index.html](http://www.cdc.gov/tb/index.html).
- Maintain complete and accurate medical records of each recipient's care and treatment and accurately document all services provided and the medical necessity for the services.
- Ensure that services provided to each client are commensurate with the client's medical needs based on the client's assessment or evaluation, diagnostic studies, plan of care, and physician direction. These services must be documented in the client's medical records.
- Be enrolled and approved for participation in Texas Medicaid.
- Sign a written provider agreement with HHSC or its designee. By signing the agreement, the provider of TB-related clinic services agrees to comply with the terms of the agreement and all requirements of Texas Medicaid including regulations, rules, handbooks, standards, and guidelines published by HHSC or its designee.
- Submit claims for services covered by Texas Medicaid in the manner and format prescribed by HHSC or its designee.
- Be organized and operated to provide TB-related services, which include, but are not limited to, the covered services as indicated in subsection 9.2, "Services, Benefits, Limitations, and Prior Authorization" in this handbook.
- Not provide services within an SNF, ICF, or intermediate care facility for persons with intellectual disability (ICF-ID)

**Referto:** Subsection 1.1, "Provider Enrollment" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*) for more information.

## 9.5 Claims Filing and Reimbursement

### 9.5.1 Claims Information

TB-related clinic services must use benefit code TB1 on all claims and authorization requests. All TB-related clinic services must be submitted to TMHP in an approved electronic claims format or on a CMS-1500 paper claim form from the vendor of their choice. TMHP does not supply them. When completing a CMS-1500 paper claim form, all required information must be included on the claim, as information is not keyed from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

**Referto:** "Section 3: TMHP Electronic Data Interchange (EDI)" (*Vol. 1, General Information*) for information on electronic claims submissions.

"Section 6: Claims Filing" (*Vol. 1, General Information*).

Subsection 6.5, "CMS-1500 Paper Claim Filing Instructions" in "Section 6: Claims Filing" (*Vol. 1, General Information*) for instructions on completing paper claims. Blocks that are not referenced are not required for processing by TMHP and may be left blank.

#### 9.5.1.1 Managed Care Clients

TB-related services are carved out of the Medicaid Managed Care Program and must be billed to TMHP for payment consideration. Carved-out services are those that are rendered to Medicaid Managed Care clients, but are administered by TMHP and not the client's MCO.

### 9.5.2 Reimbursement

The Medicaid reimbursement rates for TB clinics are calculated in accordance with 1 TAC §355.8085.

X-ray services are reimbursed in accordance with 1 TAC §355.8085 and are listed in the current [physician fee schedule](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com). Texas Medicaid implemented mandated rate reductions for certain services. The Online Fee Lookup (OFL) and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates/rate-changes](http://www.tmhp.com/resources/rate-and-code-updates/rate-changes).

### 9.5.2.1 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the *Texas Medicaid Provider Procedures Manual*. Providers should refer to the [CMS NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

## 10 Claims Resources

Refer to the following sections or forms when filing claims:

| Resource                                                           | Location                                                                                                                                                     |
|--------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|

## 1 General Information

The information in this handbook is intended for Texas Medicaid durable medical equipment (DME) supplier and medical supply company providers. This handbook provides information about the Texas Medicaid benefits, policies, and procedures that are applicable to these providers.

This handbook contains information about Texas Medicaid fee-for-service benefits. For information about managed care benefits, refer to the Texas Medicaid Managed Care Handbook.

Managed care carve-out services are administered as fee-for-service benefits. A list of all carve-out services is available in section 8, “Carve-Out Services” in the *Medicaid Managed Care Handbook* (Vol. 2, *Provider Handbooks*).

All providers are required to report suspected child abuse or neglect as outlined in subsection 1.7.1.2, “Reporting Child Abuse or Neglect” in “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, *General Information*).

**Important:** *All providers are required to read and comply with “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, General Information). In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

**Referto:** “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, *General Information*) for more information about enrollment procedures.

### 1.1 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission

According to the three-day and one-day payment window reimbursement guidelines, most professional and outpatient diagnostic and nondiagnostic services that are rendered within the designated timeframe of an inpatient hospital stay, and are related to the inpatient hospital admission, will not be reimbursed separately from the inpatient hospital stay if the services are rendered by the hospital or an entity that is wholly owned or operated by the hospital.

These reimbursement guidelines do not apply in the following circumstances:

- The professional services are rendered in the inpatient hospital setting.
- The hospital and the physician office or other entity are both owned by a third party, such as a health system.
- The hospital is not the sole or 100-percent owner of the entity.

**Referto:** Subsection 3.7.4.17, “Payment Window Reimbursement Guidelines” in the *Inpatient and Outpatient Hospital Services Handbook* (Vol. 2, *Provider Handbooks*) for additional information about the payment window reimbursement guidelines.

## 2 Texas Medicaid (Title XIX) Home Health Services

### 2.1 Enrollment

All DME providers must be Medicare-certified before applying for enrollment in Texas Medicaid.

Providers that render custom DME wheeled mobility systems to Texas Medicaid clients must enroll in Texas Medicaid as a specialized/custom wheeled mobility group provider and must have at least one qualified rehabilitation professional (QRP) performing provider.

Certified QRP providers must enroll in Texas Medicaid as performing providers under DME provider groups.

To enroll in Texas Medicaid as a QRP performing provider, individual professionals must be certified by the National Registry of Rehabilitation Technology Suppliers (NRRTS) or Rehabilitation Engineering and Assistive Technology Society of North America (RESNA) and must enroll as a performing provider under a Specialized /Custom Wheeled Mobility group.

Providers can use the online Provider Enrollment and Management System (PEMS) tool to enroll electronically through the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Providers may request prior authorization for home health services by contacting:

Texas Medicaid & Healthcare Partnership  
Home Health Services  
PO Box 202977  
Austin, TX 78720-2977  
1-800-925-8957  
Fax: 1-512-514-4209

#### 2.1.1 Pending Agency Certification

DME providers that submit claims before the enrollment process is complete or without prior authorization for services issued by the TMHP Home Health Services Prior Authorization Department will not be reimbursed. The effective date of enrollment is the date on which all Medicaid provider enrollment forms have been received and approved by TMHP.

Upon the receipt of notice of Medicaid enrollment, the supplier must contact the TMHP Home Health Services Prior Authorization Department before rendering to a Medicaid client, services that require a prior authorization number. Prior authorization cannot be issued before Medicaid enrollment has been completed. Regular prior authorization procedures are followed at that time.

Providers must not submit home health services claims for payment until they have received their Medicaid certification and a prior authorization number has been assigned.

**Referto:** Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

#### 2.1.2 Surety Bond Requirements

All newly enrolling and re-enrolling durable medical equipment (DME) providers must, as a condition of enrollment and continued participation into Texas Medicaid, obtain a surety bond that complies with Title 1, Texas Administrative Code (TAC) §352.15.

**Important:** *Surety bonds obtained for the purpose of accreditation in the Medicare program, which lists the Centers for Medicare & Medicaid Services (CMS) as obligee, do not fulfill the surety bond requirement for Texas Medicaid.*

The surety bond submitted to Texas Medicaid must meet the following requirements:

- A bond in an amount of no less than \$50,000 must be provided for each enrolled location.  
***Note:** Only one surety bond is required if the provider has multiple Medicaid DME provider numbers related to the same location. For example, if the provider has an enrollment record for DME and an enrollment record for Specialized Custom Wheeled Mobility all for the same practice location, only one surety bond is required.*
- The bond must be submitted on the [State of Texas Medicaid Provider Surety Bond Form](#). No other form will be accepted. The use of this form designates the Health and Human Services Commission (HHSC) as the sole obligee of the bond. Instructions are included with the form.
- The bond must be issued for a term of 12 months. Bonds for longer or shorter terms are not acceptable.
- The bond must be in effect on the date that the provider enrollment application is submitted to TMHP for consideration. The effective date stated on the bond must be:
  - No later than the date that the provider enrollment application is submitted.
  - No earlier than 12 months before the date that the provider enrollment application is submitted.
- The bond must be a continuous bond. A continuous bond remains in full force and effect from term to term unless the bond is canceled.

**Important:** *An annual bond that specifies effective and expiration dates for the bond, is not acceptable.*

At the time of enrollment or re-enrollment, providers must submit the surety bond form with original signatures and a copy of the Power of Attorney document from the surety company that issued the bond.

***Note:** Surety companies may refer to Texas Department of Insurance (TDI) file #9212562912 or TDI link #132456 when filing the bond.*

### 2.1.2.1 Proof of Continuation

DME providers must maintain a current surety bond to continue participation in Texas Medicaid. Each year, providers must submit documentation that shows proof of continuation of the bond for a new 12-month term. The document may be submitted on the surety bond company's form and must include the following components:

- Bond number
- Principal's name, address, and Tax ID or National Provider Identifier (NPI)
- Surety's company name and address
- Date of the original bond
- New "good through" date

To avoid losing Medicaid enrollment status, providers must submit the proof of continuation to the TMHP Provider Enrollment before the expiration date of the bond that is currently on file. The completed proof of continuation document must include the original signatures of the authorized corporate representative of the DME provider (principal), and the attorney-in-fact of the surety company. Providers may submit a copy of the proof of continuation (i.e., scan, FAX, photocopy) pending the submission of the original document.

### Submission Information

The surety bond can be submitted using the Provider Enrollment and Management System (PEMS).

## 2.2 Services, Benefits, Limitations and Prior Authorization

Home health services include home health skilled nursing (SN), home health aide (HHA), physical therapy (PT) and occupational therapy (OT) services; DME; and expendable medical supplies that are provided to eligible Medicaid clients at their place of residence.

**Referto:** *The Physical Therapy, Occupational Therapy, and Speech Therapy Services Handbook (Vol. 2, Provider Handbooks)* for more information about therapy services.

*The Home Health Nursing and Private Duty Nursing Services Handbook (Vol. 2, Provider Handbooks)* for more information about nursing services.

### 2.2.1 Home Health Services

The benefit period for home health professional services is up to 60 days with a current plan of care (POC). For all DME and medical supplies with or without prior authorization requirements, providers must complete a Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form except as outlined in subsection 2.2.12, “Diabetic Equipment and Supplies” in this handbook. In chronic and stable situations, the Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form is valid for up to, but no more than, 6 months from the date of the physician or allowed practitioner’s signature on the form, unless otherwise noted in this handbook. If necessary, DME and supplies that are ordered on a Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form may be prior authorized for up to 6 months with medical necessity determination. Because Medicaid clients have a one-month eligibility period, providers must bill for a one month supply at a time, even though prior authorization may be granted for up to 6 months. This extended prior authorization period begins on the date that clients receive their first prior-authorized home health service. Texas Medicaid allows additional DME or supplies that have been determined to be medically necessary and have been prior authorized by TMHP Home Health Services Prior Authorization Department. Durable medical equipment providers must retain all orders; copies of completed, signed, and dated Title XIX forms; delivery slips; and corresponding invoices for all supplies provided to a client. Durable medical equipment providers must disclose these records to HHSC or its designee on request. These records and claims must be retained for a minimum of five years from the date of service (DOS) or until audit questions, appeals, hearings, investigations, or court cases are resolved. Use of these services is subject to retrospective review.

#### 2.2.1.1 Client Eligibility

Home health clients do not have to be homebound to qualify for services.

To qualify for home health services, the Medicaid client must be eligible on the DOS and must:

- Have a medical need for home health professional services, DME, or supplies that is documented in the client’s POC and considered a benefit under home health services.
- Receive services that meet the client’s existing medical needs and can be safely provided in the client’s home.
- Receive prior authorization from TMHP for most home health professional services, DME, and medical supplies.

Unless otherwise noted in this handbook, certain DME/supplies may be obtained without prior authorization. Durable medical equipment providers must retain a copy of the completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form that has been reviewed, signed, and dated by the treating physician or allowed practitioner for these clients.

**Referto:** Subsection A.12.3, “Automated Inquiry System (AIS)” in “Appendix A: State, Federal, and TMHP Contact Information” (*Vol. 1, General Information*).

“Section 6: Claims Filing” (*Vol. 1, General Information*) for more information on clients who are 20 years of age and younger.

### **2.2.1.2 Prior Authorization Requests for Clients with Retroactive Eligibility**

Retroactive eligibility occurs when the effective date of a client’s Medicaid coverage is before the date on which the client’s Medicaid eligibility is added to TMHP’s eligibility file, which is called the “add date.”

For clients with retroactive eligibility, prior authorization requests must be submitted after the client’s add date and before a claim is submitted to TMHP.

For services provided to fee-for-service Medicaid clients during the client’s retroactive eligibility period (i.e., the period from the effective date to the add date), prior authorization must be obtained within 95 days of the client’s add date and before a claim for those services is submitted to TMHP. For services provided on or after the client’s add date, the provider must obtain prior authorization within three business days of the date of service.

The provider is responsible and strongly encouraged to verify client eligibility frequently. Eligibility can be verified electronically by checking:

- TexMedConnect.
- The Medicaid Client Portal for Providers.

Additionally, providers can verify eligibility through AIS. To use the AIS, call the TMHP Contact Center at 800-925-9126 and select option 1.

If services are discontinued before the client’s add date, the provider must still obtain prior authorization within 95 days of the add date to be able to submit claims.

**Referto:** “Section 4: Client Eligibility” (*Vol. 1, General Information*).

### **2.2.1.3 Prior Authorization**

Prior authorization must be obtained for some supplies and most DME from TMHP within three business days of the DOS. Although durable medical equipment providers may supply some DME and medical supplies to a client without prior authorization, they must still retain a copy of the Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form that has Section B completed, signed, and dated by the client’s attending physician or allowed practitioner, unless otherwise noted in this handbook.

The following prior authorization requests can be submitted on the TMHP website at [www.tmhp.com](http://www.tmhp.com):

- External Insulin Pump
- Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form
- Home Health Services POC
- Statement for Initial Wound Therapy System In-Home Use
- Statement for Recertification of Wound Therapy System In-Home Use
- Wheelchair/Scooter/Stroller Seating Assessment Form (CCP/Home Health Services) (Attachments will be sent separately due to size and detailed information)

**Referto:** Subsection 5.5.1, “Prior Authorization Requests Through the TMHP Website” in “Section 5: Fee-for-Service Prior Authorizations” (*Vol. 1, General Information*) for more information, including mandatory documentation requirements.

If a client's primary coverage is private insurance and Medicaid is secondary, prior authorization is required for Medicaid reimbursement. If the primary coverage is Medicare, Medicare approves the service, and Medicaid is secondary, prior authorization is not required. TMHP will pay only the coinsurance or deductible according to current payment guidelines. If Medicare denied the service, then Medicaid prior authorization is required. TMHP must receive a prior authorization request within 30 days of the date of Medicare's final disposition. The Medicare Remittance Advice Notice (MRAN) containing Medicare's final disposition must accompany the prior authorization request. If the service is a Medicaid-only service, prior authorization is required within three business days of the DOS.

The provider must contact the TMHP Home Health Services Prior Authorization Department within three business days of the DOS to obtain prior authorization for DME and medical supplies.

If inadequate or incomplete information is provided or medical necessity is lacking, the provider will be asked to furnish any required or additional documentation so that a decision about the request can be made. Because the documentation must often be obtained from the client's physician, providers have two weeks to submit the requested documentation. If the additional documentation is received within the two-week period, prior authorization can be considered for the original date of contact. If the additional documentation is received more than two weeks after the request for the documentation, prior authorization is not considered before the date on which the additional documentation is received. It is the DME supplier's responsibility to contact the physician or allowed practitioner to obtain the requested additional documentation. The physician or allowed practitioner must maintain documentation of medical necessity in the client's record.

TMHP Home Health Services toll-free number is 1-800-925-8957.

**Referto:** Subsection 2.2.2.2, "Prior Authorization" in this handbook for DME prior authorization information.

Subsection 2.3.1, "Medicaid Relationship to Medicare" in this handbook.

Client eligibility for Medicaid is for one month at a time. Providers should verify their client's eligibility every month. Prior authorization does not guarantee payment.

## **2.2.2 Durable Medical Equipment (DME) and Supplies**

Texas Medicaid defines DME as:

*Medical equipment or appliances that are manufactured to withstand repeated use, ordered by a physician or allowed practitioner for use in the home, and required to correct or ameliorate a client's disability, condition, or illness.*

Since there is no single authority, such as a federal agency, that confers the official status of "DME" on any device or product, HHSC retains the right to make such determinations with regard to Texas Medicaid DME benefits. DME provided by Texas Medicaid must either have a well-established history of efficacy, or, in the case of novel or unique equipment, valid peer-reviewed evidence that the equipment corrects or ameliorates a Medicaid-eligible medical condition or functional disability.

**Note:** *An allowed practitioner is an individual licensed in Texas as a physician assistant (PA), a certified nurse practitioner (CNP), or clinical nurse specialist (CNS).*

Requested DME may be a benefit when it meets the Medicaid definition of DME. The majority of DME and expendable supplies are covered home health services. If a service cannot be provided for a client who is 20 years of age or younger through home health services, these services may be covered through CCP if they are determined to be medically necessary.

To be reimbursed as a home health benefit:

- The client must be eligible for home health benefits.
- The criteria listed for the requested equipment or supply must be met.

- The requested equipment or supply must be medically necessary, and Federal Financial Participation (FFP) must be available.
- The client's health status would be compromised without the requested equipment or supply.
- The requested equipment or supplies must be safe for use in the home.
- The client must be seen by a physician or allowed practitioner no more than 6 months prior to the start of service.

For any purchased DME, the DME provider and the client must sign the DME Certification and Receipt Form that is available on the TMHP website at [www.tmhp.com](http://www.tmhp.com) before the claim is submitted for payment. The client's signature on the certification form verifies that the DME is the property of the client. The certification form must include:

- The date that the client received the DME
- The name of the item
- The name of the separate receiver/monitor if applicable
- The printed name of the client or primary caregiver
- The printed name of the provider
- The signature of the client or primary caregiver
- The signature of the provider

The provider must maintain a completed copy of the certification form in the client's record.

The completed, signed, and dated DME Certification and Receipt Form must be submitted to TMHP for claims and appeals for DME that meet or exceed a billed amount of \$2,500.00. The form must also be submitted when multiple items that meet or exceed a total billed amount of \$2,500.00 are billed for the same DOS. The form is required in addition to obtaining prior authorization, when applicable.

If the DME Certification and Receipt Form is not submitted to TMHP, the claim payment or appeal will be reviewed and will be eligible for recoupment. Incomplete forms will be returned to the provider for correction and resubmission.

TMHP will contact clients that received DME that meets or exceeds a billed amount of \$2,500.00 to verify that services were rendered. If the delivery of the equipment cannot be verified by the client, the claim payment will be eligible for recoupment.

A completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form prescribing the DME and/or supplies must be signed and dated by a physician or an allowed practitioner familiar with the client, before requesting prior authorization for all DME equipment and supplies. The completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form must include the procedure codes and quantities for services requested.

The completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form with the original dated signature must be maintained by the prescribing physician or an allowed practitioner in the client's medical record. A copy of the completed, signed, and dated form must be maintained by the DME provider in the client's medical record.

To document the item and date of delivery for all DME that is provided to a client, DME providers must also retain the following documentation:

- All delivery slips
- Corresponding invoices
- The completed, signed, and dated DME Certification and Receipt Form

DME providers must disclose this documentation to HHSC or its designee upon request.

The DME must be used for medical or therapeutic purposes, and supplied through an enrolled DME provider in compliance with the client's POC.

These records and claims must be retained for a minimum of five years from the DOS or until audit questions, appeals, hearings, investigations, or court cases are resolved. Use of these services is subject to retrospective review.

**Note:** *All purchased equipment must be new upon delivery to client. Used equipment may be utilized for lease, but when purchased, must be replaced with new equipment.*

HHSC/TMHP reserves the right to request the Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form or Addendum to Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form at any time.

To complete the prior authorization process by paper, the DME provider must fax or mail the completed form to the Home Health Services Prior Authorization Department. To complete the prior authorization process electronically, the DME provider must submit the prior authorization requirements through any approved electronic methods.

To facilitate the determination of medical necessity and avoid unnecessary denials, the physician or an allowed practitioner must provide correct and complete information, including documentation of medical necessity for the equipment and/or supplies requested and is subject to retrospective review. The physician or allowed practitioner must maintain documentation of medical necessity in the client's medical record. The requesting provider may be asked for additional information to clarify or complete a request for the DME.

DME must meet the following requirements to qualify for reimbursement under Home Health Services:

- The client received the equipment as prescribed by the physician or allowed practitioner.
- The equipment has been properly fitted to the client or meets the client's needs.
- The client, the parent or guardian of the client, or the primary caregiver of the client, has received training and instruction regarding the equipment's proper use and maintenance.

DME must:

Be medically necessary due to illness or injury or to improve the functioning of a body part, as documented by the physician or allowed practitioner in the client's POC or the Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form.

Be prior authorized by the TMHP Home Health Services Prior Authorization Department for rental or purchase of most equipment. Some equipment does not require prior authorization. Prior authorization for equipment rental can be issued for up to six months based on diagnosis and medical necessity. If an extension is needed, requests can be made up to 60 days before the start of the new prior authorization period with a new Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form.

- Meet the client's existing medical and treatment needs.
- Be considered safe for use in the home.
- Be provided through an enrolled DME provider or supplier.

**Note:** *Texas Health Steps (THSteps)-eligible clients who qualify for medically necessary services beyond the limits of this home health benefit will receive those services through CCP.*

DME that has been delivered to the client's home and then found to be inappropriate for the client's condition will not be eligible for an upgrade within the first six months following purchase unless there has been a significant change in the client's condition, as documented by the physician or allowed practitioner familiar with the client. All adjustments and modifications within the first six months after delivery are considered part of the purchase price.

**Note:** *Texas Medicaid fee-for-service requires providers to review for medical necessity of DME every six months. An MCO may approve an initial DME prior authorization request for a period of 6 months, unless otherwise stated, and may authorize an extension of 12 months after the initial 6 months, if medically necessary.*

All DME purchased for a client becomes the Medicaid client's property upon receipt of the item. This property includes equipment delivered which will not be prior authorized or reimbursed in the following instances:

- Equipment delivered to the client before the physician or allowed practitioner signature date on the Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form or Addendum to Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form.
- Equipment delivered more than three business days before obtaining prior authorization from the TMHP Home Health Services Prior Authorization Department and meets the criteria for purchase.

Additional criteria:

- A determination as to whether the equipment will be rented, purchased, replaced, repaired, or modified will be made by HHSC or its designee based on the client's needs, duration of use, and age of the equipment.
- Periodic rental payments are made only for the lesser of either the period of time the equipment is medically necessary, or when the total monthly rental payments equal the reasonable purchase cost for the equipment.
- Purchase is justified when the estimated duration of need multiplied by the rental payments would exceed the reasonable purchase cost of the equipment or it is otherwise more practical to purchase the equipment.
- If a DME/medical supply provider is unable to deliver a prior authorized piece of equipment or supply, the provider should allow the client the option of obtaining the equipment or supplies from another provider.

Items or services are reimbursed at the lesser of:

- The provider's billed charges
- The published fee determined by HHSC
- Manual pricing as determined by HHSC based on one of the following:
  - The manufacturer's suggested retail price (MSRP) less 18 percent
  - The provider's documented invoice cost

If an item is manually priced, providers must submit documentation of one of the following for consideration of purchase or rental with the appropriate procedure codes:

- The MSRP or average wholesale price (AWP), whichever is applicable
- The provider's documented invoice cost

**Note:** *Handwritten alterations (crossing out of information or changing values) of the invoice render the invoice invalid.*

### **2.2.2.1 Modifications, Adjustments, and Repairs**

Modifications are the replacement of components because of changes in the client's condition, not replacement because the component is no longer functioning as designed. All modifications and adjustments within the first six months after delivery are considered part of the purchase price.

Modifications to custom equipment may be prior authorized should a change occur in the client's needs, capabilities, or physical and mental status which cannot be anticipated.

Documentation must include the following:

- All projected changes in the client's mobility needs
- The date of purchase, and serial number of the current equipment
- The cost of purchasing new equipment versus modifying the current equipment

All modifications, adjustments, and repairs to a wheeled mobility system within the first six months after delivery are considered part of the purchase price. An exception is made for the push-rim activated power assist wheelchair (PAPAW) system, which may be considered for prior authorization with a new seating assessment form within the first six months after fitting and delivery.

Adjustments do not require supplies. Adjustments made within the first six months after delivery will not be prior authorized. A maximum of one hour of labor for adjustments may be prior authorized as needed after the first six months following delivery.

Repairs to client-owned equipment may be prior authorized as needed with documentation of medical necessity. Technician fees are considered part of the cost of the repair. Repairs require the replacement of components that are no longer functional. Providers are responsible for maintaining documentation in the client's medical record specifying the repairs and supporting medical necessity.

A DME repair will be considered based on the age of the item and cost to repair it.

A request for repair of DME must include an itemized estimated cost list from the vendor or DME provider of the repairs. Rental equipment may be provided to replace purchased medical equipment for the period of time it will take to make necessary repairs to purchased medical equipment.

Repairs will not be prior authorized in situations where the equipment has been abused or neglected by the client, client's family, or caregiver. Routine maintenance of rental equipment is the provider's responsibility. For clients requiring wheelchair repairs only, the date last seen by a physician or an allowed practitioner does not need to be filled in on the Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form. Rental of a wheeled mobility system during the time of repair should be offered at the time of equipment pick-up, if appropriate.

#### **2.2.2.1.1 Accessories**

Equipment accessories including, but not limited to, pressure support cushions, may be prior authorized with documentation of medical necessity.

### **2.2.2.2 Prior Authorization**

Prior authorization is required for most DME and supplies provided through Home Health Services. These services include accessories, modifications, adjustments, and repairs for the equipment.

Providers must submit a completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form to the TMHP Home Health Services Prior Authorization Department.

Unless otherwise noted in this handbook, a completed Home Health Services (Title XIX) Durable Medical Equipment (DME) or Medical Supplies Prescribing Provider Order Form prescribing the DME or supplies must be signed and dated by a physician or allowed practitioner and by the representative of the DME/Medical Supply provider familiar with the client before requesting prior authorization for all DME equipment and supplies. A current signature and date is valid for no more than 90 days prior to

the date of the requested prior authorization or the initiation of service. The completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form must include the procedure codes and numerical quantities for services requested.

A copy of the completed, signed, and dated Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form must be maintained by the DME provider. The ordering physician or allowed practitioner must maintain the completed, originally signed, and dated Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form in the client's medical record.

To complete the prior authorization process by paper, the provider must fax or mail the completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form to the Home Health Services Prior Authorization Department and retain a copy of the completed, signed, and dated form in the client's medical record at the provider's place of business.

To complete the prior authorization process electronically, the provider must submit the prior authorization requirements through any approved electronic methods and retain a copy of the completed, signed, and dated Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form in the client's medical record at the provider's place of business.

**Note:** *Texas Medicaid fee-for-service requires providers to review for medical necessity of DME every six months. An MCO may approve an initial DME prior authorization request for a period of 6 months, unless otherwise stated, and may authorize an extension of 12 months after the initial 6 months, if medically necessary.*

Retrospective review may be performed to ensure that the documentation included in the client's medical record supports the medical necessity of the requested services.

The date last seen by the physician or an allowed practitioner must be within the past six months. The physician or allowed practitioner's signature on the Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form is only valid for 90 days before the initiation of services. The requesting provider may be asked for additional information to clarify or complete the request.

Providers must obtain prior authorization within three business days of providing the service by calling the TMHP Home Health Services Prior Authorization Department or faxing the Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form.

To facilitate a determination of medical necessity and avoid unnecessary denials when requesting prior authorization, the physician or allowed practitioner must provide correct and complete information supporting the medical necessity of the equipment or supplies requested and is subject to retrospective review, including:

- Accurate diagnostic information pertaining to the underlying diagnosis or condition as well as any other medical diagnoses or conditions, to include the client's overall health status.
- Diagnosis or condition causing the impairment resulting in a need for the equipment or supplies requested.

Purchased DME is anticipated to last a minimum of five years, unless otherwise noted, and may be considered for replacement when the time has passed or the equipment is no longer functional or repairable. A copy of the police or fire report, when appropriate, and the measures to be taken to prevent reoccurrence must be submitted.

Prior authorization for equipment replacement is considered within five years of equipment purchase when one of the following occurs:

- There has been a significant change in the client's condition such that the current equipment no longer meets the client's needs.
- The equipment is no longer functional and either cannot be repaired or it is not cost-effective to repair.

Replacement of equipment is also considered when loss or irreparable damage has occurred. The following must be submitted with the prior authorization request:

- A copy of the police or fire report, when appropriate
- A statement about the measures to be taken in order to prevent reoccurrence

Payment may be prior authorized for repair of purchased DME. Maintenance of rental equipment (including repairs) is the supplier's responsibility. The toll-free number for the TMHP Home Health Services Prior Authorization Department is 1-800-925-8957. Requests for repairs must include the cost estimate, reasons for repairs, age of equipment, and serial number.

### **2.2.3 Home Health DME and Supplies Exceptional Circumstances Provision**

The Home Health Durable Medical Equipment (DME) and Supplies Exceptional Circumstances provision is made available in accordance with Title 42 Code of Federal Regulations (CFR) §440.70 and Title 1 Texas Administrative Code (TAC) §354.1039. Under the Exceptional Circumstances provision, Texas Medicaid is obligated to consider coverage of medically necessary DME and supplies that are not currently listed as benefits of Texas Medicaid for clients who are 21 years of age or older.

#### **2.2.3.1 Prior Authorization Requests for Home Health DME and Supplies under the Exceptional Circumstances Provision**

All Exceptional Circumstances DME and supplies must be prior authorized. The Home Health DME and Supplies Exceptional Circumstances provision is not an available process to pursue for clients who receive prior authorization denials for medical necessity or technical reasons (e.g., missing essential fields, incomplete documentation). Clients that have been denied prior authorization under these circumstances may appeal the decision through the regular fair hearing process.

To request prior authorization for home health DME and supplies under the Exceptional Circumstances provision, providers must submit a written notice to TMHP. The written notice must include:

- Completed copies of all of the necessary forms for the requested home health DME or supplies, such as the Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form, Special Medical Prior Authorization (SMPA) Request Form, Prior Authorization Request for Oxygen Therapy Devices and Supplies, Wound Care Equipment and Supplies Order Form etc. The forms must be signed and dated by the prescribing physician or allowed practitioner along with a cover letter indicating the forms are being submitted under the Home Health DME and Supplies Exceptional Circumstances provision.
- The client's specific diagnosis, medical needs and the reasons why they can only be met by the requested home health DME or supply.
- A clear, concise description of the requested DME or supply.
- The manufacturer's suggested retail price (MSRP) for the requested DME or supply or an invoice documenting the provider's cost.
- Letters of Medical Necessity (LOMN) from the client's prescribing physician or allowed practitioner and other clinical professionals, as appropriate, documenting the alternative measures and alternative DME or supplies that have been tried and have failed to meet the client's medical needs, or have been ruled out and an explanation of why they have failed or have been ruled out.

**Important:** *TMHP may request additional supporting documentation after reviewing the initial request.*

#### **2.2.3.2 Reimbursement and Billing**

TMHP will only consider reimbursement for home health DME and supplies under the Exceptional Circumstances provision if:

- Providers request DME and supplies using the most appropriate procedure code available.

- TMHP approves the prior authorization request.

## **2.2.4 Medical Supplies**

Medical supplies are benefits of the Home Health Services Program if they meet the following criteria:

- Unless otherwise noted in this handbook, the representative of the DME/medical supply provider and a physician or allowed practitioner who is familiar with the client must sign and date a completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form that prescribes the DME or supplies before requesting prior authorization for the DME or supplies. A current signature and date is valid for no more than 90 days prior to the date of the requested prior authorization or the initiation of service. The completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form must include the procedure codes and numerical quantities for the services requested.
- The provider must contact TMHP within three business days of providing the supplies to the client and obtain prior authorization, if required.
- The durable medical equipment provider must keep all completed copies of the Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Forms and Addendum to Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Forms on file. The ordering physician or allowed practitioner must maintain copies of the completed, originally signed, and dated Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form and Addendum to Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Forms in their records.
- Providers must retain individual delivery slips or invoices for each DOS that documents the date of delivery for all supplies provided to a client and must disclose them to HHSC or its designee upon request. Documentation of delivery must include one of the following:
  - Delivery slip or corresponding invoice signed and dated by client or caregiver, or
  - A dated carrier tracking document with shipping date and delivery date as confirmation that the supplies were shipped and delivered. The dated carrier tracking document must be attached to the delivery slip or corresponding invoice.
  - If using a third-party distributor, delivery confirmation from the third-party distributor and corresponding tracking number from the third-party distributor's carrier.
- The dated delivery slip or invoice must include the client's full name, the address to which supplies were delivered, and an itemized list of goods that includes the descriptions and numerical quantities of the supplies delivered to the client and the corresponding tracking number from the carrier. This document could also include prices, shipping weights, shipping charges, or other descriptions.
- All claims submitted for medical supplies must include the same quantities or units that are documented on the delivery slip or corresponding invoice and on the Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form. They must reflect the number of units by which each product is measured. For example, diapers are measured as individual units. If one package of 300 diapers is delivered, the delivery slip or corresponding invoice and the claim must reflect that 300 diapers were delivered and not that one package was delivered. Diaper wipes are measured as boxes or packages. If one box of 200 wipes is delivered, the delivery slip or invoice and the claim must reflect that one box was delivered and not that 200 individual wipes were delivered. There must be one dated delivery slip or invoice for each claim submitted for each client. All claims submitted for medical supplies must reflect either one business day before or one business day after the date of service as documented on the delivery slip or corresponding invoice and the

same time frame covered by the Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form. The DME Certification and Receipt Form is still required for all equipment delivered.

**Note:** *These records and claims must be retained for a minimum of five years from the DOS or until audit questions, appeals, hearings, investigations, or court cases are resolved. Use of these services is subject to retrospective review.*

- The ordering physician or allowed practitioner must document medical supplies as medically necessary in the client's POC or on a completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form and Addendum to Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form.

HHSC/TMHP reserves the right to request the signed and dated Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form or Addendum to Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form at any time.

**Note:** *Client eligibility can change monthly. Providers are responsible for verifying eligibility before providing supplies.*

The DOS is the date on which supplies are delivered to the client or shipped by a carrier to the client as evidenced by the dated tracking document attached to the invoice for that date. The provider must maintain the signed and dated records supporting documentation that an item was not billed before delivery. These records are subject to retrospective review.

**Referto:** [Home Health Services \(Title XIX\) DME/Medical Supplies Prescribing Provider Order Form](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

[Home Health Services \(Title XIX\) DME/Medical Supplies Prescribing Provider Order Form Instructions](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Subsection 2.8, “Durable Medical Equipment (DME) Supplier (CCP)” in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* for specific information about certain DME and medical supplies.

Subsection 2.2.1.1, “Client Eligibility” in this handbook.

#### **2.2.4.1 Supply Procedure Codes**

When submitting supplies on the CMS-1500 claim form, itemize the supplies, including quantities, and also provide the Healthcare Common Procedure Coding System (HCPCS) national procedure codes.

**Referto:** Subsection 6.3.3, “Procedure Coding” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for more information about HCPCS procedure codes.

#### **2.2.4.2 Prior Authorization**

TMHP must prior authorize most medical supplies. They must be used for medical or therapeutic purposes, and supplied through an enrolled DME provider in compliance with the client's POC.

Some medical supplies may be obtained without prior authorization; however, the provider must retain a copy of the completed POC or Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form in the client's file. Unless otherwise noted in this handbook, a completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form for medical supplies not requiring prior authorization may be valid for a maximum of six months, unless the physician or allowed practitioner indicates the duration of need is less. If the physician or allowed practitioner indicates the duration of need is less than six months, then a new Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form is required at the end of the determined duration of need.

For a list of DME/medical supplies that do not require prior authorization, providers can refer to subsection 2.2.30, “Procedure Codes That Do Not Require Prior Authorization” in this handbook.

Clients with ongoing needs may receive up to six months of prior authorizations for some expendable medical supplies under Home Health Services when requested on a Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form. Providers may deliver medical supplies as ordered on a Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form for up to six months from the date of the physician or allowed practitioner’s signature. In these instances, a review of the supplies requested by the physician or allowed practitioner familiar with the client’s condition, and a new Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form is required for each new prior authorization request. Requests for prior authorization can be made up to 60 days before the start of the new prior authorization period. Professional Home Health Services prior authorization requests require a review by the physician or allowed practitioner familiar with the client’s condition and a physician or allowed practitioner signature every 60 days when requested on a POC.

**Note:** *These records and claims must be retained for a minimum of five years from the DOS or until audit questions, appeals, hearings, investigations, or court cases are resolved. Use of these services is subject to retrospective review.*

**Note:** *Texas Medicaid fee-for-service requires providers to review for medical necessity of DME every six months. An MCO may approve an initial DME prior authorization request for a period of 6 months, unless otherwise stated, and may authorize an extension of 12 months after the initial 6 months, if medically necessary.*

#### **2.2.4.3 Cancelling a Prior Authorization**

The client has the right to choose his DME/medical supply provider and change providers. If the client changes providers, TMHP must receive a change of provider letter with a new Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form. The client must sign and date the letter, which must include the name of the previous provider and the effective date for the change. The client is responsible for notifying the original provider of the change and the effective date. Prior authorization for the new provider can only be issued up to three business days before the date TMHP receives the change of provider letter and the new Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form.

#### **2.2.5 Augmentative Communication Device (ACD) System**

An ACD system, also known as an augmentative and alternative communication (AAC) device system, allows a client with an expressive speech language disorder to electronically represent vocabulary and express thoughts or ideas in order to meet the client’s functional speech needs.

Digitized speech devices and synthesized speech devices are benefits of Texas Medicaid Title XIX Home Health Services.

A digitized speech device, sometimes referred to as a “whole message” speech output device, uses words or phrases that have been recorded by someone other than the ACD system user for playback upon command by the ACD system user.

Providers must use procedure codes E2500, E2502, E2504, and E2506 when billing for a digitized speech device.

A synthesized speech device uses technology that translates a user’s input into device-generated speech using algorithms representing linguistic rules. Users of synthesized speech ACD systems are not limited to prerecorded messages, but can independently create messages as their communication needs dictate. Some synthesized speech devices require the user to make physical contact with a keyboard, touch screen, or other display containing letters.

Providers must use procedure code E2508 when billing for a synthesized speech device.

Other synthesized devices allow for multiple methods of message formulation and multiple methods of device access. Multiple methods of message formulation must include message selection by two or more of the following methods:

- Letters
- Words
- Pictures
- Symbols

Multiple methods of access must include the capability to access the device by direct physical contact with a keyboard or touch screen and one or more of the following indirect selection techniques:

- Joystick/switches
- Head mouse
- Optical head pointer
- Light pointer
- Infrared pointer
- Scanning device
- Morse code

**Note:** ACD systems that do not meet the criteria through Title XIX Home Health Services may be considered for clients who are birth through 20 years of age under CCP.

Providers must use procedure code E2510 when billing for other synthesized speech devices.

Items included in the reimbursement for an ACD system and not reimbursed separately include, but are not limited to, the following:

- ACD
- Basic, essential software (except for software purchased specifically to enable a client-owned computer or personal digital assistant [PDA] to function as an ACD system)
- Batteries
- Battery charger
- Power supplies
- Interface cables
- Interconnects
- Sensors
- Moisture guard
- Alternating current (A/C) or other adapters
- Adequate memory to allow for system expansion within a three-year timeframe
- All basic operational training necessary to instruct the client and family/caregivers in the use of the ACD system
- Manufacturer's warranty

### **2.2.5.1 ACD System Accessories**

Accessories are a benefit of Texas Medicaid if the criteria for ACD system prior authorization are met and the medical necessity for each accessory is clearly documented in the speech language pathologist (SLP) evaluation.

All accessories necessary for proper use of an ACD system, including those necessary for the potential growth and expansion of the ACD system (such as a memory card), must be included in the initial prescription/Title XIX form. The following accessories for an ACD system may be covered:

- Access devices for an ACD system include, but are not limited to, devices that enable selection of letters, words, or symbols by direct or indirect selection techniques such as optical head pointers, joysticks, and ACD scanning devices.
- Gross motor access devices, such as switches and buttons, may be considered for clients with poor fine motor and head control.
- Fine motor, head control access devices, such as laser or infrared pointers, may be considered for clients with poor hand control and good head control.

Mounting systems are devices necessary to place the ACD system, switches and other access devices within the reach of the client. Mounting devices may be considered for reimbursement when used to attach an ACD system or access device to a wheelchair or table.

A request for prior authorization of a wheelchair mounting device must include the manufacturer name, model, and purchase date of the wheelchair. One additional mounting device, separate from the one included in the system, may be considered for prior authorization for the same client.

Providers must use procedure codes E2512 and E2599 when billing for ACD system accessories.

#### **2.2.5.1.1 Carrying Case**

Carrying cases may be considered for separate reimbursement with supporting documentation of medical necessity.

Providers must use procedure code E2599 and modifier U1 when billing for the carrying case. Carrying cases are limited to one every three years.

Carrying cases may be considered for prior authorization. The prior authorization request must include the make, model, and purchase date of the ACD system.

#### **2.2.5.1.2 Non-warranty Repairs**

Non-warranty repairs of an ACD system may be considered for prior authorization using procedure code V5336 with documentation from the manufacturer explaining why the repair is not covered by the warranty.

#### **2.2.5.1.3 Trial Period**

In order to ensure the client's needs are met in the most cost effective manner and to ascertain the most appropriate system and access device for the client, the ACD system is prior authorized for purchase only after the client has completed a three-month trial period that includes experience with the requested system.

The ACD system for the trial period may be obtained through the rental, the school setting, or another setting determined by the licensed SLP.

In the situation where an ACD system is not available for rental and the client has recent documented experience with the requested ACD system, purchase can be considered.

A trial period is not required when replacing an existing ACD system, unless the client's needs have changed and another ACD system or access device is being considered.

#### 2.2.5.1.4 Rental

Prior authorization may be provided for rental during this trial period. All components necessary for use of the device, such as access devices, mounting devices, and lap trays, must be evaluated during this trial period.

#### 2.2.5.1.5 Purchase

Purchase of an ACD system may be considered for prior authorization when all of the following ACD system criteria are met:

- The evaluation/re-evaluation includes documentation that the client has had sufficient experience with the requested ACD system through trial, rental, school, or another setting. When the SLP has confirmed the appropriateness of a specific device for the client, the trial/rental period may be cancelled.
- A Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form listing the prescribed ACD system, access device, and accessories (such as a mounting device) must be completed, signed, and dated by the physician or allowed practitioner.

ACD systems, equipment, and accessories that have been purchased are anticipated to last a minimum of three years.

#### 2.2.5.1.6 Replacement

Prior authorization for replacement may be considered within three years of purchase when one of the following occurs:

- There has been a significant change in the client's condition such that the current device no longer meets his or her communication needs.
- The ACD system is no longer functional and either cannot be repaired or it is not cost effective to repair.
- Three years have passed and the equipment is no longer repairable.

**Note:** *Replacements for clients who are birth through 20 years of age that do not meet the criteria above may be considered through CCP.*

#### 2.2.5.1.7 Software

Computer software that enables a client's computer or PDA to function as an ACD system may be covered as an ACD system. Providers must use procedure code E2511 when billing for a speech generating software. Requests for ACD software may be considered for prior authorization if the software is more cost effective than an ACD system.

If an ACD system is more cost effective than adapting the client's computer or PDA, an ACD system may be prior authorized instead of the ACD software.

Laptop or desktop computers, PDAs, or other devices that are not dedicated ACD systems are not a benefit of Texas Medicaid, because they do not meet the definition of DME.

### 2.2.5.2 Non-Covered ACD System Items

Noncovered items that are not necessary to operate the system and are unrelated to the ACD system or software components are not benefits of Texas Medicaid. These items include, but are not limited to:

- Printer
- Wireless Internet access devices

Specialized evaluations required for the provision of new complex rehabilitation technology, such as augmentative communication devices, require physical in-person presence of the rendering provider.

**Note:** *For clients who are 21 years of age or older, requests for ACD systems that do not meet the criteria through Title XIX Home Health Services may be considered under the Texas Medicaid Home Health—Durable Medical Equipment (DME) Exceptional Circumstances process.*

### 2.2.5.3 Prior Authorization

Prior authorization is required for ACD systems provided through Home Health Services. The prior authorization also includes all related accessories and supplies. The physician or allowed practitioner must provide information supporting the medical necessity of the equipment or supplies requested, including:

- Accurate diagnostic information pertaining to the underlying diagnosis or condition and any other medical diagnoses or conditions, including the client's overall physical and cognitive limitations.
- Diagnosis or condition causing the impairment of speech.

Prior authorization for an ACD system and accessories (rental or purchase) must be requested using the following information:

- Medical diagnosis and how it relates to the client's communication needs.
- Any significant medical information pertinent to ACD system use.
- Limitations of the client's current communication abilities, systems, and devices.
- Statement as to why the prescribed ACD system is the most effective, including a comparison of benefits using other alternatives.
- Complete description of the ACD system with all accessories, components, mounting devices, or modifications necessary for client use (must include manufacturer's name, model number, and retail price).
- Documentation that the client is mentally, emotionally, and physically capable of operating the device.
- An evaluation and assessment must be conducted by a licensed SLP in conjunction with other disciplines, such as physical or occupational therapies. The prescribing provider must base the prescription on the professional evaluation and assessment.

The prior authorization request must include the specifications for the ACD system, all component accessories necessary for the proper use of the ACD, and all necessary therapies or training. It is recommended that the preliminary evaluation for an ACD system include the involvement of an occupational therapist or physical therapist to address the client's seating/postural needs and the motor skills required to utilize the ACD system.

The prescribing provider familiar with the client must review the SLP evaluation of the client's cognitive and language abilities and base the prescription and treatment plan on the SLP's recommendations.

An evaluation and assessment by a licensed SLP must be signed and dated before the date on the physician or allowed practitioner's prescription or the Title XIX form and include the following information:

- Documentation of medical necessity for an ACD system, including a formal written evaluation performed by a licensed SLP.
- Medical status or condition and medical diagnoses underlying the client's expressive speech-language disorder that justifies the need for an ACD system.

- Current expressive speech-language disorder, including the type, severity, anticipated course, and present language skills.
- Description of the practical limitations of the client's current aided and unaided modes of communication.
- Other forms of therapy or intervention that have been considered and ruled out.
- Rationale for the recommended ACD system and each accessory, including a statement as to why the recommended device is the most appropriate and least costly alternative for the client and how the recommended system will benefit the client.
- Documentation that the client possesses the cognitive and physical abilities to use the recommended system.
- Comprehensive description of how the ACD system will be integrated into the client's everyday life, including home, school, or work.
- Treatment plan that includes training in the basic operation of the recommended ACD system necessary to ensure optimal use by the client (if appropriate, the client's caregiver) and a therapy schedule for the client to gain proficiency in using the ACD system.
- Description of the client's speech-language goals and how the recommended ACD system will assist the client in achieving these goals.
- Description of the anticipated changes, modifications, or upgrades with projected time frames of the ACD system necessary to meet the client's short- and long-term speech-language needs.
- Identification of the assistance or support needed by, and available to, the client to use and maintain the ACD system.
- Statement that the licensed SLP is financially independent of the ACD system manufacturer/vendor.
- Speech- and language- skills assessment that includes the prognosis for speech or written communication.
- Interactional/behavioral and social abilities.
- Capabilities, including intellectual, postural, sensory (visual and auditory), and physical status.
- Motivation to communicate.
- Residential, vocational, and educational setting.
- Alternative ACD system considered with comparison of capabilities.
- Ability to meet projected communication needs, growth potential, and length of time it will meet the client's needs.

### 2.2.6 Bath and Bathroom Equipment

Bath and bathroom equipment is DME that is included in a treatment protocol, serves as a therapeutic agent for life and health maintenance, and is required to treat an identified medical condition. Bath and bathroom equipment may be considered for reimbursement for those clients who have physical limitations that do not allow for bathing, showering, or bathroom use without assistive equipment.

Bath seats are not considered for clients who are younger than 1 year of age or weighing less than 30 pounds.

**Note:** *For clients who are 21 years of age or older, requests for bath and bathroom equipment that do not meet the criteria through Title XIX Home Health Services may be considered under the Texas Medicaid Home Health—Durable Medical Equipment (DME) Exceptional Circumstances process.*

Rental of equipment includes all necessary supplies, adjustments, repairs, and replacement parts.

### **2.2.6.1 Hand-Held Shower Wand**

A hand-held shower wand with attachments may be considered for prior authorization only if the client currently owns or meets the criteria for a bath or shower chair, tub stool or bench, or tub transfer bench. Prior authorization of a hand-held shower wand includes all attachments and accessories. Providers must use procedure code E1399 when billing for a hand-held shower wand. Hand-held shower wands with attachments are limited to one every five years.

### **2.2.6.2 Bath Equipment**

#### **2.2.6.2.1 Bath or Shower Chairs, Tub Stool or Bench, Tub Transfer Bench**

A bath or shower chair is a stationary or mobile seat with or without upper body or head support used to support a client who is unable to stand or sit independently in the shower or tub.

Bath/shower chairs are grouped into three levels of design to assist the client based on their physical condition and mobility status:

- Level 1 - standard bath or shower chair is defined as stationary equipment.
- Level 2 - intermediate bath or shower chair is defined as mobile equipment with or without a commode cut out.
- Level 3 - complex bath or shower chair is defined as custom equipment (either stationary or mobile) with or without a commode cut out.

A tub stool or bench is a stationary seat or bench used to support a client who is unable to stand or sit independently in the shower or tub.

A tub transfer bench is a stationary bench that sits in the tub and extends outside the tub. It is used to support a client who is unable to stand or sit independently in the shower or tub and allows the client to scoot or slide over the side of the tub.

Bath or shower chairs, tub stools or benches, and tub transfers are limited to one every five years.

A custom bath or shower chair may be considered for prior authorization only if the client does not also have any type of commode chair.

#### **Level 1 Group**

A Level 1 device may be considered if the client:

- Is either unable to stand independently or is unstable while standing, or
- Is unable to independently enter or exit the shower or tub due to limited functional use of the upper or lower extremities, and
- Maintains the ability to ambulate short distances (with or without assistive device), or
- Has a condition that is defined as a short-term disability without a concomitant long-term disability (including, but not limited to postoperative status).

Providers must use procedure code E0240 without a modifier when billing for Level 1 group bath or shower chairs.

#### **Level 2 Group**

A Level 2 device may be considered if the client:

- Has good upper body stability, and
- Has impaired functional ambulation, including, but not limited to, lower body paralysis, osteoarthritis, or

- Is nonambulatory.

The client must have a shower that is adapted for rolling equipment; ramps will not be prior authorized for access to showers.

Providers must use procedure code E0240 and modifier TF (Intermediate Level) when billing for Level 2 group bath or shower chairs.

### **Level 3 Group**

A Level 3 device may be considered if the client requires:

- Trunk or head or neck support, or
- Positioning to accommodate conditions, including, but not limited to, spasticity, or frequent and uncontrolled seizures.

Providers must use procedure code E0240 and modifier TG (Complex/high Level) when billing for Level 3 group bath/shower chairs.

A bath or shower chair may be prior authorized for clients who meet the Level 1, 2, or 3 criteria. A Level 3 custom bath or shower chair may be prior authorized only if the client does not also have any type of commode chair. A Level 3 mobile bath or shower chair may be considered for clients who have a shower that is adapted for rolling equipment; ramps will not be prior authorized for access to showers.

A tub stool or bench may be prior authorized for clients who meet the Level 1 criteria. Providers must use procedure code E0245 when billing for a tub stool or bench.

A tub transfer bench may be considered for clients who meet the Level 1 or 2 criteria. Providers must use procedure code E0247 when billing for a tub transfer bench.

A heavy duty tub transfer bench may be considered for clients who meet the Level 1 or 2 criteria and who weigh more than 200 pounds. Providers must use procedure code E0248 when billing for a heavy duty tub transfer bench.

## **2.2.6.3 Bathroom Equipment**

### **2.2.6.3.1 Non-fixed Toilet Rail, Bathtub Rail Attachment, and Raised Toilet Seat**

Nonfixed toilet rails are limited to two every five years. A bathtub rail is limited to one every five years.

Raised toilet seats are limited to one every five years. Nonfixed toilet rails and bathtub rail attachments may be considered for prior authorization for a client who has decreased functional mobility and is unable to safely self-toilet or self-bathe without assistive equipment. Raised toilet seats do not require prior authorization. Providers must use procedure code E0243 when billing for non-fixed toilet rails, procedure code E0244 when billing for raised toilet seats, and procedure code E0246 when billing for bathtub rails.

### **2.2.6.3.2 Toilet Seat Lifts**

A toilet seat lift mechanism is designed for the top of the toilet to assist lifting the body from a sitting position to a standing position.

A toilet seat lift mechanism must be prior authorized. To qualify for prior authorization, clients must meet all the following criteria:

- The client must have severe arthritis of the hip or knee or have a severe neuromuscular disease.
- The toilet seat lift mechanism must be a part of the physician or allowed practitioner's course of treatment and be prescribed to correct or ameliorate the client's condition.
- Once standing, the client must have the ability to ambulate.

- The client must be completely incapable of standing up from a regular armchair or any chair in the client's home.

The client's difficulty or incapability of getting up from a chair is not sufficient justification for a toilet seat lift mechanism. Almost all clients who are capable of ambulating can get out of an ordinary chair if the seat height is appropriate and the chair has arms.

Prior authorization will be given for either mechanical or powered toilet assist devices, not for both. If a client already owns one or more mechanical toilet-assist devices, a powered toilet seat lift mechanism will not be prior authorized unless there has been a documented change in the client's condition such that the client can no longer use the mechanical equipment.

Toilet seat lift mechanisms are limited to those types that operate smoothly, can be controlled by the client, and effectively assist a client in standing up and sitting down without other assistance. A toilet seat lift operated by a spring release mechanism with a sudden, catapult-like motion that jolts the client from a seated to a standing position is not a benefit of Texas Medicaid.

Providers must use procedure code E0172 when billing for a toilet seat lift mechanism. A toilet seat lift mechanism is limited to one purchase every five years.

### 2.2.6.3.3 Commode Chairs and Foot Rests

Commode chairs, foot rests, and replacement commode pails or pans may be considered as benefits, depending on the client's level of need. The client must meet the criteria for the level of commode chair or foot rest requested.

A commode chair with or without a foot rest may be considered a benefit for the client who also has a stationary bath chair without a commode cutout.

Documentation must support medical necessity for a customized commode chair or the addition of attachments to a standard commode chair.

#### **Level 1: Stationary Commode Chair**

A Level 1 commode chair is defined as a stationary commode chair with fixed or removable attachments to support the arms.

A stationary commode chair with fixed or removable arms may be considered for prior authorization when the client has a medical condition that results in an inability to ambulate to the bathroom safely (with or without mobility aids).

Providers must use procedure code E0163 or E0165 when billing for a stationary and mobile commode chair.

#### **Level 2: Mobile Commode Chair**

A Level 2 commode chair is defined as a mobile commode chair with fixed or removable attachments to support the arms.

A mobile commode chair with fixed or removable arms may be considered for prior authorization when the following criteria are met:

- In addition to meeting the criteria for a Level 1 commode chair, the client must be on a bowel program and require a combination commode or bath chair for performing the bowel program and bathing after.
- A mobile commode chair will be considered for reimbursement with prior authorization only if the client does not also have any type of bath chair. If the client meets the criteria for a stationary bath chair, prior authorization of a stationary chair may be considered.

### Level 3: Custom Commode Chair

A Level 3 commode chair is defined as a custom commode chair with all of the following characteristics:

- Is stationary or mobile
- Has fixed or removable attachments to support the arms, head, neck, or trunk.

A custom stationary or mobile commode chair with fixed or removable arms and head, neck, and/or trunk support attachments may be considered for prior authorization when the following criteria are met:

- In addition to meeting the criteria for a Level 1 or 2 commode chair, the client must have a medical condition that results in an inability to support their head, neck, or trunk without assistance.
- A mobile custom commode chair may be considered for reimbursement only if the client does not also have any type of bath chair.

Providers must use procedure code E0163 or E0165 with modifier TG when billing for a custom stationary or mobile commode chair.

### Extra-wide and Heavy-Duty Commode Chair

An extra-wide, heavy-duty commode chair is defined as one with a width greater than or equal to 23 inches, and capable of supporting a client who weighs 300 pounds or more.

An extra-wide or heavy-duty commode chair may be considered for prior authorization when the client meets the criteria for a Level 1, 2, or 3 commode chair and weigh 300 pounds or more.

Providers must use procedure code E0168 and the appropriate modifiers when billing for an extra-wide or heavy-duty commode chair. Use modifier TF when billing for a mobile extra-wide, heavy-duty commode chair. Use modifier TG when billing for a custom extra-wide, heavy-duty commode chair.

### Commode Chair With Integrated Seat Lift

A commode chair with integrated seat lift is designed to assist lifting the body from a sitting position to a standing position.

A commode chair with integrated seat lift mechanism for top of the commode must be prior authorized for clients who meet all the following criteria:

- The client must have severe arthritis of the hip or knee or have a severe neuromuscular disease.
- The client must be completely incapable of standing up from a regular toilet, commode, or any chair in their home.
- The commode chair with integrated seat lift must be a part of the physician or allowed practitioner's course of treatment and be prescribed to correct or ameliorate the client's condition.
- Once standing, the client must have the ability to ambulate independently for a short distance of no more than ten feet.

**Note:** *The fact that a client has difficulty or is even incapable of getting up from a chair, particularly a low chair, is not sufficient justification for a seat lift mechanism. Almost all clients who are capable of ambulating can get out of an ordinary chair if the seat height is appropriate and the chair has arms.*

Providers must use procedure code E0170 or E0171 when billing for a commode chair with integrated seat lift. The purchase of a commode chair with integrated seat lift is limited to one every five years.

### Replacement Commode Pail or Pan

Replacement commode pails or pans are a benefit through Title XIX Home Health Services and are limited to one per year. Additional quantities may be considered for prior authorization with documentation of medical necessity.

Providers must use procedure code E0167 when billing for a commode pail or pan.

### **Foot Rest**

A foot rest is used to support feet during use of the commode chair.

A foot rest may be considered for prior authorization if the client meets the criteria for a Level 1, 2, or 3 commode chair and the foot rest is necessary to support contractures of the lower extremities of clients who are paraplegic or quadriplegic.

Providers must use procedure code E0175 when billing for a foot rest.

#### **2.2.6.3.4 Portable Sitz Bath**

Portable sitz baths that fit over commode seats are limited to 1 per 180 days for clients requiring any of the following:

- Cleaning, irrigation, or pain relief of a perianal wound.
- Relief of pain associated with the pelvic area (hemorrhoids, bladder, vaginal infections, prostate infections, herpes, testicle disorders).
- Muscle toning for bowel and bladder incontinence.

Providers must use procedure codes E0160 or E0161 when billing for portable sitz baths.

#### **2.2.6.3.5 Bath Lifts**

The purchase of a bath lift is limited to one every five years. The rental of a bath lift is limited to one per month.

The two types of bath lifts that are considered for reimbursement include:

- An outside the tub bath lift which is a portable transfer system used to move a nonambulatory client a short distance from bed or chair to bath and is designed to accommodate the smaller space. This type of lift is either hydraulic or electric and consists of a base with wheels or casters and a sling which can transfer the client in and out of the bath.
- An inside the tub bath lift is a portable transfer system used to lower and raise a nonambulatory client into and out of the bath tub. This type of lift is either hydraulic or electric and consists of a base which adheres to the tub surface using suction cups and a seat that will lower and raise the client into and out of the tub.

Providers must use procedure code E0625 with the appropriate modifier (U1, U2, or U3) if necessary when billing for a bath lift.

The bath lift must be free standing, it cannot be attached to the floor, walls, or ceiling. Home adaptation for use of medical equipment is not a benefit of Home Health Services.

A hydraulic bath lift is for a client who is unable to assist in their own transfers and is operated by the weight or pressure of a liquid.

An electric bath lift is operated by electricity and may be considered when a hydraulic lift will not meet the client's needs.

A bath lift is not a benefit for the convenience of a caregiver.

There are four levels of bath lifts:

- Level 1 - an outside the tub bath lift (hydraulic or electric) and must accommodate a client weighing up to 300 pounds. Providers must use procedure code E0625 when billing for the purchase of a Level 1 bath lift.

- Level 2 - an in-tub bath lift (hydraulic or electric) and must accommodate a client weighing up to 300 pounds. Providers must use procedure code E0625 and the U1 modifier when billing for the purchase of a Level 2 bath lift.
- Level 3 - a bariatric lift (hydraulic or electric, out of tub type) designed to lift a client weighing greater than 300 pounds. Providers must use procedure code E0625 and the U2 modifier when billing for the purchase of a Level 3 bath lift.
- Level 4 - a bariatric lift (hydraulic or electric, in tub type) designed to lift a client weighing greater than 300 pounds. Providers must use procedure code E0625 and the U3 modifier when billing for the purchase of a Level 4 bath lift.

A bath lift may be considered for prior authorization if the client:

- Has an inability to transfer to the bathtub or shower independently using assistive devices (including, but not limited to, a cane, walker, bathtub rails).
- Requires maximum assistance by the caregiver to transfer to the bathtub or shower.
- Has bathroom and tub or shower that meets the manufacturer's recommended depth, width, and height for safe bath lift installation and operation.

Providers must use procedure code E0621 when billing for a lift sling. The purchase of a lift sling is limited to one every five years.

The following are payable procedure codes for bath and bathroom equipment:

| Procedure Code | Maximum Limitation                           |
|----------------|----------------------------------------------|
| E0160          | 2 per year                                   |
| E0161          | 2 per year                                   |
| E0163          | 1 every 5 years                              |
| E0165          | 1 every 5 years                              |
| E0167          | 1 per year                                   |
| E0168          | 1 every 5 years                              |
| E0170          | 1 every 5 years                              |
| E0171          | 1 every 5 years                              |
| E0172          | 1 every 5 years                              |
| E0175          | 1 every 5 years                              |
| E0240          | 1 every 5 years                              |
| E0243          | 2 every 5 years                              |
| E0244          | 1 every 5 years                              |
| E0245          | 1 every 5 years                              |
| E0246          | 1 every 5 years                              |
| E0247          | 1 every 5 years                              |
| E0248          | 1 every 5 years                              |
| E0621          | 1 per 5 years                                |
| E0625          | 1 purchase every 5 years; 1-month rental     |
| E0630          | 1 purchase every 5 years; 1 per month rental |
| E1399          | 1 every 5 years                              |

#### **2.2.6.4 Prior Authorization**

Except as otherwise indicated in this section, prior authorization is required for all bath and bathroom equipment and related supplies, including any accessories, modifications, adjustments, replacements and repairs to the equipment.

Bathroom and toilet lift rentals may be prior authorized during the period of repair up to a maximum of four months per lifetime, per client.

Prior authorization will not be considered for modifications, adjustments, or repairs to bath or bathroom equipment delivered to a client's home and then found to be inappropriate for the client's condition within the first six months after delivery. This applies unless there is a significant change in the client's condition that is documented by a physician or allowed practitioner familiar with the client.

#### **2.2.6.5 Documentation Requirements**

##### **2.2.6.5.1 Bath and Bathroom Equipment**

To request prior authorization for all bath or bathroom equipment, the following documentation must be provided:

- Accurate diagnostic information pertaining to the underlying diagnosis or condition, including the client's overall health status, any other medical needs, developmental level, and functional mobility skills and why regular bath or bathroom equipment will not meet the client's needs.
- The age, height, and weight of the client.
- Assessment of the client's home to ensure the requested equipment can be safely accommodated.
- Anticipated changes in the client's needs, including anticipated modifications or accessory needs and the growth potential of any custom shower and bath equipment.

##### **2.2.6.5.2 Toilet Seat Lifts**

In addition to the above documentation, the submitted documentation for a toilet seat lift must include an assessment completed by a physician, an allowed practitioner, physical therapist, or occupational therapist that includes all of the following:

- A description of the client's current level of function without the device
- An explanation why a nonmechanical toilet elevation device, such as toilet rails or elevated toilet seat, will not meet the client's needs
- Documentation that identifies how the toilet seat lift mechanism will improve the client's function
- A list of the mobility related activities of daily living (MRADLs) the client will be able to perform with the toilet seat lift mechanism that the client is unable to perform without the toilet seat lift mechanism and how the device will increase the client's independence
- The client's goals for use of the toilet seat lift mechanism

Supporting documentation must be kept in the client's record that all appropriate therapeutic modalities (e.g., medication or physical therapy) have been tried and that they failed to enable the client to transfer from a chair to a standing position.

#### **2.2.7 Blood Pressure Devices (Manual and Automated)**

Blood pressure devices are benefits in the home setting for self-monitoring when:

- The devices are medically necessary and appropriate.
- The devices are prescribed by a physician or allowed practitioner.

A manual blood pressure device requires manual cuff inflation with real-time visualization of the results displayed on the manometer and does not require prior authorization for purchase when provided for one of the diagnosis codes listed in the table below. Providers must use procedure code A4660 when billing for a manual blood pressure device.

An automated blood pressure device inflates the cuff manually or automatically, displays the blood pressure results on a small screen, and does not require prior authorization for purchase when provided for one of the diagnosis codes listed in the table below. Providers must use procedure code A4670 when billing for an automated blood pressure device.

Repair of equipment may be considered with documentation of why the equipment needs repair. Providers must use procedure code A4660 when billing for the replacement of other components or repair of equipment.

Finger cuff automated blood pressure devices and ambulatory blood pressure devices for diagnostic purposes are not a benefit of Texas Medicaid.

### 2.2.7.1 Prior Authorization

Procedure codes A4660 and A4670 do not require prior authorization if they are billed with one of the following diagnosis codes:

| Diagnosis Codes |        |       |        |        |        |        |        |
|-----------------|--------|-------|--------|--------|--------|--------|--------|
| I10             | I110   | I119  | I120   | I129   | I130   | I1310  | I1311  |
| I132            | I150   | I151  | I152   | I158   | I159   | I160   | I161   |
| I169            | I1A0   | I219  | I21A1  | I21A9  | I21B   | I2601  | I2602  |
| I2603           | I2604  | I2609 | I2690  | I2692  | I2693  | I2694  | I2695  |
| I2696           | I2699  | I270  | I271   | I2720  | I2721  | I2722  | I2723  |
| I2724           | I2729  | I2781 | I2782  | I2783  | I2789  | I279   | I340   |
| I341            | I342   | I3481 | I3489  | I349   | I350   | I351   | I352   |
| I358            | I359   | I360  | I361   | I362   | I368   | I369   | I370   |
| I371            | I372   | I378  | I379   | I421   | I422   | I424   | I425   |
| I428            | I429   | I43   | I440   | I441   | I442   | I4430  | I4439  |
| I444            | I445   | I4460 | I4469  | I447   | I450   | I4510  | I4519  |
| I452            | I453   | I454  | I455   | I456   | I4581  | I4589  | I459   |
| I4710           | I4711  | I4719 | I4720  | I4729  | I479   | I480   | I4811  |
| I4819           | I4820  | I4821 | I483   | I484   | I4891  | I4892  | I495   |
| I501            | I5020  | I5021 | I5022  | I5023  | I5030  | I5031  | I5032  |
| I5033           | I5040  | I5041 | I5042  | I5043  | I50810 | I50811 | I50812 |
| I50813          | I50814 | I5082 | I5083  | I5084  | I5089  | I509   | I5A    |
| I950            | I951   | I952  | I953   | I9581  | I9589  | I959   | N00A   |
| N010            | N011   | N012  | N013   | N014   | N015   | N016   | N017   |
| N018            | N01A   | N02A  | N02B1  | N02B2  | N02B3  | N02B4  | N02B5  |
| N02B6           | N02B9  | N03A  | N04A   | N050   | N051   | N052   | N053   |
| N054            | N055   | N056  | N057   | N058   | N059   | N05A   | N08    |
| N130            | N1330  | N1339 | N13721 | N13722 | N13729 | N13731 | N13732 |
| N13739          | N170   | N171  | N172   | N178   | N179   | N181   | N182   |
| N1830           | N1831  | N1832 | N184   | N185   | N186   | N189   | N250   |

| Diagnosis Codes |         |         |         |         |         |         |         |
|-----------------|---------|---------|---------|---------|---------|---------|---------|
| N2589           | Q200    | Q201    | Q202    | Q203    | Q204    | Q205    | Q208    |
| Q210            | Q2110   | Q2111   | Q2112   | Q2113   | Q2114   | Q2115   | Q2116   |
| Q2119           | Q2120   | Q2121   | Q2122   | Q2123   | Q213    | R001    | T800XXA |
| T81718A         | T8172XA | T82817A | T82855A | T82855D | T82855S | T82856A | T82856D |
| T82856S         |         |         |         |         |         |         |         |

Manual and automated blood pressure devices should last at least one year and may be considered for replacement after one year has passed. If it is medically necessary to replace nonfunctional and irreparable equipment before one year has passed, providers can submit prior authorization requests with documentation of medical necessity that explains the need for the replacement.

Prior authorization is required in the following situations:

- Another blood pressure device is medically necessary within the same year. Replacement of equipment within the same year as the purchase requires prior authorization. If equipment must be replaced before the end of the anticipated lifespan, the provider must submit a copy of the police or fire report, when appropriate, and the measures that will be taken to prevent reoccurrence.
- The diagnosis code is not in the table above. If the diagnosis code is not one of those listed in the table above, providers must submit a request for the prior authorization of the initial or replacement device and must include all of the documentation necessary to support the medical necessity of the blood pressure device.

### 2.2.7.2 Hospital-Grade Blood Pressure Devices

Hospital-grade blood pressure devices and their components are benefits of CCP in the home setting for self-monitoring when the equipment is prescribed by a physician or an allowed practitioner. A hospital-grade blood pressure device includes memory for continuous recording, has an alarm system to notify the caregiver of abnormal readings, and is capable of frequent or continuous automatic blood pressure and heart rate monitoring with correction of motion artifact.

Documentation that supports medical necessity of the requested equipment, including the diagnosis, must be maintained in the client's medical record and is subject to retrospective review.

**Referto:** Section 9.2.26.1, "Blood Pressure Monitoring" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about ambulatory blood pressure devices.

Providers must use procedure code A9279 with modifier U1 when billing for hospital-grade blood pressure devices.

Hospital-grade blood pressure devices that have been purchased are anticipated to last a minimum of three years and may be considered for replacement when three years have passed or when the equipment is not functional and not repairable.

For clients who are birth through 11 months of age, the rental or purchase of a hospital-grade blood pressure device is a benefit when documentation supports medical necessity and includes an explanation of why the client cannot use a standard automated blood pressure device.

For clients who are 12 months of age and older, the rental or purchase of a hospital-grade blood pressure device is a benefit on a case-by-case basis. Supporting documentation of medical necessity must be provided.

The following indications are recognized by Texas Medicaid for hospital-grade blood pressure devices:

- Hypotension
- Essential hypertension

- Hypertensive heart disease
- Hypertensive renal disease
- Myocardial infarction
- Pulmonary embolism
- Acute pulmonary heart disease
- Chronic pulmonary heart disease
- Valve disorders
- Cardiomyopathy
- Conduction disorders
- Cardiac dysrhythmias
- Heart failure
- Acute kidney failure
- Chronic kidney disease
- Hydronephrosis
- Vesicoureteral reflux with neuropathy
- Bulbus cordis anomalies and anomalies of cardiac septal closure
- Embolism
- Stenosis of either coronary artery stent or peripheral vascular stent

All rental costs of the hospital-grade blood pressure device apply toward the purchase price.

#### **2.2.7.3 Components, Replacements, and Repairs**

The following may be considered for reimbursement of blood pressure device replacement and repairs with prior authorization:

- Replacement of blood pressure cuffs (procedure code A4663)
- Replacement of other components (procedure code A4660)
- Repairs of the equipment (procedure code A4660)

#### **2.2.7.4 Prior Authorization**

Prior authorization is required for the rental or purchase of a hospital-grade blood pressure device. A determination will be made by HHSC or its designee as to whether the equipment will be rented, purchased, repaired, or modified based on the client's needs, duration of use, and age of the equipment. Repairs and modifications can only be performed on purchased equipment.

Documentation of medical necessity for the hospital-grade blood pressure device must support the client's need for self-monitoring and address why an automated blood pressure device will not meet the client's needs. The documentation must include:

- All pertinent diagnoses.
- Initial evaluation.
- Symptoms.
- Duration of symptoms.
- Any recent hospitalizations (within past 12 months).

- Comorbid conditions.
- How frequent or continuous self-monitoring will affect treatment.
- All pertinent laboratory and radiology results.
- Client's weight.
- A family or caregiver(s) who has an understanding of cause and effect and object permanence and who has agreed to accept the responsibility to be trained to use the hospital-grade monitor.

Prior authorization may be granted for a six-month rental period when the request is submitted with documentation of medical necessity supporting the client's need for self-monitoring and addressing why an automated blood pressure device will not meet the client's needs.

Recertification for an additional six-month period may be considered when the physician or allowed practitioner provides current documentation that supports the ongoing medical necessity for self-monitoring and confirms the client or family is compliant with its use.

A hospital-grade blood pressure device will not be considered for prior authorization of purchase until the client has completed a six-month trial period.

Purchase of a hospital-grade blood pressure device may be prior authorized when all of the following criteria are met:

- The client is 12 months of age or older.
- Documentation of medical necessity supports the client's need for ongoing self-monitoring and addresses why an automated blood pressure device will not meet the client's needs.

#### 2.2.7.4.1 Components, Replacements, and Repairs

Replacement of blood pressure cuffs and other components may be considered for purchase with prior authorization and documentation of medical necessity that explains the need for the replacement.

Repair of equipment must be prior authorized when irreparable damage has occurred and documentation exists that supports the need for repair. Repair of equipment will be considered after the factory warranty has expired.

## 2.2.8 Bone Growth Stimulators

Internal and external bone growth (osteogenic) stimulators are a benefit of Texas Medicaid. Bone growth stimulators are a benefit for skeletally-mature individuals only.

**Note:** *Bone growth stimulators that do not meet criteria for coverage through Title XIX Home Health Services may be considered through Texas Health Steps—Comprehensive Care Program (THSteps-CCP) for clients who are birth through 20 years of age.*

**Note:** *For clients who are 21 years of age or older, requests for bone growth stimulators that do not meet the criteria through Title XIX Home Health Services may be considered under the Texas Medicaid Home Health—Durable Medical Equipment (DME) Exceptional Circumstances process.*

Electromagnetic bone growth stimulators promote healthy bone growth and repair by low intensity electrical stimulation. Electrical stimulation is provided by implanting low-voltage electrodes within the tissue surrounding the bone (internal) or by external placement of a device that transmits low-voltage currents through the soft tissue to the bone (external).

Ultrasonic bone growth stimulators promote healthy bone growth and repair through low-intensity, pulsed ultrasound waves.

A noninvasive electrical bone growth stimulator (procedure codes E0747 and E0748) and noninvasive ultrasound bone growth stimulator (procedure code E0760) are benefits of Texas Medicaid for DME providers when provided in the home setting. An invasive electrical bone growth stimulator (procedure code E0749) is a benefit of Texas Medicaid for freestanding and hospital-based ambulatory surgical centers when provided in the outpatient setting.

Electrical and ultrasonic bone growth stimulator devices for the treatment of orthopedic and neurosurgical conditions are a benefit for Texas Medicaid clients when the client experiences nonunion of a fracture, requires an adjunct to spinal fusion surgery, or experiences congenital pseudarthrosis.

Nonunion is defined as a fractured bone that fails to heal completely. Diagnosis of nonunion is established when a minimum of six months has passed since the injury and the fracture site shows no progressive signs of healing for a minimum of three months and is not complicated by a synovial pseudoarthrosis. Serial radiographs must confirm that fracture healing has ceased for three months or longer before the client begins treatment with the bone growth stimulator.

### **2.2.8.1 Professional Services**

Procedure codes 20974, 20975, and 20979 are a benefit of Texas Medicaid and limited to one per six months. During the six-month limitation period, a subsequent fracture that meets the above criteria for a bone growth stimulator may be reimbursed after the submission of an appeal with documentation of medical necessity that demonstrates the criteria have been met.

### **2.2.8.2 Prior Authorization Criteria and Documentation Requirements for Bone Growth Stimulators**

Procedure codes E0747, E0748, E0749, and E0760 require prior authorization. Additional bone growth stimulators may be considered for prior authorization with documentation that supports treatment of a different fracture.

A completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form prescribing the DME and/or supplies must be signed and dated by a physician or an allowed practitioner familiar with the client, before requesting prior authorization for all DME equipment and supplies. The completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form must include the procedure codes and quantities for services requested.

A copy of the completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form with the original dated signature must be maintained by the prescribing physician or allowed practitioner in the client's medical record. A copy of the completed, signed, and dated form must be maintained by the DME provider in the client's medical record.

To facilitate the determination of medical necessity and avoid unnecessary denials, the physician or allowed practitioner must provide correct and complete information, including documentation of medical necessity for the equipment or supplies prescribed and is subject to retrospective review. Either provider may be asked for additional information to clarify or complete a request for the bone growth stimulator.

#### **2.2.8.2.1 Documentation for Noninvasive Electrical Bone Growth Stimulator**

Documentation of one of the following is required for prior authorization of the external, electromagnetic bone stimulator (procedure code E0747):

- Nonunions, failed fusions, and congenital pseudarthrosis where there is no evidence of progression of healing for three or more months despite appropriate fracture care.
- Delayed unions of fractures of failed arthrodesis at high-risk sites (e.g., open or segmental tibial fractures, carpal navicular fractures).

Documentation must also indicate all the following:

- Serial radiographs have confirmed that no progressive signs of healing have occurred.

- The fractured gap is 1 cm or less.
- The individual can be adequately immobilized and is likely to comply with non-weight-bearing restrictions.

Documentation of one of the following is required for prior authorization of the external, electromagnetic bone stimulator for spinal application (procedure code E0748):

- One or more failed fusions.
- Grade II or worse spondylolisthesis.
- A multiple-level fusion with extensive bone grafting is required.
- Other risk factors for fusion failure are present, including gross obesity, degenerative osteoarthritis, severe spondylolisthesis, current smoking, previous fusion surgery, previous disc surgery, or gross instability.

#### 2.2.8.2.2 Documentation for Invasive Electrical Bone Growth Stimulators

Documentation of one of the following is required for prior authorization of the surgically implanted bone growth stimulator (procedure code E0749):

- Nonunion of long bone fractures (i.e., clavicle, humerus, radius, ulna, femur, tibia, fibula, and metacarpal, metatarsal, carpal, and tarsal bones). Nonunion of long bone fractures is considered to exist only when serial radiographs have confirmed that fracture healing has ceased for three or more months prior to starting treatment with the bone growth stimulator. Serial radiographs must include a minimum of two sets of radiographs separated by a minimum of 90 days. Each set of radiographs must include multiple views of the fracture site.
- Failed fusion of a joint other than the spine when a minimum of three months has elapsed since the joint fusion was performed.
- Congenital pseudoarthrosis.
- An adjunct to spinal fusion surgery for patients at high risk for pseudoarthrosis due to previously failed spinal fusion at the same site.
- An adjunct to multiple-level fusion, which involves three or more vertebrae (e.g., L3-L5, L4-S1, etc).

#### 2.2.8.2.3 Documentation for Ultrasound Bone Growth Stimulator

Documentation of the following is required for prior authorization of the external, low-intensity ultrasound bone growth stimulator device (procedure code E0760):

- Nonunion of a fracture, other than the skull or vertebrae, in a skeletally mature person, which is documented by a minimum of two sets of radiographs that were:
  - Obtained prior to starting treatment with the bone growth stimulator.
  - Separated by a minimum of 90 days.
  - Taken with multiple views of the fracture site.
  - Accompanied by a written interpretation by a physician who states that there has been no clinically significant evidence of fracture healing between the two set of radiographs.
- Evidence of all of the following:
  - The fracture is not tumor related.
  - The fracture is not fresh (less than seven days), closed or grade I open, tibial diaphyseal fractures, or closed fractures of the distal radius (Colles fracture).

### 2.2.8.3 Claims Reimbursement for Professional Services

Professional claims that are submitted for bone growth stimulation (procedure codes 20974, 20975, and 20979) may be reimbursed if the claim includes documentation of one of the following:

- Documentation of medical necessity as outlined in subsection 2.2.8.2, “Prior Authorization Criteria and Documentation Requirements for Bone Growth Stimulators” in this handbook.
- The corresponding bone growth stimulator device was submitted within 95 days of the date the bone growth stimulation procedure was performed.

The appropriate evaluation and management (E/M) procedure code must be billed for monitoring the effectiveness of bone growth stimulation treatment.

### 2.2.9 Breast Feeding Support Services

**Referto:** Section 3, “Breastfeeding Support Services” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)* for information about breastfeeding support services.

### 2.2.10 Cochlear Implants

Cochlear implant services (procedure codes L8499, L8615, L8616, L8617, L8618, L8619, L8623, and L8624) may be reimbursed in the home setting to DME providers.

**Referto:** Subsection 9.2.22, “Cochlear Implants” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for more information about cochlear implant services.

### 2.2.11 Continuous Passive Motion (CPM) Device

A CPM device is reimbursed on a daily basis and is limited to once per day. Reimbursement includes delivery, set-up and all supplies. Providers must use procedure code E0935 when billing for a CPM machine.

#### 2.2.11.1 Prior Authorization

A CPM device may be considered for prior authorization through Home Health Services. Reimbursement for a CPM device is considered after joint surgery, such as knee replacement, when prescribed by a physician and submitted with clinical documentation of medical necessity and appropriateness.

### 2.2.12 Diabetic Equipment and Supplies

Diabetic equipment and supplies are a benefit through Title XIX Home Health Services and do not require prior authorization unless otherwise specified.

**Note:** For clients who are 21 years of age or older, requests for diabetic equipment and supplies that do not meet the criteria through Title XIX Home Health Services may be considered under the Texas Medicaid Home Health—Durable Medical Equipment (DME) Exceptional Circumstances process.

Diabetic equipment and supplies may be obtained through one of the following methods:

- A Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form
- A verbal or a detailed written order provided by a physician, physician assistant (PA), nurse practitioner (NP), clinical nurse specialist (CNS), or a certified nurse midwife (CNM).

### 2.2.12.1 Obtaining Equipment and Supplies Through a Title XIX Form

The completed Title XIX Form must be maintained by the dispensing provider and the prescribing physician or allowed practitioner in the client's medical record. The physician or allowed practitioner must maintain the original signed and dated copy of the Title XIX Form. The completed Title XIX Form is valid for a period up to six months from the physician or allowed practitioner's signature date.

**Note:** *Texas Medicaid fee-for-service requires providers to review for medical necessity of DME every six months. An MCO may approve an initial DME prior authorization request for a period of 6 months, unless otherwise stated, and may authorize an extension of 12 months after the initial 6 months, if medically necessary.*

### 2.2.12.2 Obtaining Equipment and Supplies Through a Verbal or Detailed Written Order

If the dispensing provider does not have a detailed written order then a verbal order is required to be on file until the written order is received from the prescribing provider and before providing diabetic equipment and supplies. The prescribing provider's order may be a written, fax, electronic, or verbal order and must include:

- A description of the item(s).
- Make and model for a device.
- The client's name.
- The name of the physician or authorized prescribing provider.
- The date of the order.

A detailed written order must be received by the DME supplier within 90 days from the date of the prescribing provider's signature. The detailed written order for diabetic equipment and supplies is valid for six months from the date of the order or the date of the prescribing provider's signature, whichever is earlier, for initial orders, and from the start date of renewal orders. In the absence of a start date, then the authorized prescribing signature date will be the beginning date of service.

**Note:** *Texas Medicaid fee-for-service requires providers to review for medical necessity of DME every six months. An MCO may approve an initial DME prior authorization request for a period of 6 months, unless otherwise stated, and may authorize an extension of 12 months after the initial 6 months, if medically necessary.*

A completed, detailed written order must be signed and dated by the authorized prescribing provider. The prescribing provider is required to retain a copy of the signed and dated detailed written order in the client's medical record. The DME provider must retain the original, faxed, photocopied, or electronic, signed and dated detailed written order in the client's medical record.

A completed detailed written order must contain all the following components:

- The client's name
- The date of the verbal order if different from the date the authorized prescribing provider signed the written order
- Description of item(s) to be provided, including make and model for a device
- Quantity to dispense (quantity required per day or month)
- Diagnosis code or description supporting the medical necessity

Before submitting a claim to Texas Medicaid, DME providers must have on file a detailed written order with the required information. No other documentation is required.

### Prior Authorization

Prior authorization, when necessary, may be considered with documentation of medical necessity, which must include one of the following:

- A completed Title XIX Form that has been signed and dated by the physician or an allowed practitioner who is familiar with the client. The make and model of a requested device must also be included on the Home Health Services Title XIX Form.
- Or all the following:
  - A completed and signed detailed written or verbal order.
  - A Title XIX Form with section A completed, along with the make and model information of the requested device.

### 2.2.12.3 Glucose Testing Equipment and Other Supplies

The prescribing provider must indicate on a completed, signed and dated Title XIX Form, or a signed and dated detailed written order how many times a day the client is required to test blood glucose or ketone levels when applicable (not all supplies are related to testing glucose or urine, e.g., batteries).

Glucose tablets or gel (procedure code A9150) may be considered with prior authorization when provided to a client with a diagnosis from the diagnosis code table below. Procedure code A9150 is limited to one per six months.

The procedure codes for the diabetic supplies listed in the following table do not require prior authorization, up to the quantities listed in the table, when provided to a client with a diagnosis from the diagnosis code table below. These limitations are not dependent on the client's use of insulin:

| Procedure Code | Limitation          |
|----------------|---------------------|
| A4233          | 1 per 180 days      |
| A4234          | 1 per 180 days      |
| A4235          | 1 per 180 days      |
| A4236          | 1 per 180 days      |
| A4252          | 10 strips per month |
| A4256          | 2 per year          |
| A4258          | 2 per year          |

### Insulin-Dependent Clients

The following procedure codes for diabetic supplies do not require prior authorization up to the quantities listed when the supplies are provided to an insulin-dependent client with a valid diagnosis. If the client is insulin-dependent, providers must submit claims for these procedure codes with modifier U9:

| Procedure Code                                                                                                                                                      | Limitation        |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------|
| A4253*                                                                                                                                                              | 2 boxes per month |
| A4259                                                                                                                                                               | 1 box per month   |
| A9275*                                                                                                                                                              | 2 per month       |
| *A client may receive a combined total of two per calendar month of procedure codes A4253 and A9275, either two or one procedure code or one of each procedure code |                   |

### Non-Insulin-Dependent Clients

The following procedure codes for diabetic supplies do not require prior authorization up to the quantities listed when they are provided to a non-insulin-dependent client with a valid diagnosis. If the client is not insulin-dependent, providers must submit claims for these procedure codes with no modifier:

| Procedure Code                                                                             | Limitation           |
|--------------------------------------------------------------------------------------------|----------------------|
| A4253*                                                                                     | 1 box per month      |
| A4259                                                                                      | 1 box every 2 months |
| A9275*                                                                                     | 1 per month          |
| *A client may receive only one per calendar month of either procedure code A4253 or A9275. |                      |

The following diagnosis codes apply to the tables listed above:

| Diabetic Diagnosis Codes |         |         |         |         |         |         |         |
|--------------------------|---------|---------|---------|---------|---------|---------|---------|
| E0800                    | E0801   | E0810   | E0811   | E0821   | E0822   | E0829   | E08311  |
| E08319                   | E083211 | E083212 | E083213 | E083219 | E083291 | E083292 | E083293 |
| E083299                  | E083311 | E083312 | E083313 | E083319 | E083391 | E083392 | E083393 |
| E083399                  | E083411 | E083412 | E083413 | E083419 | E083491 | E083492 | E083493 |
| E083499                  | E083511 | E083512 | E083513 | E083519 | E083521 | E083522 | E083523 |
| E083529                  | E083531 | E083532 | E083533 | E083539 | E083541 | E083542 | E083543 |
| E083549                  | E083551 | E083552 | E083553 | E083559 | E083591 | E083592 | E083593 |
| E083599                  | E0836   | E0837X1 | E0837X2 | E0837X3 | E0837X9 | E0839   | E0840   |
| E0841                    | E0842   | E0843   | E0844   | E0849   | E0851   | E0852   | E0859   |
| E08610                   | E08618  | E08620  | E08621  | E08622  | E08628  | E08630  | E08638  |
| E08641                   | E08649  | E0865   | E0869   | E088    | E089    | E0900   | E0901   |
| E0910                    | E0911   | E0921   | E0922   | E0929   | E09311  | E09319  | E093211 |
| E093212                  | E093213 | E093219 | E093291 | E093292 | E093293 | E093299 | E093311 |
| E093312                  | E093313 | E093319 | E093391 | E093392 | E093393 | E093399 | E093411 |
| E093412                  | E093413 | E093419 | E093491 | E093492 | E093493 | E093499 | E093511 |
| E093512                  | E093513 | E093519 | E093521 | E093522 | E093523 | E093529 | E093531 |
| E093532                  | E093533 | E093539 | E093541 | E093542 | E093543 | E093549 | E093551 |
| E093552                  | E093553 | E093559 | E093591 | E093592 | E093593 | E093599 | E0936   |
| E0937X1                  | E0937X2 | E0937X3 | E0937X9 | E0939   | E0940   | E0941   | E0942   |
| E0943                    | E0944   | E0949   | E0951   | E0959   | E09610  | E09618  | E09620  |
| E09621                   | E09622  | E09628  | E09630  | E09638  | E09641  | E09649  | E0965   |
| E0969                    | E098    | E099    | E1010   | E1011   | E1021   | E1022   | E1029   |
| E10311                   | E10319  | E103211 | E103212 | E103213 | E103219 | E103291 | E103292 |
| E103293                  | E103299 | E103311 | E103312 | E103313 | E103319 | E103391 | E103392 |

### Non-diabetic Diagnosis Codes

| Non-diabetic Diagnosis Codes |        |        |       |       |        |        |        |        |
|------------------------------|--------|--------|-------|-------|--------|--------|--------|--------|
| E161                         | E162   | E16A1  | E16A2 | E16A3 | E71111 | E71310 | E71311 | E71312 |
| E71313                       | E71314 | E71318 | E7132 | E7420 | E7421  | E7429  | E88810 | E88811 |
| E88818                       | E88819 | E8882  | E88A  | K911  | R7303  | R7309  | R81    |        |

**Note:** THSteps-eligible clients who qualify for medically necessary services beyond the limits of this home health benefit will receive those services through CCP.

Alcohol wipes (procedure code A4245) and urine test or reagent strips or tablets (procedure code A4250) are a benefit of Texas Medicaid when they are necessary for the treatment of some diabetic conditions or other conditions and therefore are not limited to the diagnoses listed in the diagnosis code table above.

Procedure code A4245 is limited to four boxes per month and must be submitted with modifier U4. Procedure code A4250 is limited to one box per six months. Prior authorization is not required for these procedure codes up to the quantities listed.

The quantity of glucose testing supplies billed for a one-month supply should relate to the number of tests ordered per day by the prescribing provider.

Glucose testing supplies may be reimbursed for the quantities prescribed or the quantity prior authorized.

Blood glucose test or reagent strips (procedure code A4253) and home glucose disposable monitors with test strips (procedure code A9275) are limited to a combined total of two per month.

#### **2.2.12.3.1 Prior Authorization**

Glucose tablets or gel (procedure code A9150) requires prior authorization with documentation supporting medical necessity.

Glucose testing supplies for quantities beyond the limits listed in the procedure code table above or for diagnoses other than those listed in the diagnosis code table above in subsection 2.2.12.3, “Glucose Testing Equipment and Other Supplies” in this handbook may be considered for prior authorization with documentation of medical necessity. Quantities will be prior authorized based on the documentation of medical necessity related to the number of tests ordered per day by the physician or allowed practitioner.

#### **2.2.12.4 Blood Glucose Monitors (BGM)**

Blood glucose monitors with integrated voice synthesizers (procedure code E2100) and blood glucose monitors with integrated lancing blood sample (procedure code E2101) may be considered for prior authorization with documentation of medical necessity.

Glucose monitors that have been purchased are anticipated to last a minimum of three years and may be considered for replacement when three years have passed or the equipment is no longer repairable.

Standard home glucose monitors (procedure code E0607) are not a benefit of Texas Medicaid.

##### **2.2.12.4.1 Prior Authorization**

Blood glucose monitors with special features (procedure code E2100 or E2101) may be considered for prior authorization with documentation supporting medical necessity for the special feature requested.

Purchase of a blood glucose monitor with integrated voice synthesizer (procedure code E2100) may be considered for prior authorization with documentation that includes a diagnosis of diabetes and significant visual impairment.

Purchase of a blood glucose monitor with integrated lancing and blood sample (procedure code E2101) may be considered for prior authorization with documentation that includes a diagnosis of diabetes and significant manual dexterity impairment related but not limited to neuropathy, seizure activity, cerebral palsy, or Parkinson’s disease.

#### **2.2.12.5 External Insulin Pump and Supplies**

An external insulin infusion pump is a programmable, battery-powered mechanical syringe or reservoir device controlled by a microcomputer to provide a basal continuous subcutaneous insulin infusion (CSII) and release a “bolus” dose at meals and at programmed intervals. The pump is connected to an infusion set with an attached small needle or cannula that is inserted into the subcutaneous tissue. The purpose of the insulin pump is to provide an accurate, continuous, controlled delivery of insulin which can be regulated by the user to achieve intensive glucose control and prevent the metabolic complications of hypoglycemia, hyperglycemia and diabetic ketoacidosis. The typical external insulin pump capacity is two to three days of insulin.

An external insulin pump must be ordered by, and the client's follow-up care must be managed by, a prescribing provider with experience managing clients with insulin infusion pumps and who is knowledgeable in the use of insulin infusion pumps.

The external insulin pump (procedure code E0784) may be considered for prior authorization with documentation of medical necessity. Procedure code E0784 is limited to one purchase every three years, and one rental per month. External insulin pumps that have been purchased are anticipated to last a minimum of three years and may be considered for replacement when three years have passed or the equipment is no longer repairable.

The following procedure codes for external insulin pump supplies are a benefit through Title XIX Home Health Services and do not require prior authorization up the maximum quantities allowed. Additional quantities may be considered with documentation of medical necessity and prior authorization.

| Procedure Code | Limitation     |
|----------------|----------------|
| A4224          | 4 per month    |
| A4225          | 15 per month   |
| A4230          | 15 per month   |
| A4231          | 15 per month   |
| A4232          | 10 per month   |
| A4601          | 1 per 180 days |
| A4602          | 1 per 180 days |
| A6257          | 30 per month   |
| A6258          | 30 per month   |
| A6259          | 15 per month   |
| K0601          | 4 per 2 months |
| K0602          | 4 per 2 months |
| K0603          | 4 per 2 months |
| K0604          | 1 per 6 months |
| K0605          | 1 per 6 months |

Providers must bill replacement batteries (procedure codes K0601, K0602, K0603, K0604, and K0605 with modifier U1).

When there is not an appropriate procedure code for supplies providers may request prior authorization using procedure code A9900.

The external insulin pump supplies (including batteries) are not included in the external insulin pump rental. Routine maintenance of rental equipment is the provider's responsibility.

Infusion sets for the external insulin pump (procedure codes A4230 or A4231) are limited to clients with a previously billed external insulin pump device or supply. Infusion sets for clients who did not receive the external insulin pump through Texas Medicaid are considered for reimbursement on appeal with a physician or allowed practitioner's statement documenting medical necessity.

An internal insulin pump will not be prior authorized as it is considered part of the surgery to place the pump.

#### 2.2.12.5.1 Prior Authorization

Prior authorization is required for an external insulin pump (procedure code E0784) with carrying cases.

### Rental of External Insulin Pump

An external insulin pump may be considered for prior authorization of rental with submission of clinical documentation indicating one of the following:

- A client who has a diagnosis of type 1 or 2 diabetes must meet at least two of the following criteria while on multiple daily administrations of insulin:
  - Elevated glycosylated hemoglobin level (HbA1c) > 7.0 percent
  - History of dawn phenomenon with fasting blood sugars frequently exceeding 200 mg/dl
  - History of severe glycemic excursions with wide fluctuations in blood glucose
  - History of recurring hypoglycemia (less than 60 mg/dL) with or without hypoglycemic unawareness
  - Anticipation of pregnancy within three months
- A client with a diagnosis of gestational diabetes must meet at least one of the following criteria:
  - Erratic blood sugars in spite of maximal compliance and split dosing
  - Other evidence that adequate control is not being achieved by current methods

In addition to the clinical documentation the provider must submit the External Insulin Pump form indicating:

- The client or caregiver possess the following competencies:
  - The cognitive and physical abilities to use the recommended insulin pump treatment regimen
  - An understanding of cause and effect
  - The willingness to support the use of the external insulin pump
- The prescribing provider must attest that:
  - A training/education plan will be completed prior to initiation of pump therapy.
  - The client or caregiver will be given face-to-face education and instruction and will be able to demonstrate proficiency in integrating insulin pump therapy with their current treatment regimen for ambient glucose control.

### Purchase of External Insulin Pump

An external insulin pump may be considered for prior authorization of purchase after it has been rented for a three-month trial and all of the following documentation is provided:

- The training/education plan has been completed
- The pump is the appropriate equipment for the specific client
- The client is compliant with the use of the pump

#### 2.2.12.6 Insulin and Insulin Syringes

Insulin and insulin syringes (0.5 and 1.0 cc sizes only) that are prescribed to fee-for-service clients are reimbursed through the Medicaid Vendor Drug Program and are not covered under Title XIX Home Health Services. The Medicaid Vendor Drug Program (VDP) only enrolls pharmacies.

**Referto:** The *Outpatient Drug Services Handbook* (Vol. 2, *Provider Handbooks*) for more information about VDP.

#### 2.2.12.7 Continuous Glucose Monitors (CGM)

CGMs are devices that measure glucose levels taken from interstitial fluid continuously throughout the day and night, providing real-time data to the client, physician, or an allowed practitioner.

The CGM is comprised of three parts:

- A disposable sensor (attaches to the skin and inserts a tiny wire into the subcutaneous tissue to measure glucose levels)
- A transmitter (attaches to the sensor and sends the data to a wireless receiver/monitor)
- A receiver/monitor (records and stores the data and alerts the client when glucose levels are too high or too low)

Only CGM consisting of all three parts including the sensor, transmitter, and receiver/monitor are covered. Coverage requires a dedicated receiver/monitor. A CGM that uses a smart device (e.g., smart phone, tablet, watch, personal computer, etc.) as a receiver is not classified as durable medical equipment and therefore not covered by Medicaid.

The general term CGM refers to both non-adjunctive (formerly referred to as therapeutic) and adjunctive (formerly referred to as nontherapeutic) CGMs.

A non-adjunctive CGM can be used to make treatment decisions without the need for a stand-alone BGM to confirm testing results. An adjunctive CGM requires the user to verify their glucose levels or trends displayed on a CGM with a BGM prior to making treatment decisions.

A long-term personal CGM system for clients who have diabetes to use at home may be considered as a Medicaid DME benefit with prior authorization using procedure codes E2102 (device) and A4238 (supplies) for adjunctive CGM; procedure codes E2103 (device) and A4239 (supplies) for non-adjunctive CGM.

**Note:** *There are no devices on the United States market that function as stand-alone adjunctive CGM devices. Current technology for adjunctive CGM devices operates in conjunction with an insulin pump.*

The short-term CGM (worn a minimum of 72 hours) is used for diagnostic purposes to establish or modify the client's treatment plan, which is a distinct and separate Texas Medicaid benefit.

When a CGM (procedure code E2102 or E2103) is covered, the related supply allowance (procedure code A4238 or A4239) is also covered. Supplies (procedure code A4238) for an adjunctive CGM integrated into an external insulin infusion pump are covered when the client meets both the CGM coverage criteria and the coverage criteria for an external insulin infusion.

The following non-adjunctive CGM device procedure codes and related supplies will be a benefit when provided by medical supplier durable medical equipment (DME) providers in the home setting:

| Procedure Code | Limitation    |
|----------------|---------------|
| E2102          | 1 per 3 years |
| E2103          | 1 per 3 years |
| A4238          | 1 per month   |
| A4239          | 1 per month   |

**Referto:** Subsection 9.2.24, "Continuous Glucose Monitoring (CGM)" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*

#### 2.2.12.7.1 Prior Authorization

A personal CGM for clients with diabetes to use at home may be considered as a Medicaid DME benefit with prior authorization using procedure code E2102 for adjunctive CGM and E2103 for non-adjunctive CGM.

A CGM must be prescribed by the client's treating practitioner performing the glucose monitoring.

The following initial criteria must be met for the client to qualify for the CGM benefit:

- A client must have diabetes mellitus and meet all of the following medical necessity criteria:
  - The client is insulin-treated; or
  - The client has a history of problematic hypoglycemia with documentation of at least one of the following:
    - Recurrent (more than one) level 2 hypoglycemic events (glucose <54 mg/dL [3.0 mmol/L]) that persist despite multiple (more than one) attempts to adjust medication(s) and/or modify the diabetes treatment plan; or
    - A history of one level 3 hypoglycemic event (glucose <54 mg/dL [3.0 mmol/L]) characterized by altered mental and/or physical state requiring third-party assistance for treatment of hypoglycemia.
- A client with hypoglycemia unawareness or several episodes of hypoglycemia a day also qualifies for the CGM benefit if the client does not meet the criteria outlined above.
- The client's treating practitioner has concluded that the client (or the client's caregiver) has sufficient training using the CGM prescribed as evidenced by providing a prescription for the appropriate supplies and frequency of blood glucose testing.
- The CGM is prescribed in accordance with its FDA indications for use.

Within six (6) months prior to ordering the CGM, the treating practitioner has an in-person or Medicaid-approved telehealth visit with the client to evaluate their diabetes control and determined that the criteria in this section are met.

For continued CGM coverage, every six (6) months following the initial prescription of the CGM, the treating practitioner has an in-person or Medicaid-approved telehealth visit with the client to document adherence to the CGM regimen and diabetes treatment plan.

Prior authorization is not required for CGM supplies once a device is approved. When a CGM (procedure code E2102 or E2103) is covered, the related supply allowance (procedure code A4238 or A4239) is also covered.

There are no devices on the United States market that function as stand-alone adjunctive CGM devices according to the CMS definition of DME. Current technology for adjunctive CGM devices (procedure code E2102) operates in conjunction with an insulin pump, and its supplies (procedure code A4238) are covered when the beneficiary meets both the CGM coverage criteria and the coverage criteria for an external insulin infusion pump.

CGM devices that have been purchased are expected to last a minimum of three years and may be considered for replacement when three years have passed, or the equipment is no longer repairable. The replacement of the equipment may also be considered when the equipment has been lost or irreparably damaged. A copy of the police or fire report, when appropriate, and the measures to be taken to prevent a recurrence must be submitted. Additional services may be reimbursed with prior authorization based on documentation of medical necessity.

#### 2.2.12.7.2 Claims Filing Requirements

Only one CGM system may be authorized for the qualified diabetic client. The ordering provider is responsible for requesting the appropriate device and supplies according to the client's medical need.

The ordering provider should also verify that the client's condition meets the manufacturers' recommendations for appropriate age range, testing and calibration requirements, etc., prior to prescribing the CGM device.

The provider must submit procedure codes E2102 or E2103 with the KF modifier when billing for a class III CGM device (designated by FDA). No modifier is required for a class II device (designated by FDA).

No prior authorization is required for CGM integrated insulin pump supplies. When a CGM integrated pump is covered, its supplies (procedure code A4238 or A4239) are also covered.

The supply allowance (procedure code A4238 or A4239) is billed as one unit of service per 30 days. Only one unit of service of procedure code A4238 or A4239 may be billed to the claim system at a time. Billing more than one unit of service per 30 days of procedure code A4238 or A4239 will be denied as not reasonable and necessary.

Non-adjunctive CGM devices replace standard home BGMs and related supplies. The following procedure codes for BGM and its related supplies will be denied when billed with a non-adjunctive CGM (procedure code E2103) and its associated supply allowance (procedure code A4239):

| Procedure Code |       |       |       |       |       |       |       |       |       |
|----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| A4233          | A4234 | A4235 | A4236 | A4244 | A4245 | A4246 | A4247 | A4250 | A4253 |
| A4255          | A4256 | A4257 | A4258 | A4259 | E0607 | E2100 | E2101 |       |       |

Adjunctive CGM devices do not replace a standard home BGM. The supply allowance for an adjunctive CGM (procedure code A4238) encompasses all items necessary for the use of the device and includes, but is not limited to, CGM sensors and transmitters. Procedure code A4238 does not include a home BGM and related BGM testing supplies. Clients on an insulin pump with adjunct CGM capability may be billed separately, in addition to procedure code A4238:

- Two boxes for test strips (procedure code A4253), and
- One box for lancets (procedure code A4259) during the same calendar year by any provider.

The initial order from a health-care provider who manages the client’s diabetes is valid for the first six months. If the client continues to be compliant with use of the CGM and treatment plan, the provider may write an order for an additional six months. After the first year, an order(s) for replacement sensors, transmitter, and receiver (following frequency rules) may be written for a 12-month period.

**Note:** *Texas Medicaid fee-for-service requires providers to review for medical necessity of DME every six months. An MCO may approve an initial DME prior authorization request for a period of 6 months, unless otherwise stated, and may authorize an extension of 12 months after the initial 6 months, if medically necessary.*

Requests for the supplies for client-owned CGM devices require the ordering provider to submit a statement attesting that the client meets one of the following conditions:

- The client owns a CGM device and the client’s current condition meets the criteria outlined in this policy for the CGM.
- The client owns a CGM device and is compliant with using the CGM device to manage their diabetes.

2.2.12.7.3 Non-Covered Services

CGM devices (procedure code A9278) and supplies (procedure codes A9276 and A9277) for use with non-durable medical equipment are informational only. DME is defined as:

- Medical equipment or appliances that are manufactured to withstand repeated use, ordered by a physician or allowed practitioner for use in the home, and required to correct or ameliorate a client’s disability, condition, or illness.

**Referto:** Subsection 2.2.2, “Durable Medical Equipment (DME) and Supplies” in this handbook.

The following services are not benefits of Texas Medicaid:

- Rental of adjunct CGM devices
- Smart devices (smart phones, tablets, personal computers, etc.) used as GCM monitors

- Medical supplies used with non-covered equipment

### 2.2.12.8 CGM Integrated External Insulin Pump

A CGM integrated pump is an insulin pump that has the CGM capability. The system uses an algorithm to calculate insulin doses from the CGM readings based on thresholds of measured glucose levels and tells the pump to deliver or suspend the insulin into the client's body.

A CGM integrated pump system may be considered for prior authorization when the client meets both the CGM coverage criteria and the coverage criteria for an external insulin infusion pump. Use pump procedure code E0784 with modifier UD and procedure code E2102 with modifier U4 for an insulin pump that has adjunctive CGM capability. Pump procedure code E0784 with modifier UD and procedure code E2103 with modifier U4 may be used for an insulin pump that has non-adjunctive CGM capability.

A tubeless external insulin pump (Omnipod) may be considered as an alternative to the CGM integrated pump system through prior authorization using pump procedure code E0784 with modifier U1 combined with the disposable supply procedure code A9274.

| Procedure Code | Limitation    |
|----------------|---------------|
| E0784          | 1 per 3 years |
| E2102          | 1 per 3 years |
| E2103          | 1 per 3 years |
| A9274          | 15 per month  |

#### 2.2.12.8.1 Prior Authorization

A CGM integrated pump system may be considered for prior authorization when the client meets both the CGM coverage criteria and the coverage criteria for an external insulin infusion pump outlined in this handbook.

Providers must submit the pump (procedure code E0784) with modifier UD and CGM device (procedure code E2102 or E2103) to specify a CGM integrated pump system.

Some CGM integrated pump systems use smart devices to monitor the system to carry out their function. The device provider is responsible for supplying the software applications to make the system work appropriately.

Prior authorization requests for the tubeless external insulin pump (Omnipod) must be submitted using procedure code E0784 with U1 modifier. Disposable pods requests are submitted using supply procedure code A9274.

#### 2.2.12.8.2 Claims Filing Requirements

To qualify for a CGM integrated external insulin pump, the client must meet both CGM criteria and external insulin pump criteria outlined in this handbook.

Only one CGM integrated pump may be authorized for the qualified diabetic client. The ordering provider is responsible for requesting the appropriate device and supplies according to the client's medical need using the appropriate procedure codes.

Once the client is on a CGM integrated insulin pump, either with non-adjunctive CGM capability or with adjunctive CGM capability, claims for a stand-alone CGM will be denied.

Once the client is on a CGM integrated insulin pump, either with non-adjunctive CGM capability or with adjunctive CGM capability, claims for a regular external insulin pump will be denied.

Provider's must bill the pump (procedure code E0784) used in the CGM integrated system with modifier UD. Providers also must bill the CGM capability device (procedure code J-E2102 or J-E2103) with modifier U4 for the integrated system.

Some CGM integrated pump systems might use smart devices to monitor the system. The Medicaid DME Benefit excludes coverage for non-medical items, even when the items may be used to serve a medical purpose. The device provider is responsible for supplying the software applications to make the system work appropriately.

The alternative tubeless external insulin pump (Omnipod) should be billed using the same external insulin pump code E0784 with a U1 modifier and A9274 for its disposable pod including all supplies and accessories.

**Referto:** Subsection 2.2.12.5.1, "Prior Authorization" in this handbook for prior authorization criteria that will also apply to a CGM integrated pump system or an Omnipod.

## 2.2.13 Donor Human Milk

Donor human milk is a benefit for clients who are birth through 11 months of age when documentation submitted clearly shows that it is medically necessary and will correct or ameliorate the client's disability or physical or mental illness or condition. Documentation must include all of the following:

- The ordering physician or allowed practitioner has documented medical necessity and appropriateness.
- The parent or guardian has signed and dated an informed consent form indicating that the risks and benefits of using banked donor human milk have been discussed with them.
- The donor human milk bank adheres to quality guidelines consistent with the Human Milk Bank Association of North America or such other standards as may be adopted by HHSC.

Additional donor human milk benefits beyond the limitations listed in this handbook may be available to clients who are birth through 20 years of age with documentation of medical necessity.

Procedure code B9998 must be used when requesting or billing for donor human milk.

Donor human milk is reimbursed at a maximum fee determined by HHSC or manual pricing.

Donor human milk is only reimbursed to a Texas Medicaid-enrolled donor milk bank and only for children who are in the home setting.

The physician or allowed practitioner must address the benefits and risks of using donor human milk, such as HIV, freshness, effects of pasteurization, nutrients, and growth factors to the parent. The physician or allowed practitioner also must address donor screening, pasteurization, milk storage, and transport of the donor milk. The physician or allowed practitioner may obtain this information from the donor milk bank.

### 2.2.13.1 Prior Authorization and Documentation Requirements

Donor human milk may be considered for a maximum of six months per authorization. The authorization may be extended with documentation of medical necessity.

Prior authorization is required for donor human milk provided through Texas Medicaid THSteps CCP Services.

**Note:** *Texas Medicaid fee-for-service requires providers to review for medical necessity of DME every six months. An MCO may approve an initial DME prior authorization request for a period of 6 months, unless otherwise stated, and may authorize an extension of 12 months after the initial 6 months, if medically necessary.*

To obtain prior authorization, ordering providers must complete the CCP Prior Authorization Request Form and a Donor Human Milk Request Form every 180 days. The completed CCP Prior Authorization Request Form must be signed and dated by a physician or allowed practitioner familiar with the client before submitting the prior authorization request, and must include the procedure codes and quantities for the services requested.

The physician or allowed practitioner ordering the donor human milk must complete all of the fields in Part A of the original form, including the documentation of medical necessity. This information must be substantiated by written documentation in the clinical report. The physician or allowed practitioner must specify the quantity and the time frame in the Quantity Requested field (e.g., cubic centimeters per day or ounces per month). All of the fields in Part B of the form must be completed by the donor milk bank providing the donor human milk.

The completed CCP Prior Authorization Request Form and Donor Human Milk Request Form with the original dated signature must be maintained by the prescribing physician or allowed practitioner in the client's medical record. A copy of the completed, signed, and dated form must be maintained by the milk bank in the client's medical record.

To complete the prior authorization process by paper, the rendering provider must fax or mail the completed form to the CCP prior authorization unit. To complete the prior authorization process electronically, the rendering provider must submit the prior authorization requirements through any approved electronic methods.

The completed documentation of medical necessity and appropriateness and the signed and dated written informed consent form must be maintained in the client's clinical records. The documentation must address all of the following:

- Medical necessity, including why the particular client cannot survive and gain weight on any appropriate formula (e.g., elemental, special, or routine formula or food), or any enteral nutritional product other than donor human milk.
- Clinical feeding trial of an appropriate nutritional product has been considered with each authorization.
- The informed consent provided to the parent or guardian details the risks and benefits of using banked donor human milk.
- A copy of the CCP Prior Authorization Request Form and the Donor Human Milk Request Form.

**Referto:** [Donor Human Milk Request Form](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

[CCP Prior Authorization Request Form](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

### 2.2.13.2 Donor Human Milk Services for Inpatient Clients

Donor human milk may be reimbursed to hospital providers for services rendered to inpatient clients. Hospital providers may receive reimbursement for the donor human milk service separate from the inpatient diagnosis-related group (DRG) payment.

The hospital may be reimbursed using the following revenue and procedure code combination as an outpatient hospital service using the CMS-1450 (UB-04) claim form with the most appropriate outpatient type of bill (TOB):

| Revenue Code          | Procedure Code |
|-----------------------|----------------|
| 220 (special charges) | T2101          |

For proper reimbursement when billing procedure code T2101, the Units field on the claim form must indicate the number of ounces rendered to the client.

Procedure code T2101 may be reimbursed for donor human milk as medically necessary for clients who are 6 months of age and younger. Prior authorization is not required.

Hospitals must follow clinical recommendations for administering donor human milk to inpatient clients, and must maintain all applicable and appropriate medical necessity documentation in the client's medical record.

### 2.2.14 Hospital Beds and Equipment

A hospital bed and related equipment are considered for reimbursement for the diagnosis or treatment of illness or injury or to improve the functioning of a malformed body member. A hospital bed is not one that is typically sold as home furniture.

The following items are a benefit of Home Health Services with prior authorization:

- Hospital bed
- Air-fluidized bed
- Pressure pads or a nonpowered pressure-reducing mattress overlay
- Nonpowered pressure-reducing mattress
- Powered pressure-reducing mattress overlay system
- Powered pressure-reducing mattress
- Advanced nonpowered pressure-reducing mattress overlay
- Powered pressure-reducing mattress overlay
- Advanced nonpowered pressure-reducing mattress
- Sheepskin and lamb's wool pads
- Decubitus care accessories

**Note:** For clients who are 20 years of age and younger and do not meet criteria through Title XIX Home Health Services, hospital beds and equipment may be considered through the Texas Health Steps—Comprehensive Care Program (THSteps-CCP).

**Note:** For clients who are 21 years of age or older, requests for hospital beds and equipment that do not meet the criteria through Title XIX Home Health Services may be considered under the Texas Medicaid Home Health—Durable Medical Equipment (DME) Exceptional Circumstances process.

Side rails or mattresses may be considered for replacement only and may be considered if it is a client-owned hospital bed and the client's condition requires a replacement of an innerspring mattress or side rails.

The following items may be considered for clients who are birth through 20 years of age when documentation submitted clearly shows that the equipment is medically necessary and will correct or ameliorate the client's disability or physical or mental illness or condition:

- Pediatric hospital cribs and beds
- Enclosure frame, canopy, or bubble tops
- Positioning pillows or cushions
- Reflux wedges
- Reflux slings

Hospital beds, cribs, and equipment are a benefit when all the following criteria are met:

- FFP must be available.

- The requested equipment or supplies must be safe for use in the home.

#### **2.2.14.1 Hospital Beds**

A hospital bed is defined as a medical device with all of the following features:

- An articulating frame that allows adjustment of the head and foot of the bed
- A headboard
- A foot board
- A mattress
- Side rails of any type (A side rail is defined as a hinged or removable rail, board, or panel of any height.)

**Note:** *Without all the components listed above, Texas Medicaid will not consider a request for any hospital bed.*

#### **2.2.14.2 Pediatric Hospital Bed**

A pediatric hospital bed or pediatric crib is defined as a fully enclosed bed with all of the following features:

- A bed that allows adjustment of the head and foot of the bed.
- A manual pediatric hospital bed (procedure code E0328) or pediatric crib (procedure code E0300) allows manual adjustment to the head and leg elevation.
- A semi-electric or fully electric hospital bed (procedure code E0329) allows manual or electric adjustments to height and electric adjustments to head and leg elevation.
- A headboard
- A footboard
- A mattress
- Side rails of any type (A side rail is defined as a hinged or removable rail, board, or panel.)

Pediatric hospital beds and pediatric cribs that do not have all of these features will not be considered for prior authorization.

A bed that has side rails that extend 24 inches or less above the mattress is considered a pediatric hospital bed (procedure code E0328 or E0329). A pediatric hospital bed may be fixed or variable height. Variable height beds may be adjusted manually or electrically as required for the client's medical condition.

Procedure codes E0328 and E0329 are restricted to clients who are 20 years of age and younger.

A bed that has side rails that extend more than 24 inches above the mattress is considered a pediatric crib (procedure code E0300).

A pediatric hospital bed or pediatric crib of any width that has all of the features defined above may be considered for prior authorization using only procedure code E0300, E0328, or E0329.

Hospital beds that are not fully enclosed can be considered through Texas Medicaid home health services.

**Note:** *Texas Medicaid defines fully enclosed as having 360-degree side enclosures.*

The following procedure codes are used when billing for the rental or purchase of pediatric hospital beds, cribs, and equipment:

| Procedure Codes |       |       |       |       |       |        |  |  |  |
|-----------------|-------|-------|-------|-------|-------|--------|--|--|--|
| E0190*          | E0300 | E0316 | E0328 | E0329 | E1399 | K0739* |  |  |  |
| * Purchase only |       |       |       |       |       |        |  |  |  |

**Note:** *Reflux slings must be billed using procedure code E1399.*

The purchase of a safety enclosure frame, canopy, or bubble top (procedure code E0316) may be a benefit when the protective crib top or bubble top is for safety use. It is not considered a benefit when it is used as a restraint or for the convenience of family or caregivers.

Procedure code E0316 may be used in conjunction with procedure codes E0300, E0328, or E0329 to request a pediatric fully-enclosed bed with a canopy.

Reflux slings or wedges may be considered for clients who are birth through 11 months of age. Reflux slings or wedges may be used as positioning devices for infants who require elevation after feedings when prescribed by a physician or allowed practitioner as medically necessary and appropriate.

Procedure code E0190 with modifier UD must be used to bill the purchase of reflex wedges and positional devices (positioning pillows and cushions). This code and modifier will require manual pricing. Procedure code E0190 is limited to once per three years, per client, any provider.

Procedure code K0739 may be reimbursed for the repair of equipment.

**2.2.14.3 Prior Authorization**

Hospital beds may be considered for prior authorization for clients who cannot safely utilize a regular bed.

**2.2.14.3.1 Fixed-Height Hospital Bed**

A fixed-height bed (procedure code E0250), which allows for manual adjustment to the head and leg elevation but not height, may be considered for prior authorization if at least one of the following criteria exists:

- The client’s medical condition requires positioning of the body in ways that are not feasible in an ordinary bed.
- The client’s medical condition requires special positioning to alleviate pain.
- It is necessary to elevate the head of the bed 30 or more degrees most of the time due to, but not limited to, congestive heart failure, chronic pulmonary disease, or problems with aspiration, and alternative measures such as wedges or pillows, have been attempted but have failed to manage the client’s medical condition.

**Note:** *Texas Medicaid defines a failed measure as having no clinically significant improvement after being introduced.*

- The client requires traction equipment that can only be attached to a hospital bed.

#### 2.2.14.3.2 Variable-Height Hospital Bed

A variable-height hospital bed (procedure E0255), which allows manual adjustments to height as well as to head and leg elevations, may be considered for prior authorization if the client meets the criteria for a fixed-height hospital bed and requires a bed height that is different from a fixed-height hospital bed to permit transfers in and out of the bed to a chair, wheelchair, or to a standing position. Medical conditions that require a variable-height hospital bed include, but are not limited to, the following:

- Severe arthritis and other injuries to lower extremities that require the variable height feature to assist in ambulation by enabling the client to place his or her feet on the floor while sitting on the edge of the bed.
- Severe cardiac conditions, where the client is able to leave the bed, but must avoid the strain of “jumping” up and down.
- Spinal cord injuries (including quadriplegia and paraplegia), multiple limb amputations, and stroke, where the client is able to transfer from a bed to a wheelchair with or without help.
- Other severely debilitating diseases and conditions if the client requires a bed height different than a fixed-height hospital bed to permit transfers to a chair, wheelchair, or to a standing position.

#### 2.2.14.3.3 Semi-Electric Hospital Bed

A semi-electric hospital bed (procedure code E0260), which allows manual adjustments to height and electric adjustments to head and leg elevation, may be considered for prior authorization if the client meets the criteria for a fixed-height hospital bed and has a condition that requires frequent changes in body position or might require an immediate change in body position to avert a life-threatening situation.

#### 2.2.14.3.4 Fully-Electric Hospital Bed

A fully-electric bed (procedure code E0265), which allows electric adjustments to height and head and leg elevation, may be considered for prior authorization when all of the following criteria are met:

- The client has paraplegia or hemiplegia.
- The fully-electric hospital bed will allow the client to have functional independence with self-care.

Documentation must include an attestation statement from the client’s physician, allowed practitioner, or physical or occupational therapist that verifies a determination has been made that the fully-electric hospital bed will allow the client to independently meet their daily self-care needs.

The following hospital beds may be considered for prior authorization if the client meets the criteria for a hospital bed and the weight requirements for a bariatric bed as listed below:

- Heavy-duty, extra-wide hospital bed (procedure code E0303) capable of supporting a client who weighs more than 350 pounds, but no more than 600 pounds
- Extra heavy-duty, extra-wide hospital bed (procedure code E0304) capable of supporting a client who weighs more than 600 pounds

#### 2.2.14.3.5 Pediatric Hospital Beds and Safety Enclosure

Pediatric hospital beds and pediatric cribs (procedure codes E0300, E0316, E0328, and E0329) may be considered for prior authorization when the documentation submitted clearly shows that the requested bed or crib will correct or ameliorate the client’s condition. The documentation must meet at least one of the following criteria:

- The client’s medical condition requires positioning of the body in ways that are not feasible in an ordinary bed, including, but not limited to, the need for positioning to alleviate pain.

- The head of the bed must be elevated 30 or more degrees most of the time due to, but not limited to, congestive heart failure, chronic pulmonary disease, or problems with aspiration, and alternative measures, such as wedges or pillows, have been attempted but have failed to manage the client's medical condition.

**Note:** *Texas Medicaid defines a failed measure as having no clinically significant improvement after being introduced.*

- The client requires traction equipment that can only be attached to a hospital bed.

A semi-electric or fully electric hospital bed (procedure code E0329) may be considered for prior authorization when the submitted documentation shows that the client has a medical condition that requires frequent changes in body position or might require an immediate change in body position to avert a life-threatening situation.

The safety enclosure frame, canopy, or bubble top may be considered for prior authorization with documentation that the protective canopy top or bubble will provide for the client's safety. Prior authorization will not be considered when it will be used as a restraint or for the convenience of family or caregivers.

Reflux slings or wedges may be considered for prior authorization for clients who are 11 months of age and younger. These may be used as positioning devices for infants who require the head of the bed or crib to be elevated greater than 30 degrees after feedings when prescribed by a physician or an allowed practitioner as medically necessary and appropriate.

Positioning pillows and cushions may be considered for prior authorization with documentation of medical necessity that indicates the item will provide for or assist in the positioning needs of the client to maintain proper body alignment and skin integrity. Documentation must include what other devices have been used previously and why they proved to be ineffective.

Items used for PT or rehabilitation in the home are provided by the therapist. Requests for authorization for these purposes will not be considered.

#### **2.2.14.4 Documentation Requirements**

To request prior authorization for a hospital bed, the following documentation must be submitted:

- Accurate diagnostic information pertaining to the underlying medical diagnoses or conditions (e.g., gastrostomy feeding, suctioning, ventilator dependent, other respiratory equipment or ventilation assistance devices) to include the client's overall health status
- Client height and weight
- Client functional mobility status
- Client use of any pressure-reducing support surfaces, if applicable

The following documentation must be submitted for clients who are birth through 20 years of age:

- The diagnosis, medical needs, treatments, developmental level, and functional skills of the child. A diagnosis alone is insufficient information to consider prior authorization of the requested equipment.
- The age, length, and weight of the child.
- Description of any other devices that have been used, the length of time used, and why they were ineffective.
- How the requested equipment will correct or ameliorate the client's condition beyond that of a standard child's crib, regular bed, or standard hospital bed.
- The name of the manufacturer and the manufacturer's suggested retail price (MSRP).

A determination will be made by HHSC or its designee whether the equipment will be rented, purchased, repaired, or modified based on the client's needs, duration of use, and age of equipment. All modifications, adjustments, and repairs within the first six months after delivery are considered to be part of the purchase price.

#### **2.2.14.5 Mattresses and Support Surfaces**

A pressure-reducing support surface includes three separate groups of mattress or mattress-like equipment designed to assist in the healing of wounds. These devices are used in conjunction with conventional wound care therapy to prevent the occurrence of said wounds in susceptible clients. Pressure-reducing support surfaces are designed to prevent skin breakdown or to promote the healing of pressure ulcers by reducing or eliminating tissue interface pressure. Most of these devices reduce interface pressure by conforming to the contours of the body so that pressure is distributed over a larger surface area rather than concentrated on a more circumscribed location.

For all types of pressure-reducing support surfaces, the support surface provided for the client should be one in which the client does not “bottom out.” The Centers for Medicare & Medicaid Services (CMS) define “bottoming out” as: when an outstretched hand, palm up, between the undersurface of the overlay or mattress and in an area under the bony prominence can readily palpate the bony prominence (coccyx or lateral trochanter). This “bottoming out” criterion should be tested with the client in the supine position with head flat, in the supine position with head slightly elevated (no more than 30 degrees), and in the side-lying position.

Pressure-reducing support surfaces containing multiple components are categorized according to the clinically predominant component (usually the top-most layer of a multi-layer product) and the presence and stage of pressure ulcers.

The staging of pressure ulcers is as follows:

**Stage I:** Observable pressure related alteration of intact skin whose indicators are as follows:

- Compared to the adjacent or opposite area on the body may include changes in one or more of the following: skin temperature (warmth or coolness), tissue consistency (firm or boggy feel), or sensation (pain, itching).
- The ulcer appears as a defined area of persistent redness in lightly pigmented skin, whereas in darker skin tones, the ulcer may appear with persistent red, blue, or purple hues.

**Stage II:** Partial thickness skin loss involving epidermis, dermis, or both. The ulcer is superficial and presents clinically as an abrasion, blister, or shallow crater.

**Stage III:** Full thickness skin loss involving damage to, or necrosis of, subcutaneous tissue that may extend down to, but not through, underlying fascia. The ulcer presents clinically as a deep crater with or without undermining of adjacent tissue.

**Stage IV:** Full thickness skin loss with extensive destruction, tissue necrosis, or damage to muscle, bone, or supporting structures (e.g., tendon, joint capsule). Undermining and sinus tracts also may be associated with Stage IV pressure ulcers.

##### **2.2.14.5.1 Documentation Requirements**

A support surface that does not meet the characteristics specified in the criteria for grouping levels may be denied and considered to be not medically necessary.

To request prior authorization for a pressure-reducing support surface, the following documentation must be provided:

- Client's overall health status and all other medical diagnoses or conditions (e.g., history of decubitus)
- Documentation of the client's limited mobility or confinement to a bed

- History of previous use and results of pressure-reducing support surfaces, (e.g., wound improvement, stasis, or degradation)
- Current wound therapy, if any

#### 2.2.14.5.2 Group 1 Support Surfaces

A group 1 Support Surface may be considered for prior authorization with documentation of medical necessity if the client is completely immobile without assistance, or the client has limited mobility or existing pressure ulcer on the pelvis or trunk and at least one of the following conditions:

- Impaired nutritional status
- Fecal or urinary incontinence
- Altered sensory perception
- Compromised circulatory status

All of the support surfaces described below are considered a benefit of the Home Health Services Program when medical necessity criteria for Group 1 support surfaces are met.

Pressure pads or a nonpowered pressure-reducing mattress overlay for mattresses with the following features may be considered for reimbursement with documentation of medical necessity:

- A gel or gel-like layer with a height of two inches or greater
- An air mattress overlay with interconnected air cells that are inflated with an air pump and a cell height of three inches or greater
- A water mattress overlay with a filled height of three inches or greater
- A foam mattress overlay with all the following features:
  - Base thickness of two inches or greater and peak height of three inches or greater if it is a convoluted overlay (e.g., eggcrate) or an overall height of at least three inches if it is a nonconvoluted overlay
  - Foam with a density and other qualities that provide adequate pressure reduction
  - Durable, waterproof cover

Nonpowered pressure-reducing mattresses, with the following features, may be considered for reimbursement with documentation supporting medical necessity:

- A foam mattress with all the following features may be considered with documentation supporting medical necessity. Documentation must include all of the following features:
  - A foam height of five inches or greater
  - Foam with a density and other qualities that provide adequate pressure reduction
  - Durable, waterproof cover
  - Can be placed directly on a hospital bed frame
- An air, water, or gel mattress with all the following features may be considered for reimbursement:
  - A height of five inches or greater
  - Durable, waterproof cover

A powered pressure reducing mattress overlay system, with all the following features, may be considered for reimbursement when documentation supports medical necessity:

- The system includes an air pump or blower which provides either sequential inflation and deflation of air cells, or a low interface pressure throughout the overlay.

- Inflated cell height of the air cells through which air is being circulated is 2.5 inches or greater.
- Height of the air chambers, proximity of the air chambers to one another, frequency of air cycling (for alternating pressure overlays), and air pressure provide adequate client lift, reduces pressure, and prevents bottoming out.

#### 2.2.14.5.3 Group 2 Support Surfaces

A Group 2 support surface may be considered for prior authorization with documentation of medical necessity if the client has multiple stage II ulcers on the trunk or pelvis and has been on a comprehensive ulcer treatment program for at least the past month which has included the use of a Group 1 support surface.

The client must also have at least one of the following:

- The ulcers have remained the same or worsened over the past month.
- There are large or multiple stage III or IV pressure ulcers on the trunk or pelvis.
- Received a myocutaneous flap or skin graft for a pressure ulcer on the trunk or pelvis within the last 60 days, and have been prescribed or placed on a Group 2 or 3 support surface immediately before discharge (within the last 30 days) from the hospital or a nursing facility

All of the support surfaces described below are considered a benefit of the Home Health Services Program when medical necessity criteria for Group 2 support surfaces are met.

The powered pressure reducing mattress (alternating pressure low air loss, or powered flotation without air loss) device with all the following features may be considered for reimbursement when documentation supports medical necessity:

- The system includes an air pump or blower which provides either sequential inflation and deflation of the air cells or a low interface pressure throughout the mattress.
- Inflated cell height of the air cells through which air is being circulated is five inches or greater.
- Height of the air chambers, proximity of the air chambers to one another, frequency of air cycling (for alternating pressure mattress), and air pressure to provide adequate client lift, reduce pressure, and prevent bottoming out.
- A surface designed to reduce friction and shear.

A semi-electric hospital bed with fully integrated powered pressure-reducing mattress that has all of the features described above may be considered for reimbursement when documentation supports medical necessity.

The advanced nonpowered pressure-reducing mattress overlay device with all the following features may be considered for reimbursement when documentation supports medical necessity:

- Height and design of individual cells which provide significantly more pressure reduction than Group 1 overlay and prevent bottoming out
- Total height of 3 inches or greater
- A surface designed to reduce friction and shear
- Manufacturer product information that substantiates the product is effective for the treatment of conditions described by the coverage criteria for Group 2 support surfaces

The powered pressure-reducing mattress overlay device with all the following features may be considered for reimbursement when documentation supports medical necessity:

- The system includes an air pump or blower that provides either sequential inflation and deflation of the air cells or a low interface pressure throughout the overlay.

- Inflated cell height of the air cells through which air is being circulated is three and a half inches or greater.
- Height of the air chambers, proximity of the air chambers to one another, frequency of air cycling (for alternating pressure overlays), and air pressure to provide adequate client lift, reduce pressure and prevent bottoming out.

The advanced nonpowered pressure-reducing mattress device with all the following features may be considered for reimbursement when documentation supports medical necessity:

- Height and design of individual cells designed to provide significantly more pressure than a Group 1 mattress and prevent bottoming out
- Total height of 5 inches or greater
- A surface designed to reduce friction and shear
- Documented evidence substantiates that the product is effective for the treatment of conditions described by the coverage criteria for Group 2 support surfaces

Sheepskin and lamb's wool pads are considered a benefit of the Home Health Services Program under the same conditions as alternating pressure pads and mattresses (Group 2 pressure-reducing support surfaces) when prior authorized.

#### 2.2.14.5.4 Group 3 Support Surfaces

A Group 3 support surface may be considered for prior authorization with documentation of medical necessity when all the following criteria are met:

- There is a presence of a stage III or IV ulcer.
- Severely limited mobility rendering the client bed or chair bound.
- Without an air-fluidized bed, the client would be institutionalized.
- The client has been placed on a Group 2 support surface for at least a month before ordering the air-fluidized bed with the ulcers not improving or worsening.
- There has been at least weekly assessment of the wound by the physician, a nurse or other licensed health-care professional and the treating physician or allowed practitioner has done a comprehensive evaluation of the client's condition within the week before ordering the air-fluidized bed.
- A trained adult caregiver is available to assist the client with activities of daily living, maintaining fluid balance, supplying dietary needs, aiding in repositioning and skin care, administering prescribed treatments, recognizing and managing altered mental status, and managing the air-fluidized bed system and its potential problems, such as leakage.
- The physician or allowed practitioner continues to re-evaluate and direct the home treatment regimen monthly.
- All other alternative equipment has been considered and ruled out.

The existence of any one of the following conditions may result in noncoverage of the air-fluidized bed:

- Coexisting pulmonary disease (the lack of firm back support can render coughing ineffective and dry air inhalation thickens pulmonary secretions).
- Wounds requiring moist wound dressings that are not protected with an impervious covering such as plastic wrap or other occlusive material (if wet-to-dry dressings are being utilized, dressing changes must be frequent enough to maintain their effectiveness).
- For clients who are 21 years of age and older, the caregiver is unwilling or unable to provide the type of care required by the client who uses an air-fluidized bed.

- The home's structural support or electrical system cannot safely accommodate the air-fluidized bed.

Initial prior authorization for a Group 3 pressure-reducing support surface will be for no more than 30 days. Prior authorized extensions may be considered for reimbursement in increments of 30-day periods, up to a maximum of four months, when documentation supports continued significant improvement in wound healing. Coverage beyond four months will be on a case-by-case basis after review by the medical director or designee.

Air-fluidized beds may be considered for reimbursement when the medical necessity criteria for Group 3 support surfaces are met.

### **2.2.14.6 Equipment and Other Accessories**

The following equipment or accessories may be considered with documentation of medical necessity:

- Positioning devices
- Bed cradle (keeps bed covers from touching affected skin)
- Trapeze bars

#### **2.2.14.6.1 Accessories**

A mattress of any size with innerspring may be considered for prior authorization with procedure code E0271.

Replacement rails and hospital bed frame padding or covers may be considered for prior authorization as a hospital bed accessory (procedure code E0315) with documentation that the padding, covers or rails are required to prevent injury (for example, related to seizure activity) or to prevent entrapment.

#### **2.2.14.6.2 Prior Authorization**

Heel or elbow protector (procedure code E0191) does not require prior authorization. Prior authorization is required for all other hospital beds, equipment, and services provided through Texas Medicaid Title XIX Home Health Services. Prior authorization also includes any accessories, modifications, adjustments, and repairs of the equipment. Positioning cushions or pillows (procedure code E0190) may be considered with documentation of medical necessity that the item will provide pressure relief and positioning in the treatment of decubiti, burns, or musculoskeletal injuries. Documentation must include a listing of other devices that have been used and why the devices proved ineffective.

A trapeze bar attached to a bed (procedure code E0910 or E0911) may be considered if the client requires this device to sit up, to change body position, to get in or out of bed, or for other medical reasons with documentation of medical necessity.

"Free-standing" trapeze equipment (procedure code E0940 or E0912) may be considered if the client does not have an eligible hospital bed, but the client needs this device to sit up, to change body position, to get in or out of bed, or for other medical reasons with documentation of medical necessity.

An over-bed table (procedure code E0315) may be considered if the client is bed-bound and needs the over-bed table for treatments.

### **2.2.14.7 Decubitus Care Accessories**

For prior authorization of decubitus care accessories, the following documentation must be provided:

- Wound measurements including location, length, width, and depth
- Any undermining or tunneling
- Odor, if applicable

### **2.2.14.8 Replacement**

Beds rails and frames that have been purchased are anticipated to last a minimum of five years.

#### 2.2.14.8.1 Prior Authorization

Prior authorization for replacement may be considered within five years of purchase when one of the following occurs:

- There has been a significant change in the client's condition, such that the current equipment no longer meets the client's needs.
- The equipment is no longer functional and cannot be repaired or it is not cost effective to repair.

Replacement of equipment may be considered when loss or irreparable damage has occurred. A copy of the police or fire report, when appropriate, and the measures to be taken to prevent reoccurrence must be submitted.

In situations where the equipment has been abused or neglected by the client, the client's family, or the caregiver, a referral to the Department of State Health Services (DSHS) Health Screening and Case Management unit will be made by the Home Health Services prior authorization unit for clients who are 20 years of age and younger. Providers will be notified that the state will be monitoring this client's services to evaluate the safety of the environment for both the client and equipment.

Repairs require replacement of components that are no longer functional. Technician fees are considered to be part of the cost of the repair.

Repairs to client-owned equipment may be considered with documentation of medical necessity.

Providers are responsible for maintaining documentation in the client's medical record specifying the repairs and supporting medical necessity.

Rental equipment may be considered during the period of repair. Routine maintenance of rented equipment is the provider's responsibility.

Pediatric hospital cribs and beds, enclosed beds, and safety enclosure frames, canopies, or bubble tops that have been purchased are anticipated to last a minimum of five years.

#### 2.2.14.9 Non-covered Items

A safety enclosure (procedure code E0316) used to prevent a client from leaving the bed is not a benefit of Home Health Services. A safety enclosure or enclosed bed may be considered through CCP for safety use.

Traction equipment (procedure codes E0890, E0947, and E0948) is not a benefit of Home Health Services.

The following types of beds will not be considered for prior authorization, because they are not considered medically necessary or are inappropriate for use in the home setting:

- Institutional type beds (procedure code E0270)
- An ordinary or standard bed typically sold as furniture (may consist of a frame, box spring, and mattress, and is of fixed height with no head or leg elevation adjustments). These types of beds are not primarily medical in nature, not primarily used in the treatment of disease or injury, and are normally of use in the absence of illness or injury. They are not considered durable medical equipment (DME) by Texas Medicaid.
- All non-hospital adjustable beds available to the general public as furniture. These types of beds are not primarily medical in nature, not primarily used in the treatment of disease or injury, and are normally of use in the absence of illness or injury. They are a comfort and convenience item and are not considered DME by Texas Medicaid.
- Hospital beds without rails. Texas Medicaid considers side rails an integral part of medically necessary bed.

- Beds with rails of any height that do not allow head and foot elevation (e.g., platform beds with rails), and are primarily used to prevent clients from leaving the bed. This types of beds are not primarily medical in nature.

#### 2.2.14.10 Hospital Beds and Equipment Procedure Code Table

| Procedure Code                                                                           | Maximum Limitation                                               |
|------------------------------------------------------------------------------------------|------------------------------------------------------------------|
| <b>* Only one of either procedure code E0188 or E0189 is allowed every rolling year.</b> |                                                                  |
| E0184                                                                                    | 1 purchase every 5 years; 1-month rental                         |
| E0185                                                                                    | 1 purchase every 5 years; 1-month rental                         |
| E0186                                                                                    | 1 purchase every 5 years; 1-month rental                         |
| E0187                                                                                    | 1 purchase every 5 years; 1-month rental                         |
| E0188                                                                                    | 1 every year*                                                    |
| E0189                                                                                    | 1 every year*                                                    |
| E0193                                                                                    | 1 per month                                                      |
| E0194                                                                                    | 1 per month                                                      |
| E0196                                                                                    | 1 per month                                                      |
| E0197                                                                                    | 1 per month                                                      |
| E0198                                                                                    | 1 purchase every 5 years; 1-month rental                         |
| E0199                                                                                    | 1 every 5 years                                                  |
| E0250                                                                                    | 1 purchase every 5 years; 1-month rental                         |
| E0255                                                                                    | 1 purchase every 5 years; 1-month rental                         |
| E0260                                                                                    | 1 purchase every 5 years; 1-month rental                         |
| E0265                                                                                    | 1 purchase every 5 years; 1-month rental                         |
| E0271                                                                                    | 1 every 5 years                                                  |
| E0277                                                                                    | 1 per month                                                      |
| E0280                                                                                    | 1 purchase every 5 years; 1-month rental                         |
| E0303                                                                                    | 1 purchase every 5 years; 1-month rental, 4 rentals per lifetime |
| E0304                                                                                    | 1 purchase every 5 years; 1-month rental, 4 rentals per lifetime |
| E0305                                                                                    | 1 every 5 years                                                  |
| E0310                                                                                    | 1 every 5 years                                                  |
| E0315                                                                                    | 1 every 5 years                                                  |
| E0371                                                                                    | 1 purchase every 5 years; 1-month rental                         |
| E0372                                                                                    | 1 purchase every 5 years; 1-month rental                         |
| E0373                                                                                    | 1 purchase every 5 years; 1-month rental                         |
| E0910                                                                                    | 1 purchase every 5 years; 1-month rental                         |
| E0911                                                                                    | 1 purchase every 5 years; 1-month rental                         |
| E0912                                                                                    | 1 purchase every 5 years; 1-month rental                         |
| E0940                                                                                    | 1 purchase every 5 years; 1-month rental                         |

#### 2.2.15 Incontinence Supplies

Incontinence supplies, such as diapers, briefs, pull-ons, liners, wipes, and underpads, may be considered for reimbursement through CCP for those clients who are birth through 3 years of age with a medical condition resulting in an increased urine or stool output beyond the typical output for this age group,

such as celiac disease, short bowel syndrome, Crohn's disease, thymic hypoplasia, Acquired Immunodeficiency Syndrome (AIDS), congenital adrenal hyperplasia, diabetes insipidus, Hirschsprung's disease, or radiation enteritis.

For clients who are 4 years of age or older, incontinence supplies may be considered through Title XIX Home Health Services when their medical conditions result in an impairment of urination and/or stool. For clients who do not meet criteria through Title XIX Home Health Services, incontinence supplies may be considered through CCP with documentation of medical necessity.

**Note:** *For clients who are 21 years of age or older, requests for incontinence supplies that do not meet the criteria through Title XIX Home Health Services may be considered under the Texas Medicaid Home Health—Durable Medical Equipment (DME) Exceptional Circumstances process.*

Lack of bladder or bowel control is considered normal development for clients who are 4 years of age or younger.

Reusable diapers, briefs, pull-ons, liners, wipes, and underpads are not a benefit of CCP. Gloves used to change diapers, briefs, and pull-ons are not considered medically necessary unless the client has skin breakdown or a documented disease that may be transmitted through the urine.

- Incontinence supplies billed for a one-month period must be based on the frequency or quantity ordered by the physician or allowed practitioner on the Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form.

#### **2.2.15.1 Skin Sealants, Protectants, Moisturizers, and Ointments for Incontinence-Associated Dermatitis**

Incontinence-associated dermatitis is classified by category:

- Category 1—Small area of skin breakdown (<20 cm<sup>2</sup>) with mild redness (blotchy and non-uniform) and mild erosion involving the epidermis only.
- Category 2—Moderate area of skin breakdown (20-50 cm<sup>2</sup>) with moderate redness (severe in spots, but not uniform in appearance) and moderate erosion involving epidermis and dermis with no or little exudate.
- Category 3—Large area of skin breakdown (>50 cm<sup>2</sup>) with severe redness (uniformly severe in appearance) and severe erosion of epidermis with moderate involvement of the dermis and no or small volume of exudate.
- Category 4—Large area of skin breakdown (>50 cm<sup>2</sup>) with severe redness (uniformly severe in appearance) and extreme erosion of epidermis and dermis with moderate volume of persistent exudate.

Skin sealants, protectants, moisturizers, and ointments (procedure code A6250) may be considered for clients who are 4 years of age or older and have documented incontinence-associated dermatitis.

For clients who have Category 1 or Category 2 incontinence-associated dermatitis, prior authorization is not required for a maximum quantity of 2 containers (no less than 4 ounces per container) per month and 12 containers per year of skin sealants, protectants, moisturizers, and ointments. Providers must use procedure code A6250 with modifier UA to bill for these products.

For clients who have Category 3 or Category 4 incontinence-associated dermatitis, prior authorization and documentation of medical necessity is required for skin sealants, protectants, moisturizers, and ointments that are not used for Category 1 or Category 2 incontinence-associated dermatitis. Providers must use procedure code A6250 without a modifier to bill for these products.

Providers must use procedure code A6250 instead of procedure code A5120 when billing for skin sealants, protectants, moisturizers, and ointments.

**Note:** *Skin sealants, protectants, moisturizers, ointments for diagnoses other than incontinence related dermatitis (i.e., wounds, decubitus ulcers, periwound skin complications, peristomal skin complications) may be considered for reimbursement with prior authorization.*

**2.2.15.2      Diapers, Briefs, Pull-ons, and Liners**

Diapers and briefs are defined as incontinence items attached with tabs. Pull-ons are defined as incontinence items that do not attach with tabs and are slip-on items, such as “pull-ups.” Liners are intended to be worn inside diapers, briefs, and pull-ons to increase absorbency. Reusable diapers or briefs are not a benefit of Home Health Services.

For clients who are 4 years of age and older and have a medical condition that results in chronic incontinence, up to a maximum total combination of 240 per month of diapers, briefs, or liners may be considered without prior authorization. Quantities in excess of 240 per month may be considered with documentation of medical necessity and prior authorization.

The following procedure codes must be used when billing for diapers, briefs, and liners and are limited to a combined total of 240 per month:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| T4521           | T4522 | T4523 | T4524 | T4525 | T4526 | T4527 | T4528 | T4529 | T4530 |
| T4531           | T4532 | T4533 | T4534 | T4535 | T4543 | T4544 |       |       |       |

**Note:** *Gloves used to change diapers and briefs are not considered medically necessary unless the client has skin breakdown or a documented disease that may be transmitted through the urine or stool.*

**2.2.15.3      Diaper Wipes**

For clients who are 4 years of age and older and are receiving diapers, briefs, or pull-ons up to 2 boxes of diaper wipes per month do not require prior authorization. Additional quantities may be considered, with documentation of medical necessity and prior authorization, for clients:

- Who are 4 through 20 years of age, through THSteps-CCP.
- Who are 21 years of age or older, through the Texas Medicaid Home Health – Durable Medical Equipment (DME) Exceptional Circumstances process.

Providers must use procedure code A4335 with modifier U9 instead of procedure code A5120 when billing for diaper wipes.

If there is not an appropriate procedure code for supplies, providers may request prior authorization using procedure code A4335.

Diaper wipes may be considered for clients who are receiving diapers, briefs, or pull-ons through CCP.

**2.2.15.4      Underpads**

For clients who are 4 years of age and older and are receiving diapers/briefs/pull-ons/liners/urine collection devices/bowel management supplies, up to a maximum of 120 underpads per month may be considered without prior authorization. Quantities in excess of 120 per month may be considered with documentation of medical necessity and prior authorization.

Reusable underpads are not a benefit of Home Health Services.

Underpads may be considered for clients who are receiving diapers, briefs, or pull-ons through CCP.

Providers must use procedure code A4554 when billing for underpads. Procedure code A4554 is limited to 120 per month.

**Note:** *The Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form for the supplies listed above must reflect no more than a one-month's supply of the incontinence product. The Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form must not reflect more than the maximum allowed quantity per month without requesting prior authorization.*

### **2.2.15.5 Ostomy Supplies**

The physician or allowed practitioner must specify the type of ostomy device or system to be used and how often it is to be changed on the Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form. The quantity of ostomy supplies billed for a one-month period must relate to the number of changes per month based on the frequency ordered by the physician or allowed practitioner.

Ostomy supplies may be considered for reimbursement without prior authorization.

### **2.2.15.6 Indwelling or Intermittent Urine Collection Devices**

The home setting is considered a clean environment, not a sterile one. Sterile incontinence supplies, (including the supplies in procedure codes A4311, A4312, A4313, A4314, A4315, A4316, and A4353) are a benefit in the home setting when requested for the following:

- Indwelling urinary catheters
- Intermittent catheters for clients who:
  - Are immunosuppressed
  - Have radiologically documented vesico-ureteral reflux
  - Are pregnant and have a neurogenic bladder due to spinal cord injury
  - Have a history of distinct, recurrent urinary tract infections, defined as a minimum of two within the prior 12-month period, while on a program of clean intermittent catheterization

Nonsterile or sterile gloves for use by a health-care provider in the home setting, such as a registered nurse (RN), licensed vocational nurse (LVN), or attendant, are not a benefit of Home Health Services.

#### **2.2.15.6.1 Indwelling Catheters and Related Insertion Supplies**

Indwelling catheters and related supplies may be considered without prior authorization up to a maximum of two per month for clients who have a medical condition that results in an impairment of urination. Quantities in excess of two per month may be considered with documentation of medical necessity and prior authorization.

#### **2.2.15.6.2 Intermittent Catheters and Related Insertion Supplies**

Intermittent catheters and related supplies, up to a maximum of 150 per month, may be considered without prior authorization for clients who have a medical condition that results in an impairment of urination. Quantities in excess of 150 per month may be considered with documentation of medical necessity and prior authorization.

Procedure code A4351 denotes catheters used for intermittent catheterizations. Procedure code A4351 must be accompanied with modifier SC when a hydrophilic catheter is used.

A completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form may be valid for up to 12 months for intermittent catheters and related insertion supplies for quantities within the stated benefit limits for clients who have one of the following chronic conditions:

| Diagnosis Codes |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|
| G35             | G8221 | G8222 | G8250 | G8253 | G8254 | G834  | N310  |
| N311            | N312  | N319  | Q054  | Q057  | Q058  | Q0701 | Q0702 |
| Q0703           | Q6410 | Q6412 | Q6419 | Q760  | Q794  |       |       |

**Note:** The diagnosis codes R32 and R339 are not specific enough to allow for the extension of the prior authorization to 12 months.

For clients who have a diagnoses other than those listed in the above table, the completed Title XIX Form may be valid for up to six months for intermittent catheters and related insertion supplies for quantities within the stated benefit limits.

**Note:** Texas Medicaid fee-for-service requires providers to review for medical necessity of DME every six months. An MCO may approve an initial DME prior authorization request for a period of 6 months, unless otherwise stated, and may authorize an extension of 12 months after the initial 6 months, if medically necessary.

For quantities greater than the stated benefit limits, prior authorization will be required and may be granted for up to six months regardless of diagnosis.

Nonsterile gloves are a benefit with prior authorization when a family member or friend is performing the catheterization.

Providers must use procedure codes A4351 or A4352 when billing for intermittent catheters. Providers must use procedure code A4353 when billing for intermittent catheters with insertion supplies. For hydrophilic catheters, procedure code A4351 must be accompanied with modifier SC.

### 2.2.15.6.3 External Urinary Collection Devices

For clients who are 4 years of age and older and have a medical condition that results in a permanent impairment of urination, external urinary collection devices, including, but not limited to, male external catheters, female collection devices, and related supplies may be considered without prior authorization. Male external catheters are limited to 31 per month. Female collection devices are limited to 4 per month. Male external catheters in excess of 31 per month and female collection devices in excess of 4 per month may be considered with documentation of medical necessity and prior authorization.

External urinary collection devices, including, but not limited to, male external catheters, female collection devices, and related supplies may be considered with a documented medical condition resulting in an increased urine or stool output beyond the typical output.

The following procedure codes must be used when billing for external urinary collection devices:

| Procedure Code | Maximum Limitation |
|----------------|--------------------|
| A4326          | 31 per month       |
| A4327          | 4 per month        |
| A4328          | 4 per month        |
| A4349          | 31 per month       |

#### **2.2.15.6.4 Urinals and Bed Pans**

Urinals and bed pans may be considered without prior authorization for clients who have a medical condition that results in an inability to ambulate to the bathroom safely (with or without mobility aids) up to a limit of 2 per year. Quantities in excess of 2 per year may be considered with documentation of medical necessity and prior authorization.

Urinals and bed pans are purchase only.

#### **2.2.15.7 Prior Authorization**

Prior authorization is required for incontinence supplies if amounts greater than the maximum limits are medically necessary.

Prior authorization is required for incontinence supplies through CCP.

A determination is made by HHSC or its designee as to the number of incontinence supplies prior authorized based on the client's medical needs.

Additional quantities may be considered with documentation of medical necessity.

The quantity of incontinence supplies billed for a one-month period must be consistent with the number of times per day the physician or allowed practitioner has ordered the supply be used on the CCP Prior Authorization Request Form.

To request prior authorization for incontinence supplies, the following documentation must be provided for the items requested:

- Accurate diagnostic information pertaining to the underlying diagnosis or condition as well as any other medical diagnoses or conditions, to include the client's overall health status
- Diagnosis or condition causing increased urination or stooling
- Client's height, weight, and waist size
- Number of times per day the physician or allowed practitioner has ordered the supply be used
- Quantity of disposable supplies requested per month

Additional information may be requested to clarify or complete a request for the supplies and equipment.

#### **2.2.15.8 Documentation Requirements**

To request prior authorization for incontinence supplies and equipment, the following documentation must be provided:

- Diagnostic information pertaining to the underlying diagnosis or condition, the diagnosis causing incontinence, and any other medical diagnoses or conditions, including the client's overall health status
- Weight and height or waist size, when applicable
- Number of times per day the physician or allowed practitioner has ordered the supply be used
- Quantity of disposable supplies requested per month by the physician or allowed practitioner

Additional information may be requested to clarify or complete a request for the supplies.

#### **2.2.15.9 Incontinence Procedure Codes with Limitations**

Any service or combination of services requires prior authorization if the maximum limitation is exceeded.

Requests for prior authorization of diaper wipes that exceed more than two boxes per month will be considered for clients:

- Who are 4 through 20 years of age through THSteps-CCP.
- Who are 21 years of age or older, through the Texas Medicaid Home Health-Durable Medical Equipment (DME) Exceptional Circumstances process.

| Procedure Code | Maximum Limitation |
|----------------|--------------------|
| A4310          | 2 per month        |
| A4311          | 2 per month        |
| A4312          | 2 per month        |
| A4313          | 2 per month        |
| A4314          | 2 per month        |
| A4315          | 2 per month        |
| A4316          | 2 per month        |
| A4320          | 15 per month       |
| A4322          | 4 per month        |
| A4326          | 31 per month       |
| A4327          | 4 per month        |
| A4328          | 4 per month        |
| A4330          | As needed          |
| A4331          | 2 per month        |
| A4332          | 50 per month       |
| A4333          | 2 per month        |
| A4334          | 2 per month        |
| A4335          | 2 per month        |
| A4338          | 2 per month        |
| A4340          | 2 per month        |
| A4344          | 2 per month        |
| A4346          | 2 per month        |
| A4349          | 31 per month       |
| A4351          | 150 per month      |
| A4352          | 150 per month      |
| A4353          | 150 per month      |
| A4354          | 2 per month        |
| A4355          | 2 per month        |
| A4356          | 2 per month        |
| A4357          | 2 per month        |
| A4358          | 2 per month        |
| A4360          | 31 per month       |
| A4361          | As needed          |
| A4362          | As needed          |
| A4363          | As needed          |

| Procedure Code | Maximum Limitation |
|----------------|--------------------|
| A4364          | 8 per month        |
| A4366          | As needed          |
| A4367          | As needed          |
| A4368          | As needed          |
| A4369          | As needed          |
| A4371          | As needed          |
| A4372          | As needed          |
| A4373          | As needed          |
| A4375          | As needed          |
| A4376          | As needed          |
| A4377          | As needed          |
| A4378          | As needed          |
| A4379          | As needed          |
| A4380          | As needed          |
| A4381          | As needed          |
| A4382          | As needed          |
| A4383          | As needed          |
| A4384          | As needed          |
| A4385          | As needed          |
| A4387          | As needed          |
| A4388          | As needed          |
| A4389          | As needed          |
| A4390          | As needed          |
| A4391          | As needed          |
| A4392          | As needed          |
| A4393          | As needed          |
| A4394          | As needed          |
| A4395          | As needed          |
| A4396          | 1 per day          |
| A4398          | As needed          |
| A4399          | 1 per day          |
| A4400          | As needed          |
| A4402          | 4 per month        |
| A4404          | As needed          |
| A4405          | As needed          |
| A4406          | As needed          |
| A4407          | As needed          |
| A4408          | As needed          |
| A4409          | As needed          |
| A4410          | As needed          |

| Procedure Code | Maximum Limitation |
|----------------|--------------------|
| A4411          | As needed          |
| A4412          | As needed          |

| T4544          | *240 per month     |
| E0275          | 1 per 180 days     |
| E0276          | 1 per 180 days     |
| E0325          | 1 per 180 days     |
| E0326          | 1 per 180 days     |

**Referto:** Subsection 2.2.15.2, “Diapers, Briefs, Pull-ons, and Liners” in this handbook for an explanation of the item limitations identified with an asterisk (\*).

The following procedure codes always require prior authorization even if the maximum benefit limitation allowed has not been exceeded:

| Procedure Code | Maximum Limitation |
|----------------|--------------------|
| A4927          | 1 per month        |
| A6250          | 2 per month        |

## 2.2.16 Intravenous (IV) Therapy Equipment and Supplies

The following equipment and supplies are used in the delivery of IV therapy and are a benefit of Home Health Services. The following procedure codes require prior authorization unless otherwise specified:

| Procedure Code |       |       |       |       |       |       |       |       |       |
|----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| A4221          | A4222 | A4223 | A4305 | A4306 | A4649 | A4930 | A9900 | E0776 | E0779 |
| E0780          | E0781 | E0791 | K0455 | K0552 | S1015 | S5036 |       |       |       |

**Note:** Additional supply procedure codes not listed may be considered with documentation of medical necessity.

The following IV supplies listed are available without prior authorization up to the stated quantity limitations. Prior authorization is required for any quantities exceeding the limitations with documentation supporting the medical necessity of the quantity requested.

| Procedure Code | Limitation     |
|----------------|----------------|
| A4206          | 30 per month   |
| A4207          | 30 per month   |
| A4208          | 30 per month   |
| A4209          | 180 per month  |
| A4202          | 2 per month    |
| A4216          | 60 per month   |
| A4245          | 1 per month    |
| A4247          | 1 per month    |
| A4248          | 1 per month    |
| A4300          | 4 per month    |
| A4450          | 100 per month  |
| A4452          | 100 per month  |
| A4602          | 1 per 180 days |
| A4927          | 1 per month    |
| A5200          | 2 per month    |
| A6206          | 60 per month   |
| A6207          | 30 per month   |
| A6216          | 200 per month  |
| A6257          | 30 per month   |
| A6258          | 30 per month   |

| Procedure Code | Limitation     |
|----------------|----------------|
| A6402          | 200 per month  |
| K0601          | 1 per 180 days |
| K0602          | 1 per 180 days |
| K0603          | 1 per 180 days |
| K0604          | 1 per 180 days |
| K0605          | 1 per 180 days |

Types of IV access devices include but are not limited to:

- Peripheral IV lines.
- Central IV lines, including but not limited to, peripherally-inserted central catheters, subclavian catheters, and vena cava catheters.
- Central venous lines, including but not limited to, tunneled and peripherally inserted central venous catheters.
- Implantable ports, including but not limited to, access devices with subcutaneous ports.

Stopcocks increase the risk of infection and should not be routinely used for infusion administration. Routine use of in-line filters is not recommended for infection control.

**Note:** *Nonsterile or sterile gloves for use by a health-care provider in the home setting, such as an RN, LVN, or attendant, are not a benefit of Home Health Services.*

Stationary infusion pumps may be a benefit when the infusion rate must be more consistent and cannot be obtained with gravity drainage. Ambulatory infusion pumps may be a benefit when the length of infusion is greater than two hours, the client must be involved in activities away from home, and when the infusion rate must be more consistent and cannot be obtained with gravity drainage. Elastomeric infusion pumps may be a benefit for short-term use when the client or the caregiver cannot administer the infusion by pump. Dial flow regulators are a benefit and are incorporated into IV extension sets or IV tubing. Elastomeric devices may be reimbursed using procedure codes A4305 and A 4306.

Rental of an infusion pump may be prior authorized on a monthly basis for a maximum of 10 months per lifetime, with the same provider. Rentals for the same infusion pump exceeding 10 months with the same provider within a one-year period will be considered purchased. Purchase of an infusion pump (ambulatory or stationary) may be prior authorized with documentation of medical necessity that supports repeated IV administration for a chronic condition.

For clients who require cardiovascular medications, infusion pumps will be rented, but not purchased.

Repairs to client-owned equipment may be prior authorized as needed with documentation of medical necessity. Technician fees are considered part of the cost of the repair. Providers are responsible for maintaining documentation in the client's medical record that specifies the repairs and supports medical necessity. The documentation must include the date of purchase, serial number, and the reason for the repairs. All repairs and replacement parts, including batteries, within the first six months after delivery are considered part of the purchase price. Rental equipment includes all necessary accessories, supplies, modifications, adjustments, replacement parts, and repairs.

**Note:** *For clients who are 21 years of age or older, requests for IV supplies and equipment that do not meet the criteria through Title XIX Home Health Services may be considered under the Texas Medicaid Home Health—Durable Medical Equipment (DME) Exceptional Circumstances process.*

IV therapy, supplies, and equipment are not considered a benefit when the infusion or medication being administered:

- Is not considered medically necessary to the treatment of the client's illness.
- Exceeds the frequency or duration ordered by the physician or allowed practitioner.
- Is a chemotherapeutic agent.
- Is not FDA-approved, unless the physician or allowed practitioner documents why the off-label use is medically appropriate and not likely to result in an adverse reaction. In order to consider coverage of an off-label (non-FDA approved) use of a drug, documentation must include why a drug usually indicated for the specific diagnosis or condition has not been effective for the client.

Routine maintenance of rental equipment is included in the rental price.

Repairs or replacement parts may be reimbursed with documentation of a client-owned device.

Replacement batteries (procedure codes K0601, K0602, K0603, K0604, and K0605) for client-owned pumps are limited to one battery per 180 days.

### **2.2.16.1 Prior Authorization**

Additional replacement batteries for client-owned pumps (procedure codes K0601, K0602, K0603, K0604, and K0605) beyond the limit of 1 per 180 days may be considered for prior authorization with documentation of medical necessity.

All IV equipment and supplies, with the exception of implantable access catheter (A4300) require prior authorization. Prior authorization of IV equipment and supplies may be considered when administration of the drug in the home is medically necessary and is appropriate in the home setting. IV equipment may be prior authorized for rental or purchase depending on the clinician's predicted length of treatment.

The following standards are used when considering prior authorization of IV supplies:

- The aseptic technique is acceptable for IV catheter insertion and site care; the sterile technique is not required:
  - Nonsterile gloves are acceptable for the insertion of a peripheral IV catheter and for changing any IV site dressing.
  - The sterile technique may be medically necessary. Examples of medical necessity include, but are not limited to, a client who is immuno-compromised.
- A peripheral IV site is rotated no more frequently than every 72 hours, but it is rotated at least weekly.
- The IV administration set (with or without dial flow regulator), extension set (with or without dial flow regulator), and any add-on devices are changed every 72 hours.
- One IV access catheter is used per insertion.
- Saline or heparin-locked catheters:
  - Use one syringe to flush the catheter, and one syringe per each additional lumen(s) if applicable, before administration of an intermittent infusion to assess.
  - Use two syringes to flush the catheter and two syringes per each additional lumen(s) if applicable, after the intermittent infusion—one to clear the medication and one to infuse the anticoagulant or other medication used to maintain IV patency between doses, including, but not limited to, heparin.
- An injection port is cleaned before administering an intermittent infusion and capped after the infusion.

- IV catheter site care:
  - Disinfect the site with an appropriate antiseptic (including but not limited to 2 percent chlorhexidine-based preparation, tincture of iodine, or 70 percent alcohol).
  - Cover with sterile gauze, transparent dressing, or semi-permeable dressing.
  - Replace the dressing if it becomes damp, loosened, or visibly soiled.

Elastomeric devices and dial flow regulators are specialized infusion devices that may be considered for prior authorization when the device:

- Will be used for short-term medication administration (less than two weeks duration).
- Is expected to increase client compliance.
- Will better facilitate drug administration.
- Costs less than the cost of pump rental or tubing.
- The caregiver can not administer the infusion by pump.

The following criteria must be met for prior authorization of a stationary infusion pump:

- An infusion pump is required to safely administer the drug.
- The standard method of administration of the drug is through prolonged infusion or intermittent infusion, and the infusion rate must be more consistent than can be obtained with gravity drainage.
- The drug being administered requires IV infusion (i.e., the drug cannot be administered orally, intramuscularly, or by push technique).

The following criteria must be met for prior authorization of an ambulatory infusion pump:

- An infusion pump is required to safely administer the drug.
- The standard method of administration of the drug is through prolonged infusion or intermittent infusion and the infusion rate must be more consistent than can be obtained with gravity drainage.
- The drug being administered requires IV infusion (i.e., the drug cannot be administered orally, intramuscularly, or by push technique).
- The infusion administration is more than two hours and the client is involved in activities away from home, including but not limited to, physician or allowed practitioner visits.

#### **2.2.16.2 Documentation Requirements**

To request prior authorization for IV supplies and equipment, the following documentation must be provided:

- Diagnostic information pertaining to the underlying diagnosis or condition
- A completed signed and dated Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Form and documentation supporting medical necessity
- The medication and dose being administered, the duration of drug therapy, and the frequency of administration

If additional supplies are needed beyond the standards listed, prior authorization may be considered with documentation supporting medical necessity.

For additional IV access catheters, supporting documentation must have evidence that includes, but is not limited to, the following:

- Dehydration
- Vein scarring

- Fragile veins, including but not limited to, clients who are infants or elderly

For more frequent IV site changes, supporting documentation must have evidence that includes, but is not limited to, the following:

- Phlebitis
- Infiltration
- Extravasation

For more frequent IV tubing or add-on changes, supporting documentation must have evidence that includes, but is not limited to, the following:

- Phlebitis
- IV catheter-related infection
- The administered infusion requires more frequent tubing changes

### **2.2.17 Mobility Aids**

Mobility aids and related supplies, including, but not limited to canes, crutches, walkers, wheelchairs, and ramps are a benefit through Title XIX Home Health Services to assist clients to move about in their environment.

Mobility aids and related supplies, including, but not limited to, strollers, special-needs car seats, travel safety restraints, and thoracic-hip-knee-ankle orthoses (THKAO)/parapodiums are a benefit to assist clients to move about in their environment when medically necessary and Federal Financial Participation is available.

Mobility aids and related supplies may be considered for reimbursement through CCP for clients who are 20 years of age or younger who are CCP-eligible when documentation submitted clearly shows that the equipment is medically necessary and will correct or ameliorate the client's disability or physical or mental illness or condition. Documentation must include the following:

- The client's mobility status would be compromised without the requested equipment.
- The requested equipment or supplies are safe for use in the home.

Mobility aids may be considered through CCP if the requested equipment is not available through Title XIX Home Health Services or the client does not meet criteria through Title XIX Home Health Services

**Note:** *A mobility aid for a client who is birth through 20 years of age is medically necessary when it is required to correct or ameliorate a disability or physical illness or condition.*

#### **2.2.17.1 Canes, Crutches, and Walkers**

Canes, crutches, and walkers are a benefit through Title XIX Home Health Services when medically necessary to assist clients to move about in their environment. Walkers require prior authorization. Prior authorization is not required for canes, crutches, or walker accessories. Documentation of medical necessity must be provided by a physician or allowed practitioner familiar with the client and must include information on the client's impaired mobility.

#### **2.2.17.2 Wheeled Mobility Systems**

A wheeled mobility system is a manual or power wheelchair, or scooter that is a customized power or manual mobility device, or a feature or component of the mobility device, including, but not limited to, the following:

- Seated positioning components
- Manual seating options
- Adjustable frame

- Other complex or specialized components

A stroller (a multipositional client transfer system with integrated seat, operated by caregiver) for medical needs may be considered for clients who are CCP-eligible when documentation submitted clearly shows that the equipment is medically necessary and will correct or ameliorate the client's disability or physical or mental illness or condition. Documentation must include the following:

- The client does not own another seating system, including, but not limited to, a wheelchair
- The client's condition does not require another type of seating system, including, but not limited to, a wheelchair

If the client does not meet criteria for a stroller, a wheelchair may be considered through Texas Medicaid (Title XIX) Home Health Services.

Scooters may be considered for reimbursement through Texas Medicaid (Title XIX) Home Health Services.

A wheelchair is a non-customized chair mounted on four wheels that incorporates a non-adjustable frame, a sling or solid back and seat, and arm rests. Optional items included in this definition include, but are not limited, to the following:

- Handles at the back
- Foot rest
- Seat belt or safety restraint

A wheelchair includes all of the following:

- Standard (manual) wheelchairs
- Standard hemi (manual) wheelchairs
- Standard reclining (manual) wheelchairs
- Lightweight (manual) wheelchairs
- High strength lightweight (manual) wheelchairs

#### 2.2.17.2.1 Prior Authorization

A wheelchair may be prior authorized for short-term rental or for purchase with documentation supporting medical necessity and an assessment of the accessibility of the client's residence to ensure that the wheelchair is usable in the home (i.e., doors and halls wide enough, no obstructions).

#### 2.2.17.2.2 Documentation Requirements

Documentation by a physician or an allowed practitioner familiar with the client must include information on the client's impaired mobility and physical requirements. In addition, the following information must be submitted with documentation of medical necessity:

- Why the client is unable to ambulate a minimum of 10 feet due to their condition (including, but not limited to, AIDS, sickle cell anemia, fractures, a chronic diagnosis, or chemotherapy)
- If the client is able to ambulate further than 10 feet, why a wheelchair is required to meet the client's needs
- A completed Wheelchair/Scooter/Stroller Seating Assessment Form with seating measurements.

**Referto:** Section "Seating Assessment for Manual and Power Custom Wheelchairs"

- A description of growth allowance for clients
  - For clients who are 12 years of age or younger, if the wheelchair frame allows for at least a 3 inch growth potential in both width and depth, accept as sufficient growth potential.

- For clients who are 13 years of age through 17 years of age, if the wheelchair frame allows for at least a 2 inch growth potential in both width and depth, accept as sufficient growth potential.
- For clients who are 18 years of age or older, if the wheelchair frame allows for at least a 1 inch growth potential in depth and 2 inches in width, accept as sufficient growth potential.
- Growth allowance to the dimensions specified may be made with frame modification or growth kit.

### **2.2.17.3 Manual Wheelchairs-Standard, Standard Hemi, and Standard Reclining**

A standard manual wheelchair is defined as a manual wheelchair that:

- Weighs more than 36 pounds.
- Does not have features to appropriately accept specialized seating or positioning.
- Has a weight capacity of 250 pounds or less.
- Has a seat depth of between 15 and 19 inches.
- Has a seat width of between 15 and 19 inches.
- Has a seat height of 19 inches or greater.
- Is fixed height only, fixed, swing away, or detachable armrest.
- Is fixed, swing away, or detachable footrest.

A standard hemi (low seat) wheelchair is defined as a manual wheelchair that:

- Has the same features as a standard manual wheelchair.
- Has a seat to floor height of less than 19 inches.

A standard reclining wheelchair is defined as a manual wheelchair that:

- Has the same features as a standard or standard hemi manual wheelchair.
- Has the ability to allow the back of the wheelchair to move independently of the seat to provide a change in orientation by opening the seat-to-back angle and, in combination with leg rests, open the knee angle.

#### **2.2.17.3.1 Prior Authorization**

A standard manual wheelchair may be considered for prior authorization for short-term rental or purchase when all the following criteria are met:

- The client has impaired mobility and is unable to consistently ambulate more than 10 feet.
- The client does not require specialty seating components.

A standard hemi wheelchair may be considered for prior authorization for short-term rental or purchase when the client meets criteria for a standard manual wheelchair and the following criteria is met:

- The client requires a low seat-to-floor height.
- The client must use their feet to propel the wheelchair.

A standard reclining wheelchair may be considered for prior authorization for short-term rental or purchase when the client meets criteria for a standard manual wheelchair and one or more of the following criteria are met:

- The client develops fatigue with longer periods of sitting upright.
- The client is at increased risk of pressure sores with prolonged upright position.

- The client requires assistance with respirations in a reclining position.
- The client needs to perform mobility related activities of daily living (MRADLs) in a reclining position.
- The client needs to improve venous return from lower extremity in a reclining position.
- The client has severe spasticity.
- The client has excess extensor tone of the trunk muscles.
- The client has quadriplegia.
- The client has a fixed hip angle.
- The client must rest in a reclining position two or more times per day.
- The client has the inability or has great difficulty transferring from wheelchair to bed.
- The client has trunk or lower extremity casts or braces that require the reclining feature for positioning.

#### **2.2.17.4 Manual Wheelchairs-Lightweight and High-Strength Lightweight**

A lightweight manual wheelchair is defined as a manual wheelchair that:

- Has the same features as a standard or hemi manual wheelchair.
- Weighs 34 to 36 pounds.
- Has available arm styles that are height adjustable.

A high-strength lightweight wheelchair is defined as a manual wheelchair that:

- Has the same features as a lightweight manual wheelchair.
- Weighs 30 to 34 pounds.
- Has a lifetime warranty on side frames and cross braces.

##### **2.2.17.4.1 Prior Authorization**

A lightweight manual wheelchair may be considered for prior authorization for rental or purchase when all the following criteria are met:

- The client is unable to propel a standard manual wheelchair at home.
- The client is capable of independently propelling a lightweight wheelchair to meet their MRADLs at home.

A high-strength lightweight wheelchair may be considered for prior authorization for rental or purchase when the client meets all of the criteria for a lightweight manual wheelchair and meets one or more of the following criteria:

- The high-strength lightweight wheelchair will allow the client to self-propel while engaging in frequently performed activities that cannot otherwise be completed in a standard or lightweight wheelchair.
- The client requires frame dimensions (seat width, depth, or height) that cannot be accommodated in a standard, lightweight, or hemi wheelchair and the wheelchair is used at least 2 hours a day.

#### **2.2.17.5 Manual Wheelchairs-Heavy-Duty and Extra Heavy Duty**

A heavy duty wheelchair is defined as a manual wheelchair that:

- Meets the standard manual wheelchair definition.
- Has a weight capacity greater than 250 pounds.

An extra heavy duty wheelchair is defined as a manual wheelchair that:

- Meets the standard manual wheelchair definition.
- Has a weight capacity greater than 300 pounds.

#### 2.2.17.5.1 Prior Authorization

A heavy-duty wheelchair may be considered for prior authorization for short-term rental or purchase when the client has severe spasticity or all the following criteria are met:

- The client meets criteria for a standard manual wheelchair.
- The client weighs between 250 and 300 pounds.

An extra heavy duty wheelchair may be considered for prior authorization for short-term rental or purchase when all the following criteria are met:

- The client meets criteria for a standard manual wheelchair.
- The client weighs more than 300 pounds.

#### 2.2.17.6 Wheeled Mobility Systems

A wheeled mobility system is a manual or power wheelchair, or scooter that is a customized power or manual mobility device, or a feature or component of the mobility device, including but not limited to, the following:

- Seated positioning components
- Powered or manual seating options
- Specialty driving controls for powered chairs
- Adjustable frame
- Other complex or specialized components

A wheeled mobility system includes all of the following:

- Tilt-in-space (manual) wheelchairs
- Pediatric size (manual) wheelchairs and strollers
- Custom ultra lightweight (manual) wheelchairs
- All power wheelchairs
- All scooters

##### 2.2.17.6.1 Definitions and Responsibilities

The following definitions and responsibilities apply to the provision of wheeled mobility systems.

*Adjustments*—The adjustment of a component or feature of a wheeled mobility system.

Adjustments require labor only and do not include the addition, modification, or replacement of components or supplies needed to complete the adjustment.

Texas Medicaid will consider adjustments only to client-owned equipment that is considered a benefit of Texas Medicaid.

*Major Modification*—The addition of a custom or specialized feature or component of a wheeled mobility system that did not previously exist on the system due to changes in the client's needs, including, but not limited to, the items listed in this paragraph. This definition also includes the modification of a custom or specialized feature or component due to a change in the client's needs, including, but not limited to, the following:

- Seated positioning components, including, but not limited to, specialized seating or positioning components
- Powered or manual seating options, including, but not limited to, power tilt or recline seating systems and seat elevation systems
- Specialty driving controls, including, but not limited to, non-standard alternative power drive control systems
- Adjustable frame, including, but not limited to, non-standard seat frame dimensions
- Other complex or specialized components, including, but not limited to, power elevating leg rests and specialized electronic interfaces

The replacement of a previously existing custom or specialized feature or component with an identical or comparable component is considered a repair and not a major modification.

Texas Medicaid will consider major modifications only to client-owned equipment that is considered a benefit of Texas Medicaid.

*Minor Modification*—The addition or modification of non-custom or non-specialized features or components due to changes in the client's needs, including but not limited to, the following:

- Arm pads/armrests
- Leg rests/Leg extensions
- Modification of seating and positioning components to accommodate for a change in the client's size.

The replacement of a previously existing non-custom or non-specialized feature or component with an identical or comparable component is considered a repair and not a minor modification.

Texas Medicaid will consider minor modifications only to client-owned equipment that is considered a benefit of Texas Medicaid.

*Mobility Related Activity of Daily Living (MRADL)*—An activity of daily living, including, but not limited to, toileting, feeding, dressing, grooming, and bathing performed in customary locations in the residence.

*Occupational Therapist*—A person who is currently licensed by the Executive Council of Physical Therapy & Occupational Therapy Examiners to practice occupational therapy.

*Physical Therapist*—A person who is currently licensed by the Executive Council of Physical Therapy & Occupational Therapy Examiners to practice physical therapy.

**Note:** *A physical or occupational therapist is responsible for completing the seating assessment of a client obtaining a wheeled mobility system.*

*Qualified Rehabilitation Professional (QRP)*—A person who meets one or more of the following criteria:

- Holds a certification as an Assistive Technology Professional (ATP) or a Rehabilitation Engineering Technologist (RET) issued by, and in good standing with, the Rehabilitation Engineering and Assistive Technology Society of North America (RESNA).
- Holds a certification as a Seating and Mobility Specialist (SMS) issued by, and in good standing with, RESNA.

- Holds a certification as a Certified Rehabilitation Technology Supplier (CRTS) issued by, and in good standing with, the National Registry of Rehabilitation Technology Suppliers (NRRTS).

The QRP is responsible for:

- Being present at and involved in the seating assessment of the client for the rental or purchase of a wheeled mobility system.
- Being present at the time of delivery of the wheeled mobility system to direct the fitting of the system to ensure that the system functions correctly relative to the client.

*Repairs*—The replacement of a component or feature of a wheeled mobility system that is no longer functioning as designed, with an identical or comparable component that does not change the size or function of the system.

Texas Medicaid will consider repairs only to client-owned equipment that is considered a benefit of Texas Medicaid. Rental of a wheeled mobility system during the time of repair should be offered at the time of equipment pick-up, if appropriate.

### **Additional Benefit Information**

The initial purchase of all manual wheelchairs and wheeled mobility systems must include the wheel-chair base or frame, and the following standard components, which will not be prior authorized separately:

- Complete set of standard propulsion and caster wheels, including all of the following:
  - Propulsion or caster tires of any size, made of solid rubber or plastic
  - Standard hand rims
  - Complete wheel lock assembly
  - Bearings
- Standard footrest assembly (fixed, detachable, or swing away), including standard footplates, calf rests/pads, and ratchet assembly
- Standard armrests (fixed non-adjustable or detachable non-adjustable), including standard foam or plastic arm pads
- Standard seat and back upholstery

Medically necessary non-standard components may be considered for prior authorization with documentation of medical necessity for the requested component. Such components include, but are not limited to, the following:

- Flat-free inserts
- Foam filled propulsion or caster tires
- Pneumatic propulsion or caster tires
- Non-standard hand rims (including ergonomic and contoured)
- Non-standard length footrests
- Custom footrests
- Elevating footrests
- Angle adjustable footplates
- Adjustable height fixed armrests
- Adjustable height detachable armrests

- Custom size arm pads
- Gel arm pads
- Arm troughs
- Elevating leg rests

Claims for wheelchairs, components, and accessories must be submitted using the most appropriate procedure code that describes the item.

#### 2.2.17.6.2 Prior Authorization

A wheeled mobility system may be prior authorized for short-term rental or for purchase with documentation supporting medical necessity and an assessment of the accessibility of the client's residence to ensure that the wheelchair is usable in the home (i.e., doors and halls wide enough, no obstructions).

#### 2.2.17.6.3 Documentation Requirements

Documentation by a physician or an allowed practitioner familiar with the client must include information on the client's impaired mobility and physical requirements. In addition, the following information must be submitted with documentation of medical necessity:

- Why the client is unable to ambulate a minimum of 10 feet due to their condition (including, but not limited to, AIDS, sickle cell anemia, fractures, a chronic diagnosis, or chemotherapy).
- If the client is able to ambulate further than 10 feet, why a wheelchair is required to meet the client's needs.
- An itemized component list for custom manual or power wheeled mobility systems.
- A completed Wheelchair/Scooter/Stroller Seating Assessment Form with seating measurements that includes documentation supporting medical necessity, including:
- For clients 12 years of age and younger, the wheelchair frame must accommodate a minimum of 3 inches of growth potential in width and depth.
- For clients 13 years of age through 17 years of age, the wheelchair frame must accommodate a minimum of 2 inches of growth potential in width and depth.
- For clients 18 years of age and older, the wheelchair frame must accommodate a minimum of 1 inch in depth and 2 inches in width of growth potential.

Documentation of frame modifications or growth kits may be submitted to demonstrate growth allowances to the dimensions specified above.

When medically necessary, prior authorization may also be considered for the rental or purchase of an alternative wheelchair on a case-by-case basis, as follows:

- A manual wheelchair will be considered for a client who owns or is requesting a power wheeled mobility system with no custom features.
- A manual wheelchair or a manual wheeled mobility system will be considered for a client who owns or is requesting a power wheeled mobility system with custom features.

### **2.2.17.7 Manual Wheeled Mobility System - Tilt-in-Space**

A tilt-in-space manual wheeled mobility system is defined as a manual wheelchair that meets the following requirements:

- Has the ability to tilt the frame of the wheelchair greater than or equal to 45 degrees from horizontal while maintaining a constant back to seat angle to provide a change of orientation and redistribute pressure from one area (such as the buttocks and the thighs) to another area (such as the trunk and the head)
- Adult size has a weight capacity of at least 250 pounds
- Pediatric size has a seat width or depth of less than 15 inches

#### **2.2.17.7.1 Prior Authorization**

A tilt-in-space wheeled mobility system may be considered for prior authorization for short-term rental or purchase when all the following criteria are met:

- The client meets criteria for a standard manual wheelchair.
- The client has a condition that meets criteria for a tilt-in-space feature, including but not limited to:
  - Severe spasticity
  - Hemodynamic problems
  - Quadriplegia
  - Excess extensor tone
  - Range of motion limitations prohibit a reclining system, such as hip flexors, hamstrings, or even heterotopic ossification
  - The need to rest in a recumbent position two or more times per day and the client has an inability to transfer between bed and wheelchair without assistance
  - Documented weak upper extremity strength or a disease that will lead to weak upper extremities
  - At risk for skin break down because of inability to reposition body in a chair to relieve pressure areas

### **2.2.17.8 Manual Wheeled Mobility System-Pediatric Size**

A pediatric sized wheeled mobility system is defined as a manual standard/custom wheelchair (including those optimally configured for propulsion or custom seating) that has a seat width or depth of less than 15 inches.

### **2.2.17.9 Manual Wheeled Mobility System-Custom (Includes Custom Ultra-Lightweight)**

Custom manual wheeled mobility systems may be considered for a client who meets criteria for a manual wheelchair, has a condition that requires specialized seating, and cannot safely utilize a standard manual wheelchair.

A custom ultra lightweight wheeled mobility system is defined as an optimally configured wheelchair for independent propulsion which cannot be achieved in a standard, lightweight, or high-strength lightweight wheelchair that:

- Meets the high-strength lightweight definition and weighs less than 30 pounds.
- Has one or more of the following features to appropriately accept specialized seating or positioning:
  - Adjustable seat-to-back angle
  - Adjustable seat depth

- Independently adjustable front and rear seat-to-floor dimensions
- Adjustable caster stem hardware
- Adjustable rear axle
- Adjustable wheel camber
- Adjustable center of gravity
- Has a lifetime warranty on side frames and cross braces

#### 2.2.17.9.1 Prior Authorization

A custom ultra-lightweight wheeled mobility system may be considered for prior authorization for rental or purchase when the client meets all the criteria for a lightweight manual wheelchair and one or more of the following criteria:

- The client is able to self-propel, will have independent mobility with the use of an optimally configured chair, and meets all of the following criteria:
  - The client uses the wheelchair for a significant portion of their day to complete MRADLs.
  - The client uses the wheelchair in the community to complete MRADLs.
- The client is able to self-propel, will have independent mobility with the use of an optimally configured chair, has a medical condition that cannot be accommodated by the seating available on a standard, lightweight, or high-strength lightweight wheelchair and one or more of the following features needed by the client to ensure optimal independence with MRADLs:
  - Adjustable seat to back angle.
  - Adjustable seat depth.
  - Independently adjustable front and rear seat-to-floor dimensions.
  - Adjustable caster stem hardware.
  - Adjustable rear axle (adjustable center of gravity).
- The client meets all of the following criteria:
  - The client is unable to self-propel.
  - The client has a documented condition that requires custom seating, including, but not limited to:
    - Poor trunk control.
    - Contractures of elbow or shoulders.
    - Muscle spasticity.
    - Tone imbalance through shoulders or back.
    - Kyphosis or lordosis.
    - Lack of flexibility in pelvis or spine.
    - The client requires custom seating that cannot be accommodated on a standard, lightweight, or hemi-wheelchair.

Prior authorization for labor to create a custom molded seating system is limited to a maximum of 15 hours.

A medical stroller does not have the capacity to accommodate the client's growth. Strollers for medical use may be considered for prior authorization when all of the following criteria are met:

- The client weighs 30 pounds or more.
- The client does not already own another seating system, including, but not limited to, a standard or custom wheelchair.
- The stroller must have a firm back and seat, or insert.
- The client is expected to be ambulatory within one year of the request date or is not expected to need a wheelchair within two years of the request date.

To request prior authorization for the purchase of procedure code E1035, the criteria must be met for the level of stroller requested:

- Level One, Basic Stroller—The client meets the criteria for a stroller. Providers must use procedure code E1035.
- Level Two, Stroller with Tray for Oxygen or Ventilator—The client meets the criteria for a level-one stroller and is oxygen- or ventilator-dependent. Providers must use procedure code E1035 with modifier TF.
- Level Three, Stroller with Positioning Inserts—The client meets the criteria for a level-one or level-two stroller and requires additional positioning support. Providers must use procedure code E1035 with modifier TG.

The following supporting documentation must be submitted:

- A completed Wheelchair/Stroller Seating Assessment Form that includes documentation supporting medical necessity. This documentation must address why the client is unable to ambulate a minimum of 10 feet due to his or her condition (including, but not limited to, AIDS, sickle cell anemia, fractures, a chronic diagnosis, or chemotherapy), or if able to ambulate further, why a stroller is required to meet the client's needs.
- If the client is three years of age or older, documentation must support that the client's condition, stature, weight, and positioning needs allow adequate support from a stroller.

**Note:** *A stroller may be considered on a case-by-case basis with documentation of medical necessity for a client who does not meet the criteria listed above.*

A seating assessment must be completed by a physician or licensed occupational therapist or physical therapist, who is not employed by the equipment supplier, before requesting prior authorization.

#### **2.2.17.10 Seating Assessment for Manual and Power Custom Wheelchairs**

A seating assessment is required for:

- The rental or purchase of any device meeting the definition of a wheeled mobility system as defined in subsection 2.2.17.6, "Wheeled Mobility Systems" in this handbook.
- The purchase of any device meeting the definition of a wheelchair as defined under subsection 2.2.17.2, "Wheeled Mobility Systems" in this handbook for a client with a congenital or neurological condition, myopathy, or skeletal deformity, which requires the use of a wheelchair.

A seating assessment is required for the rental or purchase of any device meeting the definition of a wheeled mobility system or purchase of any device meeting the definition of a wheelchair for a client with a congenital or neurological condition, myopathy, or skeletal deformity that requires the use of a wheelchair as defined under subsection 2.6.9.1.2, "Wheeled Mobility Systems" in this handbook.

A seating assessment with measurements, including specifications for exact mobility/seating equipment and all necessary accessories, must be completed by a physician, licensed occupational therapist, or licensed physical therapist.

A qualified rehabilitation professional (QRP) directly employed or contracted by the DME provider must be present at and participate in all seating assessments, including those provided by a physician.

Upon completion of the seating assessment, the QRP must attest to his or her participation in the assessment by signing the Wheelchair/Scooter/Stroller Seating Assessment Form. This form must be submitted with all requests for wheeled mobility systems.

When the practitioner completing the seating assessment is an occupational or physical therapist, the occupational or physical therapist may perform the seating assessment as the therapist, or as the QRP, but may not perform in both roles at the same time. If the occupational or physical therapist is attending the seating assessment as the QRP, the occupational or physical therapist must meet the credentialing requirements and be enrolled in Texas Medicaid as a QRP.

If the practitioner completing the seating assessment is a physician, the seating assessment is considered part of the evaluation and management service provided.

If the seating assessment is completed by a physician, reimbursement is considered part of the physician's office visit and will not be reimbursed separately.

Specialized evaluations required for the provision of new complex rehabilitation technology, such as power mobility and adaptive seating systems, require physical in-person presence of the rendering provider. Texas Medicaid may reimburse only for seating assessments, fitting, or training completed in-person.

**Referto:** *The Physical Therapy, Occupational Therapy, and Speech Therapy Services Handbook (Vol. 2, Provider Handbooks)* for information about telehealth services.

#### 2.2.17.10.1 Prior Authorization

A seating assessment performed by an occupational therapist, physical therapist, or a physician, with the participation of a QRP, does not require prior authorization. A seating assessment performed by a physician is considered part of the physician evaluation and management service.

The QRP's participation in the seating assessment requires authorization before the service can be reimbursed. Authorization must be requested at the same time and on the same prior authorization request form as the prior authorization request for the QRP fitting and the wheeled mobility system or major modification to the wheeled mobility system.

Prior authorization requests for the QRP's participation in the seating assessment will be returned to the provider if the seating assessment is requested separately from the prior authorization for the QRP fitting and the wheeled mobility system or major modification to the wheeled mobility system.

The QRP participating in the seating assessment must be directly employed by or contracted with the DME provider requesting the wheeled mobility system or major modification to a wheeled mobility system.

An authorization for the QRP's participation in the seating assessment for a wheeled mobility system or major modification to a wheeled mobility system may be issued to the QRP in 15-minute increments, for a time period of up to one hour (4 units).

If the seating assessment is completed by a physician, reimbursement is considered part of the physician office visit and will not be reimbursed separately.

If the seating assessment is completed by a physician, reimbursement is considered part of the physician office visit and will not be reimbursed separately.

The physical therapist completing the seating assessment must submit procedure code 97542 with the GP and UC modifiers to bill for the seating assessment.

The occupational therapist completing the seating assessment must submit procedure code 97542 with the GO and UC modifiers to bill for the seating assessment.

Services for the QRP's participation in the seating assessment must be submitted for reimbursement by the DME provider billing for the wheeled mobility system using procedure code 97542 with modifier U1 (used for participation in the seating assessment up to four units or one hour). The DME provider must include the QRP specialty as the performing provider on the claim for all components of the wheeled mobility system, including the QRP's participation in the seating assessment.

Seating assessments are reimbursed in 15-minute increments (units) and are limited to four units (one hour).

#### **2.2.17.10.2 Documentation Requirements**

The seating assessment must clearly show that the equipment is medically necessary and will correct or ameliorate the client's disability or physical or mental illness or condition.

Documentation must include the following:

- Explain how the client or family will be trained in the use of the equipment.
- Anticipate changes in the client's needs and include anticipated modifications or accessory needs, as well as the growth potential of the wheelchair.
- Include significant medical information pertinent to the client's mobility and how the requested equipment will accommodate these needs, including intellectual, postural, physical, sensory (visual and auditory), and physical status.
- Address trunk and head control, balance, arm and hand function, existence and severity of orthopedic deformities, as well as any recent changes in the client's physical and/or functional status, and any expected or potential surgeries that will improve or further limit mobility.
- Include information on the client's current mobility/seating equipment, how long the client has been in the current equipment and why it no longer meets the client's needs.
- Include the client's height, weight, and a description of where the equipment is to be used.
- Include seating measurements.
- Include the accessibility of client's residence.
- Include manufacturer's information, including the description of the specific base, any attached seating system components, and any attached accessories, as well as the manufacturer's retail pricing information and itemized pricing for manually priced components.
- Include documentation supporting medical necessity for all accessories.
- Be documented on the Wheelchair/Scooter/Stroller Seating Assessment Form, which must be signed and dated by the qualified practitioner completing the assessment (occupational therapist, physical therapist, or physician), and the QRP who was present and participated in the assessment.
- Be submitted with the prior authorization request for the wheeled mobility system. The Form must be completed, signed and dated as outlined above.

#### **2.2.17.11 Fitting of Custom Wheeled Mobility Systems**

The fitting of a wheeled mobility system is defined as the time the QRP spends with the client fitting the various systems and components of the system to the client. It may also include time spent training the client or caregiver in the use of the wheeled mobility system. Time spent setting up the system, or travel time without the client present, is not included.

A fitting is required for any device meeting the definition of a wheeled mobility system as defined under subsection 2.2.17.6, "Wheeled Mobility Systems" in this handbook.

The fitting of a wheeled mobility system must be:

- Performed by the same QRP that was present for, and participated in, the seating assessment of the client.
- Completed prior to submitting a claim for reimbursement of a wheeled mobility system.

The QRP performing the fitting will:

- Verify the wheeled mobility system has been properly fitted to the client.
- Verify that the wheeled mobility system will meet the client's functional needs for seating, positioning, and mobility.
- Verify that the client, parent, guardian of the client, and/or caregiver of the client has received training and instruction regarding the wheeled mobility system's proper use and maintenance.

The QRP must complete and sign the DME Certification and Receipt form after the wheeled mobility system has been delivered and fitted to the client. Completion of this form by the QRP signifies that all components of the fitting as outlined above have been satisfied. The form must be completed prior to submission of a claim for a wheeled mobility system and submitted to HHSC's designee according to instructions on the form to allow for proper claims processing.

Services for fitting of a wheeled mobility system by the QRP must be submitted for reimbursement by the DME provider of the wheeled mobility system using procedure code 97542 with modifier U2 (used for final fitting of wheeled mobility system performed by QRP up to eight units or two hours). The DME provider must list the QRP who participated in the seating assessment as the performing provider on the claim for all components of the wheeled mobility system, including the fitting performed by the QRP.

All adjustments, modifications, and repairs to the wheeled mobility system within the first six months after delivery are considered part of the purchase price.

Procedure code 97542 with modifier U2 must be billed on the same claim as the procedure code(s) for the wheeled mobility system in order for both services to be reimbursed.

#### 2.2.17.11.1 Prior Authorization

Prior authorization is required for the QRP performing the fitting of a wheeled mobility system and must be included with the request for the wheeled mobility system.

The QRP must be directly employed by or contracted with the DME company providing the system and must be the same QRP who was present at and participated in the client's seating assessment.

A prior authorization may be issued to the QRP in 15-minute increments, for a time period of up to two hours (8 units), for the fitting of any manual or power wheeled mobility system. Up to one additional hour (4 units) may be authorized to the QRP with documentation of medical necessity demonstrating that fitting of three or more major systems is required, or that additional client training is required for such systems. Major systems can include, but are not limited to, the following:

- Complete complex seating system (planar system with trunk supports and hip supports or abductor or custom contoured seating system such as a molded system) Off-the-shelf seat and back cushions do not constitute a complex seating system.
- Alternative drive controls (such as a head array, mini-proportional system, etc.).
- Additional specialty control features (such as infrared access).
- Power positioning features (such as power tilt, power recline).
- Specific purpose specialty features (such as power seat elevation systems, power elevating leg rests).

### 2.2.17.11.2 Documentation Requirements

When the QRP that participated in the assessment of the client is not available to conduct the fitting of the wheeled mobility system, the DME provider must update the prior authorization for the wheeled mobility system and fitting by submitting all of the following information:

- A letter written on the DME provider's letterhead, signed and dated by a representative of the DME provider other than the new QRP.
- Documentation explaining why the original QRP could not conduct the fitting. Examples may include, but are not limited to, documentation that the QRP:
  - Is no longer associated with the DME provider requesting the wheeled mobility system.
  - Is on an extended leave from the DME provider requesting the wheeled mobility system.

An extended leave is any leave of more than 30 consecutive calendar days.

- The name and NPI of the original QRP who performed the initial assessment, and the date the assessment was completed.
- The name and NPI of the QRP who will be performing the fitting.
- A copy of the original, physician- or allowed practitioner-signed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form.

A copy of this documentation must be maintained by the provider in the client's medical record and be available upon request by HHSC or its designee.

### 2.2.17.12 Power Wheeled Mobility Systems- Group 1 through Group 5

A power wheeled mobility system or powered mobility device (PMD) is a professionally manufactured device that provides motorized wheeled mobility and body support specifically for individuals with impaired mobility. PMDs are four- or six-wheeled motorized vehicles whose steering is operated by an electronic device or joystick to control direction, turning, and alternative electronic functions, such as seat controls.

Each PMD must include all of the following basic components that may not be billed separately:

- Lap belt or safety belt (This does not include multiple-attachment-point positioning belts or padded belts.)
- Battery charger, single mode
- Batteries (initial)
- Complete set of tires and casters, any type
- Leg rests
- Foot rests or foot platform
- Arm rests
- Any weight-specific components (braces, bars, upholstery, brackets, motors, gears, etc.) as required by client weight capacity
- Controller and input device

The following definitions apply to PMDs:

- No-Power Option - A category of PMDs that cannot accommodate a power tilt, recline, or seat elevation system. A PMD that can accept only power-elevating leg rests is considered to be a no-power option chair.

- **Single-Power Option** - A category of PMDs that can accept and operate a power tilt, power recline, or a power seat elevation system, but not a combination power tilt and recline seating system. A single-power option PMD might be able to accommodate power elevating leg rests, or seat elevator, in combination with a power tilt or power recline. A PMD does not have to be able to accommodate all features to meet this definition.
- **Multiple-Power Option** - A category of PMDs that can accept and operate a combination power tilt and recline seating system. A multiple-power option PMD might also be able to accommodate power elevating leg rests, or a power seat elevator. A PMD does not have to accommodate all features to qualify to meet this definition.

#### 2.2.17.12.1 Prior Authorization

Prior authorization for a power wheeled mobility system/PMD requires the following documentation in addition to all documentation required for a custom manual wheelchair:

- The client's physical and mental ability to receive and follow instructions related to responsibilities of using equipment. The client must be able to operate a PMD independently. The therapist must provide written documentation that the client is physically and cognitively capable of managing a PMD.
- How the PMD will be operated (i.e., joystick, head pointer, puff-and-go).
- The capability of the client to understand how the PMD operates.
- The capability of the caregiver or client to care for the PMD and accessories.

#### 2.2.17.12.2 Group 1 PMDs

All Group 1 PMDs must have all the specified basic components and meet all the following requirements:

- Standard integrated or remote proportional joystick
- Nonexpandable controller
- Incapable of upgrade to expandable controller
- Incapable of upgrade to alternative control devices
- May have cross brace construction
- Accommodates nonpowered options and seating systems (e.g., recline-only backs, manually elevating leg rests [except captains chairs])
- Length - less than or equal to 40 inches
- Width - less than or equal to 24 inches
- Minimum top end speed - 3 mph
- Minimum range - 5 miles
- Minimum obstacle climb - 20 mm
- Dynamic stability incline - 6 degrees

#### **Prior Authorization Requirements**

A Group 1 PMD may be considered for prior authorization for rental or purchase when all the following criteria are met:

- The client will use the PMD for less than 2 hours per day.
- The client will use the PMD indoors on smooth, hard surfaces.

- The client will not encounter obstacles in excess of 0.75 inch.

#### 2.2.17.12.3 Group 2 PMDs

All Group 2 PMDs must have all the specified basic components and meet all the following requirements:

- Standard integrated or remote proportional joystick
- May have cross brace construction
- Accommodates seating and positioning items (e.g., seat and back cushions, headrests, lateral trunk supports, lateral hip supports, medical thigh supports [except captains chairs])
- Length - less than or equal to 48 inches
- Width - less than or equal to 34 inches
- Minimum top end speed - 3 mph
- Minimum range - 7 miles
- Minimum obstacle climb - 40 mm
- Dynamic stability incline - 6 degrees

#### **Prior Authorization Requirements**

A Group 2 PMD may be considered for prior authorization for rental or purchase when the following criteria are met:

- The client will use the PMD for 2 or more hours per day.
- The client will not routinely use the PMD for MRADLs outside the home.
- The client will not encounter obstacles in excess of 1.5 inches.

#### 2.2.17.12.4 Group 3 PMDs

All Group 3 PMDs must have all the specified basic components and meet all the following requirements:

- Standard integrated or remote proportional joystick
- Nonexpandable controller
- Capable of upgrade to expandable controller
- Capable of upgrade to alternative control devices
- May not have cross brace construction
- Accommodates seating and positioning items (e.g., seat and back cushions, headrests, lateral trunk supports, lateral hip supports, medial thigh supports [except captains chairs])
- Drive wheel suspension to reduce vibration
- Length - less than or equal to 48 inches
- Width - less than or equal to 34 inches
- Minimum top end speed - 4.5 mph
- Minimum range - 12 miles
- Minimum obstacle climb - 60 mm
- Dynamic stability incline - 7.5 degrees

**Prior Authorization Requirements**

A Group 3 PMD may be considered for prior authorization for rental or purchase when the following criteria are met:

- The client's mobility limitation is due to a neurological condition, myopathy, or congenital skeletal deformity.
- The client may routinely use the PMD for MRADLs outside of the home.
- The client will use the PMD primarily on smooth or paved surfaces.
- The client will not encounter obstacles in excess of 2.5 inches.

**2.2.17.12.5 Group 4 PMDs**

All Group 4 PMDs must have all the specified basic components and meet all the following requirements:

- Standard integrated or remote proportional joystick
- Nonexpandable controller
- Capable of upgrade to expandable controller
- Capable of upgrade to alternative control devices
- May not have cross brace construction
- Accommodates seating and positioning items (e.g., seat and back cushions, headrests, lateral trunk supports, lateral hip supports, medial thigh supports [except captains chairs])
- Drive wheel suspension to reduce vibration
- Length - less than or equal to 48 inches
- Width - less than or equal to 34 inches
- Minimum top end speed - 6 mph
- Minimum range - 16 miles
- Minimum obstacle climb - 75 mm
- Dynamic stability incline - 9 degrees

**Prior Authorization Requirements**

A Group 4 PMD may be considered for prior authorization for rental or purchase when all the following criteria are met:

- In addition to using the PMD in the home, the client will routinely use the PMD for MRADLs outside the home.
- The client will routinely use the PMD on rough, unpaved or uneven surfaces.
- The client will encounter obstacles in excess of 2.25 inches.
- The client has a documented medical need for a feature that is not available on a lower level PMD.

**Documentation Requirements**

The submitted documentation for a Group 4 PMD must include a completed assessment that is signed and dated by a physician, an allowed practitioner, or a licensed occupational or physical therapist and includes the following:

- A description of the environment where the PMD will be used in the routine performance of MRADLs.

- A listing of the MRADLs that would be possible with the use of a Group 4 PMD that would not be possible without the Group 4 PMD.
- The distance the client is expected to routinely travel on a daily basis with the Group 4 PMD.

**Note:** *The enhanced features found on a Group 4 PMD must be medically necessary to meet the client's routine MRADL and will not be approved for leisure or recreational activities.*

In addition to meeting criteria for Group 2 through Group 4 PMDs, the submitted documentation of medical necessity must demonstrate that the client requires the requested power option (e.g., the need for a power recline or tilt in space, or a combination power tilt and power recline), the no-power option, single-power option, or multiple-power option as defined in subsection 2.2.17.12, "Power Wheeled Mobility Systems- Group 1 through Group 5" in this handbook.

#### 2.2.17.12.6 Additional Requirements - Group 2 through Group 4 No-Power Option

Group 2 through Group 4 no-power option PMDs must have all the specified basic components and meet all the following requirements:

- Nonexpandable controller
- Incapable of upgrade to expandable controller
- Incapable of upgrade to alternative control devices
- Meets the definition of no-power option
- Accommodates nonpowered options and seating systems (e.g., recline-only backs, manually elevating leg rests [except captains chairs])

#### 2.2.17.12.7 Group 2 through Group 4 Single-Power Option

Group 2 through Group 4 single-power option PMDs must have all the specified basic components and meet all the following requirements:

- Nonexpandable controller
- Capable of upgrade to expandable controller
- Capable of upgrade to alternative control devices
- Meets the definition of single-power option

#### 2.2.17.12.8 Group 2 through Group 4 Multiple-Power Option

Group 2 through Group 4 multiple-power option PMDs must have all the specified basic components and meet all the following requirements:

- Nonexpandable controller
- Capable of upgrade to expandable controller
- Meets the definition of multiple-power option
- Accommodates a ventilator

#### 2.2.17.12.9 Group 5 PMDs

All Group 5 PMDs must have all the specified basic components and meet all the following requirements:

- Standard integrated or remote joystick
- Nonexpandable controller
- Capable of upgrade to expandable controller
- Seat width - minimum of 5 one-inch options

- Seat depth - minimum of 3 one-inch options
- Seat height - adjustment requirements = 3 inches
- Back height - adjustment requirements minimum of 3 options
- Seat-to-back angle range of adjustment - minimum of 12 degrees
- Accommodates nonpowered options and seating systems
- Accommodates seating and positioning items (e.g., seat and back cushions, headrests, lateral trunk supports, lateral hip supports, medial thigh supports)
- Adjustability for growth (minimum of 3 inches for width, depth, and back height adjustment)
- Special developmental capability (i.e., seat to floor, standing, etc.)
- Drive wheel suspension to reduce vibration
- Length - less than or equal to 48 inches
- Width - less than or equal to 34 inches
- Minimum top end speed - 4 mph
- Minimum range - 12 miles
- Minimum obstacle climb - 60 mm
- Dynamic stability incline - 9 degrees
- Passed crash test

#### **Prior Authorization Requirements**

A Group 5 pediatric PMD may be considered for prior authorization for rental or purchase when all the following criteria are met:

- The client weighs less than 125 pounds.
- The client is expected to grow in height.
- The client may require growth of up to 5 inches in width.
- The client may require a change in seat to floor height up to 3 inches.
- The client may require a seat to back angle range of adjustment in excess of 12 degrees.
- The client requires special developmental capability (i.e., seat to floor, standing, etc.).

#### **2.2.17.12.10 Group 5 Single-PMDs**

A group 5 single-power option PMD must have all the specified basic components and have the capability to accept and operate a power tilt or recline or seat elevation system, but not a combination power tilt and recline seating system, and may be able to accommodate power elevating leg rests, or seat elevator, in combination with a power tilt or power recline.

#### **Prior Authorization Requirements**

A Group 5 pediatric PMD with single power option may be considered for prior authorization for rental or purchase when all the following criteria are met:

- The client meets criteria for a Group 5 PMD.
- The client requires a drive control interface other than a hand or chin-operated standard proportional joystick (examples include but are not limited to head control, sip and puff, or switch control).

#### 2.2.17.12.11 Group 5 Multiple-PMDs

Group 5 multiple-power option PMD must have all the specified basic components and meet all the following requirements:

- Has the capability to accept and operate a combination power tilt and recline seating system, and may also be able to accommodate power elevating leg rests, or a power seat elevator.
- Accommodates a ventilator.

#### Prior Authorization Requirements

A Group 5 pediatric PMD with multiple power option may be considered for prior authorization for rental or purchase when the following criteria are met:

- The client meets criteria for a Group 5 PMD.
- The client requires a drive control interface other than a hand or chin-operated standard proportional joystick (examples include but are not limited to head control, sip and puff, switch control).
- The client has a documented medical need for a power tilt and recline seating system and the system is being used on the wheelchair or the client uses a ventilator which is mounted on the wheelchair.

#### 2.2.17.13 Wheelchair Ramp-Portable and Threshold

Portable and threshold ramps are a benefit of Texas Medicaid.

A portable ramp is defined as a unit that is able to be carried as needed to access a home, weighs no more than 90 pounds, or measures no more than 10 feet in length. A threshold ramp is defined as a unit that provides access over elevated thresholds.

Portable ramps exceeding the above criteria may be considered on a case-by-case basis with documentation of medical necessity and a statement that the requested equipment is safe for use.

One portable ramp and one threshold ramp for wheelchair or stroller access may be considered for prior authorization when documentation supports medical necessity. The following documentation supporting medical necessity is required:

- The date of purchase and serial number of the client's wheelchair or documentation of a wheelchair request being reviewed for purchase
- Diagnosis with duration of expected need
- A diagram of the house showing the access points with the ground-to-floor elevation and any obstacles

Providers must use procedure code E1399 for the purchase of portable and threshold stroller ramps.

A request for prior authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.

Permanent ramps, vehicle ramps, and home modifications are not a benefit of Texas Medicaid.

Ramps may be considered for rental for short term disabilities and for purchase for long term disabilities. Mobility aid lifts for vehicles and vehicle modifications are not a benefit of Texas Medicaid.

#### 2.2.17.14 Power Elevating Leg Lifts

A power elevation feature involves a dedicated motor and related electronics with or without variable speed programmability, which allows the leg rest to be raised and lowered independently of the recline and/or tilt of the seating system. It includes a switch control which may or may not be integrated with the power tilt and/or recline control(s).

#### 2.2.17.14.1 Prior Authorization

Power elevating leg lifts may be prior authorized for clients who have compromised upper extremity function that limits the client's ability to use manual elevating leg rests. The client must meet criteria for a PMD with a reclining back and at least one of the following:

- The client has a musculoskeletal condition such as flexion contractures of the knees and legs, or the placement of a brace that prevents 90-degree flexion at the knee.
- The client has significant edema of the lower extremities that requires elevating the client's legs.
- The client experiences hypotensive episodes that require frequent positioning changes.
- The client needs power tilt-and-recline and is required to maintain anatomically correct positioning and reduce exposure to skin shear.

#### 2.2.17.14.2 Documentation Requirements

The submitted documentation must include an assessment completed, signed, and dated by a physician, an allowed practitioner, or a licensed occupational or physical therapist that includes the following:

- A description of the client's current level of function without the device
- Documentation that identifies how the power elevating leg lifts will improve the client's function
- A list of MRADLs the client will be able to perform with the power elevating leg lifts that the client is unable to perform without the power elevating leg lifts and how the device will increase independence
- The duration of time the client is alone during the day without assistance
- The client's goals for use of the power elevating leg lifts

#### 2.2.17.15 Power Seat Elevation System

A power seat elevation system is used to raise and lower the client in their seated position without changing the seat angles to provide varying amounts of added vertical access.

The use of a power seat elevation system will:

- Facilitate independent transfers, particularly uphill transfers, to and from the wheelchair, and
- Augment the client's reach to facilitate independent performance of MRADLs in the home.

#### 2.2.17.15.1 Prior Authorization

A power seat elevation system may be prior authorized to promote independence in a client who meets all of the following criteria:

- The client does not have the ability to stand or pivot transfer independently.
- The client requires assistance only with transfers across unequal seat heights, and as a result of having the power seat elevation system, the client will be able to transfer across unequal seat heights unassisted.
- The client has limited reach and range of motion in the shoulder or hand that prohibits independent performance of MRADLs (such as, dressing, feeding, grooming, hygiene, meal preparation, and toileting).

#### 2.2.17.15.2 Documentation Requirements

The submitted documentation must include an assessment completed, signed, and dated by a physician, an allowed practitioner, or a licensed occupational or physical therapist that includes the following:

- A description of the client's current level of function without the device

- Documentation that identifies how the power seat elevation system will improve the client's function
- A list of MRADLs the client will be able to perform with the power seat elevation system that the client is unable to perform without the power seat elevation system and how the device will increase independence
- The duration of time the client is alone during the day without assistance
- The client's goals for use of the power seat elevation system

**Note:** *A power seat elevation system option will not be authorized for the convenience of a caregiver, or if the device will not allow the client to become independent with MRADLs and transfers.*

### **2.2.17.16 Seat Lift Mechanisms**

A medically necessary seat lift mechanism is one that operates smoothly, can be controlled by the client, and effectively assists the client in standing up and sitting down without other assistance.

The payment for a recliner or chair with the incorporated seat lift mechanism is limited to the amount of the seat lift mechanism.

#### **2.2.17.16.1 Prior Authorization**

A seat lift mechanism may be prior authorized for clients who meet all the following criteria:

- The client must have severe arthritis of the hip or knee or have a severe neuromuscular disease.
- The seat lift mechanism must be a part of the physician or allowed practitioner's course of treatment and be prescribed to correct or ameliorate the client's condition.
- Once standing, the client must have the ability to ambulate.
- The client must be completely incapable of standing up from a regular armchair or any chair in their home.

**Note:** *The fact that a client has difficulty or is even incapable of getting up from a chair, particularly a low chair, is not sufficient justification for a seat lift mechanism. Almost all clients who are capable of ambulating can get out of an ordinary chair if the seat height is appropriate and the chair has arms.*

Seat lift mechanisms are limited to those types that operate smoothly, can be controlled by the client, and can effectively assist a client in standing up and sitting down without other assistance. A seat lift operated by a spring release mechanism with a sudden, catapult-like motion and jolts the client from a seated to a standing position is not a benefit of Texas Medicaid.

#### **2.2.17.16.2 Documentation Requirements**

The submitted documentation must include an assessment completed, signed, and dated by a physician, an allowed practitioner, or a licensed occupational or physical therapist that includes the following:

- A description of the client's current level of function without the device
- Documentation that identifies how the seat lift mechanism will improve the client's function
- A list of MRADLs the client will be able to perform with the seat lift mechanism that the client is unable to perform without the seat lift mechanism and how the device will increase independence
- The duration of time the client is alone during the day without assistance
- The client's goals for use of the seat lift mechanism

Supporting documentation must be kept in the client's record that shows that all appropriate therapeutic modalities (such as medication, physical therapy) have been tried and that they failed to enable the client to transfer from a chair to a standing position.

### **2.2.17.17 Batteries and Battery Charger**

A battery charger and initial batteries are included as part of the purchase of a PMD. Replacement batteries or a replacement battery charger may be considered for reimbursement if they are no longer under warranty.

A maximum of one hour of labor may be considered to install new batteries. Labor is not reimbursed with the purchase of a new PMD or with replacement battery chargers.

#### **2.2.17.17.1 Prior Authorization**

Batteries and battery chargers will not be prior authorized for replacement within six months of delivery. Batteries and battery chargers within the first six months after delivery are considered part of the purchase price.

A maximum of one hour of labor may be prior authorized to install new batteries. Labor will not be prior authorized for a new power wheelchair or for replacement battery chargers.

#### **2.2.17.17.2 Documentation Requirements**

To request prior authorization for replacement batteries or a replacement battery charger, the provider must document the date of purchase and serial number of the currently owned wheelchair as well as the reason for the replacement batteries or battery charger.

Documentation required supporting the need to replace the batteries or battery charger must include:

- Why the batteries are no longer meeting the client's needs, or
- Why the battery charger is no longer meeting the client's needs

### **2.2.17.18 Power Wheeled Mobility Systems- Scooter**

A scooter is a professionally manufactured three- or four-wheeled motorized base operated by a tiller with a professionally manufactured basic seating system for clients who have little or no positioning needs.

A scooter must meet all the following requirements:

- Length- less than or equal to 48 inches
- Width- less than or equal to 28 inches
- Minimum top end speed- 3 mph
- Minimum range- 5 miles
- Minimum obstacle climb- 20 mm
- Radius pivot turn of less than or equal to 54 inches
- Dynamic stability incline- 6 degrees

Custom seating for scooters is not a benefit of Texas Medicaid Title XIX Home Health Services. Repairs to scooters will be considered only for a scooter purchased by the Texas Medicaid.

#### **2.2.17.18.1 Prior Authorization**

A scooter may be prior authorized for ambulatory-impaired clients with good head, trunk, and arm/hand control, without a diagnosis of progressive illness (including, but not limited to, progressive neuromuscular diseases such as amyotrophic lateral sclerosis [ALS]).

To request prior authorization for a scooter, the client must not own a power wheelchair.

A scooter may be prior authorized for a short-term rental or an initial three-month trial rental period based on documentation supporting the medical necessity and appropriateness of the device.

Assessment of the accessibility of the client's residence must be completed and included in the prior authorization documentation to ensure that the scooter is usable in the home (i.e., doors and halls wide enough, no obstructions).

#### 2.2.17.18.2 Documentation Requirements

Prior authorization for a scooter requires all the documentation required for a standard power wheelchair and meets all the following criteria:

- The client's physical and cognitive ability to receive and follow instructions related to the responsibilities of using the equipment.
- The ability of the client to physically and cognitively operate the scooter independently.
- The capability of the client to care for the scooter and understand how it operates.

#### 2.2.17.19 Push-Rim Activated Power Assist Wheelchair (PAPAW) System

A push-rim activated power assist wheelchair (PAPAW) system is a wheelchair accessory that adds a power component to manual wheelchairs for additional power for propulsion and for braking. These systems may include specially designed wheels with sensors and motors embedded to determine the force that is exerted by the person upon the wheel. The system includes components, such as the drive wheels, batteries, battery chargers, controls, and mounting hardware.

##### 2.2.17.19.1 Prior Authorization Documentation Requirements

A PAPAW system can be prior authorized using the Wheelchair/Scooter/Stroller/Seating Assessment Form (CCP/Home Health Services). All sections of the form must be completed, including the wheelchair and power wheelchair section.

The client must have the physical and mental ability to receive and follow instructions related to responsibilities of using equipment. The client must have the capability to:

- Understand how the PAPAW system and components function.
- Operate and control the PAPAW system safely.
- Self-propel and maneuver a manual wheelchair independently.
  - Clients who primarily use one arm to self-propel and maneuver independently utilizing a one-arm drive manual wheelchair may be considered.
- The PAPAW must be medically necessary for the client to perform MRADLs in a typical day. Medical necessity may include but is not limited to:
  - Client's medical needs, such as limitations in upper body strength and endurance, and can include the presence of pain.
  - Prevention of the client from completing an MRADL within a reasonable time frame in their environment.
  - Heightened risk of repetitive strain injuries.
- The client or caregiver must have the capability to maintain care for the PAPAW system and accompanying components.

The cost of purchasing new equipment as opposed to the cost of modifying current equipment is not required for the PAPAW system prior authorization.

##### 2.2.17.19.2 Seating Assessment

The addition of a PAPAW system as a wheelchair accessory is considered a type of major modification, which requires a seating assessment and a completed copy of the Wheelchair/Scooter/Stroller/Seating Assessment Form (CCP/Home Health Services).

Documentation of a new seating assessment demonstrating criteria of medical necessity is required for the PAPA system.

A description is required of a trial with the equipment requested during the seating assessment by a therapist, in a variety of environments (or simulations of customary environments), including safety awareness, ability to navigate in the environment, and operate the PAPA system independently. The description of a trial is required on the Wheelchair/Scooter/Stroller/Seating Assessment Form (CCP/Home Health Services) for a PAPA system with a new wheeled mobility system or a major modification.

If a wheeled mobility system has been fitted and delivered to the client's home by a QRP, a PAPA system may be considered for prior authorization with submission of a new Wheelchair/Scooter/Stroller/Seating Assessment Form (CCP/Home Health Services) any time within or beyond the first six months after fitting and delivery.

If a wheeled mobility system has not previously been fitted and delivered to the client's home by a QRP, initial prior authorization may be considered with submission of the same Wheelchair/Scooter/Stroller/Seating Assessment Form (CCP/Home Health Services) for both a manual wheelchair and PAPA system.

### **2.2.17.20 Client Lifts**

A lift is an item of DME that is a mechanical system used to lift or transfer a nonambulatory client between a bed, chair, wheelchair, bedside commode, bathroom, or other location. A lift may be medically necessary to ameliorate a client's medical condition or disability that results in impaired functional mobility impacting mobility related activities of daily living (MRADLs).

Electric and hydraulic lifts are movable single-stand mechanisms, often on casters, with a lifting arm attached to a sling, and lifting power that is provided by a manual hydraulic pump or an electric motor. Electric and hydraulic lifts are benefits for clients of all ages through Title XIX Home Health Services with documented medical necessity.

#### **2.2.17.21 Hydraulic Lifts**

Hydraulic lifts require prior authorization.

##### **2.2.17.21.1 Documentation Requirements**

Prior authorization for a hydraulic lift may be considered with the following documentation:

- The inability of clients to assist in their own transfers
- The weight of the client and the weight capacity of the requested lift
- The availability of a caregiver to operate the lift
- Training by the provider to the client and the caregiver on the safe use of the lift

#### **2.2.17.22 Electric Lifts**

Prior authorization for an electric lift may be considered when the client meets criteria for a hydraulic lift and additional documentation explains why a hydraulic lift does not meet the client's needs.

#### **2.2.17.23 Overhead, Fixed, and Portable Lifts**

Overhead and fixed client lifts will be considered for reimbursement through CCP for clients who are 20 years of age or younger and are CCP-eligible. In order to consider a client lift outside of those specified in the home health benefit, consideration must be given to the client's medical needs (e.g., muscle tone, pain, fear, etc.), environmental factors, and caregiver abilities.

A client lift will not be prior authorized solely for the convenience of a caregiver. Prevention of caregiver injury or consideration of client safety during transfer due to caregiver factors, such as physical abilities, is not considered "caregiver convenience."

Final set up and installation costs of client lifts, including labor costs associated with ceiling or other fixed lifts, are included in the initial purchase price of the client lift and will not be separately reimbursed. Components and accessories are also considered part of the initial purchase price of a client lift. Components and accessories include, but are not limited to, the following:

- Lift motor and gear box
- Any type of sling
- Hand controls and connectors
- Carry or spreader bar and sling attachments or straps
- Ceiling tracks or rails and components
- All mounting hardware and brackets
- Batteries
- Charger system
- Emergency stop and lowering systems
- Lifting tape
- Wheels or castors of any type
- Installation of the fixed lift systems

Repair or replacement of components, such as a sling, to client-owned equipment may be considered a benefit as needed with documentation of medical necessity. Rental of an electric or hydraulic lift may be considered during a repair of a client lift.

#### **2.2.17.24 Overhead Lifts**

The purchase of a free-standing overhead client lift (procedure code E0639) is a benefit in the home setting when services are provided by DME providers.

An overhead lift is anticipated to last a minimum of five years but may be replaced in less than five years with documentation of medical necessity.

Delivery and labor to assemble the overhead lift are not separately reimbursed.

##### **2.2.17.24.1 Prior Authorization**

Procedure code E0639 requires prior authorization.

A free-standing overhead lift may be considered for prior authorization when the client meets the criteria for a hydraulic or electric lift and additional documentation explains why a hydraulic or electric lift will not meet the client's needs. Documentation that supports the medical necessity of the requested free-standing overhead lift must include all of the following:

- A written statement from a licensed physical therapist, licensed occupational therapist, physician, or allowed practitioner that clearly outlines the client's medical need to be transferred with a free-standing overhead lift versus a hydraulic or electric lift.
- Diagrams of the home (rooms) indicating the location where the free-standing lift will be used. Diagrams must include dimensions of the rooms, including doorways, as well as the dimensions and placement of all furnishings and equipment (i.e., hospital bed, wheelchair, bedside commode, etc.) in the room.
- A list of all equipment the lift will interact with (i.e., wheelchair, hospital bed, or therapy equipment). Documentation should clearly indicate if the client owns other mobility aids, including any type of bath chair or bath lift, and explain why those pieces of equipment are not sufficient for mobility.

### 2.2.17.25 Fixed Lifts

The purchase of a fixed client lift (procedure code E0640) is a benefit in the home setting when the services are provided by home health medical supplier DME providers.

Home modifications that are necessary for the final set up and installation of a fixed lift are not benefits of Texas Medicaid. Suppliers must not submit claims for any structural changes or remodeling necessitated by the installation of a lift system.

**Note:** *Home modifications are physical changes to the home to prepare the structure for the final set up and installation of the equipment.*

A fixed lift is anticipated to last a minimum of five years but may be replaced in less than five years with documentation of medical necessity.

Delivery and labor to assemble and install the fixed lift are not separately reimbursed.

#### 2.2.17.25.1 Prior Authorization

Procedure code E0640 requires prior authorization.

A fixed lift may be considered for prior authorization when the client meets criteria for a hydraulic or electric lift and additional documentation explains why a hydraulic, electric, or free-standing overhead lift will not meet the client's needs. Documentation that supports the medical necessity of the requested fixed lift must include all of the following:

- A signed and dated statement from the DME provider attesting that the home in which the lift will be installed meets the manufacturer's requirements for installation, including documentation that the ceiling and wall structures of the residence are adequate to safely support the fixed lift.
- Documentation of whether the home is owned by the client, parent, guardian, or responsible party, such as a signed and dated document attesting to the ownership of the home. If the home is not owned by the client, parent, guardian, or responsible party, written consent of the installation from the home owner or property manager must be submitted.
- A written statement from a licensed physical therapist, licensed occupational therapist, physician, or allowed practitioner that clearly outlines the client's medical need to be transferred with a fixed lift.
- Indication of what type of home the client lives in (i.e., traditional 1-story or 2-story home, mobile home, or apartment), including diagrams of the home where the fixed lift system will be installed. Diagrams must include dimensions of the rooms including doorways, as well as the dimensions and placement of all furnishings and equipment (i.e. hospital bed, wheelchair, bedside commode, etc.) in the room. Diagrams must also include the proposed placement of all fixed components (i.e. railing or track) of the system.
- A list of all equipment the lift will interact with (i.e., wheelchair, hospital bed, or therapy equipment). Documentation should clearly indicate if the client owns other mobility aids, including any type of bath chair or bath lift, and explain why those pieces of equipment are not sufficient for mobility.
- Attestation from the DME provider stating that the provider has personnel who have been trained to install the lift system.
- Documentation confirming the home modifications necessary to allow for installation of the lift have been done or are scheduled to be completed prior to installation.

### **2.2.17.26 Portable Client Lifts for Outside Home Setting**

Portable client lifts are benefits for clients who are 20 years of age and younger. Providers must bill procedure code E0635 with modifier TG for the purchase of the portable client lift. Purchase of procedure code E0635 is limited to once per lifetime, any provider. Rental for E0635 is limited to once per month.

#### **2.2.17.26.1 Prior Authorization**

Prior authorization is required and will be considered on a case-by-case basis for portable client electric lifts that fold-up for transport and are necessary for use outside the home setting.

The provider must submit a prior authorization request with the following documentation for consideration of medical necessity:

- An explanation of why a home-based portable lift will not meet the client's needs
- A description of the circumstances, including duration of need
- The family member or caregivers who support the client with the use of the portable client lift when the client travels outside the home setting

### **2.2.17.27 Standers**

A stander is a device used by a client with a neuromuscular condition who is unable to stand alone. Standers and standing programs can improve digestion, increase muscle strength, decrease contractures, increase bone density, and minimize decalcification (this list is not all inclusive).

#### **2.2.17.27.1 Prior Authorization**

Standers, including all accessories, require prior authorization. Standers and gait trainers will not be prior authorized for a client within one year of each other.

#### **2.2.17.27.2 Documentation Requirements**

Prior authorization may be considered for standers with the following documentation:

- Diagnoses relevant to the requested equipment, including functioning level and ambulatory status
- Anticipated benefits of the equipment
- Frequency and duration of the client's standing program
- Anticipated length of time the client will require this equipment
- Client's height, weight, and age
- Anticipated changes in the client's needs, anticipated modifications, or accessory needs, as well as the growth potential of the stander

### **2.2.17.28 Gait Trainers**

Gait trainers are devices with wheels that are used to train clients with ambulatory potential. They provide the same benefits as a stander, in addition to assisting with gait training.

#### **2.2.17.28.1 Prior Authorization**

Prior authorization for a gait trainer may be considered with the following documentation:

- Documentation of medical necessity
- An assessment of the accessibility of the client's residence to ensure that a gait trainer is usable in the home (i.e., doors and halls are wide enough and have no obstructions)
- A physician or allowed practitioner familiar with the client documents that the client has ambulatory potential and will benefit from a gait training program

- The client meets the criteria for a stander

### **2.2.17.29 Accessories, Modifications, Adjustments and Repairs**

Accessories, modifications, adjustments, and repairs are benefits of Texas Medicaid as outlined below.

- All major and minor modifications, adjustments, and repairs to standard mobility aid equipment within the first six months after delivery are considered part of the purchase price.
- All modifications and adjustments to a wheeled mobility system within the first six months after delivery are considered part of the purchase price.

Mobility aids that have been purchased are anticipated to last a minimum of five years.

A major modification to a wheeled mobility system requires the completion of a new seating assessment by a qualified practitioner (physician, occupational therapist, or physical therapist), with the participation of a QRP.

Prior authorization for equipment replacement is considered within five years of equipment purchase when one of the following occurs:

- There has been a significant change in the client's condition such that the current equipment no longer meets the client's needs.
- The equipment is no longer functional and either cannot be repaired or it is not cost-effective to repair.

A wheeled mobility system that has been fitted and delivered to the client's home by a QRP and then found to be inappropriate for the client's condition will not be eligible for an upgrade, replacement, or major modification within the first six months following purchase unless there has been a significant change in the client's condition. The significant change in the client's condition must be documented by a physician or allowed practitioner familiar with the client.

#### **2.2.17.29.1 Prior Authorization**

##### **Modifications**

Modifications to custom equipment after the first six months from fitting and delivery may be considered for prior authorization if a change occurs in the client's needs, capabilities or physical/mental capability, that cannot be anticipated.

Documentation supporting the medical necessity of the requested modification must include the following:

- Description of the change in the client's condition that requires accommodation by different seating, drive controls, electronics, or other mobility base components.
- All projected changes in the client's mobility needs.
- The date of purchase, the serial number of the current equipment, and the cost of purchasing new equipment versus modifying current equipment.

Major modifications to a wheeled mobility system also require that a new seating assessment be completed by a qualified practitioner (physician, physical therapist, or occupational therapist) and submitted with the prior authorization request. A request for authorization of the QRP's participation in the seating assessment for the major modification must be included with the prior authorization request for the major modification.

Minor modifications to a wheeled mobility system do not require the completion of a new seating assessment.

Requests for equipment submitted as a minor modification or a repair to a wheeled mobility system must be submitted with modifier RB.

### Adjustments

Adjustments within the first six months after delivery, including adjustments to a wheeled mobility system within the first six months after fitting and delivery by a QRP will not be prior authorized.

A seating or positioning component alteration that does not require replacement components to accommodate a change in the client's size (height or weight) is considered an adjustment and not a major modification.

A maximum of one hour of labor for adjustments may be prior authorized as needed after the first six months from delivery.

Documentation must include the date of purchase, the serial number of the current equipment, and the reason for adjustments.

### Repairs

Repairs to client-owned equipment may be considered for prior authorization as needed with documentation of medical necessity. Technician fees are considered part of the cost of the repair.

HHSC or its designee reserves the right to request additional documentation about the need for repairs when there is evidence of abuse or neglect to equipment by the client, client's family, or caregiver. Requests for repairs when there is documented proof of abuse or neglect will not be authorized.

Requests for equipment submitted as a repair to a wheeled mobility system must be submitted with modifier RB.

Providers are responsible for maintaining documentation in the client's medical record specifying the repairs and supporting medical necessity.

Documentation must include the date of purchase and serial number of the current equipment, the cause of the damage or need for repairs, the steps the client or caregiver will take to prevent further damage if repairs are due to an accident, and when requested, the cost of purchasing new equipment as opposed to repairing current equipment.

### 2.2.17.30 Replacement

Replacement of equipment is also considered when loss or irreparable damage has occurred. The following must be submitted with the prior authorization request:

- A copy of the police or fire report, when appropriate.
- A statement about the measures to be taken in order to prevent reoccurrence.
- Replacement equipment for clients who are birth through 20 years of age and do not meet the criteria in this handbook may be considered for prior authorization through Texas Health Steps CCP.

### 2.2.17.31 Procedure Codes and Limitations for Mobility Aids

For clients who are 20 years of age and younger, the limitations listed below may not apply with evidence of medical necessity. Procedures include, but are not limited to, the following:

| Procedure Code  | Maximum Limit                            |
|-----------------|------------------------------------------|
| <b>Canes</b>    |                                          |
| E0100           | 1 per 5 years                            |
| E0105           | 1 per 5 years                            |
| <b>Crutches</b> |                                          |
| A4635           | As needed                                |
| E0110           | 1 purchase every 5 years; 1-month rental |

| Procedure Code       | Maximum Limit                            |
|----------------------|------------------------------------------|
| E0111                | 1 purchase every 5 years; 1-month rental |
| E0112                | 1 purchase every 5 years; 1-month rental |
| E0113                | 1 purchase every 5 years; 1-month rental |
| E0114                | 1 purchase every 5 years; 1-month rental |
| E0116                | 1 purchase every 5 years; 1-month rental |
| E0153                | 1 purchase every 5 years                 |
| <b>Walkers</b>       |                                          |
| A4636                | 1 per month                              |
| A4637                | As needed                                |
| E0130                | 1 purchase every 5 years; 1-month rental |
| E0135                | 1 purchase every 5 years; 1-month rental |
| E0141                | 1 purchase every 5 years; 1-month rental |
| E0143                | 1 purchase every 5 years; 1-month rental |
| E0144                | 1 purchase every 5 years; 1-month rental |
| E0147                | 1 purchase every 5 years; 1-month rental |
| E0148                | 1 purchase every 5 years; 1-month rental |
| E0149                | 1 purchase every 5 years; 1-month rental |
| E0154                | 1 per 5 years                            |
| E0155                | 1 per 5 years                            |
| E0157                | 1 per 5 years                            |
| E0158                | 1 per 5 years                            |
| E0159                | 1 per 5 years                            |
| <b>Gait Trainers</b> |                                          |
| E8001                | 1 purchase every 5 years                 |
| <b>Wheelchairs</b>   |                                          |
| 97542                | N/A                                      |
| E1050                | 1 purchase every 5 years; 1-month rental |
| E1060                | 1 purchase every 5 years; 1-month rental |
| E1070                | 1 purchase every 5 years; 1-month rental |
| E1100                | 1 purchase every 5 years; 1-month rental |
| E1110                | 1 purchase every 5 years; 1-month rental |
| E1161                | 1 purchase every 5 years; 1-month rental |
| E1220                | 1 per 5 years                            |
| E1229                | 1 per 5 years                            |
| E1231                | 1 purchase every 5 years; 1-month rental |
| E1232                | 1 purchase every 5 years; 1-month rental |
| E1233                | 1 purchase every 5 years; 1-month rental |
| E1234                | 1 purchase every 5 years; 1-month rental |
| E1235                | 1 purchase every 5 years; 1-month rental |
| E1236                | 1 purchase every 5 years; 1-month rental |

| Procedure Code           | Maximum Limit                            |
|--------------------------|------------------------------------------|
| E1237                    | 1 purchase every 5 years; 1-month rental |
| E1238                    | 1 purchase every 5 years; 1-month rental |
| E1239                    | 1 per 5 years                            |
| <b>Power Wheelchairs</b> |                                          |
| K0001                    | 1 purchase every 5 years; 1-month rental |
| K0002                    | 1 purchase every 5 years; 1-month rental |
| K0003                    | 1 purchase every 5 years; 1-month rental |
| K0004                    | 1 purchase every 5 years; 1-month rental |
| K0005                    | 1 purchase every 5 years; 1-month rental |
| K0006                    | 1 purchase every 5 years; 1-month rental |
| K0007                    | 1 purchase every 5 years; 1-month rental |
| K0008                    | 1 purchase every 5 years; 1-month rental |
| K0009                    | 1 purchase every 5 years; 1-month rental |
| K0010                    | 1 per 5 years; 1 per month rental        |
| K0011                    | 1 per 5 years                            |
| K0012                    | 1 per 5 years                            |
| K0013                    | 1 purchase every 5 years; 1-month rental |
| K0015                    | As needed                                |
| K0017                    | As needed                                |
| K0018                    | As needed                                |
| K0019                    | As needed                                |
| K0020                    | As needed                                |
| K0037                    | As needed                                |
| K0038                    | As needed                                |
| K0039                    | As needed                                |
| K0040                    | As needed                                |
| K0041                    | As needed                                |
| K0042                    | As needed                                |
| K0043                    | As needed                                |
| K0044                    | As needed                                |
| K0045                    | As needed                                |
| K0046                    | As needed; 1 per month                   |
| K0047                    | As needed; 1 per month                   |
| K0050                    | As needed                                |
| K0051                    | As needed                                |
| K0052                    | As needed                                |
| K0053                    | As needed; 1 per month                   |

The following mobility aids are not a benefit of Home Health Services:

- Items including but not limited to tire pumps, a color for a wheelchair, gloves, back packs, and flags are not considered medically necessary
- Mobile standers, power standing system on a wheeled mobility device
- Vehicle lifts and modifications
- Permanent ramps, vehicle ramps, and home modifications
- Stairwell lifts of any type
- Elevators or platform lifts of any type
- Chairs with incorporated seat lifts
- An attendant control, for safety, all power chairs are to include a stop switch
- Powered mobility device for use only outside the home

**Note:** For clients who are 21 years of age or older, requests for mobility aids that do not meet the criteria through Title XIX Home Health Services may be considered under the Texas Medicaid Home Health—Durable Medical Equipment (DME) Exceptional Circumstances process.

Texas Medicaid does not reimburse separately for associated DME charges, including battery disposal fees or state taxes. Reimbursement for associated charges is included in the reimbursement for the specific piece of equipment. White canes for the blind are considered self help adaptive aids and are not a benefit of Home Health Services.

### 2.2.18 Nutritional (Enteral) Products, Supplies, and Equipment

Medical nutritional products including enteral formulas and food thickener, may be approved for clients who have specialized nutritional requirements.

Medical nutritional products must be prescribed by a physician or allowed practitioner and be medically necessary.

Enteral nutritional products are those food products that are included in an enteral treatment protocol. They serve as a therapeutic agent for health maintenance and are required to treat an identified medical condition. Nutritional products, supplies, and equipment may be a benefit when provided in the home under Home Health Services.

For clients who are 20 years of age and younger and do not meet criteria through Home Health Services, products, supplies, and equipment can be considered through the Comprehensive Care Program (CCP).

**Note:** For clients who are 21 years of age or older, requests for nutritional (enteral) products, supplies and equipment that do not meet the criteria through Title XIX Home Health Services may be considered under the Texas Medicaid Home Health—Durable Medical Equipment (DME) Exceptional Circumstances process.

### 2.2.18.1 Enteral Nutritional Products, Feeding Pumps, and Feeding Supplies

Enteral nutritional products and related feeding supplies and equipment are a benefit through Home Health Services for clients who are 21 years of age and older and require tube feeding as their primary source of nutrition. The enteral product, supply, or equipment must be part of the medical POC outlined and maintained by the treating physician or allowed practitioner.

Enteral nutritional products may be reimbursed with the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| B4100           | B4103 | B4104 | B4149 | B4150 | B4152 | B4153 | B4154 | B4155 | B4157 |
| B4158           | B4159 | B4160 | B4161 | B4162 |       |       |       |       |       |

Enteral formulas consisting of semi-synthetic intact protein or protein isolates (procedure codes B4150 and B4152) are appropriate for the majority of clients requiring enteral nutrition.

Special enteral formulas or additives (procedure code B4104) may be considered for prior authorization with supporting documentation submitted by the client's physician or allowed practitioner indicating the client's medical needs for these special enteral formulas.

Special enteral formula may be reimbursed with the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|
| B4149           | B4153 | B4154 | B4155 | B4157 | B4161 | B4162 |

Pediatric nutritional products (procedure codes B4103, B4158, B4159, B4160, B4161, and B4162) are restricted to clients who are 20 years of age and younger.

Food thickener may be considered for clients with a swallowing disorder. B4100 is reimbursed per unit; 1 unit = 1 ounce. Food thickener option (powder, gel, or liquid) should be appropriate for the client's medical condition.

Enteral nutritional supplies and equipment may be reimbursed with the following procedure codes and limitations:

| Procedure Codes                                                                                                                      | Limitations        |

| T1999*                                                                                                                               | As needed*<br>If procedure code T1999 is used for a needleless syringe, the allowed amount is 8 per month. |
| * Appropriate limitations for miscellaneous procedure code T1999 are determined on a case-by-case basis through prior authorization. |                                                                                                            |

Procedure code B9998 may be reimbursed as needed without a modifier or with the following modifiers and limitations:

| Procedure Codes        | Descriptions                                                                      | Limitations        |
|------------------------|-----------------------------------------------------------------------------------|--------------------|
| B9998                  |                                                                                   | As Needed          |
| B9998 with modifier U1 | Disposable G-tube adapter set                                                     | 4 per month        |
| B9998 with modifier U2 | Nonobtured gastrostomy or jejunostomy tube with insertion supplies and extensions | 2 per rolling year |
| B9998 with modifier U3 | Low profile enteral extension set                                                 | 4 per month        |
| B9998 with modifier U4 | Standard gastrostomy tube                                                         | 2 per rolling year |
| B9998 with modifier U5 | Standard enteral extension set                                                    | 4 per month        |

**Note:** Appropriate limitations for miscellaneous procedure codes B9998 without a modifier are determined on a case-by-case basis through prior authorization. Specific items may be requested using procedure code B9998 using the modifiers outlined in the table above.

A backpack or carrying case for a portable enteral nutrition infusion pump may be a benefit of Home Health Services, when medically necessary and prior authorized, using procedure code B9998.

## 2.2.18.2 Prior Authorization Requirements

Prior authorization is required for most enteral products, supplies, and equipment provided through Home Health Services. Requests are reviewed for medically necessary amounts based on caloric needs as indicated by the client's physician or an allowed practitioner.

### 2.2.18.2.1 Clients who are 21 years of age and older

Enteral nutrition and related supplies and equipment may be considered for prior authorization for clients who are 21 years of age and older when all or part of the client's nutritional intake is received through a feeding tube, and the enteral formula is:

- The client's sole source of nutrition
- The client's primary source of nutrition
  - An enteral tube feeding is considered the primary source of nutrition when it comprises more than 70 percent of the caloric intake needed to maintain the client's weight.
  - The percent of calories provided by an enteral formula may be calculated by dividing the client's daily calories supplied by the enteral formula by the daily caloric intake ordered by the physician or allowed practitioner to maintain the client's weight. The result is multiplied by 100 to determine the percentage of calories provided by the enteral formula.

Related supplies and equipment may be considered for prior authorization when criteria for nutritional products are met, and medical necessity is included for each item requested.

Renewal of the prior authorization will be considered based on medical necessity.

Prior authorization may be given for up to six months. Prior authorization may be recertified with documentation supporting ongoing medical necessity for the nutritional products requested.

#### 2.2.18.2.2 Clients who are 20 years of age and younger

Prior authorization for nutritional products is not required for a client who is 20 years of age and younger and who meets at least one of the following criteria:

- Client receives all or part of their nutritional intake through a tube.
- Client has a metabolic disorder that has been documented with one of the following diagnosis codes:

| Diagnosis Codes |        |        |        |        |        |        |        |

Prior authorization is required for nutritional products that are provided through CCP to clients who do not meet the criteria above.

A completed CCP Prior Authorization Request Form that prescribes the nutritional product and/or related services must be signed and dated by a prescribing physician or an allowed practitioner who was familiar with the client before requesting prior authorization. The completed CCP Prior Authorization Request Form must include the procedure codes and numerical quantities for the services requested. The completed CCP Prior Authorization Request Form with the original dated signature must be maintained by the prescribing physician or allowed practitioner in the client's medical record. A copy of the completed, signed, and dated form must be maintained by the DME provider in the client's medical record.

Requests for prior authorization must include the following documentation:

- Accurate diagnostic information pertaining to the underlying diagnosis or condition that resulted in the requirement for a nutritional product, as well as any other medical diagnoses or conditions, including:
  - The client's overall health status.
  - Height and weight.
  - Growth history and growth charts.
  - Why the client cannot be maintained on an age-appropriate diet.
  - Other formulas tried and why they did not meet the client's needs.
- Diagnosis or condition.
- The goals and timelines on the medical plan of care.
- Total caloric intake prescribed by the physician or allowed practitioner.
- Acknowledgement that the client has a feeding tube in place.

Related supplies and equipment for clients who require nutritional products may be considered for prior authorization when the criteria for nutritional products are met and medical necessity is included for each item requested.

Prior authorization may be given for up to 12 months. Prior authorization may be recertified with documentation that supports the ongoing medical necessity of the requested nutritional products.

A retrospective review may be performed to ensure that the documentation included in the client's medical record supports the medical necessity of the requested service.

Requests for prior authorization, when required, must include the necessary product information.

Prior authorization of nutritional pudding products may be considered for children who have a documented oropharyngeal motor dysfunction and receive greater than 50 percent of their daily caloric intake from a nutritional pudding product.

Requests for electrolyte replacement products, such as Pedialyte or Oralyte, require documentation of medical necessity, including:

- The underlying acute or chronic medical diagnoses or conditions that indicate the need to replace fluid and electrolyte losses.
- The presence of mild to moderate dehydration due to the persistent mild to moderate diarrhea or vomiting.

Electrolyte replacement products are not indicated for clients with:

- Intractable vomiting
- Adynamic ileus
- Intestinal obstruction or perforated bowel
- Anuria, oliguria, or impaired homeostatic mechanism
- Severe, continuing diarrhea, when intended for use as the sole therapy

#### 2.2.18.2.3 Enteral Formulas

Enteral formulas require prior authorization. Requests for prior authorization must include the necessary product information.

#### 2.2.18.2.4 Nasogastric, Gastrostomy, or Jejunostomy Feeding Tubes

Feeding tubes require prior authorization.

Additional feeding tubes may be prior authorized if documentation submitted supports medical necessity, such as infection at gastrostomy site, leakage, or occlusion.

#### 2.2.18.2.5 Enteral Feeding Pumps

Enteral feeding pumps, with and without alarms, require prior authorization.

Enteral feeding pumps may be considered for prior authorization for lease or purchase with documentation of medical necessity indicating that the client meets the following criteria:

- Gravity or syringe feedings are not medically indicated
- The client requires an administration rate of less than 100 ml/hr
- The client requires night-time feedings
- The client has one of the following medical conditions (this list is not all-inclusive):
  - Reflux or aspiration
  - Severe diarrhea
  - Dumping syndrome
  - Blood glucose fluctuations
  - Circulatory overload

#### 2.2.18.2.6 Enteral Supplies

Enteral supplies require prior authorization, with the exception of irrigation syringes (procedure code A4322) and percutaneous catheter or tube anchoring devices (procedure code A5200) within the allowable limits.

Procedure code B4034 will not be prior authorized for use in place of procedure code A4322 for irrigation syringes when they are not part of a bolus administration kit.

Gravity bags and pump nutritional containers are included in the feeding supply kits and will not be prior authorized separately.

Procedure code B4105 will require prior authorization, and may be considered with documentation of medical necessity indicating that the client meets all the following criteria:

- The client has exocrine pancreatic insufficiency.
- The client utilizes an enteral feeding pump.
- The client utilizes a compatible formula and the amount of formula (mL) the client is receiving daily is documented.

**Note:** *One cartridge can be used with up to 500mL of formula, with a maximum of two cartridges used per day. Procedure code B4105 will be limited to 62 per month.*

For clients who are 5 through 20 years of age, procedure code B4105 will be considered through the Comprehensive Care Program (CCP).

Specific items may be considered for prior authorization using miscellaneous procedure code B9998 and modifiers U1, U2, U3, or U5.

Requests for a backpack or carrying case for a portable enteral feeding pump may be considered for prior authorization for purchase only, under miscellaneous code B9998, for clients who meet all of the following medical necessity criteria:

- The client requires enteral feedings lasting greater than eight hours continuously, or feeding intervals exceed the time that the client must be away from home to:
  - Attend school or work.
  - Participate in extensive outpatient therapies ordered by the physician or allowed practitioner.
  - Attend frequent, multiple medical appointments.
- The client is ambulatory, or uses a wheelchair which will not support the use of a portable pump by other means, such as an IV pole.
- The portable enteral feeding pump is client owned.

### **2.2.18.3 Documentation Requirements**

To request prior authorization for nutritional formula, supplies, or equipment, the following documentation must be provided:

- Accurate diagnostic information pertaining to the underlying diagnosis or condition as well as any other medical diagnoses or conditions, to include the client's overall health status
- Diagnosis or condition (including the appropriate *International Classification of Diseases, Tenth Revision, Clinical Modification* [ICD-10-CM] code)
- A statement from the ordering physician or allowed practitioner noting that enteral nutritional products for tube feedings are the client's sole or primary source of nutrition
- The goals and timelines on the medical POC
- Total caloric intake prescribed by the physician or allowed practitioner
- Acknowledgement that the client has a feeding tube in place

### **2.2.18.4 Nutritional Counseling**

Clients for whom nutritional products are being requested may benefit from nutritional counseling. Nutritional counseling is a benefit of CCP if it is provided to treat, prevent, or minimize the effects of illness, injury, or other impairment.

**Referto:** Subsection 2.11, “Medical Nutrition Counseling Services (CCP)” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)* for information about nutritional counseling.

### **2.2.18.5 Women, Infants, and Children Program (WIC)**

Generic nutritional products that have been approved by the United States Department of Agriculture (USDA) for use in the Women, Infants, and Children Program (WIC) may be approved for use by CCP clients.

While CCP does not require that a client access WIC, it is only recommended as another source of services for clients who are 4 years of age and younger, or clients who are pregnant or breast feeding. Nutritional products are not provided to infants who are 11 months of age and younger unless medical necessity is documented.

### **2.2.18.6 Managed Care Clients**

Nutritional products that are provided to WIC clients are carved-out of the Medicaid Managed Care Program and must be billed to TMHP for payment consideration. Carved-out services are those that are rendered to Medicaid Managed Care clients but are administered by TMHP and not the client’s managed care organization (MCO).

Nutrition products that are provided to other Medicaid Managed Care Program clients (other than WIC clients) are not carved out and must be submitted to the managed care organization that administers the client’s Medicaid managed care benefits.

### **2.2.18.7 Noncovered Services**

CCP will not cover the following:

- Nutritional products that are traditionally used for infant feeding.
- Nutritional products for the primary diagnosis of failure to thrive, failure to gain weight, or lack of growth. The underlying cause of failure to thrive, gain weight, and lack of growth is required.
- Nutritional bars.
- Nutritional products for clients who could be sustained on an age-appropriate diet.

### **2.2.19 Orthotic Services (CCP)**

Orthoses, including orthopedic shoes, wedges, and lifts, are a benefit of Texas Medicaid when provided by a licensed orthotist or a licensed prosthetist/orthotist through CCP for clients who are birth through 20 years of age.

The following orthoses and related services may be reimbursed when medical necessity criteria are met:

- Spinal orthoses and additions to spinal orthoses, including those for scoliosis
- Lower-limb orthoses and additions to lower-limb orthoses, including fracture orthoses
- Foot orthoses, including inserts, orthopedic shoes, surgical boots, heel lifts, and wedges
- Upper-limb orthoses and additions to upper-limb orthoses, including fracture orthoses
- Other orthopedic devices, including protective helmets and dynamic splints
- Repairs, replacements, and modifications
- Orthotic device training

**Note:** *Training in the use of an orthotic device for a client who has not worn one previously, has not worn one for a prolonged period, or is receiving a different type is a benefit when the training is provided by a physical or occupational therapist.*

**Referto:** *The Physical Therapy, Occupational Therapy, and Speech Therapy Services Handbook (Vol. 2, Provider Handbooks)* for additional information about physical and occupational therapy services.

The following definitions are used by Texas Medicaid:

- An orthosis is defined as: A custom-fabricated or custom-fitted medical device designed to provide for the support, alignment, prevention or correction of neuromuscular or musculoskeletal disease, injury, or deformity. The term does not include a fabric or elastic support, corset, arch support, low temperature plastic splint, a truss, elastic hose, cane, crutch, soft cervical collar, orthosis for diagnostic or evaluation purposes, dental appliance, or other similar device carried in stock and sold by a drugstore, department store or corset shop.
- A brace is defined as: An orthosis or orthopedic appliance that supports or holds in correct position any movable part of the body, and that allows for motion of that part. It must be a rigid or semirigid device used for the purpose of supporting a weak or deformed body part or restricting or eliminating motion in a diseased or injured body part.

To be considered for reimbursement, orthoses must be dispensed, fabricated, or modified by a licensed orthotist or licensed prosthetist/orthotist enrolled with Medicare and CCP. The following applies:

- Upper extremity customized splints made with low-temperature materials and inhibitive casting may be provided by occupational or physical therapists.
- Other orthopedic devices addressed in the orthotic section may be provided by a Medicaid-enrolled DME vendor.
- Orthopedic shoes must be provided by a shoe vendor enrolled as a DME provider.

The date of service for a custom-made or custom-fitted orthosis is the date the supplier places an order for the equipment and incurs liability for the equipment. The custom-made or custom-fitted orthosis will be eligible for reimbursement as long as the service is provided during a month the client is eligible for Medicaid.

The following items and services are included in the reimbursement for an orthotic device and not reimbursed separately:

- Client evaluation, measurement, casting, or fitting of the orthosis.
- Repairs due to normal wear and tear during the 90 days following delivery.
- Adjustments or modifications of the orthotic device made when fitting the orthosis and for 90 days from the date of delivery (adjustments and modifications during the first 90 days are considered part of the purchase of the initial device).

Orthopedic shoes that are attached to a brace must be billed by the vendor that bills for the brace.

Reimbursement for lifts and wedges may include the cost of the prescription shoe.

### **2.2.19.1 Noncovered Orthotic Services**

The following circumstances are not a benefit of Texas Medicaid:

- Orthoses whose sole purpose is for restraint
- Orthoses provided solely for use during sports-related activities in the absence of an acute injury or other indicated medical condition
- Orthotic devices prescribed by a chiropractor

Diagnoses that are not considered medically necessary include, but are not limited to, the following:

- Tired feet

- Fatigued feet
- Nonsevere bow legs
- Valgus deformity of the foot, except as outlined in the orthotic section
- Pes planus (flat feet), except when there is a coexisting medical condition as outlined in the orthotic section

Orthopedic shoes with deluxe features, such as special colors, special leathers, and special styles, are not considered medically necessary, and the features do not contribute to the accommodative or therapeutic function of the shoe.

A foot-drop splint and recumbent positioning device and replacement interface are not considered medically necessary in a client with foot drop who is nonambulatory, because there are other more appropriate treatment modalities.

A static ankle-foot orthosis (AFO) or AFO component is not medically necessary if:

- The contracture is fixed.
- The client has foot drop without an ankle flexion contracture.
- The component is used to address knee or hip positioning, because the effectiveness of this type of component is not established.

A pneumatic thoracic-lumbar-sacral orthosis is considered experimental and investigational and is not a benefit of Texas Medicaid.

### **2.2.19.2 Prior Authorization and Documentation Requirements**

Prior authorization is required for all orthoses and related services.

Before submitting a request for prior authorization for orthosis, the orthosis provider must have a completed CCP Prior Authorization Form requesting the orthosis or related services that has been signed and dated by a physician who is familiar with the client. The completed CCP Prior Authorization Form must include the procedure codes and quantities for requested services. A copy of the completed, signed, and dated form must be maintained by the orthosis provider in the client's medical record. The completed CCP Prior Authorization Form with the original dated signature must be maintained by the prescribing physician in the client's medical record.

- To complete the prior authorization process electronically, the orthosis provider must complete the prior authorization requirements through any approved electronic method and retain a copy of the signed and dated CCP Prior Authorization Request form in the client's medical record at the provider's place of business.
- To complete the prior authorization process by paper, the orthosis provider must fax or mail the completed CCP Prior Authorization Request Form to the CCP prior authorization unit and retain a copy of the signed and dated CCP form in the client's medical record at the provider's place of business.

To facilitate determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including documentation for medical necessity of the equipment and supplies requested. The physician must maintain documentation of medical necessity in the client's medical record. The provider may be asked for additional information to clarify or complete a request for the service or device.

All requests for prior authorization must include documentation of medical necessity including, but not limited to, documentation that the device is needed for one of the following general indications:

- To reduce pain by restricting mobility of the affected body part.
- To facilitate healing following an injury to the affected body part or related soft tissue.

- To facilitate healing following a surgical procedure on the affected body part or related soft tissue.
- To support weak muscles or a deformity of the affected body part.

Prior authorization requests for some types of orthosis require additional documentation. See the appropriate sections for additional documentation needed for each service.

The provider must keep the following written documentation in the client's medical record:

- The prescription for the device.
- Orthotic devices must be prescribed by a physician (M.D. or D.O.) or a podiatrist. A podiatrist prescription is valid for conditions of the ankle and foot.
- The prescription must be dated on or before the initial date of the requested dates of service, which can be no longer than 90 days from the signature date on the prescription.
- Accurate diagnostic information that supports the medical necessity for the requested device. A retrospective review may be performed to ensure that the documentation included in the client's medical record supports the medical necessity of the requested service or device.

A prior authorization is valid for a maximum period of six months from the prescription signature date.

At the end of the six-month authorization period, a new prescription is required for prior authorization of additional services.

**Note:** *Texas Medicaid fee-for-service requires providers to review for medical necessity of DME every six months. An MCO may approve an initial DME prior authorization request for a period of 6 months, unless otherwise stated, and may authorize an extension of 12 months after the initial 6 months, if medically necessary.*

The actual date of service is the date the supplier has placed an order for the equipment and has incurred liability for the equipment.

#### 2.2.19.2.1 Spinal Orthoses

Spinal orthoses include, but are not limited to, cervical orthoses, thoracic rib belts, thoracic-lumbar-sacral orthoses (TLSO), sacroiliac orthoses, lumbar orthoses, lumbar-sacral orthoses (LSO), cervicalthoracic-lumbar-sacral orthoses (CTLTO), halo procedures, spinal corset orthoses, and spinal orthoses for scoliosis.

Spinal orthoses will be considered for prior authorization with documentation of one of the general indications.

#### 2.2.19.2.2 Lower-Limb Orthoses

Lower-limb orthoses include, but are not limited to, hip orthoses (HO), Legg Perthes orthoses, knee orthoses (KO), ankle-foot orthoses (AFO), knee-ankle-foot orthoses (KAFO), hip-knee-ankle-foot orthoses (HKAFO), fracture orthoses, and reciprocating gait orthoses (RGO).

In addition to the general indication requirements, lower-limb orthoses will be considered for prior authorization with documentation of the following criteria for specific orthotic devices:

##### **Ankle-Foot Orthoses**

AFOs used during ambulation will be considered for prior authorization for clients with documentation of all of the following:

- Weakness or deformity of the foot and ankle.
- A need for stabilization for medical reasons.
- Anticipated improvement in functioning during activities of daily living (ADLs) with use of the device.

AFOs not used during ambulation (static AFO) will be considered for prior authorization for clients with documentation of one of the following conditions:

- Plantar fasciitis.
- Plantar flexion contracture of the ankle, with additional documentation that includes all of the following:
  - Dorsiflexion on pretreatment passive range of motion testing is at least ten degrees.
  - The contracture is interfering or is expected to interfere significantly with the client's functioning during ADLs.
  - The AFO will be used as a component of a physician-prescribed therapy plan care, which includes active stretching of the involved muscles or tendons.
  - There is reasonable expectation that the AFO will correct the contracture.

### **Knee-Ankle-Foot Orthoses**

KAFOs used during ambulation will be considered for prior authorization for clients with documentation that supports medical necessity for additional knee stabilization.

KAFOs that are custom-fabricated (molded-to-patient model) for ambulation will be considered for prior authorization when at least one of the following criteria is met:

- The client cannot be fit with a prefabricated AFO/KAFO.
- The condition that necessitates the orthosis is expected to be permanent or of long-standing duration (more than six months).
- There is a need to control the knee, ankle, or foot in more than one plane.
- The client has a documented neurological, circulatory, or orthopedic status that requires custom fabrication to prevent tissue injury.
- The client has a healing fracture that lacks normal anatomical integrity or anthropometric proportions.

### **Reciprocating Gait Orthoses**

Reciprocating gait orthoses will be considered for prior authorization for clients with spina bifida or similar functional disabilities.

The prior authorization request must include a statement from the prescribing physician that indicates medical necessity for the RGO, the PT treatment plan, and documentation that the client and family are willing to comply with the treatment plan.

#### **2.2.19.2.3 Foot Orthoses**

Foot orthoses include, but are not limited to, foot inserts, orthopedic shoes, wedges, and lifts.

Foot orthoses will be considered for prior authorization for clients with documentation of all of the following:

- The client has symptoms associated with the particular foot condition.
- The client has failed to respond to a course of appropriate, conservative treatment, including PT, injections, strapping, or anti-inflammatory medications.
- The client has at least one of the following:
  - Torsional conditions, such as metatarsus adductus, tibial torsion, or femoral torsion
  - Structural deformities

- Hallux valgus deformities
- In-toe or out-toe gait
- Musculoskeletal weakness

In addition to the general indication requirements, foot orthoses will be considered for prior authorization with documentation of the following criteria for specific orthotic devices:

### **Foot Inserts**

Removable foot inserts will be considered for prior authorization for clients with documentation of at least one of the following medical conditions:

- Diabetes mellitus.
- History of amputation of the opposite foot or part of either foot.
- History of foot ulceration or pre-ulcerative calluses of either foot.
- Peripheral neuropathy with evidence of callus formation of either foot.
- Deformity of either foot.
- Poor circulation of either foot.

Removable foot inserts may be covered independently of orthopedic shoes with documentation that the client has appropriate footwear into which the insert can be placed.

A University of California at Berkeley (UCB) removable foot insert will be considered for prior authorization with documentation that the device is required to correct or treat at least one of the following conditions:

- A valgus deformity and significant congenital pes planus with pain.
- A structural problem that results in significant pes planus, such as Down syndrome.
- Acute plantar fasciitis.

### **Orthopedic Shoes**

Orthopedic shoes must be prescribed by a licensed physician (M.D. or D.O.) or a podiatrist. An orthopedic shoe is used by clients whose feet, although impaired, are essentially intact. An orthopedic shoe differs from a prosthetic shoe, which is used by clients who are missing all or most of the forefoot.

Orthopedic shoes will be considered for prior authorization when at least one of the following criteria is met:

- The shoe is permanently attached to a brace.
- The shoe is necessary to hold a surgical correction, postoperative casting, or serial or clubfoot casting.

An orthopedic shoe may be prior authorized up to one year from the date of the surgical procedure.

Only one pair of orthopedic shoes will be prior authorized every three months. Two pairs of shoes may be purchased at the same time; in such situations, however, additional requests for shoes will not be considered for another six months.

Requests for orthopedic shoes that do not meet the criteria listed above may be considered for prior authorization with documentation of medical necessity.

### **Wedges and Lifts**

Wedges and lifts must be prescribed by a licensed physician (M.D. or D.O.) or a podiatrist and must be for treatment of unequal leg length greater than one-half inch.

#### 2.2.19.2.4 Upper-Limb Orthoses

Upper-limb orthoses include, but are not limited to, shoulder orthoses (SO), elbow orthoses (EO), elbow-wrist-hand orthoses (EWHO), elbow-wrist-hand-finger orthoses (EWHFO), wrist-hand-finger orthoses (WHFO), wrist-hand orthoses (WHO), hand-finger orthoses (HFO), finger orthoses (FO), shoulder-elbow-wrist-hand orthoses (SEWHO), shoulder-elbow orthoses (SEO), and fracture orthoses.

In addition to the general indication requirements, upper-limb orthoses will be considered for prior authorization with documentation of the following criteria for specific orthotic devices.

#### 2.2.19.2.5 Other Orthopedic Devices

##### **Protective Helmets**

Protective helmets will be considered for prior authorization for clients with a documented medical condition that makes the client susceptible to injury during ADLs. Covered medical conditions include the following:

- Neoplasm of the brain
- Subarachnoid hemorrhage
- Epilepsy
- Cerebral palsy

Requests for all conditions other than those listed above require submission of additional documentation that supports the medical necessity of the requested device.

##### **Dynamic Splints**

Static and dynamic mechanical stretching devices will be considered for prior authorization for a four month rental period when the request is submitted with the following documentation:

- Client's condition
- Client's current course of therapy
- Rationale for the use of the static or dynamic mechanical stretching device
- Agreement by the client or family that the client will comply with the prescribed use of the static or dynamic mechanical stretching device

After completion of the four-month rental period, the provider may submit a request for purchase of the static or dynamic mechanical stretching device. Requests for purchase of the static or dynamic mechanical stretching device must include documentation that the four-month rental period was successful and showed improvement in the client's condition as measured by the following:

- Demonstrated increase in range of motion
- Demonstrated improvement in the ability to complete ADLs or perform activities outside the home

#### 2.2.19.2.6 Related Services

##### **Repairs, Replacements, and Modifications to Orthoses**

Within the guarantee of the manufacturer, providers are responsible, without charge to the client or to Texas Medicaid, for replacement or repair of equipment or any part thereof that is found to be nonfunctional because of faulty material or workmanship.

Service and repairs must be handled under any warranty coverage an item may have. If there is no warranty, providers may request prior authorization for the necessary service and repairs.

A repair because of normal wear or a modification because of growth or change in medical status will be considered for prior authorization if it proves to be more cost effective than replacing the device.

The request for repairs must include a breakdown of charges for parts and the number of hours of labor required to complete the repairs. No charge is allowed for pickup or delivery of the item or for the assembly of Medicaid-reimbursed parts. The following information must be submitted with the request:

- The description and procedure code of the item being serviced or repaired.
- The age of the item.
- The number of times the item has been previously repaired.
- The replacement cost for the item.

The anticipated life expectancy of an orthotic device is six months. Requests for prior authorization for the replacement of a device before its usual life expectancy has ended must include documentation that explains the need for the replacement.

Replacement of orthotic equipment will be considered when the item is out of warranty and repairing the item is no longer cost-effective or when loss or irreparable damage has occurred. A copy of the police or fire report, when appropriate, and the measures to be taken to prevent reoccurrence must be submitted with the prior authorization request.

### **2.2.19.3 Cranial Molding Orthosis**

#### **2.2.19.3.1 Services, Benefits, and Limitations**

Cranial molding orthosis (procedure code S1040) may be a benefit when all of the following criteria are met:

- The client is CCP eligible.
- The client is 3 through 18 months of age.
- The client requires a cranial molding orthosis as part of the treatment plan for a documented diagnosis of synostotic plagiocephaly.

The limitation for procedure code S1040 is one device per lifetime.

The definition for cosmetic, as it applies to cranial molding orthosis, includes surgery or other services used primarily to improve appearance and not to restore or correct significant deformity resulting from disease, trauma, congenital or developmental anomalies, or previous therapeutic process.

#### **2.2.19.3.2 Noncovered Services**

A cranial molding orthosis that is used for the treatment of positional plagiocephaly is considered cosmetic, and therefore is not a benefit of Texas Medicaid.

The effective use of a cranial molding orthosis for the treatment of brachycephaly, or a high cephalic index without cranial asymmetry has not been clearly documented, is not medically necessary, and therefore is not a benefit of Texas Medicaid.

#### **2.2.19.3.3 Prior Authorization and Documentation Requirements**

Cranial molding orthoses do not require prior authorization for clients with a diagnosis of synostotic plagiocephaly. Documentation of medical necessity must be maintained in the client's medical record.

Prior authorization requests for a cranial molding orthosis for congenital conditions that are not outlined in this section may be considered by the Medical Director on a case-by-case basis with documentation of medical necessity. Additional devices beyond the once-per-lifetime benefit may be considered for prior authorization with documentation of all of the following:

- The initial device was obtained to treat synostotic plagiocephaly.
- Treatment with the device has been effective.
- The new device is needed due to growth.

To facilitate determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including documentation of medical necessity for the equipment requested. The physician must maintain documentation of medical necessity in the client's medical record. The requesting provider may be asked for additional information to clarify or complete a request for an additional cranial molding orthosis.

The completed CCP Prior Authorization Form, which includes the DME must be signed and dated by the prescribing physician familiar with the client's condition. The completed CCP Prior Authorization Form must be maintained by the requesting provider and the prescribing physician. The original signature copy must be kept by the physician in the client's medical record.

#### **2.2.19.4 Thoracic-Hip-Knee-Ankle Orthoses (THKAO) (Vertical or Dynamic Standers, Standing Frames, Braces, and Parapodiums)**

##### **2.2.19.4.1 Services, Benefits, and Limitations**

THKAO (vertical or dynamic standers, standing frames or braces, and parapodiums), including all accessories, require prior authorization. A THKAO may be considered if the client requires assistance to stand and remain standing.

##### **Parapodium**

A parapodium is used to help clients with neuromuscular diseases or conditions resulting in a lack of sufficient muscle power in the trunk and lower extremities to stand with their hands free. It helps develop a sense of balance and aids in learning functional movements such as standing with the hands free. A parapodium acts as an exoskeleton, providing side struts and chest, hip, knee, and foot bracing.

A parapodium may be considered for reimbursement for one of the following levels:

- Level One: Small Parapodium—The client has a maximum axillary height of 35 inches and a maximum weight of 55 pounds (normal age range is 1 through 10 years of age).
- Level Two: Medium parapodium—The client has a maximum axillary height of 41 inches and a maximum weight of 77 pounds (normal age range is 5 through 12 years of age).
- Level Three: Large parapodium—The client has a maximum axillary height of 45 inches and a maximum weight of 115 pounds (normal age range is 10 through 16 years of age). Labor for parapodium assembly may be prior authorized.

Procedure code E0638 must be submitted with one of the following modifiers:

- UA-Standing frame/table system, one position (e.g., upright, supine, or prone stander), any size, including pediatric, with or without wheels. Medicaid level of care 10, as defined by each state
- UB-Standing frame/table system, one position (e.g., upright, supine, or prone stander), any size, including pediatric, with or without wheels. Medicaid level of care 11, as defined by each state

***Note:** Use modifier UA to identify an upright or prone system stander.*

***Note:** Use modifier UB to identify a supine stander.*

##### **Standing Frame or Brace**

A standing frame or brace is used to help very young clients, who are 12 months of age and older, who have good head control in the upright position and who have a neuromuscular disease or condition resulting in a lack of sufficient muscle power in the trunk and lower extremities to stand with their hands free.

Providers must use procedure code E0638 for a standing frame or brace.

### **Vertical or Dynamic Stander**

A vertical stander or dynamic stander is used to initiate standing for clients who cannot maintain a good standing posture or may never be able to stand independently. A vertical stander is used to develop weight bearing through the legs in order to decrease demineralization and to promote better body awareness. Documentation for these standers must address medical necessity for the standers to be mobile.

Providers must use procedure code E0642 for the purchase of a dynamic stander.

#### **2.2.19.4.2 Prior Authorization and Documentation Requirements**

THKAO (vertical or dynamic standers, standing frames or braces, and parapodiums), including all accessories, requires prior authorization.

THKAO may be considered for clients who are CCP-eligible and who require assistance to stand and remain standing when documentation submitted clearly shows that it is medically necessary and will correct or ameliorate the client's disability or physical or mental illness or condition.

Prior authorization may be considered for the THKAOs with the following documentation:

- Diagnoses relevant to the requested equipment, including functioning level and ambulatory status
- Anticipated benefits of the equipment
- Frequency and amount of time of a standing program
- Anticipated length of time the client will require this equipment
- Client's height, weight, and age
- Anticipated changes in the client's needs, anticipated modifications, or accessory needs, as well as the growth potential of the stander

### **2.2.20 Prosthetic Services**

#### **2.2.20.1 Services, Benefits, and Limitations**

External prostheses are a benefit of Texas Medicaid when provided by a licensed prosthetist or licensed prosthetist/orthotist through CCP for clients who are birth through 20 years of age.

The following prostheses and related services may be reimbursed when medical necessity criteria are met:

- Lower limb
- Upper limb
- Craniofacial
- External breast
- Repair, replacements, and modifications
- Prosthetic training
- Accessories to prostheses

Prosthetic training by a physical or occupational therapist for a lower limb prosthesis or an upper extremity prosthesis is a benefit for clients who have not worn one previously or for a prolonged period or who are receiving a different type.

**Referto:** Section 5, "Children's Therapy Services Clients birth through 20 years of age" in the *Physical Therapy, Occupational Therapy, and Speech Therapy Services Handbook (Vol. 2, Provider Handbooks)*.

To be considered for reimbursement, prostheses must be dispensed, fabricated, or modified by a licensed prosthetist or licensed prosthetist/orthotist enrolled with Medicare and CCP.

The date of service for a custom-made or custom-fitted prosthesis is the date the supplier places an order for the equipment and incurs a liability for the equipment. The custom-made or custom-fitted prosthesis will be eligible for reimbursement as long as the service is provided during a month the client is eligible for Medicaid.

The following items and services are included in the reimbursement for a prosthetic device and not reimbursed separately:

- Evaluation of the residual limb and gait
- Measurement, casting, or fitting of the prosthesis
- Cost of base component parts and labor contained in the base procedure code description
- Repairs due to normal wear and tear during the 90 days following delivery
- Adjustments or modifications of the prosthesis or the prosthetic component made when fitting the prosthesis or component and for 90 days from the date of delivery when the adjustments are not necessitated by changes in the residual limb or the client's functional ability

In general, base codes do not represent a complete device. To include the additional components necessary for a complete device, providers may bill additional components with a code that is used in addition to a base code. Addition codes may also be used to indicate modifications to a device. The values assigned to the additional codes do not represent the actual value of the component or modification, but only the difference between the total value and the value of the base code. As a result, reimbursement of an addition does not involve subtraction of any amounts from the base code allowance.

#### **2.2.20.1.1 Noncovered Prosthetic Services**

Prosthetic devices prescribed by a chiropractor are not a benefit of Texas Medicaid.

A vacuum-assisted socket system (procedure code L5781 or L5782), which is a specialized vacuum pump, is considered experimental and investigational, and is not a benefit of Texas Medicaid.

Myoelectric hand prostheses for conditions other than the absence of forearm(s) and hand(s) are considered experimental and investigational and are not a benefit of Texas Medicaid.

A prosthetic device customized with enhanced features is not considered medically necessary if ADLs can be met with a standard prosthetic device.

Accessories that are not required for the effective use of a prosthetic device are not considered medically necessary.

#### **2.2.20.2 Prior Authorization and Documentation Requirements**

Prior authorization is required for all prosthetic devices.

A completed CCP Prior Authorization Form requesting the prosthesis must be signed and dated by a physician familiar with the client before requesting prior authorization for all prostheses. The completed CCP Prior Authorization Form must include the procedure codes and numerical quantities for services requested. A copy of the completed, signed, and dated form must be maintained by the prosthesis provider in the client's medical record. The completed CCP Prior Authorization Form with the original dated signature must be maintained by the prescribing physician in the client's medical record.

To complete the prior authorization process by paper, the prosthesis provider must fax or mail the completed CCP Prior Authorization Request Form to the CCP prior authorization unit and retain a copy of the signed and dated CCP form in the client's medical record at the provider's place of business.

To complete the prior authorization process electronically, the prosthesis provider must complete the prior authorization requirements through any approved electronic methods and retain a copy of the signed and dated CCP Prior Authorization Request form in the client's medical record at the provider's place of business.

To facilitate determination of medical necessity and avoid unnecessary denials, the physician must provide correct and complete information, including documentation for medical necessity of the equipment or supplies requested. The physician must maintain documentation of medical necessity in the client's medical record. The provider may be asked for additional information to clarify or complete a request for the service or device.

All requests for prior authorization must include documentation of medical necessity including, but not limited to, documentation that the client meets the following general indications for the requested device:

- The prosthesis replaces all or part of the function of a permanently inoperative, absent, or malfunctioning part of the limb, and identification of the specific limb that is being replaced by the prosthesis.
- The prosthesis is required for ADLs or for rehabilitation purposes, and identification of the ADLs or rehabilitation purpose for which the prosthesis is required.

The provider must keep the following written documentation in the client's medical record:

- The prescription for the device.
  - Prosthetic devices must be prescribed by a physician (M.D. or D.O.).
  - The prescription must be dated prior to or on the initial date of the requested dates of service, which can be no longer than 90 days from the signature date on the prescription.
- Accurate diagnostic information that supports the medical necessity for the requested device. (A retrospective review may be performed to ensure that the documentation included in the client's medical record supports the medical necessity of the requested service or device.)
- The specific make, model, and serial number of the prosthetic components.
- The treatment plan outlining the therapy program prescribed by the treating physician, including expected goals with the use of the prosthesis.
- A statement submitted by the physician that indicates that the client or client's family or caregiver demonstrates willingness to comply with the therapy program.

Prior authorization is valid for a maximum period of six months from the prescription signature date.

At the end of the six-month authorization period, a new prescription is required for prior authorization of additional services.

**Note:** *Texas Medicaid fee-for-service requires providers to review for medical necessity of DME every six months. An MCO may approve an initial DME prior authorization request for a period of 6 months, unless otherwise stated, and may authorize an extension of 12 months after the initial 6 months, if medically necessary.*

The actual date of service is the date the supplier has placed an order for the equipment and has incurred liability for the equipment.

#### 2.2.20.2.1 Lower-Limb Prostheses

Lower limb prostheses include, but are not limited to, the following:

- Partial foot, ankle, and knee disarticulation sockets
- Above-knee short prostheses

- Hip and knee disarticulation prostheses
- Postsurgical prostheses
- Preparatory prostheses
- Additions to lower extremity prostheses
- Replacement sockets

A basic lower limb prosthesis consists of the following:

- A socket or connection between the residual limb and the prosthesis
- A suspension mechanism attaching the socket to the prosthesis
- A knee joint that provides support during stance, smooth control during the swing phase, and unrestricted motion for sitting and kneeling
- An exoskeleton or endoskeleton pylon (tube or shell) that attaches the socket to the terminal device
- A terminal device (foot)

In addition to the general indication requirements, the following additional documentation is also required for all lower limb prostheses:

- Written documentation of the client’s current and potential functional levels. A functional level is defined as a measurement of the capacity and potential of the individuals to accomplish their expected post-rehabilitation daily function. The potential functional ability is based on reasonable expectations of the treating physician and the prosthetist and includes, but is not limited to, the following:
  - The client’s history, including prior use of a prosthesis if applicable
  - The client’s current condition, including the status of the residual limb and any coexisting medical conditions
  - The client’s motivation to ambulate and ability to achieve independent transfers or ambulation with the use of a lower limb prosthesis
- The following functional modifiers and levels have been defined by the Centers for Medicare & Medicaid Services (CMS):

| Functional Level | Functional Modifier | Description                                                                                                                                                                                                                                                                                |
|------------------|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Level 0          | K0                  | Does not have the ability or potential to ambulate or transfer safely with or without assistance, and a prosthesis does not enhance quality of life or mobility.                                                                                                                           |
| Level 1          | K1                  | Has the ability or potential to use a prosthesis for transfers or ambulation on level surfaces at fixed cadence. Typical of the limited and unlimited household ambulator                                                                                                                  |
| Level 2          | K2                  | Has the ability or potential for ambulation with the ability to traverse low level environmental barriers such as curbs, stairs, or uneven surfaces. Typical of the limited community ambulator.                                                                                           |
| Level 3          | K3                  | Has the ability or potential for ambulation with variable cadence. Typical of the community ambulator who has the ability to traverse most environmental barriers and may have vocational, therapeutic, or exercise activity that demands prosthetic utilization beyond simple locomotion. |

| Functional Level | Functional Modifier | Description                                                                                                                                                                                                              |
|------------------|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Level 4          | K4                  | Has the ability or potential for prosthetic ambulation that exceeds basic ambulation skills, exhibiting high-impact, stress, or energy levels. Typical of the prosthetic demands of the child, active adult, or athlete. |

A client whose functional level is zero (0) is not a candidate for a prosthetic device; the device is not considered medically necessary.

Advanced knee, ankle, and foot prostheses procedure codes must be submitted with the appropriate functional modifier in the table above.

### Microprocessor-Controlled Lower Limb Prostheses

Microprocessor-controlled lower limb prostheses (e.g., Otto Bock C-Leg, Intelligent Prosthesis, or Ossur Rheo Knee) will be considered for prior authorization for clients who have a transfemoral amputation from a nonvascular cause, such as trauma or tumor and a functional level of 3 or above, and who meet the following criteria:

- The individual has adequate cardiovascular reserve and cognitive learning ability to master the higher level of technology and to allow for faster than normal walking speed.
- The individual demonstrates the ability to ambulate at a faster than baseline rate using a standard prosthetic application with a swing and stance control knee.
- The individual has a demonstrated need for long-distance ambulation at variable rates (greater than 400 yards) on a daily basis. Use of the limb in the home or for basic community ambulation is not sufficient to justify provision of the computerized limb instead of standard limb applications.
- The individual has a demonstrated need for regular ambulation on uneven terrain or for regular use on stairs. Use of the limb for limited stair climbing in the home or employment environment is not sufficient evidence for prescription of this device over standard prosthetic application.

The licensed prosthetist or licensed prosthetist/orthotist providing the device must be trained in the fitting and programming of the microprocessor-controlled prosthetic device.

### Foot Prostheses

The following foot prostheses will be considered for prior authorization for clients whose documented functional level is 1 or above:

- A solid ankle-cushion heel (SACH) foot
- An external keel SACH foot or single axis ankle/foot

A flexible-keel foot or multi-axial ankle/foot will be considered for prior authorization for clients whose documented functional level is 2 or above.

A flex foot system, energy storing foot, multiaxial ankle/foot, dynamic response, or flex-walk system or equivalent will be considered for prior authorization for clients whose documented functional level is 3 or above.

A prosthetic shoe will be considered for prior authorization if it is an integral part of a prosthesis for clients with a partial foot amputation.

### Ankle Prosthesis

An axial rotation unit will be considered for prior authorization for clients whose documented functional level is 2 or above.

**Knee Prosthesis**

A single-axis, constant-friction knee and other basic knee systems will be considered for prior authorization for clients whose documented functional level is 1 or above. A fluid, pneumatic, or electronic knee prosthesis will be considered for prior authorization for clients whose documented functional level is 3 or above. A high-activity knee control frame will be considered for prior authorization for clients whose documented functional level is 4.

**Prosthetic Substitutions or Additions for Below-Knee Prostheses**

Prosthetic substitutions or additions (procedure codes L5629, L5638, L5639, L5646, L5647, L5704, L5785, L5962, and L5980) are not considered medically necessary when an initial below-knee prosthesis (procedure code L5500) or a preparatory below-knee prosthesis (procedure codes L5510, L5520, L5530, or L5540) is provided.

Prosthetic substitutions or additions (procedure codes L5620, L5629, L5645, L5646, L5670, L5676, L5704, and L5962) are not considered medically necessary when a below-knee preparatory, prefabricated prosthesis (procedure code L5535) is provided.

**Sockets**

Prior authorization for test (diagnostic) sockets for an individual prosthesis is limited to a quantity of two test sockets. Prior authorization for same-socket inserts for an individual prosthesis is also limited to a quantity of two. Requests for test sockets or same-socket inserts beyond these limitations must include documentation of medical necessity that supports the need for the additional sockets.

**2.2.20.2.2 Upper-Limb Prostheses**

Upper limb prostheses include, but are not limited to, the following:

- Partial hand prostheses
- Wrist and elbow disarticulation prostheses
- Shoulder and interscapular thoracic prostheses
- Immediate postsurgical or early fitting prostheses
- Preparatory prostheses
- Terminal devices
- Replacement sockets
- Inner sockets-externally powered
- Electric hand, wrist, and elbow prostheses

Upper limb prostheses will be considered for prior authorization with documentation of all of the general indication requirements. The additional criteria in the following sections apply for specific prosthetic devices.

**Myoelectric Upper Limb Prostheses**

A myoelectric upper limb prosthetic device is considered medically necessary when all of the following criteria have been met:

- The client has sufficient neurological, myocutaneous, and cognitive function to operate the prosthesis effectively.
- The client has an amputation or missing limb at the wrist or above (e.g., forearm, elbow, and so on).
- The client is free of comorbidities that could interfere with maintaining function of the prostheses (e.g., neuromuscular disease).

- The client retains sufficient microvolt threshold in the residual limb to allow proper function of the prostheses.
- Standard body-powered prosthetic devices cannot be used or are insufficient to meet the functional needs of the patient in performing ADLs.
- The client does not function in an environment that would inhibit function of the prosthesis (e.g., a wet environment or a situation involving electrical discharges that would affect the prosthesis).

#### 2.2.20.2.3 External Breast Prostheses

External breast prostheses will be considered for prior authorization for clients who have congenital absence of a breast or who have had a mastectomy.

#### 2.2.20.2.4 Craniofacial Prostheses

Craniofacial prostheses include, but are not limited to, external nasal, ear, and facial prostheses.

Craniofacial prostheses will be considered for prior authorization with documentation that the device is necessary to correct an absence or deformity of the affected body part.

#### 2.2.20.2.5 Related Services

##### **Accessories to Prostheses**

Accessories to prostheses, such as stump stockings and harnesses will be considered for prior authorization when they are essential to the effective use of the prosthetic device.

##### **Repairs, Replacements, and Modifications to Prostheses**

Repairs due to normal wear and tear will be considered for prior authorization after 90 days from the date of delivery of the initial prosthesis, when the repair is:

- Necessary to make the equipment functional.
- More cost-effective than the replacement of the prosthetic device.

Providers must include documentation that supports medical necessity when they request prior authorization.

Additional information from the provider may be requested to determine cost-effectiveness.

Replacement of prosthetic equipment will be considered for coverage when loss or irreparable damage has occurred. A copy of the police or fire report when appropriate and the measures to be taken to prevent re-occurrence must be submitted with the prior authorization request.

Socket replacements will be considered for prior authorization with documentation of functional or physiological need, including, but not limited to, changes in the residual limb, functional need changes, or irreparable damage or wear due to excessive weight or prosthetic demands of very active amputees.

Children typically require new prosthetic devices every 12 to 18 months, although the actual lifespan of a device depends on the child's rate of skeletal growth. Prosthetic devices for children must accommodate growth and other physiological changes.

Components and systems that allow for growth or increase the lifespan of the prosthesis may include the following:

- Growth-oriented suspension systems and modifications
- Use of modular systems
- Use of flexible sockets
- Use of removable sockets (slip or triple-wall sockets)
- Use of distal pads

- Modification of socket liners
- Increasing or decreasing sock thickness

Modifications due to growth or change in medical status will be considered for prior authorization with documentation of medical necessity.

Medical necessity for requested components or additions to the prosthesis is based on the client's current functional ability and the expected functional potential as defined by the prosthetist and the ordering physician.

### 2.2.21 Phototherapy Devices

Phototherapy devices are not a benefit of Title XIX Home Health Services. Phototherapy devices are a benefit of Texas Medicaid through CCP for clients who are birth through 20 years of age.

#### 2.2.21.1 Services, Benefits, and Limitations

The rental of phototherapy devices (procedure code E0202) for use in the home are a benefit of Texas Medicaid for low-risk infants.

Low-risk infants are 35 or more weeks gestation at birth, without comorbidity, and with a total serum bilirubin (TSB) level within the following ranges:

| Infant's Gestation at Birth                                                                            | TSB for infant 0-24 hours of age* | TSB for infant 25-48 hours of age* | TSB for infant 49-72 hours of age* | TSB for infant older than 72 hours of age* |
|--------------------------------------------------------------------------------------------------------|-----------------------------------|------------------------------------|------------------------------------|--------------------------------------------|
| 35–37 weeks                                                                                            | 3–7                               | 7–13                               | 10–15                              | 13–18                                      |
| 38 weeks or greater                                                                                    | 6–11                              | 12–15                              | 15–18                              | 18–21                                      |
| * Infant age when TSB level is drawn.<br>TSB levels are expressed in milligrams per deciliter (mg/dl). |                                   |                                    |                                    |                                            |

The DME provider must perform routine maintenance and provide instructions to the parent or guardian on the safe use of the phototherapy device. Rental of a phototherapy device is reimbursed as a daily global fee and is limited to one per day, per client, any provider.

Providers may not bill for those days the phototherapy device is at the client's home and is not in use.

Skilled nursing (SN) visits for clients requiring phototherapy services may be reimbursed separately through Title XIX Home Health Services for nonroutine clinical teaching and assessment. Routine laboratory specimens are obtained during the SN visit, and may only be considered when the alternative to obtaining the specimen is to transport the client by ambulance.

If a client who is receiving PDN services requires phototherapy, instructions in the use of the equipment must be part of the existing PDN authorized hours. SN visits will not be allowed on the same day as PDN services.

In accordance with American Academy of Pediatrics (AAP) guidelines, providers must conduct ongoing assessments for risk of severe hyperbilirubinemia for all infants who receive home phototherapy.

Initiation of home phototherapy for medium- and high-risk infants is not a benefit of Texas Medicaid. As defined by the AAP, medium- and high-risk infants should be considered for more extensive initial treatment in an inpatient setting. Medium- and high-risk infants include, but are not limited to, those who have one of the following known risk factors:

- Acidosis
- Albumin less than 3.0 g/dl
- Asphyxia

- Glucose-6-phosphate dehydrogenase (G6PD) deficiency
- Isoimmune hemolytic disease (blood group incompatibility)
- Jaundice within the first 24 hours
- Sepsis
- Significant lethargy
- Temperature instability

### **2.2.21.2 Prior Authorization and Documentation Requirements**

Home phototherapy devices require prior authorization and are provided only for the days that are medically necessary.

For low-risk infants, prior authorization will be considered for phototherapy services that begin in the home.

For stabilized infants who began phototherapy treatment during their hospitalization and have been discharged from the hospital, prior authorization will be considered for the continuation of phototherapy services in the home. Initial prior authorization may be given for a maximum of seven days of home phototherapy. A new CCP Prior Authorization Request Form must be submitted to request more than seven days of home phototherapy.

The following documentation is required to support medical necessity when requesting home phototherapy services:

- A diagnostic evaluation, which must include, but is not limited to, a normal history and physical exam, and normal laboratory values for the following, as medically indicated:
  - Complete blood count with differential
  - Platelets
  - Blood smear for red blood cell morphology
  - Reticulocyte count
  - Urinalysis
  - Maternal and infant blood typing
  - Coombs test
- TSB level (in mg/dl)
- Gestational age
- Documentation of adequate infant hydration, as demonstrated by 4-6 wet diapers per day and 3-4 stools per day
- Documentation stating that infant weight loss does not exceed 10 percent of the infant's birth weight
- Physician's plan of care
- Anticipated number of days the client will need the phototherapy treatment
- Documentation of parental education regarding the importance of monitoring and follow-up

When requesting prior authorization for a hospitalized infant that requires continued home phototherapy, providers must submit documentation that indicates all pre-existing medium- or high-risk factors have resolved or stabilized.

Providers must submit the following additional documentation for prior authorization requests for previously hospitalized infants that require continued home phototherapy or for more than seven days of home phototherapy:

- TSB level greater than 13 mg/dl and trending downward. TSB levels less than 13 will require medical review to determine medical necessity.

**Note:** According to AAP guidelines, phototherapy may be discontinued when the TSB level falls below 13-14 mg/dl; however, exceptions to the guidelines may be considered. As a result, documentation must include the rationale for not discontinuing phototherapy when the TSB level drops below 13 mg/dl.

- Birth weight and current weight demonstrating weight gain.

**Note:** According to AAP guidelines, breast-fed infants are expected to gain 15-30 grams per day (1/2-1 ounce per day) through the first 2-3 months of life.

#### 2.2.21.2.1 Retroactive Eligibility

Newborn babies may not have a Medicaid number at the time that services are ordered by the physician and provided by the supplier. In these cases, prior authorization may be given retroactively for services rendered between the start date and the date that the client's Medicaid number becomes available.

The provider is responsible for finding out the effective dates of client eligibility.

The provider has 95 days from the date on which the client's Medicaid number becomes available (add date) to obtain prior authorization for services that were already rendered.

#### 2.2.22 Prothrombin Time/International Normalized Ratio (PT/INR) Home Testing Monitor

PT/INR home testing monitors are a benefit of Title XIX Home Health Services for clients who require chronic oral anticoagulation due to one of the following:

- Mechanical heart valve
- Chronic atrial fibrillation
- Venous thromboembolism (including both deep vein thrombosis [DVT] and pulmonary embolism)
- Ventricular assist device (VAD) awaiting a heart transplant

The PT/INR home testing monitor is a portable, battery-operated instrument for the quantitative determination of PT/INR from whole blood obtained by finger-stick. This product is designed to aid in the management of high-risk clients who take oral anticoagulants.

**Note:** For clients who are 20 years of age and younger and do not meet criteria for coverage through Title XIX Home Health Services, home PT/INR monitors and related testing supplies may be considered through CCP.

**Note:** For clients who are 21 years of age or older, requests for PT/INR monitors and related testing supplies that do not meet the criteria through Title XIX Home Health Services may be considered under the Texas Medicaid Home Health—Durable Medical Equipment (DME) Exceptional Circumstances process.

The following procedure codes are included in this benefit:

- Procedure code E1399 may be reimbursed for the rental or purchase of the monitor.
- Procedure code A9900 may be reimbursed for the related testing supplies.

Procedure codes E1399 and A9900 may be reimbursed to DME providers for services rendered in the home setting.

### 2.2.22.1 Prior Authorization

Prior authorization is required for the home PT/INR monitors and related testing supplies.

Prior authorization requests must be submitted within three business days of the date of service and must include documentation of medical necessity and a completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form.

The completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form with the original dated signature must be maintained by the prescribing physician or allowed practitioner in the client's medical record. A copy of the completed, signed, and dated form must be maintained by the DME provider in the client's medical record.

To facilitate the determination of medical necessity and avoid unnecessary denials, the physician or allowed practitioner must provide correct and complete information, including documentation of medical necessity for the equipment and/or supplies requested and is subject to retrospective review. The physician or allowed practitioner must maintain documentation of medical necessity in the client's medical record.

The requesting provider may be asked for additional information to clarify or complete a request for the PT/INR monitor.

Prior authorization for the rental or purchase of a home PT/INR monitor and related testing supplies will be considered for clients who meet all the following criteria:

- The client is on anticoagulation therapy and has a current prescription for Warfarin or other oral anticoagulant.
- The client has been on anticoagulation therapy for at least three months prior to the request for the home PT/INR monitor.
- The client is required to self-test at least every two weeks.

Additionally, the client must have at least one of the following conditions documented in the request for prior authorization:

- Fluctuations of INR or PT/PTT levels with titration greater than once per week in anticoagulation dosing with copies of laboratory reports and resultant medication changes.
- A medical condition that limits physical movement, places the client under medical restrictions for isolation, or requires non-emergency ambulance transport for the purpose of obtaining laboratory specimens.
- Limited venous access that compromises the ability to obtain laboratory specimens for the adequate monitoring of anticoagulation therapy.

The prior authorization request will be evaluated upon receipt to determine whether the equipment will be rented, purchased, repaired, or modified based on the client's needs, duration of use, and age of equipment.

**Note:** *Skilled nursing (SN) visits will not be approved for the sole purpose of instructing the client on the use of the PT/INR home testing monitor. Any necessary instruction must be performed as part of the office visit with the prescribing provider.*

### 2.2.23 Respiratory Equipment and Supplies

Respiratory equipment and supplies may be provided in the home under Title XIX Home Health Services.

Respiratory equipment and supplies must be prescribed by a physician or an allowed practitioner, be FDA approved for the medical condition, and have federal financial participation available to be considered a medically necessary benefit. An eligible client must have compromised health status without the requested equipment or supplies.

Equipment provided for rental may be new or used. Equipment provided for purchase must be new and unused.

HHSC or its designee will determine whether respiratory equipment will be rented, purchased, or repaired based on the client's needs and expected duration of use.

**Note:** *When new unused equipment is initially provided for rental and is subsequently authorized for purchase, the provider is not required to replace the equipment.*

Rental of equipment includes all necessary supplies, adjustments, repairs, and replacement parts. Supplies needed for use with client-owned equipment may be purchased separately within the limitations.

**Note:** *For clients who are 20 years of age and younger, respiratory equipment and supplies that do not meet the criteria under Title XIX Home Health Services may be considered through the Texas Health Steps-Comprehensive Care Program (THSteps-CCP).*

**Note:** *For clients who are 21 years of age and older, respiratory equipment and supplies that do not meet the criteria under Title XIX Home Health Services may be considered under the Texas Medicaid Home Health-Durable Medical Equipment (DME) Exceptional Circumstances process. Respiratory equipment and supplies are available without prior authorization up to the stated quantity limitation, unless otherwise specified in this handbook. Prior authorization is required for quantities exceeding the limitation.*

### 2.2.23.1 Prior Authorization

Unless otherwise indicated, prior authorization is required for rental or purchase of respiratory equipment provided through Home Health services.

All miscellaneous procedure codes listed in this handbook require prior authorization.

#### 2.2.23.1.1 Initial Request

A completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form prescribing the DME and/or supplies must be signed and dated by a physician or an allowed practitioner familiar with the client, before requesting prior authorization for all DME equipment and supplies. The completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form must include the procedure codes and quantities for services requested.

A Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form must be submitted for all DME services and supplies, unless the ordering physician or allowed practitioner is requesting the following:

- A continuous positive airway pressure (CPAP) or Bi-level positive airway pressure (BiPAP) and respiratory assist devices (RADs) are to be requested using a Texas Medicaid Prior Authorization Request for CPAP or RAD (Bi-level PAP) form.

**Note:** *Home ventilators (procedure codes E0465, E0466, E0467, and E0468) requested with CPAP or RAD settings must also be submitted on the Texas Medicaid Prior Authorization Request for CPAP or RAD (Bi-level PAP) form with a letter of medical necessity explaining why CPAP or RAD is not medically appropriate for the client.*

- Oxygen Therapy is to be requested using a Texas Medicaid Prior Authorization Request for Oxygen Therapy Devices and Supplies form.
- Secretion and mucus clearance device are to be requested using a Texas Medicaid Prior Authorization Request for Secretion and Mucus Clearance Devices - Initial Request form or a Texas Medicaid Prior Authorization Request for Secretion and Mucus Clearance Devices -Renewal Request form for secretion and mucus clearance devices.

**Note:** *It is not necessary to submit a Title XIX form if one of the prior authorization forms listed above are submitted.*

The following prior authorization request forms with the original dated signature must be maintained by the prescribing physician or allowed practitioner in the client's medical record. A copy of the completed, signed, and dated form must be maintained by the DME provider in the client's medical record. The following forms will not be accepted beyond 90 days from the date of the ordering physician's signature:

- Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form
- Texas Medicaid Prior Authorization Request for CPAP or RAD (Bi-level PAP) form
- Texas Medicaid Prior Authorization Request for Oxygen Therapy Devices and Supplies form
- Texas Medicaid Prior Authorization Request for Secretion and Mucus Clearance Devices - Initial Request form
- Texas Medicaid Prior Authorization Request for Secretion and Mucus Clearance Devices -Renewal Request form

Prior authorization requests may be submitted to the TMHP Prior Authorization Department via mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

**Referto:** Subsection 5.5.1.2, "Document Requirements and Retention" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*) for additional information about electronic signatures.

To complete the prior authorization process electronically, the provider must complete the prior authorization requirements through any approved electronic method.

To complete the prior authorization process by paper, the DME provider must fax or mail the completed form to the Home Health Services Prior Authorization Department.

To facilitate the determination of medical necessity and avoid unnecessary denials, the physician or allowed practitioner must provide correct and complete information, including documentation of medical necessity for the equipment and/or supplies requested and is subject to retrospective review. The physician or allowed practitioner must maintain documentation of medical necessity in the client's medical record. The requesting provider may be asked for additional information to clarify or complete a request for the respiratory equipment and supplies.

The requesting provider may be asked for additional information to clarify or complete a request.

Retrospective review may be performed to ensure documentation supports the medical necessity of the requested equipment or supplies.

A determination as to whether the equipment will be rented, purchased, repaired, or modified will be made by HHSC or its designee based on the client's needs, duration of use, and age of the equipment.

Equipment that has been purchased may be considered for replacement when loss or irreparable damage has occurred outside the warranty terms, conditions, and limitations. A copy of the police or fire report when appropriate and the measures to be taken to prevent reoccurrence must be submitted with the prior authorization request.

#### 2.2.23.1.2 Respiratory Equipment for Clients not Meeting Required Criteria

##### **Clients who are 20 years of age and younger**

For clients who are 20 years of age and younger, respiratory equipment and supplies that do not meet the criteria under Title XIX Home Health Services may be considered through the Texas Health Steps-Comprehensive Care Program (THSteps-CCP).

**Clients who are 21 years of age and older**

For clients who are 21 years of age and older, respiratory equipment and supplies that do not meet the criteria under Title XIX Home Health Services may be considered through the Texas Medicaid Home Health-Durable Medical Equipment (DME) Exceptional Circumstances provision.

**Referto:** Subsection 2.2.3, “Home Health DME and Supplies Exceptional Circumstances Provision” in this handbook for additional information about the Exceptional Circumstances provision.

Providers are expected to submit documentation for recertification requests as outlined in this handbook. If no specific documentation requirements are outlined, providers are to submit the following:

- A new prior authorization request form
- All of the initial request requirements
- A physician or an allowed practitioner attestation that the treatment has been effective and the client has been compliant with treatment

**2.2.23.1.3 Repair to Client-Owned Equipment**

Repairs to client-owned equipment may be prior authorized as needed with documentation of medical necessity. Technician fees are considered part of the cost of the repair.

HHSC or its designee reserves the right to request additional documentation about the need for repairs when there is evidence of abuse or neglect to equipment by the client, client’s family, or caregiver. When there is documented proof of abuse or neglect, requests for repairs will not be prior authorized.

Providers are responsible for maintaining documentation in the client’s medical record specifying the repairs and supporting medical necessity and must include all the following:

- The date of purchase
- The serial number of the current equipment (as applicable)
- The cause of the damage or need for repairs
- What steps the client or caregiver will take to prevent further damage if repairs are due to an accident
- When requested, the cost of purchasing new equipment as opposed to repairing current equipment

Temporary replacement of client-owned respiratory equipment during the repair may be considered for prior authorization for one month using procedure code K0462.

Labor for repair of client-owned respiratory equipment may be considered for prior authorization using procedure code K0739 up to a maximum of two hours per day (maximum quantity of 8 units).

Routine maintenance of rental equipment is the provider’s responsibility.

**2.2.23.2 Small Volume Nebulizers (SVN)**

Small volume nebulizers (SVNs) (procedure code E0570) and related supplies (procedure codes A7003, A7004, and A7005) may be considered for purchase without prior authorization for the conditions listed below:

| Condition                                          |
|----------------------------------------------------|
| Bronchiectasis - Any type                          |
| Cystic Fibrosis (CF) with pulmonary manifestations |
| Pneumonia - Any type                               |

| Condition                                                                                 |
|-------------------------------------------------------------------------------------------|
| Influenza                                                                                 |
| Bronchitis - Any type                                                                     |
| Emphysema - Any type                                                                      |
| Asthma - Any type                                                                         |
| Chronic Obstructive Pulmonary Disease (COPD) - any type                                   |
| Pneumoconiosis - Any type                                                                 |
| Acute, Sub-acute or Chronic Respiratory conditions                                        |
| Respiratory conditions due to radiation, smoke, unspecified and specified external agents |
| Abnormal Sputum                                                                           |
| Other diseases of the of the trachea and bronchus                                         |
| Tracheostomy Status                                                                       |
| Attention to tracheostomy                                                                 |
| HIV with pulmonary manifestations                                                         |
| Pneumocystosis                                                                            |
| Complications of a specified or unspecified transplanted organ, bone marrow or stem cells |
| Primary Pulmonary Hypertension                                                            |
| Other Chronic Pulmonary Heart Disease                                                     |

Supporting documentation of medical necessity must be maintained in the client's medical record, which must be available on request and is subject to retrospective review including but not limited to the following:

- Completed Title XIX Form signed and dated by the client's prescribing physician or allowed practitioner
- Name of the medication(s) ordered for administration through the nebulizer treatments
- Frequency and duration of the need for the prescribed nebulizer treatments

SVN and related supplies may be considered for conditions not listed above with prior authorization when submitted with the following documentation of medical necessity:

- Completed Title XIX Form signed and dated by the client's treating physician or allowed practitioner
- Justification supporting the use of an SVN to treat the client's diagnosis
- Name of the medication(s) ordered for administration through the nebulizer
- Frequency and duration of need for the prescribed nebulizer treatments

### **2.2.23.3 Ultrasonic Nebulizers (USNs)**

An ultrasonic nebulizer (USN) or electronic aerosol generator (procedure code E0574) is an electrically powered device that uses a piezoelectric crystal to generate aerosol. This crystal transducer converts radio waves into high-frequency mechanical vibrations (sound).

Ultrasonic nebulizers are a benefit when medically necessary and may be considered for purchase with prior authorization.

2.2.23.3.1 Prior Authorization

Purchase of a USN may be considered medically necessary when submitted with all the following documentation:

- Client meets the criteria for a SVN
- Client requires equipment for delivery of one of the following:
  - Treprostinil to treat pulmonary arterial hypertension (PAH) when used to diminish symptoms associated with exercise
  - Tobramycin to treat cystic fibrosis (CF)

USN may also be considered medically necessary for conditions other than those listed only when all of the following criteria have been met:

- Client meets the criteria for a SVN
- Client’s treating physician or allowed practitioner attests that the client has been compliant with other nebulizer and medication therapy
- Use of a SVN has failed to control the client’s disease, such as preventing the client from utilizing the hospital or emergency room

2.2.23.4 Humidification Therapy and Heating Elements

Humidification involves adding water vapor and sometimes heat to the inspired gas. Humidification therapy and heating elements are provided using the following procedure codes:

| Procedure Codes                        |       |       |       |
|----------------------------------------|-------|-------|-------|
| Large Volume nebulizer jar (water jar) |       |       |       |
| A7007                                  | A7017 | E0575 | E0580 |
| Humidifiers                            |       |       |       |
| E0550                                  | E0561 | E0562 |       |
| Other Supplies                         |       |       |       |
| E0565                                  | E1372 | E0585 |       |

2.2.23.4.1 Heating Elements

Heated humidifiers (procedure code E0562) and heated nebulizers (procedure code E0585) are used for clients with bypassed upper airways, clients receiving mechanical ventilatory support, and clients with high flow positive airway pressure devices. If heat is required for use with a large volume nebulizer (LVN), an immersion element (procedure code E1372) can be added.

2.2.23.4.2 Prior Authorization

Humidification therapy and heating elements may be considered for rental or purchase with prior authorization with documentation of medical necessity.

Indications for humidification and warming of inspired gases are humidifying dry medical gases and overcoming humidity deficit created when upper airway is bypassed.

Clinical signs and symptoms that may be an indication that airway humidification is medically necessary include the following:

- Dry, nonproductive cough
- Increased airway resistance
- Increased incidence of infection

- Increased work of breathing
- Complaint of substernal pain and airway dryness
- Thick, dehydrated secretions

Providers must specify the site of room air or oxygen delivery (e.g., nose or mouth, hypopharynx, trachea) and state how much heat and humidity is needed to mitigate the cold, dry gas delivered through the site.

Providers must submit a Title XIX form and all of the following documentation to obtain prior authorization for the monthly rental or purchase of humidification therapy or heating elements:

- Evidence that the client has a tracheostomy or tracheobronchial stent
- Evidence that the client has thick tenacious secretions not responsive to normal levels of humidification provided with routine humidifiers used with regulators or flow meters
- Evidence that the client is not currently renting a ventilator
- Evidence that the client is not currently renting a compressor for the delivery of humidification

Providers must specify the site of room air or oxygen delivery (e.g., nose or mouth, hypopharynx, trachea) and state how much heat and humidity is needed to mitigate the cold, dry gas delivered through the site.

### **2.2.23.5 Large Volume Nebulizer Jars (Water Jars) and Compressors**

Large volume nebulizer jars (procedure codes A7007 and A7017) used with compressors in humidification systems are a benefit when medically necessary and may be considered for purchase without prior authorization.

If heat is required, a heating element, such as an immersion element, can be added.

The autoclavable nebulizer (procedure code E0580 - glass or plastic) for use with a regulator or flow meter may be considered with prior authorization and documentation of medical necessity.

Equipment used with a large volume nebulizer to create a humidification system is a benefit when medically necessary with prior authorization.

A compressor (procedure code E0565) may be considered for rental or purchase with prior authorization. A compressor and heater (procedure code E0585), or large volume ultrasonic nebulizer (procedure code E0575) used to create the humidification systems when combined with a compressor are available for purchase and require prior authorization.

#### **2.2.23.5.1 Prior Authorization**

A large volume ultrasonic nebulizer and a nebulizer with compressor and heater may be considered for purchase with prior authorization when all the following criteria are met:

- The client has thick, tenacious secretions
- The client has one of the following medical conditions:
  - Cystic fibrosis
  - Bronchiectasis
  - A tracheostomy
  - A tracheobronchial stent

The compressor may also be considered when all of the following criteria are met:

- The compressor is needed for the administration of pentamidine using a filtered nebulizer

- The client has one of the following medical conditions:
  - HIV with pulmonary complications
  - Pneumocystosis
  - Complications of organ transplants

### **2.2.23.6 Intermittent Positive-Pressure Breathing (IPPB) Devices**

IPPB is not the therapy of first choice for delivering aerosol or as a method of lung hyperinflation when other therapies can reliably meet the clinical objectives prescribed for the client. Prior authorization of an IPPB device (procedure code E0500) is available for rental or purchase and will be considered with documentation of ineffective response with use of other modalities such as treatment with a cough assist device.

Rental of the IPPB device includes all supplies, such as humidification and tubing.

In accordance with the American Association for Respiratory Care (AARC) recommendations, IPPB may be considered when one of the following indications is documented:

- The client has a need to improve lung expansion
- The need to deliver aerosol medication to a client when other methods of delivery have been unsuccessful

#### **2.2.23.6.1 Prior Authorization**

IPPB requires prior authorization and may be considered with documentation of ineffective response to treatment when other modalities, such as a cough assist device, have failed, when prescribed in accordance with the AARC recommendations, and there is medical necessity to improve lung expansion due to one of the following:

- The presence of clinically significant pulmonary atelectasis when other forms of therapy have been unsuccessful or the client cannot cooperate with the treatment
- The inability to clear secretions adequately due to pathology that severely limits the client's ability to ventilate or cough effectively and failure to respond to other modes of treatment, including but not limited to:
- Neuromuscular disorders or kyphoscoliosis with associated decreases in lung volumes and capacities
- Presence of acute severe bronchospasm or exacerbated COPD that fails to respond to other therapy
- Deliver aerosol medication when other methods of delivery have been unsuccessful including, but not limited to:
- The client who has fatigue as a result of ventilatory muscle weakness such as neuromuscular disease, kyphoscoliosis, or spinal cord injury
- The clients with severe hyperinflation where IPPB may decrease dyspnea and discomfort during nebulized therapy

### **2.2.23.7 Controlled Dose Inhalation Drug Delivery Systems**

A controlled dose inhalation drug delivery system (procedure code K0730) is a benefit when it is medically necessary to deliver the drug iloprost (e.g. Ventavis) and is restricted to clients with pulmonary artery hypertension. The controlled dose inhalation drug delivery system is available for purchase with prior authorization when medically necessary.

2.2.23.7.1 Prior Authorization

Prior authorization is required for purchase of a controlled dose inhalation drug delivery system when used with iloprost and may be considered when the client has a diagnosis of pulmonary artery hypertension and the pulmonary hypertension is not secondary to pulmonary venous hypertension or disorders of the respiratory system.

2.2.23.8 Continuous Positive Airway Pressure (CPAP) and Respiratory Assist Devices (RAD) including Bi-Level PAP

Continuous positive airway pressure (CPAP) (procedure code E0601) and respiratory assist devices (RADs) (procedure code E0470) without set back up rate are available for rental or purchase with prior authorization.

RADs with set back up rate (procedure codes E0471 and E0472) are a benefit when medically necessary and may be considered for rental with prior authorization for clients requiring:

- Treatment of obstructive sleep apnea
- Restrictive thoracic disorders
- Severe chronic obstructive pulmonary disease
- Central sleep apnea
- Complex sleep apnea
- Hypoventilation syndrome

*Note: Other conditions may be considered based on medical necessity.*

RADs with a set backup respiratory rate are available for rental, only when medically necessary.

Humidification devices (heated and non-heated) may be a benefit with prior authorization when medically necessary for rental or purchase for use with CPAP devices and RADs.

The following related supplies procedure codes are included in the CPAP and RAD rental and will not be reimbursed separately:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| A7029           | A7030 | A7031 | A7032 | A7033 | A7034 | A7035 | A7036 | A7037 | A7038 |
| A7039           |       |       |       |       |       |       |       |       |       |

The following procedure codes will deny if billed in the same month by any provider as procedure code E0472:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| A7029           | A7030 | A7031 | A7032 | A7033 | A7034 | A7035 | A7036 | A7037 | A7038 |
| A7039           |       |       |       |       |       |       |       |       |       |

2.2.23.8.1 Prior Authorization

CPAP devices (procedure code E0601) and RADs (procedure codes E0470, E0471, and E0472) require prior authorization. CPAP devices deliver a single, fixed pressure to the client during the night while sleeping. Some sleep breathing disorders do not benefit from CPAP and require treatment with RADs that are able to recognize the client’s breathing patterns and adjust pressure during the respiratory cycle during sleep.

**Note:** CPAP and RAD criteria are based on CMS coverage determinations.

CPAP and RAD accessories (headgear, chin straps, face masks, nasal pillows, cushions, nasal interfaces, tubing and filters), when used with the following procedure codes and within the maximum allowed limits, do not require prior authorization with a fee-for-service history of a client-owned CPAP and RAD device:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| A7029           | A7030 | A7031 | A7032 | A7033 | A7034 | A7035 | A7036 | A7037 | A7038 |
| A7039           |       |       |       |       |       |       |       |       |       |

**Note:** RAD with backup rate used with an invasive interface (procedure codes E0471 and E0472) do require prior authorization. Supplies are included in the rental of procedure code E0472 and will not be authorized separately.

In the case of a client-owned RAD with backup rate that is used with invasive interface (procedure code E0472) that was purchased as a result of a rental or purchased through another payer source, proof of ownership of the device is required for consideration of reimbursement of associated supplies and accessories. A statement from the treating physician or allowed practitioner providing the make and model of the client-owned device, submitted with the claims appeal, will meet this requirement if the claims history is not available.

A CPAP device or a RAD without a set backup rate may be considered for an initial three month rental period with prior authorization. Following the initial three month rental period, if the CPAP or RAD without a set backup rate is effective, the device may be considered for purchase. Both devices may also be considered for continued rental with renewal at three month intervals up to 12 months.

A CPAP device and a RAD without a set backup rate will be considered purchased after 12 months of rental through the same provider and a request for purchase or further rental will not be considered.

A RAD with a set backup respiratory may be considered for an initial 3 month rental period with prior authorization and will be considered for rental only.

Humidification devices (heated or non-heated) for use with a CPAP or RAD device may be a benefit with prior authorization when medically necessary. Documentation submitted must support why humidification is medically necessary for use with positive pressure ventilation.

Prior authorization may be considered for initial and renewal requests for CPAP and RAD devices with submission of the Texas Medicaid Prior Authorization Request for CPAP or RAD (Bi-level PAP) form (new with each request) completed, signed and dated by the treating physician or allowed practitioner with the following sections completed:

- A and B for initial requests
- A and C for renewal requests

Additional documentation (e.g., titration sleep studies) as necessary to support the medical necessity of the service required as outlined below for the initial and renewal requests.

**Initial Request for a Continuous Positive Airway Pressure (CPAP) System**

The American Academy of Sleep Medicine (AASM) Guidelines state that it is clinically appropriate to treat clients who are 18 through 20 years of age using adult criteria.

A CPAP device (procedure code E0601) may be considered for an initial three-month rental period based on documentation supporting the medical necessity and appropriateness of the device. Documentation must include that the client has had a sleep study, lasting minimum of two hours, and at least one of the following criteria:

- For clients who are 17 years of age and younger, polysomnography results documenting an apnea-hypopnea index (AHI) greater than one event per hour may be used to establish medical necessity
- For clients who are 18 years of age and older, polysomnography results documenting an AHI or a respiratory disturbance index (RDI) greater than or equal to 15 events per hour
- For clients who are 18 years of age and older, an AHI or RDI greater than five events per hour with documentation of at least one of the following:
  - Excessive daytime sleepiness assessed by either the Epworth Sleepiness Scale (ESS) with a result greater than 10 or the Multiple Sleep Latency Test (MSLT) with a result less than 6
  - Symptoms of impaired cognition, mood disorders, or insomnia
  - Hypertension (systolic blood pressure greater than 140 mm Hg or diastolic blood pressure greater than 90 mm Hg)
  - Ischemic heart disease or previous myocardial infarction
  - History of stroke
  - Greater than 20 episodes of oxygen desaturation to less than 85 percent during a full night sleep study
  - Any one episode of oxygen desaturation of less than 70 percent
  - Pulmonary hypertension

CPAP may be medically necessary for the treatment of obstructive sleep apnea (OSA) in clients younger than 18 years of age when one of the following criteria is documented:

- Adenoidectomy or tonsillectomy is contraindicated
- Adenoidectomy or tonsillectomy is delayed
- Adenoidectomy or tonsillectomy has been unsuccessful in relieving symptoms of OSA

Documentation must be maintained in the client's medical record that the client or responsible caregiver has received instruction from the DME provider on the proper use and care of the device and supplies.

**Renewal Request for a CPAP System**

Prior authorization for purchase or an additional three month CPAP rental after the initial three-month rental period will be considered with all of the following documentation completed, signed, and dated by the client's treating physician or allowed practitioner:

- A new Texas Medicaid Prior Authorization Request for CPAP or RAD (Bi-level PAP) form
- Documentation of medical necessity supporting:
  - The client's continuous use of the equipment for a minimum of four hours per 24 hour period
  - The client's symptoms as documented by the treating physician or allowed practitioner are improved with use of the CPAP

Continued rental of CPAP may be considered for up to 12 months with renewal at 3 month intervals. A CPAP device will be considered purchased after 12 months of continuous rental through the same provider.

**Initial Request for Respiratory Assist Devices (RADs), including BiPAP - with and without a Set Backup Respiratory Rate**

A RAD with or without a set back up rate may be considered for prior authorization when the client has one of the following medical conditions as documented by a sleep study and meets criteria for medical necessity for the specific medical condition:

- Obstructive sleep apnea (OSA)
- Restrictive thoracic disorders (i.e., neuromuscular diseases or severe thoracic cage abnormalities)
- Severe COPD
- Central sleep apnea (CSA), complex sleep apnea (CompSA)
- Hypoventilation syndrome

**Initial Request for RAD for the Treatment of Obstructive Sleep Apnea (OSA)**

A RAD without backup may be considered for an initial three month trial period for the treatment of OSA with prior authorization and submission of all of the following:

- All the required documentation delineated on the Texas Medicaid Prior Authorization Request for CPAP or RAD (Bi-level PAP) form outlined in the section for CPAP
- The client meets the criteria for the initial CPAP rental
- The documentation supports that CPAP has been tried and one of the following is documented:
  - The client's treating physician or allowed practitioner verifies that a therapeutic trial of CPAP was conducted in the home or a facility setting and failed to be effective in treating the client's OSA
  - A CPAP device was found to be ineffective during the initial facility based or sleep laboratory titration trial testing

If a CPAP device is tried and found ineffective during the initial facility-based titration or home trial, substitution of a RAD does not require a new face-to-face clinical evaluation or a new sleep test.

**Initial Request for RAD for the Treatment of Restrictive Thoracic Medical Conditions**

A RAD without a set backup rate requires prior authorization and may be considered for the treatment of thoracic medical conditions when all of the following are met:

- The client is diagnosed with a neuromuscular disorder (e.g., Duchenne muscular dystrophy, ALS, spinal cord injuries) or the client has a diagnosis of a severe thoracic cage abnormality (e.g., severe chest wall deformities) negatively impacting the client's respiratory effort
- Significant respiratory insufficiency is documented by one of the following:
  - An arterial blood gas (ABG) PaCO<sub>2</sub> greater than or equal to 45 mm Hg, obtained while awake and breathing the client's routinely prescribed fraction of inspired oxygen concentration (FiO<sub>2</sub>)
  - Sleep oximetry demonstrates oxygen saturation less than or equal to 88 percent for 5 minutes or longer of continuous nocturnal recording time (minimum recording time of 2 hours), obtained while client is breathing his or her routinely prescribed FiO<sub>2</sub>

**Note:** *FiO<sub>2</sub> is the concentration of oxygen prescribed for routine use by the client. For example, if the client does not normally use supplemental oxygen, their prescribed oxygen is room air (FiO<sub>2</sub> of 21 percent).*

For clients who have been diagnosed with a neuromuscular disorder only, documentation must support one of the following:

- Maximal inspiratory pressure less than 60 cm H<sub>2</sub>O
- Forced vital capacity less than 50 percent of predicted volume

A RAD with a set backup rate requires prior authorization and may be considered for the treatment of thoracic medical conditions when all of the following are met:

- The client meets the criteria for use of the RAD without a backup rate for the treatment of a thoracic medical condition
- The ordering physician or allowed practitioner certifies to all of the following:
  - Client has tried a RAD without a backup rate for at least 60 days
  - The client was compliant in the use of the device (using the device on average 4 or more hours in a 24 hour day)
  - The desired therapeutic respiratory response was not achieved with the RAD without a set backup rate

### **Initial Request for RAD for the Treatment of Severe Chronic Obstructive Pulmonary Disease (COPD)**

A RAD without a backup rate may be considered for the treatment of severe COPD, with prior authorization, when all of the following criteria are met:

- An arterial blood gas PaCO<sub>2</sub> less than 52 mm Hg, obtained while awake and when the client is either using 2 LPM of oxygen or the client's prescribed FIO<sub>2</sub> (the blood gas should be drawn while the client is using whichever concentration of oxygen is the higher of the two)
- Sleep oximetry demonstrates oxygen saturation less than or equal to 88 percent for 5 minutes or longer of continuous nocturnal recording time (minimum recording time of 2 hours), obtained while breathing oxygen at 2 LPM or the client's prescribed FIO<sub>2</sub> (whichever is higher)
- Prior to initiating therapy, documentation of sleep apnea and that treatment with CPAP has been considered with an explanation of why it was ruled out

To rule out the use of a CPAP, formal sleep testing is not required if there is sufficient information in the medical record submitted with the request to demonstrate that the client does not suffer from some form of sleep apnea (obstructive sleep apnea (OSA), CSA, or CompSA) as the predominant cause of awake hypercapnia or nocturnal arterial oxygen desaturation).

A RAD with a backup feature will be considered with prior authorization for severe COPD when the all of the following criteria are met:

- The client meets the criteria for use of the RAD without a backup rate for COPD
- The ordering physician or allowed practitioner certifies to all of the following:
  - Client has tried a RAD without a backup rate for at least 60 days
  - The client was compliant in the use of the device (using on average 4 or more hours in a 24 hour day)
  - The desired therapeutic respiratory response was not achieved with the RAD without a set backup rate

**Initial Request for RAD for the Treatment of Central Sleep Apnea (CSA) or Complex Sleep Apnea (CompSA)**

CSA or CompSA is characterized by the development of central apneas or central hypopneas during pressure titrations performed in a sleep lab titration study for CPAP or RAD without a backup rate.

A RAD without a backup rate will be considered with prior authorization for the treatment of CSA or CompSA when a facility based polysomnogram is performed and supports all of the following:

- The client has a diagnosis of CSA or CompSA
- The sleep study documents one of the following:
  - The sum total of central hypopneas plus central apneas is greater than 50 percent of the total apneas and hypopneas rate
  - A central hypopnea/apnea rate index greater than 5 events per hour; and significant improvement of the sleep-associated hypoventilation while breathing the clients prescribed FiO<sub>2</sub>
  - Documentation ruling out CPAP as effective therapy if either OSA or CSA is a component of the initially observed sleep associated hypoventilation

A RAD with a backup rate will be considered with prior authorization for the treatment of CSA or CompSA when all of the following are met:

- The client meets the criteria for use of the RAD without a backup rate for the treatment of CSA or CompSA
- The ordering physician or allowed practitioner certifies to all of the following:
  - Client has tried a RAD without a backup rate for at least 60 days
  - The client was compliant in the use of the device (using on average 4 or more hours in a 24 hour day)
  - The desired therapeutic respiratory response was not achieved with the RAD without a set backup rate

**Initial Request for RAD for the Treatment of Hypoventilation Syndrome**

A RAD without a backup rate may be considered for treatment of hypoventilation syndrome with prior authorization when all of the following criteria are met:

- An initial arterial blood gas PaCO<sub>2</sub>, obtained while awake with the client breathing their prescribed FIO<sub>2</sub>, greater than or equal to 45 mm Hg
- Spirometry shows a forced expired volume in 1 sec (FEV<sub>1</sub>) or the forced vital capacity (FVC) greater than or equal to 70 percent
- A facility-based polysomnogram demonstrates oxygen saturation less than or equal to 88 percent for 5 minutes or longer of continuous nocturnal recording time (minimum recording time of 2 hours) not caused by obstructive upper airway events

A RAD with a set backup respiratory rate may be considered with prior authorization for the treatment of hypoventilation syndrome when one of the following are met:

- The client has hypoventilation syndrome as determined by a facility-based polysomnogram that demonstrates the desired respiratory therapeutic effects were not achieved with a RAD without a backup rate
- The client meets the criteria for RAD without a backup rate for hypoventilation syndrome, and the physician or allowed practitioner documents the desired respiratory therapeutic effects were not achieved with the RAD without a backup rate.

**Renewal Request for RAD with or without a Backup Rate**

Prior Authorization is required for renewal of a RAD with or without a backup rate.

Prior authorization for purchase of RAD without a set back up rate or continued rental of a RAD with or without a backup rate, after completion of the initial three-month rental period, may be considered with all of the following documentation completed, signed, and dated by the client’s treating physician or allowed practitioner:

- A new Texas Medicaid Prior Authorization Request for CPAP or RAD (Bi-level PAP) form
- Attestation from the treating physician or allowed practitioner that states the client is continuing to use the equipment at a minimum of four hours in a 24 hour period
- Client symptoms are improved as documented by the client’s treating physician or allowed practitioner

When recertifying a RAD with or without a set backup rate for significant respiratory insufficiency, documentation of a capillary blood gas (CBG) demonstrating a PaCO2 greater than or equal to 45 mm Hg, obtained while awake and breathing the client’s routinely prescribed FiO2 may be submitted in lieu of an ABG.

**2.2.23.9 Mechanical Ventilation**

Invasive and noninvasive ventilators (procedure codes E0465, E0466, E0467, and E0468) are considered for rental only with prior authorization and documentation of medical necessity indicating a clinical need for mechanical ventilation.

Mechanical ventilation may be considered for the treatment of, but not limited to:

- Neuromuscular or musculoskeletal diseases and conditions affecting the respiratory muscles
- Thoracic restrictive diseases
- Chronic respiratory failure
- The following procedure codes will deny if billed in the same month by any provider as procedure codes E0465 and E0466:

| Procedure Codes |       |       |       |       |       |  |  |  |  |
|-----------------|-------|-------|-------|-------|-------|--|--|--|--|
| A4481           | A4483 | A4611 | A4612 | A4613 | A4618 |  |  |  |  |

The following procedure codes will deny if billed in the same month by any provider as procedure code E0467:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| A4216           | A4217 | A4481 | A4483 | A4605 | A4611 | A4612 | A4613 | A4618 | A4619 |
| A4624           | A4628 | A7000 | A7002 | A7003 | A7004 | A7005 | A7006 | A7007 | A7012 |
| A7013           | A7014 | A7015 | A7017 | A7025 | A7026 | A7027 | A7028 | A7029 | A7030 |
| A7031           | A7032 | A7033 | A7034 | A7035 | A7036 | A7037 | A7038 | A7039 | A7046 |
| A7525           | E0424 | E0431 | E0433 | E0434 | E0439 | E0441 | E0442 | E0443 | E0444 |
| E0465           | E0466 | E0470 | E0471 | E0472 | E0482 | E0483 | E0561 | E0562 | E0565 |
| E0570           | E0585 | E0600 | E0601 | E1372 | E1390 | K0738 |       |       |       |

Any of the following procedure codes will deny if billed with E0468:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| A4216           | A4217 | A4481 | A4483 | A4611 | A4612 | A4613 | A4618 | A7027 | A7028 |

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| A7029           | A7030 | A7031 | A7032 | A7033 | A7034 | A7035 | A7036 | A7037 | A7038 |
| A7039           | A7046 | E0465 | E0466 | E0470 | E0471 | E0472 | E0482 | E0561 | E0562 |
| E0601           |       |       |       |       |       |       |       |       |       |

### 2.2.23.9.1 Prior Authorization

All ventilators and related equipment require prior authorization.

The DME provider is responsible for ensuring that there is a contingency plan to manage interruptions in the use of equipment such as emergency situations and mechanical failures that would be life threatening for the client. Acceptable plans include input from the client's treating practitioner that takes into account the severity of the client's medical condition and time constraints in providing emergency support.

A ventilator may be considered for an initial three-month rental period. Following the initial three-month rental period, if the ventilator was effective, it may be considered for ongoing six-month rental periods.

A home ventilator with an invasive or noninvasive interface (procedure codes E0465, E0466, E0467, and E0468) is not intended for use as a CPAP or RAD; however, a home ventilator may be considered when medically necessary. A home ventilator requested with CPAP or RAD settings must be submitted on the Texas Medicaid Prior Authorization Request for CPAP or RAD (Bi-level PAP) form with a letter of medical necessity explaining why a CPAP or RAD is not medically appropriate for the client.

Prior authorization may be considered for initial and renewal requests for mechanical ventilators with submission of all of the following:

- A completed Title XIX Form signed and dated by the client's treating physician or allowed practitioner (new with each request)
- Attestation from the treating physician or allowed practitioner that the mechanical ventilator is medically necessary and the client is compliant with the use of the equipment

The completed Title XIX Form must specify all ventilator settings and must be maintained by the DME provider and the treating physician, or allowed practitioner, in the client's medical record.

The monthly ventilator rental includes all ventilator related supplies regardless of the client's duration of use, whether 24 hours per day or less, including, but not limited to:

- Internal filters
- External filters
- Ventilator circuits with an exhalation valve
- High and low pressure alarms
- Humidification systems including supplies and solutions (e.g., sterile or distilled water)
- In-line compressors and related supplies
- Replacement ventilator
- Tracheostomy tube filters and humidification devices, such as heat moisture exchangers (procedure code A4483)

**Note:** A replacement ventilator is a replacement for the primary ventilator due to mechanical or other malfunction and is considered a part of the rental agreement and is not authorized separately from the primary ventilator request.

Oxygen rental is not considered a ventilator supply and may be considered for separate prior authorization.

**Referto:** Subsection 2.2.23.12, “Oxygen Therapy” in this handbook for more information.

Heated or non-heated humidification requires a separate prior authorization for rental or purchase for client owned ventilators. Documentation submitted must support why it is medically necessary for the use with the ventilation.

**Referto:** Subsection 2.2.23.4, “Humidification Therapy and Heating Elements” in this handbook for more information.

When prescribed by a treating physician or allowed practitioner and medically necessary for clients who require mechanical ventilation, the following devices will be prior authorized for rental:

- A home ventilator that uses an invasive interface, such as a tracheostomy tube (procedure code E0465)
- A home ventilator that uses a non-invasive interface, such as a mask or chest shell (procedure code E0466)
- A multifunction respiratory device (procedure code E0467)
- A dual-function respiratory device (procedure code E0468)

Rental of a chest shell (cuirass or “clam shell”) (procedure code E0457) and chest wrap (procedure code E0459) for use with a mechanical ventilator is limited to up to three months.

A dual-function respiratory device home ventilator (procedure code E0468) may be prior authorized for rental for those clients who require mechanical ventilation with documentation that also meets the medical necessity criteria for a cough augmentation device.

Purchase of a chest shell (cuirass or “clam shell”) may be prior authorized for purchase following the initial three-month rental period of the mechanical ventilator. The prescribing physician or allowed practitioner must include the predicted length of treatment and the client’s compliance with the equipment.

### **2.2.23.10 Back-Up Mechanical Ventilator**

A back-up ventilator is defined as an identical or similar device used to meet the same medical needs as the primary ventilator for the client, but provided in the home as a precaution in case of malfunction of the primary ventilator.

Requests for a back-up ventilator in the home must meet both the following criteria to be considered medically necessary:

- The client cannot maintain spontaneous ventilations for four or more consecutive hours.
- The client lives in an area where a replacement ventilator cannot be provided within two hours.

Prior authorization requests for a back-up ventilator must include all of the following documentation:

- The amount of time the client is able to maintain spontaneous ventilation.
- The distance and/or delivery time of a replacement ventilator to the clients home.

All requests for a back-up ventilator in the home must be sent to the TMHP for Medical Director for review.

### 2.2.23.11 Secretion and Mucus Clearance Devices

Secretion and mucus clearance devices are a benefit when medically necessary, and are typically needed by clients diagnosed with cystic fibrosis (CF), chronic bronchitis, bronchiectasis, and ciliary dyskinesia syndromes, some forms of asthma, neuromuscular degenerative disorders, post-operative atelectasis, or thoracic wall defects.

Secretion and mucus clearance devices may be considered when documentation clearly shows the client has one of the following indications for this form of therapy as described by the AARC in the Clinical Practices Guidelines for Postural Drainage Therapy:

- Evidence of retained secretions
- Evidence that the client is having difficulty with the secretion clearance
- Presence of atelectasis caused by mucus plugging

The following secretion and mucus clearance devices or procedures do not require prior authorization:

- Incentive spirometers (procedure code A9284)
- Mucous clearance valved chamber (oscillating positive expiratory pressure (PEP), such as the Flutter Valve) (procedure code S8185)
- Moisture exchangers (procedure code A4483) only when used for mechanically ventilated clients who own their ventilator
- Tracheostoma filters, such as Thermovent T (procedure code A4481) for clients with a tracheotomy who are not mechanically ventilated

The following secretion and mucus clearance devices require prior authorization:

- Insufflation-exsufflation devices (e.g. Cough Assist, Coflator) (procedure code E0482)
- Electrical percussors (procedure code E0480)
- The high-frequency chest wall oscillation (HFCWO) system with full anterior and/or posterior thoracic region receiving simultaneous external oscillation (procedure code E0483)
- Percussion cup (procedure code E1399)
- Intermittent positive pressure breathing (IPPB) devices (procedure code E0500)

Procedure codes A7025 and A7026 will deny if billed in the same month by any provider as rental of procedure code E0483.

#### 2.2.23.11.1 Prior Authorization

Prior authorization requests for the rental or purchase of secretion and mucus clearance devices require submission of a Texas Medicaid Prior Authorization Request for Secretion and Mucus Clearance Devices - Initial Request form or a Texas Medicaid Prior Authorization Request for Secretion and Mucus Clearance Devices -Renewal Request form completed, signed, and dated by the client's treating physician or allowed practitioner unless otherwise specified.

Clients requiring more than one secretion and mucus clearance device must have a pulmonologist or allowed practitioner specialized in pulmonology as the treating provider who submits a signed and dated letter of medical necessity (LMN) on the physician's letterhead stating the need of two devices.

#### Percussion Cups

Percussion cups, used when performing chest physiotherapy, may be medically necessary to loosen thick, mucus secretions, assist respiration, and prevent infections and require prior authorization. Percussion cups should be requested using the miscellaneous DME procedure code E1399.

**Electrical Percussor**

An electrical percussor (procedure code E0480) may be considered for rental or purchase with documentation of medical necessity including a description of all previous courses of therapy (such as manual percussion and postural drainage (P&PD) or valved devices) and why they did not adequately assist the client in airway mucus clearance.

**Cough Augmentation Device (e.g., mechanical insufflation-exsufflation or cough assist machine)**

A cough augmentation device (procedure code E0482) may be considered for prior authorization for rental only for those clients who have chronic pulmonary disease or neuromuscular disorders (including spinal cord injury) that affect the respiratory musculature, causing a weak, ineffectual, or absent cough.

Prior authorization of a cough augmentation device may be considered for an initial three-month rental period with all of the following documentation completed, signed, and dated by the client's treating physician or allowed practitioner:

- Diagnosis and background history including, as applicable, recent illnesses, complications, medications used, history of recent hospitalizations, and results of pulmonary function studies (if applicable) due to diagnosis related complications
- History of school, work, or extracurricular activity absences or other clinical evidence supporting natural deterioration to the level of requiring the use of a cough augmentation device to clear the airways, such as a weak, ineffective cough as demonstrated by pulmonary function studies (PFTs)
- Medical reasons why the client, parent, guardian, or caregiver cannot perform chest physiotherapy, or why such therapies were previously not effective

Requests for prior authorization recertification must include documentation by the client's treating physician or allowed practitioner that the client is compliant with the use of the equipment and that the treatment is effective.

**High-Frequency Chest Wall Oscillation (HFCWO) System**

A high-frequency chest wall oscillation (HFCWO) system with full anterior and/or posterior thoracic region receiving simultaneous external oscillation (procedure code E0483) will not be prior authorized as first line treatment. The client must have trialed other percussion and postural drainage therapy, such as electric percussor or cough augmentation device, for a minimum of three months before a request for a HFCWO system will be considered for prior authorization.

A request for a HFCWO system may be considered for prior authorization for rental or purchase when submitted with documentation addressing why prior therapy was ineffective and documentation of one of the following conditions.

- Bronchiectasis when it is confirmed by CT scan and characterized by either a continuous daily productive cough for 6 months or frequent exacerbations of pulmonary infections (i.e., more than 2 times per year) requiring antibiotic therapy
- Cystic fibrosis or other documented chronic suppurative endobronchitis
- Chronic neuromuscular disorder affecting the client's ability to cough or clear respiratory secretions
- Weak ineffective or absent cough caused by chronic pulmonary disease or a neuromuscular disorder

### **Rental of the HFCWO System**

An initial three-month rental may be prior authorized for the HFCWO system with hose and vest (procedure code E0483) when submitted with the following documentation of medical necessity that is completed, signed, and dated by the client's treating physician or allowed practitioner:

- A Texas Medicaid Prior Authorization Request for Secretion and Mucus Clearance Devices form (Initial or Renewal Request) form
- Client history of a chronic respiratory illness with exacerbation or change in baseline respiratory condition in the past 6 months, including extra nebulizer treatments for respiratory secretions, I.V. antibiotics, and hospitalizations
- Client history of school, work, or extracurricular activity absences due to diagnosis related symptoms, or pulmonary function testing in (PFTs) in past 6 months, if applicable
- Other appropriate (age, ability, skill) modes of chest physiotherapy (such as percussion and postural drainage therapy or mechanical device) that have been trialed by the client, parent, guardian, or caregiver for a minimum of three months before the HFCWO request and the reasons the trialed therapy was ineffective or contraindicated
- Documentation that any previous use of an HFCWO device did not result in aspiration, exacerbation of a gastrointestinal or pulmonary issue, or an exacerbation of seizure activity

If at the end of the initial three-month rental a determination of purchase cannot be made, an additional three month-rental may be considered for prior authorization when the request is submitted with the above documentation and documentation of compliance with ordered therapy.

### **Purchase of the HFCWO System**

If at the end of the initial three-month rental, the HFCWO system (procedure code E0483) is documented to be effective, purchase of the system may be considered for prior authorization when submitted with all the following required documentation:

- A physician or allowed practitioner's statement of the HFCWO system trial in a clinic, hospital, or the home setting documenting:
  - The results of the HFCWO system therapy
  - The effectiveness and tolerance of the system that includes evidence of vest tolerance
  - An explanation of the trial outcome
- The treating physician or allowed practitioner's description and assessment of the effectiveness and tolerance of the system that includes the client's diagnosis and the following background history:
  - Respiratory related complications and evidence of a decrease in these complications
  - Medications used, including IV antibiotic therapy with dosage, frequency and duration, including evidence of decreased respiratory-related medication use
  - Recent hospitalizations related to the client's respiratory condition and evidence of shorter hospital length(s) of stay
  - Evidence of decreased hospitalizations
  - Evidence of fewer school, work, or extracurricular activity absences due to a diagnostic related condition or other clinical evidence supporting natural deterioration to the level of requiring the use of a HFCWO system to clear the airways, such as a weak, ineffective cough as demonstrated by pulmonary function studies (PFTs)
  - Evidence of the frequency and compliance graphs for the 3-month period showing the frequency prescribed by the physician or allowed practitioner for each day and use of the system at least 50 percent of the time

- A statement from the treating physician or allowed practitioner that the previous use of the HFCWO device has not resulted in aspiration, exacerbation of a gastrointestinal or pulmonary issue, or exacerbation of seizure activity.

A HFCWO system purchase will be reimbursed only once per lifetime, due to the lifetime warranty provided by the manufacturer. Requests for a vest replacement (procedure code A7025) must include documentation that supports the client can no longer wear the vest due to changes in the client’s condition such as changes in height, weight, or skin abrasions.

**2.2.23.12 Oxygen Therapy**

Devices used for in-home oxygen therapy including stationary oxygen concentrators (procedure code E1390), compressed gas (procedure code E0424), liquid oxygen (procedure code E0439), portable compressed gas cylinder (procedure code E0431), or liquid oxygen reservoir (procedure code E0433) systems are a benefit when medically necessary and require prior authorization.

Oxygen system rental includes, but is not be limited to:

- Oxygen concentrator or oxygen tanks
- Regulator
- Flow meter
- Humidifier
- Cannula or mask
- Tubing

Oxygen system supplies, including but not limited to a cannula or mask, refills, and tubing do not require prior authorization for client owned equipment.

Devices used for in-home oxygen therapy may be considered for the treatment of hypoxemia which may be the result of, but not limited to:

- Bronchopulmonary dysplasia or other respiratory diagnoses due to prematurity
- Respiratory failure or insufficiency; musculoskeletal weakness, such as that caused by Duchenne’s muscular dystrophy or spinal muscle atrophy
- Diagnosis of cluster headaches
- Severe lung disease, such as COPD, diffuse interstitial lung disease, cystic fibrosis, bronchiectasis, or widespread pulmonary neoplasm

Humidification during oxygen therapy may be a benefit with prior authorization and is provided as a component of the oxygen therapy rental. Humidification during oxygen delivery with client-owned equipment may be a benefit for rental or purchase with prior authorization when medically necessary.

The following procedure codes will deny if billed in the same month by any provider as procedure codes E0424, E0431, E0433, E0434, E0439, E1390, and K0738:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| A4615           | A4616 | A4617 | A4619 | A4620 | E0441 | E0442 | E0443 | E0444 | E0447 |
| E0580           | E1353 | E1355 |       |       |       |       |       |       |       |

**2.2.23.12.1 Prior Authorization**

Oxygen therapy criteria are based on AARC, American Thoracic Society, and British Thoracic Society Treatment Guidelines. Oxygen therapy related supplies, other than humidification, do not require prior authorization for client owned equipment. Humidification during oxygen delivery with client-owned equipment may be a benefit for rental or purchase with prior authorization when medically necessary.

All oxygen therapy equipment requires prior authorization and prior authorization may be considered for monthly rental only. A completed Texas Medicaid Prior Authorization Request for Oxygen Therapy Devices and Supplies form completed, signed, and dated by a the client's treating physician or allowed practitioner must be submitted.

Prescribing providers must maintain an original, completed, signed, and dated Texas Medicaid Prior Authorization Request for Oxygen Therapy Devices and Supplies form in the client's medical record. The DME provider must maintain a copy of the complete, signed, and dated in the client's record.

Stationary oxygen concentrators are the preferred oxygen therapy home delivery system. If other types of oxygen therapy home delivery systems are required, documentation of medical necessity to support an exception, such as frequent interruptions in electrical service or medical necessity for a higher oxygen concentration than can be obtained with a concentrator, must be provided. The other types of delivery systems include:

- Compressed gas cylinder systems (nonportable tanks).
- Liquid oxygen reservoir systems.

Multiple oxygen types (e.g., liquid and gas) will not be authorized concurrently.

### **Initial Oxygen Therapy Medical Necessity Certification**

Oxygen ordered for 'as needed' or 'PRN' use does not provide a basis to determine if intermittent oxygen is reasonable and medically necessary for the client. Documentation must support the need for intermittent use of oxygen.

Prior authorization of home oxygen therapy for an initial three month rental period may be considered with submission of all of the following documentation in addition to the request:

- Evidence from the client's treating physician or allowed practitioner of a determination that the client has severe lung disease or hypoxia-related symptoms that are expected to improve with oxygen therapy and the client's blood gas studies meet the criteria indicated below
- A Texas Medicaid Prior Authorization Request for Oxygen Therapy Devices and Supplies form with Sections A and B that is completed, signed, and dated by the client's treating physician or allowed practitioner documenting the client's specific medical needs and the testing performed to determine the need for oxygen therapy including all of the following criteria:
  - The client's medical diagnosis requiring oxygen therapy
  - The oxygen flow rate
  - An estimate of the frequency, duration of use (e.g., 2 liters per minute, 12 hours per day), and duration of need (e.g., 3 months)
- A qualifying blood gas assessment may be supported by the results of either pulse oximetry or an arterial blood gas and includes all of the following:
  - Date of the testing
  - Results of the testing
- If the blood gas assessment occurred during the client's inpatient hospital stay, a blood gas performed no more than two days before discharge is acceptable.
- If a blood gas is obtained while the client is at home, the assessment must be performed while the client is in a stable chronic state (i.e., not during a period of acute illness or an exacerbation of their underlying disease) within the 30 day period prior to the request for service.

Oxygen therapy coverage is available under one of the three group categories outlined below, if the client has an eligible condition as described above.

**Group I Oxygen Therapy Category**

Group I - Prior authorization may be considered for clients of any age with significant hypoxemia with documentation of any of the following:

- An arterial pO2 (partial pressure of oxygen) equal to or less than 55 mm Hg or an arterial oxygen saturation equal to or less than 88 percent, taken at rest, breathing room air
- An arterial pO2 equal to or less than 55 mm Hg or arterial oxygen saturation at or below 88 percent, taken during sleep and lasting for at least 5 continuous minutes for clients who have a pO2 at or above 56 mm Hg or an arterial oxygen saturation at or above 89 percent while awake
- A decrease in arterial pO2 more than 10 mm Hg, or a decrease in arterial oxygen saturation of more than 5 percent, for at least 5 continuous minutes taken during sleep with symptoms or signs reasonably attributable to hypoxemia (e.g., impairment of cognitive processes and nocturnal restlessness or insomnia)
- An arterial pO2 equal to or less than 55 mm Hg or an arterial oxygen saturation at or below 88 percent, taken during exercise for a member who demonstrates a pO2 at or above 56 mm Hg or an arterial oxygen saturation at or above 89 percent during the day while at rest. In this case, supplemental oxygen may be provided for use during exercise if there is evidence the use of oxygen improves the hypoxemia that was demonstrated during exercise when the client was breathing room air

**Group I Oxygen Therapy for Clients who are 20 Years of Age and Younger**

Prior authorization may be considered for clients 20 years of age and younger when evidenced by any of the above or the following documentation:

- A neonate, and premature infant of any age who have not reached their 40th week of gestational maturity with an arterial pO2 of less than 60 mmHg or an arterial oxygen saturation level is less than 92 percent
- An infant with chronic neonatal lung disease with an arterial oxygen saturation equal to or less than 92 percent
- Other medical conditions that may be considered with supporting documentation include, but are not limited to:
  - Infants with bronchopulmonary dysplasia
  - Infants with apnea of prematurity, or recurrent cyanotic apneic episodes
  - Children with severe pulmonary hypotension
  - Children who have sickle cell anemia with respiratory conditions
  - Infants or children who have idiopathic pulmonary hypertension with sleep associated desaturations or a documented need for an emergent use of oxygen

| Oxygen Saturation                | pO2 in mm HG             | Required Parameters                                                                  | Clients/Comments             |
|----------------------------------|--------------------------|--------------------------------------------------------------------------------------|------------------------------|
| Less than or equal to 88 percent | Less than or equal to 55 | At rest on room air                                                                  | Infants, children and adults |
| Less than or equal to 88 percent | Less than or equal to 55 | For greater than or equal to 5 minutes during sleep, when “at rest” criteria not met | Infants, children and adults |

| Oxygen Saturation                   | pO <sub>2</sub> in mm HG          | Required Parameters                                                                                                                                                                              | Clients/Comments                                                                                                                                                                  |
|-------------------------------------|-----------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

| Greater than or equal to 89 percent | Greater than or equal to 56       | Documentation from physician or allowed practitioner supporting the medical need for the oxygen therapy due to medical conditions requiring different parameters                                 | Clients of any age                                                                                                                                                                |

Intermittent acute oxygen therapy at home is not routinely recommended for seizures as there is no evidence that it reduces seizure duration, reduces harm from prolonged seizures, or improves quality of life for the child or family.

### Group II Oxygen Therapy Category

Group II-Prior authorization may be considered for clients of any age whose arterial pO<sub>2</sub> is 56-59 mm Hg or whose arterial blood oxygen saturation is 89 percent with documentation of any of the following:

- Dependent edema suggesting congestive heart failure (CHF)
- Cor pulmonale (pulmonary hypertension)
- Erythrocythemia with a hematocrit greater than 56 percent

### Group III Oxygen Therapy Category

Group III-Prior authorization may be considered for clients with a diagnosis of cluster headaches with documentation of all of the following:

- Neurological evaluation with diagnosis of cluster headache
- Documentation of failed medication therapy

For clients whose only diagnosis is OSA, documentation must support the client's oxygen sleep desaturation was not corrected with use of CPAP or other RADs.

### **Oxygen Therapy Recertification**

Prior authorization of oxygen therapy rental after an initial three-month rental period may be considered for periods of six month at a time with the submission of all of the following documentation:

- A new Texas Medicaid Prior Authorization Request for Oxygen Therapy Devices and Supplies form with Sections A and B completed, signed, and dated by the client's treating physician or allowed practitioner
- Evidence of a continued need for oxygen therapy
- Evidence from the client's treating physician or allowed practitioner of the client's compliance with the oxygen therapy
- A new arterial blood gas assessment using either pulse oximetry or arterial blood gases
- Evidence that the client meets the criteria for any of the above Groups (I, II, or III) for oxygen therapy

If the above criteria for oxygen therapy are not met medical necessity for recertification of oxygen therapy will be considered by a medical director with documentation from the treating physician or allowed practitioner supporting the client's need for oxygen therapy.

### **Stationary Oxygen Systems**

Rental of a stationary oxygen system includes, but is not limited to, the nasal cannula or mask, tubing, and a basic bubble humidification system.

The types of covered stationary oxygen delivery systems include:

- Oxygen concentrators
- Compressed oxygen gas cylinder systems
- Liquid oxygen cylinder systems

### **Portable Oxygen Systems**

Portable oxygen therapy may be considered for prior authorization when medical necessity documentation indicates that the client requires the use of oxygen in the home and would benefit from the use of a portable oxygen system when traveling outside of the home environment.

Portable oxygen systems will not be considered for prior authorization for travel outside of the home environment for clients who qualify for oxygen usage based solely on oxygen saturation levels during sleep.

The types of covered portable oxygen and portable oxygen related delivery systems include:

- Portable tanks for compressed oxygen gas cylinder systems
- Portable tanks for liquid oxygen cylinder systems
- Home compressor attachment used on an oxygen compressor to fill oxygen tanks
- Portable gaseous oxygen system home compressor

### **2.2.23.13 Cardiorespiratory Monitor (CRM)**

A cardiorespiratory monitor (CRM) (procedure codes E0618 and E0619) for purchase or rental may be a benefit when medically necessary and may be considered for clients who require moment-to-moment cardiac and respiratory monitoring due to potential for sudden unexpected deterioration. For infants

who are four months of age and younger, a CRM with recording feature (procedure code E0619) may be considered for rental without prior authorization for a maximum of two months. Prior authorization is required for clients who are 5 months of age and older.

**Note:** *The American Academy of Pediatrics (AAP) recommends that infant monitoring using an infant CRM should not be used as a strategy to prevent sudden infant death syndrome (SIDS).*

Procedure codes A4556 and A4557 will deny if billed in the same month by any provider as procedure codes E0618 and E0619.

#### 2.2.23.13.1 Prior Authorization

For infants who are four months of age and younger, a CRM with recording feature (procedure code E0619) may be considered for rental without prior authorization for a maximum of two months with documentation of one of the following conditions:

- Central apnea (respiratory control disorders)
- Cardiac rhythm issues

A completed Title XIX Form signed and dated by the client's treating physician or allowed practitioner must be maintained in the client's medical record.

If a two-month rental has expired for infants who are 4 months of age and younger and continued CRM is medically necessary, a submitted prior authorization request on a completed Title XIX Form signed and dated by the client's treating physician or allowed practitioner (new with each request) must include the following:

- The client has on-going, documented cardiorespiratory episodes (e.g. apnea or dysrhythmia)
- A physician or allowed practitioner interpretation, signed and dated by the physician or allowed practitioner, of the most recent two-month's CRM data recorded downloads

A CRM with or without recording feature (procedure code E0618 or E0619) may be considered for prior authorization for rental or purchase for clients who are 5 months of age and older when submitted with a completed Title XIX Form signed and dated by the client's treating physician or allowed practitioner (new with each request) for one of the following conditions:

- An episode of apparent life-threatening event (ALTE) in an infant who is 12 months of age or younger
- Symptomatic central apnea
- Technology dependence such as:
- Mechanical ventilation
- Tracheostomy with a critical airway obstruction
- Assisted ventilation dependence
- Cardiac dysrhythmia with significant risk of morbidity or mortality

#### 2.2.23.14 Tracheostomy Tubes and Related Supplies

Tracheostomy tubes (procedure codes A7520, A7521, and A7522) are medically necessary for clients with a tracheostomy and are available for purchase with prior authorization.

Tracheostomy supplies, including inner cannulas, are available for purchase when medically necessary without prior authorization within the stated benefit limits.

A tracheostomy speaking valve is considered a medically necessary accessory that enhances the function of the tracheostomy and is available for purchase without prior authorization when requested within the stated benefit limits.

A tracheostomy speaking valve (procedure code L8501) is available for purchase and is limited to one per six months without prior authorization.

#### **2.2.23.14.1 Prior Authorization**

For the initial tracheostomy tube request, three tubes may be considered for prior authorization in the first month of service (two the same size and one smaller for emergencies).

For the next five months of the initial prior authorization period and for subsequent requests, one tracheostomy tube will be prior authorized per month.

More than one tracheostomy tube per month may be considered on a case-by-case basis with medical documentation supporting why the tracheostomy tube must be changed more frequently in order to meet the client's medical needs.

#### **Requesting tracheostomy supplies above the defined limitation**

Tracheostomy supplies requests for clients 20 years of age and younger that exceed the defined limits require prior authorization with documentation supporting the medical need of the quantity requested and may be considered under the Comprehensive Care Program and must be requested on a CCP Prior Authorization Request Form.

Tracheostomy supplies requests for clients who are 21 years of age and older that exceed the defined limits require prior authorization with documentation supporting the medical need of the quantity requested and may be considered by a medical director with documentation of medical necessity and must be requested on a Title XIX Form.

#### **Modifiers for Tracheostomy Tubes**

When requesting prior authorization for non-customized or non-specialized tracheostomy tubes without specialized functions, providers must submit the most appropriate procedure code with no modifier.

When requesting prior authorization for specialized but non-customized tracheostomy tubes with specialized functions, providers submit the request with modifier U1.

When requesting prior authorization for customized tracheostomy tubes, providers must submit the request with modifier U2.

With the use of either modifier U1 or U2, the following documentation is required:

- A physician or allowed practitioner statement of the reason the client cannot use a standard tracheostomy tube
- The manufacturer's information on the specialized functions of the tracheostomy tube or the order form describing the customization of the tracheostomy tube

Manufacturer's retail or invoice pricing information is required when using modifier U2.

#### **Tracheostomy Tube Inner Cannula and Required Modifier**

Clients with a tracheostomy tube with a reusable inner cannula (procedure code A4623) are allowed one reusable inner cannula per month without prior authorization.

Requests for more than one reusable inner cannula per month require prior authorization and medical documentation from the client's physician or allowed practitioner to support the need for more than one reusable inner cannula per month.

Clients with a tracheostomy tube with a disposable inner cannula (procedure code A4623 with modifier U3) are allowed 31 disposable inner cannulas per month without prior authorization. Request for more than 31 disposable inner cannulas per month require prior authorization and documentation from the client's treating physician or allowed practitioner to support the medical need for more than 31 disposable inner cannulas per month.

Custom tracheostomy tubes are manufactured with reusable inner cannulas. The reusable inner cannulas are included in the prior authorization for any custom tracheostomy tube authorized.

### **2.2.23.15 Suction Machines and Related Supplies**

A suction machine (procedure code E0600) may be considered for purchase with prior authorization if medically necessary for clients who have difficulty raising and clearing secretions. Suction supplies (suction canisters, suction tubing, tracheal suction catheters, and oropharyngeal suction catheters) (procedure codes A4605, A4624, A4628, A7000, and A7002) are medically necessary for use with a suction machine. These supplies are available, if medically necessary, for purchase without prior authorization, up to the stated benefit limits unless otherwise indicated. Only one type of tracheal suction catheter is allowed per month.

In most cases in the home setting, sterile suction catheters (procedure codes A4605 and A4624) and sterile saline for suctioning (procedure code A4216) are considered medically necessary only for tracheostomy suctioning. Sterile saline for tracheal suctioning (procedure code A4216) does not require prior authorization when requested within the stated benefit limits.

Procedure code A4605 will deny if billed in the same month by any provider as procedure code A4624.

#### **2.2.23.15.1 Prior Authorization**

Suction machines, suction canisters, suction tubing, tracheal suction tubes, and oropharyngeal suction catheters are a benefit with documented medical need to have oral, nasopharyngeal, or tracheal suctioning performed. Suction supplies do not require prior authorization within the stated benefit limits.

Suction canister filters are limited to one every two months with prior authorization and should be requested using the miscellaneous DME procedure code A9900. Suction equipment and supplies requests for clients who are 20 years of age and younger that exceed the allowed limits require prior authorization with documentation supporting the medical need of the quantity requested, may be considered under Comprehensive Care Program, and must be requested on a CCP Prior Authorization Request Form.

Suction equipment and supplies requests for clients who are 21 years of age and older that exceed the allowed limits require prior authorization with documentation supporting the medical need of the quantity requested and may be considered by a medical director with documentation of medical necessity supporting the medical need of the quantity requested and must be requested on a Title XIX Form.

### **2.2.23.16 Other Respiratory Supplies**

Other respiratory supplies are a benefit when medically necessary and are available without prior authorization up to the stated quantity limitation unless otherwise indicated:

- Non-sterile (clean) respiratory supplies are considered standard of care and are clinically appropriate in the home setting
- Sterile respiratory supplies are a benefit with prior authorization when medically necessary and documentation clearly demonstrates that the client's medical needs cannot be met with non-sterile (clean) supplies

#### **2.2.23.16.1 Prior Authorization**

Respiratory supplies are included in the rental of the respiratory equipment and will not be prior authorized separately, but may be prior authorized for equipment that is owned by the client.

To request prior authorization for respiratory supplies for use with client-owned equipment, the following documentation must be provided by the client's treating physician or allowed practitioner:

- A completed Title XIX Form signed and dated by the client's treating physician or allowed practitioner (new with each request)
- Accurate diagnostic information pertaining to the underlying diagnosis or condition as well as any other medical diagnoses or conditions, to include the client's overall health status
- The prescribed respiratory care regimen, to include frequency, duration, and supplies needed
- Treatment for infection, if present
- Quantity of disposable supplies prescribed per month by the physician or allowed practitioner
- Medical justification for the quantity and type of supply requested

#### **2.2.23.17 Bag Valve Mask (BVM) Resuscitator**

A bag valve mask (BVM) resuscitator or handheld resuscitation bag for a ventilator-dependent client (procedure code S8999) is commonly used when the client is temporarily removed from mechanical ventilation. A BVM for a ventilator dependent client may be a benefit for purchase when medically necessary without prior authorization.

A BVM for a non-ventilator client with or without a tracheotomy and with an appropriately sized face mask when appropriate who requires manual respiratory assistance due to inadequate or no breathing may be a benefit when medically necessary and requires prior authorization using the miscellaneous DME procedure code E1399 and will be reviewed by a medical director.

#### **2.2.23.18 Short Term Pulse Oximetry Services, Benefits, and Limitations**

A pulse oximeter (procedure code E0445) may be rented for short term use for no more than one calendar month in a six calendar month period. The short term rental of a pulse oximeter may be a benefit when medically necessary and does not require prior authorization for clients with one of the following conditions:

- Weaning the client from home oxygen
- Change in the client's condition that requires an adjustment in the liter flow of their home oxygen treatment
- To determine the client's appropriate home oxygen liter flow for ambulation, exercise, or sleep
- To determine the client's appropriate home oxygen liter flow for those who have neuromuscular disease involving the respiratory muscles, with chronic lung disease, or with severe cardiopulmonary disease.

#### **2.2.23.19 Long Term Pulse Oximetry Services, Benefits, and Limitations**

Long term pulse oximetry (procedure code E0445 with modifier U4) may be a benefit of Texas Medicaid through the Comprehensive Care Program (CCP) with prior authorization. Long-term rental and purchase of a pulse oximeter is a benefit for clients who are birth through 20 years of age. A pulse oximeter for long-term use is defined as equipment rented for more than one calendar month in a six-month period. Long-term pulse oximetry is limited to clients eligible for CCP who qualify for medically necessary services beyond the limits of the home health benefit.

A long-term pulse oximeter must be a device that:

- Is a bedside or tabletop device.
- Provides continuous oxygen saturation monitoring.
- Requires use of wired probes.

- Has battery and alternating current (A/C) capability.

#### 2.2.23.19.1 Long Term Pulse Oximeter Prior Authorization

##### **Prior Authorization for Clients 21 Years of Age and Older**

Pulse oximetry that is medically necessary for more than one calendar month in a six calendar month period requires prior authorization and will be considered for clients 21 years of age and older by a medical director when submitted with a complete Title XIX form, signed and dated by the treating physician or allowed practitioner and with documentation of medical necessity, such as:

- When weaning from a ventilator or oxygen and an earlier weaning attempt was unsuccessful that includes why it was unsuccessful
- Documentation of changes in the client's condition since the failed weaning attempt

##### **Prior Authorization for Clients Birth through 20 Years of Age**

Prior authorization is required for rental or purchase of a long-term pulse oximeter (procedure code E0445 with modifier U4) for clients who are birth through 20 years of age. HHSC or its designee will determine whether the long term pulse oximeter equipment will be rented, purchased, or repaired based on the client's needs and expected duration of use. Only new, unused equipment will be purchased.

The prior authorization request must include the following documentation:

- A completed CCP Prior Authorization Request form signed and dated by a physician or an allowed practitioner that includes the procedure codes and quantities for the services requested
- Documentation of the cause of the oxygen lability
- Documentation that a caregiver or medical healthcare provider is present who has been trained in use of the oximeter and how to respond to readings in a medically safe and appropriate manner, and the client meets one of the following criteria:
  - Client is oxygen or ventilator dependent and has respiratory system instability as noted in the documentation
  - Client experiences respiratory complications that require equipment that has oxygen saturation monitoring capabilities

A long-term pulse oximeter may be prior authorized for monthly rental up to a maximum of six months. Recertification for an additional six-month period may be considered for a maximum of six additional months.

A long-term pulse oximeter will be considered purchased and owned by the client when the total monthly payments equal the purchase cost for the equipment. Prior authorization for purchase or continued rental of the long-term pulse oximeter at the end of a 12-month rental period will not be considered. A long-term pulse oximeter may be prior authorized for purchase when a purchase is determined to be more cost effective than leasing the device with supplies.

Long-term pulse oximeter equipment that has been purchased is anticipated to last a minimum of five years. Replacement of equipment may also be considered for prior authorization when loss or irreparable damage has occurred outside the warranty terms, conditions, and limitations. A copy of the police or fire report, when appropriate, and the measures to be taken to prevent reoccurrence must be submitted with prior authorization request.

A long-term pulse oximeter used to monitor a client with a history of seizure activity is not routinely recommended for seizures as there is no evidence that it reduces seizure duration, reduces harm from prolonged seizures, or improves quality of life for the child or family.

### Pulse Oximetry Supplies

Pulse oximeter probes for client-owned equipment do not require prior authorization and are limited as follows:

- Disposable pulse oximeter probes (procedure code A4606) are limited to four per month
- Reusable pulse oximeter sensor probes (procedure code A4606 with modifier U5) are limited to one every six months

Procedure code A4606 and procedure code A4606 with modifier U5 will deny if billed in the same month by any provider as procedure code E0445.

Prior authorization may be considered for quantities greater than four per month with documentation supporting medical necessity.

Pulse oximeter probes (procedure code A4606 [disposable] or A4606 [reusable] with modifier U5) are included in the pulse oximeter equipment rental. Pulse oximeter probes will be denied if billed with rental of pulse oximeter equipment (procedure code E0445 or E0445 with modifier U4) in the same month of service by any provider.

The rental of equipment includes all necessary supplies, adjustments, repairs, and replacement parts.

### 2.2.23.20 Procedure Codes and Limitations for Respiratory Equipment and Supplies

| Procedure Code         | Maximum Limitations                                                                                                                       | Requires Prior Authorization                                                                                |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------|
| A4216                  | 60 per calendar month                                                                                                                     | No                                                                                                          |
| A4481                  | 31 per calendar month                                                                                                                     | No                                                                                                          |
| A4483                  | 15 per calendar month                                                                                                                     | Included in ventilator rental, No prior authorization for client-owned equipment if within policy limit     |
| A4556                  | 15 per calendar month                                                                                                                     | No                                                                                                          |
| A4557                  | 2 per calendar month                                                                                                                      | No                                                                                                          |
| A4605                  | 10 per calendar month<br>Only 1 type of tracheal catheter is allowed per month. A4605 will deny as part of A4624 if billed in same month. | No                                                                                                          |

### 2.2.23.21 Services that are not a Benefit

The following are not a benefit of Title XIX Home Health Services:

- Respiratory equipment or supplies requested primarily for the convenience of the caregiver

- Rental of:
  - Mucus clearance valved chamber
  - Medication small volume nebulizer
  - Intrapulmonary percussive ventilation (IPV) system
  - Ultrasonic nebulizers
  - Oxygen supplies for rented equipment
  - Intermittent or spot-check pulse oximetry
- Purchase of:
  - Bi-level PAP with set backup respiratory rate
  - Intrapulmonary percussive ventilation (IPV)
  - Ventilators
  - Pulse oximeter as a Home Health benefit
  - Intermittent or spot-check pulse oximetry
  - Long term (greater than 1 calendar month) pulse oximeter is not a benefit of Home Health services.

**Note:** Clients 20 years of age and younger who qualify for medically necessary services beyond the limits of the short-term pulse oximeter benefit may request those long-term pulse oximeter services through the Comprehensive Care Program (CCP).

The following items are not a benefit of Title XIX Home Health Services because they either have no federal financial participation (FFP) available, are considered environmental equipment, or are considered ineffective or detrimental and as such are not considered medically necessary:

- Cool mist humidifiers
- Room air humidifiers
- Vaporizers
- Dehumidifiers
- Air conditioners
- Back-up generators

Sterile water is not medically necessary for humidifiers in the home setting and is therefore not a benefit.

## **2.2.24 Special Needs Car Seats and Travel Restraints**

### **2.2.24.1 Special Needs Car Seats**

A special needs car seat may be considered for reimbursement with prior authorization for a client who has outgrown an infant car seat and is unable to travel safely in a booster seat or seat belt.

A special needs car seat must have a top tether installed. The top tether is essential for proper use of the car seat. The installer is reimbursed for the installation by the manufacturer.

Providers must use procedure code E1399 for a special needs car seat.

Car seat accessories available from the manufacturer may be considered for reimbursement with prior authorization when medically necessary for correct positioning.

A stroller base for a special needs car seat is not a benefit of Texas Medicaid.

A special needs car seat may be considered for reimbursement with prior authorization for a client who has outgrown an infant car seat and is unable to travel safely in a booster seat or seat belt. Consideration must be given to the manufacturer's weight and height limitations and must reflect allowances for at least 12 months of growth.

The provider must maintain a statement that has been signed and dated by the client's parent or legal guardian in the client's medical record that states the following:

- A top tether has been installed in the vehicle in which the client will be transported, by a manufacturer-trained vendor.
- Training in the correct use of the car seat has been provided by a manufacturer-trained vendor.
- The client's parent or legal guardian has received instruction and has demonstrated the correct use of the car seat to a manufacturer-trained vendor.

To request prior authorization for a special needs car seat or accessories, the following documentation must be provided:

- The client's weight must be at least 40 pounds, or the client's height must be at least 40 inches.
- Supporting documentation must include the following and must be submitted for prior authorization:
  - Accurate diagnostic information pertaining to the underlying diagnosis or condition as well as any other medical diagnoses or conditions, to include the client's overall health status.
  - A description of the client's postural condition specifically including head and trunk control (or lack of control) and why a booster chair or seatbelt will not meet the client's needs (the car seat must be able to support the head if head control is poor).
  - The expected long-term need for the special needs car seat.
  - A copy of the manufacturer's certification for the installer's training to insert the specified car seat.

A request for a client who does not meet the criteria may be considered on a case-by-case basis on review by HHSC or its designee.

#### **2.2.24.2 Travel Safety Restraints**

Providers must use procedure code E0700 for the purchase of travel safety restraints, such as ankle and wrist belts.

A travel safety restraint and ankle or wrist belts may be considered for reimbursement through CCP without prior authorization for clients with a medical condition requiring them to be transported in either a prone or supine position. The DME provider and the prescribing physician or allowed practitioner familiar with the client must maintain documentation in the client's medical record supporting the medical necessity of the travel safety restraint.

#### **2.2.25 Subcutaneous Injection Ports**

A subcutaneous injection port is a sterile medication delivery device through which medications prescribed by a physician or allowed practitioner can be injected directly into the subcutaneous tissue using a standard syringe and needle, an injection pen, or other manual injection device. The device can be used for multiple subcutaneous injections for a period of up to 72 hours, thereby avoiding repeated needle punctures of the skin. The device cannot be used with an injection pump.

A subcutaneous injection port, such as the *I-Port* or *Insuflox*, is a benefit of Texas Medicaid as a Title XIX Home Health service with prior authorization. Claims for a subcutaneous injection port must be submitted with procedure code A4211 and modifier U4.

Texas Medicaid may reimburse the device for clients who require multiple daily injections of medications prescribed by a physician or allowed practitioner and who meet the medical necessity criteria.

The subcutaneous injection port is not a benefit of Texas Medicaid as an item of convenience or for clients who are already receiving the medication through an ambulatory infusion pump. The device is considered an item of convenience if the client does not meet the criteria for medical necessity.

**Note:** *For clients who are 20 years of age or younger and do not meet criteria for coverage through Title XIX Home Health Services may be considered through the Texas Health Steps Comprehensive Care Program (THSteps-CCP).*

**Note:** *For clients who are 21 years of age or older, requests that do not meet the criteria for coverage through Title XIX Home Health Services may be considered under the Texas Medicaid Home Health - Durable Medical Equipment (DME) Exceptional Circumstances process.*

**2.2.25.1 Prior Authorization**

Prior authorization is required for a subcutaneous injection port. Initial prior authorizations will be issued for a trial period of up to 3 months. Prior authorizations that are issued after the successful completion of the initial trial period may be issued for a period of up to 6 months. Prior authorizations for subcutaneous injection ports are limited to a quantity of 10 individual ports per month. Additional ports will be considered for prior authorization with documentation of medical necessity.

**2.2.25.2 Documentation Requirements**

The initial request for prior authorization must include documentation that indicates the client meets the following criteria for medical necessity:

- The client has a medical condition that requires multiple (i.e., two or more) subcutaneous, self-administered injections on a daily basis and has a current prescription for the injectable medication. Documentation must indicate the specific medical condition that is being treated, the name of the injectable medication, and the dosage and frequency of the injections.

**Note:** *“Self-administered” includes those injections administered by the client through a subcutaneous injection or by the caregiver to the client through a subcutaneous injection.*

- The client or the caregiver has been unsuccessful with the self-administration of injections using a standard needle and syringe because the client demonstrates trypanophobia (i.e., severe needle phobia), as evidenced by documented physical or psychological symptoms. Documented symptoms may include, but are not limited to, the following:

| Condition                | Possible Exhibited Symptoms                                                                                                                              |
|--------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| Vaso-vagal trypanophobia | Physical symptoms such as changes in blood pressure, syncope, sweating, nausea, pallor, and tinnitus                                                     |
| Associate trypanophobia  | Psychological symptoms such as extreme anxiety, insomnia, and panic attacks                                                                              |
| Resistive trypanophobia  | Signs and symptoms such as combativeness, elevated heart rate, high blood pressure, and violent resistance to procedures involving needles or injections |

The prescribing provider must include with the prior authorization request a written statement of medical necessity that identifies the client as an appropriate candidate for the subcutaneous injection port device. The physician or allowed practitioner's statement or medical record documentation that is submitted with the prior authorization request must indicate the following:

- The client or caregiver has received instruction during an office visit on the proper placement and use of the device, with successful return demonstration. (Prior authorization requests for skilled nursing visits for the sole purpose of client instruction on the use of the subcutaneous injection port device will not be approved. Necessary instruction must be performed as part of the office visit with the prescribing provider.)
- The client has no known allergies or sensitivities to adhesives, silicone, or similar materials.
- The client has no skin infection at potential injection sites.
- The client's most recent lab results related to the medical condition requiring treatment with daily subcutaneous injections must also be submitted with the prior authorization request. Lab results may include, but are not limited to, hemoglobin A1c (HbA1c) levels for clients with insulin dependent diabetes mellitus (IDDM) and partial thromboplastin time (PTT) for clients who are receiving anticoagulant therapy.

Requests for the renewal of the prior authorization after the initial trial period has ended must include documentation of the following:

- Ongoing signs and symptoms associated with the client's trypanophobia.
- Improved compliance with the injection regimen prescribed by the physician or allowed practitioner.
- Successful use of the device with no persistent pattern of the client's dislodging the device during the initial trial period.
- Results of relevant lab tests performed upon completion of the initial trial period, including, but not limited to, HbA1c levels for clients with IDDM and PTT for clients who are receiving anticoagulant therapy.

**Note:** *For clients with IDDM, if the HbA1c level has not declined with use of the subcutaneous injection port, additional documentation must be submitted by the physician or allowed practitioner who documents the clinical determination about the lack of significant improvement in the HbA1c level. The renewal of the prior authorization will not be approved without this information.*

## **2.2.26 Total Parenteral Nutrition (TPN) Solutions**

### **2.2.26.1 Services, Benefits, and Limitations for Clients Birth through 20 Years of Age**

In-home TPN for clients who are birth through 20 years of age may be considered through CCP. Eligible clients may receive short-term or long-term nutritional support when oral or enteral intake are unable to maintain adequate nutrition. Covered services must be medically necessary and prescribed by the physician or allowed practitioner.

Parenteral nutrition solution, supplies, and infusion pumps services may be reimbursed with the following procedure codes:

| Procedure Codes               |       |       |       |       |       |       |       |       |       |
|-------------------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| Solution Procedure Codes      |       |       |       |       |       |       |       |       |       |
| B4164                         | B4168 | B4172 | B4176 | B4178 | B4180 | B4185 | B4187 | B4189 | B4193 |
| B4197                         | B4199 | B4216 | B5000 | B5100 | B5200 |       |       |       |       |
| Supply Procedure Codes        |       |       |       |       |       |       |       |       |       |
| B4220                         | B4222 | B4224 | B9999 |       |       |       |       |       |       |
| Infusion Pump Procedure Codes |       |       |       |       |       |       |       |       |       |
| B9004                         | B9006 |       |       |       |       |       |       |       |       |

**Note:** Procedure code B4187 is a benefit for clients who are birth through 18 years of age.

### 2.2.26.2 Prior Authorization and Documentation Requirements for Clients Birth through age 20

Prior authorization is required for TPN solutions, lipids, supply kits, and infusion pumps that are provided through CCP for clients birth through 20 years of age. Renewal of the prior authorization will be considered on the basis of medical necessity.

TPN solutions, lipids, supply kits, and infusion pumps will be considered with prior authorization when documentation submitted clearly shows that it is medically necessary and will correct or ameliorate the client's disability or physical or mental illness or condition. Documentation must include the following:

- Conditions that result in a loss of function of the gastrointestinal (GI) tract and the inability to obtain adequate nutrition by the enteral route, such as:
  - Infections of the pancreas, intestines, or other body organs that result in a loss of GI function
  - Inflammatory bowel disease
  - Necrotizing enterocolitis
  - Malnutrition
  - Trauma
  - Overwhelming systemic infections
  - Serious burns
- Conditions that result in an inability of the bowel to absorb nutrition, such as:
  - Extensive bowel resection
  - Severe, advanced bowel disease. Examples include short bowel syndrome (SBS), chronic intestinal pseudo-obstruction (CIPS), Hirshsprungs disease (HD), Crohn's disease, and ulcerative colitis
  - Prematurity
  - Leukemias
  - Congenital gastrointestinal anomalies
  - Acquired immunodeficiency syndrome

To facilitate determination of medical necessity and avoid unnecessary denials, the physician or allowed practitioner must provide correct and complete information, including documentation of medical necessity for the equipment and supplies requested.

Prior authorization requests for TPN must include the following information:

- Medical condition for which TPN is necessary
- Documentation of any trials with oral and enteral feedings
- Percent of daily nutritional needs from TPN
- A copy of the TPN formula or prescription that includes amino acids and lipids and is signed and dated by the physician or allowed practitioner
- A copy of the most recent laboratory results that includes potassium, calcium, liver function studies, and albumin

**Note:** Conditions or durations of need that are not listed above may be considered by HHSC or its designee with documentation of medical necessity.

The requesting provider may be asked for additional information to clarify or complete a request for TPN services.

To facilitate the determination of medical necessity and avoid unnecessary denials, the physician or allowed practitioner must provide correct and complete information, including documentation of medical necessity for the equipment and/or supplies requested and is subject to retrospective review. The physician or allowed practitioner must maintain documentation of medical necessity in the client’s medical record. The requesting provider may be asked for additional information to clarify or complete a request for TPN and related services.

Retrospective review may be performed to ensure that the documentation supports the medical necessity of the TPN services.

**2.2.26.3 Services, Benefits, and Limitations for Clients 21 years of age and older**

In-home TPN for clients who are 21 years of age and older may be considered through home health services. Eligible clients may receive long-term nutritional support when oral or enteral intake are unable to maintain adequate nutrition. “Long-term nutritional support” refers to treatment lasting 30 days or longer. Covered services must be medically necessary and prescribed by the physician or allowed practitioner.

Conditions that may require TPN include, but are not limited to the following:

- Bowel disease or disorder
- Cancer
- AIDS
- Coma
- Burns
- Peritonitis

**Note:** Conditions or a duration of need not listed above may be considered by HHSC or its designee with documentation of medical necessity.

TPN services are not a benefit when oral or enteral intake will maintain adequate nutrition.

Parenteral nutrition solution services may be reimbursed using the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| B4164           | B4168 | B4172 | B4176 | B4178 | B4180 | B4185 | B4189 | B4193 | B4197 |
| B4199           | B4216 | B5000 | B5100 | B5200 |       |       |       |       |       |

#### **2.2.26.4 Prior Authorization and Documentation Requirements for Clients who are 21 Years of Age and Older**

TPN solutions, lipids, supply kits, and infusion pumps must be prior authorized. Renewal of the prior authorization will be considered on the basis of medical necessity.

The administration of intravenous fluids and electrolytes cannot be billed as in-home TPN.

Claims for TPN must contain the 9-character prior authorization number in Block 23. Providers must consult with their vendor for the location of this field in the electronic claims format. The prescribing physician or allowed practitioner's name and NPI must be in Block 17 and 17a or in the appropriate field of the provider's electronic software.

Requests for prior authorization must include the following information:

- Medical condition necessitating the need for TPN and long-term nutritional support.
- Documentation of any trials with oral or enteral feedings.
- Percent of daily nutritional needs from TPN.
- A copy of the TPN formula or prescription, including amino acids and lipids, signed and dated by the physician or allowed practitioner.
- A copy of the most recent laboratory results (to include potassium, calcium, liver function studies and albumin).

The requesting provider may be asked for additional information to clarify or complete a request for TPN services.

Retrospective review may be performed to ensure that the documentation supports the medical necessity of the TPN services.

#### **2.2.26.5 Infusion Pumps and Supplies (All Ages)**

Parenteral nutrition supplies may be reimbursed using procedure codes B4220, B4222, B4224, and B9999.

Prior authorization requests for miscellaneous procedure code B9999 must include the following:

- A detailed description of the requested item or supply.
- Documentation supporting the medical necessity for the requested item or supply.

Prior authorization requests for a portable parenteral nutrition infusion pump (procedure code B9004) must also include documentation of medical necessity demonstrating that:

- The client requires continuous feedings
- Feeding intervals exceed the time that the client must be away from home to:
  - Attend school or work.
  - Participate in extensive, physician- or allowed practitioner-ordered outpatient therapies.
  - Attend frequent, multiple medical appointments.

Prior authorization for parenteral nutrition infusion pumps will be limited to one portable pump (procedure code B9004) or one stationary pump (procedure code B9006) at any one time, unless medical necessity for two infusion pumps is established. Supporting documentation for the additional pump must be included with the prior authorization request.

The infusion pump may be rented once a month or purchased once every five years.

**2.2.26.6 Backpack or Carrying Case (All Ages)**

A backpack or carrying case for a portable parenteral nutrition infusion pump may be a benefit of Home Health Services, when medically necessary and prior authorized, using procedure code B9999.

Prior authorization requests for miscellaneous procedure code B9999 must include the following:

- A detailed description of the requested item or supply.
- Documentation supporting the medical necessity for the requested item or supply.

Requests for a carrying case or backpack for the portable infusion pump will be considered for prior authorization under miscellaneous code B9999, for clients who meet the medical necessity criteria for the portable pump as outlined above. The following additional criteria apply:

- The client is ambulatory, or uses a wheelchair which will not support the use of a portable pump by other means, such as an intravenous (IV) pole.
- The portable enteral feeding pump is client-owned.

**2.2.26.7 Reimbursement and Claims (All Ages)**

No more than a one-week supply of solutions and additives may be reimbursed if the solutions and additives are shipped and not used because of the client’s loss of eligibility, change in treatment, or inpatient hospitalization. Any days that the client is an inpatient in a hospital or other medical facility or institution must be excluded from the daily billing. Payment for partial months will be prorated based upon the actual days of administration. The administration of intravenous fluids and electrolytes cannot be billed as in-home TPN.

Claims for TPN must contain the 9-character prior authorization number in Block 23. Providers must consult with their vendor for the location of this field in the electronic claims format. The prescribing physician or allowed practitioner’s name and NPI must be in Block 17 and 17a or in the appropriate field of the provider’s electronic software.

Retrospective review may be performed to ensure that the documentation supports the medical necessity of the TPN services.

**2.2.27 Vitamin and Mineral Products**

Vitamin and mineral products prescribed or ordered by a physician or allowed practitioner to treat various conditions are a benefit of Texas Medicaid through CCP for clients who are 20 years of age and younger. Vitamin and mineral products must be submitted with procedure code A9152 or A9153, the appropriate modifier, and the corresponding National Drug Code. Units must be based on the quantity dispensed, for up to a 30-day supply.

***Note:** It is acceptable for providers to bill in excess of a 30-day supply when billing for liquid formulations due to variances in container size.*

For purposes of billing, one unit is equal to one dose. The total billable units are equal to the total doses requested on the prior authorization.

Providers must dispense the most cost-effective product prescribed in accordance with a prescription from a licensed physician or allowed practitioner. Organic products will not be reimbursed unless medical documentation is provided to substantiate the need for that formulation.

The following vitamin and mineral products may be a benefit when submitted with the corresponding procedure code and state-identified modifier:

| Vitamin or Mineral | Procedure Code | State-Identified Modifier |
|--------------------|----------------|---------------------------|
| Beta-carotene      | A9152          | U1                        |

| Vitamin or Mineral                             | Procedure Code | State-Identified Modifier |
|------------------------------------------------|----------------|---------------------------|
| Vitamin A (retinol)                            | A9152          | U1                        |
| Biotin                                         | A9152          | U2                        |
| Boric acid                                     | A9152          | U3                        |
| Copper                                         | A9152          | U3                        |
| Iodine                                         | A9152          | U3                        |
| Phosphorus                                     | A9152          | U3                        |
| Zinc                                           | A9152          | U3                        |
| Calcium                                        | A9152          | U4                        |
| Chloride                                       | A9152          | U5                        |
| Iron                                           | A9152          | U6                        |
| Magnesium                                      | A9152          | U7                        |
| Vitamin B1 (thiamin)                           | A9152          | U8                        |
| Vitamin B2 (riboflavin)                        | A9152          | U8                        |
| Vitamin B3 (niacin)                            | A9152          | U8                        |
| Vitamin B5 (pantothenic acid)                  | A9152          | U8                        |
| Vitamin B6 (pyridoxine, pyridoxal 5-phosphate) | A9152          | U8                        |
| Vitamin B9 (folic acid)                        | A9152          | U8                        |
| Vitamin B12 (cyanocobalamin)                   | A9152          | U8                        |
| Vitamin C (ascorbic acid)                      | A9152          | U9                        |
| Vitamin D (ergocalciferol)                     | A9152          | UA                        |
| Vitamin E (tocopherols)                        | A9152          | UB                        |
| Vitamin K (phytonadione)                       | A9152          | UC                        |
| Multiminerals                                  | A9153          | U1                        |
| Multivitamins                                  | A9153          | U2                        |
| Trace elements                                 | A9153          | U3                        |
| Miscellaneous                                  | A9152 or A9153 | UD                        |

**Note:** Claims for multivitamins with any combination of additives must be submitted with modifier U2.

Vitamin and mineral products may be indicated for, but are not limited to, treatment of the following conditions:

| Vitamin or Mineral | Condition                         |
|--------------------|-----------------------------------|
| Beta-carotene      | Vitamin A deficiency              |
|                    | Cystic fibrosis                   |
|                    | Disorders of porphyrin metabolism |
|                    | Intestinal malabsorption          |
| Biotin             | Biotin deficiency                 |
|                    | Biotinidase deficiency            |
|                    | Carnitine deficiency              |

| Vitamin or Mineral                             | Condition                                                                              |
|------------------------------------------------|----------------------------------------------------------------------------------------|
| Boric acid                                     | Recalcitrant vulva vaginitis                                                           |
| Calcium                                        | Calcium deficiency                                                                     |
|                                                | Disorders of calcium metabolism                                                        |
|                                                | Chronic renal disease                                                                  |
|                                                | Pituitary dwarfism, isolated growth hormone deficiency                                 |
|                                                | Hypocalcemia and hypomagnesaemia of the newborn                                        |

|                          | Congenital deficiency of other clotting factors    |
|                          | Hypoprothrombinemia of the newborn                 |
|                          | Hemorrhagic disease of the newborn                 |
|                          | Intestinal malabsorption                           |
|                          | Acquired coagulation factor deficiency             |
|                          | Cystic fibrosis                                    |
|                          | Disorders of the biliary tract                     |
|                          | Chronic liver disease                              |
| Zinc                     | Zinc deficiency                                    |
|                          | Wilson's disease                                   |
|                          | Acrodermatitis enteropathica                       |
| Multi-minerals           | Other and unspecified protein-calorie malnutrition |
| Multi-vitamins           | Cystic fibrosis                                    |
|                          | Other and unspecified protein-calorie malnutrition |
| Trace elements           | Mineral deficiency                                 |

Prior authorization for vitamin and mineral products must be requested using the CCP Prior Authorization Request Form. Requests for prior authorizations must be submitted and approved before the date of dispensing the vitamin or mineral products. Prior authorization requests for vitamin and mineral products that are initiated before the date of the physician or allowed practitioner's order will not be approved.

The following documentation must be submitted with the prior authorization request:

- A physician's or allowed practitioner's prescription with the name of the vitamin or mineral product, dosage, frequency, duration, and route of administration
- The MSRP or average wholesale price (AWP), whichever is applicable, or the provider's documented invoice price
- The calculated price per dose
- Documentation that supports the medical necessity of the requested vitamin or mineral

The following sample tables, taken from the CCP Prior Authorization Request Form, are examples of the information that is required to submit a request for vitamin and mineral products:

- Example 1: Vitamin D

| HCPSC Code                                                  | Brief Description of Requested Services                 | Retail Price   |
|-------------------------------------------------------------|---------------------------------------------------------|----------------|
| A9152 UA                                                    | Vitamin D (ergocalciferol) 10 ml bottle (8000 units/ml) | \$40.00/bottle |
|                                                             | Dose: 400 units (0.05 ml)                               | \$0.20/dose    |
|                                                             | Route: PO                                               |                |
|                                                             | Frequency: QD                                           |                |
| <b>Note: HCPSC codes and descriptions must be provided.</b> |                                                         |                |

- Example 2: Multivitamin Tablets

| HCPCS Code                                                  | Brief Description of Requested Services | Retail Price  |
|-------------------------------------------------------------|-----------------------------------------|---------------|
| A9153 U2                                                    | Centrum Kids (80 tablets/bottle)        | \$8.99/bottle |
|                                                             | Dose: 1 tablet                          | \$0.11/dose   |
|                                                             | Route: PO                               |               |
|                                                             | Frequency: QD                           |               |
| <b>Note: HCPCS codes and descriptions must be provided.</b> |                                         |               |

Prior authorization requests for products, conditions, or quantities other than those described in the “Benefits” section of this handbook will be considered on a case-by-case basis after review by the medical director. Providers must submit documentation that the prescribed products are for a medically accepted indication. Documentation must include one of the following:

- FDA approval
- The use is supported by one or more citations that are included or approved for inclusion in the following compendia:
  - The American Hospital Formulary Service Drug Information
  - The United States Pharmacopoeia-Drug Information (or its successor publications)
  - The DRUGDEX Information System
  - Two articles from major medical peer-reviewed literature that demonstrate validated, untested data for the use of the agent in a specific medical condition that is safe and effective

Prior authorization of vitamin and mineral products may be granted for up to six months, and for a quantity up to a 30-day supply.

**Note:** *Texas Medicaid fee-for-service requires providers to review for medical necessity of DME every six months. An MCO may approve an initial DME prior authorization request for a period of 6 months, unless otherwise stated, and may authorize an extension of 12 months after the initial 6 months, if medically necessary.*

**Note:** *Quantities in excess of these limitations may be considered when requesting liquid formulations due to variances in container size.*

Requests for additional vitamin and mineral products must be submitted before the current authorized period expires, but no more than 30 days before the expiration.

## 2.2.28 Wound Care Supplies or Systems

Wound care equipment and supplies may be a benefit under Texas Medicaid Title XIX Home Health services.

To be considered a Home Health benefit, all of the following criteria must be met:

- The client must be eligible for home health benefits.
- The criteria listed in this handbook for the requested equipment and supplies must be met.
- The equipment and supplies requested must be medically necessary.
- Federal financial participation must be available.
- The requested equipment and supplies must be safe and appropriate for use in the home.

This handbook addresses wound care equipment and supplies provided to the client by a Durable Medical Equipment (DME) provider in the home and outpatient hospital setting.

Wound care equipment and supplies are designed to assist in healing of wounds in conjunction with an individualized wound care regimen prescribed by a provider familiar with the client.

Comprehensive wound care regimens include but are not limited to:

- Maintenance of a clean, moist bed of granulation tissue
- Debridement to remove devitalized tissue
- Any necessary treatment to resolve infection
- Optimization of nutrition, circulation, ambulation, and chronic disease management

Providers are to consider the clinical efficacy of the wound care product, the client's functional status, as well as the measurable signs of effective wound management when ordering products to treat wounds. Measurable signs of wound management include, but are not limited to:

- A decrease in wound size, either in surface area or volume
- A decrease in amount of exudate
- A decrease in amount of necrotic tissue
- Improved infection status

Wounds are defined as acute or chronic:

- Acute wounds progress through the normal stages of wound healing and show definite signs of healing within four weeks
- Chronic wounds do not progress normally through the stages of healing (often getting “stalled” in one phase) and do not show evidence of healing within four weeks

Skin ulcers represent the majority of chronic wounds. Skin ulcers include but are not limited to:

- Venous ulcers (also known as venous insufficiency ulcers or stasis ulcers)
- Arterial ulcers
- Diabetic ulcers
- Pressure injuries or pressure ulcers

### **2.2.28.1 Wound Care Supplies**

Medically necessary wound care equipment and supplies include, but are not limited to, cleansing agents, wound packing, dressings and coverings, compression garments, and negative pressure wound therapy (NPWT) systems.

#### **Cleansers**

Wound cleansing helps create an optimal healing environment and decreases the potential for infection. Cleansing agents and methods vary based on effectiveness and individual client needs. Wound cleansing agents may include, but are not limited to:

- Normal Saline
- Commercial wound cleansers
- Povidone Iodine
- Hydrogen peroxide
- Sodium Hypochlorite

## Dressings

A dressing is a wet or dry, sterile or non-sterile, pad or compress that is designed to be in direct contact with the wound. A dressing is applied to promote healing and protect the wound from further harm. Dressings and related supplies may include, but are not limited to:

- Wound packing and fillers
- Gauze, impregnated or non-impregnated, sterile or non-sterile
- Dry dressings
- Collagen dressings
- Alginate or other fiber gelling dressings
- Composite dressings
- Antimicrobials
- Foam dressings
- Contact layers and transparent films
- Hydrocolloid, Hydrofiber, and Hydrogel dressings
- Specialty absorptive dressings
- Compression dressings and wraps
- Tape to secure dressings

## Compression

Compression dressings, wraps or stockings apply pressure to body parts to control edema and aid circulation by redirecting blood centrally. Below the knee and above the knee compression stockings may be benefits for Texas Medicaid clients. Compression dressings or stockings may be used, but not limited to the following indications:

- Edema in Pregnancy
- Postural Hypotension
- Lymphedema
- Treatment of any of the following complications of chronic venous insufficiency:
  - Venous edema
  - Stasis Ulcers
  - Varicose veins (not including spider veins)
  - Lipodermatosclerosis

Custom burn compression garments may be a benefit with prior authorization and documentation supporting medical necessity.

### 2.2.28.2 Negative-Pressure Wound Therapy (NPWT) System

An NPWT system provides and maintains a moist wound environment and protects the wound during the healing process.

An NPWT system consists of a cell foam dressing that is placed in the wound bed, a suction catheter tip, an adhesive drape to cover the wound, suction tubing, and a computerized electric vacuum pump. An NPWT system uses continuous or intermittent sub-atmospheric pressure to remove excess interstitial

fluid and remove growth factor inhibitors. The removal of inhibitors allows the growth factor to stimulate cell proliferation and migration. Removal of excess fluid also helps decrease periwound induration.

Drainage from the wound is collected in a canister. Typically, each wound dressing is changed two to three times per week. NPWT is often referred to as a “wound-vac.”

NPWT may be considered for clients with wounds including but not limited to:

- Pressure
- Arterial
- Venous stasis
- Diabetic ulcers
- Post-surgical wound dehiscence; non-adhering skin grafts; or surgical flaps required for covering such wounds

Prior authorization is not required for the initial 90 days of NPWT. Prior authorization is required for continued therapy after the initial 90 days, with the submission of the Wound Care Equipment and Supplies Order Form.

Providers must submit the required documentation for the NPWT system for any prior authorization periods after the initial 90 days of treatment. All documentation required for prior authorization must be maintained in the client’s medical record with the prescribing provider.

### **2.2.28.3 Exclusions**

The following services are not a benefit of Texas Medicaid:

- Wound care supplies for use in the office or outpatient setting
- Equipment and supplies for stand-by or back-up use
- Topical or portable hyperbaric oxygen chambers (procedure code A4575) that are placed directly over the wound and provide higher concentrations of oxygen to the damaged tissue
- Non-contact normothermic wound therapy (NNWT) systems and associated supplies (procedure codes A6000, E0231, E0232)
- Rental or purchase of an electrical stimulation or electromagnetic wound treatment device (procedure code E0769), for use by the client or caregiver in the home setting
- Contact or non-contact ultrasound treatment for wounds
- Electrochemical low-dose tissue oxygenation systems
- Metabolically and non-metabolically active skin equivalents used in wound care are not reimbursed in the home setting
- Procedure code A6545 billed without AW modifier

### **2.2.28.4 Authorization Requirements**

Requests for medically necessary wound care equipment or supplies for any eligible client that does not meet criteria as outlined in this handbook for requests for supplies above the defined limitations will be considered through the comprehensive care program. These requests require prior authorization with documentation supporting the medical necessity of the equipment and the quantity requested.

**Note:** *For clients who are 21 years of age or older, requests for wound care equipment and supplies that do not meet the criteria through Title XIX Home Health Services may be considered under the Texas Medicaid Home Health - Durable Medical Equipment (DME) Exceptional Circumstances process.*

A completed Wound Care Equipment and Supplies Order Form prescribing the DME and/or supplies must be signed and dated by a physician or allowed practitioner familiar with the client, before requesting prior authorization for all DME equipment and supplies. The completed Wound Care Equipment and Supplies Order Form must include the procedure codes and quantities for services requested.

The completed Wound Care Equipment and Supplies Order Form with the original dated signature must be maintained by the prescribing physician or allowed practitioner in the client’s medical record. A copy of the completed, signed, and dated form must be maintained by the DME provider in the client’s medical record.

To complete the prior authorization process by paper, the DME provider must fax or mail the completed form to the Home Health Services Prior Authorization Department. To complete the prior authorization process electronically, the DME provider must submit the prior authorization requirements through any approved electronic methods.

To facilitate determination of medical necessity and avoid unnecessary denials, the physician or allowed practitioner must provide correct and complete information, including documentation of medical necessity for the equipment and/or supplies requested and is subject to retrospective review. The physician or allowed practitioner must maintain documentation of medical necessity in the client’s medical record. The requesting provider may be asked for additional information to clarify or complete a request for the wound care supplies or wound care system.

Unless otherwise specified, wound care equipment and supplies are available without prior authorization up to the stated quantity limitations. Prior authorization is required for any quantities exceeding the limitations.

Prior authorization or additional documentation is required for:

- Quantities of wound care supplies exceeding the quantity limits listed in the Procedure Codes and Limitations table.
- Disposable wound suction (procedure code A9272). Submitted documentation must include justification addressing why no other wound care equipment and supplies will meet the client’s need.
- Continued use of negative pressure wound therapy (NPWT) for more than 90 days requires documentation outlined in NPWT Greater than 90 Days section of this handbook.
- Compression burn garments require documentation of an appropriate diagnosis and evidence of medical necessity. These requests will be reviewed by the medical director.

Prior Authorization is required for the following procedure codes:

| Procedure Codes |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|
| A6215           | A6260 | A6501 | A6503 | A6504 | A6505 | A6506 | A6507 | A6508 |
| A6509           | A6510 | A6511 | A6512 | A6513 | A6515 | A6516 | A6517 | A6518 |
| A6519           | A6549 | A6611 | A9272 | T1999 |       |       |       |       |

**2.2.28.5 Documentation Requirements**

Information from the following four categories must be submitted anytime that prior authorization is required. If prior authorization is not required, this documentation must be maintained in the client’s medical record and is subject to retrospective review.

**Category 1: Medical History and Compliance**

A comprehensive treatment plan, including the prescribed wound care and management planned for the client including, but not limited to:

- Any medical diagnosis or chronic condition that effects wound healing

- History of previous wound care treatments and outcomes with dates, including therapies initiated in a hospital or Skilled Nursing Facility (SNF)
- Continued management of unresolved compliance issues (i.e., missed medical appointments, refusing dressing changes, repositioning, smoking, poor nutritional intake or choices)
- Whether a family member/friend/caregiver agrees to be available to assist the client

**Category 2: Wound Care Interventions**

Relevant information related to the current wound, including:

- Any mechanical, surgical, enzymatic or autolytic tissue debridement (if performed)
- Treatment for infection (if present)

**Category 3: Wound Description & Details**

Detailed description of the wound including:

- Dates of previous and current assessments
- The measurements at the initiation of wound care and the current measurements, including length, width, depth and any undermining or tunneling
- Wound color
- Amount, quality, quantity, and odor of drainage (if present)
- Presence of granulation or eschar (if appropriate)
- The currently prescribed wound care regimen, to include types of dressings, frequency of dressing changes and supplies needed for each dressing change
- Frequency client will be seen by a licensed medical professional to assess wound healing and current wound treatment regimen

**Category 4: Contraindications**

Absence of the following contraindications:

- Untreated osteomyelitis within the vicinity of the wound
- Wound ischemia
- Gangrene
- Presence in the wound of necrotic tissue with eschar (if debridement has not been attempted)
- Cancer present in the wound or around the margins
- Presence of a fistula to an organ or body cavity within the vicinity of the wound
- Documentation explaining the appropriateness of wound care is required if any of the above contraindications are present

The requesting DME provider may be asked for additional information to clarify or complete a request for the wound care equipment or supplies including but not limited to:

- Overall health status of clients whose wounds are not progressing through the normal stages of healing, including but not limited to:
  - Albumin or pre-albumin (within 30 days)
  - Hemoglobin A1C (within 30 days)
  - Use of pressure reducing surfaces, repositioning, and encouraged ambulation

All services outlined in this section are subject to retrospective review to ensure that the documentation in the client's medical record supports the medical necessity of the service(s) provided.

Reauthorization will be considered based on medical necessity, with a new prior authorization request.

### **NPWT Greater than 90 Days**

NPWT may be considered beyond the initial 90-day treatment period for additional 30 day treatment periods with prior authorization justifying continued use.

For NPWT of greater than 90 days, providers must submit justification for continued use of NPWT including:

- The measurements at the initiation of NPWT and the current measurements, including length, width, depth and any undermining or tunneling

Additionally, providers must make note if any of the following contraindications are present:

- No measurable improvement of wound status occurring over the prior 90-day period.
- The wound care equipment or supplies are no longer being used by the client as prescribed.

### **NPWT Supplies**

NPWT supplies are limited to a maximum of:

- 15 dressing kits or supplies (procedure code A6550) per wound per month; unless documentation supports that the wound size requires more than one dressing kit for each dressing change or if the provider has ordered more frequent dressing changes.
- 10 disposable canisters (procedure code A7000) per month; unless documentation provided indicates medical necessity for additional canisters.

## **2.2.28.6 Reimbursement and Billing Guidelines**

Wound care equipment and supplies addressed in this section are reimbursed only when provided as a Title XIX Home Health Benefit. Supplies provided in an outpatient setting, such as a wound care clinic, are part of the facility fee and are not reimbursed separately.

Providers should only bill for one month of supplies at a time, even though prior authorization may be granted for up to six months.

**Note:** *Texas Medicaid fee-for-service requires providers to review for medical necessity of DME every six months. An MCO may approve an initial DME prior authorization request for a period of 6 months, unless otherwise stated, and may authorize an extension of 12 months after the initial 6 months, if medically necessary.*

Procedure code A6545 must be billed with modifier AW, claims will deny if billed without the modifier.

Providers are reimbursed for items addressed in this section by the lesser of:

- The providers billed charges
- The published fee determined by HHSC

Manual price is determined by HHSC, which is based on:

- The manufacturer's suggested retail price (MSRP) less 18 percent or average wholesale price (AWP) less 10.5 percent, whichever is applicable, or
- The provider's documented invoice cost.

If manual pricing is used, the provider must request prior authorization and submit documentation of one of the following:

- The MSRP or AWP, whichever is applicable.

- The provider's documented invoice cost.

### DME Certification

The DME Certification and Receipt Form is required and must be completed before reimbursement can be made for any equipment or appliance delivered to a client. The certification form must include the name of the item, the date the client received the equipment or appliance, and the dated signatures of the provider and the client or primary caregiver. This signed and dated form must be maintained by the DME provider in the client's medical record.

The DME Certification and Receipt Form must be submitted for DME claims and appeals when:

- A single item meets or exceeds a billed amount of \$2,500.00
- Multiple items submitted on the same date of service meet or exceed a total billed amount of \$2,500.00

Claims submitted without the DME Certification and Receipt Form will be denied.

Clients who receive DME meeting or exceeding a total billed amount of \$2,500.00 may be contacted to verify receipt of the equipment. If receipt of the equipment cannot be verified, the claim payment is eligible for recoupment.

### 2.2.28.7 Wound Care Procedures and Limitations

The procedure codes listed in the following table do not require prior authorization when requested within allowable limits.

**Note:** Quantities that exceed the limitations identified in the table will require prior authorization with documentation supporting medical necessity.

| Procedure Code | Limitation    |
|----------------|---------------|
| A4213          | 30 per month  |
| A4216          | 60 per month  |
| A4217          | 10 per month  |
| A4244          | 4 per month   |
| A4246          | 4 per month   |
| A4247          | 1 per month   |
| A4320          | 15 per month  |
| A4322          | 30 per month  |
| A4364          | 8 per month   |
| A4450          | 100 per month |
| A4452          | 100 per month |
| A4455          | 4 per month   |
| A4456          | 60 per month  |
| A4461          | 30 per month  |
| A4465          | 4 per month   |
| A4490          | 4 per year    |
| A4495          | 4 per year    |
| A4500          | 4 per year    |
| A4510          | 4 per year    |
| A4927          | 1 per month   |

| Procedure Code | Limitation    |
|----------------|---------------|
| A5120          | 50 per month  |
| A5121          | 30 per month  |
| A5122          | 15 per month  |
| A5126          | 40 per month  |
| A6010          | 10 per month  |
| A6011          | 30 per month  |
| A6021          | 10 per month  |
| A6022          | 10 per month  |
| A6023          | 2 per month   |
| A6024          | 4 per month   |
| A6025          | 15 per month  |
| A6196          | 30 per month  |
| A6197          | 15 per month  |
| A6198          | 4 per month   |
| A6199          | 15 per month  |
| A6203          | 30 per month  |
| A6204          | 30 per month  |
| A6205          | 10 per month  |
| A6206          | 60 per month  |
| A6207          | 30 per month  |
| A6208          | 4 per month   |
| A6209          | 30 per month  |
| A6210          | 15 per month  |
| A6211          | 4 per month   |
| A6212          | 30 per month  |
| A6213          | 30 per month  |
| A6214          | 10 per month  |
| A6216          | 200 per month |
| A6217          | 200 per month |
| A6218          | 15 per month  |
| A6219          | 120 per month |
| A6220          | 30 per month  |
| A6221          | 15 per month  |
| A6222          | 60 per month  |
| A6223          | 60 per month  |
| A6224          | 60 per month  |
| A6228          | 120 per month |
| A6229          | 30 per month  |
| A6230          | 15 per month  |
| A6231          | 60 per month  |

| Procedure Code | Limitation    |
|----------------|---------------|
| A6232          | 30 per month  |
| A6233          | 10 per month  |
| A6234          | 30 per month  |

| T1999          | As Needed  |

### 2.2.29 Limitations and Exclusions

Payment cannot be made for any service, supply or equipment for which FFP is not available. For clients who are 20 years of age and younger and who are eligible to receive THSteps services, refer to Subsection 2.2, “Services, Benefits, Limitations and Prior Authorization” in this handbook to find which of these items are a benefit for CCP.

Home Health Services does not cover the following:

- Adaptive strollers, travel seats, push chairs, and car seats
- Administration of non-FDA-approved medications/treatments or the supplies and equipment used for administration
- Aids for daily living, such as toothpaste, spoons, forks, knives, and reachers
- Any services, equipment, or supplies furnished to a client who is a resident of a public institution or a client in a hospital, SN facility, or intermediate care facility
- Any services or supplies furnished to a client before the effective date of Medicaid eligibility as certified by HHSC or after the date of termination of Medicaid eligibility
- Any services or supplies furnished without prior approval by TMHP, except as listed
- Any supplies or equipment used in a physician’s office, or inserted by a physician (e.g., low profile gastrostomy tube)
- Apnea monitors
- Blood products (the administration or the supplies and equipment used to administer blood products)
- Cardiac telemetry monitoring
- Chemotherapy administration or the supplies and equipment used to administer chemotherapy
- Diapers and wipes for clients who are 3 years of age and younger
- Dynamic orthotic cranioplasty (DOC)
- Environmental equipment, supplies, or services, such as room dehumidifiers, air conditioners, heater/air conditioner filters, space heaters, fans, water purification systems, vacuum cleaners, treatments for dust mites, rodents, and insects

- Home whirlpool baths, spas, home exercisers/gym equipment, hemodialysis equipment, safety wall rails, toys/therapy equipment
- IPV
- Nutritional counseling
- Orthotics, braces, prosthetics including but not limited to voice prosthetic, and artificial larynx
- Parapodiums
- Personal protective equipment (such as gloves, masks, gowns, and sharps containers) for use by a health-care provider, including but not limited to an RN, LVN, or attendant in the home setting
- Pneumocardiograms
- Seat lift chairs
- Shipping, freight, delivery travel time
- Structural changes to homes, domiciles, or other living arrangements
- Vehicle mechanical or structural modifications, such as wheelchair lifts

**Referto:** Subsection 1.11, “Texas Medicaid Limitations and Exclusions” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

### 2.2.30 Procedure Codes That Do Not Require Prior Authorization

The procedure codes listed in the following table do not require prior authorization for clients who are receiving services under Home Health Services. Although prior authorization is not required, providers must retain a completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form for these clients. For medical supplies not requiring prior authorization, a completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form may be valid for a maximum of six months unless the physician or allowed practitioner indicates the duration of need is less. If the physician or allowed practitioner indicates the duration of need is less than six months, then a new Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form is required at the end of the duration of need. It is expected that reasonable, medically necessary amounts will be provided.

The use of these services is subject to retrospective review. This is not an all inclusive list.

| Procedure Codes                                                                                                                                                                                    |       |       |       |       |       |       |       |       |       |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| Nebulizer Supplies/Equipment*                                                                                                                                                                      |       |       |       |       |       |       |       |       |       |

| Inhaler Equipment                                                                                                                                                                                  |       |       |       |       |       |       |       |       |       |
| A4614                                                                                                                                                                                              | A4627 |       |       |       |       |       |       |       |       |
| * Prior authorization is required for certain diagnoses and if limitations are exceeded. Refer to subsection 2.2.23.2, “Small Volume Nebulizers (SVN)” in this handbook.                           |       |       |       |       |       |       |       |       |       |
| ** Prior authorization is required for some procedure codes if the maximum limitation is exceeded. Refer to subsection 2.2.15.9, “Incontinence Procedure Codes with Limitations” in this handbook. |       |       |       |       |       |       |       |       |       |

## 2.3 Other or Special Provisions

### 2.3.1 Medicaid Relationship to Medicare

#### 2.3.1.1 Possible Medicare Clients

It is the provider's responsibility to determine the type of coverage (Medicare, Medicaid, or private insurance) that the client is entitled to receive. Home health providers must follow these guidelines:

- Clients who are 64 years of age and younger without Medicare Part A or B:
  - If the agency erroneously submits an SOC notice to Medicare and does not contact TMHP for prior authorization, TMHP does not assume responsibility for any services provided before contacting TMHP. The SOC date is no more than three business days before the date the agency contacts TMHP. Visits made before this date are not considered a benefit of the Home Health Services Program.
- Clients who are 65 years of age and older without Medicare Part A or Part B and clients with Medicare Part A or B regardless of age:
  - In filing home health claims, home health providers may be required to obtain Medicare denials before TMHP can approve coverage. When TMHP receives a Medicare denial, the SOC is determined by the date the agency requested coverage from Medicare. If necessary, the 95-day claims filing deadline is waived for these claims, provided TMHP receives notice of the Medicare denial within 30 days of the date on the MRAN containing Medicare's final disposition.
  - If the agency receives the MRAN and continues to visit the client without contacting TMHP by telephone, mail, or fax within 30 days from the date on the MRAN, TMHP will provide coverage only for services provided from the initial date of contact with TMHP. The SOC date is determined accordingly. TMHP must have the MRAN before considering the request for prior authorization.

#### 2.3.1.2 Benefits for Medicare and Medicaid Clients

For eligible Medicare/Medicaid clients, Medicare is the primary payer and providers must bill Medicare before submitting a claim to Medicaid. Medicaid pays the Medicare deductible on Part B claims for qualified home health clients.

Home health service prior authorizations may be given for HHA services, certain medical supplies, equipment, or appliances suitable for use in the home in one of the following instances:

- When an eligible Medicaid client (enrolled in Medicare) who does not qualify for home health services under Medicare because SN care, PT, or OT are not a part of the client's care.
- When the medical supplies, equipment, or appliances are denied by Medicare Part B and are a benefit of Home Health Services.

Federal and state laws require the use of Medicaid funds for the payment of most medical services only after all reasonable measures have been made to use a client's third party resources or other insurance.

**Note:** *If the client has Medicare Part B coverage, contact Medicare for prior authorization requirements and reimbursement. If the service is a Part B benefit, do not contact TMHP for prior authorization. Texas Medicaid will only pay the deductible and coinsurance according to current payment guidelines on the electronic crossover claim.*

TMHP will not prior authorize or reimburse the difference between the Medicare payment and the retail price for Medicare Part B eligible clients.

**Referto:** "Section 8: Third Party Liability (TPL)" (*Vol. 1, General Information*).

Subsection 2.7, "Medicare Crossover Claim Reimbursement" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*).

### 2.3.1.3 Medicare and Medicaid Prior Authorization

Contact TMHP for prior authorization of Medicaid services (based on medical necessity and benefits of Home Health Services) within 30 days of the date on the MRAN.

**Note:** For MQMB clients, do not submit prior authorization requests to TMHP if the Medicare denial reason states “not medically necessary.” Medicaid only will consider prior authorization requests if the Medicare denial states “not a benefit” of Medicare.

Qualified Medicare Beneficiaries (QMB) are not eligible for Medicaid benefits. Texas Medicaid is only responsible for premiums, coinsurance, or deductibles on these clients according to payment guidelines. Providers should not submit prior authorization requests to the TMHP Home Health Services Prior Authorization Department for these clients.

To ensure Medicare benefits are used first in accordance with Texas Medicaid regulations, the following procedures apply when requesting Medicaid prior authorization and payment of home health services for clients.

Contact TMHP for prior authorization of Medicaid services (based on medical necessity and benefits of Home Health Services) within 30 days of the date on the MRAN. Fax a copy of the original Medicare MRAN and the Medicare appeal review letter to the TMHP Home Health Services Prior Authorization Department for prior authorization.

**Note:** Claims for STAR+PLUS MQMB clients (those with Medicare and Medicaid) must always be submitted to TMHP as noted on these pages. The STAR+PLUS health plan is not responsible for these services if Medicare denies the service as not a benefit.

When the client is 65 years of age and older or appears otherwise eligible for Medicare such as blind and disabled, but has no Part A or Part B Medicare, the TMHP Home Health Services Prior Authorization Department uses regular prior authorization procedures. In this situation, the claim is held for a midyear status determined by HHSC. The maximum length of time a claim may be held in a “pending status” for Medicare determination is 90 days. After the waiting period, the claim is paid or denied. If denied, the EOB code on the R&S report indicates that Medicare is to be billed.

**Referto:** Section 3, “Home Health Skilled Nursing and Home Health Aide Services” in the *Home Health Nursing and Private Duty Nursing Services Handbook* (Vol. 2, Provider Handbooks).

## 2.4 Claims Filing and Reimbursement

### 2.4.1 Claims Information

Providers must use only type of bill (TOB) 321 in Form Locator (FL) 4 of the UB-04 CMS-1450. Other TOBs are invalid and result in claim denial.

Home Health services must be submitted to TMHP in an approved electronic format or on a CMS-1500 or a UB-04 CMS-1450 paper claim form. Submit home health DME and medical supplies to TMHP in an approved electronic format, or on a CMS-1500 or on a UB-04 CMS-1450 paper claim form. Providers may purchase UB-04 CMS-1450 and CMS-1500 paper claim forms from the vendor of their choice. TMHP does not supply them.

When completing a CMS-1500 or a UB-04 CMS 1450 paper claim form, providers must include all required information on the claim, as TMHP does not key information from attachments. Superbills, or itemized statements, are not accepted as claim supplements.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.6, “UB-04 CMS-1450 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*).

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims.

Outpatient claims must have the appropriate revenue code and, if appropriate, the corresponding HCPCS code or narrative description. The prior authorization number must appear on the UB-04 CMS-1450 claim in Block 63 and in Block 23 of the CMS-1500 claim. The certification dates or the revised request date on the POC must coincide with the DOS on the claim. Prior authorization does not waive the 95-day filing deadline requirement.

Home health service claims should not be submitted for payment until Medicaid certification is received and a prior authorization number is assigned.

## 2.4.2 Reimbursement

DME and expendable medical supplies are reimbursed in accordance with 1 TAC §355.8023. Providers can refer to the [Online Fee Lookup \(OFL\)](#) or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com). Providers may also request a hard copy of the fee schedule by contacting the TMHP Contact Center at 1-800-925-9126.

DME and expendable supplies, other than nutritional products, that have no established fee, are subject to manual pricing at the documented MSRP less 18 percent or the provider’s documented invoice cost.

Nutritional products that have no established fee are subject to manual pricing at the documented AWP less 10.5 percent or at the provider’s documented invoice cost.

For reimbursement, providers must note the following:

- Claims are approved or denied according to the eligibility, prior authorization status, and medical appropriateness.
- Claims must represent a numerical quantity of 1 month for supplies according to the billing requirements.
- DME/supplies must be provided by either a Medicaid enrolled home health agency’s Medicaid/DME supply provider or an independently-enrolled Medicaid/DME supply provider. Both must enroll and bill using the NPI enrolled as a DME supplier. File these services on a CMS-1500 claim form.

**Note:** *Medical social services and speech-language pathology services are available to clients who are 20 years of age and younger and are not a benefit of Home Health Services. These services may be considered a benefit for clients who qualify for CCP.*

Texas Medicaid does not reimburse separately for associated DME charges, including but not limited to, battery disposal fees or state taxes. Reimbursement for any associated charges is included in the reimbursement for a specific piece of equipment.

**Referto:** Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*) for more information about reimbursement.

Texas Medicaid implemented mandated rate reductions for certain services. The Online Fee Lookup (OFL) and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates/rate-changes](http://www.tmhp.com/resources/rate-and-code-updates/rate-changes).

### **2.4.3 Home Health Agency Reimbursement for DME Services**

Home health agencies are reimbursed for DME and medical supplies in accordance with 1 TAC §355.8023. Providers can refer to the OFL or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com). Providers may also request a hard copy of the fee schedule by contacting the TMHP Contact Center at 1-800-925-9126. DME and medical supplies, other than nutritional products, that have no established fee are subject to manual pricing at the documented MSRP less 18 percent or the provider’s documented invoice cost.

### **2.4.4 Prohibition of Medicaid Payment to Home Health Agencies Based on Ownership**

Medicaid denies home health services claims when TMHP records indicate that the physician ordering treatment has a significant ownership interest in, or a significant financial or contractual relationship with, the nongovernmental home health agency billing for the services. Federal regulation Title 42 CFR §424.22 (d) states that “a physician who has a significant financial or contractual relationship with, or a significant ownership in a nongovernmental home health agency may not certify or recertify the need for home health services care services and may not establish or review a plan of treatment.”

A physician is considered to have a significant ownership interest in a home health agency if either of the following conditions apply:

- The physician has a direct or indirect ownership of five percent or more in the capital, stock, or profits of the home health agency.
- The physician has an ownership of five percent or more of any mortgage, deed of trust, or other obligation that is secured by the agency, if that interest equals five percent or more of the agency’s assets.

A physician is considered to have a significant financial or contractual relationship with a home health agency if any of the following conditions apply:

- The physician receives any compensation as an officer or director of the home health agency.
- The physician has indirect business transactions, such as contracts, agreements, purchase orders, or leases to obtain services, supplies, equipment, space, and salaried employment with the home health agency.
- The physician has direct or indirect business transactions with the home health agency that, in any fiscal year, amount to more than \$25,000 or 5 percent of the agency’s total operating expenses, whichever is less.

When providing CCP services and general home health services, the provider must file these on two separate UB-04 CMS-1450 paper claim forms with the appropriate prior authorization number, and must send them to the appropriate address.

Claims denied because of an ownership conflict will continue to be denied unless the home health agency submits documentation indicating that the ordering physician no longer has a significant ownership interest in, or a significant financial or contractual relationship with, the home health agency providing services. Documentation must be sent to TMHP Provider Enrollment at the address indicated in subsection A.11, “Written Communication With TMHP” in “Appendix A: State, Federal, and TMHP Contact Information” (*Vol. 1, General Information*).

### 3 Claims Resources

Refer to the following sections or forms when filing claims:

| Resource                                           | Location                                                                                                                                                     |

# 1 General Information

The information in this handbook is intended for gynecological, obstetrics, and Texas Medicaid Title XIX family planning providers. The handbook provides information about Texas Medicaid's benefits, policies, and procedures that are applicable to these service providers.

**Important:** *All providers are required to read and comply with “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, General Information). In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

**Referto:** The *Children's Services Handbook* (Vol. 2, *Provider Handbooks*) for more information about providing services to Texas Medicaid/Texas Health Steps (THSteps) clients.

“Section 1: Provider Enrollment and Responsibilities” (Vol. 1, *General Information*).

“Texas Medicaid Administration” in the *Preliminary Information* (Vol. 1, *General Information*).

The *Healthy Texas Women Program Handbook* (Vol. 2, *Provider Handbooks*) for information about women's health services.

The *Health and Human Services Commission Family Planning Program Services Handbook* (Vol. 2, *Provider Handbooks*) for information about Health and Human Services Commission (HHSC) programs that provide family planning services.

This handbook contains information about Texas Medicaid fee-for-service benefits. For information about managed care benefits, providers can refer to the *Medicaid Managed Care Handbook* (Vol. 2, *Provider Handbooks*).

Managed care carve-out services are administered as fee-for-service benefits. A list of all carve-out services is available in the *Medicaid Managed Care Handbook*.

**Referto:** Section 8, “Carve-Out Services” in the *Medicaid Managed Care Handbook* (Vol. 2, *Provider Handbooks*).

## 1.1 Family Planning Overview

TMHP processes family planning claims and encounters for two different funding sources:

- The HHSC Family Planning program funding for HHSC-contracted providers
- The Title XIX family planning funding for Texas Medicaid providers

HHSC awards contracts to agencies across Texas to provide services to low-income individuals who may not qualify for Texas Medicaid services. These awards are granted through a competitive procurement process. HHSC contracts with a variety of providers, including local health departments, universities, medical schools, private nonprofit agencies, FQHCs, RHCs, and hospital districts. All HHSC-contracted providers must first be enrolled in Title XIX Texas Medicaid.

Client eligibility requirements, reimbursement methodologies, client copayment guidelines, and covered services may differ for each funding source. Family planning funding cannot be used for elective abortion services.

- Title XIX funds are available for family planning services provided to Texas Medicaid clients. TMHP processes Title XIX claims and reimburses eligible services on a fee-for-service basis for family planning providers and a prospective payment system basis for FQHC and RHC providers.
- HHSC Family Planning Program contracts annually with family planning providers. TMHP processes claims and reimburses providers for services to eligible clients according to the individually granted funds.
- Funds are also available for women's health and family planning services provided to Healthy Texas Women (HTW) clients. TMHP processes HTW claims and reimburses eligible services on a fee-for-service basis for family planning providers and a prospective payment system basis for FQHC and RHC providers.

### **1.1.1 Guidelines for Family Planning Providers**

The following guidelines apply for all family planning services:

- Family planning services may be provided by a physician or under the direction of a physician, not necessarily personal supervision. A physician provides direction for family planning services through written standing delegation orders and medical protocols. The physician is not required to be on the premises for the provision of family planning services by a registered nurse (RN), physicians assistant (PA), nurse practitioner (NP), clinical nurse specialist (CNS), or certified nurse midwife (CNM).
- Services must be provided without regard to age, marital status, sex, race, ethnicity, parenthood, handicap, religion, national origin, or contraceptive preference.
- Texas Medicaid clients, including limited care clients, are allowed to choose any enrolled family planning service provider.
- Family planning clients must be allowed freedom of choice in the selection of contraceptive methods as medically appropriate.
- Family planning clients must be allowed the freedom to accept or reject services without coercion.
- Only family planning clients may consent to the provision of family planning services. Counseling should be offered to adolescents that encourages them to discuss their family planning needs with a parent, an adult family member, or other trusted adult.
- Sterilization services cannot be provided to any person who is 20 years of age or younger. For more information, HHSC providers may refer to the HHSC website at [www.healthytexaswomen.org](http://www.healthytexaswomen.org).

## **1.2 Payment Window Reimbursement Guidelines for Services Preceding an Inpatient Admission**

According to the three-day and one-day payment window reimbursement guidelines, most professional and outpatient diagnostic and nondiagnostic services that are rendered within the designated timeframe of an inpatient hospital stay and are related to the inpatient hospital admission will not be reimbursed separately from the inpatient hospital stay if the services are rendered by the hospital or an entity that is wholly owned or operated by the hospital.

These reimbursement guidelines do not apply in the following circumstances:

- The professional services are rendered in the inpatient hospital setting.
- The hospital and the physician office or other entity are both owned by a third party, such as a health system.

- The hospital is not the sole or 100-percent owner of the entity.
- Referto:** Subsection 3.7.4.17, “Payment Window Reimbursement Guidelines” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for additional information about the payment window reimbursement guidelines.

## 2 Medicaid Title XIX Family Planning Services

### 2.1 Title XIX Provider Enrollment

Physician, FQHC, and RHC providers may provide Title XIX family planning services for Texas Medicaid clients under the provider’s Texas Medicaid provider number. No additional enrollment is required to provide Title XIX family planning services.

**Referto:** Subsection 7.1, “Provider Enrollment” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about physician provider enrollment.

Subsection 4.1, “Enrollment” in the *Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks)* for information about FQHC provider enrollment.

Subsection 8.1, “Enrollment” in the *Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks)* for information about RHC provider enrollment.

Family planning agencies must apply for enrollment with TMHP. To be enrolled in Texas Medicaid, family planning agencies must meet the following requirements:

- Complete an agency enrollment application.
- Ensure that all services are furnished by, prescribed by, or provided under the direction of a licensed physician in accordance with the Texas Medical Board or Texas BON.
- Have a medical director who is a physician currently licensed to practice medicine in Texas, and submit a current copy of the medical director’s physician license.
- Have an established record of performance in the provision of both medical and educational counseling of family planning services as verified through client records, established clinic hours, and clinic site locations.
- Provide family planning services in accordance with HHSC standards of client care for family planning agencies.
- Be approved for family planning services by the HHSC Family Planning Program.

**Note:** An RHC can also apply for enrollment as a family planning agency.

The effective date for participation is the date an approved provider agreement with Medicaid is established.

Providers cannot be enrolled if their license is due to expire within 30 days. A current license must be submitted.

**Referto:** “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information about enrollment procedures.

Subsection 6.3.6, “Benefit Code” in the *Section 6: Claims Filing (Vol. 2, Provider Handbooks)* for more information about benefit codes.

### 2.2 Services, Benefits, Limitations, and Prior Authorization

This section includes information on family planning services funded through Title XIX Medicaid.

Family planning services are preventive health, medical, counseling, and educational services that assist individuals in managing their fertility and achieving optimal reproductive and general health. Title XIX services include:

- Family planning annual exams
- Other family planning office or outpatient visits
- Laboratory services
- Radiology services
- Contraceptive devices and related procedures
- Drugs and supplies
- Medical counseling and education
- Sterilization and sterilization-related procedures (i.e., tubal implants, tubal ligation, vasectomy, and anesthesia for sterilization)

Providers must use one of the following diagnosis codes in conjunction with all family planning procedures and services:

| Diagnosis Codes |        |        |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|--------|--------|
| Z30011          | Z30013 | Z30014 | Z30015 | Z30016 | Z30017 | Z30018 | Z3002  |
| Z3009           | Z302   | Z3040  | Z3041  | Z3042  | Z30430 | Z30431 | Z30432 |
| Z30433          | Z3044  | Z3045  | Z3046  | Z3049  | Z308   | Z309   | Z9851  |
| Z9852           |        |        |        |        |        |        |        |

One of the diagnosis codes in this table must be included in Block 24 E of the CMS-1500 claim form referencing the appropriate procedure code. The choice of diagnosis code must be based on the type of family planning service performed.

**Note:** Title XIX family planning services are exempt from the limited program and rules.

### 2.2.1 Family Planning Annual Exams

An annual family planning exam consists of a comprehensive health history and physical examination, which includes the following:

- Medical laboratory evaluations as indicated
- An assessment of the client’s problems and needs
- The implementation of an appropriate contraceptive management plan

Family planning providers must bill the most appropriate evaluation and management (E/M) visit procedure code for the complexity of the annual family planning examination provided. To bill an annual family planning examination, one of the following procedure codes must be billed with modifier FP and a family planning diagnosis code:

| Procedure Codes |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|
| 99202           | 99203 | 99204 | 99205 | 99211 | 99212 | 99213 | 99214 | 99215 |

**Important:** Only the annual family planning examination requires modifier FP. All other family planning office visits do not. One annual family planning examination is allowed per year. Claims filed incorrectly may be denied.

The following table summarizes the uses for the E/M procedure codes and the corresponding billing requirements for the annual examination:

| Billing Criteria                                                                                                          | Frequency                                                                                                                                                      |
|---------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>New patient:</i> Most appropriate E/M procedure code with modifier FP and a family planning diagnosis code             | One new patient E/M code every 3 years following the last E/M visit provided the client by that provider or a provider of the same specialty in the same group |
| <i>Established patient:</i> Most appropriate E/M procedure code with modifier FP and a family planning diagnosis code     | Once a year*                                                                                                                                                   |
| * The established patient procedure code will be denied if a new patient procedure code has been billed in the same year. |                                                                                                                                                                |

An annual family planning examination (billed with modifier FP) will not be reimbursed when submitted with the same date of service as a surgical procedure or an additional E/M visit.

If another condition requiring an E/M office visit beyond the required components for the annual examination is discovered, the provider may submit a claim for the additional visit using modifier 25 to indicate that the client's condition required a significant, separately identifiable E/M service. Documentation supporting the provision of a significant, separately identifiable E/M service must be maintained in the client's medical record and made available to Texas Medicaid upon request.

### 2.2.1.1 FQHC Reimbursement for Family Planning Annual Exams

To receive their encounter rate for the annual family planning examination, FQHCs must use the most appropriate E/M procedure code for the complexity of service provided as indicated in the previous table in subsection 2.2.1, "Family Planning Annual Exams" in this handbook.

The annual exam is allowed once per fiscal year, per client, per provider. Two additional family planning office or outpatient visits may be reimbursed to the FQHC within the same year for the same client.

A new patient visit for the annual exam may be reimbursed once every three years following the last E/M visit provided to the client by that provider or a provider of the same specialty in the same group. The annual examination must be billed as an established patient visit if E/M services have been provided to the client within the last three years.

Reimbursement for services payable to an FQHC is based on an all-inclusive rate per visit.

### 2.2.2 Other Family Planning Office or Outpatient Visits

Other family planning E/M visits are allowed for routine contraceptive surveillance, family planning counseling and education, contraceptive problems, suspicion of pregnancy, genitourinary infections, and evaluation of other reproductive system symptoms.

New and established patient E/M services for general family planning visits (procedure codes 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, and 99215) may be provided via a telemedicine service delivered using synchronous audiovisual technology if clinically appropriate and safe, as determined by the provider, and agreed to by the person receiving services. Whenever possible, HHSC encourages face-to-face interaction, such as an in-person visit.

New and established patient E/M services delivered using synchronous audiovisual technology must be billed using the 95 modifier.

**Referto:** The *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (Vol. 2, *Provider Handbooks*) for information about E/M services and The *Telecommunication Services Handbook* (Vol. 2, *Provider Handbooks*) for restrictions for services delivered using synchronous audiovisual technology.

Documentation requirements for a telemedicine service are the same as for an in-person visit and must accurately reflect the services rendered. Documentation must identify the service delivery method when provided via telemedicine.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telemedicine documentation requirements, including requirements for informed consent.

During a Declaration of State of Disaster, HHSC may issue direction to providers regarding the use of a telemedicine or telehealth services to include the use of a synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein. A Declaration of State of Disaster is when an executive order or proclamation by the governor declaring a state of disaster in accordance with Section 418.014 of the Texas Government Code.

During any visit for a medical problem or follow-up visit, the following must occur:

- An update of the client’s relevant history
- Physical exam, if indicated
- Laboratory tests, if indicated
- Treatment or referral, if indicated
- Education and counseling, or referral, if indicated
- Scheduling of office or clinic visit, if indicated

Title XIX family planning providers must use one of the following procedure codes based on the complexity of the visit with a family planning diagnosis for other family planning office or outpatient visits:

| Procedure Codes |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|
| 99202           | 99203 | 99204 | 99205 | 99211 | 99212 | 99213 | 99214 | 99215 |

**Important:** Family planning E/M office and outpatient visits should not be billed with modifier FP. Claims filed incorrectly may be denied.

The following table summarizes the uses for the E/M procedure codes and the corresponding billing requirements for each type of visit:

| Billing Criteria                                                                                                          | Frequency                                                                                                                                                      |
|---------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>New patient:</i> Most appropriate E/M procedure code with a family planning diagnosis code                             | One new patient E/M code every 3 years following the last E/M visit provided the client by that provider or a provider of the same specialty in the same group |
| <i>Established patient:</i> Most appropriate E/M procedure code with a family planning diagnosis code                     | As needed*                                                                                                                                                     |
| * The established patient procedure code will be denied if a new patient procedure code has been billed in the same year. |                                                                                                                                                                |

**Referto:** Subsection 2.2, “Services, Benefits, Limitations, and Prior Authorization” in this handbook for the list of family planning diagnosis codes.

A general family planning office or outpatient visit (billed without modifier FP) will not be reimbursed when submitted with the same date of service as a surgical procedure or an additional E/M visit. If another condition requiring an E/M office visit beyond the required components for an office visit, family planning visit, or surgical procedure is discovered, the provider may submit a claim for the additional visit using modifier 25 to indicate that the client’s condition required a significant, separately

identifiable E/M service. Documentation supporting the provision of a significant, separately identifiable E/M service must be maintained in the client's medical record and made available to Texas Medicaid upon request.

#### **2.2.2.1 FQHC Reimbursement for Other Family Planning Office or Outpatient Visits**

FQHCs may be reimbursed for three family planning encounters per year, per client, regardless of the reason for the encounter. The three encounters may include any combination of general family planning, annual family planning exams, or services. Procedure codes J7296, J7297, J7298, J7300, J7301, and J7307 may be reimbursed in addition to the FQHC encounter payment. When seeking reimbursement for an intrauterine device (IUD) or implantable contraceptive capsule, providers must submit on the same claim the procedure code for the family planning service provided and the procedure code for the contraceptive device. The contraceptive device is not subject to FQHC limitations. Providers must use modifier U8 when submitting claims for a contraceptive device purchased through the 340B Drug Pricing Program.

A family planning diagnosis code must be billed along with the most appropriate informational procedure codes for the services that were rendered. Reimbursement for services payable to an FQHC is based on an all-inclusive rate per visit.

**Referto:** Section 4, “Federally Qualified Health Center (FQHC)” in the *Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks)* for more information about FQHC services.

#### **2.2.2.2 RHC Reimbursement for Other Family Planning Office or Outpatient Visits**

RHC's may receive an encounter rate when submitting claims with procedure code T1015, in addition to a flat “add on” fee for a LARC device (procedure codes J7296, J7297, J7298, J7300, J7301, and J7307).

**Referto:** Subsection 8.2.1.4, “Family Planning Services” in the *Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks)* for more information about family planning services performed by an RHC.

### **2.2.3 Laboratory Procedures**

All family planning laboratory services must be billed with a family planning diagnosis code.

#### **2.2.3.1 Clinical Laboratory Improvement Amendments (CLIA) Requirement**

All providers of laboratory services must comply with the rules and regulations of the CLIA. Providers who are not in compliance with CLIA will not be reimbursed for laboratory services. Only the office or lab that holds the appropriate CLIA certificate and that actually performs the laboratory test procedure may be reimbursed for the procedure.

**Referto:** Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

#### **2.2.3.2 Medical Record Documentation**

Medicaid family planning service providers must document in the client's medical record the medical necessity of all ordered laboratory services. The medical record documentation must also reference an appropriate diagnosis.

#### **2.2.3.3 Lab Specimen Handling and Testing**

Any test specimen sent to a laboratory may be reimbursed to the laboratory that performs the test and not to the referring family planning provider.

If the provider that obtains the specimen does not perform the laboratory procedure, the provider that obtains the specimen may be reimbursed one lab handling fee per day, per client, using procedure code 99000 and a family planning diagnosis code for the handling or conveyance of the specimen from the provider's office to a laboratory. More than one lab handling fee may be reimbursed per day if multiple specimens are obtained and sent to different laboratories.

Handling fees are not paid for Pap smears or cultures. The appropriate procedure code may be reimbursed for Pap smear interpretations when billed with modifier SU indicating that the screening and interpretation were actually performed in the office.

#### **2.2.3.4 Providing Information to the Reference Laboratory**

When sending any specimen, including Pap smears, to the reference laboratory, the family planning provider must provide the reference laboratory with the client's name, address, Texas Medicaid number, and a family planning diagnosis so the laboratory may bill Texas Medicaid for its family planning lab services.

#### **2.2.4 Radiology Services**

Procedure codes 74000, 74010, and 76830 may be reimbursed for services performed for the purpose of localization of an IUD.

#### **2.2.5 External Contraceptives, Long Acting Reversible Contraceptives (LARCs), and Related Procedures**

##### **2.2.5.1 External Contraceptives**

Procedure codes A4261 (cervical cap) and A4266 (diaphragm) may be reimbursed separately from the fitting and instruction (procedure code 57170).

Procedure codes A4261 and A4266 may be reimbursed when they are billed with one of the following diagnosis codes:

| Diagnosis Codes |        |        |       |      |       |       |       |
|-----------------|--------|--------|-------|------|-------|-------|-------|
| Z30011          | Z30012 | Z30018 | Z3009 | Z302 | Z3040 | Z3041 | Z3042 |
| Z30431          | Z30432 | Z3049  | Z308  | Z309 | Z641  |       |       |

##### **2.2.5.2 Long Acting Reversible Contraception: Intrauterine Devices**

###### **2.2.5.2.1 Insertion of the LARC IUD**

The IUD and the insertion of the IUD may be reimbursed using procedure code J7296, J7297, J7298, J7300, J7301, and 58300.

Procedure codes J7296, J7297, J7298, J7300, and J7301 may be reimbursed when they are billed with one of the following diagnosis codes:

| Diagnosis codes |        |        |        |        |        |       |       |
|-----------------|--------|--------|--------|--------|--------|-------|-------|
| Z30011          | Z30013 | Z30014 | Z30018 | Z3002  | Z3009  | Z302  | Z3040 |
| Z3041           | Z3042  | Z30430 | Z30431 | Z30432 | Z30433 | Z3049 | Z308  |
| Z309            | Z9851  | Z9852  |        |        |        |       |       |

###### **2.2.5.2.2 Removal of the LARC IUD**

Procedure code 58301 may be reimbursed when an IUD is extracted from the uterine cavity. An office visit will not be reimbursed when billed on the same date of service as procedure code 58301.

When a vaginal, cervical, or uterine surgery procedure code is submitted with the same date of service as the IUD removal procedure code or the IUD replacement procedure code, the following reimbursement may apply:

- The other vaginal, cervical, or uterine surgical procedure may be reimbursed at full allowance.
- The removal or the replacement of the IUD will be denied.

**2.2.5.3 Long Acting Reversible Contraception: Implantable Contraceptive Capsules**

The contraceptive capsule and the implantation of the contraceptive capsule may be reimbursed using procedure code J7307. Providers must use modifier U8 when submitting claims for a contraceptive device purchased through the 340B Drug Pricing Program.

Procedure code 11981 may be reimbursed for the insertion of the contraceptive capsule when it is billed with a family planning diagnosis code.

Procedure code 11983 may be reimbursed for the removal with reinsertion of the contraceptive capsule when it is billed with a family planning diagnosis code. Progesterone-containing subdermal contraceptive capsules (Norplant) were previously used for birth control. Although subdermal contraceptive capsules are no longer approved by the Food and Drug Administration (FDA), the removal of the implanted contraceptive capsule may be considered for reimbursement with procedure code 11976 or 11982.

**2.2.5.4 Immediate Postpartum Insertion of LARCs: IUDs and Implantable Contraceptive Capsules**

Procedure codes for LARCs may be reimbursed in addition to the hospital Diagnosis related group (DRG) payment when insertion is performed immediately postpartum. “Immediately postpartum” refers to the following:

- Insertion within 10–15 minutes of placental delivery for IUDs
- Insertion prior to discharge for implantable contraceptive capsules.

Medicaid MCOs must adopt claim processing procedures to reimburse hospital and facility providers for immediate postpartum LARC devices in addition to the rate for delivery services.

For claims submitted to TMHP, hospital and facility providers must submit an outpatient claim with the appropriate procedure code for the contraceptive device in addition to the inpatient claim for the delivery services.

For claims submitted to a Texas Medicaid managed care organization (MCO), providers must follow the MCO’s claim processing procedures for reimbursement of immediate postpartum LARC devices in addition to the rate for delivery services.

**2.2.6 Contraceptive Drugs, Supplies, and Prophylactics**

The following procedure codes may be reimbursed for contraceptive drugs, supplies, and prophylactics:

| Procedure Codes                                                                                                                 |       |       |       |        |       |       |       |       |
|---------------------------------------------------------------------------------------------------------------------------------|-------|-------|-------|--------|-------|-------|-------|-------|
| A4267                                                                                                                           | A4268 | A4269 | J1050 | J3490* | J7294 | J7295 | J7304 | S4993 |
| 96372                                                                                                                           |       |       |       |        |       |       |       |       |
| * Procedure code J3490 may be reimbursed when a prescription medication to treat a genital infection is provided to the client. |       |       |       |        |       |       |       |       |

Procedure code J1050 with modifier U1 may be reimbursed for services rendered to female clients as medically appropriate for the purpose of contraception. A quantity of 1 must be billed.

Procedure code J1050 (no modifier) may be reimbursed for services rendered to male and female clients of any age for other indications as appropriate. Providers must bill the appropriate quantity based on the amount used in milligrams (mg).

For Texas Medicaid Title XIX services, procedure code J1050 is not diagnosis-restricted. For Title XIX family planning services, procedure code J1050 must be billed with a valid family planning diagnosis code.

Procedure codes A4268, A4269, and S4993 may be reimbursed when they are billed with one of the following diagnosis codes:

| Diagnosis Codes |        |        |       |      |       |       |       |
|-----------------|--------|--------|-------|------|-------|-------|-------|
| Z30011          | Z30012 | Z30018 | Z3009 | Z302 | Z3040 | Z3041 | Z3042 |
| Z30431          | Z30432 | Z3049  | Z308  | Z309 | Z641  |       |       |

Procedure code A9150 is not reimbursed through Title XIX Medicaid for the medication to treat a monilia infection. The drug is available through the Medicaid Vendor Drug Program with a prescription.

Providers must use modifier U8 when submitting claims for a contraceptive device purchased through the 340B Drug Pricing Program.

**Referto:** Subsection 1.1, “About the Vendor Drug Program” in the *Outpatient Drug Services Handbook (Vol. 2, Provider Handbooks)* for information about this program.

### 2.2.6.1 Prescriptions and Dispensing Medication

Family planning agencies may do one or both of the following:

- Dispense family planning drugs and supplies directly to the client and bill accordingly.
- Write a prescription for the client to take to a pharmacy.

Family planning drugs and supplies that are dispensed directly to the client must be billed to TMHP for Texas Medicaid fee-for-service clients. Only family planning agencies may be reimbursed for dispensing family planning drugs and supplies. Family planning agencies may be reimbursed for dispensing up to a 1-year supply of contraceptives in a 12-month period using procedure code J7294, J7295, J7304, or S4993. The appropriate family planning diagnosis code must be included on the claim.

**Referto:** Subsection 2.2, “Services, Benefits, Limitations, and Prior Authorization” in this handbook.

Title XIX clients may have prescriptions filled at the clinic pharmacy or at another pharmacy. Pharmacies under the Vendor Drug Program are allowed to fill all prescriptions as prescribed. Family planning drugs and supplies are exempt from the three prescriptions-per-month rule for up to a six-month supply.

### 2.2.6.2 Pharmacy Benefit for Long-Acting Reversible Contraception Products

Certain LARC products are available as a pharmacy benefit of Family Planning and are available through a limited number of specialty pharmacies that work with LARC manufacturers. Providers can refer to the Long-Acting Reversible Contraception Products section of the Outpatient Drug Services Handbook for additional information, including a list of covered products and participating specialty pharmacies.

### 2.2.6.3 Medroxyprogesterone Acetate (Depo-Provera)

Medroxyprogesterone acetate injectable suspension (Depo-Provera) has been approved by the FDA as a method of contraception. Intramuscular injections of medroxyprogesterone acetate given at 90-day intervals has been proven to be a long-term method of preventing pregnancy. Medroxyprogesterone

acetate injectable suspension is reimbursed by Texas Medicaid to providers of family planning services. Medroxyprogesterone acetate must be billed using procedure code J1050 with modifier U1 and a valid family planning diagnosis codes.

### 2.2.6.4 Injection Administration

Injection administration billed by a provider is reimbursed separately from the medication. If billed without procedure code J1050 and modifier U1, procedure code 96372 must be billed with a family planning diagnosis and a description of the medication in the Remarks field of the claim. Injection administration is not payable to outpatient hospitals.

**Referto:** Subsection 2.2, “Services, Benefits, Limitations, and Prior Authorization” in this handbook for a list of family planning diagnosis codes.

### 2.2.7 Medical Counseling and Education

Procedure code H1010 for the instruction in natural family planning methods may be reimbursed once per day, per person or per couple, when billed by any provider with one of the following diagnosis codes:

| Diagnosis Codes |        |        |        |       |       |       |       |
|-----------------|--------|--------|--------|-------|-------|-------|-------|
| Z30011          | Z30018 | Z3002  | Z3009  | Z302  | Z3040 | Z3041 | Z3042 |
| Z30430          | Z30431 | Z30432 | Z30433 | Z3049 | Z308  | Z309  | Z9851 |
| Z9852           |        |        |        |       |       |       |       |

Procedure code H1010 is intended to instruct a couple or an individual in methods of natural family planning. Two sessions (one per client) may be billed for separate, individual sessions, or one session may be billed for counseling and education if provided in a joint session. Each session may be billed separately or the two sessions may be billed together with a total charge for both sessions.

### 2.2.8 Sterilization and Sterilization-Related Procedures

For a complete list of Title XIX sterilization procedures, providers can refer to the Texas Medicaid fee schedules located on the TMHP website at [public.tmhp.com/FeeSchedules/Default.aspx](https://public.tmhp.com/FeeSchedules/Default.aspx).

#### 2.2.8.1 Sterilization Consent

Per federal regulation 42 CFR 50, Subpart B, all sterilization procedures require an approved Sterilization Consent Form.

**Note:** *The Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form is not sterilization consent.*

**Referto:** [Sterilization Consent Form \(English\)](#) on the TMHP website at [www.tmhp.com](https://www.tmhp.com).

[Sterilization Consent Form \(Spanish\)](#) on the TMHP website at [www.tmhp.com](https://www.tmhp.com).

[Sterilization Consent Form Instructions](#) on the TMHP website at [www.tmhp.com](https://www.tmhp.com).

#### 2.2.8.2 Anesthesia for Sterilization

Procedure codes 00840, 00851, and 00940 may be reimbursed for anesthesia for sterilization services in accordance with standard anesthesia billing requirements. Providers must include a valid family planning diagnosis code on the claim.

**Referto:** Subsection 6.2.5.2, “Anesthesia” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for more information about anesthesia modifiers.

#### 2.2.8.3 Occlusive Sterilization Device

Procedure code A4264 may be reimbursed for the occlusive sterilization system (micro-insert), and may be reimbursed separately from the surgery (procedure code 58565) to place the device.

Providers must bill procedure code A4264 on the same date of service by the same provider as the occlusive sterilization system (micro-insert).

Procedure code 58565 is considered bilateral and is limited to once per lifetime, any provider.

#### **2.2.8.4 Tubal Ligation**

Procedure code 58600, 58615, 58670, or 58671 may be reimbursed for tubal ligations.

#### **2.2.8.5 Vasectomy**

Procedure code 55250 may be reimbursed for any sterilization procedure that is performed on a male by a family planning agency. This procedure code may be reimbursed as a global fee to include preoperative, intra-operative, and postoperative services by all parties involved. Vasectomies are considered to be permanent, once-per-lifetime procedures. If a vasectomy has previously been reimbursed for the client, providers may appeal with documentation that supports the medical necessity for the repeat sterilization.

#### **2.2.8.6 Facility Fees for Sterilization**

Hospital-based and freestanding ambulatory surgical centers (HASCs/ASCs) may be reimbursed for procedure code 55250, 58260, 58262, 58565, 58600, 58615, 58670, or 58671. An appropriate family planning diagnosis code must be billed when reporting facility fees for procedure codes 58565 or 58670.

**Referto:** [Ambulatory Surgical Center](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com) for a claim form example.

Subsection 6.2.13, “Gynecological and Reproductive Health and Family Planning Services” in the *Inpatient and Outpatient Hospital Services Handbook (Vol. 2, Provider Handbooks)* for additional gynecological, reproductive health, and family planning services procedure codes that may be reimbursed to ASC and HASC providers.

### **2.2.9 Prior Authorization**

Prior authorization is not required for family planning services, including sterilization and sterilization-related procedures.

### **2.2.10 Non-covered Services**

#### **2.2.10.1 Family Planning Services for Undocumented Aliens**

Undocumented aliens are identified on the client eligibility card as having limited Medicaid eligibility by the classification of Type Program (TP) 30, 31, 34, and 35. Under Texas Medicaid, these clients are only eligible for emergency services, including emergency labor and delivery. Texas Medicaid emergency-only services do not cover Title XIX family planning services.

## **2.3 Documentation Requirements**

All services require documentation to support the medical necessity of the service rendered, including gynecological and reproductive health services, and family planning services.

Gynecological and reproductive health services, and family planning services are subject to retrospective review and recoupment if documentation does not support the service billed.

Documentation requirements for a telemedicine service are the same as for an in-person visit and must accurately reflect the services rendered. Documentation must identify the service delivery method when provided via a telemedicine service.

**Referto:** Subsection 3.4, “Telemedicine Services” in the *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for more information about telemedicine documentation requirements, including requirements for informed consent.

## 2.4 Claims Filing and Reimbursement

### 2.4.1 Claims Information

Providers may use the following claim forms to submit claims to TMHP:

| Providers                                                                                                                           | Forms                                                                              |
|-------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------|
| <b>Medicaid Fee-For-Service Claims Submitted to TMHP</b>                                                                            |                                                                                    |
| All family planning services provided by physicians, PAs, NPs, CNSs, CNMs, and family planning agencies who also contract with HHSC | 2017 claim form or approved electronic format                                      |
| Medicaid family planning providers who do not contract with HHSC                                                                    | 2017 claim form, CMS-1500 claim form, or approved electronic format of either form |
| Hospitals                                                                                                                           | UB-04 CMS-1450 claim form or approved electronic format                            |
| FQHCs not contracted with HHSC                                                                                                      | UB-04 CMS-1450, 2017 claim form, or approved electronic format of either form      |
| FQHC also contracts with HHSC                                                                                                       | 2017 claim form or approved electronic format                                      |

The following applies when filing claims:

- All claims and Sterilization Consent Forms submitted by family planning agencies must be submitted with benefit code FP3.
- Family planning services billed by RHCs must include modifier AJ, AM, SA, or U7. These services must be billed using the appropriate national place of service (72) for an RHC setting.
- When completing a 2017, CMS-1500, or UB-04 CMS-1450 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Superbills, or itemized statements, are not accepted as claim supplements.
- All claims must be filed within approved filing deadlines.
- Denied claims may be appealed.

Providers may copy [2017 Claim Form](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Providers may purchase CMS-1500 and UB-04 CMS-1450 claim forms from the vendor of their choice. TMHP does not supply the forms.

- Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.
- “Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.
- Subsection 6.9, “Family Planning Claim Form (Paper Billing)” in “Section 6: Claims Filing” (*Vol. 1, General Information*).
- Subsection 6.9.1, “2017 Claim Form” in “Section 6: Claims Filing” (*Vol. 1, General Information*).
- Subsection 6.5.4, “CMS-1500 Instruction Table” in “Section 6: Claims Filing” (*Vol. 1, General Information*).
- Subsection 6.6.3, “UB-04 CMS-1450 Instruction Table” in “Section 6: Claims Filing” (*Vol. 1, General Information*).
- Subsection 6.1.4, “Claims Filing Deadlines” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for information about filing deadlines.
- “Section 7: Appeals” (*Vol. 1, General Information*) for information about appealing claims.

Blocks that are not referenced are not required for processing by TMHP and may be left blank.

RHCs must use their National Provider Identifier (NPI), the appropriate benefit code as applicable, and the appropriate modifier and place of service as outlined in this section.

#### **2.4.1.1 Family Planning and Third Party Liability**

Federal and state regulations mandate that family planning client information be kept confidential. Because seeking information from third party insurance may jeopardize the client’s confidentiality, prior insurance billing is not a requirement for billing family planning for any title program.

#### **2.4.2 Billing Procedures for Non-Family-Planning Services Provided During a Family Planning Visit (Title XIX Only)**

When a non-family-planning service is provided during a family planning visit or the client is offered family planning services during a medical visit, the following billing process must be used:

- A family planning clinic must bill for non-family-planning services using the performing provider’s NPI and taxonomy code. The clinic NPI and taxonomy code is used to bill family planning services only.
- The performing provider must bill both family planning services and non-family-planning services, using the correct NPI and taxonomy code.
- The FQHC must bill both family planning services and non-family-planning services, using the correct NPI and taxonomy code.
- An RHC may bill a rural health encounter for a non-family-planning medical condition or use the physician’s or NP’s NPI and taxonomy code to bill for family planning services. If the RHC also is enrolled as a family planning agency, the family planning services may be billed using the agency’s family planning NPI and taxonomy code and the appropriate national place of service (72) for an RHC setting.

#### **2.4.3 National Drug Code**

- Referto:** Subsection 6.3.4, “National Drug Code (NDC)” in “Section 6: Claims Filing” (*Vol. 1, General Information*).

#### 2.4.4 National Correct Coding Initiative (NCCI) and Medically Unlikely Edit (MUE) Guidelines

The Healthcare Common Procedure Coding System (HCPCS) and Current Procedural Terminology (CPT) codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manuals and bulletins. Providers should refer to the [CMS NCCI web page](#) for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

### 3 Breastfeeding Support Services

Breast pumps facilitate an infant's ability to receive their mother's own breast milk when it would be difficult to do so without equipment. Breast pump equipment is a benefit when provided by durable medical equipment (DME) suppliers and medical supply companies in the home. DME suppliers may deliver breast pump equipment to a client who is still in the hospital, but for claims purposes, the place of service should indicate the home setting.

Durable medical equipment (DME) is defined as medical equipment/appliances that are manufactured to withstand repeated use, ordered by a physician or an allowed practitioner for use in the home, and required to correct or ameliorate the client's disability, condition, or illness. Since there is no single authority (such as a federal agency) that confers the official status of "durable medical equipment" on any device or product, the Health and Human Services Commission (HHSC) retains the right to make such determinations with regard to DME provided by Texas Medicaid. DME provided by Texas Medicaid must either have a well-established history of efficacy, or, in the case of novel or unique equipment, valid peer-reviewed evidence that the equipment corrects or ameliorates a Medicaid-eligible medical condition or functional disability.

**Note:** *An allowed practitioner is an individual licensed in Texas as a physician assistant (PA), a certified nurse practitioner (CNP), or a clinical nurse specialist (CNS).*

A breast pump may be obtained under an eligible mother's Medicaid client number; however, if a mother is no longer eligible for Texas Medicaid and there is a need for a breast pump or parts, then breast pump equipment must be obtained under the infant's Medicaid client number.

Any provider who is familiar with the mother's or infant's health may order a breast pump. The ordering provider may include, but is not limited to, obstetricians, gynecologists, neonatologists, and pediatricians. Providers in the hospital setting or the community setting may write the order for breast pump equipment.

DME providers are not precluded from releasing equipment to infants with a Medicaid pending status when they have an order from the direct care provider. A Medicaid identification number is typically assigned to an infant within 24 hours, but it may take longer. During this time, DME providers are expected to release equipment to the client as ordered by the direct care provider who is familiar with the infant.

**Note:** *For clients who are 21 years of age or older, requests for breast pumps that do not meet the criteria through Title XIX Home Health Services may be considered under the Texas Medicaid Home Health—Durable Medical Equipment (DME) Exceptional Circumstances process.*

**Note:** *Medicaid providers should supply breast pump equipment to qualifying clients. If clients do not meet criteria as outlined, mothers should also be informed that breast pumps may be available through the Special Supplemental Nutrition Program for Women, Infant, and Children (WIC), contingent upon WIC's issuance criteria.*

The American Academy of Pediatrics (AAP) recommends that infants exclusively breastfeed for the first six months and continue to breastfeed through 12 months of age or longer.

Breastfeeding refers to both the infant's feeding of breast milk directly from the breast as well as the feeding of mother's own expressed breast milk to the infant.

Breast milk provides unsurpassed nutrition and immune protections, influencing the growth and development of infants, and is a significant primary prevention strategy for improving infant health outcomes.

Breastfeeding is encouraged as a means to prevent various illnesses and conditions and to promote the health and wellness of mothers and infants. In some circumstances, breast pumps may be necessary for breastfeeding.

Breastfeeding reduces the infant's risk for illness, including ear infections, gastrointestinal and bacterial infections, respiratory infections, asthma, diabetes, obesity, and leukemia; and reduces the premature infant's risk of necrotizing enterocolitis. Breastfeeding also reduces the mother's risk of developing conditions including breast and ovarian cancers, diabetes, and cardiovascular disease. With proper breastfeeding support and management, breastfeeding may also be protective against post-partum depression.

Infant health can be directly impacted by the ability of the infant's mother to provide her own breast milk. Therefore, it is beneficial to enhance the opportunities for infants to receive their mother's milk through the use of equipment when needed.

The American Academy of Pediatrics (AAP) and the Centers for Disease Control and Prevention (CDC) advise that mothers who are infected with human immunodeficiency virus (HIV), Human T-lymphotropic virus (HTLV)-1, and HTLV-2 infection should not breastfeed as the virus may be passed to their infant.

All breast pumps must meet the following specifications:

- Comply, be registered, and be cleared with the Federal Drug Administration (FDA)
- Allow for pumping sessions to be efficiently completed within 30 minutes
- Be adaptable for several sizes of breast shields (flanges), including larger sizes, so as to accommodate different sizes of breasts and nipples
- Have an adjustable and wide-range of suction pressure at the breast shield during use, typically from 30 millimeters of mercury up to 250 millimeters of mercury (mm Hg)
- Have a mechanism or written guidelines to prevent or instruct the user from achieving a vacuum level over 250 mm Hg
- Be portable

The following breast pump procedure codes are a benefit of Texas Medicaid with the listed limitations:

| Procedure Codes                                                                                                  | Additional Information                                                                                          | Limitations                                                                      |
|------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------|
| A4281, A4282, A4283, A4284, A4285, A4286                                                                         | Breast pump parts for use with a pump that has been purchased.<br>All parts must be submitted with modifier U8. | Each part - up to 2 times within 12 months from the breast pump date of purchase |
| E0602*                                                                                                           | Purchase of a personal-use, manual breast pump                                                                  | Once within 12 months from the date of birth                                     |
| E0603*                                                                                                           | Purchase of a personal-use, electric breast pump                                                                |                                                                                  |
| *Only one of these procedure codes may be reimbursed when submitted for the same date of service by any provider |                                                                                                                 |                                                                                  |

| Procedure Codes                                                                                                  | Additional Information                                         | Limitations                                                                                           |
|------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|
| E0604*                                                                                                           | Rental of a multiple-user, hospital-grade electric breast pump | Initial 60-day rental, followed by up to three 90-day rentals within 12 months from the date of birth |
| *Only one of these procedure codes may be reimbursed when submitted for the same date of service by any provider |                                                                |                                                                                                       |

| Modifier | Description                                                                                                                          |
|----------|--------------------------------------------------------------------------------------------------------------------------------------|
| U8       | U8 denotes the replacement of a part for durable medical equipment and must be used when submitting claims for any breast pump parts |

The rental or purchase of a breast pump, as well as any replacements or parts, must be billed using the mother's Medicaid identification number, or if she is no longer eligible, using the infant's Medicaid identification number.

Personal-use breast pump is for use by only one individual. Personal-use pumps are not to be shared, or used by anyone other than the original owner. Use by more than one individual may pose a risk of cross-contamination, may result in infection or illness of mother and infant, and may void the equipment warranty.

A manual or electrical (AC and/or DC) personal-use breast pump may be considered for purchase only.

A multiple-user electric breast pump is also known as a hospital-grade electric breast pump. Hospital-grade electric breast pumps are designed for repeated uses throughout the pump's lifetime, by more than one woman and infant. The risk of cross-contamination is eliminated via a closed system. Pumped breast milk must not reach the motor. Hospital grade pumps are durable, heavy-duty breast pumps.

A hospital-grade breast pump may be considered for rental only.

Pump kits, which are specific to each breast pump manufacturer's requirements, provide the necessary supplies and accessories to allow expression of breast milk.

Procedure codes E0602 and E0603 will be denied when submitted within the same calendar month as procedure code E0604.

Procedure code E0602 will be denied when submitted within one year from procedure code E0603, any provider.

Claims for parts will not be reimbursed when billed for the same day as the purchase of breast pump equipment. Reimbursement is for purchase or rental, with documented medical necessity and prior authorization when appropriate, as outlined in this handbook.

**Referto:** Subsection 2.3.2.3, "Breast Pump Claims Filing for MCO Services" in the *Medicaid Managed Care Handbook (Vol. 2, Provider Handbooks)* for more information related to breast pump coverage for newborns.

### 3.1 Breast Pump Kit Specifications

A breast pump kit is included in the purchase or rental of a breast pump, and is not separately reimbursed. Kits should include the following:

- Breast shields (flanges) that are adjustable and flexible, or flanges that are available in several different sizes if rigid, including larger sizes
- All accessories necessary for pumping two breasts simultaneously for electric pumps, or at least one breast manually for manual handle-squeeze pumps
- All parts necessary to easily convert an electric pump to a manual pump
- At least one extra set of membranes and valve replacements

- At least one extra diaphragm replacement for closed-system pumps
- At least two collection bottles with spill-proof standard size caps, that are bisphenol-A (BPA) and DEHP-free
- Accessories and supplies must be compatible with the pump provided. Materials must be of durable quality for withstanding repeated boiling, washing, and pumping use.

### 3.2 Replacement Parts

Breast pump replacement parts (procedure codes A4281, A4282, A4283, A4284, and A4285) must be billed with modifier U8.

Replacement parts will be denied when submitted for the same date of service as a breast pump.

If the breast pump was not purchased by Texas Medicaid and requires replacement parts, the following documentation of a client-owned device must be submitted:

- Purchase date
- Serial number
- Purchasing entity of the device
- Copy of the receipt, if available

**Note:** *Parts for a hospital-grade electric breast pump (procedure code E0604), and routine servicing and all necessary repairs to ensure the unit remains functional for the client's needs, are included in the rental of the pump and is the responsibility of the DME supplier.*

**Referto:** Subsection 6.4.1, “National Correct Coding Initiative (NCCI) Guidelines” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for information about NCCI MUE guidelines.

### 3.3 Personal-Use Manual Breast Pump Medical Necessity Criteria

Manual breast pumps (procedure code E0602) are personal-use, hand-operated, handle-squeeze pumps that are appropriate for short-term or occasional uses related to, but not limited to, any of the following:

- Infrequent separation from infants; such as mothers who work or go to school part-time for less than 10 hours per week, and who do not meet criteria for electric or hospital-grade pumps.
- Resolving brief uncomplicated periods of plugged duct
- Short-term concerns of mild engorgement
- Flat, retracted, or inverted nipples, and the mother does not meet the criteria for electric or hospital-grade pumps
- Cracked or fissured nipples, and the mother does not meet the criteria for electric or hospital-grade pumps

**Note:** *Manual breast pumps are not recommended for pumping on a regular basis, or for attempting to establish a milk supply.*

#### 3.3.1 Specifications

Manual breast pumps must include an independent milk collection bottle. The pump cylinder must not be the milk-collecting container.

### 3.4 Personal-Use Electric Breast Pump Medical Necessity

Electric Breast Pumps (procedure code E0603) have a motor and are electrically (AC and/or DC) operated. Personal-use double-collection electric breast pumps are recommended for their functionality and efficiency; they allow expression of breast milk from both breasts simultaneously.

Personal use double-collection electric breast pumps are for mothers and infants who are breastfeeding with limited, minor, or no complications. Personal-use double-collection electric breast pumps are recommended for pumping and maintaining a milk supply related to, but not limited to, any of the following:

- Regular separation from infants; such as mothers returning to work or school for 10 or more hours per week
- Infants detained in the hospital, who do not meet the criteria for a multiple-user electric breast pump
- Significant breast engorgement
- Breast abscess
- Mastitis
- If the mother is to receive short-term treatment with medication or therapies that may be transmitted through breast milk, but she wishes to maintain her milk supply by pumping and discarding her milk in the interim

### 3.4.1 Specifications

Electric breast pumps must meet the following specifications:

- Be adaptable for simultaneous pumping of both breasts (double-collection)
- Have an adjustable suction pressure range necessary for preventing nipple trauma
- Automatically cycle with an adjustable variable cycling rate, typically 30 to 60 or more cycles per minute
- Include a battery option or adapter to be used as an alternate power source when electricity is not immediately available

**Note:** *Personal-use, single-collection electric pumps cannot simultaneously pump both breasts. Single-collection pumps are not recommended, as they are neither effective in maintaining a long-term milk supply nor efficient when pumping during short periods, such as work breaks. Double-collection breast pumps are the standard personal-use electric pump recommended by Texas Medicaid for breastfeeding infants and mothers.*

## 3.5 Hospital-Grade Electric Breast Pump Medical Necessity Criteria

Multiple-user, hospital-grade electric breast pumps (procedure code E0604) are heavy-duty, durable, closed-system pumps designed to be loaned multiple times throughout the pump's lifespan.

Rental of a multiple-user, hospital-grade electric breast pump is recommended for moderate to significant breastfeeding complications. Hospital-grade electric breast pumps are recommended for pumping related to, but not limited to, any of the following:

- Infants who cannot suck well, or have an uncoordinated swallow/suck reflex, due to respiratory disease or congenital disorder
- Infants diagnosed with failure to thrive, cardiac problems, or other special needs
- Infants who are chronically ill
- Infants of low birth-weight with increased nutritional needs
- Infants with severe feeding or digestive problems, as described by the provider in documentation
- Prematurity (less than 37 weeks gestation)
- Multiple births (e.g., twins, triplets, etc.)

- Long-term separation of mother and infant due to hospitalization
- Mothers experiencing conditions affecting their milk production, or low-milk supply, as described in documentation by the prescribing provider familiar with the client
- Mothers needing to induce lactation for establishing their milk supply, but are unable to do so without a hospital-grade breast pump

**Note:** A closed-system pump requires a personal-use milk collection pump kit, included in the rental, but to be kept by the individual and not for return with the pump.

### 3.5.1 Specifications

Use of a hospital-grade breast pump may be covered when the use of a hospital-grade breast pump is determined to be medically necessary and appropriate, as documented by the provider.

A hospital-grade electric breast pump must meet the following specifications:

- Be adaptable for simultaneous pumping of both breasts with an adjustable suction for preventing nipple trauma
- Automatically cycle with adjustable or variable cycling that closely mimics the suckling action of an infant
- Electrical (AC and/or DC)
- Include an adapter to be used as an alternate power source when electricity is not immediately available
- Must not allow milk to contact the housing unit or internal pump-motor at any time when the multiple-user pump is used per manufacturer's instructions

## 3.6 Prior Authorization

A completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form prescribing the DME and/or supplies must be signed and dated by a physician or an allowed practitioner familiar with the client, before requesting prior authorization for all DME equipment and supplies. The completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form must include the procedure codes and quantities for services requested.

The completed Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form with the original dated signature must be maintained by the prescribing physician or allowed practitioner in the client's medical record. A copy of the completed, signed, and dated form must be maintained by the DME provider in the client's medical record.

To complete the prior authorization process by paper, the DME provider must fax or mail the completed form to the Home Health Services Prior Authorization Department. To complete the prior authorization process electronically, the DME provider must submit the prior authorization requirements through any approved electronic methods.

To facilitate determination of medical necessity and avoid unnecessary denials, the physician or allowed practitioner must provide correct and complete information, including documentation for medical necessity of the medical equipment and/or supplies requested and is subject to retrospective review. The physician or allowed practitioner must maintain documentation of medical necessity in the client's medical record. The requesting provider may be asked for additional information to clarify or complete a request for breastfeeding equipment.

### 3.6.1 Replacement Parts

Prior authorization is not be required for up to 2 replacements of each part within 12 months from the breast pump's date of purchase.

Prior authorization is required for parts that exceed the limitations outlined in this handbook.

Requests must be submitted with appropriate documentation to support the need for additional replacement parts. The following documentation must be included under “If applicable” in section B of the Home Health Services (Title XIX) DME/Medical Supplies Prescribing Provider Order Form:

- The provider must attest that the mother continues to use the equipment for breastfeeding.
- The provider must indicate that the requested part is required for improved pumping efficiency (e.g., larger flanges), or is damaged or lost and affecting the function of the pump.

### 3.6.2 Personal-Use Manual or Electric Breast Pumps

Prior authorization is not required for the purchase of a manual or electric personal-use breast pump, within 12 months from the date of birth. Prior authorization is required for the replacement of a manual or electric personal-use breast pump due to damage or loss, within 12 months from the purchase date.

Requests for the replacement of a Texas Medicaid purchased personal-use breast pump (procedure code E0602 or E0603) must include the following documentation:

- A statement from the provider describing the loss or damage and what measures will be taken to prevent reoccurrence
- A copy of the police or fire report, when appropriate. The report must also be maintained in the client’s medical record.

**Note:** HHSC or its designee reserves the right to request additional documentation about the need for replacement when there is evidence of abuse or neglect to equipment by the client, client’s family, or caregiver. Requests for replacement when there is documented proof of abuse or neglect will not be approved.

### 3.6.3 Hospital-Grade Breast Pump

The initial 60-day rental of a hospital-grade pump does not require prior authorization.

The subsequent rental of a hospital-grade breast pump does require prior authorization. Subsequent rental requests may be considered for 90-day increments only. A maximum of 3 prior-authorized 90-day increments will be allowed within the 12 months following birth.

If an infant with medical necessity requires the extended rental of a hospital-grade electric breast pump, beyond these limitations, the claim may be considered for reimbursement upon appeal with documentation.

The prescribing provider familiar with the client must identify pumping as the mother’s primary method for expressing her breast milk, and must include a statement that clearly describes the infant’s medical necessity. Medically necessary conditions may include the following:

- Short-bowel syndrome
- Severe malabsorption syndromes
- Severe feeding intolerances or immunological deficiencies

Clients who no longer qualify for the continued rental of a hospital-grade breast pump may still qualify for the purchase of a breast pump as outlined in this handbook.

Purchase of a manual breast pump will not be reimbursed during the rental of a hospital-grade pump or if a personal-use electric breast pump was already purchased within the frequency limitations outlined in this handbook.

Purchase of a personal-use electric breast pump will not be reimbursed during the rental of a hospital-grade breast pump.

A hospital-grade electric breast pump will be considered purchased and owned by the client when the monthly payments for rental, through the same provider, equals the purchase cost for the equipment.

The following is required:

- The DME provider must notify the client when the rental equipment is considered purchased due to an extended rental. Proof of ownership must be provided to the client by the DME provider.
- Proof of client ownership of the device is required for reimbursement of replacement parts
- A statement from the DME provider indicating the make and model of the client-owned device, along with proof of client ownership, must be submitted with claim appeals for reimbursement of parts.

A hospital-grade breast pump that has been purchased due to extended rental is anticipated to last the minimum time frame indicated by the manufacturer's warranty.

### **3.7 Documentation Requirements**

Direct care providers must maintain the following documentation in the client's medical record:

- Client's specific medical necessity regarding the specific type of breast pump equipment ordered
- Anticipated duration of need regarding the circumstances or conditions related to the type of equipment ordered
- Infant's age (or gestational age, if premature)
- Documentation of the mother's intent to breastfeed

#### **3.7.1 DME Certification Form**

The DME Certification and Receipt Form must be submitted by DME claims and appeals when:

- A single item meets or exceeds a billed amount of \$2,500
- Multiple items submitted on the same date of service meet or exceed a total billed amount of \$2,500

The DME Certification and Receipt Form is required and must be completed before reimbursement can be made for any DME delivered to a client. The certification form must include the following:

- Name of the item
- Date the client received the DME
- Date signature of the DME provider and the client or client's primary caregiver

The signed and dated form must be maintained by the DME provider in the client's record.

Claims submitted without the DME Certification and Receipt Form will be denied.

Clients who receive DME meeting or exceeding a total billed amount of \$2,500 may be contacted to verify receipt of the equipment. If receipt of the equipment cannot be verified, the claim payment is eligible for recoupment.

### **3.8 Services that are not a Benefit**

The following breastfeeding support services are not benefits of Texas Medicaid:

- Personal-use electric breast pumps that are only capable of single-collection pumping, one breast at a time
- Breastfeeding support services in the preconception or prenatal period
- Breastfeeding support services for infants who are not breastfeeding and the mother has no intent to breastfeed

4 Obstetric Services

4.1 Services, Benefits, Limitations, and Prior Authorization

Antepartum care, antenatal surveillance, perinatal procedures, infant deliveries, and postpartum care are a benefit of Texas Medicaid.

Medicaid reimburses prenatal care, deliveries, and postpartum care as individual services. Providers may choose one of the following options for billing maternity services:

- Providers may itemize each service individually on one claim form and file at the time of delivery. The filing deadline is applied to the date of delivery.
- Providers may itemize each service individually and submit claims as the services are rendered. The filing deadline is applied to each individual date of service.

Providers who only provide prenatal care and choose to submit prenatal visit charges on one claim form have the filing deadline applied to the estimated date of confinement (EDC) that must be stated in Block 24D of the CMS-1500 claim form.

Laboratory (including pregnancy tests) and radiology services provided during pregnancy must be billed separately and claims must be received by TMHP within 95 days of the date of service.

Medicaid may reimburse only one delivery or Cesarean section procedure code per client in a seven-month period; reimbursement includes multiple births. Delivering physicians who perform regional anesthesia or nerve block do not receive additional reimbursement because these charges are included in the reimbursement for the delivery except when it is decided a cesarean delivery is required following neuraxial labor analgesia. Procedure code 01967 may be reimbursed separately with cesarean procedure codes 59514, 59515, 59620 and 59622.

**Referto:** Subsection 9.2.7.3, “Anesthesia for Labor and Delivery” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (Vol. 2, *Provider Handbooks*) for more information related to anesthesia reimbursement.

Procedure code 99140 is not considered for reimbursement when submitted with diagnosis code O80 for a normal delivery or with diagnosis code O82 for a Cesarean delivery when one of these diagnosis codes is documented on the claim as the referenced diagnosis. The referenced diagnosis must indicate the complicating condition. An emergency is defined as a situation when delay in treatment of the client poses a significant health threat to a client’s life, bodily organ, or body part.

Hospital admissions resulting from conditions or comorbidities complicating labor should be billed using the appropriate E/M procedure codes. These codes are not subject to the three-day pre-care period but are not payable on the date of delivery or the following six-week post-care period.

The procedure codes listed in the tables below may be reimbursed by Texas Medicaid. Providers can refer to the Texas Medicaid Static Fee Schedules and the Online Fee Look-up for rate and coverage information about specific procedure codes.

Prior authorization requests may be submitted to the TMHP Prior Authorization Department via mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients’ responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures. Medical record documentation must include assessment findings that substantiate the medical necessity for each diagnostic test performed.

4.1.1 Antepartum and Fetal Invasive Procedures

The following procedure codes may be submitted for antepartum and fetal invasive procedures:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 36460           | 59000 | 59001 | 59012 | 59015 | 59020 | 59025 | 59030 | 59050 | 59051 |

| Procedure Codes |       |       |       |       |  |  |  |  |  |
|-----------------|-------|-------|-------|-------|--|--|--|--|--|
| 59070           | 59074 | 59076 | 82731 | 84112 |  |  |  |  |  |

Antenatal surveillance includes fetal contraction stress test (procedure code 59020), fetal nonstress test (procedure code 59025), and fetal biophysical profile with or without nonstress testing (procedure code 76818 or 76819).

The American Congress of Obstetricians and Gynecologists (ACOG) states “because antepartum fetal surveillance results have not been definitively demonstrated to improve perinatal outcome, all indications for antepartum testing must be considered somewhat relative. In general, antepartum fetal surveillance has been employed in pregnancies in which the risk of antepartum fetal demise is increased.” Accordingly, some of the conditions under which testing may be appropriate, include but are not limited to the following:

- Maternal conditions:
  - Antiphospholipid syndrome
  - Hyperthyroidism (poorly controlled)
  - Hemoglobinopathies (hemoglobin SS, SC, or S-thalassemia)
  - Cyanotic heart disease
  - Systemic lupus erythematosus
  - Chronic renal disease
  - Type I diabetes mellitus
  - Hypertensive disorders
- Pregnancy-related conditions:
  - Pregnancy-induced hypertension
  - Decreased fetal movement
  - Oligohydramnios
  - Polyhydramnios
  - Intrauterine growth restriction
  - Postterm pregnancy
  - Isoimmunization (moderate to severe)
  - Previous fetal demise (unexplained or recurrent risk)
  - Multiple gestation (with significant growth discrepancy)

Procedure codes 59020 and 59025 billed with revenue code 729 for outpatient facilities may be reimbursed on the same day by a different provider without appeal; however, if billed more than once per day by the same provider, it will be denied. The provider may appeal with documentation supporting the performance of the test more than once on the same day by the same provider.

A fetal fibronectin (fFN) enzyme immunoassay (procedure code 82731) may be considered for reimbursement through Texas Medicaid when performed between 22 0/7 and 34 6/7 weeks for women with risk factors for preterm labor with or without symptoms of preterm labor.

Fetal intrauterine transfusion (procedure code 36460) and cordocentesis (procedure code 59012) are restricted to the diagnoses listed in the following table:

| Diagnosis Codes |         |         |         |         |         |         |         |
|-----------------|---------|---------|---------|---------|---------|---------|---------|
| O353XX0         | O353XX1 | O353XX2 | O353XX3 | O353XX4 | O353XX5 | O353XX9 | O358XX0 |
| O360110         | O360111 | O360112 | O360113 | O360114 | O360115 | O360119 | O360120 |
| O360121         | O360122 | O360123 | O360124 | O360125 | O360129 | O360130 | O360131 |
| O360132         | O360133 | O360134 | O360135 | O360139 | O360190 | O360191 | O360192 |
| O360193         | O360194 | O360195 | O360199 | O360910 | O360911 | O360912 | O360913 |
| O360914         | O360915 | O360919 | O360920 | O360921 | O360922 | O360923 | O360924 |
| O360925         | O360929 | O360930 | O360931 | O360932 | O360933 | O360934 | O360935 |
| O360939         | O360990 | O360991 | O360992 | O360993 | O360994 | O360995 | O360999 |
| O361110         | O361111 | O361112 | O361113 | O361114 | O361115 | O361119 | O361120 |
| O361121         | O361122 | O361123 | O361124 | O361125 | O361129 | O361130 | O361131 |
| O361132         | O361133 | O361134 | O361135 | O361139 | O361190 | O361191 | O361192 |
| O361193         | O361194 | O361195 | O361199 | O361910 | O361911 | O361912 | O361913 |
| O361914         | O361915 | O361919 | O361920 | O361921 | O361922 | O361923 | O361924 |
| O361925         | O361929 | O361930 | O361931 | O361932 | O361933 | O361934 | O361935 |
| O361939         | O361990 | O361991 | O361992 | O361993 | O361994 | O361995 | O361999 |
| O368210         | O368211 | O368212 | O368213 | O368214 | O368215 | O368219 | O368220 |
| O368221         | O368222 | O368223 | O368224 | O368225 | O368229 | O368230 | O368231 |
| O368232         | O368233 | O368234 | O368235 | O368239 | O368290 | O368291 | O368292 |
| O368293         | O368294 | O368295 | O368299 | O4690   | O4691   | O4692   | O4693   |

FIUT (procedure code 36460) is reimbursed as a global fee and, therefore, includes all other services provided by the same physician, including umbilical blood sampling or cordocentesis (procedure code 59012).

Appeals for cordocentesis performed for a diagnosis other than the ones listed in the appropriate table in the policy will be reviewed on a case by case basis.

In addition to the physician performing the FIUT (procedure code 36460), another physician may assist with echography control.

Therapeutic amniocentesis (procedure code 59001) is restricted to the following diagnosis codes:

| Diagnosis Codes |         |         |         |         |         |         |         |
|-----------------|---------|---------|---------|---------|---------|---------|---------|
| O401XX0         | O401XX1 | O401XX2 | O401XX3 | O401XX4 | O401XX5 | O401XX9 | O402XX0 |
| O402XX1         | O402XX2 | O402XX3 | O402XX4 | O402XX5 | O402XX9 | O403XX0 | O403XX1 |
| O403XX2         | O403XX3 | O403XX4 | O403XX5 | O403XX9 | O409XX0 | O409XX1 | O409XX2 |
| O409XX3         | O409XX4 | O409XX5 | O409XX9 |         |         |         |         |

Transabdominal amniocentesis (procedure code 59070), fetal fluid drainage (e.g., vesicocentesis, thoracocentesis, paracentesis), including ultrasound guidance (procedure code 59074), and fetal shunt placement, including ultrasound guidance (procedure code 59076) are restricted to one of the following diagnosis codes:

| Diagnosis Codes |         |         |         |         |         |         |         |
|-----------------|---------|---------|---------|---------|---------|---------|---------|
| O360110         | O360111 | O360112 | O360113 | O360114 | O360115 | O360119 | O360120 |
| O360121         | O360122 | O360123 | O360124 | O360125 | O360129 | O360130 | O360131 |
| O360132         | O360133 | O360134 | O360135 | O360139 | O360190 | O360191 | O360192 |
| O360193         | O360194 | O360195 | O360199 | O360910 | O360911 | O360912 | O360913 |
| O360914         | O360915 | O360919 | O360920 | O360921 | O360922 | O360923 | O360924 |
| O360925         | O360929 | O360930 | O360931 | O360932 | O360933 | O360934 | O360935 |
| O360939         | O360990 | O360991 | O360992 | O360993 | O360994 | O360995 | O360999 |
| O361110         | O361111 | O361112 | O361113 | O361114 | O361115 | O361119 | O361120 |
| O361121         | O361122 | O361123 | O361124 | O361125 | O361129 | O361130 | O361131 |
| O361132         | O361133 | O361134 | O361135 | O361139 | O361190 | O361191 | O361192 |
| O361193         | O361194 | O361195 | O361199 | O361910 | O361911 | O361912 | O361913 |
| O361914         | O361915 | O361919 | O361920 | O361921 | O361922 | O361923 | O361924 |
| O361925         | O361929 | O361930 | O361931 | O361932 | O361933 | O361934 | O361935 |
| O361939         | O361990 | O361991 | O361992 | O361993 | O361994 | O361995 | O361999 |

#### 4.1.2 Vaginal and Cesarean Deliveries

The following procedure codes submitted with the appropriate modifier may be a benefit for vaginal or Cesarean deliveries:

| Procedure Codes                                      |       |       |       |       |       |       |       |        |  |
|------------------------------------------------------|-------|-------|-------|-------|-------|-------|-------|--------|--|
| 59409                                                | 59410 | 59514 | 59515 | 59612 | 59614 | 59620 | 59622 | S8415* |  |
| * Procedure code S8415 is for home delivery supplies |       |       |       |       |       |       |       |        |  |

One of the following modifiers must be billed with the procedure codes indicated above for vaginal and cesarean deliveries:

| Modifiers |                                               |
|-----------|-----------------------------------------------|
| U1        | Prior to 39 Weeks and Medically Necessary     |
| U2        | 39 Weeks or Later                             |
| U3        | Prior to 39 Weeks and Not Medically Necessary |

Claims will deny if submitted for a delivery prior to 39 weeks of gestation and not medically necessary, or for a delivery service with no modifier.

Claims will deny or recoupment will occur for associated claims for deliveries that are performed prior to 39 weeks and are determined to be not medically necessary including:

- Claims for the provider performing the vaginal or Cesarean delivery
- Inpatient and outpatient hospital claims inclusive of the delivery, planned Cesarean section, induction with vaginal delivery or failed induction with subsequent Cesarean section
- Birthing center claims inclusive of induction with vaginal delivery

- Claims for medical or surgical admission, including ICU, due to the complications of the delivery for the mother

Home deliveries must be billed with procedure code 59409 or 59410; including postpartum care.

Licensed midwives will not be reimbursed for home deliveries.

#### 4.1.2.1 Home Deliveries

Home deliveries and the home supplies for the delivery (S8415) require submitting a written prior authorization request during the client's third trimester of pregnancy. Home deliveries will not be prior authorized to a licensed midwife.

Documentation must include:

- A statement signed by a licensed physician who examined the client during the third trimester and determined at the time of examination the client is not at high risk for complications and is suitable for a home delivery
- A plan for access to emergency transport for mother and neonate, if needed

#### 4.1.3 Elective Deliveries Prior to 39 Weeks

Texas Medicaid restricts any Cesarean section, labor induction, or any delivery following labor induction to one of the following criteria:

- Gestational age of the fetus should be determined to be at least 39 weeks
- When the delivery occurs prior to 39 weeks, maternal and/or fetal conditions must dictate medical necessity for the delivery

**Note:** Records are subject to retrospective review. Payments made for Cesarean section, labor induction, or any delivery following labor induction that fail to meet these criteria (as determined by review of medical documentation), are subject to recoupment. Recoupment may apply to all services related to the delivery, including additional physician fees, birthing center, and inpatient and outpatient hospital fees.

#### 4.1.4 Other Vaginal and Cesarean Delivery Procedures

The following vaginal and Cesarean delivery procedures do not require vaginal and Cesarean delivery modifiers:

| Procedure Codes |       |
|-----------------|-------|
| 59414           | 59525 |

**Referto:** Subsection 4.1.8, "Obstetric Ultrasound" in this handbook for information about ultrasound limitations.

#### 4.1.5 Surgical Treatment of Early Intrauterine Failed Pregnancy

A provider must conduct an evaluation to make a definitive diagnosis of early intrauterine failed pregnancy; this may include a comprehensive medical history and examination, serum human chorionic gonadotropin (hCG) testing, other lab tests, and ultrasound examination.

The following procedure codes may be submitted for surgical management of early intrauterine failed pregnancy. The provider must choose the most appropriate code:

| Procedure Codes |       |       |
|-----------------|-------|-------|
| 59812           | 59820 | 59821 |

Performing providers must maintain appropriate documentation in the medical record of the client's early intrauterine failed pregnancy and the surgical treatment provided for the individual circumstances.

Surgical treatment of early intrauterine failed pregnancy (procedure codes 59812, 59820, and 59821) must include one of the following diagnosis codes as the reference or primary diagnosis on the claim. The provider must choose the most appropriate code:

| Diagnosis Codes |       |      |      |       |       |
|-----------------|-------|------|------|-------|-------|
| O021            | O0339 | O034 | O071 | O0730 | O0739 |

4.1.6 Abortion

The following procedure codes may be submitted for abortion services:

| Procedure Codes |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|
| 59830           | 59840 | 59841 | 59850 | 59851 | 59852 | 59855 | 59856 | 59857 |

Abortion services are benefits of Texas Medicaid if submitted with the following modifier:

| Modifier | Description                                                                                    |
|----------|------------------------------------------------------------------------------------------------|
| G7       | Pregnancy resulted from rape or incest or pregnancy certified by physician as life threatening |

In accordance with federal directives, abortions may be reimbursed when performed to save the life of the mother or for pregnancies resulting from rape or incest.

In accordance with federal law, providers are required to use specific language regarding the reason the mother’s condition is life-threatening. An abortion for a life-threatening condition must be due to a physical disorder, injury, or illness, including a life-endangering physical condition caused by or arising from the pregnancy itself that would place the woman in danger of death unless an abortion was performed.

Reimbursement of an abortion is based on the physician’s certification that the abortion was performed to save the life of the mother, to terminate pregnancy resulting from rape, or to terminate pregnancy resulting from incest.

One of the following statements, signed by the physician is mandatory for any abortion performed. Substitute wording will not be accepted. One of these statements must accompany any claim for abortion in order for reimbursement to be made:

- “I, (physician’s name), certify that on the basis of my professional judgment, an abortion procedure is necessary because (client’s full name, Medicaid number, and complete address) suffers from a physical disorder, injury, or illness, including a life-endangering physical condition caused by or arising from the pregnancy itself that would place her in danger of death unless an abortion is performed.”  
Signature
- “I, (physician’s name), certify that on the basis of my professional judgment, an abortion procedure for (client’s full name, Medicaid number, and complete address) is necessary to terminate a pregnancy that was the result of rape. I have counseled the client concerning the availability of health and social support services and the importance of reporting the rape to the appropriate law enforcement authorities.”  
Signature
- “I, (physician’s name), certify that on the basis of my professional judgment, an abortion procedure for (client’s full name Medicaid number, and complete address) is necessary to terminate a pregnancy that was the result of incest. I have counseled the client concerning the availability of health and social support services and the importance of reporting the incest to the appropriate law enforcement authorities.”

Signature

A stamped or typed physician signature on the original certification statement is not acceptable. The physician signature must be an original signature. A copy of the signed certification statement must be submitted with each claim for reimbursement. Faxes are not acceptable at this time. The physician must maintain the original certification statement in the client’s file.

Abortion services must be billed with modifier G7.

Performing physicians, facilities, anesthesiologists, and certified respiratory nurse anesthetist (CRNA) providers must submit modifier G7 with the appropriate procedure code when requesting reimbursement for abortion procedures that are within the scope of the rules and regulations of Texas Medicaid. Modifier G7 must be submitted with the procedure code that identifies abortion services.

**Important:** *To bill a Texas Medicaid client for a service that TMHP denies as not medically necessary, the billing provider must ensure that the client or client’s guardian has signed an acknowledgment statement. The statement must be obtained by a provider who has contact with the client.*

4.1.6.1 Services Related to Abortion Procedures

An anesthesia service that is provided for an abortion procedure may be reimbursed if the abortion procedure meets medical necessity criteria and complies with the Texas Medicaid guidelines in the section above.

All other services that are related to abortion services are also subject to medical necessity review. All services that are related to a non-covered abortion procedure will be denied or recouped.

4.1.7 Other Maternity Care and Delivery Services

The following procedure codes may be submitted for other maternity care and delivery services:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 59100           | 59160 | 59200 | 59300 | 59320 | 59325 | 59350 | 59412 | 59870 | 59871 |
| 59897           | 59898 | 59899 |       |       |       |       |       |       |       |

4.1.8 Obstetric Ultrasound

The following procedure codes may be submitted for obstetric ultrasound services:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 76801           | 76802 | 76805 | 76810 | 76811 | 76812 | 76813 | 76814 | 76815 | 76816 |
| 76817           |       |       |       |       |       |       |       |       |       |

Texas Medicaid requires providers to follow the documentation requirements as set forth in the Diagnostic Ultrasound section of the Current Procedural Terminology (CPT) manual for the diagnostic studies of the fetus, including when ultrasound is used to guide a procedure.

Documentation requirements set forth in the CPT manual include, but are not limited to:

- Permanently recorded images with measurements, when measurements are clinically indicated
- Final written report included in the client’s medical record (includes written interpretation)
- Report must include description of elements that comprised a “complete” or “limited” exam and the reasons an element could not be visualized
- Permanently recorded images are also required for ultrasound guidance procedures of the site to be localized. In addition, description of the localization process, either separately or within the report of the procedure when the guidance is utilized.

Permanently recorded images must be available on request by the Texas Health and Human Services Commission (HHSC).

Prior authorization is required for greater than three obstetrical ultrasounds per pregnancy. Requests for additional obstetric ultrasounds may be considered when submitted with documentation of medical necessity on the Obstetric Ultrasound Prior Authorization Request Form.

**Referto:** [Obstetric Ultrasound Prior Authorization Request Form](https://www.tmhp.com) on the TMHP website at [www.tmhp.com](https://www.tmhp.com).

Authorization is not required for obstetric ultrasounds performed in the emergency department, outpatient observation, or inpatient hospital setting.

Texas Medicaid follows the American Congress of Obstetricians and Gynecologists (ACOG) indications for sonography.

First trimester ultrasounds may be medically necessary for, but not limited to, the following conditions:

- Confirm the presence of an intrauterine pregnancy
- Evaluation of a suspected ectopic pregnancy
- Evaluation of vaginal bleeding
- Evaluation of pelvic pain
- Estimation of gestational age
- Diagnosis or evaluation of multiple gestations
- Confirmation of cardiac activity
- Adjunct to chorionic villus sampling or localization and removal of an intrauterine device
- Assessment of certain fetal anomalies, such as anencephaly, in clients at high risk
- Evaluation of maternal pelvic or adnexal masses or uterine abnormalities
- Screening for fetal aneuploidy
- Evaluation of suspected hydatidiform mole

Second- and third-trimester ultrasounds may be medically necessary for the following conditions:

- Estimation of fetal age
- Evaluation of fetal growth
- Evaluation of vaginal bleeding
- Evaluation of cervical insufficiency
- Evaluation of abdominal and pelvic pain
- Determination of fetal presentation
- Adjunct to amniocentesis or other procedure
- Evaluation of suspected multiple gestation
- Evaluation of a significant discrepancy between uterine size and clinical dates
- Evaluation of pelvic mass
- Evaluation of suspected hydatidiform mole
- Adjunct to cervical cerclage placement
- Evaluation of a suspected ectopic pregnancy

- Evaluation of suspected fetal death
- Evaluation of suspected uterine abnormality
- Evaluation for fetal well-being
- Evaluation of suspected amniotic fluid abnormalities
- Evaluation of suspected placental abruption
- Adjunct to external cephalic version
- Evaluation for premature rupture of membranes or premature labor
- Evaluation for abnormal biochemical markers
- Follow-up evaluation of a fetal anomaly
- Follow-up evaluation of placental location for suspected placenta previa
- Evaluation for clients with a history of previous congenital anomaly
- Evaluation of fetal condition in late registrants for prenatal care
- Assessment of findings that may increase the risk of aneuploidy
- Screening for fetal anomalies

A request for retroactive authorization must be submitted no later than 14 calendar days, beginning the day after the study is completed.

Requests for prior authorization or retroactive authorization may be submitted by mail or an approved electronic method.

The Obstetric Ultrasound Prior Authorization Request Form must be completed, signed, dated, and maintained in the client's medical record by the provider requesting the test. The form must include information related to medical necessity of the test including all of the following:

- Procedure requested (CPT code) and quantity requested
- The trimester(s) during which the requested ultrasounds will be performed
- The date range during which the procedure(s) will be performed
- Client's estimated date of confinement (EDC) at the time the request is submitted
- Diagnosis

Additional documentation to support medical necessity may include any of the following:

- Treatment history
- Treatment plan
- Medications
- Previous imaging results

The Obstetric Ultrasound Prior Authorization Request Form must be completed, signed, and dated by the ordering provider (physician, nurse practitioner/clinical nurse specialist, certified nurse midwife [CNM], or physician assistant) when requesting prior authorization for obstetric ultrasounds, regardless of the method of request for authorization.

Residents may order obstetric ultrasounds; however, the attending physician must sign the authorization form and provide the group or supervising provider's NPI

Providers may be requested to provide additional documentation.

Obstetric ultrasounds provided in the emergency department or outpatient observation must be submitted with Modifier U6 when submitted on the professional claim form in order to be considered for reimbursement.

Obstetric ultrasounds provided in the emergency department or hospital observation must be submitted with the appropriate corresponding emergency services or hospital observation revenue code in order to be considered for reimbursement.

**Note:** Any obstetric ultrasound performed in the emergency department or hospital observation will not count toward the limit of three per pregnancy.

Any obstetric ultrasound claims submitted with or without prior authorization for the initial three will count toward the limit of three per pregnancy.

For transvaginal obstetric ultrasound performed in addition to one of the transabdominal examinations, documentation is required to substantiate the need to perform both tests on the same day.

Reimbursement for obstetric ultrasounds may be considered on appeal when submitted with documentation of any one of the following:

- Ultrasound was performed for a different pregnancy
- The provider was unable to obtain the previous ultrasound records from a different provider
- The provider was new to treating the client and was not aware the client had received three obstetric ultrasounds

Only one appeal will be considered per client for the same provider. Providers must obtain prior authorization for additional obstetric ultrasounds performed after the appealed service.

Add-on procedure codes (76802, 76810, 76812, and 76814) when billed with the primary procedure code for obstetric ultrasounds do not count toward the limit of three per pregnancy.

Claims for add-on codes for multiple fetuses should be billed with Modifier 76 if greater than one additional fetus. Claims for multiple fetuses greater than two will be considered on appeal with documentation indicating number of fetuses.

Three dimensional (3-D) rendering of obstetric ultrasound (procedure code 76376 or 76377) is not a benefit of Texas Medicaid.

Procedure code 76810 must be billed in conjunction with primary procedure code 76805, by the same provider.

Procedure code 76812 must be billed in conjunction with primary procedure code 76811, by the same provider.

Procedure code 76814 must be billed in conjunction with primary procedure code 76813, by the same provider.

4.1.9 Diagnostic Ultrasound and Ultrasonic Guidance

The following procedure codes may be submitted for diagnostic ultrasound and ultrasonic guidance services:

| Procedure Codes |       |       |       |
|-----------------|-------|-------|-------|
| 76818           | 76819 | 76941 | 76946 |

Ultrasonic guidance (procedure code 76941) is restricted to the diagnoses listed in the following table:

| Diagnosis Codes |         |         |         |         |         |         |         |
|-----------------|---------|---------|---------|---------|---------|---------|---------|
| O353XX0         | O353XX1 | O353XX2 | O353XX3 | O353XX4 | O353XX5 | O353XX9 | O358XX0 |

| Diagnosis Codes |         |         |         |         |         |         |         |
|-----------------|---------|---------|---------|---------|---------|---------|---------|
| O360110         | O360111 | O360112 | O360113 | O360114 | O360115 | O360119 | O360120 |
| O360121         | O360122 | O360123 | O360124 | O360125 | O360129 | O360130 | O360131 |
| O360132         | O360133 | O360134 | O360135 | O360139 | O360190 | O360191 | O360192 |
| O360193         | O360194 | O360195 | O360199 | O360910 | O360911 | O360912 | O360913 |
| O360914         | O360915 | O360919 | O360920 | O360921 | O360922 | O360923 | O360924 |
| O360925         | O360929 | O360930 | O360931 | O360932 | O360933 | O360934 | O360935 |
| O360939         | O360990 | O360991 | O360992 | O360993 | O360994 | O360995 | O360999 |
| O361110         | O361111 | O361112 | O361113 | O361114 | O361115 | O361119 | O361120 |
| O361121         | O361122 | O361123 | O361124 | O361125 | O361129 | O361130 | O361131 |
| O361132         | O361133 | O361134 | O361135 | O361139 | O361190 | O361191 | O361192 |
| O361193         | O361194 | O361195 | O361199 | O361910 | O361911 | O361912 | O361913 |
| O361914         | O361915 | O361919 | O361920 | O361921 | O361922 | O361923 | O361924 |
| O361925         | O361929 | O361930 | O361931 | O361932 | O361933 | O361934 | O361935 |
| O361939         | O361990 | O361991 | O361992 | O361993 | O361994 | O361995 | O361999 |
| O368210         | O368211 | O368212 | O368213 | O368214 | O368215 | O368219 | O368220 |
| O368221         | O368222 | O368223 | O368224 | O368225 | O368229 | O368230 | O368231 |
| O368232         | O368233 | O368234 | O368235 | O368239 | O368290 | O368291 | O368292 |
| O368293         | O368294 | O368295 | O368299 | O4690   | O4691   | O4692   | O4693   |

Ultrasonic guidance for intrauterine fetal transfusion (procedure code 76941) will be reimbursed separately when billed by a different physician.

Fetal biophysical profile (procedure code 76818 or 76819), when billed with 76805, 76810, 76811, 76812, 76813, 76814, 76815, or 76816, will be reimbursed separately.

#### 4.1.10 Doppler Studies

The following procedure codes may be submitted for doppler study services:

| Procedure Codes |       |
|-----------------|-------|
| 76820           | 76821 |

As supported by ACOG, umbilical artery doppler (procedure code 76820) is limited to suspected intra-uterine growth restriction (IUGR), post-term gestation, diabetes mellitus, systemic lupus erythematosus, or antiphospholipid antibody syndrome.

Middle cerebral artery doppler (procedure code 76821) is indicated, but not limited to fetuses who are alloimmunized.

#### 4.1.11 Echocardiography

The following procedure codes may be submitted for echocardiography services:

| Procedure Codes |       |       |       |
|-----------------|-------|-------|-------|
| 76825           | 76826 | 76827 | 76828 |

Fetal echocardiography (procedure codes 76825, 76826, 76827, and 76828) may be reimbursed for the following factors/syndromes:

- Fetal Risk Factors

- Extracardiac anomalies
  - Chromosomal
  - Anatomic
- Fetal cardiac dysrhythmia
  - Irregular rhythm
  - Tachycardia
  - Bradycardia
- Nonimmune hydrops fetalis
- Suspected cardiac anomaly on ultrasound
- Abnormal fetal situs
- Maternal Risk Factors
  - Congenital heart disease
  - Cardiac teratogen exposure
    - Lithium
    - Alcohol
    - Phenytoin
    - Trimethadione
    - Isoretinoin
  - Maternal Metabolic Disorders
    - Diabetes mellitus
    - Phenylketonuria
- Familial Risk Factors for congenital heart disease
  - Previous sibling
  - Paternal
- Syndromes
  - Marfan’s
  - Noonan’s
  - Tuberous sclerosis

**4.1.12 Fetal Surgery**

The following procedure codes may be submitted for fetal surgery:

| Procedure Codes |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|
| 59072           | S2401 | S2402 | S2403 | S2405 | S2409 | S2411 |

Fetal surgery procedures require prior authorization.

Prior authorization requests must be submitted on a Special Medical Prior Authorization (SMPA) Request Form to the SMPA department.

**Referto:** [Special Medical Prior Authorization \(SMPA\) Request Form](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Procedure codes S2401, S2402, S2403, S2405 and S2409 may be authorized for Texas Medicaid only when the hospital is a member of the North American Fetal Therapy Network (NAFTNet).

The pediatric surgeon for procedure codes S2401, S2402, S2403, S2405, or S2409 must submit documentation which includes:

- A clear description of the fetal malformation(s). The malformation(s) must interfere with the in utero organ development and fetal survival and have potential fatal consequences before or after birth
- Evidence that in utero correction of the fetal congenital malformation(s) results in a clinical outcome that is better than that which would be seen in expectant management

**Note:** *Services and procedures that are investigational or experimental are not a benefit of Texas Medicaid.*

Umbilical cord occlusion (procedure code 59072) may be considered when all the following is documented:

- Diagnosis of monoamniotic-monochorionic twins is present
- Spontaneous fetal death of one of the twins with the presence of hydrops
- The ratio of the acardia twin weight to the pump twin weight is greater than 50 percent
- The abdominal circumference of the twin with reversed arterial perfusion fetus is greater than or equal to the abdominal circumference of the pump twin

**Note:** *Elective abortions are not benefits of Texas Medicaid*

Fetoscopic laser therapy for treatment of twin-to-twin transfusion syndrome (procedure code S2411) may be considered when all the following are documented:

- Fetal gestational age of less than 26 weeks
- Evidence of polyhydramnios in the recipient fetus
- Donor fetus is oligohydramniotic
- Evidence of abnormal blood flow documented by Doppler studies in one or both fetuses

**4.1.13 Antenatal and Postnatal Care Visits**

The following procedure codes may be submitted for antenatal and postnatal care visits:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 59430           | 99202 | 99203 | 99204 | 99205 | 99211 | 99212 | 99213 | 99214 | 99215 |
| 99341           | 99342 | 99344 | 99345 | 99347 | 99348 | 99349 | 99350 |       |       |

Texas Medicaid reimburses prenatal care, deliveries, and postpartum care as individual procedures.

Prenatal and postpartum care visits billed in an inpatient hospital (place of service 3), will be denied as part of another procedure when billed within the three days before delivery or the six weeks after delivery. The inpatient intrapartum and postpartum care are included in the fee for the delivery or Cesarean section and should not be billed separately.

Physicians (obstetricians, family practice physicians, and maternal-fetal medicine specialists), CNMs, and maternity service clinics (MSCs) are limited to 20 prenatal care visits per pregnancy and one postpartum care visit after discharge from the hospital.

Licensed midwives (LMs) are limited to 20 outpatient antepartum care visits per pregnancy to be performed in a birthing center; postpartum visits are not separately reimbursed. Routine pregnancies are anticipated to require around 11 visits per pregnancy and high-risk pregnancies are anticipated to require around 20 visits per pregnancy. More frequent visits may be necessary for high-risk pregnancies. High-risk obstetrical visits are not limited to 20 visits per pregnancy. The provider can appeal with documentation supporting a complication of pregnancy. Documentation reflecting the need for increased visits must be maintained in the physician's files and is subject to retrospective review.

Providers must bill the most appropriate new or established patient prenatal or postnatal visit procedure code. New patient codes may be used when the client has not received any professional services from the same physician, or another physician of the same specialty who belongs to the same group, within the past three years (36 months).

New patient and established patient evaluation and management services for antenatal and postnatal visits (procedure codes 99202, 99203, 99204, 99205, 99211, 99212, 99213, 99214, and 99215) may be provided via a telemedicine service delivered using synchronous audiovisual technology if clinically appropriate and safe, as determined by the provider, and agreed to by the person receiving services. Whenever possible, HHSC encourages face-to-face interaction, such as an in-person visit.

New and established patient evaluation and management services delivered using synchronous audiovisual technology must be billed using modifier 95.

**Referto:** *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* and the *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* restrictions for services delivered using synchronous audiovisual technology.

During a Declaration of State of Disaster, HHSC may issue direction to providers regarding the use of a telemedicine or telehealth services to include the use of a synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein. A Declaration of State of Disaster is when an executive order or proclamation by the governor declaring a state of disaster in accordance with Section 418.014 of the Texas Government Code.

**Referto:** Subsection 9.2.60.1.1, "New and Established Patient Services" in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for information about established patient E/M services.

When billing for prenatal services, use modifier TH with the appropriate E/M procedure code to the highest level of specificity.

**Note:** *Failure to use the TH modifier may result in recoupment of payment rendered.*

LMs are not reimbursed for postpartum visits.

One postpartum care procedure code may be reimbursed per pregnancy. The claim for the postpartum visit may be submitted with either procedure code 59430 or with a delivery procedure code (59410, 59515, 59614, or 59622) that includes postpartum care. The reimbursement amount for the submitted procedure code covers all postpartum care per pregnancy regardless of the number of postpartum visits provided.

Postpartum depression screening is a benefit at the infant's Texas Health Steps medical checkup or follow-up visit, as a separately reimbursed service in the 12 months following the infant's birth.

**Referto:** Section 4.3.12.1.4, "Postpartum Depression Screening" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* for more information regarding postpartum depression screening for mothers during the infant's Texas Health Steps medical checkup or follow-up visit.

Any other E/M office visit will not be reimbursed when billed on the same date of service, by the same provider, as any antenatal or postpartum office visit. Modifier 25 may be used to identify a significant separately identifiable E/M service by the same physician on the same date of service as the procedure

or other service. Documentation that supports the provision of a significant, separately identifiable E/M service must be maintained in the client’s medical record and made available to Texas Medicaid upon request.

**Note:** All unlisted surgical procedure codes have a 42 global period assigned by Texas Medicaid.

**4.1.13.1 Maternity Service Clinic (MSC)**

MSCs are limited provider clinics, unrelated to a hospital, that only provide maternity services. An MSC will be reimbursed for antepartum and/or postpartum care visits only. Hemoglobin, hematocrit, and urinalysis procedures are included in the charge for antepartum care and not separately reimbursed. Services other than antepartum and postpartum care visits will be denied.

**4.1.14 Birthing Centers—Professional Services**

The following procedures may be performed by professionals in the birthing center setting:

| Procedure Codes                              |          |       |       |       |
|----------------------------------------------|----------|-------|-------|-------|
| 59409                                        | 59410*** | 99221 | 99222 | 99223 |
| ***Licensed Midwives may not use code 59410. |          |       |       |       |

The following table includes procedure codes that may be benefits for licensed midwife (LM) services rendered in the birthing center setting:

| Procedure Codes |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|
| 59409           | 99202 | 99211 | 99212 | 99221 | 99222 | 99223 |

**Note:** Licensed Midwives may not use code 59410.

Antenatal services provided by LMs may be a benefit when billed with modifier TH. If the client is discharged prior to delivery, procedure codes 99221, 99222, or 99223 may be billed by the professional for labor services only. Clinical documentation that clearly demonstrates level of medical decision making (i.e., moderate or complex) must be included in the client’s medical record. All medical documentation is subject to retrospective review. Those services not supported by the documentation in the client’s medical record are subject to recoupment.

**Referto:** Subsection 9.2.47, “Newborn Services” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook* (Vol. 2, *Provider Handbooks*) for more information related to the care of the newborn.

**4.1.15 Birthing Centers—Facility Services**

The following procedures may be performed by birthing center facilities:

| Procedure Codes |       |
|-----------------|-------|
| 59409           | S4005 |

Deliveries at a facility licensed as a birthing center by the Department of State Health Services (DSHS) must be billed with procedure code 59409.

If the client is discharged prior to delivery, procedure code S4005 may be billed by the facility for labor services only.

**4.1.16 Smoking and Tobacco Use Cessation Counseling**

Counseling for cessation of the habit of using tobacco products by pregnant women is a benefit of Texas Medicaid.

The following procedure codes listed may be billed for smoking and tobacco use cessation counseling using an applicable diagnosis code:

| Procedure Codes |       |
|-----------------|-------|
| 99406           | 99407 |

One of the following diagnosis codes must be submitted for tobacco use cessation with the appropriate procedure code:

| Diagnosis Codes |        |        |        |        |        |
|-----------------|--------|--------|--------|--------|--------|
| O99330          | O99331 | O99332 | O99333 | O99334 | O99335 |

**Referto:** Subsection 9.2.60.4.3, “Smoking and Tobacco Use Cessation Counseling” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)* for additional information related to smoking and tobacco use cessation counseling and additional covered diagnoses.

Procedure codes 99406 and 99407 are limited to once per day, same or different procedure code, any provider.

Smoking and tobacco use cessation counseling delivered by group modality are limited to a maximum of 8 individuals and must be billed with modifier HQ.

Procedure codes 99406 and 99407 may be billed in any combination, individual or group, by the same or different provider, and are limited to eight services per rolling year. Additional services require documentation of medical necessity to exceed the established limit.

**4.1.17 Zika Virus Testing**

**Referto:** Subsection 2.2.11.1, “Zika Virus Testing” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)* for information about Zika virus testing.

**5 Noninvasive Prenatal Screening (NIPS)**

Noninvasive prenatal screening (NIPS) is a benefit of Texas Medicaid when medically necessary for the advanced screening of fetal chromosomal abnormalities in pregnant women who meet specific screening criteria. Genetic screening results, when informative, may influence clinical management decisions.

NIPS may be performed as early as ten weeks gestation for specific fetal aneuploidy screening, restricted to Trisomy 13, Trisomy 18, Trisomy 21, and fetal sex chromosome aneuploidy (SCA). To determine NIPS appropriateness, a baseline ultrasound, if not previously performed, is strongly recommended to confirm viability, the number of fetuses, and gestational dating.

If NIPS provides an abnormal screening result, invasive prenatal confirmatory diagnostic testing is strongly encouraged due to the potential risk of a false-positive result from NIPS. Confirmatory diagnostic tests include chorionic villus sampling (CVS) or amniocentesis.

It is recommended that clients who receive an indeterminate result be offered further genetic counseling, comprehensive evaluation with ultrasound, and diagnostic testing due to the increased risk of aneuploidy. Higher body mass index (BMI) may affect NIPS results. Clients weighing more than 250 pounds are at risk of having an inconclusive result from NIPS.

NIPS does not assess the risk for fetal anomalies such as neural tube defects or ventral wall defects. Ultra-sound evaluation and maternal serum alpha-fetoprotein screening should be offered for these risk assessments.

If a fetal structural anomaly (e.g., hydrops, cystic hygroma, cardiac malformations, abdominal wall defects, or skeletal abnormalities) is identified upon ultrasound examination, it is recommended that diagnostic testing be offered rather than NIPS.

NIPS is a benefit for a confirmed intrauterine singleton pregnancy when serum analyte testing with any of the following screening tests were previously elected for the current pregnancy instead of NIPS, the results indicate an increased risk of Trisomy 13, Trisomy 18, or Trisomy 21, and the client wishes to postpone invasive diagnostic testing:

- First trimester screen
- Sequential screen
- Integrated screen
- Quadruple screen

NIPS must be ordered by the medical provider rendering direct care to the client. The provider must order the most appropriate screening based on the client's medical history and the results of previous screenings, if available. The provider must clarify for the client the option to decline, and the provider must document that the option to decline was clearly provided in the client's medical record.

**Note:** Some noninvasive prenatal screenings include an extended panel that screens for microdeletions and additional trisomies, such as T16 and T22. However, this use has not been validated, and the “opt-out” box on the requisition form should be checked.

## 5.1 Screening for Fetal Sex Chromosome Aneuploidy

In addition to trisomy (e.g., T13, T18, T21), NIPS may also screen for fetal SCA (e.g., 45, X; 47, XXX; 47, XXY; 47, XYY).

**Note:** Currently, clinical evidence is unclear for concluding the net health benefits when using cell-free fetal DNA to screen for fetal sex chromosome aneuploidy (SCA). The potential benefit of early detection for management must be balanced against potential harms, stigmatization, and distorted perceptions of the child.

Sex chromosome aneuploidy of maternal origin should be considered when NIPS results suggest fetal sex chromosome aneuploidy (e.g., 45, X; 47, XXX; 47, XXY; 47, XYY). Other considerations include the risk for incidental findings with NIPS. Appropriate client counseling is encouraged.

### 5.1.1 Screening Criteria

NIPS is a benefit for clients with a confirmed intrauterine singleton pregnancy dated at least ten weeks gestation.

## 5.2 Genetic Counseling Requirement

Genetic counseling must be provided by a trained genetic counselor, nurse specialist in genetics, maternal-fetal medicine specialist, or other medical provider (e.g., obstetrician) possessing expertise in genetic counseling. Genetic counseling must provide the depth of content and time for the client to make an informed decision.

The client must be provided with information about the purpose and nature of the screenings. Documentation in the medical record must reflect that the client has been given information on the benefits, risks, and limitations of advanced screening; as well as the nature, inheritance, and implications of genetic disorders. Documentation requirements include all of the following:

- Genetic counseling includes all of the following:
  - The date(s) that formal genetic counseling was provided, with the name and qualifications of the counseling professional

- The explanation of risks, benefits, and limitations that was discussed with the client
- The client's ability to understand the risks, benefits, and limitations and the client's informed choice to proceed with NIPS as evidenced by the client's signature on a consent form specific to the NIPS to be performed
- The client's other prenatal radiological or lab results, if available, to support medical necessity of NIPS
- The client's NIPS results
- The clear, non-directive explanation provided to the client concerning the findings and implications of the NIPS results
- The client's ability to understand the results and explanation provided

The genetic counseling must be nondirective. The purpose of the provider's information is not to direct the client, but to allow the client to make informed medical and personal decisions.

Clients should be informed that a negative NIPS result does not ensure an unaffected pregnancy.

### 5.3 Prior Authorization

Prior authorization is not required for NIPS procedure codes 81420 and 81507.

A no-call or inconclusive result is possible and further diagnostic testing is strongly recommended in these cases.

NIPS procedure codes 81420 and 81507 are limited to once per pregnancy. Additional tests will not be reimbursed.

***Note:** Providers may appeal denied claims with documentation of a new pregnancy.*

#### 5.3.1 Additional Documentation Requirements

In addition to the documentation of genetic counseling, and the option to decline NIPS provided to the client, the following NIPS documentation must also be maintained in the client's medical record and is subject to retrospective review:

- The appropriateness and benefit of NIPS specific to the client

### 5.4 NIPS Limitations

Procedure codes 81507 and 81420 are restricted to female clients only who are 10 through 55 years of age. Procedure code 81420 will be denied when billed during the same pregnancy as procedure code 81507, by any provider. Claims that have been paid for procedure code 81420 are subject to recoupment if procedure code 81507 is submitted later for the same pregnancy.

### 5.5 Non-Covered Services

The following NIPS services are not a benefit of Texas Medicaid:

- NIPS as part of a routine prenatal laboratory assessment
- NIPS if performed without informed patient choice and genetic counseling from a qualified professional
- NIPS for women who do not meet the criteria outlined above
- NIPS for women with multiple gestations (e.g., twins, triplets, etc.)
- NIPS for screening of chromosomal microdeletion syndromes
- NIPS for screening of trisomy other than T13, T18, or T21

- NIPS for sex determination, paternity determination, or non-medical reasons
- NIPS is not reimbursed with procedure code 81599

## 6 Gynecological Health Services

### 6.1 Services, Benefits, Limitations, and Prior Authorization

Gynecological examinations, surgical procedures, and treatments are benefits of Texas Medicaid.

The following gynecological procedures and services may be benefits of Texas Medicaid:

- Gynecological and family planning examinations
- Contraceptives
- Diagnostic tests
- Surgical procedures
- Gynecological treatments

**Referto:** Section 2, “Medicaid Title XIX Family Planning Services” in this handbook for information about contraception, sterilizations, and family planning annual examinations.

### 6.2 Surgical and Laparoscopic Treatment of Ectopic Pregnancy

Surgical and laparoscopic treatment of ectopic pregnancy (procedure codes 59120, 59121, 59130, 59136, 59140, 59150, and 59151) is a benefit of Texas Medicaid.

### 6.3 Laparoscopic Procedures

Laparoscopic procedures (procedure codes 58545, 58546, 58578, and 58674) are a benefit of Texas Medicaid.

### 6.4 Endometrial Cryoablation

Endometrial cryoablation (procedure codes 58353 and 58356) is a benefit of Texas Medicaid.

### 6.5 Uterine Suspension

Uterine suspension (procedure codes 58400 and 58410) is a benefit of Texas Medicaid.

### 6.6 Vulvectomy

Vulvectomy (procedure code 56620) is a benefit of Texas Medicaid.

#### 6.6.1 Prior Authorization for Vulvectomy

Prior Authorization is required for vulvectomy.

The prior authorization request must include documentation of one of the following conditions:

- Vulvar intraepithelial neoplasia (VIN)
- Labial enlargement that results in abrasion, irritation, or intractable skin infection

**Note:** A vulvectomy will not be considered for cosmetic reasons.

### 6.7 Salpingostomy

Salpingostomy (procedure codes 58673 and 58770) is a benefit of Texas Medicaid.

### 6.7.1 Prior Authorization for Salpingostomy

Prior authorization is required for salpingostomy.

The prior authorization request must include documentation of one or more of the following conditions:

- Ectopic pregnancy
- Hydrosalpinx unrelated to infertility
- Salpingitis unrelated to infertility
- Torsion of the fallopian tube
- Abscess of the fallopian tube
- Peritubal adhesions unrelated to infertility
- Cyst or tumor of the fallopian tube unrelated to infertility
- Hematosalpinx

## 6.8 Ovarian Wedge Resection

Ovarian wedge resection (procedure code 58920) is a benefit of Texas Medicaid.

### 6.8.1 Prior Authorization for Ovarian Wedge Resection

Prior Authorization is required for ovarian wedge resection.

The prior authorization request must include documentation of polycystic ovarian syndrome (PCOS).

***Note:** Ovarian wedge resection will not be considered to improve chances of conceiving if the PCOS lead to infertility.*

## 6.9 Assays for the Diagnosis of Vaginitis

Vaginitis assay procedure codes 87478, 87480, 87484, 87510, 87660, 87661, 87797, 87798, and 87800 are benefits of Texas Medicaid.

Providers are reminded to code to the highest level of specificity with a diagnosis to support medical necessity when submitting procedure code 87797.

Claims may be subject to retrospective review if they are submitted with diagnosis codes that do not support medical necessity.

If a positive test result was not treated, documentation must be present indicating why treatment was not rendered.

## 6.10 Hysteroscopy

Hysteroscopy (procedure codes 58555, 58558, 58559, 58560, 58561, 58562, 58563, and 58579) is a benefit of Texas Medicaid.

## 6.11 Examination Under Anesthesia

Pelvic examination under anesthesia (procedure code 57410) is considered part of another gynecological surgery performed the same day.

If the examination is performed as an independent procedure or at the time of a nongynecological surgery, the procedure may be reimbursed.

### 6.12 Laminaria Insertion

Insertion of a laminaria or dilateria (procedure code 59200) is a benefit of Texas Medicaid.

### 6.13 Hysterectomy Services

Texas Medicaid reimburses hysterectomies when they are medically necessary. Texas Medicaid does not reimburse hysterectomies performed for the sole purpose of sterilization.

Providers can use any of the following procedure codes to submit claims for hysterectomy procedures:

| Procedure Codes                                                                                                                                                               |       |       |       |       |       |       |       |       |       |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 51925                                                                                                                                                                         | 58150 | 58152 | 58180 | 58200 | 58210 | 58240 | 58260 | 58262 | 58263 |
| 58267                                                                                                                                                                         | 58270 | 58275 | 58280 | 58285 | 58290 | 58291 | 58292 | 58294 | 58541 |
| 58542                                                                                                                                                                         | 58543 | 58544 | 58548 | 58550 | 58552 | 58553 | 58554 | 58570 | 58571 |
| 58572                                                                                                                                                                         | 58573 | 58575 | 59525 |       |       |       |       |       |       |
| Providers can refer to the Texas Medicaid fee schedules on the TMHP website at <a href="http://www.tmhp.com">www.tmhp.com</a> for components and fees that may be reimbursed. |       |       |       |       |       |       |       |       |       |

#### 6.13.1 Hysterectomy Acknowledgment

Hysterectomy services are considered for reimbursement when a signed Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form is faxed to TMHP, the claim is filed with a signed Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form, or documentation supporting that the Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form could not be obtained or was not necessary.

All Texas Medicaid clients (including those in a STAR or STAR+PLUS Program health plan) receiving hysterectomy services must sign a Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form. The acknowledgment must be submitted to TMHP with the claim or to the client's health plan.

The Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form must be signed and dated by the client. The statement must indicate that the client was informed both orally and in writing before the surgery that the hysterectomy would leave her permanently incapable of bearing children.

**Note:** A client representative's signature will be required for mentally incompetent clients.

The client's eligibility file is updated upon receipt of the signed Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form. Claims for services related to the hysterectomy cannot be reimbursed unless the signed Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form is on file; therefore to avoid claim denials, each individual provider involved in the hysterectomy procedure is encouraged to submit a copy of the valid Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form rather than relying on another provider to do so.

The provider is responsible for maintaining the original, signed copy of the Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form in the client's medical record when a claim is submitted for consideration of payment. These records are subject to retrospective review.

When a hysterectomy, whether abdominal or vaginal, is performed without a client's acknowledgement form:

- The hysterectomy procedure code is denied.
- The other surgical procedures are evaluated for their clinical relevance.
- Multiple procedures are processed according to the multiple surgery guidelines.

A Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form is not required if the performing physician certifies that at least one of the following circumstances existed before the surgery:

- The patient was already sterile before the hysterectomy, and the cause of the sterility is stated (e.g., congenital disorder, sterilized previously, or postmenopausal). Providers must use a post menopause or sterilization diagnosis code on the claim form. If the provider submits a claim and does not attach the acknowledgment, the provider must maintain the signed statement in the client's records, and the physician's signature will not be required on the claim form. These records are subject to retrospective review.
- The patient requires a hysterectomy on an emergency basis because of a life-threatening situation. The physician must state the nature of the emergency and certify that it was determined that prior acknowledgment was not possible. Because the acknowledgment may be signed the day of or an hour before surgery, an emergency situation requires that the patient be unconscious or under sedation and unable to sign the acknowledgment.

Although the Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form is not required if the criteria previously listed are met, the performing physician must certify that one or more of the circumstances existed prior to the surgery. This certification may be submitted before the claim is submitted or attached to the claim and signed by the performing provider.

**Referto:** Title 42 of CFR 441.255 and 25 TAC Part 1, Chapter 29, Subchapter F, section 25.501 for more information.

**Referto:** [Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

For clients with retroactive Medicaid coverage, one of the following must be submitted with the Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form:

- A copy of the client's Your Texas Benefits Medicaid card, which covers the date of the hysterectomy.
- A copy of the retroactive approval notice for Medicaid coverage.

### Faxing Forms

All Medicaid providers may fax the Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form to 1-512-514-4218. The form must include the client's Texas Medicaid number. All consent forms should be faxed with a cover sheet that identifies the provider and includes the telephone number and address. If the fax is incomplete or the consent form is invalid, the form is returned by mail or fax for correction. Completed consent forms that are faxed for adjustments or appeals are validated in the TMHP system. However, claims associated with the consent forms must be appealed through the mail to Appeals/Adjustments at the following address:

Texas Medicaid & Healthcare Partnership  
Attn: Appeals/Adjustments  
PO Box 200645  
Austin, TX 78720-0645

## 6.14 Pap Smear (Cytopathology Studies)

Pap smears are benefits of Texas Medicaid for early detection of cancer. Family planning clients are eligible for annual Pap smears. Procurement and handling of the Pap smear are considered part of the E/M of the client and are not reimbursed separately.

The following procedure codes are reimbursed only to pathologists and CLIA-certified laboratories (whose directors providing technical supervision of cytopathology services are pathologists):

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 88142           | 88143 | 88147 | 88148 | 88150 | 88152 | 88153 | 88155 | 88164 | 88165 |
| 88166           | 88167 | 88174 | 88175 |       |       |       |       |       |       |

These procedure codes must be billed with the place of service where the Pap smear is interpreted.

Procedure code 88141 is reimbursed in addition to and when billed with the cytopathology procedure codes in the table above.

Procedure code 88155 will only be reimbursed when billed in conjunction with one of the following procedure codes on the same date of service by the same provider:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 88142           | 88143 | 88147 | 88148 | 88150 | 88152 | 88153 | 88164 | 88165 | 88166 |
| 88167           | 88174 | 88175 |       |       |       |       |       |       |       |

**Note:** *Pap smear procedures will not be reimbursed separately to either the physician or a laboratory when billed on the same day as a THSteps medical check-up visit.*

### 6.15 Clitoroplasty and Vaginoplasty

Clitoroplasty and vaginoplasty are performed for clients who possess ovaries and are female by genetic sex, but the external genitalia are not those of a normal female. Surgical correction of abnormalities of the external genitalia is the only indicated treatment for this disorder. Clitoroplasty and vaginoplasty procedure codes 56805 and 57335 may be considered for reimbursement for female clients who are 20 years of age and younger when submitted for reimbursement with one of the following diagnosis codes:

| Diagnosis Codes |       |      |      |      |       |       |       |
|-----------------|-------|------|------|------|-------|-------|-------|
| E250            | E258  | E259 | E271 | E272 | E2740 | E2749 | E3450 |
| E3451           | E3452 | Q560 | Q561 | Q562 | Q563  | Q564  |       |

### 6.16 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including gynecological services.

Gynecological health services are subject to retrospective review and recoupment if documentation does not support the service billed.

### 6.17 Claims Filing and Reimbursement

Gynecological services must be submitted to TMHP in an approved electronic format or on the CMS-1500 claim form. Providers may purchase CMS-1500 claim forms from the vendor of their choice. TMHP does not supply the forms. When completing a CMS-1500 claim form, all required information must be included on the claim, as TMHP does not key any information from claim attachments. Super-bills, or itemized statements, are not accepted as claim supplements.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

Subsection 6.1, “Claims Information” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in the *Section 6: Claims Filing* (*Vol. 2, Provider Handbooks*).

Texas Medicaid rates for physicians and other practitioners are calculated in accordance with TAC §355.8085. Providers can refer to the [Online Fee Lookup \(OFL\)](#) or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

**Referto:** Subsection 2.2.1.1, “Non-emergent and Non-urgent Evaluation and Management (E/M) Emergency Department Visits” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*).

Section 104 of the *Tax Equity and Fiscal Responsibility Act* (TEFRA) of 1982 requires that Medicare and Medicaid limit reimbursement for those physician services furnished in outpatient hospital settings (e.g., clinics and emergency situations) that are ordinarily furnished in physician offices.

### 6.17.1 NCCI and MUE Guidelines

The HCPCS and CPT codes included in the *Texas Medicaid Provider Procedures Manual* are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manual. Providers should refer to the [CMS NCCI web page](#) or correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

## 6.18 National Drug Code

**Referto:** Subsection 6.3.4, “National Drug Code (NDC)” in “Section 6: Claims Filing” (*Vol. 1, General Information*).

## 7 Claims Resources

| Resource                                      | Location                                                                                                                                                     |

## 1 Provider Enrollment for HHSC Family Planning Program Contractors

Agencies that submit claims for HHSC Family Planning Program Services must have a contract with HHSC. The HHSC Family Planning Program determines client eligibility and benefits. Refer to the HHSC Family Planning Program Policy Manual for specific eligibility, services, and policy information at [www.hhs.texas.gov/laws-regulations/handbooks/fpp/family-planning-program-policy-manual](http://www.hhs.texas.gov/laws-regulations/handbooks/fpp/family-planning-program-policy-manual).

**Referto:** “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information about enrollment procedures.

Subsection 2.1, “Title XIX Provider Enrollment” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)*.

Subsection 1.1, “Family Planning Overview” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)* for more information about family planning funding sources, guidelines for family planning providers, and family planning services for undocumented aliens and legalized aliens.

## 2 Services, Benefits, Limitations, and Prior Authorization

This section contains information about family planning services funded through the HHSC Family Planning Program funding source, including:

- Health history and physical.
- Counseling and education.
- Laboratory testing.
- Provision of a contraceptive method.
- Pregnancy tests.
- Postpartum depression screenings and treatment.
- Uncomplicated diabetes screenings and treatment.
- Uncomplicated hypertension screenings and treatment.
- Elevated cholesterol screenings and treatment.
- Sexually transmitted infection screenings and treatment.
- Referrals for additional services, as needed.
- Immunizations.
- Breast and cervical cancer screening and diagnostic services.
- Prenatal services.
- Other services subject to available funding.

Providers are encouraged to include the appropriate diagnosis codes on the claim in conjunction with all family planning procedures and services.

**Referto:** The [HHSC Family Planning Program Policy Manual](#).

The choice of diagnosis code must be based on the type of family planning service performed.

## 2.1 Family Planning Annual Exams

An annual family planning exam consists of a comprehensive health history and physical examination, including medical laboratory evaluations as indicated, an assessment of the client's problems and needs, and the implementation of an appropriate contraceptive management plan.

HHSC family planning program providers must bill the most appropriate evaluation and management (E/M) with modifier FP visit procedure code for the complexity of the annual family planning examination provided. To bill an annual family planning examination, providers must include the appropriate E/M procedure codes and must be billed with modifier FP on the claim in conjunction with all family planning procedures and services.

**Referto:** The [HHSC Family Planning Program Policy Manual](#).

The following table summarizes the uses for the E/M procedure codes and the corresponding billing requirements for the annual examination:

| Billing Criteria                                                                                                                                                  | Frequency                                                                                                                                                             |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| New patient: Appropriate E/M procedure code with modifier FP                                                                                                      | One new patient E/M code every three years following the last E/M visit provided to the client by that provider or a provider of the same specialty in the same group |
| Established patient: Appropriate E/M procedure code with modifier FP                                                                                              | Once per state fiscal year*                                                                                                                                           |
| * The established patient procedure code will be denied if a new patient procedure code has been billed for the annual examination in the same state fiscal year. |                                                                                                                                                                       |

For appropriate claims processing, providers are encouraged to use a family planning diagnosis code to bill the annual family planning exam.

**Referto:** The [HHSC Family Planning Program Policy Manual](#)

An annual family planning examination (billed with modifier FP) will not be reimbursed when submitted with the same date of service as an additional E/M visit. If another condition requiring an E/M office visit beyond the required components for an office visit, family planning visit, or surgical procedure is discovered, the provider may submit a claim for the additional visit using Modifier 25 to indicate that the client's condition required a significant, separately identifiable E/M service. Documentation supporting the provision of a significant, separately identifiable E/M service must be maintained in the client's medical record and made available to Texas Medicaid upon request.

### 2.1.1 FQHC Reimbursement for Family Planning Annual Exams

FQHCs must use the most appropriate E/M procedure code for the complexity of service provided as indicated in the *HHSC Family Planning Program Policy Manual*.

The annual exam is allowed once per fiscal year, per client, per provider. Other family planning office or outpatient visits may be billed within the same year.

A new patient visit for the annual exam may be reimbursed once every three years following the last E/M visit provided to the client by that provider or a provider of the same specialty in the same group. The annual examination must be billed as an established patient visit if E/M services have been provided to the client within the last three years.

**Referto:** The [HHSC Family Planning Program Policy Manual](#).

## 2.2 Family Planning Office or Outpatient Visits

Other family planning E/M visits are allowed for routine contraceptive surveillance, family planning counseling and education, contraceptive problems, suspicion of pregnancy, genitourinary infections, and evaluation of other reproductive system symptoms.

During any visit for a medical problem or follow-up visit, the following must occur:

- An update of the client's relevant history
- Physical exam, if indicated
- Laboratory tests, if indicated
- Treatment or referral, if indicated
- Education and counseling, or referral, if indicated
- Scheduling of office or clinic visit, if indicated

**Referto:** The [HHSC Family Planning Program Policy Manual](#) for more information about general family planning office or outpatient visits.

The following table summarizes the uses for the E/M procedure codes and the corresponding billing requirements for general family planning office or outpatient visits:

| Billing Criteria                                                                                                                                                  | Frequency                                                                                                                                                             |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| New patient: Appropriate E/M procedure code                                                                                                                       | One new patient E/M code every three years following the last E/M visit provided to the client by that provider or a provider of the same specialty in the same group |
| Established patient: Appropriate E/M procedure code                                                                                                               | As needed*                                                                                                                                                            |
| * The established patient procedure code will be denied if a new patient procedure code has been billed for the annual examination in the same state fiscal year. |                                                                                                                                                                       |

For appropriate claims processing, providers are encouraged to use a family planning diagnosis code to bill the annual family planning exam.

**Referto:** [www.tmhp.com/resources/rate-and-code-updates/hcpcs-updates](http://www.tmhp.com/resources/rate-and-code-updates/hcpcs-updates)

### 2.2.1 FQHC Reimbursement for Family Planning Office or Outpatient Visits

FQHCs must use the most appropriate E/M procedure code for the complexity of service provided as indicated previously in the tables in the *HHSC Family Planning Program Policy Manual*.

The new patient procedure codes will be limited to one new patient E/M procedure code three years following the last E/M visit provided to the client by that provider or a provider of the same specialty in the same group. The annual examination must be billed as an established patient visit if E/M services have been provided to the client within the last three years.

A general family planning office or outpatient visit (billed without modifier FP) will not be reimbursed when submitted with the same date of service as an additional E/M visit. If another condition requiring an E/M office visit beyond the required components for an office visit, family planning visit, or surgical procedure is discovered, the provider may submit a claim for the additional visit using modifier 25 to indicate that the client's condition required a significant, separately identifiable E/M service. Documentation supporting the provision of a significant, separately identifiable E/M service must be maintained in the client's medical record and made available to Texas Medicaid upon request.

**Referto:** The [HHSC Family Planning Program Policy Manual](#).

Section 4, “Federally Qualified Health Center (FQHC)” in the *Clinics and Other Outpatient Facility Services Handbook* (Vol. 2, *Provider Handbooks*) for more information about FQHC services.

### 2.2.1.1 Laboratory Procedures

**Referto:** The [HHSC Family Planning Program Policy Manual](#) for more information about laboratory procedures.

Appropriate documentation must be maintained in the client’s record.

**Referto:** Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the *Radiology and Laboratory Services Handbook* (Vol. 2, *Provider Handbooks*).

Texas Medicaid follows the Medicare categorization of tests for CLIA certificate holders.

**Referto:** The Centers for Medicare & Medicaid Services (CMS) website at [www.cms.gov/CLIA/10\\_Categorization\\_of\\_Tests.asp](http://www.cms.gov/CLIA/10_Categorization_of_Tests.asp) for information about procedure code and modifier QW requirements.

For waived tests, providers must use modifier QW as indicated on the CMS website.

## 2.3 Immunization Administration

**Referto:** The [HHSC Family Planning Program Policy Manual](#) for specific procedure codes that may be reimbursed for medications, immunizations, and vaccines.

### 2.3.1 Human Papilloma Virus (HPV) Vaccine

**Referto:** The [HHSC Family Planning Program Policy Manual](#) for specific procedure codes that may be reimbursed for medications, immunizations, and vaccines for HPV.

## 2.4 Radiology

**Referto:** The [HHSC Family Planning Program Policy Manual](#) for specific procedure codes that may be reimbursed for radiology services performed for the purpose of localization of an IUD.

## 2.5 Contraceptive Devices and Related Procedures

### 2.5.1 Barrier Contraceptives

**Referto:** The [HHSC Family Planning Program Policy Manual](#) for specific procedure codes that may be reimbursed for barrier contraceptives separately from fitting and instruction.

### 2.5.2 IUD

**Referto:** The [HHSC Family Planning Program Policy Manual](#) for specific procedure codes that may be reimbursed for IUDs and the insertion of IUDs.

#### 2.5.2.1 Removal of the IUD

**Referto:** The [HHSC Family Planning Program Policy Manual](#) for specific procedure codes that may be reimbursed for the removal of an IUD.

When a vaginal, cervical, or uterine surgery procedure code is submitted with the same date of service as the IUD removal procedure code or the IUD replacement procedure code, the following reimbursement may apply:

- The other vaginal, cervical, or uterine surgical procedure may be reimbursed at full allowance.
- The removal or the replacement of the IUD will be denied.

### 2.5.3 Contraceptive Implants

The contraceptive implant, procedure code J7307, and the implantation of the contraceptive implant, procedure code 11981, and the removal of the contraceptive implant, procedure codes 11982 and 11983, may be reimbursed.

Progesterone-containing subdermal contraceptive implants (Norplant) were previously used for birth control. Although subdermal contraceptive implants are no longer approved by the FDA, the removal of the implanted contraceptive implant may be considered for reimbursement.

**Referto:** The [HHSC Family Planning Program Policy Manual](#) for the appropriate contraceptive implant removal procedure code.

## 2.6 Drugs and Supplies

**Referto:** The [HHSC Family Planning Program Policy Manual](#) for specific procedure codes that may be reimbursed for providing contraceptive methods.

### 2.6.1 Prescriptions and Dispensing Medication

Providers may do one or both of the following:

- Dispense family planning drugs and supplies directly to the client and bill the HHSC Family Planning Program.
- Write a prescription for the client to take to a pharmacy.

Family planning drugs and supplies that are dispensed directly to the client must be billed to the HHSC Family Planning Program. Only providers with an appropriate pharmacy license may be reimbursed for dispensing family planning drugs and supplies. Provider types with an appropriate pharmacy license may be reimbursed for dispensing up to a one-year supply of contraceptives in a 12-month period.

**Referto:** The [HHSC Family Planning Program Policy Manual](#) for more information about dispensing contraceptives.

HHSC Family Planning Program clients may have their prescriptions filled at the clinic pharmacy. HHSC Family Planning Providers can refer to the *HHSC Family Planning Policy and Procedure Manual* for additional guidance on dispensing medication.

### 2.6.2 Oral Medication Reimbursement

**Referto:** The [HHSC Family Planning Program Policy Manual](#) for more information about oral medication.

## 2.7 Family Planning Education

**Referto:** The [HHSC Family Planning Program Policy Manual](#) for the procedure codes that may be reimbursed for providing Contraceptive Method Instruction.

### 2.7.1 Medical Nutrition Therapy

For clients requiring intensive nutritional guidance, medical nutritional therapy can be provided as an allowable and billable service. Medical nutritional therapy, however, must be provided by a registered dietician in order to be reimbursed.

**Referto:** The [HHSC Family Planning Program Policy Manual](#) for more information about medical nutritional therapy.

### 2.7.2 Instruction in Natural Family Planning Methods

Counseling with the intent to instruct a couple or an individual in methods of natural family planning may be reimbursed twice a year.

**Referto:** The [HHSC Family Planning Program Policy Manual](#) for more information about natural family planning.

## 2.8 Sterilization and Sterilization-Related Procedures

### 2.8.1 Sterilization Consent

Per federal regulation 42 CFR 50, Subpart B, all sterilization procedures require the following Sterilization Consent forms.

**Referto:** [www.tmhp.com/sites/default/files/provider-forms/medicaid/F00090\\_Sterilization\\_Con-sent\\_Form\\_English.pdf](http://www.tmhp.com/sites/default/files/provider-forms/medicaid/F00090_Sterilization_Con-sent_Form_English.pdf) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

[www.tmhp.com/sites/default/files/provider-forms/medicaid/F00090\\_Sterilization\\_Con-sent\\_Form\\_Spanish\\_0.pdf](http://www.tmhp.com/sites/default/files/provider-forms/medicaid/F00090_Sterilization_Con-sent_Form_Spanish_0.pdf) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

[Sterilization Consent Form Instructions](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

[DISCLOSURE AND CONSENT Medical Care and Surgical Procedures](#), required per Texas Administrative Code Title 25, Part 7, Chapter 601, Rule §601.4.

### 2.8.2 Incomplete Sterilizations

Sterilizations are considered to be permanent, once per lifetime procedures. If the claim is denied indicating a sterilization procedure has already been reimbursed for the client, the provider may appeal with documentation that supports the medical necessity for the repeat sterilization.

### 2.8.3 Tubal Ligation and Hysteroscopic Occlusion

**Referto:** The [HHSC Family Planning Program Policy Manual](#) for more information about tubal ligation and hysteroscopic occlusion.

### 2.8.4 Vasectomy

**Referto:** The [HHSC Family Planning Program Policy Manual](#) for more information about vasectomies.

Vasectomies are considered to be permanent, once-per-lifetime procedures. If the claim is denied indicating a vasectomy procedure has already been reimbursed for the client, the provider may appeal with documentation that supports the medical necessity for the repeat sterilization.

## 2.9 Prior Authorization

Prior authorization is not required for sterilization and sterilization-related procedures.

## 3 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered, including gynecological and reproductive health services and family planning services.

Gynecological and reproductive health services and family planning services are subject to retrospective review and recoupment if documentation does not support the service billed.

## 4 Claims Filing and Reimbursement

### 4.1 Claims Information

Providers must use the appropriate claim form to submit HHSC Family Planning Program claims to TMHP. Claims for dates of service that span multiple contract periods must be submitted on separate claims for services performed within each contract period.

**Note:** To submit HHSC Family Planning Program claims using TexMedConnect, providers must choose Family Planning Program “Title X-DFPP” on the electronic version of the 2017 claim form.

#### 4.1.1 Filing Deadlines

The following table summarizes the filing deadlines for HHSC Family Planning Program claims:

| Deadline                                                                                                                           | Appeals                                                                                                        |
|------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------|
| 95 days from the date of service on the claim or date of any third party insurance explanation of benefits (EOB)                   | 120 days from the date of the Remittance and Status (R&S) Report on which the claim reached a finalized status |
| If the filing deadline falls on a weekend or TMHP-recognized holiday, the filing deadline is extended until the next business day. |                                                                                                                |

**Note:** As stated in the HHSC Family Planning Policy and Procedure Manual, all claims and appeals must be submitted and processed within 60 days after the end of the contract period.

#### 4.1.2 Third Party Liability

Federal and state regulations mandate that family planning client information be kept confidential. Because seeking information from third party insurance may jeopardize the client’s confidentiality, prior insurance billing is not a requirement for billing family planning for any title program.

### 4.2 Reimbursement

Reimbursement for family planning procedures is available in the TMHP Online Fee Lookup (OFL) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

#### 4.2.1 Funds Gone

HHSC family planning providers are contracted to provide services for a specific time period, either the state fiscal year or a contract period within the fiscal year. The providers receive a specific budget amount for their contract period. When their claims payments have reached their budget allowance, providers must continue to submit claims. The amount of funds that they would have received had the funds been available will be tracked as “funds gone.”

Providers may receive additional funds for a contract period at a later time. Claims identified as “funds gone” may be reimbursed at that time.

On the R&S Report, “Claims Paid” is the dollar amount of claims paid during this financial transaction period. “Approved to Pay/Not Funds Gone” is the dollar amount that has been processed and approved to pay, but the payment has not been issued yet. “Funds Gone” is the dollar amount that has been submitted after the provider’s budget allowance has been reached. The amount in “Approved to Pay/Not Funds Gone” added to the amount in “Funds Gone” will equal the amount in the “Approved to Pay - New Claims” section.

### 4.3 NCCI and MUE Guidelines

The Healthcare Common Procedural Coding System (HCPCS) and Current Procedural Terminology (CPT) codes included in the Texas Medicaid Provider Procedures Manual are subject to National Correct Coding Initiative (NCCI) relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manual. Providers should refer to the CMS NCCI web page for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI Medically Unlikely Edit (MUE) guidance, Texas Medicaid limitations prevail.

### 4.4 National Drug Code

**Referto:** Subsection 6.3.4, “National Drug Code (NDC)” in “Section 6: Claims Filing” (*Vol. 1, General Information*).

## 1 General Information

The information in this handbook is intended for Healthy Texas Women (HTW) program providers. The handbook provides information about Texas Medicaid's HTW benefits, policies, and procedures that are applicable to these service providers.

**Important:** *All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients, including HTW clients, in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver healthcare items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

The *Clinics and Other Outpatient Facility Services Handbook (Vol. 2, Provider Handbooks)* for information about services provided in a Federally Qualified Health Centers (FQHCs) and Rural Health Clinics (RHCs).

## 2 Healthy Texas Women (HTW) Program Overview

The goal of HTW is to expand access to women's health and family planning services to reduce unintended pregnancies, positively affect the outcome of future pregnancies, and positively impact the health and wellbeing of women and their families in the eligible population.

HTW is established to achieve the following objectives:

- Implement the state policy to favor childbirth and family planning services that do not include elective abortions or the promotion of elective abortions.
- Ensure the efficient and effective use of state funds in support of these objectives and to avoid the direct or indirect use of state funds to promote or support elective abortions.
- Reduce the overall cost of publicly-funded healthcare (including federally-funded healthcare) by providing low-income Texans access to safe, effective services that are consistent with these objectives.
- Enforce Human Resources Code §32.024(c-1).

**Referto:** Subsection 1.1, “Family Planning Overview” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)* for an overview of family planning funding sources.

The [HTW page](http://www.tmhp.com) of the TMHP website at [www.tmhp.com](http://www.tmhp.com) for more information about provider certification.

Healthy Texas Women Plus (HTW Plus) is a set of additional physical health, mental health, and substance use disorder benefits that are available to HTW clients during the first 12 months of their eligibility following a pregnancy in addition to all standard HTW benefits. These outpatient services target major health conditions that contribute to maternal mortality and severe morbidity in the extended postpartum period and provide continuity of care for chronic conditions treated during the pregnancy period.

Health-care providers who want to provide HTW Plus services must be enrolled as Texas Medicaid providers and have completed the HTW provider certification process. There are no additional requirements for HTW providers to provide HTW Plus benefits within their scope of education and training, because HTW Plus is not a separate program from HTW.

## 2.1 Guidelines for HTW Providers

HTW provides family planning services, related preventive health services that are beneficial to reproductive health, and other preventive health services that positively affect maternal health and future pregnancies for women who:

- Are 15 through 44 years of age.

**Note:** *Women who are 15 through 17 years of age must have a parent or legal guardian apply on their behalf.*

- Are a United States citizen or eligible immigrant.
- Are a resident of Texas.
- Do not currently receive benefits through another Medicaid program (including Medicaid for Pregnant Women), Children’s Health Insurance Program (CHIP), or Medicare Part A or B.
- Have a household income at or below 204.2 percent of the federal poverty level.
- Are not pregnant.
- Do not have other insurance that covers the services that HTW provides.

**Exception:** *A client who has other private health insurance may be eligible to receive HTW services if a spouse, parent, or other person would cause physical, emotional, or other harm to the client because the client filed a claim on the health insurance.*

HTW medical services are provided by a physician or by another qualified health-care professional operating under physician direction. A physician provides direction for family planning services through written standing delegation orders and medical protocols. The physician is not required to be on the premises for the provision of family planning services by an RN, PA, NP, or CNS. HTW participants may receive services from any provider that participates in HTW.

HTW clients must be allowed freedom of choice in the selection of contraceptive methods as medically appropriate. They must also be allowed the freedom to accept or reject services without coercion. All HTW-covered methods of contraception must be made available to the client, either directly or by referral to another provider of contraceptive services. Services must be provided without regard to age, marital status, race, ethnicity, parenthood, disability, religion, national origin, or contraceptive preference.

Client eligibility can be verified by:

- Using TexMedConnect.
- Accessing the Medicaid Client Portal for Providers.
- Checking an electronic or printed copy of Your Texas Benefits Healthy Texas Women card.
- Calling the Automated Inquiry System at 1-800-925-9126.

**Referto:** Subsection 4.4.3, “Client Eligibility Verification” in “Section 4: Client Eligibility” (*Vol. 1, General Information*).

HTW clients will have the following identifiers on the feedback received from the stated source:

- Medicaid Coverage: W - MA - HTW
- Program Type:
  - 68 - MEDICAL ASSISTANCE - HEALTHY TEXAS WOMEN (HTW)
  - 69 - MEDICAL ASSISTANCE - HEALTHY TEXAS WOMEN PLUS (HTW PLUS)
- Program: 100 - MEDICAID
- Benefit Plan: 100 - Traditional Medicaid

HTW clients will receive 12 months of continuous eligibility unless:

- The client dies.
- The client voluntarily withdraws from HTW.
- The client no longer satisfies the HTW eligibility criteria.
- The client is certified for another Medicaid program, such as Medicaid for Pregnant Women, or CHIP.
- State law no longer allows the woman to be covered.
- HHSC or its designee determines the client provided information affecting her eligibility that was false at the time of application.

If a provider suspects that a HTW client has committed fraud on the application, the provider should report the client to the HHSC Office of Inspector General (OIG) at 1-800-436-6184.

### **2.1.1 Referrals**

If a provider identifies a health problem that is not within their scope of practice, the provider must refer the HTW client to another provider or clinic that can treat her. As mandated by Texas Human Resources Code §32.024(c-1), HTW does not reimburse office visits during which clients are referred for elective abortions.

A provider must refer and provide information about the HHSC Primary Health Care Services Program. Additionally, the toll-free Information and Referral hotline 2-1-1 can assist clients and providers with locating low-cost health services for clients in need.

### **2.1.2 Referrals for Clients Diagnosed with Breast or Cervical Cancer**

Medicaid for Breast and Cervical Cancer (MBCC) provides access to cancer treatment through full Medicaid benefits for qualified women diagnosed with breast or cervical cancer. Health facilities that contract with the Breast and Cervical Cancer Screening (BCCS) program are responsible for helping women with the MBCC application.

To find a BCCS provider, call 2-1-1. For questions about the BCCS program, contact the state office at 512-458-7796, or visit [www.healthytexaswomen.org/bccs-program](http://www.healthytexaswomen.org/bccs-program).

### 2.1.3 Abortions

Elective and non-elective abortions are not covered by HTW.

Texas Human Resources Code Section 32.024(c-1) and Title 1 Texas Administrative Code, §382.17 prohibit the participation of a provider that performs or promotes elective abortions or affiliates with an entity that performs or promotes elective abortions.

A provider that performs elective abortions (through either surgical or medical methods) or that is affiliated with an entity that performs or promotes elective abortions for any patient is ineligible to serve HTW clients and cannot be reimbursed for any services rendered to a HTW client. This prohibition only applies to providers delivering services to HTW clients.

“Elective abortion” means the intentional termination of a pregnancy by an attending physician who knows that the female is pregnant, using any means that is reasonably likely to cause the death of the fetus. The term does not include the use of any such means: (A) to terminate a pregnancy that resulted from an act of rape or incest; (B) in a case in which a woman suffers from a physical disorder, physical disability, or physical illness, including a life-endangering physical condition caused by or arising from the pregnancy, that would, as certified by a physician, place the woman in danger of death or risk of substantial impairment of a major bodily function unless an abortion is performed; or (C) in a case in which a fetus has a life-threatening physical condition that, in reasonable medical judgment, regardless of the provision of life-saving treatment, is incompatible with life outside the womb.

Certain providers that want to participate in HTW must certify that they do not perform or promote elective abortions and do not affiliate with any entity that does, as directed by HHSC.

**Referto:** Subsection 2.2, “HTW Provider Enrollment” in this handbook for more information about certification regarding elective abortions.

## 2.2 HTW Provider Enrollment

Providers who have completed the Medicaid enrollment process through TMHP, and have certified that they do not perform elective abortions or affiliate with providers that perform elective abortion are eligible to participate. Teaching hospital, independent laboratory, and radiology facility providers are not required to certify.

**Referto:** “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information about enrollment procedures.

Certain providers that want to participate in HTW must certify that they do not perform or promote elective abortions and do not affiliate with any entity that does, as directed by HHSC. Providers may complete the Healthy Texas Women Certification and disclose the required information as part of the Medicaid enrollment process, or at any time after completing the Medicaid enrollment process. New providers may use the TMHP website to submit the Healthy Texas Women Certification through the Provider Enrollment and Management System (PEMS). Medicaid-only providers may use the TMHP website to submit the Healthy Texas Women Certification through the PEMS.

The following provider types are not required to certify:

- Teaching hospitals
- Independent laboratories
- Radiology facilities

Information that providers submit through PEMS can be searched by clients who use the Find a Doctor feature on the HTW website at [www.healthytexaswomen.org](http://www.healthytexaswomen.org).

## 2.3 Services, Benefits, Limitations, and Prior Authorization

This section includes information on women’s health and family planning services funded through HTW. HTW benefits include:

- Contraceptive services
- Pregnancy testing and counseling
- Preconception health screenings (e.g., screening for obesity, hypertension, diabetes, cholesterol, smoking, and mental health)
- Sexually transmitted infection (STI) services
- Treatment for the following chronic conditions:
  - Hypertension
  - Diabetes
  - High cholesterol
- Breast and cervical cancer screening and diagnostic services:
  - Radiological procedures including mammograms
  - Screening and diagnosis of breast cancer
  - Diagnosis and treatment of cervical dysplasia
- Immunizations
- Treatment of postpartum depression

**Referto:** Subsection 2.3.11, “HTW Plus Services, Benefits, and Limitations” in this handbook for HTW Plus benefit information.

The following procedure codes are benefits for HTW:

| Procedure Codes                |        |        |        |       |        |        |        |        |        |

| * CLIA waived test                     |       |        |        |        |        |        |        |        |        |
| ^ QW Modifier                          |       |        |        |        |        |        |        |        |        |

Procedure code G0433 will deny if billed on the same day by the same provider as procedure code 86703.

Procedure codes 96156, 96158, 96159, 96167, and 96168 are a benefit for clients who are 20 years of age and younger.

Procedure code 99473 is limited to one service per year, by any provider. Procedure code 99473 may be considered for reimbursement more than once per year when documentation of medical necessity is submitted with the claim.

Procedure code 99474 is limited to four services per year, by any provider, and it may be reimbursed only if a claim for procedure code 99473 has been submitted within the past 12 rolling months.

Self-measured blood pressure monitoring is a benefit when it is used as a diagnostic tool to help a physician diagnose hypertension in individuals whose blood pressure is either elevated or inconclusive when it is evaluated in the office alone.

**Referto:** Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

### 2.3.1 Family Planning History Check

HTW clients must receive family planning services annually, but no later than the third visit as an established client. These services must include family planning counseling and education, including natural family planning and abstinence. In order to receive reimbursement, all existing HTW clients must have received family planning services and/or counseling within the past rolling year.

The following HTW clients do not require a family planning history check:

- New clients
- Women who are sterilized
- Women who have a long-acting reversible contraception (LARC)

### 2.3.2 Family Planning Annual Exams

Family planning providers must bill one of the following E/M visit procedure code based on the complexity of the annual family planning examination provided:

| Procedure Codes |       |       |       |       |       |       |       |       |       |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| 99202           | 99203 | 99204 | 99205 | 99211 | 99212 | 99213 | 99214 | 99215 | 99242 |
| 99243           | 99244 | 99384 | 99385 | 99386 | 99394 | 99395 | 99396 | G0466 | G0467 |
| G0468           | G0469 | G0470 | T1015 |       |       |       |       |       |       |

The following table summarizes the uses for the E/M procedure codes and the corresponding billing requirements for the annual examination:

| Billing Criteria                                 | Frequency                                                                                                                                                         |
|--------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| New patient: Most appropriate E/M procedure code | One new patient E/M code every 3 years following the last E/M visit provided to the client by that provider or a provider of the same specialty in the same group |

**Referto:** The [Family Planning](#) section of the HHSC website for information about the HHSC Family Planning Program.

### 2.3.2.1 FQHC Reimbursement for Family Planning Annual Exams

To receive their encounter rate for the annual family planning examination for HTW clients, FQHCs must use the most appropriate E/M procedure code for the complexity of service provided as indicated in the previous tables in Subsection 2.3.2, “Family Planning Annual Exams” in this handbook.

A new patient visit for the annual exam may be reimbursed once every three years following the last E/M visit provided to the client by that provider or a provider of the same specialty in the same group. The annual examination must be billed as an established patient visit if E/M services have been provided to the client within the last three years.

Reimbursement for services payable to an FQHC is based on an all-inclusive rate per visit.

### 2.3.3 Other Family Planning Office or Outpatient Visits

HTW does not cover office visits during which clients are referred for elective abortions.

A provider is allowed to bill clients for services that are not a benefit of HTW.

**Referto:** Subsection 1.7.12.1, “Client Acknowledgment Statement” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for the requirements for billing clients.

### 2.3.3.1 FQHC Reimbursement for Other Family Planning Office or Outpatient Visits

FQHCs may be reimbursed for three family planning encounters per HTW client, per year. Procedure codes J7296, J7297, J7298, J7300, J7301, and J7307 may be reimbursed in addition to the FQHC encounter payment. When seeking reimbursement for an IUD or implantable contraceptive implant, providers must submit on the same claim the procedure code for the contraceptive device along with the procedure code for the encounter. The contraceptive device is not subject to FQHC limitations. Providers must use modifier U8 when submitting claims for a contraceptive device purchased through the 340B Drug Pricing Program.

Outpatient visits for non-family planning-related encounters that are provided by FQHCs for HTW or HTW Plus covered physical and behavioral health services may be reimbursed when medically necessary.

Reimbursement for services payable to an FQHC is based on an all-inclusive rate per visit.

**Referto:** Section 4, “Federally Qualified Health Center (FQHC)” in the *Clinics and Other Outpatient Facility Services Handbook* (*Vol. 2, Provider Handbooks*) for more information about FQHC services.

### 2.3.4 Laboratory Procedures

The fee for the handling or conveyance of the specimen for transfer from the provider’s office to a laboratory may be reimbursed using procedure code 99000.

More than one lab handling fee may be reimbursed per day if multiple specimens are obtained and sent to different laboratories.

**Note:** *When a provider who renders HTW laboratory services obtains a specimen but does not perform the laboratory procedure, the provider who obtains the specimen may be reimbursed one lab handling fee per day, per client.*

Handling fees are not paid for Pap smears or cultures. When billing for Pap smear interpretations, the claim must indicate that the screening and interpretation were actually performed in the office by using the modifier SU (procedure performed in physician’s office).

If more than one of procedure codes 87480, 87510, 87660, 87661, or 87800 is submitted by the same provider for the same client with the same date of service, all of the procedure codes are denied. Only one procedure code (87480, 87510, 87660, 87661, or 87800) may be submitted for reimbursement, and providers must submit the most appropriate procedure code for the test provided.

**Note:** Providers must code to the highest level of specificity with a diagnosis to support medical necessity when submitting procedure code 87797.

**Referto:** Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the *Radiology and Laboratory Services Handbook (Vol. 2, Provider Handbooks)*.

Appropriate documentation must be kept in the client’s record.

Claims may be subject to retrospective review if they are submitted with diagnosis codes that do not support medical necessity.

HTW follows the Medicare categorization of tests for CLIA certificate holders.

**Referto:** The CMS website at [www.cms.gov/CLIA/10\\_Categorization\\_of\\_Tests.asp](http://www.cms.gov/CLIA/10_Categorization_of_Tests.asp) for information about procedure code and modifier QW requirements.

For waived tests, providers must use modifier QW as indicated on the CMS website.

## 2.3.5 Contraceptive Devices

Providers must use modifier U8 when submitting claims for a contraceptive device purchased through the 340B Drug Pricing Program.

An E/M procedure code will not be reimbursed when it is billed with the same date of service as procedure code 58301, unless the E/M visit is a significant, separately identifiable service from the removal of the IUD. If the E/M visit occurs on the same date of service as the removal of the IUD, modifier 25 may be used to indicate that the E/M visit was a significant, separately identifiable service from the procedure.

## 2.3.6 Drugs and Supplies

### 2.3.6.1 Prescriptions and Dispensing Medication

Drugs and supplies that are dispensed directly to the client must be billed to HTW. Only providers with an appropriate pharmacy license may be reimbursed for dispensing family planning drugs and supplies. Provider types with an appropriate pharmacy license may be reimbursed for dispensing up to a one-year supply of contraceptives in a 12-month period using procedure code J7294, J7295, J7304, or S4993.

Pharmacies under the Vendor Drug Program are allowed to fill all prescriptions as prescribed. Family planning drugs and supplies are exempt from the three prescriptions-per-month rule for up to a six-month supply.

**Referto:** Subsection 1.1, “About the Vendor Drug Program” in the *Outpatient Drug Services Handbook (Vol. 2, Provider Handbooks)* for information about this program.

#### 2.3.6.1.1 Long-Acting Reversible Contraception Products

Certain LARC products are available as a pharmacy benefit of HTW and are available through a limited number of specialty pharmacies that work with LARC manufacturers. Providers can refer to the Texas Medicaid/CHIP Vendor Drug Program website at <https://provider.txvdportal.com/SPContent/DocumentLibrary/Manuals> for additional information, including a list of covered products and participating specialty pharmacies.

## 2.3.7 Sterilization and Sterilization-Related Procedures

Sterilizations are considered to be permanent, once per lifetime procedures. Denied claims may be appealed with documentation that supports the medical necessity for a repeat sterilization.

The sterilization services that are available to HTW clients include surgical or nonsurgical sterilization, follow-up office visits related to confirming the sterilization, and any necessary short-term contraception.

HTW covers sterilization as a form of birth control. To be eligible for a sterilization procedure through HTW, the client must be 21 years of age or older and must complete and sign a Sterilization Consent Form within at least 30 days of the date of the surgery but no more than 180 days. In the case of an emergency, there must be at least 72 hours between the date on which the consent form is signed and the date of the surgery. Operative reports that detail the need for emergency surgery are required.

#### **2.3.7.1 Sterilization Consent**

Per federal regulation 42 Code of Federal Regulations (CFR) 50, Subpart B, all sterilization procedures require an approved Sterilization Consent Form.

**Note:** *The Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information form is not sterilization consent.*

**Referto:** [Sterilization Consent Form \(English\)](https://www.tmhp.com/sterilization-consent-form-english) on the TMHP website at [www.tmhp.com](https://www.tmhp.com).

[Sterilization Consent Form \(Spanish\)](https://www.tmhp.com/sterilization-consent-form-spanish) on the TMHP website at [www.tmhp.com](https://www.tmhp.com).

[Sterilization Consent Form Instructions](https://www.tmhp.com/sterilization-consent-form-instructions) on the TMHP website at [www.tmhp.com](https://www.tmhp.com).

#### **2.3.8 Treatment for Sexually Transmitted Infections (STIs)**

HTW covers treatment for the following conditions:

- Gardnerella
- Trichomoniasis
- Candida
- Chlamydia
- Gonorrhea
- Herpes
- Syphilis

#### **2.3.9 Immunizations and Vaccinations**

HTW covers the following immunizations and vaccinations:

- HPV
- Hep A
- Hep B
- Chicken pox
- MMR
- Tdap
- Flu

#### **2.3.10 Telemedicine and Telehealth Services**

Certain telemedicine and telehealth services may be provided for HTW clients if clinically appropriate and safe, as determined by the provider, and agreed to by the person receiving services. Whenever possible, HHSC encourages face-to-face interactions, such as an in-person visit, as well as the use of synchronous audio-visual technology over synchronous telephone (audio-only) technology of telemedicine and telehealth services. Therefore, providers must document in the person's medical record the

reason(s) for why services were delivered by synchronous telephone (audio-only) technology. The following HTW services are authorized for telemedicine delivery using synchronous audiovisual and synchronous telephone (audio-only), when noted, technologies:

| HTW Telemedicine Evaluation and Management Services                                                                |       |       |       |         |        |        |        |        |       |
|--------------------------------------------------------------------------------------------------------------------|-------|-------|-------|---------|--------|--------|--------|--------|-------|
| 99202                                                                                                              | 99203 | 99204 | 99205 | 99211** | 99212* | 99213* | 99214* | 99215* | 99242 |
| 99243                                                                                                              | 99244 | 99417 | Q3014 |         |        |        |        |        |       |
| * May be delivered by synchronous telephone (audio-only) technology                                                |       |       |       |         |        |        |        |        |       |
| ** May be delivered by synchronous telephone (audio-only) technology only during certain PHE or natural disasters. |       |       |       |         |        |        |        |        |       |

The following HTW services are authorized for telemedicine and telehealth delivery using synchronous telephone (audio-only) technologies:

| HTW Telemedicine Behavioral Health Services                         |        |        |        |        |        |        |  |  |  |
|---------------------------------------------------------------------|--------|--------|--------|--------|--------|--------|--|--|--|
| 90791*                                                              | 90792* | 96156* | 96158* | 96159* | 96167* | 96168* |  |  |  |
| * May be delivered by synchronous telephone (audio-only) technology |        |        |        |        |        |        |  |  |  |

| HTW Telemedicine and Telehealth Services - Non-Behavioral Health Services                                         |  |         |  |         |  |         |  |  |  |
|-------------------------------------------------------------------------------------------------------------------|--|---------|--|---------|--|---------|--|--|--|
| 97802**                                                                                                           |  | 97803** |  | 97804** |  | S9470** |  |  |  |
| **May be delivered by synchronous telephone (audio-only) technology only during certain PHE or natural disasters. |  |         |  |         |  |         |  |  |  |

### 2.3.10.1 Synchronous Audiovisual Technology

New patient and established client services provided by synchronous audiovisual technology must be billed using modifier 95. The following procedure codes are for new and established client services:

| Procedure Codes |       |       |       |       |       |       |       |       |  |
|-----------------|-------|-------|-------|-------|-------|-------|-------|-------|--|
| 99202           | 99203 | 99204 | 99205 | 99211 | 99212 | 99213 | 99214 | 99215 |  |

### 2.3.10.2 Synchronous Telephone (Audio-Only) Technology

Established client services for behavioral health or substance use conditions provided by synchronous telephone (audio-only) technology must be billed using modifier FQ. Established patient services for non-behavioral health conditions provided by synchronous telephone (audio-only) technology must be billed using modifier 93.

The following procedure codes are for established client services:

| Procedure Codes |       |       |       |  |  |  |  |  |  |
|-----------------|-------|-------|-------|--|--|--|--|--|--|
| 99212           | 99213 | 99214 | 99215 |  |  |  |  |  |  |

Established client service (procedure code 99211) is only during certain public health emergencies. Procedure codes that indicate remote (telemedicine medical and telehealth services) delivery in the description do not need to be billed with the 95 modifier.

FQHCs and RHCs that provide telemedicine and telehealth services using synchronous audiovisual and synchronous telephone (audio-only) technology may be reimbursed for the following HTW services:

| HTW Distant Site Telemedicine and Telehealth Services |       |       |       |       |       |  |  |  |  |
|-------------------------------------------------------|-------|-------|-------|-------|-------|--|--|--|--|
| G0466                                                 | G0467 | G0468 | G0469 | G0470 | T1015 |  |  |  |  |

Behavioral health services delivered using synchronous telephone (audio-only) technologies must be billed using the FQ modifier. Non-behavioral health services delivered using synchronous telephone (audio-only) technologies must be billed using the 93 modifier.

FQHCs and RHCs may be reimbursed for telemedicine and telehealth in the following manner:

- The distant site provider fee is reimbursable as a prospective payment system (PPS), alternative prospective payment system (APPS), or AIR (All Inclusive Rate) PPS.
- The facility fee (procedure code Q3014) is an add-on procedure code that should not be included in any cost reporting that is used to calculate a FQHC PPS, APPS, or the RHC AIR (All Inclusive Rate) PPS per visit encounter rate.

Services delivered using synchronous audiovisual technologies must be billed using modifier 95. Procedure codes that indicate remote (telemedicine medical and telehealth services) delivery in the description do not need to be billed with the 95 modifier.

During a Declaration of State of Disaster, HHSC may issue direction to providers regarding the use of a telemedicine or telehealth service to include the use of a synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein to the extent permitted by Texas law. A Declaration of State of Disaster is when an executive order or proclamation is issued by the governor declaring a state of disaster in accordance with Section 418.014 of the Texas Government Code.

### **2.3.11 HTW Plus Services, Benefits, and Limitations**

In addition to all HTW services, HTW Plus provides enhanced postpartum services to eligible HTW clients for the following targeted health conditions and services:

- Behavioral health conditions
  - Individual, family, and group psychotherapy services
  - Peer specialist services
- Cardiovascular and coronary conditions
  - Cardiovascular evaluation imaging and laboratory studies
  - Blood pressure monitoring equipment
  - Anticoagulant, antiplatelet, and antihypertensive medications
- Substance use disorders
  - Screening, brief intervention, and referral for treatment
  - Outpatient substance use counseling
  - Smoking and tobacco use cessation counseling
  - Medication-assisted treatment
  - Peer specialist services
- Diabetes
  - Laboratory studies
  - Additional injectable insulin options
  - Blood glucose testing supplies
  - Voice-integrated glucometers for women with diabetes who are visually impaired
  - Glucose monitoring supplies

- Asthma
  - Medications and supplies

The following procedure codes are benefits of HTW Plus:

| Procedure Codes                              |       |       |       |       |       |       |       |       |       |
|----------------------------------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|
| Behavioral Health Services                   |       |       |       |       |       |       |       |       |       |
| 90832                                        | 90833 | 90834 | 90836 | 90837 | 90838 | 90847 | 90853 | 90870 | 96130 |
| 96131                                        | 96136 | 96137 | H0038 |       |       |       |       |       |       |
| Cardiovascular and Coronary Services         |       |       |       |       |       |       |       |       |       |
| 37187                                        | 37211 | 37212 | 70498 | 70547 | 70548 | 71275 | 73706 | 74174 | 74175 |

HTW Plus benefits are subject to the same restrictions and limitations that are applied to Texas Medicaid's coverage for the same procedure codes.

**Referto:** The relevant handbooks for detailed coverage information of HTW Plus benefits.

### 2.3.11.1 HTW Plus Telemedicine and Telehealth Services

Certain telemedicine and telehealth services may be provided for HTW Plus clients if clinically appropriate and safe, as determined by the provider, and agreed to by the person receiving services. Whenever possible, HHSC encourages face-to-face interactions, such as an in-person visit, as well as the use of synchronous audio-visual technology over synchronous telephone (audio-only) technology of telemedicine and telehealth services. Therefore, providers must document in the person's medical record the

reason(s) for why services were delivered by synchronous telephone (audio-only) technology. The following HTW Plus services are authorized for delivery using synchronous audiovisual and synchronous telephone (audio-only), when noted, technologies:

| HTW Plus Behavioral Health Telemedicine and Telehealth Services     |        |        |        |        |        |        |        |       |       |
|---------------------------------------------------------------------|--------|--------|--------|--------|--------|--------|--------|-------|-------|
| 90832*                                                              | 90833* | 90834* | 90836* | 90837* | 90838* | 90847* | 90853* | 96130 | 96131 |
| 96136                                                               | 96137  | H0038* |        |        |        |        |        |       |       |
| * May be delivered by synchronous telephone (audio-only) technology |        |        |        |        |        |        |        |       |       |

**Note:** Procedure codes 90833, 90836, and 90838 are add-on codes and must be billed with a primary procedure code in order to be reimbursed.

| HTW Plus Telemedicine and Telehealth Services for Substance Use Disorder Services                                 |         |        |        |        |  |  |  |  |  |
|-------------------------------------------------------------------------------------------------------------------|---------|--------|--------|--------|--|--|--|--|--|
| 99408*                                                                                                            | H0001** | H0004* | H0005* | H0049* |  |  |  |  |  |
| * May be delivered by synchronous telephone (audio-only) technology                                               |         |        |        |        |  |  |  |  |  |
| ** May be delivered by synchronous telephone (audio-only) technology only during certain PHE or natural disasters |         |        |        |        |  |  |  |  |  |

Behavioral health services delivered using synchronous telephone (audio-only) technologies must be billed using the FQ modifier.

**Referto:** The *Behavioral Health and Case Management Services Handbook (Vol. 2, Provider Handbooks)* for information on restrictions for behavioral health services delivered by synchronous audiovisual and synchronous telephone (audio-only) technologies.

Procedure code H0001 is authorized for delivery by synchronous telephone (audio-only) technology only during certain public health emergencies or natural disasters; to the extent allowed by federal law (assessments for withdrawal management services are excluded); and the 'existing clinical relationship' requirement is waived.

During a Declaration of State of Disaster, HHSC may issue direction to providers regarding the use of a telemedicine or telehealth service to include the use of a synchronous telephone (audio-only) platform to provide covered services outside of the allowances described herein to the extent permitted by Texas law. A Declaration of State of Disaster is when an executive order or proclamation is issued by the governor declaring a state of disaster in accordance with Section 418.014 of the Texas Government Code.

### 2.3.12 Prior Authorization

Prior authorization is not required for HTW services.

## 2.4 Documentation Requirements

All services require documentation to support the medical necessity of the service rendered.

HTW services are subject to retrospective review and recoupment if documentation does not support the service billed.

Documentation requirements for a telemedicine or telehealth service are the same as for an in-person visit and must accurately reflect the services rendered. Documentation must identify the means of delivery when provided by telemedicine or telehealth.

**Referto:** The *Telecommunication Services Handbook (Vol. 2, Provider Handbooks)* for information on restrictions for services delivered by synchronous audiovisual and synchronous telephone (audio-only) technologies.

Additional documentation requirements apply for certain behavioral health services delivered by synchronous audiovisual technology and synchronous telephone (audio-only) technology.

## 2.5 HTW Claims Filing and Reimbursement

### 2.5.1 Claims Information

Providers must use the appropriate claim form to submit HTW claims to TMHP.

**Referto:** Subsection 2.4, “Claims Filing and Reimbursement” in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)* for more information about filing family planning claims.

#### 2.5.1.1 HTW and Third Party Liability

Federal and state regulations mandate that family planning client information be kept confidential.

Because seeking information from third party insurance may jeopardize the client’s confidentiality, third party billing for HTW is not allowed.

### 2.5.2 Reimbursement

Providers can refer to the Online Fee Lookup (OFL) or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

### 2.5.3 National Drug Code

**Referto:** Subsection 6.3.4, “National Drug Code (NDC)” in “Section 6: Claims Filing” (*Vol. 1, General Information*).

### 2.5.4 NCCI and MUE Guidelines

The Health Care Procedure Coding System (HCPCS) and Current Procedural Terminology (CPT) codes included in the Texas Medicaid Provider Procedures Manual are subject to NCCI relationships, which supersede any exceptions to NCCI code relationships that may be noted in the manual. Providers should refer to the CMS NCCI web page for correct coding guidelines and specific applicable code combinations.

In instances when Texas Medicaid limitations are more restrictive than NCCI MUE guidance, Texas Medicaid limitations prevail.

# 1 General Information

This handbook contains information about Texas Medicaid fee-for-service benefits. The information in this handbook is intended for home health nursing services. Nursing services include home health skilled nursing visits, home health aide services, and private duty nursing services. The Handbook provides information about Texas Medicaid's benefits, policies, and procedures applicable to these therapies.

For information about managed care services, refer to the Medicaid Managed Care Handbook. Managed care carve-out services are administered as fee-for-service benefits. A list of all carve-out services is available in Section 8, "Carve-Out Services" in the Medicaid Managed Care Handbook (*Vol. 2, Provider Handbooks*).

**Important:** *All providers are required to read and comply with Section 1: Provider Enrollment and Responsibilities. In addition to required compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide healthcare services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

**Referto:** "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*) for more information about enrollment procedures.

## 1.1 Client Eligibility for Home Health Nursing and Aide Services

It is the provider's responsibility to determine the type of coverage (Medicare, Medicaid, or private insurance) that the client is eligible to receive. To verify client Medicaid eligibility and retroactive eligibility, the home health agency, durable medical equipment (DME), or medical supplier must verify eligibility by accessing the Medicaid Client Portal for Providers. Additionally, eligibility can be verified by calling the Automated Inquiry System (AIS) at 1-800-925-9126 or the Texas Medicaid & Healthcare Partnership (TMHP) Electronic Data Interchange (EDI) Help Desk at 1-888-863-3638.

Home health clients do not need to be homebound to qualify for services.

The Medicaid client must be eligible on the date of service (DOS) and must meet all of the following requirements to qualify for home health services:

- Have a medical need for home health professional services, DME, or medical supplies that is documented in the client's plan of care (POC) and considered a benefit under home health services
- Receive services that meet the client's existing medical needs and can be safely provided in the client's home
- Receive prior authorization from TMHP for most home health professional services, DME, or medical supplies

**Referto:** Subsection A.12.3, "Automated Inquiry System (AIS)" in "Appendix A: State, Federal, and TMHP Contact Information" (*Vol. 1, General Information*).

**Note:** *Texas Health Steps (THSteps)-eligible clients who qualify for medically necessary services beyond the limits of this home health services benefit may receive those services through the Comprehensive Care Program (CCP).*

### 1.1.1 Prior Authorization Requests for Clients with Retroactive Eligibility

Retroactive eligibility occurs when the effective date of a client's Medicaid coverage is before the date the client's Medicaid eligibility is added to TMHP's eligibility file, which is called the "add date."

For clients with retroactive eligibility, prior authorization requests must be submitted after the client's add date and before a claim is submitted to TMHP.

For services provided to fee-for-service Medicaid clients during the client's retroactive eligibility period, i.e., the period from the effective date to the add date, prior authorization must be obtained within 95 days from the client's add date and before a claim for those services is submitted to TMHP. For services provided on or after the client's add date, the provider must obtain prior authorization within three business days of the date of service.

The provider is responsible for verifying eligibility. The provider is strongly encouraged to access the Medicaid Client Portal for Providers, TexMedConnect, or AIS to verify eligibility frequently while providing services to the client. If services are discontinued before the client's add date, the provider must still obtain prior authorization within 95 days of the add date to be able to submit claims.

*Referto:* "Section 4: Client Eligibility" (Vol. 1, General Information).

### 1.1.2 Client Evaluation

When a home health agency receives a referral to provide home health nursing and therapy services for a client who is eligible for Texas Medicaid, the agency-employed registered nurse (RN) must evaluate the client in the home before calling TMHP for prior authorization. A home evaluation by the agency-employed RN is required for SN, home health aide (HHA), occupational therapist (OT), physical therapist (PT), DME, or medical supplies requested on a home health services POC. It is expected that appropriate referrals will be made between home health agencies and DME suppliers for care. It is recommended that DME suppliers keep open communication with the client's physician to ensure the client's medical record is current.

This evaluation must include assessment of the following:

- Medical necessity for home health services, DME, or medical supplies requested.
- Client safety.
- Appropriateness of care in the home setting.
- Capable caregiver available if clients are unable to perform their own care or monitor their own medical condition.

Following the RN's assessment or evaluation of the client in the home setting for home health services needs, the agency-employed RN who completed the home evaluation must contact TMHP for prior authorization within three business days of the start of care (SOC).

## 1.2 Client Eligibility for PDN Services

PDN is considered medically necessary when a client has a disability, physical, or mental illness, or chronic condition and requires continuous, skillful observations, judgments, and interventions to correct or ameliorate his or her health status.

To be eligible for PDN services, a client must meet all the following criteria:

- Be birth through 20 years of age and eligible for Medicaid and THSteps
- Meet medical necessity criteria for PDN
- Have a primary physician who must:
  - Provide a prescription for PDN.

- Establish a POC.
- Provide documentation to support the medical necessity of PDN services.
- Provide continuing medical care and supervision of the client, including, but not limited to, examination or treatment within 30 calendar days prior to the start of PDN services, or examination or treatment that complies with the THSteps periodicity schedule, or is within six months of the PDN extension SOC date, whichever is more frequent (for extensions of PDN services). This requirement may be waived based on review of the client's specific circumstances.

**Note:** *The physician visit may be waived when a diagnosis has already been established by the physician, and the client is under the continuing care and medical supervision of the physician. A waiver is valid for no more than 365 days, and the client must be seen by his or her physician at least once every 365 days. The waiver must be based on the physician's written statement that an additional evaluation visit is not medically necessary. This documentation must be maintained by the physician and the provider in the client's medical record.*

- Provide specific written, dated orders for the client who is receiving continuing or ongoing PDN services.
- Require care beyond the level of services provided under Texas Medicaid (Title XIX) home health services.

Clients who are birth through 17 years of age must reside with a responsible adult who is either trained to provide nursing care or is capable of initiating an identified contingency plan when the scheduled private duty nurse is unexpectedly unavailable.

PDN is based on the need for skilled care in the client's home; however, these services may follow the client and may be provided in accordance with 42 CFR §440.80. The POS must be able to support the client's health and safety needs. It must be adequate to accommodate the use, maintenance, and cleaning of all medical devices, equipment, and supplies required by the client. Necessary primary and backup utilities, communication, fire, and safety systems must be available at all times.

The amount and duration of PDN must always be commensurate with the client's medical needs. Requests for services must reflect changes in the client's condition that affect the amount and duration of PDN.

## 2 Enrollment

**Referto:** Subsection 1.7.16, "Private Duty Nursing (PDN) Providers" in "Section 1: Provider Enrollment and Responsibilities" (*Vol. 1, General Information*) for enrollment information.

## 3 Home Health Skilled Nursing and Home Health Aide Services

### 3.1 Services, Benefits, Limitations, and Prior Authorization

Home health skilled nursing (SN) and HHA visits are a benefit of Texas Medicaid Title XIX home health services when a client requires home nursing services for an acute condition or an acute exacerbation of a chronic condition that can be met on an intermittent or part-time basis. For clients who are 20 years of age or younger, SN and HHA visits are a benefit of Texas Medicaid Title XIX home health services when a client requires nursing services for an acute condition, a chronic condition, or an acute exacerbation of a chronic condition that can be met on an intermittent or part-time basis. SN visits are

intended to provide SN care to promote independence and support the client living at home. HHA visits are intended to provide personal care services under the supervision of an RN, PT, or OT employed by the home health agency to promote independence and support the client living at home.

The following codes are a benefit of Texas Medicaid:

| Procedure Codes |       |       |
|-----------------|-------|-------|
| G0156           | G0299 | G0300 |

Title XIX home health services must be provided by a licensed and certified home health agency enrolled in Texas Medicaid.

When the client's needs are beyond the benefit of Title XIX home health services, additional benefits may be accessed through the following:

- Services for clients who are 20 years of age or younger may include, but are not limited to, private duty nursing (PDN) or personal care services (PCS).
- Services for clients who are 21 years of age or older may include, but are not limited to, long-term care assistance.

**Referto:** Section 4, "Private Duty Nursing (PDN) Services - CCP" in this handbook for information about PDN services.

Subsection 2.12, "Personal Care Services (PCS) (CCP)" in the *Children's Services Handbook (Vol. 2, Provider Handbooks)* for information about PCS services.

### 3.1.1 Medical Necessity

SN and HHA visits are considered medically necessary for a client who:

- Requires skillful observations and judgement to improve health status, skilled assessment, or skilled treatments or procedures.
- Requires individualized, intermittent, acute skilled care.
- Requires skilled interventions to improve health status, and if skilled intervention is delayed, it is expected to result in:
  - Deterioration of a chronic condition
  - Loss of function
  - Imminent risk to health status due to medical fragility, or risk of death
- Requires general supervision of nursing care provided by an HHA over whom the RN is administratively or professionally responsible.

**Note:** When documentation does not support medical necessity for home health SN or HHA visits, providers may be directed to possible alternative services based on the client's age and needs.

## 3.2 Skilled Nursing and Home Health Aide Services

All SN and HHA services must be prior authorized.

The following definitions apply to Title XIX Home Health SN and HHA visits:

- Acute is defined as a condition or exacerbation that is anticipated to improve and reach resolution within 60 days.
- Part-time is defined as SN or HHA visits provided less than eight hours per day for any number of days per week. Part-time visits may be continuous up to 7.5 hours per day (not to exceed a combined total of three 2.5 hour visits).

- Intermittent is defined as SN or HHA visits provided for less than eight hours per visit and less frequently than daily. Intermittent visits may be delivered in interval visits up to 2.5 hours per visit, not to exceed a combined total of three visits per day.

SN visits are nursing services ordered by a physician or an allowed practitioner, included in the Texas Medicaid home health services Plan of Care (POC), and provided by an RN or a licensed vocational nurse (LVN) currently licensed by the Board of Nurse Examiners of the State of Texas (BNE). SN visits may be considered when a client requires nursing services for an acute condition or an acute exacerbation of a chronic condition that can be met on an intermittent or part-time basis and typically has an end-point. SN visits may be provided on consecutive days.

**Note:** *An allowed practitioner is an individual licensed in Texas as a physician assistant (PA), a certified nurse practitioner (CNP), or a clinical nurse specialist (CNS).*

HHA visits are services ordered by the physician or allowed practitioner, included in the nursing Texas Medicaid home health services POC, and are services the HHA is permitted to perform under State law. HHA visits may be considered when a client requires services for an acute condition or an acute exacerbation of a chronic condition that can be met on an intermittent or part-time basis and typically has an end-point. HHA visits will not be considered unless the client also requires SN or therapy services. HHA visits may be provided on consecutive days.

**Referto:** *The Physical Therapy, Occupational Therapy, and Speech Therapy Services Handbook (Vol. 2, Provider Handbooks)* for information about home health PT, OT, and ST services.

### 3.2.1 Skilled Nursing Visits

SN visits are limited to SN procedures performed by an RN or LVN licensed to perform these services under the Texas Nursing Practice Act and include the following:

- Direct SN care, and parent, guardian, or caregiver training and education
- SN observation, assessment, and evaluation by an RN, provided a physician or an allowed practitioner specifically requests that a nurse visit the client for this purpose, and the physician or allowed practitioner's order reflects the medical necessity for the visit
- Supervision of delegated services provided by an HHA or others over whom the RN is administratively or professionally responsible

SN care consists of those services that must, under State law, be performed by an RN or LVN, and meet the criteria for SN services specified in the Code of Federal Regulations (42 CFR §§ 409.32, 409.33, and 409.44):

- In determining whether a service requires the skill of a licensed nurse, consideration must be given to the inherent complexity of the service, the condition of the client, and the accepted standards of medical and nursing practice.
- The fact that the SN service can be, or is, taught to the client or to the client's family or friends does not negate the skilled aspect of the service when the service is performed by a nurse.
- If the service could be performed by the average nonmedical person, the absence of a competent person to perform it does not cause it to be a SN service.
- If the nature of a service is such that it can safely and effectively be performed by the average nonmedical person without direct supervision of a licensed nurse, the service cannot be regarded as a SN service.
- Some services are classified as SN services on the basis of complexity alone (e.g., intravenous and intramuscular injections or insertion of catheters), and if reasonable and necessary to the treatment of the client's illness or injury, would be a benefit on that basis. However, in some cases, the client's

condition may cause a service that would ordinarily be considered unskilled to be considered an SN service. This would occur when the client's condition is such that the service can be safely and effectively provided only by a nurse.

- A service, which, by its nature, requires the skills of a nurse to be provided safely and effectively continues to be a skilled service even if it is taught to the client, the client's family, or other caregivers. Where the client needs the SN care and there is no one trained, able and willing to provide it, the services of a nurse would be reasonable and necessary to the treatment of the illness or injury.
- The SN services must be reasonable and necessary to the diagnosis and treatment of the client's illness or injury within the context of the client's unique medical condition. To be considered reasonable and necessary for the diagnosis or treatment of the client's illness or injury, the services must be consistent with the nature and severity of the illness or injury, the client's particular medical needs, and within accepted standards of medical and nursing practice. A client's overall medical condition is a valid factor in deciding whether skilled services are needed. A client's diagnosis should never be the sole factor in deciding whether the service the client needs is either skilled or not skilled.
- The determination of whether the services are reasonable and necessary should be made in consideration of the physician or allowed practitioner's determination that the services ordered are reasonable and necessary. The services must, therefore, be viewed from the perspective of the condition of the client when the services were ordered, and what was, at that time, reasonably expected to be appropriate treatment for the illness or injury throughout the certification period.
- The SN care must be provided on a part-time or intermittent basis.

Professional nursing provided by an RN, as defined in the Texas Nursing Practice Act, means the performance of an act that requires substantial specialized judgment and skill, the proper performance of which is based on knowledge and application of the principles of biological, physical, and social science as acquired by a completed course in an approved school of professional nursing. The term does not include acts of medical diagnosis or the prescription of therapeutic or corrective measures. Professional nursing involves:

- The observation, assessment, intervention, evaluation, rehabilitation, care and counsel, or health teachings of a person who is ill, injured, infirm, or experiencing a change in normal health processes.
- The maintenance of health or prevention of illness.
- The administration of a medication or treatment as ordered by a physician or an allowed practitioner, podiatrist, or dentist.
- The supervision of delegated nursing tasks or teachings of nursing.
- The administration, supervision, and evaluation of nursing practices, policies, and procedures.
- The performance of an act delegated by a physician or an allowed practitioner.
- Development of the nursing care plan.

Vocational nursing, as defined in the Texas Nursing Practice Act, means a directed scope of nursing practice, including the performance of an act that requires specialized judgment and skill, the proper performance of which is based on knowledge and application of the principles of biological, physical, and social science as acquired by a completed course in an approved school of vocational nursing. The term does not include acts of medical diagnosis or the prescription of therapeutic or corrective measures. Vocational nursing involves:

- Collecting data and performing focused nursing assessments of the health status of an individual.
- Participating in the planning of the nursing care needs of an individual.
- Participating in the development and modification of the nursing care plan.

- Participating in health teaching and counseling to promote, attain, and maintain the optimum health level of an individual.
- Assisting in the evaluation of an individual's response to a nursing intervention and the identification of an individual's needs.
- Engaging in other acts that require education and training, as prescribed by board rules and policies, commensurate with the nurse's experience, continuing education, and demonstrated competency.

### **3.2.2 Home Health Aide Visits**

HHA visits are intended to provide hands-on personal care, performance of simple procedures as an extension of therapy or nursing services, assistance in ambulation or exercises, and assistance in administering medications that are ordinarily self-administered.

Any HHA services offered by a home health agency must be provided by a qualified HHA under the supervision of a qualified licensed individual (e.g., RN, PT, or OT) employed by the home health agency.

The duties of an HHA during a visit include, but are not limited to:

- Obtaining and recording the client's vital signs (temperature, pulse, respirations, blood pressure)
- Observation, reporting and documentation of the client's status, and the care or service furnished
- Personal care (hygiene and grooming) including, but not limited to:
  - Sponge, tub, or shower bath
  - Shampoo, sink, tub or bed bath
  - Nail and skin care
  - Oral hygiene
- Toileting and elimination care
- Ambulation
- Exercise
- Range of motion
- Safe transfer
- Positioning
- Assisting with nutrition and fluid intake
- Household services essential to the client's health care at home
- Assistance with medications that are ordinarily self-administered
- Reporting changes in the client's condition and needs
- Completing appropriate documentation

#### **3.2.2.1 Supervision of Home Health Aides**

Supervision, as defined by the Texas Nursing Practice Act, is the process of directing, guiding, and influencing the outcome of an individual's performance of an activity.

An RN or therapist (PT or OT) must provide the HHA written instructions for all the tasks delegated to the HHA. A therapist may prepare the written instructions if the client is receiving only HHA visits, which do not include delegated SN tasks, in addition to the therapy services.

The requirements for HHA supervision are as follows:

- When only HHA visits are provided, an RN must make a supervisory visit to the client's residence at least once every 60 days. The supervisory visit must occur when the HHA is providing care to the client.
- When SN, PT, or OT visits are provided in addition to an HHA visit, an RN must make a supervisory visit to the client's residence at least every two weeks. The supervisory visit must occur when the HHA is providing care to the client.
- When only PT or OT visits are provided in addition to HHA visits, the appropriate therapist may make the supervisory visit in place of an RN. The supervisory visit must occur when the HHA is providing care to the client.
- Documentation of HHA supervision must be maintained in the client's medical record.

### **3.3 Home Health Skilled Nursing and Home Health Aide Services Providers**

Providers must be a licensed and certified home health agency enrolled in Texas Medicaid and must comply with all applicable federal, state, and local laws and regulations, and Texas Medicaid's policies and procedures.

All providers must maintain written policies and procedures for:

- Obtaining consent for medical treatment for clients in the absence of the primary caregiver that meets the standards of the Texas Family Code, Chapter 32.
- Obtaining physician or allowed practitioner's signatures for all telephone orders within 14 calendar days of receipt of the order.

Providers must only accept clients on the basis of a reasonable expectation that the client's needs can be adequately met in the place of service. The essential elements of safe and effective home health SN and HHA services include a trained parent, guardian, or caregiver, a primary physician or an allowed practitioner, competent providers, and an environment that supports the client's health and safety needs.

- The place of service must be able to support the health and safety needs of the client and must be adequate to accommodate the use, maintenance, and cleaning of all medical devices, equipment, and supplies required by the client.
- Necessary primary and back-up utility, communication, and fire safety systems must be available.

A parent or guardian, primary caregiver, or alternate care giver may not provide SN or HHA services even if he or she is an enrolled provider or employed by an enrolled provider.

### **3.4 Authorization Requirements**

Home Health SN and HHA visits require prior authorization.

Prior authorization of SN or HHA visits requires that a client's primary physician or an allowed practitioner:

- Provides an order for SN or HHA visits or recertification, identifying that the prescribed SN or HHA visits are medically necessary as defined in the Statement of Benefits
- The physician or allowed practitioner's documentation in the client's medical record must support the prescribed SN or HHA visits are medically necessary as defined in the Statement of Benefits
- The physician or allowed practitioner's documentation in the client's medical record must support that the client's medical condition is sufficiently stable to permit safe delivery of SN or HHA visits as described in the home health services POC

- Establishes a medical POC, which is maintained in the client's medical record
- Provides continuing care and medical supervision
- Provides specific written, dated orders for clients receiving SN or HHA visits
- Reviews and approves the home health services POC at least every 60 days, or more frequently as the physician or allowed practitioner determines necessary, including but not limited to when the client's condition changes

SN visits requested primarily to provide the following will not be prior authorized:

- Respite care
- Child care
- Activities of daily living for the client
- Housekeeping services
- Routine post-operative disease, treatment, or medication teaching after a physician or an allowed practitioner visit
- Routine disease, treatment, or medication teaching after a physician or an allowed practitioner visit
- Individualized, comprehensive case management beyond the service coordination required by the Texas Nursing Practice Act

**Note:** Clients who are 20 years of age or younger may be eligible for private duty nursing services and personal care services through Texas Medicaid Private Duty Nursing Services and Personal Care Services Policies.

HHA visits requested for the following will not be prior authorized when:

- Primarily requested to perform housekeeping services
- Provided to a client residing in a hospital, SN facility, or intermediate care facility

**Note:** Clients who are 20 years of age or younger may be eligible for private duty nursing services and personal care services through Private Duty Nursing (PDN) Services - THSteps-CCP or Personal Care Services (PCS) - THSteps-CCP).

Certain facilities are required by licensure to meet all the medical needs of the client. SN or HHA visits will not be authorized for clients receiving care in any of the following facilities:

- Hospitals
- SN facilities
- Intermediate care facilities for the individuals with intellectual disability (ICF-IID)
- Special care facilities, including but not limited to, sub-acute units or facilities for the treatment of acquired immune deficiency syndrome (AIDS)
- Prescribed pediatric extended care centers, unless the SN and/or HHA services are provided before or after PPECC services, when rendered on the same day.

When a client, client's responsible adult, client's physician or an allowed practitioner notifies the SN and/or HHA service provider that the client also receives services from a PPECC, the SN and/or HHA service provider must coordinate services with the PPECC provider to prevent duplication of services.

**Note:** It is anticipated that the provision of SN and/or HHA services, in addition to PPECC would be uncommon.

### 3.4.1 Initial Assessment and Reassessments

When a provider has received a referral and has physician or allowed practitioner's orders for SN or HHA services, the provider must have an RN perform an initial client assessment in the client's home.

A client can be referred to a home health agency for SN or HHA services by:

- The client
- The client's physician or allowed practitioner
- The client's family

The client assessment or reassessment should include, but is not limited to, the following:

- A nursing assessment of medical necessity for the requested visits, which includes:
  - Complexity and intensity of the client's care
  - Stability and predictability of the client's condition
  - Frequency of the client's need for SN care
  - Identified medical needs and goals
  - Description of wounds, if present
  - Cardiac status
- Whether the setting can support the health and safety needs of the client and is adequate to accommodate the use, maintenance, and cleaning of all medical devices, equipment, and supplies required by the client.
- Comprehension level of parent, guardian, caregiver, or client.
- Receptivity to training and ability level of the parent, guardian, caregiver, or client.

The initial assessment and any reassessments performed by an RN are required when changes in the client's condition occur during the course of the authorization period. If there is no change in the client's condition, the reassessment must document medical necessity, as defined in the Statement of Benefits, to support continued and ongoing SN or HHA visits beyond the initial 60 day authorization period.

A reassessment is required when the SN and/or HHA provider is notified by the client, client's responsible adult, the client's physician or allowed practitioner that PPECC services have been initiated.

### 3.4.2 Home Health Services Plan of Care Requirements

The initial assessment or reassessments are used to establish and revise the home health services POC and must support the client's medical necessity for SN services, HHA services, PT services, and OT services.

**Note:** Providers must use the Texas Medicaid home health services POC located on the TMHP Prior Authorization Texas Medicaid Forms web page; the Centers of Medicare and Medicaid (CMS) Form 485 will not be accepted.

The POC must be initiated and written in a clear and legible format by the RN and include the following:

- The client's Medicaid number, the physician or allowed practitioner's license number, and the provider's Medicaid number
- Date the client was last seen by the physician or allowed practitioner
- The start of care (SOC) date for home health services
- All pertinent diagnoses
- The client's mental status

- The prognosis
- The types of service requested, including the number of visits and amount, duration, and frequency
- The equipment or supplies required
- Rehabilitation potential
- Prior and current functional limitations
- Activities permitted
- Nutritional requirements
- Medications, including the dose, route and frequency
- Treatments, including amount and frequency
- Wound care orders and measurements
- Safety measures to protect against injury
- Available caregiver
- List all community or state agency services the client receives in the home including, but not limited to, primary home care (PHC), community based alternative (CBA), medically dependent children's program (MDCP)
- Instructions for timely discharge or referral
- Documentation of coordination with PPECC, when a client receives ongoing skilled nursing in a PPECC setting. When a client receives PPECC, the SN and/or HHA provider must provide a medical rationale to support the need for SN and/or HHA services, when PPECC services are provided on the same day.

The POC must be accompanied by the physician or allowed practitioner's signed and dated orders, or must be signed and dated by the physician or allowed practitioner. The POC must include the SOC date (when the services will begin) and must be signed and dated by the assessing RN.

When a provider has received signed physician or allowed practitioner's orders for SN or HHA visits, the POC does not require a physician or an allowed practitioner's signature before the provider contacts the claims administrator for prior authorization of services. The POC must be signed and dated by a physician or an allowed practitioner familiar with the client prior to submitting a claim for services, and no later than 30 days from the SOC date.

The type and frequency of visits, supplies, or DME must appear in the POC before the physician or allowed practitioner signs the POC and may not be added after the physician or allowed practitioner has signed the POC. If any change in the POC occurs during a prior authorization period (additional visits, supplies, or DME), the provider must update the POC, have the physician or allowed practitioner sign the updated POC, and contact the claims administrator for prior authorization.

**Note:** *Verbal physician or allowed practitioner orders may only be given to people authorized to receive them under state and federal law. They must be reduced to writing, signed and dated by the RN or qualified therapist responsible for furnishing or supervising the ordered service. The physician or allowed practitioner must sign the written copy of the verbal order within two weeks, or per agency policy if less than two weeks. A copy of the written verbal order must be maintained in the client's medical record prior to and after being signed by the physician or allowed practitioner.*

**Note:** *All documentation, including all written and verbal orders, and all physician- or allowed practitioner-signed POCs, must be maintained by the physician or allowed practitioner, and the home health agency must keep the original, signed copy of the POC in the client's medical record.*

The client must be seen by a physician or allowed practitioner within 30 days of the initial SOC, and at least once every six months thereafter unless the client's condition changes.

A revised POC is required for every request for any change in SN or HHA visits. The revised POC must include all continuing and new orders. The revised POC must be updated to document any changes in the client's condition or diagnosis.

A new POC is required with every request for recertification. The new POC must include all continuing and new orders. The new POC must document all changes in the client's condition or diagnosis and reflect the need for continued SN or HHA services in relation to the original need for care. The physician or allowed practitioner must certify he or she has provided continuing care and medical supervision including, but not limited to, examination or treatment of the client within six months or when the client's condition has changed.

#### **3.4.2.1 Written Plan of Care (POC)**

A home health services POC is required for SN, HHA, OT, or PT services. The POC is not required as an attachment with the claim, but a signed and dated POC must be maintained by the provider and primary physician in the client's medical record. The client's primary physician must recommend, sign, and date a POC. The POC must be initiated by the RN in a clear and legible format.

**Referto:** Subsection 4.6, "Frequency and Duration Criteria for PT, OT, and ST Services" in the *Physical Therapy, Occupational Therapy, and Speech Therapy Services Handbook (Vol. 2, Provider Handbooks)* for additional information about PT, OT, and ST services.

Services billed in excess of those authorized for the prior authorization week or month are subject to recoupment.

For the home health services POC to be valid, the primary physician must sign and date it, and indicate when the services will begin. The home health agency must update and maintain the POC at least every 60 days or as necessitated by a change in the client's condition.

#### **3.4.2.2 DME and Medical Supplies Submitted with a Plan of Care (POC)**

The cost of incidental medical supplies used during an SN or HHA visit are included in the rate for G0299 and G0300. Medical supplies left at the home for the client to use must be billed with the National Provider Identifier (NPI) enrolled as a DME supplier after prior authorization has been granted by the TMHP Home Health Services Prior Authorization Department.

**Referto:** Subsection 2.2, "Services, Benefits, Limitations and Prior Authorization" in the *Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook (Vol. 2, Provider Handbooks)* for information about DME and medical supplies prior authorization.

When the home health services POC is used to submit a prior authorization for DME or medical supplies that will be used in conjunction with the professional services provided by the agency, such as SN, HHA, OT, or PT, the home health agency's DME NPI must be submitted on the POC, and all of the requested DME and medical supplies must be listed in the "Supplies" section of the POC.

The POC does not require a physician's signature before prior authorization of professional services, DME, or medical supplies is requested but does require the assessing RNs dated signature. The POC must be signed and dated by a primary physician familiar with the client prior to submitting a claim for services and no later than 30 days from the SOC date.

If the home health agency uses the Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form, the agency must complete Section A. A primary physician familiar with the client must complete, sign, and date Section B prior to submission to TMHP for prior authorization of the requested DME or medical supplies.

The following information is required to consider these medical supplies for prior authorization:

- Item description

- Procedure code
- Quantity of each medical supply requested
- Manufacturer's suggested retail price (MSRP) for items that do not have a maximum fee assigned

**Referto:** Subsection 2.2, "Services, Benefits, Limitations and Prior Authorization" in the *Durable Medical Equipment, Medical Supplies, and Nutritional Products Handbook* (Vol. 2, *Provider Handbooks*) for information about DME and medical supplies prior authorization.

### 3.4.3 Prior Authorization of SN and HHA Services

Prior authorization requests may be submitted to the TMHP Prior Authorization Department by mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

**Referto:** Subsection 5.5.1.2, "Document Requirements and Retention" in "Section 5: Fee-for-Service Prior Authorizations" (Vol. 1, *General Information*) for additional information about electronic signatures.

Home Health SN and HHA services require prior authorization. Providers must obtain authorization within three business days of the SOC date for an initial authorization. For recertifications, providers must obtain authorization within seven business days of the new SOC date. During the authorization process, providers are required to deliver the requested services from the SOC date, which is the date agreed to by the physician or allowed practitioner, the RN, the Home Health Agency, and the client, parent, guardian, or caregiver. The SOC must be documented on the POC.

A provider requesting prior authorization for SN or HHA Services must submit the following documentation:

- A completed client assessment
- A completed Texas Medicaid home health services POC that must:
  - Be signed and dated by the assessing RN
  - Signed and dated by the physician or allowed practitioner or submitted with the signed and dated physician or allowed practitioner's orders.

**Note:** To complete the prior authorization process by paper, the SN or HHA provider must fax or mail the completed documentation to the Home Health prior authorization unit and retain a copy of the signed and dated documentation in the client's medical record at the provider's place of business.

**Note:** To complete the prior authorization process electronically, the SN or HHA provider must complete the prior authorization requirements through any approved electronic methods and retain a copy of the signed and dated documentation in the client's medical record at the provider's place of business.

**Note:** All documentation, including all written and verbal orders, and all physician- or allowed practitioner-signed POCs, must be maintained by the ordering physician or allowed practitioner, and the home health agency must keep the original, signed copy of the POC in the client's medical record.

Requests must be based on the medical needs of the client. Documentation must support the quantity and frequency of intermittent or part-time SN or HHA visits that will safely meet the client's needs. The amount and duration of SN or HHA visits requested will be evaluated by the claims administrator.

The home health agency must ensure the requested services are supported by the client assessment, POC, and the physician or allowed practitioner's orders.

The length of the authorization is determined on an individual basis and is based on the goals and timelines identified by the physician or allowed practitioner, home health agency, RN, and client, parent, guardian, or caregiver. SN and HHA visits will be prior authorized for no more than 60 days at a time. As a client's problems are resolved and goals are met, a client's condition is expected to become more stable, and the client's needs for SN and HHA services may decrease.

#### **3.4.3.1 Routine Laboratory Specimens**

SN visits to obtain routine laboratory specimens may be considered when the only alternative to obtain the specimen is to transport the client by ambulance.

#### **3.4.3.2 Home Phototherapy**

SN visits to address hyperbilirubinemia will not be considered for prior authorization if the client has an open authorization for home phototherapy. Home phototherapy is reimbursed as a daily global fee and includes coverage of SN visits for client, parent, or caregiver teaching and monitoring, and customary and routine laboratory work.

#### **3.4.3.3 Prothrombin Time/Internationalized Normalized Ration (TP/INR) Home Testing Device**

SN visits will not be authorized for the set-up or teaching of the Prothrombin Time/Internationalized Normalized Ration (TP/INR) home testing device.

#### **3.4.3.4 Total Parenteral Nutrition (TPN)**

SN visits to address total parenteral nutrition (TPN) must:

- Be provided by an RN appropriately trained in the administration of TPN.
- Include education of the client or caregiver regarding the in-home administration of TPN before administration initially begins.
- Include the use and maintenance of required supplies and equipment.
- Occur at least once every month to monitor the client's status and to provide ongoing education to the client or caregivers regarding the administration of TPN.

For clients receiving PDN who also require TPN administration education, intermittent SN visits may be considered for separate prior authorization when:

- The PDN provider is not an RN appropriately trained in the administration of TPN, and the PDN provider is not able to perform the function.
- There is documentation to support the medical need for an additional skilled nurse to perform TPN.

The SN services may be prior authorized only for the client or caregiver training in TPN administration.

#### **3.4.3.5 Instruction in the Self-administration of Prescribed Injections**

For clients receiving SN visits, instruction to the client or caregiver in the self-administration of prescribed injections (IM, SQ, or IV), including but not limited to Factor 8 and IVIg are considered part of the existing authorized skilled nursing home visits. Additional nursing visits for teaching and (initial) supervision to the client or caregiver will not be allowed.

Instruction and initial supervision must be provided by an RN appropriately trained in the administration of the drug or product being administered, and the client and caregiver must be involved in the decision to self-administer the medication.

The client or caregiver administering the injectable medication (IM, SQ, or IV), including but not limited to Factor 8 product or IVIg, must:

- Be medically stable.

- Have a history of compliance with other medications.
- Have a simple drug regimen.
- Have the ability to read and understand directions on the medication label.
- Demonstrate knowledge of the administration technique, maintenance of the required supplies and equipment, and storage requirements.

SN visits will not be approved for the sole purpose of instructing the client on the use of the subcutaneous injection port device. Any necessary instruction must be performed as part of the office visit with the prescribing physician or allowed practitioner.

#### **3.4.3.6 Prior Authorization Status and Limitations**

The claims administrator will notify the provider of the authorization or other action taken on the request for services.

Up to a maximum combined total of three SN and HHA visits may be prior authorized per day. One visit may last up to a maximum of 2.5 hours. SN or HHA visits may be provided on consecutive days.

***Note:** When documentation does not support medical necessity for home health SN or HHA visits, providers may be directed to possible alternative services based on the client's age and needs.*

A nurse or HHA may be authorized to provide services to more than one client over the span of the day as long as:

- Each client's care is based on an individualized POC; and
- Each client's needs and POC do not overlap with another client's needs and POC.

Settings in which a nurse or HHA provider may provide services in a provider-client ratio greater than 1:1 include, but are not limited to, homes with more than one client receiving home health services, foster homes, and independent living arrangements.

A prior authorization for SN or HHA visits is no longer valid when:

- The client is no longer eligible for Medicaid;
- The client no longer meets the medical necessity criteria for SN or HHA services;
- The place of service cannot provide for the health and safety of the client;
- The client, parent, guardian, or caregiver refuses to comply with the attending physician or allowed practitioner's plan of treatment and compliance is necessary to assure the health and safety of the client; or
- The client changes providers and the change of notification is submitted to the claims administrator in writing with a prior authorization request from the new provider.

#### **3.4.3.7 Canceling a Prior Authorization**

The client has the right to choose their home health agency provider and to change providers. If the client changes providers, TMHP must receive a change of provider letter with a new POC or Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form. The client must sign and date the letter, which must include the name of the previous provider, the current provider, and the effective date for the change.

The client is responsible for notifying the original provider of the change and the effective date. Prior authorization for the new provider can only be issued up to three business days before the date TMHP receives the change of provider letter and the new Home Health Services (Title XIX) DME/Medical Supplies Physician Order Form.

### 3.4.4 Medicare and Medicaid Prior Authorization

Qualified Medicare Beneficiaries (QMB) are not eligible for Medicaid benefits. Providers should not submit prior authorization requests to the TMHP Home Health Services Prior Authorization Department for these clients.

For eligible Medicare and Medicaid clients, Medicare is the primary insurance and providers must contact Medicare first for prior authorization and reimbursement. Home health service prior authorizations may be given for HHA services, certain medical supplies, or DME suitable for use in the home in one of the following instances:

- When an eligible Medicaid client (enrolled in Medicare) does not qualify for home health services under Medicare because SN care, OT, or PT are not a part of the client's care.
- When the medical supplies and DME are not a benefit of Medicare Part B and are a home health services benefit.

Federal and state laws require the use of Medicaid funds for the payment of most medical services only after all reasonable measures have been made to use a client's third party resources or other insurance.

**Note:** *If the client has Medicare Part B coverage, contact Medicare for prior authorization requirements and reimbursement. If the service is a Part B benefit, do not contact TMHP for prior authorization.*

To ensure that Medicare benefits are used first in accordance with Texas Medicaid regulations, the following procedures apply when requesting Medicaid prior authorization and payment of home health services for clients:

- Contact TMHP for prior authorization of Medicaid services (based on medical necessity and home health services benefits) within 30 days of the date on the MRAN. Fax a copy of the original MRAN and the Medicare appeal review letter to the TMHP Home Health Services Prior Authorization Department for prior authorization.
- An MRAN is not required when a client is eligible for Medicare or Medicaid and needs HHA visits only. However, a skilled supervisory nursing visit must be made on the same day as the initial HHA visit and at least every 60 days (on the same day an HHA visit is made) thereafter as long as no skilled need exists. An SN supervisory visit is reimbursable, but an SN visit made for the primary purpose of assessing a client's nursing care is not. The SOC date will be the date of the first requested Medicare home health services visit as listed on the original MRAN.

**Note:** *Claims for State of Texas Access Reform (STAR)+PLUS MQMB clients (those with Medicare and Medicaid) should always be submitted to TMHP as noted on these pages. The STAR+PLUS health plan is not responsible for these services if Medicare denies the service as not a benefit.*

For Medicaid qualified Medicare beneficiary (MQMB) clients, do not submit prior authorization requests to TMHP if the Medicare denial reason states "not medically necessary."

Medicaid will only consider prior authorization requests if the Medicare denial states "not a benefit" of Medicare.

When the client is 65 years of age or older or appears otherwise eligible for Medicare (e.g., a person who is blind or disabled), but has no Part A or Part B Medicare, the TMHP Home Health Services Prior Authorization Department uses regular prior authorization procedures. In this situation, the claim is held for a midyear status determined by HHSC. The maximum length of time a claim may be held in a "pending status" for Medicare determination is 90 days. After the waiting period, the claim is paid or denied. If denied, the EOB code on the R&S report indicates that Medicare is to be billed.

**Referto:** Subsection 3.2.1, "Skilled Nursing Visits" in this handbook.

Home health providers should follow these guidelines:

- Clients who are 64 years of age and younger without Medicare Part A or B:
- If the agency erroneously submits an SOC notice to Medicare and does not contact TMHP for prior authorization, TMHP does not assume responsibility for any services provided before contacting TMHP. The SOC date is no more than three business days before the date the agency contacts TMHP. Visits made before this date are not considered a benefit of Texas Medicaid.
- Clients who are 65 years of age and older without Medicare Part A or Part B and clients with Medicare Part A or B regardless of age:
- In filing home health claims, home health providers may be required to obtain Medicare denials before TMHP can approve coverage. When TMHP receives a Medicare denial, the SOC is determined by the date the agency requested coverage from Medicare. If necessary, the 95-day claims filing deadline is waived for these claims, provided TMHP receives notice of the Medicare denial within 30 days of the date on the MRAN containing Medicare's final disposition.
- If the agency receives the MRAN and continues to visit the client without contacting TMHP by telephone, mail, or fax within 30 days of the date on the MRAN, TMHP will provide coverage only for services provided from the initial date of contact with TMHP. The SOC date is determined accordingly. TMHP must have the MRAN before considering the request for prior authorization.

TMHP will not prior authorize or reimburse the difference between the Medicare payment and the retail price for Medicare Part B eligible clients.

**Referto:** "Section 8: Third Party Liability (TPL)" (*Vol. 1, General Information*).

### 3.5 Home Health SN and HHA Procedure Billing and Limitations

Home Health SN or HHA visits provided by home health agencies enrolled in Texas Medicaid must be billed using procedure codes G0299 (SN), G0300 (SN), and G0156 (HHA) and will be reimbursed per visit of up to 2.5 hours; not to exceed a combined total of three visits per day (7.5 hours total).

The reimbursement methodology for professional services delivered by home health agencies is a statewide visit rate calculated in accordance with 1 TAC §355.8021.

When services are provided to more than one client in the same setting, only the units directly provided to each client at distinct, separate time periods will be reimbursed. Provider documentation must support the services were delivered at distinct, separate time periods. Total home health services billed for all clients cannot exceed the individual provider's total number of hours spent at the place of service.

One as needed (PRN) SN visit may be reimbursed every 30 days outside of the prior authorized visits when SN visits have been authorized for the particular client.

For reimbursement purposes, Home Health SN or HHA services are always billed as place of service 2 (home) regardless of the setting in which the services are actually provided. SN or HHA services provided in the day care or school setting will not be reimbursed.

For all clients, SN visits may be provided in the following locations:

- Home of the client, parent, guardian, or caregiver
- Foster homes
- Independent living arrangements

For all clients, HHA visits may be provided in the following locations:

- Home of the client, parent, guardian, or caregiver
- Foster homes

- Independent living arrangements

An immediate relative, parent or guardian, primary caregiver, or alternate care giver may not be reimbursed for HHA services even if he or she is an enrolled provider or employed by an enrolled provider.

SN and/or HHA services may be billed on the same day as PPECC services, but they may not be billed simultaneously with PPECC services. SN and/or HHA services may be billed before or after PPECC services.

**Note:** *SN and/or HHA services are subject to retrospective review and possible recoupment when the medical record does not document the provision of SN and/or HHA services are medically necessary based on the client's situation and needs. The service provider's record must explain all discrepancies between the service hours approved and the service hours provided. For example: the parents released the provider from all responsibility for the service hours or the agency was not able to staff the service hours. The release of provider responsibility does not indicate the client does not have a medical need for the services during those time periods.*

### 3.5.1 Skilled Nursing Visit for TPN Education

The nurse providing the intermittent SN visit for TPN services will only be reimbursed for time spent delivering client or family instruction and for direct client TPN services. The services delivered must be documented in the client's record.

PDN and SN should not be routinely performed on the same date during the same time period.

PDN and SN will not be considered for reimbursement when the services are performed on the same date during the same time period without prior authorization approval.

If the SN visit for TPN education occurs during a time period when the PDN provider is caring for the client, both the PDN provider and the nurse educator must document in the client's medical record the skilled services individually provided, including but not limited to:

- The start and stop time of each nursing provider's specialized task(s)
- The client condition that requires the performance of skilled PDN tasks during the SN visit for TPN education
- The skilled services that each provided during that time period

Both the intermittent SN visit and the PDN services provided during the same time period may be recouped if the documentation does not support the medical necessity of each service provided.

A skilled nursing visit for TPN education is not allowable in a PPECC setting.

### 3.5.2 Medication Administration Limitations

Nursing visits for the purpose of administering medications are not a benefit if one of the following conditions exists:

- The medication is not considered medically necessary to the treatment of the individual's illness or is not approved by the Food and Drug Administration (FDA) or is being used for indications not approved by the FDA.
- The administration of medication exceeds the therapeutic frequency or duration by accepted standards of medical practice.
- A medical reason does not prohibit the administration of the medication by mouth.
- The client, a primary caregiver, a family member, or neighbor have been taught or can be taught to administer subcutaneous (SQ/SC), intramuscular (IM), and intravenous (IV) injections and has demonstrated competency.
- The medication is a chemotherapeutic agent or blood product SQ/SC, IM, and IV injections.

## 4 Private Duty Nursing (PDN) Services - CCP

### 4.1 Services, Benefits, Limitations, and Prior Authorization

PDN services are a benefit of the Texas Health Steps-Comprehensive Care Program (THSteps-CCP) for Medicaid clients who are 20 years of age or younger. PDN services are nursing services, as described by the Texas Nursing Practice Act and its implementing regulations, for clients who meet the medical necessity criteria, and who require individualized, continuous, skilled care beyond the level of SN visits normally authorized under Texas Medicaid Home Health SN and Home Health Aide (HHA) Services. PDN services may be provided by a registered nurse (RN) or a licensed vocational nurse (LVN).

**Note:** Texas defines a licensed practical nurse (LPN) as a licensed vocational nurse (LVN).

The following procedure code is a benefit of Texas Medicaid when PDN services are provided by a home health agency or an independently enrolled RN or LVN. Appropriate modifiers from the Modifier table must be submitted for reimbursement purposes, but are not required for prior authorization. Independently enrolled RNs or LVNs must include modifier U3 along with TD or TE for reimbursement purposes. An appropriate diagnosis from the Diagnosis Codes table must be submitted when modifier UA is used to obtain additional reimbursement for clients with a tracheostomy or who are ventilator dependent.

| Procedure Code |  |  |
|----------------|--|--|
| T1000          |  |  |

| Modifiers |                                 |
|-----------|---------------------------------|
| TD        | Registered nurse (RN)           |
| TE        | Licensed vocational nurse (LVN) |
| U3        | Independently enrolled provider |
| UA        | Specialized services            |

| Diagnosis Codes for use with Modifier UA only |       |       |       |       |       |        |      |
|-----------------------------------------------|-------|-------|-------|-------|-------|--------|------|
| J9500                                         | J9501 | J9502 | J9503 | J9504 | J9509 | J95850 | Z430 |
| Z930                                          | Z990  | Z9911 | Z9912 | Z9981 | Z9989 |        |      |

**Example:** Procedure code T1000 would be submitted with modifiers TD, U3, and UA for reimbursement purposes for PDN in increments of up to 15 minutes when provided by an independently enrolled RN to a client who has a tracheostomy or is ventilator dependent.

Because of the nature of the service being provided, some billing situations are unique to PDN. These billing requirements are as follows:

- All hours worked on one day must be billed together, on one detail, even if they involve two shifts. For example, if Nurse A works 7 a.m. to 11 a.m. and then returns and works 7 p.m. to 11 p.m., services must be billed for 8 hours (32 15-minute units) on one detail for that date of service.
- An individually-enrolled nurse will not be reimbursed for more than 16 hours of PDN services in one day.

PDN may be delivered in a provider to client ratio other than one-on-one. An RN or LVN may provide PDN services to more than one client over the span of the day as long as each client's care is based on an individualized POC, and each client's needs and POC do not overlap with another client's needs and POC. Only the time spent on direct PDN for each client is reimbursed. Total PDN billed for all clients cannot exceed an individual provider's total number of hours at the POS.

A single nurse may be reimbursed for services to more than one client in a single setting when the following conditions are met:

- The hours for PDN for each client have been authorized through the TMHP Prior Authorization Department.
- Only the actual “hands-on” time spent with each client is billed for that client.
- The hours billed for each client do not exceed the total hours approved for that client and do not exceed the actual number of hours for which services were provided.

**Example:** *If the prior authorized PDN hours for Client A is four hours, Client B is six hours, and the actual time spent with both clients is eight hours, the provider must bill for the actual one-on-one time spent with each client, not to exceed the client’s prior authorized hours or total hours worked. It would be acceptable to bill four hours for Client A and four hours for Client B, or three hours for Client A and five hours for Client B. It would not be acceptable to bill five hours for Client A and three hours for Client B. It would be acceptable to bill ten hours if the nurse actually spent ten hours onsite providing prior authorized PDN services split as four hours for Client A and six hours for Client B. A total of ten hours cannot be billed if the nurse worked only eight hours.*

For reimbursement purposes, PDN must always be submitted with POS 2 (home) regardless of the setting in which services are actually provided. PDN may be provided in any of the following settings:

- Client’s home
- Nurse provider’s home
- Client’s school
- Client’s daycare facility

A parent or guardian of a minor client, or the client’s spouse may not be reimbursed for PDN services even if he or she is an enrolled provider or employed by an enrolled provider.

PDN services are subject to retrospective review and possible recoupment when the medical record does not document the provision of PDN services are medically necessary based on the client’s situation and needs. The PDN services provider’s record must explain all discrepancies between the service hours approved and the service hours provided. For example: the parents released the provider from all responsibility for the service hours or the agency was not able to staff the service hours. The release of provider responsibility does not indicate the client does not have a medical need for the services during those time periods.

#### **4.1.1 Medical Necessity**

Texas Medicaid defines medically necessary EPSDT services as health care, diagnostic services, treatments, and other measures necessary to correct or ameliorate any disability, physical or mental illness, or chronic conditions.

Medicaid clients who are 20 years of age or younger, and who are eligible for THSteps, are entitled to all medically necessary PDN services to promote independence and support the client living at home.

PDN services are considered medically necessary when a client has a disability, physical or mental illness, or chronic condition, and he or she requires continuous, skillful observations, judgments, and interventions to correct or ameliorate his or her health status.

The following elements should always be addressed in documentation submitted with a request for PDN services:

- Dependent on technology to sustain life.

- Requires ongoing and frequent skilled interventions to maintain or improve health status; and delayed skilled intervention is expected to result in:
  - Deterioration of a chronic condition;
  - Loss of function;
  - Imminent risk to health status due to medical fragility; or
  - Risk of death.

#### 4.1.2 PDN Services

All PDN services must be prior authorized.

PDN services provide nursing care and parent, guardian, or responsible adult training and education intended to:

- Optimize client health status and outcomes; and
- Promote family-centered, community-based care as a component of an array of service options by:
  - Preventing prolonged or frequent hospitalizations or institutionalization.
  - Providing cost-effective and quality care in the most appropriate, least restrictive environment.

PDN services are nursing services ordered by a physician, included in the nursing plan of care (POC), and provided by an RN or LVN.

**Note:** *An advanced practice registered nurse (APRN) or a physician assistant (PA) may sign all documentation related to the provision of private duty nursing services on behalf of the client's physician when the physician delegates this authority to the APRN or PA. The APRN or PA provider's signature and license number must appear on the forms where the physician signature and license number blocks are required.*

Professional nursing provided by an RN, as defined in the Texas Nursing Practice Act, means that the performance of an act that requires substantial specialized judgment and skill, the proper performance of which is based on knowledge and application of the principles of biological, physical, and social science as acquired by a completed course in an approved school of professional nursing. The term does not include acts of medical diagnosis or the prescription of therapeutic or corrective measures. Professional nursing involves:

- The observation, assessment, intervention, evaluation, rehabilitation, care and counsel, or health teachings of a person who is ill, injured, infirm, or experiencing a change in normal health processes.
- The maintenance of health or prevention of illness.
- The administration of a medication or treatment as ordered by a physician, podiatrist, or dentist.
- The supervision of delegated nursing tasks or teaching of nursing.
- The administration, supervision, and evaluation of nursing practices, policies, and procedures.
- The performance of an act delegated by a physician.
- Development of the nursing care plan.

Vocational nursing, as defined in the Texas Nursing Practice Act, means a directed scope of nursing practice, including the performance of an act that requires specialized judgment and skill, the proper performance of which is based on knowledge and application of the principles of biological, physical, and social science as acquired by a completed course in an approved school of vocational nursing. The term does not include acts of medical diagnosis or the prescription of therapeutic or corrective measures. Vocational nursing involves:

- Collecting data and performing focused nursing assessments of the health status of an individual.

- Participating in the planning of the nursing care needs of an individual.
- Participating in the development and modification of the nursing care plan.
- Participating in health teaching and counseling to promote, attain, and maintain the optimum health level of an individual.
- Assisting in the evaluation of an individual's response to a nursing intervention and the identification of an individual's needs.
- Engaging in other acts that require education and training, as prescribed by board rules and policies, commensurate with the nurse's experience, continuing education, and demonstrated competency.

Professional and vocational nursing care consists of those services that must, under state law, be performed by an RN or LVN, and are further defined as nursing services in the Code of Federal Regulations (42 CFR §§ 409.32, 409.33, and 409.44).

- In determining whether a service requires the skill of a licensed nurse, consideration must be given to the inherent complexity of the service, the condition of the beneficiary, and the accepted standards of medical and nursing practice.
- The fact that the nursing care can be, or is, taught to the client or to the client's family or friends does not negate the skilled aspect of the service when the service is performed by a nurse.
- If the service could be performed by the average nonmedical person, the absence of a competent person to perform it does not cause it to be a nursing service.
- If the nature of a service is such that it can safely and effectively be performed by the average nonmedical person without direct supervision of a licensed nurse, the services cannot be regarded as nursing care.
- Some services are classified as a nursing care on the basis of complexity alone (e.g., intravenous and intramuscular injections or insertion of catheters), and if medically necessary for the treatment of the client's illness or injury, would be covered on that basis. However, in some cases, the client's condition may cause a service that would ordinarily be considered unskilled to be considered nursing care. This would occur when the client's condition is such that the service can be safely and effectively provided only by a nurse.
- A service that, by its nature, requires the skills of a nurse to be provided safely and effectively continues to be a skilled service even if it is taught to the client, the client's family, or other responsible adults.

Because Texas Medicaid is obligated to provide all medically necessary PDN services, a parent or guardian is not obligated to provide PDN services even if the parent or guardian has received the appropriate training. Medically necessary PDN services will not be denied to clients based on the parent or guardian's ability to provide the necessary PDN services.

PDN services that are intended to provide mainly respite care; child care; or do not directly relate to the client's medical needs or disability are not a benefit of Texas Medicaid.

The delivery of PDN services may inherently result in the relief of the parent, guardian, or responsible adult, child care, or some nonmedical, nonskilled activities in the course of providing nursing care.

### **4.1.3 PDN Providers**

PDN services must be provided by a licensed home health services agency or a licensed and certified home health services agency enrolled in Texas Medicaid or by an RN or LVN enrolled independently with Texas Medicaid. PDN providers must comply with all applicable federal, state, and local laws and regulations and Texas Medicaid policies and procedures.

All providers must maintain written policies and procedures for:

- Obtaining consent for medical treatment for clients in the absence of the parent or guardian that meet the standards of the Texas Family Code, Chapter 32.
- Obtaining physician signatures for all telephone orders within 14 calendar days of receipt of the order.

PDN providers must only accept clients on the basis of a reasonable expectation that the client's needs can be adequately met in the place of service. The essential elements of safe and effective PDN services include a responsible adult when the client is a minor child, a contingency plan, a primary physician, competent providers, and an environment that supports the client's health and safety needs.

The place of service must be able to support the health and safety needs of the client and must be adequate to accommodate the use, maintenance, and cleaning of all medical devices, equipment, and supplies required by the client. Necessary primary and back-up utilities, communications and fire safety systems must be available.

Clients who are 17 years of age or younger must reside with an identified responsible adult who is either trained to provide nursing care or is capable of initiating an identified contingency plan when the scheduled private duty nurse is unexpectedly unavailable.

An identified responsible adult is an individual 18 years of age or older who has agreed to accept the responsibility for a client's provision of food, shelter, clothing, education, nurturing, and supervision. Responsible adults include, but are not limited to: biological parents, adoptive parents, foster parents, guardians, individuals court-appointed as managing conservators, and other family members by birth or marriage.

An identified contingency plan is a structured process, designed by the responsible adult and the PDN provider, by which a client will receive care when a scheduled private duty nurse is unexpectedly unavailable, and the responsible adult is unavailable, or is not trained, to provide the nursing care. The identified responsible adult must be able to initiate the contingency plan.

The responsible adult's signature must be on the form acknowledging:

- Information about PDN has been discussed and received.
- PDN may change or end based on a client's need for nursing care.
- PDN is not authorized for the primary purpose of providing respite, childcare, ADLs, or housekeeping.
- All requirements have been met before seeking prior authorization for PDN.
- The responsible adult has participated in the development of the POC and the nursing care plan for the client.
- Emergency plans have been made and are part of the client's care plan.
- The client or responsible adult agrees to follow the physician's POC.

**Note:** *A responsible adult of a minor client or a client's spouse may not be reimbursed for PDN even if the responsible adult is an enrolled provider or employed by an enrolled provider.*

PDN services may be delivered in a provider or client ratio other than 1:1.

#### **4.1.4 Authorization Requirements**

PDN services require prior authorization.

All requests for PDN services must be based on the current medical needs of the client.

PDN services will not be prior authorized when:

- The client does not meet medical necessity criteria as defined in the Statement of Benefits.
- The client does not have a primary physician;
- The client is not 20 years of age or younger;
- When the client's needs are not beyond the scope of services available through Medicaid Title XIX Home Health SN or HHA Services because the needs can be met on a part-time or intermittent basis.

Requests for PDN must be based on the current medical needs of the client.

The following criteria are considered for PDN prior authorization:

- The documentation submitted with the request is complete.
- The requested services are nursing services as defined by the Texas Nursing Practice Act and its implementing regulations.
- The explanation of the client's medical needs is sufficient to support a determination that the requested services correct or ameliorate the client's disability, physical or mental illness, or chronic condition.
- The client's nursing needs cannot be met on an intermittent or part-time basis through Texas Medicaid (Title XIX) home health services skilled nursing services.
- There is no TPR financially responsible for the services.

Only those services that meet the medical necessity criteria for PDN are reimbursed. Before the TMHP Prior Authorization Department or MCO determines the requested nursing services do not meet the criteria, the Medical Director contacts the treating physician to determine whether additional information or clarification can be provided that would allow for the prior authorization of the requested PDN. If the Medical Director is not successful in contacting the treating physician or cannot obtain additional information or clarification, the Medical Director makes a decision based on the available information.

Providers must obtain prior authorization within three business days of the SOC for services that have not been prior authorized. During the prior authorization process, providers are required to deliver the requested services from the SOC date. The SOC date is the date agreed to by the physician, the PDN provider, and the client or responsible adult and is indicated on the submitted POC as the SOC date.

**Note:** *The TMHP Prior Authorization Department does not prior authorize an SOC date earlier than seven calendar days before contact with TMHP.*

Requests for nursing services must be submitted on the required Medicaid authorization forms and include supporting documentation. The supporting documentation must:

- Clearly and consistently describe the client's current diagnosis, functional status, and condition.
- Consistently describe the treatment throughout the documentation.
- Provide a sufficient explanation as to how the requested nursing services correct or ameliorate the client's disability, physical or mental illness, or condition.

#### **4.1.4.1 Authorization Forms**

The CCP Prior Authorization Request Form must be completed, signed, and dated by the physician. When PDN services are ordered, by signing the form the physician attests and certifies the client's medical condition is sufficiently stable to permit safe delivery of PDN as described in the plan of care. All requested dates of service must be included.

The POC must be recommended, signed, and dated by the client's primary physician. A POC must meet the standards outlined in the 42 CFR §484.18 related to the written POC. The primary physician must review and revise the POC, in consultation with the provider and the responsible adult, for each prior authorization, or more frequently as the physician deems necessary or the client's situation changes.

The Nursing Addendum to Plan of Care for Private Duty Nursing and/or Prescribed Pediatric Extended Care Centers form addresses PDN eligibility criteria, nursing care plan summary, health history summary, 24-hour schedule, and the rationale for the hours of PDN requested.

The following is a description of the nursing care plan summary:

- The nursing care summary is not a complete nursing care plan.
- Information must be client-focused and detailed.
- The problem list must reflect the reasons that nursing services are needed. The problem list is not the nursing care plan. Providers must identify two-to-four current priority problems from their nursing care plan. The problem does not need to be stated as a nursing diagnosis. The problems listed must focus on the primary reasons that a licensed nurse is required to care for the client. Other attached documents are not accepted in lieu of this section.
- The Goals must relate directly to the problems listed and be client-specific and measurable. Goals may be short- or long-term; however, for many clients who receive PDN, the goals generally are long-term.
- The Outcomes are the effects of the provider's nursing interventions and must be measurable. Generally, these are more short-term than goals. For initial requests, list expected outcomes. Extension requests should note the results of nursing interventions.
- The Progress must be viewed as a "yardstick" or continuum on which progress toward goals is marked. Initial requests must state expected progress for the authorization period. Extension requests must list the progress noted during the previous authorization period. It is recognized that all progress may not be positive.
- The addendum must summarize the client's health problems relating to the medical necessity for PDN.
- The addendum must clearly communicate a picture of the client's overall condition and nursing care needs.
- The summary of recent health history is imperative in determining whether the client's condition is stable or if new nursing care needs have been identified. This section gives the PDN provider an opportunity to describe the client's recent health problems, including acute episodes of illness, hospitalizations, injuries, and so on. The summary should create a complete picture of the client's condition and nursing care needs. The summary may cover the previous 90 days, even though the authorization period is 60 days; however, the objective of the summary is to capture the client's recent health problems and current health priorities. This section should not be merely a list of events. This section is the place to indicate the frequency of nursing interventions if they are different from the physician's order on the POC, such as, the order may be for a procedure to be PRN (Pro Re Nata "As Needed"), but it is actually being performed every two hours.
- The addendum must include the rationale for increasing, decreasing, or maintaining the level of PDN and must relate to the client's health problems and goals.
- The addendum must include the provider's plan to decrease hours or discharge from service (if appropriate).

All direct-care services must be identified in the client's 24-hour daily schedule. It is understood that the schedule may change, as the client's needs change. The TMHP Prior Authorization Department does not have to be notified of changes in the schedule except as they occur when a PDN recertification is requested.

#### **4.1.4.2 Primary Physician Requirements**

The client must have a primary physician who provides continuing care and medical supervision, including, but not limited to, examination or treatment within 30 calendar days prior to the start of PDN services.

The physician visit may be waived when a diagnosis has already been established by the physician, and the client is under the continuing care and medical supervision of the physician. A waiver is valid for no more than 365 days, and the client must be seen by his or her physician at least once every 365 days. The waiver must be based on the physician's written statement that an additional evaluation visit is not medically necessary. This documentation must be maintained by the physician and the provider in the client's medical record.

**Note:** *An advanced practice registered nurse (APRN) or a physician assistant (PA) may sign all documentation related to the provision of private duty nursing services on behalf of the client's physician when the physician delegates this authority to the APRN or PA.*

The primary physician must:

- Provide a prescription for PDN services
- Recommend, sign, and date a plan of care (POC)
- Sign a statement of need that PDN services are medically necessary
- Maintain documentation that the client's medical condition will allow safe delivery of PDN services as described in the POC

The physician recommended POC must include the following:

- The client's Medicaid number; the physician's license number; and the provider's Medicaid number
- Date the client was last seen by the physician
- The start of care (SOC) date for PDN services
- All pertinent diagnoses
- The client's mental status
- The prognosis
- The types of service requested, including the amount, duration, and frequency
- The equipment or supplies required
- Rehabilitation potential
- Prior and current functional limitations
- Activities permitted
- Nutritional requirements
- Medications, including the dose, route, and frequency
- Treatments, including amount and frequency
- Wound care orders and measurements
- Safety measures to protect against injury

- Responsible adult when the client is a minor child
- Contingency plan
- List all community or state agency services the client receives in the home (including, but not limited to, PCS, Community First Choice (CFC), MDCP)
- Instructions for timely discharge or referral
- Client specific goals, including if receiving PPECC, the goal of ensuring coordination of ongoing skilled nursing services with the PPECC provider.
- If the client also receives PPECC services, documentation that the client or client's responsible adult has been involved in the POC development, and description of how ongoing skilled nursing services will be coordinated between PDN and PPECC providers.

**Referto:** 42 CFR §484.18 for additional information about POC requirements.

Physician Recertification of PDN services:

- The primary physician's medical care must comply with the THSteps periodicity schedule.
- The primary physician must provide specific, written, dated orders for clients who are receiving continuing or ongoing PDN services.

#### **4.1.4.3 PDN Provider Requirements**

When a provider receives a referral for PDN services, the provider must have an RN perform a nursing assessment of the client within the client's home environment. This assessment must be performed before seeking prior authorization for PDN services, with any request for PDN services recertification, or any request to modify PDN service hours. The assessment includes, but is not limited to, the determination of:

- Medical necessity for PDN services
- Safety of providing care in the proposed setting;
- Appropriateness of care in the place of service
- Receptivity to training and ability level of the parent, guardian, or responsible adult
- The existing level of care and any additional health-care services to include, but not limited to, School Health and Related Services (SHARS), MDCP, PT, OT, ST, PCS, CFC, or case management services. Services provided under these programs will not prevent a client from obtaining medically necessary services. Certain school services are provided to meet education needs, not medical needs.

When an RN completes a client assessment and identifies a medical necessity for ADLs or health-related functions to be provided by a nurse, the scope of PDN services may include these ADLs or health-related functions.

**Note:** *The TMHP Prior Authorization Department does not review or authorize PDN based on partial or incomplete documentation.*

#### **4.1.4.4 Prior Authorization of PDN Services**

Prior authorization requests may be submitted to the TMHP Prior Authorization Department by mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

**Referto:** Subsection 5.5.1.2, "Document Requirements and Retention" in "Section 5: Fee-for-Service Prior Authorizations" (*Vol. 1, General Information*) for additional information about electronic signatures.

PDN services require prior authorization. Providers must obtain authorization within three business days of the SOC for services that have not been prior authorized. During the authorization process, providers are required to deliver the requested services from the SOC date. The SOC date is the date agreed upon by the physician, the PDN provider, and the client, parent, or guardian and is indicated on the submitted POC as the SOC date.

**Note:** *Not including PDN services provided during the authorization process, coverage periods may not coincide with calendar weeks or months. A prior authorized week coverage period begins from the day of the week the prior authorization period begins on and continues for seven days. For example, if the prior authorization starts on a Thursday, the prior authorization week runs Thursday through Wednesday. The number of nursing hours authorized for a week must be contained in that prior authorization week. Hours billed in excess of those authorized for the PAN week are subject to recoupment.*

A PDN provider requesting prior authorization for PDN services must submit all of the following documentation:

- A completed THSteps-CCP Prior Authorization Request form signed and dated by the primary physician within 30 calendar days prior to the SOC date.
- A completed POC form, signed and dated by the primary physician within 30 calendar days prior to the SOC date.
- A completed Nursing Addendum to Plan of Care for Private Duty Nursing and/or Prescribed Pediatric Extended Care Centers form signed and dated by the primary physician, RN completing the assessment, and client, parent, guardian, or responsible adult within 30 calendar days prior to the SOC date. The Nursing Addendum form must include:
  - An updated problem list
  - An updated rationale or summary page
  - A contingency plan
  - A 24-hour daily care flowsheet
  - A signed Acknowledgement

All documentation must be maintained by the requesting PDN provider. The PDN provider may be asked to submit additional documentation including, but not limited to, nurse's notes, medication administration records, seizure logs, and ventilator logs to support medical necessity as defined in this handbook.

The request can be submitted as follows:

- To complete the prior authorization process by paper, the PDN provider must fax or mail the completed PDN Request Documentation to the TMHP Prior Authorization Department and retain a copy of the signed and dated documentation in the client's medical record at the provider's place of business.
- To complete the prior authorization process electronically, the PDN provider must complete the prior authorization requirements through any approved electronic methods and retain a copy of the signed and dated documentation in the client's medical record at the provider's place of business.

Requests for authorizations of PDN services should always be commensurate with the client's medical needs. Requests for services should reflect changes in the client's condition that affect the amount and duration of PDN.

For clients who are receiving PDN services who also require phototherapy, parent or guardian education, instructional use of the phototherapy equipment, and obtaining laboratory specimens collection are included in the PDN care provided.

Authorizations for more than 16 hours per day will not be issued to a single, independently enrolled nurse.

The length of the authorization is determined on an individual basis and is based on the goals and timelines identified by the physician, provider, and client, parent, or guardian. PDN services will not be authorized for more than six months at a time.

The TMHP Prior Authorization Department or MCO is required to notify the client, parent, or guardian, physician, and provider of the approval, denial, or other action taken in response to the authorization request by fax or mail.

Home Health Agencies must provide written notice to clients of their intent to voluntarily terminate PDN services at least five calendar days prior to terminating services, except in situations of a potential threat to the provider's personal safety.

Independently enrolled RNs or LVNs must provide written notice to clients of his or her intent to voluntarily terminate services at least 30 calendar days prior to terminating services, except in situations where there is a potential threat to the nurse's personal safety.

For clients who are receiving PDN services who also require TPN administration education, intermittent SN visits may be separately authorized when the SN services are for client or client caregiver training in TPN administration, and the PDN provider is not an RN appropriately trained in the administration of TPN, and the PDN provider is not able to perform the function.

**Referto:** Subsection 3.3, "Home Health Skilled Nursing and Home Health Aide Services Providers" in this handbook for detailed information about SN benefits.

If the client has no skilled nursing need other than provision of education for self administration of prescribed injections (IM, SQ, or IV), then the client does not qualify for private duty nursing services. Nursing hours for the sole purpose of education to the client and caregiver may be considered through intermittent home health skilled nursing visits.

#### **4.1.4.5 Initial Authorization**

An initial PDN prior authorization request requires all of the following documentation:

- A completed THSteps-CCP Prior Authorization Request form signed and dated by the primary physician within 30 calendar days prior to the SOC date.
- A completed POC form, signed and dated by the primary physician within 30 calendar days prior to the SOC date.
- A completed Nursing Addendum to Plan of Care for Private Duty Nursing and/or Prescribed Pediatric Extended Care Centers form signed and dated by the primary physician, RN completing the assessment, and client, parent, guardian, or responsible adult within 30 calendar days prior to the SOC date. The completed Nursing Addendum form must include all the following:
  - An updated problem list
  - An updated rationale or summary page
  - A contingency plan
  - A 24-hour daily care flowsheet
  - A signed Acknowledgement

**Note:** *An advanced practice registered nurse (APRN) or a physician assistant (PA) may sign all documentation related to the provision of private duty nursing services on behalf of the client's physician when the physician delegates this authority to the APRN or PA.*

All documentation must be maintained by the requesting PDN provider. The PDN provider may be asked to submit additional documentation including, but not limited to, nurse's notes, medication administration records, seizure logs, and ventilator logs to support medical necessity as defined in this handbook.

Initial requests must be submitted within three business days of the SOC date.

Initial requests may be prior authorized for a maximum of 90 days.

Completed initial requests must be received and dated by the TMHP Prior Authorization Department within three business days of the SOC. The request must be received by the TMHP Prior Authorization Department no later than 5 p.m., Central Time, on the third day to be considered received within three business days. If a request is received more than three business days after the SOC, or after 5 p.m., Central Time, on the third day, authorization is given for dates of service beginning three business days before receipt of the completed request.

#### **4.1.4.6 Revisions**

The provider may request a revision at any time during the authorization period if medically necessary. The provider must notify the TMHP Prior Authorization Department at any time during an authorization period if the client's condition changes and the authorized services are not commensurate with the client's medical needs.

Requests for revisions must be submitted within three business days of the revised SOC date.

Revisions during a current authorization period must fall within that authorization period. If the revision is requested outside of an authorization period, the provider must request a new authorization and submit the following documentation:

- A completed THSteps-CCP Prior Authorization Request form signed and dated by the primary physician within 30 calendar days prior to the SOC date.
- A completed POC form, signed and dated by the primary physician within 30 calendar days prior to the SOC date.
- A completed Nursing Addendum to Plan of Care for Private Duty Nursing and/or Prescribed Pediatric Extended Care Centers form signed and dated by the primary physician, RN completing the assessment, and parent, guardian, client, or responsible adult within 30 calendar days prior to the SOC date.

**Note:** *An advanced practice registered nurse (APRN) or a physician assistant (PA) may sign all documentation related to the provision of private duty nursing services on behalf of the client's physician when the physician delegates this authority to the APRN or PA.*

**Note:** *All documentation must be maintained by the requesting PDN provider. The PDN provider may be asked to submit additional documentation including, but not limited to nurse's notes, medication administration records, seizure logs, and ventilator logs to support medical necessity.*

Revised services may be prior authorized for up to a maximum of six months.

A request for a client that does not satisfy the criteria listed above for a six-month authorization may be authorized for a period up to three months.

The provider is responsible for ensuring that the physician reviews and signs the POC within 30 calendar days of the start date of the revised authorization period, or more often if required by the client's condition or agency licensure. The provider must maintain the physician-signed POC in the client's record. PDN providers should not submit a revised POC unless they are requesting a revision.

Completed requests for revision of PDN hours during the current authorization period must be received by TMHP Prior Authorization Department within three business days of the revised SOC. The request must be received by TMHP Prior Authorization Department no later than 5 p.m., Central Time, on the

seventh day to be considered received within three business days. If a request is received more than three business days after the revised SOC or after 5 p.m., Central Time, on the third day, authorization is given for dates of service beginning three business days before receipt of the completed request.

Revisions to a current certification must fall within the certification period. If the revision extends beyond the current certification period, new authorization documentation must be submitted to TMHP Prior Authorization Department.

#### **4.1.4.7 Required Coordination between PDN and Prescribed Pediatric Extended Care Centers (PPECCs)**

When a client or client's physician notifies the PDN provider that the client also receives services from a Medicaid enrolled PPECC provider, the PDN provider must coordinate services with the PPECC provider. Both PDN and PPECC services are considered ongoing skilled nursing. A client has a choice of PDN, PPECC, or a combination of both PDN and PPECC for ongoing skilled nursing where PPECC services are available. Skilled Nursing services are authorized for a set number of hours based on the client's medical necessity at the time of the prior authorization request. Skilled nursing hours are not expected to increase when the client utilizes a combination of both PDN and PPECC services, unless there is a documented change in medical condition, or the authorized hours are not commensurate to the client's medical needs and additional hours are medically necessary.

PDN and PPECC providers must collaborate in developing their respective 24-hour flow charts found in the Nursing Addendum to Plan of Care for Private Duty Nursing and/or Prescribed Pediatric Extended Care Centers form each time a client's authorization for ongoing skilled nursing is initiated, recertified, and revised.

Both providers must maintain documentation that the client or the client's responsible adult has participated in the development of the POC (e.g., the completed PPECC POC and Nursing Addendum to Plan of Care for Private Duty Nursing and/or Prescribed Pediatric Extended Care Centers, with client or client responsible adult signatures on the Nursing Addendum to Plan of Care for Private Duty Nursing and/or Prescribed Pediatric Extended Care Centers).

Both providers must discuss with the client or the client's responsible adult how care will be coordinated between the two providers.

When a new service is initiated for ongoing skilled nursing services, and the client wants to receive both PDN and PPECC services, the TMHP Prior Authorization Department will compare the Nursing Addendum's 24-hour daily care flow sheets and medical necessity documentation (e.g., authorization requests). Upon subsequent approval of PDN or PPECC services, the provider who submitted the initial prior authorization request that established the number of authorized skilled nursing hours will have their authorized hours reduced to prevent duplication (e.g., if the client currently has PDN, and then adds PPECC services, the PDN hours will be reduced).

When hours are reduced, the PDN or PPECC provider affected by the reduction will be notified by the TMHP Prior Authorization Department when the reduction is effective, and the revised amount of authorized hours. Providers that are affected by the reduction are only required to submit a revision request and documentation of medical necessity if there is a change in the client's medical condition or the client's medical needs are not commensurate with authorized hours and additional ongoing skilled nursing hours are medically necessary. No action is required from the provider affected by the reduction if additional hours are not medically necessary.

#### **4.1.4.8 Client Receives both PDN and PPECC and Shifts Services from One to the Other**

A client receiving both PDN and PPECC services may choose to shift approved hours from one ongoing skilled nursing provider to another.

The receiving provider (PDN or PPECC provider who will gain hours in the shift) must submit all required documentation for a revision.

The sending provider (PDN or PPECC provider who will lose hours in the shift) will receive a notice from the TMHP Prior Authorization Department with revised (decreased) hours and the effective date of the reduction. The sending provider does not need to take any action unless there is a change in the client's medical needs, and additional ongoing skilled nursing hours are medically necessary. If there is a medical need for additional ongoing skilled nursing hours, the sending provider may submit a revision request.

The total combined hours between PDN and PPECC services are not expected to increase without client medical necessity for additional hours (e.g., change in client condition or authorized hours are not commensurate with the client's medical needs).

#### 4.1.4.9 Recertifications

Recertifications may be prior authorized for up to a maximum of six months.

The following criteria must be met before a client receives a recertification:

- The client must have received PDN services for at least three months
- No significant changes in the client's condition for at least three months
- No significant changes in the client's condition are anticipated
- The client's parent or guardian, physician, and provider agree the recertification is appropriate

A recertification request must be submitted at least 7 calendar days before, but no more than 30 days before, a current authorization period will expire. The PDN provider must submit the following documentation with the recertification request:

- A completed THSteps-CCP Private Duty Nursing six-month authorization signed and dated by the primary physician, nurse provider, and client, parent, or guardian
- A completed THSteps-CCP Prior Authorization Request form signed and dated by the primary physician within 30 calendar days prior to the SOC date
- A completed POC form, signed and dated by the primary physician within 30 calendar days prior to the SOC date
- A completed Nursing Addendum to Plan of Care for Private Duty Nursing and/or Prescribed Pediatric Extended Care Centers form signed and dated by the primary physician, RN completing the assessment, and parent, guardian, client, or responsible adult within 30 calendar days prior to the SOC date

**Note:** *An advanced practice registered nurse (APRN) or a physician assistant (PA) may sign all documentation related to the provision of private duty nursing services on behalf of the client's physician when the physician delegates this authority to the APRN or PA.*

**Note:** *All documentation must be maintained by the*

**Note:** *requesting PDN provider. The PDN provider may be asked to submit additional documentation including, but not limited to nurse's notes, medication administration records, seizure logs, and ventilator logs to support medical necessity.*

The provider is responsible for ensuring that the physician reviews and signs the POC within 30 calendar days of the expiration of the authorization period, and this documentation must be maintained in the client's record. PDN providers should not submit a revised POC unless requesting a revision.

**Note:** *An advanced practice registered nurse (APRN) or a physician assistant (PA) may sign all documentation related to the provision of private duty nursing services on behalf of the client's physician when the physician delegates this authority to the APRN or PA.*

The provider may request a revision of a recertification at any time during the recertification period if medically necessary. The provider must notify the claims administrator at any time during a recertification period if the client's condition changes and the authorized services are not commensurate with the client's medical needs.

All authorization timelines apply to recertifications.

Completed extension requests must be received and dated by TMHP Prior Authorization Department at least seven calendar days before, but no more than 30 days before, the current authorization expiration date. The request must be received by TMHP Prior Authorization Department no later than 5 p.m., Central Time, on the seventh day, to be considered received within seven calendar days. If a request is received less than seven calendar days before the current authorization expiration date, or after 5 p.m., Central Time, on the seventh day, authorization is given for dates of service beginning no sooner than seven calendar days after the receipt of the completed request by TMHP Prior Authorization Department.

The nursing care provider must notify TMHP Prior Authorization Department at any time during the authorization period if the client's condition and need for SN care significantly changes.

#### **4.1.4.10 Special Circumstances**

PDN services provided in a school or day care facility, at the request of the family, may be authorized provided the client requires the requested amount of PDN services if in the home.

PDN services may be provided in a hospital, SN facility or intermediate care facility for the individuals with intellectual disabilities, or special care facility with documentation from the facility showing it is unable to meet the SN needs of the client, and the services are medically necessary. These facilities are required by licensure to meet all the medical needs of the client.

#### **4.1.4.11 PDN Services Provided in Group Settings**

PDN services may be authorized in a provider or client ratio other than 1:1.

An RN or LVN may be authorized to provide PDN services to more than one client over the span of the day as long as:

- Each client's care is based on an individualized POC
- Each client's needs and POC do not overlap with another client's needs and POC

Settings in which a PDN provider may provide services in a provider-client ratio greater than 1:1 include, but are not limited to, homes with more than one client receiving PDN, foster homes, or independent living arrangements.

#### **4.1.4.12 Termination of Authorization**

Authorization for PDN services will be terminated when:

- The client is no longer eligible for Medicaid
- The client no longer meets the medical necessity criteria for PDN services
- The place of service does not support the health and safety of the client
- The client, parent, or guardian refuses to comply with the service plan and compliance is necessary to assure the health and safety of the client

#### **4.1.4.13 Appeal of Authorization Decisions**

Providers may appeal denials or modifications of requested PDN services with documentation to support the medical necessity of the requested PDN services. Appeals must be submitted to the TMHP Prior Authorization Department with complete documentation and any additional information within two weeks of the date on the decision letter. If changes are made to the authorization based on this

documentation, TMHP Prior Authorization Department will go back no more than three business days for initial, or revision requests and no more than seven calendar days for recertification requests when additional documentation is submitted.

The client, parent, or guardian will be notified of any denial or modification of requested services and will be given information about how to appeal the TMHP Prior Authorization Department decision.

All documentation must be submitted together, and requests are not reviewed until all documentation is received. If complete documentation is received at TMHP Prior Authorization Department by 3 p.m., Central Time, a response is returned to the provider within one business day. Complete documentation for initial, revision, recertification, and extension requests for PDN authorizations include all of the following:

- CCP Prior Authorization Request Form on the TMHP website at [www.tmhp.com](http://www.tmhp.com).
- Home Health Plan of Care (POC) on the TMHP website at [www.tmhp.com](http://www.tmhp.com).
- Nursing Addendum to Plan of Care for Private Duty Nursing and/or Prescribed Pediatric Extended Care Centers on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

#### **4.1.4.14 Start of Care (SOC)**

The SOC is the date that care is to begin, as agreed on by the family, the client's physician, and the provider, and as listed on the POC and the CCP Prior Authorization Request Form. Providers are responsible for determining whether they can accept the client for services.

Once the provider accepts a client for service and accepts responsibility for providing PDN, the provider is required to deliver those services beginning with the SOC date. Providers are responsible for a safe transition of services when the authorization decision is a denial or a reduction of services. Providers are required to notify the physician and the client's family on receipt of an authorization, a denial, or a change in PDN.

Providers must submit complete documentation no later than three business days from an SOC date to obtain initial coverage for the SOC date.

**Note:** *Texas Medicaid (Title XIX) home health services does not authorize an SOC date earlier than three business days before contact with TMHP.*

For PDN recertification, TMHP Prior Authorization Department must receive complete documentation no later than three business days before the SOC date. It is recommended that recertification requests be submitted up to 30 days before the current authorization ends.

During the prior authorization process for initial and recertification requests, providers are required to deliver the requested services from the SOC date.

#### **4.1.4.15 Client and Provider Notification**

When PDN is approved as requested, the provider receives written notification. The provider is responsible for notifying the client or family and the physician of the authorized services.

The TMHP Prior Authorization Department or MCO notifies the client and provider in writing when the following instances occur:

- PDN is denied.
- PDN hours authorized are less than the hours requested on the POC.
- PDN hours are modified (e.g., hours are requested by the week but are authorized by the day).
- The TMHP Prior Authorization Department or MCO receives incomplete information from the provider.
- Dates of service authorized are different from those requested.

- The provider is responsible for notification and coordination with the physician and family.

#### **4.1.5 Limitations with Other Services**

##### **4.1.5.1 PDN Services with PCS, SHARS, or PPECC**

When clients are receiving both PDN services and PCS from an individual person over the same span of time, all services will be reimbursed according to the maximum allowable fee schedule.

Texas Medicaid will not reimburse providers for PDN services that duplicate services provided by school districts under the SHARS program. If a provider bills Texas Medicaid for PDN services provided to a client at school, then the school district may be asked to provide documentation that it is not also providing PDN services to the same client at the same time and seeking reimbursement for the service under the SHARS program.

PDN services may be billed on the same day as PPECC services, but may not be billed simultaneously with PPECC services. PDN may be billed when it occurs before or after PPECC services.

##### **4.1.5.2 PDN Provided During a Skilled Nursing Visit for TPN Administration Education**

For clients who are receiving PDN services who also require TPN administration education, intermittent SN visits may be separately reimbursed when the SN services are for the client or caregiver training in TPN administration.

**Referto:** Subsection 3.3, “Home Health Skilled Nursing and Home Health Aide Services Providers” in this handbook for detailed information about SN benefits.

PDN and SN should not be routinely performed on the same date during the same time period.

PDN and SN will not be considered for reimbursement when the services are performed on the same date during the same time period without prior authorization approval.

If the SN visit for TPN education occurs during a time period when the PDN provider is caring for the client, both the PDN provider and the nurse educator must document in the client’s medical record the skilled services individually provided, including but not limited to:

- The start and stop time of each nursing provider’s specialized task(s)
- The client condition that requires the performance of skilled PDN tasks during the SN visit for TPN education
- The skilled services that each provided during that time period

Both the intermittent SN visit and the PDN services provided during the same time period may be recouped if the documentation does not support the medical necessity of each service provided.

Intermittent SN visits for clients who receive PDN and who require TPN administration education may be considered for separate prior authorization if:

- The PDN provider is not an RN who has been appropriately trained in the administration of TPN, and the PDN provider is not able to perform the function.
- There is documentation that supports the medical need for an additional skilled nurse to perform TPN.

The SN services may be prior authorized only for the client and caregiver who will be trained in TPN administration.

Clients whose only SN need is the provision of education for self-administration of prescribed subcutaneous (SQ), intramuscular (IM), or intravenous (IV) injections will not qualify for PDN services.

Nursing hours for the sole purpose of providing education to the client and caregiver may be considered through intermittent home health SN visits.

## 5 Documentation Requirements

All documentation, including that which supports medical necessity, and the comprehensive treatment plan related to the therapy services that were prior authorized and provided, must be maintained in the client's medical record and made available upon request.

Documentation elements that are routinely assessed for compliance in retrospective review of client records include, but are not limited to, the required documentation noted previously, as well as the following:

- All entries are legible to people other than the author, dated (month, day, year, time), and signed by the author.
- Each page of the record documents the client's name and Medicaid identification number.
- Client assessment time is documented at the beginning of each shift.
- All nurses' arrival and departure times are documented with signature and time in the narrative section of the nurses' notes.
- Entries in the nursing flowsheet or narrative notes must be dated and timed every 1 to 2 hours and must include the following:
  - The client's condition.
  - The name of the medication, dose, route, time given, client response, and other pertinent information is recorded when medication is administered.
  - The name of treatment, time given, route or method used, client response, and other pertinent information is provided when treatments are administered.
  - The amount, type, times given, route or method used, client response, and other pertinent information is provided when feedings are administered.
- The POC and documentation of services correlate with and reflect medical necessity for the services provided on any given day.
- A request for prior authorization must include documentation from the provider to support the medical necessity of the service, equipment, or supply.
- Client's arrival or departure from the home setting is documented with the time of arrival, departure, mode of transportation, and who accompanied the client.
- Documentation of teaching the client or the client's responsible adult includes the length of time, the subject of the teaching, the understanding of the subject matter by the person receiving the teaching, and other pertinent information.
- Supervisory visits include specifics of the visit.
- If a client is receiving SN services through another program or service in addition to PDN, such as MDCP, each provider's shift notes designate specifically which type of service they are providing during that shift.

## 6 Claims Filing and Reimbursement

### 6.1 Claims Filing

Providers may purchase CMS-1500 or UB-04 CMS-1450 paper claim forms from the vendor of their choice. TMHP does not supply them.

When completing a CMS-1500 or a UB-04 CMS-1450 paper claim form, all required information must be included on the claim, as TMHP does not key information from attachments.

**Referto:** “Section 3: TMHP Electronic Data Interchange (EDI)” (*Vol. 1, General Information*) for information on electronic claims submissions.

“Section 6: Claims Filing” (*Vol. 1, General Information*) for general information about claims filing.

Subsection 6.5, “CMS-1500 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for instructions on completing paper claims.

Subsection 6.6, “UB-04 CMS-1450 Paper Claim Filing Instructions” in “Section 6: Claims Filing” (*Vol. 1, General Information*) for paper claims completion instructions.

### 6.1.1 Home Health Skilled Nursing and Home Health Aide Providers

Providers must use only type of bill (TOB) 321 in Form Locator (FL) 4 of the UB-04 CMS-1450. Other TOBs are invalid and will result in a claim denial. Home health services must be submitted to TMHP in an approved electronic format or on a CMS-1500 or a UB-04 CMS-1450 paper claim form. Submit home health DME and medical supplies to TMHP in an approved electronic format, or on a CMS-1500 or on a UB-04 CMS-1450 paper claim form.

Outpatient claims must have the appropriate revenue code and, if appropriate, the corresponding Healthcare Common Procedure Coding System (HCPCS) code or narrative description. The prior authorization number must appear on the CMS-1500 paper claim form in Block 23 and in Block 63 of the UB-04 CMS-1450 paper claim form. The certification dates or the revised request date on the POC must coincide with the DOS on the claim. Prior authorization does not waive the 95-day filing deadline requirement.

Home health service claims should not be submitted for payment until Medicaid certification is received and a prior authorization number is assigned.

### 6.1.2 PDN Providers

Independently enrolled RNs or LVNs providing PDN services must submit claims on the CMS-1500 claim form. PDN Providers who are home health agencies must submit claims on the UB-04 CMS-1450 claim form.

PDN providers must submit claims for services in an approved electronic claims format or on the appropriate claim form based on their provider type. Home health agencies must submit claims on the UB-04 CMS-1450 paper claim form. Independently enrolled nurses must submit claims on the CMS-1500 paper claim form.

### 6.1.3 Method for Counting Minutes for Timed Procedure Codes

All claims for reimbursement of procedure codes paid in 15-minute increments are based on the actual amount of billable time associated with the service. For those services for which the unit of service is 15 minutes (1 unit = 15 minutes), partial units should be rounded up or down to the nearest quarter hour.

Time intervals for 1 through 12 units are as follows:

| Units   | Number of Minutes             |
|---------|-------------------------------|
| 0 units | 0 minutes through 7 minutes   |
| 1 unit  | 8 minutes through 22 minutes  |
| 2 units | 23 minutes through 37 minutes |
| 3 units | 38 minutes through 52 minutes |
| 4 units | 53 minutes through 67 minutes |

| Units    | Number of Minutes               |
|----------|---------------------------------|
| 5 units  | 68 minutes through 82 minutes   |
| 6 units  | 83 minutes through 97 minutes   |
| 7 units  | 98 minutes through 112 minutes  |
| 8 units  | 113 minutes through 127 minutes |
| 9 units  | 128 minutes through 142 minutes |
| 10 units | 143 minutes through 157 minutes |
| 11 units | 158 minutes through 172 minutes |
| 12 units | 173 minutes through 187 minutes |

## 6.2 Reimbursement

The reimbursement methodology for professional services delivered by home health agencies is a statewide visit rate calculated in accordance with 1 TAC §355.8021.

Home health agencies are reimbursed for DME and medical supplies in accordance with 1 TAC §355.8023.

PDN services are reimbursed in accordance with 1 TAC §355.8441.

Providers can refer to the OFL or the applicable fee schedule on the TMHP website at [www.tmhp.com](http://www.tmhp.com).

Texas Medicaid implemented mandated rate reductions for certain services. The OFL and static fee schedules include a column titled “Adjusted Fee” to display the individual fees with all mandated percentage reductions applied. Additional information about rate changes is available on the TMHP website at [www.tmhp.com/resources/rate-and-code-updates/rate-changes](http://www.tmhp.com/resources/rate-and-code-updates/rate-changes).

**Referto:** Subsection 2.2, “Fee-for-Service Reimbursement Methodology” in “Section 2: Texas Medicaid Fee-for-Service Reimbursement” (*Vol. 1, General Information*).

## 1 General Information

The information in this handbook is intended for Texas Medicaid hospital (medical and surgical acute care facility) providers and covers services that take place only in an inpatient or outpatient hospital setting. The handbook provides information about Texas Medicaid's benefits, policies, and procedures applicable to acute care hospitals, including military hospitals.

**Important:** *All providers are required to read and comply with “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, General Information). In addition to compliance with all requirements specific to Texas Medicaid, it is a violation of Texas Medicaid rules when a provider fails to provide health-care services or items to Medicaid clients in accordance with accepted medical community standards and standards that govern occupations, as explained in Title 1 Texas Administrative Code (TAC) §371.1659. Accordingly, in addition to being subject to sanctions for failure to comply with the requirements that are specific to Texas Medicaid, providers can also be subject to Texas Medicaid sanctions for failure, at all times, to deliver health-care items and services to Medicaid clients in full accordance with all applicable licensure and certification requirements including, without limitation, those related to documentation and record maintenance.*

**Referto:** The *Clinics and Other Outpatient Facility Services Handbook* (Vol. 2, *Provider Handbooks*) for information about services offered in settings such as rural health clinics (RHCs), Federally Qualified Health Centers (FQHCs), dialysis centers, and other similar facilities.

### 1.1 National Drug Codes (NDC)

**Referto:** Subsection 6.3.4, “National Drug Code (NDC)” in “Section 6: Claims Filing” (Vol. 1, *General Information*).

### 1.2 Medicaid Managed Care Services

This handbook contains information about Texas Medicaid fee-for-service benefits. For information about managed care benefits, refer to the *Medicaid Managed Care Handbook* (Vol. 2, *Provider Handbooks*).

Managed care carve-out services are administered as fee-for-service benefits. A list of all carve-out services is available in section 8, “Carve-Out Services” in the *Medicaid Managed Care Handbook* (Vol. 2, *Provider Handbooks*).

## 2 Enrollment

To be eligible to participate in Texas Medicaid, a hospital must be certified by Medicare, have a valid provider agreement with the Health and Human Services Commission (HHSC), and have completed the Texas Medicaid & Healthcare Partnership (TMHP) enrollment process.

### 2.1 Hospital Eligibility Through Change of Ownership

Under procedures set forth by the Centers for Medicare & Medicaid Services (CMS) and the U.S. Department of Health and Human Services (HHS), a change in ownership of a hospital does not terminate Medicare eligibility; therefore, Medicaid participation may be continued subject to the following requirements:

- The provider must obtain recertification as a Title XVIII (Medicare) hospital.
- The hospital under new ownership must submit a new signed and dated HHSC Medicaid Provider Agreement between the hospital and HHSC.

Providers can download the HHSC Medicaid Provider Agreement from the TMHP website at [www.tmhp.com](http://www.tmhp.com).

**Referto:** Subsection 1.4, “Provider Reenrollment” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

### **2.1.1 Hospital-based Ambulatory Surgical Center (HASC) Enrollment**

All hospitals enrolling in Texas Medicaid (except psychiatric and rehabilitation hospitals) are issued an HASC provider number at the time of enrollment.

## **2.2 Hospital-based Rural Health Clinic Enrollment**

To enroll in Texas Medicaid and qualify for participation as a Title XIX RHC, RHCs must be enrolled in Medicare. An RHC can also apply for enrollment as a family planning agency.

All providers of laboratory services must comply with the rules and regulations of the Clinical Laboratory Improvement Amendments (CLIA). Providers who do not comply with CLIA are not reimbursed for laboratory services.

**Referto:** Subsection 9.2, “Services, Benefits, Limitations, and Prior Authorization” in the *Clinics and Other Outpatient Facility Services Handbook* (*Vol. 2, Provider Handbooks*) for RHC benefit and limitation information.

Subsection 1.1, “Provider Enrollment” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*) for more information about enrollment procedures, including information on Changes of Ownership.

Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the *Radiology and Laboratory Services Handbook* (*Vol. 2, Provider Handbooks*).

## **3 Inpatient Hospital (Medical/Surgical Acute Care Inpatient Facility)**

This section contains benefit, limitation, authorization, and claims filing information for inpatient hospital facility accommodation and ancillary services.

**Referto:** “Section 6: Claims Filing” (*Vol. 1, General Information*) for more comprehensive information about claims filing and appeals.

“Section 7: Appeals” (*Vol. 1, General Information*) for more comprehensive information about claims filing and appeals.

Hospital providers are encouraged to review the other handbooks for applicable information, prior authorization requirements, and for specific requirements for special programs.

### **3.1 General Information**

Inpatient hospital services include medically necessary items and services ordinarily furnished by a Texas Medicaid hospital or by an approved out-of-state hospital under the direction of a physician for the care and treatment of patients. Services must be medically necessary and are subject to Texas Medicaid’s utilization review requirements. Claims submitted to TMHP must comply with the applicable Texas Medicaid policies and procedures.

#### **3.1.1 Reimbursement Limitations**

For clients who are 21 years of age and older, Texas Medicaid reimbursement for acute care inpatient hospital services is limited to \$200,000 per client, per benefit year (November 1 through October 31). Claims are reviewed retrospectively, and payments that exceed \$200,000 are recouped.

This \$200,000 limitation does not apply to the following:

- Services related to certain organ transplants.
- Services rendered to Texas Health Steps (THSteps) clients when provided through the Comprehensive Care Program (CCP).

For clients who are 20 years of age and younger, dollar limitations do not apply.

### **3.1.2 Spell of Illness**

Reimbursement to hospitals for inpatient services is limited to the Medicaid spell of illness. The spell of illness is defined as 30 days of inpatient hospital care, which may accrue intermittently or consecutively.

After 30 days of inpatient care is provided, reimbursement for additional inpatient care is not considered until the client has been out of an acute care facility for 60 consecutive days.

Exceptions to the spell of illness are as follows:

- A prior-approved solid organ transplant. The 30-day spell of illness for transplants begins on the date of the transplant, allowing additional time for the inpatient stay.
- THSteps-eligible clients who are 20 years of age and younger when a medically necessary condition exists.

Texas Medicaid will conduct a quarterly utilization review of inpatient claims to determine whether the claims were paid outside of the spell-of-illness limitation.

The first of these utilization reviews were for claims with dates of service from April 27, 2010, through January 6, 2012.

### **3.1.3 Take-Home Drugs, Self-Administered Drug, or Personal Comfort Items**

Take-home drugs and comfort items that are provided by the hospital during an inpatient hospital stay are included in the hospital reimbursement and are not reimbursed separately.

Take-home drugs and supplies may be a benefit through the Vendor Drug Program (VDP) when supplied by prescription.

Self-administered drugs are defined as drugs that the client administers themselves at home and may include, but are not limited to, prescription drugs, vitamins, and supplements. Self-administered drugs provided by the hospital during an inpatient hospital stay are included in the hospital reimbursement and are not reimbursed separately.

The client cannot be billed for take home drugs, comfort supplies or self-administered drugs that are provided by the hospital during an inpatient hospital stay.

### **3.1.4 Services Included in the Inpatient Stay**

The following services are included in the inpatient stay and are not separately reimbursed:

- *Whole blood and packed red blood cells.* Inpatient services include whole blood and packed red blood cells that are reasonable and necessary for treatment of illness or injury. Whole blood and packed red blood cells that are available without cost are not reimbursed by Texas Medicaid.

- *Laboratory, radiology, and pathology services.* Inpatient services include all medically necessary services and supplies ordered by a physician to include laboratory, radiology, and pathology services.

**Note:** *Ultrasound interpretations in the inpatient hospital setting will be denied if they are billed by the attending physician. Services that are billed by the attending physician are included in the facility fee and are not reimbursed separately.*

**Note:** *All providers of laboratory services must comply with the rules and regulations of the Clinical Laboratory Improvement Amendments (CLIA). Providers not complying with CLIA will not be reimbursed for laboratory services.*

**Referto:** Subsection 1.1, “Provider Enrollment” in “Section 1: Provider Enrollment and Responsibilities” (Vol. 1, *General Information*) for more information about enrollment procedures.

Subsection 2.1.1, “Clinical Laboratory Improvement Amendments (CLIA)” in the *Radiology and Laboratory Services Handbook* (Vol. 2, *Provider Handbooks*) for more information about CLIA.

The *Medicaid Managed Care Handbook* (Vol. 2, *Provider Handbooks*).

### 3.1.5 Outpatient Observation Services

Outpatient observation services are not a substitute for a medically appropriate inpatient admission. If a client meets the medical necessity criteria for an inpatient admission and an inpatient admission is ordered by the practitioner, an inpatient admission is a benefit regardless of the length of stay.

**Referto:** Subsection 4.2.4, “Outpatient Observation Room Services” in this handbook for more information.

## 3.2 Services, Benefits, Limitations, and Prior Authorization - Acute Care

Inpatient hospital services include the following:

- Bed and board
- Whole blood and packed red blood cells
- All medically necessary services ordered by a physician to include laboratory, radiology, and pathology
- All medically necessary supplies ordered by a physician
- Medically necessary emergency and non-emergency ambulance transports during the inpatient stay
- Maternity care
- Newborn care
- Inpatient surgery and rehabilitation
- Organ and tissue transplant services
- Colorectal cancer screening services

### 3.2.1 Bed and Board

Inpatient bed and board include semiprivate accommodations or accommodations in an intensive care or coronary care unit. The accommodations include:

- Meals
- Special diets

- General nursing services

Private accommodations including meals, special diets, and general nursing services may be reimbursed up to the hospital's charge for its most prevalent semiprivate accommodations. Bed and board in private accommodations may be reimbursed in full if required for medical reasons as certified by the physician. The hospital must document the medical necessity for a private room (i.e., the existence of a critical or contagious illness, a condition that could result in disturbance to other patients). The medical necessity for the private accommodations must be included in Block 80 of the UB-04 CMS-1450 paper claim form or added as an attachment to the claim submission.

### 3.2.2 Hysterectomy Services

Hysterectomy services are considered for reimbursement when the claim is filed with a signed Hysterectomy Acknowledgment Form or submitted documentation indicates that the Hysterectomy Acknowledgment Form could not be obtained.

Claims for services related to the hysterectomy cannot be reimbursed unless the signed Hysterectomy Acknowledgment Form is on file; consequently, to avoid claim denials, each individual provider is encouraged to submit a copy of the valid Hysterectomy Acknowledgment Form and not rely on another provider to do so.

**Referto:** Subsection 6.13.1, "Hysterectomy Acknowledgment" in the *Gynecological, Obstetrics, and Family Planning Title XIX Services Handbook (Vol. 2, Provider Handbooks)* for additional information.

[Texas Medicaid - Title XIX Acknowledgment of Hysterectomy Information](https://www.tmhp.com) on the TMHP website at [www.tmhp.com](https://www.tmhp.com).

### 3.2.3 Maternity Care

Inpatient maternity care includes usual and customary care for all female clients.

#### 3.2.3.1 Emergency Coverage

For women with a family income at or below 198 percent of the Federal Poverty Level (FPL), hospital facility charges are paid through Emergency Medicaid. A client must be determined eligible for Emergency Medicaid by HHSC for a claim to be paid to a Medicaid provider. Claims are sent to Texas Medicaid & Healthcare Partnership (TMHP) for processing.

#### 3.2.3.2 Mother and Newborn Hospital Stay

Circumstances that require the mother and newborn to remain in the hospital longer than two days for a routine vaginal delivery or four days for a cesarean section must be documented in the clients' medical records.

Continuation of hospitalization is a benefit for the infant when the mother is required to remain hospitalized for medical reasons. The reason for the continuation of hospitalization must be documented in the client's medical record.

#### 3.2.3.3 Children's Health Insurance Program (CHIP) Perinatal Coverage

For clients who are eligible for CHIP perinatal services as determined by HHSC, CHIP perinatal services include newborn services and inpatient hospital charges related to the delivery of the newborn. Preterm or false labor that does not result in a birth are not CHIP perinatal services.

Inpatient services limited to labor with delivery for women with income at or below 202 percent of FPL will be covered under CHIP perinatal. Newborn services will also be covered under CHIP perinatal.

For CHIP perinatal newborns with a family income at or below 198 percent of the federal poverty level, TMHP will process newborn transfer hospital claims even if the claim from the initial hospital stay has not been received. The hospital transfer must have occurred within 24 hours of the discharge date from the initial delivery hospital stay.

Transfer claims must be filed to TMHP using the admission type 1, 2, 3, or 5 in block 14; source of admission code 4 or 6 in block 15; and the actual date and time the client was admitted in block 12 of the UB-04 CMS-1450 paper claim form.

**Referto:** Subsection 6.19.1, “CHIP Perinatal Newborn Transfer Hospital Claims” in “Section 6: Claims Filing” (*Vol. 1, General Information*).

### 3.2.4 Newborn Care

Newborn care includes routine newborn care, routine screenings, and specialized nursery care for newborns with specific problems.

Hospital providers must provide all state-mandated newborn screenings and vaccinations.

**Referto:** Subsection 4.3.12.2.3, “Hearing Screening” in the *Children’s Services Handbook* (*Vol. 2, Provider Handbooks*).

Subsection 4.3.10, “Newborn Examination” in the *Children’s Services Handbook* (*Vol. 2, Provider Handbooks*).

#### 3.2.4.1 Newborn Eligibility

A child is deemed eligible for Texas Medicaid through 12 months of age if the mother is receiving Medicaid at the time of the child’s birth, and the mother continues to be eligible for Medicaid or would be eligible for Medicaid if she were pregnant. Therefore, it is not acceptable for a hospital to require a deposit for newborn care from a Medicaid client. The child’s eligibility ends if the mother relinquishes her parental rights or if it is determined that the child is no longer part of the mother’s household.

Hospitals must complete [Hospital Report \(Newborn Child or Children\) \(Form 7484\)](#) on the TMHP website at [www.tmhp.com](http://www.tmhp.com) to provide information about each child born to a mother who is eligible for Medicaid. If the newborn’s name is known, the name must be on the form.

**Important:** *If the newborn’s name is not known, the name may be left blank. The use of “Baby Boy” or “Baby Girl” delays the assignment of a number.*

The form must be completed by the hospital no later than five days after the child’s birth and sent to HHSC at the address identified on the form. The form should not be completed for stillbirths. Hospitals should duplicate the form as needed, because they are not supplied by HHSC or TMHP.

Hospitals that submit the birth certificate information using the Department of State Health Services (DSHS), Vital Statistics Unit (VSU) Texas Electronic Registrar for Birth software and the HHSC Form 7484, receive a rapid and efficient assignment of a newborn Medicaid identification number. This process expedites reimbursement to hospitals and other providers involved in newborn care including pharmacies that provide outpatient prescription benefits for medically-needy newborns.

For additional information about obtaining a newborn Medicaid identification number, providers may call 1-888-963-7111, Ext. 7368 or 1-512-458-7368.

After receiving a completed form, HHSC verifies the mother’s eligibility. Within 10 days of receiving the completed form, HHSC sends notices to the hospital, mother, caseworker, and attending physician, if identified. The notice includes the child’s Medicaid client number and the effective date of coverage. After the child has been added to the eligibility file, HHSC issues a Medicaid Identification (Form H3087).

Claims submitted for services provided to a newborn child who is eligible for Medicaid must be filed using the newborn child’s Medicaid client number.

Newborns who are from families with an income at or below 198 percent of the FPL and who receive CHIP perinatal benefits are assigned a client number for Texas Medicaid. This number is only assigned for reimbursement of the newborn's hospital facility charges (on a UB-04 CMS-1450 paper claim form) for the initial hospital stay after delivery. Claims for the newborn's hospital facility charges should be sent to TMHP.

### **3.2.5 Organ and Tissue Transplant Services**

#### **3.2.5.1 Transplant Facilities**

A facility that renders organ transplants must be a designated children's hospital or a facility in continuous compliance with the criteria set forth by the following:

- Organ Procurement and Transportation Network (OPTN)
- United Network for Organ Sharing (UNOS)
- National Marrow Donor Program (NMDP)

Facilities whose status of "good standing" has been suspended for any reason by the national credentialing bodies will not be reimbursed by Texas Medicaid for transplant services until the status of "good standing" is restored.

If a Medicaid client receives a transplant in an in-state or out-of-state facility that is not approved by Texas Medicaid, the client must be discharged from the facility to be considered to receive other medical and hospital benefits under Texas Medicaid. Coverage for other services needed as a result of complications of the transplant may be considered when medically necessary, reasonable, and federally allowable.

Texas Medicaid will not pay for routine post-transplant services for transplant patients in facilities that are not approved by Texas Medicaid.

##### **3.2.5.1.1 Out-of-state Transplant Facilities**

Out-of-state facilities may be reimbursed for transplants rendered to Texas Medicaid clients under certain conditions. In order for Texas Medicaid to reimburse for an out-of-state transplant, the out-of-state facility and professional providers must enroll as Texas Medicaid providers. The out-of-state transplant facilities must submit proof of transplant facility UNOS or NMDP certification as required by the Texas HHSC.

Prior authorization requests may be submitted to the TMHP Prior Authorization Department by mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients' responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

Physicians who are licensed by the state of Texas may request prior authorization for transplant services to be performed at out-of-state facilities when all of the following criteria are met:

- The required organ transplant is not available in Texas
- The facility is nationally recognized as a Center of Excellence
- The services are medically necessary, reasonable, and federally allowable
- The client is enrolled in Texas Medicaid

The pretransplant evaluation must be performed by a Texas facility. If it is medically necessary that the pretransplant evaluation be performed at the out-of-state facility as well, the prior authorization request for the out-of-state pretransplant evaluation must be submitted with a copy of the evaluation that was performed by the Texas facility. The documentation must support the need for an out-of-state pretransplant evaluation.

**Important:** *Texas Medicaid does not cover transplant services provided out-of-state that are available in Texas.*

### 3.2.5.2 Transplant Benefits and Limitations

If a transplant has been authorized as medically necessary by HHSC or its designee because of an emergent, life-threatening situation, a maximum of 30 days of inpatient hospital services during Title XIX spell of illness may be a benefit, beginning with the actual first day of the transplant. This benefit is in addition to covered inpatient hospital days provided before the actual first day of the transplant. This 30-day period is considered a separate inpatient hospital admission for reimbursement purposes, but is included under one hospital stay.

**Referto:** Subsection 3.1.2, “Spell of Illness” in this handbook for additional information about the 30-day spell of illness period.

Reimbursement for transplant is limited to an initial transplant as a lifetime benefit and one subsequent re-transplant because of rejection. Expenses incurred by a living donor will not be reimbursed.

All transplants require prior authorization. If a solid organ transplant is not prior authorized, services that are directly related to the transplant within the three-day pre-operative and six-week postoperative period will be denied, regardless of who provides the services. Services unrelated to the transplant surgery will be paid separately.

If the organ is rejected, the re-transplant requires its own prior authorization. If the re-transplant is not prior authorized, services that are directly related to the re-transplant within the three-day pre-operative and six-week postoperative period will be denied, regardless of who provides the services. Services unrelated to the re-transplant surgery will be paid separately.

**Note:** *The re-transplant is not included in the prior authorization for the initial transplant. The subsequent re-transplant must be prior authorized separately.*

**Referto:** Subsection 9.2.51, “Organ/Tissue Transplants” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

### 3.2.5.3 Prior Authorization for Organ and Transplant Services

All solid organ transplant services provided by facilities and professionals must be prior authorized. If a solid organ transplant is not prior authorized, services directly related to the transplant within the three day pre-operative and six-week postoperative period also will be denied, regardless of who provides the service, (e.g., laboratory services, status-post visits, and radiology services). Services unrelated to the transplant surgery will be paid separately.

A transplant request signed by a physician associated with transplant facilities is considered for prior authorization after the client has been evaluated and meets the guidelines of the institution’s transplant protocol.

**Referto:** Subsection 9.2.51, “Organ/Tissue Transplants” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

Prior authorization requests may be submitted to the TMHP Prior Authorization Department by mail, fax, or the electronic portal. Prescribing or ordering providers, dispensing providers, clients’ responsible adults, and clients may sign prior authorization forms and supporting documentation using electronic or wet signatures.

#### **3.2.5.4 Transplants for Medicare-Eligible Clients**

Transplants are also a benefit under the Medicare program; therefore, for clients eligible for Medicare and Medicaid, Texas Medicaid will pay only the deductible or coinsurance portion as applicable according to current payment guidelines. Prior authorization must be obtained for Medicaid-only clients; authorization will not be given for Medicare/Medicaid-eligible clients. Texas Medicaid will not pay for a transplant service denied by Medicare for a Medicare-eligible client.

#### **3.2.5.5 Experimental or Investigational Services**

Benefits are not available for any experimental or investigational services (including xenotransplantation and artificial/bioartificial liver transplants), supplies, or procedures.

#### **3.2.5.6 Reimbursement for Transplant Services**

The hospital diagnosis related group (DRG) payment for the transplant includes procurement of the organ and services associated with the organ procurement. Section 1138 of the Social Security Act defines the conditions of participation for institutions in the organ procurement program. Organ procurement costs are not reimbursed to a hospital that fails to meet the conditions of participation. The specific guidelines may be found in the appropriate areas of the Code of Federal Regulations (CFR) Title 42, Parts 405, 413, 441, 482, and 485. Documentation of organ procurement must be maintained in the hospital's medical record.

**Referto:** Subsection 2.2, "Fee-for-Service Reimbursement Methodology" in "Section 2: Texas Medicaid Fee-for-Service Reimbursement" (*Vol. 1, General Information*) for more information about reimbursement.

#### **3.2.5.7 Nonsolid Organ Transplants**

Under current Texas Medicaid policy, procedures are considered to be medically necessary and reasonable based on safety and efficacy, as demonstrated by scientific evidence and controlled by clinical studies.

Nonsolid organ transplants that are benefits of Texas Medicaid include:

- Allogeneic and autologous stem cell transplantation
- Allogeneic and autologous bone marrow transplantation
- Autologous islet cell transplantation

All nonsolid organ transplants require prior authorization and must be performed in a Texas facility that is a designated Children's Hospital or a facility in compliance with the criteria set forth by the Organ Procurement and Transportation Network (OPTN), the United Network for Organ Sharing (UNOS), or the National Marrow Donor Program (NMDP).

Experimental or investigational services, supplies, or procedures are not a benefit of Texas Medicaid.

##### **3.2.5.7.1 Inpatient Hospitalization**

For a nonsolid organ transplant that has been prior authorized for clients who are 21 years of age and older, a maximum of 30 days of inpatient hospital services during a Title XIX spell of illness is covered beginning with the actual first day of the transplant. This coverage is in addition to covered inpatient hospital days provided before the actual first day of the transplant. This 30-day period is considered a separate inpatient hospital admission for reimbursement purposes but is included under one DRG payment.

Autologous harvesting of stem cells (single or multiple sessions) are reimbursed to the facility when prior authorized by HHSC or its designee and performed in the outpatient facility setting. Harvesting of stem cells performed in a hospital inpatient setting is included in the DRG and is not reimbursed separately.

**Referto:** Subsection 9.2.51.9, “Nonsolid Organ Transplants” in the *Medical and Nursing Specialists, Physicians, and Physician Assistants Handbook (Vol. 2, Provider Handbooks)*.

### 3.3 Services, Benefits, Limitations, and Prior Authorization - Inpatient Rehabilitation Services

Inpatient rehabilitation services are a benefit of Texas Medicaid when provided as part of a general acute care inpatient admission, or with prior authorization for clients who are 20 years of age and younger in a freestanding rehabilitation facility.

Inpatient rehabilitation services in an acute care setting are included in the hospital DRG payment. All rehabilitation services are subject to Medicaid benefit limitations including the spell of illness. Exceptions to those limitations may be offered under CCP.

**Referto:** Subsection 1.7.18, “Physical, Occupational, and Speech Therapy Providers” in “Section 1: Provider Enrollment and Responsibilities” (*Vol. 1, General Information*).

Subsection 2.18, “Inpatient Rehabilitation Facility (Freestanding) (CCP)” in the *Children’s Services Handbook (Vol. 2, Provider Handbooks)*.

### 3.4 Services, Benefits, Limitations, and Prior Authorization - Inpatient Psychiatric Services

#### 3.4.1 Enrollment

Acute care hospitals and publicly-operated psychiatric facilities, i.e. state hospitals, must:

- Be certified by Medicare.
- Have a valid provider agreement with the Texas Health and Human Services Commission (HHSC).
- Complete the TMHP enrollment process.
